Graduate

Select from more than 120 graduate degree programs that will challenge, inspire and prepare you to achieve your highest academic and professional goals. DU graduate programs combine rigorous study with critical thinking, collaboration and applied learning experiences that will enable you to expand your skills, deepen your expertise and apply your knowledge to benefit you and the world.
About DU

The University of Denver

Founded in 1864, the University of Denver is an independent coeducational institution located in a residential neighborhood eight miles southeast of downtown Denver. Colleges, schools and divisions of the University include the following:

- Colorado Women's College
- Daniel Felix Ritchie School of Engineering and Computer Science
- Daniels College of Business
- Divisions of Arts, Humanities and Social Sciences
- Division of Natural Sciences and Mathematics
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Morgridge College of Education
- Sturm College of Law
- University College

Students

University of Denver students come from all 50 states, in addition to the District of Columbia and Territory of Guam, and from 76 different countries. Enrollment is approximately 11,800: 5,500 undergraduates and 6,300 graduate students.

Equal Opportunity and Non-Discrimination Policy

The University of Denver is an Equal Opportunity Institution. It is the policy of the University not to discriminate in the admission of students, in the provision of services, or in employment on the basis of race, ethnicity, color, religion, sex, national origin, age, marital status, veteran status, sexual orientation, gender identity, gender expression, genetic information, or disability. The University prohibits all discrimination, harassment and retaliation, and complies with all applicable federal, state and local laws, regulations and Executive Orders.

Inquiries concerning allegations of discrimination based on any of the above factors may be referred to the Office of Equal Opportunity:

University of Denver
Office of Equal Opportunity
Mary Reed Building, Room 422
2199 S. University Blvd.
Denver, CO 80208
Phone: 303-871-7436
Fax: 303-871-3656

For more information, please call the above number or see the website at http://www.du.edu/deo/. You also may contact the Office of Equal Opportunity with concerns regarding determinations of religious or disability accommodations and/or issues about access.

Board of Trustees
Douglas G. Scrivner
Chairman
The Office of Graduate Studies (OGS) provides leadership and support for graduate education and advocates on behalf of graduate students and programs at the University of Denver. Under the direction of the Associate Provost for Graduate Studies, the OGS partners with deans, academic units and University governance to ensure excellence and integrity in educational programs and curricula. The OGS facilitates the development of new degree programs at the graduate level, oversees processes to ensure the quality of graduate and credential programs, acts as an advisory resource to programs initiating or transforming their academic programs, and ensures the University is in compliance with all federal, state, and university policies related to graduate education. On behalf of the Provost and working in consultation with the Graduate Council, the office is responsible for the authorship and oversight of graduate policy.

Graduate Council

The Associate Provost and the Graduate Council are charged with the responsibility of reviewing, formulating, and implementing policy concerning graduate education.

Composition

Council membership includes the Associate Provost for Graduate Studies, all of the academic deans from units with graduate programs, an elected faculty representative from each division, two elected representatives from the Faculty Senate and two representatives of the Graduate Student Government (GSG).
Administrators such as the Registrar, the Dean of the Library, the Vice Chancellor for University Technology Services, the Chair of the Undergraduate Council, the Associate Provost for Research and the Vice Provost for Internationalization serve *ex officio* and participate in the Committee’s proceedings as voting members.

**Responsibilities**

The Graduate Council shall oversee the configuration of graduate degree and certificate programs, monitor the degree to which these programs further the University’s mission, avoid unwarranted program duplication, and establish, monitor and maintain academic standards across the graduate curricula. The Council shall recommend policies including, but not limited to, the structure and quality of the graduate curricula; procedures concerning graduate student appeals; and policies governing the initiation and termination of graduate degree programs.

**Academic Units**

Graduate Studies at the University of Denver includes programs in the following academic units:

- Arts and Humanities Division
- Morgridge College of Education
- Daniels College of Business
- DU-Illiff Joint PhD Program
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Graduate Tax Program
- Natural Sciences and Mathematics Division
- Daniel Felix Ritchie School of Engineering and Computer Science
- Social Sciences Division
- Sturm College of Law
- University College
Accreditation

Higher Learning Commission

The University of Denver and its programs are accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools (HLC) and by other major accrediting agencies.

About Graduate Policy

Graduate Policy Mission and Scope
The policy development mission of the Office of Graduate Studies (OGS) is to provide an authoritative, accessible and current repository for University and campus policies that impact the members of the University community across all graduate schools and programs. University policies have broad application throughout the University to help ensure coordinated compliance with applicable laws and regulations, promote operational efficiency, or reduce institutional risk. Individual schools and departments reserve the right to maintain policies particular to their units. However, unit-specific policies do not override university-wide policies. Policies duplicated on other websites or in print may not be the most current version. OGS recommends that graduate programs share content from the Graduate Policy Manual rather than creating their own pages with University policies. This will help ensure that everyone is referencing the most current versions of University policies.

Student Responsibility for Bulletin Information
Applicants to the University of Denver as well as admitted and enrolled students are held to the standards and procedures set forth in the University bulletin. Students are responsible for staying informed of the University’s policies and procedures.

Modifications to the Policy in the Bulletin
The University of Denver reserves the right to make changes in the regulations, rules, fees or other aspects of this University bulletin without advance notice.

Changes within academic units, the University, or applicable law (or other factors) may require modifications to this Graduate Policy Manual. Additionally, any unit or member of the Graduate Council may propose a change in policy by submitting a petition to the Associate Provost for Graduate Studies.

Graduate Academic Unit-Level Adherence to and Implementation of University Policy
Each graduate unit must examine the Graduate Policy Manual and identify unit-specific policies or practices that conflict with the manual. Units shall adjust their practices to conform to University policy. If a unit believes it is necessary to maintain policies or practices that diverge from University policy, it shall petition the Associate Provost for Graduate Studies for an exception to policy.

Note: Student Services Offices
In the Graduate Policy and Procedures, the student services offices for each college, school and division are referenced the following:

- Office of Graduate Studies for Arts and Humanities & Social Sciences (AHSS) , Morgridge College of Education (MCE), Graduate School of Professional Psychology (GSPP), Josef Korbel School of International Studies (JKSIS) (Admissions only), Natural Sciences and Mathematics (NSM), Daniel Felix Ritchie School of Engineering and Computer Science (SECS), DU-Iliff Joint PhD Program (DU-Iliff)
- Student Affairs, Sturm College of Law for Sturm College of Law
- Office of Graduate Programs, Daniels College of Business for Daniels College of Business (DCB)
- Student Affairs, Josef Korbel School of International Studies for Josef Korbel School of International Studies (JKSIS)
- Admission and Financial Aid Office and Registrar, Graduate School of Social Work for Graduate School of Social Work (GSSW)
- Student Affairs, Sturm College of Law for Graduate Tax Program
- Student Services Office, University College for University College (UColl)
Dual and Joint Graduate Degrees

Formal Dual Degree Programs

A formal dual degree program links two master’s degrees or a master’s program with a JD program and leads to two degrees. The Graduate Council and the Associate Provost for Graduate Studies must approve all proposals for formal dual degree programs.

There are two types of formal dual degree programs. Type one incorporates two distinct disciplines where students complete two separate sets of core courses and cross-count electives. Type two incorporates two areas of study within one discipline where students can cross-count a common set of core courses and take separate sets of electives.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must matriculate into the second program no later than the first term available following fifty percent (50%) course work completion of the first program.

Students should complete both degrees at the same time. However, students can receive the first degree as long as all original requirements and credits for the first degree have been met. They then have up to 18 months to complete the second degree. Students pursuing a dual degree with Sturm College of Law must complete all requirements for both degrees before the law degree can be awarded. Students will not be graduated and certified to take the bar examination unless both programs have been completed. Students must apply for graduation for both programs.

With fully developed and approved curricula, these programs are available to graduate students who are admitted to both schools and submit the Dual Degree Approval Form (http://www.du.edu/media/documents/graduates/dual_degree_form.pdf) during the program’s first term. For program details, please contact the school, college or department.

Flexible Dual Degree Programs

Students may propose a flexible dual degree program that links two master’s degrees or a master’s degree and a JD degree.

Students must submit the proposal for the flexible dual degree no later than one term prior to matriculation into the second degree.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must matriculate into the second program no later than the first available term following fifty percent (50%) course work completion of the first program.

Students should complete both degrees at the same time. However, students can receive the first degree as long as all original requirements and credits for the first degree have been met. They then have up to 18 months to complete the second degree. Students pursuing a dual degree with Sturm College of Law must complete all requirements for both degrees before the law degree can be awarded. Students will not be graduated and certified to take the bar examination unless both programs have been completed. Students must apply for graduation for both programs.

Any significant changes to the approved program require the student to resubmit a revised proposal packet to the deans/chairs/directors and advisors of both programs and the Office of Graduate Studies.

Proposing a Flexible Dual Degree

To propose a flexible dual degree, the student must first apply to and be admitted by both programs, pay application fees and admissions deposits for both programs, and seek the counsel of an advisor in each program. Admission into each program does not take the place of filing a Flexible Dual Degree proposal (http://www.du.edu/media/documents/graduates/flexdual.pdf) nor guarantee approval of the proposal.

The dean, chair, or director of each degree program and both program advisors, must carefully compare the requirements for each program and approve the proposed curriculum. The student must then submit a copy of the original requirements for each degree (printout from the unit website or copy from the student handbook is acceptable), a detailed course plan showing all proposed courses, and the credit hours; a one to two- page statement of the educational/career objectives stating the reasons for the specific course selection and which courses most clearly serve the educational and career goals of the student; and current official/unofficial transcript(s) showing any work already completed towards the proposed program and degrees.

The student then submits the documents listed above to the Office of Graduate Studies, which reviews and decides on the proposals. Proposals with errors or course/program inconsistencies will be returned for revision.

Once the proposal is approved, the student will be entered into the University computer system as a flexible dual degree student.

Curriculum Structure

Students may propose any flexible dual degree program that seems reasonable to them and their advisors for academic and career objectives. Only elective courses may be counted among the hours used for reduction or cross-counting.

All the core requirements of each program must be preserved and cannot be overlapped or waived. Credit reduction due to cross counting of elective courses will be limited to the following for each program as determined by the original number of credit hours required for each degree.
Required credit hours for degrees and flexible dual degree reduction allowed:

- **45-60 quarter hour degree program**: Reduce or cross-count a maximum of 10 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 10 quarter hours. A reduction of 15 quarter hours from the original 42 degree will be the maximum allowed when combining outside transfer hours and the cross counting of degree hours.

- **61-75 quarter hour degree program**: Reduce or cross-count a maximum of 12 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 22 quarter hours. A reduction of 25 quarter hours from the original degree will be the maximum allowed when combining outside transfer hours and the cross counting of degree hours.

- **76-90 quarter hour degree program**: Reduce or cross-count a maximum of 15 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 45 quarter hours. A reduction of 45 quarter hours will be the maximum allowed from the original degree when combining outside transfer hours and the cross counting of degree hours.

Note: Credits at the Sturm College of Law for a JD degree are calculated using semester hours: 1 semester hour equals 1.5 quarter hours. A 90 semester hour JD degree may only be reduced by a maximum of 10 semester hours for a total of 80 semester hours completed for the JD (10 semester hours equals 15 quarter hours).

**Non-Course Requirements**

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Studies in writing of their intention to nullify the flexible dual degree proposal. Students must complete all the original requirements for the remaining degree in order to graduate.

**Dual Undergraduate-Graduate Degree Programs**

A Dual Undergraduate-Graduate Degree Program is an institutionally approved program in which a DU undergraduate student begins taking classes toward a graduate degree program prior to earning a baccalaureate degree. Both degrees must be earned within five years of matriculation into the undergraduate degree program. Students pursuing a dual degree with a Juris Doctorate must earn both degrees within six years.

The programs may reduce a limited number of both undergraduate and graduate credit hours toward both degrees. The amount of the credit hour reduction is variable across programs. To be admitted, a student’s academic progress must demonstrate that the requirements of the program can be completed within the set time-frame.

Undergraduates still need to meet all normal core, major, minor and total credit hour requirements of their respective majors and minors before receiving the undergraduate degree. Graduate coursework is usually taken during the undergraduate “senior” year. Students should be admitted to the dual undergraduate-graduate program before taking graduate courses since undergraduate students generally may not take graduate courses. Usually, no more than 30 hours of electives may be used in the senior year to begin the graduate/professional program. Only graduate credit may be counted for the graduate degree. The total number of credit hours required varies by department. All requirements of the graduate or professional program need to be completed before receiving the advanced degree.

- For students enrolled in a dual degree program, the University will award the undergraduate degree at the time it is earned.

- As a dual-degree student, you are considered an undergraduate until you have fulfilled your undergraduate degree requirements, and should file your FAFSA (http://www.fafsa.ed.gov) and CSS PROFILE (https://profileonline.collegeboard.com/prf) as an undergrad. Once you complete your undergraduate degree requirements, you are considered a graduate student. Federal loan eligibility will increase for most students because of the higher graduate student borrowing maximum and scholarship merit based aid will be decided and awarded by their graduate unit. If you have specific questions about how your financial aid may be affected, please contact the graduate academic program or the Office of Financial Aid for information. Dual undergraduate-graduate students who matriculated into the undergraduate degree 2012 and earlier will continue to receive the undergraduate financial aid award level in the 5th year. In addition, Boettcher and Daniels Fund scholars in a dual undergraduate-graduate degree will continue to receive the undergraduate financial aid award level in the 5th year.

- Upon completion of the undergraduate degree federal loan eligibility will actually increase for most students because of the higher graduate student borrowing maximum.

- A student who chooses not to continue on for the graduate degree may count the graduate courses, if approved as relevant by the advisor, toward the undergraduate degree. (Students should visit the appropriate college or school for opt-out options and requirements).

- Students enrolled in the dual undergraduate-graduate program who have been awarded the BA/BS degree, completed all required coursework and are working on a thesis may be eligible to enroll in graduate continuous enrollment.
Dual Undergraduate-Graduate Admission and Records Procedures

The following must be followed consistently and accurately:

- Students are admitted to dual undergraduate-graduate degree programs by the graduate admission unit. The graduate unit follows all normal admission procedures and the student must meet all admission criteria for the graduate program other than receipt of the baccalaureate degree. Students should be admitted to the dual undergraduate-graduate program as early as practical for financial aid and other reasons. They must be admitted to the dual undergraduate-graduate program no later than the end of their tenth full-time quarter of the undergraduate degree (i.e., by the first quarter of the senior year).
- The effective term for admission should be the term in which the student is permitted to take graduate courses. For example, if the student's senior year begins in the fall and the student meets admission criteria and may begin taking graduate courses in the subsequent spring term, the admission term should be that spring.
- Graduate units are responsible for assuring that the student information is accurate.

Note: A student who receives a bachelor's degree and was not previously enrolled in a dual undergraduate-graduate program is not eligible to return and enroll in a graduate program and reduce the number of credit hours for the graduate degree.

- Arts and Humanities Division
- Morgridge College of Education
- Daniels College of Business
- DU-Illiff Joint PhD Program
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Graduate Tax Program
- Natural Sciences and Mathematics Division
- Daniel Felix Ritchie School of Engineering and Computer Science
- Social Sciences Division
- Sturm College of Law
- University College

Arts and Humanities

Arts, Humanities, and Social Sciences (AHSS) is the liberal arts hub of the University of Denver and represents 26 schools, departments and programs. We offer 26 different graduate degrees ranging from a PhD in English to a Master’s in Public Policy to a Master’s in Music. All of these graduate programs are well regarded for academic rigor and post-graduation job placement. With about 340 AHSS graduate students enrolled, our intimate graduate programs feature small class sizes taught by enthusiastic faculty, many of whom are internationally recognized for their research and creative endeavors. In our interdisciplinary, highly collaborative environment, we strive to foster meaningful partnerships amongst students and faculty, support student research opportunities and provide both theoretical and applied learning opportunities for our graduate community.

Emergent Digital Practices

Office: Sturm Hall, Room 216
Mail Code: 2000 E. Asbury Ave., Denver, CO 80208
Phone: 303-871-7716
Email: edp@du.edu
Web Site: www.du.edu/ahss/edp

The MA in Emergent Digital Practices combines the pursuit of advanced, investigatory technical media skill-sets with focused research agendas contextualized within a broad liberal arts and digital humanities framework. The MFA in Emergent Digital Practices emphasizes methods and production of creative scholarly research and works shaped by broader art historical and cultural contexts. Students in both of the graduate degree threads of the EDP program will share key critical, theoretical, and historical resources, will be expected to excel in areas of creative expression and hands-on media production, and will be asked to acquire specialized investigatory skills. Students will learn to work together by utilizing advanced technical platforms and facilities combined with opportunities for heightened critical reflection and dialog.

EDP graduate students should strive to develop critical awareness, to articulate deep media literacies, to sustain new creative practices, and to foster outlooks engaged with the world around us. While invested in participatory forms of creation, performance, and interactivity, EDP graduate students are expected to engage in technical experimentation outside the realm of industry standards and creative as well as critical undertakings that surpass the limits of single disciplines. Students are also expected to be able to articulate the critical underpinnings of the things they devise and create through writing and speaking.

Advanced study in EDP will add scholarly and professional depth to the multiple artistic and cultural practices—both mainstream and alternative—that have developed alongside the powerful, networked, and mobile computing technologies of the 21st century. Advanced research in EDP will provide students with an awareness of broad contexts as well as definitive, professional-level focus and in-depth knowledge of the strategies and collaborative processes for complex, interdisciplinary cultural engagement.
Master of Arts in Emergent Digital Practices

The EDP MA degree at the University of Denver is unique in that it asks the student to balance the technical and the critical, the practical and the aesthetic. The MA degree is structured to build upon the body of knowledge each student already possesses from his/her undergraduate studies and expand and explore the consequence and possibilities that arise from the inclusion of technology into that field.

The MA student should be able to articulate and demonstrate advanced perspectives on emergent digital practices within interdisciplinary contexts. The MA student should also be able to synthesize knowledge of ideas and practices from across the spectrum of historical and contemporary contexts, focusing not just on making the new, but making the needed. And the MA student’s work should demonstrate accomplished means and mechanisms for critically evaluating the cultural dynamics of emergent digital practices.

The MA degree is designed around a 2-year structure with 2 courses being taken during each of the three regular quarters per year. It is not unusual for students to be able to have a part-time job (up to 20 hours/week) and still be successful on the program.

Master of Fine Arts in Emergent Digital Practices

Envisioning artworks created with the latest technology fueled by critical content—that’s the EDP program.

While also demonstrating an understanding of Emergent Digital Practices within interdisciplinary contexts, the MFA student should be able to articulate a deep understanding of the art historical and contemporary contexts of art making as shaped by technology and the sciences. The MFA student should be prepared for public engagement through knowledge of the significance of established cultural institutions and frameworks such as galleries, museums, festivals, and other public spaces.

The MFA Degree is structured as a 3-year program with students taking on average 3 courses during each of the three normal quarters per year. It is recommended that students pursuing the MFA degree are able to focus full time on their studies without simultaneous employment. The MFA degree is considered a “terminal degree” the same as a PhD, providing the necessary credentials to teach at an institute of higher education.

Master of Arts in Emergent Digital Practices

Following are the simple steps to apply for graduate study in Emergent Digital Practices at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications for graduate study in Emergent Digital Practices (EDP) at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: January 20, for the fall quarter. After the priority deadline, applications may be considered on a rolling basis for fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

Course and Degree Prerequisites and Requirements

- Proof of a bachelor’s degree is required from a regionally accredited college or university.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- Application to the MA program in Emergent Digital Practices requires the Graduate Record Examination (GRE) general test. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS
scores are valid for two years from the test date. The minimum TOEFL score accepted by the Emergent Digital Practices program at DU is 105 (iBT) or 620 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the EDP program is 7.5. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.

- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

**Personal Statement**

- MA applicants are required to submit a 2–4 page essay explaining motivation for application, personal and professional goals, and any information or perspectives that will better inform the faculty of your capability to pursue graduate-level work in the EDP program. Students should specifically address their interest in the EDP program.
- The statement should be submitted via upload through the online application process.

**Resume/C.V.**

- A resume or C.V. is required. This should be submitted via upload through the online application process.
- Program-Specific Admission Requirements
- For MA applicants, submission of portfolios, demo reels, or other samples of work is optional.

**Recommendation Letters**

- Three letters of recommendation, preferably academic in nature, are required. These letters should be solicited and uploaded by recommenders through the online application system.

**Financial Support**

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.
- Emergent Digital Practices provides some scholarship hours based on merit and need. Applicants will be considered for financial support when they apply by the priority deadline, January 20, or as funds allow.

**Application Status**

- We encourage you to be actively engaged in the admission process. You can check your application status online (https://webcentral.du.edu).

**Mailing Address**

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  
  University of Denver  
  Office of Graduate Studies  
  Mary Reed Building, Room 5  
  2199 S. University Blvd.  
  Denver, CO 80208-4802

**International Applicants**

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

**Master of Fine Arts in Emergent Digital Practices**

Following are the simple steps to apply for graduate study in Emergent Digital Practices at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

**Apply Online / Application Deadlines**

- Applications for graduate study in Emergent Digital Practices (EDP) at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: January 20, for the fall quarter. After the priority deadline, applications may be considered on a rolling basis for fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.
Course and Degree Prerequisites and Requirements

- Proof of a bachelor’s degree is required from a regionally accredited college or university.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early.
  - The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- The GRE is not required for MFA applicants.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the Emergent Digital Practices program at DU is 105 (iBT) or 620 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the EDP program is 7.5.
  - Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement

- MFA applicants are required to submit a 1–2 page essay explaining motivation for application, personal and professional goals, and any information or perspectives that will better inform the faculty of your capability to pursue graduate-level work in the EDP program. Students should specifically address their interest in the EDP program.
  - The statement should be submitted via upload through the online application process.

Resume/C.V.

- A resume or C.V. is required. This should be submitted via upload through the online application process.

Program-Specific Admission Requirements

- MFA applicants should submit a portfolio: 20 images and/or a maximum total of 15 minutes of time-based media representing at least 10 works of art. MFA applicants are strongly encouraged to submit a URL for the portfolio in website format. The portfolio must be accompanied by a 1-2 page descriptive list of the works. If necessary, send DVDs or CDs to: Emergent Digital Practices, 2000 East Asbury Ave., 216 Sturm Hall, University of Denver, Denver CO 80208 and include a self-addressed postage-paid envelope for their return.

Recommendation Letters

- Three letters of recommendation, preferably academic in nature, are required. These letters should be solicited and uploaded by recommenders through the online application system.

Financial Support

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.
- Emergent Digital Practices provides some scholarship hours based on merit and need. Applicants will be considered for financial support when they apply by the priority deadline, January 20, or as funds allow.

Application Status

- We encourage you to be actively engaged in the admission process. You can check your application status online (https://webcentral.du.edu).
Mailing Address
• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
University of Denver
Office of Graduate Studies
Mary Reed Building, Room 5
2199 S. University Blvd.
Denver, CO 80208-4802

International Applicants
• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

The Graduate Policy Manual provides complete details regarding admission requirements.

---

**Non-coursework Requirement**

**Exhibition:** Additionally, the MFA graduate student should be prepared for the development and organization of emerging venues for the exhibition of, and public engagement through, digital art works and new media. The final form of the MFA exhibition is the creation and public showcase of a significant body of work coupled with a written analysis of the past present and future of connected ideas, inspirations and critical theories.

**Courses**

**EDPX 3950 Collaboration and Production (4 Credits)**

In this collaborative capstone experience, students combine skills to create complex works that encourage the social collaboration of its audience or users. Students learn how to develop group working methods that take advantage of the skills of each member. This course requires full cooperation between team members in order to demonstrate synthesis of the principles of experience, emergence, and engagement taught throughout the program. Understanding and involving the audience as full participants in the final created experiences are also essential. Lab fee. At least junior standing required. Prerequisite: varies with topic.

**EDPX 4000 Digital Design Concepts (4 Credits)**

An introductory course requiring conceptual, perceptual and manual skills to meet rigorous studio research into the history of mark-making, letter forms and layout designs as reflective of cultural, social, political and psychological contexts of interpretation. This class also emphasizes 2-D principles of design, including form, structure, conceptual understanding, visual aesthetics, semiotics, organizational systems, relationships of typography and imagery. Lab fee.
EDPX 4010 Emergent Digital Tools (4 Credits)
This course serves as a primer on the tools essential to expression, sharing, and creation in digital mediums. This includes knowledge of web technologies, creative coding, video, audio, and the basic historical and theoretical contexts of each. Lab fee.

EDPX 4020 Emergent Digital Cultures (4 Credits)
This course familiarizes students with current crucial approaches to understanding digital media and the impacts these media have in personal, community, cultural, social, institutional and international life. The course pays particular attention to cultural constructions of emergent digital media and practices. This course introduces graduate students to a variety of disciplinary lenses and conceptual practices, with readings and research ranging from media theory and studies, philosophy of technology, media archaeology and history, to science fiction studies as approaches to digital media and cultures.

EDPX 4100 Programming for Play (4 Credits)
This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Cross listed with EDPX 3100. Prerequisites: EDPX 4000 and EDPX 4010, or permission of the instructor.

EDPX 4110 Rapid Game Design and Prototypes (4 Credits)
This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 3110.

EDPX 4115 Game Design: Paper to Digital (4 Credits)
This rigorous game design and development course analytically considers formal game design elements through game design and simple 2D game creation exercises, game design text readings, the creation of paper-based game prototypes, digital game-mechanic prototypes, and the followed by the creation of a complete 2D digital game. Class time is devoted to reading discussions, design exercises, play-testing, and some workshop time. Lab fee. Prerequisite: EDPX 4100 or permission of the instructor.

EDPX 4120 Making Critical Games (4 Credits)
This course is a time intensive practicum offered once a year and may be available in Summer terms. Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintaining an essential ludic quality. Public Good and Civic Engagement projects are welcomed. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisites: EDPX 4100 and EDPX 4110 or permission of the instructor. Cross listed with EDPX 3120.

EDPX 4130 Making Educational Games (4 Credits)
This course is a time intensive practicum offered once a year and may be available in summer terms. Students are challenged to create games (board, physical, video-, and hybrid games) that deliver K-12 educational content while still maintaining an essential ludic quality. Course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisites: EDPX 4100 and EDPX 4110 or EDPX 4115, or permission of the instructor.

EDPX 4200 Data Visualization (4 Credits)
This course explores the creation of informational graphics for visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations is also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 3200. Prerequisites: EDPX 4000 and EDPX 4010 or permission of the instructor.

EDPX 4210 Typographic Landscapes (4 Credits)
This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 4000 or permission of the instructor.

EDPX 4250 Making Networks (4 Credits)
This course covers the use and development of content management systems for the creation of network spaces. Current web technologies and standards are covered, while also looking at user interfaces. Critical focus is on leveraging online networks for offline communities. Lab fee. Cross listed with EDPX 3250. Prerequisite: EDPX 4010 or permission of the instructor.

EDPX 4270 Making Networked Art (4 Credits)
The grounding conceptual framework of this course on net art includes an understanding of the psychological, social and cultural contexts of net art, net access and distribution, and net culture. Aesthetic and technical reinforcement of this conceptual base explore network architecture; user/audience interface/navigation design, development and experimentation; meta-data/multimedia content utilization; enhanced interactively; and venue evolution. Technologies used in the course include webpage authoring environments, digital imaging software and multimedia authoring tools. Lab fee. Cross listed with EDPX 3270. Prerequisites: EDPX 4010 and EDPX 4250.

EDPX 4310 Tangible Interactivity (4 Credits)
Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor.
EDPX 4320 Interactive Art (4 Credits)
This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta-data/multimedia asset acquisition and authoring environments. While utilizing students' skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 3320. Prerequisites EDPX 4310 or EDPX 4450.

EDPX 4340 Designing Social Good (4 Credits)
This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and to then make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross listed with EDPX 3340. Prerequisites: EDPX 4000 and EDPX 4010.

EDPX 4350 Sustainable Design (4 Credits)
This course reviews and implements advanced sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure, among others. Lab fee. Prerequisite: EDPX 4000 and EDPX 4010 or permission of the instructor.

EDPX 4400 Video Art (4 Credits)
This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing small format video. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor. Cross listed with EDPX 3400.

EDPX 4410 Advanced Video Art (4 Credits)
This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on "off-screen" time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into spaces, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 4400 or permission of instructor.

EDPX 4430 2.5D Motion (4 Credits)
This course provides students an opportunity to create multi-dimensionally active poetic orchestrations of text, video and audio using the post-production processing and animation tool, After Effects. Lab fee. Prerequisite: EDPX 4010. Cross listed with EDPX 3430.

EDPX 4440 Site-Specific Installation (4 Credits)
This class produces projects investigating physical space, virtual space and site-specific public installations. Lab fee. Cross listed with EDPX 3440. Prerequisites: EDPX 4000 and EDPX 4010.

EDPX 4450 Visual Programming (4 Credits)
This course introduces intuitive visual "programming" that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 3450. Prerequisite: EDPX 4010 or permission of the instructor.

EDPX 4460 Visual Programming II (4 Credits)
This course uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics simulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 3460. Prerequisite: EDPX 4450.

EDPX 4490 Expanded Cinema (4 Credits)
This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performance and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 3490. Prerequisite: EDPX 4010 or permission of the instructor.

EDPX 4500 Sonic Arts (4 Credits)
This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 3500. Prerequisite: EDPX 4010 or permission of the instructor.

EDPX 4510 Sonic Arts II (4 Credits)
This class extends and applies the techniques and theories of the sonic arts to include loop-based composition, generative creation and modular processing. Students learn to add richness and complexity to audio work based on a combination of modern and classic techniques for audio production and the sonic arts. Class assignments include creation of audio for video and games, live performance and installations. Lab fee. Prerequisite: EDPX 4500 or permission of the instructor.
EDPX 4520 Voice and Sonic Environments (4 Credits)
This course covers environmental sound design with an emphasis on the human voice and acoustic ecologies. Studying and exploring a range of documentary, narrative and experimental approaches to sound design and the spoken word, students write and produce several short audio pieces. The final consists of a podcast, voice-oriented performance and/or sonic installation. Lab fee. Prerequisite: EDPX 4500 or permission of the instructor. Cross listed with EDPX 3520.

EDPX 4600 3D Modeling (4 Credits)
This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of composting in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 3600, MFJS 3600. Prerequisite: EDPX 4000 or permission of the instructor.

EDPX 4610 3D Animation (4 Credits)
This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 3610. Prerequisite: EDPX 4600.

EDPX 4620 3D Spaces (4 Credits)
An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisites: EDPX 4010 and EDPX 4600, or permission of the instructor.

EDPX 4700 Topics in Digital Cultures (4 Credits)
This course provides an in-depth exploration of the emergent digital practices of a particular culture and unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. Prerequisite: varies with topic.

EDPX 4701 Topics in Emergent Digital Practices (1-4 Credits)
Topics in Emergent Digital Practices.

EDPX 4725 Activist Media (4 Credits)
Today’s alternative cultures use Internet and mobile technologies to access and circulate mainstream information, but also to rapidly exchange information that exists outside mainstream media channels. Activist movements today with access to digital tools and networks are no longer dependent on newspapers and broadcast networks to represent them and to disseminate their messages. We are, however, just beginning to see how the proliferation of alternative networks of communication, and the content, practices, and identities they facilitate, interact with traditional political and business organizations, as well as with traditional media products and practices. This course focuses on media activism over the past half-century tied to various social movements with an emphasis on contemporary protest movements and their use of new and old media tools and strategies. Cross listed with EDPX 3725, MFJS 3150.

EDPX 4740 Performance Cultures (4 Credits)
This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. Students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab Fee. Prerequisites: EDPX 4010 and EDPX 4020, or permission of the instructor.

EDPX 4750 Sound Cultures (4 Credits)
This course explores some of the cultures of artists, producers, and listeners that have formed around sound technologies. The class combines reading of critical texts and guided listening to study several genres of music, sound art and noise, ranging from post-WWII electronic music, field recordings and sound art, to hip-hop, dub, techno, jam bands, and more. Interdisciplinary in critical approach, this class encourages students to listen to these sonic forms as intersections of technological, social, ideological and imaginative forces. Students produce written media on a variety of sound-related issues, artifacts, and practitioners, culminating in a podcast or interactive publication. Lab fee. Cross listed with EDPX 3750. Prerequisites: EDPX 4010 and EDPX 4020.

EDPX 4770 Cybercultures (4 Credits)
This course encompasses a variety of lenses through which to view, evaluate and critique ideas of ‘community’ and communities in cyberspace (cyber culture). The course covers such issues as: identity and race in cyberspace (including ‘identity and racial tourism’); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are ‘good’ for you and your communities. Cross listed with EDPX 3770. Prerequisite: EDPX 4020.
EDPX 4780 Speculative Cultures (4 Credits)
This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). Students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 4780. Prerequisite: EDPX 4020 or permission of the instructor.

EDPX 4800 Topics in Digital Making (4 Credits)
This course provides an in-depth explorations of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. Lab Fee. Prerequisite: varies with topic.

EDPX 4980 Internship (0-8 Credits)
Instructor approval required.

EDPX 4991 Independent Study (1-8 Credits)
Independent Study form required.

EDPX 4992 Directed Study (1-4 Credits)
Independent study form required.

EDPX 4995 Independent Research (1-10 Credits)

EDPX 5000 Graduate Seminar (4 Credits)
Topics vary. Reading and discussion of critical theory. May include project(s) related to the topic. Course may be repeated up to six times.

EDPX 5100 Graduate Critique (4 Credits)
The course focuses on student’s creative production. Critiques are moderated by a different faculty member each quarter. Conceptual, methodological and theoretical concerns are stressed. Critiques are designed to assist in the experimentation, preparation and construction of individual art projects. Time is also spent on preparing students for a professional practice in the Arts. Course may be repeated up to six times.

EDPX 5700 Research & Theoretical Methods (4 Credits)
This course provides graduate students with the strategies and techniques of research in the area of digital media studies.

EDPX 5800 M.A. Thesis (4-8 Credits)
Independent work toward completion of the MA Thesis. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

EDPX 5850 M.A. Project (4-8 Credits)
Independent work toward completion of the MA Project. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

EDPX 5900 MFA Exhibition (4-8 Credits)
Independent work toward completion of the MFA Thesis Exhibition. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

Email: kheeps@du.edu
Web Site: http://www.du.edu/english

The department of English offers a PhD in English with concentrations in creative writing, literary studies and rhetoric and theory, as well as an MA with a concentration in literary studies.

Our major areas for dissertation research include creative writing; modern and contemporary British literature; American literature; American multicultural literature and Anglphone literatures; genre studies; and literary theory and rhetoric. We also offer course work in traditional literary fields, cultural studies, ethnic literatures and gender studies.

The University of Denver’s department of English is small and intimate, with 22 faculty members, who all publish widely and seek to translate their learning into shared experiences by working closely with students in and out of the classroom.

Because of our relatively small faculty, the department has the flexibility to allow students to tailor their degrees to their specific talents and interests. We do so with a distinctive curriculum that offers not only typical graduate seminars but also writing workshops, individually designed tutorials and colloquia devoted to teaching and professional development. Such a curriculum encourages students to cross genre boundaries in their writing, to relate theory to practice and to work creatively with scholarly projects.
Master of Arts in English with a Concentration in Literary Studies

Following are the simple steps to apply for graduate study in English at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

• Applications for graduate study in English at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
• All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: Master’s program – January 1, for the fall quarter.
• A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

Course and Degree Prerequisites and Requirements

• Proof of a bachelor’s degree is required from a regionally accredited college or university.
• A Bachelor of Arts degree (BA), from a regionally accredited college or university, showing satisfactory preparation, grades and potential for advanced study are required for the master’s program.

Transcripts

• Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
• The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
• Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.

Test Scores

• Satisfactory scores on the Graduate Record Examination (GRE) for both the general test and the Advanced Literature subject test are required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

Language Proficiency

• Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the graduate programs in English at DU is 88 (iBT) or 570 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted is 6.5. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.

• Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Essay

• An academic essay is required. The essay should be submitted via upload through the online application process.

Statement of Intent

• A statement of intent is required. The statement should be submitted via upload through the online application process.

Recommendation Letters

• Three letters of recommendation from college instructors that speak to the applicant’s scholarly and/or creative work are required. These letters should be solicited and uploaded by recommenders through the online application system. Letters must be received by the program’s stated deadline.

Financial Support

• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
• Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.

**Application Status**
• We encourage you to be actively engaged in the admission process. You can check your application status online (https://webcentral.du.edu).

**Mailing Address**
• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  
  University of Denver  
  Office of Graduate Studies  
  Mary Reed Building, Room 5  
  2199 S. University Blvd.  
  Denver, CO 80208-4802

**International Applicants**
• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program's application deadline.

**Doctor of Philosophy in English with a Concentration in Creative Writing**

Following are the simple steps to apply for graduate study in English at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

**Apply Online / Application Deadlines**
• Applications for graduate study in English at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
• All online materials must be submitted, and all supplemental materials must be postmarked, by the program's stated deadline: Doctoral program – January 1, for the fall quarter.
• A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

**Course and Degree Prerequisites and Requirements**
• Proof of a bachelor’s and a master’s degree are required from a regionally accredited college or university.
• A Master of Arts degree (MA) or Master of Fine Arts (MFA), from a regionally accredited college or university, showing satisfactory preparation, grades and potential for advanced study are required for the doctoral program.

**Transcripts**
• Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
• The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.

**Master of Arts in English with a Concentration in Literary Studies**

**Course Requirements**

• 45 hours of course credit, up to 13 hours of which may be taken in graduate tutorials, independent research and/or cognate courses outside the department.

• A minimum of 32 classroom hours (eight courses) is required.

• All course work for the MA should be taken at the University of Denver, but, in rare exceptions, a maximum of 10 credit hours taken elsewhere may count for the requirements if approved by the director of graduate studies.

• While students have no specific course requirements beyond the 32-hour minimum within the department of English and the 13 hours of tutorials or cognate courses, they are advised to work closely with an adviser to determine a balance between coverage and focus. They may take both 3000- and 4000-level courses in literary studies, but students must petition to count more than two 3000-level courses towards graduate study.

• Courses must be completed within three years of enrollment (excluding ENGL 4995).

**Coursework Requirements**

Up to 13 credits of which may be taken in graduate tutorials, independent research and/or cognate courses outside the department.
Minimum of 32 classroom hours (eight courses) is required.

Non-Course Requirements:

- Preliminary advancement to candidacy
- Advancement to candidacy
- A dissertation of publishable quality that makes a significant contribution to its field. This will take the form of an extended scholarly and critical work (usually between 150 and 250 pages) OR a creative work (fiction or poetry). The creative dissertation must include a critical preface that situates the dissertation in its literary context.
- Oral examination. When the dissertation is completed, it must be defended by the candidate. The defense must take place by April 30. No dissertation defenses will be held during the summer quarter. The candidate is therefore advised to set the defense date as far in advance as possible. The defense takes the form of a discussion with the committee concerning the content, context and implications of the work. The dissertation committee consists of the director, two other readers from the English department and an outside chair.
- Tool (reading knowledge of one language) proficiency may be established by completing one of the following:
  - Passing a standard reading examination accredited by the department
  - Passing, with a grade of B or better, a 3000-level literature course in the language.
  - Successful completion of the Bibliography and Research Methods class in the English department.
  - Selection and successful completion of a cognate course in another department that will augment specific skills. This course must be approved by the Graduate Committee.
  - Successful completion of Old English, followed by a two-hour “Beowulf” tutorial, followed by an intermediate Old English tutorial. (This option will no longer require a petition to the Graduate Committee.)
  - Successful completion of a graduate translation class (students must secure approval of instructor)

The language requirements must be completed one quarter before graduation.

- Prospectus review. By the end of the winter quarter of the third year, students must submit a Dissertation Area Proposal to the director of graduate studies. This proposal is a brief description of the proposed area of the dissertation; it must be signed by at least two dissertation committee members. Before the end of the third quarter of the third year of study, all students should complete the prospectus review. This is an oral discussion based on the written dissertation prospectus and conducted by the director of graduate studies and a committee consisting of the first two readers of the dissertation. The prospectus should be approximately 2,500–3,000 words and should be presented to the exam committee well in advance of the exam. For creative writing students, the prospectus should discuss the theoretical and generic origins of the project, its methodology and artistic goals.
- Written comprehensive exam. At the beginning of the third year of study, and after 48 hours of completed course work, all students will take a written comprehensive exam covering three (out of four) areas of study: an author or major figure; a genre; a period; and a second period or special topic. All choices must be approved by examiners and the graduate director. Students will prepare a reading list for each area in consultation with examiners. All lists must be signed by both examiners and on file with the graduate director by May 1 or the student will not be allowed to take the exam the following fall.

Doctor of Philosophy in English with a Concentration in Literary Studies

Course Requirements for Literary Studies

- 90 graduate-level quarter hours beyond the master’s
- 48 hours of course work must be in formal classes, excluding ENGL 5995, non-ENGL courses and tutorials.
- 10 max for tutorial courses

Five courses distributed over three literary periods: before 1700; 1700–1900; and after 1900. Students must take at least one course in one period and at least two courses in the other two periods. Students must petition to count more than two 3000-level courses towards graduate study.

Coursework Requirements

48 hours of course work must be in formal classes, excluding ENGL 5995, non-ENGL courses and tutorials.

10 max for tutorial courses
Five courses distributed over three literary periods: before 1700; 1700–1900; and after 1900. Students must take at least one course in one period and at least two courses in the other two periods. Students must petition to count more than two 3000-level courses towards graduate study.

General Professional Seminars
Non-Course Requirements

- Preliminary advancement to candidacy
- Advancement to candidacy
  - A dissertation of publishable quality that is a significant contribution to its field. This will take the form of an extended scholarly and critical work (usually between 150 and 250 pages) or a creative work (fiction or poetry). The creative dissertation must include a critical preface that situates the dissertation in its literary context.
  - Oral examination. When the dissertation is completed, it must be defended by the candidate. The defense must take place no later than three weeks before graduation. No dissertation defenses will be held during the summer quarter. The candidate is therefore advised to set the defense date as far in advance as possible. The defense takes the form of a discussion with the committee concerning the content, context and implications of the work. The dissertation committee consists of the director, two other readers from the English department and an outside chair.
  - Tool (reading knowledge of one language) proficiency may be established by completing one of the following:
    - Passing a standard reading examination accredited by the department
    - Passing, with a grade of B or better, a 3000-level literature course in the language
    - Successful completion of the Bibliography and Research Methods class in the English department
    - Selection and successful completion of a cognate course in another department that will augment specific skills. This course must be approved by the Graduate Committee.
    - Successful completion of Old English, followed by a two-hour "Beowulf" tutorial, followed by an intermediate Old English tutorial. (This option will no longer require a petition to the Graduate Committee.)
    - Successful completion of a graduate translation class (students must secure approval of instructor)

The language requirements must be completed one quarter before graduation.

- Prospectus review. By the end of the winter quarter of the third year, students must submit a Dissertation Area Proposal to the director of graduate studies. This proposal is a brief description of the proposed area of the dissertation; it must be signed by at least two dissertation committee members. Before the end of the second quarter of the third year of study, all students should schedule the prospectus review. This is an oral discussion based on the written dissertation prospectus and conducted by the director of graduate studies and a committee consisting of the first two readers of the dissertation. The prospectus should be approximately 2,500–3,000 words and should be presented to the review committee well in advance of the exam. For literature and rhetoric/theory students, the prospectus should outline the relevant scholarship and describe an original thesis for the proposed work. It should also include a working bibliography for the project.

- Written comprehensive exam. At the beginning of the third year of study, and after 48 hours of completed course work, all students will take a written comprehensive exam covering three (out of four) areas of study: an author or major figure; a genre; a period; and a second period or special topic. All choices must be approved by examiners and the graduate director. Students will prepare a reading list for each area in consultation with examiners. All lists must be signed by both examiners and on file with the graduate director by May 1 or the student will not be allowed to take the exam the following fall.

Courses

**ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)**
Technique, writing practice and criticism.

**ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)**
Technique, writing practice and criticism.
ENGL 3013 Ad Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)

ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)
A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

ENGL 3040 Introduction to Publishing (4 Credits)
Cross listed with ENGL 2040, MFJS 3140.

ENGL 3101 Non-Chaucerian Middle English Literature (4 Credits)
A study of Chaucer's near-contemporaries, Gower, Langland, and the Pearl poet as well as drama and lyrics.

ENGL 3121 Chaucer: Canterbury Tales (4 Credits)
Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

ENGL 3320 Oral Literature and Orality in Literature (4 Credits)
The term "oral literature" generally refers to narratives and poems--including songs--performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. Some of the questions that we therefore explore in this course are as follows: How did oral literature develop? What are its types and their characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature--from the traditional (such as folklore) to the contemporary (such as spoken word poetry). We also study the use of orality as a literary device in written literature. Our studies involve the examination of material and texts from different parts of the world.

ENGL 3402 Early Romantics (4 Credits)

ENGL 3405 Postmodern Visions of Israel (4 Credits)
This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual “multiverses.” A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

ENGL 3406 Writing the American West (4 Credits)
Explores historical and contemporary writing produced in and about the American West.

ENGL 3407 20th-Century American Fiction (4 Credits)

ENGL 3706 Writing the American West (4 Credits)
Explores historical and contemporary writing produced in and about the American West.

ENGL 3720 20th-Century American Fiction (4 Credits)

ENGL 3731 Topics in English (1-4 Credits)
ENGL 3732 Topics in English (1-4 Credits)
ENGL 3733 Topics in English (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

ENGL 3743 Modern Jewish Literature (4 Credits)
Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

ENGL 3744 African American Literature (4 Credits)

ENGL 3800 Bibliography/Research Method (4 Credits)

ENGL 3803 Modernism/Postmodernism (4 Credits)

ENGL 3813 History and Structure of the English Language (4 Credits)
A composite course studying both the structure of modern English and the history of the English language.

ENGL 3815 Studies in Rhetoric (4 Credits)
This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

ENGL 3817 History of Rhetoric (4 Credits)

ENGL 3818 Composition Theory (4 Credits)

ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)

ENGL 3822 Literary Criticism: 20th Century (4 Credits)
Critical methods and philosophies of 20th-century critics; their relationship to traditions.

ENGL 3823 Interpretation Theory (4 Credits)

ENGL 3825 Cultural Criticism (4 Credits)
Cross listed with ENGL 2835.

ENGL 3852 Topics in Poetics (4 Credits)
ENGL 3982 Writers in the Schools (2-4 Credits)
This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

ENGL 3991 Independent Study (1-17 Credits)
ENGL 3992 Directed Study (1-10 Credits)
ENGL 3995 Independent Research (1-10 Credits)
ENGL 4000 Colloquium (2 Credits)
ENGL 4001 Sem Creative Writing-Poetry (4 Credits)
ENGL 4011 Sem Creative Writing-Fiction (4 Credits)
ENGL 4012 History/Theory of Genre-Poetry (4 Credits)
ENGL 4017 Travel Writing (4 Credits)
ENGL 4100 Graduate Tutorial (2-4 Credits)
ENGL 4120 Beowulf (2 Credits)
Reading and translation of the Old English Beowulf. Prerequisite: ENGL 4125.
ENGL 4125 Old English (4 Credits)
ENGL 4150 Special Topics in Medieval Lit (4 Credits)
ENGL 4200 Special Topics-Early Mod Lit (4 Credits)
ENGL 4210 Holocaust Literature (4 Credits)
This seminar presents a multidisciplinary and transnational approach to literature of the Holocaust. Students consider memoir, fiction, and poetry drawn from a variety of national literatures and linguistic traditions. Works written by victims, survivors and 'witnesses through the imagination' are all considered. These readings are supplemented by secondary texts, including historical and philosophical materials, as well as relevant works from the social sciences.

ENGL 4213 Advanced Studies in Early Modern Literature (4 Credits)
ENGL 4220 Seminar-Studies in Shakespeare (4 Credits)
ENGL 4300 Advanced Studies in 18th Century Literature (4 Credits)
ENGL 4321 Spc Tpcs: 18th Cent Literature (4 Credits)
Special Topics courses will explore specific topics within historical periods, single authors, or theoretical/critical/ scholarly issues.
ENGL 4424 Topics in English: 19th Century Literature (4 Credits)
Special Topics courses will explore specific topics within historical periods, single authors, or theoretical/critical/ scholarly issues.
ENGL 4600 Adv Studies -20th C. Literature (4 Credits)
ENGL 4621 Adv Studies-20th C. Literature (4 Credits)
This course will offer (and be required of) graduate students an advanced foundation in 20th century literature; the primary texts and their cultural/ historical/ theoretical contexts.

ENGL 4650 Special Topics: 20th Cent Lit (4 Credits)
ENGL 4675 Interactive Fictions (4 Credits)
This class examines the border between traditional narrative texts and texts that require a higher degree of interactivity, collectively called 'configurational narratives,' 'works in movement' (Umberto Eco) or 'cyber texts' (Espen Aarseth). The goal is to identify what differences may exist between traditional and interactive literatures, and to analyze the possibilities of the future of narrative. Primary texts are drawn from experimental and avant-garde works of poetry, prose, drama, and games. Secondary texts survey recent critical theory and trace analyses of interactivity to determine how "literature is a combinatorial game" (Italo Calvino).

ENGL 4700 Antebellum American Literature (4 Credits)
ENGL 4701 Topics in English (2-5 Credits)
A topics class; topics may change.
ENGL 4702 Topics in English (2-5 Credits)
A topics class; topics may change.
ENGL 4730 American Romanticism (4 Credits)
ENGL 4732 Spc Tpc: Antebellum Amer Lit (4 Credits)
ENGL 4735 Sem: H. James & E. Wharton (4 Credits)
ENGL 4830 Seminar: Teaching and Writing Literature (2-4 Credits)
ENGL 4832 Sem: Teaching Writing & Lit (2 Credits)
ENGL 4840 Topics in Composition Studies (2-4 Credits)
Each offering of this course focuses on specific issues in theory, research, or pedagogy within the broad field of composition studies. Examples of topics include the development of writing abilities; genre theory and composing; multimodal texts and their intersections and disjunctions of rhetoric and composition; the history of composing theories and practices; realms of composing, including the academic, civic, vocational, aesthetic, and interpersonal; institutional formations and settings of composing; discourse theories; stylistics; race, gender, class and composing; and so on.
ENGL 4851 Publishing Institute (6 Credits)
ENGL 4852 Dissertation Colloquium (2 Credits)
This two-credit dissertation colloquium is offered in the winter and spring for third-year PhD students in English who are in the process of researching and writing their dissertations. In addition to having weekly presentations and discussions of work in progress, the group will peruse prefaces and introductions to former English Department dissertations, write and abstract for their own dissertation, and possibly revise and send out a piece from their dissertation. The class is open to both literary studies and creative writing students. Restricted to doctoral students in English.
ENGL 4991 Independent Study (1-17 Credits)
ENGL 4992 Directed Study (1-10 Credits)
ENGL 4995 Independent Research (1-17 Credits)
ENGL 5991 Independent Study (1-17 Credits)
ENGL 5995 Independent Research (1-17 Credits)

Lamont School of Music

Office: Robert & Judi Newman Center for the Performing Arts
Mail Code: 2344 E. Iliff Ave., Denver, CO 80208
Phone: 303-871-6400
Email: musicadmissions@du.edu
Web Site: http://www.du.edu/lamont

With its wide array of degrees and certificates, outstanding faculty and superior new facilities, the Lamont School of Music is one of the most distinguished music programs in the United States.

If the words dedication, discipline, enthusiasm and desire define your musical aspirations, then you’ll find exciting opportunities at the University of Denver. The Lamont School of Music will lend resonance to your musical career, as well as surrounding you with other talented students and a rich cultural environment in Denver.

The Lamont School of Music offers MM programs with concentrations in composition, conducting, pedagogy and performance, as well as MA programs in music theory and musicology. We also offer certificates with concentrations in conducting, orchestral studies, performance and Suzuki teaching; and artist diploma programs with a concentration in conducting and orchestral studies.

The faculty is composed of professors and instructors who actively perform, compose, publish, and lecture worldwide. The Lamont School of Music is located in the Robert and Judi Newman Center for the Performing Arts, a 186,000-square-foot state-of-the-art facility opened in 2002 and officially inaugurated in 2003. The Newman Center includes an academic building, a 225-seat recital hall, a 1,000-seat concert/opera hall and a 250-seat flexible theater. The academic building is replete with teaching studios, practice rooms (some of which are digitally enhanced as “virtual” acoustic practice rooms), large rehearsal spaces, a music library, a digital keyboard laboratory, two recording studios, an electronic music lab, classrooms with smart-to-the-seat technology and an 80-seat recital salon.

Certificate in Music (artist Diploma Program) with a concentration in Conducting

Following are the simple steps to apply for the Lamont School of Music artist diploma at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines
- Applications for the artist diploma at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: December 15, for the fall quarter only.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.
Course and Degree Prerequisites and Requirements

- Proof of a high school diploma is required; however, an undergraduate degree is not necessary.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and Scrip-Safe.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement

- A personal statement of at least 300 words is required. Your statement should include information concerning your life, education, experiences, interests and reason for applying to DU. The statement should be submitted via upload through the online application process.

Resume

- The resume is required and should be submitted via upload through the online application process.

Recommendation Letters

- Conducting applicants: One to three (1-3) letters of recommendation are required. Recommendations must come from people who have seen the applicant conduct.

Submit the Following to the Lamont School of Music, Office of Admission

- Submit a prescreen video recording to the Lamont Application (https://app.decisiondesk.com/clients/lamontadmissions/account/create) by December 15, 2013. If you successfully pass the prescreen, you will be invited to Lamont for a live audition.

Financial Support

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.
- Some programs provide competitive awards in the form of fellowships and/or assistantships. Contact your academic program for more information.

Application Status

- We encourage you to be actively engaged in the admission process. You can check your application status online (https://PioneerWeb.du.edu).

Mailing Address

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:
International Applicants

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Certificate in Music (Artist Diploma Program) with a concentration in Orchestral Studies

Following are the simple steps to apply for the Lamont School of Music artist diploma at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications for the artist diploma at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: December 15, for the fall quarter only.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

Course and Degree Prerequisites and Requirements

- Proof of a high school diploma is required; however, an undergraduate degree is not necessary.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

• Essay or Research Paper (Required for MA applicants only)
  Musicology and Music Theory applicants must also submit an essay or research paper on a topic in musicology, ethnomusicology, or music history. This paper should demonstrate critical and independent thinking in conjunction with the appropriate use of primary and secondary sources. Please submit your paper to the Lamont Application (https://app.decisiondesk.com/clients/lamontadmissions/account/create).

Financial Support
• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.

Some programs provide competitive awards in the form of fellowships and/or assistantships. Contact your academic program for more information.

Application Status

- We encourage you to be actively engaged in the admission process. You can check your application status online (https://webcentral.du.edu).

Mailing Address

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Master of Music in Music with a Concentration in Composition

Following are the simple steps to apply for master of music at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications for the MM at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- Admission applications are reviewed on a rolling basis for fall, winter and spring quarters; however, starting the program in the fall quarter is preferable. Scholarship priority will be given to those who apply for fall and submit all online materials and supplemental materials before January 15.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

Course and Degree Prerequisites and Requirements

- Proof of a bachelor’s degree is required from a regionally accredited college or university.
- Applicants without an undergraduate degree in music must complete additional requirements. Please contact the Lamont Office of Admission for details at 303-871-6973.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.
Test Scores

• The Graduate Record Examination (GRE) is required for MA applicants only. Master of Music in Piano Pedagogy applicants are strongly encouraged to take the GRE. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

Language Proficiency

• Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.

• Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement

• A personal statement of at least 300 words is required. Your statement should include information concerning your life, education, experiences, interests and reason for applying to DU. The statement should be submitted via upload through the online application process.

Resume

• The resume is required and should be submitted via upload through the online application process.

Recommendation Letters

• Three (3) letters of recommendation are required. These letters should be solicited and uploaded by recommenders through the online application system. Letters must be received by the program’s stated deadline.

Submit the Following to the Lamont School of Music, Office of Admission

• Composition applicants: Submit a portfolio of at least two scores to the Lamont Application (https://app.decisiondesk.com/clients/lamontadmissions/account/create). One of these scores must be notated by hand (not by computer). Please submit scanned copies, not originals. Recordings are optional but encouraged.

Financial Support

• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.

• Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.

• Some programs provide competitive awards in the form of fellowships and/or assistantships. Contact your academic program for more information.

Total Credits: 45

Minimum number of credits required for degree: 45 credits

Non-coursework requirements (see below and the MUSC handbook for more details)

- Thesis
- Final Oral Comprehensive Examination

Additional non-coursework requirements (see below and the MUSC handbook for more details)

- Entrance Proficiencies
- Convocation and Performance Attendance
- Grades
- Time Limits

Non-coursework requirements:

Thesis

Typically a scholarly, article-length paper of publishable quality

Final Oral Comprehensive Examination

Oral comprehensive final examination, including defense of the thesis

Additional non-coursework requirements:

Entrance Proficiencies

By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiency in musicology by examination.
By no later than the completion of 15 graduate credit hours, demonstration of superior graduate entrance-level proficiencies in music theory and aural skills by examination.

**Convocation and Performance Attendance**

Attendance requirements as specified in the Lamont School of Music Handbook.

**Grades**

A 3.0 (“B”) grade point average is required in all graduate coursework accepted for the degree.

No more than one-fourth of the hours accepted toward the degree may be with “C” grades. A grade lower than “C” (2.0) renders the credit unacceptable for meeting degree requirements.

Students cannot take more than eight hours beyond the degree requirements in order to make up grade deficiencies. Students whose grades are still deficient after taking the additional eight hours are terminated from the degree program.

A 3.0 (“B”) grade point average must be maintained in all music courses.

Any course in the student’s major area within music, or the course Introduction to Graduate Study in Music, must be repeated if a grade lower than “B” (3.0) is awarded. A grade of “B” or better must be received in the repeated course. Only one such repeat is permitted; two grades lower than “B” for the same course will result in termination from the Lamont School of Music.

In the case of MUAC 4000 Introduction to Graduate Studies in Music, the average of the two grades from the two-quarter sequence must equal at least a B (3.0).

Upon failing a graduate music course, the student is placed on probationary status. If the student fails another music course while on probation, he/she will be terminated from the Lamont School of Music.

Five quarter-hours of “C” (2.0) work will be accepted in elective areas, provided they are balanced by the same number of quarter hours of “A” (4.0) work in any subject(s).

**Time Limit**

All requirements for the degree must be completed within five years of matriculation.

**Master of Arts in Music with a Concentration in Musicology**

Departments must offer a graduate degree program

**Total Credits**

45

**Minimum number of credits required for degree: 45 credits**

**Non-coursework requirements (see below and the MUSC handbook for more details)**

- Tool
- Thesis
- Final Oral Comprehensive Examination
- Final Written Project
Additional non-coursework requirements (see below and the MUSC handbook for more details)

- Entrance Proficiencies
- Convocation and Performance Attendance
- Grades
- Time Limits

Non-coursework requirements:

Tool

Ability to read relevant music-based documents in at least one Western language other than English, as demonstrated by completion of at least two years of study of that language at the college level or a language tool examination in that language. Must be completed at least one quarter prior to the quarter in which the student will graduate.

Thesis

Typically a scholarly, article-length paper of publishable quality

Final Oral Comprehensive Examination

Oral comprehensive final examination, including defense of the thesis

Final Written Project

Additional non-coursework requirements:

Entrance Proficiencies

By no later than the completion of 15 graduate credit hours, demonstration of superior graduate entrance-level proficiency in musicology by examination.

By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiencies in music theory and aural skills by examination.

Convocation and Performance Attendance

Attendance requirements as specified in the Lamont School of Music Handbook.

Grades

A 3.0 ("B") grade point average is required in all graduate coursework accepted for the degree.

**Time Limit**

All requirements for the degree must be completed within five years of matriculation.

**Master of Music in Music with a Concentration in Conducting**

The Master of Music with a concentration in conducting degree has three emphases: Choral, Orchestral, or Wind.

**Degree requirements**

**Coursework requirements**

**Core coursework requirements**

Complete all of the following courses:

- **MUAC 4000** Introduction to Graduate Study (Complete 2 credits in both fall and winter quarters during the 1st year for a total of 4 credits) 2
- **MUAC 4000** Introduction to Graduate Study 2
- **MUAC 3XXX or 4XXX** Musicology/ Ethnomusicology course 4
- **MUAC 3XXX or 4XXX** Music theory course 4

**Concentration requirements**

- **MUAC 4930** Conducting Tutorial 2
- **MUAC 4930** Conducting Tutorial 2
- **MUAC 4930** Conducting Tutorial 2
- **MUAC 4930** Conducting Tutorial 2
- **MUAC 4930** Conducting Tutorial 2

**Emphasis requirements**

Students must select 1 of the 3 emphases (Choral, Orchestral or Wind):

**A. Choral emphasis**

Complete all of the following courses:

- **MUEN 3712** Lamont Chorale 6
- **MUAC 3960** Advanced Orchestral Conducting 2
- **MUAC 3962** Advanced Wind Conducting 2
- **MUAC 3684** Choral Literature I 4

Select either Choral or the Voice/Vocal Pedagogy sequences:

- **MUAC 3XXX** Choral Pedagogy I & 2 4
- **MUAC 3240** Vocal Pedagogy 2
- **MUAC 3241** Voice Pedagogy 2

**B. Orchestral emphasis**

Complete all of the following courses:

- **MUEN 3760** Lamont Symphony Orchestra 6
- **MUAC 3961** Advanced Choral Conducting 2
- **MUAC 3962** Advanced Wind Conducting 2
- **MUAC 3959** Movement and Expression for Conductors 2
- **MUAC 3XXX or 4XXX** Orchestral literature 4

**C. Wind emphasis**

Complete all of the following courses:

- **MUEN 3752** Lamont Wind Ensemble 6
- **MUAC 3960** Advanced Orchestral Conducting 2
- **MUAC 3961** Advanced Choral Conducting 2
- **MUAC 3959** Movement and Expression for Conductors 2
- **MUAC 3973** Advanced Wind Literature I 2
- **MUAC 3974** Advanced Wind Literature II 2

- Entrance Proficiencies
- Convocation and Performance Attendance
Non-coursework Requirements:

Ensemble Participation
- Cello (Suzuki) and Violin (Suzuki) Pedagogy Emphases
  Participation in at least two ensembles each quarter as assigned. Please view Lamont Student Handbook for specific requirements.
- Piano Pedagogy Emphasis
  Participation in the piano accompanying program each quarter. An accompanying load that is equivalent to participation in two major ensembles will be determined by the coordinator of the program.

Recital
One full-length performance recital

Thesis (Piano Pedagogy Only)
A thesis that constitutes an original contribution of research to the field.

Final Teaching Demonstration
Final Oral Comprehensive Examination
- Cello (Suzuki) and Violin (Suzuki) Pedagogy Emphases: Final oral comprehensive examination
- Piano Pedagogy Emphasis: Final oral comprehensive examination, including defense of the thesis

Additional non-coursework requirements:

Entrance Proficiencies
By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiency in musicology by examination.
By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiencies in music theory and aural skills by examination.

Convocation and Performance Attendance
Attendance requirements as specified in the Lamont School of Music Handbook.

Grades
A 3.0 (“B”) grade point average is required in all graduate coursework accepted for the degree.
No more than one-fourth of the hours accepted toward the degree may be with “C” grades. A grade lower than “C” (2.0) renders the credit unacceptable for meeting degree requirements.
Students cannot take more than eight hours beyond the degree requirements in order to make up grade deficiencies. Students whose grades are still deficient after taking the additional eight hours are terminated from the degree program.
A 3.0 (“B”) grade point average must be maintained in all music courses.
Any course in the student’s major area within music, or the course Introduction to Graduate Study in Music, must be repeated if a grade lower than “B” (3.0) is awarded. A grade of “B” or better must be received in the repeated course. Only one such repeat is permitted; two grades lower than “B” for the same course will result in termination from the Lamont School of Music.
In the case of MUAC 4000 Introduction to Graduate Studies in Music, the average of the two grades from the two-quarter sequence must equal at least a B (3.0).
Upon failing a graduate music course, the student is placed on probationary status. If the student fails another music course while on probation, he/she will be terminated from the Lamont School of Music.
Five quarter-hours of “C” (2.0) work will be accepted in elective areas, provided they are balanced by the same number of quarter hours of “A” (4.0) work in any subject(s).

Time Limit
All requirements for the degree must be completed within five years of matriculation.
Master of Music in Music with a Concentration in Performance

The Master of Music in Music with a concentration in performance has several emphases: Accordion, Bassoon, Clarinet, Flute, Harp, Oboe, Percussion or Saxophone; Carillon; Cello; Double Bass; French Horn, Trombone, Trumpet and Tuba; Guitar; Organ; Piano; Viola; Violin; Voice; or Jazz emphasis in Accordion, Bassoon, Cello, Clarinet, Double Bass, Flute, French Horn, Guitar, Harp, Oboe, Organ, Percussion, Piano, Trombone, Trumpet, Tuba, Violin, Viola and or Voice.

Voice majors must take MUAC 3242 Vocal Pedagogy if equivalent not completed during undergraduate study

Note: Departments must offer a graduate level degree program

Total credits 50

Minimum number of credits required for the degree: 50 credits

Non-coursework requirements (see below and the MUSC handbook)

- Ensemble Participation or the Piano Accompanying Program (depending on the emphasis)
- Recital
- Final Oral Comprehensive Examination
- Final Written Project

Additional non-coursework requirements (see below and the MUSC handbook)

- Entrance Proficiencies
- Convocation and Performance Attendance
- Grades
- Time Limits

Non-coursework requirements:

Ensemble Participation or the Piano Accompanying Program

All MM Performance students (except voice and piano) must audition and participate in two ensembles per quarter as assigned.

All MM Voice students must audition and participate in two ensembles per quarter for three quarters, and one ensemble per quarter for all other quarters.

All Piano Emphasis students must participate in the piano accompanying program each quarter. An accompanying load that is equivalent to participation in two major ensembles will be determined by the coordinator of the program.

Recital

One full-length performance recital

Final Oral Comprehensive Examination

Final oral comprehensive examination

Final Written Project

Final written project determined by department

Additional non-coursework requirements:

Entrance Proficiencies

By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiency in musicology by examination.

By no later than the completion of 15 graduate credit hours, demonstration of graduate entrance-level proficiencies in music theory and aural skills by examination.

Convocation and Performance Attendance

Attendance requirements as specified in the Lamont School of Music Handbook.
Grades

A 3.0 (“B”) grade point average is required in all graduate coursework accepted for the degree.

No more than one-fourth of the hours accepted toward the degree may be with “C” grades. A grade lower than “C” (2.0) renders the credit unacceptable for meeting degree requirements.

Students cannot take more than eight hours beyond the degree requirements in order to make up grade deficiencies. Students whose grades are still deficient after taking the additional eight hours are terminated from the degree program.

A 3.0 (“B”) grade point average must be maintained in all music courses.

Any course in the student’s major area within music, or the course Introduction to Graduate Study in Music, must be repeated if a grade lower than “B” (3.0) is awarded. A grade of “B” or better must be received in the repeated course. Only one such repeat is permitted; two grades lower than “B” for the same course will result in termination from the Lamont School of Music.

In the case of MUAC 4000 Introduction to Graduate Studies in Music, the average of the two grades from the two-quarter sequence must equal at least a B (3.0).

Upon failing a graduate music course, the student is placed on probationary status. If the student fails another music course while on probation, he/she will be terminated from the Lamont School of Music.

Five quarter-hours of “C” (2.0) work will be accepted in elective areas, provided they are balanced by the same number of quarter hours of “A” (4.0) work in any subject(s).

Time Limit

All requirements for the degree must be completed within five years of matriculation.

Music-Academic Classes Courses

MUAC 3002 Theory III: Form and Analysis (4 Credits)
Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2006.

MUAC 3005 Post-Tonal Theory and Analysis: Set-Theory and Serialism (4 Credits)
This course has two components: (1) A study of selected analytical techniques for post-tonal music, primarily pitch-class set theory and twelve-tone (serial) theory; (2) Analysis of representative works from the twentieth century, focusing on the music from the first half of the century (Schoenberg, Berg, Webern, Stravinsky, and Bartok). Six credits of Theory 2 or permission of instructor required.

MUAC 3006 Post-Tonal Theory: Mode/Rhythm (4 Credits)
Works of Stravinsky, Bartok, Satie, Debussy, and others are studied, employing various transformational theories, diatonic set theory, and 20th-century metric theories. Prerequisite: completion of Music Theory I and Music Theory II sequences.

MUAC 3010 Tonal Counterpoint (4 Credits)
Eighteenth-century counterpoint using J.S. Bach as a model, with two- and three-part fugue writing.

MUAC 3023 Rhythm & Meter in Tonal Music (4 Credits)
This course gives a general background, including the history of rhythm and meter, different rhythmic analyses, and various topics (dissonance, ambiguity, Schenker, motives, biology, and perception).

MUAC 3024 Theory III: Introduction to Tonal Analysis (4 Credits)
This course introduces students to various types of musical analysis for tonal music that are more advanced than what is introduced in first- and second-year music theory. Prerequisites: MUAC 2006 and MUAC 2022.

MUAC 3025 Topics in Analysis: Brahms (4 Credits)
This course explores a variety of analytical techniques used to understand the compositions of Brahms. We examine works by musicologists and theorists such as Allen Forte, Walter, Frisch, Arnold Schoenberg, Carl Schachter, and David Lewin. Issues discussed include developing variations, rhythm, form, and ambiguity in Brahms. We cover a wide range of repertoire, ranging from piano works to choral works to symphonies.

MUAC 3030 Seminar-Performance Psychology (2 Credits)

MUAC 3036 Internship (1-5 Credits)

MUAC 3045 Introduction to Studio Recording (3 Credits)
A hands-on introduction to recording popular music in the state of the art Lamont Recording Studio. Students will participate in pre-production and recording of a professional four piece rock band. Students will also learn basic audio theory as it applies to the use of microphones, signal processing, and other studio equipment. Topics to be covered include drum sounds, guitar and bass sounds, basic audio theory and acoustics, basic electricity, digital recording, microphones and DI's, signal routing in the studio, tracking with ProTools HD and Logic Pro7, equalization, dynamics, reverberation and delay, special effects, mixing to stereo.
MUAC 3059 Audio Production II (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the second sequence in the audio production concentration.

MUAC 3060 Extra-Musical Roles of the Music Director (1 Credit)
Under the supervision and guidance of the director of orchestral studies, students will gain hands-on, actual experience with many of the non-musical tasks that conductors face. These experiences will include managing orchestra personnel, librarian activities, running auditions, and recruiting. Open only to artist diploma in orchestral conducting students.

MUAC 3061 Audio Production I (4 Credits)
An introduction to analog and digital synthesis, MIDI sequencing, and DAW software.

MUAC 3064 Audio Production IV (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the fourth sequence in the audio production concentration.

MUAC 3065 Audio Production V (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as onsite training at Lamont School of Music performances. This is the fifth sequence in the audio production concentration.

MUAC 3068 Audio Production for Working Musicians (4 Credits)
In this course, students are taught a solid foundation of basic audio production skills that will enable them to record any style of music. Students are also taught the basics of digital music synthesis and how to create music with digital synthesizers and MIDI. The primary digital audio workstation software used in this course will be ProTools, and each student is required to purchase ProTools (about $250 academic price) and an iLok license dongle (about $40). However, the course has been designed so that skills acquired can be easily applied to any regular DAW platform, such as Logic, Cubase, Ardour, etc. Production techniques for various musical genres will be presented, including Rock, Jazz, Classical, Techno, experimental electro-acoustic, etc. This course will be of great value to performing musicians, singer-songwriters, ensemble directors and conductors, composers, or anyone who wants to record and/or produce music. Students are encouraged but not required to purchase an audio interface and microphone or other input device depending on their area of interest, and are advised in class as to what purchases make sense.

MUAC 3069 Jazz Rhythm Section (4 Credits)
Jazz Rhythm Section provides students with detailed performance practice skills and knowledge. This class may be used to fulfill four hours of Jazz Studies and Commercial Music Area Requirements and may only be taken once for credit. Jazz Studies and Commercial Music Major or the performance ability sufficient to perform on a rhythm section instrument in one of the JSCM ensembles.

MUAC 3092 The Business Side of Music (4 Credits)
A personal and clinical approach to developing music business skills and strategies.

MUAC 3105 Studies in Style: Movement, Mannerisms, Gesture and Physical Comedy (3 Credits)
The exploration of period styles in theatrical and historical genres will be introduced to broaden the singer/actor's repertoire of physical gesture and comedic forms of stage movement. The focus of the course will include studies in rhythm, timing, pacing, musicality and lyricism as these elements apply to heightened expressivity within scene work, character development and ensemble performance. Considerable time will be devoted to the physical practice of related skills as preparation and facilitation of performance projects that will serve as an opportunity for peer observation, group discussion and commentary, and student assessment.

MUAC 3106 The Dynamic Body: Foundations in Movement Methods and Body Awareness Principles (2 Credits)
An introduction to fundamental body awareness principles in relationship to physical performance skills for vocal performance majors. Methods for heightening kinesthetic awareness will be learned in the form of movement explorations, improvisations, structures, and learned phrases to gain somatic insight into the performer's sense of verticality in all places and dimensions of space. The concepts of the body in motion will be a primary context and focus for the progression of studies or 'etudes,' and for the reflective and analytical processes that include observation, journaling, discussion and peer commentary. Studio activities in solo, partnering, and group work will further the student's knowledge of how to become more responsive, expressive, and communicative when interacting with the surrounding environment and with others. Integrated with the body-mind practice and theoretical study, students will be encouraged to inquire, examine and articulate possible philosophies regarding why the mastery of the performer's physical body requires an essential sense of discipline that is cultivated in the performing arts, and how the somatic practices being investigated can serve his/her performance presence and support one's vocal training and health for the long-term.

MUAC 3120 Seminar in Music Theory (1-5 Credits)
Practical application of harmonic (written and aural) materials of 18th, 19th, early 20th centuries. Creative projects and harmonic analysis required.

MUAC 3124 Composition Seminar (1 Credit)
Composition Seminar focuses on the reading and performance of modern scores by Lamont and recognized composers. Any student composing music or wishing to perform new compositions at Lamont may register and participate. Requirements for composers include the completion, rehearsal and performance of a piece of music at the New Music Ensemble concert each quarter. Non-composers are required to rehearse and perform at the New Music Ensemble concert. Composers enrolled in the ensemble may be required to play compositions submitted as well.
MUAC 3161 Topics in 20th-Century Opera (4 Credits)
Through the close study of particular twentieth-century operas and musicals, this course will consider such issues as opera and film, musicals as a business, feminist criticism of opera librettos, the personal politics of opera. In addition to assigned excerpts, students will view three complete works during the quarter. Primary and secondary source readings will serve as the texts for the course.

MUAC 3165 Music Theater Survey (2 Credits)
A historical overview of the American Broadway musical, performance technique, audition preparation and repertoire. Must be prepared to sing and perform.

MUAC 3196 Advanced Composition Tutorial (4 Credits)

MUAC 3200 Recitative in Opera & Oratorio (2 Credits)
The fluid singing of recitative in German, English, Italian and French will be explored and practiced in this class. Students will harmonically analyze examples, add ornamentation, and perform recitative with a knowledge of the translation and emotional content.

MUAC 3234 Cycle of Seasons-Resources (1 Credit)

MUAC 3235 Preschool Music Workshop (3 Credits)

MUAC 3236 Family Music Workshop (1 Credit)

MUAC 3237 Music Makers at the Keyboard (3 Credits)
This 30-hour workshop presents the keyboard method for groups of young beginners ages 5-9.

MUAC 3238 Music Makers at Home & World (3 Credits)
This 30-hour workshop presents the method for a sequential two-year program that guides the musical development of children ages 4-7. Different world cultures are celebrated through music, songs, dances, stories, and rituals.

MUAC 3240 Vocal Pedagogy (2 Credits)
Psychological and physical aspects of teaching of singing.

MUAC 3241 Voice Pedagogy (2 Credits)
Psychological and physical aspects of teaching of singing.

MUAC 3282 Suzuki Violin Seminar II (2 Credits)

MUAC 3283 Suzuki Violin Seminar II (2 Credits)

MUAC 3284 Suzuki Violin Seminar II (2 Credits)

MUAC 3333 Advanced Vocal Pedagogy (2 Credits)
An advanced study of the science behind the singing voice, including the biomechanics of phonation, identifying systems and changes in the voice, posture and breathing that impact phonation, and a physiologic approach to vocal exercises in preparation for teaching voice. Prerequisite: MUAC 3242.

MUAC 3350 Social History-Modern Britain (4 Credits)
This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissension as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with HIST 3350.

MUAC 3439 Teaching Note Reading (2 Credits)

MUAC 3460 Suzuki Cello Practicum (1 Credit)

MUAC 3461 Suzuki Cello Practicum (1 Credit)

MUAC 3462 Suzuki Cello Practicum (1 Credit)

MUAC 3463 Suzuki Cello Seminar I (2 Credits)

MUAC 3464 Suzuki Cello Seminar I (2 Credits)

MUAC 3465 Suzuki Cello Seminar I (2 Credits)

MUAC 3466 Suzuki Cello Seminar II (2 Credits)

MUAC 3467 Suzuki Cello Seminar II (2 Credits)

MUAC 3468 Suzuki Cello Seminar II (2 Credits)

MUAC 3470 Suzuki Violin Seminar I (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.
MUAC 3471 Suzuki Violin Seminar I (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

MUAC 3472 Suzuki Violin Seminar II (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

MUAC 3477 Suzuki Violin Practicum (1 Credit)
MUAC 3478 Suzuki Violin Practicum (1 Credit)
MUAC 3479 Suzuki Violin Practicum (1 Credit)

MUAC 3492 History of Opera: From Monteverdi to Minimalism and Beyond (4 Credits)
This seminar course surveys the history of opera from the invention of the genre c. 1600 to the present day. In addition to assigned excerpts, students view three complete operas during the quarter. Primary and secondary source readings supplement the required text and class lectures. Students write a research paper that may examine some aspect of a particular opera or that may compare a particular aspect found in several operas. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

MUAC 3493 Approaches to American Popular Music (4 Credits)
We explore a number of topics involved in the study of popular music, including tensions between analytical and cultural approaches; issues of race, class, and gender; and constructions of authenticity and personae. Listening and reading are wide-ranging, encompassing diverse styles. The course concludes with individual research projects and presentations on topics students choose and develop.

MUAC 3494 Music and Belief in World Cultures (4 Credits)
How does music affect religious experience and how does religion shape musical practice? Why is music vital in some religious rituals and expressly banned in others? If humans use music to create, reflect, and comment upon the worlds they experience and imagine, then the use of music in religious practice is among its most powerful and ephemeral. Students are introduced to a wide range of musical traditions and their relationship to many of the world's religions, including Islam, Judaism, Christianity, Buddhism, Hinduism, Native American belief and the religious practices of Africa and its diaspora. Readings, lectures and discussions are supplemented by guest lecture demonstrations, film/video screenings and hands-on workshops.
Prerequisite: Junior or senior standing required; sophomores allowed with instructor approval.

MUAC 3497 Studying Music in the Field: Theory and Method in Ethnomusicology (4 Credits)
This course introduces issues that motivate ethnomusicological research and techniques for carrying out fieldwork, the ethnographic method which has largely come to define the discipline. Our primary texts include Bruno Nettl's classic text, The Study of Ethnomusicology, and Shadows in the Field, a seminal volume of essays discussing ethnomusicological fieldwork. This course also involves hands-on experience in some of the major fieldwork techniques, including field observation and writing fieldnotes, musical transcription and interviewing. This course culminates in a field research project in a Denver musical community determined in consultation with the professor. Note: this course is not open to freshman; sophomores allowed with permission of instructor.

MUAC 3498 Music, Dance, and Everyday Life in South Asia (4 Credits)
This course serves as an introduction to a diverse array of performance traditions from the South Asian subcontinent. We examine the significance of music and dance in everyday life, the influence of media technology, and the relationship of performance to issues such as caste, gender, nationalism and globalization. Class discussions are supplemented by guest lectures, hands-on workshops and film screenings. Our study of music outweighs that of dance, and a music background is strongly encouraged. This course is not open to first-year students. Sophomores allowed with instructor approval.

MUAC 3499 Topics in Musicology (4 Credits)
This course focuses on particular musicology topics determined by the instructor. Course materials may include primary and secondary source readings, theoretical writings from other disciplines, a variety of listening assignments, film/video screenings, guest lecture demonstrations, and hands-on workshops. Students are expected to participate in class discussions and may be asked to write short response papers and/or to give short oral presentations. The course concludes with individual research projects, presented orally and in written form, on topics chosen and developed in consultation with the instructor. Expectations for graduate students enrolled in the course are commensurate with their training and background as compared to undergraduates enrolled in the course. In some cases, with the prior consent of the instructor, students may choose to combine performance with the final research project. Prerequisite: Junior standing.

MUAC 3502 Gender & Genre in World Music (4 Credits)
How are concepts of "maleness," "femaleness" and other gendered categories constructed, maintained, and contested through musical performance? This course examines the issues explored and debated in recent studies of gender in music. We focus on reading and discussion of ethno-musicological and anthropological ethnographies, musicological studies focusing on gender and theoretical writings from gender and women's studies. Lectures and discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores can register with instructor approval.

MUAC 3511 Mahler and Musical Culture (4 Credits)
We explore Gustav Mahler's life, historical context, and music, all in relation to one another. The focus is on recent and important scholarly approaches to this conductor and composer. The course concludes with individual research projects and presentations on topics students choose and develop.

MUAC 3513 Wagner and the Ideology of the Artwork (4 Credits)
We explore Richard Wagner's music dramas, particularly the Ring operas, as well as theories and ideologies surrounding them. The focus is on recent and important scholarly approaches. The course concludes with individual research projects and presentations on topics students choose and develop.
MUAC 3520 Topics in Baroque Music (4 Credits)
Through the study of selected Baroque instrumental, vocal and operatic works, this seminar course considers various approaches to performance practice issues such as "authenticity," the "historically informed" performance, period instruments, ornamentation, continuo realization, and editing. Facsimile editions and primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of Baroque music with an emphasis on performance practice. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

MUAC 3535 Musics of the African Diaspora (4 Credits)
How have African music-cultures changed in their transitions to new lands? What performative Africanisms have been retained, reconstructed and/or highlighted in the aftermath of legal slavery? And within newer Afro-diasporic communities? What role does musical transmission play in cultural retention and survival? This course will explore the connections and differences in musical practice and worldview throughout the African diaspora. We focus primarily on music-cultures of North, South, and Central America, and the Caribbean, examining traditional forms of music and dance associated with religion and ritual such as Afro-Cuban bata drumming, practices which fuse music and movement such as Afro-Brazilian capoeira, jazz, and popular music such as rap. Lectures and class discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores with permission of instructor.

MUAC 3541 Mozart's Piano Concertos (4 Credits)
Cultural context, stylistic sources, stylistic development, meaning, and performance issues with regard to Mozart's 30 works in the piano concerto genre. Principles for the creation of stylistic cadenzas, lean-ins, embellishments, "white-spot" fill-ins, and basso continuo realizations. Considerations of means for integration aspects of the concertos' original cultural context into performance for twenty-first-century pianists, orchestral players, and their listeners. Course is designed for both pianists and non-pianists and can be taken by graduate students and upper-division undergraduate students.

MUAC 3542 Beethoven's Piano Concertos (4 Credits)
Cultural context, stylistic sources, stylistic development, meaning, and performance issues with regard to Beethoven's works in the piano concerto genre, including the triple concerto and the choral fantasia with piano. Consideration of means of integrating aspects of the concertos' original cultural context into performance for twenty-first-century pianists, orchestral players, and their listeners. Course is designated for both pianists and non-pianists and can be taken by graduate students and upper-division undergraduate students.

MUAC 3543 Schubert and the Piano: Sonatas and Chamber Music (4 Credits)
Cultural context, stylistic sources, stylistic development, meaning, and performance issues with regard to Franz Peter Schubert's works in the piano sonata genre - whether for two or four hands - and other closely related genres. Consideration of means for integrating aspects of the works' original cultural context into performance for 21st-Century pianists and their listeners. Course is designed for both pianists and non-pianists and can be taken by graduate students and upper-division undergraduate students.

MUAC 3545 The Making of Romantic Music: Paris and Leipzig in the 1830s (4 Credits)
With a view to identifying the various interdisciplinary factors that led to the making of romantic music, this seminar course focuses on musical life in Paris and Leipzig in the 1830s. Specific attention is paid to the music of Chopin, Berlioz, Mendelssohn, and Robert and Clara Schumann and the personal and musical connections between these composers. Primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of music and/or musical life in the 1830s. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

MUAC 3550 Major Composers-J.S. Bach (4 Credits)
Music of Bach, including chronological development, form and style, studied against background of baroque musical practice and circumstances of Bach's life and temperament. Prerequisites: MUAC 1621, 1622 and 1623.

MUAC 3570 Major Composers: Beethoven (4 Credits)
MUAC 3578 Theory III: Advanced Composition (4 Credits)
Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression.

MUAC 3579 Advanced Composition (3 Credits)
Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression. May be taken more than once for credit. Prerequisite: MUAC 3020.

MUAC 3590 Guitar History (4 Credits)
MUAC 3600 The Evolution of Rock (4 Credits)
This course traces the history of rock from the Beatles in the early 60's to the most recent developments of the 90's. The course provides a concise overview of this most influential musical phenomenon. Designed for the non-music major, it requires no prerequisites. Classes consist of lectures and listening. All listening examples are available via computer to each student.

MUAC 3650 Orchestral Excerpts-Cello (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.
MUAC 3655 Orchestral Excerpts-Bass (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock audition and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3660 Orchestral Excerpts-Violin (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3661 Orchestral Excerpts Viola (4 Credits)
This course explores excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students are given a list of excerpts and coached on how to prepare them. They participate in mock auditions and receive feedback. This course also addresses the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3662 Orchestral Studies for Brass (2 Credits)
Study of orchestral literature brass players are likely to be asked to play at auditions for professional orchestras. Undergraduate participants should have passed their Sophomore Proficiency jury with distinction.

MUAC 3663 Orchestral Excerpts, Viola II (4 Credits)
Companion course to Orchestral Excerpts Viola I, this section expands the repertoire list beyond the standard works used for auditions today. In addition to further honing basic requisite material from section I, students study and prepare less frequently required works and principle viola solo repertoire. There is more extensive discussion of the audition process and mock auditions as a part of the course. While it is advised and preferable that students complete the first section of this course it is possible to take the course with the approval of the instructor.

MUAC 3662 Topics-Orchestral Repertoire (4 Credits)
We explore the history of the orchestra and orchestral literature from the baroque through modern eras, and examine a number of test cases in which conventional understanding has been challenged in recent years. The course concludes with individual research projects and presentations on topics students choose and develop.

MUAC 3683 History of Chamber Music (4 Credits)
Chamber music from baroque trio sonata to contemporary electronic works. Prerequisites: MUAC 1621, MUAC 1622 and MUAC 1623. Winter quarter only.

MUAC 3684 Choral Literature I (2 Credits)
This course is an analysis of the development of choral repertoire from the Middle Ages through the Baroque era.

MUAC 3686 Choral Pedagogy I (2 Credits)
The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

MUAC 3688 Choral Pedagogy II (2 Credits)
The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

MUAC 3698 Carillon History and Mechanics (4 Credits)
A survey of the evolution of signal bells into the musical instrument known as the carillon. This subject is often called "campanology." The history will be traced from the 16th century in the Low Countries through modern times in Europe, North America, Australia/New Zealand and Japan. Topics will include bell foundries, bell casting and tuning, bell chambers, playing actions, carillonneurs, carillon schools, carillon organizations, the use of the carillon in its various regions and basic carillon maintenance.

MUAC 3700 Carillon Repertoire (4 Credits)
A survey of the music expressly produced for carillon from the earliest times through the present. Categories include automatic music (e.g., De Sany, Wyckaert, Eggert), the earliest compositions for manual play (Van den Gheyn and the Louvain manuscripts of the 18th century), and the 20th-century categories: Flemish, Dutch, French and North American. Mainstream publishers as well as incidental publications will be covered. The labs will focus on analysis through recordings and live performances by participants.

MUAC 3704 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.

MUAC 3705 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.

MUAC 3706 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.
MUAC 3707 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3708 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3709 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3710 Carillon Pedagogy I (2 Credits)
An exploration of the physical and psychological elements that can lead to effective carillon teaching: technique, handling/pedaling (“fingering” on the piano), and developing an attitude that fosters successful performance.

MUAC 3711 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3712 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3713 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3717 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3718 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3719 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3724 Pedagogy & Repertoire Guitar (4 Credits)
Teaching techniques and survey of literature and teaching materials for the guitar.

MUAC 3726 Pedagogy & Repertoire Viola (4 Credits)
Teaching techniques and survey of literature and teaching materials for the viola.

MUAC 3727 Pedagogy & Repertoire Viola (4 Credits)
Teaching techniques and survey of literature and teaching materials for the viola.

MUAC 3730 Pedagogy & Repertoire Cello (4 Credits)
Teaching techniques and survey of literature and teaching materials for the cello.

MUAC 3733 Pedagogy & Rep Double Bass (4 Credits)
Teaching techniques and survey of literature and teaching materials for the double bass.

MUAC 3735 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3736 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3737 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3738 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3739 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3740 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3741 Pedagogy & Repertoire Trumpet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trumpet.

MUAC 3742 Pedagogy & Repertoire Trumpet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trumpet.

MUAC 3743 Pedagogy & Repertoire Trumpet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trumpet.

MUAC 3747 Pedagogy & Repertoire Flute (4 Credits)
Teaching techniques and survey of literature and teaching materials for the flute.
MUAC 3748 Pedagogy & Repertoire Flute (4 Credits)
Teaching techniques and survey of literature and teaching materials for the flute.

MUAC 3749 Pedagogy & Repertoire Flute (4 Credits)
Teaching techniques and survey of literature and teaching materials for the flute.

MUAC 3750 Pedagogy & Repertoire Clarinet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3751 Pedagogy & Repertoire Clarinet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3752 Pedagogy & Repertoire Clarinet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3753 Pedagogy & Repertoire Saxophone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3754 Pedagogy & Repertoire Saxophone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3755 Pedagogy & Repertoire Saxophone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3756 Pedagogy & Repertoire Oboe (4 Credits)
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3757 Pedagogy & Repertoire Oboe (4 Credits)
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3758 Pedagogy & Repertoire Oboe (4 Credits)
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3759 Pedagogy & Repertoire Bassoon (4 Credits)
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3761 Pedagogy & Repertoire Bassoon (4 Credits)
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3762 Pedagogy & Repertoire Bassoon (4 Credits)
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3765 Professional Brass Techniques (4 Credits)
This 4-hour per week course will be divided into a lecture/seminar for two hours and performance practicum for two hours. Topics discussed and performed include orchestral playing, sight reading, practice, solo performance, jazz survival, ornamentation, transposition, and warm-up/maintenance routine.

MUAC 3801 Introduction to Schenkerian Analysis (4 Credits)

MUAC 3804 Topics in Music (1-5 Credits)

MUAC 3810 Voice Repertoire (2 Credits)
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3811 Voice Repertoire (2 Credits)
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3812 Voice Repertoire (2 Credits)
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3822 Piano Repertoire I (2 Credits)
Performance and analysis.

MUAC 3823 Piano Repertoire II (3 Credits)
Performance and analysis.

MUAC 3824 Piano Repertoire III (3 Credits)
Performance and analysis.

MUAC 3830 Theory III: Jazz and Commercial Music Orchestration and Arranging (4 Credits)
This course offers an in-depth, three term sequence of the theory, forms and styles of commercial music composition. Prerequisite: Satisfactory completion of first- and second-year written and aural theory. Final projects include production of a "studio orchestra" piece and writing for a film, including MIDI and SMPTE technologies.
MUAC 3831 Theory III: Jazz and Commercial Music Orchestration and Arranging (4 Credits)
This course offers an in-depth, three term sequence of the theory, forms and styles of commercial music composition. Prerequisite: Satisfactory completion of first- and second-year written and aural theory. Final projects include production of a "studio orchestra" piece and writing for a film, including MIDI and SMPTE technologies.

MUAC 3832 Theory III: Jazz and Commercial Music Orchestration and Arranging (4 Credits)
This course offers an in-depth, three term sequence of the theory, forms and styles of commercial music composition. Prerequisite: Satisfactory completion of first- and second-year written and aural theory. Final projects include production of a "studio orchestra" piece and writing for a film, including MIDI and SMPTE technologies.

MUAC 3841 Jazz & Commercial Music History/Repertoire (4 Credits)

MUAC 3842 Jazz & Commercial Music History/Repertoire (4 Credits)
Writing for small and large jazz groups; accompaniment skills; writing for live performance versus writing for recorded performance. Prerequisite: MUAC 3830.

MUAC 3843 Jazz & Commercial Music History/Repertoire (4 Credits)
Writing for small and large jazz groups; accompaniment skills; writing for live performance versus writing for recorded performance. Prerequisite: MUAC 3830.

MUAC 3860 Theory III: Basic Jazz Improvisation (4 Credits)
The study of jazz improvisation techniques and forms. Open to music majors or by instructor permission.

MUAC 3870 Theory III: Jazz Improvisation & Composition (4 Credits)
Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

MUAC 3872 Theory III: Jazz Improvisation & Composition (4 Credits)
Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational style. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

MUAC 3910 Theory III: Orchestration (4 Credits)
Techniques of instrumental scoring.

MUAC 3933 Graduate Music History Review (0 Credits)

MUAC 3935 Graduate Music Theory Review (0 Credits)
This course provides an accelerated review of materials from the undergraduate theory core, including analysis and written exercises in diatonic and chromatic harmony, counterpoint, tonal forms, and an introduction to 20th-Century theory.

MUAC 3959 Movement and Expression for Conductors (2 Credits)
Conductors use their whole body to communicate and elicit successful performances from their ensemble. If you have unnecessary tension or lack of ease in your body, this is communicated unconsciously to your ensemble, hindering quality of performance. Additionally, physical tension can prevent your ability to communicate and think clearly under pressure. This course is an exploration of freedom of movement and the physicality of musical expression. Classes will include group activities in free-movement, dance, acting, keeping your cool, poise, balance, tension release, as well as hands-on instruction applying Alexander technique to your conducting.

MUAC 3960 Advanced Orchestral Conducting (2 Credits)
Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Required of MM Conducting students with Choral or wind concentrations. Open to other students with permission of instructor. Prerequisite: Permission of instructor (not needed for MM Conducting students with Choral or Wind concentration). Fall quarter only.

MUAC 3961 Advanced Choral Conducting (2 Credits)
Conducting complex choral works, including those with instrumental accompaniment; phrasing, interpretation and score reading. Prerequisite: MUAC 2940. Fall quarter only.

MUAC 3962 Advanced Wind Conducting (2 Credits)
Conducting complex wind compositions; phrasing interpretation and score reading. Prerequisite: MUAC 2970. Spring quarter only.

MUAC 3973 Advanced Wind Literature I (2 Credits)
This course is an overview of wind literature appropriate for junior high school, high school, college and professional programs including strategies in effective programming and creation of appropriate program notes.

MUAC 3974 Advanced Wind Literature II (2 Credits)
An in-depth study of successful compositional techniques by prominent composers of wind literature. Prerequisite: MUAC 3973.

MUAC 3980 Advanced Jazz Improvisation and Composition (4 Credits)
A three term sequence continuing the in-depth study of the theory, performance practices, style, and history of jazz improvisation and composition. Prerequisite: satisfactory completion of the three terms of Jazz Improvisation and Composition or consent of the instructor.

MUAC 3990 Internship in Music (1-8 Credits)
Internship in Music will offer opportunities for music majors to experience actual music related careers within a sponsoring music organization chosen by the student and accepted by the supervising faculty of the School of Music.
MUAC 3991 Independent Study (1-10 Credits)
MUAC 3992 Directed Study (1-10 Credits)
MUAC 4000 Introduction to Graduate Study (2 Credits)
Problems of research in various chronological epochs of Western musical culture; research techniques and sources used in research; formal writing style.
MUAC 4010 Pedagogy of Music Theory (4 Credits)
Materials, devices, techniques of teaching theory. Students must have successfully completed undergraduate music theory or passed graduate review theory.
MUAC 4020 Intro Research in Music Ed (2 Credits)
Foundations in measurement and evaluation of musical behaviors and understanding, using, designing primary research projects in music education.
MUAC 4050 Major Adv Repertoire Guitar (2 Credits)
Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.
MUAC 4051 Major Adv Repertoire Guitar (2 Credits)
Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.
MUAC 4052 Major Adv Repertoire Guitar (2 Credits)
Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.
MUAC 4055 Major Adv Repertoire Guitar (2 Credits)
Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.
MUAC 4090 Model Composition (4 Credits)
Students in this course deepen their understanding of musical styles and techniques by composing works that imitate major composers before 1900. Music by each student is performed in a final recital. Prerequisite: Tonal Counterpoint, equivalent coursework from another institution, or permission of instructor.
MUAC 4189 Jazz Performance Techniques (2 Credits)
Individual study of jazz performance techniques in a directed study environment.
MUAC 4196 Graduate Composition Tutorial (2 Credits)
MUAC 4200 Diction-Graduate Voice Majors (2 Credits)
This course is designed to help refine the diction skills of graduate students in voice, with an emphasis on Italian, French and German. Native speakers will be presented, and the student will learn some basic vocabulary and syntactical aspects of the language.
MUAC 4300 Topics in Jazz History (2 Credits)
A seminar focusing on a major figure of jazz history. Detailed examination of a single artist, their life, music and influences.
MUAC 4512 Stories of Music History (4 Credits)
We explore a number of case studies in which "conventional wisdom" about a composer, repertory, or a period of time turns out to be not universally "true," but instead contingent on cultural context and changing ideologies about music. The course concludes with individual research projects and presentations on topics students choose and develop.
MUAC 4520 Topics in Hindustani Music (4 Credits)
This course explores the melodic system (raga) and rhythmic system (tala) of Hindustani music, the classical music of North India. These conceptual frameworks act both as sound structures to be realized in improvised performance and as aesthetic entities manifested in the related traditions of dance, iconography, and film. A major emphasis of this course will be developing an understanding of raga and tala as musical structures through intensive listening as well as practical instruction. Accordingly, one class each week is designed to incorporate hands-on music-making through singing, rhythmic exercises, and dance. By the end of the quarter, students will become familiar with several ragas and talas and the stages by which they are developed in performance. A second, equally important objective is to learn to appreciate ragas as aesthetic entities. We will analyze their musical characteristics as well as the "extra-musical" characteristics of sentiment (rasa), performance time and/or season and iconographic associations (ragamala painting).
MUAC 4535 Baroque Opera on Stage (4 Credits)
This course will explore aspects of Baroque opera not immediately conveyed by a score - including staging, gesture, scenic design, machinery, theater space, performers response - as they inform our understanding of specific Baroque operas and the cultural context within which they were performed. We will focus on operas by Monteverdi, Cavalli, Purcell, Handel, Lully, Campra and Rameau, among others. Students should expect to participate in class discussions, to write short response papers, to give short oral presentations, and to write a 12 to 15 page paper that examines a Baroque opera or operas in the light of one or more performance considerations. With the prior consent of the instructor, students may submit an alternative final project, one which combines performance with some form of written work.
MUAC 4831 Prof Found-Piano Pedagogy (2 Credits)
Literature in musical aesthetics, educational philosophy, psychology; curriculum development; group teaching processes; interpretation and technique; foundations of educational research in music; practice teaching of children and adults.
MUAC 4832 Prof Found-Piano Pedagogy (2 Credits)
Literature in musical aesthetics, educational philosophy, psychology; curriculum development; group teaching processes; interpretation and technique; foundations of educational research in music; practice teaching of children and adults.
MUAC 4833 Prof Found-Piano Pedagogy (2 Credits)
Literature in musical aesthetics, educational philosophy, psychology; curriculum development; group teaching processes; interpretation and technique; foundations of educational research in music; practice teaching of children and adults.

MUAC 4837 Pedagogy and Repertoire Organ (2 Credits)
Study of teaching techniques, survey of literature and teaching materials from the 20th and 21st centuries. Prerequisite: MUAC 3740.

MUAC 4840 Piano Teaching Practicum (1 Credit)
Guided observations, lesson planning, practice teaching of students of various developmental age groups using foundations and principles developed in Piano Pedagogy.

MUAC 4841 Piano Teaching Practicum (1 Credit)
Guided observations, lesson planning, practice teaching of students of various developmental age groups using foundations and principles developed in Piano Pedagogy.

MUAC 4842 Piano Teaching Practicum (1 Credit)
Guided observations, lesson planning, practice teaching of students of various developmental age groups using foundations and principles developed in Piano Pedagogy.

MUAC 4850 Sem Piano Ped-Preschool Chld (2 Credits)
Designing piano-centered music education offerings for preschool-aged children. Prerequisites: MUAC 4831, MUAC 4832, MUAC 4833 or equivalent.

MUAC 4851 Sem Piano Ped-Elem Children (2 Credits)
Designing piano-centered music education offerings at elementary level for school-aged children. Prerequisites: MUAC 4831, MUAC 4832, MUAC 4833 or equivalent.

MUAC 4853 Sem Piano Pedagogy-Beg/Int Adt (2 Credits)
Designing piano-centered music education offerings, including college/university courses, for beginning- and intermediate-level adults. Prerequisites: MUAC 4831, MUAC 4832, MUAC 4833 or equivalent.

MUAC 4854 Sem Piano Ped-Adv Students (2 Credits)
Designing advanced piano instruction for adolescents and adults. Prerequisites: MUAC 4831, MUAC 4832, MUAC 4833 or equivalent.

MUAC 4855 Sem Piano Pedegogy-Beg/Int Adt (2 Credits)
Designing piano-centered music education offerings, including college/university courses, for beginning- and intermediate-level adults. Prerequisites: MUAC 4831, MUAC 4832, MUAC 4833 or equivalent.

MUAC 4929 Tutorials-Theoretical Subject (1-5 Credits)
Individual instruction in all areas of music theory with regularly scheduled meetings allowing students to acquire necessary skills to qualify for upper-division and/or graduate courses. Summer session only.

MUAC 4930 Conducting Tutorial (2 Credits)
Private tutorial in orchestral conducting. Open to Orchestral Conducting majors only.

MUAC 4934 Choral Pedagogy (4 Credits)
A comprehensive investigation of the art and science of choral music instruction. Students use philosophical and theoretical learning to develop a practical approach to choral music instruction. Students identify personal strengths in the area of choral music instruction as well as areas for improvement.

MUAC 4991 Independent Study (1-10 Credits)
MUAC 4992 Directed Study (1-10 Credits)
MUAC 4993 Independent Study (1-10 Credits)
MUAC 4995 Thesis Research (1-10 Credits)
MUAC 4999 Graduate Recital (1-10 Credits)
MUAC 5991 Graduate Thesis (1-10 Credits)

Music-Ensembles Courses
MUEN 3025 Ensemble Block (3 Credits)
Required for all incoming first-year music majors.

MUEN 3028 Album Combo (0-1 Credits)
The study and performance of the skills and practices of collective improvisation and composition.

MUEN 3029 Steel Drum Ensemble (0-1 Credits)
The steel drum music of Trinidad and Tobago as well as other styles of music from around the world are studied and performed by this ensemble. Participation in this ensemble does not require music notation. Participation in the ensemble is limited; therefore, students are selected by a simple audition process.

MUEN 3030 Hard Bop Combo (0-1 Credits)
The Hard Bop Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Hard Bop jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.
MUEN 3031 Bebop Combo (0-1 Credits)
The Bebop Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Bebop jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3032 Latin Combo (0-1 Credits)
The Latin Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Latin jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3033 Standards Combo (0-1 Credits)
The Standards Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with standard jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3034 Traditional Jazz Combo (0-1 Credits)
The Traditional Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with traditional (Dixieland) jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3035 Fusion Combo (0-1 Credits)
The Fusion Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with fusion jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3036 Commercial Music Combo (0-1 Credits)
The Commercial Music Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with commercial music repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3037 Vocal Repertoire Combo (0-1 Credits)
The Vocal Repertoire Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz solo repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3038 Vocal Jazz Combo (0-1 Credits)
The Vocal Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3039 Modal Combo (0-1 Credits)
The Modal Combo is coached by one of our faculty of performing jazz and commercial artists and is concerned with modal jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3040 Contemporary Combo (0-1 Credits)
The Contemporary Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with contemporary jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3041 North Indian Classical Ensemble (0-1 Credits)
The arts of India are distinguished by their close interrelationship; rhythm, melody and movement are all encompassed by the term "sangeet." In keeping, DU's North Indian Classical Ensemble is dedicated to the practice of all three of these arts, through singing, rhythmic recitation and dance. Participation in this ensemble involves studying the ornate and highly refined systems of Hindustani music and Kathak dance. No prior experience is necessary; all that is required is a positive attitude and a desire to learn!

MUEN 3042 Advanced Vocal Jazz Repertoire (0-1 Credits)
This combo is intended for vocal jazz majors who have completed the first year of Vocal Jazz Repertoire and are ready to progress into more advanced repertoire, as well as composing and arranging for small group settings.

MUEN 3043 Senegalese Drum/Dance Ensemble (0-1 Credits)
This ensemble is dedicated to learning the art of sabar dance and drumming, vibrant traditions of the Wolof people of Senegal, West Africa. In Senegal, sabar drums are played exclusively by griots, a caste of hereditary musicians. Sabar drum troupes perform at a variety of events, baptisms, weddings, wrestling matches, political meetings, and neighborhood dance parties. At most of these events, dance is an essential counterpart to drumming. The drum ensemble consists of numerous parts that come together to create complex polyrhythms. Ensemble members learn various drum parts that form rhythms over which a lead drummer solos, and dance movements that accompany these drum rhythms. They also learn bakks, extended musical phrases played in unison, and songs in the Wolof language. This course may be taken multiple times. This course counts toward the Analytical Inquiry: Society and Culture requirement.
MUEN 3044 Ghanaian Drumming Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to the drumming and singing traditions of Ghana, West Africa. Through hands-on instruction and oral transmission, students learn ceremonial and recreational music styles of select ethnic groups. Assigned readings, film viewing, guided listening, and in-class discussion familiarizes students with the social and cultural meanings of the music performed in class. The course culminates in an end of the quarter concert. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3045 Flex Jazz Ensemble (0-1 Credits)
The Flex Jazz Ensemble is a modern jazz group with open-ended instrumentation. The ensemble consists of traditional jazz instruments and vocalists as well as nontraditional jazz instruments (such as double reed, French Horns, strings, etc). While there is no specific instrumentation for the ensemble, the core of the group will always be the traditional modern jazz rhythm section: piano (keys-synth), bass (acoustic and electric), drums (plus an extra percussionist as needed), and guitar (hollow body and Stratocaster-styles with the full range of pedals and gear. With the addition of non-traditional instrumentation, the ensemble reaches out to the classical side of Lamont to give those students a jazz opportunity. Along with the regular fare of programmed concerts, this ensemble also provides opportunities to other departments (theatre, creative writing, studio art, EDP, etc) to incorporate their disciplines in performances.

MUEN 3710 Opera (0-1 Credits)
Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3712 Lamont Chorale (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3720 Pioneer Pep Band (0-1 Credits)

MUEN 3740 Lamont Men’s Choir (0-1 Credits)

MUEN 3750 Modern Music Ensemble (1 Credit)
The 20th- and 21st- Centuries have produced some of the most expressive, intriguing, and diverse music ever written. In this course, students have the opportunity to prepare and perform chamber music by 20th-Century masters, as well as recent works by living composers and new pieces written for them by students. This repertoire often involved unusual combinations of instruments (potentially including strings, woodwinds, brass, percussion, plucked instruments, keyboards, vocals, and electronics), providing an opportunity for students to work in less familiar ensembles. Students may also participate in the course by conducting or composing. The course is limited to music majors who are graduate students or advanced undergraduate students. Students in their first or second undergraduate year, and music non-majors may enroll with instructor approval.

MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3752 Lamont Wind Ensemble (0-1 Credits)
Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)
Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3754 University Jazz Ensemble (0-1 Credits)
The study of large ensemble jazz works for non-music majors. Must have high school performance ability.

MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)
The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3769 Organ Accompanying (0-1 Credits)
Major choral/vocal and major instrumental repertoire with organ accompaniment are studied and prepared for possible performance with chamber groups or local professional/church choirs.

MUEN 3770 Chamber Ensemble-Piano (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3771 Chamber Ensemble-Accordion (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3772 Chamber Ensemble-Harp (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3774 Chamber Ensemble-Brass (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3775 Piano Accompanying (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.
MUEN 3776 Chamber Ensemble-Percussion (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3777 Chamber Ensemble-Strings (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3778 Chamber Ensemble-Woodwind (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3781 Chamber Ensemble-Guitar (0-2 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3800 Vocal Chamber Ensemble (0-1 Credits)
A small group of outstanding singers interested in singing soloist vocal chamber music.

MUEN 3900 Lamont Women’s Chorus (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

Music-Studio Lessons Courses

MUPR 3120 Alexander Technique (2 Credits)
The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion.

MUPR 3121 Alexander Technique (4 Credits)
The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion. This class is tailored to the needs of students who are experiencing pain or injury and cannot take their regular studio lesson in a given quarter.

MUPR 3350 Organ Improvisation (2 Credits)
This course is designed for students to introduce them to the art of organ improvisation, hymn and ensemble playing, as well as all possible forms of accompaniment. It is meant for undergraduate students (upper division), graduate students, and artist diploma graduates. Prerequisites: knowledge of music history, figured bass, and counterpoint. Permission of instructor required.

MUPR 4191 Jazz Piano (2 Credits)
MUPR 4195 Applied Lessons (2,4 Credits)

MUPR 4210 Piano (2 Credits)
MUPR 4230 Voice (2 Credits)
MUPR 4250 Violin (2 Credits)
MUPR 4251 Violin (2 Credits)
MUPR 4270 Violoncello (2 Credits)
MUPR 4290 Viola (2 Credits)
MUPR 4310 Bass Violin (2 Credits)
MUPR 4312 Jazz Bass (2 Credits)
MUPR 4330 Harp (2 Credits)
MUPR 4350 Organ (2 Credits)
MUPR 4370 Clarinet (2 Credits)
MUPR 4390 Flute (2 Credits)
MUPR 4460 Bassoon (2 Credits)
MUPR 4480 Trombone (2 Credits)
MUPR 4481 Jazz Trombone (2 Credits)
MUPR 4500 Trumpet (2 Credits)
MUPR 4520 Horn (2 Credits)
MUPR 4540 Euphonium (2 Credits)
MUPR 4560 Tuba (2 Credits)
MUPR 4570 Tuba (4 Credits)
MUPR 4600 Classical Guitar (0-2 Credits)
MUPR 4610 Classical Guitar (4 Credits)
MUPR 4621 Jazz Guitar (2 Credits)
MUPR 4660 Percussion (2 Credits)
MUPR 4661 Percussion Set (2 Credits)
MUPR 4671 Percussion Set (4 Credits)
MUPR 4680 Oboe (2 Credits)
MUPR 4780 Saxophone (2 Credits)
MUPR 4900 Carillon (2 Credits)
MUPR 4920 Composition (2 Credits)

One-on-one instruction for composition majors.

Philosophy

Office: Sturm Hall, Room 257
Mail Code: Sturm Hall, Room 257, 2000 E. Asbury, Denver, CO 80208
Phone: 303-871-2063
Email: philosophy@du.edu
Web Site: http://www.du.edu/philosophy

Master of Arts in Philosophy

The department of philosophy at the University of Denver offers an MA in philosophy, but only when done through the university’s flexible dual-degree program in conjunction with an MA in another approved discipline. The philosophy faculty places a strong emphasis on research and personal interaction with students. Our program is designed to meet the needs of two kinds of students — those wishing to prepare for doctoral work in philosophy and those seeking an individualized course of study with a more interdisciplinary focus. Areas of concentration include the history of Western thought, interpretive and critical theory, practical philosophy, meta-philosophy, and studies in creative and critical reasoning about human nature and values.

Proposal Process for Flexible Dual-Degree Program in Philosophy

The dean, chair, or director of each degree program and both program advisors, must carefully compare the requirements for each program and approve the proposal. The student must then submit a copy of the original requirements for each degree (printout from the unit Web site or copy from the student handbook is acceptable), and the flexible dual-degree proposal to the Office of Graduate Studies. The philosophy department will provide a coursework template for the student to include with his or her proposal. The student then submits the documents listed above to the Office of Graduate Studies, which reviews and decides on the proposals. Proposals with errors or course/program inconsistencies will be returned for revision.

Any changes to the approved program require the student to resubmit a revised proposal packet to the deans/chairs/directors and advisors of both programs and the Office of Graduate Studies.

Once the proposal is approved, the student will be entered into the university computer system as a flexible dual-degree student for the following quarter.

Need admission content.

Master of Arts in Philosophy

Degree Requirements

Coursework Requirements

45 quarter hours in philosophy (students may propose to have this amount reduced by a maximum of 10 quarter hours under appropriate circumstances as specified by the flexible dual-degree guidelines). Because philosophy is part of a flexible dual degree program, these hours are required in addition to the required hours in another approved discipline. Courses graded below a C– cannot be counted for a flexible dual degree.

PHIL 3XXX, 4XXX, or 5XXX courses 45

Total Credits 45
Non-Coursework Requirements

- A comprehensive exam over the history of Western philosophy
- A portfolio paper approved by a committee of three department faculty
- An oral defense covering both the comprehensive exam on the history of Western philosophy and the portfolio paper

Courses

PHIL 3000 Plato's Metaphysics (4 Credits)
A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

PHIL 3003 Plato's Theory of Knowledge (4 Credits)
A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

PHIL 3010 Great Thinkers: Aristotle (4 Credits)
A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

PHIL 3020 Great Thinkers: Aquinas (5 Credits)
A study of Aquinas' central theories and doctrines. Prerequisite: 10 hours of philosophy at the 2000 level or permission of instructor. Cross listed with PHIL 3023.

PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)
Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

PHIL 3024 Great Thinkers: Maimonides: Greek, Muslim and Christian Encounters (4 Credits)
Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of ideas and in the history of Jewish thought. In this course, we examine in-depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers. Topics include Aquinas and Maimonides on Negative Theology; Aristotle and Maimonides on Creation, Eternity and Providence; Maimonidean Emanation meets Plotinus, the "Theology of Aristotle", and the "Liber de Causis"; relating Maimonides' cosmological and political theories to Avicenna, al-Farabi, and Averroes. Cross listed with JUST 3024. Prerequisite: junior standing or instructor's permission.

PHIL 3050 Great Thinkers: Hume (4 Credits)
A detailed study of Hume's "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor's permission.

PHIL 3061 Kant's Ethics/Aesthetics/Politics (4 Credits)
A study of Kant's "value theory" and its historical significance. Prerequisite: junior standing or instructor's permission.

PHIL 3062 Kant's Epistemology and Logic (4 Credits)
A study of Kant's theory of knowledge, logic and related issues. Prerequisite: junior standing or instructor's permission.

PHIL 3063 Kant on Religion (4 Credits)
A study of Immanuel Kant's major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor's permission.

PHIL 3070 Great Thinkers: Hegel (4 Credits)
Hegel's "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor's permission.

PHIL 3090 Great Thinkers: Heidegger (4 Credits)
Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor's permission.

PHIL 3092 Great Thinkers: The Later Heidegger (4 Credits)
Study of the works of Heidegger after 1930. Prerequisite: junior standing or instructor's permission.

PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)
Each year, the philosophy department offers at least two courses in great thinkers. Specific figures may vary from year to year. Cross-listed with RLGS 3102. Prerequisite: 10 hours of Philosophy at the 2000 level or permission of instructor.
PHIL 3111 Contemporary Continental Philosophy: The Figure of the Migrant (4 Credits)
The 21st century has been described as the century of “people on the move” by UNHCR High Commissioner Antonio Guterres. Some 11 million people are refugees worldwide, fleeing political violence and/or persecution at home; whole more than 20 million are internally displaced within the borders of their own countries. Accordingly, the figure of the migrant/refugee has emerged as one of the most important, if not the most important, political figures of contemporary continental philosophy. Despite differences in philosophical orientation, thinkers such as Gilles Deleuze, Judith Butler, Jacques Ranciere, Julia Kristeva, Alain Badiou, and Jacques Derrida have all written at length on the centrality of the figure of the migrant for contemporary political thought. Not only does the figure of the migrant define the people of our time, according to many of these authors, it also defines a positive political way forward. This course thus provides not only a survey of the different traditions in contemporary European philosophy over the last twenty years (post-structuralism, deconstruction, neo-classicism, post-Marxism, third-wave feminism) but also offers a thematic look at the politico-philosophical figure of the migrant and other issues related to migration (human rights, borders, camps, sovereignty, territory, nomadism, and resistance).

PHIL 3120 Metaphysics (4 Credits)
In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

PHIL 3130 Knowledge Problems (4 Credits)
Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

PHIL 3150 Metaphysics of Matter: Theory-Building from Science to Philosophy to Theology (4 Credits)
What is matter? How do we make sense of philosophical discussions of an “X I know not what”? Of a “nothing” which is something? Of a “pure potency” that lacks any actual characteristics? In what sense does matter mark the very limits of human theorizing, and how do theories of matter reveal differences (or similarities) between the methods of theorizing that we use in physics, metaphysics, and theology? In this course, we work to understand the metaphysics and metametaphysics of matter, focusing on a number of views of matter as well as on methodological questions of what it means to theorize about matter in (1) scientific, (2) philosophical, and (3) theological contexts. Drawing on theory ranging from ancient physics and cosmology to contemporary metaphysics, philosophy of science, and philosophy of language, we engage in close readings of ancient, medieval, and modern texts to challenge the ways we theorize about matter (and theory itself) in the history of philosophy. Requires junior standing or higher.

PHIL 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)
Neoplatonism is a unique genre—somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century “father of Neoplatonism”) into later Jewish and Islamic textual traditions. As part of our journey, we will investigate a host of philosophical writings, including the Theology of Aristotle and the Liber de Causis, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Avicecenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection and the call to virtue. Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3152.

PHIL 3175 Morality and the Law (4 Credits)
A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

PHIL 3176 Advanced Topics in Philosophy of Law: Rights, Legal Institutions, and Justice (4 Credits)
A critical examination of rights claims and an exploration of how those rights claims ought to affect legal institutions. What are rights? How are they justified? How do various different rights claims conflict with each other? Does a theory or rights help provide a justified theory of criminalization? Are there any rights we have just in virtue of being human? How does the concept of human rights apply to issues such as international law, the right to life and whether human rights require a right to democracy?.

