MALS 4020 Graduate Research and Writing (4 Credits)
Critical thinking, accomplished through solid research and clear writing, is paramount to success in one’s academic and professional pursuits. This course enables students to develop clear analytic and rhetorical writing skills at the graduate level; these skills are utilized throughout the curriculum in all degree areas. Each student organizes and produces a focused paper on a topic related to the student’s degree field that contains a continuing argument centered around a clear thesis statement supported by the work of experts. Sources are evaluated for validity and incorporated in the paper with regard to the absence of plagiarism and proper Turabian author-date documentation. Focusing on the thesis statement, students research and analyze current data and trends in the field, build a rhetorical argument, and draw conclusions. The course stresses editing and revision for mechanics, style, and language. It is designed to improve writing and communication skills for use in academic and professional settings. This course is required of all degree seeking students and should be taken in the first two quarter of enrollment. A final grade of B or better must be earned in this course to meet degree requirements.

MALS 4050 World Visual & Performance Art (4 Credits)
This course draws upon global artistic traditions of visual art and performance in conveying how human beings express ideas, themes, and emotions. Students view and experience artistic forms and movements throughout history and from a variety of traditions across the world, critically analyzing art movements and forms across time. They synthesize ideas across cultures, traditions, and types of creative expression and make connections and distinctions between genres and art forms. A different, rich, artistic theme is the focus each time the course is taught.

MALS 4070 The Writing Life: Concepts, Practices, and Professionalism (4 Credits)
This course aims to provide aspiring writers a basic knowledge of the creative and professional tools they will need to succeed, whatever their individual goals or life situation. This course tackles questions and challenges common to all writers at one time or another. Primary considerations include: What exactly does it mean to be a writer? What are my motivations for wanting to write? How can I identify and prioritize writing projects? How do I move my writing projects forward from concept to completion? These primary challenges require writers to narrow their creative focus and to cultivate habits of thought and behavior that sustain creative efforts in a world full of distractions, obligations, and competing claims on their time.

MALS 4080 Literary Genres for Writers: Drama, Fiction, Creative Nonfiction, Poetry (4 Credits)
This course deals with the four core literary genres: Drama, Fiction, Creative Nonfiction, and Poetry. These genres are distinguished from one another in two ways: first, by the relative weight each genre gives to the key cross-genre elements, and secondly, by each genre’s distinctive approach to structure and form. Within each genre, subgenres have evolved over time, each recognizable by particular patterns, each playing by a distinct set of rules. Whether writing within or across or even against those rules, writers need to understand how literary genres work in order to write effectively. This course aims to foster that understanding and prepare students to shape their writing in ways that align with their creative vision.

MALS 4090 Writing for the Stage: Fundamentals of Writing Drama (4 Credits)
This course uses readings of dramatic texts, brief lectures, writing assignments, and the performance of those writings to develop the skills required to write for the stage. Students learn the essentials of drama, including the design of effective plots, the creation of vivid characters, and the writing of performable dialogue. Students also explore the effects of drama’s necessarily collaborative process and varieties of stagecraft on the way playwrights shape their texts. Examples illustrate successful uses of key dramatic techniques and help students explore various approaches to expressing themselves fully and clearly through a range of open-ended exercises. Students also develop practical critiquing skills with the aim of helping themselves and their classmates create compelling plays that appeal to both theater professionals and theatrical audiences.

MALS 4120 Writing Non-Fiction (4 Credits)
This course concentrates on the craft of writing nonfiction, which includes genres and approaches such as memoir, the personal essay, narrative nonfiction, travel writing, humor, criticism, and experimental forms. Class discussions involve some lecture but are structured more as a workshop. Students learn about writing and write about learning. Members of the class are expected to express their ideas about the craft and to workshop their writing. The class is a safe place for writers to share their work with others and to learn from one another.

