BUSINESS CORE (BUS)

Courses

BUS 4101 Base Camp Self and Team Training (0 Credits)
The Base Camp is the launch event for the new MS Management program. During the one-week Base Camp, students will become familiar with other members of their cohort, work on their team skills, get to know themselves better both as individuals as well as potential managers. In this week students will take a battery of tests to help them explore their strengths and limitations both individually and as members of a team. Students will work with the staff of the Daniels Career Center to establish their career goals, polish their job search portfolios, and create LinkedIn professional profiles. They will also recognize the importance of personal branding and professional projection in dealing with colleagues, other professionals, and potential employers.

BUS 4102 Base Camp Program Launch Team Challenge (0 Credits)
The Base Camp is the launch event for the new MS Management program. During the one-week Base Camp, students will work in teams to create business ideas, develop the ideas, prepare a business plan, and professionally present and pitch to a panel of judges consisting of academics and business professionals. Teams will compete with each other in the Base Camp Launch Challenge.

BUS 4310 Business Communication for Accounting Professionals (4 Credits)
This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and teambuilding.

BUS 4330 International Business (2 Credits)

BUS 4444 Global Bus, Governance & CSR (4 Credits)
In an increasingly globalized world, civil society, states and businesses are trying to discern how to govern business conduct across the borders of nation-states. Many of the issues our society faces today—global financial crises, environmental degradation, and corruption, to name a few—are impossible to tackle within a given country. Instead, these issues require collaboration and coordination across a variety of actors spread around the globe. Within this framework, businesses are aware of increased pressure to behave responsibly and adopt a corporate social responsibility (CSR) approach to their conduct. Yet, businesses are unsure how to integrate these goals into their business strategy and engage meaningfully with stakeholders. Likewise, governments recognize the importance of having business at the table, but do not have a clear understanding of how to best engage with the private sector. The response to this conundrum is a focus on global governance, which refers broadly to the way in which global affairs are managed. After a brief overview of economic trends and trajectories around the globe, the course will focus on global governance as a mechanism for change. The class will first explore the opportunities and shortcomings of global governance efforts. The class will build on this scholarship by discussing the role business plays in global governance mechanisms. As society has become aware of, and is acutely concerned with, business conduct, the role of the manager and business strategy in these realms has also changed. Students will analyze these trends and study their implications for government, business, or civil society strategy and practice. The final portion of the course will focus on specific issue areas, including: human rights, labor standards, the natural environment, corruption, and microfinance.

BUS 4445 International Business: Strategy and Practice (4 Credits)
This course focuses on applied issues in international business. Students will learn to think strategically about international business issues, and will in turn be able to apply that thinking to best practices. The following subject areas will be covered: country selection, entry mode theory, exporting, born-global businesses, organizational structures internationally, negotiation, consumption, culture and demand. Other potential topics include global supply chain management/sourcing, country of origin effects, etc. This course focuses on applied issues in international business. Students will learn to think strategically about international business issues, and will in turn be able to apply that thinking to best practices. The following subject areas will be covered: country selection, entry mode theory, exporting, born-global businesses, organizational structures internationally, negotiation, consumption, culture and demand. Other potential topics include global supply chain management/sourcing, country of origin effects, etc.

BUS 4600 Professional MBA Capstone Project (4 Credits)
The Capstone Project enables the practical application of organizational leadership and management competencies necessary to demonstrate mastery of the core content of the Professional MBA program and provide students with a material edge in the development of their professional capabilities. The capstone Project effectively integrates Daniels’ desired learning outcomes and professional work experiences and applies them to "real-world" business challenges, problems and dilemmas, to support the development and presentation of proposed solutions for the client enterprise.