PHIL 3177 Metaethics (4 Credits)
This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency, or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn’t the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

PHIL 3179 Virtue Ethics (4 Credits)
Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

PHIL 3180 Socratic Ethics (4 Credits)
A study of Plato's early dialogues in order to discern the ethical views of the historical Socrates. Prerequisite: junior standing or instructor's permission.
PHIL 3185 Philosophy of Action and Agency (4 Credits)
Wittgenstein once asked, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Understanding the difference between mere happening and an intentional action became central to the philosophical investigation of action and agency in the 20th century. In this course we examine this distinction and why it should matter to us. Our topics include intentional action, the causal theory of action, the metaphysics of action, agent causation, basic action, acting and trying to act, intentions, weakness of will, strength of will, and mental action. Requires junior standing or permission of instructor.

PHIL 3201 Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge (4 Credits)
A study of Wittgenstein, Quine, and Kripke on the nature of necessity, a priori knowledge and their relation to understanding philosophy. Prerequisite: junior standing or instructor's permission.

PHIL 3210 Philosophy of Movement (4 Credits)
Everything is in motion. Yet, philosophers have consistently considered motion to be a derivative or secondary form of being. Why? What are the political and metaphysical consequences of marginalizing motion in the history of philosophy? The aim of this class is to read the history of philosophy with a unique focus on the status of movement and motion from the ancient to contemporary period.

PHIL 3215 Modern Jewish Philosophy (4 Credits)
Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3215.

PHIL 3450 Phenomenology and Theology (4 Credits)
Cross listed with RLGS 3455. Prerequisite: junior standing or instructor's permission.

PHIL 3455 Philosophy and 9/11: Sovereignty in Traumatic Times (4 Credits)
Philosopher's responses to the attacks on 9/11/2001, leading into philosophical study of the connections between trauma and modern assertions of political sovereignty. Prerequisite: junior standing or instructor's permission.

PHIL 3460 Nietzsche & the Death of God (4 Credits)
This course involves an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Prerequisite: junior standing or instructor's permission. Cross listed with RLGS 3460.

PHIL 3465 Derrida and Postmodernism (4 Credits)
Cross listed with RLGS 3465. Prerequisite: junior standing or instructor's permission.

PHIL 3466 Contemporary Continental Philosophy (4 Credits)
A critical study of current trends in European philosophy, focusing on such thinkers as Deleuze, Badiou, Zizek, Meillassoux, or Laruelle. Prerequisite: junior standing or instructor's permission.

PHIL 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)
This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PSYC 3610. Prerequisites: PSYC 1001 and junior standing (or instructor approval).

PHIL 3618 Philosophy of Biology (4 Credits)
A survey of conceptual issues that lie at the intersection of biology and philosophy: the central concepts of evolutionary theory (such as natural selection, fitness, adaptation and function), the relation of biology to other "lower" sciences (can it be reduced to physics and chemistry?), whether there are genuine scientific laws in biology, and the relation between biology and other fields like cognitive science and ethics. At least Junior standing required.

PHIL 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)
This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

PHIL 3700 Topics in Philosophy (1-4 Credits)
Prerequisite: junior standing or instructor's permission.

PHIL 3701 Topics in Philosophy (1-4 Credits)
Prerequisite: junior standing or instructor's permission.

PHIL 3702 Topics in Philosophy (1-4 Credits)
Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

PHIL 3703 Topics in Philosophy (1-4 Credits)
Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.
PHIL 3704 Topics in Philosophy (1-4 Credits)  
Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

PHIL 3991 Independent Study (1-8 Credits)

PHIL 3992 Directed Study (1-10 Credits)

PHIL 4991 Independent Study (1-10 Credits)

PHIL 4992 Directed Study (1-10 Credits)

PHIL 4995 Independent Research (1-10 Credits)

PHIL 5300 Philosophy Colloquium (4 Credits)

PHIL 5400 Cultural Theory Colloquium (1-5 Credits)

Religious Studies

Office: Department of Religious Studies, Room 266  
Mail Code: 2000 E. Asbury Ave., Denver, CO 80208  
Phone: 303-871-2740  
Email: rlgs@du.edu  
Web Site: http://www.du.edu/rlgs

The Department of Religious Studies offers a master of arts (MA) degree in Religious Studies and, together with the Iliff School of Theology, a doctor of philosophy (PhD) degree, as well as a graduate certificate in Religious Studies.

Why pursue an MA in Religious Studies at the University of Denver?

The Department of Religious Studies offers graduate students the opportunity to study with its distinguished faculty in a program that emphasizes breadth and depth. Religious Studies faculty members are well published and have won several distinguished teaching awards. They have served in leadership roles in national learned societies and have received grants from the National Endowment for the Humanities, the American Council of Learned Societies and the Guggenheim Foundation.

The program provides students with a substantive grounding in the major religious traditions of the world, as well as training in the discipline of religious studies. Through the areas of specialization, it provides students with the opportunity to develop a specific and scholarly expertise in one of the following particular fields of interest: Biblical Studies, Theory of Religion, International and Multicultural Studies, Philosophy of Religion, Islamic Studies and World Religions. Students can use these areas of specializations to deepen their own expertise in a particular area while preparing for thesis work or comprehensive exams.

As part of broader University mandates to support interdisciplinary work and internationalization (study and research abroad), the Department of Religious Studies expects students to embrace multiple disciplinary perspectives. It encourages students to enrich their graduate studies by taking courses in other departments and to work with faculty outside Religious Studies. For example, students in the MA program routinely take graduate-level courses in Anthropology, International Studies, Philosophy and Art History. Similarly, students in the MA program are encouraged to pursue advanced language training in the language(s) of their sub-field as well as modern research languages. Finally, the Department encourages students to study or conduct research abroad, as appropriate, and to seek external support in ways that will enhance their curriculum vitae as well as their scholarly and professional training.

Program advantages include:

• The opportunity to develop broad competencies in major religious traditions and the discipline of Religious Studies, while cultivating scholarly expertise in a particular area of specialization.
• Small classes that facilitate professor-student interaction, encouraging faculty mentoring while fostering community and collegiality with other graduate students.
• The opportunity to pursue interdisciplinary training and related interests by taking courses or working one-on-one with faculty in other University of Denver departments.
• Preparation either for doctoral work or for a professional career, with strong support from faculty and the University of Denver’s career counselors.
• Opportunities to engage with and conduct research within metropolitan Denver, a culturally and religiously diverse city with a high quality of life.
• Substantial scholarship packages, including tuition credits and research assistant positions.

What do applicants need in order to qualify for the Religious Studies MA program?

Applicants must have an undergraduate degree from an accredited college, with a minimum grade point average (GPA) of 3.0. Applicants must meet the minimum performance standard set by the Office of Graduate Studies for the Graduate Record Examination (GRE) or the Test of English as a Foreign
Language (TOEFL). Applicants must have an appropriate background in the study of the humanities. Undergraduate courses in Religious Studies are highly desirable, but all work in related areas will be taken into consideration.

Applicants must be

- Academically qualified for graduate level study
- Prepared to do coursework and conduct research that emphasizes engagement with local and global communities
- Motivated to work collegially with faculty and other students in a community of learning

What can graduates do with a MA in Religious Studies?

The MA degree in religious studies prepares students for PhD work or for teaching and careers in journalism, government, education, and nonprofit organizations in which cross-cultural analytical skills are important. The program provides broad competencies in several religious traditions, while offering students the opportunity to specialize in an area of particular interest.

Joint PhD Program in Religious and Theological Studies

A number of graduates of the Department of Religious Studies’ MA program choose to continue their doctoral studies in the Joint PhD program.

The Joint PhD Program, which the Department of Religious Studies offers in partnership with the Iliff School of Theology, is taught by distinguished faculty from the University of Denver and Iliff. The program enrolls students from across the nation and around the world. The facilities and libraries of both institutions are open to all Joint PhD students, offering considerable research and academic resources. The Joint PhD Program offers specialization in four concentrations: Biblical interpretation; religion and psychological studies; religion and social change; theology, philosophy and cultural theory. Please note that admission to the Joint Doctoral Program is a separate process, distinct from admission to the Department’s MA program. For more details, please visit the joint PhD website at www.du.edu/duilffjoint/ (http://www.du.edu/duilffjoint).

Why pursue a Graduate Certificate in Religious Studies at the University of Denver?

The graduate certificate in Religious Studies provides students with an opportunity to acquire graduate-level exposure to the academic study of religion and to several of the world’s major religious traditions. This certificate program provides students with the opportunity to:

1. develop an introductory, graduate-level understanding of two major world religious traditions;
2. to gain a grasp of pertinent theoretical approaches to the study of religion; and
3. to engage major issues in a particular religious tradition or aspect of religion.

For students currently enrolled in graduate programs in fields other than religious studies or the study of religion - such as business, international studies, law or other AHSS disciplines - this certificate will augment the competencies gained in their primary program. For students currently pursuing a career, particularly those in consulting, journalism, the law, the non-profit sector, public policy, education, human resources, faith-based institutions/organizations or other professions where a knowledge of religious beliefs, practices and values can be important, this certificate will enhance their professional credentials or expand their expertise into a new arena.

What do applicants need in order to qualify for the Religious Studies graduate certificate program?

Applicants must have an undergraduate degree from an accredited college, with a minimum grade point average (GPA) of 3.0. Applicants must meet the minimum performance standard set by the Office of Graduate Studies for the Test of English as a Foreign Language (TOEFL). Applicants must have an appropriate background in the study of the humanities. Undergraduate courses in Religious Studies are highly desirable, but all work in related areas will be taken into consideration.

Applicants must be

- Academically qualified for graduate level study
- Prepared to do coursework and conduct research that emphasizes engagement with local and global communities
- Motivated to work collegially with faculty and other students in a community of learning

Certificate in Religious Studies

Following are the simple steps to apply for graduate study in Religious Studies at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications for graduate study in Religious Studies at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: **February 15**, for fall admission to the master's program. Late applications will be considered but priority consideration for admission and departmental scholarships will
be given to applicants meeting the deadline. Students may apply at any time for winter, spring, and summer admission but will be considered on a space-available basis. Applications to the certificate are considered for fall, winter, and spring admission.

- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

**Course and Degree Prerequisites and Requirements**

- Proof of a bachelor’s degree is required from a regionally accredited college or university with an appropriate undergraduate background in relevant arts, humanities or social science disciplines and a minimum “B” (3.0) grade point average. Meeting this and the minimum test score standard (noted below) does not guarantee admission, but no application will be seriously considered if such standards are not met.

**Transcripts**

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, **applicants with a degree from outside of the U.S. are encouraged to apply early.** Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

**Test Scores**

- The GRE is not required for applicants to the certificate program.

**Language Proficiency**

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

**Personal Statement**

- A personal statement that describes your interest in religious studies and your career goals is required. The statement, of at least 300 words, should include information concerning your life, education, practical experience, special interests and specific purpose for applying to the University of Denver.

**Writing Sample**

- An academic writing sample of 3–10 pages is required. Applicants may submit all or part of a paper previously submitted for a course, or may submit another piece of written work. If submitting a section of a longer paper, please provide a brief (one paragraph) abstract (summary) of the larger work from which the excerpt is taken. The writing sample should be submitted via upload through the online application process.

**Recommendation Letters**

- Certificate applicants are required to submit one letter of recommendation that can address both academic aptitude and career goals. The letter should be solicited by the applicant and uploaded by the recommender through the online application system.

**Application Status**

- We encourage active engagement in the admission process. You can check your application status online (https://webcentral.du.edu).
Mailing Address

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/international/applicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Master of Arts in Religious Studies

Following are the simple steps to apply for graduate study in Religious Studies at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications for graduate study in Religious Studies at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- All online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: February 15, for fall admission to the master’s program. Test Scores

- GRE General Test scores – Applicants must request that Educational Testing Services (ETS) forward results to the University of Denver Office of Graduate Studies. The institution code for the University of Denver is R4842.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS
scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.

- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

**Personal Statement**

- A personal statement that describes your interest in religious studies and your career goals is required. The statement, of at least 300 words, should include information concerning your life, education, practical experience, special interests and specific purpose for applying to the University of Denver. It should also include which of our six areas of specialization you would likely select, and why. The statement should be submitted via upload through the online application process.

**Writing Sample**

- An academic writing sample of 3–10 pages is required. Applicants may submit all or part of a paper previously submitted for a course, or may submit another piece of written work. If submitting a section of a longer paper, please provide a brief (one paragraph) abstract (summary) of the larger work from which the excerpt is taken. The writing sample should be submitted via upload through the online application process.

**Recommendation Letters**

- 3 Letters of Recommendation at least one of which must be written by a person who is qualified to judge your academic work. Requests are sent to your recommender via email within one business day of the submission of your online application. You will be asked to provide names and email addresses of individuals who will be writing your recommendations.

**Financial Support**

- To be considered for financial support, domestic applicants should apply early and submit the [Free Application for Federal Student Aid (FAFSA)](http://www.du.edu/financialaid/graduate) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.
- The Department of Religious Studies offers various forms of financial support to master’s students including tuition credits and scholarships. Applicants are encouraged to apply early for consideration.

**Application Status**

- We encourage you to be actively engaged in the admission process. You can check your application status.

**Mailing Address**

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:

  University of Denver  
  Office of Graduate Studies  
  Mary Reed Building, Room 5  
  2199 S. University Blvd.  
  Denver, CO 80208-4802

**International Applicants**

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

**Certificate in Religious Studies**

The Graduate Certificate program allows students structured flexibility, providing exposure to religious traditions through the traditions requirement, training in the discipline of religious studies with the theory requirement, and the opportunity to pursue particular interests through elective courses. The certificate requires a minimum of 24 credit hours.

### International and multicultural studies

This specialization focuses on the role of religion within the context of the globalization process. Particular attention may be given to certain regions such as the Americas, Europe, or Asia. Students must take at least one course in a specific religious tradition beyond the core requirements as well as one course in the theory of religion that pertains to international and multicultural studies. Finally, students must take at least four hours of course work (including independent study, an internship, service learning, or field work) at a location outside North America that meet the student’s curricular and long-term professional goals. Depending on the program of study, the department may require a competency exam in a relevant language.

### Philosophy of religion
Students must take at least two courses in the theory of religion plus one course in a specific philosopher, or philosophers, from each of the two historical periods: ancient and modern (Plato to Kant), late modern and postmodern (Hegel to the present). The remaining courses can be chosen from the department’s approved list of courses for this area of specialization, and will likely involve additional courses taken in the Philosophy Department.

Islamic studies

This specialization introduces students to the textual foundations of Islamic theology and legal reasoning, as well as exposing them to major issues in the development of Islamic traditions, contemporary developments, and particularly questions of reform and fundamentalism. In addition to RLGS 3500, students must take a minimum of three additional courses dealing with Islam. Students must pass a competency examination in Arabic, equivalent to two years of coursework.

**Elective Credits** 13

**Total Credits** 45

Students must declare an area of specialization after completing 32 hours of course work.
Non-Coursework Requirements

In order to complete the MA degree, students must revise a research paper into a journal article, write a thesis, pass a set of comprehensive examinations, or complete a substantive research project.

- **Journal Article Track**: To be eligible for the journal article, students must have a 3.5 GPA; to be eligible for the thesis option, students must have a minimum 3.3 GPA. Students pursuing the journal article option will research religious studies journals and select an appropriate target journal with their advisor’s approval. They will expand a course research paper into an article appropriate for the selected journal.

- **Thesis Track**: Students pursuing the thesis option will expand a course research paper into a graduate thesis of 50-60 pages. Both the article and the thesis should allow students to make an original contribution to the field of religious studies, as well as to demonstrate a mastery of relevant theories and background literature.

- **Comprehensive Exam Track**: The comprehensive examination will consist of three written exams over two successive days. Exam questions will deal respectively with two of the five major religious traditions (one drawn from Judaism, Christianity or Islam; one drawn from either Buddhism or Hinduism) and the theory of religion. General bibliographies for the exams, on which the student will be tested, must be worked out with the instructor administering the exam.

- **Project Track**: Students pursuing the project option will develop a project that will allow them to make an original contribution to the field of applied religious studies. It may take several forms but should include a substantive written component and a formal presentation.

Please note that all completion option defenses may only be scheduled during the regular academic year: Fall, winter or spring Quarters.

The Department of Religious Studies allows graduate students to transfer up to 10 hours of previous graduate course work from another institution or another department at the University during the first quarter of the student’s admission to the program. The transfer must be approved by the department as well as by the Office of Graduate Studies. Similarly, the Department allows students to earn waivers for the traditions requirements by submitting syllabi from similar courses taken at the undergraduate level.

Students may also take up to 15 hours in independent study outside the regular course listings of the Department of Religious Studies. These hours may include courses outside the Department as well.

In order for a course to fulfill degree requirements, students must earn a B- or better. The minimum grade for any elective course taken for the degree is a C.

Courses

**RLGS 3001 Judaism (4 Credits)**
A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with JUST 3001.

**RLGS 3023 Great Thinkers: Maimonides (4 Credits)**
Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imagination" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**RLGS 3102 Early Judaism (4 Credits)**
This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with JUST 3102.

**RLGS 3151 Dead Sea Scrolls (4 Credits)**
The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with JUST 3151.

**RLGS 3192 Christian Classics (4 Credits)**
Reading and discussion of influential historic books pertaining to Christian life and devotion.

**RLGS 3203 Christianity (4 Credits)**
This is an introductory course about the Christian religion, with a substantial component devoted to experiential learning. The primary goal of the course is to acquaint students with the richness, dynamism and diversity of one of the world's largest and most influential religious traditions. Even those students who have some general knowledge of Christianity benefit from the disciplined approach of the academic study of religion.
RLGS 3204 Christianity in the British Isles (4 Credits)
It is the contention of this course that Christianity in the British Isles constitutes a singular chapter in the history of the religion and must be approached and appreciated as such. The circumstances surrounding Christianity's introduction to Britain--as documented by the Venerable Bede in his Ecclesiastical History of the English People--presaged a destiny for the English Church that would be “peculiar.” With decidedly Roman sympathies, Bede’s reforming agenda is presented as historical fait accompli. The narrative nevertheless bears witness to the vibrant and resilient character of Celtic spirituality. Although Henry VIII officially brought the Protestant Reformation to England from the Continent in the 1530s when he severed the English Church from the Papacy, the extent to which the Reformation in England was ever as theologically “Protestant” as it was in Europe is open to debate. The Oxford movement--at once reforming and catholicizing--would otherwise seem incongruous were that not the case. Indeed, as we shall see, the notion of semper reformanda ecclesia is, perhaps, most suited to this geographical context. Not surprisingly, playwrights, novelists, and filmmakers have found no little inspiration in Anglican reform’s concomitant turmoil and intrigue.

RLGS 3212 Development of the New Testament: The Evolution and Transmission of Christian Scripture (4 Credits)
Using a variety of critical methods, this course explores the social, political, and religious influences that shaped the New Testament as it was written, copied, edited, canonized, and translated into its current forms. Students will perform a variety of exercises in class to illustrate the complicated process by which the New Testament was formed.

RLGS 3300 Psychology of Religion (4 Credits)
Beliefs, feelings and actions representing human religious response of experience; function of religion in individual life.

RLGS 3302 Islamic Fundamentalism (4 Credits)
This writing-intensive course introduces students to the history and scope of fundamentalist movements in the Muslim world, focusing on the Middle East. Beginning with a look at the internal traditions of renewal and reform built around the idea of a return to the fundaments or origins of Islam, the course examines the rise of major movements from the 1700s to the present. Students will engage with key questions, including the following: What distinguishes fundamentalism from radicalism? How do Sunni and Shi fundamentalisms differ? What roles have these movements played in politics and society, and how might these evolve in the future? How might policy makers and others best approach fundamentalist groups? A basic knowledge of Islam is assumed; students wishing to enroll without this background knowledge will be provided supplementary readings.

RLGS 3315 Religion & Moral Psychology (4 Credits)
Philosophical foundations and research strategies of psychological studies of moral thought; Aristotelian, Kantian and utilitarian thought included, as well as religious dimensions of morality.

RLGS 3318 Jesus on the Silver Screen (4 Credits)
First and foremost, this is a course in religious studies. It is a course about Jesus, a religious reformer of late ancient Judaism whose movement, by the end of the first century of the Common Era, gave rise to an identifiably separate tradition. It is a course about New Testament portrayals of Jesus in the Gospels. It is a course about contemporary, historical research on the figure of Jesus. It is also a course about film and cinematography, about reading film critically as a “text,” and, in this context, the way in which film “translates” or “transforms” Jesus into another medium. Finally, it is a course about how Jesus films serve to convey modern cultural assumptions.

RLGS 3350 Culture, Psyche, and Religion (4 Credits)

RLGS 3370 Freud, Psychology, & Religion (4 Credits)
Readings, discussion, and papers help students learn about the life, intellectual and social environment, and clinical and theoretical work of Sigmund Freud. Attention is given to the influence of Freud's work on the understanding of religion at the beginning of the 21st century.

RLGS 3381 Religion & Psychobiography (4 Credits)
Use of different psychological theories to understand life and religious experience of individuals known through historical records.

RLGS 3400 Philosophy of Religion (4 Credits)
Inquiries into nature of religion, religious experience, language, methods of thinking.

RLGS 3452 Political Theology (4 Credits)
A general inquiry, focusing on the modern and postmodern eras, into various forms of philosophical reflection on the relationship between religion and political theory. Survey of the seminal ideas of such major thinkers as Kant, Hegel, Schmidt, Strauss, Derrida, Agamben, Asad, and Žižek.

RLGS 3455 Phenomenology and Theology: Husserl to Marion (4 Credits)
The implications of phenomenology for theology and the issue of theology in relation to phenomenology. The course starts with a reading of Husserl and 19th century efforts to chart a “phenomenology of religion” in the work of Otto. It also explores the ideas of later figures such as Heidegger, Merleau-Ponty, Henry, Nancy, and Marion. Junior standing required or permission of the instructor. Cross listed with PHIL 3450.

RLGS 3460 Nietzsche & the Death of God (4 Credits)
This course will involve an intensive reading and discussion of Friedrich Nietzsche’s ‘Thus Spake Zarathustra,’ together with relevant associated materials, especially ‘The Gay Science.’ Cross listed with PHIL 3460.

RLGS 3465 Derrida and Postmodernism (4 Credits)
Cross listed with PHIL 3465.
RLGS 3475 Deleuze and Semiotics (4 Credits)
Examines the development of the thought of the famous French postmodern thinker Gilles Deleuze with special attention to his cultural and semiotic theory to the degree that it is relevant to the philosophy of religion. The course also investigates how Deleuze's work has shaped, and is beginning to push in new directions, contemporary postmodern philosophy. Prerequisites: must be at least junior standing and have completed at least two undergraduate courses in philosophy.

RLGS 3500 Islam (4 Credits)
Introduction to the history, faith, practice, culture(s), and politics of Islam, starting with the Judeo-Christian Near Eastern context in which it emerged and tracing its theological development and geographic spread around the world. Proceeding thematically along a broad historical frame, the course ends with an examination of the numerous, often competing, trends in contemporary Muslim communities.

RLGS 3501 Pilgrimage in Islam (4 Credits)
Introduction to the ideas and practices of pilgrimage in Islam, focusing on the hajj as Islam’s paradigmatic form of pilgrimage and the one to which all others are compared, but also considering other local or “lesser” pilgrimages, often known as ziyarat or visits. The course excavates the history of the practice of pilgrimage, situating it within the social, political, economic and cultural contexts that have helped frame Muslims’ understandings of the spiritual and social meanings of various kinds of pilgrimages at different times and places across the Muslim world. The course includes consideration of the hajj experiences of non-Arab Muslims through documentary and news programs, investigates contemporary re-thinkings of the meaning of “hajj”, and reflects on the key geo-political and religio-political issues that may surround Muslim pilgrimage in the 21st century.

RLGS 3502 Contemporary Islam (4 Credits)
This course introduces students to contemporary Islam. After a historical overview, the course looks thematically at different spheres of Muslim life. It considers changes that relate to political systems and forms of governance, styles of education, labor and professional work, changes in daily life habits such as timing and organization, changes in gender relations, and changes in religious authority. It also pays attention to the ways in which faith and practice are articulated through cultural practices like pop music and film.

RLGS 3503 Quran and Hadith (4 Credits)
This writing-intensive course introduces students to the key texts of Islam—the Qur’an and hadith—including their origins and meaning as well as how they have been interpreted by Muslims over time, and focusing as well on case studies that highlight issues of crucial relevance for today and the future.

RLGS 3570 Religion and Morality in the American Public Square (4 Credits)
Close focus on one or two moral issues in which religion is drawn into public debate in the contemporary U.S. Observation of the debate first hand at demonstrations, town meetings, and discussion groups, etc. Analysis of these observations is facilitated by readings on the subject and class discussion.

RLGS 3601 Religion and Culture in Vienna (4 Credits)
This course focuses on the cultural, religious and intellectual history of the city of Vienna as the hub of culture for Central Europe during the 19th and 20th centuries with special attention to the arts, philosophy, psychoanalysis, and the critique of Christianity. This course examines how religious past, particularly the influence of Judaism, shaped its rich cultural heritage and the birth of modernism. A special segment of the course is devoted to the Nazi period and the Holocaust, including a study of the resistance of religious groups. The course concludes with a history of the post-Nazi period with attention to the development of Vienna as the center of internation diplomacy and theories of globalization. The class combines lectures and online discussions with site visits to major cultural and historical sites as well as research centers around the city. The first week of the course is online.

RLGS 3604 Faith & Ethics-Religion Biography (4 Credits)
Modes of reconciling private (faith) and public (ethics) in thought and careers of selected modern individuals.

RLGS 3641 Religion and Race in America (4 Credits)
Explores the relationship between racism and religious activism by focusing on the biographies of activists.

RLGS 3660 American Religious Experience (4 Credits)

RLGS 3693 Religion and the Media (4 Credits)
Interactions between religion and all forms of communications media in American life.

RLGS 3701 Topics in Religious Studies (1-4 Credits)
An exploration of various topics and issues related to the academic study of religion. The subject matter of the course varies and may be taught by the regular faculty of the department or a visiting scholar. Some offerings may include a travel component.

RLGS 3707 Religion and Film (4 Credits)
Understanding religion requires us to take culture seriously. In doing so, we must consider products of culture, including popular culture. This course engages both classic and more recent films as “texts” to be analyzed, not as mere entertainments or diversions. We focus not only on those films that identify themselves explicitly as “religious” or reflect a particular religious tradition, but also moved that render the subject more obliquely, which reveal – via image and sound – religion as a complex human activity.

RLGS 3740 Bodies and Souls (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a “human” does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand “out-of-body” experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.
RLGS 3760 Globalization and Religion: Theory and Methods (4 Credits)
This course explores how religious movements around the world both affect, and are affected by, the process of globalization. A major segment of the course is devoted to various theories of globalization and how they account for the increasingly important role of religion. Focus is largely on the relationship between Christianity, Judaism, and Islam.

RLGS 3813 Ritual (4 Credits)
Classical and contemporary theories about the meaning, functions, and processes of ritual, and its relationship to "religion.

RLGS 3814 Modern Hinduism (4 Credits)
Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism. Cross listed with RLGS 3814.

RLGS 3816 Hinduism Through Texts (4 Credits)
History of ancient and medieval Hinduism, viewed through the lens of religious texts. Cross listed with ASIA 2706.

RLGS 3820 Buddhism (4 Credits)
Buddhist life and thought from origins to present in India, Tibet, Japan and China. Cross listed with ASIA 2704.

RLGS 3830 Buddhist Lives (4 Credits)
This course explores the literary canon of Buddhist life stories across time, traditions and cultures. Cross-listed with ASIA 3830.

RLGS 3890 Religion and Diaspora (4 Credits)
When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to--or resist--new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

RLGS 3891 Justice: A Biblical Perspective (4 Credits)
This is a service learning course designed for religious studies undergraduate majors, though non-majors are welcome to enroll. Cross listed with JUST 3891.

RLGS 3892 Grant Writing as Research and Community Engagement (4 Credits)
This service learning / community engagement course introduces student to non-profit work and to scholarship on non-profit activities. It connects students with community partners, continuing the department's commitment to experiential learning and to engagement with living faith communities. Students spend course time discussing scholarly research on grant writing and non-profit grant support and discussing logistical and other issues related to their service learning placements. This course is intended to help provide M.A. students with arenas for future research, including possible thesis topics, while also offering a unique practical opportunity for professional development. Experience in forming a 501(c)3 corporation and writing grant proposals will be an asset for students planning to work in non-profits as well as for those continuing on to doctoral work.

RLGS 3991 Independent Study (1-10 Credits)
RLGS 3992 Directed Study (1-10 Credits)
RLGS 3995 Independent Research (1-10 Credits)
RLGS 4000 Theory and Methods in the Study of Religion (4 Credits)
This course begins with a brief overview of the history of the study of religion in the west, from antiquity to the modern period. When it reaches the modern period, the course shifts to considering "representative" theories of religion, broken down roughly along ideological and/or disciplinary lines.

RLGS 4010 Pedagogy & Teaching of Religion (4 Credits)
RLGS 4050 History of Islam (4 Credits)
RLGS 4090 Dissertation Proposal Seminar (4-5 Credits)
RLGS 4100 Hebrew Bible Backgrounds: Seminar in Ancient Israelite Religion (4 Credits)
This course is designed to train the student in the method and means of engaging in archeo-historical study of the Hebrew Bible. The content of this course focuses on ancient Israelite religion in Iron Age Palestine, particularly on emergent ideas about God (‘El) and the development and evolution of the priesthood. Cross listed with JUST 4100.

RLGS 4105 Understanding the Bible: Old Testament (4 Credits)
RLGS 4119 Ph.D. Colloquium: Biblical Interpretations (4 Credits)
RLGS 4122 Augustine on Genesis (4 Credits)
RLGS 4130 Prophets of Israel (4 Credits)
RLGS 4150 Biblical Aramaic (4 Credits)
Reading seminar in Biblical Aramaic. This course focuses on the vocabulary, syntax and expression of Aramaic in the Bible as well as in some related post-biblical texts (Targums, Dead Sea Scrolls, etc.).

RLGS 4191 Early Christian Old Testament Interpretations (4 Credits)
RLGS 4402 Plato: Postmodern Perspective (4 Credits)
RLGS 4403 Kant's Religious Philosophy (5 Credits)
RLGS 4404 PhD Tutorial (1-10 Credits)

RLGS 4501 Intersections of Faith and Media (4 Credits)
Using Islam and Muslim communities as case studies, this course examines the intersections between faith communities and media in the 20th and 21st centuries, looking at religious approaches to and use of print, radio, recorded voice and music, television, film, and the Internet.

RLGS 4676 Latino Religious Cultures: Methods and Theories (4 Credits)
A survey of the freshest texts, methods, and theories for the study of religiosity among Latinos in the United States.

RLGS 4980 Internship (1-4 Credits)
Designed to provide masters students with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. For MA students only.

RLGS 4981 Internship in Religious Community (1-4 Credits)

RLGS 4982 Internship in Religious Community (1-4 Credits)

RLGS 4983 Internship in Religious Community (1-4 Credits)

RLGS 4991 Independent Study (1-10 Credits)

RLGS 4992 Directed Study (1-10 Credits)

RLGS 4995 Independent Research (1-10 Credits)

RLGS 5101 Ph.D. Colloquium: Biblical Interpretations (4 Credits)

RLGS 5110 Hebrew Bible Seminar I (4 Credits)

RLGS 5111 Hebrew Bible Seminar II (4 Credits)

RLGS 5112 Hebrew Bible Seminar III (4 Credits)

RLGS 5113 New Testament Seminar I (4 Credits)

RLGS 5114 New Testament Seminar II (4 Credits)

RLGS 5115 New Testament Seminar III (4 Credits)

RLGS 5301 Colloquium: Religion and Psychological Study (4 Credits)
The course serves two main functions: (1) to gather the students and faculty of the Religion and Psychological Studies concentration of the Joint Ph.D. Program to share research and examine trends in the field and (2) to study a topic of importance to the field, be it historical, contemporary, related to a cognate field, or oriented toward a sub-specialty. Students must be in a doctoral program in order to register.

RLGS 5601 Ph.D. Colloquium: Religion & Social Change (1 Credit)

RLGS 5980 Internship (1-4 Credits)
Designed to provide doctoral students with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. For PhD students only.

RLGS 5991 Independent Study (0-10 Credits)

RLGS 5995 Independent Research (1-10 Credits)

School of Art and Art History

Office: Shwayder Art Building
Mail Code: 2121 E. Asbury Ave., Denver, CO 80208
Phone: 303-871-2846 or 800-876-3323
Email: saah-interest@du.edu
Web Site: http://du.edu/art

The School of Art and Art History offers two tracks in our Art History MA degree program: Art History and Art History with a Museum Studies concentration. Our program of about 20 students emphasizes a collegial student-faculty atmosphere. The Art History program offers courses in most areas of world art, with special emphasis on the arts of Europe and the Americas and global contemporary art. In addition to our own Vicki Myhren Gallery, our partnership with the Denver Art Museum provides opportunities for museum internships and exhibition-based courses.
Our graduates are competitive in sought-after positions. Some go on to doctoral studies in the United States or overseas; others hold respected jobs at distinguished art museums or take the road less traveled, entering careers with art-related nonprofit organizations.

At the School of Art and Art History we offer many advantages, including:

- small classes and personal attention
- in-depth training in Art History and research methods
- an on-site art gallery
- practical museum training
- museum internships in local and national institutions
- a strong alumni network
- vibrant and diverse cultural activities in Denver

**Master of Arts in Art History / Master of arts in art history with concentration in museum studies**

Following are the simple steps to apply for graduate study in the School of Art and Art History at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

**Apply Online / Application Deadlines**

- Applications for graduate study in the School of Art and Art History at the University of Denver must be submitted online (https://du-grad.edu.185r.net/application).
- For priority consideration, all online materials must be submitted, and all supplemental materials must be postmarked, by the program’s stated deadline: **January 31**, for Fall quarter. After the priority deadline, applications are considered on a rolling basis for Fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

**Course and Degree Prerequisites and Requirements**

- Proof of a bachelor’s degree is required from a regionally accredited college or university.

**Transcripts**

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are **encouraged to apply early**. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

**Test Scores**

- The Graduate Record Examination (GRE) is required. Applicants are generally required to demonstrate a 153 on the GRE verbal section and 4.0 on the writing section. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

**Language Proficiency**

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.
Personal Statement
• A personal statement including relevant information concerning your education, practical experience, special interests, goals and specific purpose for applying to the MA program in the School of Art and Art History is required. The statement should be submitted via upload through the online application process.

Writing Sample: Research Paper
• A research paper, preferably an Art History research paper, is required. A paper demonstrating the applicant’s research and writing abilities and the applicant’s strengths in discussing images and art historical issues is most helpful. This should be submitted via upload through the online application process.

Recommendation Letters
• Three letters of recommendation are required. Letters from individuals familiar with the applicant’s research and writing skills are particularly useful. These letters should be solicited and uploaded by those recommending through the online application system. Letters must be received by the program’s stated deadline.

Financial Support
• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
• Information about financial aid can be found on the Office of Financial Aid website (http://www.du.edu/financialaid/graduate). International students are not eligible for federal financial aid.
• The School of Art and Art History student can be considered for two types of financial aid: departmental financial aid, primarily merit-based aid such as graduate dean’s tuition scholarships and graduate teaching assistantships; and, federal financial aid including student loans and work study.

Application Status
• We encourage you to be actively engaged in the admission process. You can check your application status online (https://webcentral.du.edu).

Mailing Address
• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants
• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information (http://www.du.edu/learn/graduates/internationalapplicants.html). International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Non-coursework requirements:
- Qualifying Examination
- Language Requirement
- Comprehensive Examination
- Master's Research Paper

Qualifying Examination

A qualifying examination is used by the faculty to determine the newly admitted student’s strengths and weaknesses and to facilitate program planning. The exam is normally taken on the Friday before the first week of classes.

Language Requirement

Demonstration of reading proficiency in one modern foreign language is required for all MA candidates. An exam is offered each quarter by the Department of Languages and Literatures, or the student may take the fourth semester (or sixth quarter) of a college language course and receive a grade of B+ or better to demonstrate reading proficiency. A language should be chosen, in consultation with the graduate adviser, that supports the student’s research interests and career plans, keeping in mind that some PhD programs still require French and German. This requirement must be met before the student advances to candidacy.

Comprehensive Examination

The comprehensive examination is designed to evaluate the student’s retention and synthesis of Art History course work taken at the University of Denver. Students are encouraged to take the test as soon as possible after the final quarter in which they are enrolled in course work. Planning for this examination takes place under supervision of the graduate adviser.

Master's Research Paper

MA degree students are required to write a research paper of publishable quality. Although work on the master’s research paper should not begin prior to completion of the language requirement, students often choose subjects on which they have already conducted some research during prior seminars or lecture classes. Guidelines should be obtained from the School of Art and Art History.

Courses

ARTH 3556 Curatorial Practicum (4 Credits)
Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

ARTH 3661 Learning in Museums (4 Credits)

ARTH 3701 Topics in Art History (1-4 Credits)
Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

ARTH 3813 Arts of the American West (4 Credits)
This course covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

ARTH 3815 American Art and Religion (4 Credits)
This class examines sacred art forms, as well as art that documented or commented upon religious experience in the U.S., from the 17th century to the present. In includes fine, decorative, and popular arts as well as architecture, in slide-lecture-discussions and field trips. The diversity of religious experience and spirituality in American art is emphasized.

ARTH 3817 Gothic Art (4 Credits)
This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world—its beliefs, aspirations, social and political realities.

ARTH 3818 Art of Renaissance Europe (4 Credits)
This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

ARTH 3822 Northern Renaissance Art (4 Credits)
This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.
ARTH 3823 17th-Century European Art (4 Credits)
This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

ARTH 3832 19th-Century Art (4 Credits)
This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

ARTH 3833 20th-Century Art (4 Credits)
This class studies the development of early 20th-century art in Europe and the U.S., as the center of the avant-garde shifted to America around World War II. The class follows the development of modernism and its theories from 1900 to around 1960. Artists and movements will be considered according to stylistic and theoretical development, and also in relation to social, political and cultural developments of their time.

ARTH 3834 Contemporary Art (4 Credits)
This course surveys the development of contemporary art, focusing primarily on recent decades, but making connections to earlier movements from 1970 to the present. This includes painting, sculpture, performance art, installations and new media art. Students become familiar with various issues of recent art theory and criticism to put these works into a theoretical perspective. In addition to an in-depth look at the broad stylistic movements of the past forty years, this course also examines those figures whose work has come to define the major approaches and concerns for the art of our time.

ARTH 3838 Connoisseurship (4 Credits)
In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum's collection.

ARTH 3839 Topics in Modern Art (4 Credits)
Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

ARTH 3841 Topics in Chinese Art (4 Credits)
Selected topics in Chinese art. Content changes. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. Course may be repeated to a maximum of 12 credits. Cross listed with ASIA 2102.

ARTH 3842 Topics in Japanese Art (4 Credits)
Selected topics in Japanese art. Content changes. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. Course may be repeated to a maximum of 12 credits. Cross listed with ASIA 2105.

ARTH 3845 Chinese Painting: Masters and Masterpieces (4 Credits)
This course explores pictorial art in China from the third century BCE to the present. Cross listed with ASIA 2106.

ARTH 3846 Dada and Surrealism (4 Credits)
This course will survey the development of Dada and Surrealist art from 1916 through 1939, focusing on the painting, sculpture, graphics, photography and films of these movements. The relationships between Dada and Surrealist artists and literary figures will be discussed as well as their shared interests in psychoanalysis, dreams, sexuality and automatic methods of creativity. Cross listed with ASIA 2106.

ARTH 3850 Art and the History of Science (4 Credits)
This class explores the connections between art and the history of science, using a broad span of visual material, mainly European art from the Middle Ages to the present. Coverage of the material is thematic, focusing on three major categories: Art and the Natural World; Art and the Human Body; and Art and the Human Mind. We read a wide variety of art historical articles and selected chapters that examine works of art related in the first section to astrology, astronomy and alchemy; botanical, zoological and geological illustration; and color theory, perspective, optics, maps, contemporary earthworks and ecology. In the second section, we explore the evolution of anatomic illustration, as well as mythic, religious and genre images related to medicine, pharmacy and healing as well as works by contemporary artists who are concerned with genetic codes, hybridization and cloning. In the third section, we examine depictions of human temperaments, emotions and madness through the images of selected artists.

ARTH 3862 Mesoamerican Art (4 Credits)
This course is an introduction to the art and archaeology of the native peoples of Mesoamerica in Pre-Columbian times, or from about 2000 BC to AD 1521. Cultures covered include the Olmec, Teotihuacan, Mixtec, Zapotec, Aztec and others. This class presents the cultural sequence of Pre-Columbian Mesoamerica and explores how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, and human sacrifice. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.

ARTH 3863 Art of the Maya (4 Credits)
This course is an introduction to the art and archaeology of the Maya from about 300 BC to the present. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.
ARTH 3864 Buddhism and the Fine Arts (4 Credits)
This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

ARTH 3867 Native American Art (4 Credits)
This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.

ARTH 3868 Art of the Andes (4 Credits)
This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

ARTH 3869 Twentieth-Century Art in Latin America (4 Credits)
This course explores twentieth-century art movements in Latin America. Topics include modernism, indigenism, surrealism, neo-concretism, conceptualism, censorship under dictatorships, and issues in exile and displacement. We also analyze the cultural production of Latinos in the United States and its representation in cultural institutions. Organized both chronologically and geographically, the material has been structured to provide a basic understanding of the methods of art history in relation to Latin American art and to familiarize students with the significant artistic movements and styles that emerged from Latin America in the Twentieth Century.

ARTH 3870 Women in Art (4 Credits)
This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

ARTH 3872 Introduction to Conservation (4 Credits)
This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

ARTH 3873 The Goddess in Art (4 Credits)
This course surveys the image of the goddess in art from prehistoric times until the present day from a feminist perspective. Beginning with anthropological and art historical theories about the numerous female figurines of Paleolithic and Neolithic times, the course continues to explore representations of female goddesses from ancient Mesopotamia, Egypt, Crete, Greece, and Rome. Polarized images of Eve, the Virgin Mary and several female saints during the Middle Ages will be examined. From the Renaissance through the Baroque periods, classical goddesses, especially Venus/Aphrodite, are revived and adapted to both Christian and secular contexts. Images of the sexualized female body will be explored, along with its counterpart, the witch, who was persecuted during the 16th and 17th centuries. This course is interspersed with examples of contemporary art inspired by the “Great Goddess,” especially by feminist artists of the 1970s and 1980s. Some discussion of the goddess as she appears in contemporary popular culture concludes the class. Cross listed with GWST 3873.

ARTH 3874 History of Collections (4 Credits)
This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week’s readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists’ collections, to name a few.

ARTH 3902 Art History Travel (4 Credits)
A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.

ARTH 3992 Directed Study (1-5 Credits)
This class should only be used when a required ARTH course listed in this catalog is not offered in the quarter in which the student must take it. Permission of an instructor and the Director of the School of Art and Art History are required. Permission/registration form is available from the Office of the Registrar.

ARTH 4301 Seminar in Art History Methods (4 Credits)
This seminar considers the history of art history and the development of various methods that art historians use to interpret and understand art. Required of all MA candidates in art history.
ARTh 4302 Research Practicum (4 Credits)
The goal in this course is to learn professional methods and resources for original research in areas of American art where little or no published research exists. Students learn through short exercises in biographical, object-oriented, internet, and archival research; by tackling a 10-week research project of their choice within the topic for the quarter; and by networking with each other to share resources and progress. Required of all MA candidates in art history.

ARTh 4312 Seminar in PreColumbian Art (4 Credits)
Selected topics in PreColumbian Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4314 Seminar in Medieval Art (4 Credits)
Selected topics in Medieval Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4321 Seminar in Renaissance Art (4 Credits)
Selected topics in Renaissance Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4331 Seminar in 18th Century Art (4 Credits)
Selected topics in 18th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4332 Seminar in 19th Century Art (4 Credits)
Selected topics in 19th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4333 Seminar in 20th Century Art (4 Credits)
Selected topics in 20th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4334 Selected Topics in Contemporary Art: Public Art (4 Credits)
Selected topics in contemporary art. Advanced research papers and presentations. Content changes. May be repeated for a maximum of 8 credits.

ARTh 4336 Seminar in American Art (4 Credits)
Selected topics in American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4345 Selected Topics in Latin American Art: Mexican Modernism (4 Credits)
Selected topics in Latin American art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

ARTh 4651 Museum Methods and Principles (4 Credits)
This class surveys the major activities, goals, and organization of the art museum within today’s world. Students meet with a variety of museum professionals to discuss the changing dynamics within art museums, as well as ethical and practical issues of museum work. The class reads both classic and current literature on museum issues and practice, and participates in research, collection, and exhibition projects. Required of all M.A. art history students pursuing the Museum Studies option.

ARTh 4652 Museum Internship (3-10 Credits)
Arranged internship in student's area of specialization. Students should take ARTH 4651 Museum Methods and Principles first. Prerequisite: instructor's permission.

ARTh 4656 Writing for Exhibitions (4 Credits)
This class focuses on the special skills required to create and articulate a compelling exhibit concept, drawing artworks primarily from contemporary art collections. This seminar offers an opportunity to take part in a major exhibition project. The major work products of the seminar are extended essays for a catalog to accompany an exhibition that will open the following year at the Victoria H. Myhren Gallery.

ARTh 4991 Independent Study (1-10 Credits)
This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

ARTh 4992 Directed Study (1-5 Credits)
This class should only be used when a required ARTH 4000-level course listed in this catalog is not offered in the quarter in which the student must take it. Permission of an instructor and the Director of the School of Art and Art History are required. Permission/registration form is available from the Office of the Registrar.

ARTh 4995 Master's Research Paper (1-5 Credits)
Students should see their advisor for guidelines regarding the Master's Research Paper class.

Daniel Felix Ritchie School of Engineering and Computer Science

At the Daniel Felix Ritchie School of Engineering and Computer Science, our mission is to enhance the quality of life for the global society through scientific and technical innovation. With emphases in fields such as bioengineering, materials science, robotics, and humane games, our research teams are designing improved orthopaedic devices, new materials for high voltage transmission lines, robots for search and rescue, and computer programming that enhances information security and privacy. We also prioritize social responsibility and international perspectives as we tailor degrees to the needs and interests of our students.

Computer Science

Office: Department of Computer Science, Aspen Hall North, Room 100
Master'S AND DOCTORAL DEGREES OFFERED

Why study computer science at the University of Denver?

The department of computer science offers cutting-edge and innovative graduate degree programs. The degree programs are:

- MS in computer science
- MS in computer science systems engineering
- PhD in computer science

The department of computer science is based in the University of Denver’s School of Engineering and Computer Science. The school reflects two of the university’s strongest traditions: academic integrity and a commitment to meeting student needs with dynamic new programs.

We are strong in research and particularly noted in software engineering, information security and privacy, and humane gaming.

Some of our other outstanding advantages include:

- Small classes taught by faculty, not teaching assistants
- Research-active faculty members who publish regularly, land impressive grants and win teaching awards
- An up-to-date curriculum that includes classes in modern software engineering,
- Web technology based on Linux and Microsoft servers and applications, Java, multimedia, mobile computing, networks, databases, cyber security and computer game development
- Students who create a peer culture defined by high expectations
- A small yet vital PhD program that enhances the department’s intellectual atmosphere

At the University of Denver, you will find opportunities to research, study leading-edge technology and tools, and gain integrated knowledge. We emphasize interdisciplinary programs, so you will be ready to meet career challenges around the office or, if you choose, around the world.

In addition, Denver is a first-rate location for internships and jobs, as well as business and government partnerships. The campus is just minutes from the Denver Technological Center — home to many top tech companies — and we enjoy sweeping views of the Rocky Mountains.

ADMISSION TO THE MASTER’S and DoCTORAL DEGREES

Following are the simple steps to apply for graduate study in Computer Science at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply online / Application deadlines

- Applications (https://du-grad.edu.185r.net/application) for graduate study in Computer Science at the University of Denver must be submitted online.
- Applicants are encouraged to submit all materials to the Office of Graduate Studies by the priority deadline: February 15, for the fall quarter.
- Students interested in competing for graduate teaching assistantships (GTAs) are encouraged to submit their applications by this deadline to ensure full consideration for an appointment in September of a given year.
- Applications received after the priority deadline will be accepted, processed and reviewed on a rolling basis for the fall, winter or spring quarters. International applicants are encouraged to have the admission application and all supporting documents in the Office of Graduate Studies by the deadline or no later than May 1, for fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.

Course and Degree Prerequisites and Requirements

- Applicants for the MS in computer science must have proof of a bachelor’s degree in any discipline from a regionally accredited college or university.
- Prerequisite courses for both MS and PhD include:

<table>

Transcripts
• Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
• The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
• Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early.
• The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores
• The Graduate Record Examination (GRE) is required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.
• Competitive GRE scores for students admitted to the Department of Computer Science are below.
  - MS: Quantitative - 152; Analytical Writing Section - 2.0
  - PhD: Verbal - 146; Quantitative - 156; Analytical Writing Section - 3.5

Language Proficiency
• Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
• Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement
• A personal statement of at least 300 words is required. The statement should include information concerning your life, education, practical experience, special interests and specific purpose for applying to the University of Denver. The statement should be submitted via upload through the online application process.

Resume / C.V.
• A detailed resume or C.V. is required. This should include all educational achievements, relevant work experience, research and/or volunteer work. The resume or C.V. should be submitted via upload through the online application process.

Recommendation Letters
• Three letters of recommendation are required. These letters should be solicited and uploaded by recommenders through the online application system. Letters must be received by the program’s stated deadline.

Financial Support
• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
• Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/financialaid) website. International students are not eligible for federal financial aid.
• The Department of Computer Science also offers a number of competitive graduate teaching assistantships (GTA) that provide full tuition remission along with a stipend for the nine-month academic year (three academic quarters).
• Other sources of financial support available include graduate research assistantships (GRA) either with or without partial tuition remission, scholarships and fellowships, and work opportunities from the department and from the School of Engineering and Computer Science. Contact the Computer Science department for more information about financial support.
Application Status
• We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address
• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants
• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information.

Master of Science in Computer Science
The MS program in computer science prepares students for advancement in academic or industrial careers. The program is designed to provide students with a breadth of advanced knowledge in computer science, while permitting them to achieve depth in areas of current interest within the computing field, as well as the emerging technologies that will be gaining importance in the future.

</tr>
</tbody>
</table>

3 COMP courses at the 4000-level (other than COMP 4991) are required of which at least one must be a designated "theory" class.

Advanced programming requirement
Students must also choose and complete two courses from the following list of COMP courses that include an advanced programming component. Students must complete at least two of the courses listed below at the University of Denver. These courses must be approved by an advisor. The current pre-approved list includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 4362</td>
<td>Operating Systems II</td>
</tr>
<tr>
<td>COMP 3353</td>
<td>Compiler Construction</td>
</tr>
<tr>
<td>COMP 3621</td>
<td>Computer Networking</td>
</tr>
<tr>
<td>COMP 3801</td>
<td>Introduction Computer Graphics</td>
</tr>
</tbody>
</table>

Seminar attendance requirement
Students must complete three quarters of COMP 4600 - Seminar (0 credits). A passing grade is required for successful completion.

Non-thesis option
A maximum of 12 quarter hours may be earned in Independent Study (COMP 4991), provided the student can find an advisor for such independent study. No thesis is required. Not eligible for support (GTA, GRA)

Thesis option
A maximum of 12 credits may be earned for thesis credits (COMP 4995). A thesis is required. Students should also note the following: A maximum of 8 quarter hours may be earned in approved courses outside the COMP designation, including transfer credits from another university. Such credit must be approved in writing by an advisor from the computer science faculty. A student receiving any support from the department (GTA, GRA) must complete the degree requirements as per the Thesis option.

Non-coursework Requirements

- If the thesis option is chosen, a thesis and oral defense are required.

Master of Science in Computer Science Systems Engineering

Every candidate for the MS in computer science systems engineering degree must complete 45 quarter hours of credit, at least 36 of which must be completed at the University of Denver. To satisfy graduation requirements, candidates must maintain a course GPA of 3.0. In addition, a grade of C or better must be obtained in each course for that course to count toward the 45 quarter hour requirement. Six courses at the 4000-level are required. The degree is designed for the working professional. The prerequisites for this degree are the same as those for the MS in computer science.

Doctor of Philosophy in Computer Science

The department currently has faculty to support PhD students in the following areas:

- Artificial Intelligence
- Computational Geometry
- Humane Games
- Graphics
- Networks
- Parallel and Distributed Algorithms
- Security and Privacy
- Software Systems Engineering

Degree Requirements

Coursework Requirements

</tr>
</tbody>
</table>

At least 36 credits must be at the 4000-level courses

Up to 24 credits may be taken in other relevant disciplines, as approved by the Computer Science Department Graduate Committee.

Courses should be chosen in consultation with, and are subject to the approval of, the student's advisor.

Total Credits

90
Minimum credit hours required: 90 beyond BA or BS degree

Additional Degree Requirements applicable to PhD Students without a Master’s Degree in Computer Science

• Must complete the requirements of the Computer Science Master’s Degree with a thesis option within 3 years (9 quarters).

Additional Degree Requirements applicable to PhD Students with a 2 year Master’s Degree in Computer Science or Related Field

• May take a proficiency test in the four required courses for Master’s Degree. The test may be offered at a time other than the official final exam time of the term. A grade of B+ (B plus) or better must be obtained in the test.
• If the student chooses not to take the proficiency test, the student must register and attend classes for the four required courses. A grade of B+ (B plus) or better must be obtained in the courses.

Non-coursework Requirements:

• Completion of a written dissertation that makes a significant contribution to the research literature in computer sciences.
• Completion of a tool requirement.
• Qualifying Examination
• Preliminary Examination

Qualifying & Dissertation Examinations

Qualifying Exam

Every PhD student must pass the Qualifying Exam. It consists of two parts, the Breadth Requirement and the Written and Oral exam.

1. Breadth Requirement: To fulfill the Breadth Requirement the student must take 5 graded courses (20 Quarter Credits) at the 3000 and 4000 level (not including independent study, internship, or independent research). At most, two may be at the 3000 level. At least three must be at the 4000 level. The course work should cover at least three distinct areas. Five areas should include a sequence of 3000 and 4000 level courses. The GPA in these courses must be at least 3.7/4.0. No course with a grade below a B may be used to fulfill this requirement. Graduate computer science courses taken at another university and transferred for credit at DU may be applied to the Breadth requirement up to a maximum of 2 courses (8 quarter credits).

2. Written and Oral Exam: Before being admitted to this exam, the student must have fulfilled the Breadth Requirement. The student selects an area of examination from the list of areas in Table 1. The Written part of the exam is a take home exam. It is a handed out on a Friday and is due the following Tuesday. The Oral Exam is held the following Friday. The take home exam consists of a set of research questions, a set of related papers and instructions. The student should prepare a written report of at least 10 but no more than 20 pages with answers to the questions. Study guides or other relevant material to prepare for the exam can be obtained from the chair of the examination committee. The oral portion of the exam is based on a student presentation in which the student explains and defends his/her answers. During the Oral Exam, questions in other areas of computer science may also be asked.

A failed exam may be retaken once (in the same or another area). Sufficiently prior to the exam date, the department chair will appoint an examination committee of three tenure-track faculty. One of the committee members must be in the area in which the examination will be held. The student’s advisor is allowed to be on the committee. The committee creates the take home exam and grades it. After the Oral Exam, the committee makes a recommendation to the CS faculty on whether the student passes or fails. If the faculty agrees, the committee recommendation stands. If there is a disagreement, the faculty as a whole decides.

Preliminary Examination

Following successful completion of the Qualifying Examination, each student will prepare a dissertation proposal and take the Preliminary Examination. Passing this examination admits the student to Ph.D. candidacy. The dissertation proposal should be prepared in close consultation with the student’s advisor, and should be available to all committee members at least two weeks prior to the examination. It should reflect an extensive critical literature survey, and contain an accurate assessment of the state-of-the-art in the area of research, a precise statement of the problem to be solved, motivation for pursuing the research, and evidence to the effect that there is a good likelihood the problem is solvable with reasonable effort.

For full-time students, the Preliminary Examination must be taken within 5 quarters of passing the Qualifying Examination. Successful completion of the Preliminary Examination results in agreement between the student and the committee as to what will constitute successful completion of the dissertation research. The committee may choose to reconvene the examination to allow the student to further research the problem, complete additional course work, or revise the dissertation proposal document.

The examining committee consists of at least 3 Computer Science faculty members, including the advisor. The preliminary exam is a one hour oral closed exam. If a student passed the preliminary exam, but subsequently switches advisor and hence topic, the preliminary exam must be repeated within one year to ensure capability of the student and feasibility of the project.
**Possible Thesis Proposal Outline**

1. Intro
   a. Problem
   b. Research questions, scope

2. Background
   a. Lit search
   b. Open Problems
   c. Analysis with respect to research questions

3. Approach

4. Preliminary results

5. Plan for completion of work including timeline

6. Risks and risk mitigation

7. References

**Dissertation Defense**

After the dissertation has been completed, the student must defend it in a final examination, as specified by the Office of Graduate Studies.

**Tool requirement**

It is strongly recommended that students satisfy their tool requirement by demonstrating proficiency in a modern computer typesetting system suitable for writing technical papers that include mathematical equations and graphics. The faculty advisor must approve the specific system used to satisfy this requirement. Other options include reading competency in two languages selected from French, German, and Russian; a series of outside courses in another discipline; or significant laboratory experience involving computer science.

**Undergraduate + Graduate BS/MS**

The Department of Computer Science at the University of Denver offers a Dual Degree Bachelor of Science and Masters in Computer Science. The BS/MS in Computer Science encompasses the theory and techniques by which information is encoded, stored, communicated, transformed, and analyzed. It is concerned with the theory of algorithms (that is, effective procedures or programs), with the structure of languages for the expression of algorithms, and with the design of algorithms for the solution of practical problems. A central concern is the study of the computer systems (hardware and software) for the automatic execution of these algorithms prepares students for advancement in academic or industrial careers. The program is designed to provide students with a breadth of advanced knowledge in computer science, while permitting them to achieve depth in areas of current interest within the computing field, as well as the emerging technologies that will be gaining importance in the future.

The degree is strongly based in mathematics and, in fact, a student will automatically acquire sufficient credits for a minor in mathematics. One additional minor is required. The second minor may be in any discipline other than mathematics or computer science.

**Total Credit Hours: 183 at the undergraduate level (UG) for the Bachelor's degree + 36 at the graduate level (GR) for the master's of science degree**

**Required courses**

**Other Requirements**

Students who intend to obtain a BS/MS in Computer Science must satisfy all the requirements of the Bachelor of Science degree as outlined in the University of Denver Undergraduate Bulletin. One of the two minor areas required in the B.S. program must be in mathematics. The other minor may be in any field. Upon completion of the BS requirements, the student must satisfy the 36 hours at the graduate level of required coursework for the MS.
The eleven courses listed above total 44 quarter hours. An additional 28 hours of 3000-level computer science electives are required. COMP 2400 or COMP 2901, or COMP 2555 may be used to satisfy 8 credits of the required 3000-level elective credits, but COMP 3904 may not be used in this way. In addition there are 3 COMP courses at the 4000-level (other than COMP 4991) are required of which at least one must be a designated “theory” class and one must be a designated “Advanced Programming” course and completion of three quarters of COMP 4600 Seminar (0 credits).

Advanced Programming Requirement

Students must also choose and complete two courses from the following list of COMP courses that include an advanced programming component. Students must complete at least two of the courses listed below at the University of Denver. These courses must be approved by an advisor. The current pre-approved list includes:

<table>
<thead>
<tr>

<tr>
<td>COMP 3801</td>
<td>Introduction Computer Graphics</td>
<td>4</td>
</tr>
</tbody>
</table>

Math Minor Requirement

Minimum of 20 quarter hours in MATH courses numbered 1951 or higher. Discrete Structures in Computer Science (COMP 2300) may be counted toward the math minor. Courses not covered by the foregoing two sentences must be approved in writing by a mathematics faculty advisor.

For students entering DU Fall 2010 or later: At least 50% of the required credit hours for minor must be completed at the University of Denver.

All electives, especially the MATH and COMP electives, should be selected in close consultation with an academic advisor from the Computer Science Department. The courses for the non-mathematics minor (see Minor courses above) should be selected in consultation with an academic advisor from the department in which the minor is administered.

Courses

COMP 3200 Discrete Structures (4 Credits)
Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: MATH 2200 or COMP 2300 and COMP 1672 or COMP 1771.

COMP 3341 Multimedia Systems (4 Credits)
This course covers fundamental issues in design and implementation of multimedia applications. This course also covers technologies in multimedia systems such as multimedia data representation, compression, coding, networking, data management, and I/O technologies. Prerequisite: COMP 3361.

COMP 3351 Programming Languages (4 Credits)
Programming language as a component of software development environment; binding, scope, lifetime, value and type of a variable: run-time structure--static, stack-based and dynamic languages; parameter passing--call by reference, value, result, value-result and name; subprogram parameters; role played by side effects, dangling pointers, aliases and garbage; garbage collection; data abstraction - study of object-oriented, functional, and logic languages. Prerequisites: COMP 2370, COMP 2691, and COMP 2355.

COMP 3353 Compiler Construction (4 Credits)
Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

COMP 3361 Operating Systems I (4 Credits)
Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: COMP 2355, COMP 2370, and COMP 2691.

COMP 3371 Advanced Data Structures & Algorithms (4 Credits)
Design and analysis of algorithms; asymptotic complexity, recurrence equations, lower bounds; algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, etc. Prerequisites: COMP 2370, MATH 3200.

COMP 3381 Software Engineering I (4 Credits)
An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross listed with COMP 4381. Prerequisite: COMP 2370.

COMP 3382 Software Engineering II (4 Credits)
Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

COMP 3400 Advanced Unix Tools (4 Credits)
Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool- building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

COMP 3410 World Wide Web Programming (4 Credits)
Creating WWW pages with HTML, accessing user-written programs via CGI scripts, creating forms, imagemaps and tables, and Java programming principles and techniques. Prerequisite: COMP 3355.

COMP 3421 Database Organization & Management I (4 Credits)
An introductory class in databases explaining what a database is and how to use one. Topics include database design, ER modeling, database normalization, relational algebra, SQL, physical organization of records and clocks, heap files, sorted files, hashing, extendible hashing, linear hashing and B trees. Each student will design, load, query and update a nontrivial database using the Oracle DMBS. Prerequisite: COMP 2370.

COMP 3501 Introduction to Artificial Intelligence (4 Credits)
Programming in LISP and Prolog with applications to artificial intelligence; fundamental concepts of artificial intelligence; emphasis on general problem-solving techniques including state-space representation, production systems, and search techniques. Prerequisites: MATH 2200, COMP 2370.

COMP 3621 Computer Networking (4 Credits)
An introduction to computer networks with an emphasis on Internet protocols. Topics include; network topologies, routing, Ethernet, Internet protocol, sockets, operating system impact and client/server implementations. Prerequisites: COMP 2355 and COMP 2370. Corequisite: COMP 3361.

COMP 3701 Topics in Computer Graphics (4 Credits)
COMP 3702 Topics in Database (4 Credits)
COMP 3703 Topics-Artificial Intelligence (4 Credits)
COMP 3704 Advanced Topics: Systems (4 Credits)
COMP 3705 Topics in Computer Science (1-4 Credits)
COMP 3801 Introduction Computer Graphics (4 Credits)
Fundamentals of graphics hardware, scan conversion algorithms, 2D and 3D viewing transformations, windows, viewports, clipping algorithms, mathematics for computer graphics, graphics programming using a standard API. Prerequisites: COMP 2370, MATH 1952 or 1962, and MATH 2060.
COMP 3821 Game Programming I (4 Credits)
An introduction to computer game programming. Use of a game engine to create 3D computer games. Topics to include game scripting, simple 3D asset creation, incorporation of assets, keyboard/mouse event handling, animation, game phases and score keeping. Prerequisite: COMP 2370.

COMP 3822 Game Programming II (4 Credits)
An introduction to computer game engine programming. Major class goal is to understand how game engines are created by building subsets of a game engine. Non-exhaustive set of topics include how terrains are generated, how animations are supported, how particle systems are implemented, how physics systems are coded, and how support is provided for higher level scripting languages. All coding will be done in low-level graphics languages. Prerequisites: COMP 3801 and COMP 3821.

COMP 3904 Internship/Co-Op in Computing (0-10 Credits)
Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).

COMP 3991 Independent Study (1-10 Credits)
Cannot be arranged for any course that appears in the regular course schedule for that particular year.

COMP 3992 Directed Study (1-10 Credits)

COMP 4362 Operating Systems II (4 Credits)
Continuation of COMP 3361. Case studies of existing operating systems programming. Prerequisite: COMP 3621.

COMP 4372 Theory of Algorithms (4 Credits)
NP-completeness; lower bound theory; approximation algorithms; amortized complexity and data structures, randomized algorithms. Assorted topics such as string algorithms, graph algorithms, linear programming, computational geometry. Prerequisite: COMP 3371.

COMP 4384 Secure Software Engineering (4 Credits)
This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software. There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 3381 & COMP 4555. COMP 3621 is highly recommended. Students must be able to implement complex programs in C, C++ and Java.

COMP 4600 Seminar in Computer Science (0-4 Credits)
Preparation and presentation of lectures on some aspect of current research in computer science; topics not generally encountered in formal courses, may include robotics, pattern recognition, parallel processing, computer applications. 10- to 15- page paper with bibliography required.

COMP 4621 Computer Networking (1-4 Credits)

COMP 4701 Special Tpcs-Computer Graphics (1-4 Credits)

COMP 4702 Advanced Topics-Database (3 Credits)

COMP 4703 Adv Topics-Artificial Intell (1-4 Credits)

COMP 4704 Advanced Topics-Systems (3-4 Credits)

COMP 4705 Advanced Topics-Programming (1-4 Credits)

COMP 4708 Special Topics-VLSI (3 Credits)

COMP 4709 Special Tpcs-Computer Security (3 Credits)

COMP 4721 Computer Security (4 Credits)
This course gives students an overview of computer and system security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 3361.

COMP 4991 Independent Study (1-10 Credits)
Cannot be arranged for any course that appears in regular course schedule for that particular year.

COMP 4992 Directed Study (1-10 Credits)

COMP 4995 Independent Research (1-17 Credits)
Research projects undertaken in conjunction with a faculty member.

COMP 5991 Independent Study (1-17 Credits)

COMP 5995 Independent Research (1-17 Credits)

Master’s and Doctoral Degrees

Why study engineering at the University of Denver?

DU’s Department of Electrical and Computer Engineering (ECE) is creating the future of technology by providing a graduate education that emphasizes both multi-disciplinary and cross-disciplinary knowledge. The distinguished faculty is creating multi-disciplinary education and research programs that anticipate technological trends in research and development, along with industry. Graduate students join the faculty in conducting leading-edge basic and applied research in emerging disciplines developing novel and unique solutions to old and new problems and opportunities.

All laboratories in the Department contain state-of-the-art equipment and software to support basic and applied research in hardware and software design, hardware/software interfacing, communications and signal processing, image processing, computer vision and pattern recognition, optoelectronics, power and energy systems, robotics, mechatronic systems, unmanned systems, among other research areas. Small classes support our multi-disciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students’ individual career goals.

Denver is a first-rate location for business, government and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and DU is located just minutes from the Denver Technological Center, the site of many top technology companies. The Department of Electrical and Computer Engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector that is second to none!

The ECE Department offers, among other degrees, a Masters and a PhD degree in Mechatronic Systems Engineering (MSE). DU/ECE is the only University in the United States that offers BS, MS and PhD degrees in MSE.

Admission to the Master’s DEGREES

- Proof of a bachelor’s degree is required from a regionally accredited college or university.
- A Bachelor of Science (BS) degree in computer engineering (BScpE), electrical engineering (BSEE), mechanical engineering (BSME), or closely related field from a regionally accredited college or university is required for admission to any of the programs.
- Those students whose backgrounds differ significantly from EAC/ABET-accredited BS computer, electrical, or mechanical engineering programs may be required to complete prerequisite undergraduate courses. Such courses are not considered part of the 45 quarter hour requirements for the degree.
- A competency examination may be required of candidates who do not possess a 3.0 GPA or a BS in electrical, electronic, computer, or mechanical engineering from an EAC/ABET accredited program.
- Students with BS degrees in physics, mathematics, computer science, engineering science, electrical engineering technology, engineering physics, or similar BS degrees from a regionally accredited college or university may also be admitted. However, these students should be able to demonstrate competency in the following basic subjects by passing an appropriate competency examination:
  - MSCpE: Circuits and Electronics • Digital Systems • Computer Organization • A high- or low-level computer language
  - MSEE: Digital Design Methods • Physical Electronics • Introductory Electromagnetics • Signals and Systems • Principles of Communications • Circuits and Electronics
  - MSEE: Controls • Robotics • Signals and Systems • Circuits and Electronics • Digital Design Methods • Mechanics • Electromagnetics

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours or more (or one semester hour or more) completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades, and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be completed by the program’s stated deadline. For this reason, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- The Graduate Record Examination (GRE) is required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.
• Competitive GRE scores for MS students admitted to the Department of Electrical and Computer Engineering are as follows:
  • MS: Verbal - 138; Quantitative - 149; Analytical Writing Section - 2.75

Language Proficiency
• Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
• Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations. Applicants still desiring a GTA position, must provide a TOEFL/IELTS score that meets the minimum requirements for the position.

Personal Statement
• A personal statement of at least 300 words is required. The statement should be submitted via upload through the online application process. The statement should include information concerning your life, education, practical experience, special interests and specific purposes for furthering your studies in the Department of Electrical and Computer Engineering at the University of Denver.

Resume / C.V.
• A detailed resume or C.V. is required. This should include all educational achievements, relevant work experience, research and/or volunteer work. The resume or C.V. should be submitted via upload through the online application process.

Recommendation Letters
• Three letters of recommendation are required. These letters should be solicited and uploaded by the recommenders through the online application system. Letters must be received by the program’s stated deadline.

Financial Support
• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
• Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/financialaid) website. International students are not eligible for federal financial aid.
• The Department of Electrical and Computer Engineering also offers a number of competitive Graduate Teaching Assistantships (GTA) that provide full tuition remission along with a stipend for the nine-month academic year (three academic quarters).
• Other sources of financial support available include Graduate Research Assistantships (GRA) either with or without partial tuition remission, scholarships and fellowships, and work opportunities from the department and from the Ritchie School of Engineering and Computer Science. Contact the Electrical and Computer Engineering department for more information about financial support.

Application Status
• We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address
• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants
• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information. International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline. The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.
Admission to the DOCTORAL DEGREE

- Proof of a bachelor’s, and, if applicable, a master’s degree is required from a regionally accredited college or university.
- Students with a MS in CpE, MS in MSE, MS in EE, MS in ME, or closely related areas may apply for admission to the PhD in ECE or PhD in MSE programs. Admission with only a BS in this field is also possible, but students with only a BS degree are strongly encouraged to enroll first in a MS (CpE, EE, MSE) program.
- Admission to the PhD programs is based on review of the application and associated references. Normally, a GPA of at least 3.0 is required.
- All graduate engineering courses presuppose mastery of the subject matter of a modern ABET-accredited curriculum in engineering. Students with a BS in other engineering or related science fields and students with a BSCpE, BSEE, or BSME who have not taken graduate academic work for some time may be required to complete preparatory courses that are prerequisites for the core courses of the engineering concentrations on which the qualifying exams are based. These courses carry no credit toward the graduate degree.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours or more (or one semester hour or more) were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades, and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- The Graduate Record Examination (GRE) is required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.
- Competitive GRE scores for students admitted to the Department of Electrical and Computer Engineering are as follows:
  - PhD: Verbal - 143; Quantitative - 155; Analytical Writing Section - 3.0

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations. Applicants still desiring a GTA position, must provide a TOEFL/IELTS score that meets the minimum requirements for the position.

Personal Statement

- A personal statement of at least 300 words is required. The statement should be submitted via upload through the online application process. The statement should include information concerning your life, education, practical experience, special interests and specific purposes for furthering your studies in the Department of Electrical and Computer Engineering at the University of Denver.

Resume / C.V.

- A detailed resume or C.V. is required. This should include all educational achievements, relevant work experience, research and/or volunteer work. The resume or C.V. should be submitted via upload through the online application process.

Recommendation Letters

- Three letters of recommendation are required. These letters should be solicited and uploaded by the recommenders through the online application system. Letters must be received by the program’s stated deadline.
Financial Support

• To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
• Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/financialaid) website. International students are not eligible for federal financial aid.
• The Department of Electrical and Computer Engineering also offers a number of competitive Graduate Teaching Assistantships (GTA) that provide full tuition remission along with a stipend for the nine-month academic year (three academic quarters).
• Other sources of financial support available include Graduate Research Assistantships (GRA) either with or without partial tuition remission, scholarships and fellowships, and work opportunities from the department and from the Ritchie School of Engineering and Computer Science. Contact the Electrical and Computer Engineering department for more information about financial support.

Application Status

• We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address

• Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants

• For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information.
  International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.

Master of Science in Computer Engineering

The Master of Science in Computer Engineering (MSCpE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this program is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offers a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MSCpE program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.

Minimum Credit Requirements

Every candidate for the MS degree must complete 45 QH of credit, at least 36 of which must be completed at the University of Denver.

Program Structure

Candidates may elect either the thesis or non-thesis option. This choice may be made at any time, although a delay in declaration may impact the completion date. Students who are GTAs or who receive financial support from a University research grant, such as GRAs, are required to elect the thesis option. The program is designed to be completed in about six quarters if two courses (usually 8 QH) are taken each quarter.

Non-Thesis Option

The non-thesis option is the more flexible of the two options. This program is designed with the working professional in mind. For this option, a grade of B or better must be obtained in each course in order for that course to count toward the requirement of 45 QH. An overall minimum GPA of 3.0 is also
required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree, after approval by their advisor and the Chair. Each student must take a minimum of 24 quarter hours at the 4000-level.

**One Year (four quarters) – Non-thesis Option**

The Department of Electrical and Computer Engineering (ECE) offers a one-year, non-thesis option. Students who select the one-year program will be able to graduate within 12 months, four academic quarters, as there are enough courses offered in each specialization to meet the 20 QH depth requirement. The breadth requirement (14 QH) is fulfilled by taking courses offered in other specializations. In addition, every year courses that satisfy the mathematics requirement (3 QH) are offered. The MS non-thesis structure is shown below. QH in each category denote minimum requirements that must be satisfied. Any changes in the student’s plan of study must be approved a-prior by the student’s advisor.

The basic structure of the minimum 45 QH for the non-thesis option is as follows:

<table>
<thead>
<tr>
<th>Requirements for Non-Thesis Option (minimum QH)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Requirement</td>
</tr>
<tr>
<td>Depth Requirement - Specialization Area</td>
</tr>
<tr>
<td>Mathematics Requirement (requires one approved course at the 3000-level or higher)</td>
</tr>
<tr>
<td>Breadth Requirement</td>
</tr>
<tr>
<td>Total Credits</td>
</tr>
</tbody>
</table>

1 This indicates minimum number of quarter hours. Any credits over the 3 QH from the mathematics courses will count toward the breadth requirement.

**Thesis Option**

A thesis permits a candidate to obtain depth in an area of study and it is especially useful for individuals who seek to pursue a subsequent degree, for example, a PhD degree. Thesis candidates work closely with a thesis advisor. The thesis option is required for all GRAs and GTAs. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the 45 QH hour requirements. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree. Each student must take a minimum of 16 quarter hours at the 4000-level. The basic structure of the minimum 45 QH for the thesis option is as follows:

<table>
<thead>
<tr>
<th>Requirements for Thesis Option (minimum QH)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Requirement</td>
</tr>
<tr>
<td>Depth Requirement - Specialization Area</td>
</tr>
<tr>
<td>Thesis</td>
</tr>
<tr>
<td>Total Credits</td>
</tr>
</tbody>
</table>

1 The breadth requirement must be pre-approved by the student's advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

**Breadth Requirement (Non-Thesis and Thesis Option)**

Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering, Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student’s advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement.

**The MSCpE program offers one area of specialization:**

- Computer Systems Engineering

The student’s degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

**Core courses for all Computer Engineering Students**

The following courses are required for all computer engineering students:
Specialization in Computer Systems Engineering
This area of specialization prepares students with fundamental and working knowledge of methods for analysis, design, and implementation of intelligent systems (IS). Particular attention is given to signal and information processing in IS, design of IS, and implementation of IS using state-of-the-art technology. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENCE 3321</td>
<td>Network Design</td>
<td>4</td>
</tr>
<tr>
<td>ENCE 4231</td>
<td>Embedded Systems Programming</td>
<td>4</td>
</tr>
<tr>
<td>ENCE 4250</td>
<td>Advanced Hardware Description Language (HDL) Modeling and Synthesis</td>
<td>4</td>
</tr>
<tr>
<td>ENCE 4620</td>
<td>Advanced Computer Vision</td>
<td>4</td>
</tr>
<tr>
<td>ENCE 4630</td>
<td>Advanced Pattern Recognition</td>
<td>4</td>
</tr>
<tr>
<td>ENEE 3670</td>
<td>Introduction to Digital Signal Processing</td>
<td>4</td>
</tr>
</tbody>
</table>

Master of Science in Electrical Engineering
The Master of Science in Electrical Engineering (MSEE) is designed to advance the student’s knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this programs is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MS degree program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. <td>16</td>
</tr>
<tr>
<td>Breadth Requirement</td>
<td>6</td>
</tr>
<tr>
<td>Thesis</td>
<td>15</td>
</tr>
<tr>
<td>Total Credits</td>
<td>45</td>
</tr>
</tbody>
</table>

1 The breadth requirement must be pre-approved by the student’s advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

Breadth Requirement (Non-Thesis and Thesis Option)

Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering, Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student’s advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement.

The MSEE program offers three areas of specialization:

- Control & Communication Systems
- Electric Power & Energy Systems
- Optics/Optoelectronics/Photonics

Each student must choose an area of specialization. The student’s degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

Core courses for all Electrical Engineering Students

The following courses are required for all electrical engineering students, regardless of area of specialization:

- ENEE 4640 Electromagnetic Compatibility 4
- ENGR 3620 Advanced Engineering Mathematics 4

Specialization in Control & Communication Systems

This area of specialization prepares students for basic and applied research and development of complex systems, including, electrical, mechanical, bio-inspired, mechatronic systems, robotic systems, and unmanned systems. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

- ENCE 4231 Embedded Systems Programming 4
- ENEE 3670 Introduction to Digital Signal Processing 4
ENGR 3721 & ENGR 3722 Controls and Control Systems Laboratory 4
ENGR 4730 Introduction to Robotics 4
ENGR 4350 Reliability 4
ENGR 4620 Optimization 3,4
ENGR 4735 Linear Systems 4
ENGR 4740 Principles of Adaptive and Optimal Control Systems 4

1 This course may count toward the specialization with advisors pre-approval. This course may not be offered on a regular basis.

Specialization in Electric Power and Energy Systems
This area of specialization prepares students with the basic foundation and advanced knowledge, required for the research and development in the area of power systems, renewable energy systems, and power electronic devices. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

ENGR 3510 Renewable and Efficient Power and Energy Systems 4
ENGR 3540 Electric Power Systems 4
ENGR 3721 & ENGR 3722 Controls and Control Systems Laboratory 4
ENGR 4530 Intro to Power and Energy 4
ENGR 4545 Electric Power Economy 4
ENGR 4560 Power Generation Operation and Control 4
ENGR 4590 Power System Protection 4
ENGR 4735 Linear Systems 4
ENGR 4740 Principles of Adaptive and Optimal Control Systems 4

Specialization in Optics/Optoelectronics/Photonics
This area of specialization prepares students for research, development, and design of devices and systems operating based on wave theory; focusing on laser, optics, light wave devises, and systems.

ENEE 4030 Optoelectronics 4
ENEE 4035 Nanophotonics 4
ENGR 4200 Introduction to Nanotechnology 4
ENCE 4250 Advanced Hardware Description Language (HDL) Modeling and Synthesis 4
ENGR 4735 Linear Systems 4
ENGR 4740 Principles of Adaptive and Optimal Control Systems 4

Master of Science in Mechatronic Systems Engineering
The Master of Science in Mechatronic Systems Engineering (MSMSE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this programs is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MS degree program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.
Minimum Credit Requirements
Every candidate for the MS degree must complete 45 QH of credit, at least 36 of which must be completed at the University of Denver.

Program Structure
Candidates may elect either the thesis or non-thesis option. This choice may be made at any time, although a delay in declaration may impact the completion date. Students who are GTAs or who receive financial support from a University research grant, such as GRAs, are required to elect the thesis option. The program is designed to be completed in about six quarters if two courses (usually 8 QH) are taken each quarter.

Non-Thesis Option
The non-thesis option is the more flexible of the two options. This program is designed with the working professional in mind. For this option, a grade of B or better must be obtained in each course in order for that course to count toward the requirement of 45 QH. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree, after approval by their advisor and the Chair. Each student must take a minimum of 24 quarter hours at the 4000-level.

One Year (four quarters) – Non-thesis Option
The Department of Electrical and Computer Engineering (ECE) offers a one-year, non-thesis option. Students who select the one-year program will be able to graduate within 12 months, four academic quarters, as there are enough courses offered in each specialization to meet the 20 QH depth requirement. The breadth requirement (14 QH) is fulfilled by taking courses offered in other specializations. In addition, every year courses that satisfy the mathematics requirement (3 QH) are offered. The MS non-thesis structure is shown below. QH in each category denote minimum requirements that must be satisfied. Any changes in the student’s plan of study must be approved a-prior by the student’s advisor.

The basic structure of the minimum 45 QH for the non-thesis option is as follows:

<table>

<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Requirement</td>
<td>8</td>
</tr>
<tr>
<td>Depth Requirement - Specialization Area</td>
<td>20</td>
</tr>
<tr>
<td>Mathematics Requirement (requires one approved course at the 3000-level or higher)</td>
<td>3</td>
</tr>
<tr>
<td>Breadth Requirement</td>
<td>14</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td>45</td>
</tr>
</tbody>
</table>

1  This indicates minimum number of quarter hours. Any credits over the required 3 QH from the mathematics courses will count toward the breadth requirement.

Thesis Option
A thesis permits a candidate to obtain depth in an area of study and it is especially useful for individuals who seek to pursue a subsequent degree, for example, a PhD degree. Thesis candidates work closely with a thesis advisor. The thesis option is required for all GRAs and GTAs. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the 45 QH hour requirements. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree. Each student must take a minimum of 16 quarter hours at the 4000-level. The basic structure of the minimum 45 QH for the thesis option is as follows:

<table>
<thead>
<tr>
<th>Requirements for Thesis Option (minimum quarter hours)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Requirement</td>
<td>8</td>
</tr>
<tr>
<td>Depth Requirement - Specialization Area</td>
<td>16</td>
</tr>
<tr>
<td>Breadth Requirement 1</td>
<td>6</td>
</tr>
<tr>
<td>Thesis</td>
<td>15</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td>45</td>
</tr>
</tbody>
</table>

1 The breadth requirement must be pre-approved by the student’s advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

Breadth Requirement (Non-Thesis and Thesis Option)
Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering,
Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student’s advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement.

The MSE program offers one area of specialization:

- Robotic Systems

The student’s degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

Core courses for all Mechatronic Systems Engineering Students

The following courses are required for all mechatronic systems engineering students regardless of area of specialization:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENEE 4640</td>
<td>Electromagnetic Compatibility</td>
<td>4</td>

<td>4</td>
</tr>
</tbody>
</table>

Specialization in Robotics Systems

This area of specialization is designed to meet the needs of industry and federal research laboratories for engineers with multidisciplinary experience and ability to design and integrate complex systems requiring knowledge from diverse engineering disciplines. Said differently, mechatronic systems involves integration of mechanical, electrical, and computer engineering to design complex systems that perform real-world tasks. This program includes a broad set of common course requirements along with a selection of appropriate technical electives providing both breadth and depth of knowledge in a student’s area of interest.

1 This course may count toward the specialization with advisors preapproval. This course may not or may not be offered on a regular basis.

Doctor of Philosophy in Electrical and Computer Engineering

The objective of the PhD in Electrical and Computer Engineering degree program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of science, engineering and technology, through independent research. The PhD students of the 21st century may pursue academic, research, entrepreneurial, and/or industrial careers. We offer opportunities to develop individualized plans of study based on the students’ previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in ECE degree requirements.

Research requires an in-depth study of engineering problems with a broad knowledge base in science and engineering. Therefore, advanced courses are offered to strengthen the fundamentals and to broaden the engineering and science perspective. The minimum credit requirements are different for individuals entering a program with a closely related master’s degree and for those entering with a bachelor’s only. All requirements for the degree must be completed within seven years (eight years without a master’s degree) from admission to candidacy. A grade of C or better must be obtained in each course in order for that course to count toward the credit hour requirements. An overall minimum GPA of 3.0 is also required for graduation.

The PhD in ECE is appealing to students because it offers the much needed specialization component and the ‘degree identity’ required to be competitive in the job market. Graduates from this program will be well equipped to follow academic careers, or be hired in federal laboratories, industry and the private sector.

Program requirements

All PhD students who have been admitted to the PhD in ECE program must successfully complete three milestones before the PhD degree can be conferred. These milestones refer to:
• Demonstrating that the student is qualified to begin PhD studies
• Demonstrating that the student may identify and formulate a research problem
• Demonstrating that the student can defend her/his thesis

These three milestones are referred to as the “PhD Qualifying Exam”, the “Comprehensive Exam” (also known as the “PhD Proposal”), and the “Thesis Defense”, respectively.

Coursework requirements
The PhD in ECE does not have specific course requirements. The courses will be assigned by the student’s advisor.

Minimum credit requirements

Students with a Bachelor of Science in Engineering/Science
For students admitted to the PhD program with a bachelor’s degree, 90 QH are required, 72 of which must be completed at the University of Denver. A minimum of 48 QH must be at the 4000-level or higher and may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor. The student with his/her advisor will develop an appropriate plan of study with core requirements, an area of specialization (depth requirement), breadth requirement and advanced mathematics. The core will consist of 8 QH of coursework. The area of specialization will consist of 16 QH of coursework. An additional 6 QH of coursework (excluding independent research) is required as related breadth requirement. The student must complete a minimum of 16 QH at the 4000-level courses, excluding independent research. Prior to completion of the comprehensive exam, the plan of study must be approved by the student’s PhD committee.

If a student is entering the PhD program without a relevant master’s degree, the student should work with their advisor in order to meet the degree requirements for a master’s degree. All requirements for the given master’s degree must be met in order for the students to receive the degree.

A minimum of 48 QH must be at the 4000-level or higher, may include Independent Research or Independent Study as considered appropriate by advisor and assuming a minimum of 16 QH are earned excluding independent research

</tr>
</tbody>
</table>

The breadth requirement must be pre-approved by the student’s advisor.

Students with a Master of Science in Engineering/Science
If a student is admitted with a closely related master’s degree, up to 45 hours may be transferred and applied to the doctorate degree. A minimum of 36 quarter hours is required at the University of Denver. The student with his or her advisor will develop an appropriate program consisting of a minimum of 28 quarter hours at the 4000-level, which may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor. The student with his or her advisor will develop an appropriate plan of study with an area of specialization, breadth requirements and advanced mathematics. Prior to completion of the comprehensive exam, the student’s plan of study must be approved by the student’s PhD committee.

A minimum of 36QH must be at the 4000-level or higher, may include Independent Research or Independent Study as considered appropriate by advisor

| Requirement                                                     | Credits |

Non-coursework Requirements

Qualifying Examination
Each student must demonstrate sufficient breadth and depth of basic engineering knowledge relevant to electrical and computer engineering and be able to demonstrate ability to organize and present her/his thoughts in a convincing manner. The PhD Qualifying Exam achieves this through three components: a written Common Exam of basic engineering knowledge (breadth), two written Specific Area Exams (depth), and an oral Design Exam (breadth, depth, organization and presentation). Failure to pass any component of the PhD Qualifying Exam will prevent the student from continuing in the PhD program.

All PhD students who are admitted into the Department of Electrical and Computer Engineering must pass the PhD Qualifying Exam. There are three components of the PhD Qualifying Exam consisting of four test subject areas. The three components are
PhD Common Exam
This is a common two-hour written exam. Each student, with advice from his/her advisor must choose one of the three subject areas. The Common Exam will be graded as pass/fail; with 70% constituting as passing grade.

• Engineering Mathematics (Calculus, Engineering Analysis, Linear Algebra)
• Circuits and Electronics
• Digital Design, Computer Organization, and HDL

PhD Specific Area Exam
This part of the exam will consist of two written subject area texts lasting two hours each. Students must pick two specific subject areas and cannot be the same subject area as the topic chosen for the PhD Common Exam. The Specific Area Exam will be graded as pass/fail; with 70% constituting as passing grade.

• Digital Design, Computer Organization, and HDL (only if NOT taken for the common component)
• Circuits and Electronics (only if NOT taken for the common component)
• Microprocessors
• Data Structures, Algorithms, & Operating Systems
• Control, Signals & Systems
• Electromagnetics
• Power & Energy Systems
• Optoelectronics/Optical Fiber Communication
• Communication & DSP
• Robotics
• Computer Vision
• Pattern Recognition

PhD Specialization Design Exam
This portion of the exam will be an open-ended design problem developed by the candidate’s advisor. The Design Exam will be based on the candidate’s area of research. This exam will be evaluated by a committee of three faculty (one must be the candidate’s advisor) in both written and oral form. The candidate will have five days to complete the written report and an additional two days to prepare the presentation. If the written design exam is turned in late for any reason, it will be considered as an automatic fail. The Specialization Design Exam will be graded on a pass/fail scale.

The purpose of this design examination is to demonstrate the candidate’s ability to follow good design procedures at the level of an undergraduate senior design course and to explain/justify the tradeoffs that are tantamount to design. For the purposes of this examination, “good design procedures” shall include the following steps as outlined in the DU ENGR 3313, ENGR 3323, ENGR 3333 sequence in the undergraduate curriculum:

• Conceptual Design
• Requirements Analysis
• Specification
• Brainstorming
• Architectural Design
• Detailed Design
• Test and Validation
• Maintenance and Support

In general, it will not be possible to fully execute a design solution to an open-ended design problem in one week. The emphasis of this exam is on the candidate’s ability to complete the above steps to some convincing level of detail, the candidate’s ability to explain/justify the tradeoffs considered at each step of the process, and the candidate’s ability to communicate the completeness of the design exercise to the committee at a level appropriate for a beginning graduate student in engineering. As part of this exercise, comparisons to the existing body of literature are expected.

If a student is unable to pass the PhD Common Exam and/or any of the PhD Specific Area Exams, the student must take the same exam(s) during the second attempt; the student is not allowed to switch subject areas.

All PhD students must attempt the PhD Qualifying Exam by the end of their first year. If a student is unsuccessful at passing all four test areas, the student will be given an additional year to pass the PhD Qualifying Exam. All students must take and pass the PhD Qualifying Exam by the end of their second year. A student shall be considered to have passed the PhD Qualifying Exam only after all four test areas have been successfully completed within the given time constraints identified.
Comprehensive Examination

The purpose of the Comprehensive Examination is to ascertain the potential of the student for PhD quality research. At least two quarters prior to the final defense, the student shall schedule and take the Comprehensive Examination. This oral and written examination will be attended by a minimum of three faculty members, the same faculty who will attend the student’s final dissertation defense. The Comprehensive Exam may be open to other students based on the requirements of the student’s advisor. The student is expected to make a 30 to 40 minute concise presentation on her/his dissertation topic. The oral and written presentation will highlight previous work in this area, demonstrate a need for the given research, and explain how the given research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. In addition, the student will be expected to answer general fundamental questions in the area of her/his concentration and detailed questions in the area of the student’s graduate course work.

The PhD Qualifying Examination must be taken and passed prior to the student taking the Comprehensive Examination. The Comprehensive Examination can be taken at most 2 times. If the student does not pass the Comprehensive Exam on the second try, the student will be terminated from the program. The comprehensive exam will be graded on a pass/fail system, revisions maybe required.

Dissertation

The student is required to complete and defend a dissertation of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University’s Graduate School guidelines. A summary of the dissertation must be presented in a public seminar and subsequently defended by the student in the final oral examination. The examining committee will consist of the student’s entire PhD committee.

Residence Requirement

Enrollment in at least six quarters (four semesters), including at least two consecutive quarters (one semester) of full-time attendance is required for graduation.

PhD Committee

The PhD committee should consist of at least four faculty members. Three faculty members must be from within the student’s specialty area; these can include the student’s advisor, other faculty in that degree program and, if necessary, off-campus experts. Finally, for the final oral defense of the thesis, an oral defense chair, who must be a tenured faculty member outside the Department of Electrical and Computer Engineering and Mechanical and Materials Engineering, needs to be identified in consultation with the DU Graduate Studies Office. The PhD committee must approve the student’s plan of study and research plan and must be in place before the PhD comprehensive exam.

Doctor of Philosophy in Mechatronics Systems Engineering

The objective of the PhD in MSE degree program are to provide an educational environment that encourages students to develop the ability to contribute to the advancement of science, engineering and technology, through independent research. The PhD students of the 21st century may pursue academic, research, entrepreneurial, and/or industrial careers. We offer opportunities to develop individualized plans of study based on the students’ previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in MSE degree requirements.

Research requires an in-depth study of engineering problems with a broad knowledge base in science and engineering. Therefore, advanced courses are offered to strengthen the fundamentals and to broaden the engineering and science perspective. The minimum credit requirements are different for individuals entering a program with a closely related master’s degree and, if necessary, off-campus experts. Finally, for the final oral defense of the thesis, an oral defense chair, who must be a tenured faculty member outside the Department of Electrical and Computer Engineering and Mechanical and Materials Engineering, needs to be identified in consultation with the DU Graduate Studies Office. The PhD committee must approve the student’s plan of study and research plan and must be in place before the PhD comprehensive exam.

Program requirements

All PhD students who have been admitted to the PhD in ECE or PhD in MSE programs must successfully complete three milestones before the PhD degree can be conferred. These milestones refer to:

- Demonstrating that the student is qualified to begin PhD studies
- Demonstrating that the student may identify and formulate a research problem
- Demonstrating that the student can defend her/his thesis

These three milestones are referred to as the “PhD Qualifying Exam”, the “Comprehensive Exam” (also known as the “PhD Proposal”), and the “Thesis Defense”, respectively.
Coursework requirements
The PhD in ENMT does not have specific course requirements. The courses will be assigned by the student's advisor.

Minimum credit requirements

Students with a Bachelor of Science in Engineering/Science
For students admitted to the PhD program with a bachelor's degree, 90 QH are required, 72 of which must be completed at the University of Denver. A minimum of 48 QH must be at the 4000-level or higher and may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor. The student with his/her advisor will develop an appropriate plan of study with core requirements, an area of specialization (depth requirement), breadth requirement and advanced mathematics. The core will consist of 8 QH of coursework. The area of specialization will consist of 16 QH of coursework. An additional 6 QH of coursework (excluding independent research) is required as related breadth requirement. The student must complete a minimum of 16 HQ at the 4000-level courses, excluding independent research. Prior to completion of the comprehensive exam, the plan of study must be approved by the student's PhD committee.

If a student is entering the PhD program without a relevant master's degree, the student should work with their advisor in order to meet the degree requirements for a master's degree. All requirements for the given master's degree must be met in order for the students to receive the degree.

A minimum of 48 QH must be at the 4000-level or higher, may include Independent Research or Independent Study as considered appropriate by advisor and assuming a minimum of 16 QH are earned excluding independent research

The PhD committee must approve the student’s plan of study and research plan and must be in place before the PhD comprehensive exam.

**Engineering, Computer Courses**

**ENCE 3220 Microprocessor Systems II (4 Credits)**
Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Prerequisite: ENCE 3210.

**ENCE 3231 Embedded Systems Programming (4 Credits)**
Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3220.

**ENCE 3250 HDL Modeling & Synthesis (3 Credits)**
Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor’s permission.

**ENCE 3261 Fault Tolerant Computing (3 Credits)**

**ENCE 3321 Network Design (4 Credits)**
Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**
Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA’s, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3220.

**ENCE 3610 Multimedia Systems (3 Credits)**
Interactive multimedia technologies include hardware, software, standards, concepts and issues, compression, decompression, user interface design, query by content, multimedia indexing, and distributed multimedia.
ENCE 3620 Computer Vision (4 Credits)
This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4630. Prerequisite: ENEE 3311.

ENCE 3630 Pattern Recognition (4 Credits)
This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.

ENCE 4100 High Speed Digital Design (4 Credits)
Fundamental topics related to the development of high speed digital systems. Topics include signal integrity and reliability related to crosstalk, parasitic, and electromagnetic interference caused by device clocking speed and system complexity. Project. Cross listed with ENCE 3110.

ENCE 4110 Modern Digital Systems Design (4 Credits)
This course focuses on the design of digital systems using combinational, sequential, and programmable logic devices and Hardware Description Languages (HDL). Techniques for logic design including asynchronous logic, physical world interfaces to digital systems, and system performance analysis methods are studied. Students also learn HDL-Verilog to program CPLD devices and FPGA systems. Cross listed with ENCE 3100.

ENCE 4210 Microprocessor Systems I (4 Credits)
Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Cross listed with ENCE 3210.

ENCE 4231 Embedded Systems Programming (4 Credits)
Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems.

ENCE 4250 Advanced Hardware Description Language (HDL) Modeling and Synthesis (4 Credits)
This course covers advanced concepts in Hardware Description Language (HDL) modeling and Synthesis. It covers topics including but not limited to digital system design, simulation, and synthesis using Verilog HDL and VHDL. The course also covers RTL design, behavioral description, system Verilog, and timing analysis using CAD tools.

ENCE 4501 Advanced VLSI Design (4 Credits)
Advanced techniques in the fabrication and design of VLSI circuits and systems. Modeling of parasitic components. Floor-planning, clock distribution, routing, and low power design. Cross listed with ENCE 3501. Prerequisite: ENCE 3501 or permission of instructor.

ENCE 4601 Detection and Estimation Theory (4 Credits)
The subject of the detection and estimation theory course is on signal and information processing for the purpose of making desired inferences. The purpose of this course is to provide the fundamentals of theory and principles underlying the techniques for such processing. The following topics are involved in this course: receiver operating characteristics, hypothesis testing, Neyman-Pearson theorem, detection of deterministic signals with known parameters in Guassian noise, matched filters principles, detection of random signals with known characteristics, estimator-correlator, linear models, estimation bias, variance, Cramer-Rao bounds and Fisher matrix, Bayesian estimation, maximum likelihood estimation, minimum mean-squared estimation, detection of deterministic signals with unknown parameters, signal parameter estimation, Bayesian approach and generalized likelihood ratio test, detection of random signals with unknown characteristics, unknown noise parameters; signal processing applications. Prerequisite: basic understanding of probability theory and statistics, or permission of instructor.

ENCE 4620 Advanced Computer Vision (4 Credits)
This course covers advanced concepts in image processing and computer vision including but not limited to image radiometry and geometric formation, edge detection, geometric based transformations (e.g., image warping and morphing), camera calibration, Epipolar geometry, and stereo feature matching. Other advanced topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice advanced topics in image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 3620. Prerequisite: ENEE 3311.

ENCE 4630 Advanced Pattern Recognition (4 Credits)
This class covers advanced topics in pattern recognition including but not limited to Bayesian decision theory, parametric estimation and supervised learning, linear discriminant functions, nonparametric methods, feature extraction for representation and classification, manifold learning, bag of words, and Support Vector Machines. Cross listed with.
ENCE 4680 Time-Frequency Signal Analysis (4 Credits)
This course focuses on time-frequency signal processing methods. Many TFRs and their usefulness in many applications is covered. Course topics include: signals and signal properties; uncertainty principle. Review of 1-D transforms: Fourier transform (FT), group delay, instantaneous frequency. Desirable properties: linear vs. quadratic TFRs. Linear TFRs: Short-time Fourier transform (STFT); Wavelet transform; filter banks. Spectrogram: relation to STFT; tradeoff between TF resolution and cross-term attenuation; application examples. Wigner distribution (WD): definition; properties; signal examples; relation to narrowband ambiguity function; cross-term geometry; applications; Smoothed WDs. Scalogram: relation to wavelet transform; properties; TF resolution' applications. Adaptive TFRs: adaptive spectrogram; positive TFRs; short-time techniques; time-frequency distribution series. Reassignment method; matching pursuit algorithms. TFRs in real-world applications: wireless communications, biomedicine, radar, sonar, detection, estimation, classification, speech processing, image processing, structural health monitoring, and many more. Prerequisites: basic knowledge of signal and systems, and digital signal processing, or permission of instructor.

ENCE 4800 Advanced Topics (CPE) (1-5 Credits)
Various topics in computer engineering as announced. May be taken more than once. Cross-listed with ENCE 3321, ENCE 3620.

ENCE 4900 Machine Learning (4 Credits)
This course provides a broad introduction to machine learning. Topics include: supervised learning (linear regression, logistic regression, parametric/ non-parametric, neural networks, support vector machines); unsupervised learning (clustering, dimensionality reduction, kernel methods); anomaly detection and recommender systems. The course also discusses recent applications of machine learning. Recommended prerequisite: basic probability theory and statistics.

ENCE 4991 Independent Study (1-10 Credits)
ENCE 4992 Directed Study (1-10 Credits)
ENCE 4995 Independent Research (1-18 Credits)

Engineering, Electrical Courses

ENEE 3011 Physical Electronics (4 Credits)
The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010, CHEM 1610, PHYS 1213, PHYS 1214 or permission of instructor.

ENCE 3111 Signals & Systems (4 Credits)
Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Prerequisites: ENEE 2021, MATH 2070.

ENCE 3141 Digital Communications (3 Credits)
Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3610 or permission of instructor.

ENCE 3611 Analysis and Design of Antennas and Antenna Arrays (4 Credits)
Maxwell's equations applied to antenna analysis and design. Topics include fundamental parameters of antennas, radiation integrals and auxiliary potential functions, analysis and design of linear wire antennas, loop antennas, arrays, broadband antennas, frequency independent antennas, aperture antennas and horns. Integrated lab included. Prerequisite: ENEE 2611.

ENCE 3620 Optical Fiber Communications (4 Credits)
A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

ENCE 3641 Introduction to Electromagnetic Compatibility (4 Credits)
The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Includes integrated lab. Cross listed with ENEE 4640. Prerequisites: ENEE 3111, ENEE 2611 and ENEE 2222.

ENCE 3660 Communications Systems Design (4 Credits)
Design and performance evaluation of terrestrial and space communications systems; error correction coding; spread spectrum communication; link budget analysis and environmental effects. System design considerations include engineering judgment decisions to implement optimum communication configurations such as data rates, bandwidth, modulation schemes and operating frequencies. Prerequisite: ENEE 3130.
ENEE 3670 Introduction to Digital Signal Processing (4 Credits)
Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

ENEE 4030 Optoelectronics (4 Credits)
Optical fibers: structures, waveguiding, and fabrication; attenuation and dispersion; optical sources (LED, LASER, Fiber laser); power launching and coupling; photodetectors (APD, PIN, MSM); and practical optical transmitter and receivers. Cross listed with ENEE 3030.

ENEE 4035 Nanophotonics (4 Credits)
Nanophotonics provides high-speed, high-bandwidth, and ultra-small optoelectronic components. This course covers nanoscale processes, devices and their applications for harnessing and manipulating light on the nanoscale.

ENEE 4141 Digital Communications (4 Credits)
Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels.

ENEE 4116 Advanced Digital Signal Processing Topics (4 Credits)
Study of linear discrete-time systems used to perform operation on random processes for the purposes of signal detection, estimation, spectral estimation, enhancement and parametric modeling of signals and systems, linear difference equations, Z-transforms, random sequences, state variables, matched filtering, Wiener filtering. Prerequisite: ENEE 3670.

ENEE 4460 Real-Time Digital Signal Processing (4 Credits)
Digital signal processing algorithms and processing of discrete data, finite word length effects on filters, fixed point arithmetic and floating-point arithmetic. Overview of different architectures of digital signal processors. Programming of the DSP processor, implementation of DSP algorithms on DSP hardware in labs. Prerequisite: ENEE 3111, ENEE 3670, or ENEE 3210.

ENEE 4620 Adv Optical Fiber Comm (4 Credits)
A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users who have a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA), and ultra-fast optical time division multiplexing (OTDM). Advanced Project. Cross listed with ENEE 3620. Prerequisite: instructor permission.

ENEE 4625 Radio over Fiber Comms. (4 Credits)
This course provides a technical overview of optical networking. It gives students a solid understanding of optical networking field principles and practice. Underlying principles are reviewed along with common optical solutions and practices. It explains and provides practical tips on how to design and implement Networks. Examples are used to demonstrate key concepts of ATM, SONET/SDH and DWDM implementation. Prerequisite: ENEE 3011 or instructor approval.

ENEE 4630 Optical Networking (4 Credits)
This course provides a technical overview of optical networking. It gives students a solid understanding of optical networking field principles and practice. Underlying principles are reviewed along with common optical solutions and practices. It explains and provides practical tips on how to design and implement Networks. Examples are used to demonstrate key concepts of ATM, SONET/SDH and DWDM implementation. Prerequisite: ENEE 3011 or instructor approval.

ENEE 4635 Optical Wireless Communications (OWC) (4 Credits)
This course describes addressing important issues in optical wireless theory, including coding and modulation techniques for optical wireless, wireless optical CDMA communication systems, Optical MIMO systems and optical wireless technology such as visible light communications, IR links and sensor networks. Project in OWC. No prerequisite.

ENEE 4640 Electromagnetic Compatibility (4 Credits)
The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include: Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Final Project. Cross listed with ENEE 3641.

ENEE 4650 Radio Frequency Design in the Wireless World (4 Credits)
Topics include the following: basic concepts in Radio Frequency design and communications, transceiver architectures, low-noise amplifiers, mixers, oscillators, phase-locked loops, power amplifiers, and transceiver design examples. Final Project. Prerequisites: ENEE 2611, ENEE 2222, and ENEE 3111 or equivalents.

ENEE 4800 Advanced Topics (EE) (1-5 Credits)
Various advanced topics in electrical engineering as announced. May be taken more than once. Cross-listed with ENEE 3035.
ENEE 4991 Independent Study (1-10 Credits)
ENEE 4992 Directed Study (1-10 Credits)
ENEE 4995 Independent Research (1-18 Credits)
ENEE 6991 Ph.D Independent Study (1-10 Credits)
ENEE 6995 Ph.D Independent Research (1-10 Credits)

Engineering Courses

ENGR 3210 Intro Nano-Electro-Mechanics (4 Credits)
Familiarize science and engineering students with the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications to state of the art and future sensors, actuators, and electronics. Starting with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 4210. Prerequisite: must be an engineering or science major of at least junior standing.

ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)
This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2021.

ENGR 3520 Introduction to Power Electronics (4 Credits)
This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)
In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

ENGR 3540 Electric Power Systems (4 Credits)
This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

ENGR 3550 Introduction to Machine Drive Control (4 Credits)
This course provides the basic theory for the analysis and application of adjustable-speed drive systems employing power electronic converters and ac or dc machines. Prerequisites: ENGR 3520 and ENGR 3530.

ENGR 3560 Engineering Analysis (3 Credits)
Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to Bessel functions, and applied probability and statistics. Cross listed with ENGR 3620. Prerequisites: MATH 2070, MATH 2080.

ENGR 3620 Advanced Engineering Mathematics (4 Credits)

ENGR 3630 Finite Element Methods (4 Credits)
Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisite: ENGR 3610 or equivalent.

ENGR 3721 Controls (3,4 Credits)
Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2021, ENGR 3610 or permission of instructor.

ENGR 3722 Control Systems Laboratory (1 Credit)
This laboratory course serves as supplement to ENGR 3721. It aims at providing “hands on” experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

ENGR 3730 Robotics (3 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.
ENGR 3731 Robotics Lab (1 Credit)
Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

ENGR 3800 Topics (ENGR) (1-4 Credits)
Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENGR 3900 Engineering Internship (0-4 Credits)
Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

ENGR 3951 Engineering Assessment II (0 Credits)
Students in Mechanical Engineering must register for and take the Fundamentals of Engineering Examination (FE). All students must complete an engineering exit interview and other assessment related tasks. To be taken in the last quarter of attendance.

ENGR 3970 Entrepreneurship for Engineers and Computer Scientists (4 Credits)
The course presents an overview of fundamentals of understanding entrepreneurship and entrepreneurial characteristics; the focus is on aspects of engineering entrepreneurship, technology-based innovation and new product development. Topics to be covered: learning an industry; recognizing and creating opportunities; new product development process, phases and cycle, risks and benefits; ‘testing’ of an engineering-focused business concept; marketing, organizational plan strategies and financing for new start ups. Special attention is given to technological innovation, considering both incremental or routine innovation, and more radical or revolutionary changes in products and processes. Prerequisite: ENGR 3610 or permission of the instructor.

ENGR 4100 Instrumentation and Data Acquisition (4 Credits)
Cross listed with ENGR 3100.

ENGR 4200 Introduction to Nanotechnology (4 Credits)
The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

ENGR 4210 Introduction to Nano-Electro-Mechanical-Systems (4 Credits)
This course familiarizes science and engineering students to the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications in the state of the art and future sensors, actuators, and electronics. This course starts with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 3210.

ENGR 4215 Nanoscale Electromechanical Systems and Nanofabrication Laboratory (4 Credits)
This course provides science and engineering students with comprehensive hands-on experience in design, fabrication and characterization of Nanoscale Electromechanical Systems (NEMS). This laboratory-based course starts with a number of sessions including brief lectures reviewing the fundamentals and theories followed by pre-designed lab experiments. The students are then provided with a choice of different comprehensive design and implementation projects to be performed during the quarter. The projects include design, layout, fabrication, and characterization of the devices potentially resulting in novel findings and publications.

ENGR 4220 Introduction to Micro-Electro-Mechanical-Systems (4 Credits)
This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology, MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 3220.

ENGR 4300 Advanced Numerical Methods (4 Credits)
Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.
ENGR 4350 Reliability (4 Credits)
An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 3350.

ENGR 4530 Intro to Power and Energy (4 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

ENGR 4545 Electric Power Economy (4 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545. Prerequisite: ENGR 3530 or ENGR 4530.

ENGR 4550 Probabilistic Methods in Electric Power Systems (4 Credits)
The course covers techniques for probabilistic power system analysis and design, power system reliability, probabilistic structural design and analysis of transmission lines, analysis and assessment of transmission line reliability, probability-based power system design criteria, probabilistic load-flow studies and probabilistic power system stability. Prerequisites: ENGR 3540 or equivalent; permission of instructor; knowledge of MATLAB/Simulink is required.

ENGR 4560 Power Generation Operation and Control (4 Credits)
This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 4540.

ENGR 4590 Power System Protection (4 Credits)
This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 4540.

ENGR 4620 Optimization (3,4 Credits)
Engineering problems will be formulated as different programming problems to show the wide applicability and generality of optimization methods. The development, application, and computational aspects of various optimization techniques will be discussed with engineering examples. The application of nonlinear programming techniques will be emphasized. A design project will be assigned.

ENGR 4730 Introduction to Robotics (4 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

ENGR 4735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3610, ENGR 3721/3722, or permission of the instructor.

ENGR 4740 Principles of Adaptive and Optimal Control Systems (4 Credits)
This course covers fundamentals of adaptive and optimal control systems. Topics to be covered include: i) From adaptive control: parameter estimation, model reference adaptive systems, self-tuning regulators, gain scheduling, stability, alternatives to adaptive control; ii) From optimal control: principles and methods of optimal control, performance measures, dynamic programming, calculus of variations, Pontryagin's principle, variational approach to optimal control problems, optimal linear regulators with quadratic criteria, time and fuel optimal systems. Prerequisites: ENEE 3111, ENGR 3610, and ENGR 3721. Students must have knowledge of MATLAB.

ENGR 4745 Adv Non-Linear Control System (3 Credits)
Limit cycles; functional analysis approach to input-output stability; analysis/synthesis of time-varying systems; feedback linearization, bang-bang control. Prerequisite: ENGR 3721.

ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)

ENGR 4991 Independent Study (1-5 Credits)

ENGR 4992 Directed Study (1-10 Credits)

ENGR 4995 Independent Research (1-18 Credits)

ENGR 5991 Independent Study (1-10 Credits)

ENGR 5995 Independent Research (1-18 Credits)
Master's and Doctoral Degrees

Why study engineering at the University of Denver?

The University of Denver's department of mechanical and materials engineering (MME) is creating the future of technology by providing a graduate education emphasizing cross-disciplinary knowledge. A distinguished faculty is creating multidisciplinary education and research programs that anticipate technological trends in research and industry. Engineering graduate students join the faculty in conducting cutting-edge research in emerging disciplines to develop unique solutions to old and new problems and opportunities.

The well-equipped laboratories in the department contain state-of-the-art equipment and software to support research in biomedical engineering, advanced materials, atmospheric aerosol science, and mechanical design among others. Small classes support our multidisciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students' individual career goals.

Recognizing the different aims and goals of students, we offer joint degree programs in management and engineering for students who wish to add to their technical skills and acquire business skills. The general engineering graduate student can choose courses from mechanical engineering, electrical engineering, computer engineering, computer science, nanoscale science and engineering, materials science, and bioengineering.

Denver is a first-rate location for business, governmental and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and the University of Denver is located just minutes from the Denver Technological Center, site of many top technology companies. The department of mechanical and materials engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector.

Time Commitment

Our department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. Many employers will permit additional flexibility by releasing employees early to attend classes.

The master's program offer thesis and non-thesis options and can be completed in one (non-thesis track only) to four years depending on the number of courses taken per quarter. The choice of thesis or non-thesis can be made at any time, although a delay in declaration may impact the completion date.

The doctoral program is generally completed in three to seven years, depending on the number of courses taken per quarter and whether the student enters with a BS or MS.

A student not interested in pursuing a degree, but interested in taking an occasional course, may register as special status students (http://www.du.edu/learn/graduates/degreeprograms) by following an abbreviated admissions process. If at a later time the student chooses to enter a graduate degree program at DU, you may apply up to 15 special status credits to your degree, with departmental approval. Just follow the regular graduate application requirements, including submitting the application fee, to get started.

ADMISSION TO THE MASTER'S AND DOCTORAL DEGREES

Following are the simple steps to apply for graduate study in Mechanical and Materials Engineering (MME) at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).

Apply Online / Application Deadlines

- Applications (https://du-grad.edu.185r.net/application) for graduate study in Mechanical and Materials Engineering at the University of Denver must be submitted online.
- Applicants are encouraged to submit all materials to the Office of Graduate Studies by the priority deadline: February 1, for the fall quarter.
- Applications received after the priority deadline will be accepted, processed and reviewed on a rolling basis for the fall, winter or spring quarters. International applicants are encouraged to have the admission application and all supporting documents in the Office of Graduate Studies by the deadline or no later than May 1, for fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.
- **Note for PhD Applicants:** We recommend PhD applicants contact faculty to find a research advisor BEFORE submitting the application. If we receive an application and there is no research advisor commitment, we will consider the applicant for the master's program only. To learn more about the faculty research being conducted, a list of our most recent grants and faculty contact information can be found on the MME Research (http://www.du.edu/rsecs/departments/mme/research) tab.
Course and Degree Prerequisites and Requirements

- Proof of a bachelor’s, and, if applicable, a master’s degree is required from a regionally accredited college or university.
- Please see the Degree Requirements sections in the department bulletin for specific prerequisite requirements.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- The Graduate Record Examination (GRE) is required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement

- A personal statement of at least 300 words is required. The statement should be submitted via upload through the online application process.

Resume / C.V.

- A resume or C.V. is required. This should include work experience, research, and/or volunteer work. The resume or C.V. should be submitted via upload through the online application process.

Recommendation Letters

- Two letters of recommendation are required. These letters should be solicited and uploaded by recommenders through the online application system. Letters must be received by the program’s stated deadline.

Financial Support

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/apply/gradfinaid) website. International students are not eligible for federal financial aid.
The Department of Mechanical and Materials Engineering also offers a number of competitive graduate teaching assistantships (GTAs) that provide full tuition remission along with a stipend for the nine-month academic year (three academic quarters). Priority for these GTAs is given to PhD and masters-thesis students. It should be noted that a student whose undergraduate degree is not in engineering is not typically eligible for a GTA upon entry.

Graduate research assistantships (GRAs), either with or without tuition remission, are awarded by individual faculty based on available funding.

Application Status

We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address

Mail official transcripts and any supplemental admission materials not submitted with the online application to:

University of Denver
Office of Graduate Studies
Mary Reed Building, Room 5
2199 S. University Blvd.
Denver, CO 80208-4802

International Applicants

For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information. International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline. The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Degree Programs

The following are our general engineering degrees. Please see the Mechanical and Materials Engineering Programs for our other graduate engineering degrees.

- Master of Science in Engineering (MS ENGE)
- Master of Science in Engineering with a Concentration in Management (MS ENGE (CM))
- Doctor of Philosophy in Engineering (PhD ENME)

Master of Science in Engineering

The Master of Science in Engineering (MS ENGE) is designed to advance the knowledge of students in areas differing from those in which they received their bachelor’s degree. The program is particularly intended for students with bachelor’s degrees in the natural sciences, mathematics, computer science or engineering who are making a change of discipline or wanting to develop expertise in an engineering area, often one that is of emerging importance or interdisciplinary in nature. The program combines a solid background in an area of engineering with a distinctly personal specialization. It enables the student to focus on a particular area of engineering, while providing breadth through its flexible minor or technical elective requirement addressing the student’s specific interests.

A master’s in engineering with a concentration in management (CM) is also offered (see below). These engineering and management courses are focused on developing core knowledge and competencies in innovation and entrepreneurship, and providing concrete tools to successfully translate ideas and initiative into marketplace success.

Program Structure (non-management)

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master’s degree candidates are expected to complete degree requirements no later than five years after beginning their programs. These programs are designed to be completed in about six quarters if two courses (eight credits) are taken each quarter.
8. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation
of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements

1. Core Courses: a minimum of nine credits (two courses from ME, MTSC, ENBI or ECE Core Course List; no more than one course from a single discipline) plus the required courses.

2. Required Courses: All master's students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. **NOTE:** Students on the thesis track are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the non-thesis track are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4950 along with the completed and signed degree program plan.

3. Technical Electives: a minimum of 16 credits for thesis track and 28 credits for non-thesis track. These do not include independent research credits.
   a. Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor's discretion.
   b. A students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor PRIOR TO REGISTRATION if more than one business/management course is taken.

4. Advanced Math Requirement: a minimum of three credits for thesis track and six credits for non-thesis track from the Core Course List or advisor approval.

5. Thesis Hours: a minimum of 12 credits; not allowed for non-thesis track.

Master of Science in Engineering with a Concentration in Management

The degree of Master of Science in Engineering allows students to pursue a concentration in management (MS ENGE (CM)). This is an engineering degree with both engineering and management focuses. The concentration in management is designed to meet the increasing needs of students to enhance their career opportunities as managers or as entrepreneurs by supplementing advanced engineering knowledge with a fundamental understanding of business principles within the context of technology enterprises. Drawing upon the strengths of both RSECS and the Daniels College of Business, the program provides the relevant content for graduates to lead technology enterprises. Candidates for the degree of master of science with a concentration in management will be on non-thesis track only.

