UNDERGRADUATE

About this Bulletin
The University of Denver Undergraduate Bulletin has been prepared by the faculty and administration to serve as the governing document for University's undergraduate academic programs, courses and policies. The Undergraduate Bulletin represents the University's best planning at the time of publication. Course and curriculum changes; modification to tuition, fees or other charges; and unforeseen changes in other aspects of the University of Denver sometimes occur after the bulletin has been published, but before the changes can be incorporated in a later edition and apply to all students as of the date they become effective, regardless of whether they were in effect at the time the student initially enrolled at the University of Denver. Students are responsible for knowing all academic and administrative policies and regulations affecting their program of study and for abiding by all such policies and regulations during their period of enrollment at the University. The Undergraduate Bulletin does not constitute a contract between the University of Denver and its students on either a collective or individual basis.

About DU
The University of Denver
Founded in 1864, the University of Denver is an independent coeducational institution located in a residential neighborhood eight miles southeast of downtown Denver. Colleges, schools and divisions of the University include the following:

- College of Arts, Humanities and Social Sciences
- Colorado Women’s College
- Daniel Felix Ritchie School of Engineering and Computer Science
- Daniels College of Business
- Division of Natural Sciences and Mathematics
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Morgridge College of Education
- Sturm College of Law
- University College

Students
University of Denver students come from all 50 states, in addition to the District of Columbia and from several U.S. territories, and from 98 different countries. Enrollment is approximately 11,700: 5,800 undergraduates and 5,900 graduate students.

Accreditation
Institutional Accreditation
The University of Denver is accredited by the Higher Learning Commission (HLC) of the North Central Association of Colleges and Schools, one of six regional accrediting bodies recognized by the U.S. Department of Education. DU is authorized to offer post-secondary education in the state of Colorado by the Colorado Department of Higher Education.

Higher Learning Commission

Specialized Accreditation
Individual academic programs undergo periodic review by accreditation or certification bodies in their field.
• Accrediting Board for Engineering and Technology
• American Bar Association
• American Chemical Society
• American Library Association
• American Psychological Association
• Association to Advance Collegiate Schools of Business International
• Colorado Department of Education
• Council for Accreditation of Educator Preparation
• Council on Social Work Education
• National Association for the Education of Young Children
• National Association of Schools of Arts and Design
• National Association of School Psychologists
• National Association of Schools of Music

Rosalynn Feagins
Assistant Secretary

Andrew Cullen
Assistant Treasurer
Quarter System
The academic calendar is divided into fall, winter and spring quarters and a summer session. Each quarter is approximately ten weeks long and summer session is nine weeks. There are two interterm sessions. Students may complete degree requirements through continuous enrollment, including summers, or may arrange the normal work of a three-quarter academic year in any desirable sequence of quarters and summer session.

Semester System
The academic calendar is divided into fall, spring and summer semesters.
Summer Session

Summer session (http://www.du.edu/summer) is an avenue for continuing undergraduate and graduate students to accelerate their programs or complete necessary coursework. Elective, Common Curriculum and required courses for majors and minors are offered in a variety of time frames. Travel and other unique courses including short, intensive workshops are part of the summer program. Visiting students, professionals and individuals from the community interested in attending for the summer only are encouraged to attend and are admitted (p. 27) under an open-enrollment policy.

Interterms

Interterms are the periods preceding each academic quarter, during which short, innovative on-campus, online, and travel experiences for undergraduate and graduate students are offered. Hours completed in interterms are applied as credit toward graduation requirements and may be applied to the major or minor. Students can find more information about and register for interterm classes through the Academic Programs (http://www.du.edu/specpro) office. Questions about interterms should be directed to Academic Programs, Mary Reed Building, Room 301, 2199 S. University Blvd., Denver, CO 80208-2360, or by emailing uap@du.edu.

Attendance

Students are expected to attend all meetings of classes for which they are registered, including the first and last scheduled meetings and the final examination period. Students who fail to attend the first class and who have not previously notified their instructors of their absence may be withdrawn from the course by the Office of the Registrar in consultation with the instructor. Instructors have the right and responsibility to establish attendance policies for their courses.

Participation in official University activities, personal emergencies and religious observances are valid reasons for absences. Students are responsible for informing instructors about their absence and for completing assignments given during their absence. A student may not attend classes without being officially enrolled. Registrations are not processed after the designated registration period of the quarter.