MALS 4130 Fiction Fundamentals (4 Credits)
Effective, powerful writing requires skills that can be acquired. This course is a combination of workshops and lectures focusing on the interplay of plot, characterization, and pacing. Students learn to turn personal experience into story structure and tap the psychological well-spring which enables writers to sustain momentum. The instructor utilizes literary examples to illustrate successful uses of these concepts. Students are invited to bring material at any stage of development to the first class. During the course, development and critique of each student’s material is encouraged.

MALS 4150 Poetry: The Voice Within (4 Credits)
This course is a combination of readings in poetry and poetics, brief lectures, and open discussions focused on the interplay of image, metaphor, rhythm, emotions and ideas in the expressive form of writing called poetry. Students learn to tap the imaginative sources that all creative writing springs from and flow those energies into poetic form. Examples illustrate successful uses of key poetic concepts and help students explore various approaches to expressing themselves fully and clearly through a range of open-ended exercises. Students develop practical critiquing skills with the aim of helping themselves and their classmates write with greater subtlety and power.
MALD 4163 Writing the Screenplay (4 Credits)
Screenwriting is the art of telling a story in images. This class focuses on elements of form and structure, with particular emphasis on format, character development, plot, and dialogue. Movies are studied to illustrate genre, fixed and fluid characters, tragic flaw, the dynamic of relationships, development of protagonist and antagonist, and other screen elements. Numerous in-class exercises, discussions, workshops, and screenings enable students to find the dramatic essence of stories, write a detailed film synopsis, treatment, and the first act of a feature-length screenplay.

MALD 4175 Literary Translation (4 Credits)
Translation is essential for a genuine exchange of ideas between people of different linguistic and cultural backgrounds. Besides being an essential service for cultural understanding, literary translation is also a form of creative writing. This course includes readings in the history, theory, and practice of literary translation, along with analysis of sample translations by leading translators. Students will also practice translation of literary texts, including poetry and short works of fiction and nonfiction. While increasing the student’s awareness of the art of literary translation as an end in itself, the course also demonstrates translation’s value in enriching a writer’s development in his or her own work. Students should have basic skills in the source language of their choice, but full fluency is not required.

MALD 4190 The Writer’s Workshop (4 Credits)
A writer writes" is the universal mantra of the writing life, but one of the critical steps in developing a work in progress is getting constructive feedback. Unfortunately, all too often, a writer ends up disappointed because the feedback received is superficial, too polite, or little more than proofreading. This course teaches students to workshop in a meaningful way, responding to content, focus, coherence, and organizational issues. Students learn to elicit more feedback from their workshop colleagues, demonstrating the relationship between reader and writer. The class explores a variety of genres, and each student produces short exercises and longer projects that demonstrate a grasp of various aspects of the writing craft. Periodically, guest authors with different writing specialties join the class to discuss the writing experience and shed light on the workshop process.

MALD 4240 Memoir & Personal Essay (4 Credits)
Personal essays and memoirs are forms of writing that attempt to arrive at universal truths through self-exploration. Students examine the work of several modern essayists and analyze a literary memoir. Through course readings, writing, workshop, and discussions, students analyze and apply what makes this writing work. By incorporating literary elements such as conflict, characterization, dramatic structure, and transformation, students turn their personal experiences into meaningful nonfiction narratives. As V.S. Pritchett said of the memoir, "It’s all in the art. You get no credit for living." Personal essays need not deal with the author’s biography at all, only with his or her experience in a limited way. This course combines reading, writing, analysis, and discussion facilitation.

MALD 4260 Writing the Short Story (4 Credits)
The dramatic elements of the short story are distinct from any other form of fiction. This workshop is for writers who plan to seriously study the form of the contemporary short story, and to apply their learning to their own projects. Students focus equally on reading published works and writing/revising an original short story, as well as discussing aspects of publishing. Weekly writing exercises, readings, and workshops of student stories are combined to provide the most direct, effective training in this dynamic form. Prerequisite: MALD 4130 (Fiction Fundamentals).