BUS 4610 The Essence of Enterprise (4 Credits)
Today’s business environment is increasingly characterized by complex questions without clear black and white answers that span well beyond the historically narrow focus on the enterprise. Managers of tomorrow must be equipped with analytical and conceptual skills that allow them to see connections between social and environmental challenges and opportunities from local to global levels and how they interact and influence enterprise level value creation and innovation in a responsible manner. This course provides a perspective, i.e. worldview, that appropriately places the enterprise in the context of an interconnected world where success, organizationally and personally, is determined by how well one applies the necessary functional skills and organizational understanding to opportunities and challenges framed by globalization, both shared and disparate values, and the need for creativity, innovation, and entrepreneurial spirit. This course draws on the history of business practice and leadership to provide a foundation for personal self-discovery and professional direction.
BUS 4615 Leading at the Edge (2 Credits)
Connects values, globalization, and innovation through a mix of classroom and outdoor experiential learning formats. The course is a two credit hour complement to The Essence of Enterprise course. Using the metaphor of the 10th Mountain Division, the course builds a foundation for learning at Daniels through introductory looks at leadership, team building, and creative problem solving. Through metaphor and experience, the course bonds the cohorts to each other and enhance self confidence to succeed under difficult and changing conditions. The 10th Mountain Division was created out of a global crisis and trained at Camp Hale Colorado, located between Leadville and Vail, during the 1940s. This experience resulted in fourteen patents, including predecessors to the snow cat, snowmobile, and various other forms of outdoor equipment. Following WWII, members of the 10th were responsible for building the country’s most famous ski resorts, such as Aspen and Vail, along with the 10th Mountain Hut System. Individual members became successful businessmen, social entrepreneurs, and civil servants forming companies such as NIKE, leading organizations like the Sierra Club, and founding the Colorado Outdoor Education Center (where training for this course takes place). The group is renowned for exemplary leadership, passion, team dynamics, innovation, and ethics within a global environment.

BUS 4620 Ethics for the 21st Century Professional (4 Credits)
A fundamental purpose is to engage students in ongoing reflection and dialogue about their responsibilities as managers and leaders. Of particular emphasis are the ethical, professional and social responsibilities of managers and leaders, especially as it relates to numerous stakeholders and communities. This course focuses on the idea of "community" and the social relationships of managers and business organizations in their communities. Roles and responsibilities of managers and business firms are examined by analyzing a variety of issues that managers will face during their careers. These specific issues will be examined in terms of their legal, public policy, and ethical dimensions. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that may emerge in their business careers. Cross-listed with ACTG 4620.

BUS 4630 Creating Sustainable Enterprises (4 Credits)
A sustainable enterprise is defined as any human endeavor with integrity in three interconnected dimensions (environmental, cultural, and economic) and whose collective actions meet the needs of the enterprise and its stakeholders today without compromising the ability of future generations to meet their needs. The fundamental purpose of this course is to help prepare students for careers in which success requires a worldview that extends beyond the enterprise level in order for managers to create sustainable cultural, social, and financial value for the organization and society in a responsible manner.

BUS 4635 Global Enterprise Challenges (2 Credits)
As students complete the integration of material from the Compass sequence, this class provides an opportunity for the students to extensively apply the material through: case analysis, presentation, critique of other presentations, and integration of MBA Compass material and first year MBA Core material as appropriate.

BUS 4640 Innovation Design & Execution (4 Credits)
In the last century, the technologies of the industrial age (telegraph, railroads, electricity, radio, telephone, television, automobiles, airplanes, computers) have dramatically altered not only the way business is conducted, but the way we live and learn. These technologies have also enabled undesirable and unintended consequences: urban sprawl, global warming, terrorism, weapons of mass destruction, stress, obesity. Where is technology taking us? In this course, students look at innovation, creativity, entrepreneurship and design, and the role each can play in creating a better business world, a business world less driven by science fiction than inspired by social fiction, a business world which begins to shift from an industrial age of ever more encompassing technology to a creative economic environment based less on stuff and more on people and their needs.

BUS 4700 Special Topics in Business (1-4 Credits)
BUS 4701 Special Topics in Business (1-6 Credits)
BUS 4702 Special Topics in Business (1-6 Credits)
BUS 4703 Special Topics in Business (1-6 Credits)
BUS 4704 Topics in Business (1-6 Credits)
BUS 4705 Topics in Business (1-6 Credits)
BUS 4802 Executing in a PM Enterprise (4 Credits)
This course is the second course in a three-part required series. Pre-requisite: Must be a Lockheed employee.