Program Structure (management focus)

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track. No courses at the 1000- or 2000-level are acceptable.
3. An overall GPA of 3.0 is required for the degree.
4. Any individual grade lower than C- renders the credit unacceptable.
5. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
6. Master's degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
7. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements:

1. **Core Courses**: a minimum of nine credits (one course from ME, ENBI, MTSC or ECE Core Course List AND one course from Management Concentration Core Course List) plus required courses.
2. **Required Courses**: All master's students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. **NOTE**: Students on this non-thesis track are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900, along with the completed and signed degree program plan.
3. **Technical Electives**: a minimum of 16 credits should be selected from the engineering Core Course List.
4. **Management Electives**: a minimum of 12 credits should be selected from the Management Concentration Core Course List. These management electives are in addition to the management core credit requirement. If a student wishes to take courses not on the Management Concentration Core Course List, written approval by the advisor is required, PRIOR TO REGISTRATION.
5. **Advanced Math Requirement**: a minimum of three credits from Core Course List or advisor approval.

### Doctor of Philosophy in Engineering

The objective of the Doctor of Philosophy in Engineering (PhD ENGE) program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of science, engineering and technology through independent research. The PhD students of the 21st century may pursue academic, research, entrepreneurial and/or industrial careers. Individualized plans of study are based on students' previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in engineering degree requirements.

The MME department offers two types of general PhD degrees:

- Concentration in management
- Interdisciplinary: The interdisciplinary PhD program offers opportunities for a student to develop a plan of study combining engineering and a complementary discipline (e.g. natural sciences). In the plan of study, coursework in the complementary discipline can be included up to the maximum number of technical elective credits. The student’s plan of study must be approved by the PhD committee and the department chair. When the student is completing research and coursework in a complementary discipline, the student’s PhD committee must include a faculty member from the related department or division/school.

For a part-time student who is working in industry position, a topic related to the job function may be acceptable as the dissertation research topic. Furthermore, a student may request for a qualified staff member at the place of employment to serve as a special committee member on the dissertation committee.

Exam Structure:

1. Each student must pass the **qualifying exam** to obtain official entrance into the PhD program. In consultation with the advisor, students should expect to take the qualifying exam about 1.5 years (30 credits) into their academic study. Students must take exams in three subject areas. The Design exam is required for all participants, and is an open-book exam, where the student will have one week to prepare a written and oral response to an open-ended design problem. The other two exams are closed-book, written exams and should be related to the student’s research area. The exam is offered twice a year: once in the summer interterm (usually in June) and once in the winter interterm (usually in December or early January). The qualifying exam can be retaken only once, and must be completed prior to the comprehensive exam.

2. Generally within three years after completion of the qualifying exam, the student should schedule and take the **comprehensive exam** attended by the student's PhD committee. The student will be expected to make concise presentation on his/her dissertation topic. The presentation will highlight previous work in this area, demonstrate a need for the research, and explain how the research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. The comprehensive exam can be retaken only once.

3. After successful completion of the qualifying exam and the comprehensive exam, the student is required to complete and **defend a dissertation** of publishable quality based on the student’s original research. The dissertation must be completed in written form in accordance with the University’s Graduate School guidelines, and must be defended by the student in the final oral examination. The examining committee members will consist of the student's entire PhD committee. The dissertation defense can be retaken only once.

**PhD Residence Requirement**

One year of full-time graduate work and two consecutive years of part-time graduate work satisfy the minimum residency requirement at the University of Denver. For those applicants from industry with established special degree programs with RSECS, the residency requirement can be waived by the dean of RSECS.

**PhD Students with a Bachelor of Science Degree**

**Program Structure**

1. For students entering with a bachelor’s degree, 90 credits are required, at least 72 of which must be completed at the University of Denver.
2. A minimum of 48 credits must be at the 4000- or 5000-level and may include as many dissertation research credits as considered appropriate by the advisor.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Students must complete all requirements for the doctoral degree no later than eight years after doctoral studies begin.
8. **International students** must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete your program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

**Course Requirements:**

1. Candidates who hold only a bachelor’s degree on entering the doctoral program are expected to **meet all degree requirements of the corresponding master’s degree** program (as part of the doctoral requirements).
2. Students are required to take ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.

3. PhD students who enter the program with a bachelor’s are required to take ENME 4900 **Graduate Professional Development** in the first year (this is offered once a year; usually in winter quarter).

### PhD Students with a Master of Science

1. A minimum of 36 credits must be completed at the 4000- or 5000-level, which may include as many research credits as considered appropriate by the advisor.

2. For students entering with a master’s degree, up to 45 credits may be transferred and applied to the doctorate degree. In addition, a minimum of 45 credits must be completed at DU. The total number of credits required for the degree is 90.

3. No courses at the 1000- or 2000-level are acceptable.

4. An overall GPA of 3.0 is required for the degree.

5. Any individual grade lower than C- renders the credit unacceptable.

6. A student who holds a master’s degree on entering the doctoral program is expected to complete all requirements for the degree no later than seven years after beginning the program.

7. **International students** must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation
of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements:

1. Students are required to take ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.

2. If a PhD student fails his/her qualifying exam on the first try, he/she will be required to take ENME 4900 Graduate Professional Development as well. ENME 4900 will be offered once a year, usually in winter quarter.

Courses

**ENGR 3210 Intro Nano-Electro-Mechanics (4 Credits)**
Familiarize science and engineering students with the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications to state of the art and future sensors, actuators, and electronics. Starting with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 4210. Prerequisite: must be an engineering or science major of at least junior standing.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**
This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2021.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**
This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**
In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3540 Electric Power Systems (4 Credits)**
This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3550 Introduction to Machine Drive Control (4 Credits)**
This course provides the basic theory for the analysis and application of adjustable-speed drive systems employing power electronic converters and ac or dc machines. Prerequisites: ENGR 3520 and ENGR 3530.

**ENGR 3610 Finite Element Methods (4 Credits)**
Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisite: ENGR 3610 or equivalent.

**ENGR 3721 Controls (3,4 Credits)**
Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2021, ENGR 3610 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**
This laboratory course serves as supplement to ENGR 3721. It aims at providing “hands on” experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.
ENGR 3730 Robotics (3 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

ENGR 3731 Robotics Lab (1 Credit)
Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

ENGR 3800 Topics (ENGR) (1-4 Credits)
Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENGR 3900 Engineering Internship (0-4 Credits)
Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

ENGR 3951 Engineering Assessment II (0 Credits)
Students in Mechanical Engineering must register for and take the Fundamentals of Engineering Examination (FE). All students must complete an engineering exit interview and other assessment related tasks. To be taken in the last quarter of attendance.

ENGR 3970 Entrepreneurship for Engineers and Computer Scientists (4 Credits)
The course presents an overview of fundamentals of understanding entrepreneurship and entrepreneurial characteristics; the focus is on aspects of engineering entrepreneurship, technology-based innovation and new product development. Topics to be covered: learning an industry; recognizing and creating opportunities; new product development process, phases and cycle, risks and benefits; ‘testing’ of an engineering-focused business concept; marketing, organizational plan strategies and financing for new start ups. Special attention is given to technological innovation, considering both incremental or routine innovation, and more radical or revolutionary changes in products and processes. Prerequisite: ENGR 3610 or permission of the instructor.

ENGR 4100 Instrumentation and Data Acquisition (4 Credits)
Cross listed with ENGR 3100.

ENGR 4200 Introduction to Nanotechnology (4 Credits)
The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

ENGR 4210 Introduction to Nano-Electro-Mechanical-Systems (4 Credits)
This course familiarizes science and engineering students to the electromagnetic aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications in the state of the art and future sensors, actuators, and electronics. This course starts with an overview of nanotechnology and discussion on the shifts in the electromagnetic behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 3210.

ENGR 4215 Nanoscale Electromechanical Systems and Nanofabrication Laboratory (4 Credits)
This course provides science and engineering students with comprehensive hands-on experience in design, fabrication and characterization of Nanoscale Electromechanical Systems (NEMS). This laboratory-based course starts with a number of sessions including brief lectures reviewing the fundamentals and theories followed by pre-designed lab experiments. The students are then provided with a choice of different comprehensive design and implementation projects to be performed during the quarter. The projects include design, layout, fabrication, and characterization of the devices potentially resulting in novel findings and publications.

ENGR 4220 Introduction to Micro-Electro-Mechanical-Systems (4 Credits)
This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology. MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 3220.
ENGR 4300 Advanced Numerical Methods (4 Credits)
Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

ENGR 4350 Reliability (4 Credits)
An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 3350.

ENGR 4530 Intro to Power and Energy (4 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

ENGR 4545 Electric Power Economy (4 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545. Prerequisite: ENGR 3530 or ENGR 4530.

ENGR 4550 Probabilistic Methods in Electric Power Systems (4 Credits)
The course covers techniques for probabilistic power system analysis and design, power system reliability, probabilistic structural design and analysis of transmission lines, analysis and assessment of transmission line reliability, probability-based power system design criteria, probabilistic load-flow studies and probabilistic power system stability. Prerequisites: ENGR 3540 or equivalent; permission of instructor; knowledge of MATLAB/Simulating is required.

ENGR 4560 Power Generation Operation and Control (4 Credits)
This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 4540.

ENGR 4590 Power System Protection (4 Credits)
This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 4540.

ENGR 4620 Optimization (3,4 Credits)
Engineering problems will be formulated as different programming problems to show the wide applicability and generality of optimization methods. The development, application, and computational aspects of various optimization techniques will be discussed with engineering examples. The application of nonlinear programming techniques will be emphasized. A design project will be assigned.

ENGR 4730 Introduction to Robotics (4 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

ENGR 4735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3610, ENGR 3721 or ENGR 3722, or permission of the instructor.

ENGR 4740 Principles of Adaptive and Optimal Control Systems (4 Credits)
This course covers fundamentals of adaptive and optimal control systems. Topics to be covered include: i) From adaptive control: parameter estimation, model reference adaptive systems, self-tuning regulators, gain scheduling, stability, alternatives to adaptive control; ii) From optimal control: principles and methods of optimal control, performance measures, dynamic programming, calculus of variations, Pontryagin’s principle, variational approach to optimal control problems, optimal linear regulators with quadratic criteria, time and fuel optimal systems. Prerequisites: ENEE 3111, ENGR 3610, and ENGR 3721. Students must have knowledge of MATLAB.

ENGR 4745 Adv Non-Linear Control System (3 Credits)
Limit cycles; functional analysis approach to input-output stability; analysis/synthesis of time-varying systems; feedback linearization, bang-bang control. Prerequisite: ENGR 3721.

ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)
ENGR 4991 Independent Study (1-5 Credits)
ENGR 4992 Directed Study (1-10 Credits)
ENGR 4995 Independent Research (1-18 Credits)
ENGR 5991 Independent Study (1-10 Credits)
ENGR 5995 Independent Research (1-18 Credits)

Mechanical and Materials Engineering

Master’s and Doctoral Degrees Offered

Why study engineering at the University of Denver?

The University of Denver’s department of mechanical and materials engineering (MME) is creating the future of technology by providing a graduate education emphasizing cross-disciplinary knowledge. A distinguished faculty is creating multidisciplinary education and research programs that anticipate technological trends in research and industry. Engineering graduate students join the faculty in conducting cutting-edge research in emerging disciplines to develop unique solutions to old and new problems and opportunities.

The well-equipped laboratories in the department contain state-of-the-art equipment and software to support research in biomedical engineering, advanced materials, atmospheric aerosol science, and mechanical design among others. Small classes support our multidisciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students’ individual career goals.

Recognizing the different aims and goals of students, we offer several degree programs for students who wish to add to their technical skills in various areas: MS in Bioengineering; MS and PhD in Materials Science; MS and PhD in Mechanical Engineering; and MS and PhD in Nanoscale Science and Engineering.

Denver is a first-rate location for business, governmental and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and the University of Denver is located just minutes from the Denver Technological Center, site of many top technology companies. The department of mechanical and materials engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector.

Time Commitment

Our department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. Many employers will permit additional flexibility by releasing employees early to attend classes.

The master’s program offer thesis and non-thesis options and can be completed in one (non-thesis track only) to four years depending on the number of courses taken per quarter. The choice of thesis or non-thesis can be made at any time, although a delay in declaration may impact the completion date.

The doctoral program is generally completed in three to seven years, depending on the number of courses taken per quarter and whether the student enters with a BS or MS.

A student not interested in pursuing a degree, but interested in taking an occasional course, may register as special status students (http://www.du.edu/learn/graduates/degreeprograms) by following an abbreviated admissions process. If at a later time the student chooses to enter a graduate degree program at DU, you may apply up to 15 special status credits to your degree, with departmental approval. Just follow the regular graduate application requirements, including submitting the application fee, to get started.

Master of Science in Bioengineering (MS ENBI)
Master of Science in Engineering (MS ENGE) (See Department of Engineering program listing)
Master of Science in Engineering with a Concentration in Management (MS ENGE (CM))
Master of Science in Materials Science (MS MTSC)
Master of Science in Mechanical Engineering (MS ENME)
Master of Science in Nanoscale Science and Engineering (MS NANO)
Doctorate of Philosophy in Engineering (PhD ENGE) (See Department of Engineering program listing)
Doctorate of Philosophy in Materials Science (PhD MTSC)
Doctorate of Philosophy in Mechanical Engineering (PhD ENME)
Doctorate of Philosophy in Nanoscale Science and Engineering (PhD NANO)

ADMISSION TO THE MASTER’S and Doctoral DEGREES

Following are the simple steps to apply for graduate study in Mechanical and Materials Engineering (MME) at the University of Denver. If you have any questions about the process, please contact the Office of Graduate Studies (gradinfo@du.edu).
Apply Online / Application Deadlines

- Applications (https://du-grad.edu.185r.net/application) for graduate study in Mechanical and Materials Engineering at the University of Denver must be submitted online.
- Applicants are encouraged to submit all materials to the Office of Graduate Studies by the priority deadline: February 1, for the subsequent fall quarter.
- Applications received after the priority deadline will be accepted, processed and reviewed on a rolling basis for the fall, winter or spring quarters. International applicants are encouraged to have the admission application and all supporting documents in the Office of Graduate Studies by the deadline or no later than May 1, for fall admission.
- A $65 non-refundable application fee is required for an application to be processed. Application fee waivers are available for McNair Scholars.
- **Note for PhD Applicants:** We recommend PhD applicants contact faculty to find a research advisor BEFORE submitting the application. If we receive an application and there is no research advisor commitment, we will consider the applicant for the master's program only. To learn more about the faculty research being conducted, a list of our most recent grants and faculty contact information can be found on the MME Research tab.

Course and Degree Prerequisites and Requirements

- Proof of a bachelor's, and, if applicable, a master's degree is required from a regionally accredited college or university.
- Please see the Degree Requirements sections in the department bulletin for specific prerequisite requirements.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed including study abroad and college coursework completed in high school.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.

Test Scores

- The Graduate Record Examination (GRE) is required. Scores must be received directly from the appropriate testing agency by the program’s stated deadline. The institution code for the University of Denver is 4842.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) for complete English language proficiency requirements.
- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

Personal Statement

- A personal statement of at least 300 words is required. The statement should be submitted via upload through the online application process.
Resume / C.V.

- A resume or C.V. is required. This should include work experience, research, and/or volunteer work. The resume or C.V. should be submitted via upload through the online application process.

Recommendation Letters

- Two letters of recommendation are required. These letters should be solicited and uploaded by recommenders through the online application system. Letters must be received by the program’s stated deadline.

Financial Support

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.
- Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/apply/gradfinaid) website. International students are not eligible for federal financial aid.
- The Department of Mechanical and Materials Engineering also offers a number of competitive graduate teaching assistantships (GTAs) that provide full tuition remission along with a stipend for the nine-month academic year (three academic quarters). Priority for these GTAs is given to PhD and masters-thesis students whose undergraduate degrees are in engineering.
- Graduate research assistantships (GRAs), either with or without tuition remission, are awarded by individual faculty based on available funding.

Application Status

- We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:
  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information. International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline. The Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf) provides complete details regarding admission requirements.

Degree Programs

Below are links to our various graduate programs under the Department of Engineering program listing:

- Master of Science in Engineering (MS ENGE) (p. 143) (See Department of Engineering program listing)
- Master of Science in Engineering with a Concentration in Management (MS ENGE (CM)) (p. 143) (See Department of Engineering program listing)
- Doctorate of Philosophy in Engineering (PhD ENGE) (p. 143) (See Department of Engineering program listing)

Master of Science in Bioengineering

The Master of Science in Bioengineering (MS ENBI) integrates engineering sciences with biomedical sciences and clinical practice to provide the skill set needed by bioscience companies. The Department of Mechanical and Materials Engineering—in collaboration with the Departments of Electrical and Computer Engineering, Chemistry & Biochemistry, Biological Sciences, and Physics & Astronomy—has designed a cross-disciplinary master of science program to address industrial requirements and the desired qualifications of a 21st century workforce in bioengineering businesses. Students with bachelor’s degrees in chemistry, biological sciences or physics, as well as those with accredited engineering degrees, acquire a specialized expertise in bioengineering by designing programs which leverage the individual students’ undergraduate experience and expertise resident at DU.
Program Structure
1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master’s degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
8. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements
1. **Core Courses**: a minimum of nine credits (two courses from the Bioengineering Core Course List plus required courses) for both thesis and non-thesis tracks.
2. **Required Courses**: All master's students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. **NOTE**: Students on the thesis track are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the non-thesis track are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900, along with the completed and signed degree program plan.
3. **Technical Electives**: a minimum of eight credits for thesis track and 20 credits for non-thesis track. These do not include independent research credits.
   a. Technical elective courses are intended to provide bioengineering students an opportunity to take additional course work that will expand their knowledge of advanced engineering topics. The courses must be chosen primarily from engineering course offerings numbered 3000 or higher and approved by the student’s advisor.
   b. Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor **PRIOR TO REGISTRATION** if more than one business/management course is taken.
4. **Minor Elective Courses**: minimum of eight credits for thesis track; eight credits for non-thesis track. A minor is required by each student and is intended to provide bioengineering students with additional knowledge in an area unassociated with their undergraduate degree. Candidates with non-engineering undergraduate degrees must take courses in engineering chosen from regular engineering course offerings numbered 3000 or higher and must be approved by the advisor. Candidates with engineering undergraduate degrees must take graduate-level coursework in biological sciences or chemistry and biochemistry.
5. **Advanced Math Requirement**: a minimum of three credits for both thesis track and non-thesis track from Core Course List or advisor approval.
6. **Thesis Hours**: a minimum of 12 credits; not allowed for non-thesis track.
7. **Tool Requirement**: As employers of graduates of this degree will inherently expect a basic competency in foundational engineering skills, students must demonstrate these before advancing to candidacy. Candidates with BS degrees from accredited engineering schools will be exempt from the tool requirement because their degree is sufficient proof of foundational engineering skills. Candidates with undergraduate degrees from non-engineering majors will be required to pass a tool requirement. This will consist of an exam based on the topics in the Fundamentals of Engineering General Exam. The tool exam will be offered twice a year at the same time as the Fundamentals of Engineering Exam, so candidates can participate in the exam preparation course offered free of charge by the MME department.

ENME 4900  
Grad Professional Development (Graduate Professional Development)  
1
Master of Science in Materials Science

The Master of Science in Materials Science (MS MTSC) program is designed to prepare the student for research and development work in the materials field. The program is multidisciplinary and involves the departments of physics, chemistry and engineering, with the Mechanical and Materials Engineering Department administering the degree. The programs reflect the multidisciplinary nature by providing a thorough grounding in each of the basic disciplines of the field. Depth in specialized areas is achieved through the research interests of faculty in each of the participating departments. With an increasing number of technological fields becoming materials-limited in various ways, the program seeks to prepare students to meet the challenges of property improvement and new materials development, with a broad-based curriculum that stresses fundamentals.

MS Program Structure

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master’s degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
8. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements

1. Core Courses: a minimum of nine credits (two courses from the Materials Science Core Course List plus required courses) for both thesis and non-thesis tracks.
2. Required Courses: All master’s students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students on the thesis track are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the non-thesis track are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900, along with the completed and signed degree program plan.
3. Technical Electives: a minimum of 16 credits for thesis track and 28 credits non-thesis track. These do not include independent research credits.
   a. Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor’s discretion.
   b. Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor PRIOR TO REGISTRATION if more than one business/management course is taken.
4. Advanced Math Requirement: a minimum of three credits for thesis track and six credits for non-thesis track from Core Course List or advisor approval.
5. Thesis Hours: a minimum of 12 credits; not allowed for non-thesis track.
Master of Science in Mechanical Engineering

The Master of Science in Mechanical Engineering (MS ENME) is designed to advance the student's knowledge in several areas of engineering. Each degree provides breadth through its flexible technical elective requirement, while permitting the student to achieve depth in one of several areas of specialization; fluid mechanics and heat transfer, mechanical design and analysis, and structure and behavior of materials. These areas of specialization have been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of these programs is to serve the profession of engineering and the Colorado community through advanced study in mechanical engineering and related fields. Each program prepares the student for academic and industrial advancement.

Program Structure

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master’s degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
8. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements

1. Core Courses: a minimum of nine credits (two courses from the Mechanical Engineering Core Course List plus required courses) for both thesis and non-thesis tracks.
2. Required Courses: All master's students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students on the thesis track are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the non-thesis track are required to upload to Assess-It
an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900 along with the completed and signed degree program plan.

3. **Technical Electives**: a minimum of 16 credits for thesis track and 28 credits non-thesis track. These do not include independent research credits.
   a. Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor’s discretion.
   b. Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor PRIOR TO REGISTRATION if more than one business/management course is taken.

4. **Advanced Math Requirement**: a minimum of three credits for thesis track and six credits for non-thesis track from Core Course List or advisor approval.

5. **Thesis Hours**: a minimum of 12 credits; not allowed for non-thesis track.

---

**Master of Science in Nanoscale Science and Engineering**

The Master of Science in Nanoscale Science and Engineering (MS NANO) program shares faculty and other resources with existing graduate programs in NSM and RSECS. The interdisciplinary nature of this graduate program mandates certain flexibility in order to accommodate students with a variety of backgrounds. In order to make it easier for students to migrate between different programs, the program is structured similarly to other existing graduate programs in NSM and RSECS. All NSM and RSECS graduate programs focus on the research component. Therefore, course work credit is supplemented by the significant amount of credit earned from independent study/independent research (IS/IR) courses taken in order to satisfy minimum credit requirements to earn a degree.

**Program Structure**

- The program accepts students with a bachelor of science or bachelor of arts in biological sciences, chemistry, biochemistry, computer science, engineering, physics or related discipline.
- As a minimum, to be admitted into the program, students are expected to have earned as a part of their undergraduate degree:
  - 1 year of calculus
  - 1 year of algebra or calculus-based physics with accompanying laboratory
  - 1 quarter of general chemistry with accompanying laboratory
- Every candidate for the master's must complete 45 credits, at least 36 of which must be completed at the University of Denver.
- To satisfy graduation requirements, candidates must maintain a course GPA of 3.0 (excluding thesis credits). The average is determined on the basis of the university’s grading system.
• In no case may more than one-fourth of the hours accepted toward the degree be of C grade.
• A grade of C or better must be obtained in each course for that course to count toward the 45-credit requirement.
• A grade lower than C- renders the credit unacceptable for meeting degree requirements.

**Thesis Option**

• Thesis candidates work closely with a thesis adviser, and thus this option requires support from a qualified faculty member.
• The thesis option is required for all graduate research assistants and graduate teaching assistants.
• All students pursuing the master's with thesis defend their thesis before the candidate's masters committee, as specified in the University of Denver’s Graduate Policy Manual.

**Core Courses**

1. Core curriculum assures that all students have knowledge of a certain number of topics. Therefore, core courses taken are dependent on the background of a particular student and are determined by a graduate program adviser upon the student’s admission based on the degree earned and courses taken, as evidenced by the available transcripts from each institution attended.
2. Core curriculum is based on courses regularly offered by the six constituent departments (biological sciences, chemistry and biochemistry, computer science, electrical and computer engineering, mechanical and materials engineering, and physics and astronomy).
3. The core courses are as follows (up to 30 credits plus the one-credit course ENME 4900 Graduate Professional Development).

4. **Required Core Courses**
   a. All master's students are required to take ENGR 4200 Introduction to Nanotechnology.
   b. All master's students are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 Graduate Assessment in the last quarter of study. **NOTE:** Students on the thesis track are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the non-thesis track are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900 along with the completed and signed degree program plan.

5. **Course Requirements: Thesis option**
   a. The coursework for the core courses and technical electives must consist of a minimum of 12 credits of 4000-level courses.
   b. The thesis research is normally carried out through IS and IR credits. The maximum number of IS/IR credit hours in thesis research that can be applied toward the total credit requirement is 15 credits.

6. **Course Requirements: Non-thesis option**
   a. The course work for the core courses and technical electives must consist of a minimum of 24 credits of 4000-level courses.
   b. Master's students pursuing a non-thesis option are required to take five credits of IS on a selected topic.

7. A maximum of four core courses from this list can be waived.
8. The credit earned through other graduate courses at the 3000 and higher level not listed can be applied toward the total credit requirement with the approval of the graduate program adviser.

**Elective Courses**

1. Elective courses are designed to give students a more specialized knowledge and prepare them for thesis/dissertation research if pursued.
2. Master's students have to take at least one elective course from this list, excluding IS and IR courses.
3. The regularly offered elective courses are currently included in the Elective Course List, below.

Doctor of Philosophy in Materials Science

The Doctor of Philosophy in Materials Science (PhD MTSC) is designed to prepare the student for research or faculty position in the materials field. The program is multidisciplinary and involves the departments of Physics and Astronomy, Chemistry and Biochemistry, Electrical and Computer Engineering, and Mechanical and Materials Engineering (MME), with MME as the administering department. The programs reflect the multidisciplinary nature by providing a thorough grounding in each of the basic disciplines of the field. Depth in specialized areas is achieved through the research interests of faculty in each of the participating departments. With an increasing number of technological fields becoming materials limited in various ways, the program seeks to prepare students to meet the challenges of property improvement and new materials development, with a broad-based curriculum that stresses fundamentals.

PhD Residence Requirement

One year of full-time graduate work and two consecutive years of part-time graduate work satisfy the minimum residency requirement at the University of Denver. For those applicants from industry with established special degree programs with RSECS, the residency requirement can be waived by the dean of RSECS.

Exam Structure

1. Each student must pass the qualifying exam to obtain official entrance into the PhD program. In consultation with the advisor, students should expect to take the qualifying exam about 1.5 years (30 credits) into their academic study. Students must take exams in three subject areas. The design exam is required for all participants, and is an open book exam, where the student will have one week to prepare a written and oral response to an open-ended design problem. The other two exams are closed-book written exams and should be related to the student’s research area. The exam is offered twice a year: once in the summer interterm (usually in June) and once in the winter interterm (usually in December or early January). The qualifying exam can be retaken only once, and must be completed prior to the comprehensive exam.

2. Generally within three years after completion of the qualifying exam, the student should schedule and take the comprehensive exam attended by the student's PhD committee. The student will be expected to make concise presentation on his/her dissertation topic. The presentation will highlight previous work in this area, demonstrate a need for the research, and explain how the research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. The comprehensive exam can be retaken only once.

3. After successful completion of the qualifying exam and the comprehensive exam, the student is required to complete and defend a dissertation of publishable quality based on the student’s original research. The dissertation must be completed in written form in accordance with the University’s Graduate School guidelines, and must be defended by the student in the final oral examination. The examining committee members will consist of the student’s entire PhD committee. The dissertation defense can be retaken only once.
PhD Students with a Bachelor of Science

Program Structure:

1. For students entering with a bachelor's degree, 90 credits are required, at least 72 of which must be completed at the University of Denver.
2. A minimum of 48 credits must be at the 4000 or 5000 level and may include as many dissertation research credits as considered appropriate by the advisor.
3. No courses at the 1000 or 2000 level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Students must complete all requirements for the doctoral degree no later than eight years after doctoral studies begin.
8. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements:

1. Candidates who hold only a bachelor's degree on entering the doctoral program are expected to meet all degree requirements of the corresponding master's degree program (as part of the doctoral requirements).
2. Students are required to take ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.
3. PhD students who enter the program with a bachelor's are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter).

PhD Students with a Master of Science

Program Structure:

1. A minimum of 36 credits must be completed at the 4000- or 5000-level, which may include as many research credits as considered appropriate by the advisor.
2. For students entering with a master's degree, up to 45 credits may be transferred and applied to the doctorate degree. In addition, a minimum of 45 credits must be completed at DU. The total number of credits required for the degree is 90.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. A student who holds a master's degree on entering the doctoral program is expected to complete all requirements for the degree no later than seven years after beginning the program.
7. International students must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

Course Requirements

1. Students are required to take ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.
2. If a PhD student fails his/her qualifying exam on the first try, he/she will be required to take ENME 4900 Graduate Professional Development as well. ENME 4900 will be offered once a year, usually in winter quarter.

Doctor of Philosophy in Mechanical Engineering

The objective of the Doctor of Philosophy in Mechanical Engineering (PhD ENME) program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of mechanical engineering through independent research.

PhD Residence Requirement

One year of full-time graduate work and two consecutive years of part-time graduate work satisfy the minimum residency requirement at the University of Denver. For those applicants from industry with established special degree programs with RSECS, the residency requirement can be waived by the dean of RSECS.

Exam Structure

1. Each student must pass the qualifying exam to obtain official entrance into the PhD program. In consultation with the advisor, students should expect to take the qualifying exam about 1.5 years (30 credits) into their academic study. Students must take exams in three subject areas. Doctor of Philosophy in Nanoscale Science and Engineering

The Doctor of Philosophy in Nanoscale Science and Engineering (PhD NANO) shares faculty and other resources with existing graduate programs in NSM and RSECS. In order to make it easier for students to migrate between different programs, the program is structured similarly to other existing graduate programs in NSM and RSECS. All NSM and RSECS graduate programs focus on the research component. Therefore, coursework credit is supplemented by the significant amount of credit earned from independent study/independent research (IS/IR) courses taken in order to satisfy minimum credit requirements to earn a degree.

PhD Residence Requirement

The Nanoscale Science and Engineering PhD program does not have a residency requirement.

PhD Examination Structure

After successfully passing core courses, all students intending to pursue a PhD degree, must take a written comprehensive examination. This examination is based on the core courses and is administered by the graduate program committee. The comprehensive examination can have two possible outcomes:

1. Fail: Student will be moved to the MS level
2. Pass at the PhD level: advancement to preliminary PhD candidacy

The comprehensive examination can be retaken once for students failing on the first attempt.

Students advanced to the PhD preliminary candidacy are required to give an oral presentation on their dissertation research before their dissertation committee after substantial progress in the research is achieved, but at least one year before the anticipated date of graduation. Upon a successful oral presentation, student is advanced to final PhD candidacy.

All students pursuing a PhD degree defend their dissertation before the candidate’s dissertation committee, as specified in the University of Denver’s Graduate Policy Manual (http://www.du.edu/media/documents/graduates/gradpolmanual.pdf).

PhD Students with a Bachelor of Science

Program Structure

1. The student, along with his/her adviser, will develop an appropriate plan of study with an area of specialization, technical electives and advanced mathematics.
2. A total of 90 credits are required, 72 of which must be completed at the University of Denver.
3. A satisfactory quality of achievement with a grade point average of 3.0 or better is required in graduate course work accepted for the degree. The average is determined on the basis of the university's grading system.
4. In no case may more than one-fourth of the hours accepted toward the degree be of C grade.
5. A grade lower than C- renders the credit unacceptable for meeting the degree requirements.
6. Prior to completion of the comprehensive exam, the plan of study must be approved by the student’s PhD committee.

Course Requirements

Required Courses

1. ENGR 4200 Introduction to Nanotechnology is required for all students.
2. Students are required to take ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.
3. PhD students who enter the program with a bachelor’s are required to take ENME 4900 Graduate Professional Development in the first year (this will be offered once a year; usually in winter quarter).

Core Courses

1. Core curriculum is based on courses regularly offered by the six constituent departments (biological sciences, chemistry and biochemistry, computer science, electrical and computer engineering, mechanical and materials engineering, and physics and astronomy).
2. Core curriculum assures that all students have knowledge of a certain number of topics. Therefore, core courses taken are dependent on the background of a particular student and are determined by a graduate program adviser upon student’s admission based on the degree earned and courses taken, as evidenced by the available transcripts from each institution attended.
3. The area of specialization will consist of 15 credits of course work (with a minimum of nine credits of 4000-level courses, excluding IR).
4. An additional 12 credits of course work (excluding IR) are required as related technical electives.

5. One advanced mathematics requirement must be satisfied. Advanced mathematics courses at the 3000-level or higher are selected with the prior approval of the student's adviser.

6. A maximum of two core courses from this list can be waived.

7. The credit earned through other graduate courses at the 3000- and higher level not listed above can be applied toward the total credit requirement with the approval of the graduate program adviser.

Elective Courses

1. Elective courses are designed to give students a more specialized knowledge and prepare them for dissertation research.

2. Students must take at least four elective courses from this list, excluding IS and IR courses.

3. The following regularly offered courses are currently included in the Elective Course List, below.

PhD Students with a Master of Science

Program Structure

1. The program accepts students with a master of science or master of arts degree in biological sciences, biophysics, chemistry, biochemistry, computer science, engineering, physics or related discipline.

2. If a student is admitted with a closely related master's degree, up to 45 credits may be transferred and applied to the doctorate degree. The total number of credits required for the degree is 90.

3. A minimum of 45 credits are required at the University of Denver.

4. A satisfactory quality of achievement with a grade point average of 3.0 or better is required in graduate course work accepted for the degree. The average is determined on the basis of the university's grading system.

5. In no case may more than one-fourth of the hours accepted toward the degree be of C grade.

6. A grade lower than C- renders the credit unacceptable for meeting the degree requirements.

7. The student, along with his/her adviser, will also develop an appropriate plan of study with an area of specialization, technical electives and advanced mathematics.

8. Prior to completion of the comprehensive exam, the student's plan of study must be approved by the student's PhD committee.

Course Requirements

Required Courses

1. ENGR 4200 Introduction to Nanotechnology is required for all students.

2. Students are required to take ENME 4950 Graduate Assessment in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.

3. If a PhD student fails the qualifying exam on the first try, the student will be required to take ENME 4900 Graduate Professional Development as well. ENME 4900 will be offered once a year, usually in winter quarter.

Core Courses

1. Core curriculum is based on courses regularly offered by the six constituent departments (biological sciences, chemistry and biochemistry, computer science, electrical and computer engineering, mechanical and materials engineering, and physics and astronomy).

2. Core curriculum assures that all students have knowledge of a certain number of topics. Therefore, core courses taken are dependent on the background of a particular student and are determined by a graduate program adviser upon student’s admission based on the degree earned and courses taken, as evidenced by the available transcripts from each institution attended.

3. A maximum of two core courses from this list can be waived.

4. The dissertation research is normally carried out through IS and IR credits. The maximum number of IS/IR credits in dissertation research that can be applied toward the total credit requirement is 15 credits.

5. The credit earned through other graduate courses at the 3000- and higher level not listed above can be applied toward the total credit requirement with the approval of the graduate program adviser.
Elective Courses

1. Elective courses are designed to give students a more specialized knowledge and prepare them for dissertation research.
2. Students must take at least four elective courses from this list, excluding IS and IR courses.
3. The following regularly offered courses are currently included in the Elective Course List, below.

Engineering, Bio Courses

ENBI 4500 Biofluids (4 Credits)
The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.
ENBI 4510 Biomechanics (4 Credits)
An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)
An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)
Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENBI 4991 Independent Study (1-5 Credits)
ENBI 4992 Directed Study (1-5 Credits)
ENBI 4995 Independent Research (1-18 Credits)

Engineering, Mechanical Courses

ENME 3511 Machine Design (3 Credits)
Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520, ENME 2541.

ENME 3545 Mechanisms (4 Credits)
Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and COMP 1572.

ENME 3651 Computational Fluid Dynamics (4 Credits)
This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisite: ENME 2671 or instructor approval.

ENME 4020 Adv Finite Element Analysis (4 Credits)

ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)
An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

ENME 4360 Advanced Elasticity (3 Credits)
Stress tensor; analysis of strain; conservation laws; linear elastic stress-strain relationships; solution of problems in elasticity by potentials; 2-D problems in elasticity; energy theorems; wave propagation; numerical techniques.

ENME 4400 Fatigue (4 Credits)
A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

ENME 4520 Intermediate Dynamics (4 Credits)
Development and analysis of dynamic systems through classical and modern approaches. Topics include: reference frames, particle kinematics, Newtonian particle mechanics, Phase Portraits, rigid-body kinematics, Euler's laws, Lagrange's Equations, Lagrange Multipliers, and Kane's Equations. Recommended prerequisites: MATH 2070 and MATH 2080.

ENME 4541 Advanced Mechanics of Materials (4 Credits)
This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, asymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability. Recommended prerequisite: ENME 2541.

ENME 4630 Viscous Flow (4 Credits)
Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

ENME 4650 Adv. Fluid Dynamics (4 Credits)
Physical properties of liquids and gases; turbulence and closure models; surface waves and instabilities; non-Newtonian fluid behavior; conformal mapping and airfoil theory.
ENME 4660 Micro Heat Exchangers (4 Credits)
Explores the advance principles and applications of fluid dynamics and heat transfer through the application to micro fluidic heat exchanger design and optimization. Students utilize Mathcad extensively to seek optimized exchanger performance within a clearly defined design space. Students also build small scale heat exchangers from their optimized designs. Prerequisite: ENME 2671.

ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)
Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

ENME 4800 Advanced Topics (ME) (1-5 Credits)
Determined by interest and demand. May be taken more than once for credit.

ENME 4900 Grad Professional Development (1 Credit)
This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

ENME 4950 Graduate Assessment (0 Credits)
This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to Assess-It to meet the course requirements. Students will receive emails through the Assess-It system notifying you of what is required to be uploaded.

ENME 4991 Independent Study (1-10 Credits)
ENME 4992 Directed Study (1-10 Credits)
ENME 4995 Independent Research (1-18 Credits)
ENME 5991 Independent Study (1-10 Credits)
ENME 5995 Independent Research (1-10 Credits)

Engineering Courses
ENGR 3210 Intro Nano-Electro-Mechanics (4 Credits)
Familiarize science and engineering students with the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications to state of the art and future sensors, actuators, and electronics. Starting with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 4210. Prerequisite: must be an engineering or science major of at least junior standing.

ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)
This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2021.

ENGR 3520 Introduction to Power Electronics (4 Credits)
This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)
In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

ENGR 3540 Electric Power Systems (4 Credits)
This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

ENGR 3550 Introduction to Machine Drive Control (4 Credits)
This course provides the basic theory for the analysis and application of adjustable-speed drive systems employing power electronic converters and ac or dc machines. Prerequisites: ENGR 3520 and ENGR 3530.
ENGR 3610 Engineering Analysis (3 Credits)
Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to Bessel functions, and applied probability and statistics. Cross listed with ENGR 3620. Prerequisites: MATH 2070, MATH 2080.

ENGR 3620 Advanced Engineering Mathematics (4 Credits)

ENGR 3630 Finite Element Methods (4 Credits)
Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisite: ENGR 3610 or equivalent.

ENGR 3721 Controls (3,4 Credits)
Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2021, ENGR 3610 or permission of instructor.

ENGR 3722 Control Systems Laboratory (1 Credit)
This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

ENGR 3730 Robotics (3 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

ENGR 3731 Robotics Lab (1 Credit)
Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

ENGR 3800 Topics (ENGR) (1-4 Credits)
Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENGR 3900 Engineering Internship (0-4 Credits)
Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

ENGR 3951 Engineering Assessment II (0 Credits)
Students in Mechanical Engineering must register for and take the Fundamentals of Engineering Examination (FE). All students must complete an engineering exit interview and other assessment related tasks. To be taken in the last quarter of attendance.

ENGR 3970 Entrepreneurship for Engineers and Computer Scientists (4 Credits)
The course presents an overview of fundamentals of understanding entrepreneurship and entrepreneurial characteristics; the focus is on aspects of engineering entrepreneurship, technology-based innovation and new product development. Topics to be covered: learning an industry; recognizing and creating opportunities; new product development process, phases and cycle, risks and benefits; 'testing' of an engineering-focused business concept; marketing, organizational plan strategies and financing for new start ups. Special attention is given to technological innovation, considering both incremental or routine innovation, and more radical or revolutionary changes in products and processes. Prerequisite: ENGR 3610 or permission of the instructor.

ENGR 4100 Instrumentation and Data Acquisition (4 Credits)
Cross listed with ENGR 3100.

ENGR 4200 Introduction to Nanotechnology (4 Credits)
The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.
ENGR 4210 Introduction to Nano-Electro-Mechanical-Systems (4 Credits)
This course familiarizes science and engineering students to the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications in the state of the art and future sensors, actuators, and electronics. This course starts with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 3210.

ENGR 4215 Nanoscale Electromechanical Systems and Nanofabrication Laboratory (4 Credits)
This course provides science and engineering students with comprehensive hands-on experience in design, fabrication and characterization of Nanoscale Electromechanical Systems (NEMS). This laboratory-based course starts with a number of sessions including brief lectures reviewing the fundamentals and theories followed by pre-designed lab experiments. The students are then provided with a choice of different comprehensive design and implementation projects to be performed during the quarter. The projects include design, layout, fabrication, and characterization of the devices potentially resulting in novel findings and publications.

ENGR 4220 Introduction to Micro-Electro-Mechanical-Systems (4 Credits)
This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology. MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 3220.

ENGR 4300 Advanced Numerical Methods (4 Credits)
Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

ENGR 4350 Reliability (4 Credits)
An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 3350.

ENGR 4350 Intro to Power and Energy (4 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

ENGR 4345 Electric Power Economy (4 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545. Prerequisite: ENGR 3545. Prerequisite: ENGR 3540 or equivalent; permission of instructor; knowledge of MATLAB/Simulink is required.

ENGR 4455 Probabilistic Methods in Electric Power Systems (4 Credits)
The course covers techniques for probabilistic power system analysis and design, power system reliability, probabilistic structural design and analysis of transmission lines, analysis and assessment of transmission line reliability, probability-based power system design criteria, probabilistic load-flow studies and probabilistic power system stability. Prerequisites: ENGR 3540 or equivalent; permission of instructor; knowledge of MATLAB/Simulink is required.

ENGR 4450 Power Generation Operation and Control (4 Credits)
This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 4450.

ENGR 4450 Power System Protection (4 Credits)
This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 4450.

ENGR 4460 Optimization (3,4 Credits)
Engineering problems will be formulated as different programming problems to show the wide applicability and generality of optimization methods. The development, application, and computational aspects of various optimization techniques will be discussed with engineering examples. The application of nonlinear programming techniques will be emphasized. A design project will be assigned.

ENGR 4470 Introduction to Robotics (4 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.
ENGR 4735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Crosslisted with ENGR 3735. Prerequisites: ENGR 3610, ENGR 3721/3722, or permission of the instructor.

ENGR 4740 Principles of Adaptive and Optimal Control Systems (4 Credits)
This course covers fundamentals of adaptive and optimal control systems. Topics to be covered include: i) From adaptive control: parameter estimation, model reference adaptive systems, self-tuning regulators, gain scheduling, stability, alternatives to adaptive control; ii) From optimal control: principles and methods of optimal control, performance measures, dynamic programming, calculus of variations, Pontryagin's principle, variational approach to optimal control problems, optimal linear regulators with quadratic criteria, time and fuel optimal systems. Prerequisites: ENEE 3111, ENGR 3610, and ENGR 3721. Students must have knowledge of MATLAB.

ENGR 4745 Adv Non-Linear Control System (3 Credits)
Limit cycles; functional analysis approach to input-output stability; analysis/synthesis of time-varying systems; feedback linearization, bang-bang control. Prerequisite: ENGR 3721.

ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)
ENGR 4991 Independent Study (1-5 Credits)
ENGR 4992 Directed Study (1-10 Credits)
ENGR 4995 Independent Research (1-18 Credits)
ENGR 5991 Independent Study (1-10 Credits)
ENGR 5995 Independent Research (1-18 Credits)

Daniels College of Business

The Daniels College of Business is dedicated to educating ethical business leaders, advancing the theory and practice of business, and making a positive global impact. As the eighth-oldest business college in the country, we have helped graduates achieve their career aspirations for more than a century. The College is ranked among the best of the world’s top business schools. We are proud to be one of the 655 business schools accredited by the Association to Advance Collegiate Schools of Business (AACSB). Daniels is the only business school in Colorado to receive high rankings and recognition from Businessweek, the Financial Times, U.S. News & World Report, and Forbes. Daniels is internationally recognized for integrating social, environmental and ethical issues into our traditional curricula. Committed to diversity, we welcome all who want to hone their skills, improve their knowledge, and gain a lasting foundation.

Daniels College General

Office: Daniels College of Business, Suite 255, 2101 S. University Blvd., Denver, CO 80208

Master of Business Administration in General Business

The Daniels College of Business Full-time MBA is a comprehensive 21-month program that immerses students in the study and practice of business. Students will gain the technical expertise and leadership skills required to navigate complex business situations with confidence and integrity.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

Cohort
Cohort program—experience the MBA core classes with the same set of peers to maximize cross-learning, collaboration and networking.

Concentrations/Electives
Students will have 24 credits to concentrate on a specific business discipline. These concentrations include: Accounting, Business Analytics, Finance, Innovation and Entrepreneurship, Management, Marketing, Real Estate and Construction Management, School Leadership, Values Based Leadership, and a customized option.

Master of Business Administration in General Business in the Executive MBA Program

The Daniels Executive MBA (EMBA) at the University of Denver is a highly selective academic program designed for the mid-to-senior level professional. Strategically focused and integrated in approach, the EMBA classroom is a dynamic environment of leaders from a wide array of
backgrounds and industries. Although the pace of the EMBA experience is accelerated and academically rigorous, it is offered in an efficient once-a-week format which allows for balance between career, school and personal life.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Cohort**
A cohort MBA program with an integrated, lockstep curriculum of 24 courses (60 credit hours).

**Class Schedule**
Alternating Fridays and Saturdays once a week, from 8 a.m. to 5 p.m. 18 calendar months.

**Master of Business Administration in General Business in the Professional MBA Program**
The Daniels Professional MBA (PMBA) is an ideal fit for early- to mid career professionals. It holds the same quality and rigor as our Full-time MBA with a curriculum focus suited for those with three to nine years of professional work experience. Students in the PMBA program are fully employed and enjoy a network of like-experienced peers. Gaining exposure to one another's industries and challenges is a key benefit of this MBA option.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Cohort**
A 24-month, cohort program with a sequential curriculum of 62 lockstep credit hours followed by 8 elective credits.

**Evening PMBA Class Schedule**
Two classes per evening, on Mondays and Wednesdays from 6 p.m. to 10 p.m.

**Master of Business Administration in General Business in the One Year MBA Program**
The One-year MBA is an intense, 11-month program for students seeking to immediately build upon their undergraduate business degree to acquire the MBA-level knowledge sought after in today’s competitive marketplace.

The Daniels College of Business is one of the few business colleges that offers a One-year MBA to recent college graduates.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Cohort**
A 56-hour, 11-month, full-time program with 8 credit hours of intensive business review, 12 credit hours of advanced core classes, 12 credit hours of Daniels Compass courses and 24 credit hours of electives in a selected concentration. Experience the MBA core classes with the same set of peers to maximize cross-learning, collaboration and networking.

**Concentrations/Electives**
Students will have 24 credits to concentrate on a specific business disciple. These concentrations include: Accounting, Business Analytics, Customized, Finance, Innovation and Entrepreneurship, Management, Marketing, Real Estate and Construction Management, and Values Based Leadership.

Program Start date: August

**International Master of Business Administration in International Business**
The International MBA (IMBA) from The Daniels College of Business is a full- or part-time program for students interested in pursuing a career in international business. The degree combines two highly regarded programs—the Daniels MBA and courses taken at the University of Denver’s Josef Korbel School of International Studies—into one powerful degree. Students emerge with the business acumen that the marketplace expects from an MBA graduate, but the ability to manage across national boundaries, balance calls for globalization with local interests and market to different cultures sets our students apart.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Cohort**
Cohort program—experience the MBA core classes with the same set of peers to maximize cross-learning, collaboration and networking.
Concentrations/Electives

Students have the option of building a concentration in a specific business disciple into their International MBA. These concentrations (requiring an additional 12-16 credit hours) include: Accounting, Business Analytics, Finance, Innovation and Entrepreneurship, Management, Marketing, Real Estate and Construction Management, Values Based Leadership, and a customized option.

MASTER OF BUSINESS ADMINISTRATION IN GENERAL BUSINESS

- Application fee $100 non-refundable
- GMAT or GRE Scores required. Applicants who wish to be considered for merit-based scholarships or graduate assistantships must take the GMAT. To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.
- Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes. A bachelor's degree from a regionally accredited college or university is required.
- Submit a resume that focuses on your unique strengths and accomplishments.
- Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
- Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
- Admissions Interview: Applicants are contacted by a Daniels representative to schedule the admissions interview, which will be conducted in person, by phone, or via web cam.
- A minimum of three years of work experience is recommended for the Full-time MBA program.
- Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

MASTER OF BUSINESS ADMINISTRATION IN GENERAL BUSINESS IN THE EXECUTIVE MBA PROGRAM

- Application fee $100 non-refundable
- Ten or more years of professional work and management experience are required. Management is defined as people, project, financial or sales territory management experience, or a combination.
- GMAT or GRE Scores not required for candidates who have the required work and management experience.
- Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes. An undergraduate degree from a regionally accredited college or university is required.
- Submit a resume that focuses on your unique strengths and accomplishments.
- Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.

Total Credits 108-112

Accounting Courses
ACTG 4155 Accounting Information Technology Systems and Business Environment (4 Credits)
This course will introduce you to the study of Accounting Information Systems (AIS) that utilize a Database Management System (DBMS) specifically Microsoft Access (MSA). You will gain a basic understanding of how to develop a beginning-to-intermediate AIS data and processes using system flow charts (SEC), entity relationship diagrams (ERDs) and data flow diagrams (DFDs) utilizing MS Visio software. Cross-listed with ITEC 3155, ITEC 4155.

ACTG 4176 DB Sys Devlpmnt, Audit & Ctrl (4 Credits)
ACTG 4220 Financial Actg & Analysis (4 Credits)
Cross-listed with ACTG 3230.

ACTG 4222 Understanding Financial Stmts (4 Credits)
At the conclusion of this course the student should understand: 1) management decisions that impact published financial statements, 2) fundamentals of interpretation and analysis of financial statements, 3) economic and ethical issues relating to financial reporting, and 4) management attempts to enhance reported operating results. Cross listed with ACTG 3220.

ACTG 4240 Topics & Cases-Financial Actg (4 Credits)

ACTG 4281 Intermediate Financial Actg I (4 Credits)
Introduces key accounting concepts such as revenue recognition, matching principle, and accounting cycle. How to account for various transactions and learn role and purpose of balance sheet, income statement, and statement of cash flows. How various transactions affect these statements and how statements interrelate. Cross-listed with 3281. Prerequisite: MBA 4110, MBA 4111, or MS finance degree student.

ACTG 4282 Intermediate Financial Actg II (4 Credits)
Enhances understanding of financial statements and develops insight into treatment of such advanced financial accounting topics as consolidated financial statements, accounting for leases, currency translation, and options and futures impacts. GAAP (Generally Accepted Accounting Principles) to restate financial statements for differences between companies. Emphasis on impact of financial transactions and how to better evaluate firms’ performances. Reflects a user’s perspective rather than a preparer’s perspective. Not open to MAcc students. Cross listed with ACTG 3068. Prerequisite: ACTG 4281. Cross-listed with ACTG 3068.

ACTG 4284 Consolidated Financial Statmnt (2 Credits)
This course covers consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements. Cross-listed with ACTG 3284. Prerequisite: ACTG 4282, ACTG 3282 or ACTG 3068.

ACTG 4285 Actg. for Foreign Operations (2 Credits)
Topics covered in this course include the financial statement impact of doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities. Prerequisite: ACTG 4282, ACTG 3282 or ACTG 3068.

ACTG 4340 Topics & Cases-Managerial Actg (4 Credits)
Research and presentation (oral and written) of cases in managerial accounting involving internal reporting, internal uses of financial data, and effects on and considerations of interpersonal and interorganizational relationships. Cross-listed with ACTG 3340. Prerequisite: ACTG 4354 or permission of instructor.

ACTG 4354 Cost Accounting (4 Credits)
Accounting information in manufacturing enterprises, standard costs, and budgets. Open to students not having ACTG 3354 or equivalent. Prerequisite: MBA 4110, MBA 4111, or equivalent.

ACTG 4400 Tax Aspects of Busi Decision (4 Credits)
Prerequisite: ACTG 4610.

ACTG 4410 Federal Income Taxation (4 Credits)
Cross-listed with ACTG 3461.

ACTG 4462 Corp Partnership & Taxation (4 Credits)
Cross-listed with ACTG 3462.

ACTG 4520 Forensic Accounting & Auditing (4 Credits)
Opportunity to learn, study, and discuss practical aspects of accounting as it is used to detect and prosecute fraud. Students will be exposed to and shown how to deal with improprieties, common fraud schemes, illegalities, and harassments. Prerequisite: ACTG 3551.

ACTG 4551 Auditing (4 Credits)
This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports. Cross listed with ACTG 3551.

ACTG 4552 Advanced Auditing (4 Credits)
This course is designed to build on the foundation of auditing knowledge developed in ACTG 4551 and apply that knowledge to specific accounts and assertions in a financial statement audit. Students also examine selected SEC enforcement actions and discuss what audit procedures may have been beneficial to prevent the misstatement. Prerequisite: ACTG 4551 or ACTG 3551.

ACTG 4557 Fair Value Auditing (4 Credits)
The purpose of this course is to expose students to the accounting, economic and valuation concepts and challenges that are relevant to auditing fair value measurements and disclosures in financial statements. The role of the FASB, PCAOB, SEC and other standards setters on fair value accounting and measurements are explored. Prerequisite: ACTG 4551 or ACTG 3551.

ACTG 4575 AIS Risk, Control and Audit (4 Credits)
This course covers the topics of risk, associated internal controls and IT audit of accounting information systems. The course outcomes are the skills to analyze and document AIS, perform a risk assessment, evaluate and document current IC and articulate the best practice in internal control frameworks such as COSO, COSO ERM, Cobit 4.1, etc. Student also recommend revised/new IC based on the frameworks, understand CPA risk-based audit standards SAS 104-109 and demonstrate knowledge and skills concerning IT audit techniques known as Computer Assisted Audit Techniques (CAATs) requiring general audit software such as IDEA. Prerequisite: ACTG 4155 or ITEC 3155.
ACTG 4607 Not-For-Profit & Gov Actg (4 Credits)
Accounting methods for governmental bodies and public and private not-for-profit institutions. Cross listed with ACTG 3607. Prerequisite: ACTG 3038, ACTG 3281 or ACTG 4281.

ACTG 4610 Financial Accounting and Reporting (4 Credits)
The purpose of this course is to provide you with an understanding of financial statements issued by companies to external parties, such as shareholders, creditors, and government agencies such as the Securities and Exchange Commission (SEC). To achieve this purpose, the course will: 1) introduce students to the most important issues relating to the assets, liabilities, and stockholders' equity accounts reported on the balance and income statement reporting issues; 2) provide students with sufficient understanding of the reporting mechanics to locate and interpret relevant information in the financial statements; 3) assist students in developing skills that can be used in analyzing financial information provided by companies; and 4) examine major transaction categories and accounting policies of business firms and their financial statement implications. Upon completion of the course, students should be able to appreciate both the usefulness and the limitations of accounting information. The perspective of the course is at all times that of the USER, rather than a PREPARERE, of financial statements.

ACTG 4620 Accounting Ethics (4 Credits)
This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed. Cross-listed with BUS 4620. Prerequisite: BUS 4610.

ACTG 4660 Strategic Cost Management (4 Credits)
Strategic cost management methods and practices focus on how to help the firm succeed in contemporary business. Topics in the course include balanced scorecard, cost-volume-profit analysis, target costing, standard costing, and management control. The course will enable students to apply strategic thinking to management planning, decision-making, and management reporting. Prerequisite: ACTG 4610.

ACTG 4700 Graduate Seminar in Accounting (1-17 Credits)

ACTG 4701 Special Topics in Accounting (1-5 Credits)

ACTG 4702 Special Topics in Accounting (1-5 Credits)

ACTG 4703 Special Topics in Accounting (1-5 Credits)

ACTG 4704 Special Topics in Accounting (1-5 Credits)

ACTG 4705 Topics in Accounting (1-4 Credits)

ACTG 4710 Managing the Family Business (4 Credits)
Explores the business, personal, and interpersonal issues of family-owned and managed businesses. Strengths and weaknesses of family businesses and behavioral issues specific to these settings; analytical skills pertinent to these issues; ability to manage effectively and cope interpersonally within these complex and offer emotionally charged situations; understand family patterns and dynamics and their relationship to family-owned businesses; consider impact that a family business may have on a student's career.

ACTG 4740 Valuation and Modeling (4 Credits)
The ultimate purpose of the course is to improve professional decision-making skills. Professional decisions are made using a combination of judgment and analysis. Even skilled professionals (in any field) will make incorrect decisions when working with incorrect or insufficient information. Thus, one key to improving decision-making is improving analytical insights and skills. This course emphasizes the definition, construction, uses and limitations of popular financial models and instruments. Further, the class focuses on how the instruments are used, why they are used and how decisions to use such instruments and tools/techniques to value them are made.

ACTG 4750 Valuing a Business (4 Credits)
This course explores all major aspects of business valuation. Students not only study valuation theory, they appraise an actual business and draft a valuation report in compliance with the American Institute of Certified Public Accountants Statement on Standards for Valuation Services (SSVS) and Reporting Standards of the National Association of Certified Valuation Analysts (NACVA). Prerequisite: ACTG 3068 or ACTG 4282.

ACTG 4760 CEOs & Corporate Governance (4 Credits)
This course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Cross-listed with LGST 4760. Prerequisite: BUS 4620. MSAcc students only.

ACTG 4795 Graduate Research Sem-Actg (1-17 Credits)

ACTG 4880 Internship - Graduate (0-4 Credits)
Hours and times arranged by student.

ACTG 4991 Independent Study (1-10 Credits)
Hours and times arranged by student.
ACTG 4992 Directed Study (1-10 Credits)

Business Core Courses

BUS 4310 Business Communication for Accounting Professionals (4 Credits)
This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and teambuilding.

BUS 4330 International Business (2 Credits)

BUS 4600 Professional MBA Capstone Project (2 Credits)
The Capstone Project enables the practical application of organizational leadership and management competencies necessary to demonstrate mastery of the core content of the Professional MBA program and provide students with a material edge in the development of their professional capabilities. The capstone Project effectively integrates Daniels’ desired learning outcomes and professional work experiences and applies them to "real-world" business challenges, problems and dilemmas, to support the development and presentation of proposed solutions for the client enterprise.

BUS 4610 The Essence of Enterprise (4 Credits)
Today's business environment is increasing characterized by complex questions without clear black and white answers that span well beyond the historically narrow focus on the enterprise. Managers of tomorrow must be equipped with analytical and conceptual skills that allow them to see connections between social and environmental challenges and opportunities from local to global levels and how they interact and influence enterprise level value creation and innovation in a responsible manner. This course provides a perspective, i.e. worldview, that appropriately places the enterprise in the context of an interconnected world where success, organizationally and personally, is determined by how well one applies the necessary functional skills and organizational understanding to opportunities and challenges framed by globalization, both shared and disparate values, and the need for creativity, innovation, and entrepreneurial spirit. This course draws on the history of business practice and leadership to provide a foundation for personal self-discovery and professional direction.

BUS 4615 Leading at the Edge (2 Credits)
Connects values, globalization, and innovation through a mix of classroom and outdoor experiential learning formats. The course is a two credit hour complement to The Essence of Enterprise course. Using the metaphor of the 10th Mountain Division, the course builds a foundation for learning at Daniels through introductory looks at leadership, team building, and creative problem solving. Through metaphor and experience, the course bonds the cohorts to each other and enhance self confidence to succeed under difficult and changing conditions. The 10th Mountain Division was created out of a global crisis and trained at Camp Hale Colorado, located between Leadville and Vail, during the 1940s. This experience resulted in fourteen patents, including predecessors to the snow cat, snowmobile, and various other forms of outdoor equipment. Following WWII, members of the 10th were responsible for building the country's most famous ski resorts, such as Aspen and Vail, along with the 10th Mountain Hut System. Individual members became successful businessmen, social entrepreneurs, and civil servants forming companies such as NIKE, leading organizations like the Sierra Club, and founding the Colorado Outdoor Education Center (where training for this course takes place). The group is renowned for exemplary leadership, passion, team dynamics, innovation, and ethics within a global environment.

BUS 4620 Ethics for the 21st Century Professional (4 Credits)
A fundamental purpose is to engage students in ongoing reflection and dialogue about their responsibilities as managers and leaders. Of particular emphasis are the ethical, professional and social responsibilities of managers and leaders, especially as it relates to numerous stakeholders and communities. This course focuses on the idea of “community” and the social relationships of managers and business organizations in their communities. Roles and responsibilities of managers and business firms are examined by analyzing a variety of issues that managers will face during their careers. These specific issues will be examined in terms of their legal, public policy, and ethical dimensions. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that may emerge in their business careers. Cross-listed with ACTG 4620.

BUS 4630 Creating Sustainable Enterprises (4 Credits)
A sustainable enterprise is defined as any human endeavor with integrity in three interconnected dimensions (environmental, cultural, and economic) and whose collective actions meet the needs of the enterprise and its stakeholders today without compromising the ability of future generations to meet their needs. The fundamental purpose of this course is to help prepare students for careers in which success requires a worldview that extends beyond the enterprise level in order for managers to create sustainable cultural, social, and financial value for the organization and society in a responsible manner.

BUS 4635 Global Enterprise Challenges (2 Credits)
As students complete the integration of material from the Compass sequence, this class provides an opportunity for the students to extensively apply the material through: case analysis, presentation, critique of other presentations, and integration of MBA Compass material and first year MBA Core material as appropriate.

BUS 4640 Innovation Design & Execution (4 Credits)
In the last century, the technologies of the industrial age (telegraph, railroads, electricity, radio, telephone, television, automobiles, airplanes, computers) have dramatically altered not only the way business is conducted, but the way we live and learn. These technologies have also enabled undesirable and unintended consequences: urban sprawl, global warming, terrorism, weapons of mass destruction, stress, obesity. Where is technology taking us? In this course, students look at innovation, creativity, entrepreneurship and design, and the role each can play in creating a better business world, a business world less driven by science fiction than inspired by social fiction, a business world which begins to shift from an industrial age of ever more encompassing technology to a creative economic environment based less on stuff and more on people and their needs.
BUS 4700 Special Topics in Business (1-4 Credits)
BUS 4701 Special Topics in Business (1-6 Credits)
BUS 4702 Special Topics in Business (1-6 Credits)
BUS 4703 Special Topics in Business (1-6 Credits)
BUS 4704 Topics in Business (1-6 Credits)
BUS 4705 Topics in Business (1-6 Credits)
BUS 4802 Executing in a PM Enterprise (4 Credits)
This course is the second course in a three-part required series. Pre-requisite: Must be a Lockheed employee.
BUS 4804 Kaiser Leadership Edge - People Leadership (4 Credits)
The People Leadership course is part of the Leadership Edge program designed specifically for the Kaiser Permanente Colorado organization. The program grows the internal leadership capacity necessary to reach their goal of becoming the best solution in health care. By exploring topics and cases from multiple perspectives and across business areas, participants develop a deeper understanding of the challenges and opportunities that Kaiser faces. Signature needed to register. Must be a Kaiser employee to register.
BUS 4805 Kaiser Leadership Edge - Financial Acumen (4 Credits)
The Financial Acumen course is part of the Leadership Edge program designed specifically for the Kaiser Permanente Colorado organization. The program grows the internal leadership capacity necessary to reach their goal of becoming the best solution in health care. By exploring topics and cases from multiple perspectives and across business areas, participants develop a deeper understanding of the challenges and opportunities that Kaiser faces. Signature required to register. Must be a Kaiser employee to register.
BUS 4806 Kaiser Permanente Strategy, Innovation, and Execution (4 Credits)
The Strategy, Innovation and Execution course is part of the Leadership Edge program designed specifically for the Kaiser Permanente Colorado organization. The program grows the internal leadership capacity necessary to reach their goal of becoming the best solution in health care. By exploring topics and cases from multiple perspectives and across business areas, participants develop a deeper understanding of the challenges and opportunities that Kaiser faces. Signature required to register. Must be a Kaiser employee to register.
BUS 4980 Internship (0-10 Credits)
Faculty supervised Internship.
BUS 4991 Independent Study (1-10 Credits)
BUS 4995 Independent Thesis (6 Credits)
BUS 9000 Study Abroad Tongji University (0-18 Credits)
This course facilitates study abroad through an exchange agreement with Tongji University School of Economics and Management in Shanghai China. University of Denver exchange students may take only graduate level courses at Tongji University and only graduate level courses from Tongji are counted for graduate credit at the University of Denver.
BUS 9001 Study Abroad Doshisha University (0-18 Credits)
This course facilitates study abroad through an exchange agreement with Doshisha University, Global Business and Management Studies, Kyoto, Japan.

Business Ethics Legal Studies Courses
LGST 3730 Values Based Leadership in Practice (4 Credits)
This course is a practical focus on leadership culture through analysis of real leaders applying theory to their personal experiences and practice. The course utilizes speakers in the Voices of Experience Speaker Series and outstanding literature to facilitate discussion. The course is offered in two-credit-hour sequences over two quarters. Prerequisites: LGST 2000 and degree checkpoint 2.
LGST 4198 E-Commerce Law and Ethics (4 Credits)
The changes in technology and business over the past 20 years have been dramatic and far-reaching. Navigating the even more astonishing changes in the future requires some perspective on the developments of the recent past. How did we get to where we are? What technological, economic and political forces have generated the current state of e-commerce? How are these forces likely to change into the future? What are the basic features of e-commerce as it exists today?.
LGST 4550 Business Law for Accountants (4 Credits)
This course provides students with a detailed review of the legal considerations in forming, operating, and dissolving the most common forms of business entities: partnerships, limited liability companies, and corporations. The rights, duties and liabilities of the managers, owners and accountants (internal and external) of these entities are extensively examined. The course also provides an overview of federal securities laws impacting these organizations. Prerequisite: ACTG 4620 or BUS 4620 or LGST 2000 (concurrent registration OK).
LGST 4700 International Law (4 Credits)
Offers both an introduction to public international law (the rights and duties of states and intergovernmental organizations [IGOs]) and to private international law (the rights and duties of individuals, businesses, and non-governmental organizations [NGOs] in their international affairs). Majority of course devoted to key international issues of business law and public policy such as alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of legal issues related to business.

LGST 4701 Topics in Ethics & Legal Study (1-5 Credits)
This course examines complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. At the heart of Great Leadership one finds a values base. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants gain a deep understanding of - and practical experience with - Values Based Leadership in today's world.

LGST 4730 Values Based Leadership in Practice (4 Credits)
The course examines the complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants will gain a deep understanding of - and practical experience with - Values-Based Leadership in today's world.

LGST 4740 Science & Mgmt. of Org. Ethics (4 Credits)
This course examines our knowledge regarding ethical decision making and behavior in organizational contexts. The course also explores the implications of such knowledge for effectively creating and managing ethical organizations. The course will be conducted as a graduate seminar with students playing a central role in identifying topics, researching content areas, and deciding on course outcomes. We will examine conceptual and theoretical models of ethical behavior in organizations, research empirical studies, and develop managerial implications. The overarching goal is to increase knowledge and understanding so as to strengthen capacities to be ethical leaders and managers. Prerequisite: BUS 4100. Non-business students may take the course with permission.

LGST 4760 CEOs and Corporate Governance (4 Credits)
In the wake of the Sarbanes-Oxley and Dodd-Frank laws, corporate governance has become a compelling issue for business students and executives. Corporate board members and leaders of institutional investors share their insights concerning corporate governance from strategic, financial and legal perspectives. CEO/board dynamics are explored, along with leadership development and executive succession policies. The roles of major board committees, such as the audit, compensation, nominating, and legal compliance committees are given special emphasis. Board responsibilities in corporate crises and re-structuring are examined, along with the legal liabilities of executives, board members, and the corporation. Public policy pressures on corporate governance, including the roles played by the Securities and Exchange Commission and other regulatory bodies are discussed, along with the responses by business organizations, political interest groups, and self-regulatory bodies. Shareholder activism and litigation, along with pressures from other corporate stakeholders are also emphasized in the course. Examples of topics include corporate scandals, executive compensation, global corporate governance systems, and governance reforms. Students engage in a number of case analyses over the course of the quarter, produce a four-part case study, and discuss actual real world solutions with business leaders who have been involved in the issues. Cross-listed with ACTG 4760.

LGST 4775 The Leader's Compass (4 Credits)
This course qualifies for the four course requirement for the MBA Values Based Leadership concentration. By reading the works of great philosophers and using the Socratic Method, students come to understand the role of values in business and society, and learn to respectfully listen to, and learn from, those with different values. Students synthesize the readings and class discussions by writing a paper describing what (a) "a good society" and (b) "a good work organization" would look like to them personally, and what would be needed in terms of leadership to create each condition. Prerequisite: BUS 4620.

LGST 4780 Leadership, Teams & Values (4 Credits)
This course is designed for Daniel Scholars (who have completed the first quarter of their MBA program including Value Based Leadership) to provide both challenging intellectual discussion and physical engagement around the fundamental ethical dilemma of competition and/or cooperation. The venue for the course is Harbor Island, San Diego, California, and the adjacent waters of San Diego Bay and the Pacific Ocean. Both traditional classrooms and the untraditional learning environment of the off-shore sail boat provide the context of dynamic learning about values, teams and self. Prerequisite: BUS 4100.

LGST 4790 Entrepreneur & Family Business-Organization, Governance Ethics & Leadership (4 Credits)
This course covers the most current legal and ethical issues involving the creation of value, strengthening and growing family businesses through the process of best practices in business governance, coupled with ethical conduct and values based leadership, and legal compliance. Cross listed with LGST 3790. Prerequisite: BUS 4100.

LGST 4980 Internship (1-5 Credits)

LGST 4991 Independent Study (1-10 Credits)

LGST 4992 Directed Study (1-4 Credits)

LGST 4995 Independent Research (1-10 Credits)
Business Information Analytics Courses

INFO 4100 Business Intelligence, Data Warehousing, Corporate Decision Making and Leadership (4 Credits)
This course provides an overview of business intelligence: how data are generated, collected, actively warehoused and analyzed to support decision making. It addresses how to combine data with corporate processes and culture to gain new insights to empower corporate strategy and improve daily operations.

INFO 4140 Business Databases (4 Credits)
This is an introductory database course which covers enterprise database design, modeling and implementation.

INFO 4200 Business Intelligence Capstone Planning (2 Credits)
This course provides the foundation for the capstone course. Students begin the planning phase for their culminating project, identifying a business need and company with which to partner. Students then outline the problem, determine objectives and project deliverables, create a document of understanding, and produce a work plan. Prerequisite: STAT 4610.

INFO 4240 Data Warehousing (4 Credits)
This course addresses how to extract and time stamp data from many different business databases, transform it into a common compatible format, and load it into the data warehouse. The course includes using the data warehouse for real time queries as well as generating longer period reports for strategy considerations. Data marts and data mining are also included as part of this course. Prerequisites: INFO 4100 and INFO 4140.

INFO 4280 Project Management (4 Credits)
In this course students examine the science, practice the art, and discuss the folklore or project management to enable them to contribute to and manage projects as well as to judge when to apply this discipline. The course also covers the use of MS Project Professional as a management tool and Crystal Ball as a Monte Carlo simulator for project exercises. Students also learn the fundamentals of process and project simulation for business decision-making. Prerequisite: INFO 4100.

INFO 4300 Predictive Analytics (4 Credits)
This course is designed to prepare students for managerial data analysis and data mining, predictive modeling, model assessment and implementation using large data sets. The course addresses the how, when, why and where of data mining. The emphasis is on understanding the application of a wide range of modern techniques to specific decision-making situations, rather than on mastering the theoretical underpinnings of the techniques. The course covers methods that are aimed at prediction, forecasting, classification, clustering and association. Students gain hands-on experience in using computer software to mine business data sets. Prerequisite: STAT 4610.

INFO 4340 Data Mining and Visualization (4 Credits)
In this course, students create business intelligence tools such as balanced scorecards, data visualization and dashboards to inform business decisions. The course focuses on the identification of metrics, measures, indicators and key performance indicators for a variety of business operations. The focus is on the advantages and disadvantages of various modeling methodologies and implementations moving towards performance improvement. Prerequisite: STAT 4610.

INFO 4380 Decision Processes (4 Credits)
This course addresses the process of decision making in the enterprise: who makes what decisions based on what information and for what purpose. Business Intelligence is premised on the HP motto: "in God we trust. All others bring data." But what is the cost of collecting and analyzing the data and presenting the results, and what decisions justify that cost? Is the transformation from data to decision always rational, and what are the common pitfalls for human decision makers? We examine the results of recent experiments from behavior economics and their relevance to making business decisions. Prerequisite: INFO 4100.

INFO 4400 Business Analytics Capstone (4 Credits)
This course gives students an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from model construction and data collection through an analysis and presentation of results to recommendations for specific business decisions. Prerequisite: INFO 4200.

INFO 4520 Health Informatics (4 Credits)
Annual health care spending in the United States exceeds 16% of GDP ($2 Trillion) and is expected to continue to increase. The effective use of information technology is perceived as an important tool in increasing the access to and quality of health care delivery in a cost effective manner. This course examines the role of health informatics in the health care deliver and management process. The objectives of this course are to familiarize students with the critical issues and challenges faced by those in the health care environment, what technologies are or will soon be available to potentially address these issues and challenges, potential barriers professionals employed in the health care field may face deploying and managing these technologies, and possible strategies to assist these professionals in addressing and overcoming these barriers. This course focuses on four major areas related to health informatics: the role of electronic health records, clinical decision support systems, analytics, and other e-health initiatives such as mobile technologies and telehealth.

INFO 4700 Topics in Business Analytics (4 Credits)
Exploration of current trends and topics in business analytics. Prerequisite: INFO 4100.

INFO 4991 Independent Study (0-10 Credits)
INFO 4992 Directed Study (1-4 Credits)
Construction Management Courses

CMGT 4110 Preconstruction Integration and Planning (4 Credits)
This course examines the role of preconstruction services, team integration, and joint design planning in various Integrated Project Delivery (IPD) approaches. Various tools and techniques associated with preconstruction services and design planning from the proposal stage through the design stages of a project are considered.

CMGT 4120 Construction Planning and Scheduling (4 Credits)
Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Prerequisite: CMGT 4410.

CMGT 4155 Sustainable Development/LEED (4 Credits)
The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis is placed on how LEED project certification influences the overall construction project. Topics include LEED certification techniques for sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and design. The following topics are covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student studies and analyzes how management and LEED techniques are applied to current construction projects.

CMGT 4177 Environmental Systems and MEP Coordination (4 Credits)
A study of electrical and mechanical systems used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating or systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings. Cross listed with CMGT 3177 and XRCM 4177.

CMGT 4180 Construction Layout/Surveying (4 Credits)
Designed to provide the student with the theory, principles, and techniques of construction layout and surveying. Includes field procedures in fundamental land surveying as well as site and foundation layout. Cross listed with CMGT 3180.

CMGT 4200 Lean Construction Project Management (4 Credits)
This advanced course focuses on cutting edge lean tools and other productive strategies for the management of people and processes in the construction industry. The tools and strategies presented draw on the very successful Toyota Production System adapted to the construction industry. Lean construction methodologies such as the Last Planner System, the Lean Project Delivery System, and Integrated Project Delivery are discussed. Topics also include sustainability and the emerging interest in "green construction," as well as the use of Building Information Modeling to enhance the development and management of integrated projects. This course also looks at the human element in relation to motivation, safety, and environmental stresses. A number of case studies are presented to highlight best practices in Lean Construction Project Management.

CMGT 4230 Design Management and Schedule Control (4 Credits)
This course examines the various strategies and techniques associated with managing the design delivery process to align with the construction budget and schedule needs in an integrated fashion. Design planning, scheduling, and resource allocation are considered along with design value determination and management of the design-construct interfaces. Constructability, value engineering, design performance.

CMGT 4250 Construction Contract Admin (4 Credits)
This course addresses how a successful construction project is managed and administered from design through construction to closeout. Emphasis will focus on how to unite the key stakeholders (contractors, architects, engineers, etc.) to provide them with a workable system for operating as an effective project team. The latest technology, laws, and regulations associated with contract administration will be presented. Topics pertinent to each stage of a project are introduced and discussed as they occur throughout the life of the project. Numerous real-world examples will be utilized throughout the course. Various electronic project administration tools and techniques will be demonstrated including Building Information Modeling.

CMGT 4310 Cost Modeling and Trend Management (4 Credits)
This course covers various approaches to construction cost estimating at the conceptual stages of planning and design through detailed construction. Students learn parametric estimating techniques and how they are applied to construct and predict reliable budgets at the earliest stages of design. Students build cost models and refine those models with greater detail as design develops through a project. Building information modeling is introduced and used to create massing models to demonstrate design impacts on project costs. Cost trending techniques are presented to manage, monitor and document project performance relative to cost.

CMGT 4320 Arch Plan & Design Mgmt (4 Credits)
This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students will be introduced to principles, protocols and the planning process related to the design function and the link between the architect’s vision and the finished physical structure. Students will be introduced to design, thinking, theory and application. Student will learn to read and interpret the various graphical and written construction documents as well as know how they are developed and what information they contain. Architectural, structural, mechanical, electrical, plumbing and civil drawings and specifications are covered. The business model for design services will be explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction.
CMGT 4401 Residential Practicum I (4 Credits)
A three course sequence designed to emphasize the practical application of the theories and concepts of residential development. The courses provide a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property. Students will apply accounting, finance, marketing, real estate and construction management techniques in the development of a single family residence. Cross listed with CMGT 3401.

CMGT 4410 Construction Building Systems (4 Credits)
A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced.

CMGT 4420 Construction Estimating (4 Credits)
Integrated approach addressing construction accounting, estimating, purchasing, and management reporting systems. Cross listed with CMGT 3100, XRCM 4420. Prerequisite: CMGT 4400 or permission of instructor.

CMGT 4438 Legal Issues & Risk Management (4 Credits)
General contract and real estate law, including property rights, title concepts, deeds, purchase contracts, law of agency, environmental issues and disclosures, basics finance concerns, tax law, landlord-tenant law, construction contracts, indemnity agreements, rights and remedies of property owners, contractors and subcontractors issues, and various areas of liability for real estate practitioners and property owners.

CMGT 4480 Const Project Management (4 Credits)
Principles and techniques of construction project management, use of systems analysis, internal and external procedures, planning, programming, budgeting and staffing, controlling major projects, emphasis on construction scheduling techniques with case application. Cross listed with CMGT 3120. Prerequisite: CMGT 4410 or permission of the instructor.

CMGT 4490 Residential Development (4 Credits)
A seminar-style capstone course that integrates various aspects of the construction management curriculum. Emphasis is on topics in the construction and development industries. Cross listed with CMGT 3190. Prerequisite: CMGT 4410.

CMGT 4560 Relational Contracting and Risk Mitigation (4 Credits)
Relational contracting is a construction project delivery framework for multidisciplinary, integrated projects that focuses on aligned goals, high performance, innovation, mutual respect, open communication and a "no blame" culture between Client, Contractor, and Design Team. This approach to contracting, also known as Alliance Contracting, is becoming more prevalent in the United States and is often applied when using integrated project delivery systems. This course compares and contrasts transactional contracting methods with relational contracting methods and the influences on the project team and projects outcomes. Relational contracting is also considered in the context of risk mitigation and project optimization.

CMGT 4580 Integrated Teaming and Project Leadership (4 Credits)
This course examines the unique leadership skills and talents associated with leading and facilitating multidisciplinary, integrated design and construction teams. The focus of the course is on applying strategic intelligence and a system of leadership in the development of integrated solutions for the built environment. This leadership model is driven by a compelling purpose and supported by people who share practical values and have excellent processes, to look into the future, create a vision, and bring that vision to reality. Effective strategies for supporting high performance teams are explored.

CMGT 4700 Topics in Construction Mgmt (1-4 Credits)
CMGT 4980 Construction Mgmt Internship (0-8 Credits)
CMGT 4991 Independent Study (1-10 Credits)
CMGT 4992 Directed Study (1-10 Credits)
CMGT 4995 Independent Research (1-10 Credits)

Entrepreneurship Venture Mgt Courses
EVM 4350 Ent Opportunity & Feasibility (4 Credits)
Refine the concepts of business ideas, critically evaluate the market for new products/services, and assess the market feasibility of ideas for new ventures. Cross listed with EVM 3350.

EVM 4351 Ent Planning the New Venture (4 Credits)
Write business plans for their ventures and present plans to a juried panel of entrepreneurs and venture capitalists for review. The objective is to enable each student to create a truly fundable, realistic business plan. Cross listed with EVM 3351.

EVM 4700 Real Business:Cases in Entrep. (2,4 Credits)
The Real Business course is designed to provide students with an opportunity to examine entrepreneurial business challenges through case studies, guest speakers, discussions and field experience. In addition to standard entrepreneurial start-ups, the course will cover international start-ups, gender issues related to start-ups as well as fostering an entrepreneurial spirit in large organizations. Throughout the course, entrepreneurship will be examined from the perspective of business challenge as well as career choice.

EVM 4704 Topics in EVM (1-8 Credits)
EVM 4710 Innovation/Creativity-Business (4 Credits)
Cross listed with EVM 3710.

EVM 4980 Internship (1-5 Credits)

EVM 4991 Independent Study (1-10 Credits)

EVM 4992 Directed Study (1-4 Credits)

Finance Courses

FIN 4110 Ethics in Finance (4 Credits)
This second course in the Compass is specifically designed for the Master of Science Finance (MSF) curriculum and focuses on the ethical, professional, social, and legal responsibilities of finance professionals, organizations and markets. Financial institutions are facing a crisis of confidence. Trust is an essential ingredient to maintaining efficient and effective financial markets. The finance industry has acquired a reputation for unethical and unsavory activity and has lost the trust of much of society. Many financial professionals believe they are encouraged and rewarded for engaging in unethical activity. We discuss the ethical issues facing financial institutions and professionals and explore solutions for resolving these issues and restoring trust.

FIN 4120 Quantitative Methods in Stock Selection (4 Credits)
This course introduces quantitative methods and techniques applied to alpha generation in stock selection. It enables students to better understand and conceptualize the entire quantitative investment process in the context of a simulated long/short equity portfolio. The student learns to set investment objectives, test investment hypotheses, define security selection criteria and construct portfolios using quantitative techniques. This is a practical class held in a lab environment using financial industry tools and data with a strong emphasis on student participation. Students have to define and defend a quantitative investment strategy and implement it in a simulated portfolio environment.

FIN 4130 Financial Risk Management Strategies (4 Credits)
This course applies risk management, quantitative approaches and investment theoretical models to derivatives markets. It examines the proven risk management and revenue enhancement strategies in derivatives and equity markets, creates innovated derivatives investment styles, validates quantitative strategies in options markets, and implements investment models. This course is to offer advanced graduates in finance a well-rounded exposure to the theory and practice of risk management and derivatives investment strategies. It focuses on four aspects: (1) essential risk management theories regarding asset pricing, portfolio construction, and financial statistics; (2) the approaches to develop risk management and derivatives investment strategies based on the fundamental analysis, statistical analysis, and behavioral finance; (3) the rigorous test of various options investment strategies; and (4) the implementation of risk management and investment strategies based on The Reiman Fund. Prerequisites: FIN 4860 or instructor permission.

FIN 4140 Enterprise Risk Management (4 Credits)
This course introduces the fundamentals of enterprise risk management (ERM). The purpose of this course is to give students an overview of the current approaches used to identify, evaluate and monitor the key risks that an organization faces. Students learn that there are numerous approaches that organizations take in addressing ERM. Over the course of the quarter, a number of outside ERM experts address the class on various aspects of ERM. Students then apply newly gained ERM knowledge to a mock risk assessment developed from a real-life corporate scenario from Newmont Mining Corporation.

FIN 4150 Advanced Business Valuation (4 Credits)
The objective of this course is to present advanced valuation techniques to deepen students’ understanding and enhance their knowledge of valuation theory and practical application. Prerequisite: FIN 4410.

FIN 4160 Treasury Management (4 Credits)
The objective of the course is to provide students with a comprehensive understanding of how various treasury functions are managed in a corporation and build students’ capabilities to assume the role of a proficient treasury manager. Prerequisite: FIN 4430.

FIN 4170 Quantitative Methods in Finance (4 Credits)
This course introduces students to the mathematical and statistical methods needed in order to succeed in the quantitative discipline of modern finance. Topics include differential calculus, optimization techniques, linear algebra, probability, and statistical methods. Data analysis software is used when appropriate to facilitate the analysis. Emphasis is on applications, analytic reasoning, and proper interpretation of results.

FIN 4200 Financial Investments and Markets (4 Credits)
Introduction to financial markets, securities, instruments, and other factors that determine the financial environment. Prerequisites: FIN 4630 and STAT 4610.

FIN 4320 Security Analysis and Valuation (4 Credits)
Examination of statistical and theoretical foundation for determination of market prices and market returns. Includes theoretical implications for investment management of options, futures, stocks and bonds. Prerequisite: FIN 4200.

FIN 4330 Portfolio Management (4 Credits)
Case and project approach to foundation of investment portfolio management. Prerequisite: FIN 4200.

FIN 4410 Financial Planning & Analysis (4 Credits)
Advanced course in financial planning and decision-making focusing on capital structure, working capital management, long-range and short-term financial planning, and mergers. Prerequisite: MBA 4112.
FIN 4420 Capital Expenditure Analysis (4 Credits)
Advanced course in capital budgeting examining capital allocation processes and procedures and the theory and applied techniques of capital spending and divestment under conditions of certainty and uncertainty. Related issues of cost of capital and leasing also included. Prerequisite: FIN 4630.

FIN 4500 Financial Modeling (4 Credits)
Use of erect functions and macros to construct financial models from corporate finance, investments and financial markets. Prerequisites: MBA 4112 and FIN 4200.

FIN 4610 Multinational Financial Management (4 Credits)
Financial analysis of multinational corporation operating in international markets, including exchange rates, international instruments, markets, institutions and futures. Prerequisite: MBA 4112.

FIN 4620 Financial Forecasting (4 Credits)

FIN 4630 Managerial Finance (4 Credits)
Analytical skills and tools of finances; theoretical concepts and practical applications. Topics include ratio analysis, breakeven analysis and leverage, securities valuation, capital budgeting, financial forecasting, and working capital management.

FIN 4700 Topics in Finance (4 Credits)
Topics vary each quarter. Course may be taken more than once if topics are different.

FIN 4701 Topics in Finance (1-10 Credits)
Topics vary. For new/experimental courses taught within the Reiman School of Finance.

FIN 4710 Marsico Investment Fund I (4 Credits)
A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: Permission of instructor. (First part of two-quarter course.).

FIN 4720 Marsico Investment Fund II (4 Credits)
A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4710. (Second part of two-quarter course.).

FIN 4730 Marsico Investment Fund III (4 Credits)
This course is an elective course that is the third in the series of classes involving the Graduate investment fund class: Marsico Investment Fund I & II. This course allows students to apply the investment, security analysis, and portfolio management tools and techniques that they have learned in their Finance classes. The students manage an actual portfolio, a portion of the University's endowment originally gifted by Tom and Cydney Marsico. The selection of students for this class is competitive. Students must agree to participate for 2 consecutive quarters, and they must be willing to address portfolio issues during the between-quarter periods if necessary. Because the course involves the application of tools and concepts learned in other classes, the best time to take the course is in the last year of a student's program. Prerequisites: FIN 4710 and FIN 4720.

FIN 4740 Managerial Microeconomics (2 Credits)
This course combines the standard tools of microeconomic analysis with a well-rounded appreciation of the important perspectives that form the business environment in the contemporary world. The goal is to provide students with the tools from microeconomics, game theory, and industrial organization that they need to make sound managerial decisions. The course uses case studies to develop practical insights into managing the firm's resources to achieve competitive advantage. The course is divided into two principle modules based on market structure: perfect competition and imperfect competition. Both modules cover optimal behavior and strategies.

FIN 4750 Managerial Macroeconomics (2 Credits)
This course covers the theory and practice of modern macroeconomics. It teaches students how private market forces and government policy decisions drive fluctuations in the global economy and affect the business environment. It explores issues related to inflation, interest rates, foreign exchange rate, business cycles, and monetary and fiscal policies. The course uses case studies to analyze real-life macroeconomic issues, and students are encouraged to investigate the potential and limitations of macroeconomic theory with real-world problems. The course is divided into two principle modules: the economy in the long run, and the economy in the short run. Both modules cover impacts of government policies on the business environment in a closed economy and an open economy.

FIN 4800 Organized Walk Down Wall St (4 Credits)
Participants will spend five days in New York visiting exchanges, brokerage firms, investment bankers, commercial banks and other institutions. Prerequisite: MBA 4112.

FIN 4830 Econometrics for Finance (4 Credits)
This course focuses on econometric and statistical modeling with an emphasis on finance applications. Prerequisite: STAT 4610.

FIN 4860 Derivatives (4 Credits)
This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisite: FIN 4200.
FIN 4870 Strategic Finance (4 Credits)
Addresses theory, concepts, and techniques associated with asset management and creation of value from a strategic orientation. Links financial theory and practice to strategic and operational objectives of the firm, prepares student to incorporate risk and uncertainty into analytical decision-making process and to analyze divestiture, restructuring, and liquidation decisions. Prerequisites: MS/Finance students only and FIN 4840.

FIN 4885 External Financing (4 Credits)
Considers the blend of theory and practice with regard to designing the appropriate capital structure of the firm as well as appropriate use of securities and process for raising capital in different financial markets. Prerequisites: MS/Finance students only and FIN 4840.

FIN 4890 Fixed Income Analysis (4 Credits)
Emphasizes valuation and management of fixed income securities in prevailing environment of complex and innovative financial arrangements. Study of the nature of evolving markets, both domestically and internationally. Prerequisites: MS/Finance students only and FIN 4820.

FIN 4980 Finance Internship (1-10 Credits)
Permission of instructor required. Hours and times arranged by student.

FIN 4991 Independent Study (1-10 Credits)
Individual study and report. Hours and times arranged by student.

FIN 4992 Directed Study (1-4 Credits)

Info Tech E-Commerce Courses

ITEC 4155 Intro to Database Apps in Acct (4 Credits)
Introduces database technology and appropriate Accounting Information Systems applications to undergraduate students. Upon completion of this course, the student should be able to design, create, de-bug, and operate a simple/intermediate accounting application using the Microsoft Access Database. Course is cross-listed with ITEC 3155, ACTG 4155.

ITEC 4270 Emerging Technologies (4 Credits)
Emerging Technologies and Strategies investigates new information technologies. Having a broad view of emerging technologies as they relate to business can provide an organization with a valuable strategic advantage. Those organizations that can most effectively grasp the deep currents of technological evolution can use their knowledge to protect themselves against sudden and fatal technological obsolescence.

ITEC 4280 Intro Software Engineering II (4 Credits)
A continuation of ITEC 4270, this course covers systems development in a client-server Internet/Intranet environment using the Java programming language. Principles of event- driven systems, remote database access, and building GUI (Graphical User Interface) prototypes for interfacing with desktop systems are included. Prerequisite: ITEC 4270 or instructor's permission.

ITEC 4310 Electronic Commerce (4 Credits)
This course is an overview of electronic commerce (EC) trends and techniques including the underlying technical infrastructure, traditional EDI techniques such as electronic data interchange (EDI) and commerce at light speed (CALS), Internet use for EC, business models for business-to-consumer EC, marketing on the Internet, payment and fulfillment mechanisms, security and regulatory issues, and global implications. Uses lectures, cases, outside speakers from industry and field trips.

ITEC 4340 Networks & Telecommunication (4 Credits)
This course examines network-enabling technologies and concepts, including LANs and WANs. Network design, management, and troubleshooting issues will be covered. Network design in the age of the Internet will be emphasized, including intranets, extranets, design issues, security and firewalls. Pros and cons of private networks, including virtual private networks, will be discussed. Alternative technologies such as wire line, wireless, satellite and cable will be covered. Cross listed with ITEC 3810. Prerequisite: ITEC 4475.

ITEC 4350 Practicum (1-4 Credits)
This course will consist of an information systems project performed by small teams of students and tailored to individual students' needs. It will be undertaken for a "client" in the business community. Supervised by a faculty member, each project will permit students to apply what they have learned in a live setting and focus on project management planning, reporting, and problem discovery and resolution. Prerequisite: ITEC 4300 or ITEC 4330.

ITEC 4476 Business Process Analysis and Design (4 Credits)
This course starts with the traditional information technology systems analysis and design and broadens this approach to include analysis and design of better business processes - innovative processes which deliver greater value to customers and enterprises alike through creative uses of information technology. We will analyze past and current examples and look for ways to build on and extend these successful exploitations of information technology to other companies and industries. In short, this course is about exploring innovative ways to create greater business value by analyzing and designing not only the systems, but also the business processes these systems are created to support.

ITEC 4477 Database-Driven Websites (4 Credits)
Using state of the art technologies, this course focuses on the development of dynamic web pages. Technologies include PEARL, ASP, ColdFusion, SQL, Access, and Oracle. Cross listed with ITEC 3477. Prerequisite: ITEC 4475 or current enrollment.
ITEC 4478 XML (4 Credits)
This programming course is the second of a five series Web Services course track designed to prepare the student for the certification exam offered by Microsoft in the development of .NET applications. The second module of the series, XML, provides a thorough understanding of the main techniques surrounding the development of XML applications. Up until now, it has been very difficult to communicate and transfer data between different platforms. The surge of XML as a universal text-based standard readable and interpreted by any other system available, has opened the channel to enhance the development of cross-functional applications. Students will learn to write the codes describing the data, processes it and prepare it for presentation, as well as modeling and designing functional components that will later be used to drive the applications. Topics include: creating well-formed and valid XML documents, parsing the documents and creating the format to display it through the client's browser, design functional components and the interconnections among them. Some of the tools that the student will learn to use in this course are XML Syntax, DTD, Schema, CSS, XSL, XSLT, DOM, SAX, SOAP, WSDL, and UDDI. Prerequisite: ITEC 4477 or concurrent enrollment.

ITEC 4480 ASP.NET (4 Credits)
The goal of this course is to provide students with the knowledge and skills that are required to develop XML Web services-based solutions to solve common problems in the distributed application domain. The course focuses on using Microsoft Visual Studio .NET, Microsoft ASP.NET, and Universal Description, Discovery, and Integration (UDDI) to enable students to build, deploy, locate and consume Extensible Markup Language (XML) Web services.

ITEC 4481 C#.NET (4 Credits)
The goal of this course is to provide students with the knowledge and skills needed to develop C# applications for the Microsoft .NET Platform. The course focuses on C# program structure, language syntax, and implementation details. C# was created to be the programming language best suited for writing .NET enterprise applications. C# combines the high productivity of Microsoft Visual Basic with the raw power of C++. It is a simple, object-oriented, and type-safe programming language that is based on the C and C++ family of languages.

ITEC 4486 Information Technology Management (4 Credits)
This course focuses on issues central to the effective management of the IT function including, but not limited to: managing the IT organization, IT’s changing role in the enterprise, and managing internal and external relationships.

ITEC 4500 Strategic Info Technologies (4 Credits)
How organizations are using information technologies for competitive advantage.

ITEC 4610 IT Strategy (4 Credits)
Businesses run on information, organized data about customers, markets, competition, and environments. Information systems (interconnected computers, data, people, and processes) are critical to capture, organize, and disseminate that information in ways that provide stakeholder value. This course is designed to help managers, technical and non-technical alike, to explore how to derive greater value and satisfaction, both personally and professionally, from information systems.

ITEC 4700 Topics in Inform. Technology (1-10 Credits)
New topic area discussion in information technology.

ITEC 4980 Internship (1-4 Credits)
Permission of instructor required. Hours and times arranged by student.

ITEC 4991 Independent Study (1-8 Credits)
Individual study and report. Hours and times arranged by student.

ITEC 4992 Directed Study (1-4 Credits)

ITEC 4995 Independent Research (1-8 Credits)

MBA - General Courses

MBA 4000 Business Speaking Lab (4 Credits)
Provides students whose primary language is not English the opportunity to enhance their English language skills. No credit toward degree.

MBA 4001 Business Writing Lab (4 Credits)
Provides students whose primary language is not English the opportunity to enhance their English language skills. No credit toward degree.

MBA 4010 Business Speaking Lab II (1 Credit)
Provides students whose primary language is not English the opportunity to enhance their English language skills. No credit toward degree.

MBA 4011 Business Writing Lab II (1 Credit)
Provides students whose primary language is not English the opportunity to enhance their English language skills. No credit toward degree.

MBA 4050 Business Foundations I (4 Credits)
OMBA students only.

MBA 4060 Business Foundations II (4 Credits)
OMBA students only.
MBA 4205 Strategic Career Management (4 Credits)
Strategic Career Management offers graduate business students a theoretical and practical understanding of career management within the context of the current and projected labor market. The course facilitates the development of personal short- and long-term career action plans, and provides students with the tools and frameworks for developing other employees’ careers once they are in managerial roles. This course is offered in conjunction with the Suitts Center for Career Services. Major components of the course include in-depth self-assessment, labor market assessment (macro and micro), creating a career development and action plan, positioning and branding oneself within the marketplace, and lifelong career management. Prerequisite or Corequisite: BUS 4610.

MBA 4250 Values in Global Marketplace (4 Credits)
This course examines the ethical, legal, and public policy dimensions of business in the global marketplace. Prerequisite: BUS 4200.

MBA 4260 MBA Internship (0-8 Credits)
The internship typically is taken in either the third or fourth quarter of the MBA program and is a fulltime work experience (roughly 400 hours of work) at a sponsoring company. A participant can register for additional courses beyond the internship with approval of the sponsoring company. Prerequisites: MBA 4220, MBA 4231, BUS 4300.

MBA 4270 Integrative Challenge (4 Credits)
Field study experience at end of MBA program to provide students with exposure to current, relevant and challenging issues faced by Colorado businesses; practical application of business knowledge, managerial skills, professional competencies designed to integrate all graduate program elements and provide distinctive advantage in career development. Prerequisites: MBA 4221, 4232.

MBA 4310 Profiles in Leadership (4 Credits)

MBA 4350 Bien's Int Bus Exp in Europe (1-4 Credits)
The objective of this course is to provide an international experience to our students who are interested in international business. This is achieved through field trips, academic and professional presentations, journaling and cultural immersion. Students reflect on similarities and differences in business practices and broader cultural issues that exist between the U.S. and Scandinavian countries.

MBA 4351 Doing Business in Europe (4 Credits)
The objective of this course is to expose students to issues of international business and cultural diversity through field trips and academic and professional presentations in four Scandinavian countries. Topics to be covered include managing production and operations, international marketing, the European Union, personnel development, cross-cultural aspects of international management, and the role of government. The course includes office visits and plant tours of both large and small production facilities and presentations by industry management. The course is intended also to be an interesting and informative cultural experience with visits to a Viking museum, a ship museum, several castles, and with time for individualized travel in Europe after the course is over. A research project of 15-20 pages is required and due at the end of the summer quarter.

MBA 4610 Law and Public Policy (4 Credits)
This course is designed as a survey to cover a broad scope of basic concepts, along with their application to three major policy areas in the final weeks of the course. The course begins with an exploration of the role of business in the public policy environment. The course then examines the legal environment of business, including key elements of private law (contracts, agency, torts, and business organization law) and public law (employment law, administrative law, antitrust law, environmental law, and intellectual property law). In so doing, the course finally applies basic concepts from law and public policy, along with some concepts from economics, to examine three crucial policy areas related to business: regulatory policy, competition policy, and natural resource policy.

MBA 4690 Enterprise Solutions (4 Credits)
A practical application of key business and managerial knowledge, skills, and competencies designed to integrate all graduate program elements and provide students with a distinctive advantage in career development.

MBA 4991 Independent Study (1-10 Credits)

MBA 4992 Directed Study (1-5 Credits)

Management Courses

MGMT 4240 Global Business Imperative (4 Credits)
Conducting business outside the United States involves a unique set of challenges. Diverse cultures, laws, languages and currencies add to the complexity of putting together and managing international business ventures. This course will help you to prepare for these activities by exploring ten questions, which focus critical aspects of international business. The primary vehicle for accomplishing this will be class discussions built around presentations by the instructors as well as cases and exercises dealing with a range of issues, countries, and industries.

MGMT 4280 Business Design (4 Credits)
Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovation(s) to the business model. That innovation(s) is discovered through an investigation of the existing business models and the competitive landscape including: suppliers, customers, competitors, substitutes and barriers of entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of strategies in: marketing, sales, operations, human capital, social responsibility, financing, corporate governance and technology. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of business planning. The result is a written business plan and presentation to funding sources reflecting a sustainable competitive advantage and creation of a defensible market.
MGMT 4340 Strategic Human Resource Mgmt (4 Credits)
This course focuses on the effective management of human resources in order to create sustained competitive advantage. The course covers the major policy areas of employee influence mechanisms, staffing, training and development, performance appraisal, reward systems, and work design so that students are better prepared to provide direction to the creation and implementation of effective management systems. Prerequisite: MBA 4121 or permission of instructor.

MGMT 4345 Performance & Rewards System (4 Credits)
Measuring and improving human performance, techniques of individual objective settings including MBO, appraisal and feedback systems, creating and managing compensation programs, job design, analysis and redesign of reward systems in various organizational contexts. Prerequisite: MBA 4121 or equivalent.

MGMT 4490 Global Strategy (4 Credits)
Management of multinational enterprises; identification, analysis, and discussion of key policy issues for the international manager within various functional areas; home and host country relationships including assessment of political risk, selection of foreign locations, entry and ownership strategy, personnel and staffing considerations, technology transfer, multinational labor relations, organizing for international operations. Prerequisite: Should be taken in the last possible quarter before graduation and after completion of all advanced requirements and ITEC 3900, MGMT 3900, MKTG 3900, STAT 3910, and FIN 4610.

MGMT 4503 Comparative Management (2 Credits)
Exploration of similarities and dissimilarities of management practices in various cultures, determination of political, economic and cultural factors primarily affecting management theory and practice, transferability of certain management practices to other cultures. Introduction to basic assumptions and approaches of comparative research methodology. Prerequisite: MBA 4121.

MGMT 4515 Introduction to Sport and Entertainment Management (4 Credits)
The purpose of this course is to provide students with a very broad but significant exposure to the business of sports, which represents a global, multi-billion dollar industry. By critically analyzing numerous facets within this business from the perspective of a manager, student come away with knowledge that is wide enough but deep enough to foster a solid understanding of this dynamic and exciting industry. At the same time, this course provides students with specific and valuable insights that foster and stimulate deeper interest in a particular aspect within this industry through subsequent and additional coursework, independent study, and/or internship opportunities.

MGMT 4520 Managing Sport & Entertainment Contracts (4 Credits)
This is a comprehensive and interactive seminar on managing sports and entertainment contracts. The class covers intellectual property; the role of entertainment and sports managers and agents; general contract principles and theory; contract negotiation; management and operating agreements; and sponsorship, endorsement, and licensing agreements.

MGMT 4525 Facility Management (4 Credits)
What is a Public Assembly Facility? Public assembly facilities such as arenas, stadiums, convention centers, and theatres evolved out of the need by social communities to build permanent structures for public assembly, for political and commercial activities, religion, sports, spectacles, artistic expression and for commercial and educational assemblies. This course examines the specific areas of responsibility that one must acknowledge and understand to operate a successful venue of this type. We discuss the core competencies required and the unique areas of concentration that separate a public assembly facility from other venue types. Students realize the significant impact and benefit that facilities like these have on the social, educational and economic environment of communities.

MGMT 4530 Technologies for Sport & Entertainment Management (2 Credits)
This is a specialized course for the MBA student interested in expanding their knowledge of the sports industry as a business and as a world economic force. It provides students with a framework for understanding the scope of the sports business across various venues, as it relates to information technology. Management Sport Technology focuses on understanding the practical uses of computer applications as a tool in sport management activities. Emphasis is placed on demonstrated proficiency in project management, spreadsheet management, database management, and Web page development.

MGMT 4535 Managing Sponsorships for Sport & Entertainment Events (2 Credits)
The purpose of this course is to give students an understanding of sports sponsorship from the perspective of the corporate sponsor and the sports entity. The course identifies and describes the several media distribution channels that are used in corporate sports sponsorship. In addition, students learn how to use sports media distribution properties to create an effective sports marketing plan for corporate sponsors. Students put together a corporate sports marketing plan with a sample sports team.

MGMT 4540 Advanced Seminar in Sports and Entertainment Management (4 Credits)
The purpose of this seminar is to consider current topics in sport and entertainment management. Topics vary by quarter depending on timeliness of topics and interest of students. Potential topics may include public policy questions; ethical issues; current economic impacts and analysis; sport and entertainment management factors and how the various segments (professional, amateur, collegiate, high school, recreational and others) relate; environmental impacts; global issues and other issues that impact the current and future fields of sport and entertainment management.

MGMT 4620 Organizational Dynamics (4 Credits)
In this course, you will: (1) understand and develop a set of management and leadership skills critical for effectiveness in high performance work environments; (2) develop the ability to analyze organizations and environments from multiple perspectives; (3) explore policies and practices for facilitating organizational change; (4) become a valued and effective member of a work team; and (5) learn how to incorporate effective communication, critical thinking, creative problem solving, and technology, into organizational behaviors and processes.
MGMT 4625 Managing Human Capital (6 Credits)
This course focuses on the effective management of people, every organization’s most critical resource. Employees’ knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. It is people who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. In this course, the class approaches the people side of business from a general management perspective, integrating concepts from organizational behavior, human resource management, strategy, and organizational design. Course topics include motivation, reward systems, engagement; feedback; processes by which work is done and decisions are made, including attention to teams, power dynamics, conflict, and negotiations; the structure of the organization and its systems, including job and organizational design and system and policies affecting human capital; the organization’s culture and history; and the external environment within which the organization operates, including legal, regulatory, demographic, economic and national cultural factors.

MGMT 4630 Strategic Human Resources Management (4 Credits)
This course advances the argument that effective human resource policies will create sustained competitive advantage. To that end, this course will address the effective management of human resources in various policy areas: staffing, diversity, training and development, voice and influence, performance appraisal, and reward systems. Rather than taking a traditional, staff personnel perspective, we will discuss human resource management from the strategic perspective of a general manager. Prerequisite: MGMT 4620.

MGMT 4690 Strategic Management (4 Credits)
This course builds from the premise that managers make decisions that influence the overall success of their organizations. We will concentrate on how top managers create and maximize value for their stakeholders. You will learn about how companies compete against each other in the quest of achieving high performance and market victories. You will learn about how and why some companies are successful while others are not. This course is about strategy. The primary task of strategy is the allocation and commitment of critical resources over relatively long periods of time in pursuit of specific goals and objectives. Strategic decisions take account of the conditions that prevail within the industry environment, both positive and negative, and the resources and capabilities available to managers for meeting environmental challenges. Strategy also requires establishing and managing an internal organizational system that creates and sustains strategic value.

MGMT 4700 Stress Management (1-4 Credits)

MGMT 4710 Sustaining Family Enterprises (4 Credits)
Family enterprises have a tremendous impact on our local, national and global economies. Today, the definition of the family enterprise extends beyond just the business entity. It includes family offices, family “banks,” family councils, trusts, and family foundations, just to name a few. Further, what happens in, and how decisions are made by, family enterprise affects not only the active family members but other key stakeholders such as inactive family members, in-laws, non-family managers and employees, professional advisors, customers, suppliers and competitors. This course gives students insight into the universe of possibilities that families, enterprises and their advisors face when engaged in systemic transition planning. This highly interdisciplinary course is appropriate for anyone who intends to work in or with family enterprises. This includes family members, accountants, attorneys, estate planners, financial or wealth managers, family office professionals, insurance consultants, business advisors, management consultants, organizational and leadership development experts, international business professionals, psychologists, social workers, and family therapists.

MGMT 4790 Managing Strategic Alliances (4 Credits)
The purpose of this course is to examine and expand upon the current understanding of the challenges of developing and managing strategic alliances. Reflecting the breadth of the novel features of the structure, the course draws from both strategic management and organizational behavioral disciplines. To order the discussion, we take a process view in addressing why and then how to use a strategic alliance. We initially focus on when to use an alliance. We then turn to the formation of an alliance - examining how to select a partner, which structure to choose and how to negotiate. Following, we discuss post-formation issues of partner relationships, management of the alliance, performance evaluation and alliance termination. We conclude the course with sessions devoted towards managing a portfolio of alliances and network management in general.

MGMT 4980 Graduate Internship in Mgmt (1-10 Credits)
Hours and times arranged by student.

MGMT 4991 Independent Study (1-10 Credits)
Individual research and report. Hours and times arranged by student.

MGMT 4992 Directed Study (1-4 Credits)

MGMT 4995 Independent Research (1-10 Credits)

Marketing Courses

MKTG 4100 Marketing Concepts (4 Credits)
Ever wonder what’s behind those Super Bowl ads we love to watch? Or, how Apple decides the price of its newest electronic wonder? Did you notice you can almost always find what you are looking for at the grocery store, whether it’s in season or out? How does that happen? This course provides students with a lens through which they may view the world as a consumer and as a marketer, relating marketing principles and models to consumer and business actions. The course investigates marketing strategy and tactics using contemporary examples from the headlines, active class discussion, and a marketing strategy simulation.
MKTG 4220 Customer Experience Management (4 Credits)
In their best-selling book, The Experience Economy, Pine and Gilmore set the stage for what today’s organizations are facing—customers that connect with brands on the basis of the experiences they receive: products and service are no longer a sufficient differentiator. This course takes the student beyond the ‘better product, better service’ approach to the cutting edge concepts of customer experience management (CEM). It provides an understanding of CEM, its best practices, and the tools for its implementation and evaluation. The course considers the challenges of creating and delivering customer experiences in a variety of settings—in-store operations, branded products, and web-based operations. One of the special features of this course is the use of live, case studies from a variety of companies. Among the companies recently represented by guest speakers are Charles Schwab, Comcast, Cox Communication, Starbucks, 24HR Fitness, Frontier Airlines, eBags, and others.

MKTG 4230 Financial Aspects of Customer Experience Management (4 Credits)
Successful customer experience management requires knowledge of the tools and techniques to assess the costs, benefits, and return on investment in customer relationships. This course shows students how to conceptualize, design, implement, and evaluate information and financial systems that support successful customer experience operations. A particular focus of this course is the determination of the optimal investment in customer experience, including insights from concepts such as lifetime value of customers. Prerequisite: MKTG 4220.

MKTG 4240 Customer Experience Management Integration (4 Credits)
A key component of every successful customer experience management (CEM) program is the ability to integrate CEM, marketing, financial, and information systems information, concepts, and processes into a successful operation for the customer and the company. This course provides the student with the tools to evaluate the success of customer experience management systems through conducting the CEM Audit. Students apply the CEM Audit to evaluate the level of company achievement of CEM goals and objectives. This course builds on the courses in the CEM and IMC programs (primarily MKTG 4810 and MKTG 4220) as well as other courses in marketing and business. In this sense, it is a capstone course, integrating the knowledge and experience acquired through other courses and your life and business experiences. Developing skills in assessment of an organization against CEM standards is the primary objective of this course. Cross listed with MKTG 4850. Prerequisite: MKTG 4220.

MKTG 4360 Global Transportation Systems (4 Credits)
Managing a global supply chain involves applying increased discipline to a process with many parts. The key parts of the supply chain over which a company has the least control are the transportation carriers that connect a company with its customers and suppliers in all parts of the world. Global Transportation Systems covers the various modes of transportation including ocean vessel, barge, railroads, truck and air freight. The course will touch on the operating characteristics, service, infrastructure, sustainability, ownership, finances, prices and each mode’s place in the global supply chain both across borders and domestically in several target countries including the U.S. In addition Global Transportation Systems will provide the student with an understanding of how public policy affects transportation infrastructure investment, security, cost and service around the world. The course provides a solid foundation for other supply chain courses. Cross listed with MKTG 3360. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4370 Marketing Channels & Logistics (4 Credits)
Of the four Ps (product, price, promotion, and place), MKTG 4370 explores the “place” in a firm’s marketing efforts to gain sustainable competitive advantage. Marketing channels are the routes to market used to sell every product and service that consumers and business buyers purchase everywhere in the world. Logistics is the other half; delivering the right product at the right time to the right place in the right quantities to keep satisfied loyal customers, a crucial element in making the sale. In this course, students learn the design of marketing channels to deliver sustainable competitive advantage while building channel power and managing channel conflict. Sound strategic and tactical channels decisions are taught via an on-line computer simulation. Logistics design and execution includes best practices for demand management, order management, customer service, inventory strategy, transportation, and distribution, all of which are taught through lecture, hands-on exercises, and case studies of the world’s best supply chains. Cross listed with MKTG 3370. Prerequisites: MKTG 4100, MKTG 4610, or MKTG 3900.

MKTG 4375 Strategic Sourcing (4 Credits)
Current businesses face relentless pressure to provide additional value in an ever more competitive world. Globalization of world markets has reconfigured supply networks across the globe, causing increasing complexities and challenges in sourcing. In this course, the student learns about the strategic sourcing process, from the development of a sourcing strategy to establishing, managing, and optimizing the firm’s supply base. A framework for aligning corporate, business unit and functional department objectives with a sourcing strategy for each commodity purchased by the firm will be presented, along with spend analysis, portfolio analysis, and other best practices (supply base optimization, supplier scorecards, supplier development programs, reverse cost analysis, B2B Auctions, learning curves, value analysis, total cost of ownership, and gain sharing) for improving a firm’s cost and financial performance through improved supply chain performance. Cross listed with MKTG 3375. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4380 Supply Chain Management (4 Credits)
Today’s economy of globally sourced manufacturing, developing markets, synchronized e-commerce, international trade lanes, and intertwined economies demand supply chains of global reach to bring goods and services from around the world to local stores or even the consumer’s front door. This course addresses the challenges and illustrates the tools required to build, maintain, and expand global supply chains. The course develops the ability to make sound strategic, tactical, and operational supply chain decisions via an on-line simulation tool, and superior supply chain design and performance is taught through in-depth case studies from the world’s top 25 supply chains. Students are able to connect improvements in supply chain design and performance to the financial performance of a firm. Cross listed with MKTG 3380. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4510 Concepts of Buyer Behavior (4 Credits)
What makes consumers tick? This course draws on a variety of sources, including concepts and models from psychology, sociology, anthropology, and economics, to offer helpful frameworks for understanding why consumers buy what they buy. These concepts are applied to real-world situations to give students practice at making better product, promotion, pricing, and distribution decisions based on consumer insights. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.
MKTG 4520 Measuring Marketing Plans and Strategies (4 Credits)
There’s no escape; even marketing managers need to understand financials. This course is designed to introduce MS Marketing students to the principles of financial decision-making and the use of marketing metrics, including customer lifetime value (CLV). Students learn how to compute marketing ROI and how to make marketing decisions that enhance the bottom line. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900, and MKTG 4545 or permission of the instructor.

MKTG 4530 Marketing Research (4 Credits)
Understanding consumers requires careful observation and thoughtful questions. Marketing research represents a methodology for getting the answers needed to be successful in business. This course introduces students to a broad array of marketing research tools, including focus groups, ethnographic studies, survey research, and experiments. Students will learn how and when to apply these tools, as well as how to interpret the results to make sound marketing decisions. Highly recommended students take statistics prior to taking this course. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4540 Product and Service Innovation (4 Credits)
Developing and introducing new products and services are the lifeblood for companies and a primary responsibility of product management. This course focuses on the timeframe beginning with identifying market opportunities for new products and services through to market launch, with particular attention paid to managing project and processes milestones from inception to introduction. The course addresses how marketing managers can overcome the poor success rates for most introductions and increase odds for achieving higher success rates more frequently. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4545 Marketing Planning Foundations (2 Credits)
Prerequisite: MKTG 4100.

MKTG 4550 Marketing Planning (4 Credits)
It has been said that “planning without action is futile, and action without planning is fatal.” The objective of this course is to enable students to utilize a rigorous planning process to develop action-oriented marketing programs. This activity involves an integrated application of concepts and theories characterized by the logical use of facts -- leading to alternatives -- leading to actions. By the end of the course students should be able to develop effective marketing programs, and to understand the strength and limitations of the principal planning tools a marketing manager has at his/her disposal. The skills developed in this class are particularly important because many organizations now use the marketing plan as the basis for developing the business plan. In fact, marketing-developed plans often must precede the subsequent decisions in planning production, finance, and other corporate activities. Each student will apply the planning process, develop an action plan, and identify specific marketing outcomes for an existing or prospective enterprise. The course utilizes current practices, contemporary exemplars, and rigorous communication/presentation platforms. Course must be taken within one quarter of graduation or instructor’s permission. Prerequisites: any two graduate-level marketing courses.

MKTG 4560 Pricing Strategy (4 Credits)
This course provides an overview of all aspects of Pricing, a key driver of growth and profitability. As one of the 4 “Ps” of Marketing, attention and interest in Pricing is growing. This is not surprising, given that Price is the one “P” that drives the topline, with a direct impact on revenue growth, customer growth, market share, and profitability. This Pricing survey course examines established and emerging pricing strategies and principles. In addition, students learn some basic analytical tools that can be applied to pricing strategy decisions and explore approaches to optimize the impact of pricing strategies and tactics, including segmentation, addressing the competition, and communicating value. Prerequisite: MKTG 4100 or equivalent.