MALD 4270 Writing & Healing (4 Credits)
Many writers attest to the emotional, spiritual, and even physical benefits of writing. In this course, we explore a variety of ways written expression can help us navigate the human journey. Students learn leading theoretical models of journal and poetry therapy (interactive bibliotherapy), assess poems for use in personal growth contexts, and participate in experiential discussions and writing exercises. Students focus on the writing and healing process rather than their own self-explorations of healing through writing. Students submit a portfolio of reflection writings, as well as complete a final paper on a writing topic that intersects with a personal growth experience or interest.

MALD 4280 Funding the Arts and Program Development (4 Credits)
Arts organizations must always consider funding when developing programming. Organizational strategic planning is analyzed, and fundraising is examined as a major component of that planning. Various tools and techniques for fundraising, including communication and planning skills, are analyzed and applied to case studies. Students explore different forms of fundraising and their implications for programming, which may include private or public grants, governmental funding, fundraising events, and private donations.

MALD 4281 Event Planning (4 Credits)
Events and festivals play a large role in promoting the arts and developing links between the arts community and wider audiences and patrons. Students address various topics associated with event and festival planning and management, such as program development, marketing and audience development, venue considerations, and building partnerships. Students create an event program and plan.

MALD 4283 Marketing the Arts: Audience Development and Retention (4 Credits)
This course provides a strategic approach to audience and markets. Students study basic principles of marketing and audience identification. They build strategic marketing plans that are cohesive with the mission and programming of the organization, utilizing various forms of media. Audience characteristics are examined from various perspectives, and theories of creating commitment to the arts are studied. Students create an arts marketing plan for an organization or event.

MALD 4284 Arts and Culture Entrepreneurship (4 Credits)
In any sector of the Arts and Culture field, whether government, non-profit, or for profit, it is essential to be able to develop programs and/or organizations from conception through implementation and assessment. This development requires the clear communication of what is needed to develop, implement, and sustain this plan over time. In this course, students take an entrepreneurial approach to develop a program or organization in the arts and culture field. Students develop and present a comprehensive business plan to define, map, structure, and assess the program/organization in either the non-profit or for profit sector.
MAL 4440 Artists on Art (4 Credits)
This course explores the professional life of the artist, including how artists conceive of a vision for their work, organize their time and space, and communicate about their art. Students read significant works (diaries, correspondence, and essays) by and about artists, and have opportunities to interact with working artists. Students keep and produce a journal to explore ideas, plan projects, and describe methods and media to be used in their current or proposed work.

MAL 4444 Emerging Trends in Art (4 Credits)
This course focuses on what is “going on” in the arts: contemporary trends, what’s hot, what’s not, and why. Selected themes in modern and contemporary art are reviewed to help students discover how their art will fit into or counter emerging trends in art. The latest cutting edge developments in art are explored, and students are challenged to describe the place and purpose for their work.

MAL 4470 Arts and Culture: History, Context, and Trends (4 Credits)
This course examines the significant and growing economic, social, and educational impact of the arts in today’s rapidly changing environment. Discussion of current and historical trends in the visual, performing, literary, and media arts provide a context for practical applications in the field.

MAL 4480 Arts and Culture: Best Practices and Practical Skills (4 Credits)
This course provides a comprehensive overview of nonprofit best practices with specific applications to arts and culture organizations. Governance, budget planning and management, organizational development, advocacy, marketing and fundraising, community and rural development, event planning and facilities management are discussed using exemplary and diverse arts organizations as case studies.

MAL 4490 Cultural Participation and Program Planning (4 Credits)
In this course, students explore changing attitudes and participation in the arts and the need for innovative approaches to engage audiences. Audience development and involvement is explored, especially in terms of arts education. The connection between cultural participation and program planning is closely examined. Various models are discussed on a theoretical level, and diverse arts organizations serve as case studies for practical applications.

MAL 4605 Sustainable Development (4 Credits)
Economic development, ecology and democracy are three volatile forces in the world today. Players in the tension between them include nations, large corporations, and a groundswell of farmers, workers, and ordinary people. This course looks at the model of sustainable development as a way for countries to make long-term and ethical decisions about how to use resources: earth, water, air, energy, as well as the most important resource, people. Contrasts will be drawn between Western economies humming along in the Digital Age and the emerging world attempting the leap from an agricultural paradigm to industrialization, while trying to avoid falling into the Malthus trap of overpopulation. Students will develop an understanding of the complex, intertwined relationship between economic growth, environment and humanity.

MAL 4701 Topics in Literature (4 Credits)
The content of this course varies each term. The topics may include time-sensitive issues in the area of literature, elective courses that are not scheduled regularly during the course of the year, or advanced inquiry into core-course subjects. Each time the course is offered, the specific content is announced in the quarterly course schedule. Depending on the subject matter, students may be required to have completed prerequisite courses.

MAL 4702 Topics in Writing (1-4 Credits)
The content of this course varies each time it is offered. The topics may include time-sensitive issues in the areas of writing and literature, elective courses that are not scheduled regularly during the course of the year, or advanced inquiry into core-course subjects. Each time the course is offered, the specific content is announced in the quarterly course schedule. Depending on the subject matter, students may be required to have completed prerequisite courses.

MAL 4703 Topics in Film (1-5 Credits)
The content of this course varies each time it is offered. The topics may include time-sensitive issues from the film industry, elective courses that are not scheduled regularly during the course of the year, or advanced inquiry into core-course subjects. Each time the course is offered, the specific content is announced in the quarterly course schedule. Depending on the subject matter, students may be required to have completed prerequisite courses.

MAL 4704 Topics in Art (1-5 Credits)
The content of this course varies each time it is offered. The topics may include time-sensitive issues from the film industry, elective courses that are not scheduled regularly during the course of the year, or advanced inquiry into core-course subjects. Each time the course is offered, the specific content is announced in the quarterly course schedule. Depending on the subject matter, students may be required to have completed prerequisite courses.

MAL 4705 Topics in Liberal Studies (1-5 Credits)
The content of this course varies each time it is offered. The topics may include time-sensitive issues from the film industry, elective courses that are not scheduled regularly during the course of the year, or advanced inquiry into core-course subjects. Each time the course is offered, the specific content is announced in the quarterly course schedule. Depending on the subject matter, students may be required to have completed prerequisite courses.
MAL 4740 Natural Science and Literature (4 Credits)
The natural sciences have inspired some of the most entertaining, creative and provocative works in international literature. Writers like Thoreau, Gould, McPhee, Kingsolver and others have explored some of the most complex theories that explain the majesty of the physical world. Students read and analyze many works in this popular genre. Specifically, the class looks at how these writers use story to shape their work, how they introduce and explain multifaceted theories for the layperson, and how recent scientific theory has shaped our culture. Students also have an opportunity to write about scientific subjects in their own voice.

MAL 4745 Children's Literature (4 Credits)
This course is an introductory study of all levels of children's literature for the student who is interested in literature, the student who is planning to teach, and for those who are or will be parents. This course introduces students to types, genres, and varieties of literature for reading to children as well as reading by children. The main focus is to remember the joys and wonders of reading as a child and young adult, and to approach the literature selected not as "just a kid's book," but as literature with real quality standards and room for critical and analytical discussions.

MAL 4750 Literature to Film (4 Credits)
In this course, we examine the adaptation of literary works into films. We closely study selected modern literary works and the film interpretations of each work. Focusing on the transition from one narrative form to another, the course aims at enhancing the critical skill of students as well as their creative ability. Therefore, we also have mini scripting workshops as a way of imaginatively highlighting the sort of considerations that go into the making of the film script.

MAL 4755 World Literature (4 Credits)
In this course, students take a literary tour of the world in 70 days. Stops along the way include classic works of the 20th-Century from Africa, Asia, Europe, and Latin America - fiction, nonfiction, and poetry. As with any whirlwind tour, students learn a little about "the other" and a lot about themselves. An emphasis can help us see our own literary and cultural assumptions with new eyes. Students are also asked to reflect on thematic relationships and differences among texts from different times and places.