MKTG 4563 International Marketing (4 Credits)
The shrinking planet and constant pressure to maintain a firm’s growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international contexts. It includes a combination of lectures and discussions, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4565 Product and Service Innovation (4 Credits)
This course focuses on the timeframe beginning with identifying market opportunities for new products and services through to market launch, with particular attention paid to managing project and processes milestones from inception to introduction. The course addresses how marketing managers can overcome the poor success rates for most introductions and increase odds for achieving higher success rates more frequently. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4570 Competitive Strategies (4 Credits)
This course will examine what is happening in the world of corporate marketing today. Which companies’ marketing strategies are working and why? Which are not working and why? Who is winning in the competitive marketplace and who is losing? How do you know? What is the connection between a company’s marketing strategy and its financial strategy? Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4600 Sports & Entertainment Marketing (4 Credits)
There are few products for which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorships or driving event ticket sales. Participation in a current sports marketing project provides context for graduate students to apply the theories to real situations. Cross listed with MKTG 3660. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4670 Competitive Strategies (4 Credits)
This course will examine what is happening in the world of corporate marketing today. Which companies’ marketing strategies are working and why? Which are not working and why? Who is winning in the competitive marketplace and who is losing? How do you know? What is the connection between a company’s marketing strategy and its financial strategy? Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4690 International Business through E-Commerce (4 Credits)
This course is designed to bring together the concepts of international business and e-commerce. We will discuss trends, issues that hinder or facilitate such trade across countries and diverse strategies that might work under different situations. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4700 Topics in Marketing (4 Credits)
Prerequisite: MKTG 4100.
MKTG 4704 Tpcs Mktg: Special Sector (1-4 Credits)
Various topics in Marketing are covered. Topics change each term.

MKTG 4705 Topics in Marketing (1-4 Credits)
Like most disciplines, marketing is evolving constantly. One can learn about marketing and its classic terms and notions by reading a textbook. But to familiarize oneself with the current pressing issues, emerging ideas, and innovative applications, one must consult both industry practitioners and academic gurus. In this course, students and faculty meet and interview several top business executives in Denver area as well as visit their facilities. Such interaction with the managers and faculty help the students understand the interface of theory and application. In addition, by identifying the current issues in marketing and learning how to develop strategies to handle them, students add to their preparation for the job market.

MKTG 4800 Global Integrated Marketing Communication (4 Credits)
The Global IMC class is for graduates who have taken marketing communications classes and want to gain an understanding of how use this knowledge in the global marketplace. It helps students to understand similarities and differences between markets and how to most effectively approach them. What are the IMC tools that work best and how do you use them with cultural sensitivity? The class features a number of guest speakers and at least one off-site agency visit. The finale to this high-intensity class will have competing teams creating a global campaign. Prerequisites: MKTG 4100 and MKTG 4810.

MKTG 4805 Introduction to Digital Marketing (4 Credits)
Knowing how to use digital marketing tools as part of an integrated marketing strategy is critical in today's marketplace. This course provides the knowledge and skills to plan and implement a digital marketing strategy, create and manage digital marketing campaigns, and select and use the most effective tools and technologies to achieve the business' objectives. Students learn how to successfully integrate online tools including search engine optimization, pay per click advertising, email marketing, blogs, viral marketing, social media, and online PR within the overall marketing mix. Through team projects and class assignments, students get applied knowledge in developing an e-marketing plan. In addition, students acquire firsthand experience using twitter, blogs, web site graders, keyword research software tools and online media measurement services. Previous guest speakers have included industry leaders and agencies like Theo Mandel, Ph.D, a highly acclaimed author on web site user experience, design and usability, as well as leading email marketing firm, Emma. Cross listed with MKTG 3480.

MKTG 4810 Integrated Marketing Communication (4 Credits)
Marketers must successfully communicate to consumers to be successful. Integrated Marketing Communications represents the latest approach to this process. This course focuses on how to integrate marketing messages by using brand management as the foundation of creating effective marketing communications. To get a broad perspective on the topic, students read and discuss both classic and contemporary books on marketing communications. Looking at more than traditional advertising, the class also discusses how social media, outdoor, mobile, product placement, and event marketing are all changing the marketing communications process. The course work focuses on three cases, including a presentation of a proposed advertising campaign. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4815 Social Media Marketing (4 Credits)
Social media marketing is an evolving field with consumers driving the changes marketers are seeing. Based on students' business model, social media may be more than just distribution and prosumers may be a part of your long-term business strategy. This class illuminates the increasing importance of social media as it relates to consumer behavior and the purchase cycle. This course also develops a strategic model for a diverse range of businesses (B2B, B2C, Product, Service, Online, Online with Brick and Mortar) that will empower students as a marketer to determine their best strategy. Cross listed with MKTG 3490. Prerequisites: MKTG 4100 and MKTG 4805 or permission of instructor.

MKTG 4820 Brand Management (4 Credits)
Brands are valued assets for businesses. Building and maintaining strong, valuable brands represent core responsibilities of brand managers. Brand management encompasses brand audits, elements, attitudes, beliefs, images and equity that customers associate with a company's branded offerings. This course focuses on concepts, tools, techniques and strategies for creating, building, measuring, maintaining and managing strong, valuable brands in today's complex marketing landscape. Prerequisites: MKTG 4100 and MKTG 4100.

MKTG 4825 Mobile Marketing (4 Credits)
Due to the explosion of Smartphones, Mobile Commerce, Social Media and Location-based Services such as Foursquare, mobile marketing is the next frontier! Learning to harness this ever-evolving field is essential for business students. This course enables students to build creative mobile marketing campaigns that complement digital and traditional marketing strategies. This fast-paced course is a must for people interested in marketing and business. Prerequisites: MKTG 4100 and MKTG 4805 or permission of instructor.

MKTG 4830 Integrated Marketing Communication Cases (4 Credits)
Using the Harvard case method, students analyze marketing communication and brand building campaigns and processes used to acquire and retain customers, generate sales, and increase profits. The presence (and absence) of IMC strategies and practices are identified and discussed. Course concludes with presentations of cases created (based on working with real companies) by student teams. Prerequisites: MKTG 4100 and MKTG 4810.

MKTG 4835 Search Engine Marketing (4 Credits)
The digital marketing landscape has hundreds of tools that marketers can utilize to increase revenue, execute on strategies and develop deep brands. This course reviews the most essential of those tools; Google Analytics and Google AdWords. This course's goal is to enable students to attain individual certification. By partnering with the businesses in our internship program, this course ensures students are mastering those most sought after tools/skills. This course is fast-paced and has a real world focus! Cross listed with MKTG 3485.
MKTG 4850 Integrated Marketing Communication Campaign (4 Credits)
This course builds on all of the courses in the IMC program/concentration as well as other courses offered through the Department of Marketing. In this sense, it is a capstone course, integrating the knowledge and experience acquired through these other courses. Integration is the primary objective of this course—that is, to develop skills in integrating content from other courses into a complete IMC campaign for a brand of the student’s choice. IMC Campaign is a major project course with a single significant outcome, the IMC Campaign. The project is conducted in a team environment with the guidance of the instructor. Cross listed with MKTG 3460, MKTG 4240. Prerequisites: MKTG 4810 or instructor permission, and MKTG 4820.

MKTG 4900 Advanced Marketing Strategy (4 Credits)
Making sound strategic marketing decisions in the real world is complex and challenging, even for seasoned executives. Determining sound strategies is critical. Implementing them effectively and profitably is essential. How can managers increase their chances for making better strategic marketing decisions leading to more successful outcomes more often? This course applies concepts, constructs and learning acquired in prior marketing courses to complex strategic decisions. Cases are at the heart of the course, challenging teams and individuals to make specific marketing decisions in the context of larger strategic marketing and company contexts, including accounting for top- and bottom-line impact. Students are required to be within two quarters of graduation. Prerequisites: any two graduate-level marketing courses, one of which must be MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4980 Marketing Internship (1-8 Credits)
We learn by doing. That’s what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein’s, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will students earn school credit, they may very well land a paid internship, and eventually a full-time job. Course requirements include an internship report that covers your experience on the job, a study of the industry, and what they learned from their company. It’s a win-win course where you put into practice the marketing concepts you’ve learned at DU, and discover new marketing tactics from your company co-workers. “Thanks to the University of Denver for fostering this partnership and providing such great students” (NCM Media Networks).

MKTG 4991 Independent Study (1-10 Credits)
Hours and times arranged by student.

MKTG 4992 Directed Study (1-4 Credits)

MKTG 4995 Independent Research (1-10 Credits)

MKTG 4999 Marketing Capstone Assessment (0 Credits)
Surveys graduating MS Marketing students and assesses the level of learning obtained by these students. This class is to be taken during the final quarter of study. Prerequisites: MKTG 4100, MKTG 4510, MKTG 4520, MKTG 4530, plus 12 additional hours of graduate marketing classes.

Real Estate Courses

REAL 4000 Business of the Built Environment (4 Credits)
The emphasis of this course is on the importance of real estate and the built environment and its impacts and influences on how we live, work, and play. The course employs a full life cycle sustainable model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value generating solutions for society. Professional practices/skillsets associated with the many career options that engage the built environment are explored.

REAL 4002 The Business of Real Estate (2 Credits)
This is an introduction to home ownership, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title, concepts, deeds, and purchase contracts. Listing contracts, law of agency, types of mortgages, basics of home loan finance, appraisal, investment and tax benefits are also covered in this class. Partially satisfies Colorado Real Estate sales licensing requirements.

REAL 4007 Real Estate Financial Analysis (4 Credits)
Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisite: REAL 4407.

REAL 4010 Real Estate Capital Markets (4 Credits)
This course will expose students to the Commercial Real Estate Capital Markets that have evolved from exclusively private in the 1980s to a mix of private and public, including commercial mortgage backed securities (CMBS) and real estate investment trusts (REITs), in the 1990s. Any person involved in real estate today must understand all the alternative capital sources available and their requirements. Students will be exposed to the positives and pitfalls of all the capital market products. This course will provide students with the general concepts and definitions. A combination of lectures, guest lectures from industry experts, text & article readings, class discussions, and case studies using real life examples. Cross listed with REAL 3010. Prerequisite: REAL 4007.

REAL 4110 Advanced Issues in Real Estate & Construction Management (4 Credits)
This course concentrates on five advanced real estate and construction management topics; the design build environment, negotiation skills in real estate and construction management, real estate capital markets, the entitlement process -- urban planning, zoning, PUDs and underutilized tax advantages in real estate. Cross listed with REAL 3110. Prerequisite: REAL 4407.
REAL 4140 Global Perspectives in Real Estate (4 Credits)
This course focuses on inbound U.S. and outbound U.S. real estate transactions and the cultural issues that impact these transactions. This can also be taken as a Burns Global Delegation travel course. Cross listed with REAL 3140, XRCM 4140.

REAL 4210 Planning, Entitlements, and Public Finance (4 Credits)
Real estate development, place making, and community building require the combined efforts of the public, for-profit, and non-profit sectors. Participants in the real estate development process need to understand and appreciate the sometimes competing and sometimes collaborative interests of governments, agencies, and the private developer. This course is designed to familiarize students with the overall context of urban planning and land use. Students discover the variety of participants in the development process and also become familiar with the project entitlement process, zoning, and land use regulation. Students also examine public/private financing structures such as public-private-partnerships (P3s) and become familiar with detailed calculations relating to Tax Incremental Financing (TIF) and Metropolitan Districts.

REAL 4337 RE Securities/Syn/Entrep (4 Credits)
Introduction to real estate securities; emphasis on private offerings; determining whether a contemplated transaction involves a security, and what happens if it does; exemptions from registration (Reg D); registration requirements; investor suitability, how to syndicate, acquisition of property, marketing or the property, tax structure and formation of syndication, compensation to syndicators, real estate tax considerations. Cross listed with REAL 3337, XRCM 4337.

REAL 4347 Mgmt of Income Properties (4 Credits)
Explore the complexities of managing apartments, condominiums, office buildings, industrial property and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting, and owner relations. Cross listed with REAL 3347.

REAL 4369 Real Estate Taxation (4 Credits)
Tax factors affecting investments and operations in real estate; special attention is given to legal forms of ownership, depreciation, tax basis, tax impacts of exchanges, syndications, real estate securities, and other federal tax laws affecting real estate. Cross listed with REAL 3369.

REAL 4400 Real Estate Concepts (4 Credits)
Principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan financing, appraisal investment and tax benefits. Partially satisfies Colorado real estate broker licensing requirements. Cross listed with REAL 1777.

REAL 4407 Income Property Finance (4 Credits)
This course explores conventional and alternative financing, mortgage banking, law and markets, loan underwriting analysis and the impact of monetary and fiscal policies on the real estate and mortgage markets, with emphasis on decision making from the equity investors point of view. Specific topics include an overview and history of real estate finance, the taxation and legal aspects of real estate finance, compounding and discounting, functions of interest and real estate capital markets and securities. Specific areas of focus are residential property finance, income property finance, and construction and development financing. Cross listed with REAL 3307.

REAL 4417 Income Property Valuation and Appraisal (4 Credits)
Residential/Commercial appraising, including market cost and income approaches to value, gross rent multiplier analysis, neighborhood and site analysis, valuation of income properties including market cost and income approaches to value, capitalization theory and techniques, mortgage-equity analysis, and investment value concepts. Prerequisite: REAL 4407.

REAL 4467 Property Development and Feasibility (4 Credits)
Commercial real estate development analysis and feasibility includes economic base analysis, tenant demand analysis, development and construction cost analysis, lease-up analysis, financial feasibility, leasing and property management practices. Five major property types (office, industrial, retail, apartment and hotel) are covered. Prerequisite: REAL 4007.

REAL 4477 Income Property Investment (4 Credits)
Comprehensive analytical framework for real estate investment decision-making, equity investment decisions via discounted cash flow, and risk analysis models and strategic planning concepts, structuring parameters to maximize rates of return while controlling downside risks; emphasis on theory, concept building, and practical application to various types of investment properties. Cross listed with REAL 3377. Prerequisite: REAL 4007.

REAL 4500 Argus Financial Analysis (4 Credits)
This course concentrates on practical applications of the Argus (TM) Real Estate Financial Software through interactive examples and case studies. Participants will be exposed to the software's capabilities, fundamentals, and unique nuances. Cross listed with REAL 4500, XRCM 4702. Prerequisite: REAL 4007.

REAL 4701 Topics in Real Estate (1-5 Credits)

REAL 4705 Risk Management in the Built Environment (4 Credits)
Decision making and risk analysis concepts in the context of real estate and the built environment. This includes, but is not limited to, liability issues as to persons and property, casualty and property damage questions, employee and employer insurance areas, auto insurance, professional liability insurance, directors' and owners' liability issues, medical insurance, life insurance, environmental risks, and much more in areas of exposure that one can face in the business world. The course further examines means to minimize such areas of exposure.

REAL 4800 NAIOP Challenge (4 Credits)
A unique non-traditional course, where the students will work on a complex real estate problem culminating in an internal competition and external competition which includes a written report and an oral presentation. Cross listed with CMGT 3800, CMGT 4800, REAL 3800.
REAL 4890 Internship (0-8 Credits)

REAL 4980 Adv Valuation/Report Writing (1-10 Credits)
Advanced cutting-edge techniques not yet institutionalized nor commonly practiced in the field. Includes writing skills workshops appropriate to specialized nature of appraisal reports, and composition of a complex field problem report to prepare student for writing "demonstration" report required for MAI professional designation. Prerequisite: REAL 4417.

REAL 4991 Independent Study (1-10 Credits)

REAL 4992 Directed Study (1-10 Credits)

REAL 4995 Independent Research (1-10 Credits)

Statistics Courses

STAT 3920 Strategic Management of Operations (4 Credits)
The operations function is the unit of the organization that produces the products and/or delivers the service for which the company earns revenue. It is the largest unit of the organization with which all other units interact. Therefore, efficient management of this function is a critical success factor for any company. This course focuses on an organization's management (planning, organizing, staffing, directing, and controlling) when converting inputs into products and services. Companies today must remain competitive in the global marketplace, and careful consideration of various options regarding cost containment and use of technology are required. This course will explore how operations managers meet these challenges in the manufacturing and services firms in response to changes in economic conditions. Students will be exposed to a number of quantitative tools as well as becoming familiar with new systems and methods in the operations management field. When appropriate, optimization software such as Microsoft Solver will be utilized to conduct analysis. Prerequisite: STAT 3900.

STAT 4040 Basic Math-Graduate Students (2 Credits)

STAT 4045 Basic Math-Evening MBA Stdnt (1 Credit)

STAT 4050 Basic Statistics-Grad Students (2 Credits)

STAT 4100 Quantitative Methods I (4 Credits)
An introduction to the methods of quantitative analysis commonly used in business, with an emphasis on finance applications. Topics include descriptive statistics, probability, probability distributions, fundamentals of statistical inference, correlation, and simple and multiple regression analysis.

STAT 4200 Quantitative Methods II (4 Credits)

STAT 4300 Production & Operation Mgmt (3 Credits)

STAT 4350 Statistical Computing (4 Credits)
Introduction to and training in the use of modern statistical software packages. Exposure to several of SAS, STATISTICA, S-PLUS, and SPSS with focus on one to best fit student needs. Data acquisition, management, graphs, analyses, reports, customizing and programming. Cross listed with STAT 3350.

STAT 4400 Risky Business (4 Credits)
An interterm travel course to Las Vegas that deals with the theory, practice, and business of gambling.

STAT 4500 Prob Thry Math Gamb (4 Credits)
This course covers the theory of probability and the formal study of mathematics underlying gambling and games of chance. Topics include probability concepts, probability rules, expectation, permutations and combinations, the law of large numbers, the law of "averages," history of gambling, house advantage, fallacies and betting systems, volatility and operations, game odds and price setting, games of pure chance, games with a skill component. Prerequisite: a previous course in statistics or permission of instructor. Cross listed with STAT 3500.

STAT 4510 Applied Decision Theory (4 Credits)
Application of classical and Bayesian decision theory and game theory to practical problems. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4610 Business Statistics (4 Credits)
This course introduces students to basic analytical tools in statistics and operations and provides the initial theoretical concepts and skills that are building blocks for future courses. The approach is to present students with a "corporate" view of how quantitative tools and concepts are used to analyze data and facilitate business decision-making. Students will familiarize themselves with all of the statistical and operations models presented in the course and will demonstrate knowledge in applying the appropriate techniques and models to various decision modeling, with an interpretation of the results of the analysis. Appropriate software will be used in all places where it facilitates the analysis and modeling, allowing students to become more proficient overall in using Microsoft Excel and to place their emphasis on applications to core business disciplines, quantitative reasoning, model building, proper interpretation of results, and managerial decision-making.

STAT 4640 Regrns/Correlation Analysis (4 Credits)
Simple linear regression analysis, methods of estimation, multivariate multiple regression and correlation, tests of reliability and significance, simultaneous equations model and applications. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4650 Applied Multivariate Analysis (4 Credits)
The introduction and application of multivariate analytical techniques and model building for problem solving in business and other settings. Cross listed with STAT 3650. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.
STAT 4680 Sampling Theory & Application (4 Credits)
Simple and stratified random sampling; multistage, cluster, and sequential sampling; optimum allocation and economic efficiency; ratio estimation methods; design of sample studies of various human and physical populations; financial auditing by probability sampling. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4687 Advanced Statistics (4 Credits)

STAT 4700 Intro Computer Simulation (4 Credits)
Deterministic and probabilistic model structures, planning models, heuristics and artificial intelligence, Monte Carlo methods, simulation programming languages, model design, experimentation, and verification. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4704 Topics in Statistics (1-5 Credits)
Various topics including travel courses.

STAT 4709 Computer Simulation Methods for Business (4 Credits)
Large-scale simulation in business and economics, deterministic and probabilistic model structures, corporate planning models, heuristics and artificial intelligence; Monte Carlo methods, model design, experimentation and verification, tactical problems in total systems simulation. Cross listed with STAT 3709.

STAT 4710 Statistical Quality Control (4 Credits)
Applies the basic concepts of statistics to quality improvement in the business environment. Topics include a summary of Total Quality Management (TQM) and where Statistical Quality Control fits in, the tools of Statistical Process Control, Deming’s Continuous Improvement Cycle, as well as the evaluation of Process Capability and Sampling. Cross listed with STAT 3710. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4780 Dsgn & Analysis Exp & Survey (4 Credits)

STAT 4783 Forecasting-Financial Envirn (4 Credits)
Cross listed with FIN 3610, STAT 3620.

STAT 4793 Sem: Statistical Methods (1-5 Credits)

STAT 4794 Sem: Operations Research (1-5 Credits)

STAT 4795 Grad Research Sem-Statistics (1-5 Credits)

STAT 4800 Dsgn & Analysis Exp & Survey (4 Credits)
Designing experiments, analysis of results of experiments, nonparametric and parametric tests, randomization, factorial and nonfactorial designs, Latin squares, survey methodology, survey techniques for field investigations. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4810 Nonparametric Statistics (4 Credits)
Statistical procedures applicable in many situations where standard normal theory methods are not. Especially useful when data are of categorical or rank type or when sampled population is excessively skewed. Emphasis will be on applications, making use of the laws of probability. Cross listed with STAT 3110. Prerequisite: MBA 4111, MBA 4112, or permission of instructor.

STAT 4830 Stats-Econ & Bus Forecasting (4 Credits)
Methods to explain, discover, and predict business and economic forces, bases for evaluating such methods. Prerequisite: STAT 4100 or equivalent. Cross-listed with FIN 4620.

STAT 4840 Decision Sciences (4 Credits)
Decision-making techniques, processes, and support systems; basic decision models dealing with certainty, uncertainty, and static and dynamic time frames; emphasis on viewing all decision problems from perspective of a generalized decision-making structure; introduction to computerized decision support systems. Prerequisites: MBA 4111, MBA 4112, or permission of instructor.

STAT 4850 Operations Research I (4 Credits)
Linear programming, including transportation, warehousing, assignment models, and sensitivity analysis, integer programming and game theory. Permission of instructor required.

STAT 4860 Operations Research II (4 Credits)
Non-linear models and optimization, Kuhn Tucker conditions, quadratic and dynamic programming, inventory and queuing models, simulation. Permission of instructor required.

STAT 4870 Advanced Statistics (4 Credits)
Discrete and continuous probability distributions, sampling distributions, estimation methods, moment generating functions, analysis of variance, test of reliability, and significance by parametric and non-parametric methods. Prerequisites: MBA 4111, MBA 4112, or permission of instructor.

STAT 4930 Sem: Statistical Methods (1-5 Credits)

STAT 4940 Sem: Operations Research (1-5 Credits)

STAT 4950 Grad Research Sem-Statistics (1-5 Credits)

STAT 4960 Intern/Case Study: Statistics (1-5 Credits)

STAT 4970 Intern/Case Study: Ops Res (1-10 Credits)
STAT 4980 Intern/Case Study: Statistics (1-4 Credits)  
Hours and times arranged by student.

STAT 4981 Intern/Case Study: Ops Res (4 Credits)

STAT 4991 Independent Study (1-4 Credits)  
Individual research and report. Hours and times arranged by student.

STAT 4992 Directed Study (1-10 Credits)

STAT 4995 Independent Research (1-10 Credits)

Finance

Office: Daniels College of Business, Rooms 555-579  
Mail Code: Daniels College of Business, Rooms 555-579, 2101 S. University Blvd., Denver, CO 80208

Master of Science in Finance

The Master of Science in Finance from the Daniels College of Business combines the in-depth study of finance theories and principles with advanced technologies, communication, teamwork and values—challenging students to think, not memorize. Students come away with the broad understanding needed to unravel complexity and solve problems while making an impact anywhere in the world of finance.

Master of science in Finance

Admissions Requirements

• Application fee $100 non-refundable
• GMAT or GRE Scores required. Applicants who wish to be considered for merit-based scholarships or graduate assistantships must take the GMAT. To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.
• Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
• Submit a resume that focuses on your unique strengths and accomplishments.
• Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
• Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
• Admissions Interview: Applicants are contacted by a Daniels representative to schedule the admissions interview, which will be conducted in person, by phone, or via web cam.
• Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

Courses

FIN 4110 Ethics in Finance (4 Credits)
This second course in the Compass is specifically designed for the Master of Science Finance (MSF) curriculum and focuses on the ethical, professional, social, and legal responsibilities of finance professionals, organizations and markets. Financial institutions are facing a crisis of confidence. Trust is an essential ingredient to maintaining efficient and effective financial markets. The finance industry has acquired a reputation for unethical and unsavory activity and has lost the trust of much of society. Many financial professionals believe they are encouraged and rewarded for engaging in unethical activity. We discuss the ethical issues facing financial institutions and professionals and explore solutions for resolving these issues and restoring trust.

FIN 4120 Quantitative Methods in Stock Selection (4 Credits)
This course introduces quantitative methods and techniques applied to alpha generation in stock selection. It enables students to better understand and conceptualize the entire quantitative investment process in the context of a simulated long/short equity portfolio. The student learns to set investment objectives, test investment hypotheses, define security selection criteria and construct portfolios using quantitative techniques. This is a practical class held in a lab environment using financial industry tools and data with a strong emphasis on student participation. Students have to define and defend a quantitative investment strategy and implement it in a simulated portfolio environment.

FIN 4130 Financial Risk Management Strategies (4 Credits)
This course applies risk management, quantitative approaches and investment theoretical models to derivatives markets. It examines the proven risk management and revenue enhancement strategies in derivatives and equity markets, creates innovated derivatives investment styles, validates quantitative strategies in options markets, and implements investment models. This course is to offer advanced graduates in finance a well-rounded exposure to the theory and practice of risk management and derivatives investment strategies. It focuses on four aspects: (1) essential risk management theories regarding asset pricing, portfolio construction, and financial statistics; (2) the approaches to develop risk management and derivatives investment strategies based on the fundamental analysis, statistical analysis, and behavioral finance; (3) the rigorous test of various options investment strategies; and (4) the implementation of risk management and investment strategies based on The Reiman Fund. Prerequisites: FIN 4860 or instructor permission.

FIN 4140 Enterprise Risk Management (4 Credits)
This course introduces the fundamentals of enterprise risk management (ERM). The purpose of this course is to give students an overview of the current approaches used to identify, evaluate and monitor the key risks that an organization faces. Students learn that there are numerous approaches that organizations take in addressing ERM. Over the course of the quarter, a number of outside ERM experts address the class on various aspects of ERM. Students then apply newly gained ERM knowledge to a mock risk assessment developed from a real-life corporate scenario from Newmont Mining Corporation.

FIN 4150 Advanced Business Valuation (4 Credits)
The objective of this course is to present advanced valuation techniques to deepen students’ understanding and enhance their knowledge of valuation theory and practical application. Prerequisite: FIN 4410.

FIN 4160 Treasury Management (4 Credits)
The objective of the course is to provide students with a comprehensive understanding of how various treasury functions are managed in a corporation and build students’ capabilities to assume the role of a proficient treasury manager. Prerequisite: FIN 4430.

FIN 4170 Quantitative Methods in Finance (4 Credits)
This course introduces students to the mathematical and statistical methods needed in order to succeed in the quantitative discipline of modern finance. Topics include differential calculus, optimization techniques, linear algebra, probability, and statistical methods. Data analysis software is used when appropriate to facilitate the analysis. Emphasis is on applications, analytic reasoning, and proper interpretation of results.

FIN 4200 Financial Investments and Markets (4 Credits)
Introduction to financial markets, securities, instruments, and other factors that determine the financial environment. Prerequisites: FIN 4630 and STAT 4610.

FIN 4320 Security Analysis and Valuation (4 Credits)
Examination of statistical and theoretical foundation for determination of market prices and market returns. Includes theoretical implications for investment management of options, futures, stocks and bonds. Prerequisite: FIN 4200.

FIN 4330 Portfolio Management (4 Credits)
Case and project approach to foundation of investment portfolio management. Prerequisite: FIN 4200.
FIN 4410 Financial Planning & Analysis (4 Credits)
Advanced course in financial planning and decision-making focusing on capital structure, working capital management, long-range and short-term financial planning, and mergers. Prerequisite: MBA 4112.

FIN 4420 Capital Expenditure Analysis (4 Credits)
Advanced course in capital budgeting examining capital allocation processes and procedures and the theory and applied techniques of capital spending and divestment under conditions of certainty and uncertainty. Related issues of cost of capital and leasing also included. Prerequisite: FIN 4630.

FIN 4500 Financial Modeling (4 Credits)
Use of erect functions and macros to construct financial models from corporate finance, investments and financial markets. Prerequisites: MBA 4112 and FIN 4200.

FIN 4610 Multinational Financial Management (4 Credits)
Financial analysis of multinational corporation operating in international markets, including exchange rates, international instruments, markets, institutions and futures. Prerequisite: MBA 4112.

FIN 4620 Financial Forecasting (4 Credits)

FIN 4630 Managerial Finance (4 Credits)
Analytical skills and tools of finances; theoretical concepts and practical applications. Topics include ratio analysis, breakeven analysis and leverage, securities valuation, capital budgeting, financial forecasting, and working capital management.

FIN 4700 Topics in Finance (4 Credits)
Topics vary each quarter. Course may be taken more than once if topics are different.

FIN 4701 Topics in Finance (1-10 Credits)
Topics vary. For new/experimental courses taught within the Reiman School of Finance.

FIN 4710 Marsico Investment Fund I (4 Credits)
A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: Permission of instructor. (First part of two-quarter course.).

FIN 4720 Marsico Investment Fund II (4 Credits)
A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4710. (Second part of two-quarter course.).

FIN 4730 Marsico Investment Fund III (4 Credits)
This course is an elective course that is the third in the series of classes involving the Graduate investment fund class: Marsico Investment Fund I & II. This course allows students to apply the investment, security analysis, and portfolio management tools and techniques that they have learned in their Finance classes. The students manage an actual portfolio, a portion of the University's endowment originally gifted by Tom and Cydney Marsico. The selection of students for this class is competitive. Students must agree to participate for 2 consecutive quarters, and they must be willing to address portfolio issues during the between-quarter periods if necessary. Because the course involves the application of tools and concepts learned in other classes, the best time to take the course is in the last year of a student's program. Prerequisites: FIN 4710 and FIN 4720.

FIN 4740 Managerial Microeconomics (2 Credits)
This course combines the standard tools of microeconomic analysis with a well-rounded appreciation of the important perspectives that form the business environment in the contemporary world. The goal is to provide students with the tools from microeconomics, game theory, and industrial organization that they need to make sound managerial decisions. The course uses case studies to develop practical insights into managing the firm's resources to achieve competitive advantage. The course is divided into two principle modules based on market structure: perfect competition and imperfect competition. Both modules cover optimal behavior and strategies.

FIN 4750 Managerial Macroeconomics (2 Credits)
This course covers the theory and practice of modern macroeconomics. It teaches students how private market forces and government policy decisions drive fluctuations in the global economy and affect the business environment. It explores issues related to inflation, interest rates, foreign exchange rate, business cycles, and monetary and fiscal policies. The course uses case studies to analyze real-life macroeconomic issues, and students are encouraged to investigate the potential and limitations of macroeconomic theory with real-world problems. The course is divided into two principle modules: the economy in the long run, and the economy in the short run. Both modules cover impacts of government policies on the business environment in a closed economy and an open economy.

FIN 4800 Organized Walk Down Wall St (4 Credits)
Participants will spend five days in New York visiting exchanges, brokerage firms, investment bankers, commercial banks and other institutions. Prerequisite: MBA 4112.

FIN 4830 Econometrics for Finance (4 Credits)
This course focuses on econometric and statistical modeling with an emphasis on finance applications. Prerequisite: STAT 4610.
FIN 4860 Derivatives (4 Credits)
This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisite: FIN 4200.

FIN 4870 Strategic Finance (4 Credits)
Addresses theory, concepts, and techniques associated with asset management and creation of value from a strategic orientation. Links financial theory and practice to strategic and operational objectives of the firm, prepares student to incorporate risk and uncertainty into analytical decision-making process and to analyze divestiture, restructuring, and liquidation decisions. Prerequisites: MS/Finance students only and FIN 4840.

FIN 4885 External Financing (4 Credits)
Considers the blend of theory and practice with regard to designing the appropriate capital structure of the firm as well as appropriate use of securities and process for raising capital in different financial markets. Prerequisites: MS/Finance students only and FIN 4840.

FIN 4890 Fixed Income Analysis (4 Credits)
Emphasizes valuation and management of fixed income securities in prevailing environment of complex and innovative financial arrangements. Study of the nature of evolving markets, both domestically and internationally. Prerequisites: MS/Finance students only and FIN 4820.

FIN 4980 Finance Internship (1-10 Credits)
Permission of instructor required. Hours and times arranged by student.

FIN 4991 Independent Study (1-10 Credits)
Individual study and report. Hours and times arranged by student.

FIN 4992 Directed Study (1-4 Credits)

Master of Science in Management with a concentration in Customized Management
The Master of Science in Management program allows you to tailor a management-related concentration to suit your passion—whether that’s entrepreneurship, nonprofit management, human resource management or business strategy and consulting. It combines a solid foundation in business fundamentals with high-level coursework devoted to your selected career specialization.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

Master of Science in Management with a concentration in Customized Management
Admissions Requirements

- Application fee $100 non-refundable
- GMAT or GRE Scores required. Applicants who wish to be considered for merit-based scholarships or graduate assistantships must take the GMAT. To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.
- Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
- Submit a resume that focuses on your unique strengths and accomplishments.
- Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
- Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
- Admissions Interview: Applicants are contacted by a Daniels representative to schedule the admissions interview, which will be conducted in person, by phone, or via web cam.
- Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

Concentration requirements

26 credits in Management Faculty Advisor approved concentration courses. Concentrations include Business Strategy and Consulting, Entrepreneurship, Human Resources Management, and Public and Nonprofit Management.

Total Credits: 54

Courses

MGMT 4240 Global Business Imperative (4 Credits)
Conducting business outside the United States involves a unique set of challenges. Diverse cultures, laws, languages and currencies add to the complexity of putting together and managing international business ventures. This course will help you to prepare for these activities by exploring ten questions, which focus critical aspects of international business. The primary vehicle for accomplishing this will be class discussions built around presentations by the instructors as well as cases and exercises dealing with a range of issues, countries, and industries.

MGMT 4280 Business Design (4 Credits)
Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovation(s) to the business model. That innovation(s) is discovered through an investigation of the existing business models and the competitive landscape including: suppliers, customers, competitors, substitutes and barriers of entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of strategies in: marketing, sales, operations, human capital, social responsibility, financing, corporate governance and technology. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of business planning. The result is a written business plan and presentation to funding sources reflecting a sustainable competitive advantage and creation of a defensible market.

MGMT 4340 Strategic Human Resource Mgmt (4 Credits)
This course focuses on the effective management of human resources in order to create sustained competitive advantage. The course covers the major policy areas of employee influence mechanisms, staffing, training and development, performance appraisal, reward systems, and work design so that students are better prepared to provide direction to the creation and implementation of effective management systems. Prerequisite: MGMT 3900 or permission of instructor.

MGMT 4345 Performance & Rewards System (4 Credits)
Measuring and improving human performance, techniques of individual objective settings including MBO, appraisal and feedback systems, creating and managing compensation programs, job design, analysis and redesign of reward systems in various organizational contexts. Prerequisite: MBA 4121 or equivalent.

MGMT 4490 Global Strategy (4 Credits)
Management of multinational enterprises; identification, analysis, and discussion of key policy issues for the international manager within various functional areas; home and host country relationships including assessment of political risk, selection of foreign locations, entry and ownership strategy, personnel and staffing considerations, technology transfer, multinational labor relations, organizing for international operations. Prerequisite: Should be taken in the last possible quarter before graduation and after completion of all advanced requirements and ITEC 3900, MGMT 3900, MKTG 3900, STAT 3910, and FIN 4610.
MGMT 4503 Comparative Management (2 Credits)
Exploration of similarities and dissimilarities of management practices in various cultures, determination of political, economic and cultural factors primarily affecting management theory and practice, transferability of certain management practices to other cultures. Introduction to basic assumptions and approaches of comparative research methodology. Prerequisite: MBA 4121.

MGMT 4515 Introduction to Sport and Entertainment Management (4 Credits)
The purpose of this course is to provide students with a very broad but significant exposure to the business of sports, which represents a global, multi-billion dollar industry. By critically analyzing numerous facets within this business from the perspective of a manager, student come away with knowledge that is wide enough but deep enough to foster a solid understanding of this dynamic and exciting industry. At the same time, this course provides students with specific and valuable insights that foster and stimulate deeper interest in a particular aspect within this industry through subsequent and additional coursework, independent study, and/or internship opportunities.

MGMT 4520 Managing Sport & Entertainment Contracts (4 Credits)
This is a comprehensive and interactive seminar on managing sports and entertainment contracts. The class covers intellectual property; the role of entertainment and sports managers and agents; general contract principles and theory; contract negotiation; management and operating agreements; and sponsorship, endorsement, and licensing agreements.

MGMT 4525 Facility Management (4 Credits)
What is a Public Assembly Facility? Public assembly facilities such as arenas, stadiums, convention centers, and theatres evolved out of the need by social communities to build permanent structures for public assembly, for political and commercial activities, religion, sports, spectacles, artistic expression and for commercial and educational assemblies. This course examines the specific areas of responsibility that one must acknowledge and understand to operate a successful venue of this type. We discuss the core competencies required and the unique areas of concentration that separate a public assembly facility from other venue types. Students realize the significant impact and benefit that facilities like these have on the social, educational and economic environment of communities.

MGMT 4530 Technologies for Sport & Entertainment Management (2 Credits)
This is a specialized course for the MBA student interested in expanding their knowledge of the sports industry as a business and as a world economic force. It provides students with a framework for understanding the scope of the sports business across various venues, as it relates to information technology. Management Sport Technology focuses on understanding the practical uses of computer applications as a tool in sport management activities. Emphasis is placed on demonstrated proficiency in project management, spreadsheet management, database management, and Web page development.

MGMT 4535 Managing Sponsorships for Sport & Entertainment Events (2 Credits)
The purpose of this course is to give students an understanding of sports sponsorship from the perspective of the corporate sponsor and the sports entity. The course identifies and describes the several media distribution channels that are used in corporate sports sponsorship. In addition, students learn how to use sports media distribution properties to create an effective sports marketing plan for corporate sponsors. Students put together a corporate sports marketing plan with a sample sports team.

MGMT 4540 Advanced Seminar in Sports and Entertainment Management (4 Credits)
The purpose of this seminar is to consider current topics in sport and entertainment management. Topics vary by quarter depending on timeliness of topics and interest of students. Potential topics may include public policy questions; ethical issues; current economic impacts and analysis; sport and entertainment management factors and how the various segments (professional, amateur, collegiate, high school, recreational and others) relate; environmental impacts; global issues and other issues that impact the current and future fields of sport and entertainment management.

MGMT 4620 Organizational Dynamics (4 Credits)
In this course, you will: (1) understand and develop a set of management and leadership skills critical for effectiveness in high performance work environments; (2) develop the ability to analyze organizations and environments from multiple perspectives; (3) explore policies and practices for facilitating organizational change; (4) become a valued and effective member of a work team; and (5) learn how to incorporate effective communication, critical thinking, creative problem solving, and technology, into organizational behaviors and processes.

MGMT 4625 Managing Human Capital (6 Credits)
This course focuses on the effective management of people, every organization’s most critical resource. Employees’ knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. It is people who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. In this course, the class approaches the people side of business from a general management perspective, integrating concepts from organizational behavior, human resource management, strategy, and organizational design. Course topics include motivation, reward systems, engagement; feedback; processes by which work is done and decisions are made, including attention to teams, power dynamics, conflict, and negotiations; the structure of the organization and its systems, including job and organizational design and system and policies affecting human capital; the organization’s culture and history; and the external environment within which the organization operates, including legal, regulatory, demographic, economic and national cultural factors.

MGMT 4630 Strategic Human Resources Management (4 Credits)
This course advances the argument that effective human resource policies will create sustained competitive advantage. To that end, this course will address the effective management of human resources in various policy areas: staffing, diversity, training and development, voice and influence, performance appraisal, and reward systems. Rather than taking a traditional, staff personnel perspective, we will discuss human resource management from the strategic perspective of a general manager. Prerequisite: MGMT 4620.
MGMT 4690 Strategic Management (4 Credits)
This course builds from the premise that managers make decisions that influence the overall success of their organizations. We will concentrate on how top managers create and maximize value for their stakeholders. You will learn about how companies compete against each other in the quest of achieving high performance and market victories. You will learn about how and why some companies are successful while others are not. This course is about strategy. The primary task of strategy is the allocation and commitment of critical resources over relatively long periods of time in pursuit of specific goals and objectives. Strategic decisions take account of the conditions that prevail within the industry environment, both positive and negative, and the resources and capabilities available to managers for meeting environmental challenges. Strategy also requires establishing and managing an internal organizational system that creates and sustains strategic value.

MGMT 4700 Stress Management (1-4 Credits)

MGMT 4710 Sustaining Family Enterprises (4 Credits)
Family enterprises have a tremendous impact on our local, national and global economies. Today, the definition of the family enterprise extends beyond just the business entity. It includes family offices, family “banks,” family councils, trusts, and family foundations, just to name a few. Further, what happens in, and how decisions are made by, family enterprise affects not only the active family members but other key stakeholders such as inactive family members, in-laws, non-family managers and employees, professional advisors, customers, suppliers and competitors. This course gives students insight into the universe of possibilities that families, enterprises and their advisors face when engaged in systemic transition planning. This highly interdisciplinary course is appropriate for anyone who intends to work in or with family enterprises. This includes family members, accountants, attorneys, estate planners, financial or wealth managers, family office professionals, insurance consultants, business advisors, management consultants, organizational and leadership development experts, international business professionals, psychologists, social workers, and family therapists.

MGMT 4790 Managing Strategic Alliances (4 Credits)
The purpose of this course is to examine and expand upon the current understanding of the challenges of developing and managing strategic alliances. Reflecting the breadth of the novel features of the structure, the course draws from both strategic management and organizational behavioral disciplines. To order the discussion, we take a process view in addressing why and then how to use a strategic alliance. We initially focus on when to use an alliance. We then turn to the formation of an alliance - examining how to select a partner, which structure to choose and how to negotiate. Following, we discuss post-formation issues of partner relationships, management of the alliance, performance evaluation and alliance termination. We conclude the course with sessions devoted towards managing a portfolio of alliances and network management in general.

MGMT 4980 Graduate Internship in Mgmt (1-10 Credits)
Hours and times arranged by student.

MGMT 4991 Independent Study (1-10 Credits)
Individual research and report. Hours and times arranged by student.

MGMT 4992 Directed Study (1-4 Credits)

MGMT 4995 Independent Research (1-10 Credits)

Marketing

Master of Science in Marketing
The Daniels Master of Science in Marketing program is a 54-credit degree that combines the in-depth study of marketing practices and principles with values-based leadership and ethical decision making. Your studies span the theoretical to the real world—from an independent study research project of your choosing to client projects that will test your marketing mettle. You'll be immersed in real-time scenarios that let you dive deep into what interests you most and stay ahead of the curve in this rapidly changing industry.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

Master of Science in Marketing with a Concentration in Integrated Marketing Communication
The integrated marketing communication concentration examines the many ways in which promotion can increase brand awareness and loyalty. The courses you will take include integrated marketing communication, brand management, and IMC Campaign. We also have a full suite of digital marketing courses, helping you to use mobile, social, and digital branding effectively. The search engine marketing course will equip you to take several digital certifications. You will solve client problems in many of our courses, presenting the results of your work to the client at the end of the quarter.
Master of Science in Marketing with a Concentration in Integrated Marketing strategy

The integrated marketing strategy concentration takes the "big picture" look at strategic marketing, including such classes as international marketing, pricing strategy, global supply chain management, product and services innovation, integrated marketing communication, marketing planning, and advanced marketing strategy. Depending on your aspirations, this concentration can be customized to help you reach your professional goals.

Courses

MKTG 4100  Marketing Concepts (4 Credits)
Ever wonder what’s behind those Super Bowl ads we love to watch? Or, how Apple decides the price of its newest electronic wonder? Did you notice you can almost always find what you are looking for at the grocery store, whether it’s in season or out? How does that happen? This course provides students with a lens through which they may view the world as a consumer and as a marketer, relating marketing principles and models to consumer and business actions. The course investigates marketing strategy and tactics using contemporary examples from the headlines, active class discussion, and a marketing strategy simulation.

MKTG 4220  Customer Experience Management (4 Credits)
In their best-selling book, The Experience Economy, Pine and Gilmore set the stage for what today’s organizations are facing—customers that connect with brands on the basis of the experiences they receive: products and service are no longer a sufficient differentiator. This course takes the student beyond the ‘better product, better service’ approach to the cutting edge concepts of customer experience management (CEM). It provides an understanding of CEM, its best practices, and the tools for its implementation and evaluation. The course considers the challenges of creating and delivering customer experiences in a variety of settings—in-store operations, branded products, and web-based operations. One of the special features of this course is the use of live, case studies from a variety of companies. Among the companies recently represented by guest speakers are Charles Schwab, Comcast, Cox Communication, Starbucks, 24HR Fitness, Frontier Airlines, eBags, and others.

MKTG 4230  Financial Aspects of Customer Experience Management (4 Credits)
Successful customer experience management requires knowledge of the tools and techniques to assess the costs, benefits, and return on investment in customer relationships. This course shows students how to conceptualize, design, implement, and evaluate information and financial systems that support successful customer experience operations. A particular focus of this course is the determination of the optimal investment in customer experience, including insights from concepts such as lifetime value of customers. Prerequisite: MKTG 4220.
MKTG 4240 Customer Experience Management Integration (4 Credits)
A key component of every successful customer experience management (CEM) program is the ability to integrate CEM, marketing, financial, and information systems information, concepts, and processes into a successful operation for the customer and the company. This course provides the student with the tools to evaluate the success of customer experience management systems through conducting the CEM Audit. Students apply the CEM Audit to evaluate the level of company achievement of CEM goals and objectives. This course builds on the courses in the CEM and IMC programs (primarily MKTG 4810 and MKTG 4220) as well as other courses in marketing and business. In this sense, it is a capstone course, integrating the knowledge and experience acquired through other courses and your life and business experiences. Developing skills in assessment of an organization against CEM standards is the primary objective of this course. Cross listed with MKTG 4850. Prerequisite: MKTG 4220.

MKTG 4360 Global Transportation Systems (4 Credits)
Managing a global supply chain involves applying increased discipline to a process with many parts. The key parts of the supply chain over which a company has the least control are the transportation carriers that connect a company with its customers and suppliers in all parts of the world. Global Transportation Systems covers the various modes of transportation including ocean vessel, barge, railroads, truck and air freight. The course will touch on the operating characteristics, service, infrastructure, sustainability, ownership, finances, prices and each mode’s place in the global supply chain both across borders and domestically in several target countries including the U.S. In addition Global Transportation Systems will provide the student with an understanding of how public policy affects transportation infrastructure investment, security, cost and service around the world. The course provides a solid foundation for other supply chain courses. Cross listed with MKTG 3370. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4370 Marketing Channels & Logistics (4 Credits)
Of the four Ps (product, price, promotion, and place), MKTG 4370 explores the “place” in a firm’s marketing efforts to gain sustainable competitive advantage. Marketing channels are the routes to market used to sell every product and service that consumers and business buyers purchase everywhere in the world. Logistics is the other half; delivering the right product at the right time to the right place in the right quantities to keep satisfied loyal customers, a crucial element in making the sale. In this course, students learn the design of marketing channels to deliver sustainable competitive advantage while building channel power and managing channel conflict. Sound strategic and tactical channels decisions are taught via an on-line computer simulation. Logistics design and execution includes best practices for demand management, order management, customer service, inventory strategy, transportation, and distribution, all of which are taught through lecture, hands-on exercises, and case studies of the world’s best supply chains. Cross listed with MKTG 3370. Prerequisites: MKTG 4100, MKTG 4610, or MKTG 3900.

MKTG 4375 Strategic Sourcing (4 Credits)
Current businesses face relentless pressure to provide additional value in an ever more competitive world. Globalization of world markets has reconfigured supply networks across the globe, causing increasing complexities and challenges in sourcing. In this course, the student learns about the strategic sourcing process, from the development of a sourcing strategy to establishing, managing, and optimizing the firm’s supply base. A framework for aligning corporate, business unit and functional department objectives with a sourcing strategy for each commodity purchased by the firm will be presented, along with spend analysis, portfolio analysis, and other best practices (supply base optimization, supplier scorecards, supplier development programs, reverse cost analysis, B2B Auctions, learning curves, value analysis, total cost of ownership, and gain sharing) for improving a firm’s cost and financial performance through improved supply chain performance. Cross listed with MTKG 3375. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4380 Supply Chain Management (4 Credits)
Today’s economy of globally sourced manufacturing, developing markets, synchronized e-commerce, international trade lanes, and intertwined economies demand supply chains of global reach to bring goods and services from around the world to local stores or even the consumer’s front door. This course addresses the challenges and illustrates the tools required to build, maintain, and expand global supply chains. The course develops the ability to make sound strategic, tactical, and operational supply chain decisions via an on-line simulation tool, and superior supply chain design and performance is taught through in-depth case studies from the world’s top 25 supply chains. Students are able to connect improvements in supply chain design and performance to the financial performance of a firm. Cross listed with MKTG 3380. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4510 Concepts of Buyer Behavior (4 Credits)
What makes consumers tick? This course draws on a variety of sources, including concepts and models from psychology, sociology, anthropology, and economics, to offer helpful frameworks for understanding why consumers buy what they buy. These concepts are applied to real-world situations to give students practice at making better product, promotion, pricing, and distribution decisions based on consumer insights. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4520 Measuring Marketing Plans and Strategies (4 Credits)
There’s no escape; even marketing managers need to understand financials. This course is designed to introduce MS Marketing students to the principles of financial decision-making and the use of marketing metrics, including customer lifetime value (CLV). Students learn how to compute marketing ROI and how to make marketing decisions that enhance the bottom line. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900, and MKTG 4545 or permission of the instructor.

MKTG 4530 Marketing Research (4 Credits)
Understanding consumers requires careful observation and thoughtful questions. Marketing research represents a methodology for getting the answers needed to be successful in business. This course introduces students to a broad array of marketing research tools, including focus groups, ethnographic studies, survey research, and experiments. Students will learn how and when to apply these tools, as well as how to interpret the results to make sound marketing decisions. Highly recommended students take statistics prior to taking this course. Prerequisites: MKTG, 4100, MKTG 4610 or MKTG 3900.
MKTG 4540 Product and Service Innovation (4 Credits)
Developing and introducing new products and services are the lifeblood for companies and a primary responsibility of product management. This course focuses on the timeframe beginning with identifying market opportunities for new products and services through to market launch, with particular attention paid to managing project and processes milestones from inception to introduction. The course addresses how marketing managers can overcome the poor success rates for most introductions and increase odds for achieving higher success rates more frequently. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4545 Marketing Planning Foundations (2 Credits)
Prerequisite: MKTG 4100.

MKTG 4550 Marketing Planning (4 Credits)
It has been said that “planning without action is futile, and action without planning is fatal.” The objective of this course is to enable students to utilize a rigorous planning process to develop action-oriented marketing programs. This activity involves an integrated application of concepts and theories characterized by the logical use of facts -- leading to alternatives -- leading to actions. By the end of the course students should be able to develop effective marketing programs, and to understand the strength and limitations of the principal planning tools a marketing manager has at his/her disposal. The skills developed in this class are particularly important because many organizations now use the marketing plan as the basis for developing the business plan. In fact, marketing-developed plans often must precede the subsequent decisions in planning production, finance, and other corporate activities. Each student will apply the planning process, develop an action plan, and identify specific marketing outcomes for an existing or prospective enterprise. The course utilizes current practices, contemporary exemplars, and rigorous communication/presentation platforms. Course must be taken within one quarter of graduation or instructor’s permission. Prerequisites: any two graduate-level marketing courses.

MKTG 4560 Pricing Strategy (4 Credits)
This course provides an overview of all aspects of Pricing, a key driver of growth and profitability. As one of the 4 “Ps” of Marketing, attention and interest in Pricing is growing. This is not surprising, given that Price is the one “P” that drives the topline, with a direct impact on revenue growth, customer growth, market share, and profitability. This Pricing survey course examines established and emerging pricing strategies and principles. In addition, students learn some basic analytical tools that can be applied to pricing strategy decisions and explore approaches to optimize the impact of pricing strategies and tactics, including segmentation, addressing the competition, and communicating value. Prerequisite: MKTG 4100 or equivalent.

MKTG 4630 International Marketing (4 Credits)
The shrinking planet and constant pressure to maintain a firm’s growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international contexts. It includes a combination of lectures and discussions, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4660 Sports & Entertainment Marketing (4 Credits)
There are few products for which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorships or driving event ticket sales. Participation in a current sports marketing project provides context for graduate students to apply the theories to real situations. Cross listed with MKTG 3660. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4670 Competitive Strategies (4 Credits)
This course will examine what is happening in the world of corporate marketing today. Which companies’ marketing strategies are working and why? Which are not working and why? Who is winning in the competitive marketplace and who is losing? How do you know? What is the connection between a company’s marketing strategy and its financial strategy? Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4690 International Business through E-Commerce (4 Credits)
This course is designed to bring together the concepts of international business and e-commerce. We will discuss trends, issues that hinder or facilitate such trade across countries and diverse strategies that might work under different situations. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4700 Topics in Marketing (4 Credits)
Prerequisite: MKTG 4100.

MKTG 4704 Tpcs Mktg: Special Sector (1-4 Credits)
Various topics in Marketing are covered. Topics change each term.

MKTG 4705 Topics in Marketing (1-4 Credits)
Like most disciplines, marketing is evolving constantly. One can learn about marketing and its classic terms and notions by reading a textbook. But to familiarize oneself with the current pressing issues, emerging ideas, and innovative applications, one must consult both industry practitioners and academic gurus. In this course, students and faculty meet and interview several top business executives in Denver area as well as visit their facilities. Such interaction with the managers and faculty help the students understand the interface of theory and application. In addition, by identifying the current issues in marketing and learning how to develop strategies to handle them, students add to their preparation for the job market.
MKTG 4800 Global Integrated Marketing Communication (4 Credits)
The Global IMC class is for graduates who have taken marketing communications classes and want to gain an understanding of how use this knowledge in the global marketplace. It helps students to understand similarities and differences between markets and how to most effectively approach them. What are the IMC tools that work best and how do you use them with cultural sensitivity? The class features a number of guest speakers and at least one off-site agency visit. The finale to this high-intensity class will have competing teams creating a global campaign. Prerequisites: MKTG 4100 and MKTG 4810.

MKTG 4805 Introduction to Digital Marketing (4 Credits)
Knowing how to use digital marketing tools as part of an integrated marketing strategy is critical in today's marketplace. This course provides the knowledge and skills to plan and implement a digital marketing strategy, create and manage digital marketing campaigns, and select and use the most effective tools and technologies to achieve the business' objectives. Students learn how to successfully integrate online tools including search engine optimization, pay per click advertising, email marketing, blogs, viral marketing, social media, and online PR within the overall marketing mix. Through team projects and class assignments, students get applied knowledge in developing an e-marketing plan. In addition, students acquire firsthand experience using twitter, blogs, web site graders, keyword research software tools and online media measurement services. Previous guest speakers have included industry leaders and agencies like Theo Mandel, Ph.D, a highly acclaimed author on web site user experience, design and usability, as well as leading email marketing firm, Emma. Cross listed with MKTG 3480.

MKTG 4810 Integrated Marketing Communication (4 Credits)
Marketers must successfully communicate to consumers to be successful. Integrated Marketing Communications represents the latest approach to this process. This course focuses on how to integrate marketing messages by using brand management as the foundation of creating effective marketing communications. To get a broad perspective on the topic, students read and discuss both classic and contemporary books on marketing communications. Looking at more than traditional advertising, the class also discusses how social media, outdoor, mobile, product placement, and event marketing are all changing the marketing communications process. The course work focuses on three cases, including a presentation of a proposed advertising campaign. Prerequisites: MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4815 Social Media Marketing (4 Credits)
Social media marketing is an evolving field with consumers driving the changes marketers are seeing. Based on students' business model, social media may be more than just distribution and prosumers may be a part of your long-term business strategy. This class illuminates the increasing importance of social media as it relates to consumer behavior and the purchase cycle. This course also develops a strategic model for a diverse range of businesses (B2B, B2C, Product, Service, Online, Online with Brick and Mortar) that will empower students as a marketer to determine their best strategy. Cross listed with MKTG 3490. Prerequisites: MKTG 4100 and MKTG 4805 or permission of instructor.

MKTG 4820 Brand Management (4 Credits)
Brands are valued assets for businesses. Building and maintaining strong, valuable brands represent core responsibilities of brand managers. Brand management encompasses brand audits, elements, attitudes, beliefs, images and equity that customers associate with a company's branded offerings. This course focuses on concepts, tools, techniques and strategies for creating, building, measuring, maintaining and managing strong, valuable brands in today's complex marketing landscape. Prerequisites: MKTG 4810 and MKTG 4100.

MKTG 4825 Mobile Marketing (4 Credits)
Due to the explosion of Smartphones, Mobile Commerce, Social Media and Location-based Services such as Foursquare, mobile marketing is the next frontier! Learning to harness this ever-evolving field is essential for business students. This course enables students to build creative mobile marketing campaigns that complement digital and traditional marketing strategies. This fast-paced course is a must for people interested in marketing and business. Prerequisites: MKTG 4100 and MKTG 4805 or permission of instructor.

MKTG 4830 Integrated Marketing Communication Cases (4 Credits)
Using the Harvard case method, students analyze marketing communication and brand building campaigns and processes used to acquire and retain customers, generate sales, and increase profits. The presence (and absence) of IMC strategies and practices are identified and discussed. Course concludes with presentations of cases created (based on working with real companies) by student teams. Prerequisites: MKTG 4100 and MKTG 4810.

MKTG 4835 Search Engine Marketing (4 Credits)
The digital marketing landscape has hundreds of tools that marketers can utilize to increase revenue, execute on strategies and develop deep brands. This course reviews the most essential of those tools; Google Analytics and Google AdWords. This course’s goal is to enable students to attain individual certification. By partnering with the businesses in our internship program, this course ensures students are mastering those most sought after tools/skills. This course is fast-paced and has a real world focus! Cross listed with MKTG 3485.

MKTG 4850 Integrated Marketing Communication Campaign (4 Credits)
This course builds on all of the courses in the IMC program/concentration as well as other courses offered through the Department of Marketing. In this sense, it is a capstone course, integrating the knowledge and experience acquired through these other courses. Integration is the primary objective of this course—that is, to develop skills in integrating content from other courses into a complete IMC campaign for a brand of the student’s choice. IMC Campaign is a major project course with a single significant outcome, the IMC Campaign. The project is conducted in a team environment with the guidance of the instructor. Cross listed with MKTG 3460, MKTG 4240. Prerequisites: MKTG 4810 or instructor permission, and MKTG 4820.
MKTG 4900 Advanced Marketing Strategy (4 Credits)
Making sound strategic marketing decisions in the real world is complex and challenging, even for seasoned executives. Determining sound strategies is critical. Implementing them effectively and profitably is essential. How can managers increase their chances for making better strategic marketing decisions leading to more successful outcomes more often? This course applies concepts, constructs and learning acquired in prior marketing courses to complex strategic decisions. Cases are at the heart of the course, challenging teams and individuals to make specific marketing decisions in the context of larger strategic marketing and company contexts, including accounting for top- and bottom-line impact. Students are required to be within two quarters of graduation. Prerequisites: any two graduate-level marketing courses, one of which must be MKTG 4100, MKTG 4610 or MKTG 3900.

MKTG 4980 Marketing Internship (1-8 Credits)
We learn by doing. That’s what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein’s, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will students earn school credit, they may very well land a paid internship, and eventually a full-time job. Course requirements include an internship report that covers your experience on the job, a study of the industry, and what they learned from their company. “Thanks to the University of Denver for fostering this partnership and providing such great students” (NCM Media Networks).

MKTG 4991 Independent Study (1-10 Credits)
Hours and times arranged by student.

MKTG 4992 Directed Study (1-4 Credits)

MKTG 4995 Independent Research (1-10 Credits)

MKTG 4999 Marketing Capstone Assessment (0 Credits)
Surveys graduating MS Marketing students and assesses the level of learning obtained by these students. This class is to be taken during the final quarter of study. Prerequisites: MKTG 4100, MKTG 4510, MKTG 4520, MKTG 4530, plus 12 additional hours of graduate marketing classes.

Real Estate and Construction Management

Office: Daniels College of Business, Room 380
Mail Code: Daniels College of Business, Room 380, 2101 S. University Blvd. Denver CO 80208
Phone: 303-871-3432

Master of Science in Real Estate and the Built Environment
The Franklin L. Burns School of Real Estate and Construction Management at the Daniels College of Business allows you to combine the core competencies across the full spectrum of the built environment. Students will have a sound understanding of the Development and Delivery sides of real estate, property development and integrated project delivery. Our core curriculum includes courses in Real Estate Feasibility, Real Estate Finance, Investment and Appraisal in addition to courses in Project Feasibility, Construction Estimating, Procurement, Project Delivery, Scheduling, and Contract Administration. This holistic, integrated approach adds value in a way that a single discipline perspective cannot, and establishes a firm basis upon which to build a selected area of expertise. It can be completed in one year full time or 18 months part time.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

Master of Science in Real Estate and the Built Environment, Executive
This program mirrors the on campus Master of Science in Real Estate and the Built Environment degree. This Executive program is a flexible, online degree program designed for working professionals with at least 10 years of relevant work experience who want to progress in their corporate or entrepreneurial careers in real estate, property development or integrated project delivery. Two intensive three-day courses in residence are required in addition to your online studies. The online classes are offered in a synchronous manner one evening per week for a total of 10 weeks. This program can be completed in as little as 18 months or up to five years.

Master of Business Administration in Real Estate and the Built Environment

Master of Science in Real Estate and the Built Environment
• Application fee $100 non-refundable
• Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
• Submit a resume that focuses on your unique strengths and accomplishments.
• Official GMAT or GRE scores (GMAT is required for scholarship and graduate assistantship consideration)
• Official TOEFL or IELTS score (international students)
• Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
• Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
• Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

Master of Science in Real Estate and the Built Environment, Executive

• Application fee $100 non-refundable
• Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
• Submit a resume that focuses on your unique strengths and accomplishments.
• GMAT/GRE Waived with appropriate industry background (normally 8-10 years industry experience)
• Official TOEFL or IELTS score (international students)
• Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
• Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
• Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

**Total Credits** 50
Construction Management Courses

CMGT 4110 Preconstruction Integration and Planning (4 Credits)
This course examines the role of preconstruction services, team integration, and joint design planning in various Integrated Project Delivery (IPD) approaches. Various tools and techniques associated with preconstruction services and design planning from the proposal stage through the design stages of a project are considered.

CMGT 4120 Construction Planning and Scheduling (4 Credits)
Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management.
Prerequisite: CMGT 4410.

CMGT 4155 Sustainable Development/LEED (4 Credits)
The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis is placed on how LEED project certification influences the overall construction project. Topics include LEED certification techniques for sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and design. The following topics are covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student studies and analyzes how management and LEED techniques are applied to current construction projects.

CMGT 4177 Environmental Systems and MEP Coordination (4 Credits)
A study of electrical and mechanical systems used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating or systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings. Cross listed with CMGT 3177 and XRCM 4177.

CMGT 4180 Construction Layout/Surveying (4 Credits)
Designed to provide the student with the theory, principles and techniques of construction layout and surveying. Includes field procedures in fundamental land surveying as well as site and foundation layout. Cross listed with CMGT 3180.

CMGT 4200 Lean Construction Project Management (4 Credits)
This advanced course focuses on cutting edge lean tools and other productive strategies for the management of people and processes in the construction industry. The tools and strategies presented draw on the very successful Toyota Production System adapted to the construction industry. Lean construction methodologies such as the Last Planner System, the Lean Project Delivery System, and Integrated Project Delivery are discussed. Topics also include sustainability and the emerging interest in “green construction,” as well as the use of Building Information Modeling to enhance the development and management of integrated projects. This course also looks at the human element in relation to motivation, safety, and environmental stresses. A number of case studies are presented to highlight best practices in Lean Construction Project Management.

CMGT 4230 Design Management and Schedule Control (4 Credits)
This course examines the various strategies and techniques associated with managing the design delivery process to align with the construction budget and schedule needs in an integrated fashion. Design planning, scheduling, and resource allocation are considered along with design value determination and management of the design-construction interfaces. Constructability, value engineering, design performance.

CMGT 4250 Construction Contract Admin (4 Credits)
This course addresses how a successful construction project is managed and administered from design through construction to closeout. Emphasis will focus on how to unite the key stakeholders (contractors, architects, engineers, etc.) to provide them with a workable system for operating as an effective project team. The latest technology, laws and regulations associated with contract administration will be presented. Topics pertinent to each stage of a project are introduced and discussed as they occur throughout the life of the project. Numerous real-world examples will be utilized throughout the course. Various electronic project administration tools and techniques will be demonstrated including Building Information Modeling.

CMGT 4310 Cost Modeling and Trend Management (4 Credits)
This course covers various approaches to construction cost estimating at the conceptual stages of planning and design through detailed construction. Students learn parametric estimating techniques and how they are applied to construct and predict reliable budgets at the earliest stages of design. Students build cost models and refine those models with greater detail as design develops through a project. Building information modeling is introduced and used to create massing models to demonstrate design impacts on project costs. Cost trending techniques are presented to manage, monitor and document project performance relative to cost.

CMGT 4320 Arch Plan & Design Mgmt (4 Credits)
This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students will be introduced to principles, protocols and the planning process related to the design function and the link between the architect’s vision and the finished physical structure. Students will be introduced to design, thinking, theory and application. Student will learn to read and interpret the various graphical and written construction documents as well as know how they are developed and what information they contain. Architectural, structural, mechanical, electrical, plumbing and civil drawings and specifications are covered. The business model for design services will be explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction.
CMGT 4401 Residential Practicum I (4 Credits)
A three course sequence designed to emphasize the practical application of the theories and concepts of residential development. The courses provide a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property. Students will apply accounting, finance, marketing, real estate and construction management techniques in the development of a single family residence. Cross listed with CMGT 3401.

CMGT 4410 Construction Building Systems (4 Credits)
A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced.

CMGT 4420 Construction Estimating (4 Credits)
Integrated approach addressing construction accounting, estimating, purchasing, and management reporting systems. Cross listed with CMGT 3100, XRCM 4420. Prerequisite: CMGT 4400 or permission of instructor.

CMGT 4438 Legal Issues & Risk Management (4 Credits)
General contract and real estate law, including property rights, title concepts, deeds, purchase contracts, law of agency, environmental issues and disclosures, basics finance concerns, tax law, landlord-tenant law, construction contracts, indemnity agreements, rights and remedies of property owners, contractors and subcontractors issues, and various areas of liability for real estate practitioners and property owners.

CMGT 4480 Const Project Management (4 Credits)
Principles and techniques of construction project management, use of systems analysis, internal and external procedures, planning, programming, budgeting and staffing, controlling major projects, emphasis on construction scheduling techniques with case application. Cross listed with CMGT 3120. Prerequisite: CMGT 4410 or permission of the instructor.

CMGT 4490 Residential Development (4 Credits)
A seminar-style capstone course that integrates various aspects of the construction management curriculum. Emphasis is on topics in the construction and development industries. Cross listed with CMGT 3190. Prerequisite: CMGT 4410.

CMGT 4560 Relational Contracting and Risk Mitigation (4 Credits)
Relational contracting is a construction project delivery framework for multidisciplinary, integrated projects that focuses on aligned goals, high performance, innovation, mutual respect, open communication and a “no blame” culture between Client, Contractor, and Design Team. This approach to contracting, also known as Alliance Contracting, is becoming more prevalent in the United States and is often applied when using integrated project delivery systems. This course compares and contrasts transactional contracting methods with relational contracting methods and the influences on the project team and project outcomes. Relational contracting is also considered in the context of risk mitigation and project optimization.

CMGT 4580 Integrated Teaming and Project Leadership (4 Credits)
This course examines the unique leadership skills and talents associated with leading and facilitating multidisciplinary, integrated design and construction teams. The focus of the course is on applying strategic intelligence and a system of leadership in the development of integrated solutions for the built environment. This leadership model is driven by a compelling purpose and supported by people who share practical values and have excellent processes, to look into the future, create a vision, and bring that vision to reality. Effective strategies for supporting high performance teams are explored.

CMGT 4700 Topics in Construction Mgmt (1-4 Credits)
CMGT 4980 Construction Mgmt Internship (0-8 Credits)
CMGT 4991 Independent Study (1-10 Credits)
CMGT 4992 Directed Study (1-10 Credits)
CMGT 4995 Independent Research (1-10 Credits)

Real Estate Courses

REAL 4000 Business of the Built Environment (4 Credits)
The emphasis of this course is on the built environment and its impacts and influences on how we live, work, and play. The course employs a full life cycle sustainable model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value generating solutions for society. Professional practices/skillsets associated with the many career options that engage the built environment are explored.

REAL 4002 The Business of Real Estate (2 Credits)
This is an introduction to home ownership, real estate industry and its markets; legal aspects of home ownership from consumer’s point of view, including property rights, title, concepts, deeds, and purchase contracts. Listing contracts, law of agency, types of mortgages, basics of home loan finance, appraisal, investment and tax benefits are also covered in this class. Partially satisfies Colorado Real Estate sales licensing requirements.

REAL 4007 Real Estate Financial Analysis (4 Credits)
Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisite: REAL 4407.
REAL 4010 Real Estate Capital Markets (4 Credits)
This course will expose students to the Commercial Real Estate Capital Markets that have evolved from exclusively private in the 1980s to a mix of private and public, including commercial mortgage backed securities (CMBS) and real estate investment trusts (REITs), in the 1990s. Any person involved in real estate today must understand all the alternative capital sources available and their requirements. Students will be exposed to the positives and pitfalls of all the capital market products. This course will provide students with the general concepts and definitions. A combination of lectures, guest lectures from industry experts, text & article readings, class discussions, and case studies using real life examples. Cross listed with REAL 3010. Prerequisite: REAL 4007.

REAL 4110 Advanced Issues in Real Estate & Construction Management (4 Credits)
This course concentrates on five advanced real estate and construction management topics; the design build environment, negotiation skills in real estate and construction management, real estate capital markets, the entitlement process -- urban planning, zoning, PUDs and underutilized tax advantages in real estate. Cross listed with REAL 3110. Prerequisite: REAL 4407.

REAL 4140 Global Perspectives in Real Estate (4 Credits)
This course focuses on inbound U.S. and outbound U.S. real estate transactions and the cultural issues that impact these transactions. This can also be taken as a Burns Global Delegation travel course. Cross listed with REAL 3140, XRCM 4140.

REAL 4210 Planning, Entitlements, and Public Finance (4 Credits)
Real estate development, place making, and community building require the combined efforts of the public, for-profit, and non-profit sectors. Participants in the real estate development process need to understand and appreciate the sometimes competing and sometimes collaborative interests of governments, agencies, and the private developer. This course is designed to familiarize students with the overall context of urban planning and land use. Students discover the variety of participants in the development process and also become familiar with the project entitlement process, zoning, and land use regulation. Students also examine public/private financing structures such as public-private-partnerships (P3s) and become familiar with detailed calculations relating to Tax Incremental Financing (TIF) and Metropolitan Districts.

REAL 4337 RE Securities/Syn/Entrep (4 Credits)
Introduction to real estate securities; emphasis on private offerings; determining whether a contemplated transaction involves a security, and what happens if it does; exemptions from registration (Reg D); registration requirements; investor suitability, how to syndicate, acquisition of property, marketing or the property, tax structure and formation of syndication, compensation to syndicators, real estate tax considerations. Cross listed with REAL 3337, XRCM 4337.

REAL 4347 Mgmt of Income Properties (4 Credits)
Explore the complexities of managing apartments, condominiums, office buildings, industrial property and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting, and owner relations. Cross listed with REAL 3347.

REAL 4369 Real Estate Taxation (4 Credits)
Tax factors affecting investments and operations in real estate; special attention is given to legal forms of ownership, depreciation, tax basis, tax impacts of exchanges, syndications, real estate securities, and other federal tax laws affecting real estate. Cross listed with REAL 3369.

REAL 4400 Real Estate Concepts (4 Credits)
Principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan financing, appraisal investment and tax benefits. Partially satisfies Colorado real estate broker licensing requirements. Cross listed with REAL 1777.

REAL 4407 Income Property Finance (4 Credits)
This course explores conventional and alternative financing, mortgage banking, law and markets, loan underwriting analysis and the impact of monetary and fiscal policies on the real estate and mortgage markets, with emphasis on decision making from the equity investors point of view. Specific topics include an overview and history of real estate finance, the taxation and legal aspects of real estate finance, compounding and discounting, functions of interest and real estate capital markets and securities. Specific areas of focus are residential property finance, income property finance, and construction and development financing. Cross listed with REAL 3307.

REAL 4417 Income Property Valuation and Appraisal (4 Credits)
Residential/Commercial appraising, including market cost and income approaches to value, gross rent multiplier analysis, neighborhood and site analysis, valuation of income properties including market cost and income approaches to value, capitalization theory and techniques, mortgage-equity analysis, and investment value concepts. Prerequisite: REAL 4407.

REAL 4467 Property Development and Feasibility (4 Credits)
Commercial real estate development analysis and feasibility includes economic base analysis, tenant demand analysis, development and construction cost analysis, lease-up analysis, financial feasibility, leasing and property management practices. Five major property types (office, industrial, retail, apartment and hotel) are covered. Prerequisite: REAL 4007.

REAL 4477 Income Property Investment (4 Credits)
Comprehensive analytical framework for real estate investment decision-making, equity investment decisions via discounted cash flow, and risk analysis models and strategic planning concepts, structuring parameters to maximize rates of return while controlling downside risks; emphasis on theory, concept building, and practical application to various types of investment properties. Cross listed with REAL 3377. Prerequisite: REAL 4007.
REAL 4500 Argus Financial Analysis (4 Credits)
This course concentrates on practical applications of the Argus (TM) Real Estate Financial Software through interactive examples and case studies. Participants will be exposed to the software’s capabilities, fundamentals, and unique nuances. Cross listed with REAL 4500, XRCM 4702. Prerequisite: REAL 4007.

REAL 4701 Topics in Real Estate (1-5 Credits)
REAL 4705 Risk Management in the Built Environment (4 Credits)
Decision making and risk analysis concepts in the context of real estate and the built environment. This includes, but is not limited to, liability issues as to persons and property, casualty and property damage questions, employee and employer insurance areas, auto insurance, professional liability insurance, directors’ and owners’ liability issues, medical insurance, life insurance, environmental risks, and much more in areas of exposure that one can face in the business world. The course further examines means to minimize such areas of exposure.

REAL 4800 NAIOP Challenge (4 Credits)
A unique non-traditional course, where the students will work on a complex real estate problem culminating in an internal competition and external competition which includes a written report and an oral presentation. Cross listed with CMGT 3800, CMGT 4800, REAL 3800.

REAL 4890 Internship (0-8 Credits)
REAL 4980 Adv Valuation/Report Writing (1-10 Credits)
Advanced cutting-edge techniques not yet institutionalized nor commonly practiced in the field. Includes writing skills workshops appropriate to specialized nature of appraisal reports, and composition of a complex field problem report to prepare student for writing “demonstration” report required for MAI professional designation. Prerequisite: REAL 4417.

REAL 4991 Independent Study (1-10 Credits)
REAL 4992 Directed Study (1-10 Credits)
REAL 4995 Independent Research (1-10 Credits)

School of Accountancy
Office: Daniels College of Business, Rooms 355-379
Mail Code: 2101 S. University Blvd., Suite 355, Denver, CO 80208
Phone: 303-871-2032
Web Site: http://daniels.du.edu/faculty-research/accountancy/

Master of Accountancy in Accounting
The Master of Accountancy (MAcc) program at the Daniels College of Business School of Accountancy provides rigorous training in both accounting fundamentals and the latest practices and technologies, preparing you for a rewarding career. The best indicator of the program’s strength is the success of our graduates: virtually all of our domestic MAcc graduates accept positions within three months of graduation.

Through demonstrated prerequisite knowledge, formal coursework, and elective internship opportunities, students will develop technical knowledge in accounting, a broad understanding of related disciplines, the critical thinking, communication and interpersonal skills to be effective business advisors, and the ethical grounding to act with integrity.

An undergraduate accounting or business major is not necessary and work experience is not a requirement for admission to the MAcc. Entering students must demonstrate competency in introductory and intermediate financial accounting, introductory managerial accounting, business statistics, and business finance. Students with an undergraduate degree in accounting meet the competency requirement by having earned a B- or better in these topics at an AACSB-accredited school. Students with an AACSB accredited accounting undergraduate degree who earned less than a B- or better in these topics courses and students with a non-AACSB accredited accounting undergraduate degree must demonstrate competency by passing the on-campus competency exams, or by completing the competency courses for the MAcc degree. In addition, to meet the competency requirement for the technical communications course, entering students with an AACSB accredited accounting undergraduate degree must have earned a B- or better and the course must be taught in English.

Our mission as a School of Accountancy in a great private university dedicated to the public good is to foster Enlightened Practice, Professional Achievement, Knowledge Creation and a Commitment to Community among its graduates, faculty and others engaged in the accounting profession and related disciplines.

- Enlightened Practice means ensuring that our graduates understand the theory and practice of accounting and its ramifications on society, the profession and organizations.
- Professional Achievement includes accomplishment at each level of one’s career and commitment to life-long learning, competence and integrity.
- Knowledge Creation means scholarship which improves our understanding of accounting, the practice of accounting and the process of educating future accountants.
- Commitment to Community is the process of giving of oneself both to the community that supports one’s efforts and achievements and to the community at large. Commitment to Community is a vital aspect of the accounting profession and is critical to the School’s ongoing success.
The Master of Accountancy (MAcc) is a comprehensive program of study with focus on in-depth accounting knowledge and skills. MAcc students hone their skills as professional business advisors and increase their breadth of understanding of related disciplines, including information technology, taxation, valuation, assurance, and the social and ethical responsibilities for professional accountants.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Master of Accountancy in Accounting**

- Application fee $100 non-refundable
- GMAT or GRE Scores required. To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.
  - GMAT will be waived if one of the following conditions are met:
    - Has obtained a bachelor degree in accounting (or business with a major in accounting) from an AACSB accredited university with a GPA of at least 3.25 overall and at least 3.0 in the undergraduate accounting coursework.
    - The student has a graduate degree from a regionally accredited school.
    - Has passed four parts of the CPA exam.
- Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
- Submit a resume that focuses on your unique strengths and accomplishments.
- Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
- Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
- Admissions Interview: Applicants are contacted by a Daniels representative to schedule the admissions interview, which will be conducted in person, by phone, or via web cam.
- Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

**Master of Accountancy in Accounting with a Concentration in Taxation**

- Application fee $100 non-refundable
- GMAT or GRE Scores required. To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.

Courses

ACTG 4155 Accounting Information Technology Systems and Business Environment (4 Credits)
This course will introduce you to the study of Accounting Information Systems (AIS) that utilize a Database Management System (DBMS) specifically Microsoft Access (MSA). You will gain a basic understanding of how to develop a beginning-to-intermediate AIS data and processes using system flow charts (SEC), entity relationship diagrams (ERDs) and data flow diagrams (DFDs) utilizing MS Visio software. Cross-listed with ITEC 3155, ITEC 4155.

ACTG 4176 DB Sys Devlpmnt, Audit & Ctrl (4 Credits)

ACTG 4220 Financial Actg & Analysis (4 Credits)
Cross-listed with ACTG 3230.

ACTG 4222 Understanding Financial Stmts (4 Credits)
At the conclusion of this course the student should understand: 1) management decisions that impact published financial statements, 2) fundamentals of interpretation and analysis of financial statements, 3) economic and ethical issues relating to financial reporting, and 4) management attempts to enhance reported operating results. Cross listed with ACTG 3220.

ACTG 4240 Topics & Cases-Financial Actg (4 Credits)

ACTG 4281 Intermediate Financial Actg I (4 Credits)
Introduces key accounting concepts such as revenue recognition, matching principle, and accounting cycle. How to account for various transactions and learn role and purpose of balance sheet, income statement, and statement of cash flows. How various transactions affect these statements and how statements interrelate. Cross-listed with 3281. Prerequisite: MBA 4110, MBA 4111, or MS finance degree student.
ACTG 4282 Intermediate Financial Actg II (4 Credits)
Enhances understanding of financial statements and develops insight into treatment of such advanced financial accounting topics as consolidated financial statements, accounting for leases, currency translation, and options and futures impacts. GAAP (Generally Accepted Accounting Principles) to restate financial statements for differences between companies. Emphasis on impact of financial transactions and how to better evaluate firms' performances. Reflects a user's perspective rather than a preparer's perspective. Not open to MAcc students. Cross listed with ACTG 3068. Prerequisite: ACTG 4281. Cross-listed with ACTG 3068.

ACTG 4284 Consolidated Financial Statmnt (2 Credits)
This course covers consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements. Cross-listed with ACTG 3284. Prerequisite: ACTG 4282, ACTG 3282 or ACTG 3068.

ACTG 4285 Actg. for Foreign Operations (2 Credits)
Topics covered in this course include the financial statement impact of doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities. Prerequisite: ACTG 4282, ACTG 3282 or ACTG 3068.

ACTG 4340 Topics & Cases-Managerial Actg (4 Credits)
Research and presentation (oral and written) of cases in managerial accounting involving internal reporting, internal uses of financial data, and effects on and considerations of interpersonal and interorganizational relationships. Cross-listed with ACTG 3284. Prerequisite: ACTG 4354 or permission of instructor.

ACTG 4354 Cost Accounting (4 Credits)
Accounting information in manufacturing enterprises, standard costs, and budgets. Open to students not having ACTG 3354 or equivalent. Prerequisite: MBA 4110, MBA 4111, or equivalent.

ACTG 4400 Tax Aspects of Busi Decision (4 Credits)
Prerequisite: ACTG 4610.

ACTG 4410 Federal Income Taxation (4 Credits)
Cross-listed with ACTG 3461.

ACTG 4462 Corp Partnership & Taxation (4 Credits)
Cross-listed with ACTG 3462.

ACTG 4520 Forensic Accounting & Auditing (4 Credits)
Opportunity to learn, study, and discuss practical aspects of accounting as it is used to detect and prosecute fraud. Students will be exposed to and shown how to deal with improprieties, common fraud schemes, illegalities, and harassments. Prerequisite: ACTG 3551.

ACTG 4551 Auditing (4 Credits)
This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports. Cross listed with ACTG 3551.

ACTG 4552 Advanced Auditing (4 Credits)
This course is designed to build on the foundation of auditing knowledge developed in ACTG 4551 and apply that knowledge to specific accounts and assertions in a financial statement audit. Students also examine selected SEC enforcement actions and discuss what audit procedures may have been beneficial to prevent the misstatement. Prerequisite: ACTG 4551 or ACTG 3551.

ACTG 4557 Fair Value Auditing (4 Credits)
The purpose of this course is to expose students to the accounting, economic and valuation concepts and challenges that are relevant to auditing fair value measurements and disclosures in financial statements. The role of the FASB, PCAOB, SEC and other standards setters on fair value accounting and measurements are explored. Prerequisite: ACTG 4551 or ACTG 3551.

ACTG 4575 AIS Risk, Control and Audit (4 Credits)
This course covers the topics of risk, associated internal controls and IT audit of accounting information systems. The course outcomes are the skills to analyze and document AIS, perform a risk assessment, evaluate and document current IC and articulate the best practice in internal control frameworks such as COSO, COSO ERM, Cobi 4.1, etc. Student also recommend revised/new IC based on the frameworks, understand CPA risk-based audit standards SAS 104-109 and demonstrate knowledge and skills concerning IT audit techniques known as Computer Assisted Audit Techniques (CAATs) requiring general audit software such as IDEA. Prerequisite: ACTG 4155 or ITEC 3155.

ACTG 4607 Not-For-Profit & Gov Actg (4 Credits)
Accounting methods for governmental bodies and public and private not-for-profit institutions. Cross listed with ACTG 3607. Prerequisite: ACTG 3038, ACTG 3281 or ACTG 4281.
ACTG 4610 Financial Accounting and Reporting (4 Credits)
The purpose of this course is to provide you with an understanding of financial statements issued by companies to external parties, such as shareholders, creditors, and government agencies such as the Securities and Exchange Commission (SEC). To achieve this purpose, the course will: 1) introduce students to the most important issues relating to the assets, liabilities, and stockholders' equity accounts reported on the balance and income statement reporting issues; 2) provide students with sufficient understanding of the reporting mechanics to locate and interpret relevant information in the financial statements; 3) assist students in developing skills that can be used in analyzing financial information provided by companies; and 4) examine major transaction categories and accounting policies of business firms and their financial statement implications. Upon completion of the course, students should be able to appreciate both the usefulness and the limitations of accounting information. The perspective of the course is at all times that of the USER, rather than a PREPARERE, of financial statements.

ACTG 4620 Accounting Ethics (4 Credits)
This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed. Cross-listed with BUS 4620. Prerequisite: BUS 4610.

ACTG 4660 Strategic Cost Management (4 Credits)
Strategic cost management methods and practices focus on how to help the firm succeed in contemporary business. Topics in the course include balanced scorecard, cost-volume-profit analysis, target costing, standard costing, and management control. The course will enable students to apply strategic thinking to management planning, decision-making, and management reporting. Prerequisite: ACTG 4610.

ACTG 4700 Graduate Seminar in Accounting (1-17 Credits)
ACTG 4701 Special Topics in Accounting (1-5 Credits)
ACTG 4702 Special Topics in Accounting (1-5 Credits)
ACTG 4703 Special Topics in Accounting (1-5 Credits)
ACTG 4704 Special Topics in Accounting (1-5 Credits)
ACTG 4705 Topics in Accounting (1-4 Credits)
ACTG 4710 Managing the Family Business (4 Credits)
Explores the business, personal, and interpersonal issues of family-owned and managed businesses. Strengths and weaknesses of family businesses and behavioral issues special to these issues; analytical skills pertinent to these issues; ability to manage effectively and cope interpersonally within these complex and offer emotionally charged situations; understand family patterns and dynamics and their relationship to family-owned businesses; consider impact that a family business may have on a student's career.

ACTG 4740 Valuation and Modeling (4 Credits)
The ultimate purpose of the course is to improve professional decision-making skills. Professional decisions are made using a combination of judgment and analysis. Even skilled professionals (in any field) will make incorrect decisions when working with incorrect or insufficient information. Thus, one key to improving decision-making is improving analytical insights and skills. This course emphasizes the definition, construction, uses and limitations of popular financial models and instruments. Further, the class focuses on how the instruments are used, why they are used and how decisions to use such instruments and tools/techniques to value them are made.

ACTG 4750 Valuing a Business (4 Credits)
This course explores all major aspects of business valuation. Students not only study valuation theory, they appraise an actual business and draft a valuation report in compliance with the American Institute of Certified Public Accountants Statement on Standards for Valuation Services (SSVS) and Reporting Standards of the National Association of Certified Valuation Analysts (NACVA). Prerequisite: ACTG 3068 or ACTG 4282.

ACTG 4760 CEOs & Corporate Governance (4 Credits)
This course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Cross-listed with LGST 4760. Prerequisite: BUS 4620. MSAcc students only.

ACTG 4795 Graduate Research Sem-Actg (1-17 Credits)
ACTG 4880 Internship - Graduate (0-4 Credits)
Hours and times arranged by student.

ACTG 4991 Independent Study (1-10 Credits)
Hours and times arranged by student.

ACTG 4992 Directed Study (1-10 Credits)
Master of Science in Business Analytics

A 12-36-month, full or part-time, 58-credit program with three components: Business Analytics Core (38 credits), the Daniels Compass (8 credits) and Electives (12 credits). Ethics and values-based leadership are integrated throughout the curriculum.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

Master of Science in Business Analytics

- Application fee $100 non-refundable
- GMAT or GRE Scores required. Applicants who wish to be considered for merit-based scholarships or graduate assistantships must take the GMAT.
  To have your GMAT or GRE scores reported to Daniels, please use the following codes: GMAT code MZR-GT-43 and the GRE code is 4842.
- Official Transcripts: Submit one official transcript from each higher educational institution you attended in officially sealed envelopes.
- Submit a resume that focuses on your unique strengths and accomplishments.
- Two letters of recommendation are required from individuals (non-relatives) who can evaluate your academic and/or work performance as well as your potential for success in graduate school.
- Two required and one optional essay. Essays are assessed for clarity, organization, conciseness and grammar. Through the essays, you can communicate what you hope to achieve at Daniels and how you will contribute to the Daniels community.
- Admissions Interview: Applicants are contacted by a Daniels representative to schedule the admissions interview, which will be conducted in person, by phone, or via web cam.
- Tuition Deposit: If accepted into the program, a $500 deposit is due to reserve your seat. This deposit is non-refundable and is credited toward your first tuition payment.

Total Credits 58

Courses

INFO 4100 Business Intelligence, Data Warehousing, Corporate Decision Making and Leadership (4 Credits)
This course provides an overview of business intelligence: how data are generated, collected, actively warehoused and analyzed to support decision making. It addresses how to combine data with corporate processes and culture to gain new insights to empower corporate strategy and improve daily operations.

INFO 4140 Business Databases (4 Credits)
This is an introductory database course which covers enterprise database design, modeling and implementation.

INFO 4200 Business Intelligence Capstone Planning (2 Credits)
This course provides the foundation for the capstone course. Students begin the planning phase for their culminating project, identifying a business need and company with which to partner. Students then outline the problem, determine objectives and project deliverables, create a document of understanding, and produce a work plan. Prerequisite: STAT 4610.
INFO 4240 Data Warehousing (4 Credits)
This course addresses how to extract and time stamp data from many different business databases, transform it into a common compatible format, and load it into the data warehouse. The course includes using the data warehouse for real time queries as well as generating longer period reports for strategy considerations. Data marts and data mining are also included as part of this course. Prerequisites: INFO 4100 and INFO 4140.

INFO 4280 Project Management (4 Credits)
In this course students examine the science, practice the art, and discuss the folklore or project management to enable them to contribute to and manage projects as well as to judge when to apply this discipline. The course also covers the use of MS Project Professional as a management tool and Crystal Ball as a Monte Carlo simulator for project exercises. Students also learn the fundamentals of process and project simulation for business decision-making. Prerequisite: INFO 4100.

INFO 4300 Predictive Analytics (4 Credits)
This course is designed to prepare students for managerial data analysis and data mining, predictive modeling, model assessment and implementation using large data sets. The course addresses the how, when, why and where of data mining. The emphasis is on understanding the application of a wide range of modern techniques to specific decision-making situations, rather than on mastering the theoretical underpinnings of the techniques. The course covers methods that are aimed at prediction, forecasting, classification, clustering and association. Students gain hands-on experience in using computer software to mine business data sets. Prerequisite: STAT 4610.

INFO 4340 Data Mining and Visualization (4 Credits)
In this course, students create business intelligence tools such as balanced scorecards, data visualization and dashboards to inform business decisions. The course focuses on the identification of metrics, measures, indicators and key performance indicators for a variety of business operations. The focus is on the advantages and disadvantages of various modeling methodologies and implementations moving towards performance improvement. Prerequisite: STAT 4610.

INFO 4380 Decision Processes (4 Credits)
This course addresses the process of decision making in the enterprise: who makes what decisions based on what information and for what purpose. Business Intelligence is premised on the HP motto: "in God we trust. All others bring data." But what is the cost of collecting and analyzing the data and presenting the results, and what decisions justify that cost? Is the transformation from data to decision always rational, and what are the common pitfalls for human decision makers? We examine the results of recent experiments from behavior economics and their relevance to making business decisions. Prerequisite: INFO 4100.

INFO 4400 Business Analytics Capstone (4 Credits)
This course gives students an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from model construction and data collection through an analysis and presentation of results to recommendations for specific business decisions. Prerequisite: INFO 4200.

INFO 4520 Health Informatics (4 Credits)
Annual health care spending in the United States exceeds 16% of GDP ($2 Trillion) and is expected to continue to increase. The effective use of information technology is perceived as an important tool in increasing the access to and quality of health care delivery in a cost effective manner. This course examines the role of health informatics in the health care deliver and management process. The objectives of this course are to familiarize students with the critical issues and challenges faced by those in the health care environment, what technologies are or will soon be available to potentially address these issues and challenges, potential barriers professionals employed in the health care field may face deploying and managing these technologies, and possible strategies to assist these professionals in addressing and overcoming these barriers. This course focuses on four major areas related to health informatics: the role of electronic health records, clinical decision support systems, analytics, and other e-health initiatives such as mobile technologies and telehealth.

INFO 4700 Topics in Business Analytics (4 Credits)
Exploration of current trends and topics in business analytics. Prerequisite: INFO 4100.

INFO 4991 Independent Study (0-10 Credits)
INFO 4992 Directed Study (1-4 Credits)

Graduate School of Professional Psychology

The Graduate School of Professional Psychology offers four degrees, including the Doctor of Psychology (PsyD), that all aim to prepare graduate students for professional, and especially clinical, practice. Focusing on applied professional work from a practitioner-scholar perspective, the Graduate School of Professional Psychology also offers master's-level programs in Sports and Performance Psychology, International Disaster Psychology, and Forensic Psychology. Our goals are to train professionals in understanding human behavior through the integration of theory, research, and practice and to improve the human condition through competent and ethical service.

Professional Psychology

Office: Ammi Hyde Building
Mail Code: 2450 S. Vine Street, Denver, CO 80208
Phone: 303-871-3736
Email: gsppinfo@du.edu
Master of Arts in Forensic Psychology

The Master of Arts in forensic psychology was first offered at the GSPP in 1999 in response to the growing interest in the rapidly developing field of forensic psychology. The degree supplements fundamental master's level clinical psychology training with course work and practicum experiences in the area of psychology and law. The Master's Degree in forensic psychology concerns the application of psychological theory, knowledge, skills and competencies to the civil and criminal justice systems. It is designed to train students to become mental health professionals, able to work in a variety of clinical settings within the criminal and civil legal system, including but not limited to: adult, juvenile and child populations; victim assistance; police consultation; correctional institutions; domestic violence and child abuse programs; and trial consulting. The MAFP Program is unique in many respects. Our curriculum, consisting of 90 credits, is forensically and clinically based, with an emphasis on applied practice. Students complete two year-long field placements, allowing for the exploration of different forensic interests and providing them with a solid clinical foundation. Students benefit from the expertise of core and adjunct faculty who are active practitioners and scholars in the field.

Master of Arts in International Disaster Psychology

The University of Denver, Graduate School of Professional Psychology is proud to offer our Master’s Program in International Disaster Psychology. This degree is designed for those who wish to provide effective mental health and psychosocial services to individuals and communities in the US and globally who are affected by traumatic events, acute and chronic civil conflict, natural disasters, and health-related pandemics. Our program is recognized for ‘Innovative Graduate Training’ by both the American Psychological Association & the National Council of Schools in Professional Psychology, and is the first master’s program of its kind in the nation.

Through academic coursework and practical experiences students develop a solid foundation for knowledge and skills in the mental health field and unique and specific approaches in the field of international disaster psychology. Students receive essential opportunities to integrate knowledge with practice in contextually relevant and culturally competent ways. Internship experiences domestically and abroad, disaster simulation exercises, and classroom case studies support an integrated training experience helping students bring a “best practice” model to their work in a variety of psychosocial and mental health contexts internationally and in the U.S.

Instruction is provided in diverse areas including international disaster psychology, trauma intervention, disaster mental health, gender-based violence, crisis intervention, group dynamics, loss and grief, the effects of trauma on life-span development, psychotherapeutic models, program evaluation and research, global health, and cross-cultural foundations. Faculty expertise addresses the full span of mental health and psychosocial work that is necessary for effective work in this innovative field.

Our graduates work in a variety of professional settings providing direct services to populations affected by trauma, training and consulting with community, non-governmental and government agencies to promote psychosocial wellness of affected populations, developing emergency preparedness and response plans, and monitoring and evaluating psychosocial interventions. With comprehensive and specialized training in this emerging field of international disaster psychology, our students are prepared to make a difference in the world.

Master of Arts in Sport & Performance Psychology

The University of Denver Graduate School of Professional Psychology (GSPP), with its history of pioneering innovative training in psychology is excited to offer a new Master of Arts degree in Sport and Performance Psychology. This degree is intended for individuals in the sport, performing arts, health and fitness, or mental health fields who want to develop their ability to improve the performance and lives of those with whom they work. Those applicants involved in coaching and teaching in sport and performance settings are encouraged to add to their skills and abilities through this training. Denver's passion for sports and a thriving performing arts scene make it a perfect place to master the practice of sport and performance psychology. Students in the MASPP program are encouraged to continue their training by applying to the PsyD program.

The field of sport and performance psychology is concerned with the psychological factors that influence human performance. Simply put, sport and performance psychology is about improving the lives of others. It involves assessment and intervention strategies that enhance an individual’s performance and personal growth.

GSPP’s program is unique and pioneering in many respects. There are four areas in which this program truly stands out from other educational opportunities in the field of sport and performance psychology: our applied focus, the curriculum, practicum opportunities, and the faculty. The program provides the necessary training for an individual to become a competent, proficient sport and performance psychologist with the completion of a psychology doctoral program. The MASPP will help those who coach and work with others do their job more effectively and experience more rewarding outcomes.

Doctor of Psychology in Professional Psychology

The PsyD program of the University of Denver is housed in the Graduate School of Professional Psychology (GSPP). GSPP’s mission is to provide an innovative educational environment that promotes the application of psychological theory, knowledge, skills, and attitudes/values to professional practice. The mission of the PsyD program is to train competent doctoral level practitioner/scholars who have foundational interpersonal and scientific skills, and have a functional mastery of psychological assessment and intervention, and can apply this knowledge and skill in a wide range of settings, with a variety of populations.
Program Accreditation
The PsyD program has been continuously accredited by the American Psychological Association since 1979, and has a strong foundation in the practitioner/scholar model of training (also known as the Vail model).

Master of Arts in Forensic Psychology

- **GRE Requirements**: The GRE general exam is required for all applicants; the GRE psychology subject test is optional.
  - To schedule your test date, call 1-800-GRE-CALL, or visit the GRE website (http://www.ets.org). The University requires that the GRE General exam has been taken within the last five years. The GRE psychology subject test is optional.
  - Please have your official scores sent to the University of Denver, school code 4842.
  - Applicants should take the General GRE no later than the December testing date of the academic year before potential enrollment in GSPP.
  - GSPP does not have GRE cutoff scores; we evaluate the GRE along with the rest of the application.

- **TOEFL or IELTS Score Requirement**: (Required of all graduate applicants whose native language is not English, regardless of citizenship status): 550 pBT; 80 iBT; or 6.0 IELTS

- **Essay Responses**: Please respond to these questions (http://www.du.edu/gspp/programs/ma-forensic/mafp-essay.html) and upload your responses when requested in the online application (https://du-grad.edu.185r.net/application/login). A personal statement will not be accepted in lieu of these essay questions.

- **Letters of Recommendation**: For all programs, two letters of recommendation are required, (three are STRONGLY recommended). It is helpful, not required, to have 1 letter of recommendation which speaks to your academic abilities. You will submit your referees names and email addresses on the electronic application (https://du-grad.edu.185r.net/application/login). Please be sure your referee email addresses are correct as the University of Denver will be contacting your referees directly for their reference letters. Delays in reaching your referees may result in delays processing and reviewing your application.

- **Official Sealed Transcripts**: one official copy is required from all institutions where more than two credits were completed
- **NOTE**: Do NOT wait for grades/degrees to be posted on your transcript. If you are offered admission you will provide final transcripts at that time.

- **Prerequisite Classes**: This requirement is for applicants who do NOT have a BA with a psychology major or minor.
  - abnormal psychology,
  - child psychology,
  - experimental psychology (requires that the student complete the content portion of an experimental psychology class [e.g., learning, perception, cognition, motivation, physiology, which also requires the student to perform one or more direct experiments using the scientific method applied to some empirical question. This second requirement is often met by taking an experimental lab associated with the course),
  - personality theory,
  - statistics.
  - For applicants WITHOUT a psychology background, you are required to complete four (4) psychology courses, earning a ‘B’ or better in these classes. We recommend the following courses to give you a foundation in psychology:

These recommended classes can be completed by course work or by obtaining a score of at least 660 on the Psychology Subject Graduate Record Examination (GRE). Applicants offered admission should be aware that all psychology classes must be completed before registration in September.

Please indicate your plan to meet the prerequisite in your application.

- **GPA and Testing Requirements**: The school expects an undergraduate grade point average (GPA) of at least 3.5 and a graduate GPA of 3.0. Higher scores may make an application more competitive. GSPP reviews each application in its entirety to determine all assets an applicant brings to the program. Please be sure to highlight your strengths if your GRE scores/GPA are somewhat lower than our baseline scores.

- **Paid or Volunteer Clinical Experience**: Having paid or volunteer experience providing services to clients having emotional, behavioral, or developmental disorders is an asset. Please detail your experience in your resume/curriculum vita.

In reviewing applications, we are concerned with the quality of the whole application, evidence of academic ability, quality of work done in the human service role, how referees view the applicants potential to become a professional psychologist, and how the applicant presents him or herself in answering questions on the Supplemental Application. Our aim is to enroll people who have an appreciation of psychology as a scientifically based discipline and sufficient emotional and social maturity to function effectively in applied professional work. Even though we do not require an undergraduate major in psychology, we expect applicants to have knowledge of and curiosity about psychological theory and issues.

Master of Arts in International Disaster Psychology

- **GRE Requirements**: The GRE general exam is required for all applicants; the GRE psychology subject test is optional.
  - To schedule your test date, call 1-800-GRE-CALL, or visit the GRE website (http://www.ets.org). The University requires that the GRE General exam has been taken within the last five years.
  - Please have your official GRE scores sent to the University of Denver, school code 4842.

**Master of Arts in Forensic Psychology**

Program requirements are designed to be completed in six academic quarters over two years. The University of Denver is on a quarter system, and students complete the program as a cohort, attending fall, winter, and spring quarters of both years. All students are required to successfully complete all courses, consisting of 90 quarter hours of coursework.

CPSY 4250  Practicum VI  3

Minimum Number of Credits Required  90

Additional elective if wishing to pursue licensure in Colorado:
CPSY 4430  Career Counseling  3

Non-coursework Requirements

• Field Placements-We require that students engage in direct service through their field placements, working with diverse populations and in diverse settings. As an adjunct to their field placements, students are enrolled in case consultation/peer supervision courses that provide added support and foster development as professionals and practitioners.

• Clinical Competency Exam-Students will be required to pass a clinical competency exam in the spring of their second year. The oral exam is clinical in nature, and evaluates students on their mastery of the theoretical and conceptual underpinnings of forensic practice, as captured through our foundational competencies, and their ability to convey the technical and applied aspects of forensic practice, as reflected by our functional competencies.

• Personal Therapy-The Master’s in Forensic Psychology program requires personal therapy for all students. Faculty believe that personal therapy is a vital component of clinical psychology training and growth, and that it is the professional responsibility of every clinician to identify, address, and work through personal issues that may have an impact on clinical interactions with clients. Students are required to complete a minimum of 10 sessions (45-50 minutes in length) with the same therapist by the end of their first year of the program. It is required that therapy be provided by a licensed psychologist, professional counselor, social worker, or other mental health worker under the supervision of a licensed professional. If you select a therapist not in this category, you must petition the Director of Forensic Studies for approval. Students will not be advanced to preliminary candidacy until the therapy requirement is met. Students must submit a therapy plan by November 1st of fall quarter. Students must complete this requirement by the summer of their first year. The student must petition the Director for an exception, if therapy is not completed in this time frame.

Master of Arts in International Disaster Psychology

Degree Requirements

Coursework Requirements

Program requirements are designed to be completed in seven academic quarters over two years. The University of Denver is on a quarter system, and students must attend fall, winter, spring, and summer quarters of their first year and fall, winter, and spring quarters of their second year. All students are required to successfully complete all courses, consisting of 90 quarter hours of coursework.

Core requirements

CPSY 4500  International Disaster Psychology: Foundations  3
CPSY 4515  Ethics  3
CPSY 4503  Clinical Interviewing  3
CPSY 4501  Psychotherapeutic Models of Intervention  3
CPSY 4550  Seminar: Therapeutic Interventions (3 hours each)  3
CPSY 4509  Global Mental Health Systems  3
CPSY 4020  Psychopathology and Diagnosis  3
CPSY 4556  International Perspective of Trauma Intervention  3
CPSY 4545  Lifespan Development and the Cultural Context  3
CPSY 4510  Preparation for International Internships: Intercultural Competence  3
CPSY 4505  Cross Cultural Analysis  3
CPSY 4380  Group Interventions  3
CPSY 4530  Program Evaluation  3
CPSY 4595  International Disaster Psychology Internship  6
CPSY 4590  Psychology of Loss and Grief  3
Non-coursework Requirements

- Community Based Field-Placement-During fall, winter, and spring terms of both their first and second years, students are required to complete community field placements and supervision in the Denver area. A variety of field-placement sites are available, including local non-governmental and state agencies providing direct mental health care, case management, policy and grant writing, disaster planning and preparedness, and disaster relief services. Agencies serve diverse populations and age-groups, including refugee and low-SES individuals, many of whom have been affected by trauma and disaster. Students spend a minimum of ten hours a week at their placement.

- Trauma and Disaster Recovery Clinic (TDRC) - During the Fall, Winter and Spring terms of their first and second years, students are required to carry a client (individual, couple, family or group) in the TDRC. This clinical work is supervised in the small-group supervision seminar. Either in the first or second year of the program, students may request to participate in the small-group program evaluation seminar to fulfill this requirement.

- International Internship-During the summer between the first and second year of enrollment, students engage in an 8-week international internship, providing a rich opportunity to apply theory to practice in the global context. International internships are arranged by the program with non-governmental and governmental agencies whose missions focus on a variety of mental health and psychosocial issues relevant to the needs of individuals and communities affected by disaster and trauma. While the locations of our internships vary each summer, in recent years students have interned in Ghana, Liberia, Bosnia, Serbia, Croatia, Nepal, Egypt, Ethiopia, India, Panama and Belize.

Elective requirements

Minimum of 12 credits

Minimum Number of Credits Required 72
Minimum number of credits required for degree: 72 hours

Non-coursework Requirements

- Practicum-It is important to put theory into practice; therefore, the practicum experience is critical to the development of a competent sport and performance consultant. In addition to integrating theory into actual technique, the practicum affords students the opportunity to network within the field. GSPP is committed to practical training and there are many exciting opportunities and experiences available at the University of Denver (home of the two-time National Hockey Champions, and three-time National Ski Team Champions) as well as in the metro area. Sites include, but are not limited to: private high school academies, public high school athletic departments, club sports programs, collegiate athletic departments, the DU Lamont School of Music, private practice, coaching, local exercise and health related industries, Boys and Girls Clubs of Metro Denver, Vail Ski and Snowboard Academy, Craig Hospital. Other practical experiences in SPP are available as formal internships during the year and in the summer. Sites around the nation that current/former students have obtained internships at include: the US Olympic Training Center, Vail Ski & Snowboard Academy, Evert Tennis Academy, and IMG Academies.

- Master's project-The Master’s Project requirement is designed to serve as a capstone achievement demonstrating students comprehensive knowledge of SPP theories, concepts, applications, and professional and ethical guidelines. Most importantly, students will organize and present the breadth and depth of their knowledge in a personally meaningful way that is directly relatable to the working world. MASPP faculty will sponsor a number of projects each year that students may elect to join. These will be group projects with the evaluation criteria for an individual’s completion being a contribution worthy of authorship on a journal article (see APA publication manual for more details on the definition of authorship). The faculty sponsored group projects are intended to increase the scientific contribution (e.g., the possibility of multi-year studies, more collaboration) and thus the likelihood of publication.

  - If a student elects for an individual master’s project, the types of projects include:
    - professional practice report (e.g., case studies approached from a number of different perspectives with an analysis of the pros and cons associated with each approach including relevant research and associated findings);
    - professional practice creative project (e.g., a job portfolio including detailed examples of activities and interventions sufficient to demonstrate comprehensive knowledge of SPP; performance enhancement multi-media products);
    - data-based research paper including a detailed review of literature leading to new conclusions and collecting and analyzing original data;
    - review research paper including an extensive review of literature leading to new theoretical conclusions with accompanying implications for SPP research, professional practice, or both.

    - These are only examples of possible Master’s Projects, and each student who chooses to pursue an individual project is responsible for defining and developing his/her own proposed project. The student is then responsible for getting two (2) SPP faculty members to approve the proposal and serve as the Master’s Project Committee.

Minimum Number of Credits Required 135

Cognate requirements

1. The student must select and enroll in a minimum of 15 credit hours of elective course work in their specialty area, including courses taken at the GSPP or other DU department/schools (classes taken at the College of Law, Iliff School of Theology and University College do not count towards the 135 credits). Written approval from your advisor must be attained for appropriate coursework transferred from other academic departments and placed in the student’s file. Discuss classes taken in other departments with your advisor and have your advisor write a memo of approval for your file. Make sure the class is at the graduate level.

2. The 15 credit hours cannot include required/core courses but should include (a maximum of 8 credits of) professional seminar registration appropriate to the specialty area.

3. Independent study, which is relevant, may be included.

4. Complementary clinical work, including a year of field placement in an appropriate setting, is recommended.

5. It is also recommended that the student undertake a doctoral paper that will serve as a scholarly contribution to the area of specialization.

6. Students must take a seminar in their specialized area, if one is given. If a seminar is not offered in the specialized field, they will need to coordinate with their advisor to take a field placement to cover the clinical experience.

7. When checking out for internship, students should double check that courses were indeed completed. Students may need to update specialty focus tool form for their file.

Non-coursework Requirements

- Professional Psychology Center-All students become staff members of the Professional Psychology Center (PPC) and are expected to work with clients in the center each year prior to the internship year. The center is an integral part of the school and includes interview, play therapy, and group therapy rooms as well as necessary supplies and equipment. One-way-vision mirrors, audio taping, videotaping, and digital recording facilitate ongoing supervision of clinical work. Clients of diverse ethnic, racial, social, religious, and individual backgrounds and life styles are seen by students for assessment and intervention. Referrals come from private and public sources throughout the community.

- Community Field Placement-Each year prior to the internship year, students are also required to be in a Community Field Placement for a minimum of eight hours per week. In these placements, students are involved in supervised professional experiences in mental health centers, schools, college counseling centers, the justice system, hospitals, rehabilitation centers, private practices, residential treatment homes, and businesses in the Denver metropolitan area. There is a wide choice of placements, and available paid placements are often filled by second- and third-year students. Within the general field placement requirement, students are required to work a minimum of 40 contact hours with clients from at least one culturally diverse group, such as a racial/ethnic minority or people of a gay, lesbian, or bisexual orientation. Opportunities for such experience are available in a variety of the community field placement settings. The 40 contact hours are a total to be achieved during the time a student is enrolled in the program.

- Doctoral Paper-The doctoral paper requirement requires students to make an original contribution to psychological scholarship. Students may choose to do a qualitative or quantitative research project, or can choose other forms of scholarship, such as developing a case study or treatment protocol. Doctoral papers should be publication quality, and students are encouraged to submit their papers for publication. (Appendix H)

- The first draft of doctoral paper is due March 1st for students anticipating graduating in August. The chair may have a different (earlier) deadline, but March 1st is the absolute last day for a first draft. If you miss your deadline, call your family to reschedule the trip.

- Internship-GSPP requires an APA approved clinical internship which is either full time for 12 months, or equivalent. PsyD students participate in the national APPIC Match, and are given significant support in this process from the DCT, Jenny Cornish. The GSPP offers an exclusively affiliated
consortium that is APA accredited, and students may apply to sites outside the consortium, either locally or nationally. Students must pass the internship in order to receive the PsyD degree. (Appendix G)

Courses

**CPSY 4000 Issues in Forensic Psychology I (3 Credits)**
Overview of psychological theory, research and practice as used within the legal and criminal justice system; differences between forensic and clinical assessments and interventions; special topic areas (e.g. trauma, abuse, domestic violence, etc.); ethical issues.

**CPSY 4010 Introduction to Statistics (3 Credits)**
General statistical principles and techniques and their application to psychological and psycho-legal issues. Students will develop computer analytic skills to assist in answering professionally relevant questions.

**CPSY 4020 Psychopathology and Diagnosis (3 Credits)**
An overview of major DSM diagnostic categories, as well as an introduction to ICD and noncategorical classification.

**CPSY 4030 Clinical Interviewing and Theories of Psychotherapy (3 Credits)**
Theoretical and practical issues related to clinical interviewing within forensic and non-forensic settings; exploration of the process of psychotherapy from various theoretical perspectives.

**CPSY 4040 Issues in Forensic Psychology II (3 Credits)**
Further exploration of the relationship between the legal system and psychological theory in areas of criminal law (e.g. standards of legal competency, insanity defense, prediction of dangerousness), civil law (civil commitment, personal injury) and family law (e.g. child custody determinations, juvenile issues).

**CPSY 4050 Research Methods (3 Credits)**
Examination of the research process, including the formulation of questions and utilization of various methodologies to answer hypotheses.

**CPSY 4060 Psychology of Criminal Behavior (3 Credits)**
Psychological origins and dynamics of criminal behavior from the viewpoint of major psychological theories; treatment of the types of offender populations (e.g. the antisocial personality, psychopath, adolescent offender, female offender) within the criminal justice system.

**CPSY 4070 Trauma & Crisis Intervention (3 Credits)**
Theory, techniques and research related to various types of trauma (e.g. childhood abuse, combat veterans, natural disaster survivors); crisis intervention techniques as a system of managing trauma related difficulties.

**CPSY 4080 Issues in Forensic Psychology III (3 Credits)**
Relationship and application of psychological principles and practice to varied law enforcement and correctional functions; assessment of violence in the workplace, trauma debriefing; hostage negotiation. Students will become prepared to assume the role of an expert witness in a variety of psycho-legal settings.

**CPSY 4090 Issues in Measurement (3 Credits)**
Critical assessment of various psychological tests, with an emphasis on validity, reliability and issues of standardization.

**CPSY 4100 Mental Health Law (3 Credits)**
The goal of this introductory Mental Health Law course is to provide students with a general understanding of the laws impacting the field of mental health, including those involving professional responsibility and ethics; competency issues; court-ordered evaluations and testimony; family law issues; the rights of differently-abled and historically marginalized persons; and defenses based on mental state. Course objectives include assisting students in locating, understanding, and interpreting laws relevant to the mental health practitioner; recognizing potential legal and ethical dilemmas faced in forensic practice; and applying the principles of mental health law to offer the highest standard of care in their clinical practices.

**CPSY 4110 Conflict Resolution (3 Credits)**
This course investigates five ways of resolving conflict relevant to forensic psychology: violence, science and critical thinking, litigation, consultation or therapy, and negotiation. A focus on gender and status helps students understand how identity goals can interfere with reaching content goals.

**CPSY 4120 Psychology of Performing Arts (3 Credits)**
Students gain an understanding of the psychological factors involved in the performing arts, including theatre, acting, dancing, music, and circus arts. Students learn about appropriate psychological interventions for these populations to enhance performance. The course format includes lecture, discussion, guest speakers, case studies, and role plays.

**CPSY 4130 Organizational Leadership: Center for Performance Excellence (3 Credits)**
This course is designed to familiarize CPEX Officers with approaches to effective leadership while engaging in leadership roles within the Center for Performance Excellence (CPEX). Students are exposed to successful leadership strategies from the business world and have the opportunity to implement these strategies into their roles as leaders within CPEX. This course is intended for CPEX Officers only.

**CPSY 4140 Exercise Psychology (3 Credits)**
In this course, students explore the theory, research, and practice related to psychological aspects of exercise behavior. Students explore research and intervention models in exercise psychology and be able to integrate this knowledge in their practice. Major topics include health behavior change, the impact of exercise on mental health, and exercise motivation and adherence.
CPSY 4160 Psychology of High Risk Occupations (3 Credits)
In this course, students gain an understanding of the psychological factors involved in high risk occupations. High risk occupations include individuals whose profession directly involves saving lives or placing their own life at risk. Students learn about appropriate psychological interventions for these populations to enhance performance and resilience in the high stress situations required by their jobs. The course format includes lecture, discussion, guest speakers, case studies, and role plays.

CPSY 4200 Practicum I (3 Credits)
CPSY 4210 Practicum II (1-6 Credits)
CPSY 4220 Practicum III (3 Credits)
CPSY 4230 Practicum IV: Theories of Personality (3 Credits)
CPSY 4240 Practicum V (1-6 Credits)
CPSY 4250 Practicum VI (3 Credits)
CPSY 4260 Psychophysiology and Biofeedback Lab (2 Credits)
This course is designed to be both an introduction to psychophysiology and biofeedback and to its applications, particularly to sport and performance. The principles of psychophysiology, the biofeedback instruments used, the areas of application, the techniques commonly used in conjunction with biofeedback, the diverse field of biofeedback and applied psychophysiology, and the latest uses for optimal self-regulation are covered. The course involves use of biofeedback instrumentation as well as classroom participation and readings and a self-regulation project.

CPSY 4300 Eval and Treat Juv Offender (3 Credits)
Theories of juvenile delinquency and studies concerned with the etiology, development and prediction of such; review of the various psychological treatment options utilization with juvenile offenders; consideration of the legal responses to juvenile crime and the role of the psychologist within the juvenile justice system.

CPSY 4310 Ethical Iss in Forensic Psyc (3 Credits)
Discussion of ethical and legal conflicts and dilemmas as a psychologist within the legal system, and consideration of ways to resolve such conflicts, including standards applicable to the science and practice of forensic psychology and the role of the expert witness.

CPSY 4320 Cognitive Assessment (3 Credits)
Students learn to administer, score, and interpret the WAIS. There is some exposure to other intelligence tests as well. Students understand diagnostic validity (Bayes’ Theorem), how to identify interpretive material, and how to think ideographically about nomothetic data. Through discussions of legal cases, students learn numerous forensic issues to which cognitive assessment is applicable, including for example testamentary capacity, competence to waive Miranda rights, and ability to enter a contract.

CPSY 4330 Cog Behavioral Interventions (3 Credits)
Theory, techniques and research relating to cognitive-behavioral therapy, focusing on assessment, case conceptualization and intervention approaches within a forensic setting.

CPSY 4340 Psychopathology, Evaluation & Treatment of the Adult Offender (3 Credits)
Psychological theories related to etiology, development and prediction of violent crime; types of intervention possible within in the criminal justice setting, Topic areas may include special offender populations (e.g. sexual offender, offenders with developmental disabilities or those classified as mentally retarded).

CPSY 4350 Sociocultural Issues in Forensic Psychology (3 Credits)
Impact of cultural issues and social change an assessment, diagnosis and treatment of various psychological disorders, emphasizing the explicit linkage between socio-cultural change and the legal system.

CPSY 4360 Personality Assessment: Self Report (3 Credits)
Administration and interpretation of objective personality instruments and discussion of their utilization within a forensic setting; use of the MMPI-2 and MCMI.

CPSY 4370 Substance Abuse (3 Credits)
Substance use and abuse, with focus on symptom formation, classification, causes socio-cultural factors and treatment modalities; various theoretical approaches to the etiology and treatment of substance abuse; resultant psychological and physiological effects of various drugs.

CPSY 4380 Group Interventions (3 Credits)
Interpersonal dynamics of small groups and larger organizational settings; understanding of group processes (such as group formulations and development, group conflict, and group resistance); skills enabling positive group intervention.

CPSY 4400 Personality Assessment: Projective (3 Credits)
Students learn to administer and interpret the Thematic Apperception Test and Early Memories. These are construed as behavior samples under conditions where the occasioning environment is reproducible, so that the functional relationship between the behavior and the stimulus can be understood carefully. Students learn to write reports that integrate several sources of information to answer referral questions.

CPSY 4410 Criminal Evaluations (3 Credits)
Incidence and prevalence of criminal violence; risk assessment within the context of prediction, supervision and intervention in both a correctional and mental health setting. Special topics will include assessment of various legal competencies, the insanity of defense and assessment of dangerousness.
CPSY 4430 Career Counseling (3 Credits)
This course is designed to teach the theoretical framework of career counseling, and introduce the basic counseling tools used in the career counseling process. The course presents major theories of career development, introduce sources of occupational information, and introduce principles of assessment in career counseling. The impact of diversity and difference on career development and choices, as well as the career counseling process, is also explored. Topics include: the role of interests, skills, values and personality in the career development process; social, cultural and family influences on the career development process; and career development across the lifespan.

CPSY 4500 International Disaster Psychology: Foundations (3 Credits)
This is the first course in a three course sequence designed to provide the entering M.A. student with a fluent understanding of the area of International Disaster Psychology. The course will cover the evolution of IDP from its beginnings to its present status. It will review the different innovations in the area. Potential subject areas include the treatment of refugees, torture victims, child soldiers, internally displaced persons and complex Post Traumatic Stress Disorder.

CPSY 4501 Psychotherapeutic Models of Intervention (3 Credits)
Major psychological models of intervention are the focus of this course. The major theoretical models of personality development, psychopathology and theories of intervention are explored including psychodynamic, family systems, behaviorism, cognitive-behavioral approaches and others.

CPSY 4502 Psychotherapy with Children and Families (3 Credits)
This course provides an understanding of various psychotherapeutic approaches to children and families. The perspectives and techniques of play therapy, behavioral interventions, cognitive-behavioral therapy and integrative work with parents and families are explored.

CPSY 4503 Clinical Interviewing (3 Credits)
Theoretical and practical issues related to clinical interviewing in international and national disaster settings.

CPSY 4505 Cross Cultural Analysis (3 Credits)
The first course in a two part series designed to provide students with an understanding of cross cultural analysis. The course will provide an understanding of diverse cultures. Students will review historical literature in the area of cross cultural understanding. Students will also be taught methodologies for conceptualizing and understanding diverse cultures and cross cultural practices in psychology.

CPSY 4509 Global Mental Health Systems (3 Credits)
This course will focus on the dynamics of mental health systems in developing countries.

CPSY 4510 Preparation for International Internships: Intercultural Competence (3 Credits)
This is the second course in the three part introductory sequence. Students will continue to learn about the field of IDP and future trends for the field. The course will address specific subject areas within the field in order to provide students with the working knowledge needed to continue to pursue advanced training in the area. Potential subject areas will include treatment of refugees, torture victims and working in post conflict areas across the globe.

CPSY 4511 Humanitarian and International Refugee Law (3 Credits)
This course surveys the central rules, complexities and debates of international refugee law, which is both a specialized field of its own and also an intersection of human rights law, migration law, and humanitarian policy. We focus extensively on how courts and the United Nations have attempted to interpret the various refugee definitions found in human rights treaties, and introduce rules of international law governing how refugees should be treated. We also examine the obstacles refugees face today in enjoying their rights.

CPSY 4512 Disaster Mental Health (3 Credits)
This course will explore disaster response systems and their mental health components.

CPSY 4513 International Disaster Psychology Case Conference (2 Credits)
This class meets to discuss case theory, formulation and psychotherapy practice with persons affected by disaster and/or trauma.

CPSY 4515 Ethics (3 Credits)
The course is designed to educate students about the ethical guidelines in psychology applicable to the field of IDP. Students will learn the APA Ethics Code as well as other more specialized ethics guidelines applicable to the field of IDP. Students will be expected to identify, address and resolve potential ethical conflicts. Potential future trends in the development of ethics in the area of IDP will be addressed.

CPSY 4530 Program Evaluation (3 Credits)
Theory and techniques for developing management information and assessment systems for human service programs. Organization evaluation of international organizations will be discussed. Psychosocial interventions will be highlighted.

CPSY 4545 Lifespan Development and the Cultural Context (3 Credits)

CPSY 4550 Seminar: Therapeutic Interventions (3 Credits)
Small group seminar is a small group class designed to provide students a discussion forum to share and integrate their experiences in the IDP Master's Program. Students are expected to address and share their field placement experiences with other students in their seminar. The seminar will also provide instruction on the implementation of theory in IDP to practice in multiple settings. Faculty will provide supervision for the students’ field placements.

CPSY 4555 Trauma & Child Development (3 Credits)
The course reviews the literature regarding childhood trauma and its implications for child and adult development. Models for the conceptualization of trauma and for treatment of childhood trauma are discussed. Cross-cultural theories of childhood development and trauma are emphasized.
CPSY 4556 International Perspective of Trauma Intervention (3 Credits)
This course, taught by a different visiting professor each year, will take an in-depth look at trauma and the development of mental health systems and interventions internationally.

CPSY 4557 Interntl Public Health (3 Credits)
This course will provide an overview to the many issues concerning international public health today. Topics include basic epidemiology, malaria, tuberculosis, HIV/AIDS, diarrheal diseases, injury prevention, and environmental health. Specific attention will be given to examining the intersection between disease prevention and disaster mitigation.

CPSY 4558 Practical Apps Clinical Theory (1 Credit)
This course enables first year Master of Arts in International Disaster Psychology (MAIDP) students to explore the application of coursework in clinical psychology to practice in the field. Articles and case examples that apply ethics, developmental theory, psychotherapeutic models, cross cultural analysis and group interventions are discussed.

CPSY 4560 Humanitarian Law of Armed Conf (3,5 Credits)
This course is a theoretical and practical introduction to international humanitarian law (IHL). IHL is known by many other names such as "humanitarian law," "law of conflict," and "laws of war." All these terms refer to the rules regarding the treatment of civilians and non-combatants. These "rules" are especially important to know if you eventually work for an IO or NGO that finds itself in areas of armed conflict. Cross listed with INTS 4935.

CPSY 4565 Group Dynamics of Organizations (3 Credits)
A comprehensive review of the literature regarding the understanding of systems and organizational structure and dynamics. Methods of assessment and interventions in organizational structure will be presented. Cross-cultural implications will also be addressed.

CPSY 4566 From Triage to Justpeace (3 Credits)
This course examines the inter-disciplinary continuum of integrated work that responds initially to natural and human-made disaster, but then leads to coordinated relief and development projects, and eventually seeks longer-term justpeace. Students learn how normative "regimes" or changed behavior are built and sustained by societal, state, and global actors. Students apply critical interview skills among professionals of diverse disciplines, and in particular, meet the range of development organizations headquartered in Colorado.

CPSY 4570 Crises Intervention (3 Credits)
This course will deal with the clinical approaches to handling psycho-social crises.

CPSY 4580 Psychodynamic Theory (3 Credits)
Traditional and modern theories of psychodynamic concepts will be presented. Students are instructed on the use of such theories as a tool to structure interventions in their field work.

CPSY 4585 Family Systems (3 Credits)
A comprehensive review of family therapy concepts and treatment theories. A review of the applicable literature of family therapy is provided with an emphasis on cross-cultural models and interventions.

CPSY 4590 Psychology of Loss and Grief (3 Credits)
A review of the theory of loss and grief. The course reviews cultural understandings of loss and grief as seen following disaster and conflict. Treatment modalities of loss and grief are also presented.

CPSY 4591 Supervision Group - IDP (1 Credit)
This class is an opportunity for students in field-placements to receive additional supervision for their field-placement work. Students present and receive supervisory consultation about their work in these settings.

CPSY 4595 International Disaster Psychology Internship (6 Credits)
Students will spend one quarter in various international locations working in full time internships with international nonprofit organizations applying the principles and knowledge obtained during their study in the IDP program. Students will work under faculty and professional supervision.

CPSY 4605 Psychotherapy Interventions (3 Credits)
This course will survey different theoretical models of psychotherapy with an emphasis on specific intervention approaches.

CPSY 4606 Gender-based Violence (3 Credits)
Gender-based Violence will cover issues as they relate cross-culturally. Special attention will be directed towards descriptions of programs approaching these issues and the challenges of designing and implementing such programs in various cultural environments.

CPSY 4650 Sport Psychology (3 Credits)
A comprehensive view of the field of sport psychology will be covered. Through participation in this course, students will develop a better understanding of the field of sport and exercise psychology and develop skills that will assist in enhancing their career opportunities. Varied psychology topics (e.g., individual differences/personality, motivational orientations and strategies, applied psychological skills, social influence and group dynamics) with an emphasis on understanding major theories and research and applying those theories and research findings to diverse sport, exercise, and performance settings. Additionally, the psychological effect that participation in a sport or a physical activity has on a performer including anxiety reduction, aggressive behavior, and personality development will be explored.
CPSY 4652 Theoretical Aspects of Sport and Performance Psychology (3 Credits)
This course is an in-depth exploration of selected aspects of the theories of sport psychology along with applications of these theories to other performance domains. An advanced understanding of the field of sport and performance psychology is pursued in relation to psychosocial aspects involved in both the preparation and performance processes among adults, youth, and children who represent all skill levels. The explored areas include: (a) motivation, confidence, and anxiety in sport and performance, (b) selected topics in social psychology and psychobiology, (c) psychological skills training, and (d) special topics (e.g., personality, flow, injuries, burnout).

CPSY 4653 Sport in American Society (3 Credits)
This course examines the influence of the social context on sport. Attention is given to the influence of society on sport as an institution and the role of sport as an agent of social change. This course examines how sport affects the social world we live in. Topics explored include the intersection of sport and gender, race/ethnicity/culture, socioeconomic class, media relations, violence, deviance, and sexuality.

CPSY 4654 Coaching & Leadership (3 Credits)
This course is a survey of the intersection of coaching, leadership, organizational behavior, organization dynamics, and change management. It examines the definitions, history, theories, and research in the sport and management leadership literature. Students will gain an understanding of how planning, motivation, team building, and leadership impact a team's or organization's effectiveness. Students are expected to learn and personally develop the analytical and leadership skills that affect individual and group performance.

CPSY 4655 Social Psychology of Sport (3 Credits)
This course will address the relationship between sport and cultural dynamics, sociological factors underlying competitive physical activity, and behavioral responses of sport participants and supporters to various socio-cultural motivations. This course will be a serious study of organized professional, amateur, and youth sports in North America. Emphasis will be placed on social forces that both impinge on and enhance athletic activities and organizations, and the influence sport has on society.

CPSY 4660 Sport Psychology Interventions and Techniques (3 Credits)
Students will acquire knowledge and increase their comprehension of cognitive-behavioral intervention strategies (e.g., mental skills training) and how they can be applied to achieve optimal performance of athletes and others. The complex interaction between the sport psychology consultant and performer will be explored.

CPSY 4662 Foundation of Counseling Theories (3 Credits)
This course will review major contemporary counseling models, theories, procedures, and the helping relationship. Advanced study of techniques and research findings. Survey of principles underlying individual, family systems, and multicultural approaches to counseling.

CPSY 4663 Applied Motor Learning (2 Credits)
This course takes an applied approach to understanding motor control, motor development, and motor learning. Emphasis is given to understanding how skill movement is controlled and regulated. Students will learn the factors that influence skill acquisition and how to design effective practices.

CPSY 4664 Practicum in Sport and Performance Psychology III: Business Principles (3 Credits)
This is the third course in a year long, three-part sequence. This course serves the purpose of (a) providing an opportunity for students to learn about sport and performance psychology through observation and experiential opportunities; (b) providing an intimate forum for discussing the practice of sport and performance psychology; and (c) providing information on professional development and conduct. The course requires didactic and experiential activities. Business, consultation, and professional development issues in sport and performance psychology will be addressed. Prerequisite: CPSY 4663.

CPSY 4665 Beh Kinesiology & Physiology (3 Credits)
A study of human movement. Topics will include but are not limited to structural anatomy, biomechanics, and neurophysiology. The biomechanical etiology of various injuries will be studied.

CPSY 4666 Movement Principles for Performance (3 Credits)
This course is an exploration of selected areas of the exercise and sport sciences. The explored areas include: functional anatomy, biomechanics, and exercise physiology.

CPSY 4668 Psychology of Excellence (3 Credits)
The purpose of this course is to examine the theories, research, and intervention strategies related to the pursuit of excellence. This course explores the deliberate interventions necessary to support the development of excellence and expertise. Students will learn the nature of expertise development, the necessary steps to achieve excellence, and common roadblocks. The concept of excellence will be investigated in many contexts, such as sport and performance, intrapersonal, relationships, and life in general. Topics to be explored include: happiness, contentment, life satisfaction, values, character strengths, emotional intelligence, optimism, hope, flow, and resiliency.

CPSY 4669 Consulting Methods & Practices (3 Credits)
The primary goal of this course is to acquaint students with skills and research fundamentals related to the practice of consultation in performance settings. The course focuses on the consulting role; the major theoretical approaches to consultation; the process and stages of consultation; and students' personal strengths and concerns in the role of a consultant. Students define "consultation" and identify and describe the differences between the goals, objectives, intervention strategies and theoretical orientations of consulting and mental health therapy. Students begin to become more aware of their own value systems and the ways in which these values impact upon their effectiveness as agents of change. Integrated throughout the course is working in diverse settings with diverse populations.
CPSY 4670 Psych of Coaching & Leadership (3 Credits)
Examination of psychological components of coaching and talent development. Explores coaching development, coaching models, as well as strategies for dealing with athletes and different coaching contexts. Discussion of talent development theories including influence of genetic and environmental factors.

CPSY 4671 Theories of Performance Excellence (3 Credits)
This course is designed to familiarize students with theories of performance excellence developed by leading practitioners. Each week, students are exposed to a different practitioner's approach, which often includes an opportunity to observe the practitioner's style through video. Emphasis is placed on the role of theory in practice, theory-based conceptualizations utilizing a case study format, and comparing and contrasting the different theories.

CPSY 4672 Counseling Methods & Practices (3 Credits)
This course is an introduction to counseling microskills and techniques needed in helping relationships, with attention to building the therapeutic alliance. Emphasis placed on learning skills in small group format. Laboratory experience in demonstrating skills and the ability to form an effective counseling relationship is required. Pre-practicum experience to prepare students to work with clients.

CPSY 4673 Practicum in Sport and Performance Psychology 2 (3 Credits)
This is the second course in a year long, three-part sequence. This course serves the purpose of (a) providing an opportunity for students to learn about sport & performance psychology through observation and experiential opportunities; (b) providing an intimate forum for discussing the practice of sport and performance psychology; and (c) providing information on professional development and conduct. The course requires didactic and experiential activities. Psychological consultation, best practices, and professional development issues in sport and performance psychology will be addressed. Prerequisite: Practicum in Sport and Performance Psychology I.

CPSY 4674 Clinical Issues: Interviewing and Diagnosis (3 Credits)
This course examines adult psychopathology as classified in the DSM. Special emphasis will be placed on the intersection of performance with more traditional psychopathology. Students learn about etiology, symptomology, epidemiology, and treatment issues. Possible causes and contributory factors are examined, as well as theoretical and multicultural considerations. Prerequisites: Theoretical Aspects of SPP, Applied SPP, and Ethical Issues in SPP.

CPSY 4676 Assessment in Sprt & Perf Psy (3 Credits)
This course covers the selection, use, and proper interpretation of common sport and performance psychology assessments. Basic principles of educational and psychological measurement, including test construction, validity, and reliability are addressed. The assessments taught include those used for individual assessment, individual selection, and organizational assessment (360 degree feedback, surveys, etc.). Prerequisites: CPSY 4652, CPSY 4690, and CPSY 4682.

CPSY 4677 Motivation, Emotion & Learning (3 Credits)
This is an in-depth course reviewing the theories and research related to motivation, emotion, and learning in performance contexts. Topics include the relationships between motivation, emotion, and learning; and the influences of emotion and motivation on counseling and consultation. The course provides basic information about the human cognitive system. Students are taught the basic principles of learning, with a focus on the principles of learning which are most applicable in sport and performance settings. This course places an emphasis on relating current research to practice.

CPSY 4678 Scholarly Writing Methods and Practices (2 Credits)
The primary goal of this course is to familiarize students with the methods and practices of scholarly writing. The course focuses on writing a scholarly review of literature, methodology, results, and conclusions according to APA style. Within the course, students are also asked to review one another's work while developing editing skills and methodological complexity.

CPSY 4679 Field Placement Practicum in Sport and Performance Psychology (3 Credits)
Supervised practice sport & performance psychology in an approved sport or performance setting under licensed practitioners.

CPSY 4680 Sport and Performance Psychology Practicum (3 Credits)
This course will familiarize students with professional issues relevant to the practice of sport and performance psychology. Students will be presenting and analyzing their current applied experiences as coaches and leaders in sport and performance settings in the community. This is a participation-intensive course and the students will receive feedback and suggestions from both the instructor and peers in a group supervision format. Importantly, the ongoing feedback and readings will provide an opportunity for students to understand and apply theories and practice systems of behavior change in sport and performance psychology in the context of their own clients/cases. Students will learn the roles and responsibilities inherent in professional and ethical consultation, with a special emphasis given to the dilemmas of serving as an embedded consultant.

CPSY 4681 Multicultural Issues (3 Credits)
This course covers the research and theories of counseling the culturally different client. Students are expected to develop multicultural skills, including culturally-based conceptualization, assessment, and selection of culturally appropriate intervention strategies. This course will examine these issues in general, with a special emphasis on those in sport and performance cultures. This is both an experimental and seminar-based course, aimed at developing student's personal awareness, knowledge, and skills.

CPSY 4682 Ethical and Legal Issues (3 Credits)
This course introduces the students to the ethical principles, codes, and standards related to the profession of sport and performance psychology. This includes an overview of the regulation of the practice of psychology, the relationships between ethical codes and legal statutes, and the development of a personal model for ethical decision-making.
CPSY 4683 Group Interventions (3 Credits)
This course is a survey of group counseling methods and techniques from a theoretical and applied perspective. The course will include practical application of group counseling interventions. Prerequisites: demonstrated knowledge of ethical principles and departmental consent.

CPSY 4684 Sport and Performance Psychology - Team and Organizational Dynamics (3 Credits)
This course examines the principles, theories, and research of human functioning in performance related teams and organizations. It explores the social and psychological factors influencing behavior in organizations, along with individual differences, dyadic relations and small group behavior. Students learn about the dynamics of team and organizational diagnosis, feedback and learning, intervention, and planned change.

CPSY 4685 Human Growth & Development (3 Credits)
This course is a comprehensive analysis of theories and research relating to human psychological development and learning across the lifespan. It explores the cognitive, affective, academic, physiological, moral, and social/cultural/racial domains. An emphasis is placed on a) the theoretical models underlying character and moral development, and b) adolescent and college student development theories.

CPSY 4686 Practicum in Sport and Performance Psychology: Professional Practice (3 Credits)
This course provides an examination of the critical components of successful and ethical professional practice and career building in sport and performance psychology in conjunction with intensive provision of sport and performance psychology services. The entire body of sport and performance psychology theoretical and applied knowledge as well as the skills that the students have acquired will be utilized. Additionally, rigorous self-reflective activities and ethical decision-making will increase the student professional and personal growth as directly related to effectiveness in the sport and performance psychology practice. Emphasis will be placed on diversifying and integrating theoretical knowledge and applied strategies and skills while simultaneously engaging in supervised independent work in real life sport and performance settings.

CPSY 4687 Psychology of Injury (3 Credits)
This course examines the psychological factors involved in injury, rehabilitation, and return to performance. The effects upon social, personal, and performance adjustment are addressed. The course covers how relevant theory and research can be used to inform practical applications to help the injured performer’s rehabilitation and return. It presents the major medical aspects of injury and the rehabilitation process.

CPSY 4688 Seminar in Sport and Performance Psychology (3 Credits)
Advanced seminars offered by sport and performance psychology faculty on topics relevant to the practice and science of sport and performance psychology area.

CPSY 4689 Psychophysiology and Biofeedback (2 Credits)
This course explores the underlying mechanisms and psychophysical determinants of behavior in sport and performance settings. Students learn the use of biofeedback in achieving voluntary self-regulation and control of stress related behaviors.

CPSY 4690 Sport and Performance Psychology Interventions (3 Credits)
This course is designed to familiarize students with the application of sport and performance psychology interventions. Students experience the building of a sport and performance psychology program. This program includes the cardinal skills of relaxation, concentration, imagery, self-talk, and mental routine; followed by broader topics such as goal setting, motivation, confidence, cohesion, engagement, and mastery. The instructor briefly reviews relevant theory and research followed by demonstrations of techniques and strategies, after which students learn by doing. Specific attention is given to blending the science of peak performance with the art of applying science.

CPSY 4691 Practice Development in Sport and Performance Psychology (3 Credits)
The primary goal is to acquaint students with the skills needed to develop and implement a private practice in the profession of sport or performance psychology. The course takes students through the process of business development by using the traditional business plan model, from the necessary startup expenses to the executive summary. Throughout the course students learn the What, When, Where, and How of starting their own consulting practice, while learning the basic components of branding, marketing, and operations. Prerequisites: Must be enrolled in the MASPP program or instructor approval.

CPSY 4692 Entrepreneurship in Sport and Performance Psychology (3 Credits)
The primary goal of this course is to provide students with an overview of skills necessary to succeed in the entrepreneurial profession of sport and performance psychology. The course is flexibly designed to accommodate the students’ desired career paths. Topics covered may include: sales and marketing, developing a practice, job search and interviewing skills, and understanding the job market.

CPSY 4991 Independent Study (1-17 Credits)
CPSY 4992 Directed Study (1-10 Credits)
CPSY 4995 Independent Research (1-17 Credits)
CPSY 5000 Rad Behav/Func Contexti Models (3 Credits)
CPSY 4000 is designed to provide a historical, philosophical and conceptual background to better understand and appreciate Behaviorist views of “being-in-the world”. The course lays the foundation for the sophisticated application of a science of behavior-its theories and methods-to the assessment of clinical problems and the art of doing psychotherapy. The course will invite a little discomfort, disturb some preconceptions, and compel students to address some difficult questions and thorny issues. Among the goals of this course are to see students commit to being more than a psychologist technician, to encourage them to develop a guiding philosophical core in their practice as a psychologist; to assist them in clarifying or deepening whatever philosophical worldview they may hold; and that they will have achieved an informed understanding of radical behaviorism/functional contextualism - whether or not they choose to further pursue these models.
CPSY 5010 Cognitive & Affective Models (3 Credits)
This is the first in a three part sequence that includes Psychophysiology and Clinical Neuropsychology and is designed to introduce students to the current research in cognitive neuroscience and consciousness. This first course focuses on sensation/perception, learning, memory, emotion, language and other higher cognitive functions. Lectures will emphasize current technologies and historical inquiry and the unique contributions made by psychosocial and cultural variables.

CPSY 5020 Psychoanalytic Models (3 Credits)
Psychoanalytic theories, including Freud's topographic and structural theories, ego psychology, object relations theory and modern relational theories, including self-psychology and intersubjectivity.

CPSY 5030 Systems Models (3 Credits)
Basic concepts of general systems theory and their applications in psychology, focusing on family systems, groups and organizations.

CPSY 5040 History and Systems in Psych (2 Credits)
Basic psychological concepts surveyed from a historical point of view, tracing development of psychological bases of professional practice.

CPSY 5050 Advanced Statistics (3 Credits)

CPSY 5051 Statistics I Lab (1 Credit)

CPSY 5070 Research Methods (2 Credits)
Sequential course that cover fundamentals of structuring, analyzing and critiquing research reports and proposals; strategies to guide and facilitate the writing process; attitude and thinking skills necessary for function as a local clinical scientist; research design tools, methods and strategies for answering different types of questions.

CPSY 5071 Research Methods II (2 Credits)
Sequential courses that cover fundamentals of structuring, analyzing and critiquing research reports and proposals; strategies to guide and facilitate the writing process; attitudinal and thinking skills necessary for function as a local clinical scientists; research design tools, methods and strategies for answering different types of questions.

CPSY 5073 Qualitative Research Methods (2 Credits)
Qualitative research involves obtaining in-depth information about the behaviors and beliefs of people in naturally occurring social settings. This course introduces students to the philosophical underpinnings, history, and key elements of five qualitative approaches: narrative research, phenomenology, grounded theory, ethnography, and case study. We compare theoretical frameworks and methodologies, experience the use of data, and discuss writing strategies. In addition, we read articles that are exemplars or each approach.

CPSY 5075 Program Evaluation Technique (3 Credits)
Theory and techniques for developing management information and assessment systems for human service programs.

CPSY 5080 Diagnosis and Classification (2 Credits)
An overview of major DSM diagnostic categories, as well as an introduction to ICD and noncategorical classification.

CPSY 5108 Introduction to Acceptance and Commitment Therapy (ACT) (2 Credits)
Acceptance and Commitment Therapy (ACT) belongs to the movement in clinical psychological science that sees acceptance and openness to experience as an essential addition to change-focused psychotherapeutic treatment strategies. Although consciously based on behavior-analytic thinking, ACT is a hybrid in terms of approach and technique, bringing together aspects of Zen Buddhism, Gestalt therapy, and humanist-existential though. The paradox upon which ACT is founded is that only radical acceptance of what cannot be changed empowers people to recognize and change the things that they can. The ACT approach is about embracing necessary suffering in order to make more committed, life-affirming choices and live in accordance with personal values. ACT emphasizes that in a very deep sense all human beings are in the same boat. The technical and theoretical bases of ACT are through normal didactics, but the heart and art of the approach occurs through experiential exercises, group process, and from observation and modeling. Prerequisite: CPSY 5000.

CPSY 5120 Introduction to Animal-Assisted Interventions (2 Credits)
This course serves as an introduction to animal-assisted interventions (AAI) as they are commonly used by mental health care professionals. It is designed to provide students with an overview of the foundations of AAI, the variety of ways in which this modality is used, international perspectives on AAI, various perspectives on ethics and animal welfare, and researchers' current understanding of the role of the human-animal bond in facilitating AAI treatment efficacy. General topics to be addressed include the characteristics of the species used in AAI, the basic principles of AAI, the use of AAI with a variety of populations, and animal abuse issues. A number of guest lecturers will share their knowledge and experiences with students throughout the quarter.

CPSY 5130 Issues in Measurement (3 Credits)
Validity, reliability and standardization issues in psychological testing; statistical properties of commonly used tests.

CPSY 5131 Issues in Measurement Lab (1 Credit)
Optional. Focused assistance with basic math skills; review and clarification of class topics.

CPSY 5170 Life Cycle: Inf to Mid Childhdh (3 Credits)
Understanding normal development of children (0-12 years), integrating theory, research and a phenomenological perspective.

CPSY 5180 Life Cycle: Adolescent - Adult (2 Credits)
CPSY 5200 Life Cycle: Late Adulthood (3 Credits)
Theories of aging; social, psychological and biological changes; assessment and intervention methods, emphasizing issues impacting older adults. (65 years and above).

CPSY 5230 Group Dynamics & Interventions (3 Credits)
Provides psychologists in training with multiple learning experiences highlighting that groups and organizations are intensely psychological environments in which most psychologists function professionally and personally and have the potential to impact positively.

CPSY 5231 Social Psychology (3 Credits)
CPSY 5250 Existential and Humanistic Theory and Therapy (2 Credits)
Historical roots and basic assumption of existential and humanistic views. Students encouraged to integrate materials with their personal values and assumptions about human nature and their interaction with clients.

CPSY 5270 Physiological Psychology I (3 Credits)
Terminology and principles of and research in physiological psychology. Where possible, application made to content and practice of clinical psychology.

CPSY 5271 Physiological Lab I (1 Credit)
Optional. Assistance with material covered in CPSY 4170.

CPSY 5273 Physiological Lab II (1 Credit)
CPSY 5290 Clinical Neuropsychology (3 Credits)
Historical, conceptual and clinical foundation for, as well as current developments related to, the field of clinical neuropsychology. Includes exposure to: developmental neuropsychology and neuroanatomy; higher cognitive functions; neuropsychologically informed interviews and standard neuropsychological test batteries; neuropsychological profiles associated with a variety of acquired disorders (both classical neuropsychological and psychological in nature); ethnic, cultural, age and gender considerations; and current status of a variety of professional/ethical issues. Prerequisite: CPSY 5270.

CPSY 5310 Ethical Issues in Psychology (3 Credits)
In-depth consideration of ethical standards applicable to the science and practice of psychology; pertinent laws and legal standards governing the practice of psychology; areas in which legal and ethical standards suggests contradictory actions on the part of the clinical psychologist.

CPSY 5320 Professional Issues in Psych (2 Credits)
Issues, concerns and controversies impacting current practice of professional psychology at the state and national levels; preparation for future alternative systems of service delivery. Emphasis is on professional life after the PsyD. Required for first year students.

CPSY 5340 Social Psych of Rac and Oppr (3 Credits)
Theoretical and experimental nature of racism and oppression, primarily in the United States, definition of such terms as stereotypes, prejudice, racism, white supremacy and privilege; exploration of various theories regarding these terms and how they manifest themselves historically and contemporarily.

CPSY 5360 Racial/Ethnic Identity Dvlpmnt (3 Credits)
This course will explicate the concept of ethnic identification, and the process by which this central aspect of a person's overall identity develops. Accordingly, the two central questions that this course will address are: a. who are they? and b. how did they get that way? These questions will be examined utilizing a Descriptive Psychology perspective.

CPSY 5370 Gay, Lesbian, Bisex Trans Is (3 Credits)
Various aspects of gay, lesbian life explored cross-culturally; nature of homosexuality, including the controversy of heredity vs. choice. Issues of oppression and discrimination will also be explored. The role of psychology and the politics of homosexuality will be studied. Students will also be asked to explore their personal awareness regarding homosexuality in their everyday lives and in a therapeutic context.

CPSY 5380 Culturally Competent Psychotx (3 Credits)
As the final class in the year-long multicultural course sequence, this class will integrate the theoretical content of the preceding classes and focus on their psychotherapeutic implications. This course will address psychotherapy with the following groups - African Americans, Asian Americans, Latinos, Native Americans, and the GLBT community.

CPSY 5385 Pro Sem: Beg. Psychotherapy (2 Credits)
This is a clinical and didactic seminar on beginning psychotherapy. The focus will be on case formulation and developing a therapeutic relationship with the client.

CPSY 5386 Pro Sem: Child & Ad Psychother (2 Credits)
This seminar involves the evaluation and treatment of children, adolescents and their parents in the Professional Psychology Center. Supervision is provided from an integrative perspective, and topics relevant to child and adolescent psychotherapy are discussed.

CPSY 5388 Pro Sem: Psychological Assessment (2 Credits)
Assessment is a central feature of the work of the clinical psychologist. This seminar is an opportunity to hone your knowledge and skills in personality and cognitive assessment. It will involve some lecture, but mainly focus on supervision of assessment cases obtained through the Professional Psychology Clinic. You will be expected to complete four assessments during the year - you certainly can do more if you wish. You also will have the opportunity to present a case you have completed to the seminar during the Spring quarter.
CPSY 5389 Pro Sem: Behavior Therapy (2 Credits)
This advanced professional seminar draws upon pragmatic philosophy and contextualistic worldview as it informs and guides contemporary behavior analytic theory and practice. Students gain experiences using functional analysis as a method for describing and integrating clinical observations and learn to implement a variety of evidence based, acceptance inspired interventions designed to facilitate psychological flexibility and values-congruent living in clients from diverse backgrounds. Therapeutic work is conducted in an atmosphere of care, respect, compassion, and commitment, and challenges the client (and therapist) to be more open, aware, vulnerable, and present in their lives.

CPSY 5390 Pro Sem: Forensic Issues (2 Credits)
The Professional Issues Seminar in Forensics will introduce students to various areas and ways in which psychology interacts with the legal and criminal justice systems. Students will develop their capacity to perform evaluations relating to psychological questions, dilemmas, and disputes that are most frequently requested of forensic psychologists. Focus of the seminar will be assisting students in clarifying their role as an evaluator and consultant to attorneys, judges, and criminal justice personnel; exploring the ethical responsibilities therein; learning to conduct assessments and compose reports for a legal rather than a clinical audience; and preparing to testify as an expert witness. Students will formulate and deliver case presentations and submit reports. Over the course of the year, we will cover a number of issues for clinical psychologists who provide services for legal and criminal justice professionals.

CPSY 5391 Professional Seminar: Psychodynamic Therapy (2 Credits)
This seminar focuses on psychodynamic psychotherapy - that is, individual adult psychotherapy with the aim of bringing about meaningful and lasting psychological concepts as they apply to your patients, with a practical, "hands on" focus - for example, what to do and say when your patient shuts down, threatens suicide, act out, comes on to you, misses appointments, gets worse, throws up in your office, and all the other troubling and fascinating things people do from time to time in psychotherapy. Prior or current personal psychotherapy is highly desirable and strongly recommended. Students should be prepared to discuss their clinical work candidly - and help foster an environment of mutual trust, compassion, and respect, in which candid discussion can take place.

CPSY 5392 Pro Sem: Couple and Family (2 Credits)
This seminar allows students more in-depth training in working with systems including couples and families. Students should take Couples Therapy and Family Therapy either before or concurrent with the seminar. Special topics covered include divorce, step families parenting, sex therapy, multicultural issues, and ethics, as well as more general couple and family therapy work.

CPSY 5393 Pro Sem: ACT (2 Credits)
Acceptance and Commitment Therapy (ACT) is a pragmatically based, relatively new and highly experiential form of therapy whose overarching goals are to a) assist clients (and therapists) in accepting what cannot be changed (i.e., the form or frequency of certain private events), while b) helping them fully commit to behaving in accordance with idiosyncratic values. Although consciously based on behavior-analytic thinking, ACT is a hybrid therapy in terms of approach and technique, bringing together aspects of Zen Buddhism, Gestalt therapy, and humanist-existential thought. In the seminar, students will learn the technical and theoretical bases of ACT through group process, individual and small group supervision, as well as from observation and modeling. Prerequisite: Behavioral Models course.

CPSY 5394 Professional Seminar: Cognitive Therapy (2 Credits)
This is a year-long seminar in cognitive-behavior therapy (CBT). Trainees learn the theory and practice of CBT through readings, didactic presentations, discussion, and especially case presentations. Small-group supervision is also required. Other orientations to therapy and common factors are also covered.

CPSY 5396 Pro Sem: Adv. Psychotherapy (2 Credits)
Seminar will focus on the individual therapy treatment of adult cases. Particular emphasis will be placed on conceptualizing cases from a developmental perspective with no particular emphasis on object relations and the psychology of self. We will evaluate culture, role of trauma, issues of sexual orientation, and developmental history. Students will be encouraged to look at their own and other's responses in a supportive environment that will foster discussion on counter-transference responses. An in depth exploration of client's needs will be assessed and model the treatment to those needs, rather than applying the same treatment model to all patients. Previous exposure and readings on the psychology of self and object relations is helpful. Readings to deepen our understanding of the above will be assigned. Must have taken or be currently enrolled in Adult Psychopathology sequence. Prerequisite: Psychoanalytic Models course.

CPSY 5399 Professional Seminar: Gender Issues (2 Credits)
This seminar will focus on gender issues from developmental and psychodynamic perspectives. Topics will include issues relevant to women, men, and transgendered/intersexed individuals. Clients may include adolescents and adults with a variety of presenting concerns including relationship problems, identity issues, eating disorders, pregnancy and postpartum work, parenthood, mood and anxiety disorders, and aging.

CPSY 5404 Prof Sem: Integrative Therapy (2 Credits)
This advanced seminar examines various integrative models of psychotherapy, and students have the opportunity to develop their own therapeutic "voice" by integrating the major theories already learned. While the seminar is theoretical in nature, one goal is to help students prepare for practice in the real world by exploring the common factors of therapy, and how to work collaboratively in a client-directed fashion. Clients may include adults, adolescents, and children with a wide variety of presenting concerns, in individual, couples, family, or group therapy. Competency areas covered include: relationships (awareness of process in the room), intervention (integrative theory), diversity/multiculturalism, and ethics/legal issues/professionalism. Prerequisite: enrollment in the PsyD program.
CPSY 5405 Advanced Relational Psychodynamic Seminar (2 Credits)
This seminar focuses on relational psychotherapy from the perspectives of self-psychology and intersubjective systems theory in working with adults. We examine the co-creation of the therapeutic relationship, the making of meaning, empathic listening, attuning to the other’s affective experience and putting the other’s subjective experience into words. We develop treatment plans and case formulations that are consistent with this perspective.

CPSY 5406 Professional Seminar: Health Psychology (2 Credits)
This advanced seminar focuses on the ways that clients’ physical health concerns affect psychosocial and emotional well-being. We focus on the relationship between the mind and the body and take a holistic and contextual approach to understanding work with clients, keeping in mind relational and cultural variables throughout the seminar. Clients in the PPC that have been in this seminar have had cancer, mitiple sclerosis, diabetes, heart failure, chronic pain, autoimmune diseases, etc. As relevant to our work with clients, we discuss pain management, mindfulness, differential diagnosis of depression and anxiety, sleep hygiene, psychosocial oncology, grief and loss, and other empirically supported treatments for issues that clients present. The overarching theoretical framework of the course is relationship-focused, client-centered, and strengths-based. We draw on rehabilitation psychology and medical psychology, and explore diversity issues in a variety of ways, including examining disability as a multicultural issue. We use readings from interpersonal psychotherapy, feminist and multicultural therapy, positive-psychotherapy, meaning-centered psychotherapy, humanistic/existential therapy, client-centered therapy and post-traumatic growth to guide discussions. Particular attention is paid to helping clients enhance their strengths and find meaning in their lives during times of transition. Since many health settings are focused on a short-term model of treatment, students in seminar have the option of taking on shorter-term cases and we explore the use of time-limited psychotherapy in a health setting. It is expected that most students take on new cases in this seminar.

CPSY 5420 Behav-Analytic Prin 1 (2 Credits)
This course covers philosophical foundations, assumptions, and principles underlying major systems and models of behaviorism. Emphasis is given to the philosophy of science called radical behaviorism and its behavior-analytic functional-contextualistic tradition. Course 1 specifically targets contingency-shaping selection processes based upon Pavlovian and operant conditioning paradigms. Recommended prerequisite: CPSY 5000.

CPSY 5421 Behavioral Analysis Princ La (1 Credit)

CPSY 5422 Behav-Analytic Prin 2 (2 Credits)
This course covers philosophical foundations, assumptions, and principles relevant to cultural-linguistic practices. Emphasis is given to the philosophy of science called radical behaviorism and its behavior-analytic functional-contextualistic traditions. Course 2 specifically addresses verbal relational contingency selection processes based upon cultural and its verbal community. Prerequisite: CPSY 5420.

CPSY 5423 Behav-Analytic Assess/Case Frm (2 Credits)
This course covers the philosophical foundations, assumptions, and principles relevant to behavioral assessment and case formulation tactics. Emphasis is given to the philosophy of science called radical behaviorism and its behavior-analytic functional-contextualistic traditions. This course specifically targets an empirical data-driven approach to idiographic assessment for purposes of developing conceptual analyses from the contextual-functional analytic perspective. Prerequisites: CPSY 5420, CPSY 5422.

CPSY 5424 Behavior-Analytic Intervention (2 Credits)
This course provides an overview of issues, principles and methods basic to clinical practice and intervention. Emphasis is given to the philosophy of science called radical behaviorism and its behavior-analytic functional-contextualistic traditions. This course specifically targets a range of commonly used methods of intervention (e.g., counter-conditioning and exposure-based treatments, guided action strategies, acceptance-commitment approaches, Eastern interventions). Issues relevant to the structuring of therapy sessions, the therapeutic relationship, behavioral nonadherence, empirical research, and other topics of therapeutic interest will be reviewed. This course will incorporate the use of experiential exercises, modeled demonstration, and behavior rehearsal methods for training purposes. Prerequisites: CPSY 5420, CPSY 5422, CPSY 5423.

CPSY 5466 Health Psychology (2 Credits)
This course is designed to provide students with a broad overview of the salient empirical and theoretical aspects of health psychology and behavioral medicine. The course will emphasize the role that psychological variables play in the development, exacerbation, treatment and prognosis of both acute and chronic illness. We will also highlight sociopolitical and cultural discourse surrounding end-of-life decision making, healthcare accessibility and the phenomenology of a disabled population.

CPSY 5467 Health Psychology Service Learning Seminar (1 Credit)
The Health Psychology Service Learning Seminar provides the opportunity for students to gain clinical experience with the underserved/underrepresented populations covered in the Health Psychology course (CPSY 5466). Students who enroll in the Seminar must agree to complete 20 hours of supervised clinical service with an agency and supervisor of their choice.

CPSY 5468 Sport and Performance Psychology Practicum in Collegiate Athletics I (2 Credits)
This is the first course in a year long, three-part sequence. This course serves the purpose of providing: a) practice in sport and performance psychology in a NCAA Collegiate Athletic Department under the supervision of licensed practitioners; b) an opportunity for students to learn about sport and performance psychology through observation and experiential opportunities; and c) information on professional development and conduct. The course requires didactic and experiential activities. The didactic component covers the practice of sport and performance consulting, focusing on gaining entry and building working relationships. Current research is integrated with theory, emphasizing empirically validated approaches to best practice.
CPSY 5469 Sport and Performance Psychology Practicum in Collegiate Athletics II (2 Credits)
This is the second course in a year long, three-part sequence. This course serves the purpose of providing: a) practice in sport and performance psychology in a NCAA Collegiate Athletic Department under the supervision of licensed practitioners; b) an opportunity for students to learn about sport and performance psychology through observation and experiential opportunities; and c) information on professional development and conduct. The course requires didactic and experiential activities. Psychological consultation, best practices, and professional development issues in sport and performance psychology are addressed.

CPSY 5470 Sport and Performance Psychology Practicum in Collegiate Athletics III (2 Credits)
This is the third course in a year long, three-part sequence. This course serves the purpose of providing: a) practice in sport and performance psychology in a NCAA Collegiate Athletic Department under the supervision of licensed practitioners; b) an opportunity for students to learn about sport and performance psychology through observation and experiential opportunities; and c) information on professional development and conduct. The course requires didactic and experiential activities. Psychological consultation, best practices, and professional development issues in sport and performance psychology are addressed.

CPSY 5480 Integrated Primary Care (2 Credits)
This course is designed to provide an introduction to the field of Integrated Primary Care (IPC). Primary health care physicians currently serve as the de-facto mental health care providers for approximately 50-80% of the patients they serve. Psychologists are desperately needed to support primary care, yet traditional clinical training does not adequately prepare them to work in this field. Students in this course can expect to acquire a solid knowledge in IPC that will enable them to function effectively in the primary care culture. A clinical exposure component are required so students can experience the pace and problem range seen in the primary care office. Class size is limited. Students not enrolled in the PsyD program must petition the instructor for approval to register.

CPSY 5500 Diagnosis & Treatment of Children (2 Credits)
CPSY 5505 Diagnosis & Treatment of Adolescents (2 Credits)
CPSY 5550 Couples Therapy (2 Credits)
Theory, techniques and research relating to couples therapy, including theoretical perspectives: behavioral couples therapy, emotionally-focused couples therapy and object relations couples therapy. The course also addresses specific problem areas, including domestic violence, infidelity, depression, anxiety, substance abuse and personality disorders. Prerequisite: CPSY 5030.

CPSY 5560 Family Therapy (2 Credits)
Theory, techniques and research relating to family therapy, including several theoretical perspectives: behavioral, experiential, psychodynamic, multigenerational approaches. Special topics covered include working with community resources, addressing developmental issues of children, working with medical and school systems, utilizing cultural factors in planning programs and interventions and adults in family therapy. Prerequisite: CPSY 5030.

CPSY 5562 Psychological Consultation (2 Credits)
This course provides an overview of the practice of psychological consultation. Theories and models of consultation in various settings including businesses, organizations, health care, and schools are covered. The process and stages of consultation from entry to termination are analyzed. This class differentiates consultation from other types of psychological interventions. Important legal, ethical and multicultural issues in consultation are addressed throughout the course. Students develop their own model for conducting consultation and refine that model through work with local organizations. Students increase their awareness of their strengths and weaknesses in the practice of consultation. Methods of instruction include lecture, discussion, experiential exercises, and interactions with local organizations and professional consultants.

CPSY 5590 Adult Psychopathology I (2 Credits)
Theoretical understanding and treatment of adults within a developmental, ego analytic framework. First quarter-differences between the neuroses, borderline, and psychoses. Prerequisite: CPSY 5020.

CPSY 5591 Adult Psychopathology II (2 Credits)
Theoretical understanding and treatment of adults within a developmental, ego analytic framework. Second quarter - the neuroses. Prerequisite: CPSY 5020.

CPSY 5592 Adult Psychopathology III (2 Credits)
This course is a continuation of Adult Psychopathology I and II with an emphasis on complex trauma and the psychotic disorders. Diagnostic understanding, differential diagnosis, and treatment implications are emphasized within a psychoanalytic orientation. Prerequisites: CPSY 5590 and CPSY 5591 or instructor approval.

CPSY 5620 Intersubjective Systems Theory (2 Credits)
This course focuses on psychotherapy from the perspectives of intersubjective systems theory in working with adults. We examine the co-creation of the therapeutic relationship, the making of meaning, empathic listening, attuning to the other's affective experience and putting the other's subjective experience into words. We develop treatment plans and case formulations that are consistent with this perspective.

CPSY 5680 Cognitive Assessment (4 Credits)
Theoretical, professional and clinical issues involving intelligence and its measurement; assessment of cognitive functioning and clinical interpretation of test results, focusing on the WAIS-III ( child equivalents). Prerequisite: CPSY 5130.
CPSY 5685 Introduction to Pediatric Neuropsychological Assessment (2 Credits)
Pediatric neuropsychology integrates many basic sciences including behavioral Neurology, developmental psychology, neuroanatomy, psychopathology, and psychological assessment. The role of pediatric neuropsychologist is to provide comprehensive assessment, consultation, and intervention in the context of a developing child. The course will review important concepts, theories, and empirical research in the field of pediatric neuropsychology. Students will learn the basic rationale in conducting a pediatric neuropsychological evaluation, including a brief review of many common pediatric assessment measures. In addition, many common pediatric disorders will be reviewed from a neuropsychological perspective including: Dyslexia, Attention Deficit hyperactivity Disorder, Pervasive Development Disorders, Traumatic Brain Injury, Seizure Disorders, and Mental Retardation. Upon completion of the course the student will have a greater appreciation of a neuropsychological conceptual framework and have a better understanding of specific pediatric disorders.

CPSY 5686 Suicide Prevention, Intervention and Postvention (2 Credits)
Suicide is a serious public health issue and challenge for the nation, Colorado, and our local communities. In 2009, suicide claimed the lives of almost 34,000 people in the United States and is the second leading cause of death for college students and men ages 25-34. In Colorado, there are many more suicides than motor vehicle deaths. While most clinicians are focused on the assessment and treatment of people at high risk for suicide, a more comprehensive approach is needed to prevent people from becoming suicidal in the first place. This course covers best practices in suicide prevention, intervention and “postvention” (suicide crisis response) and will explore the particular issues of several vulnerable populations.

CPSY 5687 Contemporary Issues in Geropsy (3 Credits)
This course addresses issues in aging. Topics include healthy aging, aging issues in diverse populations, contemporary options for care, challenges in service delivery, the interplay of medical and mental health needs, mental health treatment approaches and issues, and end-of-life issues.

CPSY 5690 Introduction to the Rorschach (4 Credits)
Exner's Comprehensive System for administering, scoring and development hypotheses with the Rorschach Test. Prerequisite: CPSY 5130.

CPSY 5692 Advanced Rorschach Analysis (2 Credits)
This course is an exploration of advanced topics in Rorschach interpretation. Topics will include: conceptual understanding of the Comprehensive System; content and sequence analysis; differential diagnosis; integrating alternative systems of interpretation with the Comprehensive System; development and use of special scales; appropriate use of computerized interpretation; and integration of Rorschach analysis with personality theory. Prerequisites include course work in Rorschach administration, scoring and basic interpretation; and in personality theory. Students will be expected to score, analyze, and present Rorschach protocols.

CPSY 5700 Adv Personality Assessment (3 Credits)
Projective techniques including Rorschach, storytelling tasks and projective drawings, with a focus both on test content and the patient-examiner relationship in the context of the diagnostic consultant. Prerequisites: CPSY 5130, CPSY 5680, CPSY 5690.

CPSY 5705 Self Report Assessment (3 Credits)
Construction and application of objective instruments, emphasizing the MMPI and MCMI. Students are required to submit test reposts. Prerequisite: CPSY 5130.

CPSY 5706 Self Report Assessment Lab (1 Credit)
Optional. For students anticipating a need for extra help with repost writing.

CPSY 5740 Int Personality Assessment (2 Credits)
This course is the culmination of the assessment sequence, and integrates techniques, approaches and concepts covered in issues in Measurement, Cognitive Assessment, Objective Personality Assessment, and Rorschach. Aspects of the other core courses in the curriculum will also be brought to bear on the question of how to obtain and how to interpret information within various theoretical models for the purposes of answering referral questions and planning interventions. Projective testing will be introduced as a source of behavior samples for which the occasioning environment is known to the psychologist. There will be focus on distinguishing interpretable from irrelevant information, and on integrating interpretable information into meaningful patterns. The goal of using assessment to answer referral question and plan treatments will generate a special focus on report writing.

CPSY 5741 Therapeutic Assessment (2 Credits)
This course explores the advances made in understanding and enhancing the therapeutic impact that assessment can have on clients. We read broadly in the area: from the genesis of collaborative assessment fueled by Fischer to the empirical foundations and structure of Therapeutic Assessment provided by Finn to novel applications of the approach highlighted by Handler. This important movement in assessment is applicable to personality, cognitive, and neuropsychological assessment as well as any professional endeavor that aims to help clients understand themselves in life-changing ways. The course is designed for those with a solid foundation in assessment who wish to develop greater facility in helping their clients.

CPSY 5750 Supervision (2 Credits)
This course is designed to familiarize students with theories of supervision; provide practical, guided experience in peer supervision/consultation; help students understand and critically discuss the supervisory process; aid in gaining awareness of how multicultural issues may affect supervision; and familiarize students with ethical and legal issues in supervision.

CPSY 5755 Supervision Practicum I (1 Credit)
This is a four quarter sequence, 1 quarter credit hour/quarter, in which advanced students will have the opportunity to supervise on beginning student under the overall supervision of a faculty member. Each quarter practicum will include appropriate level readings, group discussions and report writing. Admission to the course with instructor's approval.
CPSY 5756 Supervision Practicum II (1 Credit)
This is a four quarter sequence, 1 quarter credit hour/quarter, in which advanced students will have the opportunity to supervise one beginning student under the overall supervision of a faculty member. Each quarter practicum will include appropriate level readings, group discussions and report writing. Admission to the course with instructor's approval.

CPSY 5757 Supervision Practicum III (1 Credit)
This is a four quarter sequence, 1 quarter credit hour/quarter, in which advanced students will have the opportunity to supervise one beginning student under the overall supervision on a faculty member. Each quarter practicum will include appropriate level readings, group discussions and report writing. Admission to the course with instructor's approval.

CPSY 5758 Supervision Practicum IV (1 Credit)
This is a four quarter sequence, 1 quarter credit hour/quarter, in which advanced students will have the opportunity to supervise one beginning student under the overall supervision of a faculty member. Each quarter practicum will include appropriate level readings, group discussions and report writing. Admission to the course with instructor's approval.

CPSY 5760 Professional Issues II (2 Credits)
This class provides an organized and comprehensive approach to pre-doctoral psychology internship selection, emphasizing an understanding of “fit.” Topics covered include choosing sites; writing cover letters, CVs, and AAPI essays; preparing application materials; interviewing techniques; rank ordering sites; and dealing with emotions related to the process. The course syllabus includes important readings from the current literature. Lectures are balanced with guest appearances by DU Writing Center staff and others. Opportunities are given for role play among the students.

CPSY 5762 Qualitative Data Analysis (3 Credits)
This course, designed for psychology students who are completing their doctoral or masters’ projects, focuses on qualitative data analysis. Throughout the course, we explore different research traditions including phenomenology, grounded theory, ethnography, case study and critical theory. In doing so, we discuss their differing philosophical assumptions, procedures for research, and methods for data collection and analyses. Emphasis is placed on developing skills in qualitative data analysis techniques such as indexing, coding and memo writing. Students also gain experience using qualitative data software (NVIVO 7) and exploring its utility for visual representations and other analytic approaches to understanding their data.

CPSY 5765 Cognitive Behavioral Therapy (2 Credits)
This course focuses on clinical applications of cognitive-behavioral theory. Major theorists in the area are reviewed, including Ellis, Beck, Lazarus, and Meichenbaum. Research utilizing cognitive-behavioral therapy as an evidence-based practice are reviewed. In addition, key cognitive behavioral techniques are demonstrated and practiced.

CPSY 5770 Doctoral Paper Preparation (2 Credits)

CPSY 5775 Clinical Psychology Internsh (8 Credits)

CPSY 5815 Trauma and its Aftermath (2 Credits)
Conceptual model for treating trauma; incidence and specific treatment techniques for various types of trauma (e.g. combat vets, survivors of natural disaster and victims of childhood abuse); professional issues relating to trauma (e.g. secondary PTSD and ethical issues). Students exposed to a variety of reading and expected to integrate current research into clinical application. For advanced students who have both a clinical and conceptual background.

CPSY 5816 Int’l Psychology Externship (5 Credits)
International externship is one component of a yearlong advanced seminar. The five credit course offers students the opportunity to work with victims of disasters in an international setting.

CPSY 5840 Psychopharmacology (2 Credits)

CPSY 5880 Business Issues in Professional Psychology (2 Credits)
This course introduces students to business principles as they apply to professional psychology. Students think through various business practice decisions, such as starting, managing, marketing, and diversifying a psychology practice and consider the related legal, ethical, and financial issues.

CPSY 5899 Doctoral Paper Development (1 Credit)
This course is designed to facilitate the development and writing of the doctoral paper. Students are expected to adhere to the GSPP Doctoral Paper Guidelines and the APA style guidelines. A major feature of the class is student-to-student sharing and critiquing of doctoral project ideas and plans. Students are expected to take advantage of this opportunity to hone their writing skills and develop their doctoral paper proposal. Students have complete the proposal phase of their project further develop their research methodology.

CPSY 5991 Independent Study (1-17 Credits)

CPSY 5992 Directed Study (1-10 Credits)

CPSY 5993 Advanced Field Placement Experience (1-8 Credits)
All PsyD students are required to work as a Psychology Trainee in an outside agency each year prior to the internship year. The minimum total is 384 hours per year. Students are expected to arrange with a field placement to receive psychological clinical training, which could include the following types of experiences: psychotherapy, assessments, group therapy, individual therapy, family therapy, supervision, primary care psychology, intake evaluations, case management, consultation, testing, etc.
CPSY 5994 PsyD Internship (4.8 Credits)
The Graduate School of Professional Psychology (GSPP) requires that all students attend a yearlong or two half-time years of clinical internship. Internship is the clinical experience after the student has completed all courses, the clinical competency examination, and at least three years of residency at GSPP. Students typically apply through APPIC and are offered formal internships. Occasionally students create internships, but they must be approved formally through GSPP prior to the start of the internship. The basic experiences may include training in: psychotherapy, assessments, group therapy, individual therapy, family therapy, supervision, primary care psychology, intake evaluations, case management, consultation, testing, etc.
To register, student must have departmental approval. Students can register half-time for 4 credit hours or full-time for 8 credit hours.

CPSY 5995 Independent Research (1-17 Credits)

Graduate School of Social Work
The Graduate School of Social Work (GSSW) at the University of Denver is internationally recognized as a leader in educating practitioners, scholars, educators and researchers. GSSW’s mission is to foster social responsibility regarding social and economic justice, quality of life and multicultural communities, based on equality for all people. This mission is carried out in a rich educational environment featuring excellent teaching by award-winning faculty, as well as path-breaking research and three institutes focused on child welfare, gerontology and the human-animal connection. GSSW’s doctoral program was one of the first in the United States. The Master of Social Work (MSW) program is nationally ranked in the top 11% and offers concentrations in child welfare, children and youth, family systems, aging services and policy, health and wellness, mental health, organizational leadership and policy, and sustainable development and global practice. The MSW curriculum includes international experiential courses and internships, as well as certificates in animal-assisted social work, couples and family therapy, and social work with Latinos/Latinas. GSSW also offers MSW degree programs on-location in Durango and Glenwood Springs, Colorado.

Graduate School of Social Work
GSSW’s MSW program is ranked in the top 11 percent of all accredited MSW programs in the country by U.S. News & World Report. (http://grad-schools.usnews.rankingsandreviews.com/best-graduate-schools/top-health-schools/university-of-denver-127060)

In addition to excellent instruction by our committed and highly accessible faculty members, our on-campus MSW programs allow you to customize your career preparation by choosing from eight specialized concentrations:

- Aging Services and Policy
- Child Welfare
- Children and Youth: Risks and Positive Development
- Family Systems
- Health and Wellness
- Mental Health
- Organizational Leadership and Policy Practice
- Sustainable Development and Global Practice

In addition, students can work towards three unique certificate programs:

- Animal Assisted Social Work
- Couples Therapy (in cooperation with the Denver Family Institute)
- Social Work with Latino/as

Our Four Corners MSW program (based in Durango, Colorado) and Western Colorado MSW program (based in Glenwood Springs, Colorado) feature weekend scheduling and course content designed to meet the unique needs of local communities in those areas.

Whichever MSW program is right for you, you’ll begin your specialization after just two quarters of study, earlier than in other, more traditional MSW programs.

We also offer a Doctor of Philosophy in Social Work

Accreditation
Since 1933, our MSW program has been accredited by the Council on Social Work Education (CSWE) (http://www.cswe.org), a specialized accrediting body recognized by the Council on Post-Secondary Accreditation.

CSWE accreditation signifies that our MSW program meets nationally accepted standards in eight areas:

- mission, goals and objectives
- curriculum
Certificate in Animal Assisted Social Work

The Animal-Assisted Social Work Certificate is the first of its kind in the nation. It explores the therapeutic use of animals in many types of social work practice—a new and exciting aspect of the field.

By earning this certificate, you'll learn how to create, implement and evaluate AASW programs in which an animal becomes a teacher, therapist, facilitator and companion. You'll learn how to choose the most appropriate animals for particular therapies, and how to care for the animals in accordance with nationally recognized standards.

You'll also understand how to identify, assess and intervene in "link" violence—the frequent connection between animal-abuse and violence toward people.

The AASW certificate adds specialized courses to the MSW curriculum and includes a field internship offering opportunities for AASW practice.

Couples & Family Therapy Certificate

You may begin work toward the Couples and Family Therapy Certificate as part of your concentration curriculum through a cooperative program with the Denver Family Institute (http://www.denverfamilyinstitute.org). The program provides you with:

• advanced learning, and direct clinical training and practice with families, couples and individuals;
• state-of-the-art, hands-on training with master practitioners and family therapy trainers, helping you to become a skilled practitioner;
• the opportunity to develop a clinical specialty, thus facilitating your social work employment opportunities and career preparation; and
• clinical supervision (live and video) for licensure, and the opportunity for dual licensure in both social work, and marriage and family therapy.

You'll take 10 quarter hours of coursework at the Denver Family Institute, completing your first year of work toward the certificate while still at GSSW. After obtaining your MSW, you'll complete an additional year of coursework, two years of post-master's degree supervision requirements and 500 clinical contact hours.

NOTE: Additional fees are required for this certificate and students must be admitted by both programs.

Certificate in Social Work with Latinos/as

The Social Work with Latinos/Latinas Certificate addresses the critical need for bilingual and culturally responsive social workers, preparing you to effectively serve individuals and families of Mexican and Latin American origin.

Certificate courses are based in a model of critical pedagogy (power, oppression, and privilege), which examines the interconnectedness of issues of race, racism, citizenship status, and relationships between the United States and Latin American countries.

The certificate includes:

• an intensive Spanish language summer immersion course (taught collaboratively with the Department of Languages and Literatures)
• an experiential course taught in Latin America
• additional specialized courses for those seeking to work with Latino/a populations
• a field internship offering you the opportunity to work with Spanish-speaking clients

Within GSSW's MSW curriculum, the Latino/a certificate program can be combined with any of our eight concentrations (http://www.du.edu/socialwork/programs/oncampus/twoyear/concentration). Once you complete this certificate, you'll have the knowledge, skills, and linguistic ability to effectively serve Latinos/as and their communities.

Master of Social Work With a Concentration in Aging Services and policy

The Aging Services and Policy concentration prepares social workers to practice across the continuum of services that promote quality of life and independence for older adults and their families. Social workers interested in aging provide clinical care in health, behavioral health, memory care, community and residential settings. Additionally, social workers intervene in social justice issues impacting older adults through educational,
management, program development, advocacy and policy work. This concentration emphasizes culturally responsive practice needed for the increasing diversity among older adults locally, nationally and internationally.

Students engage in field education in a variety of settings such as community service agencies and government agencies, home health and hospice agencies, outpatient and inpatient medical care settings, residential facilities across the continuum of care, gero-psychiatry services, and advocacy agencies. Clients are predominately older adults and their families, but may include clients of all ages. These placements can offer opportunities to gain skills in clinical interventions, care management, group work, program and policy development, advocacy, and administration.

**Master of Social Work With a Concentration in Child welfare**

The Child Welfare concentration prepares social workers for work with children and families served in public and private child welfare agencies. Most of these children and families have experienced child maltreatment. Many of these families are also experiencing poverty, domestic violence, mental illness and substance abuse.

Intervention is focused on building upon individual and family strengths, preventing and alleviating the consequences of child maltreatment, and promoting the safety, permanence and well-being of children who have suffered, or are at risk of, child maltreatment.

**Master of social work with a concentration in Children and youth: Risks and Positive development**

This concentration provides students with knowledge and skills to work from a resilience perspective with adolescents and children in a wide variety of settings: mental health, family services agencies, schools, treatment centers, youth correctional facilities, and community agencies.

The concentration gives students expertise in the theories and practices for prevention, early intervention and clinical treatment with children and youth. The overarching frameworks for the concentration are positive youth development and resilience. Students learn clinical strategies that are particularly effective for working with children and youth.

**Master of Social Work With a Concentration in family systems**

The Family Systems Practice concentration provides students with knowledge and skills to work from a family systems perspective with adults, adolescents and children in a wide variety of settings: mental health and family services agencies, schools, treatment centers and community agencies.

“Family” is defined broadly to include biological lineages, affiliational families and communities. Social workers using this perspective may intervene with individuals, couples, several members of a family, peer groups, work associates, schools, classrooms and organizations. Clients are viewed as being part of a larger context, situated in multiple social locations: race, ethnicity, class, sexual orientation, gender identity, age, ability and citizenship status. Assessment and intervention are applied within this context, with a goal of strengthening families and other systems, and the individuals within these systems.

**Master of Social Work With a Concentration in health and wellness**

The Health and Wellness concentration prepares students to be practitioners in diverse health, integrated health and wellness settings. Students study a variety of practice skills, theories and evidence-based modalities to prepare for social work in comprehensive and specialized health care facilities, public health clinics and programs and/or wellness and preventative healthcare programs.

The Health and Wellness concentration allows students to practice specific skill sets that incorporate problem-solving, integrative and strengths-based approaches to care. Students gain exposure to classical Western medical social work settings (such as hospitals), to integrative health settings (where mental health, drug and alcohol intervention, and medical care are connected) and to organizations primarily focused on promoting mental, emotional, physical, spiritual, community, social and/or environmental wellness. Students can choose to experience a range of options from learning medical terminology to studying complementary and alternative medicine techniques focused on the mind-body connection.

Course work also illuminates the history of health and health disparities in the United States and globally, preparing students for culturally competent clinical practice, as well as leadership and advocacy in health and wellness administrative and policy practice.

**Master of Social Work With a Concentration in mental health**

The Mental Health concentration focuses on clinical interventions, advanced theory and research related to mental health, substance use and trauma. Core topics include the assessment of mental health and substance use, skills in crisis intervention and suicide risk-assessment, policy related to mental health and substance use intervention and key clinical interventions and skills.

Courses include intervention in drug dependency and mental health interventions from several theoretical perspectives: solution focused interventions, cognitive approaches, trauma informed interventions, existential, interpersonal/psychodynamic and strengths/empowerment approaches in community mental health.

Field education placements are offered in agencies that provide psychotherapy, crisis intervention, case management and other clinical interventions related to mental health, substance use and trauma.
Master of Social Work With a Concentration in organizational leadership and policy practice

The Organizational Leadership and Policy Practice concentration prepares social work practitioners to work at community, organizational and societal levels. Practitioners work to build the capacity of communities, organizations and policy-makers to advance human rights, social justice and the well-being of all peoples. Community social workers use leadership skills to develop programs, administer organizations, build community coalitions, craft and analyze social policy, advocate for policy and program change, and implement program and policy research to support best practices for social services delivery. Students complete field work in community based settings and organizations that address a range of social problems and policy issues such as poverty, women’s rights, health care, homelessness and education.

Master of Social Work With a Concentration in sustainable development and global practice

Humans need an ecological understanding of their place in the natural environment to promote personal health and well-being, environmental awareness, sense of belonging in a community, sustainability, resilience and advocacy. Students will develop practice behaviors in assessment, community engagement, education, health promotion, mobilization, organizing, poverty reduction, environmental preservation and capacity building strategies. Students in the Sustainable Development and Global Practice concentration will learn about local and global policies and laws relevant to humane treatment of human and animals, human security, sustainable development strategies in countries emerging from conflict, conservation of nature, biodiversity and sustainability, land use, and water use.

Courses and field internships will be guided by the principles of human rights, global justice, and sustainability and will address complex social and economic development, reconciliation and restorative justice, implementation of sustainable development strategies in countries emerging from conflict, conservation of nature, and biodiversity issues to support the systemic interconnections of human-animal and ecosystem health using practice-informed environmental health and capacity-building strategies.

Students learn to partner effectively with families, communities, non-governmental organizations (NGOs) and institutions by developing competencies in assessment, community engagement, education, health promotion, mobilization, environmental preservation, organizing and developing strategies to reduce poverty and build capacity.

Master of Social Work With a Concentration in Clinical Social Work (Western Colorado Program)

Launched in the fall of 2013, the Western Colorado MSW Program is helping to meet the human services needs of organizations and communities in western Colorado, including Grand Junction, Glenwood Springs and Rifle. The program is based in Glenwood Springs.

Program Objectives:

- provide professional education to support local workforce development
- address community concerns and the special needs of rural communities
- strengthen the professional social work infrastructure of Western Colorado communities

Teaching Methods:

- summer intensive courses taught on-site in the Western Colorado region by GSSW faculty and local social work professionals
- classes simulcast and broadcast from Denver using Interactive Video
- online and hybrid courses using Web-based technology
- field education internships throughout the Western Colorado area
- online access to the University of Denver library for both students and faculty

Master of Social Work With a Concentration in Clinical Social Work (Four Corners Program)

GSSW’s Four Corners MSW Program operates through a unique partnership with the Colorado Department of Human Services, Fort Lewis College, Southwest Colorado Community College and many other Four Corners agencies.

Since 2002, this program—based in Durango, Colorado— has met a need for graduate-level MSW education in the rural and tribal communities of the Four Corners region that includes southwestern Colorado, Arizona, Utah and New Mexico. Through the program, Four Corners residents can earn the MSW degree in or near their home communities.

Program Objectives:

- enhance social service delivery systems
- address community problems and the special needs of rural communities
address the concerns and needs of multi-ethnic communities, with special emphasis on local Native American communities
strengthen the professional social work infrastructure of Four Corners communities

Teaching Methods:
- GSSW faculty and local social work professionals teach courses on-site in Durango
- we use Interactive TV (ITV) to simulcast and broadcast classes from Denver
- we provide online and hybrid courses using Web-based technology
- GSSW offers field education internships throughout the Four Corners area
- both you and your instructors have online access to the University of Denver's Penrose Library, part of DU's new Anderson Academic Commons

doctor of philosophy in social work

The doctoral program at the Graduate School of Social Work trains master's level human service professionals from across the country and around the world to become social work researchers, educators and policy experts.

Founded in 1968, our PhD program is among the oldest social work doctoral programs in the nation. Here, you'll work alongside distinguished faculty members (http://www.du.edu/socialwork/facultyandstaff/facultydirectory) to conduct research, write publications and gain substantive and methodological knowledge in the field of social work.

As doctoral students, you're encouraged to develop a solid understanding of the theories, social interventions and policies that guide research in your substantive area.

The program emphasizes:
- knowledge development through advanced coursework in theory, policy and research methodology;
- research competencies through required and elective courses, graduate research assistantships and dissertation research;
- collaboration with faculty working in diverse, substantive areas including high-risk youth, child welfare, gerontology, mental health, substance abuse and poverty; and
- teaching skills through a teaching practicum, elective courses and faculty mentoring.

Master of Social Work

Application dates
GSSW accepts and processes MSW applications on a rolling basis. To receive priority consideration for financial aid, you must submit your completed application by Jan. 15, 2014.

Entry dates
Two-year students begin the MSW program in fall quarter.

Advanced standing students begin the MSW program in early July. The advanced standing program is available only to applicants with a baccalaureate degree in social work from a college or university whose social work program is accredited by, or in accreditation candidacy with, the Council on Social Work Education (CSWE) at the time the degree is conferred.

How to apply
To apply, you must submit an application online. A completed MSW application includes:
- the Master of Social Work Application (submitted online)
- the Career Goals Statement; For detailed instructions, view the printable instructions (PDF)
- an Experience Summary (submitted online)
- an official transcript from each college or university previously attended (Official paper transcripts must be mailed to the GSSW Office of Admission)
- two written recommendations
  - You'll need reference names and valid email addresses during the online application process
  - Recommenders will be emailed the appropriate form and detailed instructions on how to submit their recommendation electronically
- a résumé (submitted online)
- a $65 application fee (submitted online or mailed separately)

Please note that GRE scores are not required as part of our MSW admission process.

International students who wish to apply to the MSW program also must submit additional items listed on our international student page.
certificates

Overall Requirements for Admission to Certificate Programs

Students who wish to be considered for admission to any one of the four academic certificate programs must:

- successfully complete the foundation curriculum at GSSW or be admitted to the MSW program as an advanced standing student
- be in good standing in both academics and field
- declare intention to complete certificate on Course Planning Worksheet according to established deadlines
- be willing and able to attend all classes required for the certificate at the time these classes are offered
- be willing and able to meet all academic requirements for their concentration and practice track, as well as for the certificate program
- pay any additional tuition or fees as required
- meet any additional eligibility requirements listed within the individual certificate descriptions below

Animal-Assisted Social Work Certificate

Students who wish to be considered for admission to the Animal-Assisted Social Work Certificate program must meet all of the general requirements for admission to certificate programs listed in the introductory section. In addition, they must complete the introductory course (SOWK 4795) prior to taking the SOWK 4796 and SOWK 4797 and they must attend a series of scheduled experiential AASW activities.

Certificate in Couples and Family Therapy

Students who wish to be considered for admission to the Certificate in Couples and Family Therapy must meet all of the general requirements for admission to the certificate programs listed in the introductory section. In addition, they must apply directly to the Denver Family Institute (http://denverfamilyinstitute.org). DFI reserves space for GSSW students each year, but openings are limited. The program only accepts applications from students who will complete the entire certificate program including the post-graduate coursework, supervision and clinic hours. A strong sense of self and social work values, interest in couples and family therapy work, and the desire to be part of a clinical community are also a plus. Applications are accepted in the Spring for admission in Fall Quarter. Limited additional spaces in the program are reserved for advanced standing students.

Social Work with Latinos/as Certificate

Students who wish to be considered for admission to the Social Work with Latinos/as Certificate program must meet all of the general requirements for admission to certificate programs. In addition, the Social Work with Latinos/as Certificate program requires:

- The ability and willingness to complete the intensive Spanish language immersion course (SOWK 4750 – Critical Perspectives on the Latino Context) during the spring or summer quarter preceding the concentration year. Advanced standing students must complete this course during their first summer of enrollment.
- The ability and willingness to complete SOWK 4757 – SW & Mexican Culture: An Intensive Practice & Spanish Immersion course.* This is a travel course to Mexico. Two-year students will register for this course with their Spring course load in the foundation year, with travel occurring in the summer. Advanced standing students will register for this course as part of their Summer course load.
- Ability to demonstrate a minimum proficiency level of Intermediate (or higher) in Spanish. A proficiency exam, if needed, can will be provided by GSSW.

*Please note: Due to the nature of international travel, circumstances may arise that inhibit our best travel intentions. In the event that travel to Mexico is not possible, the faculty will develop an alternative experiential course that may include other relevant domestic or international travel.

PhD Program

To apply to the GSSW doctoral program, you must have:

- a master's degree
  - conferred by a school of social work accredited by the Council on Social Work Education (CSWE), or
  - in one of the social sciences, and demonstrated evidence of substantial professional experience in the social work field;
- a clear interest in developing advanced theory, policy and research skills in a substantive area relevant to the field of social work;
- a superior academic record in all previous work; and
- the maturity, intellectual ability and readiness for advanced study.

Two years of post-master's practice experience is preferred, but not mandatory.

Doctoral students are expected to enter the program with a basic proficiency in descriptive and inferential statistics. This knowledge is necessary for several of the required doctoral courses. If you lack this required statistical proficiency, you should plan to take a basic statistics course before enrolling at GSSW.
Our on-campus MSW programs allow you to customize your career preparation by choosing from eight specialized concentrations:

- Aging Services and Policy
- Child Welfare
- Children and Youth: Risks and Positive Development
- Family Systems
- Health and Wellness
- Mental Health
- Organizational Leadership and Policy Practice
- Sustainable Development and Global Practice

In addition, students can work towards three unique certificate programs:

- Animal Assisted Social Work
- Couples Therapy (in cooperation with the Denver Family Institute)
- Social Work with Latino/as

Our Four Corners MSW program (based in Durango, Colorado) and Western Colorado MSW program (based in Glenwood Springs, Colorado) feature weekend scheduling and course content designed to meet the unique needs of local communities in those areas.

Whichever MSW program is right for you, you'll begin your specialization after just two quarters of study, earlier than in other, more traditional MSW programs.

We also offer a Doctor of Philosophy in Social Work.

**Certificate in Animal-Assisted Social Work**

The Animal-Assisted Social Work Certificate is the first of its kind in the nation. It explores the therapeutic use of animals in many types of social work practice—a new and exciting aspect of the field.

**Program Requirements**

**Field Internship Requirements**

Students enrolled in this certificate program are required to complete 15 hours of concentration year field internship (five in each of three quarters) in a program or agency that either offers animal-assisted social work or is interested in developing it. Students must include a plan for integrating the specific requirements of the certificate into those of the internship on the Individualized Field Education Plan (IFEP). The internship must fulfill the requirements of the concentration practice track, as well as those of the certificate.

**Coursework Requirements**

Within their course of study, AASW Certificate program students must include the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOWK 4795</td>
<td>Integration of Animals Into Therapeutic Settings</td>
<td>3</td>
</tr>
<tr>
<td>SOWK 4796</td>
<td>Animal Assisted Social Work Practice</td>
<td>3</td>
</tr>
<tr>
<td>SOWK 4797</td>
<td>Issues for Evidence-Supported Animal Assisted Social Work</td>
<td>3</td>
</tr>
<tr>
<td>SOWK 4960</td>
<td>Concentration Field Internship: Clinical</td>
<td>18</td>
</tr>
<tr>
<td>or SOWK 4961</td>
<td>Concentration Field Internship: Community</td>
<td></td>
</tr>
</tbody>
</table>

**Certificate in Couples and Family Therapy**

You may begin work toward the Couples and Family Therapy Certificate as part of your concentration curriculum through a cooperative program with the Denver Family Institute (http://www.denverfamilyinstitute.org).

**Program Requirements**

**Field Internship Requirements**

A limited number of internship placements for concentration year and advanced standing students are made available each year at DFI for GSSW students. All DFI field internship students must also enroll in, and complete, the Couples and Family Therapy Certificate Program. However, students in this certificate may also complete their field internships elsewhere.
Coursework Requirements

Couples and Family Therapy Certificate students in the Families Systems concentration will take a Theory for Practice course and two Methods/Skills courses at DFI. These courses are taken in place of the Theory for Practice and Methods/Skills courses that GSSW requires within the Families Systems concentration (SOWK 4320, SOWK 4420, and choice of 3rd Methods/Skills). However, in order to receive credit for these courses at GSSW, students must register at GSSW for the equivalent DFI courses, in addition to registering for these courses at the Denver Family Institute. Students will earn ten hours of GSSW credit for courses taken at DFI. As a result, most two-year students participating in this program graduate with a minimum of 91 credit hours.

At GSSW, students will complete all other remaining course requirements for the concentration.

Students in other concentrations also may participate in the certificate program, completing all required courses for their concentration and taking DFI courses as 10 hours of their electives.

Fees

The Denver Family Institute charges tuition, payable at the beginning of each quarter. This fee is in addition to GSSW tuition, but it is less than half of what non-GSSW students are charged. The reduction in fees is given to GSSW students attending DFI as a scholarship contingent upon graduation from the Couples and Family Therapy Certificate program. For current fee information, please contact the Denver Family Institute (http://denverfamilyinstitute.org).

Certificate in Social Work with Latinos/as

The Social Work with Latinos/as Certificate addresses the critical need for bilingual and culturally responsive social workers, preparing students to effectively serve individuals and families of Mexican and Latin American origin.

Program Requirements

Field Internship Requirements

Students enrolled in this certificate program are required to complete fifteen hours of concentration year field internship (five in each of three quarters) in a program or agency offering the opportunity to work with Latino/a clients and use Spanish at least 30% of the time. Students must include a plan for integrating the specific requirements of the certificate into those of the internship on the Individualized Field Education Plan (IFEP). The internship must fulfill the requirements of the concentration practice track, as well as those of the certificate.

Coursework Requirements

Within their course of study, Social Work with Latinos/as Certificate program students must include the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Total Credits 27

Master of Social Work with a Concentration in Aging Services and Policy

The Aging Services and Policy concentration prepares social workers to practice across the continuum of services that promote quality of life and independence for older adults and their families. Social workers interested in aging provide clinical care in health, behavioral health, memory care, community and residential settings. Additionally, social workers intervene in social justice issues impacting older adults through educational, management, program development, advocacy and policy work. This concentration emphasizes culturally responsive practice needed for the increasing diversity among older adults locally, nationally and internationally.

Students engage in field education in a variety of settings such as community service agencies and government agencies, home health and hospice agencies, outpatient and inpatient medical care settings, residential facilities across the continuum of care, gero-psychiatry services, and advocacy agencies. Clients are predominately older adults and their families, but may include clients of all ages. These placements can offer opportunities to gain skills in clinical interventions, care management, group work, program and policy development, advocacy, and administration.

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

Aging Services and Policy Concentration Curriculum

THEORY FOR PRACTICE (3 credits required)

- SOWK 4350 Evolving Perspectives and Trends in Aging

Also Recommended:

- SOWK 4325 Evolving Perspectives and Trends in Health and Wellness
- SOWK 4320 Theories and Practice of Family Systems Therapy
- SOWK 4370 Community and Organizational Change: Theory for Practice

METHODS/SKILLS (9 credits required)

- SOWK 4523 Care Management Skills and Resources to Promote Community Living

AND AT LEAST TWO OF THE FOLLOWING COURSES:

- SOWK 4445 Social Work Assessment and Intervention in Aging
- SOWK 4340 Leadership and Supervision Skills
- SOWK 4422 Strategies for Family Meetings
- SOWK 4723 Social Work Practice in Health Care
- SOWK 4725 Mind-Body Connections and Social Work Practice
- SOWK 4741 Grief and Loss Across the Lifespan
- SOWK 4330 Assessment of Mental Health and Drug Use in Adults
- SOWK 4721 Existential Social Work Practice
- SOWK 4401 Integrated Health Care: Models and Practice
- SOWK 4501 Wellness Prevention and Intervention Across the Lifespan

POLICY & PROGRAM ADVOCACY: FOSTERING SOCIAL & ECONOMIC JUSTICE (3 credits required)

- SOWK 4650 Aging Policy

Also Recommended:

- SOWK 4645 Health Care Policy

RESEARCH (6 credits required)

- SOWK 4900 Methods for Evaluating Practice and Programs

& SOWK 4901 and Applied Practice Evaluation Research (Research courses must be taken in sequence. The research will be conducted in the Student's field placement.)

VALUES FOR PRACTICE (3 credits required)

AT LEAST THREE CREDITS FROM THIS LIST:
SOWK 4732  Disrupting Privilege through Anti-Oppressive Practice  
SOWK 4232  Advanced Multicultural Practice: Critical Race Theory Praxis  
SOWK 4764  Historical Trauma and Healing  
SOWK 4235  Disproportionality and Disparities Across Systems: The Impact on Children and Youth  
SOWK 4240  Intergenerational Justice  
SOWK 4749  Social Work Interventions with Latinos/as  
SOWK 4751  Global Relations and Poverty in Mexico  
SOWK 4759  Global Cultural Perspectives: Consensus and Conundrums (SOWK 4971 Social Work in Thailand)  
SOWK 4753  Social Development in Latin America  
SOWK 4758  Social Work in Kenya: Context, Conservation, Empowerment, Sustainability (SOWK 4971 SW in Postwar Bosnia)  
SOWK 4890  Contemporary Global Issues  
SOWK 4971  Experimental Class (Social Work in Thailand)  
SOWK 4990  Topics in Social Work (as approved, titles vary)  

**INTERNSHIP (15 credit minimum required)**  
SOWK 4970  Concentration Field Internship  

**CAPSTONE (1 credit required)**  

**ELECTIVE COURSES RELEVANT TO AGING SERVICES POLICY INCLUDE: (12 credits required)**  
- SOWK 4730  Cognitive Approaches to Social Work Practice  
- SOWK 4700  Solution Focused Brief Practice  
- SOWK 4735  Interpersonal Approaches to Counseling  
- SOWK 4754  Trauma and Recovery in Social Work Practice  
- SOWK 4755  Interventions for Responses to Trauma  
- SOWK 4775  Social Work with Adult Groups  
- SOWK 4784  Suicide Prevention and Crisis Intervention  
- SOWK 4971  Experimental Class (Helping Military Families)  

* In addition to electives above, students may take courses from other concentration areas OR up to 10 credits of coursework from other DU graduate programs with the approval of the advisor and Associate Dean for Academic Affairs  

**TOTAL CREDITS REQUIRED FOR CONCENTRATION CURRICULUM: 52**

### Master of Social Work with a Concentration in Child Welfare

The Child Welfare concentration prepares social workers for work with children and families served in public and private child welfare agencies. Most of these children and families have experienced child maltreatment. Many of these families are also experiencing poverty, domestic violence, mental illness and substance abuse.  

Intervention is focused on building upon individual and family strengths, preventing and alleviating the consequences of child maltreatment, and promoting the safety, permanence and well-being of children who have suffered, or are at risk of, child maltreatment.  

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

* In addition to electives above, students may take courses from other concentration areas OR up to 10 credits of coursework from other DU graduate programs with the approval of the advisor and Associate Dean for Academic Affairs  

**TOTAL CREDITS REQUIRED FOR CONCENTRATION CURRICULUM: 52**  

**Master of Social Work with a Concentration in Children and Youth: Risks and Positive Development**  

This concentration provides students with knowledge and skills to work from a resilience perspective with adolescents and children in a wide variety of settings: mental health, family services agencies, schools, treatment centers, youth correctional facilities, and community agencies.  

The concentration gives students expertise in the theories and practices for prevention, early intervention and clinical treatment with children and youth. The overarching frameworks for the concentration are positive youth development and resilience. Students learn clinical strategies that are particularly effective for working with children and youth.  

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

Master of Social Work with a Concentration in Family Systems

The Family Systems Practice concentration provides students with knowledge and skills to work from a family systems perspective with adults, adolescents and children in a wide variety of settings: mental health and family services agencies, schools, treatment centers and community agencies.

“Family” is defined broadly to include biological lineages, affiliational families and communities. Social workers using this perspective may intervene with individuals, couples, several members of a family, peer groups, work associates, schools, classrooms and organizations. Clients are viewed as being part of a larger context, situated in multiple social locations: race, ethnicity, class, sexual orientation, gender identity, age, ability and citizenship status. Assessment and intervention are applied within this context, with a goal of strengthening families and other systems, and the individuals within these systems.

The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.

**TOTAL CREDITS REQUIRED FOR CONCENTRATION CURRICULUM: 52**

**Master of Social Work with a Concentration in Health and Wellness**

The Health and Wellness concentration prepares students to be practitioners in diverse health, integrated health and wellness settings. Students study a variety of practice skills, theories and evidence-based modalities to prepare for social work in comprehensive and specialized health care facilities, public health clinics and programs and/or wellness and preventative healthcare programs.

The Health and Wellness concentration allows students to practice specific skill sets that incorporate problem-solving, integrative and strengths-based approaches to care. Students gain exposure to classical Western medical social work settings (such as hospitals), to integrative health settings (where mental health, drug and alcohol intervention, and medical care are connected) and to organizations primarily focused on promoting mental, emotional, physical, spiritual, community, social and/or environmental wellness. Students can choose to experience a range of options from learning medical terminology to studying complementary and alternative medicine techniques focused on the mind-body connection.

Course work also illuminates the history of health and health disparities in the United States and globally, preparing students for culturally competent clinical practice, as well as leadership and advocacy in health and wellness administrative and policy practice.

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

**Master of Social Work with a Concentration in Mental Health**

The Mental Health concentration focuses on clinical interventions, advanced theory and research related to mental health, substance use and trauma. Core topics include the assessment of mental health and substance use, skills in crisis intervention and suicide risk-assessment, policy related to mental health and substance use intervention and key clinical interventions and skills.

Courses include intervention in drug dependency and mental health interventions from several theoretical perspectives: solution focused interventions, cognitive approaches, trauma informed interventions, existential, interpersonal/psychodynamic and strengths/empowerment approaches in community mental health.

Field education placements are offered in agencies that provide psychotherapy, crisis intervention, case management and other clinical interventions related to mental health, substance use and trauma.

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

- SOWK 4755  Interventions for Responses to Trauma
- SOWK 4523  Care Management Skills and Resources to Promote Community Living
- SOWK 4741  Grief and Loss Across the Lifespan
- SOWK 4725  Mind-Body Connections and Social Work Practice
- SOWK 4721  Existential Social Work Practice

* In addition to electives above, students may take courses from other concentration areas OR up to 10 credits of coursework from other DU graduate programs with the approval of the advisor and Associate Dean for Academic Affairs

**TOTAL CREDITS REQUIRED FOR CONCENTRATION CURRICULUM: 52**

**Master of Social Work with a Concentration in Organizational Leadership and Policy Practice**

The Organizational Leadership and Policy Practice concentration prepares social work practitioners to work at community, organizational and societal levels. Practitioners work to build the capacity of communities, organizations and policy-makers to advance human rights, social justice and the well-being of all peoples. Community social workers use leadership skills to develop programs, administer organizations, build community coalitions, craft and analyze social policy, advocate for policy and program change, and implement program and policy research to support best practices for social services delivery. Students complete field work in community based settings and organizations that address a range of social problems and policy issues such as poverty, women’s rights, health care, homelessness and education.

*The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.*

TOTAL CREDITS REQUIRED FOR CONCENTRATION CURRICULUM: 52

Master of Social Work with a Concentration in Sustainable Development and Global Practice

Humans need an ecological understanding of their place in the natural environment to promote personal health and well-being, environmental awareness, sense of belonging in a community, sustainability, resilience and advocacy. Students will develop practice behaviors in assessment, community engagement, education, health promotion, mobilization, organizing, poverty reduction, environmental preservation and capacity building strategies. Students in the Sustainable Development and Global Practice concentration will learn about local and global policies and laws relevant to humane treatment of human and animals, human security, sustainable development strategies in countries emerging from conflict, conservation of nature, biodiversity and sustainability, land use, and water use.

Courses and field internships will be guided by the principles of human rights, global justice, and sustainability and will address complex social and economic development, reconciliation and restorative justice, implementation of sustainable development strategies in countries emerging from conflict, conservation of nature, and biodiversity issues to support the systemic interconnections of human-animal and ecosystem health using practice-informed environmental health and capacity-building strategies.

Students learn to partner effectively with families, communities, non-governmental organizations (NGOs) and institutions by developing competencies in assessment, community engagement, education, health promotion, mobilization, environmental preservation, organizing and developing strategies to reduce poverty and build capacity.

The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.

Master of Social Work with a Concentration in Clinical Social Work (Western Colorado Program)

Launched in the fall of 2013, the Western Colorado MSW Program is helping to meet the human services needs of organizations and communities in western Colorado, including Grand Junction, Glenwood Springs and Rifle. The program is based in Glenwood Springs. The program is tailored to the needs of each individual cohort, so course offerings in the concentration curriculum will vary, but will include some or all of the classes given in the course list below.

The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.

ELECTIVES / CERTIFICATES

Master of Social Work with a Concentration in Clinical Social Work (Four Corners Program)

GSSW’s Four Corners MSW Program operates through a unique partnership with the Colorado Department of Human Services, Fort Lewis College, Southwest Colorado Community College and many other Four Corners agencies. The program is tailored to the needs of each individual cohort, so course offerings in the concentration curriculum will vary, but will include some or all of the classes given in the course list below.

Since 2002, this program—based in Durango, Colorado—has met a need for graduate-level MSW education in the rural and tribal communities of the Four Corners region that includes southwestern Colorado, Arizona, Utah and New Mexico. Through the program, Four Corners residents can earn the MSW degree in or near their home communities.

The minimum credits required for the MSW degree is 90 (60 for advanced standing students). Part-time options are available in consultation with student advisor.

Doctor of Philosophy in Social Work

The doctoral program at the Graduate School of Social Work trains master's level human service professionals from across the country and around the world to become social work researchers, educators and policy experts.

Founded in 1968, our PhD program is among the oldest social work doctoral programs in the nation. Here, you'll work alongside distinguished faculty members (http://www.du.edu/socialwork/facultyandstaff/facultydirectory) to conduct research, write publications and gain substantive and methodological knowledge in the field of social work.

University policy requires a minimum of 135 quarter hours beyond a baccalaureate for the doctor of philosophy degree in social work. Up to 60 quarter hours toward this requirement may be credited for “A” or “B” work completed as part of a master’s degree conferred through an accredited school of social work.

Elective Courses 23-82

In addition to the core courses, students must complete 23 elective hours in theory, policy, research methodology/analysis, and in a substantive area of study. Students work with their advisor and other faculty members to develop an Educational Plan that includes 23 elective hours.

- One three-credit policy course
- One three-credit theory course
- Six credits of advanced methodology and statistics
- SOWK 5991 Independent Study (Maximum of 8 credits permitted)

Total Credits 76-135

Non-Coursework Requirements

- Comprehensive Examination
- Dissertation
- Oral Defense

Courses

SOWK 4001 Social Work Skills Across Client Systems: Lab (3 Credits)
This foundation course focuses on basic skills for micro social work practice with individuals and small groups. The framework of intentional interviewing teaches students to think critically about applying the skills for engagement, assessment and intervention. Attention focuses on use of these skills with clients from multiple social identities (e.g. ethnic, racial, sexual orientation, gender affiliation) and the pitfalls of practitioner micro-aggressions. An active learning approach requires students to participate in role-play exercises both in and outside of class. Students digitally record some of those exercises and share them with the class and instructor.

SOWK 4003 Clinical Social Work Theory and Practice (3 Credits)
This foundation course helps students develop a multi-dimensional assessment and intervention framework for clinical social work practice. This course builds upon knowledge of human behavior in the social environment and adds a focus on theories of change - at the individual and family level. The course is grounded in empirical information about the importance of relationship skills, across a variety of classic and modern approaches to intervention. We use a social work lens to emphasize the importance of context in client lives, including their socioeconomic status, cultural history, and experiences of oppression. Since no single theory captures the totality of human experiences, we integrate a variety of intervention techniques from multiple human behavior theories and ground them in a social work framework for ethical and effective clinical practice.

SOWK 4006 Human Behavior and the Social Environment: Theory and Practice (3 Credits)
This foundation course provides an overview of theoretical frameworks for understanding human behavior from a social work perspective. Theories reviewed include the developmental stages across the life cycle in terms of psychological, cognitive, moral, spiritual, identity and social development. Students apply a biopsychological assessment across the life span. The course emphasizes a social work perspective and key frameworks for social work, with an emphasis on the person in environment and systems theory as they describe diverse individual behavior in relation to social class, race and ethnicity, age, gender orientation, sexual orientation, and other multicultural backgrounds. The course aims to develop students’ foundational understanding of how theories are used to promote relationship development with diverse individuals and to guide interventions across all system levels. Students may test out of this course and substitute an advanced course in human development, with advisor approval, if they have already successfully completed an equivalent course in human development.
SOWK 4007 Community and Macro Social Work Theory and Practice (4 Credits)
This foundation course provides students with a foundational level understanding of macro social work practice and roles. The course builds upon knowledge of human behavior in the social environment, and adds theories of change to understand diverse communities and social service networks and the relationship of local, national and global interventions. The course introduces students to empirically supported models and emerging interventions that address macro level social issues. Students complete community/organizational assessments and also participate in work groups to learn how to engage, assess, and intervene in communities and organizations.

SOWK 4020 Integrated Social Work Practice for Social Justice (4 Credits)
This foundation course focuses on professional development and identity for social work practice. The course emphasizes values, ethics and ethical decision making in the context of the history of the profession. Students are introduced to person-in-environment, critical theory and empowerment perspectives and apply these concepts to current field of practice and social work roles. Through integration of field placement experiences, students analyze and apply social work frameworks and generalist practice theories to current social justice challenges and diverse contexts that social workers face.

SOWK 4120 Social Policy Analysis, Advocacy, and Practice (3 Credits)
This foundation course analyzes contemporary societal needs and problems, as well as the historical and current context of U.S. social welfare programs and policies. It presents frameworks used to define social problems and analyze social problems, and introduces students to the policy-making process and the role of policy in service delivery with special emphasis on programs designed to aid the poor and the policies that shape them. The course is designed to help social workers advocate for policies within the social welfare system that advance social well-being and fulfill their ethical obligations to improve social conditions and promote social justice.

SOWK 4132 Power, Privilege and Oppression from a Critical Multicultural Perspective (3 Credits)
This foundation course examines the phenomena of power, privilege and oppression and their effect on individuals, families and communities in the context of the values of social and economic justice and the social work profession. The course is intended to increase awareness of the intersectionality of multiple oppressions with a focus on race/ethnicity, gender, socioeconomic status and sexual orientation. Students will gain a beginning self-awareness to identify the influence of personal biases and values that impact practice with diverse groups.

SOWK 4150 Foundation Seminar (1 Credit)
Required seminar format used to facilitate the integration of the foundation field practicum and the professional foundation course content; emphasis on linking classroom learning with practice in the field, integrating theory with professional practice; field practicum situations and issues used for discussion and deliberation. Co-requisite: SOWK 4950.

SOWK 4201 Evidence for Practice (3 Credits)
This foundation course focuses on developing student skills in identifying, understanding, and using empirical evidence in support of their social work practice. Students review strategies for finding relevant empirical evidence (also covered in Integrated Social Work Practice for Social Justice). The course introduces students to meta-analyses and systematic reviews for use in support of their practice. The course aids students in developing a familiarity with basic research concepts such as research designs, measurement, and sampling so as to critique the utility of evidence for practice. Students also engage in critically examining available evidence for biases and relevance for under-served populations.

SOWK 4232 Advanced Multicultural Practice: Critical Race Theory Praxis (3 Credits)
Advanced Multicultural Practice: Critical Race Theory Praxis is a micro-, mezzo-, and macro practice course that uses the fundamentals of Critical Race Theory (CRT) as a framework for contextualizing and intervening with client systems. This course is a values elective for all concentrations. CRT is used as a framework to examine, critique, and challenge the way that race and racism is unwittingly sustained and perpetuated by traditional social work approaches to the amelioration of personal and social ills. Through this course, students learn the central tenets of CRT, how to evaluate traditional social work practice using these tenets, and begin to design to design a professional social work practice that uses CRT tenets as a foundation for micro-, mezzo-, and macro-level interventions. This course is offered within the concentration curriculum as a Values for Practice course to assist in the training and preparation of social workers practicing with historical underrepresented and marginalized clients and communities of color. Students develop skills and techniques grounded in anti-oppressive culturally grounded social work practice.

SOWK 4235 Disproportionality and Disparities Across Systems: The Impact on Children and Youth (3 Credits)
This course will explore the interconnectedness of institutional racism and discrimination across major social systems within the U.S., focusing on the historical context of current racial disproportionalities and disparities in youth service systems such as child welfare, juvenile justice, mental health, education, and health. Using a critical lens, the course is designed to help students analyze how policy decisions have long-range impact on generations; specifically for children and youth of color. Students will have the opportunity to apply this critical lens to their current field placement and the youth populations they serve. As an elective course, the class is open to all GSSW students; however, students concentrating in child welfare, children and youth, and families are especially encouraged to take the course.

SOWK 4240 Intergenerational Justice (3 Credits)
This course engages students in the conversation, scholarship, and social work practice issues related to how social justice is promoted across age groups and generational cohorts (i.e., baby boomers, generation X, millennial generation). While looking at debates for how families, local communities, states, and nations link age to power, decision-making, funding, and access to resources, the course also examines what within age group issues of injustice and inequality persist. Topics include: generational equity in terms of government budgets and debt, intergenerational issues related to sustainability and ecological justice, age-based versus need-based service delivery models, interventions to address intergenerational conflicts within families, and best practices in intergenerational social service models. This course is designed as a seminar course for social work students from any concentration to explore values related to social justice as they play out across all levels of practice.
SOWK 4250 Concentration Seminar (1 Credit)
This course is taken (by distance education students only) concurrently with the concentration year field practicum and the concentration year required courses. The purpose of this course is to integrate the concentration field experience and concentration year course work to prepare students for employment as professional social workers. This is also an evolving seminar co-created between faculty and students. Clinical issues and skill development at a more advanced clinical level is integrated into the seminar format as well as topics the student and faculty members agree upon that will enhance their first year learning.

SOWK 4299 Advanced Standing Seminar (3 Credits)
The seminar reviews knowledge, skills and values that form the basis of GSSW concentration year curricula in clinical practice, community practice and policy practice. The seminar combines content planned by instructors with individualized guided study and planning for field instruction based on student self-assessments. Prerequisite: Admission to advanced standing program.

SOWK 4305 Child Maltreatment: Causes and Developmental Consequences (3 Credits)
Examines theory and research concerning causes and developmental consequences of child maltreatment, as well as theory and research concerning attachment and the developmental consequences of separation and loss that often follow intervention in child maltreatment. A required course in the Child Welfare Track. Prerequisite: Completion of foundation year curriculum, admission to MSW program with advanced standing or permission of the instructor.

SOWK 4315 Building Resilience: Healthy Development in Childhood and Adolescence (3 Credits)
Provides students with knowledge of child and adolescent development with a particular focus on resilience. At each stage of development, risk factors that are deleterious to development, and protective factors that promote healthy development, will be discussed. Along with basic information about theories of resiliency, students will also gain a good working knowledge of cognitive behavior theory. A required course in the High-Risk Youth Track and an elective course in the Child Welfare Track.

SOWK 4320 Theories and Practice of Family Systems Therapy (3 Credits)
Introduces family systems, feminist and cultural/contextual models of family therapy, integrating theory, practice and skill development. Content includes current family structures and assessment and intervention from a family systems perspective with couples and families. Family system models covered: intergenerational, structural, strategic, solution-focused brief, narrative and feminist. Analyzes intersecting issues of oppression: sexism, racism, classism, heterosexism and ageism. This is a required course in the Families Track and an elective course in the High-Risk Youth Track. Prerequisite: completion of foundation year coursework or permission of adviser and instructor.

SOWK 4325 Evolving Perspectives and Trends in Health and Wellness (3 Credits)
This course provides an overview of the theories that inform social work practice in the field of health and wellness. Health as a concept is examined for its understanding and meaning in multiple practice settings, communities and cultures. While addressing evolving trends and ethics in health care practice settings, a range or topics are covered including systems perspectives and thinking, the intersection of health and mental health, wellness and prevention, social ecology of health promotion, client and person centered care, care management and health care disparities.

SOWK 4330 Assessment of Mental Health and Drug Use in Adults (3 Credits)
Focuses on the assessment of psychological, social and biological contributors to mental health disorders in adults and the use of this assessment as a guide for treatment/clinical interventions. Examines the strengths and weaknesses of the DSM-IV classification system in terms of social work values and ethics. Examines symptoms, theories of etiology, treatment interventions and prognosis within each diagnostic category, and reviews a variety of assessment tools in the context of gender, ethnicity, cultural diversity, sexual orientation and historically oppressed and/or disadvantaged populations.

SOWK 4340 Leadership and Supervision Skills (3 Credits)
This course examines the application of leadership and supervision theories to practice settings in communities, organizations and policy contexts. A focus is placed on leadership roles and an examination of leadership styles, with an emphasis on the skills of transformational leadership and supervision. Topics covered include team leadership and supervision, one to one supervision skills, managing conflict, personnel management, and cross cultural work.

SOWK 4345 Intersections of Mental Health, Substance Abuse and Trauma (3 Credits)
This course is an advanced theory for practice course with builds upon foundation courses in HBSE and clinical theories, and covers the dynamics of and interventions in mental health, substance abuse treatment, and trauma. The course examines the independent and intersecting theory bases of mental health; trauma and substance abuse approaches, including both crisis and longer-term work, crisis intervention, and the recovery philosophy. It also explores recent evidence about individual and environmental risks associated with these conditional and evidence about both specific therapeutic interventions and the importance of common relational factors. Social workers make up one of the largest professional groups working with clients with mental illness, and bring a unique person-in-environment and strengths perspective to that work, which fits well with a recovery philosophy. General therapeutic approaches common across these fields, such as motivational interviewing, are presented and students are introduced to complementary and alternative approaches that show promise in treating common client conditions. Because of the strong linkages between health, mental health and wellness, the course also explores recent integrative and behavioral health approaches. Recovery refers to the process in which people are able to live, work, learn, and participate fully in their communities. For some individuals, recovery is the ability to live a fulfilling and productive life despite a disability. For other, recovery implies the reduction or complete remission of symptoms. Science has shown that having hope plays an integral role in an individual's recovery. (President's New Freedom Commission on Mental Health, 2003, p. 7).
SOWK 4350 Evolving Perspectives and Trends in Aging (3 Credits)
This course provides an overview of how theories of aging inform the role of social workers with older adults and their families across a range of service settings, including emerging fields of practice. The course examines multiple perspectives on the late life adult years, spanning the period from middle adulthood and on into late life, including: historical, biological, psychological, social, cross-cultural, and spiritual theories and related empirical evidence. While addressing evolving trends, the importance of difference, and ethical implications the topical issues include: work and retirement; economic status; residence and housing location; education and learning styles; interpersonal relationships with partners, families, and peers; creativity, spirituality, and religiosity; political beliefs and ideologies (including the formation, maintenance and alteration of prejudice and racism); the experience of chronic illness, disability, and death; and wisdom attained during adulthood and aging.

SOWK 4360 Social Ecology, One Health and Resiliency: Connecting Human and Environmental Health (3 Credits)
This course is a theory of practice course in the Sustainable Development and Global Practice Concentration and is a required class. This course is also an elective for other concentrations. A defining feature of social work is the profession's focus on human well-being and health in a context of person-in-environment. This theory of practice course builds on that feature and emphasizes the concept of Social Ecology and explores the integrated model of One Health as a necessary understanding for human health as connected to the natural world. This course positions students to understand a 21st-Century vision for a sustainable and healthy human presence on Earth, including an integrated understanding of social, political, economic and environmental structures that influence the UN's Millennium Development Goals http://www.un.org/millenniumgoals/. Social workers often conceptualize interventions through the model of a Systems Perspective where the interconnectedness of systems is endorsed as the most accurate way in which to understand people in context. Fundamental to equipping social workers with the knowledge and skills to be effective in new challenges facing the human condition is a comprehensive understanding of the importance of healthy environments, and environmental forces that create, contribute to, and address problems in the everyday lives of people. This course is offered within the Sustainable Development and Global Practice concentration to assist in the training and preparation of social workers practicing within the international arena. Students explore the models and theories for the important and urgent issues occurring in our global environment and come away from this course with a strong understanding of the issues facing communities. Through the development of an integrated social science and eco-centric understanding of one's place in the natural environment and a paradigm that acknowledges the interdependence and interconnection between humans and the more-than-human world, social workers practicing locally and globally will be equipped to contribute to effective, strength-based solutions to address the crises and issues facing the world. Local issues and community-based efforts that strive for socio-environmental justice are highlighted to promote critical thinking around concrete issues and develop a knowledge-base for prevention as well as intervention strategies, environmental awareness, sense of belonging in a community, sustainability, resilience and advocacy. This includes policy and relevant laws with a focus on such topics as environmental toxins, sustainable economics, conservation of nature and biodiversity, land use, water use and the strong correlation between human health and the health of non-human animals and the environment. This includes humane treatment and care of wildlife and habitat and how to empower communities to resist their exploitation. Students are exposed to current challenges and competing needs confronting communities in urban as well as rural communities.

SOWK 4370 Community and Organizational Change: Theory for Practice (3 Credits)
This course presents key theoretical frameworks for students to be informed and innovative in responding to changing community, organizational and societal contexts. Theories of social change are presented that can assist social work leaders in promoting positive social change in the lives of vulnerable populations through the development of policy, community interventions and human services organizations. Students apply theories to understanding organizational change and innovation and the promotion of social and economic justice through community and policy practice.

SOWK 4375 Economic Theory and Social Work (3 Credits)
Human rights, urbanization, poverty, housing, gender inequality, care of children, poverty, indebtedness, racial and/or ethnic discrimination, and cultural conflicts are challenging the United States and nations throughout the world. This course introduces students to economic theories to develop broader conceptualization of local, national, and global social problems and possible intervention strategies. An understanding of economic theory provides a foundation for studying the emergence and maintenance of diverse social policies to address these problems. The course explores Neoclassical, Behavioral, and Microeconomic concepts of economic efficiency and the corresponding consequences to marginalized and oppressed populations.

SOWK 4401 Integrated Health Care: Models and Practice (3 Credits)
This course provides an overview of the knowledge, skills and theory of integrated health care social work practice, where physical and behavioral health services are most often provided in a primary care medical environment. Students will learn roles/functions of the behavioral health professional and their effectiveness as a member of the collaborative care team. Incorporating knowledge of evidence-based practice models of care and behavior change theory, they will increase their practice abilities to effectively work at an advanced level of skill as an integrated care behavioral health provider. Strategies and skills in patient engagement, motivational enhancement and advocacy will be taught through case studies and group activities. Cultural competency and effective care planning in an integrated healthcare environment will be emphasized.

SOWK 4410 Prevention & Treatment of Adolescent Substance Abuse (3 Credits)
This course examines causal factors and theories that seek to explain why some adolescents develop problems with alcohol and other drugs. Effective substance abuse prevention and treatment approaches are identified at the individual, family, school and community level. This is a required course in the High-Risk Youth Track.
SOWK 4412 Practice Elements in Youth Mental Health Intervention (3 Credits)
This course offers an integrative framework of theory and research to understand and intervene in the major mental health problems experienced by children and adolescents. Interventions include both direct work with children and collaborative/conjoint work with parents. Techniques include common elements across empirically-supported interventions such as cognitive-behavioral therapy, functional family therapy, behavioral treatment, client centered treatment, social skills training, and parent management training. Intervention strategies are described across five primary mental health problems common among children/adolescents: anxiety, depression, traumatic stress, disruptive behavior, and attention deficit disorder. For each of these mental health problems, assessment and intervention techniques are demonstrated, practiced in class, implemented in field placements, and monitored for associated reduction in client symptoms. The use of empirically-supported interventions is discussed from a multidimensional perspective with consideration for cultural context and adaptations necessary for particular client groups.

SOWK 4415 Intake and Family Based Services: Assessment and Intervention (3 Credits)
This course examines decision-making in child welfare at the point of family referral to the child welfare system, the processes involved in family assessment and service planning, and design, delivery and intervention skills for home-based child welfare services. This course is required for students in the Child Welfare Track. Prerequisite: completion of foundation year curriculum, admission to the MSW Program with advanced standing or permission of the instructor. It is preferred that students have completed SOWK 4305 prior to taking this course.

SOWK 4416 Foster Care and Permanency Planning (3 Credits)
This course presents strategies for culturally competent assessment and intervention with children who are in foster care, adoption, or with their families. It focuses on permanency planning, involving extended families in making case decisions and caring for children, family reunification, relinquishment of children for adoption, termination of parental rights, preparing children and parents for adoption or guardianship, working with young adults nearing emancipation, and providing post-adoption/guardianship services. This is a required course in the Child Welfare Track. Prerequisites: SOWK 4305 and SOWK 4600 or permission of the instructor.

SOWK 4420 Strategies and Techniques of Family Systems Therapy (3 Credits)
A skill-based class where students learn to apply family systems knowledge to case situations. Teaching strategies include role-play and discussion of actual cases. This is a required course in the Families Track. Prerequisite: SOWK 4320.

SOWK 4422 Strategies for Family Meetings (3 Credits)
This course builds students’ skills in conducting family meetings and brief family interventions. Students learn to incorporate clinical principles during time-limited contact with clients and their families of all ages. Skills include assessing family dynamics quickly, guiding family mediations and decision-making meetings, managing and debriefing crises and incidents, providing education, and intervening with supportive counseling. These skills are applicable in different human service organizations, such as aging services, alcohol and drug treatment facilities, child welfare, hospital and outpatient health care facilities, mental health settings, and schools.

SOWK 4425 Positive and Community Youth Development (3 Credits)
This course provides an overview of the “community and positive youth development” approach to providing social services to children and adolescents. Many services for young people focus on negative outcomes such as behavior problems, pregnancy, violence, drug abuse, and truancy. These services are supposed to “fix” the small minority of kids who are “broken” in some way. The community and positive youth development perspective stresses that all youth need a variety of supports and opportunities to develop into healthy, contributing adults. This course considers how such an approach to social service delivery can be applied across different organizational settings (e.g., schools, government agencies, and non-profits) to promote the well-being of American youth from diverse cultural backgrounds.

SOWK 4430 Drug Dependency Interventions (3 Credits)
There is widespread recognition that substance abuse is one of America’s most pressing social problems. Social workers increasingly find themselves attempting to help individuals and families resolve substance abuse problems, as well as directly or indirectly related issues. This course introduces students to current and emerging substance abuse treatment approaches so they can conduct their practices from an informed perspective.

SOWK 4435 Community Organizing and Empowerment Practice (3 Credits)
Examines empowerment practice and community organizing as a social work intervention method. Topics include challenges of community practice in today’s world and with diverse groups; special tactics and techniques of community organizing and community capacity building models; empowerment of oppressed populations; ethical issues in community practice; social work and social justice. This is a required course in the Leadership for Community and Organizational Practice.

SOWK 4445 Social Work Assessment and Intervention in Aging (3 Credits)
This course focuses on biological, neurological, psychological, social, spiritual, and environmental aspects of late life as a foundation for the delivery of assessments and interventions to older adults. This course presents information on demographic projections, population trends, and theoretical perspectives that inform gerontological social work practice. This class additionally focuses on the unique nature of social work with this diverse population including a continuum of care services for older adults, interdisciplinary nature of helping services, dynamic nature of aging for multiple vulnerable older adults such as those facing institutionalized oppression, and specific attention to elder wellness.
SOWK 4454 Child and Adolescent Trauma (3 Credits)
This course introduces students to the common concepts (general theory and foundational knowledge), components (intervention and treatment elements) and skills (practitioner skills) underlying evidence-based treatment for children and adolescents who have experienced trauma. Trauma is broadly defined, and includes children and adolescents exposed to traumatic events including, but not limited to natural disasters, war, abuse and neglect, medical trauma, witnessing interpersonal crime (e.g. intimate partner violence), and other traumatic events. The course highlights the role of development, culture, and empirical evidence in trauma-specific interventions with children, adolescents, and their families. It addresses the level of functioning of primary care giving environments and assesses the capacity of the community to facilitate restorative processes. The course focuses on assessment and intervention as a foundation for subsequent learning about treatment. This course incorporates the new National Child Traumatic Stress Network (NCTSN) core curriculum on child trauma (CCCT). The course conveys the crucial evidence-based concepts, components, and skills designed by NCTSN to strengthen competency in assessment, referral, and treatment.

SOWK 4465 Human Security: Intervention Strategies for Economic & Social Development (3 Credits)
Human security is a new paradigm for understanding complex global vulnerabilities. Human security goes way beyond traditional notions of national security and highlights the security of the individual rather than that of the nation state. Human security uses a person, entitlement and human rights centered view of security. It is essential for national, regional and global stability and sustainability. In defining human security, the United Nations stressed “the right of all people to live in freedom and dignity, free from poverty and despair,” and recognized that “all individuals, in particular vulnerable people, are entitled to freedom from fear and freedom from want, with an equal opportunity to enjoy all their rights and fully develop their human potential” (A/RES/60/1). “Human security aims at ensuring the survival, livelihood and dignity of people in response to current and emerging threats - threats that are widespread and cross-cutting. Such threats are not limited to those living in absolute poverty or conflict” (UN-OCHA). Today, the impacts of natural disasters, climate change and other forms of environmental change, and global economic crises, among others, are considered to threaten human security in developing as well as developed countries. The increasing numbers of internal violent conflicts, forced migration, natural disasters and environmental degradation have resulted in national and international security failings that reflect the challenges of the post-Cold War security environment. The failure of mainstream development models to generate growth, particularly in Least Developed Countries (LDCs), or to deal with the consequences of complex new threats (e.g., HIV/AIDS, climate change, social and economic inequality) reinforced the sense that international institutions and states are not organized to address such problems in an integrated way. Social workers focusing on human, social and economic issues in global settings will use various human development strategies and other capacity-building approaches in practice. This course develops students' skills in human and social development strategies, sustainable livelihood and conflict management strategies, and other capacity-building community strategies, and fosters a solid understanding of the programmatic and practical requirements for human security in a global context.

SOWK 4500 Mental Health Interventions with Children (3 Credits)
This course offers an integrative framework of theory and research to understand and intervene in the major mental health problems experienced by children. Interventions include both direct work with children and collaborative/conjoint work with parents. Techniques include play therapy, cognitive-behavioral interventions, psychopharmacology, and crisis intervention for suicide. Children's development is considered from a multidimensional perspective, including cultural context, risk and protective factors, and the development of psychopathology.

SOWK 4501 Wellness Prevention and Intervention Across the Lifespan (3 Credits)
This course prepares students to critically analyze the determinants of wellness across the life span, across socio-economic boundaries and across cultures in order to promote wellness in the everyday lives we lead both personally and as social workers in a community. An emphasis will be placed on the research and application of knowledge and skills to increase social worker awareness of the distinctions between health and wellness and to promote wellness in the quality of life in a community. This course builds students' skills and strategies to enhance wellness needs within a community. Strategies include using developmental models, researching current policies and implementing wellness assessment tools in order to create interventions for communities.

SOWK 4505 Relationship Therapy (3 Credits)
Focuses on assessment, problem/solution path identification, intervention strategies and outcome evaluation in counseling heterosexual, gay and lesbian couples. Identifies common relationship patterns and explores intervention strategies including behavioral, strategic, structural, narrative, transpersonal and feminist. Covers issues such as conflict management, relationship enhancement, intimacy, power and control, domestic abuse, infidelity and divorce. Analyzes the intersecting issues of oppression: sexism, racism, classism, heterosexism and ageism. This is a required course in the Families Track.

SOWK 4520 Advanced Strategies and Techniques of Family Systems Practice (3 Credits)
This course is an advanced skill-based course that extends students' knowledge and application of family systems therapy. The course engages the active participation of students in role-play scenarios and the discussion and deconstruction of actual cases. Advanced Strategies and Techniques builds on the family systems theory and practices applications learned in the family systems concentration courses and expands students' opportunity to apply theory to cases in diverse practice and client situations. Pre-requisites: SOWK 4320 and SOWK 4420.

SOWK 4523 Care Management Skills and Resources to Promote Community Living (3 Credits)
Many individuals and their families of all ages cope with physical and mental health conditions that impede their ability to live in the community. A vast array of formal and informal resources, public programs, and privately funded services can promote community living. Social workers often provide care management to enhance access, coordinate care, and ensure equality of these long-term services and supports. This course will develop students' skill at care management and knowledge of resources, including resources for persons with developmental disabilities, chronic mental health conditions, physical disabilities, and age-related functional impairments.
SOWK 4525 Administration and Management Practice and Skills (3 Credits)
This course examines the application of leadership and supervision theories to practice settings in communities, organizations and policy contexts. A focus is placed on leadership roles and an examination of leadership styles, with an emphasis on the skills of transformational leadership and supervision. Topics covered include team leadership and supervision, one to one supervision skills, managing conflict, personnel management, and cross cultural work.

SOWK 4530 Poverty and Community Economic Development (3 Credits)
This is an advanced community practice class focused on poverty, low-income neighborhoods and local economic development. The class begins with a thorough review of the scholarly literature related to poverty, sustainability, and the concentration of poverty in low-income neighborhoods. Then, public and private responses to poverty are examined. The class focuses on both governmental policies and programs supported by the private sector. Next, the class turns to local responses to the concentration of poverty in low-income neighborhoods. The class focuses on the interdisciplinary nature of programs and interventions aimed at community economic development in low-income neighborhoods.

SOWK 4535 Planning and Program Development (3 Credits)
This course prepares students to engage in strategic planning and program development roles and practice within a social work community, organizational, or policy practice setting. Students in this course gain knowledge in the principles of planning, social enterprise, the engagement of stakeholders in planning processes, community collaboration and the elements of designing and implementing programs. Students have the opportunity to put this knowledge base into practice by developing a comprehensive program proposal applying the skills of strategic thinking, planning, critically evaluating research informed practice and practice informed research. In addition, students engage in communicating professional judgment in both written and oral formats.

SOWK 4565 Social and Environmental Impact Assessments (3 Credits)
Social and environmental impact assessments are important tools for analyzing and managing both the intended and unintended consequences of development projects on human and ecological systems in order to bring about a more equitable and sustainable social ecological system. This class incorporates an understanding of the history and concepts of the three levels of impact assessments (micro, mezzo, and macro) into the research process that is the core of social impact assessments. Students prepare and evaluate social ecological impact assessments through learning to identify and define problems, select theoretical frameworks appropriate to the problem, identify research questions, design a study appropriate for the identified questions, gather and analyze data, and write the final assessment. Particular attention is paid to assessing the effects of interventions on vulnerable populations. Other topics will focus on the practical aspects of project team selection and management, timelines, and the communication of findings to stakeholders.