MAL 4880 From Romance to Realism (4 Credits)
Nineteenth-century Britain witnessed wide-scale social, political, and cultural upheaval: the French Revolution, the expansion of empire, naval dominance, massive political reforms, and ongoing debate about women. This course explores the great writings of the period, examining the transition from the Romanticism of the early part of the century, characterized by the writing of William Wordsworth, S. T. Coleridge, Jane Austen, and Sir Walter Scott, to the realism of the later century employed by such writers as Charles Dickens, George Eliot, Robert Browning, and Alfred, Lord Tennyson. We explore the tensions, gaps, and overlaps between these two categories - Romanticism and realism - and their place in the writing of the authors whose works are frequently labeled as Romantic or realist. The course emphasizes both the literature itself and the cultural forces from which the literature developed.

MAL 4901 Capstone Project (4 Credits)
The Capstone Project provides students the opportunity to research a topic, problem, or issue within their field of study, and work individually with a Capstone advisor. Similar in weight to a thesis, but more flexible, this final project will synthesize and apply core concepts acquired from the program. The student will select an appropriate Capstone advisor who is knowledgeable in the field of study to work closely with and whom can guide the research project. Evaluation will be focused on the quality and professionalism of applied research and writing; critical and creative thinking; problem-solving skills; knowledge of research design, method, and implementation; and contribution to the field and topic of study. Please see the Capstone Guidelines for additional details. Prerequisites: A Capstone Proposal that has been approved by both the Capstone Advisor and the Academic Director, unconditional acceptance as a degree candidate, completion of at least 40 quarter-hours (including all core courses) with a cumulative GPA of 3.0 or better. A final grade of B- or better is required to pass.

MAL 4902 Capstone Seminar (4 Credits)
The Capstone Seminar is a graduate seminar in which students utilize the knowledge and skills gained through the degree program to create a culminating work that critically addresses a problem in their degree field of study. The students produce a Capstone of 7000-8000 words that presents a position on a relevant problem, supports the position with professional and academic literature, analyzes and tests the proposed solution, and discusses the findings as related to the field of study. The seminar is dependent upon quality, collegial discussion, and feedback of students' research and work products, under the facilitation of a faculty member. The course structure guides the students through the process of independent, secondary research and writing of a Capstone. No primary research is allowed. Students generate the course content through ongoing discussion and peer feedback on the Capstone process and individual topic areas under investigation. Students professionally and academically communicate through written work and oral presentation. Students must have: Unconditional acceptance as a degree candidate, completion of at least 40 quarter-hours (including all core courses) with a cumulative GPA of 3.0 or better. A final grade of B- or better is required in this course to meet degree requirements. Students must complete the Capstone Seminar in one quarter; no incomplete grades are assigned.
MAL 4903 Creative Capstone Seminar (4 Credits)
The Creative Capstone Seminar is a graduate seminar in which students utilize the knowledge and skills gained through the degree program to create a culminating creative work and a paper that critically addresses its context in the degree field of study. In the critical paper, the student presents writing and content motivations of the creative work, supports those motivations with professional and academic work in the field, analyzes the creative work in the context of the writing and literature fields, and reflects upon the creative process. The seminar is dependent upon collegial discussion of student writing process and drafts under the facilitation of a faculty member, and it is governed by the quality of participation and contributions of the students. The course structure, facilitated by the faculty member, guides the students through the creative process and writing of an analytical capstone paper; the instructor provides intensive feedback on the capstone process and papers. Students are responsible for generating the course content through ongoing discussion of and peer feedback on the capstone process and individual work, as well as the analysis and contextualization of focused student creative work and papers within the wider degree field of study. Students will professionally and academically communicate their creations and findings through written work and oral presentation. Students must have: Unconditional acceptance as a degree candidate, completion of at least 40 quarter-hours (including all core courses) with a cumulative GPA of 3.0 or better. A final grade of B- or better is required in this course to meet degree requirements. Students must complete the Capstone Seminar in one quarter; no incomplete grades are assigned.