SOWK 4600 Child Welfare Policies and Services (3 Credits)
Examines contemporary U.S. child welfare policies in historical perspective, focusing on prevention, report and investigation of child abuse and neglect, as well as family preservation, out-of-home care, adoption and services for troubled adolescents. Evaluates the impact of policies and proposals for change in policies, considering empirical evidence, values and ethics. Provides a framework to analyze policy choices and encourages students to advocate for needed policy changes. This is a required course in the Child Welfare Track. Prerequisite: SOWK 4120 or admission to advanced standing program.

SOWK 4605 Poverty: Policies and Services (3 Credits)
The United States poverty rate declined steadily from the 1950s through the 1970s, decreasing from 22% of the population in the late 1950s to 12% in the late 1970s. Poverty rates have fluctuated since then with current rates standing at approximately 15% or 46 million people. More than 16 million children, 22% of all children, live in families with incomes below the federal poverty line. The course begins by considering the federal poverty measure and competing definitions of poverty. Key programs and policies meant to alleviate poverty, such as government transfer programs (including cash and noncash welfare, earnings supplements, and social insurance programs), education and training programs, and support services are examined. Course content is applied to practice scenarios to enhance student knowledge of poverty programs, eligibility criteria and application processes. Critical discussions of these programs will inform analysis of alternative approaches to poverty reduction and economic self-sufficiency.

SOWK 4610 Policies and Programs for Children and Youth (3 Credits)
Examines the history and evolution of social policies and programs targeting high-risk youth. Seeks to critically analyze the effects of current and recent policies in the context of youth offending and other adolescent problem behaviors. This is a required course in the High-Risk Youth Track. Prerequisite: SOWK 4120, admission to advanced standing program or permission of the instructor.

SOWK 4630 Family Policies and Services (3 Credits)
Identifies challenges contemporary American families are experiencing and presents strategies for developing policies and services to meet these challenges. Examines specific policies and services that most affect families, as well as broader questions concerning power and its distribution, allocation of resources and the role of government in promoting individual and family well-being. A required course in the Families Track. Prerequisite: SOWK 4120, admission to advanced standing program or permission of the instructor.

SOWK 4635 Immigration Policies and Services (3 Credits)
This course identifies challenges for immigrants and presents strategies for developing policies and services to meet these challenges. It not only examines specific policies and services that most affect immigrants but also considers broader questions concerning power and its distribution, allocation of resources, and the role of government in promoting individual and family well-being. This is a concentration policy course for all concentrations.
SOWK 4640 Mental Health and Drug Dependency Policies and Systems (3 Credits)
Provides a comprehensive understanding of policies related to mental health and/or drug dependency, their historical antecedents and the socio-political forces that influence their development. Also introduces students to emerging controversies concerning these policies. Choice of this course or SOWK 4650 required in the Adulthood and Late Life Challenges Track.

SOWK 4645 Health Care Policy (3 Credits)
This policy course provides an overview of health care policy as it is relevant to social work practice in multiple health and behavioral care settings. With the advent of health care reform and the implementation and operationalization of the Patient Protection and Affordable Care Act (PPACA), there are rapidly changing policy issues related to this innovative integration and delivery of health care services. Students in this course critically analyze the practice of policy in this new and quickly evolving service arena. This course explores key health policy strategies to foster integrated delivery system development and sustainability in line with health policy goals to reduce cost of care, improve population health and improve quality of integrated care services, with special emphasis on the integration of primary care, behavioral health services and wellness/health promotion initiatives. Strategies for students to influence policies and promote change in the interest of the individual/family/community, agency/organization and the communities they serve are presented. Critical thinking skills in developing and analyzing proposals to improve integrated health policy are encouraged. The course builds on policy content offered in the professional foundation year and links policy to practice and research skills.

SOWK 4650 Aging Policy (3 Credits)
This course provides an overview of social policy and service delivery issues in gerontology. It includes a critical review of rapidly developing policy issues, as well as an overview of U.S. health care and social service delivery systems serving older adults. The course encourages students to participate in critical analysis of issues and to develop and analyze innovative proposals to improve policy and programs for older adults. This course fulfills the policy requirement for the Aging Services and Policy concentration.

SOWK 4660 Social Policy Advocacy (3 Credits)
Facilitates student learning within policy-making arenas. Students are paired with health and social service agencies and coalitions to assist in agenda-setting, legislative research, and issue-advocacy development and implementation in the state legislature and bureaucracy. An elective course in the Leadership for Community Organizational Practice Track.

SOWK 4665 Global Policies and Programs (3 Credits)
This course focuses on understanding and connecting eminent global policy trends, their inter-relatedness with globalization and their impact on human and social development. In particular, economy, trade, human rights, immigration, health, environment, human security as well as disaster relief and response related policies are examined. The course gives students the opportunity to study, analyze and understand specific federal and global policy initiatives, their development and implementation. The goal of this course is to train students to understand the essential components of global policies in both the public and private sectors and to prepare them to initiate systems reform to accomplish innovative and effective outcomes. This course addresses the development of policy in the context of social values and ethics. Policies are covered both from the viewpoint of developed and developing countries. Readings, examples and discussion include policies of nations and international organizations (e.g., United Nations, World Bank, International Monetary Fund, and specialized agencies such as the World Health Organization) with applications to both developed and developing countries. The course emphasizes an analytic approach for understanding the impact of policy on programs, services, and development at large.

SOWK 4670 Policy Development & Analysis (3 Credits)
Focuses on the development and analysis of social welfare policy. Reviews the structure of the policy-making and implementation process, and examines perspectives on the definition of social problems and approaches to the development and analysis of social welfare policies. Students apply the perspectives and frameworks as they analyze a specific social problem and policy directed toward it, identify needed change in policy, select place and strategy for change in policy, and communicate knowledge to central actors in the policy-making and implementation process. An option for the policy course requirement in the Leadership for Community and Organizational Practice Track. Prerequisite: SOWK 4120 or SOWK 4299 or permission of the instructor.

SOWK 4700 Solution Focused Brief Practice (3 Credits)
This course is a methods skills course that provides students with the opportunity to gain knowledge and skills in the contextual stance and core interventions of the evidence-based approach, Solution-Focused Brief Therapy (SFBT). Students gain an understanding of how this approach works, and the ability to use this approach in a variety of settings including with clients struggling with chronic mental illness, trauma, and substance misuse, as well as with children and adolescents, couples and families, in community development, and supervision. This course addresses competencies and practice behaviors in advanced clinical settings including Families, Child Welfare, Children and Youth, Mental Health and Health.

SOWK 4705 Forensic Orientation in Social Work Practice: Assessment and Interventions with High-Risk Offenders (3 Credits)
Presents and applies a framework for assessing and intervening with offender populations. This risk and containment framework takes a community safety and victim-centered perspective and focuses on assessing and intervening with multiple systems surrounding offenders. The framework is then applied to specific interventions with domestic violence abuse offenders and with adult and adolescent sexual offenders. An elective course in the Child Welfare Track.

SOWK 4710 Domestic Violence (3 Credits)
This is a concentration year practice elective focusing on understanding, assessing, and intervening with domestic violence, understood as violence occurring in the context of intimate relationships. The purpose of this course is to provide students with the theoretical understanding and practice skills necessary to establish a beginning competence in assessing and intervening with domestic violence and in developing community, systemic, and policy responses.
SOWK 4712 Law of Family and Child (3 Credits)
Examines legal principles and procedures relevant to social work practice with families and children: structure and operation of the American legal system, principles to follow in conducting legal research, basic principles of constitutional law and law related to juvenile delinquency, child protection, child adoption, education and domestic relations. Covers legal aspects of social work practice including licensing, confidentiality and professional liability. Successful completion of this course or SOWK 4715 required for certification as school social worker in Colorado.

SOWK 4713 Interdisciplinary Approaches to School, Family and Community Programs (3 Credits)
This course presents an overview of theory and practice in school, family, and community prevention. A developmental perspective is used to examine factors that promote or inhibit healthy child and adolescent development at different stages and transitions. The focus is from preschool through age 18. The course demonstrates ways in which interdisciplinary prevention approaches are built on the foundations of epidemiological research and on knowledge of the individual, peer, family, and community factors that increase risk or enhance positive development among children and youth. The public health preventive intervention cycle is used as a framework to examine effective approaches to preventing common child and adolescent problem behaviors like substance use, academic failure, and antisocial conduct. Principles and ingredients of effective school, family, and community prevention programs are examined. Students will learn and apply specific intervention skills necessary to implement prevention strategies across school, family, and community settings.

SOWK 4715 School Social Work Interventions (3 Credits)
Designed to give students the ability to identify, understand and apply the varied roles of school social worker. Examines politics of education, the educational organizational structure, special education law and process, collaborative teamwork with school and community professionals and inter-systems coordination. Emphasis placed on meeting the needs of special education populations through assessment, intervention and evaluation and on preventive programs for children and youth at risk for school failure, truancy and dropping out. An elective course in the High-Risk Youth Track.

SOWK 4720 Prevention and Treatment of Juvenile Delinquency and Youth Violence (3 Credits)
Examines causal factors and theories that seek to explain why some adolescents engage in delinquent conduct and/or violent behavior. Effective delinquency and violence prevention and treatment approaches are identified at the individual, family, school and community levels. A required course in the High-Risk Youth Track.

SOWK 4721 Existential Social Work Practice (3 Credits)
The problems facing people can be understood in the context of situations and meanings they give to them. This course seeks to identify useful ways to clarify and validate the client’s unique “world view,” bypassing the many dangers and misuses of diagnostic categorization and empowering clients in relation to themselves and problem definition.

SOWK 4723 Social Work Practice in Health Care (3 Credits)
This course is designed to explore and develop advanced social work knowledge and skills in order to practice social work in diverse health care settings. It includes examination of the social work role on interdisciplinary teams, health care terminology, setting-specific assessment and interventions and comprehensive social work services for acute and chronically ill patients. It emphasizes social work values and ethics in relation to health care practice.

SOWK 4725 Mind-Body Connections and Social Work Practice (3 Credits)
Health and illness can be regarded within a systems framework that links that person’s physical, mental, and social aspects of self. This course explores the interactions between an individual’s thoughts and his/her physical, emotional, and social health. Combines examination of research and theory on various aspects of mind-body connections with practice skills that can be used in working with clients of all types. An elective course.

SOWK 4730 Cognitive Approaches to Social Work Practice (3 Credits)
Examines major cognitive approaches to social work practice, suggesting methods focusing on clients’ problem-solving abilities, building on client strengths, targeting specific thought patterns that impede clients from reaching goals and assessing outcomes in terms of changes in thinking and behavior. Theory is applied to individuals, dyads, families and groups. Examines relevant research suggesting both indications and counter-indications of approaches. An elective course.

SOWK 4732 Disrupting Privilege through Anti-Oppressive Practice (3 Credits)
This course, building on the theoretical foundation in SOWK 4132 Multicultural Social Work Practice, examines the barriers to the professional use of self as an ally to historically disenfranchised groups, both in the context of day-to-day relationships with clients as well as in the context of community and macro-level interventions. The course is intended to assist in understanding the personal, situational, structural, and cultural influences that impede justice-oriented social work practice. The course supports students in developing strategies, skills, and approaches to anti-oppressive practice. Anti-oppressive social work practice is a range of practice approaches that adopt a critical and structural perspective on issues of social inequality, oppression, power, privilege, and domination. It encompasses approaches such as feminist, anti-racist, Afrocentric, disability practice, and critical social work frameworks to name a few (Campbell, 2003). It attends to both process and outcome (Dominelli, 1998), and links the provision of individual assistance to people from marginalized groups with involvement in social movements corresponding to the marginalization (Carniol, 2000). “The [anti-oppressive] framework enables links to be made between individual action and social structures. It informs practice by enabling the worker to evaluate differences that exist at an individual level and within society and how these impact on each other. It provides the means of making accurate assessments by taking into account the inequalities that texture the lives of those denied access to society’s resources because of their defined social status and the exclusionary practices of the dominant system. It demands that we consistently engage in the process of critical self examination, which in turn enables us to engage in the process of change.” (Dalrymple and Burke, 1995, p. 18).
SOWK 4735 Interpersonal Approaches to Counseling (3 Credits)
This course is an elective course which utilizes the interpersonal models of psychotherapy and neurobiology, drawing upon psychodynamic theories and techniques. The course examines traditional and contemporary psychotherapy theories and techniques. Interpersonal interventions are grounded within the values, ethics and standards of practice for clinical social work.

SOWK 4737 Assmt & Interven w/Adolescent (3 Credits)
Examines adolescence as a major developmental life cycle stage and the reciprocal relationships between gender, race, ethnicity, family development, peer group, neighborhood and the adolescent's physical, intellectual, social and sexual development, as they contribute to identity formation. Presents individual, group, family and program-based intervention approaches, ranging from least to most intensive and restrictive. Prerequisite: completion of foundation year course work or permission of advisor and instructor.

SOWK 4741 Grief and Loss Across the Lifespan (3 Credits)
This course is designed to prepare students to understand social work roles and practice (engagement, assessment, intervention and evaluation) in working with those experiencing loss across the life span. Whether the loss is related to health or functioning, family system, developmental stage or an actual death, this course prepares students to be culturally responsive to diverse perspectives and bereavement needs. Students will learn theoretical models of grief and loss and how to effectively evaluate the needs of grieving individuals, families, communities and their support systems.

SOWK 4749 Social Work Interventions with Latinos/as (3 Credits)
Addresses immigration issues, as well as intervention and theoretical approaches for Latinos/as. Covers the selection of interventions and strategies for cross-cultural use in adequately addressing the needs of Latinos/as. A required course for the Social Work with Latinos/as Certificate.

SOWK 4750 Critical Perspectives on the Latino Context (3,12 Credits)
This course provides a framework for culturally relevant social work services designed to meet the needs of the Latino/a community. This is a social work content course taught in Spanish in collaboration with the Department of Languages and Literatures. Students acquire core principles grounded in an understanding of social justice, privilege, and oppression including the interconnection between human and civil rights, globalization, immigration and poverty. Students expand their oral and written Spanish expression as they learn about cultural, social and political theory. Students learn aspects of Mexican culture, community development, historical patterns of oppression, spirituality, and the role of indigenous movements. As a result of this course, students understand how to advocate for nondiscriminatory cultural, social and economic practices within a Latino context and experience. The course is open to both foundation and concentration students. It is designed for students in all tracks who have an interest in understanding issues facing the Latino community. The first option is a paper that investigates a current social advocacy movement in the Denver Latino community. The second option is an experiential learning in Mexico about culture and social movements. Students must select either the paper or the travel option upon registering for the course. Those students in the Latino/a Certificate in Social Work are required to participate in the experiential learning in Mexico in order to fulfill the requirements for the certificate program. Prerequisite: placement is based on language proficiency test results at the intermediate-advanced level.

SOWK 4751 Global Relations and Poverty in Mexico (3 Credits)
Provides a mixture of experiential and academic learning based on the community-learning model of Paulo Freire. Taught in Cuernavaca, Mexico, the course covers Mexican culture, community development, historical patterns of oppression, spirituality, and liberation theology, global economics and policy, and the role of indigenous movements. Includes discussion on the relationship between poverty in Mexico and the US, and implication for social workers. A required course for the Social Work with Latinos/as Certificate.

SOWK 4753 Social Development in Latin America (3 Credits)
Covers social development in South and Central America, with special emphasis on Mexico. Practice-oriented, it is geared towards a knowledge of policy-making in Latin America and on the skills required for local social development. A required course for the Social Work with Latinos/as Certificate.

SOWK 4754 Trauma and Recovery in Social Work Practice (3 Credits)
Provides an overview of multi-system level definitions of trauma experience - historical, individual, interpersonal, family, organizational, community, and global. Also examines various approaches to trauma response theory. Promotes the unique contribution social workers have to offer through lenses of strength, resiliency, and coping as well as commitments to multicultural and systems factors. A required course for the Trauma Response & Recovery Certificate.

SOWK 4755 Interventions for Responses to Trauma (3 Credits)
This course is designed from a strengths perspective, in which the study of trauma is approached from a theoretical base that perceives psychological adjustments after trauma as primarily a “response” rather than a “disorder.” Includes information on the integration of cognitive, emotional, and somatic approaches to trauma treatment, as well as consideration of when to use a trauma-informed versus a trauma-focused paradigm. At the community level, the course also includes an introduction to mental health reactions and responses to disaster. A required course for the Trauma Certificate. Prerequisite: SOWK 4754.

SOWK 4756 Social Work from a Chinese Perspective (3 Credits)
This course provides students with a unique opportunity to learn first in the classroom the social, cultural, historical, political, and economic characteristics of China and how these characteristics shape social work in China. Then students learn by experiencing social work in China. In Beijing, students participate in lectures given by faculty at China Youth University, discussions with social work students, visits to social work organizations, visits to important cultural landmarks and nightly synthesis of new knowledge and experiences. An elective course.
SOWK 4757 Social Work and Mexican Culture: Intensive Practice and Spanish Immersion (3 Credits)

This course combines academic classroom instruction with experiential and conversational learning. The goal of the course is to enhance the student’s Spanish communication and cultural responsibility skills through dialogue practice and service in Mexico. The course takes place in two cities, Puebla (State of Puebla) and Cuernavaca (State of Morelos), offering both a colonial and urban setting (unless there are State Department travel restrictions). Based on the student’s individual skills and interests, and the needs of local field agencies, students become involved in mini field placement-like settings and service learning opportunities preparing them for their concentration field placement at the Graduate School of Social Work where they are expected to demonstrate competency in Spanish. Some of these activities include, but are not limited to, intake and assessment, supportive counseling, program planning and implementation, public policy, community development, and health education. Students learn to identify cultural differences and similarities in attitudes towards community organizing and mental health care in order to better address these cultural differences and similarities in the U.S. This experience also allows students to learn Spanish within a cultural and professional context. Students meet two times, for 3 hours, prior to travel. Minimum proficiency level required to attend is Intermediate Spanish (particularly oral). This course is taught in Spanish and is a required course for Social Work with Latinos/as Certificate students (instructor permission is required for any non-certificate student).

SOWK 4758 Social Work in Kenya: Context, Conservation, Empowerment, Sustainability (3 Credits)

This course is designed to introduce students to the social, cultural and conservation issues of Kenya and East Africa. This course is field-based with strong emphasis on service learning and direct experiences. Course readings, lectures, classroom discussions, service learning projects and field work in rural Kenya provide participants firsthand experience in the social, cultural, historical, political, environmental, ecological and economic realities that exist in Kenya. This course is open to qualified concentration and advanced standing Graduate School of Social Work students. The course meets on campus for four sessions before traveling to Nairobi, Voi, and Kasigau, Kenya. Due to the intensive nature, remote travel logistics and costs for this course, direct communication with the professors is required. Qualifications include: willingness to sign International Travel Agreement, willingness to receive required medical authorization and immunization, academic good standing, and readiness for the physical and emotional demands of traveling in rural and remote Africa.

SOWK 4759 Global Cultural Perspectives: Consensus and Conundrums (3 Credits)

Social workers increasingly practice in global communities both nationally and internationally. Changes in practice environments demand that social work practitioners are informed citizens of comparative cultures and societies. This course examines the values and ethics of social work practice in a global context of power, privilege and oppression. Course materials and educational experiences are used to challenge students to examine ethical and value-based conundrums when practicing in global settings and to develop practice skills to enhance the health, well-being and sustainability of communities. Through the use of case studies, critical thinking, cultural inventories and reflexivity the course supports and challenges students’ personal growth and professional practice.

SOWK 4760 Resource Development and Fundraising (3 Credits)

Examines financial management aspects of integrated program planning and budgeting with emphasis on practical explanations of, and skill building in, grant proposal writing, budgeting and fiscal processes common to not-for-profit organizations, from government agencies to community programs. Topics include resource acquisition (fundraising) and resource expenditure (budget development, fiscal management, cost analysis and related ethical issues). A track elective course in the Leadership for Community and Organizational Practice Track.

SOWK 4764 Historical Trauma and Healing (3 Credits)

This course is designed to provide students with a context for practice with communities experiencing historical trauma. We learn about the conceptualization of historical trauma, its impact on communities as well as community responses to it. We also discuss the importance of cultural protective factors, strengths, and culturally relevant models of healing around multigenerational, collective experiences of trauma. A number of practice approaches found useful with communities experiencing historical trauma are presented and discussed. Class format includes presentations, small group discussions, films, poetry, movement, and experiential learning in the community. This course is built upon the concepts of empowerment practice, indigenous models of social work, and narrative theory and practice. We use these perspectives as we explore work around historical trauma in communities. This class provides social work direct practice skills on individual, family, community and policy levels.

SOWK 4765 International Social Development (3 Credits)

Social development is a process of planned instructional change to bring about a better correspondence between human needs and social policies and programs. This class focuses primarily on the developing work with particular emphasis on transitional economies. Practice-oriented, the class is geared toward a knowledge of policy-making for human security and the skills required for local social development. An elective course in the Leadership in Community and Organizational Practice Track.

SOWK 4775 Social Work with Adult Groups (3 Credits)

The course teaches students advanced clinical group work methods and skills with vulnerable and resilient adult clients who are experiencing an array of bio-psycho-social-spiritual problems, and who are seen in mental health, health, and gerontology practice settings. The purpose of group work is to meet the socio-emotional needs of members through mutual aid and support, education, therapy, growth, and socialization. The impact of gender, age, race/ethnicity, sexual orientation, social class, ability/disability, and spirituality on group formation and dynamics is addressed. Evidence of practice effectiveness of group methods is examined. Ethical conflicts and dilemmas involved in group work are considered within the framework of social work values and ethics.

SOWK 4780 Conflict Resolution in Social Work Practice (3 Credits)

Covers methods of conflict resolution including negotiation, bargaining and mediation. Applies social work role of mediator to families, divorces and child custody, elder care issues, groups and organizations. Examines frameworks and helps students build skills for conflict resolution in practice. An elective course.
SOWK 4784 Suicide Prevention and Crisis Intervention (3 Credits)
This course builds students’ competencies in providing crisis intervention, suicide risk assessment, and suicide intervention to children and adults. It examines theories of crisis intervention, theories of suicide causation, suicide risk assessment, and suicide intervention models. Students learn evidence-based practices for helping people immediately after a crisis, eliciting sensitive information about trauma and troubling thoughts, assessing and documenting a client’s level of suicide risk, and using cognitive-behavioral methods to help restore equilibrium after crisis and to reduce suicide risk.

SOWK 4790 Human Sexuality (3 Credits)
Integrates human sexuality in the thinking and practice of social workers. By viewing sexual behavior from the social work perspective, the student is prepared to assume a significant role in helping clients deal with issues of human sexuality. Focuses on clients experiencing sexual dysfunction and on sexually oppressed client groups including the elderly, the homosexually or bisexualy oriented, the physically or developmentally challenged and the sexually abused. An elective course.

SOWK 4795 Integration of Animals Into Therapeutic Settings (3 Credits)
Explores the human-animal bond and potential for therapeutic intervention with the animal as teacher, therapist, facilitator and companion in a number of therapeutic settings. Focuses on core skills for social workers seeking to integrate this clinical approach into their practice. A required course for the Animal-Assisted Social Work Certificate.

SOWK 4796 Animal Assisted Social Work Practice (3 Credits)
This course provides a comprehensive examination of approaches to Animal Assisted Social Work (AASW) and emphasizes clinical application skills utilized with a broad array of persons and in a number of therapeutic settings. Students will learn to design, implement and analyze the efficacy of AASW approaches within their chosen area of specialization, providing an opportunity to practice these approaches in their field internships. Students will learn to clearly articulate, assess, and intervene in “link” violence as it relates to social work practices and AASW implications. A required course for the Animal-Assisted Social Work Certificate. Prerequisite: SOWK 4795 or permission of instructor.

SOWK 4797 Issues for Evidence-Supported Animal Assisted Social Work (3 Credits)
This course is designed to take students into an evidence-supported exploration and understanding of methods for incorporating specific animals and animal assisted interventions in the context of current social work practice. The course examines the capacities of different species for work with diverse goals and populations in animal interactions and introduces components critical to animals’ well-being. Emphasis is placed on case formulation and experiential learning methods that link goal-specific human-animal interactions that impact measureable client behavioral changes. The course focuses on the explicit identification of how the animal will move clients toward goals and identifying outcomes and indicators of such change. Special attention is given to the development of animal selection, handling, evaluation, and management skills necessary for development as a social worker with competency in the incorporation of animals in evidence-based practice. Prerequisite: SOWK 4795.

SOWK 4820 Integrated Family Studies Intensive I (1,2 Credit)
This course aids students in identifying personal strengths and weaknesses which may contribute to therapeutic work with clients.

SOWK 4821 Integrated Family Studies Intensive II (1,2 Credit)
This course is designed to provide an understanding of the historical development and basic theory and practice of family therapy.

SOWK 4825 Family Therapy Assessment, Engagement and Treatment Planning (1,2 Credit)
This course provides knowledge of assessment concepts that are related directly to strategy and goal planning, which facilitate proceeding with the early phase of family treatment.

SOWK 4826 Applied Ethics (1,2 Credit)
This class enhances the student's understanding of the professional, legal and ethical issues in systemic, relational, and family therapy.

SOWK 4830 Strategies and Techniques in Family Therapy: Families and Play Therapy (1,2 Credit)
This course is designed to acquaint students with the origin, theory and use of strategic and narrative methods in marital and family therapy.

SOWK 4831 Couples I (2 Credits)
This course concentrates on approaches to couples therapy. Developmental models of couples work are explored.

SOWK 4835 Working with Multi-Problem Families (1,2 Credit)
This course is offered as part of the cooperative program with the Denver Family Institute. Course focuses on the development of skills needed for working in multi-disciplinary settings. Emphasis is on integrating family therapy theory and practice with individual models.

SOWK 4890 Contemporary Global Issues (1-3 Credits)
The complexities of sustainable development and global practice require an understanding of current developments and events at a global scale. This course is designed to support student learning by providing a dynamic review and exploration of contemporary global issues with a focus on approaches and competencies for global social work practice. This course encourages students to understand the myriad geo-cultural, political, socio-economic, and environmental dimensions involved in current global developments and events. Examining issues of governance, local and regional laws, as well as human rights and social justice issues to include those of race, religion and ethnic influence can expand understanding of the unique considerations of various countries and world regions. Particular emphasis is laid on human security, poverty alleviation and humanitarian concerns, conflict/post conflict response, human rights, human and social development, migration and refugee activity, civil society and environmental sustainability. In this course, efforts are made to incorporate historical understanding, research-driven knowledge, expert experience-based insight, and field-tested skills and resources to examine possible solutions, policy, and response. Social workers focusing on human, social, economic and ecological issues in global settings must be equipped to evaluate, analyze and respond to current global issues with a coherent understanding of major value and policy frameworks such as the new Sustainable Development Goals (SDGs). This course develops students’ global reach and readiness as global citizens and social workers by engaging students in a year-long in-depth exploration of current events shaping issues and unfolding events globally.
SOWK 4900 Methods for Evaluating Practice and Programs (1-3 Credits)
Provides students with strategies for evaluating social work practice at multiple system levels. Prerequisite: SOWK 4201 or admission to advanced standing program.

SOWK 4901 Applied Practice Evaluation Research (3 Credits)
Provides students with the opportunity to conduct a practice evaluation project in their field setting. Prerequisite: SOWK 4900.

SOWK 4950 Foundation Field Internship (1-15 Credits)
This required practicum provides foundation students with the opportunity to integrate social work theory and practice for effective professional intervention at clinical and community levels. Prerequisite or Corequisite: SOWK 4001, SOWK 4002, SOWK 4003, SOWK 4007, SOWK 4008. Corequisite: SOWK 4150.

SOWK 4960 Concentration Field Internship: Clinical (1-18 Credits)
Concentration students participate in planned clinical practice experience that integrates classroom theory, the learning of practice skills and the continued development of social work attitudes, ethics and values in the clinical practice setting. Prerequisite: completion of foundation year course work and field practicum.

SOWK 4965 International Field Practicum (0-18 Credits)
This international course fulfills partial requirement for a student's concentration year practicum. In an international social work setting, the practicum provides students with the opportunity to integrate social work theory and practice for effective professional intervention at clinical and community levels.

SOWK 4970 Concentration Field Internship (0-18 Credits)
Concentration students participate in planned community practice experience that integrates classroom theory, the learning of practice skills and the continued development of social work attitudes, ethics and values in the community practice setting. Prerequisite: completion of foundation year course work and field practicum.

SOWK 4971 Experimental Class (3 Credits)
Experimental courses allow GSSW to provide a wide variety of course offerings that respond to current issues and themes in the profession as they arise, as well as providing specialized courses that relate to the interests and areas of expertise of our faculty. All experimental courses are offered as electives open to all students. Prerequisite: determined by each instructor.

SOWK 4990 Topics in Social Work (1-3 Credits)
This topics course provides students with the opportunity to learn content appropriate to graduate social work education that is not currently incorporated into the standard MSW curriculum. Given the ever-changing nature of social work practice, theory, and research, topics of importance emerge each year that have particular relevance for a period of time or may be new emergent topics that will have relevance for the future of the discipline of social work. As such, this course provides a mechanism through which courses may be offered on a one-time basis. Topics may be related to social work practice, theory, or research. Topics vary from term to term and may be limited by program administrators, faculty, or by student interest.

SOWK 4992 Directed Study (1-10 Credits)
A permanent catalog course delivered on an individual basis when the course is not offered that term. Directed studies are approved under extenuating circumstances to provide an opportunity to complete a required course. Prerequisite: approval of instructor and MSW Director. Credit hours vary according to the catalog course taken.

SOWK 4999 Capstone (0-1 Credits)
This course is a 0-1 credit (Pass-Fail) required course in which students document their work through the development of an individual portfolio. Students are asked to upload artifacts (papers, presentations and field accomplishments) from both classroom and field internship that demonstrate how they have met the CSWE foundation and concentration specific EPAS competencies and practice behaviors. Students complete a reflection statement on their learning as it relates to the EPAS competencies.

SOWK 5000 Seminar in Professional Social Work Issues (2 Credits)
Examines the dilemmas and challenges confronting the social work profession and social work education. Examines the nature of professional education, the nature of the profession itself and the forces internal and external to the profession that have an impact upon practice and education. Required.

SOWK 5101 Social Welfare Policy Analysis and Development (3 Credits)
Applies analytical techniques to development of social welfare policy stressing the ability to formulate a policy hypothesis (i.e., a statement, in testable form, of a basic premise undergirding a policy position) and to reach conclusions based on analysis of empirical evidence related to the policy hypothesis. Required.
SOWK 5110 Introduction to Advanced Quantitative Research Methods (3 Credits)
This required doctoral course introduces students to quantitative approaches to conducting social research. The course includes material related to measurement, sampling, research design, data collection, and data analysis. While each of these topics encompasses technical issues to be mastered by doctoral students, the logic and underlying rationale of these research methods is of prime importance in this course. A second component of the course requires students to define and begin to develop a substantive area of intended study and research during their enrollment in the doctoral program. Elements of articulating a substantive research area and steps toward defining key research questions in a topical area are reviewed. Aspects of conducting literature reviews leading to the articulation of a substantive research area are discussed in class sessions.

SOWK 5111 Quantitative Methods for Assessing Social Interventions (3 Credits)
Social work researchers are in a unique position to contribute to knowledge about the causes of individual and societal problems and to test interventions that seek to prevent or ameliorate such problems. A variety of qualitative and quantitative research methods are used to advance knowledge about etiological factors contributing to individual and social problems and to assess the outcomes of specific social policies and practice strategies. This course presents a detailed examination of quantitative methods and designs that are useful in assessing the effects of social interventions. Measurement, sampling and design issues in generating and testing research questions and hypothesis are explored. Experimental, quasi-experimental, and survey research designs are assessed and applied to practice and policy issues and problems. Special emphasis is placed on developing skills necessary to conduct intervention research. Cognate students may be permitted on a case by case basis, space permitting.

SOWK 5120 Introduction to Advanced Qualitative Research Methods (3 Credits)
This course provides a substantive doctoral-level review of content on qualitative research methods and strategies. It is developed for students from social science disciplines. The content includes the nature of the method, the epistemological implications and assumptions, and appropriate applications. Student learning and evaluation includes the experience of developing a research proposal based on qualitative methodology and conducting data collection for a mini-research project. This class a prerequisite for SOWK 5121, Qualitative Data Analysis. This course is required for social work doctoral students. Students from other departments may register with permission from the professor.

SOWK 5121 Qualitative Data Analysis (3 Credits)
The focus of this course is on data analysis and interpretation, demonstration of the science of the analysis, and presentation of findings in oral and written forms. Students are expected to conduct qualitative analyses on textual data they collected as part of SOWK 5120 or as a result of some other qualitative data collection experience. Over the course of the term students learn to code and analyze their data, interpret findings, orally present those findings, and write a final paper in which they demonstrate a rigorous engagement with qualitative data analysis and the literature relevant to their topic. This course is for SOWK PhD students only. Cognate students may be permitted on a case by case basis, space permitting.

SOWK 5130 Mixed Methods Research in Social Work (3 Credits)
This course introduces doctoral students to mixed methods research in social work and the social sciences. Students explore mixed methods as a third research paradigm that strategically combines both quantitative and qualitative methods within a single inquiry. The course encourages students to actively reflect on previous quantitative and qualitative research training. Specific topics for the course include: history and language of mixed methods research; relevant paradigms and epistemological debates; mixed methods design and research questions; and analysis and dissemination consideration. SOWK PhD students only. Cognate Students will be allowed to register on a case by case basis, space permitting.

SOWK 5201 Statistical Methods (5 Credits)
Examines the use and interpretation of statistics in educational and human services research, including descriptive and inferential statistics. Required.

SOWK 5202 Correlation and Regression (4 Credits)
Examines correlational and multiple regression research designs and their application to social work and social science problems. This course is for SOWK PhD students only. Cross-listed with RMS 4911, SOWK 5952. Prerequisite: SWOK 5201.

SOWK 5203 Multivariate Analysis (5 Credits)
Provides a conceptual understanding of common multivariate statistical techniques as applied to research in social work and the social sciences. Prerequisite: SOWK 5201.

SOWK 5300 Social Science Theory and the Philosophy of Science (3 Credits)
This foundation doctoral level course introduces traditional issues and recent developments in the philosophy of science, and provides an overview of social science theory and theoretical frameworks. It examines philosophical questions on scientific inquiry and the consequences modern science imposes on our basic understanding of knowledge and nature. The course analyzes and critiques the social-and-behavioral-science foundations that undergird the social work knowledge base and current social work theories. There are no prerequisites for this course. This course is required to social work doctoral students.

SOWK 5301 Social Work Theory in Research and Practice (3 Credits)
This course builds on SOWK 5300, Philosophy of Science and Social Work Theory, to examine how theories, conceptual frameworks, perspectives, and models are used specifically within social work research, education, and practice. This course explores how theories are used in research and in social work interventions on individual, family, group, organizational, community, and policy levels. The course analyzes and critiques the social work knowledge base and the current state of social work theories. This course is required for social work doctoral students. Prerequisite: SOWK 5300.

SOWK 5401 Quantitative Research Methods (4 Credits)
Focuses on basic elements of quantitative social research methods: measurement, sampling, research designs, data collection and data analysis. Emphasizes logic and underlying rationale, as well as technical issues. Prior understanding of computer-based statistical analysis is helpful. Required.
SOWK 5403 Advanced Social Welfare Policy Analysis (3 Credits)
Applies analytical techniques to development of social welfare policy stressing the ability to formulate a policy hypothesis (i.e., a statement, in testable form, of a basic premise undergirding a policy position) and to reach conclusions based on analysis of empirical evidence related to the policy hypothesis. This course is for SOWK PhD students only.

SOWK 5405 Qualitative Data Analysis (4 Credits)
Provides an understanding of analysis methods used to draw meaning from qualitative data, methods that must be practical, applicable and understandable to other observers. Prepares students to use a systematic, scientific process of analysis that captures the meaning of data while avoiding research self-delusion and unreliable or invalid conclusions. Topics include data collection, data reduction, data display, and conclusion drawing and verification. Methods include application of computer software. Prerequisite: SOWK 5402. Required.

SOWK 5450 Social Work Knowledge Integration and Publication (3 Credits)
This required doctoral course introduces students to integrating knowledge for social work scholarship through the use of tolls that support academic argumentation and exposition. It provides students with the skills, expertise, and readiness necessary to compose a number of scholarly documents, including academic publications and the dissertation proposal. The course focuses on the preparation and writing of the comprehensive examination proposal as an example of such documents. The major product of the class is a paper designed to meet the requirements of the comprehensive examination proposal. Advisors and mentors participate in class presentations and critiques as a part of preparing the student for their ongoing scholarship.

SOWK 5500 Pedagogy in Social Work Education (3 Credits)
This foundation course examines philosophies, theories, and pedagogical models that are utilized in social work education. It explores how various perspectives shape the approaches and techniques used and how these in turn impact classroom effectiveness and issues of classroom management. The course incorporates concepts and develops skills based on evidence-based teaching. This course is a required course for social work students and has no prerequisite. This course is for SOWK PhD students only.

SOWK 5700 Teaching Practicum (3 Credits)
This 3-hour required course provides classroom instruction and teaching opportunities designed to prepare doctoral students for faculty positions in undergraduate and graduate level social work education. Students work with a faculty mentor to pursue practicum placements that match their substantive interests. Students are expected to devote approximately 8 hours to the practicum per week. Restricted to Ph.D. students only.

SOWK 5930 Multivariate Analysis (5 Credits)
Examines correlation and multiple regression research designs and their application to educational and social science problems. Cross listed with RMS 4913. Prerequisite: SOWK 5930.

SOWK 5952 Correlation and Regression (4 Credits)
Examines correlation and multiple regression research designs and their application to educational and social science problems. Cross listed with RMS 4911. Prerequisite: SOWK 5930. Required.

SOWK 5990 Special Topics (1-3 Credits)
This special topics course provides students with the opportunity to learn content appropriate to graduate social work education that is not currently incorporated into the standard PhD curriculum. Given the ever-changing nature of social work practice, theory, and research, topics of importance emerge each year which have particular relevance for a period of time or may be new emergent topics that will have relevance for the future of the discipline of social work. As such, this course provides a mechanism through which courses may be offered on a one-time basis. Topics may be related to advanced social work theory, pedagogy, or research. Topics vary from term to term and may be initiated by program administrators, faculty, or by student interest.

SOWK 5991 Independent Study (1-10 Credits)
This is an opportunity for students to undertake special study in a defined area of interest with faculty consultation.

SOWK 5995 Independent Research-Thesis (1-10 Credits)

SOWK 6991 Independent Study (1-10 Credits)
Students undertake special study in a defined area of interest with faculty consultation. By arrangement.

SOWK 6995 Dissertation Research (1-18 Credits)
The formal mechanism for undertaking the dissertation, providing for faculty support through the appointment of a dissertation committee. By arrangement.

### Graduate Tax Program

The Graduate Tax Program was created at the University of Denver in 1975 in response to the demand for trained tax specialists in both the legal and accounting professions. Initially an evening program catering to the needs of practicing attorneys and accountants employed in the Denver area, it has evolved into one of the few such programs to offer a curriculum designed for both the full- and part-time student. The Graduate Tax Program also offers its degrees in an online format for working professionals who live more than 50 miles from Denver. The Program, accredited by the Association to Advance Collegiate Schools of Business (AACSB) and offered subject to acquiescence by the American Bar Association, is offered to highly qualified students who are graduates in law, accounting, or business.
The Graduate Tax Program prepares students for entry into professional tax practice in both the public and private sectors. Through the interdisciplinary nature of the program, the law graduate learns the accounting aspects of tax practice, and the accounting graduate acquires a thorough understanding of the legal process.

Graduate Tax Program

Office: Ricketson Law Building, 2255 E. Evans Ave. Ste 390, Denver, CO 80208
Phone: 303-871-6239
Email: gtp@du.edu
Web Site: http://www.du.edu/tax

The Graduate Tax Program was created at the University of Denver in 1975 in response to the demand for trained tax specialists in both the legal and accounting professions. Initially an evening program catering to the needs of practicing attorneys and accountants employed in the Denver area, it has evolved into one of the few such programs to offer a curriculum designed for both the full- and part-time student. The Graduate Tax Program also offers its degrees in an online format for working professionals who live more than 50 miles from Denver. The Program, accredited by the Association to Advance Collegiate Schools of Business (AACSB) and offered subject to acquiescence by the American Bar Association, is offered to highly qualified students who are graduates in law, accounting, or business.

Graduates of accredited law schools successfully completing the Program receive the degree LL.M. in Taxation. All other candidates receive the degree Master of Taxation (M.T.). Both degrees are awarded upon the joint recommendation of the faculties of the Sturm College of Law and Daniels College of Business. To be competitive in the marketplace, non-lawyers should plan to earn the CPA designation. A dual degree program is also available, where a University of Denver law student may pursue the J.D. and LL.M. in taxation concurrently.

The educational standards of the Program are rigorous; students are expected to be prepared for class each day, and grading is usually based on one final examination. The environment, however, is one of cooperation rather than competition, and the teaching attitude is both helpful and challenging. The Program is dedicated to the pursuit of superior professional competence, and students with similar aspirations find their studies in the Graduate Tax Program entirely rewarding.

Master of Laws in Taxation

- Complete application.
- $65 Application Fee.
- A J.D. or its equivalent from a college of law approved by the American Bar Association. Official transcripts must be sent directly from each college or university attended.
- LSAT score sent from the law school (photocopy of the first page of the LSDAS report, or in a letter from the law school Registrar. The LSAT is not required for graduates of non-U.S. law schools.
- Students whose native language is not English and who have not received a degree from a U.S. institution must either submit a Test of English as a Foreign Language (TOEFL) score of at least 550 (80 internet based), IELTS score of 6.0, or successfully complete the Graduate Preparation Program at the University of Denver English Language Center.
- A resume and personal statement must be submitted to show an applicant's background and interest in taxation. Letters of recommendation are also welcome, but not required.

Master of Taxation

- Complete application.
- $65 Application Fee.
- A baccalaureate degree in accounting or business from an accredited university. Official transcripts must be sent directly from each college or university attended.
- Official GMAT score report sent directly to us from GMAC. Use GMAT code number MZR-GT-68 or select University of Denver/Daniels College of Business/Graduate Tax Program from the pull-down menus on GMAC.com. The GMAT may be waived if the applicant has previously earned a master's degree from an accredited U.S. institution.
- Students whose native language is not English and who have not received a degree from a U.S. institution must either submit a Test of English as a Foreign Language (TOEFL) score of at least 550 (80 internet based), IELTS score of 6.0, or successfully complete the Graduate Preparation Program at the University of Denver English Language Center.
- A resume and personal statement must be submitted to show an applicant's background and interest in taxation. Letters of recommendation are also welcome, but not required.

### Courses

**TAX 4010 Tax Principles, Research and Writing (2 Credits)**
Research sources, techniques, and practice; in-depth research of selected areas. Emphasis on argument and communication of conclusion; evaluation of legislative history and administrative authorities.

**TAX 4020 Individual Tax Problems (4 Credits)**
Using the Internal Revenue Code and the Federal Income Tax Regulations as a basis, substantive issues relating to individual taxation are covered. Areas are included are general concepts of gross income, individual employee benefits and deductions, charitable deductions, alternative minimum tax, deductibility and classes of interest, office in home and vacation homes, and a general overview of the interrelationships of various statutory and non-statutory principles. Cross listed with LAWS 4292.

**TAX 4100 Tax Accounting (4 Credits)**
Adoption of and change in accounting periods; income recognition and deduction allowance under the cash and accrual methods, including discussion of the time value of money; prepaid and contested income and expenses; income and deduction reversals; accounting method and practice changes; installment sales; long-term contractors; inventory accounting method and practice changes; installment sales; long-term contractors; inventory accounting, including LIFO and manufacturing's inventories and net operating losses; income tax allocation for financial reporting.

**TAX 4110 Property Transactions (4 Credits)**
Basis of property; expenditures and current expense comparison; depreciable status; amortization of intangible property; depreciation methods; property casualties and losses; profit or loss computation and characterization for taxable property dispositions; limitations on passive losses; lessor and lessee reporting; tax-deferred dispositions.

**TAX 4120 Qualified Pension and Profit Sharing Plans (4 Credits)**
An in-depth study of ERISA, labor departments rules, and Internal Revenue Code provisions relating to qualified deferred compensation. The course is geared toward an understanding of all the pension and profit sharing rules required for plan qualification, with emphasis on qualified plan planning for both incorporated and unincorporated forms of business.

**TAX 4200 Corporate Taxation I (4 Credits)**
The federal income taxation of corporations and their shareholders with emphasis on the creation of the corporation, establishment of its capital structure, operational alternatives, distributions to shareholders, stock dividends and redemptions, personal holding company, and accumulated earnings tax.

**TAX 4210 Estate & Gift Taxation (4 Credits)**
Taxation of gratuitous transfers under the federal estate and gift tax codes, including taxable inter vivos gifts, annual exclusion, gift-splitting, gift tax charitable deduction, gift tax on powers of appointed estate, estate tax on owned interests, property transferred inter vivos with retained interests and powers, property subject to powers of appointment or transferred in contemplation of death, jointly owned property, life insurance proceeds, annuities and employee death benefits, marital deduction, charitable deduction, estate tax credits, estate tax deductions, valuation problems.

**TAX 4220 Fiduciary Income Taxation (4 Credits)**
Federal income taxation of estates and trusts. Included is a discussion of the concept of an estate or trusts; trust accounting income for a simple and complex trust; calculation of taxable income, including special rules on the calculation of distributable net income, capital gains, personal exemptions, and charitable contributions; the separate share rule and trapping distributions; income in respect of a decedent's; the grantor trust rules under Section 671-678; and the calculation of the alternative minimum tax.

**TAX 4230 Estate Planning (3 Credits)**
Estate analysis, including fact gathering and the analysis of data; the psychological aspects of "role playing" in estate planning; the members of the team (the attorney, the CPA, the life underwriter, the trust officer); life insurance in an estate and business planning context; planning with trusts. including revocable, short-term, and irrevocable; the transfer of a closely held business interest from one generation to the next, including full and partial stock redemptions, cross purchase agreements, private annuity, installment sale, retirement, recapitalization, qualified and nonqualified plans of deferred compensation; special estate planning considerations for the professional corporation, the highly paid executive, and the farmer and rancher; specific cases analyzed. Prerequisite: TAX 4210.
TAX 4240 Tax and Financial Planning (3 Credits)
This is an introductory, integrated course focusing on personal financial planning. Topics covered include cash flow projections and budgeting, annual and multiple period income tax planning, an introduction to taxation of investments, an insurance and liability coverage insurance and liability coverage survey, retirement planning, and estate and succession planning.

TAX 4300 Corporate Taxation II (4 Credits)
A continuation of Corporate Taxation I with emphasis on corporate reorganizations, operation, liquidation of subsidiary corporations and corporate division, and carryover of tax attributes. Prerequisite: TAX 4200.

TAX 4310 Civil & Criminal Tax Procedure (4 Credits)
Statute of limitations on assessment/collection of deficiencies, definition of deficiency, restrictions on assessment and collection; statute of limitations on overpayments, claims and suits for refund, and limitations for criminal prosecutions; regulations and rulings--retroactive revocation; administrative settlements, closing agreements and compromises; civil penalties; tax return preparer penalties; civil litigation--injunctions, jurisdiction of Tax Court, District Court and Court of Claims, small claims procedure, authority to increase deficiencies, choice of forum; jeopardy assessments and termination of taxable years; criminal tax investigations--administrative summons, document production (taxpayer and third party), constitutional protections, common law privileges, strategies; professional responsibilities and ethics for the tax practitioner.

TAX 4315 Low Income Taxpayer Clinic (2-4 Credits)

TAX 4320 Partnership Taxation (4 Credits)
Tax treatment of partnership property in the hands of the partner; the conduit rule; problems associated with the formation, operation, and dissolution of the partnership; sales of the partnership interest; withdrawal and retirement of partners; basis adjustments, unrealized receivables, and substantially appreciated inventory.

TAX 4330 Corporate Taxation III (4 Credits)
Advanced corporate taxation problems with emphasis on collapsible corporations; liquidations; detailed study of sections 305, 306, 307; loss carryovers and Subchapter S corporations. Prerequisite: TAX 4300.

TAX 4410 Taxation-Natural Resources (3 Credits)
Tax problems encountered in the acquisition, operation, and disposition of natural resources properties; pre-production expenditures, depletion, depreciation, and ad valorem taxes; emphasis on overall tax planning for natural resource ventures.

TAX 4420 International Taxation (4 Credits)
Introduction to U.S. international taxation with an equal emphasis on inbound and outbound transaction. Resident and nonresident alien taxation, withholding taxes, effectively connected (business) income, foreign investment in U.S. real estate, tax treaties, branch taxes, earnings stripping, conduit financing rules, foreign personal holding companies, controlled foreign entities, foreign tax credit, foreign personal holding companies, controlled foreign corporations, passive foreign investment companies, export transactions, Subpart F manufacturing rules, outbound property transfers, and transfer pricing. Cross listed with LAWS 4344.

TAX 4430 Exempt Organizations (3 Credits)
The statutory exemption for "charities," social welfares and social clubs, homeowners' associations, fraternal orders, employee benefit organizations, mutual or cooperative companies, business and professional leagues, labor unions, exempt organizations, property title companies, federally organized or chartered organizations, and political organizations' activities, funds, and lobbying activities; prohibited transaction rules; the private foundation; the unrelated business and debt-financed income tax exposures; excise tax exemptions; administrative appeal and declaratory judgment procedures; anti-discrimination considerations; discrimination considerations; charitable contributions.

TAX 4470 Employment Tax (2 Credits)
Explore existing employment tax risks, recognize employment tax planning opportunities through appropriate compensation and entity structuring techniques, analyze proper worker classification, and highlight preventative techniques to avoid personal liability.

TAX 4490 State & Local Taxation (2 Credits)
Taxable incidents, privilege tax, discrimination, and multiple taxation under the Commerce Clause of the United States Constitution; taxation based on class legislation and Equal Protection Clause; nexus or jurisdictional due process allocation and apportionment formulas; business versus nonbusiness income; multi-state tax compact; unitary concept; residence definitions; nonresident income sources; tax credits and short-period returns for individual income tax payers; sales of tangible personal property; retail and wholesale sales; taxable and nontaxable leases; contractors rules, exemptions, and resale certificates under sales and use tax statutes; valuation techniques for real personal property; and administrative and judicial appeal of property tax valuations and assessments.

TAX 4500 Consolidated Returns (3 Credits)
Methods used by multiply related corporations to report income and losses; impact of corporate combination and separation; timing problems.

TAX 4600 Seminar: Selected Topics (2-4 Credits)
Recognition of tax problems and opportunities for a broad range of transactions encountered by individuals. Areas include family income splitting and other tax reduction and avoidance techniques; portfolio transactions, including short sales, puts and calls, and commodity futures; structuring agreements in contemplation of marriage or arising out of separation or divorce; personal insurance; charitable contributions; net operating losses; alternative minimum tax; various year-end planning techniques.
TAX 4980 Internship (0 Credits)
The Graduate Tax Program (GTP) encourages students to gain practical experience and to develop professional skills in the field of taxation. Internships are supervised by faculty who interact with the eligible student and the employer or organization that provides the internship. The internship should provide a new learning experience for the student intern and must be related to taxation. Satisfactory completion of the internship results in a passing grade for the internship. The GTP Director or a full time GTP faculty member may serve as Faculty Supervisor for GTP interns. Students must obtain approval from the GTP Director or a full-time GTP faculty member.

TAX 4991 Independent Study (1-5 Credits)
Opportunity to study and write in any area agreed upon between the student and a member of the faculty. The student is required to produce a written work of publishable quality to receive a final grade for the course. The 4- quarter-hour maximum may be applied toward graduation requirements with no more than 2 quarter hours in any one quarter.

DU-Illiff Joint PhD

Joint Doctoral Program in the Study of Religion

The PhD in the Study of Religion is a joint venture between the University of Denver and the Iliff School of Theology. With faculty from both schools equally available for coursework and mentoring, the Joint PhD combines the expansive opportunities of the University of Denver with the deep theological resources of the Iliff School of Theology. Coursework in all concentrations emphasizes cross-discipline research. Classes are taught by faculty from the University’s Graduate School of Professional Psychology, Social Work, Education and International Studies, Anthropology, English, Philosophy, and more. These degrees equip students to become scholar-teachers who are committed to addressing contemporary social and spiritual matters.

DU Iliff Joint Doctoral Program in the Study of Religion

Office: Iliff School of Theology I-408

Doctor of Philosophy in the Study of Religion with a Concentration in Biblical Interpretation

This research program focuses on Hebrew Bible and Early Christian (canonical and apocryphal) literature. Students in this concentration will have competence to teach undergraduate and graduate courses in the languages, literature, history, and religion of ancient Israel and early Christianity. In addition to teaching competencies, graduates will be prepared to conduct research and scholarship in biblical studies. Students may specialize in select areas of either Hebrew Bible or the New Testament and their cognate literatures.

Doctor of Philosophy in the Study of Religion with a Concentration in Religion and Psychological Studies

The Religion and Psychological Studies concentration has two emphases: (1) Religion and Behavioral Sciences, and (2) Pastoral Theology and Counseling.

The Religion and Behavioral Sciences track is designed to help persons explore the relationship of behavioral sciences, personality theory, and religion. Students in this track will be prepared to do research and teach in the fields of religion and psychological studies and psychology of religion. Graduates from this track would, therefore, be in a position to perform work for a research institute or to teach at the college, university, or seminary level in the general field of psychology of religion. Successful degree candidates will be conversant with other disciplines and methods of inquiry in religious studies.

The Pastoral Theology and Counseling track is designed to train persons critically and constructively to relate theological and psychological resources to clinical work, teaching, and research in the field of pastoral theology and counseling. The stipulations of this track are consistent with the membership requirements of the American Association of Pastoral Counselors. This track is not designed to prepare persons to meet the requirements for licensing as clinical psychologists, though many of the courses have been used as a partial basis for licensure in the State of Colorado as a Professional Counselor.

Doctor of Philosophy in the Study of Religion with a Concentration in Religion and Social Change

The concentration in Religion and Social Change is an interdisciplinary research program focusing on the relation of religions and societies. Religion functions sometimes to conserve values in the midst of change; sometimes to inhibit urgently needed change, and sometimes to empower and motivate qualitative change. The concentration provides a scholarly context for pursuing descriptive, analytic and constructive examination of these complex interrelationships between religions and societies. A commitment to explore the ways religious thought may contribute to responsible engagement with
contemporary societal and global challenges is a major dimension of this concentration. A critical aspect of this exploration is the systemic whole of globalization within which particular contexts and problems are located.

Academic disciplines especially germane to this interdisciplinary concentration are social sciences (e.g. sociology, anthropology, international studies); religious, intellectual and cultural histories; and critical reflection (ethics, philosophy, theology, cultural theory). An assumption of this program is that the interrelationships of religions and societies are most fruitfully understood through a combination of descriptive, historical and critical theories and methods.

Within this concentration, special resources are available in: Religion, Politics and Social Change in varied societal contexts (e.g. Europe, First Nation Peoples, Middle East, North America, South Asia, Southern Africa); Religious and Cultural Diversity in varied societal contexts (see above); Postcolonial Thought and Critiques of Globalization, Critical Theory Pertaining to Systemic Analysis American Indian Cultures and Religious Traditions, Human Rights, and Latina/o Studies.

Doctor of Philosophy in the Study of Religion with a Concentration in Theology, Philosophy & Cultural Theory

The Theology, Philosophy, and Cultural Theory concentration comprises four sub-fields:

- Theology
- Philosophy
- Comparative Studies
- Cultural Theory

Students concentrate in, and demonstrate extensive knowledge of, one of the four sub-fields, which will be regarded as the student’s specialty field. Students graduating from this concentration will have developed competency to teach at least one undergraduate course in each of the four sub-fields. They will also be prepared to do research, publish, and teach in their sub-field of specialization.

Joint PhD Program in The study of religion

Below are instructions for applying to the Joint PhD Program in the Study of Religion at the University of Denver and Iliff School of Theology. If you have any questions about the application process, please contact the DU Office of Graduate Studies.

Apply Online / Application Deadlines

- Applications (https://du-grad.edu.185r.net/application) for the DU/Iliff Joint PhD Program must be submitted online.
- All online materials must be submitted and all supplemental materials must be postmarked by January 1 for fall admission to the PhD program. Late applications will be considered but priority consideration for admission and program scholarships will be given to applicants who meet the deadline.
- A $65 non-refundable application fee is required for an application to be processed.
- A $300 non-refundable deposit is due upon acceptance of admission, which will be applied toward the first quarter of tuition upon matriculation.

Course and Degree Prerequisites and Requirements

- A completed master’s degree relevant to the student’s proposed area of study from a HLC accredited American university or a comparably accredited institution outside of the United States as approved by DU’s Office of International Admissions is required. In special cases, a student who is admitted with a master’s degree in a field other than Religious Studies or a closely related field may be required to take remedial coursework that would not count as part of the student’s program and would not be covered by departmental scholarship.
- A grade point average from all graduate work of no less than 3.0 (B) is required for admission into the program.

Transcripts

- Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed.
- The applicant is responsible for obtaining all transcripts. DU students and alumni do not need to provide DU transcripts. Applicants who have earned a degree outside the U.S. must submit transcripts accompanied by certified English translations, if not normally issued in English.
- Official study abroad transcripts are required unless the course titles, grades and credit earned abroad appear on another transcript. Transcripts from outside of the U.S. are evaluated by the Office of International Student Admission. This process can take three to four weeks and must be complete by the program’s stated deadline. Therefore, applicants with a degree from outside of the U.S. are encouraged to apply early. Applicants educated outside the U.S. are encouraged to contact the Office of Graduate Studies for assistance regarding transcript-related materials.
- The University of Denver will consider electronic transcripts official from a domestic institution provided by the following approved agencies: Army/ American Council on Education Registry Transcript System (AARTS); Docufide/Parchment; National Student Clearinghouse; Naviance; Royall and Company; and, Scrip-Safe.
Graduate Record Examination

- GRE scores for the general test are required for all applicants. (Note: When reporting scores to the Joint PhD Program, please use institution code #4842 for the University of Denver.) Please allow at least 14 business days for your general test scores to be received. Entrance exam scores older than five years from the date of the application may not be acceptable for admission.

Language Proficiency

- Official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required of all graduate applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL or IELTS score is received. The TOEFL and IELTS scores are valid for two years from the test date. The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (paper-based). The institution code for the University of Denver is 4842. The minimum IELTS score accepted by the University is 6.0. Graduate Teaching Assistants (GTAs) must demonstrate fluency in spoken English by scoring a 26 on the TOEFL speaking section or 8.0 on the IELTS speaking section. Please see the Graduate Policy Manual for complete English language proficiency requirements.

- Applicants may be exempted from English proficiency test requirements if by the time of matriculation they have earned a post-secondary degree from a formally-recognized/accredited university where the language of instruction and examination is English. Such applicants may be exempt from the TOEFL/IELTS requirement but not from other standardized graduate entrance examinations.

- Students wishing to apply for the Biblical Interpretation (BI) concentration must have demonstrated proficiency in both ancient Greek and ancient Hebrew equivalent to one-year of study at the time of application. Proficiency must be documented by a transcript from a regionally accredited institution or by examination by a qualified examiner approved by the BI faculty.

Personal Statement

- A statement of purpose outlining the professional and/or academic goals of the applicant and detailing the applicant’s interest and background in their chosen concentration is required. (Combined length is typically 3-5 pages.) Applicants are strongly encouraged to name specific faculty at DU and/or Iliff with whom they would like to work. The statement should be uploaded through the online application process.

Writing Sample

- A research paper or essay that represents the applicant’s best effort in an academic field of study directly related to the proposed field of study is required. (Length is typically 10-20 pages, not to exceed 25 pages.) The research paper should be uploaded and attached to the online application prior submission.

Recommendation Letters

- Three letters of recommendation are required from qualified persons, including graduate and/or undergraduate faculty familiar with the applicant’s academic work. Letter of recommendation requests are sent to your recommender via email within one business day of the submission of your online application. You will be asked to provide names and email addresses of individuals who will be writing your recommendations.

Financial Support

- To be considered for financial support, domestic applicants should apply early and submit the Free Application for Federal Student Aid (FAFSA) by the priority deadline, February 15.

- Information about financial aid can be found on the Office of Financial Aid (http://www.du.edu/financialaid) website. International students are not eligible for federal financial aid.

- The DU/Iiiff Joint PhD Program awards merit-based scholarships. Scholarship determinations are made at the time of admission. No separate application is needed.

Application Status

- We encourage you to be actively engaged in the admission process. You can check your application status online at https://webcentral.du.edu.

Mailing Address

- Mail official transcripts and any supplemental admission materials not submitted with the online application to:

  University of Denver
  Office of Graduate Studies
  Mary Reed Building, Room 5
  2199 S. University Blvd.
  Denver, CO 80208-4802

International Applicants

- For complete international applicant information, please visit the Office of Graduate Studies International Student Application Information. International applicants are strongly encouraged to have their applications complete at least eight weeks prior to the program’s application deadline.
The Graduate Policy Manual provides complete details regarding admission requirements.

**Doctor of Philosophy in the Study of Religion with a Concentration in Biblical Interpretation**

- **THEO 4035 Visions of a New Society (4 Credits)**
- **THEO 4037 Holy Spirit: History and Traditions (2 Credits)**
- **THEO 4041 Clinical Pastoral Education (4 Credits)**
- **THEO 4043 Theology and Human Sexuality (4 Credits)**
  A critical survey of both historical and prevailing concepts of human sexualities in various religious, cultural, and theological traditions. An examination of the phenomenology of sexuality in relation to issues of power, identity, as well as in relation to the politics of sexual difference.
- **THEO 4044 Ministry and Human Sexuality (4 Credits)**
  Reflecting on narratives of sexual desire and intimacy, gender, sexual orientation and body image, this course compares theological and psychological ways of understanding sexuality.
- **THEO 4045 Pilgrimage in Comparative Perspective (4 Credits)**
  A comparative study that examines the dynamics of pilgrimage from a number of different angles--theoretical, doctrinal, ritual, social--and which utilizes a variety of sources (including classical, ethnographic studies of actual pilgrimages) and focused studies of particular pilgrimage places.
- **THEO 4046 Theological Imagination & Construction I (4 Credits)**
  This course (a) introduces students to the main movements in Christian theology since the late nineteenth century and their particular historical foundations; (b) introduces students to the tasks of Christian theology; its varying criteria, methods and substantive proposals on what it has often taken to be the fundamental human questions; (c) and enables students to develop a systematic statement of their own theological perspective, with attention to: (1) its clarity, coherence and capacity to illuminate experience; (2) its relationship to the resources and limitations of a particular historical tradition and the interests of a particular social location; (3) its relationship to alternative Christian perspectives, especially those of a traditionally excluded peoples; and (4) its possible implications in terms of social and personal praxis.
THEO 4047 New Testament Introduction I (2 Credits)
An introduction to the literature of Christian origins that begins with a look at the context out of which the New Testament emerged, then turns to the earliest extant texts, Paul’s letters.

THEO 4048 Theological Imagination & Construction II (4 Credits)
This course (a) introduces students to the main movements in Christian theology since the late nineteenth century and their particular historical foundations; (b) introduces students to the tasks of Christian theology: its varying criteria, methods and substantive proposals on what it has often taken to be the fundamental human questions; (c) and enables students to develop a systematic statement of their own theological perspective, with attention to: (1) its clarity, coherence and capacity to illuminate experience; (2) its relationship to the resources and limitations of a particular historical tradition and the interests of a particular social location; (3) its relationship to alternative Christian perspectives, especially those of a traditionally excluded peoples; and (4) its possible implications in terms of social and personal praxis.

THEO 4124 New Testament Literature: Romans (4 Credits)

THEO 4125 Systematic Theology I (4 Credits)

THEO 4126 Systematic Theology II (4 Credits)

THEO 4127 Pastoral Care of Families (4 Credits)

THEO 4128 Theology and Culture (4 Credits)

THEO 4129 Women in American Religious History (4 Credits)

THEO 4130 Social Ethical Issues (4 Credits)

THEO 4151 Sacred Space and Place in Comparative Perspective (4 Credits)
This course examines sacred spaces and sacred places from a comparative perspective. Through close reading and discussion of primary and secondary sources, students are challenged to think critically and theoretically about sacred spaces and places. Cross listed with THEO 6151.

THEO 4198 Social Change Praxis Seminar (4 Credits)

THEO 4199 Social Change Praxis Seminar (4 Credits)

THEO 4200 Social Change Praxis Seminar (4 Credits)

THEO 4202 Post-Traumatic Stress Disorder: Pastoral, Psychological, and Theological Responses (4 Credits)
Examines multicultural issues in pastoral care and counseling and explores the dynamics and complexities of culture, race and other socializing factors in pastoral care conversations.

THEO 4203 Ministry in Cultural Context (1-4 Credits)

THEO 4224 United Methodist History and Sources of United Methodist Doctrine (4 Credits)
English Methodism to the death of John Wesley; the United Methodist tradition in North America; racial and ethnic diversity and the role of women in United Methodism. This course meets the disciplinary requirements for ordination. Offered each year online and residential.

THEO 4225 Ministry Praxis Seminar (1 Credit)
Ministry Praxis Seminars are one credit hour weekend courses offered quarterly that focus on specific aspects of the practice of ministry with attention given to the integration of theory and practice. Topics vary and may include issues such as life cycle rituals, budgeting and finance, ministry in particular settings. The course may be repeated for credit.

THEO 4301 Doing Christian Ethic-Margins (4 Credits)

THEO 4304 Race, Gender, Class: Historical & Social Analysis of Racism in the Modern World (4 Credits)
An historical survey of the role of racism, sexism and classism in shaping the oppressive institutional structures of the existing world order and of how sociological analysis of these structures can help justice and peace activists direct effective action toward the elimination of race, gender and class oppression.

THEO 4305 Storytelling and Narrative Justice (4 Credits)
This course explores how justice might be defined, sought and made through the use of storytelling and narrative forms of various types: such as historical record, education, the autobiographical nature of resistance to oppression, socio-political commentary as story, narrative clarification of individual and community values, including preservation of culture, motivation for the work of justice, and the creation of community itself through story. The course includes storytelling perspectives such as oral history and tradition, narrative theory, auto/biography, and performance/theatre. Using multiple storytelling and narrative platforms, students will examine others’ stories and narratives of justice-seeking-and-making and create and examine their own.

THEO 4335 Contemporary Sociology of Religion (4 Credits)
Seminar in which the work of such sociologists as Berger, Bellah, Stark, Wuthnow, Warner and others will be examined and critiqued. Cross listed with THEO 6335.

THEO 4400 Liberation Tehologies (4 Credits)

THEO 4401 Theology Ethics Liberation Person (4 Credits)
THEO 4418 Second Century Life & Thought (4 Credits)
An attempt to understand Christian life and thought in the Roman Empire in the Second-century by analyzing primary.

THEO 4430 Religion in the Public Square (4 Credits)
What is the proper role of religion in the public debates necessary to healthy democracy? Some argue that religion in the public square threatens the fundamental democratic right, the freedom of conscience; others that only religion can inculcate the communal values that make democracy possible. This course examines the best and most prominent arguments in this contemporary debate.

THEO 4701 Topics in Theology (0-5 Credits)
THEO 4702 Topics in Theology (0-5 Credits)
THEO 4991 Independent Study (0-4 Credits)
THEO 5991 Independent Study (1-10 Credits)

THEO 6001 Theories and Methods in the Study of Religion (4 Credits)
This course begins with a brief overview of the history of the study of religion in the west, from antiquity to the modern period. When we reach the modern period, the course shifts to considering 'representative' theories of religion, broken down roughly along ideological and/or disciplinary lines.

THEO 6002 Pedagogy and the Teaching of Religion (4 Credits)
This course looks at pedagogical methods as they relate to the teaching of religion. Students design syllabi and materials appropriate for the teaching of religion in at least two different contexts. In addition, the course covers theoretical issues related to the teaching and learning process.

THEO 6003 Dissertation Proposal Seminar (4 Credits)
This seminar focuses upon the range of research topics and methods in religious and theological studies by examining dissertations and dissertation proposals related to the Joint Ph.D. Program at Iliff and the University of Denver. Bibliographic and research methods and matters of style and format receives particular emphasis. Students present their own dissertation proposals for discussion.

THEO 6090 Professional Development (0 Credits)
This course provides the "nuts and bolts" on not only surviving, but also thriving within the academy. Assuming that the student's goal is an eventual tenure-track position, the course demystifies the PhD route so that the student, through a working knowledge of the academy, can better position her/himself to succeed. Besides providing professional development, the course attempts to raise the level of involvement of PhD candidates in the profession, from presenting papers to publishing articles.

THEO 6100 Religious Identity in Antiquity (4 Credits)
An exploration of the way individuals and communities understood their religious beliefs and behaviors during the Hellenistic and Roman periods. The focus is on varieties of Jews and Christians (including how they formed their identities in relation to each other), but consideration is also given to the Greco-Roman religious context.

THEO 6101 Studies in Early Christianity (4 Credits)
A critical study of themes and selected movements within early Christianity and other religions of the Greco-Roman world. May be repeated for credit.

THEO 6102 Women in Early Christianity (4 Credits)
An exploration of the role women played in early Christianity, with attention given to the social and literary constructions of women in Greco-Roman antiquity.

THEO 6103 Hebrew Bible Literature: Genesis (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6104 Hebrew Bible Lit-Job (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6105 Hebrew Bible Literature: Psalms (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6106 Hebrew Bible Literature: Prophetic Literature (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6107 Hebrew Bible Literature: Writings (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6108 Hebrew Bible Literature: Isaiah (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6109 Hebrew Bible Literature: Ruth and Esther (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6110 Hebrew Bible Literature: Jeremiah (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6111 Hebrew Bible Literature: Jonah (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.
THEO 6112 Hebrew Bible Literature-Poetry of the Bible (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6113 Hebrew Bible Literature: I Samuel (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6114 Hebrew Bible Literature: Judges (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6115 Hebrew Bible Literature: Exodus (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6116 Hebrew Bible Literature: Wisdom Literature (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6117 New Testament Literature: Synoptic Gospels (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6118 New Testament Literature: Parables (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6119 New Testament Literature: Matthew (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6120 New Testament Literature: Mark (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6121 New Testament Lit-Luke (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6122 New Testament Lit-John (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6124 New Testament Literature: Romans (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6125 New Testament Literature: Corinthians (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6126 New Testament Literature: Galatians (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6127 New Testament Literature: Ephesians and Colossians (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6128 New Testament Literature: Revelation (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6129 New Testament Literature: Hebrews (4 Credits)
Interpretation of selected New Testament literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6130 Biblical Theology (4 Credits)
Each quarter the course is offered it deals with a selected issue, e.g., Old Testament theology, Christology, Jesus the hero.

THEO 6131 Ancient Scriptural Interpretation (4 Credits)
An exploration of the way ancient Christian and Jewish texts interpret and adapt older scriptural texts. The focus is on both the dynamism of biblical themes and stories and the enduring nature of specific threads of biblical tradition.

THEO 6132 Deutero-and Extra-Canonical Literature (4 Credits)
Interpretation of selected Deutero- and extra-canonical books.

THEO 6133 Jewish and Greco-Roman Non-Cannonical Texts (4 Credits)
This seminar examines Jewish and Hellenistic backgrounds; the social scientific study of early Christianity; and the New Testament in its literary environment.

THEO 6136 Feminist Interpretation of the Bible (4 Credits)
An exploration of feminist hermeneutics as it pertains to selected texts from the Hebrew Bible and the New Testament. Attention is given both to examining works of feminist interpretation and to the development of critical skills in reading biblical texts.

THEO 6137 Ph.D. Colloquium in Biblical Interpretation (2 Credits)
Discussion of selected topics in the field of biblical studies, e.g., northwest Semitic inscriptions, Hebrew poetry, Judges, Acts of Andrew, literature of rabbinic Judaism, American biblical studies. Also listed as RLGS 4119.
THEO 6138 Tutorials in Biblical Interpretation (4 Credits)
The faculty of the biblical interpretation concentration offer tutorials for students who make arrangements with the faculty. The course may be taken more than once. Topics may include: Conversion in the Ancient World Dead Sea Scrolls Gnosticism Sociology of Pauline Christianity Genesis Prophetic Literature Narrative Analysis Psalms Paul and the Law Apocalyptic and the Apocalypse of John Theodicy Job.

THEO 6139 Methods for Interpreting Biblical Texts (4 Credits)
This seminar addresses critical study of biblical texts, the history of interpretations and hermeneutics.

THEO 6140 Teaching the Bible (4 Credits)
Designed to integrate faith development theory, biblical interpretation and confluent education. Education instructional models for the purpose of assisting students to develop professional self-understanding and functional skills as interpreters and teachers; experience in teaching adults in a local setting.

THEO 6141 Asceticism in the Ancient World and Early Christianity (4 Credits)
Critical study of the theories and practices of asceticism in early Christian literature. Special emphasis on the integration of modern critical theory and ancient texts. Advanced master's students may enroll with permission of the instructor.

THEO 6142 Greek Reading (4 Credits)
Selected readings from the New Testament and other early Christian literature. Greek I, II and Exegesis are prerequisites. May be repeated for credit.

THEO 6143 New Testament Seminar: Language and Text (2-4 Credits)
This seminar focuses on advanced Greek grammar, reading and vocabulary building; textual criticism; and reference tools. May also be listed as RLGS 5113.

THEO 6144 Language Seminar (4 Credits)
Advanced work in biblical languages or a selected issue in a language study.

THEO 6145 Hebrew Reading (2 Credits)
Advanced work in biblical languages or a selected issue in a language study.

THEO 6146 Hebrew Bible Seminar: Language and Text (4 Credits)
This seminar focuses on the Biblia Hebraica Stuttgartensia; Hebrew grammar and syntax; and text critical methodology. May also be listed as RLGS 5110.

THEO 6147 Greek Reading (2 Credits)

THEO 6148 Studies in Israelite Religion (4 Credits)
Critical study of the phenomenon of religion and selected movements within Israelite religion, e.g. survey of history of Israelite religion.

THEO 6149 Language Seminar (4 Credits)
Advanced work in biblical languages or a selected issue in a language study.

THEO 6150 Hebrew Bible Literature: Leviticus (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6151 Sacred Space and Place in Comparative Perspective (4 Credits)
This course examines sacred spaces and sacred places from a comparative perspective. Through close reading and discussion of primary and secondary sources, students are challenged to think critically and theoretically about sacred spaces and places. Cross listed with THEO 4151.

THEO 6152 Hebrew Bible Literature: Numbers (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6153 Hebrew Bible Literature: Deuteronomy (4 Credits)
Interpretation of selected Hebrew Bible literature. Each course focuses on a book or selected topic. Different courses are offered each year.

THEO 6200 Ph.D. Colloquium in Religion and Psychological Studies (1-4 Credits)
A review of contemporary developments in psychology and theology offered during the winter quarter each year for doctoral students in the religion and psychological studies concentration. Also listed as RLGS 5301.

THEO 6201 Seminar on Pastoral Psychology (1-4 Credits)
Topics will vary with needs and interests of students. May be repeated for grade.

THEO 6202 Theological Themes in Pastoral Care (4 Credits)
Theological bases of pastoral care. Contributions of contemporary pastoral care to doctrinal theology.

THEO 6204 Pastoral Theology (4 Credits)
This seminar explores the development of pastoral theology as an academic discipline in theological education and examines classical texts and contemporary problems. Special attention is given to the relation of pastoral care and counseling, the psychology of religion, and the classical theological disciplines.

THEO 6205 Pastoral Care of Families (4 Credits)
Examination of marriage and family from religious perspectives. Basic methods of marriage and family counseling for the parish minister.

THEO 6207 Feminism, Psychotherapy and Pastoral Theology (4 Credits)
The integration of feminism and psychotherapy into the framework of pastoral theology.
THEO 6208 Theology and Psychodynamics (4 Credits)
Seminar comparing theological and psychological interpretations of dynamics and issues in pastoral counseling and psychotherapy. Readings, case analyses and reaction and seminar papers.

THEO 6209 Theodicy and Tragedy (4 Credits)
Study of tragic and theological literature for pastoral care in tragic circumstances.

THEO 6217 Multi-Cultural Pastoral Care & Counseling (4 Credits)
Examines multicultural issues in pastoral care and counseling and explores the dynamics and complexities of culture, race and other socializing factors in pastoral care conversations.

THEO 6218 Care and Consultation with Congregations (4 Credits)
Assists congregations to become caring corporate communities and to enhance their organizational and institutional vitality.

THEO 6219 Research Religion-Behavioral Science (4 Credits)
A post-modern approach to cross-disciplinary quantitative and qualitative research in religious/theological studies and the social sciences.

THEO 6220 Practicum in Counseling (4 Credits)
Supervised counseling in a church-related context.

THEO 6221 Women and Religious Education (4 Credits)

THEO 6222 Global Experience and Pas (4 Credits)

THEO 6223 Bible Seminar: Methods and Issues (4 Credits)

THEO 6224 Religion and Jungian Psych (4 Credits)

THEO 6225 Imaginal Education (4 Credits)

THEO 6226 Third World Theologies-EATWOT (4 Credits)

THEO 6227 Vocation and Transitions: Work & Life Through Adulthood (4 Credits)
This course explores how people create meaningful lives across the multiple transitions of the adult lifespan. It uses the lens of work and vocation because work is often a significant source of identity, stress, and fragmentation. Theological themes and resources are used to examine vocation and transition, and methods are introduced for understanding and supporting others through life transitions. The course looks at creating and sustaining community and creating institutional contexts that sustain vocational fulfillment. The course is intended to provide pastors, leaders, caregivers, or teachers with resources for reflection on their vocations and for more effective ministry to adults facing vocational decisions.

THEO 6228 Process Theology and Pastoral Care (4 Credits)
This course creates a conversation between process theology and spiritual care. Utilizing an aesthetic approach, we develop a constructive framework of care from themes found in process theology.

THEO 6300 Social Ethical Issues (4 Credits)
Selected problems in social ethics.

THEO 6304 Race, Gender, Class: Historical & Social Analysis of Racism in the Modern World (4 Credits)
An historical survey of the role of racism, sexism and classism in shaping the oppressive institutional structures of the existing world order and of how sociological analysis of these structures can help justice and peace activists direct effective action toward the elimination of race, gender and class oppression.

THEO 6305 Colloquium: Post-Colonial Discourse and Other Myths: A Theological Critique of Dominance (4 Credits)
Selected topics in religion and social change, approached from the disciplines and perspectives of history, ethics, sociology, international studies and social transformation. Offered annually. Also listed as RLGS 5601.

THEO 6306 The Sociology of Contemporary Religious Movements (4 Credits)
Sociological inquiry into the origin, development, structure, and ideology of religious movements. The emergence and life cycle of contemporary groups, sects, and cults are explored in relation to theoretical perspectives on issues such as alienation recruitment, leadership and power, reform and tension with wider society.

THEO 6307 Research Methods in Sociology of Religion (4 Credits)
Critical examination of research classics in the field, with emphasis on particular problems of making religion the object of social scientific concerns. Applications of sociological method to students' research concerns.

THEO 6311 Religion and Movements of Social Change in America: Social Gospel (4 Credits)

THEO 6312 Issues in American Religious History (4 Credits)
A seminar dealing with selected issues such as religious diversity in American religious history, new directions in the study of American religious history, insiders and outsiders in American religious history etc.

THEO 6313 Women in American Religious History (4 Credits)
Exploration of the history of women's experience, changing images and roles, and leadership and participation in North American religious life from the seventeenth for the twentieth centuries.
THEO 6314 Feminist Theology (4 Credits)
Analysis of feminist theology with attention to methodological issues, the relation of contemporary feminist visions to historical material, the ideas of God/Goddess and the question of what it means to be female. Prerequisite: At least one introductory level theology course.

THEO 6315 Theology and Ethics from a Liberation Perspective (4 Credits)
Consideration of contemporary liberation movements with focus on feminist, black and Third World theologies. Special concern is with what the various perspectives of sex, race and class analysis suggest for one another and for theology and social ethics generally.

THEO 6317 Multicultural Issues in Theological Education (4 Credits)
A seminar especially designed for students of color. Particular issues or fields of study is chosen by the participants and are looked at critically within the context of communities of color. May be repeated for credit.

THEO 6318 Native American Religious Traditions (4 Credits)
A survey of the world views of Native American people, as these pertain to both inter-tribal beliefs and Native American ceremonial life, with an attempt to show how Native American practice proceeds from their world view.

THEO 6325 Muslins, Jews, and Christians in Medieval Spain (4 Credits)
This course offers students the opportunity to explore the Golden Age of cross-cultural encounters that occurred in Medieval Spain from the Muslim conquest in 711 to the fall of Granada and the expulsion of the Jews in 1492. By analyzing theological, polemical, and mystical writers of the period the course will provide students with a comprehensive overview of the historical and ecumenical dimensions of Jewish, Christian and Muslim coexistence known as La Convivencia.

THEO 6328 Classic Theorists in the Sociology of Religion (4 Credits)
A treatment of the thought of figures such as Durkheim, Weber, Troeltsch and Marx on the subject of religion and society.

THEO 6330 Muslims, Jews and Christians in Medieval Spain (4 Credits)
An exploration of the "Golden Age" of cross-cultural encounters that occurred in Medieval Spain from the Muslim conquest in 711 to the fall of Granada and the expulsion of Jews in 1492; an overview of the historical and ecumenical dimensions of Jewish, Christian, and Muslim coexistence known as "La Convivencia.

THEO 6332 Historiography (4 Credits)
This course surveys the various theories and methods developed by historians since the emergence of the historical profession from the roots of historicism and philosophy of history in the mid-1800s; and examine the relationship of history to theology, cultural theory and literary studies.

THEO 6333 Violence and Toleration in Medieval Europe (4 Credits)
This course surveys the various theories and methods developed by historians since the emergence of the historical profession from the roots of historicism and philosophy of history in the mid-1800s; and examine the relationship of history to theology, cultural theory and literary studies.

THEO 6334 Doing Christian Ethics (4 Credits)
Many of us have been taught religion through the eyes of white, middle-class males. How then do ethics from the perspective of the disenfranchised.

THEO 6335 Contemporary Sociology of Religion (4 Credits)
Seminar in which the work of such sociologists as Berger, Bellah, Stark, Wuthnow, Warner and others is examined and critiqued. Cross listed with THEO 4335.

THEO 6336 Classic Theorists in the Sociology of Religion (4 Credits)
A treatment of the thought of figures such as Durkheim, Weber, Troeltsch and Marx on the subject of religion and society.

THEO 6337 Liberal & Evangelical Protestantism in the U.S. (4 Credits)
A comparison of the liberal and evangelical Protestant traditions in the United States from 1875 to the present. Students read both scholarly analysis of these traditions and materials produced by leading voices in these traditions. Specific topics include race, gender, politics, science and post liberal/post conservative convergence.

THEO 6339 Indigenous Knowledge Science Religion (4 Credits)

THEO 6343 Implementing Social Ethics from Liberation Perspectives (4 Credits)
The purpose of this course is to explore the roots, development, and history of liberation ethical thought as it first manifested itself within a Latin American context then expanding to other continents and faith traditions.

THEO 6344 Sects, Cults & New Religions (4 Credits)

THEO 6345 Indigenous Knowledge (4 Credits)

THEO 6346 Paradigms for Ethical Action (4 Credits)

THEO 6347 History of Christian Ethics (4 Credits)

THEO 6348 Non-Viol/20th Century (4 Credits)

THEO 6349 Race and Religion in the United States (4 Credits)
An exploration of the different ways in which race is understood religiously in the United States and how race impacts both white and racial minority religious institutions. Specific topics include the black church, the Nation of Islam, Native American theology, the Christian far right, Asian American religions, Latino/a religions, and multiracial congregations.
THEO 6350 Women in Medieval Europe (4 Credits)
This class focuses on the role of medieval women, who struggled to find a voice in the political, religious, social and literary arenas of medieval Europe from about 1100 to 1600. Through primary and secondary source readings we look at everyday women's lives in this period. The class also includes the lives and careers of some of the most famous women writers and leaders of the period, such as Hildesgard of Bingen, Eleanor of Aquitaine, Marie de France, Margery Kempe, Julian of Norwich, Queen Isabel of Castile, Teresa of Ávila, and Queen Elizabeth I of England.

THEO 6351 Social Construction & Selfhood (4 Credits)
This course invites us into a collection of investigations into the intersections of social structures and individual identity or selfhood. While reading in a variety of disciplines and genres, we are drawn together around the questions of how one understands the possibilities for individual or communal agency in light of the formative, systemic power of social structures and institutions. Beyond conceptual understanding of this relationship, we ask questions of how to encourage coherent religious, educational, and other forms of practice in light of the realities of social construction. These reflections are particularly important for persons who are interested in social change and the very real barriers to its generation.

THEO 6352 Interreligious Dialogue: A Critical Analysis (4 Credits)
This course begins with a fundamental question that runs throughout the entire course: Is interreligious dialogue even possible? Can members of different religious groups genuinely meet as equals, or does one group always have the discursive upper hand? Is there a hidden agenda in such dialogue? More particularly, is it possible for Christians to dialogically engage with non-Christians without, either consciously or unconsciously, translating the religious language of the other into the religious language of the self? We will explore these and other questions, with the aim of developing an acceptable methodological and ideological position.

THEO 6353 Formative Figures in Christian Ethics: The 20th Century White Male Canon (4 Credits)
This course on formative white male figures in Christian Ethics examines the ethical canon from a historical perspective. Special attention is given to texts and traditions as living changing heritages.

THEO 6354 Making Peace with Justice: Resolving Indigenous Struggles in Post-Colonial Nations (3 Credits)
My work is involved in the broad realm of indigenous politics but I am not willing any longer to subscribe to the increasingly polemistic grievance politics I see now very unhelpfully dominating our public discourse. Two things arise - firstly, historically established indigenous struggles must be resolved fairly and urgently but they must be resolved in such a way that brings peace with justice to both indigenous peoples and those responsible for the original injustice. This course provides a case studies approach on the Australian example and from my own Maori context.

THEO 6355 Education and Social Change (4 Credits)
This course investigates the role of education in maintaining and transforming social structures, identity, and commitments. We examine how educational practices can contribute towards social change in both religious and public settings.

THEO 6356 Fannon, Foucault and Friends (4 Credits)
This course reads the primary sources of post colonialists (mainly Fanon) and postmodernists (mainly Foucault) to explore creating ethical approaches to globalized manifestations of race, class, and gender oppression. Special attention is given to the use of Christianity as a liberationist response to global structures of oppression in spite of its historic use in causing much of said oppression.

THEO 6357 Post Traumatic Stress Disorder: Pastoral Psychological and Theological Responses (4 Credits)
Students are paired with veterans and provide time-limited supervised spiritual care over the course of 8 weeks. Using a case study format, students review and reflect upon the spiritual care they are providing using theological and psychological perspectives.

THEO 6358 Liberating Sex (4 Credits)
The purpose of the course is to search the Christian Scriptures, in spite of its accusations of being patriarchal, to find biblically-based guidelines for developing an ethical sexual lifestyle that is aware of how racism, classism, and specifically sexism influences the current conversation on sexual ethics. This course focuses on developing healthy models that foster intimacy and vulnerability for a disjointed and at times oppressive community.

THEO 6359 Hispanic Ethics and Theology (4 Credits)
The primary sources of Latino/a theological and ethical thought are read to discover its foundational tenets. The course explores this contextual approach to religion to discover how it could serve to liberate the Latino/a community from prevalent oppressive social structures. Comparisons are made with Eurocentric ethics and theology.

THEO 6360 Religion and Film (4 Credits)
Can film elicit the holy? Does the story of Jacob and Esau look different when told by a north-American filmmaker? How does a Buddhist sensibility shape the form of Japanese films? Can we ask theological questions about secular films? In this course films are the primary texts, supplemented by readings, lecture and discussion. Students develop the film literacy and theological and theoretical acumen to explore these and other interactions between religion and film in cultural context. While there is no explicit prerequisite, background in film or literary criticism and/or theological or religious studies is helpful.

THEO 6361 Ethical Perspectives on War and Peace (4 Credits)
The aim of this course is to explore issues of war and peace-making from religious perspectives, employing a multi-disciplinary approach. To that end, the course is designed to have different Iliff School of Theology faculty approach the issue of war and peace from their specific area of expertise, allowing the student to wrestle with a comprehensive approach to this crucial issue.

THEO 6362 PTSD: Spiritual Care Practicum (4 Credits)
This clinically-oriented course teaches intercultural approaches to spiritual care with trauma survivors, focusing on their coping and meaning-making. We use qualitative interviews with survivors for research and training purposes.
THEO 6363 Jesus, John, and Social Change (2 Credits)
This course examines the presentation and theological message of Jesus in the Gospel of John. The portrayals of Jesus' leadership, inclusivity, and community have profound implications for contemporary contexts, especially as resources for effecting social change.

THEO 6364 English Reformatioins: Bede, Henry VIII, Wesley, Newman, and Postcolonialism (4 Credits)
This course argues that English Christianity has always been in the process of reformation. The Venerable Bede in his Ecclesiastical History of the English People documents this tendency in the early Middle Ages. Henry VIII's reforming turn, the reforms sought by John Wesley and by John Henry Newman continued the process. Current upheavals in the post-colonial era constitute a new chapter in a reformation still underway.

THEO 6365 Religion and Social Change Colloquium: Selected Topics (1-4 Credits)
This is a topics course for the Religion and Social Change concentration colloquia.

THEO 6400 Philosophy of Mysticism (4 Credits)
An overview of several mystical traditions leads to a discussion of key philosophical problems that include the possibility of a typology of mystical experiences, whether or not mystical experience is proof for religious claims, whether or not it is ineffable and whether or not all mystical experience is the same.

THEO 6401 Colloquium Religious Thought (4 Credits)
A seminar on selected topics in the philosophy of religion and theology. May also be listed as RLGS 4984.

THEO 6402 Colloquium in Comparative Study of Religion (4 Credits)
Critical analysis of the literature concerning (a) methods, (b) primary problems and (c) perspectives in the comparative study of religions. Examination of historical, anthropological, psychological and phenomenological approaches to the study of religions.

THEO 6403 Theology Religion and Science (4 Credits)
An examination of the nature of truth and method in religion and science, and an investigation of the impact/challenge presented by science to religion and vice-versa. The course seeks to create a dialogue between relevant topics in the sciences and traditional religious thought.

THEO 6404 Twentieth-Century American Theology (4 Credits)
Consideration of the developments in American theology in the twentieth century.

THEO 6405 Feminist Theology (4 Credits)
Analysis of feminist theology with attention to methodological issues, the relation of contemporary feminist visions to historical material, the ideas of God/ Goddess and the question of what means to be female. Prerequisite: at least one introductory theology course.

THEO 6406 Process Theology (4 Credits)
Introduction to process thought and its influence upon theological reflection. Readings of major process philosophers and theologians.

THEO 6407 Kierkegaard and Existential Theology (4 Credits)
Kierkegaard and the origins of existentialism; twentieth-century forms of existentialism and recent developments; the decline of neo-orthodoxy and resurgence of phenomenology.

THEO 6408 Schleiermacher and Liberal Theology (4 Credits)
Consideration of the theology of Friedrich Schleiermacher. Analysis of the philosophical and theological predecessors of Schleiermacher as well as the tradition of theological liberalism that followed him.

THEO 6410 Theology and Culture (4 Credits)
An examination of the ways in which artistic and aesthetic expressions reflect and initiate religious meanings, with particular attention to American theology, poetry and fiction.

THEO 6411 Religious and Theological Interpretations of America (4 Credits)
A critical examination of religious and implicitly theological interpretations of America from Puritanism to the present. Particular emphasis is contemporary period and to the divergence of interpretations of America.

THEO 6412 Theology and the Challenge of Postmodernism (4 Credits)
An examination of representative postmodern thinkers, how they have changed the context for theology, and how theology has responded to them.

THEO 6413 Historicism American Theology (4 Credits)
Traces the development of the modern historical consciousness as it has impacted the nature and self-understanding of theology, especially in North America.

THEO 6414 African Theology and Post-Colonial Discourse (4 Credits)
This course attempts to examine the relationship between the emergence of African Theology and the historical conditions which characterize Africa's encounter with the European/American will to power. The initial hypothesis to be tested is the claim that the will to power provides the locus classicus for formulating the identity of African theological reflection. This makes the latter a part of a much larger discourse on Africanty. The course takes the student through a close reading of basic texts produced by African theologians themselves. All the major issues characteristic of the discourse of African Theology is dealt with.

THEO 6415 Studies in Early Christianity (4 Credits)
A critical study of themes and selected movements within early Christianity and other religions of the Greco-Roman world. May be repeated for credit.
THEO 6416 Theology of the Ancient Church to 451 C.E. (4 Credits)
Development of early Christian doctrines to and including the fourth Ecumenical Council, major theologians such as Irenaeus, Tertullian, Clement, Origen, Ambrose, Augustine, Athanasius, the Cappadocians and fifth-century thinkers; and the most significant heretical questions of the period.

THEO 6417 Augustine and His Influence: 400 C.E. to 1000 C.E. (4 Credits)
Theological contribution of the great North African Bishop; his major writings, such as Confessions, City of God and The Trinity; and his anti-Pelagian, anti-Donatist, and anti-Manichaean writings.

THEO 6419 Studies in Popular Culture (2-4 Credits)
This course examines the cultural function of mass-market storytelling in television, film and print; looks at religious critiques and interpretations of the media and at religious broadcasting. The primary objective is to prepare the church for ministry in a modern mass-mediated culture in which popular culture serves a mythic-religious purpose.

THEO 6420 Narrative Approaches to the Religious Life (4 Credits)
An exploration of the role of narratives in the religious imagination of individuals and communities. Narrative approaches to scripture and theology are introduced and brought into dialogue with contemporary novels and films. The course focuses on a theme or culture each time it is offered. Narrative texts reflective of the theme is paired with and discussed in relation to critical/theoretical texts.

THEO 6421 16th-Century Spanish Mystics & Reformers (4 Credits)
Early modern Spain witnessed the emergence of Catholic and Protestant individuals whose timeless works and popular appeal in subsequent centuries rested largely upon the practice of contemplation in action. This course examines the works of such mystics and reformers as Teresa of Avila, John of the Cross, Ignatius of Loyola, Juan de Valdes, Constantino Ponce de la Fuente and others. It also explores the influence of Islam and Judaism on these sixteenth century religious movements, as well as modern Spain's subsequent rejection of this pluralistic legacy as it sought to define its new national identity.

THEO 6422 Buddhist Philosophy (4 Credits)

THEO 6423 Early Modern Theologies (4 Credits)
An examination of the emergence of the theological, philosophical, literary and scientific trends often designated as Early Modern (1400-1700), formative trends, which have become a neglected source of the modern consciousness typified by the European Enlightenment.

THEO 6425 16th-Century Spanish Mystics & Reformers (4 Credits)
Early modern Spain witnessed the emergence of Catholic and Protestant individuals whose timeless works and popular appeal in subsequent centuries rested largely upon the practice of contemplation in action. It also explores the influence of Islam and Judaism on sixteenth century religious movements as well as modern Spain's subsequent rejection of this pluralistic legacy as it sought to define its new national identity.

THEO 6426 Philosophy & Cultural Conflict (4 Credits)
Analysis of various contemporary and competing social philosophies in terms of their assumptions, values, operational procedures and ideological structures.

THEO 6427 Seminar Classical Philosophy (4 Credits)
One of the following topics: Platonism, Aristotelianism, Stoicism, or Neo-Platonism examining the basic philosophy and its development and influence on Western religious thought.

THEO 6428 Ritual Studies (4 Credits)
By reading some of the most important "classic" and recent theorists of ritual, and by learning to observe and understand ritual behavior, this class will examine the important role of ritual in defining religious groups, creating religious identity, forming religious beliefs, and structuring how we view the world. Prerequisite: Masters students need permission of instructor.

THEO 6429 Recent Trends in Religious Studies (4 Credits)
Recent Trends in Religious Studies is an advanced Ph.D. in Theory and method. The object is to understand and analyze the most recent works of importance that are rooted in theoretical traditions of religious studies and which are on the cutting edge of advancing the discipline. Prerequisite: Ph.D. seminar THEO 6001.

THEO 6430 Religion in the Public Squares (4 Credits)
What is the proper role of religion in the public debates necessary to healthy democracy? Some argue that religion in the public square threatens the fundamental democratic right the freedom of conscience; others that only religion can insulate the communal values that make democracy possible. This course examines the best and most prominent arguments in this contemporary debate.

THEO 6432 Buddhist Philosophy (4 Credits)
An introduction to the Buddhist philosophical tradition that covers both the different philosophical movements within Buddhism as schools of thoughts and major philosophical issues.

THEO 6433 Twentieth Century American Theology (4 Credits)
Consideration of the developments in American theology in the twentieth century.

THEO 6434 Feminist Theology (4 Credits)
Analysis of feminist theology with attention to methodological issues, the relation of contemporary feminist visions to historical material, the ideas of God/ Goddess and the question of what it means to be female.
Liberationist thought has been utilized to inform social movements. Liberationist thought as it first manifested itself within a Latin American context then expanding to other continents and faith traditions, and how that of liberation theology, dismissing its significance as a passing fad. The purpose of this course is to explore the roots, development, and history of to bring about social and political change since the mid-twentieth century. But with the state of the new millennium, many have proclaimed the death of liberationist thought has greatly impacted how social movements, and the theological and ethical perspective which inform them, has been implemented to the work of Christ, faith, eschatology ecclesiology, and sacraments. Either quarter may be taken independently.

THEO 6438 Systematic Theology II (4 Credits)
Systematics focuses on the importance of system in Christian theology, and on the development of students’ own systematic theology, through a reading of three prominent systematists, classical, modern, and contemporary. Quarter 1 - method, doctrine of God, sin, and Christology. Quarter 2 - the work of Christ, faith, eschatology ecclesiology, and sacraments. Either quarter may be taken independently.

THEO 6439 Studies in Popular Culture: Myth, Religion and Story (4 Credits)
This course examines the cultural function of mass-market storytelling in television, film and print and looks at religious critiques and interpretations of the media and at religious broadcasting.

THEO 6441 Contemporary Issues in United Methodism (2 Credits)
A seminar exploring contemporary issues facing the United Methodist Church.

THEO 6442 Process Philosophy (4 Credits)
Consideration of the basic ideas in the philosophy of Alfred North Whitehead and their significance for theology.

THEO 6444 Introduction to Coptic I (2 Credits)
The course is dedicated to introducing students to Coptic, the last phase of the Ancient Egyptian language and the only one to be recorded in an alphabetic script showing vowels. This portion of the process is designed to introduce the most frequent vocabulary as well as the acquisition of key skills for the understanding of the Coptic language and for the interpretation and understanding of Coptic texts.

THEO 6445 Introduction to Coptic II (2 Credits)
The course is dedicated to introducing students to Coptic, the last phase of the Ancient Egyptian language and the only one to be recorded in an alphabetic script showing vowels. This part of the module is designed to promote the acquisition of key skills for the understanding of the Coptic language and for the interpretation and understanding of Coptic texts. The last half of the class requires the student to demonstrate proficiency at reading Coptic.

THEO 6446 Coptic Readings (2 Credits)
Selected readings from Coptic texts drawn from ancient canonical and noncanonical sources, including discoveries at Nag Hammadi. It includes advanced vocabulary building and advanced grammatical and syntactical constructions. May be repeated for credit.

THEO 6447 Pilgrimage in Comparative Perspective (4 Credits)
A comparative course that examines the dynamics of pilgrimage from a number of different angles (theoretical, doctrinal, ritual, social) and which utilizes a variety of sources including classical, ethnographic studies of actual pilgrimages, and focused studies of particular pilgrimage places.

THEO 6448 Science & the Christian Right (4 Credits)
An examination of the American Christian Right's challenges to mainstream scientific theories and practices. Specific topics include Intelligent Design movement, reparative therapy of homosexuality, denial of human-driven climate change, and opposition to stem cell research.

THEO 6449 Being Human (1 Credit)
This course looks at the basic question: what does it mean to be human? Specifically, it is a conversation on theological anthropology. We approach the topic by examining contemporary views and also learn from positions from the Third World. If theology is concerned deeply with the incarnation of the Spirit, then that Spirit reveals itself in human culture, which is made up of collective and individual persons, who, in the U.S.A. context, are over-determined by race.

THEO 6450 Islam, Gender, and Sexuality (4 Credits)
This course examines issues surrounding gender and sexuality in Islam. Through a close reading of religious texts, critiques of patriarchy, and historical studies, students are challenged to think critically about the construction of gender roles and the regulation of sexual practices in Islam. By the conclusion of the class, students gain insight and understanding regarding the ways modernity has radically altered norms surrounding gender and sexual preference in Muslim-majority societies.

THEO 6451 Disability and Difference, Theological and Ethical Perspectives (2 Credits)
An examination of disability theology, its relationship to other liberation theologies, and the complex theological and philosophical issues raised by the vantage point of disability. This course introduces students to the discourse of disability studies and examines and evaluates a variety of theological and ethical structures based on this lens. The course also provides students with the tools to reflect theologically and ethically on the diversity of human embodiment (including, but not limited to, experiences of disability), which helps prepare them to thoughtfully live out these understandings in ministry or other leadership settings.

THEO 6452 Social Movements from Liberationist Perspectives (4 Credits)
Liberationist thought has greatly impacted how social movements, and the theological and ethical perspective which inform them, has been implemented to bring about social and political change since the mid-twentieth century. But with the state of the new millennium, many have proclaimed the death of liberation theology, dismissing its significance as a passing fad. The purpose of this course is to explore the roots, development, and history of liberationist thought as it first manifested itself within a Latin American context then expanding to other continents and faith traditions, and how that thought has been utilized to inform social movements.
THEO 6453 Social Change and Critical Security (4 Credits)
As an emerging field of international relations, critical security studies challenges conventional foreign relations doctrines and policies to envision a global community that moves beyond the orthodoxies of nation-state politics and embodies ideals of justice, peace, and human flourishing. This course examines current threats to global security and the ways in which a critical approach to security analysis can provide new insights and tools for social movements, religious communities, and other civil society actors to achieve a more just and fair global commons.

THEO 6454 Social Justice in Global Contexts (2 Credits)
This course is a 15 day immersion trip to Zimbabwe and South Africa. The course is designed to provide participants with first-hand exposure to social justice issues in the context of Southern Africa and undertake site visits to areas of concentrated poverty, selected development projects, HIV/AIDS clinics, orphanages and youth and women's self-help projects.

THEO 6455 Abrahamic Traditions: Issues in Social Justice (4 Credits)
Abrahamic traditions have yielded complex religious responses to oppression and social injustice. This course examines some of those responses in relationship to governance, economics, war, health, and sexuality through the lenses of Judaism, Christianity, and Islam.

THEO 6456 History of Heresy (4 Credits)
While the term heresy has a particular Christian connotation, the history of the term tells a far more complex story. This course investigates the development of the Christian discourse or language of heresy in the ancient world. With particular attention to its Jewish and Greek antecedents, students discover just how Christians transformed a neutral, descriptive term, which mean “choice,” into a pejorative, proscribed title of error and falsity. Students come to see the Christian authors consciously and carefully gendered, Judaized, Hellenized, and radicalized heresy and the heretics. Students read a range of primary and secondary sources, which reveal this process of creating a Christian taxonomy of heresy.

THEO 6457 Ethics of Neoliberalism and Globalization (4 Credits)
People of faith have responded to the triumph of the free market economy around the world in a variety of ways. To some, “neoliberalism” seems to hold the key to sustained economic growth worldwide and, eventually, to nothing less than the eradication of poverty itself. To others, it represents the unleashing of corporate greed on a scale previously unknown, with momentous and often disastrous consequences for the working poor, the economically marginalized, and the environment. Does the new global economy signify the lifting of all boats or the race to the bottom? Does it further Christian ethical values, or subvert them?

THEO 6458 Theories in Religion and Media (4 Credits)
Theories of Religion and Media: Intended for doctoral or MA students, and for other Masters students with some background in media and/or interest in the critical theory that underlies the emerging conversation about media, religion and culture, this course explores the mediation of religion both in contemporary digital culture and as an inherent fact in the history of religion. Students will be introduced to the discourses at the interface of communications, cultural and religious studies and carry out independent research.

THEO 6459 The Pursuit of Happiness: A Hitstory (4 Credits)
This course provides a historical examination of key concepts, major questions, and practices about humanity's search for happiness from the Hellenistic-Roman period of Antiquity through the Early Christian and Medieval periods. The content centers on the role of Classical moral philosophy and Christian theology in the formulation of eudemonic theories about the problem of happiness in relation to metaphysical and religious influences as well as to socio-cultural, political, and institutional norms and practices that shaped Christian notions of human purpose and potential. The legacies of these ancient ideas on the development of modern assumptions about happiness and human flourishing are also discussed towards the end of the course.

THEO 6460 Being Human in the Modern World (4 Credits)
What does it mean to be human? After a brief survey of traditional Christian answers to this question, we focus on the theological anthropology that has become the de facto theory of human nature since the emergence of the modern western world in the early 19th century. Theological anthropology can be the driver of other doctrines in a systematic theology; it also underpins work not necessarily seen as theological, such as ethics, development, and human rights. A rich understanding of this anthropology is necessary for theological reflection in our current context.

THEO 6701 Topics in Theological and Religious Studies (0-4 Credits)
THEO 6702 Topics in Theological and Religious Studies (0-4 Credits)
THEO 6703 Topics in Theological and Religious Studies (0-4 Credits)
THEO 6704 Topics in Theological and Religious Studies (0-4 Credits)
THEO 6705 Topics in Theological and Religious Studies (0-4 Credits)

Josef Korbel School of International Studies

The Josef Korbel School of International Studies is one of the world's leading schools for the study of international relations. Our interdisciplinary programs prepare tomorrow’s global leaders for careers in commerce, government, diplomacy, military affairs, economic development, global health and humanitarian relief. Coming together from over 20 different countries, our students provide diverse perspectives that supplement the experience and research of our renowned faculty.

Conflict Resolution

Master of Arts in Conflict Resolution

Conflict Resolution is an interdisciplinary program which capitalizes on the talent of 19 faculty members drawn from nine academic units on campus including: Conflict Resolution, International Studies (http://www.du.edu/korbel), Communications (http://www.du.edu/ahss/schools/comn), Social Work (http://www.du.edu/socialwork), Law (http://www.law.du.edu), Business (http://daniels.du.edu), Professional Psychology (http://www.du.edu/gspp), Theology (http://www.iliff.edu), and Applied Communication (http://universitycollege.du.edu/comm/degree/masters/organizational-communication-online/degreeid/450) in University College.

International Studies focuses on aspects of ethnicity and cultural differences, globally organized efforts in cooperation, and justice, human rights, and diplomacy. The Department of Communications and the Graduate School of Social Work explore group dynamics. The College of Law and University College have developed training programs in mediation. The College of Business offers a management specialty. More than 20 different classes in the Conflict Resolution curriculum are offered on campus at least once each year. Courses emphasize theories of conflict resolution, mastery of techniques for alternative dispute resolution, and courses on organizational and management issues.

Master of Arts in Conflict Resolution

- Complete Application: Online application (http://www.du.edu/apply/graduates/applicationrequirements.html)
- Application Fee: a $65 application fee is required, payable online or via check
- One Official Transcript from each undergraduate institution: Send Transcripts in an official envelope bearing an official stamp from the Registrar’s Office across the envelope’s seal.
- Exam Scores: Official Graduate Record Examination (GRE) scores which have been taken within the last five years.
- Two Letters of Recommendation: two letters of recommendation submitted via our online system (Preferred) or in sealed envelopes with the recommender’s signature across the seal. We encourage you to contact your recommenders prior to sending this invitation.
- Statement of Purpose: In 500-700 words, answer all of the following questions:
  - What is your career goal upon completing your graduate degree and what are your longer-term career goals?
  - Explain why you have chosen to pursue a graduate degree and how the degree program you have chosen will prepare you to reach your specific career goals.
- Resume/Curriculum Vitae (CV): submit through online application
- Proof of Permanent Residence (U.S. Green Card holders only)

Priority Deadline: January 15—Fall Quarter

**Emphasis (skills/methodology) requirement**

CRES 4111 Reflective Practice and Evaluation 5

**Elective requirements**

All remaining courses to total minimum of 62 credits

**Non-coursework Requirements**

Practical Techniques Workshop (required) 4

COMM 4701 Topics in Applied Comm (through University College)

**Professional Development Requirement**

CRES 4961 Professional Development 0

Internship (required) 0-5

CRES 4981 Internship (variable credits)

Practicum (required) 3

CRES 4971 Practicum

Thesis (optional) (up to 5 credits) 5

CRES 4991 Independent Study

& CRES 4995 and Thesis Research

**Total Credits** 62

**Minimum number of credits required for degree:** 62

* COMM classes are offered on-line through the Organizational and Professional Communication program at University College. These courses are offered for 4 credits.

**Courses**

CRES 3401 Caribbean Conflict Resolution (3 Credits)

A travel course offering students an opportunity to view a broad spectrum of conflict—from interpersonal to community to intercultural—in Caribbean countries. Local conflicts and conflict resolution processes are examined, along with visits to governmental and non-governmental organizations and cultural sites to develop an understanding of how particular methods and approaches for solving disputes are applied within this political and cultural setting.

CRES 4111 Reflective Practice and Evaluation (5 Credits)

Course is designed for practitioners who would like to become more reflective and theory oriented in their practice, and for researchers who wish to work with actual data and questions from practice. The goals are to learn techniques for making theories of practice explicit, to examine ways practice and research may modify theory, and to explore how to introduce and expand reflective practice into conflict resolution.

CRES 4221 Negotiation Theory and Practice (3.5 Credits)

An overview of negotiation theories, strategy and tactics to understand the role of power perceptions, communications, and ethics affect bargaining processes and outcomes.

CRES 4222 Mediation Theory and Issues (5 Credits)

An analysis and critique of the nature and role of third parties in conflict intervention including conciliator, arbitrator, facilitator, monitor, trainer. Theoretical perspectives and case studies are used to understand the situations in which third parties operate, what values and resources they bring to their roles, and how power issues affect mediator functioning. Ethical guidelines are also considered.
CRES 4225 Conciliation and Reconciliation (5 Credits)
Societies are often divided along ethnic, racial, or religious lines. Without work at the grassroots level, international peace agreements regularly fail within five years of ratification. How do we create sustainable post-conflict relationships? How does justice factor into peace, or into the sustainability of peace agreements? This course explores these questions by building on concepts and themes introduced in Mediation Theory (CRES 4222), and analyzing topics such as multilevel interventions and their challenges, second track diplomacy, and citizen dialogue. Reconciliation is a key factor in peace building -- Voice, Acknowledgement, and Repair are specifically considered within this realm. Focus is also on the challenges presented by deep-rooted, protracted conflicts, allowing for more complete understanding of the situations in which third parties must operate.

CRES 4333 Resolving Contentious Public Issues (5 Credits)
The course covers collaborative governance work, including identity politics of contentious public issues. Natural resources disputes and the range of processes used to address these conflicts, including theories and concepts useful for understanding environmental and policy disputes, case studies, and world views that premise these disputes, provide insight into constructing interventions best suited to the characteristics and context of each contentious issue.

CRES 4400 Restorative Justice (3 Credits)
This course explores four leading Restorative Justice practices - Victim-Offender Mediation, Conferencing, Talking Circles, and Truth Commissions - to understand how needs of victims are addressed, and embracing notions of forgiveness, reconciliation and social healing within a set of principles based on social justice.

CRES 4410 Intractable Conflict (3 Credits)
This course is focused on factors that lead to intractability, along with strategies for violence prevention and conflict transformation. Conflict mapping and analysis, sources of intractability, and social, psychological, economic and political dimensions of intractable conflicts are examined.

CRES 4420 Negotiating Difficult Situations (3 Credits)
What should a negotiator do when the win-win approach fails and important interests are at stake? This course addresses a variety of tactics and ploys of unethical behavior and dirty tricks used in persuasion and bargaining. Students learn how to recognize and counter such techniques and practice in simulated and real world settings. Prerequisite: CRES 4221.

CRES 4810 Conflict Resolution Topics (3,5 Credits)
Fields of interest to Conflict Resolution Students such as negotiation, international conflict resolution case studies, restorative justice, conflict transformation, methods for conflict resolution research.

CRES 4820 Topics in Conflict Resolution (1-5 Credits)
Fields of interest to Conflict Resolution Students such as negotiation, international conflict resolution case studies, restorative justice, conflict transformation, methods for conflict resolution research.

CRES 4830 Topics in Conflict Resolution (3-5 Credits)
Fields of interest to Conflict Resolution Students such as negotiation, international conflict resolution case studies, restorative justice, conflict transformation, methods for conflict resolution research.

CRES 4840 Managing Organizational Conflict in the Workplace (3,5 Credits)
A broad study of conflict in organizations that may involve gender, race, age, disability and other issues, using lecture, case studies, group dialogue, and team projects to develop systems of management and evaluation.

CRES 4850 Creating Agreement (3 Credits)
Multilateral agreements are as complex as they are difficult to create. What are the key elements in this process? The history of such negotiations is one of both successes and failures. This course examines the development of criteria necessary for creating satisfactory and acceptable agreements involving multiple parties through a series of case studies that link negotiation theory and praxis.

CRES 4860 Public Forum Facilitation (3 Credits)
Diverse democracies require high quality communication and coordination to function well. In the current era, however, polarization, cynicism and apathy have become the norm, they obstructing possibilities for collaborative problem-solving. What are the best processes for making public decisions in a democracy? This course examines the tools of advocacy, debate, dialogue and deliberation through the lens of facilitation in public forums.

CRES 4870 Conflict Vulnerability Assessment (3 Credits)
This course guides students seeking to specialize in early warning and conflict prevention approaches at the community, societal, or country level through the contemporary scholarly literature, policy-related instruments and models that seek to define and measure "conflict vulnerability."

CRES 4880 Grant Writing: The Research Proposal and Conflict Analysis (3,5 Credits)
This course is designed to cover key elements of social research methods that are important principles of evidence-based policy, known for its rigor and precision in careful data collection - including quantitative and qualitative methodology analysis and expert opinion to build facts and findings from context-free, context rich and colloquial environments into a coherent whole - to support informed decision-making capability.

CRES 4961 Professional Development (0 Credits)
To develop the specialized knowledge, skills, attitudes, values, norms, and interest needed to perform professional roles in the Conflict Resolution practitioner community. It involves informal socialization including lessons learned incidentally through association with mentors, networking with practitioners, and observations of conflict resolution processes in all areas of life. Students gain an awareness of how self-image and activities play an active part in professional socialization.
CRES 4971 Practicum (3-5 Credits)
Students design, execute, and evaluate conflict resolution interventions. Student involvement in planning, implementation, reflection, and evaluation may look different in different contexts, but all elements are present in some form. Students are supervised by faculty with relevant theoretical expertise and practice experience.

CRES 4981 Internship (1-5 Credits)
CRES 4985 Internship (4-8 Credits)
CRES 4991 Independent Study (1-5 Credits)
CRES 4995 Thesis Research (1-5 Credits)

International Studies

Certificate in Homeland Security
This certificate program is offered to currently enrolled Josef Korbel School of International Studies’ master’s or PhD students.

Certificate in International Studies with a Concentration in Global Health Affairs
The Certificate in Global Health Affairs (CGHA) is the first global health program to be based in a school of International Studies. Unlike certificates offered by schools of medicine or public health, which emphasize biomedical approaches to health, CGHA places social and political solutions at the forefront of global health action. Combined with a degree, the seven-course CGHA sequence prepares students for systematic, evidence-based approaches to a broad range of global health problems relating to development, diplomacy, security, trade, and human rights.

CGHA’s core emphasis lies in building sound decision-making skills in an arena often suffused with inefficiency and blindness to political, social, and cultural context. Substantive courses address the widest conception of the causes and consequences of individual and population health, emphasizing short- and long-term effects, the increasing globalization and personalization of health; and interactions between health and other key areas of human endeavor such as politics, development, trade, and conflict. Practical courses combine basic analytic, management, and epidemiologic skills with innovative new technologies such as social marketing, Geographic Information Systems, and mobile telephony.

Students who graduate with the certificate in global health affairs distinguish themselves as leaders and innovators through the pursuit of the “science of service” on and off campus. While most GHA students take advantage of traditional internship opportunities at leading international health organizations, many also pursue action-oriented research and leadership projects through a network of partner agencies and through our own student-led community-based research projects in Nairobi, Delhi, and Jerusalem. Students are encouraged, but not required, to undertake action-oriented research projects including a thesis or Significant Research Paper, which may be completed for course credit. Throughout the GHA program, students build an evidence-based framework for evaluating project impacts on served communities, service agencies, their own career paths, and their community at DU.

Certificate in International Studies with a concentration in Humanitarian Assistance
The mission of the Humanitarian Assistance Program is to prepare students to work in the humanitarian field. The program provides students with the theoretical and practical underpinnings for humanitarian work which is technically sound, engages with affected communities, responds to the diverse needs of affected populations and sets the stage for sustainable and inclusive recovery and development.

A limited number of students pursuing a master’s degree at Korbel are admitted to the Humanitarian Assistance Certificate Program each year. Admission is extremely competitive on the basis of experience, focus and motivation.

Applications will be accepted from Korbel students at the beginning of each academic year (due late September). Students will be informed about whether they have been accepted by mid-November.

All certificate students are required to

1. Complete core humanitarian coursework comprised of two courses which aim to introduce students to key aspects of humanitarian assistance (one focused on policy and the other on field operations) and two additional courses directly related to humanitarian assistance.

2. Take three elective courses in one of three tracks: (personalized tracks are also possible)
   a. Monitoring, Evaluation and Analysis
   b. Management/Operations
   c. Policy/Advocacy
3. Complete an internship (150 hours) with an organization whose core work includes international humanitarian assistance or humanitarian policy/advocacy. This is a critical component of the Certificate. It is unlikely that students in the Certificate Program will find appropriate internships in Denver. Certificate candidates should plan to spend some significant time interning at an appropriate location (either in the US or abroad) in order to fulfill this requirement.

**Master of Arts in Global Finance, Trade and Economic Integration**

The Global Finance, Trade, and Economic Integration (GFTEI) program provides students with a multi-disciplinary, policy-focused examination of the global economy. Courses within this degree focus on the complex changes underway in the global economy, including the emerging patterns of financial, trade, and human capital flows and their effect on national economies; the effect of globalization on state capacity, policy autonomy, and national economic conditions; the relationship between economic, political, and social outcomes; corporate governance and competition; and the interaction of interest groups, states, and multilateral agreement and organizations. All students within this degree receive training in advanced statistical methods. Students also select from a diverse collection of “hard” and “soft” skills courses (e.g. Art of Forecasting, Political Risk Analysis, Professional Communications, Project Management.)

Students pursuing the GFTEI degree are required to select one concentration that is tied to their intellectual and career aspirations. Some students have chosen to pursue two concentrations. Examples of concentrations that students have pursued recently include international political economy, international business, development economics and policy, environmental studies, the political economy of China or the European Union, risk and forecasting techniques, and security and international economic analysis.

This degree is intended for students who intend to pursue careers in four domains:

1. International economic policy analysis for public sector agencies, such as the Department of Commerce and the International Trade Administration
2. Analyst positions in multilateral institutions and organizations, such as the World Bank, the United Nations and the Organization for Economic Cooperation and Development;
3. Research and analyst positions within non-governmental organizations, such as Oxfam and Action Aid; and
4. Private sector careers as economic policy consultants, country risk or international project analysts, or international project managers.

Students who wish to pursue careers in corporate or investment management, accounting or marketing might consider the dual degree that we offer with Daniels College of Business (DCB). The dual degree allows students to earn a GFTEI degree from Josef Korbel School of International Studies and an International MBA from DCB (see the dual GFTEI-IMBA degree section of this handbook). Students who seek a more specialized and technical training in portfolio allocation might consider creating their own “customized, flexible dual degree” with DCB that allows them to earn an MS in Finance along with the GFTEI degree (for more information, see the Flexible Dual Degree section of this handbook).

Students may be interested to know that the course, “Economics: Fundamental Knowledge, Global Applications” (INTS 4536) with Professor Mark Evers (to be taught in the fall quarter only), is designed for students who have never successfully completed an undergraduate course in Introductory Macroeconomics & Microeconomics (or undergraduate Principles of Economics or undergraduate International Economics). INTS 4536 will prepare students who do not possess this basic economics background to enroll in INTS 4310 (Int'l Trade) and INTS 4320 (International Monetary Relations).

**Master of Arts in International Administration**

The goals of the International Administration Degree Program are first to establish a foundation of management skills (people, programs or policies) required to become a leader in a non-profit or public sector organization in an international context and second to provide students the opportunity to gain expertise in a specific policy area of the students’ choice such as human rights, development, security, or health affairs.

**Master of Arts in International Development**

The MA in International Development focuses on development theory, policy-making and analysis, politics of institutions, and in-demand practical skills. The program prepares students for careers in government, multilateral and bilateral development agencies, non-governmental organizations, and the private sector. Development graduates also enter relevant doctoral programs.

The program reflects an approach to development that emphasizes not only economic issues but also the importance and interrelatedness of sustainable economic and human development, human rights, and environmental sustainability. We emphasize the diversity of needs, desires, opportunities, and constraints that are experienced by individuals of differing socioeconomic classes, ethnicities, and genders, as well as differences among nations and regions.

Students gain analytical skills that address not only policy issues, but also the logics and workings of diverse institutions that create, negotiate, and implement development policy. Students also engage the many power differentials that profoundly influence processes central to sustainable development. These power differentials exist not only among nations, but also among public- and private-sector partners within development programs; between development practitioners and their intended beneficiaries; and among those intended beneficiaries. Thus we also engage with actors and processes across scalar levels from the most macro-level international institutions and initiatives to the most micro-level agendas and actions taken by communities, firms, families and individuals.
The program provides training in practical skills that have been identified as key by development employers, including communications, quantitative analysis, and administration. Through internships, students gain experience in meeting the challenges of development practice while applying these skills and their knowledge of ideas, institutions, and processes that have influenced the course of international development.

**Master of Arts in International Human Rights**

This degree is for students with academic or career interests in human rights and humanitarianism. Graduates typically seek and obtain positions in international non-profits; international rights advocacy organizations, international aid agencies, governmental and intergovernmental organizations, the human rights legal profession and academia.

Because of its integrative and interdisciplinary nature, the human rights curriculum leads to flexible career options which link human rights to development, health, security, humanitarian assistance, etc., and provides fascinating research possibilities beyond the MA degree. The program combines intellectual breadth and multidisciplinary grounding, specialized themes, and practical experience. For breadth, the core offers courses in human rights theory, history, law, foreign policy, and economic development. Our specialized themes include courses linking human rights to security, economic development, health, humanitarian assistance, administration, etc. For practical experience, students are offered skills courses, internships and opportunities for fieldwork crafted to enhance professional qualifications.

Combined with an exceptional group of distinguished alumni and current students, the remarkable scholarly and practical credentials of the faculty associated with this program speak volumes. The Korbel School has the leading interdisciplinary human rights program in the United States.

Ninety credit hours are required to complete the degree, which typically requires two years of full-time study. The degree can also be completed on a part-time basis.

**Master of Arts in International Security**

The International Security program provides education and training from a multi-disciplinary perspective on issues dealing with political, historical, social, and economic causes and consequences of the threat or use of military force and other forms of violence.

Our pedagogical aim is to debate issues and test theories of international security in an effort to understand the foundation of national strategies, sources of conflict and war, and a myriad of influence tools—intelligence, communication, diplomacy, terrorism—used by state and non-state actors in order to prepare students for responsible positions as leaders and analysts in the security field within the United States and abroad, and in international organizations.

The curriculum provides a fundamental background of international politics theories and major issues of International Security; exposure to classical readings and contemporary arguments in Security and Strategy; basic knowledge of important factors and processes explaining U.S. foreign and defense policies; training in research methodology for security, defense, and policy analysis; training in preparing and writing policy memos; experience in policy-making through simulation and table-top exercises; opportunities for concentrated study in selected security subfields such as: Intelligence, Homeland Security, or Geographic Areas, and interdisciplinary study of security in conjunction with cognate International Studies specialties: conflict resolution, development, economics, human rights, global health, and humanitarian assistance.

**Master of Arts in International Studies**

The Master of Arts in International Studies combines an in-depth study of one of the principle fields of international studies with an issue-oriented concentration, skills courses, and the opportunities for internships or advanced research. It is the "traditional" professional international studies curriculum long favored by students pursuing career options in the government, private, and non-profit sectors, as well as those considering a PhD. It is also our most flexible degree, with great opportunities to tailor a program to fit your own special needs and interests. Ninety credit hours are required to complete the degree, which typically requires two years of full-time study.

**Master of Arts in International Studies with A concentration in Comparative Politics**

The Master of Arts in International Studies combines an in-depth study of one of the principle fields of international studies with an issue-oriented concentration, skills courses, and the opportunities for internships or advanced research. It is the "traditional" professional international studies curriculum long favored by students pursuing career options in the government, private, and non-profit sectors, as well as those considering a PhD. It is also our most flexible degree, with great opportunities to tailor a program to fit your own special needs and interests. Ninety credit hours are required to complete the degree, which typically requires two years of full-time study.

For questions about this degree, see the degree director or the Director of Student Affairs.

Doctor Of Philosophy in International Studies with a Concentration in Comparative Politics

The Ph.D. degree is designed as a 5-7 year program provided the student a) enters with a closely related Master's degree and b) is able to devote full-time study during the entire period. The student working toward this degree must earn a grade average above 3.5 for a minimum of 135 hours of graduate credit, of which 90 hours must be earned at the University of Denver. In addition, each student must meet the core curriculum and fields training, methodology and foreign language requirements and pass written and oral comprehensive exams, file an approved prospectus, and successfully write and defend a dissertation.

</tr>
<tr>
<td>INTS 4056</td>
<td>Information Management in Human Crises</td>
</tr>
<tr>
<td>INTS 4342</td>
<td>Project Management</td>
</tr>
</tbody>
</table>

Total Credits

Minimum number of credits required for certificate: 30

Non-coursework Requirements

• All GHA candidates must conduct a single, 150-hour health-related practical experience or a suitable alternative (see below). This experience must take place during the student’s course of study and the work must be carried out off campus. As an alternative to a traditional internship, this requirement could be fulfilled through current employment, an RPCV local internship, independent research (as long as it has an off-campus field component), or work on a GHA service-based research project. To qualify as health-related, a substantive component of the internship/practicum should focus on health issues. If this condition is not met within the context of the internship/practicum, the student may instead submit an additional, separate report on the health implications of their internship/practicum to the certificate director in order to fulfill the requirement. See the GHA Director for guidelines. It is possible for students to fulfill both a degree and certificate requirement with one internship/practicum.

Students are encouraged but not required to base their internship on their required proposal for INTS 4367, and to prepare a thesis, significant research paper, or independent study based on one of their internships or other self-driven or faculty-driven research.

Certificate in International Studies with a Concentration in Humanitarian Assistance

Certificate Requirements

Coursework Requirements

Core Coursework Requirements

Two required courses (to be taken in the winter quarter after acceptance)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4496</td>
<td>Field Operations for Humanitarian Assistance</td>
</tr>
<tr>
<td>INTS 4581</td>
<td>Introduction to Humanitarian Systems</td>
</tr>
</tbody>
</table>

And two of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4056</td>
<td>Information Management in Human Crises</td>
</tr>
<tr>
<td>INTS 4492</td>
<td>Health and Humanitarian Aid</td>
</tr>
</tbody>
</table>
INTS 4583  International Protection in the Humanitarian Context
INTS 4935  Humanitarian Law of Armed Conflict

**Elective Requirements**  
15

At least three courses in one of the following tracks:

**Management/Operations**
- INTS 4342  Project Management
- INTS 4391  Financial Management and Fundraising of Non-Profits
- INTS 4394  Non-Profit Issues & Techniques
- INTS 4497  International Campaign Management
- INTS 4555  Professional Communications
- INTS 4557  Cross-Cultural Communications
- INTS 4920  Conflict Resolution

**Monitoring, Evaluation and Analysis**
- INTS 4057  Statistics for International Affairs
- INTS 4332  Data Analysis and Development
- INTS 4333  International Project Analysis
- INTS 4423  Introduction to Epidemiology
- GEOG 3130  Advanced Geographic Information Systems
- GEOG 3130  Advanced Geographic Information Systems
- PPOL 4400  Analytical & Critical Skills

**Policy/Advocacy**
- INTS 4497  International Campaign Management
- INTS 4931  International Organizations
- INTS 4934  Intervention: Policies & Pract
- INTS 4936  International Law and Human Rights
- INTS 4937  Human Rights and Refugee Systems
- INTS 4941  Human Rights and International Organizations
- INTS 4987  Forced Labor and Human Trafficking
- INTS 4495  Civil Wars and International Responses I: Causes and Consequences: Prevention and Peacemaking
- INTS 4595  Civil Wars and International Responses II: Post-War Peacebuilding
- CPSY 4500  International Disaster Psychology: Foundations
- CPSY 4606  Gender-based Violence

**Total Credits**  
35

1  Only 1 non-INTS course may be counted towards the Certificate. Only 1 elective may be double-counted towards a degree.

**Minimum number of credits required for certificate: 35**

**Non-coursework Requirements**
- An internship (150 hours) with an organization, whose core work includes international humanitarian assistance or humanitarian policy/advocacy, is required for the Humanitarian Assistance Certificate. These are usually completed by students in the summer between the first and second years of the MA program. Students arrange their own internship placements but should consult with the HA program director for ideas and approval. Internships must also be approved by the JKSIS Office of Career and Professional Development before the internship starts.

**Master of Arts in Global Finance, Trade, and Economic Integration**

**Degree Requirements**

**Coursework Requirements**

**Core coursework requirements**
International Studies Core

Select one of the following:

- INTS 4324  Int'l Political Economy (strongly recommended)
- INTS 4372  Great Books in Political Economy
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4374</td>
<td>The Ethical Foundations of Global Economic Policy</td>
</tr>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4900</td>
<td>International Politics (*)</td>
</tr>
<tr>
<td>or INTS 4599</td>
<td>Ethics and International Affairs</td>
</tr>
<tr>
<td>or INTS 4820</td>
<td>Democracy and War: Socrates, Thucydides, and Today's America</td>
</tr>
<tr>
<td>or INTS 4821</td>
<td>Early Modern Political Theory</td>
</tr>
<tr>
<td>or INTS 4822</td>
<td>Contemporary Political Thought</td>
</tr>
<tr>
<td></td>
<td>Or others from the Political Theory courses listed under the traditional INTS degree</td>
</tr>
</tbody>
</table>

**Program Training Core**

<table>
<thead>
<tr>

<td>5</td>
</tr>
<tr>
<td></td>
<td>Select one of the following:</td>
<td>5</td>
</tr>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy 3</td>
<td></td>
</tr>
<tr>
<td>INTS 4370</td>
<td>Political Economy of Globalization 4</td>
<td></td>
</tr>
</tbody>
</table>

**Concentration requirements**

Concentrations allow students to group at least three elective courses that relate to a particular theme. Students are required to complete at least one concentration but may also choose to complete a second concentration. Students have considerable latitude in the design of concentration(s), and should consult with their advisors on the selection of elective courses to complete their chosen concentration.

**Emphasis (skills requirement)**

Skills set:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4051</td>
<td>Statistical Methods II 1,2</td>
<td>5</td>
</tr>
<tr>
<td>or INTS 4057</td>
<td>Statistics for International Affairs</td>
<td></td>
</tr>
<tr>
<td>INTS 4303</td>
<td>Econometrics for Decision Making I</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>A third skills oriented course approved by your academic advisor or Student Affairs.</td>
<td>5</td>
</tr>
</tbody>
</table>

**Elective requirements**

Remaining credits (after taking above) for a total of 90 credits (72 credits for returning Peace Corps Volunteers in the PCMI program)

**Total Credits**

90

---

1 Prerequisite, grade of B- or better in undergraduate course in Introductory Microeconomics or International Economics. Students who have not completed the undergraduate prerequisites for INTS 4310 and INTS 4320 should first complete INTS 4536.

2 Prerequisite, grade of B- or better in undergraduate course in Introductory Macroeconomics or International Economics.

3 Students who have taken INTS 4324 to fulfill their International Studies Core requirement must take INTS 4370 to fulfill their Program Training Core requirement.

4 INTS 4310 and INTS 4320 are recommended as prerequisites for INTS 4370.

**Non-coursework Requirements**

- Foreign Language Proficiency: Required
- Internship: Required (0-5 credits)
- Thesis or Substantial Research Paper (SRP): Optional (0-10 credits)

**Master of Arts in International Administration**

**Degree Requirements**

**Coursework Requirements**

**Core coursework requirements**

</tr>
<tr>
<td>INTS 4492</td>
<td>Health and Humanitarian Aid</td>
</tr>
</tbody>
</table>
Concentration requirements

Each student creates a concentration by completing at least three elective courses that are linked thematically. Concentrations may center on an issue, region, or skill set. Students have great latitude in identifying thematic interests and choosing related courses. Students should consult with advisors, and the director will be available to help identify relevant courses. Students who complete certificate programs may submit their certificate transcript in place of a concentration. Courses listed as SHD/ED options and Skills options are strongly recommended and may be applied to the concentration if they have not been used to fulfill other requirements.

Emphasis (skills) requirements

INTS 4051 Statistical Methods II ²

One of the following courses will complete the skills requirement:

INTS 4342 Project Management
INTS 4391 Financial Management and Fundraising of Non-Profits
INTS 4394 Non-Profit Issues & Techniques
INTS 4966 Applied Field Methods
INTS 4555 Professional Communications
INTS 4557 Cross-Cultural Communications
INTS 4563 Crisis Management & Communications
INTS 4423 Introduction to Epidemiology
INTS 4575 Systems Thinking for Social Scientists
INTS 4576 Seminar: Community Based Research
INTS 4633 Intl Project Evaluation
INTS 4333 International Project Analysis

Elective requirements

All other courses to total 90 for completion of the degree (72 hrs. for those Peace Corps PCMI students)

Total Credits 90

1 Students who have sufficient background in development economics may substitute INTS 4310, 4320, 4370; see pre-requisite requirements for these courses via the Course Description Booklet (https://portfolio.du.edu/issta).

2 Students who need to complete Statistics I before taking Statistics II will receive elective credit for Stats I. Completion of Statistics III is strongly recommended. If available, occasional offerings of Data Analysis for Development or Knowledge for Development may be substituted for Statistics III.

Minimum number of credits required for degree: 90 hrs. (72 for Peace Corps PCMI students)

Non-coursework Requirements

- Internship: Required (0-5 credits)
- Foreign Language Proficiency: Required
- Thesis or Substantial Research Paper (SRP): Optional (0-10 credits)
  - Students who choose to complete a thesis should prepare a proposal and secure an advisor for the project at least one year before they plan to submit the thesis.

Master of Arts in International Human Rights

Degree Requirements

Coursework Requirements

Core coursework requirements

International Studies Core

Select one of the following:

INTS 4324 Int'l Political Economy
INTS 4501 Comparative Politics: States and Societies in the 21st Century
INTS 4900 International Politics

Or a Political Theory (PT) course with permission of the Degree Director
**Specialization requirements**

**Program Training Core**

Select four of the following: 20

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4940</td>
<td>Introduction to Human Rights (required)</td>

Methodology Concentration

Select four of the following: 20

- INTS 4051 Statistical Methods II
- or INTS 4057 Statistics for International Affairs
- INTS 4052 Statistical Methods III
- INTS 4391 Financial Management and Fundraising of Non-Profits
- INTS 4497 International Campaign Management
- INTS 4954 Human Rights Research and Design
- INTS 4955 The Human Trafficking Clinic (open only to Human Trafficking Clinic Associates)
- INTS 4966 Applied Field Methods
- INTS 4500 Social Science Methods
- INTS 4576 Seminar: Community Based Research
- Plus other Methodology/Statistics/Skills courses upon approval.

Project Analysis, Management and Evaluation

- INTS 4333 International Project Analysis
- INTS 4342 Project Management
- INTS 4633 Int'l Project Evaluation

Conflict Resolution

- INTS 4920 Conflict Resolution
- CRES 4221 Negotiation Theory and Practice
- CRES 4222 Mediation Theory and Issues (Prerequisite: INTS 4920)
- CRES 4225 Conciliation and Reconciliation (Prerequisite: CRES 4222)
- Other CRES courses with permission of the Conflict Resolution Institute Co-Directors, Prof. Karen Feste or Prof. Tamra Pearson d'Estrée

Emphasis (skills) requirements

Statistics/Methodology/Skills/Project Analysis: choose 5 courses (25 credits)
Statistics
Select one of the following:

<table>

</tr>
</tbody>
</table>

Elective requirements

Minimum number of credits required for degree: 90

Non-coursework Requirements:
- Foreign Language Proficiency: Required
- Internship: Required (0-5 credits)

Master of Arts in International Security

Degree Requirements

Coursework Requirements

All first-term new students must enroll in INTS 4735 and INTS 4739 (Defense Methods and Policy Analysis I and II) during their first year. Students taking 2 courses the first quarter should also take 4702, and those taking 3 courses should take 4700. Thus, a new full-time student takes U.S. Foreign Policy, Major Issues in International Security, and Defense Methods and Analysis for the first quarter. All program training core and skill enhancement courses should also be completed during the first year.

Core coursework requirements

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
</tbody>
</table>

Specialization requirements

Complete at least 4700, 4702, 4703 during first year

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4700</td>
<td>United States Foreign Policy</td>
</tr>
<tr>
<td>INTS 4701</td>
<td>US National Security Policy</td>
</tr>
<tr>
<td>INTS 4702</td>
<td>Major Issues in International Security Policy</td>
</tr>
<tr>
<td>INTS 4703</td>
<td>Security and Strategy: Classics and Current</td>
</tr>
</tbody>
</table>
Concentration requirements

Any 4000 level courses with Security, Defense, Weapons, Arms, Non-Proliferation, Conflict, Revolution, War, Terrorism, Intervention, Violence, Intelligence, Foreign Policy, Civil Resistance, Technology, Military or Diplomacy in the title apply. Students select course combinations within or across any of these areas, mindful of classes carrying prerequisites.

Emphasis (skills) requirements

Complete both classes during first year

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4735</td>
<td>Defense Methods and Policy Analysis I</td>
<td>5</td>
</tr>
<tr>
<td>INTS 4739</td>
<td>Advanced Security and Defense Analysis Methods</td>
<td>5</td>
</tr>
</tbody>
</table>

Elective requirements

Remaining coursework to total 90 hrs.

Total Credits 90

Minimum number of credits required for degree: 90 hrs.

Non-coursework Requirements

- Internship: Required (0-5 credits)
- Foreign Language Proficiency: Required
- Thesis or Substantial Research Paper (SRP): Optional (0-10 credits)

Master of Arts in International Studies

Degree Requirements

Coursework Requirements

Core coursework requirements

International Studies Core

Choose one course from the following list. The course should be outside of the student’s chosen field.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
<tr>
<td>INTS 4349</td>
<td>Comparative Public Policy and Finance</td>
</tr>
<tr>
<td>INTS 4370</td>
<td>Political Economy of Globalization</td>
</tr>
<tr>

<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4599</td>
<td>Ethics and International Affairs</td>
</tr>
<tr>
<td>INTS 4715</td>
<td>Problems and Challenges of Democratization in Contemporary Democracies</td>
</tr>
<tr>
<td>INTS 4890</td>
<td>Revolutions and State Building: Forgotten Movements for Emancipation</td>
</tr>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
<tr>
<td>INTS 4951</td>
<td>Comparing International Societies</td>
</tr>
</tbody>
</table>

Specialization (field) requirements

Students must choose one field from below and complete 4 courses (20 credits) within that field

International Politics

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
</tbody>
</table>

Three other courses in International Politics. For questions in this field, see Jack Donnelly or Susan Rivera.

Comparative Politics

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
</tbody>
</table>

Three other courses in Comparative Politics. For questions in this field, see Martin Rhodes or Susan Rivera.

International Political Economy

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4310</td>
<td>International Trade</td>
</tr>
<tr>
<td>INTS 4320</td>
<td>Int'l Monetary Relations</td>
</tr>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
</tbody>
</table>

Plus a fourth course. For questions in this field, see Rachel Epstein.

Political Theory

Any four of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4599</td>
<td>Ethics and International Affairs</td>
</tr>
<tr>
<td>INTS 4802</td>
<td>Foundational Ideas in Social Science: Marx and Weber</td>
</tr>
<tr>
<td>INTS 4804</td>
<td>Realism and Democracy</td>
</tr>
<tr>
<td>INTS 4820</td>
<td>Democracy and War: Socrates, Thucydides, and Today's America</td>
</tr>
</tbody>
</table>
For questions in this field, see Alan Gilbert.

**Concentration requirements**

A three-course (15 credits) concentration. Students may design a customized concentration with the approval of Student Affairs. Students are only required to have one concentration, but may do two if they wish. Course descriptions are available at https://portfolio.du.edu/issta.

**Emphasis (skills) requirements**

Methodology/Skills. A package of three courses (15 credits) from the various methods and skills courses offered at the Josef Korbel School and, with permission, from other units at the University of Denver. The list below contains examples of the types of courses that students may choose and do not exhaust the possibilities. The best choices for each student will depend on that student's career goals.

CPSY 4606 Gender-based Violence

Total Credits 90

1 Only 1 non-INTS course may be counted towards the Certificate. Only 1 elective may be double-counted towards a degree.

Minimum number of credits required for certificate: 90

Non-coursework Requirements

- An internship (150 hours) with an organization, whose core work includes international humanitarian assistance or humanitarian policy/advocacy, is required for the Humanitarian Assistance Certificate. These are usually completed by students in the summer between the first and second years of the MA program. Students arrange their own internship placements but should consult with the HA program director for ideas and approval. Internships must also be approved by the JKSIS Office of Career and Professional Development before the internship starts.

Master of Arts in International Studies with A Concentration in International Economics

Degree Requirements

<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
</tbody>
</table>

Plus a fourth course.

For questions in this field, see Rachel Epstein (chair of the IPE field).

Concentration requirements 15

A three-course (15 credits) concentration. Students may design a customized concentration with the approval of Student Affairs. Students are only required to have one concentration, but may do two if they wish. Course descriptions are available at https://portfolio.du.edu/issta.

Emphasis (skills) requirements 15
Methodology/Skills. A package of three courses (15 credits) from the various methods and skills courses offered at the Josef Korbel School and, with permission, from other units at the University of Denver. The list below contains examples of the types of courses that students may choose and do not exhaust the possibilities. The best choices for each student will depend on that student’s career goals.

<td>Contemporary Political Thought</td>
</tr>
<tr>
<td>INTS 4599</td>
<td>Ethics and International Affairs</td>
</tr>
</tbody>
</table>

Specialization (field) requirements

Students are required to take five courses in each of two fields, as specified below.

For the Comparative Policy focus, students must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
<tr>
<td>INTS 4349</td>
<td>Comparative Public Policy and Finance</td>
</tr>
</tbody>
</table>

PLUS two additional courses in Comparative Politics

Consult with Martin Rhodes and Tim Sisk before selecting your CP courses.

The second field must be one of these below:

1. International Politics (IP)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
<tr>
<td>INTS 4903</td>
<td>Social Construction of International Society</td>
</tr>
</tbody>
</table>

PLUS three additional courses in International Politics.

Consult with Jack Donnelly and Karen Feste before selecting your IP courses.

2. International Political Economy (IPE)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4310</td>
<td>International Trade</td>
</tr>
<tr>
<td>INTS 4320</td>
<td>Int'l Monetary Relations</td>
</tr>
</tbody>
</table>

INTS 4327  Advanced Issues in International and Comparative Political Economy
INTS 4370  Political Economy of Globalization
INTS 4324  Int'l Political Economy

For questions or problems in this field, see Rachel Epstein and Martin Rhodes.

International Relations (IR) (from AYE2013-2014)

INTS 4648  Theories of Security in World Politics
INTS 4320  Int'l Monetary Relations
INTS 4903  Social Construction of International Society
INTS 4327  Advanced Issues in International and Comparative Political Economy
PLUS one additional course from approved list (available for fall 2013)

Political Theory (PT)

INTS 4820  Democracy and War: Socrates, Thucydides, and Today's America
INTS 4821  Early Modern Political Theory
INTS 4822  Contemporary Political Thought
INTS 4821  Early Modern Political Theory
And one additional Political Theory course. For questions regarding this field, see Alan Gilbert or Micheline Ishay

Emphasis (skills/methodology) requirements 2

INTS 4010  Epistemology 5
INTS 4499  National Security and Defense Transformation 5
INTS 4500  Social Science Methods 5

Elective requirements, if applicable 50

All other electives to total 135 hrs. most students coming in with an MA degree are also able to transfer in a maximum of 45 quarter hrs., leaving them with a minimum of 90 credit hrs. to complete.

Total Credits

1  The International Politics (IP) and International Political Economy (IPE) fields are being merged into a new International Relations field but only for students entering the PhD program from AY2013-14. For students already in the program IP and IPE remain separate fields.

2  Methodology training beyond these required courses is a matter of individual needs and interests, and students should consult their advisor or potential dissertation committee chair and members about available options. A limited fund is available to fund students to study at methods courses outside of DU, at for example, methods summer schools. Awards for this purpose will be made on a competitive basis and only when students and their advisors can prove that such training is vital for completion of the Ph.D. dissertation.

Minimum number of credits required for degree: 135 hrs.

Non-coursework Requirements

• Please note that PhD students are required to write TWO extended research papers during their period of fulfilling course work requirements. Each paper should be written in ONE of your two fields. Each field will attach different requirements to these papers, and in some fields there will be particular advanced classes for which these papers should be written. But all fields will require that students demonstrate a capacity for independent research in writing the extended research papers. Please note that at some point the titles of these papers and the courses for which they are written should be included in your Program Statement

• Foreign Language Proficiency: Non-native English speakers should pass the Test of English as a Foreign Language (TOEFL) with a minimum score of 95 (internet based), 240 (computer-based) or 587 (paper-based) and native English speakers need to demonstrate proficiency in one foreign language.

• Comprehensive Written Exams: An 8 hr. comprehensive exam is given to each student upon complete of their coursework. Students must test in 2 fields (in this case, one will be Political Theory; the other will be the students 2nd field). One week after the written exam a 1.5 oral exam is given for each field made up of 3 tenured faculty members in each field.

• Students cannot progress towards prospectus stage until they successfully pass both fields. Prospectus must have approval/signature of all Korbel committee members.

• Final Dissertation: Prior to submitting the final dissertation for graduation, students must successfully pass an oral defense of the dissertation comprised of a minimum of 3 tenured Korbel faculty and one tenured outside chair from another department.
# Doctor of Philosophy in International Studies with a Concentration in International Economics

## Degree Requirements

### Coursework Requirements

#### Core coursework requirements

<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
<tr>
<td>INTS 4370</td>
<td>Political Economy of Globalization</td>
</tr>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
</tbody>
</table>

For questions or problems in this field, see Rachel Epstein and Martin Rhodes.

The second field must be one of these below: 1

**International Politics (IP)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
<tr>
<td>INTS 4903</td>
<td>Social Construction of International Society</td>
</tr>
</tbody>
</table>

PLUS three additional courses in International Politics.

Consult with Jack Donnelly and Karen Feste before selecting your IP courses.

**Comparative Politics (CP)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
<tr>
<td>INTS 4349</td>
<td>Comparative Public Policy and Finance</td>
</tr>
</tbody>
</table>

PLUS two additional courses in Comparative Politics

Consult with Martin Rhodes and Tim Sisk before selecting your CP courses.

**International Relations (IR) (from AYE2013-2014)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4648</td>

<td>INTS 4320</td>
<td>Int'l Monetary Relations</td>
</tr>
<tr>
<td>INTS 4903</td>
<td>Social Construction of International Society</td>
</tr>
<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
</tbody>
</table>

PLUS one additional course from approved list (available for fall 2013)

**Political Theory (PT)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4820</td>
<td>Democracy and War: Socrates, Thucydides, and Today's America</td>
</tr>
<tr>
<td>INTS 4821</td>
<td>Early Modern Political Theory</td>
</tr>
<tr>
<td>INTS 4822</td>
<td>Contemporary Political Thought</td>
</tr>
<tr>
<td>INTS 4821</td>
<td>Early Modern Political Theory</td>
</tr>
</tbody>
</table>

And one additional Political Theory course. For questions regarding this field, see Alan Gilbert or Micheline Ishay

#### Emphasis (skills/methodology) requirements

2
INTS 4010  Epistemology  5
INTS 4499  National Security and Defense Transformation  5
INTS 4500  Social Science Methods  5

**Elective requirements, if applicable**  
50

All other electives to total 135 hrs. Most students coming in with an MA degree are also able to transfer in a maximum of 45 quarter hrs., leaving them with a minimum of 90 credit hrs. to complete.

**Total Credits**  
135

---

1. The International Politics (IP) and International Political Economy (IPE) fields are being merged into a new International Relations field but only for students entering the PhD program from AY2013-14. For students already in the program IP and IPE remain separate fields.

2. Methodology training beyond these required courses is a matter of individual needs and interests, and students should consult their advisor or potential dissertation committee chair and members about available options. A limited fund is available to fund students to study at methods courses outside of DU, at for example, methods summer schools. Awards for this purpose will be made on a competitive basis and only when students and their advisors can prove that such training is vital for completion of the Ph.D. dissertation.

**Minimum number of credits required for degree: 135 hrs.**

**Non-coursework Requirements**

- Please note that PhD students are required to write **TWO** extended research papers during their period of fulfilling course work requirements. Each paper should be written in **ONE** of your two fields. Each field will attach different requirements to these papers, and in some fields there will be particular advanced classes for which these papers should be written. But all fields will require that students demonstrate a capacity for independent research in writing the extended research papers. Please note that at some point the titles of these papers and the courses for which they are written should be included in your Program Statement.

- **Foreign Language Proficiency:** Non-native English speakers should pass the Test of English as a Foreign Language (TOEFL) with a minimum score of 95 (internet based), 240 (computer-based) or 587 (paper-based) and native English speakers need to demonstrate proficiency in one foreign language.

- **Comprehensive Written Exams:** An 8 hr. comprehensive exam is given to each student upon complete of their coursework. Students must test in 2 fields (in this case, one will be Political Theory; the other will be the students 2nd field). One week after the written exam a 1.5 oral exam is given for each field made up of 3 tenured faculty members in each field.

- Students cannot progress towards prospectus stage until they successfully pass both fields. Prospectus must have approval/signature of all Korbel committee members.

- **Final Dissertation:** Prior to submitting the final dissertation for graduation, students must successfully pass an oral defense of the dissertation comprised of a minimum of 3 tenured Korbel faculty and one tenured outside chair from another department.

**Doctor of Philosophy in International Studies with a Concentration in Political Theory**

**Degree Requirements**

**Coursework Requirements**

**Core coursework requirements**

International Studies Core: Choose four courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4324</td>
<td>International Political Economy</td>
</tr>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
</tbody>
</table>

Plus one Political Theory course from the following list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4820</td>
<td>Democracy and War: Socrates, Thucydides, and Today's America</td>
</tr>
<tr>
<td>INTS 4821</td>
<td>Early Modern Political Theory</td>
</tr>
<tr>
<td>INTS 4515</td>
<td>19th-Century Political Theory</td>
</tr>
<tr>
<td>INTS 4544</td>
<td>Classics in Comparative Politics: Weber and Durkheim</td>
</tr>
<tr>
<td>INTS 4822</td>
<td>Contemporary Political Thought</td>
</tr>
<tr>
<td>INTS 4599</td>
<td>Ethics and International Affairs</td>
</tr>
</tbody>
</table>

**Specialization (field) requirements**

Students are required to take five courses in each of two fields, as specified below.

For the Political Theory focus, students must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4820</td>
<td>Democracy and War: Socrates, Thucydides, and Today's America</td>
</tr>
<tr>
<td>INTS 4821</td>
<td>Early Modern Political Theory</td>
</tr>
<tr>
<td>INTS 4822</td>
<td>Contemporary Political Thought</td>
</tr>
</tbody>
</table>
INTS 4821 Early Modern Political Theory

And one additional Political Theory course. For questions regarding this field, see Alan Gilbert or Micheline Ishay.

The second field must be one of these below:

**International Politics (IP)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4900</td>
<td>International Politics</td>
</tr>
<tr>
<td>INTS 4903</td>
<td>Social Construction of International Society</td>
</tr>
</tbody>
</table>

PLUS three additional courses in International Politics.

Consult with Jack Donnelly and Karen Feste before selecting your IP courses.

**Comparative Politics (CP)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4501</td>
<td>Comparative Politics: States and Societies in the 21st Century</td>
</tr>
<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
<tr>
<td>INTS 4349</td>
<td>Comparative Public Policy and Finance</td>
</tr>
</tbody>
</table>

PLUS two additional courses in Comparative Politics

Consult with Martin Rhodes and Tim Sisk before selecting your CP courses.

**International Political Economy (IPE)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4310</td>
<td>International Trade</td>
</tr>
<tr>
<td>INTS 4320</td>
<td>Int'l Monetary Relations</td>
</tr>
<tr>
<td>INTS 4327</td>
<td>Advanced Issues in International and Comparative Political Economy</td>
</tr>
<tr>
<td>INTS 4370</td>
<td>Political Economy of Globalization</td>
</tr>
<tr>
<td>INTS 4324</td>
<td>Int'l Political Economy</td>
</tr>
</tbody>
</table>

For questions or problems in this field, see Rachel Epstein and Martin Rhodes.

**International Relations (IR) (from AYE2013-2014)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS 4648</td>
<td>Theories of Security in World Politics</td>
</tr>
<tr>
<td>INTS 4320</td>

Courses

INTS 4010 Epistemology (5 Credits)
An introductory course covering philosophy and history of science, epistemology, causality, and the logic of inquiry as related to international studies. The relation between theory and practical politics is explored, and differences between empirical and normative theory are examined in the context of foundational principles of politics and social science.

INTS 4020 Preparing a Grant Proposal (5 Credits)
An intermediate course on methodological issues in scientific data analysis. Topics include the logic of hypothesis testing, modes of gathering data, sampling, experimental and non-experimental design, index construction, bivariate and multivariate techniques, and causal inference fallacies. Prerequisite: INTS 4050.

INTS 4050 Statistical Methods I (5 Credits)
An introductory course featuring statistical reasoning, probability, sampling, statistical inference, nominal and ordinal measures of association, and correlation. Open only to students with no prior background in statistics.

INTS 4051 Statistical Methods II (5 Credits)
An intermediate course covering survey research methods, analysis of variances, t-test, correlation, and various methods in multivariate analysis, such as regression, time series, and causal models. Prerequisites INTS 4050.

INTS 4052 Statistical Methods III (5 Credits)
This course will serve as continuation of Statistical Methods II. This will be an applied, non-calculus based course on statistical techniques used in nonparametric and multivariate analysis. Emphasis will be on applications and data analysis using the statistical software package SAS. Prerequisite: INTS 4051 or equivalent.

INTS 4053 Statistical Methods IV (3,5 Credits)
This course is the fourth in a series of statistical methods courses. The first two cover the basic concepts in statistical analysis from descriptive statistics up through multiple regression analysis. The third course covers popular multivariate techniques and the writing/critiquing of empirical research papers. Emphasis in this fourth course is on broad applications of statistics as they relate to policy decision making. Prerequisite: INTS 4052 or equivalent.

INTS 4054 Qualitative Research in Developing Contexts (5 Credits)
Researchers investigate qualitative research to promote accuracy and justice in developing contexts. Students employ a variety of media to examine indigenous research, institutional review boards and human subject research, critical and performance ethnography, arts-based inquiry, narrative inquiry, Foucault, the ethics and strategies of on-line research, cultural and investigative poetics, and/or the politics of evaluation. Using sustainability lenses including scale, geography, issues of equity and justice, different ways of measuring social wellbeing, micro- and macroeconomic signals (i.e., prices or taxes) which affect research, as well as the effects of spirituality and cultural beliefs, students identify needed reforms. The environment is active, highly participative and experiential.

INTS 4056 Information Management in Human Crises (5 Credits)
Accurate, reliable and timely data collection, processing, analysis and dissemination (four steps in information management) are critical for the effective implementation of both development and humanitarian programs. In humanitarian responses, there are numerous challenges to managing information in what may be a rapidly evolving situation. This course introduces students to the theory of information management and its application in the humanitarian context.

INTS 4057 Statistics for International Affairs (5 Credits)
A first course in statistics taught at an accelerated pace. This course combines materials typically offered in an introductory course and an intermediate course. Topics include statistical reasoning, probability, statistical inference, measures of association, survey research methods, analysis of variance and regression. There are no prerequisites but students are expected to have reasonably strong quantitative skills.

INTS 4058 Applied Time-Series Analysis (5 Credits)
This course serves as an introduction to time-series analysis techniques including longitudinal, cross-sectional and panel data analysis. Topics include moving averages, exponential smoothing, time-series decomposition, model identification and estimation, ARMA and ARIMA models, repeated measures models and intervention analysis. Panel data analysis includes fixed effects and random effects models. Emphasis is on computer applications (using Stata) and interpretation of results. Prerequisites: INTS 4051 or INTS 4057 or permission of instructor.

INTS 4141 Domestic/Int'l Conseq:Drug War (5 Credits)
Domestic and international policy and the impact of the drug war on both.

INTS 4142 After the Fall: Russia & China (5 Credits)
Provides analysis of the historical rise of Russia and China, and their complex inter-relationship and interaction with the United States and the world.
INTS 4147 American Govt & Pol. Making (5 Credits)
Examines governmental fragmentation affects and policies and examines how policy issues engage different segments of the government.

INTS 4151 History, Culture, and Conflict (5 Credits)
An introductory course examining how and why historians develop diverse interpretations of events and periods. Methods of analyzing evidence, selecting research material, and supporting arguments are discussed and evaluated in assessments of selected historical cases. Methodological ties between the historiographic approach and social sciences including anthropology and psychology, as well as the study of gender are also drawn.

INTS 4180 Third World Foreign and Defense Policy (5 Credits)
This course explores common issues in the defense policy of Third World countries. Topics covered include definitions of national interest and security, military organization and planning, domestic order, repression and human rights, war termination and reconstruction, regional conflict and alliances, military assistance, arms proliferation, and external intervention.

INTS 4181 History of American Diplomacy (5 Credits)
Course examines the development of diplomacy as a tool in the relationship between the US and its allies and adversaries, and how that diplomacy has evolved as the country changed and grew.

INTS 4183 Arms Control (5 Credits)
INTS 4184 Cost Benefit Analysis (5 Credits)
Cost Benefit Analysis (CBA) is an assessment method that quantifies in monetary terms the costs and benefits of alternative public policies, programs, or projects. After taking this course, students will be able to design and carry out cost-benefit analyses and cost effectiveness analyses. This course covers the conceptual and microeconomic foundations of cost-benefit analysis as a public decision making tool. However, the main focus is on the practical steps and techniques involved in an actual cost-benefit analysis. Students learn practical methods of market and non-market valuation of benefits and costs of the proposed public policies, programs, and projects. Students learn how to discount future streams of costs and benefits so as to measure and compare the net social benefits of alternative public policies, programs or projects. In this course, students learn practical ways of recognizing and dealing with risks and uncertainties in the valuation of benefits and costs of alternative public policies, programs, or projects. Students carry out sensitivity analysis to show the sensitivity of the results of the cost-benefit analysis to changes in the values of critical variables. Some selected case studies of cost-benefit analyses are used to enable students to learn and apply various concepts, principles, theories, and methods in conducting cost-benefit analyses. This class can be taken for 3 or 5 credit hours. Students who take this class for 3 credits are required to design a Cost-Benefit Analysis. Students who take this class for 5 credits are required to design and complete a Cost-Benefit Analysis.

INTS 4185 Environmental Impact Assessment (5 Credits)
Students have the option of taking this course for 3 or 5 credit hours. Those students who take this for 5 credits are required to complete an environmental impact assessment project. This is a practical course aimed at equipping students with the skills necessary to design and carry out environmental impact assessments and prepare environment impact statements. Environmental Impact Assessment (EIA) is a set of appraisal techniques that use a systematic, holistic and multi-disciplinary approach to assess the potential impacts of a planned project on the environment in advance, thereby allowing avoidance measure to be taken. This course focuses on the legislative requirements and the methodology of environmental impact assessment to achieve sustainable development goals. This includes analyzing the role of public consultation and participation in order to ensure the quality, comprehensiveness and effectiveness of the EIA. This course is useful for those who are planning to serve as Peace Corps volunteers, project managers, public policy analysts, consultants, and professionals in global security, environmental law, public health, international development, international administration, environment and natural resources management, and international trade. This course uses lectures, homework problem sets, in-class exercises and case studies from various fields to equip students with very useful and practical skills to design and carry out environmental impact assessments and prepare environmental statements.

INTS 4210 Multinational Corporations (5 Credits)
The emergence of sweeping new legal rights for MNCs in relation to their foreign direct investment and cross-border trading activities under the avalanche of bilateral investment treaties negotiated in the last few decades and under multilateral conventions such as NAFTA represent what many have termed “revolutionary” changes in the nature of state sovereignty as it relates to state-investor relations. That expansion of investor/MNC rights in relation to state sovereignty has thus seemingly reached a point calling for re-examination of the nature and appropriate scope of MNC rights, as well as the nature of MNE accountability and responsibilities which are the flip side of such rights.

INTS 4250 Outbreak of War (5 Credits)
An introductory course examining the history and theory of the causes of war. Focuses on historical accounts of World War I and critiques weaknesses and strengths of theoretical writings on the causes of war. Topics include psycho-logical approaches to conflict; the role of the state in war. crisis management, and intelligence failures; bureaucracy and linkage politics; and ideology.

INTS 4303 Econometrics for Decision Making I (5 Credits)
The first course in a two course sequence in Applied Econometrics. Introduces basic probabilistic techniques for the quantitative analysis of economic and social data and their application to international public policy decision making. Prepares students to: compile and analyze data sets; build and test regression models; interpret and critically evaluate applied econometric studies; and conduct their own applied econometric research using computerized statistical packages. Prerequisite: INTS 4051 or INTS 4057.

INTS 4304 Econometrics for Decision Making II (5 Credits)
Continuation from Econometrics I. The purpose of this course is to critically review the classical regression models and introduce students to some more recent models in order to analyze data and test relevant hypotheses in economics, IPE and related social science disciplines. The course provides students with the tools necessary to conduct and critically evaluate empirical analysis in these fields. Prerequisite: INTS 4303.
INTS 4310 International Trade (5 Credits)
An intermediate course analyzing causes and consequences of international trade. Classical, neo-classical, and product-cycle models included. Topics include international specification, terms of trade of developed and less-developed countries, distribution of gains from trade, instruments and uses of commercial policy, nominal and effective protection, and theory of customs unions and economic integration. Prerequisites: macro and micro economics.

INTS 4318 Applied Research in International Economics (5 Credits)
The purpose of this course is to critically review the literature in political economy and introduce students to some recent empirical work to analyze data and test relevant theories and hypotheses in political economy, IPE and related social science disciplines. The course provides students with the tools necessary to conduct and critically evaluate empirical analysis in these fields. Two data sets are handed out during the course and students analyze them. The final paper deals with a substantive empirical issue.

INTS 4319 Governing the Global Economy: The Effectiveness of Multilateral Economic Institutions (5 Credits)
Multilateral Economic Institutions are the primary mechanisms by which the global economy is governed when it is governed at all. This course examines the institutions and theoretical foundations that are at the center of this system of global governance by studying their history, sources of authority, and ideological underpinnings. Simultaneously, each multilateral economic institution/regime is examined from an empirical perspective in order to determine the impact of these institutions and whether or not they are accomplishing their respective tasks in the governance of the global economy. The course is both theoretical and empirical and there is a bias to the course - it is that the MEIs are among the most written about and least understood institutions in the global economy. In addition, the course also examines the practical reality of multilateral economic negotiations through an examination of recent attempts to govern segments of the global economy; including international trade, finance, and climate.

INTS 4320 Int'l Monetary Relations (5 Credits)
An intermediate course examining history of the monetary system, foreign exchange rates, balance of payments analysis, and adjustment processes under different exchange systems, current status problems, and prospects for reform. Prerequisites: macro and micro economics.

INTS 4324 Int'l Political Economy (5 Credits)
The course examines 3 contrasting visions of international political economy: economic security, trade and finance. Required for all INTS majors.

INTS 4327 Advanced Issues in International and Comparative Political Economy (5 Credits)
This course examines the spread of global capitalism in the late 20th and early 21st centuries. Although recent economic phenomena are frequently characterized as features of "globalization," we will go beyond an assessment of increased cross-national interactions. Rather, the focus will be on the apparently growing willingness of states to choose privatization, liberalization and denationalization in the economic sphere. It is possible that the elevation of markets since the 1970s has signaled the end of the liberal compromise that was struck at the close of World War II and that allowed at least the advance industrialized states to protect their populations against economic downturns. Whether this is the case will be a central theme throughout the quarter. The bulk of the course deals with processes, most of which originate in Western Europe and North America, but that have global effects. We begin by exploring the origins of international capital mobility and then assess one possible domestic political consequence of it, namely the spread of an anti-inflation orthodoxy and the institutionalization of central bank independence. Next, we will take stock of the state of international trade and the degree to which it has truly been liberalized. We will also explore some possible causes of the turn to freer trade. Also under "processes," we will read competing accounts of why states have increasingly chosen privatization, liberalization and denationalization in everything from the way they fund their pension systems to their method of organizing finance. In this connection, the course covers international institutions and assesses the extent to which they have successfully promoted liberalizing strategies in a range of settings. But we will also look at competing theories of policy diffusion that suggest liberalizing trends are not orchestrated by any single set of institutions or states. Rather, theories of diffusion posit that there are social or competitive forces that have advanced privatization, liberalization and denationalization. In addition to the substantive emphasis on liberalization, the course will focus on research strategies, as students will be required to write a research paper on a topic of their choosing during the quarter. Each week we will discuss a distinct aspect of developing a research paper. Topics include how to formulate the research question, Hypothesis development and testing, appropriate sources and accounting for alternative explanations. We will discuss these topics both with respect to students' papers as they evolve but also in relation to the readings assigned in a given week.

INTS 4328 European Post-Communist States (5 Credits)
Course studies countries previously under communist regimes, and the economic struggles they face, as well as future challenges.

INTS 4330 International Business Transactions (5 Credits)

INTS 4332 Data Analysis and Development (5 Credits)

INTS 4333 International Project Analysis (5 Credits)
An advanced course in techniques of proposal assessment, implementation, and evaluation. Emphasis on computerized benefit-cost analysis, including methods adopted by the World Bank and other donor agencies. Projects drawn from industry, agriculture, and public health sectors used as cases for study. Prerequisites: INTS 4010 and 4055.
INTS 4339 Microfinance and Sustainable Development (3.5 Credits)
This class provides an overview of the principles of microfinance and its role in sustainable approaches to international development. The course introduces students to the main business models of microfinance, leading microfinance institutions (MFIs) around the globe, typical products and services, and how microfinance has evolved over 25 years. In addition, we examine both NGO and for-profit organizational structures, and how they balance development and financial sustainability. Topics include: How "microcredit" evolved in poverty alleviation, and how it became "microfinance; Lending methodologies that allow MFIs to deliver credit at large scale to poor clients; Challenges to measuring social impact and development outcomes; Commercialization of microfinance, and how the push to access private sector capital has financed global expansion and competition; How social entrepreneurship continues to innovate new strategies around the globe; Whether NGO microfinance organizations can serve the poor as efficiently and at the same scale as profit-driven MFIs, and conversely, whether for-profit MFIs can achieve the same development impact as NGOs; How different target clients and organizational structures influence the business choices microfinance organizations make to balance financial sustainability and development; Challenges and opportunities, including those facing NGOs that blend microfinance with other development approaches. While many see microfinance as a powerful tool for eradicating global poverty, questions remain about its impact, efficacy, and whether it will continue targeting the poorest of the world's population as an increasingly market-driven strategy. We review the fundamentals of microfinance, how commercialization has created more efficient and sometimes regulated financial institutions, and the distinction between "financial services for the poor" and "microfinance as poverty alleviation." In addition, we review microfinance's appeal to donors, its growth and expansion around the globe, and the challenges of such growth for individual MFIs. Each week, we examine a different microfinance organization (MFI) to understand its development strategy (target clients, products and services, organizational structure), and its business strategy for reaching financial sustainability. In addition to the readings and case studies, we have occasional guest speakers from the industry. Students work in small groups to research an individual MFI and present it to the class.

INTS 4341 Illicit Markets in Latin America (5 Credits)
This course applies the understandings of International Political Economy (IPE) to the study of illicit market activity in the western hemisphere. While sociologists, criminologists, legal scholars and law enforcement agencies have all contributed substantially to this area of study, IPE has only recently been applied. So what can this approach contribute? Through IPE, we can place illicit market activity within the larger structure of trade and monetary relations, the rise of the informal sector and the existence of economic and other inequalities in particular regions. We can consider the nature and impact of North-South relations and the process of structural adjustments as advised by international financial institutions. Further, we can evaluate the overall function and effectiveness of law enforcement, governing institutions and international organizations in controlling illicit market activity. Finally, through IPE, we can consider the ideational context of participation in illicit market activity.

INTS 4342 Project Management (5 Credits)
Course introduces the skills and techniques to be a successful project manager.

INTS 4345 The Art of Forecasting (5 Credits)
Course defines forecasting techniques and expert systems. Will cover Delphi techniques, expert systems, modeling and economic forecasting.

INTS 4348 European Integration (5 Credits)
Provides students with in-depth knowledge of politics, institutions and development of the EU from its origins to present day.

INTS 4349 Comparative Public Policy and Finance (5 Credits)
Course aims to provide in-depth treatment of the question "why do size, form, financing, and distributive outcomes of government differ so greatly across nations?".

INTS 4350 Economic Development (5 Credits)
Deals with financial and economic problems faced by developing societies.

INTS 4353 Environment and Sustainable Development (5 Credits)
INTS 4355 Finance and Development (5 Credits)
An advanced course which examines the relationship between financial system organization and economic performance. The political economy of financial innovation, liberalization and globalization, state-finance-industry relations, micro-lending, stock markets and regional financing are discussed with reference to Latin America, Asia and African countries.

INTS 4356 Economic Analysis - Emerging Financial Markets (5 Credits)
Examines economic financial markets and their impact on international financial structures.

INTS 4357 Advanced Issues in the Political Economy of International Monetary Relations (3.5 Credits)
This seminar focuses on new areas of research and policy debate in the international and domestic political economy of the monetary system. The topics discussed include the following: the role of power, ideology and conflict in the global financial system; the political economy of sovereign risk and credit rating agencies; the political economy of sovereign wealth funds; the future of territorial currencies; the implications for state power and policy effectiveness of offshore finance, virtual monies and money laundering; and the efficacy of strategies involving the accumulation of high levels of official reserves. The material in this seminar assumes that students already understand the workings of the international financial system. Prerequisite: INTS 4320.

INTS 4362 Gender and Health (5 Credits)
INTS 4363 Discrimination and Minorities (5 Credits)
INTS 4364 Global Poverty and Human Rights (5 Credits)
This course explores the many dimensions of global poverty and human rights and well-being of people around the world. Three particular areas are emphasized and explored in detail. The first is the exact dimensions and extent of globalization. The second is the exact nature of another complex thought called poverty. The third area explores the connections between globalization, poverty, and human rights. After rigorous discussion of the conceptual foundations, we focus on the U.N. millennium development goals for poverty reduction in particular. At the end we will be able to explore the analytical foundation of alternative policies, strategies and evaluate these for formulating alternative strategies addressing human rights issues and global poverty reduction.

INTS 4366 Reproductive Health (5 Credits)
This course introduces students to the wide tangle of social issues surrounding reproductive and sexual health today. We begin with an in-depth look at the historical and cultural variations in definitions of reproductive and sexual health in order to provide important background for the various medical, legal, ethical, political, issues that inform reproductive health programs and policies. We end with a topical focus on HIV/AIDS and a look at international health programs designed to address reproductive health in “vulnerable” populations. The course necessarily vacillates between examining the local and the global at both micro and macro levels in order to cover both the current knowledge about sexuality and reproduction and the broader social impact of advances in reproductive health technology.

INTS 4367 Global Health Affairs (5 Credits)
Introductory survey class for all students interested in intersection of international affairs and global health and security, development and economics.

INTS 4368 HIV & AIDS in International Affairs (5 Credits)
Upon completion of the course, students will understand (a) the concept of global health security; (b) HIV/AIDS as an epidemiological phenomenon; (c) the political, economic and social contexts of HIV/AIDS in specific regions of the world; (d) HIV/AIDS as a threat to security and gender; (e) security considerations of HIV/AIDS impacts in development and as a human right.

INTS 4369 Pol Econ of Global Inequality (5 Credits)
The main purpose of this course is to understand the underlying causes of inequality and poverty in the world. In order to do this, we look at the relationship between economic growth, poverty, and inequalities in several different dimensions. First, the process of sustainable grown itself is analyzed. Second, the implications of different types of growth for income distribution and poverty are studied. Finally, the implications of such inequalities for human welfare in developing economies in particular are studied. After an initial exploration of the income-based measures of poverty and inequalities we focus on the more recently developed social capabilities approach developed by Amartya Sen and others.

INTS 4370 Political Economy of Globalization (5 Credits)
An introductory course on the nature of global economic integration in the postwar period, including contending theoretic perspectives, and several applied issues and policy dilemmas such as the evolving nature of firms (e.g. globalization of production), the "new international of labor," and the status of national sovereignty/policy autonomy in an integrated world economy, politics and markets, and currents themes in political economy.

INTS 4372 Great Books in Political Economy (5 Credits)
This course investigates several contemporary approaches to Political Economy, ranging from institutionalist to Marxist, anti-essentialist, and (postmodernist) feminist thought. Rather than attempt to survey quickly a lot of literature, we carefully read a limited number of influential (and provocative) texts that present a range of perspectives with which most students are largely unfamiliar. These are very challenging texts, and students must be prepared to spend a good bit of time on the assigned readings weekly.

INTS 4374 The Ethical Foundations of Global Economic Policy (5 Credits)
This seminar course explores the contending ethical theories that underlay contemporary debates over global economic policymaking. We explore the ethical foundations of neoclassical, Austrian, institutionalist and Marxian and economic theory (including utilitarianism, welfarism, libertarianism and egalitarianism) in order to better understand why and how these diverse economic theories generate distinct policy prescriptions. For example, we examine the controversy over “free trade” versus “fair” trade that is now at the center of policy debate in the U.S. and across the globe, and explore the contending ethical theories that inform this debate. This is a reading intensive seminar. We examine central works of Amartya Sen, Milton Friedman, Robert Nozick, Michael Walzer, and other leading economists and political theorists.

INTS 4378 Terrorism, Transportation, and Homeland Security (5 Credits)
This course is designed to introduce students to the critical role that transportation plays in homeland security. Transportation is one of the most important critical infrastructures because society and economy are totally dependent upon the efficient movement of freight and people. Not surprisingly, terrorists, on numerous occasions and in many countries, have launched attacks against aircraft, ships, railway stations, airports and other transportation facilities. In the U.S. the devastating 9/11 attack proved to be a turning point and led to fundamental changes in the struggle against terrorism, including the largest governmental reorganization in many decades, the creation of the Department of Homeland Security and its Transportation Safety Administration. In this course, students analyze the degree to which a safe and secure transportation system for goods and people has emerged. Accordingly the course deals with such topics as the contemporary structure and role of transportation, the nature of the terrorist threat, including the potential of the weapons that are or might become available (ranging from WMD’s to suicide bombers to cyber-attacks), the difficulties inherent in safeguarding such facilities as airports, rapid transit, railroads, and seaports, the efficacy of the policies that have been implemented and the kinds of changes that might further enhance transportation and homeland security.
INTS 4379 Gender and Development (5 Credits)
This course is concerned with how and why gender matters in outcomes and impacts of planned and unplanned development. It is also concerned with gender as a human rights issue and the equity and ethical dimensions of development planning. Beyond these practical implications, the course engages theoretical and ideological underpinnings for the gendered structures of economic, political, and social power encountered in a wide range of economic and social development contexts. Throughout the quarter, the class examines interactions among structural and cultural (including ideational) factors that together comprise and construct gendered environments. Structural and cultural factors are, at the least, mutually reinforcing, and may be mutually constitutive. The class investigates the ways in which each set of economic and social transformations broadly encompassed within a human-rights or human-development approach to international development. The class also engages interacting dimensions of change, including economic, social, political, physical environmental, and human biological dimensions. The class explicitly examines all interactions across scales from global to local. If we were looking for a label for this approach, it could be called “gendered political ecology.” We could also use a term coined by Dianne Rocheleau and others, “feminist political ecology,” which suggests the need to examine the responsibilities, freedoms, and control of resources, together with the varying forms of agency, strategy, and tactic deployed by women (often in partnership with men) to redress these inequalities. The class considers numerous cases from the Global South, and some from the Global North. These case studies immerse us in the diversity and complexity of gender and development interactions and in the “grounded agency” (Radcliffe 2006) through which women and men attempt to secure livelihoods – that is, “making a living and making living meaningful” (Bebbington 2000) – to enjoy long and healthy lives, and to participate in full citizenship. These cases also illustrate myriad patterns of gender construction across ethnicity, class, age, marital status, and other differences among women and men. This is a policy-oriented course. The class explores the ways in which the gendered division of labor and resources, and the socio-cultural construction of masculinities and femininities, influence perceptions, formulation, and implementation of development policies and practices. The class traces the differential impacts of development policies and initiatives on women, men, and gender relations in the developing world as well as efforts to target women through more gender-sensitive development initiatives. Ultimately, this course considers how ideologies and institutions of global development might yet enable women’s empowerment and facilitate equity in a deeply unequal and interconnected world.

INTS 4382 Environmental Economics (5 Credits)
Course covers current environmental issues and topics, and their effects on the environment.

INTS 4384 Middle East and U.S. Security (5 Credits)
The course will examine current US strategies toward the Middle East, terrorism, and how Homeland Security in US will respond.

INTS 4386 Transnational Migration in the Americas (5 Credits)
The course examines movement of various nationalities from other nations into North, South and Central America.

INTS 4389 Global Water Resources (5 Credits)
Course investigates major water resource issues impacting developed and developing countries.

INTS 4391 Financial Management and Fundraising of Non-Profits (5 Credits)
This course will introduce students to the legal, governance and financial structures that enable non-profit organizations to function effectively. It will also provide a practical orientation to financial management issues, such as budgeting, financial reporting, and independent audits. Finally, a comprehensive presentation will be given of the fundraising methods needed to sustain the viability of non-profit organizations. These methods include: annual campaigns, direct mail, special events, major gifts, corporate fundraising, foundation grants, and planned giving. The course combines exploration of the general conceptual issues with an emphasis on practical "how-to’s" and skill building.

INTS 4392 Non-Profit Issues & Techniques (5 Credits)
Nonprofit management issues and techniques looks at current NGOs and issues in working with corporations.

INTS 4396 Education and Development (5 Credits)
Education is a major component of the human capital. It is both an indicator and a driver of an improved quality of life. Developed economies have already achieved high in terms of the average education of their populations. Most of the middle income and some low-income countries have also succeeded in enrolling a high percentage of their children in elementary schools, thanks to the internationally coordinated emphasis in this sector in the sixties and seventies of the last century. On the flip side, some of the developing regions are still struggling to provide basic education to a large share of their school age population. Research on economic growth and development has established a close connection between the economic performance of a country and the level of education of its population. These results have prompted a resurgence of focus on education in the global development agenda. From the Jomtien conference on Education for All (EFA) in 1990 to the Millennium Declaration, the world community has set targets on universal primary and gender balances at the higher levels of education. Despite the thrust on national commitment on education, supported by international efforts like the EFA/Fast Track Initiative, there still remains some inertia and uncertainties on issues like equity of access along different dimensions of deprivation - gender being an important one, balancing the demand and supply of education, the relative importance of basic education for capability creation and social cohesion versus mid-level education for knowledge diffusion or higher education for knowledge generation. Discussion of these issues in a regional comparative context is important in understanding and suggesting education policies for developing countries. This course is primarily intended for students who have a broader interest on human capital development, and specific interest on educational policies and their outcomes. Students with a general interest on development policies and developing economies would also find the course beneficial. It is expected that, after actively participating in the course, the students gather or enhance their understanding of the major education policy issues and debates in the context of developing countries. Students will also identify the best practices by analyzing the national education policies of some of the high performing countries and regions in the developing world. Students use this knowledge to examine the national and international education policy initiatives and develop their own recommendations as necessary.
INTS 4397 The Environment, The Economy, and Human Well-Being (5 Credits)
In this course we explore the role of the environment plays in society and the determination of human well-being. A core premise of the course is that the human economy is embedded within the broader context of human society, which in turn is embedded within a natural environment. The natural environment provides a variety of goods and services, which through interactions between the environment, individuals, and society, contribute to human well-being. Some of these services are directly used by people. Others contribute indirectly by allowing for the continued provision of other services. As such, any discussion of human well-being and development that ignores the natural environment is inherently problematic. We will specifically adopt an economic perspective, but one that goes well beyond that of conventional neoclassical economics. This course is intended to provide a basic foundation upon which students are able to build. Through the research paper and presentation, each student has the opportunity to explore in more depth an issue of specific interest to them.

INTS 4399 Issues in Global Economics and Financial Security (5 Credits)
The course discusses global economic and financial security issues through the prism of the current crisis and its aftermath. We begin by developing the analytical framework and they applying it to key countries/regions. We consider the causes, the policy responses and prospects. We look at ways of ensuring global monetary and financial stability, including appropriate policies to ward off financial crises and asset prices bubbles. Other key topics, including food and energy security and the role of finance in promoting development, are also discussed as time permits. The focus is on applied economics and finance, and their importance as analytical tools in policy discussions on economic security and development. This course is less narrowly technical, more policy and political economy oriented, but nonetheless appropriate for students concentrating in global markets, development, finance and trade. These are a few guest speakers on special topics, in addition to answering questions about career choices and professional development.

INTS 4403 Post-Communism Transition (5 Credits)
This course examines post-communist transition, the process of EU enlargement, and the prospects for integrating East and West. Europe’s recent transformation raises a number of critical questions concerning variation in democratic and economic outcomes across post-communist Europe, the relationship between democratic governance and free market enterprise, and the geo-strategic underpinnings for creating a sustainable peaceful European order. In keeping with these themes, the course will examine the literature on the politics leading up to the revolutions of 1989, study competing approaches to understanding transition, explain a wide variety of political and economic outcomes, and consider the prospects for enduring European integration in the aftermath of EU enlargement. Because the course poses several puzzles, we take an eclectic approach that draws on both the comparative politics and international relations literatures. In this connection, we address multiple dimensions of transition and integration - political, economic, and geo-strategic. Together, these readings and meetings will provide participants with a clear sense both of how individual states have fared in the transition and why, and the implications of continuing integration for the changing balance of power within Europe and globally.

INTS 4410 Economic Geography (5 Credits)
Course studies location and spatial organization of economic activities at local, national and global scales. Cross listed with GEOG 4410.

INTS 4420 Contemporary African Politics (5 Credits)
Examines socio-economic and political dynamics in states of sub-Saharan Africa.

INTS 4422 International Health Organizations and Actors (5 Credits)
This course introduces students to the international health "players." Weekly seminars provide an orientation to organizations such as the World Health Organization, bilateral organizations (e.g. USAID), health Non-Governmental Organizations (e.g. Catholic Relief Services), international health foundations (e.g. Bill and Melinda Gates Foundation), and transnational corporations, (e.g. pharmaceutical companies). As an organizational pedagogy, the course analyzes these organizations in the multiple contexts of the global, national, and local systems within which they operate.

INTS 4423 Introduction to Epidemiology (5 Credits)
Decisions and policy related to global health are based on data from various disciplines such as demography, medicine, and epidemiology. Therefore, it is crucial to correctly understand and interpret what health data and the data in general tell us. This course provides the knowledge and skills required to critically assess data, and understand both strengths and limitations of data and research. This course covers the basic principles and concepts of descriptive and analytic methods in epidemiology and their application to research and practice in public and global health.

INTS 4424 Global Health Challenges (5 Credits)
This course covers the current public health challenges that shape international policy and debate within the international health community and with which international affairs experts should be familiar. Weekly class sessions will address the public health benchmark issues of nutrition, access to safe water, maternal and child health, infectious disease control, and access to essential medicines, as well as other health issues that organizations like the World Health Organization have deemed imperative to securing the foundations of long-term economic development in some of the world’s most disadvantaged regions.
INTS 4427 The Political Economy of African Development (5 Credits)
This course introduces the political economy of sub-Saharan Africa (SSA). It uses a multidisciplinary approach that draws on literature from development economics, international relations, comparative politics, sociology, and anthropology, as well as a broad range of country case studies. Prior basic knowledge of economics is an advantage, but no quantitative economics are necessary. We engage with the main theoretical and empirical debates on macro- and microeconomic aspects of the subject and examine key concepts of economic development in relation to SSA. The topics covered include the determinants of growth, industrialization, education and employment, structural adjustment, poverty reduction, and the role of foreign aid in African development. We further explore the consequences of natural resources in SSA and the region’s integration into the global political economy, and examine the socioeconomic effects of war and the success of post-conflict policies for economic development. The political and social dimensions of historically specific economic development processes form a central focus of this course. The role of the state, post-independence and in Africa today, provides a common thread across the topics, and we critically assess the dominant theories and concepts of its development, using country case studies from across the region. Gender aspects of development are discussed as a crosscutting issue, with a particular emphasis on the relations between gender and macroeconomic policy, as well as poverty. The course helps students to understand the major development challenges facing African societies today by illuminating patterns as well as diversity across the region.

INTS 4428 Political Economy of Human Rights (5 Credits)
What does one mean by human rights? What can be the political economy of such rights? These are the two central questions that we will explore in this course. The goal is to understand the underlying social, political and economic processes that led in an evolutionary sense to the present human rights discourse. The nature and implications of economic rights will be given special attention. In particular, the implications of such rights for human wellbeing in both advanced capitalist and developing economies will be studied. The social capabilities approach to rights developed by Amartya Sen and others will be extended to the understanding of human rights.

INTS 4435 Health and Development (5 Credits)
Looks at how health status of populations affects culture and environment, and also how successful development affects health.

INTS 4436 Professional Ethics and International Development (5 Credits)
Course fills the gap in professional training at GSIS: surveys rise of professions, professional ethics, ethical principles, and examines applications of principles to international affairs.

INTS 4437 American Public Opinion & Foreign Policy (5 Credits)
This course examines American public opinion and its impact of foreign policy. The course begins with an investigation of what is public opinion in general and how it is collected, analyzed and used. The primary sources of American public opinion data and analyses are identified. The course proceeds to outline the controversies of American public opinion related to foreign policy decision-making using historical perspectives and the most recent challenges from the first Iraq War to the Arab Spring. Although foreign policy is often a secondary issue for the public compared to domestic issues, in recent times it has been mostly responsible for the transition from a Republican-dominated era to the Democrats’ ascendance. A series of principles that have informed practitioners and foreign policy experts concerning American opinion related to foreign policy is examined and affirmed or debunked. Also, media and its persuasive power in opinion formation are considered. At the conclusion of the course, students should be familiar with a selection of foreign policy challenges that America has confronted in the modern era, the role of public opinion in the national decision-making and the existence of guiding principles of public opinion and their exceptions.

INTS 4438 International Public Opinion and Foreign Policy (5 Credits)
This course examines international public opinion and introduces the major international opinion trends that impact foreign affairs. The course first reviews international public opinion worldwide, then by major regions and finally a selection of leading countries. The theoretical question is how public opinion influences foreign policy in countries around the world, and if and when it does, under what conditions. Also, how international opinion affects American foreign policy, including the views of foreign publics toward America and its policies, is also examined. The course begins with an investigation of the history of collection and diffusion of international survey research, the quality of the data and the techniques used to collect it. The relationship of public opinion research and democratic government and media freedom is examined. The second part of the course outlines some of the public opinion benchmarks, their variations and similarities among countries and regions, and their change over time. A variety of the best sources of opinion data are used. Benchmarks include: level of satisfaction with the direction of own nation; satisfaction with and preferences for form of government; satisfaction with and preferences for economic system, the role of government intervention and entrepreneurial values; nationalism and approach to neighbors; attitudes toward Americans, American leadership and foreign policy; and impact of cell phones and Internet on opinion formation and collection. The course's orientation is both from an American foreign policy perspective and from the perspective of key international organizations, such as the UN, OAS, EU, etc. At the conclusion of the course, students should be familiar with the history and sources of international public opinion research, the major similarities and differences in international and regional public opinion, and the impact that it has on both American and international, multinational organization foreign policy decision-making. When available, there are guest speakers concerning the impact of public opinion on foreign policy decision makers.
INTS 4439 East Asian Security (5 Credits)
One most significant geo-political development in the 21st century is the rise of non-Western powers centers. East Asia as one of the emerging power centers has been in many respects the most critical with respect to determining the basic international trends of our times. Tensions and conflicts in this region have been frequently transmitted to that of the international system. The Russo-Japanese War, the Sino-Japanese War, the Pacific War, the Korean War, and the Vietnam War provide classical examples. The great powers have drawn East Asia into their rivalries, because this region is where the geographic reaches of the United States, Russia (the former Soviet Union), Japan, and China come into contact, and it is where the great powers have vital political, economic, and military interests. The importance of East Asia in the international arena was also enhanced by the fact that the East Asia mainland is the home of more than one-quarter of the world’s population. The geographical proximity and economic vitality have brought about frequent conflicts of political, economic, and military interests of these great powers since the late 19th century. During the recent decades, East Asia has experienced a dramatic political transformation and led the world in rapid industrialization and commercial expansion so that this dynamic area has become one of the centers of the global distribution of political, economic, and military power. In particular, the rise of China is one of the most significant developments in the world politics of the 21st century. China’s growing power and influence in East Asia raises many important questions. This course examines the evolution of international politics in East Asia with a focus on the changing security landscape of this critical important region. We trace and explain how the great powers have risen and fallen and the changing security concerns in this region. Some current regional issues, such as the building of regional security architecture, ongoing Korean nuclear crisis and cross Taiwan Strait relations, are also addressed.

INTS 4447 Making of Chinese Foreign Policy (5 Credits)
This seminar course examines and analyzes the making of foreign policy in China, a rising power in the 21st-Century. We look at and identify major driving forces behind China’s foreign policy-making, including ideational sources (historical legacy, strategic culture, communism, and nationalism), domestic and institutional sources (foreign policy making institutions, elite politics and key players), and international sources (international system and regimes). We also examine China’s strategic relations with major powers and its Asian-Pacific neighbors. This course is aimed to equip students with sophisticated understanding of the ongoing debate about the role that a rising China has played and will play in world affairs.

INTS 4450 Democracy and Militarism in Latin America (5 Credits)
Many note that even as democratization has taken place throughout Latin America, there has been a persistent and evolving role for the military, police and private security forces in many cases. The purpose of the class is to explore this apparent contradiction by examining the various internal and external pressures that have come to bear on these societies. Through approaches derived from comparative politics and international political economy we study domestic factors such as interest groups, political parties, social movements and governing institutions on one hand, and the role of international relations and organizations on the other. From this standpoint, the state becomes a mediator of internal and external pressures and is shaped by these pressures in turn. In the first half of the class, we specifically apply institutions, political realist, class analytic and market globalization perspectives to the study of the military. In the second half, we look at the interplay between democratic development and security issues in a changing global environment. This includes a study of the nature of democratization in Latin America, so heavily applauded by scholars, politicians and others, the impact of the truth and reconciliation process that emerged after the bureaucratic-authoritarian era, and the role of civil society and international organizations. In the final part of the class, we turn to the issue of citizen security amid high levels of crime, gang activity, and drug trafficking with a focus on Central America.

INTS 4453 Political Economic Development in Latin America (5 Credits)
In the first five weeks of the class we consider various theories of political economy. These include dependency, hegemonic stability, class conflict, neoclassical economic theory, and the study of institutions and international regimes. Each approach is illustrated through and examination of a historic issue in development - patterns of land ownership, the role of the military, the rise or revolutionary politics, neoliberal development and the promotion of democracy. During this time, students are asked to choose a theoretical framework as a foundation for the required research paper. A term paper prospectus including a description of the framework is due week five. In the second five weeks of the class we consider specific topics in political economic development in the last three decades or what is often called the "global era." These topics include the emergence of "uneven" development, the rise of social movements and role of civil society, transnational migration, the rise of illicit networks of trade, and U.S. foreign policy considerations. Students are encouraged to draw from this or closely related material for the subject matter of the research.

INTS 4455 Human Rights and Health (5 Credits)
This course will address current socioeconomic and international issues in addressing growing health concerns and issues, particularly in impoverished areas throughout the world. Explores relationships between health, development and human rights for both legal and social science perspectives.

INTS 4460 Nationalism, Communism, and Liberalism in China’s Rise (5 Credits)
After more than a century of decline and stagnation, China is reemerging as a great power in the twenty-first century. China’s rise to the glorious has never been easy and still faces many changes in the year ahead. This course is designed to provide students with a comprehensive understanding of China’s rise in the context of its political development. We examine how revolution, nationalism, communism and liberalism have all affected the development of modern China with a focus on the political dynamics of the People’s Republic of China (PRC) and the politics of post-Mao economic and political reform. We start by analyzing the rise of the Chinese Communist Party and its state and nation building efforts in the early years of the PRC and move on to examine the Mao’s failed socialist transformation and political campaigns (the Hundred Flow Campaign, Great Leap Forward, and the Cultural Revolution). The remainder of the course explores political dynamics of post-Mao economic and political reforms and the prospect for a democratic China. This course aims at equipping students with an analytical perspective for understanding contemporary Chinese politics.

INTS 4462 Ethnic Conflict (5 Credits)
Deals with conflict within different ethnic groups in various countries.
INTS 4465 Population, Society, and Development (5 Credits)

Population can play a key role in defining the fates of societies, yet Auguste Comte's notion that "demography is destiny" has been subject to two centuries of oversimplification, misinterpretation, and manipulation. This course seeks to reverse key misconceptions and open up new avenues of inquiry through an in-depth look at the key elements of population - population size and growth, demographic events, and population structure - and their relationship to development, security, health, the environment, and human rights. The course begins with a look at theories on the relationship between population and the fates of societies from Malthus to Marx to the present day. In doing so, we move from thinking of population change in aggregate to considering the impact of three demographic events - birth, death, and migration - that occur according to highly measurable and predictable age and sex patterns. Armed with a powerful conception of demographic change as a product of population structures and events, we explore the implications of demographic shift and long-term demographic structures for national and global outcomes under a range of political, economic, and social conditions. We will use case studies to address salient issues such as the limits to the human life span; prospects for reversing or mitigating the effects of very low fertility; the consequences of coercive solutions to population control; prospects for global migration; and the impact of HIV/AIDS on society.

INTS 4468 Politics of Development (5 Credits)

Course explores political factors and parties which affect developing nations and hinder new development.

INTS 4479 Development Assistance: Policy, Theory, and Practice (5 Credits)

Understand basic theories of economic development. Ask why certain countries/areas have achieved economic success and other have failed. Understand how overall U.S. Foreign Policy has shaped the practice of development assistance, and how this has changed since the 1950s; understand the principle drivers of development assistance. How have these changed and how these have changed from the Marshall Plan to the present? Assess why foreign assistance is important. How it worked? How and when? Where has it failed? Is there a link between development assistance and economic growth? Looking ahead: How will foreign assistance change in the next decade? What reforms are likely and desirable? While we examine foreign assistance in general, the focus of these lines of inquiry is U.S. foreign assistance.

INTS 4483 Practical Applications in Global Health (5 Credits)

This course is designed for students interested in a career in Global Health with a focus on low resource settings including humanitarian settings. This course focuses on analyzing and developing solutions to global health problems in a systematic and creative way. Students are introduced to a problem-solving paradigm and, working in small groups, apply this model to a global health issue of interest to them. In addition, we cover other critical issues that need to be considered in addressing global health issues including equity, social determinants, and health systems as well as leadership, innovation and working in multidisciplinary teams. At the completion of the course, students should be able to: apply a methodical approach to problem solving in global health; analyze the range of factors that contribute to global health problems and understand the importance for finding solutions; examine critically the implications of policy or programmatic solutions to global health problems; develop and present a program proposal.

INTS 4484 Agriculture and Sustainable Development (5 Credits)

This course provides an overview of world agriculture and an introduction to agricultural populations, politics, policy paradigms, and institutions. It contain modules in: the history of agricultural production for economic growth and food security; global distributions of (1) agricultural production regimes, (2) land (including historical and contemporary “land grabs”) and other productive factors, and (3) uses of agricultural products for food, fuel, feed, fiber, and agro-based construction materials; effects of agricultural trade on economic growth, livelihoods, and food security; relationship between humanitarian food aid and agricultural production and food security; social organization of agriculture and related productivity and human development issues, with special attention to gender; environmental constraints to agricultural sustainability and agricultural constants to environmental sustainability (climate change, water demands and conversation, agricultural energy production and consumption, causes of soil loss and degradation); technological change and innovation in agriculture; and culture and agriculture.

INTS 4485 International Economic Negotiations (5 Credits)

The purpose of the course is to explore the challenges confronting international trade and economic policy, as well as current negotiations designed to address these circumstances.

INTS 4489 Development in South Asia (5 Credits)

This course will focus on the issues, challenges, barriers, and opportunities for achieving development in South Asia. South Asia is home for a rich diversity of natural resources, social and cultural heritage, micro-climatic zones, bio-diversity, multi-ethnicity, multi-linguistic people groups, and political and economic systems. This course will help students to appreciate and understand how this diversity has been both a boon and a barrier for achieving human development including increasing economic growth, reducing poverty and income inequality and other forms of inequalities, promoting human rights, and empowering women. Although South Asia has had its own long history of civilization, it is no more isolated from the expanding wave of globalization. In this course, students will explore and research ways in which this region has been adapting and changing in response to this wave of globalization. Students will have an opportunity to research and analyze how this rapidly changing South Asia will emerge as an active player in the global political and economic development and contribute in achieving global peace, prosperity, and security.

INTS 4492 Health and Humanitarian Aid (5 Credits)

This course aims to examine current organizational standards such as the Sphere Project, best-practice scenarios from ICRC, IRC, MSF and many other humanitarian organizations, and lessons learned from recent and historical humanitarian crises. Utilizing a case-based and problem-based format, students will gain and apply knowledge through critical examination of issues and development of practical solutions.

INTS 4493 Humanitarian Aid in Complex Emergencies (5 Credits)

This course will focus on the evolution of humanitarian actions, in the context of the international system, since World War II. Complex humanitarian emergencies will be the focus. Themes will include: disasters, conflicts and humanitarian action; the political economy of conflicts and humanitarian aid; civil-military cooperation; and the impacts of humanitarian intervention on the delivery of aid. Vulnerability analysis, capacity analysis, and risk analysis will be key tools. The structure and function of EWS (early warning systems), especially in the context of famine, also will be key.
INTS 4495 Civil Wars and International Responses I: Causes and Consequences: Prevention and Peacemaking (5 Credits)

Throughout the post-cold war period and into the 21st century, the scourge of war today is seen in mostly internal conflicts fought along ethnic, religious, ideological, or economic lines that divide societies and lead to devastating armed conflict. This course investigates the problem of contemporary civil wars. This course explores theories, concepts, and empirical research in the analysis of contemporary civil wars and in-depth, student-led evaluation of specific cases. The course covers these themes: evaluation and patterns of armed conflict and war termination in the 1990s and early 2000s with a focus on methods for systematic, multi-causal conflict assessment methodologies; exploration of the processes of escalation in armed conflict and of concomitant peacemaking by international mediators; and evaluation of the concepts of "peace processes" and scrutiny of the terms of negotiated settlements in armed conflicts today. The principle learning outcomes for the course is to gain a complex and detailed understanding of the modal form of contemporary armed conflict-civil wars and concomitant international intervention by the international community (particularly the United Nations) to this form of armed conflict. Students who successfully complete the course gain an understanding of contemporary civil wars, issues in conflict duration and processes of war termination, and introduction to the scholarly and policy-relevant literature that has developed in the last two decades related to challenges of conflict prevention and of "peacemaking" or negotiation and mediation of civil war conflicts.

INTS 4496 Field Operations for Humanitarian Assistance (5 Credits)

Within a disaster response, various interrelating factors determine the ability of the humanitarian community to adequately respond. From coordination among governments, donors, non-governmental organizations (NGOs) to internal working components within an agency that drive programmatic support, the realm of humanitarian operations is a complex system that should be understood by anyone with an interest in supporting relief efforts. The main focus of this course is concentrating on the practical, specific systems that drive field operations - namely security, logistics, finance, monitoring and evaluation, human resources, administration, and advocacy that support program planning and implementation. Through understanding these components, the challenges that are encountered, and how each interrelates within an organization and the wider response community students gain a balanced understanding of humanitarian operations. While each emergency response comes with varying contextual challenges, the humanitarian imperative mandates the relief community to respond in a neutral manner based on need. Doing so, places strains on the operational systems that need to be overcome to provide quality interventions. Through this course we take an in depth look at both theoretical and practical ideals for humanitarian assistance.

INTS 4497 International Campaign Management (5 Credits)

This course will examine the principles of political campaign management and their application in a number of international political, public affairs and human rights campaigns. It will be an introduction to the tools of political campaign management: message development, survey research, audience targeting, paid and earned communications, fundraising and organizational structure. Case studies of campaigns in countries such as Sweden, the UK, and Australia will be used as examples of these techniques. Class will be comprised of lectures, discussion and some simulation exercises. Efforts will be made to bring outside specialists and experts to the class or by teleconference. Readings may include contemporary journals, periodicals, newspaper reports and excerpts from major studies of campaign and organizational management.

INTS 4498 Community, Networks, and Place in Health and Development (5 Credits)

The aim of this course is to explore global health challenges and solutions from the perspective of community and networks. Faculty presentation, global field exemplars, active participant dialogue, and students’ presentations comprise the teaching-learning strategies.

INTS 4499 National Security and Defense Transformation (5 Credits)

Change brings with it challenges – at the individual, organizational, and systemic levels. It involved behaviors and cultures with often deep-seated traditions. This course explores the scope and magnitude of the transformational forces at work in our national security and defense establishments. By its nature the course is about warfare – how the nation goes about the business of preparing, equipping, and training itself to deter and if necessary to fight traditional wars and the new kinds of challenges that might lead to armed conflict. It is also about sociology, bureaucratic politics, the role of the media, economics, healthcare, power....

INTS 4500 Social Science Methods (5 Credits)

This course focuses on issues and techniques in qualitative research methodology. This is not just an abstract course about competing conceptions in the social sciences. It is an advanced course in the practical matters and issues that underpin all research activity. It provides students with the essential basic training they will need for critically analyzing political and social science research conducted by others and, most importantly, for engaging in their own research design and prospectus and dissertation writing. For those Ph.D. students already advanced in their own research, it will allow for a critical evaluation of their own research designs and strategies. The course covers the following topics: what is a question or ‘puzzle’ in political and social science; what makes a research project feasible; causation and explanation in social science; causality and casual inference; the quantitative-qualitative debate; theory, concepts, operationalization and measurement; concepts and concept formation; the comparative method; case-oriented versus variable-oriented comparisons; identifying dependent, independent and mediating variables; selecting cases and establishing an explanation; conducting case studies; problems of selection bias; the importance of skepticism and rival hypotheses; research design and the classics: Barrington Moore, Tocqueville, Skocpol.
INTS 4501 Comparative Politics: States and Societies in the 21st Century (5 Credits)
This is a core course in the Graduate School of International Studies curriculum; it is designed to provide a basic foundation of knowledge essential to expertise in contemporary international affairs. The course critically explores theories, approaches and research methods for analyzing political processes within countries and societies around the globe. The point of departure is new approaches to governance - a term that refers to how governments and societies interrelate to manage social problems in the globalized 21st century. Why is the "inside-out" perspective of comparative politics so important to today's interdependent world? How do domestic social forces interact with political institutions and how do these interactions affect prospects for democracy, development, and conflict management? Which emerging theoretical approaches offer the most explanatory power in today's rapidly changing world? Through readings, instructor presentations, guided discussion, and multimedia curriculum resources (including an Internet-based module) the curriculum facilitates a broad overview and critical assessment of the current state of comparative politics. We explore how cutting-edge comparative politics research offers us bedrock theoretical and methodological skills for interpreting contemporary international affairs and for making policy prescriptions. Pedagogically, learning is encouraged through assignments and exercises designed to improve students' practical skills to interpret research findings and apply them to current events and policy concerns. Another feature is the extensive use of case studies to illustrate concepts and theory in today's most intriguing societies. The knowledge base gained in this class enables students to undertake more advanced graduate-level study in a wide range of topics such as development and international political economy, human rights, democratization, ethnic conflict, environmental politics, public policy, and contemporary problems of war and peace in deeply divided societies.

INTS 4502 Comparative Revolutions (5 Credits)
An intermediate course focused around the major revolutions, that occurred in England, France, 19th century Europe, and in Russia and China during the 20th century. Emphasis is placed on historical facts, key theoretical debates generated during the various social upheavals, and diverse interpretations seeking to understand the nature and causes of revolutions and their impact on societies. Prerequisites: INTS 4702.

INTS 4511 Population and Health (5 Credits)
This course will take a theoretical and empirical look at all aspects of the intersection between population and health. The course will address the power of demographic analysis - in terms of demographic patterns of disease and demographic composition of populations - can be used to understand levels of health and disease and to draw inference about program and policy effectiveness. It will look at the general role of demographic outcomes (birth, death, migration) and population growth as cause and consequence of societal patterns of health and development. Finally, it will address the specific health consequences of the reproductive process as well as the continually evolving relationship between policy and discourse that are driven by concerns over population, life-course health, reproductive health, and women's rights.

INTS 4512 Ethics in Development, Health, and Humanitarian Assistance (5 Credits)
William Butler Yeats wrote, "in dreams begins responsibility." Dreams and an imagination as to what life could be underpin ideals of development, health, and humanitarian assistance. When one confronts the world such as it is, one needs to determine what s/he feels reality could become and work to make it so. But in attempting to realize such dreams come a responsibility to act based on a set of values or ethics. These ethics guide the perception of right and wrong, black and white, which in turn dictate action. They may be legally codified as rules or remain principles which operate in conjunction with, or in opposition to, the law. This course is designed to prepare students to proactively identify personal and professional values across different actors and institutes, to assess the ethical basis of actions and programs, and to build project management strategies based on shared values.

INTS 4514 Population, Environment, and Development in Latin America (5 Credits)
This course engages the complex and interlinked dynamics of changes in population, systems of production, and the physical environment. Navigating among scales from global to local, we examine the interactions of trade regimes, markets, natural resource tenure systems, migration, livelihoods, technologies, health, and natural resource stocks. Taking a political ecology perspective, we will interrogate the distributions of wealth and power that affect control of natural resources, human well-being, and environmental sustainability. We also investigate the multiple social and cultural meanings of "natural resources" to actors who are variously positioned in terms of class, ethnicity, and gender. These dimensions of the population/environment/development nexus are examined for the following sectors: water conflicts and watershed management in the Andes; colonization, cattle, and energy development in the Amazon; non-traditional agricultural exports and aquaculture development in Central America; and forests throughout Latin America.

INTS 4515 19th-Century Political Theory (5 Credits)
This course explores the impact on political theory in the 19th-Century. The focus is on reading the main authors whose work reshaped political theory in response to the emergence of capitalism: Smith, Hegel, Marx, and Mill. The emphasis in the course is on the way in which debates over market economy begun during this period continue to shape thinking on the vital issues of political theory and the design of political institutions, issues such as: equality, inequality and poverty; the consequences of economic growth; the ethical meaning and significance of individual choice; the importance of a vibrant civil society; the implications of the liberal ideal of individual choice; the importance of a vibrant civil society; the implications of the liberal ideal of individual self-determination; and the debate over the role of government in securing welfare.
INTS 4516 Major Diseases in Global Health: From Pathophysiology to Action (5 Credits)
As future global health practitioners and policy makers, it is imperative that we each have a complete and solid understanding of the mechanisms, physiology, epidemiology, transmission patterns, and clinical impact of the major diseases affecting global health. How and when does a person transition from simple HIV infection to full-blown AIDS? Why is dracunculiasis so readily amenable to eradication whereas filariasis is not? For what populations is co-infection with HIV and TB or HIV and malaria so critical and why? On the individual patient level, how and why do certain diseases manifest so differently in resource-poor versus resource-rich or urban versus rural settings? Who are the vulnerable populations and how does disease impact them physiologically? When and where would specific program interventions work over other programs and for whom? In this course, the students develop an understanding of the etiology, agents, vectors, burden, methods of detection, basic treatment complexities, and life cycles of major diseases impacting the world. Specifically, this course details HIV/AIDS, TB, malaria, maternal/reproductive health, some protozoa, helminthes, and major parasites, chronic disease such as cancers and diabetes, and violence/trauma. As there is no shortage of amazing and interesting diseases globally, students learn a sound method of inquiry with which to address and disease process. Students also apply this method directly toward program analysis, and in the development of teaching sessions for community health workers.

INTS 4517 Politics of Deeply Divided Societies (5 Credits)
This course focuses on the politics, conflicts, and conflict transformation approaches to deeply-divided societies. While ethnic, religious, and other types of communal conflict have been around for millennia, since the decline of colonization, and especially since the end of the Cold War, such struggles seemed to have exploded onto the world scene. This course focuses on these "contemporary" ethnic, religious, racial, and other communal conflicts to better understand why and how such conflicts develop. We then examine both theory and practice on what can be done to ameliorate or remedy them. Units focus on the nature of identity and identity politics; the use of political violence to pursue identity or nationalistic goals, and nonviolent approaches to identity conflicts. We then look at alternative political and conflict-transformational approaches to such conflicts including frameworks for living together (such as consociationalism, federalism, and power-sharing), and scenarios for separation (partition or succession). We also look at the negotiation, mediation, and other peace processes that have been utilized to try to accomplish such ends, and examine which have worked better than others and (to the extent possible) why. Readings will include both case study and theoretical material. Students are required to make several short class presentations, participate actively in discussions and exercises, and prepare and present a term paper analyzing one currently destructive deeply-divided society, analyzing the cause of the current unrest, and possible remedies to that situation.

INTS 4521 International Development in Cross-Cultural Perspectives (5 Credits)
Explores cultural dimensions of economic and social change from perspectives of actors who create, promote, negotiate, and resist different agendas from global to local.

INTS 4522 Philosophy of Social Science (5 Credits)
What is the nature of social science and the knowledge that it produces? This course, which is intended to complement INTS 4500 Social Science Methodology and INTS 4010 Epistemology, introduces students to the leading mainstream perspectives on the philosophy of social science. Special attention is given to Positivism and Post-Positivism, Post-Structuralism, Pragmatism, and Scientific Realism.

INTS 4523 Islam & Democracy in the Middle East (5 Credits)
Following September 11, 2001, Islam's relationship to liberal-democratic politics has emerged as one of the most pressing and contentious issues in international affairs. In light of the Bush Administration's desire, at least rhetorically, to promote democratic regime change in the Middle East, the question of Islam's relationship to democracy is likely to remain a pressing topic for debate. This seminar course is dedicated to a critical examination of this topic. The focus is on examining the theoretical relationships between Islam, Muslim societies and liberal-democracy. The first half of the course examines the scholarly literature on the points of compatibility and friction between religion and democracy. In the second part of the course, we examine the academic literature and the major debates on Islam's relationship with liberal-democracy. The debate on secularism and its discontents in the Middle East will be thoroughly explored. With time permitting, through the use of case studies, we study "real world" deterrents to democratization and liberalization in Muslim societies.

INTS 4524 Introduction to Middle East and Islamic Politics (5 Credits)
This course is designed for students without a background in the politics or history of the modern Middle East. Beginning with the study of colonialism and imperialism in the region, we then shift to a study of the emergence of the modern Middle East state system. Then the third theme of this course explores political ideologies, both secular and religious. The final section of this course will briefly explore the theme of democratization and its discontents in the Middle East. The focus is on recent debates about democratization that have been promoted from outside the region as a means of combating tyranny within the region, particularly the perceived anti-democratic nature of political Islam. This section includes a review of current analysis of democratization. The argument for how is that some theorists relating to the culture of receptivity to ideas about democracy which are largely Western in inspiration and practice.

INTS 4525 Religion and State in Comparative Perspectives (5 Credits)
This seminar course provides an introduction to the key readings, concepts and debates on religion-state relations. While the focus is on the Western political tradition we explore the case of India and the Islamic world at the end of the course. Themes such as freedom of belief, the role of religion in the public sphere and debates over the political construction, location and meaning of secularism are examined.

INTS 4526 Modern Islamic Political Thought (5 Credits)
This seminar course explores the key writings of Muslim thinkers who have shaped Islamic political thought during the 20th Century. We begin with the writings of Jamal Eddin Al Afghani and his Egyptian disciple Muhammad Abduh. We then proceed to read from the selected writings and speeches of Hassan al-Banna (founder of the Muslim Brotherhood), Sayyid Qutb (radical Egyptian Islamist theoretician), Adul Ala Maududi (Pakistani Islamic thinker and founder of Jamaat-i Islami) and Ayatollah Ruhollah Khomeini (leader of Iran's 1979 Islamic Revolution). We also investigate some of the writings of Islamic reformist thinkers such as Abdolkarim Soroush, Nasser Hamed Abu Zayd and Khaled Abou El Fadl. The emphasis in this course is on understanding the historical and political context which has shaped Islamic political thought during the 20th Century.
INTS 4527 Women in Islam (5 Credits)
This course focuses on the role that a religion plays in shaping its followers' socio-cultural identities on the basis of their natural/physical differences, i.e. men and women. The central argument of the course is that to understand a set of beliefs and practices regarding gender relations and women's status in any religious group, one needs to examine the historical context and socio-economic bases of that particular religion. By using gender and feminist discourse as a tool of analysis this course intends to understand and explain existing perceptions, misperceptions, myths, and realities regarding Muslim women's lives in the past and present. This course begins with a historical materialist explanation of the religion of Islam and examines women's roles, rights and responsibilities as described in the religious texts, interpretations, traditions and historical sources such as the Quran, Hadith, Sunnah and Shariah. This course revolves around three major questions: what does Islam say about the roles, rights and responsibilities of Muslim women and men in its texts and teachings? How have Muslim states and communities applied original texts and early teachings while determining gender roles, rights and responsibilities over time? Why do many contradictions and variations exist in the application of the texts and teachings of Islam regarding women/ gender issues across the Muslim world today? It is expected that this course will enable students (a) to acquire knowledge of the historical contexts, textual teachings and actual practices related to women's lives in the present world of Islam; (b) to analyze existing situations and current practices regarding gender issues among Muslim communities; and (c) to compare various scholarly inquiries, feminist discourses and dissident voices of Muslim women emerging in local, national and global contexts.

INTS 4534 Topics in Middle East Politics (5 Credits)
The 2011 Arab Spring is widely viewed as a turning point in the modern politics of the Middle East and North Africa. Longstanding authoritarian regimes and dictators have fallen while others cling to power in the face of popular protests. The region is headed for uncertain waters with Islamist parties on the ascendance, liberal and secular forces struggling to assert themselves while a Western world watches these developments with a combination of hope, concern and consternation. This course is devoted to examining the Arab Spring revolutions and more broadly the changing politics of the Arab-Islamic world. We do so by collectively reading one book per week on the Arab Spring and other situations in the Middle East. Specific themes that are analyzed include the legacy of authoritarianism, the process of democratization, religion-state relations, the role of external powers and the transformation of Islamist politics. Part of the course looks at how these books have been reviewed both in intellectual and scholarly journals. This class is designed for students who seek a deeper grasp of the Middle East and a more refined understanding of the politics and history of this region. This is not an introductory course on the Middle East, Islam, or the Arab world and previous course work is assumed. Those uncertain about their status should consult with the instructor before enrolling.

INTS 4536 Economic Fundamentals: Global Applications (5 Credits)
This course provides an introduction to the methods used to analyze contemporary global economic events by examining the environment in which individual economic agents interact. We analyze what the economic problem is, how consumers and business firms make economic decisions, how markets work and how they fail, and how government public policy decisions affect individual and aggregate behavior in both domestic and international markets. A special feature of the course is the application of economic principles to real world problems.

INTS 4539 Food Security in the United States and the World (5 Credits)
This course discusses: food security in the United States (community food security, food insecurity); stunting and chronic nutritional deficiencies; global water crisis; land degradation; land deals; climate change; dictatorship and kleptocracy; economic approaches (westernized view, food justice, food sovereignty); World Food Summit; achieving food security (the agriculture-hunger-poverty nexus, biotechnology for smallholders in the (sub)tropics); risks to food security (fossil fuel dependence, genetic erosion in agricultural and livestock biodiversity, hybridization, genetic engineering and loss of biodiversity, price setting, treating food the same as other internationally traded commodities); access to basic food supplies; infant feeding; determining nutritional status; supplementary feeding; therapeutic feeding; malnutrition, nutrient requirements and sources.

INTS 4542 International Criminal Tribunal Law & Practice (5 Credits)
The International Criminal Court and the various ad hoc tribunals such as the International Criminal Tribunal for Rwanda and for the former Yugoslavia prosecute a unique and evolving set of international criminal laws designed to end the impunity of military and political leaders engaged in mass violence. The tribunals' mandate is to prosecute violations of a discreet set of laws including war crimes, genocide, grave breaches of the Geneva Conventions and crimes against humanity. Along with related domestic prosecutions, ICL is evolving rapidly. Its history is fascinating, beginning with the proposition that even in the context of the most violent of clashes, some humanitarian standards exist and violators should be held accountable. The post-World War II precedent of the Nuremberg trials was the basis of the creation of ad hoc war crimes tribunals for the former Yugoslavia and Rwanda, which themselves led to hybrid courts such as the Bosnia War Crimes Chamber, the Extraordinary Chambers for Cambodia and the International Criminal Court. In addition, many national jurisdictions have enacted enabling legislation that provides in domestic courts the jurisdiction to prosecute these crimes. This course explores the origins and development of ICL, their elements, the dilemmas ICL presents for enforcement, sovereignty, justice and political efficacy. Students pursue questions about ICL in the context of concrete cases.

INTS 4543 Religion and International Studies: The Apocalyptic Tradition (5 Credits)
The relationship between religion and international politics is an important and understudied topic. For year, religion was, at best, a handmaiden to international relations as scholars focused on state actors only. Since 9/11 this has changed in dramatic fashion because of the rise of radical Islam, the importance of the religious right in the United States and its role in Middle East politics, and a growing awareness of how religion can divide populations within states and in many regions of the world. This course begins with an evaluation of the thousand year history of religious conflict before 1648 when faith and international politics were inseparable. We study the struggles between Islam and Christianity as well as “heresy” in both of these religions which lead to events like the Protestant Reformation. We explore the role of religion in politics from the eighteenth to the twentieth centuries and conclude with readings on such topics as suicide bombing, shifting religious values, demographics, and projections on how religion will shape international politics in the 21st century.
INTS 4544 Classics in Comparative Politics: Weber and Durkheim (5 Credits)
The works of Emile Durkheim and Max Weber are the basis for most 20th century social theory in the non-revolutionary (post-Marxist) tradition. The two thinkers are in many respects rivals in their attempts to comprehend industrial capitalist society in the generation after Marx. The larger context is the whole developing tradition of modern social theory going back to Hobbes, Locke and other 17th century theorists. This course consists of intensive reading of the works of Durkheim and Weber, some reading about them, about the emergence of sociology as a discipline, and about how social theory illuminates the broader discourse of political theory and comparative politics.

INTS 4545 Disaster Logistics for Humanitarian Assistance & Security (5 Credits)
Domestic logistics integration including local, state, and federal levels, including basic understanding of military capacity. Case studies of international disaster to highlight specific logistical issues, e.g., Hurricane Katrina for coordination/communication amongst agencies, Southeast Asia Tsunami for special populations and cultural issues, Pakistan earthquake for civil-military cooperation regarding logistic supply and delivery, or Darfur for special issues of logistics during ongoing conflict. International organizations and organo-grams regarding logistics and operations, including UNJLC, OCHA, HIC, and various other agencies. Hands-on practical exercises utilizing computer simulations and/or "sand table" demonstrations of mock events. Specific issues such as: storage and warehousing, supply and transportation, distribution, procurement, fleet management, and security.

INTS 4546 Economics of Climate Change (5 Credits)
Climate change and climate change policy will affect every facet of life on Earth. From fossil fuels, to livestock production, to crop and forestry practices - human activity generates greenhouse gases. This course examines issues related to global warming and policies to abate, or adapt to, climate change. These include: modeling economic impacts of climate change, evaluating alternative analyses of climate impacts (e.g. the Stern Review, Nordhaus, Lomborg), evaluating the experience of the ETS (European Trading System), issues in the architecture of a U.S. cap-and-trade system, climate policy and leakage (trade impacts), the Green Development Mechanism (linkages with developing countries), impacts on developing countries, the potential for environmental migration, climate change and equity, food production and emission of greenhouse gases.

INTS 4547 Obama Foreign Policy (5 Credits)
This course studies the Obama Administration's approach to foreign affairs and details the extent to which the United States has become a nation in newfound waters internationally. Our scope does not limit itself to only those trouble spots around the world, but also includes the numerous allies that we become so reliant upon, as well as those we have forged newer relationships with. Students are exposed to various guest speakers and outside material in addition to texts and classroom discussion; and experience what encompasses the makeup of this Administration's foreign policy, from a front row seat.

INTS 4549 Managing Microfinance: Balancing Business with Development (5 Credits)
This course builds on the topics in "Introduction to Microfinance" and delves more deeply into the challenges of managing microfinance institutions (MFIs) and effective social entrepreneurship. How do MFIs make sure they stay in business (with good risk management and financial management) and make sure they have real social impact? How can they innovate financial services and other market-based solutions that create lasting economic opportunity or social change? Whether a market-oriented NGO or a socially-motivated business, an MFI needs a clear development strategy, a clear business strategy, and the operational tools to implement both strategies well. Regardless of legal structure, both NGO and for-profit MFIs need good management and financial information to meet both sustainability and social goals. Whether used for poverty alleviation and or banking services for the poor, there are shared characteristics among successful microfinance organizations, as well as common pitfalls and challenges. As organizations figure out the "business" side of providing loans and savings, they also need to figure out which development services have greatest benefit for clients, choose strategies for social change (e.g. basic education, health care, business skills), and assess how well those strategies are working. For example, large-scale MFIs in India and Latin America have been very successful financially, but have only recently focused on their social impact. Smaller NGOs may serve the poorest and provide many development services, yet struggle to find a viable business strategy and sustainability. MFIs share challenges faced by many development organizations: (1) How do we balance our financial and impact goals; (2) How do we choose where to invest resources for greatest impact (e.g. financial services for many or in-depth assistance for fewer?); (3) What information do we need to ensure financial transparency and accountability; (4) How do we assess social and financial performance to keep improving our business strategies? This class will use weekly readings and case studies of specific microfinance organizations to: Illustrate business challenges and specific business risks in microfinance; Review basic financial statements and key financial measures to assess financial performance and risk, for both for-profit and non-profits; Review different approaches to answering the question "are we making a difference?"; Analyze management situations of "too much profit" and "too much development"; Compare pros and cons of for-profit and HGO legal structures, and implications; Discuss governance and boards of directors, compare and evaluate approaches; Highlight examples of social entrepreneurship powering market-driven change in microfinance and other areas (mobile banking, small-scale solar electricity, etc). Cases include Adelante Foundation, BRAC, Fonkoze, Kenya Women's Finance Trust, ACCION's Center for Financial Inclusion, and others. The first half of each class focuses on a real MFI case study to highlight the issues and understand the topic; the second half on the financial implications of these risks, the financial principles involved, and how well the tools work. Students gain a better understanding of financial statements, MFI operations (with case studies from around the globe), and credit risk, as well as key principles of financial management and good governance that apply to any non-profit or social business. Recommended prerequisite: INTS 4339.

INTS 4555 Professional Communications (5 Credits)
INTS 4557 Cross-Cultural Communications (5 Credits)
This course is designed to prepare graduate students for careers as international professionals by focusing on the cultural factors that influence communication in international relations as well as the rules that proscribe and prescribe behavior. The course emphasizes culture and will explore how different cultures: perceive and interpret their surroundings, and create and communicate a shared, cultural construct of reality and identity; develop unique communication rules; and evolve culture-specific verbal and non-verbal communication behaviors. Students will immerse themselves in a particular culture (its history, values, world views and associated thought processes, religion, gender and social perception, language, and nonverbal communication) and research its communication conventions, practices, standards, core metaphors, terms, cultural premises, and meaning systems. Students are expected to demonstrate a critical and informed awareness of cultural content and identity, as well as the communication imperatives and procedural issues in their country through class presentations, discussions, and a long paper. The course rationale is that cross-cultural communication is inevitable, and without an understanding of the cultural communication imperatives, it is very difficult, virtually impossible to understand, work with, manage, or influence individuals from another culture. The course will involve theory and proven models, but will primarily focus on cultural immersion, skills development, practical applications, and case studies—exploring how culture both influences and reflects communication dynamics, how to communicate effectively in a multicultural environment, and how to manage and resolve cross-cultural conflicts.

INTS 4560 Global Change: Issues/Dynamics (5 Credits)
Significant forces reshape the socio-political world much like tectonic plates restructure the geological world. These include the Information-Communications Technology (ICT) revolution and other technological change, the demographic/agricultural transitions, financial globalization, the energy transition from fossil fuels, atmospheric carbon build-up, reshaping of value systems, and global democratization. Serious analysis of global affairs requires an understanding of these forces, the primary issues to which they give rise and the debates over country-specific and multilateral policy responses to those issues. This course surveys key forces and provides analytical tools from a broad range of disciplines to facilitate better understanding of them and the central dynamics of their interaction. It maps key issues and policy environments.

INTS 4562 Millennium Development Goals (5 Credits)
The MDGs focus attention of the global dev. community, with targets such as: poverty reduction, education and literacy needs, safe water, etc.

INTS 4563 Crisis Management & Communications (5 Credits)
This course is designed to prepare graduate students for careers as international professionals by teaching the management and communication skills and processes required before, during, and after a crisis. Students will learn how to respond to and manage crises such as: outbreaks of armed hostilities, terrorist attacks, operational accidents, critical technology events, workplace violence, environmental controversies and events, fraud and extortion, workplace harassment, competitive market assaults, punitive regulation/legislation, organized protests, religious/ethnic/political riots and incidents, serious service/product safety challenges, media exposes, adverse litigation, and catastrophic events (force majeure). According to nearly 90% of international CEO's and NGO Executive Directors, Crisis Management (CM) and the Crisis Management & Communications Plan (CM&CP) are essential and integral components of any organization's comprehensive management system, regardless of its size, nature, or location. In the current international environment, these components are imperative and involve establishing and administering processes and teams that anticipate, prevent, and resolve threats to the organization's personnel, mission, property, image, or survival. Though including theory (basic risk, contingency, and management theory), the course is primarily an applied, practical approach, one that addresses the extremely difficult challenges faced by organizations operating internationally. Students will work singly and in collaborative teams. All assignments will include written components; some will include oral presentation; most will involve cross-cultural issues. Students will demonstrate their understanding of Crisis Management & Communications by creating a comprehensive Crisis Management and Communications Plan for an organization.

INTS 4565 Advanced Quantitative International Political Economy (5 Credits)
The main purpose of this course is to understand critically some of the formally conceptual and quantitative papers in International Political Economy (IPE) and international economics. After a review of some basic theories, the course focuses on a selected list of classic and recently published papers in these fields. The basic requirements are familiarity with the fundamentals of international political economy and economics. At least Statistics II (INTS 4051) level knowledge of statistics is required.
INTS 4566 Global and Sustainable Development (5 Credits)
In recent years, the issue of sustainable development has received considerable attention from academia, governments, and international organizations. Of particular concern are countries that are heavily dependent on the export of commodities. Can sustainable development be achieved by such countries? Chocolate (cocoa) and coffee are not only among the world's most popular little pleasures, they are also among the most traded commodities. Originating in Latin America and Africa respectively, their global diffusion has influenced the culture, society and politics of developed and developing countries for decades and continues to do so today. Coffee exports (the primary source of foreign exchange for many poor countries such as Ethiopia) are valued at about 9 billion annually. 25 million people in Asia, Latin America, and Africa struggle to earn a living through coffee production, it too is a major source of income for many countries in Latin America and West Africa. Yet, many problems have been identified such as farmers unable to earn a survival wage, the exploitation of child labor, and the damage that production processes inflict upon the environment. In short, these important commodities are apparently contributing little to sustainable development. Various organizations and individuals are involved in efforts to change this situation by promoting the establishment of specialty, organic and fair trade coffee and chocolate products. The degree to which these efforts can help turn the existing situation around remains unclear but the lives of millions of people and the future of many countries hangs in the balance. This seminar is designed to address such issues. We explore the meaning of sustainable development and consider the nature of globalization and the ways in which it has shaped the cultivation and consumption of coffee and chocolate over time. In order to understand this linkage, we utilize the concept of the "commodity chain", an approach that allows us to conceptualize the nature of the international linkages, their key nodes, the distribution of power, and the ways in which external factors influence a country's development efforts. The course is divided into three parts. In the first, we cover the basic concepts and seek to answer such questions as: 1) How have the coffee and cocoa commodity chains been shaped by globalization? 2) What has been the role of key actors - producers, local traders, governments, and multinational corporations - in shaping production and consumption patterns over time? In the second part we consider three basic forces that have shaped the commodity chains - the state and its policies, culture and consumption patterns, and entrepreneurs and technology. Here the questions are: 1) How have the policies of producing and consuming states affected the commodity chains? 2) How have changes in consumption patterns reflected in the growth of Starbucks influenced the situation in developing countries? 3) How have external technologies such as transportation and communication technologies as well as internal technologies such as instant coffee changed the chains? In the third part, we focus explicitly on two dimension of sustainable development - the environmental and the socio-economic. We seek to answer such questions as 1) To what extent are contemporary patterns damaging the environment? 2) What is condition of producers and how have these changed over time? 3) How effective are fair trade and other campaigns designed to promote sustainable development?

INTS 4567 Democratization in Africa (5 Credits)
Since the mid-1970s, the world has seen an ongoing wave of democratization. Some 70 countries have undergone transitions to democracy since the 1970s, with some 40 countries having gone through such a transition in the 1990s and early 2000s. Perhaps nowhere is the "third wave" more fully felt than in sub-Saharan Africa, which has seen since the 1990s a myriad of transitions from one-party states to multiple-party democracies, as well as war-to-democracy transitions as countries today raise a number of important retrospective questions about the underlying drivers of democratization, the various paths that countries go through on the road to democracy, whether such changes are sustainable over time (and why or why not). The very word "transition" is rightly questioned: Is there a proverbial point of no return when democracy is "consolidated" and country goes from the transitional category to a fully formed democracy? While democratization may lead to peace over time, the actual process of political reform is destabilizing for societies, and that in the short term there may be real and direct threats to peace in democratizing societies as a result of the uncertainty and competition that democracy introduces into revistive social environments. In Africa, despite celebrated transitional elections and a few clear success stories (such as Namibia), democratization has been fraught with challenges, from elections as the spark to civil war or massive political violence, to corruption, fraud, and rent-seeking by elected elites, to widespread discontent over the inability of democratically elected regimes to foster socio-economic development. As well, there is a critical concern that electoral processes in Africa are often accompanied by widespread political violence. Thus, Africa's experience with democracy lies between the powerful force of liberation that guided the continent's politics in the formative years, and the uneven, non-linear, and for the most part elusive goal of "consolidation." The course explores democratization - the means and methods by which countries in recent years have moved form a non-democratic to democratic regime type. What theories, concepts, and methods should be used to understand democracy and democratization in today's complex, multiethnic societies? How does the Africa experience relate to broader theories and perspectives on democratization?

INTS 4569 Migration (5 Credits)
Migration is a fundamental feature of our lives. Indeed, every aspect of our civilization and our self-conception is shaped by the exodus of all humans from our origin as a species in Southern Africa 200,000 years ago. In our own era, the aging of western populations, the rise of new economic powers, and dramatic improvements in human capital have given rise to an era of labor migration unparalleled in magnitude and diversity, though not entirely unique. New technologies have risen to facilitate further migration, enable the transmission of resources and knowledge across borders, and create new transnational patterns of residence and livelihood that challenge our notions of nation, identity, and even the very meaning of the term migrant. To put it simply, migration is the human face of our modern era of globalization, entailing incredible costs, risks, and returns for migrants along with important impacts for host societies, and the global system. Migration comes in many varieties in terms of destruction, permanence, and level of coercion, yet common theoretical, empirical, and policy unite these different forms of mobility. This course offers a holistic view of the migration process from multiple perspectives, at multiple levels of analysis, and on multiple aspects of our world today. As a uniquely individual behavior, migration has proven over time to be notoriously unfriendly to policy, which is often ineffectual or even counterproductive. We explore this cross-cutting concern through case studies illustrating the promise and pitfalls of migration policy.
INTS 4572 The Political Economy of the Middle East (5 Credits)
This course emphasizes the economic development of the countries in North Africa and the Middle East. Students must be comfortable with Macroeconomics as presented in the introductory or principles of economics classes. Given the nature of the region under study, we cover and touch on culture, Islam, oil, Islamic Banking and Finance and other pertinent issues relevant to the region. Every student is required to write a report on one of the countries in the region and present it to the class. The course helps students to understand and discuss the relevant issues that are important to this region as well as it strategic importance to the West and the United States. The region is often associated with oil, Islam, the Palestinian-Israeli peace process-or conflict-and overall instability that takes places in different parts of the area. This instability has an impact on the world economy and our understanding of this region will enhance our understanding of the global economy. Through class discussion, reading and presentations, we focus on these issues and also use current events to highlight and extend these topics. This course also helps students identify the religious, historical, social, political, economic, and security issues that affect the region as a whole. This course also compares the economic and political developments in the region with other regions of the world.

INTS 4573 Oil and the World Economy (5 Credits)
Dating back to the 1970s, with the first and second oil shocks affecting the world economy, the world oil markets have regained center stage again and forced a number of countries, developed and developing, to search for alternatives as well as policies to reduce their dependence on oil. The world oil markets have changed from a physical market where the only players were those who received delivery of the oil to a global financial market where hedge funds and investors of all stripes are able to capture gains that they cannot capture in other markets. As a commodity market, oil has become popular for many firms to diversify their investment particularly in light of the depreciation of the U.S. dollar. This course explores the world oil markets, the role of OPEC and non-OPEC oil producers in their impact on the global economy as well as what the oil consumers and the International Energy Agency can do to help mitigate the effects of high oil prices on the world economy.

INTS 4574 China and India in Comparative Analysis (5 Credits)
This course looks at Asia's 21st century powers in comparative perspective through a multi-disciplinary analysis of China and India. It covers the different historical trajectories of these two countries over the last century, their different forms of government, and discrepancies in their achievements in administrative and social development. It also looks at the structure of their economies, growth patterns, and the role of militarization and security concerns in shaping their outlooks towards the future. A major theme of the course is to understand not only the similarities between these two nations but also how and why they differ and to what extent their futures will converge or diverge.

INTS 4575 Systems Thinking for Social Scientists (5 Credits)
The purpose of this course is to introduce students to systems thinking as an approach for understanding and analyzing real-world issues. In addition to introducing the basic principles of systems thinking, questions that will be addressed include: Why do systems behave the way they do? Why do systems resist change and often end up getting worse when we try to change them? How do you find points of leverage within a system? This course uses examples drawn from a range of issues across the field of international studies. In doing so, it illustrates how a systems perspective can allow you to see parallels between seemingly disparate issues. This course introduces both qualitative and quantitative approaches for analyzing systems and discusses the benefits and limitations of each. Quantitative, computer-based modeling is used in this course, but no background is required.

INTS 4576 Seminar: Community Based Research (5 Credits)
This course offers a weekly seminar in methods for community-based research in health, development, population, and humanitarian assistance. The course is intended as preparation for students preparing for a community-based research partnership in Delhi, Nairobi, Jerusalem, or Iquitos, Peru but is open to all students preparing to go to the field. Focus is on practical methods for gathering quantitative and qualitative data at the individual, household, village/neighborhood, facility, and total community level including "windshield observation", key informant surveys, household surveys, and gathering of secondary data from census and other government and non-government sources. Methods of data collection include Geographic Positioning System (GPS), facility/provider surveys, community governance/needs assessments, and knowledge-attitude-practice (KAP) behavioral surveys. Topics of particular emphasis include maternal and child health (MCH), water and sanitation (WASH), and primary health care (PHC). Students learn to design, revise, collect, enter, and analyze basic surveys using Excel and the Stata statistical software package. The final project for the course includes a community "desktop assessment" document and a plan for further data acquisition and analysis for the student's focus community.

INTS 4579 International Futures: Global Change and Development (5 Credits)
Futures forecasting involves making decisions about priorities. Decisions require forecasting the trajectory of a society with and without interventions of various kinds. This course involved students in the forecasting and analysis process. In the lab, students learn to use the International Futures (IFs) forecasting system. That system represents multiple issues (demographics, economics, energy, agriculture, education, health, socio-political, and environment subsystems) and is supported by a very large database. Students study the structure of each of these modules, learn how they represent the underlying subsystems, how they are linked to other subsystems, and what they tell us about the processes of change globally and in countries and regions around the world. Students use the system for forecasts and analyses of their own.