MAL 4904 Interdisciplinary Capstone Seminar (4 Credits)
The Interdisciplinary Capstone Seminar is a graduate seminar in which students utilize the knowledge and skills gained through the degree program to create a culminating work that critically addresses a problem or issue in the degree field of study. Members of the class will include students from various UCOL programs, representing multiple topics of study. On-campus offerings of this course include required online components. The student produces a paper of 7000-8000 words that presents a position on a relevant problem or issue, supports the position with professional and academic work in the field, analyzes and tests the paper position, and discusses the role of the findings within the field of study. Students professionally and academically communicate their findings through written work and oral presentations. The seminar is dependent upon active and collegial discussion and critique of student research and work under the facilitation of a faculty member, and it is governed by the quality of participation and contributions of the students. Students must have: Unconditional acceptance as a degree candidate, completion of at least 40 quarter-hours (including all core courses) with a cumulative GPA of 3.0 or better. A final grade of B- or better is required in this course to meet degree requirements. Students must complete the Capstone Seminar in one quarter; no incomplete grades are assigned.

MAL 4905 Graduate Social Research Methods (4 Credits)
Graduate Social Research Methods is an exploration of the methods and purposes of social science research from the perspective of the researcher as well as that of the informed professional and consumer of information. Students will learn about the process of research, including the development of research questions, the purpose of various social science research methods, the role of professional ethics, and general approaches to the analysis and interpretation of data. Students will develop the ability to read and critique basic social science research articles and to implement simple research designs. Students will develop and write a research proposal around a specific research question informed by a review of the literature. Technical requirements include the ability to read and modify Microsoft Excel documents. This course is required of all degree-seeking students and should be taken in the first three quarters of enrollment.

MAL 4915 Research in Humanities (4 Credits)
Graduate Social Research Methods is an exploration of the methods and purposes of social science research from the perspective of the researcher as well as that of the informed professional and consumer of information. Students will learn about the process of research, including the development of research questions, the purpose of various social science research methods, the role of professional ethics, and general approaches to the analysis and interpretation of data. Students will develop the ability to read and critique basic social science research articles and to implement simple research designs. Students will develop and write a research proposal around a specific research question informed by a review of the literature. Technical requirements include the ability to read and modify Microsoft Excel documents. This course is required of all degree-seeking students and should be taken in the first three quarters of enrollment.

MAL 4920 Portfolio Capstone (4 Credits)
The Portfolio Capstone course provides students the opportunity to reflect upon the work they have done throughout their graduate studies at University College and synthesize their learning. Students in the Portfolio Capstone produce deliverables that include: (1) a thorough annotation of their portfolio, a process requiring critical and creative thinking about their educational experience, and (2) a pinnacle project that identifies, analyzes, and elaborates significant themes in their program experience, evaluates their accomplishments, connects their coursework to their professional goals, and assesses those goals in the context of their chosen field. Students must complete the Portfolio Capstone with a grade of B or better.

MAL 4980 Internship (1-4 Credits)
The internship is designed to offer students a purposeful experience in a practical, industry-related setting. The internship is an individualized learning experience and a training plan is created for each student in conjunction with the internship site to provide experiences related to the skills and knowledge covered in the certificate and master’s programs.

MAL 4991 Independent Study (1-8 Credits)
This is an advanced course for students wishing to pursue an independent course of study. The student must be accepted in a degree program, have earned a grade point average of 3.0 or better, obtained the approval of the department director, and have completed the Independent Study form and filed the form with all appropriate offices before registering for the independent study. Independent Study is offered only on a credit basis and only for degree candidates.
MALS 4992 Directed Study (1-8 Credits)
This is an advanced course for students wishing to pursue a directed course of study. The student must be accepted in a degree program, have earned a grade point average of 3.0 or better, obtained the approval of the department director, and have completed the Independent Study form and filed the form with all appropriate offices before registering for the independent study. Directed Study is offered only on a for-credit basis.