INTS 4581 Introduction to Humanitarian Systems (5 Credits)
The humanitarian field has changed significantly since the founding, in 1863, of what is now the International Committee of the Red Cross. Since the early 1990s there have been efforts to improve coordination between humanitarian actors and to improve the quality of international humanitarian response. High profile humanitarian crises such as the Rwandan genocide, the 2004 Indian Ocean Tsunami, and the Haitian earthquake have highlighted weaknesses in the system and spurred reform efforts. Through readings, class discussions, guest speakers, group work and individual assignments, students gain a better understanding of the development of humanitarian systems and policies and how these affect current humanitarian practice. Key debates in the humanitarian system are also discussed and students have the opportunity to grapple with some of the key ethical dilemmas facing humanitarians today. At the completion of the course, students should be able to: Discuss the history of humanitarianism; Recall key components of the humanitarian infrastructure; Describe the humanitarian principles, their interpretation and application; Identify ethical issues which may arise for humanitarians; Discuss the implications for humanitarian practice of key emerging challenges.
INTS 4583 International Protection in the Humanitarian Context (5 Credits)
At the conclusion of World War II after witnessing the horrific and historic loss of life, and in an effort to save future generations from the direct impact of war and conflict, the Western powers created several important legal instruments to protect civilians. These instruments are largely derived from human rights, refugee, and international humanitarian law. These initial legal instruments were later combined with additional instruments, both regional and international in scope, and are collectively and cumulatively considered the legal framework for "International Protections." After sixty years of the progressive legal and theoretical development of international protection and its practical implementation, a slow but evident shift has developed over time. Theoretically speaking, a shift from the end of the Cold War's position of absolute sovereignty to the ideals of the 1990s and the "responsibility to protect" which developed in direct response to the failed efforts of the international community to protect in Bosnia, Rwanda and other conflicts. As a result of the changing nature of conflicts, confusing mandates, ambiguous definitions, and political will, we have witnessed the failure of international protection in numerous humanitarian settings.

INTS 4587 Intell. & Military Ops (5 Credits)
Introduces concept, framework, and applications of intelligence and military operations.

INTS 4590 Civil Society and Democratization (5 Credits)
This course introduces students to the idea of civil society as a process of state-making. We explore examples that illuminate the relationship between civil society and the state in both democratic and non-democratic contexts, paying special attention to democratization and the strength of civil society. In so doing, we look at the role of state institutions, NGOs, and social movements to identify these mechanisms. Students consider the question, "Is state engagement with civil society an integral and necessary condition of democratization, and if so, how?" We consider contexts in which the state disengages from civil society and the deteriorating conditions afterwards that can result in an increase in social radicalization, as in South Africa, Colombia, and other cases. In more developed democratic countries, we investigate how this process can lead to low civic participation and ridicule of the electoral process. In the final weeks of the course, we move on to solutions for incorporating civil society into state processes in the contemporary context.

INTS 4591 Advcd Fundraising Workshop (5 Credits)
This course compliments INTS 4391, in which an overview of non-profit fundraising - along with financial management - is given. In this course, we take an in-depth look at the major methods of non-profit fundraising, namely, annual giving, special events, corporate fundraising, grant writing, major gifts, and planned giving. The teaching methodology to be employed is that each 3 hour class session is, in effect, an intense workshop on a specific fundraising topic. During each class session, a fundraising professional from the community, who is actively engaged in the particular fundraising activity being discussed, joins the professor in leading the workshop. Due to the advanced nature of this course, enrollment is limited to those who have already been introduced to the major methods of fundraising through the previous completion of INTS 4391, the concurrent enrollment of INTS 4391, or previous fundraising experience or educational pursuit in the fundraising field that is judged by the professor to be sufficient to be an active participant in this course.

INTS 4593 Knowledge for Development (5 Credits)
Knowledge plays a critical role in improving human welfare. Rapid progress in science and technology in the recent times and an increasingly inter-connected world facilitated by such progress have raised the potential for using knowledge in bringing development everywhere in the world within foreseeable future. This course examines the role of science, technology and innovation in achieving economic and social development through creation, diffusion, transfer and adaptation of knowledge within and across national boundaries. Course participants examine the role of knowledge and innovation in fostering economic growth and social development. They scan the modern science and technology challenges and opportunities especially those useful for development. They also study the various activities, institutions and policies that can help developing countries devise (or strengthen) and maintain a state of the art knowledge system. They have hands-on experience of designing a knowledge policy plan for a developing country or region. The course brings in material from various disciplines though the major focus remains on international development. It can be cross listed as a development, a technology policy or a GFTEI course. No prerequisites.

INTS 4594 Religion, Environment, and Development (5 Credits)
This course explores how religious perspectives shape relationships between humans and the placed in which they live, work, play, and worship. Students are encouraged to integrate theory and praxis by learning to deconstruct the main concepts (what is religion? environment? development?), recognize distinct world views and methods, and envision constructive possibilities for just and appropriate partnerships. In order to emphasize the diverse ways that peoples seek meaning, pursue desire, and orient themselves in the world, case studies representing a variety of cultural and geographic contexts are presented. Religion is considered as a force in promoting, resisting, and interpreting changes to the environment, both locally and globally.

INTS 4595 Civil Wars and International Responses II: Post-War Peacebuilding (5 Credits)
Today, civil wars constitute the principle, realized threat to international security (measured in lives lost). This seminar critically explores the problems to international peace and security posed by contemporary civil wars and the efforts of international - primarily, United Nations - "peace building" missions to implement negotiated settlements aimed at substantially ending such wars and preventing their recurrence. The concept of peace building seeks to capture the complex, multidimensional task of implementing the terms of settlements to end war preventing the recurrence of war, and addressing the deep-seated causes of social conflict and deep divisions that gave rise to protracted armed conflict in the first place. Furthermore, the notion of peace building have been augmented by the concept of state building, which implies that the principle strategic objective of external efforts is to help develop and create legitimate, capable states that are able to realize the provision of security and human development and to manage future social conflict through nonviolent bargaining processes and institutions. The scope of the course includes the analysis of theories, concepts and empirical research in the analysis of post-war international interventions in civil wars and in-depth, student led evaluation of specific cases. Prerequisite: INTS 4495.
INTS 4596 Mobile Technology for International Development (5 Credits)

The purpose of this course is to create awareness of the opportunities and limitations of mobile technology in the context of development challenges. We explore how mobile technology innovation around the world intersects and diverges with broader trends in Information Communication Technology (ICT) for development. For practitioners and policy makers, it is increasingly important to be familiar with mobile technologies available to support development and humanitarian assistance programs, research and policy objectives. Furthermore, with the rapid increase in mobile technology pilots around the world, it is critical to have the knowledge and tools to be able to critically assess these initiatives. This ensures that the appropriate technology investments are made by governments, the private sector, humanitarian assistance organizations and other development stakeholders to effectively, equitably and efficiently meet their goals.

INTS 4599 Ethics and International Affairs (5 Credits)

This course examines the following: social "science" and ethics, power-rivalry and capitalism versus human rights and democracy, what are the dimensions of poverty, what role does the World Bank play, "laws of people," two classes of human rights (according to Rawls), national interest, and tolerance.

INTS 4619 The Politics of Terrorism (5 Credits)

Terrorism dominates the headlines, but few people attempt to think critically about the origins and evolution of terrorist groups over the course of history. The history of terrorism, however, is rife with puzzles. What is terrorism? Why do groups take up arms against fellow civilians to effect political change? What explains the tactical choices of terrorist groups? Why do terrorist groups end? What are the most effective ways to combat terrorism? Is the "new" terrorism really new, or does it reflect continuity with terrorism in previous eras? The course takes a theoretical and historical approach, attempting to nest contemporary challenges within the broader context of terrorism as a phenomenon. To this end, the course acquaints students with the historical evolution of domestic and international terrorism while introducing students to the major theoretical approaches to the study of terrorism. The five primary goals of the course are to: (1) present leading theories and concepts for understanding terrorist behavior; (2) explore international history to evaluate theories of terrorism; (3) apply these theories to analyze current terrorist trends and make predictions about future developments; (4) provide students an opportunity to conduct research and write an original paper; and (5) allow student to deepen their knowledge about several major terrorist groups around the globe.

INTS 4621 Research and Messaging in Human Rights (5 Credits)

This course builds on topics covered in INTS 4497: International Campaign Management, and goes further in examining the role of research in campaign message development. The class places emphasis on how research and messaging has been and is used in political endeavors, both successfully and unsuccessfully, and include readings from American and international politics. Our sources cover a variety of formats, including books, journals, and newspapers, as well as the use of internet sources and movies. Excerpts from Stan Greenberg, Sasha Issenberg, and Nate Silber are also a part of course materials. Students are expected to come to class prepared to discuss the subject matter to be covered in class that day. Class participation is highly valued because much of political interaction is oral. The course is largely in seminar format, with few lectures. Prerequisite: INTS 4497.

INTS 4622 Strategy and Governance (5 Credits)

This course focuses on the variety of authorities that govern global issues (global governors) and endeavors to analyze 1) the strategy of these actors and 2) how the variety of actors engaged in a particular issue contributes to the amount and type of governance surrounding that issue. As a group students define strategy (the calculated relation of means to large ends) and what constitutes governance (creating issues, setting agendas, establishing and implementing rules or programs, and evaluating, enforcing and adjudicating outcomes), and read a variety of examples of strategy and governance on security issues (both historical and contemporary). Each student considers these concepts in the context of the strategy of a particular authority or the range of authorities relevant to a particular issue area. The intention is for each student to extract lessons relevant to future leadership roles which might call on them to connect desired ends with available means or generate collective action.

INTS 4623 Rights Based Approach to Development (5 Credits)

Human rights and development emerge as parallel approaches to confronting indignity and deprivation in their many forms. As the effects of violent conflict, global capitalism, natural disaster, and fragile states impact the lives and livelihoods of ordinary people, these two frameworks provide purpose and rationale for those wishing to alleviate suffering. Yet human rights and development have not always worked in tandem, at time quite at odds with one another. More recently, however, scholars and practitioners have attempted to identify points of overlap and complementarity in order to improve outcomes. While this remains, in many ways, not a natural partnership, strides have been made to make sense of human rights and development together: one of which proposes a rights-based approach to development. The course focuses on this hybrid by examining many of the world's most pressing problems - in the areas of democracy, gender, food, health, education, and environment - as those have been recognized as particularly fundamental to improving the welfare of a majority of the world's population. Our analysis considers these issues through the lens of each traditional route, as well as the fused third way, to draw conclusions about efficacy and appropriateness. The pragmatic implications bear on those actors engaged in human rights and development work and shape their strategies and methods. We evaluate these difficult questions while emphasizing the consequences for best practices for international and non-governmental organizations.
INTS 4624 Private Actors and Conflict (5 Credits)

General approaches to conflict focus on violence between the military forces or states. The conflicts of the last two decades, however, involved a variety of other actors: private military companies training or fighting with armies, relief workers trying to mitigate the impact of conflict on non-combatants, environmental NGOs working to lessen the impact of conflict on endangered species, multinational corporations trying to continue their business dealings, paramilitary and/or other citizen groups trying to defend their private property or other rights, criminal networks working to exploit conflict for personal gain, and terrorist networks. How do these different actors behave in conflict situations? Does their presence alter the way conflict unfolds, strategies of conflict (and conflict resolution), and/or the prospects for long-term security (peace, stability and development)? How? How do we decide whether these actors are public or private? How do today’s “private” actors in conflict compare with the past? Is this a new phenomenon or simply a return to what has been typical at numerous points in history? This course explores the questions presented by the variety of actors involved in conflict today, compare today’s situation with the past, and examine the way states and non-state actors are coming to terms with each other in conflict situations.

INTS 4625 East African Development and Human Rights (5 Credits)

For our purposes, East Africa encompasses the countries of Sudan, South Sudan, Ethiopia, Eritrea, Djibouti, Somalia, Kenya, Uganda, Rwanda, Burundi, and Tanzania. This course begins with an introduction to the cultural richness and diversity of East African societies, with an overview as to how tribes, chiefdoms, and states function. Religious influences are noted. This history of development, as externally conceptualized, begins with the Berlin Conference of 1884/85 and the so-called “scramble for Africa.” It features socio-economic and socio-political processes. 20th- and 21st-Century external development programs are covered, most recently exemplified by the former Soviet Union, the United States, and China. Principles of induced development and participatory development are contrasted. Regarding the latter, indigenous innovations are stressed. The history of human rights, as externally conceptualized, begins much later, with the 1969 refugee-related innovations of the Organization of African Unity (now, the African Union). The “classic” issues of tribalism, corruption, and resource exploitation are covered, as well as the “late-breaking” issues of food security, refugee repatriation, and child soldier rehabilitation. Conceptually and theoretically, the course is grounded in disciplinary understandings derived from cultural anthropology, political science, ecology, and history. Resource use, in the context of socio-cultural systems development, are foundational. Special projects are featured, exemplified by those involving University of Denver personnel in Kibera, Kenya (water and sanitation); Mai Misham, Ethiopia (literacy); and Juba, South Sudan (indigenous leadership). At the broadest level, examples are most often drawn from the water/sanitation, agricultural, and health/mental health sectors.

INTS 4626 Civil Resistance (5 Credits)

Civil resistance is the application of unarmed civilian power using nonviolent tactics such as protests, strikes, boycotts, demonstrations, without using or threatening physical harm against the opponent. This method of struggle occurs worldwide in places as diverse as Russia, Moldova, Serbia, Spain, Egypt, Iran, Maldives, the Niger Delta, the West Bank, Thailand, and Burma, among many others. As a consequence of the growing use of civil resistance, the foreign policy community has become interested in understanding the causes, dynamics, outcomes, and consequences of civil resistance campaigns. This course serves as a primer on the topic of civil resistance, introducing students to the primary texts in the field, as well as the policy implications of empirical research on the topic. This five primary goals of this course are to: (1) present leading theories and concepts for understanding civil resistance; (2) explore international history to evaluate theories of civil resistance; (3) apply these theories to analyze current trends and make predictions about future development; (4) provide students with opportunities to synthesize their knowledge in a major written assignment; and (5) allow students to deepen their knowledge about several historical cases around the globe.

INTS 4627 African Security (5 Credits)

This is intended to be an advanced political science graduate course examining African politics and (in)security. The aim of this course is to introduce students to theoretical frameworks that, in turn, facilitate their understanding of African politics, conflict and security issues – especially as they pertain to human security. Importantly, this class takes a critical look at the concept of sovereignty as it relates to security. Through the reading, students become familiar with major analytic frameworks and debates in the analysis of contemporary African politics; students become conversant in relevant political, civil-military and human security issues as they relate to sub-Saharan Africa. The focus of this course is for the student to develop an analytical framework by which to make sense of context. Context is important, but without a cohesive theoretical framework to inform the practitioner it is insufficient. With the understanding that modern elites benefit from the existing structures and associated incentives, this course seeks to understand the modern African state in order to best engage said structures/elites to further development and, most importantly, individual security. Of note, it is clear that security is a fundamental condition for effective governance and development. Further, whereas it is true that weak empirical states, interstate wars, and conflicts over natural resources have proliferated throughout the continent and that ethnic, religious and regional violence is a common syndrome, we often forget basic (human) security needs. Specifically, we overlook that importance of access to potable water or an individual’s ability to pursue economic gain without fear of violence. At the heart of security lies the individual. Weak states or elites might affect inter-state relations and security (e.g. militant groups in under-governed spaces), but it is the individual who suffers. Thus, security in this context seeks to understand issues that affect individual lives.
INTS 4628 Soc Movements: Latin America (5 Credits)
The past year has been witness to Tahrir Square and Occupy, reminding us of the power and innovation of popular sectors making their voices heard. Latin America is a particularly useful place to explore popular movements, as it has long been the site of popular protest and national revolution, and it is currently a region governed by a significant number of Leftist governments with important ties to social movements. This course addresses major theories of social movements, including classical, structural, and new social movement theories. These theories have attempted to answer fundamental questions of what triggers mobilization among excluded groups, how they facilitate their action, and what changes they potentially trigger to basic rights and identities. The course also places social movements in their broader context, locating them in the political, social, and economic structures that have shaped inclusion in Latin America over time. In the process, the course explores the role of popular movements in broader processes of democratization, economic development, and citizenship. We examine traditional and well-studied examples of social movements, including movements among workers, indigenous, women, environmentalists, and advocates for democracy and human rights. We also explore newly emerging and transnational movements, including those that articulate alternative models of globalization. The course takes an interdisciplinary approach, drawing on economics, sociology, anthropology, and political science. It places special emphasis on the political economy of popular organization, acknowledging the contested nature of development and the ongoing struggle for deeper democracies and more equitable societies.

INTS 4629 Cultures of Globalization: Networks, Commodities, Affections (5 Credits)
This course explores the effects of neoliberal globalization on the lives of individuals and their communities. In an increasingly interconnected world, how do everyday people and communities negotiate the opportunities, dislocations, and/or disjunctures engendered by neoliberal globalization? Does globalization contribute to increasing global homogeneity or does it restructure difference and inequality in new ways? We explore how a ground-up view of globalization can highlight some of its contradictory effects. We discuss how globalization influences increasing inequality, restructures individual and group identities, as well as the relation between globalization and migration. From a ground-up perspective, we attune to growing global connections to understand how transnational commodity circuits intersect with individual lives and communities. We ask: How are commodity chains also cultural objects that shape, and are shaped by, how we see the world? Moreover, we pay attention to the development of grassroots networks and social movements that forge connections across borders to channel and/or challenge the current trajectory of globalization. We also find it imperative to understand the affective dimension-how do human beings think about their emotional relationships, families, and identities in relation to changing global dynamics? We end by examining alternatives to thinking in terms of neoliberalism, while examining its ramifications in the current economic context. A central question we ask is: As everyday life becomes increasingly commoditized, how do people cope, find support and value, and reveal alternate ways of conceptualizing how we can all connect to one another.

INTS 4630 Civilian Protection in Armed Conflicts (5 Credits)
Studies of armed conflict tend to focus on the production of violence to the neglect of how civilians might instead be protected. In this course, we will study how to limit violence against civilians. We will begin with an overview of theories of violence and legal and ethical frameworks governing the use of force. We will then consider how various actors throughout society, from state actors, to international actors, to illegal arms actors, to NGO's, to civilians and their communities--the would-be victims of violence--can either promote or restrain the use of violence. We will also consider the conditions under which the protection of civilians is most feasible as well as research methods for analyzing populations and their protection strategies. In their final projects, students will analyze the threats of violence faced by a particular population and design appropriate protection strategies and polices to deal them them.

INTS 4631 The Politics of Civil Society (5 Credits)
Every intractable problem of politics, many significant changes in regimes and much of the pressure on government for good or ill, depending on the point of view, emerges from the civil association of citizens. There are limits, however, to what people can and cannot do. In this way, the overall objective of this class is to explore how people exert political power outside of the formal political structures. Towards this end, student gain a greater understanding of the make-up and roles of civil society, beginning with its origins and definitions and working up to current thinking, including the post-Berlin Wall opening up of civil society. The class considers the linkages between social and political objectives, studying how both formal and informal forms of associations limit and open up the possibilities of people's power.

INTS 4632 Qualitative Research Methodologies: Working with Denver Immigrants and Refugees (5 Credits)
This course provides training in ethnographic methods and gives students the opportunity to apply their skills to the local Denver immigrant and refugee community. Students learn, first hand, the challenges and rewards of integrating research and service as well as theory and practice. The course begins with methods and ethics research and training. We then undertake ethnography as a collaborative class project on immigration and refugee issues in Denver. In doing so, we discuss new developments in the field in terms of collaborative, public, and critical and activist/engaged research. Students design group projects in coordination with the professor and immigrant/refugee organizations and their needs/interests. After the training weeks, readings are kept light (and suggested/tailored to each project) for the remainder of the quarter as students should anticipate spending a significant amount of time (3 to 5 hours a week) doing research in the community/fieldsites and writing up fieldnotes. Classes serve as a workshop space for students to develop their ideas, ask questions, work together, and compare results and insights. As research progresses, we discuss coding, data analysis, and the writing and dissemination process. Students learn how to integrate theory, literature, and original data collection. Students develop the skills to write, code, and analyze fieldnotes and to conduct participant observation, interviews, and focus groups. They discuss scholarly debates surrounding objectivity, reflectivity, ethics, and activism. The course guides students through the research process including proposal and grant writing, IRB approval and ethics training, research, write-up, and dissemination of information to research communities. The course aims to show how engaged research can contribute to greater partnerships in the local community and share its results with study participants in a public forum. The course provides students with ethnographic skills while also showing them how conducting collaborative ethnography can contribute to a more holistic understanding of immigration and refugees issues in Denver. Many students may develop a service component to their projects, as well.
INTS 4633 Int'l Project Evaluation (5 Credits)
It is important that those planning careers in multilateral and bilateral development agencies, non-profit organizations, private-sector companies, and professional services organizations have an understanding of the many considerations involved in development interventions and the competencies of a project manager to lead teams in carrying out these interventions. The school currently offers three courses that are organized around the traditional international project cycle. This cycle includes six sequential but not necessarily linear phases - identification/selection, preparation, appraisal, implementation, completion/transition, and evaluation. Future project managers working at various stages of the project cycle need to develop technical, leadership/interpersonal, personal/self-management, and international development specific competencies. The purpose of the International Project Evaluation course is to provide students with a better understanding of and practical tools for designing, implementation, and reporting project evaluations. Project managers rely on evaluation at various stages of the international project cycle. They use evaluation during the implementation of development projects to determine causes of any observed variance between project milestone targets and actual progress, and to support the formulation of corrective actions. They also use evaluation to determine the extent to which a development project has met its desired outcomes at completion, and also the causes of any shortcoming. Finally, project managers use evaluation to determine the impacts of a development project several years after its completion, and the extent to which the project outcomes can be attributable to desired changes in the conditions of the target population or area. In all cases, a good evaluation design and implementation allows the project manager to identify supportable findings, conclusions, and recommendations. These recommendations can be directed to decision makers to support changes necessary to correct project deficiencies or to provide lessons learned for designing subsequent development interventions. Moreover, a project manager should use evaluation as a way to build evaluation capacity and appreciation among intervention stakeholders, which is known to further the obtainment of desired outcomes and produce more sustainable impacts. More specifically, this course covers the approaches that four organizations use to evaluate project, programs, and policies - the U.S. Government Accountability Office (GAO), the World Bank, United Nations Development Program (UNDP), and the United States Agency for International Development (USAID). Each of these organizations has developed templates for the design of an evaluation, similar methods and techniques for data collection and analysis, and common elements in reporting evaluation findings. The latter two organizations also have protocols to contract out evaluations to other groups through the preparation of statements of work. In this course, we have the opportunity to compare evaluation approaches and to apply these approaches in preparing evaluation projects. Small student teams produce a statement of work for an evaluation, as well as develop and present plausible findings, conclusions, and recommendations based on the evaluation design. Out of necessity, these are plausible results, as there is insufficient time to implement an evaluation design during the 10-week quarter.

INTS 4634 Practical Public Diplomacy (5 Credits)
When Madeleine Albright spoke at the Korbel School, she made a plea for more courses on the nuts and bolts rather than the theory of diplomacy. This course is a response to that plea; drawing on 28 years of experience as a Foreign Service Officer and practitioner of public diplomacy. In this hyper-connected world of ours, public diplomacy has taken on ever more importance. It is essential to use the traditional tools of public diplomacy, such as exchanges, cultural centers, language courses, etc., and meld them with the new tools of social media and social networks. The course is a combination of lectures and student presentations as well as talks by numerous experts in various aspects of the practice of public diplomacy.

INTS 4635 Civil-Military Relations (5 Credits)
Who guards the guardians? has been a long-standing dilemma in international politics. How can we make sure that military leaders enjoying the control of coercive power submit to civilian political authorities? How can military organizations be powerful enough to counter external threats without becoming themselves a threat to the political community they should protect? How can hierarchical institutions created to exert physical violence be compelled to respect human rights and democratic values? These questions lie at the heart of civil-military relations theory. Analyzing the different ways in which military organizations, political authorities and the broader society interact is crucial to understand political outcomes such as state-building, democratization and the outbreak of war. This course provides students with a comprehensive understanding of the problems surrounding civil-military relations. Besides looking at the theoretical foundations of the field, it offers a comprehensive overview of civil-military relations over time and across countries. Specifically, it focuses on some topical and yet poorly understood cases and phenomena, such as the impact of the rise of private military and security companies on control over the use of force and the role played by military in Middle Eastern countries such as Turkey, Egypt, Syria, Libya, and Pakistan.

INTS 4637 Comparative State building (5 Credits)
The modern state is of central interest to students of political science, Latin America, development, sociology, and public policy. For some, the state is an instrument of repression and domination; for others it is the shepherd of development. For all, it has been the fundamental unit of national political authority for at least the last two hundred years. This course explores the nature of state authority and the processes by which different types of states emerged at different moments in world history and in different regions of the world, as well as how the nature of states has evolved over time. We explore the modern states that emerged first in Western Europe, and then the transplantation, imposition, and emergence of state authority in other regions, including Africa, East Asia, and Eastern Europe. The second half of the course focuses entirely on Latin America, highlighting the way in which states emerged and shifted over time in that region through close study of particular cases. We end the course with a consideration of the nature of state authority in the current world characterized by more intense flows of people, goods, capital, and ideas.

INTS 4638 Modern Iranian History and Politics (5 Credits)
The Islamic Republic of Iran remains a mystery for many in the West. The policies of the Iranian regime represent one of the greatest challenges to U.S. foreign policy today, as reflected in the global debate about Iran's controversial nuclear program. War seems inevitable and Iran and the West are in confrontation on a number of fronts around the world. How did we get to this point in global affairs? What is the relevant historical background needed to understand Iranian culture, society, politics and foreign policy at a deeper level? What are the key moments in modern Iranian history that have shaped the contours of the current conflict between Iran and the United States? These are the overarching questions that this course seeks to examine. The course is the first of a two course sequence that seeks to demystify Iranian politics and society. Themes explored include the origins of Iran's troubled relationship with the West, the emergence of the modern Iranian state, the construction of Iranian national identity, the tension between religion and politics, the struggle for democracy and the persistence of authoritarianism and the roots of the 1979 Islamic Revolution.
INTS 4639 Post-Revolutionary Iranian Politics (5 Credits)
The focus of this course is on Iran's post-revolutionary period. The goal is to provide students with an objective examination of Iranian society and politics. Several themes are explored: the rise of religious politics and the consolidation of clerical rule, the nature and interaction between Iranian state institutions, civil-military relations, the Iranian economy, the domestic opposition and the prospects for democracy, the crisis in US-Iranian relations, and the role of women in Iranian society.

INTS 4640 Global Financial Crisis and International Policy Responses (5 Credits)
This course provides an in-depth and critical analysis of the global economic crisis of 2007-2009. The goals of the class are to provide: a) an understanding of the causes of the crisis, b) an overview of the onset of the crisis, including its similarities and differences with past crises, and c) a critical appraisal of the policy response to the crisis, including financial bailouts, monetary policy, fiscal policy and regulatory reforms since 2009. The class will take both a US and a global perspective, and will conclude with an outline of the aftermath and general lessons to be drawn. This course goes well beyond a historical treatment of the global economic crisis and provides general analytical frameworks that can be used to understand economic crises more generally. Each class will be organized around one or two topics related to a theoretical understanding of economic crisis and will apply them to an understanding of the 2008 crisis. The frameworks draw from the fields of microeconomics, macroeconomics, finance, international relations, political economy, real estate and internationa economics, integrating and extending the knowledge obtained from other economic and policy courses. Basic Macroeconomics and Microeconomics, while not strictly a prerequisite, is highly recommended. Basic economic concepts will be used repeatedly during the class and basic knowledge of economics will be assumed. The format of the course is a classroom discussion of the reading and class debate. As such, it is imperative that you come well-prepared, having done all of the readings as this course entails a substantial amount of readings to prepare for class. The instructor has a point of view, but challenging that point of view will be encouraged, and even required. Lively class participation will be essential to the success of the course. Visitors from the worlds of finance and policy will contribute on occasion and will be announced.

INTS 4641 East Asia in the Global Political Economy (5 Credits)
The main purpose of this course is to understand critically the conceptual and empirical issues underlying the linkages between the East Asian Regional Economy and the Global Economy. What is the role of the East Asian Regional Economy within the current global political economy (GPE). What is sustainable development in the East Asian Regional Economy? What are the global dimensions of sustainable development in the East Asian Regional Economy? What are the linkages between technology and sustainable development in the East Asian Regional Economy? After an initial exploration of these issues we focus critically on the more recently developed social capabilities approach developed by Amartya Sen and others. In particular, we explore the limits of policies under the more recently developed social capabilities approach developed by Amartya Sen and others. In particular, we examine the need for fundamental changes in the global political economy and the East Asian Regional Economy. For this purpose we try to find the approximate but deep casual structure of GPE and the place of the East Asian Regional Economy within this GPE.

INTS 4642 Environmental Security (5 Credits)
This course surveys the expanding literature on the complex interrelationships between the environment, natural resources, conflict, and human security. Since the dawn of agriculture (~7000 BCE), but rapidly accelerating in the industrial age (1750 CE to present), humanity has conducted an uncontrolled experiment in bending the natural environment to fit human needs and desires. Despite the perceived distance that technology has placed between our physical environments and our daily lives, human interactions with our natural environment are still fundamental. Since the end of the Cold War, much attention has been paid to the role of natural resources and environmental scarcity as a source of conflict, ranging from "water wars" between states sharing a common river basin to communal conflict between pastoralists and farmers in the Sahel. This course will survey the expanding literature on environmental impacts on conflict, as well as conflict impacts on the environment, and the potential for making co-management of valuable natural resources and wildlife a source of cooperation, rather than conflict, between communities and states.

INTS 4643 Japan in East Asia: Economic, Business, and Trade Relations (5 Credits)
This course presents an overview of Japan's economic, business and trade relations in East Asia (ASEAN plus China, South Korea and Taiwan). The focus is on the evolution of Japan's economy and big business and its shifting role and impact in East Asia. The course is organized to provide a backdrop to understanding: (a) the growth of big business in Japan; (b) the rise of the 'developmental state' in Japan and its impact on East Asia; (c) the experience of Japanese multinational with foreign direct investment in East Asia and creation of Asian production networks; and (d) the current trend of free trade agreements and other emerging trade arrangements in East Asia. Students work in groups to explore, for example, the experiences of major Japanese companies in East Asia or a period or specific event connecting the economy of Japan with those in East Asia.

INTS 4644 Human Rights Research Methods (5 Credits)
This course is about how social science research can be used as a tool to understand and promote human rights. The field of human rights is bedeviled by several challenging obstacles to research, including reporting bias, hidden abuses, missing data and politicization of the facts. To deal with these obstacles, we learn about various methodological tools and how they are applied for the analysis of special human rights topics. By the end of the course, students are equipped to compile and present information to highlight patterns of rights abuses and identify patterns of cause and effects.
INTS 4645 War by Contract? The Scope, Drivers and Implications of Military Privatization (5 Credits)

The growing privatization of military support functions such as logistics, training and armed security to commercial entities known as private military and security companies (PMSCs) has raised considerable scholarly and journalist attention. Due to the scandals triggered by some of PMSC's activities and the normative implications of outsourcing military and security tasks, the existing debate has often created more heat than light, and the scope, divers and implications of military privatization have remained poorly understood. This course intends to provide students with a comprehensive analysis of the increasing privatization of military support and national security at large. It does so by focusing on three main themes: firstly, it analyzes what is the market for force, looking at the changing role played by commercial actors in warfare and the evolution of PMSCs from the end of the Cold War to the latest military operations, focusing on the provision of land and maritime security, foreign military training and intelligence. Secondly, it draws on international relations theory to investigate why military support and security have been privatized, investigating the drivers of national security privatization and the main factors accounting for variance in the use of commercial actors over time and across countries. Thirdly, it focuses on the legal, political, strategic and ethical implications of the use of PMSCs. By doing so, it investigates the status of private military contractors under domestic and international law and the existing regulatory frameworks applicable to the private military industry, the impact of privatization of democratic control over the use of force and civil-military relations, its consequences on military effectiveness and the normative boundaries between activates that can be performed by commercial actors and tasks that ought to be considered inherently governmental.

INTS 4646 European Integration (5 Credits)

Not only have the global financial turmoil threatened by the Eurozone crisis and the negotiations of a trade agreement between the European Union (EU) and the United States made the study of EU integration increasingly important for students of International Relations. As a unique political entity distinct from both states and traditional international organizations, the EU remains an unidentified object, whose development has challenged the traditional paradigms of both international relations and political science. Besides providing an in-depth knowledge of a crucial political and economic actor, the study of the EU integration process, its drivers and its shortcomings will therefore enhance students’ understanding of some of the most crucial theoretical debates underlying today’s international studies. This course intends to provide students with a comprehensive knowledge of the politics and institutions of the EU, analyzing its development from its origins until the present day and beyond. It will do so by focusing on the following core issues: Firstly, it will briefly analyze the history of the EU, seeking to identify the rivers of the integration process and explain why, after the end of World War II, European countries have set aside their centuries-old antagonism and embedded themselves within an ever close political Union. Secondly, it will examine what the EU is and how it functions, analyzing its key institutions, the architecture of its system of multilevel governance and its policy-making processes. Thirdly, it will investigate some key consequences of European integration, focusing on topical debates such as whether and to what extent the shifting of national decision-making powers at the EU level has created a democratic deficit, what is the impact of EU enlargement on both the Union and the institutions, societies and economies of new member states and what have been the economic and political consequences of the introduction of a single currency. Finally, the course intends to engage students in a debate on what is the future of the European Union in light of the latest development brought about by the entering into force of the Lisbon Treaty and the economic and financial crisis suffered by Southern European member countries. Prerequisite:

INTS 4647 Critical Issues in International Humanitarian Assistance (5 Credits)

In recent decades, the humanitarian system has undergone significant changes related to developments in global governance, lessons learned and relationships between agencies (UN/NGO), governments (donors, affected countries), as the nature of crises themselves the contexts in which they occur and actors involved in crisis response continue to evolve, the humanitarian system and those that work within it must contend with new challenges and critiques. Through readings, class discussions, guest speakers and assignments, students have the opportunity to gain a better understanding of the major emerging policy issues and internal and external challenges facing the international humanitarian system. The class discusses important debates in the humanitarian system and students have the opportunity to grapple with some of the key ethical dilemmas facing humanitarians today. This course is aimed at those with an interest in humanitarian policy as well those who wish to explore the challenges that may face them as they prepare to work in the humanitarian field. Prerequisite: INTS 4581.

INTS 4648 Theories of Security in World Politics (5 Credits)

In the 40 years following World War II, the study of security assumed a divide between international relations (the politics between states) and domestic politics (the politics within states) and gradually became separated from studies of international economics. International or national security largely centered on one empirical and two different theoretical enterprises. The empirical enterprise explored the relationship between the US and Soviet Union, focusing particularly on deterrence and the effect of nuclear weapons. The theoretical enterprises explored the likelihood of conflict between states in different systems and scenarios (when does conflict occur? When is stability more likely?) and examined the causes and consequences for actors of pursuing different strategies (What determines which strategy states will choose and what are the consequences for security – i.e., war, conquest, security gain, security loss, etc. – of different choices). After the end of the Cold War debates about the meaning of security joined change in the prevalence of intra-state conflicts and growing attention to terrorism in ways that led many scholars to question the usefulness of assumed differences between international and domestic politics, and, to a lesser extent, between security and economics. Also studies of conflict and stability have increasingly focused on a variety of transitional and global actors that do not fall into the realm of the nation, the state, or even the “international” system at all. This course focuses on this post-Cold War security agenda. The course begins with a (rather old by now) debate over the definition of security, then consider the role of states and other actors and finally turn to a list of prominent questions. In examining these questions, the class reads studies based in a variety of explanations, research strategies and methods. Students are encouraged to think about prominent explanations that stretch across the questions in different weeks. Students should also consider the costs, benefits, and alternatives to the research strategies and methods that individual authors have chosen. While the focus is on the substance of debates in security studies, the professor hopes to also spend time each session talking about how to frame productive questions and research strategies. In the way of background, if students have never read Kenneth Waltz, Man, the State, and War, they are recommended to do so. It would also be useful to have some familiarity with some basic texts in political theory, particularly Hobbes, Machiavelli, Kant, and Weber.
INTS 4649 Human Rights and the Middle East (5 Credits)
This course is shaped in three parts; each focuses on a set of critical human rights questions drawn from different phases of the Arab uprisings. Part I focuses on the Arab Uprising and Promises of Human Rights Progress and asks: 1. What can we learn from past contagion of human rights struggles, while the class analyzes the Middle Eastern social transformation? 2. What are the main causes that shook the Arab Middle East? 3. What was/is the role of major social actors? Part II covers the Rise of the 2012 Islamist tides, which gained new momentum after the electoral victory of the Muslim Brotherhood in Tunisia and Egypt and asks: 1. Are these religious trends consistent with human rights efforts? What accounts for waves of contagious revival of religious fundamentalism in the Middle East and North African region before and after 2012? 3. What is the impact of religious fundamentalism and nationalism among Israelis and Palestinians? Part III analyses the Possible Paths of Democratization and Human Rights in the Middle East and explores: 1. What accounts for different Revolutionary Arab Paths? 2. Is there a human rights answer to the Israeli/Palestinian quandary regarding one or two state solution? What are the current and possible roles of external forces for the region (international and/or regional)?

INTS 4650 Globalization and Economic Crime (5 Credits)
This course explores the policy issues raised by international economic crime, a phenomenon that has mushroomed with globalization and now accounts by some estimates for one-fifth by value of all international commerce. But who gets to define “crime”? Are there standards applicable globally to all situations? Nation states, corporations, nongovernmental organizations and political advocacy groups have issued multiple and often conflicting definitions of acceptable and unacceptable behavior and have been free in affixing blame on other sectors. To assess the part played by economic liberalization in the increase of crime, readings focuses attention on the political, technological and economic factors that encourage criminal activity and on the direct and indirect economic costs of activities such as identity theft and counterfeiting; mislabeling and trade in illicit goods; political corruption; money-laundering; and securities and accounting fraud. The class discusses activities posing definitional challenges to policymakers, such as currency and commodity speculation, re-export, gray marketing and state sponsorship of organized crime. This class also looks at policy options available when state-supported criminal economic activity is deemed to violate peremptory norms, create a substantial domestic effect, or constitute an act of war. This course examines self-help programs such as due-diligence and know-your-customer rules as well as statutory regimes such as the U.S. Foreign Corrupt Practices Act, and the movement toward transparency and uniform financial standards.

INTS 4652 Contemporary Issues in Refugee Studies (5 Credits)
This course is designed to provide a stimulating interdisciplinary environment in which students explore contemporary issues in refugee studies. Through examination of relevant international instruments, research, case studies, agency policies and reports, students will begin to develop the skills necessary for understanding refugee-serving agencies and associated programs in large scale refugee operations. Specific emphasis will be given to recent developments in - refugee terminology, refugee status determination, urban refugee populations, refugee camps, durable solutions, and extremely vulnerable refugees. Throughout, the course will focus on humanitarian assistance and protection frameworks, including analysis of guiding principles and associated policies of refugee-serving organizations such as the United Nations High Commissioner for Refugees (UNHCR). The importance of reliance on refugee voices to frame the debate will also be emphasized. At the end of this course students should be able to integrate and apply knowledge of innovation policy and practice to begin to address contemporary challenges faced by humanitarian agencies working with refugee populations.

INTS 4653 Political Economy of the Resource Curse (5 Credits)
This course is about one of the more curious findings/non-findings in the history of economics and international relations; that valuable natural resources, such as oil, natural gas, and other mined commodities are not, in the main, associated with better development outcomes and may even depress long-run rates of economic growth and discourage democratization and effective governance. Common sense would seem to suggest that if one finds oneself sitting on a gold mine, then one should mine gold (or drill oil, as in the example above). But countries that have specialized in the production of extractive or “point-source” resources, such as mined commodities like gold, diamonds, and oil, tend to be poor, creating a nagging sense that specialization in extraction is a losing proposition in the global division of labor, condemning countries to be the “hewers of wood and drawers of water.” This course briefly reviews the basic economics of the resource curse before turning to a discussion of its effects for deeper institutional determinants of long-run development outcomes: democracy, gender equality, state capacity, and civil strife. It then moves into the realm of interstate politics, examining the ways that resource wealth shapes the foreign relations of resource exporters and major importers, principally the United States and China. The last third of the class investigates both domestic and multinational attempts to address the resource curse through policy interventions, including civil society-led good governance initiatives like the Kimberley Process and the Extractive Industries Transparency Initiative. This course presumes no deep knowledge of economics but will be of interest to students across the realms of security and development.

INTS 4661 Readings in Int’l Security (5 Credits)
Professor uses various contemporary publications, RE: International Securities, to stimulate interactive discussions.

INTS 4664 Political Economy of Brazil and India (5 Credits)
This course deals with two emerging powers, Brazil and India. We trace the political economy of both countries over time, and spend particular time exploring their historical trajectory, current emergence, challenges they face, and the significance of emerging powers for the international political economy. The course is organized around an understanding of their insertion into the international economy, the implications of international insertion for domestic transformation, and the politics of incorporating newly mobilized domestic social and political actors, especially as this plays out in existing political institutions. Students help define some areas of concentration for the course by identifying policy areas in which concentrated research will occur. This course takes an interdisciplinary approach by drawing on political science, economics, and sociology, and we are concerned to understand the potential for emerging powers to alter international relations, as well as the implications of different strategies of international insertion for domestic social sectors, especially those that have traditionally been excluded.
INTS 4700 United States Foreign Policy (5 Credits)
An intermediate course on issues and perspectives for evaluating American foreign policy. Topics discussed include theories of foreign policy; historical epochs in Superpower relations: the Cold War, Dente, and confrontation; America's role in the post-Cold War; war, peace, and trade in relation to U.S foreign policy planning and assessment.

INTS 4701 US National Security Policy (5 Credits)
An intermediate course which examines the post-war history of U.S. policy and America's response to the post-Cold War environment. Current issues include alternative strategies in nuclear deterrence and arms control; and security policy toward the Third World, Europe and the Atlantic Alliance, and Japan. Prerequisite: INTS 4702.

INTS 4702 Major Issues in International Security Policy (5 Credits)
This course focuses on contemporary challenges to global security. It seeks to familiarize students with the nature of these challenges and analytical tools with which to make sense of (and consider potential responses to) them. In the context of thinking about general issues, students learn about prominent individual instances (or "cases") of problems, think about problems through different theoretical lenses, and consider both logic and empirical evidence in evaluating different arguments. Beyond the substantive focus, the course also encourages students to develop analytical skills and their ability to communicate their analyses effectively.

INTS 4703 Security and Strategy: Classics and Current (5 Credits)
This course will focus not only on national security and alliance strategies, but also on strategies for international and nongovernmental organizations that must cope with a complex global agenda. This course will explore strategic thinking with insights drawn from Thucydides and Sun Tzu, Machiavelli and Clausewitz, Michael Howard, Thomas Schelling, Colin Gray and other present-day writers on strategy. We'll also reflect on strategizing as individuals and as members of small and larger groups in diverse organizational settings.

INTS 4704 Globalization and Security (5 Credits)
Course uses historical approaches to evaluate connections between economics and security and how views on security have been shaped.

INTS 4706 Topics in Int'l Studies (1-5 Credits)
INTS 4708 Topics in Int'l Studies (1-5 Credits)
INTS 4709 Topics in Int'l Studies (1-5 Credits)
INTS 4710 Topics in Int'l Studies (5 Credits)
INTS 4711 Topics in Int'l Studies (5 Credits)
Explores intricate inter-relationships in the Politics of Africa.

INTS 4715 Problems and Challenges of Democratization in Contemporary Democracies (5 Credits)
This is a course in the field of comparative democratization studies. The class covers political science perspective topics such as the transition to democracy, consolidation of democracies, how and why democracy has spread around the world and the debates on the virtues and perils of democracy and on the nature and quality of the resulting representative democracies. The class focuses on the major explanatory factors for democratization: the case study/actor-centric approach, the statistical/structure-centric approach, and the region-centric approach. Additionally, the class studies many of aspects that might influence the process of democratization such as: institutional design and institutional functioning, political culture, democratic support and the structure of the party system. The geographical focus is global, due to the comparative nature of the theoretical discussion, but it will be mostly focused upon the Southern, Eastern European, and Latin American cases and the time frame is concentrated to the so-called “Third Wave of Democratization” that it started with the Greek and Portuguese transition during the mid-1970s.

INTS 4719 Humanitarian Intervention in Africa and Human Rights (5 Credits)
In the post-Cold War period, Africa has increasingly become a major continent for human rights crises. Consequently, African States, the United States and the International Community have raised the level of humanitarian intervention to provide peace keeping for endangered peoples and improved livelihood. The question of effectiveness of various measures of intervention is an important consideration. Interpretation of international law, human rights and the best means of enforcement are all under discussion. The world community is increasingly opposed to genocide and ethnocide as it was in the days of anti-apartheid. How this affects current crises in Zimbabwe, West Africa, and the Sudan will be discussed. The student interested in the work of NGOs, international agencies, and state governments will benefit from this course.

INTS 4723 Citizens in Representative Democracies and Comparative Political Behavior (5 Credits)
Citizens' behavior and attitudes are fundamental for understanding the nature of the relationship between citizens and the state, and for assessing the QUALITY OF representative contemporary democracies and the nature of modern citizenship. This course focuses on the core aspects of citizens' behavior and their core political attitudes. First, departing from a classification of the different modes of political participation, the class discusses some of the most important aspects that might influence the individual act of participating. Second, departing from the classic models of voting behavior, the class discusses how citizens make up their mind when they vote and the theoretical implications of that process. Third, departing from Easton's and Almond and Verba's seminal works, this course studies the key dimensions of political support and political attitudes and the relationship among them. This class deals extensively with key concepts such as democratic support, political disaffection, political disengagement, political discontent, and social capital. The study of the factors influencing the different levels and evolution of these attitudes across countries are also covered. This course and its materials refer to studies using survey data and survey indicators, so some basic knowledge of statistics is recommended, although it is not a must.
INTS 4728 Nuclear Non-Proliferation (5 Credits)
This course will be taught by former Ambassador James E. Goodby. Ambassador Goodby is currently Senior Research Fellow at M.I.T. and Senior Fellow at Brookings Institution. He has taught at Carnegie Mellon, Stanford and Georgetown. He is the author of Europe Undivided, a book on U.S.-Russian relations. Entering the U.S. Foreign Service in 1952, he rose to the rank of Career Minister. His most recent assignments include: Deputy to the Special Advisor to the President and Secretary of State for the Comprehensive Test Ban Treaty, special representative of President Clinton for the security and dismantlement of nuclear weapons, chief negotiator for nuclear threat reduction agreements, and ambassador to Finland. Nuclear weapons are the most powerful instruments of destruction the world has ever known and, arguably, the gravest danger civilization faces. The Cold War struggle between the United States and the Soviet Union generated tens of thousands of nuclear weapons which placed both nations and much of the world in jeopardy of devastation. The nuclear legacy of the Cold War remains a serious threat to global peace and security. Added to that is the problem of nuclear black markets and an increase in the number of states possessing nuclear weapons. The specter of al Qaeda with an atomic bomb has added a further dimension of insecurity and uncertainty. In this course, the class will be challenged to analyze and consider policy choices that are outside the historical experience of the human race in terms of the consequences that are involved. In the first few sessions, we will build a common data base by discussing the technology and the political decisions that helped to end World War II and sustained a nuclear standoff during the Cold War. We will then look at the transition period that began as the Cold War was winding down and proceed to such current issues as Iran, North Korea, nuclear terrorism, and the use of force to prevent nuclear proliferation. A primary objective of the course will be to encourage students to engage directly in analysis, problem-solving, and policy formulation. Accordingly, most sessions will be structured as to encourage active interaction with the instructor and among students. Generally, an hour will be set aside for a policy exercise.

INTS 4729 Ethics and National Security (5 Credits)
Examines role of ethics in the formulation and execution of national security policy, with focus on U.S. government.

INTS 4730 Homeland Defense: Issues (5 Credits)
This course will examine the post-1945 history of United States efforts at homeland security, and include an overview of other national efforts (e.g., by the Soviet Union, Switzerland, and Israel.) It will then turn to identifying and analyzing the spectrum of issues associated with U.S. homeland security, in the context of evaluating the United States post-9/11 response to date. Those issues include: framing homeland security, prevention, response and recovery overview, foreign actors and issues, domestic actors/issues, problems of intelligence, terrorism vs. violent crime, public expectations, role of the media, funding and resources, and how to address broad spectrum threats.

INTS 4731 Homeland Defense: Prevention (5 Credits)
This course will examine the following issues: political leadership, foreign and domestic intelligence organization and functions, role of intelligence, principles of indications and warning, legal/civil rights issues: balancing human rights and security, law enforcement, Public health, and the role of various U.S. federal agencies: Department of Energy, Environmental Protection Agency, the INS, border security among others, plus the role of first responders in prevention/detection, and establishing indicators and reporting procedures.

INTS 4734 Homeland Sec & Civil Soc (5 Credits)
Examines host of potential societal consequences of homeland security efforts.

INTS 4735 Defense Methods and Policy Analysis I (5 Credits)
The purpose of this overview course in defense analysis methods is to provide students with the foundations to successfully conduct research and analysis in defense-related topics, whether within the national security community, in academia, or as a contractor. This course should also help prepare the student to complete his or her Master’s thesis. The course aims to improve the student’s ability to comprehend and assess the graduate-level readings assigned in other courses, and to write research papers and complete other written assignments for those courses. The course is intended to provide take-away skills that can be applied to professional activities after graduation: in particular, students should have greater confidence in their abilities to locate, read, commission, design, or conduct relevant research, and to draft research proposals. This class focuses on methods employed in both policy analysis and the social sciences. The emphasis is on qualitative rather than quantitative methods.

INTS 4736 Strategic Intelligence Data Collection and Analysis (5 Credits)
Course focuses on analytical prod. of strategic intel relative to int’l security issues.

INTS 4738 Current Issues in Strategic Intelligence (5 Credits)
Advanced seminar which investigates current issues relative to strategic intel within international studies.

INTS 4739 Advanced Security and Defense Analysis Methods (5 Credits)
This course is designed to cover key elements of social science methods in evidence-based policy, including quantitative and qualitative techniques and expert opinion to build facts and findings from context-free and context-rich environments. Among the topics covered: content analysis, survey and interviews, case study, ethics and research. Prerequisite: INTS 4735.

INTS 4742 International Weapons Proliferation (5 Credits)
This course explores the worldwide proliferation of weapons and military hardware. Special attention is given to weapons of mass destruction including fundamental principles of weapons development and deployment; unique characteristics and effects of nuclear, biological, and chemical weapons; and delivery systems. Capabilities and strategies to counter this international problem are developed.
INTS 4743 Comparative Defense Procurement Systems (5 Credits)
Why do countries purchase the weapons systems that they do? Although defense procurement would ideally reflect the objective strategic requirements of a particular nation, this course examines the sweeping extent to which anything but “objective strategic requirements” drives governments’ defense procurement decisions. Specifically, we assess how interest groups, political parties, industrial regions, military factions and bureaucracies compete for political influence as they attempt to manipulate the procurement process in their favor. A central question this course seeks to answer, then, is whether defense policy shapes procurement priorities or whether, more alarmingly, procurement pressures determine a country’s defense posture. We use comparative case material from North America and Europe to explore how weapons purchasing varies across democratic capitalist states.

INTS 4750 The Policy Making Process (5 Credits)
Governments make public policies through a complex process, which varies in its details from country to country and even from issue to issue within the same country. In this course we study various parts of those processes and some of the inputs into them. In addition, we play close attention to problem framing or problem definition in those policy processes. Within all these disparate policy processes political actors must have some notion of what problem they are trying to solve and what constitutes the set of feasible solutions to those problems. These ideas about problems and feasible solutions are not given exogenously, are not some fact of nature, but instead arise from complicated interactions among actors and institutions in the policy process. The quest we ask throughout the course is how policy problems and solutions could be framed differently, how we can learn to look outside the conceptual box that partisans to policy debates try to draw for us. Students write a series of papers during the course following a policy issue of their choice through the policy process.

INTS 4751 Comparative European Foreign and Defense Policy (5 Credits)
The focus of this course is on foreign and defense policies of key states and international organizations in modern Europe, from the Atlantic to the Uralis. After introducing Europe as a cultural, political, and geographical construct, we focus on the North Atlantic Treaty Organization and the European Union before turning to a comparative analysis of six leading European states. Security in an increasingly globalized world deals not only with defense issues, but also with economics, human rights, and questions of identity. We focus on Germany, France, the United Kingdom, Italy, Russia, and Turkey, underscoring their bilateral and multilateral associations with other European states, the United States, and the European Union, NATO, OSCE, and Council of Europe. We conclude with considerations of what “Europe” really means, and what the future holds for this vital content.

INTS 4753 Intelligence and National Security (5 Credits)
Focuses on the craft of U.S. Intelligence and its role in the making and implementation of national security policy.

INTS 4760 Russian Foreign and Defense Policy (5 Credits)
Course explores Russian foreign and defense policy from Vladimir Lenin to Vladimir Putin - heavy focus on security policy.

INTS 4765 Natural Resources and Armed Conflict under International Law (5 Credits)
The course offers a description and an assessment of how international law regulates the relationships between natural resources and armed conflicts. Attention is given to principles and rules regulating access to natural resources in the pre-conflict phase; protecting the resources pending the conflict; regulation the exploitation of the resources during and after occupations and international administrations. The role of trans-national corporations in fuelling conflicts is considered with reference to recent developments such as certification schemes, the emerging legal framework on transparency in business, and the debate on corporate responsibility for international crimes. The concept of “illegal exploitation of natural resources” is analyzed in light of the relevant resolutions of the United Nations Security Council. Finally, possible solutions to the issue of armed conflict resources (i.e., resources fuelling the initiation of conflicts) are considered from a legal perspective. Registration by departmental approval only; restricted to students participating in the Geneva travel program.

INTS 4766 State Building and War Making in the Developing World (5 Credits)
This course examines the challenges of state-building and the manifestations of armed conflict in the contemporary world. Surveying different cases and contexts, the course focuses on the role of state and non-state armed groups, the drivers of communal conflict, the historical dimensions of multifaceted state-building processes, and the legacy of colonial rule. Particular attention is paid to conflicts in the Middle East, North Africa, and Sub-Saharan Africa. The purpose of the course is to equip students with a comparative understanding of the complex causes, characteristics, and manifestations of conflict in the developing world and its cross-cutting relations to contemporary international governance. Registration by departmental approval only; restricted to students participating in the Geneva travel program.

INTS 4767 Cultures of Capitalism (5 Credits)
This seminar lays the theoretical foundations for a cultural critique of capitalism. With an eye towards colonialism, modernity, and globalization, readings are devoted primarily to different schools of thought parsing out capital as a social relationship, object of value, and form of mediation. The purpose of this class is to establish temporal and spatial commensurability across tendencies and discontinuities in capitalism by i) locating the phenomenological, ontological, and epistemological conditions of possibility for the reproduction of value and ii) asserting history, experience, and embodied praxis as productive features in the imagined abstraction of economic life and market discourse. More than an attempt to historicize the contemporary moment of deregulation, precariousness, or flexible accumulation, the course is designed primarily to unveil concurrent theories of value and the work of abstraction and reification, morality, and power, labor and materiality foregrounding the processual logics of capitalism. To do so, this course explores the theoretical stakes of production, circulation, and consumption occurring in time-space relations of commodity exchange, markets, and global finance in late capitalism. How to account for the increasing disconnect between the “real” economy and the “fictitious” value of virtual markets, financial derivatives, and future trading? How to make sense of the work of mediation - or perceived gaps therein - between consumers and producers, the labor of abstraction and the concrete reification of economic objects? Registration by departmental approval only; restricted to students participating in the Geneva travel program.
INTS 4768 Introduction to a Critique of Market Society and its Solidarity Alternatives (5 Credits)
This course is taught in French. Le séminaire propose d'introduire ou de conforter une vision "indignée" de l'hégémonie des marchés en s'appuyant principalement sur la lecture socialiste et chrétienne de l'économie par Karl Polanyi et ses critiques en particulier d'Adam Smith et de Karl Marx. Ceci se réfère surtout au concept de marchandise fictive (appliqué aux ressources naturelles comme au travail humain et à la monnaie), de richesse commune partagée et d'interdépendance économique (appliquée aux mécanismes complémentaires et antagoniques de concurrence, de redistribution, de solidarité et de partage). Une large part de cette réflexion interdisciplinaire doit ressortir des propres expériences des étudiant(e)s et de leurs recherches. Elles doivent aussi permettre de comprendre l'élaboration des alternatives, leurs potentialités et leurs limites. La situation de Genève, capitale des spéculations sur les matières premières sera notamment interpellée. Registration by departmental approval only; restricted to students participating in the Geneva travel program.

INTS 4769 Public Policy, Economic Development and Gender (5 Credits)
This course considers a number of topics associated with the links between gender empowerment, economic development and public policy. Topics include the role of gender in shaping political, economic and social opportunities; leadership; the role and global plan of action of international organizations; gender gaps in education, economic participation, health and political opportunity; conflict, HIV/AIDS; property rights; urbanization, international migration; global processes as well as the evaluation of specific policies and interventions, all within the broader context of development economics. The course is applied-oriented and open to students with little background in economics. By the end of the course, it is hoped that participants will be able to critically assess policy documents on the topics covered that are commonly produced by international organizations. Requires departmental approval; registration restricted to students participating in the Geneva travel program.

INTS 4770 The Politics and Economics of International Energy (5 Credits)
Although it is becoming increasingly evident that the world does not face an imminent shortage in the availability of fossil fuels, access to energy resources and security of energy supply remain important preoccupations for governments and companies alike. Utilization of fossil energy resources will be increasingly constrained by environmental considerations and the threat of global warming. Energy will remains a key concern in international relations for the coming decades and will influence the perception of national interest and the pattern of international exchanges and interdependence. The course aims at providing students with the critical knowledge and skills to avoid superficial generalizations and stereotypes - which unfortunately remain all too common. Requires departmental approval; registration is restricted to students participating in the Geneva travel program.

INTS 4771 Trade and Development (5 Credits)
Development, trade and their interlinkages are among the most controversial topics of today. Economics has much to say concerning these issues, and constitutes a powerful tool in terms of debunking commonly held misperceptions. This course considers a number of topics associated with the links between international trade and development. A particular emphasis is placed on the consequences of trade openness on outcomes in developing countries, i.e. on inequalities, growth and poverty, institutions and financial development, the impact of export instability and countries' specialization, terms of trade, financial crises, trade and environment. The course is applied-oriented: after reviewing basic theories associated with each topic, each lecture involves presentations of recent empirical papers. By the end of the course, it is hoped that participants will be able to intelligently read and critically assess policy documents on the topics covered that are commonly produced by international organizations. Requires departmental approval; registration is restricted to students participating in the Geneva travel program.

INTS 4772 International Business (5 Credits)
The objective of this course is to better understand how national and international political and economic factors shape the business environment, firm strategies, and associated performance in the contemporary global economy. Even though this course draws on a number of different academic disciplines including economics, political science, and international relations, the goal is always to draw out the implications for forms. This firm-based perspective is what differentiates this course from traditional academic courses on globalization. The firm-based perspective, however, should be of interest to those interested in public policy as well. After all, one cannot effectively design state interventions without examining how firms and other relevant actors will respond. What differentiates this course from one in international business strategy is that the implications for national policy design and regional global governance initiatives are given particular consideration. In so doing, this course seeks to be true to the multi-disciplinary nature of an international affairs program. Furthermore, the focus in this course on matters of considerable contemporary relevance should help prepare international affairs and other students well for job market interviews. The class covers eight important topics. Supporting each topic are online lectures that are posted in advance. Students are responsible for watching these online lectures before the class meets. Failure to do so detracts considerably from the learning experience of all concerned. In class discussion focus on the application of tools in case studies and matters of contemporary policy and business relevance. Registration by departmental approval only; restricted to students participating in the Geneva travel program.

INTS 4773 Violence, History and Memory in Twentieth-Century Africa (5 Credits)
This course offers historical, theoretical and empirical perspectives on the impact of conflict in the modern history of Africa. Opening with a guided discussion of broad debates over models of warfare and violence that apply social, cultural, materialist and instrumental theories of causation, the course then proceeds through a series of case studies in seminars. These include colonial wars of decolonization in Algeria and Kenya, the Biafran War of secession and its repercussions in Nigeria, contrasting genocides in Burundi and Rwanda, the Red Terror in revolutionary Ethiopia, liberation struggles in Southern Africa, the ‘African World War’ in Congo, interlinked conflicts in Sierra Leone and Liberia, and other cases of contemporary significance. In each case, students are encouraged to consider the means of violence employed, the causes and motivations of conflict, issues of gender, youth, religion, politics and ethnicity, the personal and communal impacts of experiencing and witnessing various forms of violence, and the transnational dynamics of conflict. Throughout, questions of culpability, ethics and moralities are tackled in relation to the various approaches to transitional or retributive justice, the problem of ‘living together again’ dominated by the pressures of memory, silence, memorialization and mythicohistory. Registration by departmental approval only; restricted to students participating in the Geneva travel program.
INTS 4774 Humanitarians and Human Trafficking: The Global History of Slavery and Abolition, ca. 1800-Present (5 Credits)
This course examines the changing nature of humanitarian activism against slavery from the abolition of the slave trade in the early 19th century to international action against human trafficking and labor exploitation in the 21st century. The first part of the course is structured around seven classes covering the history of the transatlantic slave trade in the late eighteenth and early nineteenth century, the rise of anti-slavery movements and the socio-economic outcomes of emancipation. The second part of the course considers the changing nature of slavery under colonial rule and the evolving context of humanitarian campaigns in the twentieth century including the efforts undertaken by the League of Nations, the International Labour Organization and the United Nations. Some of the key themes discussed include the ideological foundations of humanitarian activism, the economic motives for abolition, the contested definition of slavery, the relationship between new forms of slavery and the rise of colonialism in Africa and Asia, the formulation and implementation of international conventions against slavery, child labor and forced labor and the challenges confronting humanitarian NGOs today.

INTS 4775 Droit diplomatique international (5 Credits)
Ce cours vise à combler une lacune, l'enseignement du droit diplomatique ne faisant généralement l'objet que de développements à titre incident, ce malgré l'importance séculaire de ce domaine du droit international. Axé sur l'évolution de la pratique étatique des relations diplomatiques (y compris les relations avec les organisations internationales) et la jurisprudence pertinente de la CIJ, le cours se propose d'analyser les grands thèmes du droit diplomatique, tels que le droit de légation, la création et l'extinction des relations diplomatiques, les fonctions et droits/obligations liés à la mission diplomatique, le contenu et les limites des immunités des personnes, biens et locaux diplomatiques, ou encore les mécanismes sanctionnant les violations du droit diplomatiques. Il fera finalement une place à la pratique récente relative aux immunités des Chefs d'État et Ministres des affaires étrangères. Registration by departmental approval only; restricted to students participating in the Geneva travel program. Students must be fluent in French; course is taught in French only.

INTS 4776 Financial Crises (5 Credits)
This is a seminar designed to go over the literature on the sources, channels, characteristics and impacts of financial crises. The sessions are devoted to the study of papers, some older fundamental contributions and some very recent early analyses inspired by the crises that started in 2007 and is not yet over. The seminar is primarily designed for second-year Master and PhD students. Students from other programmes and departments may attend if they have a strong background in economics. Registration by departmental approval only; restricted to students participating in the Geneva travel program.

INTS 4786 Strategy, Planning, and Execution in Complex Environments (5 Credits)
This course gives participating students grounding in military operational planning and strategy, with emphasis on understanding lessons learned from a number of recent complex joint force operations. Over the ten weeks, students: 1) Examine the realities of planning and execution of multi-means (political, military, and economic operations in complex environments). 2) Examine a range of past operations (peacekeeping/peace-enforcement, counter-insurgency, traditional military confrontations, etc.) from a planning and execution perspective, looking for strengths and weaknesses, successes and failures. 3) Participate in an intensive simulation over three class meetings that have the students act as a planning cell preparing for a complex joint force operation in a modern context.

INTS 4802 Foundational Ideas in Social Science: Marx and Weber (5 Credits)
Marx's is the most striking and complex theory of revolutionary change. It has inspired millions of workers, peasants, soldiers, students and intellectuals in three large international movements (the International Workingmen's Association, the Second International, the Third International). "Capital" is perhaps the most striking depiction of how factories and capitalist society operate, from the point of view of workers, of any modern economic theory. It is a theory which novelly explains the tensions in the experience of most non-University educated people between their work experience and the current Washington "consensus" about free markets and democracy. It has motivated and empowered striking democratic movements, often across national boundaries, of the oppressed against the privileged. Where successful, however, Marxian movements both brought about significant, common good oriented improvements and failed to withstand external and internal attacks or resolve basic problems in radicals' vision of a new society. Further, Marx's vision has often been interpreted as, except in the immediate unfolding of the revolutions themselves, having little to do with democracy. In radical movements as well as in capitalist societies and academia, Marx has been fiercely attacked. For much of the Cold War, not having read Marx permitted one to expatiate on what Marx's views are; reading Marx was, until the late 1970s and early 1980s a disqualification even in teaching, let alone in the media. Marx's views are often misrepresented, dismissed without investigation as "obviously wrong." This course provides an opportunity to read the first volume to "Capital" and some of Marx's other main works and test them, in whatever depth desired, against Max Weber, the dominant theorist of American sociology and political science.

INTS 4804 Realism and Democracy (5 Credits)
Course answers questions such as: Can democracy check international cruelty? Why, according to Kant, Doyle, and Rawls, are democracies unlikely to go to war with other democracies? We discuss democratic individuality and Vietnam, democracy, and Realism as well.
INTS 4820 Democracy and War: Socrates, Thucydides, and Today’s America (5 Credits)
This course explores Socrates’ speech at his trial and decision to go to his death as, surprisingly, initiating two central features of modern democratic theory. First, Socrates is often depicted as simply hostile to the many, looking down on Athenian democracy. But what he in fact looks down on is tyrannical mob rule, the “democracy” of a particular interest arbitrarily enforced (what we might call a demented Joe McCarthy-kind of democracy). In contrast, Socrates also incarnates the idea of asking questions in a democracy, that is, dissent (prefiguring what is sometimes called today deliberative democracy). That makes a democracy capable of realizing, sometimes, a common good. Second, Socrates provides a paradigm for modern civil disobedience or satyagraha in Gandhi - we read Gandhi's translation of Plato’s Apology - and Martin Luther King's letter from the Birmingham City Jail. Nonviolent civil disobedience is necessary in a modern democracy because party-competition focuses mostly on personality issues and not on fundamental injustices. Further, this kind of protest promises major change even in dictatorships (consider Erica Chenoweth and Maria Stephan, Why Civil Resistance Works). Thus, this emphasis is a novel interpretation of Plato as opposed to, in scholarship and politics, Plato’s supposed link to authoritarian “commander-in-chief” power (Heidegger, Leo Strauss and William Kristol for example) which we also contrast in this course. The course explores the subtlety of these dialogues - the question of what Plato intended to teach his long-standing students like Aristotle who studied with him for 20 years - but leave the main points of Gandhi’s and King's interpretation intact. Third, the course explores Thucydides, History of the Peloponnesian War and Plato’s response to it in the Republic in terms of modern critiques of Empire building and the “unhinged” wars by American democracy (we look at W. Robert Connor’s elegant break with previous understandings of Thucydides during Viet Nam and John Mearsheimer's striking criticisms of post-Cold War American policy, echoing Obama’s 2013 speech at the National Defense University, in “America Unhinged.” Thucydides is a far deeper account of imperial expansion and the corruption of and threat to democracy at home than modern realist and neo-realist gestures at him. Neo-realists methodologically attempt to separate global politics from its domestic consequences as supposedly different levels of analysis; this interplay is the heart of Thucydides’ argument and deepest insight into the meaning of war and democracy.

INTS 4821 Early Modern Political Theory (5 Credits)
This course seeks to provide an historical introduction to Western political thought in the early modern and Enlightenment eras. More particularly, we focus on the development of “modernity” in the sixteenth and seventeenth centuries and the development of social contract theory in the seventeenth and eighteenth centuries. In addition, there is somewhat more emphasis on international relations than is typical in political science courses of a similar nature. No previous background in political theory (or international relations) is assumed.

INTS 4822 Contemporary Political Thought (5 Credits)
An examination of current 21st century political theory and how the events of the 20th century helped mold these ideas/concepts.

INTS 4851 Theories of Non-Violence (5 Credits)
Can a state be non-violent? Course explores topics such as the distinction between power and violence; whether nonviolent politics is possible; the distinction between an ethic of responsibility and an ethic of intention; is capitalism consistent with democracy? This seminar is interactive and class participation is required.

INTS 4852 Theories of Non-Violence II (5 Credits)
The aim of the course is to consider the unexpected power of nonviolence - we discuss several segments of Eyes on the Prize which draws a vivid picture of the fearsomeness of engaging in protest in the murderous segregated South and the accomplishments of the movements. We study the role of religion in protest against slavery - the violent Christianity of John Brown and the nonviolence but comparative ineffectiveness of William Lloyd Garrison - and the role of Gandhi's Hinduism in the emergence of King's strategy of nonviolence, which also arises from Christianity. We consider whether religion must be a primary motivation of nonviolent movements as well as the specific role of churches in the South. In this context, we read Barbara Demin's Revolution and Equilibrium which gives a secular argument for civil disobedience in the context of Franz Fanon's Wretched of the Earth. We then take up a comparison of effective violent revolutions elsewhere, particularly the slave revolt that created Haiti, and ask whether in modern circumstances, nonviolence might be as effective. We also discuss the idea and practice of nonviolence or nonviolent communication in all relationships, not just political ones. This course can be taken for 3, 4, or 5 credits.

INTS 4853 Geopolitics of South Asia (5 Credits)
This class explores the overlapping sub-national and regional conflicts threatening to destabilize Afghanistan and Pakistan and severely intensify Indo-Pakistan tensions. The seminar analyzes and assesses U.S. efforts to assist the Kabul regime to strengthen national support, reduce corruption, improve services and accelerate economic development. The nature of the Taliban, the dangers of increased poppy production, ongoing cross-border insurgency are studied. Similarly with regard to Pakistan, the seminar examines growing instability, the regional demographics of support and opposition to the current government, the role of the military, including the ISI, and socio-cultural challenges to modernization. The impact of the evolving conflicts in Pakistan and Afghanistan on India's interests and India's response are also treated.

INTS 4854 Global Sustainability and Public Policy (5 Credits)
This course considers the interaction of environmental, economics, and energy issues on global ecological systems. It offers an overview of relevant international legal frameworks and national governance systems, the state of major ecosystems – forests and species habitats; wetlands, oceans and rivers, and the atmosphere and selected policy issues related to each. Emphasis is less on “what” to think than “how” to think about and formulate policy responses to complex, multidimensional issues.

INTS 4855 The Rule of Law: Plato’s Laws (5 Credits)
Plato’s The Laws, is the most influential work dealing with the professional doctrine of executive power. This course goes back and forth from the text itself and current developments. We also read Plato’s “Seventh Letter”.

INTS 4856 Human Rights and Foreign Policy (5 Credits)
Global human rights issues and how those issues help mold foreign policy decisions.
INTS 4877 Gender and Islam (5 Credits)
Course focuses on role religion plays in shaping its followers social identities (gender) on the bases of their physical identities.

INTS 4888 Gender, Development and Human Rights (5 Credits)
Examines theories of gender and development by situating them in international human rights framework.

INTS 4890 Revolutions and State Building: Forgotten Movements for Emancipation (5 Credits)
Marx's is the most striking and complex theory of revolutionary change. It has inspired millions of workers, peasants, soldiers, students and intellectuals in three large international movements (the International Workingmen's Association, the Second International, the Third International). "Capital" is perhaps the most striking depiction of how factories and capitalist society operate, from the point of view of workers, of any modern economic theory. It is a theory which novelty explains the tensions in the experience of most non-University educated people between their work experience and the current Washington "consensus" about free markets and democracy. It has motivated and empowered striking democratic movements, often across national boundaries, of the oppressed against the privileged. Where successful, however, Marxian movements both brought about significant, common good oriented improvements and failed to withstand external and internal attacks or resolve basic problems in radicals' vision of a new society. Further, Marx's vision has often been interpreted as, except in the immediate unfolding of the revolutions themselves, having little to do with democracy. In radical movements as well as in capitalist societies and academia, Marx has been fiercely attacked. For much of the Cold War, not having read Marx permitted one to explicate on what Marx's views are; reading Marx was, until the late 1970s and early 1980s a disqualification even in teaching, let alone in the media. Marx's views are often misrepresented, dismissed without investigation as "obviously wrong." This course provides an opportunity to read the first volume of "Capital" and some of Marx's other main works and test them, in whatever depth desired, against Max Weber, the dominant theorist of American sociology and political science.

INTS 4900 International Politics (5 Credits)
Topics on discussion include: levels of analysis; realism; neo-realist structuralism; international society and the English school; international anarchy; process variables and international institutions; international security institutions; rationalism, constructivism, and the purposes of theory; norms and ideas; gender and identity; and postmodernism and post-structuralism.

INTS 4903 Social Construction of International Society (5 Credits)
Examines recent theoretical work in the field of international relations that treats international society and its practices as social constructs.

INTS 4905 War and Peace (5 Credits)
An intermediate course which examines the historical relationship of war to politics, such as the military profession, military organizations, economics of defense planning, limited use of force, demobilization, war reconstruction, military rule, and civilian control. Current world trends toward democratization focus attention on the issue of creating a democratic army for a democratic state. Readings cover western industrialized, communist, post-communist, and 3rd world countries.

INTS 4906 Classics of International Theory (5 Credits)
Professor will choose various books by classic political theorists for students to read and discuss in class.

INTS 4907 International Terrorism (5 Credits)
This course will examine the literature on international terrorism both before and after 9/11. It will include an overview of the origins, history, goals, strategies, and capabilities of significant terrorist groups (emphasizing Al Qaeda). It will also examine the history of United States and international efforts to combat terror, focusing on post 9/11 debates over grand strategy and tactics (e.g., the relationship between offense and defense, active vs. passive defenses, intelligence reform, multilateralism vs. unilateralism, the relationship between "rogue states" and terror, etc.).

INTS 4912 African Conflicts: Causes and Conflicts (5 Credits)
Twenty years after the "Third Wave" of democratization first swept across the African continent, African states have experienced a wide range of successes and problems in seeking political development through democratic models. Common to nearly all African states, however, is the fact that they were created by colonial powers, forcing many formerly independent people to live under one political roof. Thus before they could go about the business of governing, African states at independent first had to address their artificial natures by building coherent nations out of the many peoples living within their borders. Democratic political systems were seen as the best solution to this governance problem by allowing the many peoples of African states flexible institutions through which they could negotiate their differences, and so govern effectively. Within several years of independent, however, most of the early African democracies had collapsed under the weight of their deep ethnic and religious differences. Decades of authoritarian rule did little to address the problems of governance, and exacerbated ethnic chauvinism and clientelism. Bankrupt and often near collapse by the late 1980s, and under pressure from Western governments, many African states turned back to democracy in the 1990s. Yet their deep ethnic and other divisions remain, as do clientelistic patterns of political behavior. These fundamental conflicts over the state and its governance have characterized African politics since independence. This class reviews the problems of state development in Africa, and the extent to which democratic solutions can resolve those problems. We do so by examining these issues from both the perspective of political science and of conflict resolution. Classes draw primarily on the perspectives of practitioners from the relief and rehabilitation community. Guest lectures include representative of government agencies, international organizations, and NGOs.
INTS 4914 Statecraft and Smartpower in the Digital Era (5 Credits)
This course examines new approaches to the practice of statecraft in an era of rapid global change. Globalization is upsetting traditional international order and institutions, and changing the pace and intensity of decision making. Nation-state governments, while still the primary actors, must adjust to new sub-national, regional and transnational forces and players in a far more complex global arena. Digital Communication is revolutionizing relationships and interaction in the global arena. More groups and the general public are involved or mobilized in public participation than ever before. Vastly more information flows ever more quickly. Partisanship rises with segmentation, threatening fragmentation in public life. The new era reflects the imbalances and strains of major demographic change, especially the impact of an expanding tech-savvy younger generation. A significant youth bulge in volatile developing nations fuels reform efforts, but also creates the potential for conflict arising from continuing injustice and unmet expectations. Foreign policy institutions and decision makers here and abroad are increasingly subject to cross-pressures from competing domestic and transnational interests. In the U.S. the Inter-Agency must balance influential single-issue stakeholders and constituencies here and abroad. The course explores how the U.S. and other governments are responding to the new global challenges. Participants see to frame new “rules” of statecraft in the digital era.

INTS 4920 Conflict Resolution (5 Credits)
An introductory course which identifies the collective factors leading to successful reconciliation or agreeable compromises in conflicts; analyzes the role and influence of cultural norms, gender conditioning and different bargaining strategies on the resolution process; applies the practical fundamental of negotiation on particular problem-solving techniques.

INTS 4924 Democratization in the Middle East (5 Credits)
The promotion of democracy process and its implementation of democracy have emerged as a major goal for U.S. and world policy makers and have attracted the attention of many scholars. Democracy is now widely regarded as a political system that minimizes conflict, promotes sustainable development, and is a vital tool in the struggle against terrorism. However, the results of efforts to create democracies in various countries, including Iraq and Afghanistan are a clear illustration of the difficulties involved in making transitions to democracy. In this seminar, we shall focus on what is known about democratization, consider the nature and role of Islam, examine the state of democracy in key countries of the region, and consider the ways in which the U.S. and other external actors might strengthen democratic forces in the region.

INTS 4928 Topics in International Law (5 Credits)
This is a reading/seminar course. Students are asked to be well-prepared and contribute to the discussion. We explore mostly modern forms of torture. The use of torture has not abated in the last 100 years despite conventions, treaties and watchdog organizations. What has occurred is that torture has become “stealth”, to use Professor Rejali’s term. These “stealth” techniques leave no mark and have been developed equally by democratic states and totalitarian regimes. It is also clear that the U.S. has engaged in state sponsored torture (see The Constitution Project bi-partisan report of April, 2013). An important question before us is if there is any place for torture in the 21st century and if torture is an effective means to gather intelligence. If the answer to both questions is “no,” and torture violates the most basic ethical, moral, and legal norms of humanity, they why does it persist?.

INTS 4931 International Organizations (5 Credits)
An intermediate course on approaches to the study of international organizations, including institutionalism, neo-functionalism, complex interdependence, international regimes, and epistemic communities. Case studies examining collective security and peacekeeping, human rights, Antarctica, and the environment are discussed. Prerequisite: INTS 4900.

INTS 4932 International Law I (5 Credits)
INTS 4934 Intervention: Policies & Pract (5 Credits)
Procedures, policies and practices of international organizations and the roles they play in helping resolve internal issues and conflicts.

INTS 4935 Humanitarian Law of Armed Conflict (5 Credits)
This course is a theoretical and practical introduction to international humanitarianism law (IHL). IHL is known by many other names such as “humanitarian law,” “law of conflict,” and “laws of war.” All these terms refer to the rules regarding the treatment of civilians and non-combatants in areas of armed conflict and the rules of engagement for soldiers and combatants. These “rules” are especially important to know if you eventually work for an IO or NGO that finds itself in areas of armed conflict. Cross listed with CPSY 4560.

INTS 4936 International Law and Human Rights (5 Credits)
An introductory course examining the concept of human rights, including political, economic, social, and cultural rights. International, regional and national institutions, norms and procedures to protect individual and group rights are discussed. Recommended prerequisite: INTS 4940.

INTS 4937 Human Rights and Refugee Systems (5 Credits)
An introductory course which focuses on an examination of the international refugee system from the perspective of human rights achievements and abuse. Focuses on policies and mechanisms of refugee dislocation, resettlement, and repatriation with emphasis on persons from Asia, Africa, and Eastern Europe. Mental health outcomes are examined in depth. Prerequisites recommended: INTS 4940.

INTS 4939 Human Rights: Genocide (5 Credits)
An introductory course examining the concept of human rights, violations. From violence and brutality in classical antiquity, slavery in America, terror in the Soviet Union under Stalin, World War II and the Holocaust, and the Cambodian massacre in the 1970s. The course is designed to understand the extremely diverse conditions of regimes that used mass violence for political ends. Prerequisites recommended: INTS 4940.

INTS 4940 Introduction to Human Rights (5 Credits)
An introductory course focused around historical and theoretically relevant texts in human rights. First and second generation rights are emphasized. Early liberal, conservative, and socialist understandings of human rights are highlighted against their respective historical background.
INTS 4941 Human Rights and International Organizations (5 Credits)
An introductory course exploring the changing roles of international organizations in their efforts to protect and promote human rights. Examination of both the global and regional levels of human rights activities of international intergovernmental organizations are discussed. Recommended prerequisite: INTS 4940.

INTS 4945 International Human Rights Law and Advocacy (5 Credits)
This course includes a review of major international human rights instruments, the methods for bringing complaints to the UN and to each of the three regional human rights systems (Inter-American, European, and African), and various substantive topics - refugee and asylum law, humanitarian law (genocide, torture, war crimes, and crimes against humanity), special rights of indigenous peoples, minorities, women and children, and transitional justice. Following this course, students may enroll in INTS 4995, the clinical component of the human rights advocacy program.

INTS 4947 Human Rights and National Security (5 Credits)
In a sense, the debate over human rights and security is rooted in ancient arguments over power and morality. Yet it is particularly since the end of World War II and the defeat of the Nazis, the emergence of the United States as the leading world power, and the onset of the nuclear age, that the debate over the relationship between human rights and national security has been part of operational discourse in real world politics as well as in university classrooms. The course title suggests an amplitude of subject matter far greater than can be encompassed in the ten weeks of the quarter. So, instructors are likely to differ about which issues to explore in the available time, and inevitably, they will differ in their pedagogical methods. Differences in methodology will reflect differences in taste, personality, training and experience.

INTS 4951 Comparing International Societies (5 Credits)
Course explores variations in societies of states across time and place.

INTS 4953 Mental Health, Human Rights and Development (5 Credits)
To provide graduate students with an integrated theoretical and pragmatic orientation to the intersection of health and human rights, as these "play out" in the context of international development work.

INTS 4954 Human Rights Research and Design (5 Credits)
The purpose of this course is to acquaint students with graduate level research and writing strategies that facilitate the composition of concise, articulate, and informative pieces of scholarly and policy-oriented work. We explore an array of research options and techniques and look critically at the ways in which different uses of language are constitutive of meaning and structure in written works. This is considered a "skills" course which is designed to allow students to explore in depth a sub-topic of interest within a broader topic in the field of Human Rights. The topic varies each term. The work completed by students is edited minimally, and published in the Human Rights and Human Welfare Digest, the Josef Korbel School's online human rights journal. This digest is intended to serve as a resource for policymakers, non-profit organizations, and human rights advocates, by presenting concise and reliable information that is both informative and accessible. In the first half of the class, we focus on building practical research strategies, including: determining the parameters of research; identifying and accessing appropriate sources of information; using bibliographic management software; and compiling an annotated bibliography. The second half emphasizes the development of writing techniques that culminate in the production of an analytical essay and annotated bibliography of publishable quality. Attention is paid to grammar, syntax, structure, style, and appropriate language use.

INTS 4955 The Human Trafficking Clinic (5 Credits)
The Human Trafficking Clinic (HTC) is a two-year training program on forced labor, human trafficking, modern slavery, and international labor migration issues. The HTC has two areas of focus: research and advocacy. Most of the research is centered around the development of a human trafficking index. The advocacy element is centered around crafting legislative initiatives on both the state and federal level as well as community outreach and education. Guest lecturers present on research methodology, field research, statistics, future studies, and important issues related to forced labor and human trafficking. In addition to research and topic related discussions from other academic units and disciplines, representatives from IOs, NGOs, and government agencies present their work on the topic. Prerequisite: INTS 4987.

INTS 4957 Global Poverty and Human Rights (5 Credits)
The main purpose of this course is to understand the relation between global poverty and human rights in a broad sense. We will try to understand the extent and causes of global poverty both empirically and theoretically. We will also try to understand the nature of human rights discourse in their particular context by focusing on its social, economic and political dimensions. We will also try to understand the underlying causes of oppression, inequality and poverty in the world. In order to do this, we will look at the relationship between economic systems, political constraints and the nature of global poverty and human rights discourse historically, theoretically and empirically. In this way, both the reach and the current limits of the global poverty and human rights discourse can be identified. The last part of the course will focus on creating a new, more objective discourse on the nature of global poverty and human rights in light of our structural understanding of the political economy of global poverty and human rights.

INTS 4965 Technology and Sustainable Development (5 Credits)
Technology has always been a major influence on cultures and societies, national and international. Today, all countries recognize the key role that technology plays in achieving sustainable development and are striving to harness its potential while minimizing its negative impacts. New technologies such as robotics, genetics, information and communication all promise transformations that can greatly improve the quality of life of peoples everywhere. At the same time, they can also develop in ways that do not lead to as sustainable a future. Thus, they generate controversy and difficult policy choices for governments and peoples everywhere. Accordingly, it is essential to understand the nature of technology and its role in social and political change as well as the ways in which it can be controlled and harnessed for positive ends. In this seminar we will focus upon the relationship of technology to sustainable development and pay special attention to emerging technologies and to such issues as technology transfer, the relationship between technology and democracy, technology assessment and control, the role of appropriate technology, and how developing countries can develop modern scientific and technological capabilities that promote sustainable futures.
INTS 4966 Applied Field Methods (5 Credits)
An introductory course for students planning to conduct research in developing countries. Practical information is presented on transforming hypothesis into a fieldwork setting, questionnaire construction and administration, and interviewing techniques.

INTS 4972 Global Environmental Governance (5 Credits)
Global environmental problems pose seemingly intractable problems for international relations and policy. In this seminar, we probe some of the practical and theoretical difficulties associated with solving such problems. These problems include: How can sovereign nation-states agree to cooperate on environmental problems and how can such cooperation include businesses and civil society? No international institution can legitimately coerce nations into such cooperation. Therefore, international institutions much get them to agree to cooperate, must find ways to bring business and civil society into those agreements, and then find ways to monitor and enforce the agreements. This task is harder than it might seem, and we explore both theories and cases that illuminate it.

INTS 4981 Internship: Gov or Business (0-5 Credits)
This course enables students to work in a practical setting to acquire experience in an international organization, government agency, or non-profit foundation. The work, undertaken once a student is enrolled in GSIS, must be approved in advance by the academic advisor as relevant and worthwhile. Credit is determined by actual work time (100 hours = five credits). A grade of "P" (pass) is given after the work is completed, and a letter from the internship supervisor summarizing the student's experience is submitted to the Graduate Studies Office. Tutorial Record Form required.

INTS 4985 Strategic Problems in Intelligence (5 Credits)
Course will examine some of the major cases where intelligence has contributed to the success of the US Foreign strategic policy since WWII.

INTS 4987 Forced Labor and Human Trafficking (5 Credits)
This course looks at a brief history of slavery, especially as it pertains to the British, West African, West Indies, and American triangle. We then look at contemporary issues of forced labor, human trafficking and contemporary slavery. Human trafficking is a very complex problem that requires a sophisticated, inter-disciplinary critique.

INTS 4989 North American Defense and Security (5 Credits)
This course will challenge students to analyze the evolving North American Defense and Security environment since 1945. The course will begin by focusing on the history of the Canada - United Status (CANUS) defense and security relationship that began in the wake of World War Two and was predicated upon protecting the North American continent from Soviet attack with the formation of the Permanent Joint board on Defense (PJBD), Military Cooperation committee (MCC), and North American Air Defense Command (NORAD). However, the end of the Cold War and subsequent terror attacks of 9/11 dramatically changed the North American Defense and Security environment and created the need for enhanced cooperation between the United States, Canada, and Mexico.

INTS 4991 Independent Study (1-15 Credits)
A special individual arrangement for students to pursue more advanced work beyond that available through regular courses. Such study is arranged between professor and student prior to registration. Academic grades are assigned for course performance. Tutorial Record Form required.

INTS 4992 Directed Study (1-5 Credits)

INTS 4993 International Students Writing Lab (0-1 Credits)
Emphasizes aiding international students in perfecting their English writing skills as well as assisting them in developing ideas and solutions for specific course papers. Students receive advice on writing logic and structure as the instructor individually reviews draft papers and provides written comments. Classroom sessions provide students with the opportunity to share ideas as well as problems. An online portion will provide students with samples of scholarly writing, exercises, and classroom discussion supplements. Former participants are welcome to attend as part of independent study. Course can be taken for 0 or 1 credit and may also be repeated.

INTS 4995 M.A. Thesis Research (1-10 Credits)
This course allows a student to receive credit for research and writing undertaken as part of the master's thesis or SRP preparation. Such study is arranged between professor and student. Academic grades are reassigned for course performance. Tutorial Record Form required.

INTS 5991 Independent Study (1-10 Credits)
INTS 5992 Directed Study (1-5 Credits)
INTS 5995 Ph.D. Dissertation Research (1-10 Credits)
This course allows a student to receive credit for research and writing undertaken as part of the doctoral dissertation preparation. Grades of "P" (pass) are assigned after the dissertation is accepted by the committee. Prerequisite: Ph.D Candidacy (passing Comprehensive exams).

Morgridge College of Education

The University of Denver Morgridge College of Education is committed to preparing highly competent, socially responsible, ethical and caring professionals to promote learning in diverse settings. With a guiding commitment to excellence, our programs offer high-quality and rigorous academics with an emphasis on relevant, practical experience through field experiences, research and community-oriented projects. Through our focus on inclusiveness and innovation, we strive to create purposeful learning experiences designed to transform people and ideas.

With several regionally and nationally recognized programs, the College is known for its diverse, high quality students and alumni. The College offers certificate, master's and doctoral programs in Educational Research, Policy and Practice; Research Methods and Statistics; Library and Information Science; and School and Counseling Psychology.
Child, Family and School Psychology

Office: Katherine A. Ruffatto Hall, 2nd floor
Mail Code: 1999 E. Evans Avenue, Denver, CO 80208

Web Site: http://morgridge.du.edu/programs/child-family-and-school-psychology/

Child, Family, School Psychology

The Child, Family and School Psychology (CFSP) program provides students with the knowledge and skills relevant for collaboration with diverse families, students, educators and professionals. These programs are designed to help graduates to meet the educational and mental health needs of all students and families within a rapidly changing global society based on a strong understanding of the interrelationship between environmental, neurobiological and cultural influences on development.

Our Program’s Goal

No matter what degree a student chooses to pursue, our program goal is to prepare highly competent, collaborative, ethical and self-reflective scientist-practitioners who can solve problems and share decision-making with others to optimize social-emotional, cognitive, academic and behavioral outcomes for typically and atypically developing children from birth to age 21.

Master of Arts in Child, Family, and School Psychology

The CFSP Master’s (MA) degree prepares students interested in working in community agencies or educational settings that emphasize policy as it relates to direct service to young children and families. Licensure as a school psychologist is not available with the MA in CFSP degree. The MA courses are aligned with the CFSP School Psychology Doctoral degree and prepare students for further study.

Educational Specialist degree in Child, Family, and School Psychology with a Concentration in School Psychology

The CFSP Educational Specialist degree – School Psychology Generalist (EdS-G) prepares professionals in all aspects of School Psychology services to work with children and families from birth to age 21 in school or community settings. All graduates of the EdS program are eligible for a Colorado Department of Education license in School Psychology and the National Association of School Psychologist’s National Certification (NCSP) after the successful completion of all coursework and passing the Praxis II/National Association of School Psychology licensing exam.

Program Accreditation

The Ed.S. degree is conditionally approved by the National Association of School Psychologists (NASP).

Educational Specialist degree in Child, Family, and School Psychology with a Concentration in Early Childhood School Psychology

The CFSP Educational Specialist degree – School Psychology with Early Childhood Concentration (EdS-EC) prepares professionals in all aspects of School Psychology services to work with children and families from birth to age 21. This degree requires an additional 13 hours of integrated core and practical coursework, beyond that required for the EdS- Generalist degree. All graduates of the EdS program are eligible for a Colorado Department of Education license in School Psychology and the National Association of School Psychologist’s National Certification (NCSP) after the successful completion of all coursework and passing the Praxis II/National Association of School Psychology licensing exam.

Program Accreditation

The Ed.S. degree is conditionally approved by the National Association of School Psychologists (NASP).

Doctor of Philosophy in Child, Family, and School Psychology, Pathway for EdS Professionals

The CFSP PhD - Pathway for EdS Professionals is a unique PhD program designed for EdS professionals who wish to deepen their expertise in the dynamic field of education and school psychology. This degree program meets the needs of experienced professionals and recent graduates with an EdS from a NASP approved program interested in enhancing their careers through the development of applied research and leadership skills. It is intended to link professional knowledge and research with the world of practice in a chosen specialty area of study. Students take a flexible array of advanced courses in child and family studies, family and systems service delivery, organizational management, research and program evaluation and policy development that are designed to develop expertise matched to individual interests and proficiency.
Doctor of Philosophy in Child, Family, and School Psychology

The CFSP PhD degree – School Psychology (PhD-SP) prepares professionals in all aspects of doctoral-level school psychology services. All graduates are eligible for a Colorado Department of Education license in School Psychology and the National Association of School Psychologist’s National Certification (NCSP) after the successful completion of all coursework and passing the Praxis II/National Association of School Psychology licensing exam. PhD-SP students are required to pass comprehensive examinations and to complete a dissertation. The PhD-SP is currently under review for approval by the National Association of School Psychologists (NASP).

Program Accreditation
This degree is under review for approval by the National Association of School Psychologists (NASP).

Master of Arts in Child, Family, and School Psychology

- Online Application for Graduate Admission
- One (1) official transcript from each college/university where at least 1 credit has been earned, mailed directly to DU
- Graduate Record Exam (GRE) official score report (taken within the last five years)
- 2 Letters of Recommendation (uploaded online by recommender) – 2 required; 3 recommended.
- Statement of Professional Goals
- Current Vita/Resume
- $65 Application Fee: The application fee may be paid with a credit card only at time of submission. You cannot pay the fee online once you have submitted your application. The application fee may also be paid on a bank draft or personal check drawn from a U.S. bank.

Courses
CFSP 3900 Child Guidance (5 Credits)
Students in this class explore effective child guidance theories and factors that impact their classroom application with young children from birth to age 8. Empirically-based positive guidance techniques and strategies are reviewed and applied to everyday practice, especially as they relate to establishing prosocial environments, classroom management, and meeting the needs of children and families from diverse backgrounds.

CFSP 3910 Early Childhood Nutrition (3 Credits)
Young children have specific nutritional and physical needs. This course covers the nutritional needs of children, such as how to ensure that they get all the nutrients they need to stay healthy. The course explores what consists of safe foods at various stages in childhood, especially when not all foods can be eaten by infants and toddlers. Learn about the best practices in the field of early education regarding what foods to serve young children that promote positive health, hygiene and physical development.

CFSP 3991 Independent Study (1-10 Credits)
CFSP 3992 Directed Study (1-10 Credits)
CFSP 4000 Assessment for Non-Psychologists (2 Credits)
Foundation and methodology of assessment are considered in the context of informing practices of professionals who construct a variety of test formats including assessment of cognitive abilities, achievement testing, vocational assessment, and assessment of personality.
CFSP 4301 Professional and Ethical Issues in Education (3 Credits)
This course examines professional issues pertinent to working with early childhood through adolescent populations in school and community settings. Professional issues and contemporary service models pertinent to the field of early childhood and school psychology are reviewed, including an introduction to ethical issues, federal mandates, professional training, and roles and responsibilities. Students learn and are involved in casework discussion pertinent to the application of best practices in the delivery of assessment, intervention, and consultation services. Special emphasis is given to current mental health and education regulations and reforms. Controversial issues highlighted in the field are covered including differential issues facing early childhood and school psychology professionals in urban and rural settings. Students become acquainted with a variety of ethical issues affecting practice in the public schools; in hospital, agency, and private settings; and in higher education. Attention is focused on ethical standards, reasoning processes, and conduct in applied settings.

CFSP 4302 Legal Issues in Education (2 Credits)
This course is designed to acquaint students with a variety of legal issues affecting practice in the public schools; in hospital, agency, and private settings; and in higher education. Attention is focused on federal and state legislation, special and regular education case law, psychological practice case law, and ethical standards, reasoning processes, and conduct in applied settings. Special consideration is given to the nonequivalence of ethical standards of practice as they relate to legal mandates and court decisions concerning practice in the schools.

CFSP 4303 Risk, Resiliency & Prevention (3 Credits)
This course examines the history and theoretical bases of resiliency research and the characteristics of children at significant risk of delays, disorders, and low-incidence disabilities. Participants obtain practical information regarding the assessment, identification, amelioration, facilitative responses, and intervention in school and community settings for these populations. The course moves beyond a pathology approach that focuses on the deficits of children and families to an empowerment perspective that focuses on strengths. The course is grounded in child development research and educational and family systems Prevention principles, curriculum, and policy agendas are discussed that build on a model of collaboration between and among disciplines in community and school settings.

CFSP 4304 Diversity in School and Community Settings (3 Credits)
This course explores diversity in children and families, and the impact of culture on personal and family development. Emphasis is placed on the intersection of school and community settings’ cultures and those of children and families, and how this affects learning and development for individuals and groups of children. Attention is given to students’ cultures and cultural experiences, and how these affect the work they do with children and families in school and community settings.

CFSP 4305 Exceptional Child: Biomedical & Psycho-Social Aspects (3 Credits)
This course provides a broad survey of the field of exceptionality and special education. Included are discussions of current issues and controversies in the field, characteristics, classification, diagnosis, and educational interventions for early childhood and school-aged children with high-incidence and low-incidence disabilities who have exceptional educational needs. Biomedical and psychosocial etiologies are reviewed. Implications for child and family interventions and supports also are addressed.

CFSP 4306 Exceptional Child: Biomedical & Psycho-Social Aspects (3 Credits)
This course provides an overview of early academic competencies across diverse settings and stakeholders, such as families, teachers/providers, programs, and communities. A comparative analysis of evidence-based early literacy strategies, environments, curriculum, and a review of current evaluation and instructional language and math literacy practices for working with teachers, families, and young children is undertaken. Play-based and other informal methods of assessment and intervention are covered, including the integration of technology and strategies to promote early skill development with language and math with infants, toddlers and preschoolers in natural environments.

CFSP 4310 Infant Development (3 Credits)
This course provides an overview of theoretical, research, and practice issues in the field of child development. Attention is given to sensorimotor, cognitive, language, and social-emotional development. The focus of the course is on typical development of children from early childhood to early adolescence. The course will emphasize the synthesis of past research into current findings and accepted theories and will allow the student to broaden their understanding of the impact of research on current policies and practices.

CFSP 4311 Child Development (3-5 Credits)
This course provides an overview of the growth and development of the child from conception to twelve years. Attention is given to physical/sensorimotor, cognitive, language, and social-emotional development domains with a focus on typical as well as atypical development. Research and policy are reviewed as it relates to developmentally appropriate practice addressing the whole child and the creation of supportive environmental contexts. Guided observation and individual case work allow for application and integration of developmental theory and practice.

CFSP 4312 Learning Application and Analysis (3 Credits)
This course examines learning theories and applied behavioral principles. Students learn to apply theories to case studies and fieldwork relating to infants, toddlers, preschoolers, and school-age children with and without disabilities. Students work in teams to analyze and solve problems relating to learning and behavior at home and school, and to develop positive behavioral support and effective learning plans.

CFSP 4315 Professional and Ethical Issues in Early Childhood Special Education (3 Credits)
This course provides students with an understanding of the role of an Early Childhood Special Educator Specialist and serves as the foundation for students who are interested in pursuing this as a profession. This includes the profession’s ethical and professional practice standards, and understanding of the multiple roles and complex situations across wide age and developmental ranges. This course also covers the historical laws and legal issues associated with the profession. The course also highlights why special educators engage in professional activities and learning communities that benefit individuals with developmental issue and their families, colleagues, and their own professional growth. This course promotes the idea that special educators are lifelong learners and regularly reflect on and adjust their practice.
CFSP 4320 Infant Assessment (3 Credits)
This course is designed to teach students how to assess infants using a variety of standardized and non-standardized methods. The entire assessment process including screening, evaluating, writing results, and interpreting the results to families and to professionals are addressed. Tests are examined with consideration for when and why specific instruments should be used. Students are trained in-depth in the administration and interpretation of a variety of instruments for assessment of cognitive, language, social-emotional and motor development. Prerequisite: CFSP 4310.

CFSP 4322 Psycho-Educational Assessment I (4 Credits)
This course is one of two required courses designed to provide students in School Psychology with expertise in individual intelligence and achievement test administration, scoring, interpretation, and report writing. Each student has an opportunity to administer various cognitive and achievement measures, with particular emphasis on the Wechsler Scales. Contemporary issues pertinent to the assessment of intelligence are covered. Emphasis is placed synthesizing and integrating information from cognitive and achievement assessment with other sources to produce effective educational recommendations. In addition, the role of these tools in the special education qualification process is highlighted. Important issues regarding the use of such tests are discussed, as well as the use of tests in schools and clinical practice. The focus of the class is primarily on the assessment of school-aged children. Lab fee required.

CFSP 4323 Psycho-Educational Assessment II (4 Credits)
This course is the second of two required courses designed to provide students in School Psychology with expertise in individual intelligence and achievement test administration, scoring, interpretation, and report writing. Each student has an opportunity to administer various cognitive and achievement measures, with particular emphasis on the Woodcock Johnson Scales. Nontraditional forms of assessment, as well as adaptive behavior measures, are also covered. Integrating results of assessments with other data to provide effective educational recommendations continues to be an emphasis. The focus of the class is on the assessment of school-aged children. Lab fee required.

CFSP 4324 Social-Emotional Assessment (4 Credits)
This course is designed to provide students with knowledge of the major approaches to assess a school-aged student's social and emotional status. Instruction includes underlying theories, use and interpretation of interviewing techniques, observation methods, objective behavior ratings, self-report measures, sociometric procedures and selected projectives. Emphasis is placed on the integration and interpretation of multimethod, multisource and multisetting data to improve diagnostic accuracy, and the use of assessment results in developing effective intervention strategies. Students learn to incorporate such assessment information using case studies. In addition, students develop skills in writing case reports and in making effective presentations of social-emotional assessment results. Consideration is given to contemporary issues in the assessment of children's social emotional functioning. Lab fee required.

CFSP 4326 Preschool Assessment (3 Credits)
This course is designed to teach students how to assess preschoolers using a variety of standardized and non-standardized methods. The entire assessment process including screening, evaluating, writing results, and interpreting the results to families and to professionals are addressed. Tests are examined with consideration for when and why specific instruments should be used. Students are trained in-depth in the administration and interpretation of a variety of instruments for assessment of cognitive, language, social-emotional and motor development. Prerequisites: CFSP 4311 and CFSP 4320.

CFSP 4330 Family-School Partnering and Consultation (3 Credits)
This course is designed to familiarize educational, mental health, and early childhood service providers with essential attitudes, approaches, and actions necessary to form successful family-school-community partnerships that can foster development and learning, especially for children with disabilities. Ecological, family systems, and family-centered theory and principles serve as the foundation for working collaboratively with families from diverse cultural and social backgrounds within school and community settings. Students gain skills in family interviewing; consultation to identify family strengths, needs, and resources; collaborative problem-solving; and multi-systemic learning. Evidence-based family involvement, education, and intervention strategies contribute to positive family-school partnering relationships are reviewed within a multi-tiered, school-based service delivery framework.

CFSP 4332 Classroom Management and Consultation (4 Credits)
This course is designed to provide students with knowledge of the major approaches to assess a school-aged student's social and emotional status. Instruction includes underlying theories, use and interpretation of interviewing techniques, observation methods, objective behavior ratings, self-report measures, sociometric procedures and selected projectives. Emphasis is placed on the integration and interpretation of multimethod, multisource and multisetting data to improve diagnostic accuracy, and the use of assessment results in developing effective intervention strategies. Students learn to incorporate such assessment information using case studies. In addition, students develop skills in writing case reports and in making effective presentations of social-emotional assessment results. Consideration is given to contemporary issues in the assessment of children's social emotional functioning. Lab fee required.

CFSP 4335 Infant & Family Interventions (3 Credits)
This course will describe various models for intervention with infants and toddlers with disabilities, emphasizing intervention within natural environments. Working with children and families in home, childcare, and other community settings will be emphasized and contrasted with intervention in more clinical settings. Students learn how to consult with parents and community professionals in providing coordinated transdisciplinary services when working with children in home and community settings. All areas of development will be addressed. Field experiences with children and families are expected to practice the skills addressed in class. Families will be asked to share their experiences to enable students to gain the "human" side of theory and practice.

CFSP 4336 Preschool Interventions (3 Credits)
This course covers early childhood interventions applicable within community, preschool and home environments. A hierarchy of intervention strategies is addressed including universal, targeted, and intensive approaches. There is a focus on building supportive networks, routine-based intervention strategies, and collaboration to enhance family resources. Students review empirically validated early interventions and curriculum for young children exhibiting both normal and delayed development.
CFSP 4337 School-Age Academic Competencies (4 Credits)
The purpose of this course is to review theories of learning disability and response to intervention approaches that incorporate environmental, curriculum-based, standardized, analytical or diagnostic assessments. Students learn to link assessment data to targeted empirically-valid learning and behavioral; interventions and strategies for students exhibiting difficulties or delays in literacy, written language, or math skills. Students evaluate learning environments, formulate instructional hypotheses, and plan interventions and strategies in regards to phonemic awareness, decoding/phonics, word recognition, reading fluency, listening/reading comprehension, study skills, written expression, mathematical calculation or problem-solving. Guidelines to promote differentiated classroom instruction and for working with students with limited English proficiency are reviewed. Effective family-school partnering and home-school consultation practices are highlighted to further facilitate learning. These goals are accomplished through critical readings and assignments, classroom case discussion, demonstrations, modeling, practice with hypothetical cases, and individualized tutoring with a referred student.

CFSP 4338 Low-Incidence Disability and Intervention (3 Credits)
This course reviews a wide range of neurodevelopmental disorders and low-incidence disabilities including autism, fragile X syndrome, and Fetal Alcohol Syndrome, visual and hearing impairment, along with syndromes associated with chromosomal deletions. Implications for assessment and intervention are outlined including diagnostic criteria, prevalence, and treatment and intervention strategies. Research on identification and treatment including state of the art interventions and assistive technology are addressed. Experts and researchers on specific disabilities, from the community will be used as guest lecturers. Students observe children within community sites and also work with local families affected by low-incidence disabilities.

CFSP 4339 Introduction to Play Therapy (3 Credits)
This course examines the history and theoretical bases of major theories of play to enhance children's social-emotional and adaptive functioning. Child-centered, interpretive, and structured play therapy models are reviewed. Information is covered regarding preparation, selection of materials and toys, playroom characteristics, facilitative responses, and how to adapt play therapy in school, home and clinical settings. The play therapy process is illustrated from the initial referral and contact through termination, including observing and responding during sessions, facilitation and interpretation, therapeutic limit setting, and group play therapy strategies. Case studies, role play, video and script analysis are incorporated as is brief play therapy and applications with special populations. Efficacy, evaluation and future areas for professional development are reviewed. This course is designed as an introductory experience to prepare students for further supervised practica in play therapy.

CFSP 4340 Counseling Children and Adolescent (4 Credits)
This course provides students with counseling theory and practice strategies related to contemporary, empirically validated approaches to improve interpersonal, emotional and social functioning in young children to adolescents. Students review and develop skills necessary to conduct professional, developmentally informed and theoretically driven individual and group mental health intervention in school and community settings. Students participate in an initial supervised counseling experience with a child or adolescent as a prerequisite experience during their supervised advance practicum.

CFSP 4342 Crisis, Intervention and Prevention (3 Credits)
This course provides the knowledge and skills needed to respond effectively and to be a member of a school or community crisis team. Crisis theory, models, conceptualizations and current research are covered with a focus on the components of the crisis response and specific individual and group counseling skills needed to provide crisis intervention and postvention. Essential guidelines and components of a comprehensive community/school safety and crisis play, national and local policies and programs and effective prevention strategies are reviewed.

CFSP 4343 Group Counseling Children and Adolescents in School Settings (4 Credits)
This course is designed to give students an introduction to group theory, research, and practice. It focuses on group theory and research as is relevant to children and adolescents in school settings, but also provides instruction and experiences in a variety of group techniques. The course is designed for students in counseling psychology, school psychology, and other related fields who work with children and adolescents in a school group context. This course aims to define therapeutic groups broadly within a school setting. Prerequisites: admission in a school or clinical licensure program; CFSP 4340 or equivalent.

CFSP 4349 Practica I (1-4 Credits)
Taken during the first year of entry, the Practica is a supervised initial year field experience designed to expose students to a variety of home-, community- and school-based settings that serve families with children who have developmental and special needs, and in the CFSP Clinic. Each week for up to four hours, students are expected to attend, observe, and participate in a range of site-specific team meetings and services offered to families and children. For the MA in Educational Psychology degree, students, during the fall or winter quarter, identify, develop and initiate a research project with input from the faculty. The MA project culminates during the fourth quarter (summer) and serves as the final project in lieu of a comprehensive exam.

CFSP 4351 CFSP Clinic (2-3 Credits)
Supervised field experience in the CFSP Clinic working with preschool through high school-aged students and their families. Casework includes assessment, intervention, and consultation on a variety of psychoeducational problems of school-aged children and youth.

CFSP 4353 Practica II (1-6 Credits)
This is a 300-500 hour supervised field experience taken after the successful completion of core courses and Practica I experience. Practica is considered a critical professional transition year to help consolidate learning and professional competencies in preparation for a subsequent Internship. Students work throughout the year with Clinic Faculty and a licensed Field Supervisor within the University of Denver psycho-educational clinic and infant, preschool, elementary, middle or high school settings and also attend weekly Practicum seminars or individual supervision sessions with a University Faculty member. Supervision is designed to provide ongoing professional feedback, case analysis, peer consultation, continued professional development pertinent to the successful practice of School Psychology in urban and rural settings.
CFSP 4354 Child, Family and Community Internship (1-6 Credits)
Supervised advanced Child and Family field experience in a community medical, mental health, or educational agency setting.

CFSP 4355 School Psychology Internship (1-6 Credits)
Supervised advanced School Psychology field experience in a public or private school/community setting. Advanced standing in the program and 1200 clock hours of internship experience required.

CFSP 4356 School Psych Field Experience (4,8 Credits)
Part-time, 20-hour-per-week or full-time, 40-hour-per-week supervised advanced School Psychology field experience in a public or private school or community setting. Students register for 4 credit hours for half-time enrollment or for 8 credit hours for full-time enrollment. This course is not graded. Advanced standing in the program and 600 or 1200 hours of internship experience is required. Department approval is required for registration. Must be registered with CFSP 4355.

CFSP 4357 Early Childhood Practicum (1-4 Credits)
The practicum in Early Childhood Special Education is an individualized 300-600 hour supervised field experience taken after the successful completion of core courses. The field practicum is considered a critical professional transition year to help consolidate learning and professional competencies in preparation for employment. All students work with a licensed Field Supervisor. Students are placed in infant, preschool, elementary school settings. During practicum, students provide direct and indirect services that support children and/or families in a variety of settings. All students attend weekly practicum seminars facilitated by a University Supervisor. Supervision is designed to provide ongoing professional feedback, case analysis, peer consultation, and continued professional development and experiences pertinent to successful practice.

CFSP 4361 Seminar: CFSP Supervision (1-2 Credits)
This is an advanced seminar for Ph.D. students in Child, Family and School Psychology focusing on supervision of psychological and educational service provision in school, hospital, and community agency settings.

CFSP 4363 Child, Family, School Psychology Program Development and Evaluation (3 Credits)
This course focuses on theory and practice of program development and evaluation in school and community agency settings. Both qualitative and quantitative methods of program evaluation are discussed. Students have the opportunity to collaborate on a comprehensive evaluation of a specific educational, health, or mental health program.

CFSP 4991 MA Independent Study (1-10 Credits)
This course allows MA or EdS Child, Family, and School Psychology students to study a specific topic area in detail in conjunction with a cooperating faculty member.

CFSP 4992 Directed Study (1-10 Credits)

CFSP 4995 Research - M.A. Thesis (1-10 Credits)
This course is for students whose program requires completion of a masters level thesis.

CFSP 5991 PhD Independent Study (1-10 Credits)
This course allows PhD Child, Family, and School Psychology students to study a specific topic area in detail in conjunction with a cooperating faculty member.

CFSP 5992 Directed Study (1-10 Credits)

CFSP 5995 Dissertation Research (1-20 Credits)
This course is for PhD Child, Family, and School Psychology students engaged in completing their doctoral dissertation.

Counseling Psychology
As a graduate student in the Counseling Psychology Program, you'll develop the skills necessary to become an effective practitioner, researcher and/or leader in your field. Our goal is to develop professionals who are insightful and self-reflective, who are innovative risk takers and superior critical thinkers. Our highly selective doctoral program is accredited by the American Psychological Association and is well known for providing access to high-quality national internships for our students. This scientist-practitioner program has a strong focus on both research and practice. Similarly, the master's program has excellent practicum and internship sites all over the Denver area. One of the strengths for our Counseling Psychology program for both master's and doctoral students is the opportunity to provide counseling in our in-house clinic.

We want our students not only to demonstrate accurate and current knowledge, but to have expertise related to the many issues that confront society, and to have the skills to create effective strategies and approaches to address these challenges.
Master of Arts in Counseling Psychology with a concentration in Clinical Mental Health Counseling

The Clinical Mental Health Counseling concentration has been designed to meet the requirements to become a Licensed Professional Counselor (LPC). Students who complete this program and two years of post-Master’s work in the field can apply to become a Licensed Professional Counselor in the State of Colorado. **Other states may have other requirements.** Students completing this concentration often work in agencies or in community settings all over the Denver area. This program requires two years and 90 quarter credits. It also includes a 200-hour practicum, a 600-hour internship, and two quarters of counseling in our in-house clinic. **Students are strongly recommended to meet with their advisors before submitting their course plans.**

Master of Arts in Counseling Psychology with a concentration in General Counseling

This concentration leads to a general Master’s degree in Counseling. Students who complete this program may work in agencies or apply for further doctoral work. This concentration requires a minimum of 55 quarter hour credits, including a 400-hour practicum, although it does not lead to licensure as a professional counselor.

Master of Arts in Counseling Psychology with a concentration in Research Counseling

Some students wish to develop more advanced research skills as well as counseling skills. This concentration requires two years and 72 credit hours to complete. Students wishing to complete a master’s thesis are strongly encouraged to apply to participate in this concentration during the winter quarter of the first year of the program. If the student chooses to apply for the Research concentration later, it will take longer to complete the degree. It is recommended they begin discussing this option with their advisor during their first quarter of graduate work. Students who complete a thesis are not required to take the comprehensive examination. This is the only concentration students may pursue if they are interested in writing a thesis. The Research concentration does not meet requirements to achieve licensure. Students completing the Research concentration who would also like to achieve licensure eligibility may combine the clinical mental health counseling (90 credits). **Students are strongly recommended to meet with their advisors before submitting their course plans.**

Master of Arts in Counseling Psychology with a concentration in School Counseling

This concentration allows students to work as counselors in the public schools. It requires a minimum of 72 quarter hour credits including a 200-hour practicum, and a 600-hour internship in a school setting with multiple grade levels of students. This concentration also requires two quarters of counseling in our in-house clinic. The internship will provide opportunities to participate in a wide variety of activities, including individual and group counseling, classroom guidance, career and educational planning, assessment or professional development. Successful completion of all requirements of this program ensures that all state performance competencies for the Colorado Department of Education (CDE) have been met. Our program is accredited by CDE, which allows students to serve populations ranging in age from birth to 21.

In order to be certified in School Counseling, you must take the state PLACE exam (Program for Licensing Assessments for Colorado Educators), which is offered four times a year. You may call the Educator Licensing Department of the Colorado Department of Education at 303-866-6628 for more information about the exam, or visit the CDE website at www.cde.state.co.us (http://www.cde.state.co.us). Students typically take the exam near the end of the program or shortly after graduation. You must also take several courses specifically related to schools that are offered through the Child, Family, and School Psychology program, also part of the MCE.

Doctor of Philosophy in Counseling Psychology

The goal of the PhD in Counseling Psychology program is to educate counseling psychologists who have a solid foundation in both science and practice. The scientist portion of the scientist-practitioner model is reflected in applied research on topics that relate to the practice of counseling psychology and other research that addresses the public good more broadly. Another goal is to train our students to think critically and to be appropriately skeptical about theories, research findings, and clinical practices. The practitioner portion of the model is reflected in the many opportunities for our students to develop skills as practitioners with a wide range of clients and in a variety of settings. Providing students with a solid foundation in both science and practice provides students with the skills to work in a marketplace that continues to evolve and change.

In addition, students develop skills in intellectual, vocational, and personality assessment, and acquaint themselves with the needs and issues of specific groups, including but not limited to issues of gender, race, ethnicity, age, sexual orientation, and disabilities. Areas of specialization which have a particularly strong emphasis in the Counseling Psychology program are multicultural counseling, ethics, health psychology, group dynamics, and addictions. Seminars are offered in all of these areas.

The faculty encourages students to develop individualized programs of study commensurate with their career goals. Practicum settings and internships may be arranged to further intensify training in particular areas. Students whose goals include college teaching are encouraged to be teaching assistants with faculty members, teach one of two undergraduate classes that are in the counseling psychology curriculum, or pursue teaching experience available at several area colleges. Students are also required to complete a research project prior to their dissertation. In addition to the traditional counseling venues for employment, many of our graduates work in a variety of settings after graduation, including integrative care, Veterans Administration hospitals, mental health centers, and settings that conduct program evaluations, research, and provide supervision, among others.
Successful completion of the PhD program in Counseling Psychology will allow you to apply for licensure as a psychologist in Colorado and other states, assuming post-doctoral requirements are met. The Ph.D. degree is accredited by the American Psychological Association (APA).

**Master of Arts in Counseling Psychology with a concentration in Clinical Mental Health Counseling**
- Online Application for Graduate Admission
- One (1) official transcript from each college/university where at least 1 credit has been earned, mailed directly to DU
- Graduate Record Exam (GRE) official score report (taken within the last five years)
- 2 Letters of Recommendation (uploaded online by recommender)
- Statement of Professional Goals
- Current Vita/Resume
- $65 Application Fee: The application fee may be paid with a credit card only at the time of submission. You cannot pay the fee online once you have submitted your application. The application fee may also be paid on a bank draft or personal check drawn from a U.S. bank.