Final Exams

Any final exam for a course must be scheduled during the final exam period. Each quarter, the Office of the Registrar posts the final exam schedule on its website at www.du.edu/registrar. Students must attend all final exams as scheduled by faculty. Students are expected to let their instructors know when they have more than one exam being held at the same time. The Office of the Registrar will attempt to resolve conflicts whenever possible. Final exams are not changed to accommodate student travel plans, and students should only plan travel after the official end date of the term.

Bereavement Policy

The Office of Student Outreach & Support (SOS) is the designated office to help support students in the event of a death in the student’s immediate family or household. The student bereavement policy (https://www.du.edu/studentlife/studentsupport/media/documents/student-bereavement-policy.pdf) allows students a certain number of excused absences. Students can request verification of these absences by completing the verification request form (https://cm.maxient.com/reportingform.php?UnivofDenver&layout_id=94). Student Outreach & Support staff will then notify the student’s instructors of the verified absences.

Campus Weather Closures

Sometimes severe storms may create such a hazard that the University makes a decision to close and cancel operations for a period of time. Students can receive information about campus weather closures by registering for the Critical Incident Notification System (https://www.du.edu/emergency/notification). The University of Denver homepage will also be updated to reflect a closure due to severe weather.

Religious Accommodations and Class Attendance

University policy grants students excused absences from class or other organized activities for observance of religious holy days, unless the accommodation would create an undue hardship. Faculty are asked to be responsive to requests when students contact them IN ADVANCE to request such an excused absence. Students are responsible for completing assignments given during their absence, but should be given an opportunity to make up work missed because of religious observance.

Once a student has registered for a class, the student is expected to examine the course syllabus for potential conflicts with holy days and to notify the instructor by the end of the first week of classes of any conflicts that may require an absence (including any required additional preparation/travel time). The student is also expected to remind the faculty member in advance of the missed class, and to make arrangements in advance (with the faculty member) to make up any missed work or in-class material within a reasonable amount of time. The student is to be trusted that he/she will observe the holy day as promised; no proof will be expected.
Examples of reasonable accommodations for student absences might include: rescheduling of an exam or giving a make-up exam for the student in question; altering the time of a student's presentation; allowing extra-credit assignments to substitute for missed class work or arranging for an increased flexibility in assignment due dates; releasing a graduate assistant from teaching or research responsibilities, etc. The student must be given the opportunity to do appropriate make-up work that is equivalent and intrinsically no more difficult than the original exam or assignment. Faculty should keep in mind that religion is a deeply personal and private matter and should make every attempt to respect the privacy of the student when making accommodations (for example, it is not appropriate to announce to the class that a student is doing a presentation or making up an exam at a later date because of their religious observance).

If a student and course instructor cannot agree on an accommodation, the student may bring the matter to the Department Chair for a decision. Additional resources in resolving disagreements over accommodations include the Office of Cultural and Spiritual Life, and the Office of Diversity and Equal Opportunity. If there is still no agreement, the student may bring the matter to the school or college dean's office, where a final decision will be made. Students who believe they have been discriminated against on the basis of religion by the denial of a requested religious accommodation may contact the Office of Diversity and Equal Opportunity to learn about filing a discrimination complaint.

### 2019-2020 Academic Calendar: Quarter System

#### Autumn Quarter 2019
- **September 9**: Monday (Classes begin)
- **November 16**: Saturday (Last day of classes)
- **November 18-21**: Monday-Thursday (Final examination period)

#### Winter Interterm 2019
- **November 22**: Friday (Classes begin)
- **December 24**: Tuesday (Last day of classes)

#### Winter Quarter 2020
- **January 3**: Friday (Classes begin)
- **March 16**: Monday (Last day of classes)
- **March 17-20**: Tuesday-Friday (Final examination period)

#### Spring Interterm 2020
- **March 21**: Saturday (Classes begin)
- **March 29**: Sunday (Last day of classes)

#### Spring Quarter 2020
- **March 30**: Monday (Classes begin)
- **June 6**: Saturday (Last day of classes)
- **June 8-11**: Monday-Thursday (Final examination period)
- **June 12**: Friday (Graduate Commencement)
- **June 13**: Saturday (Undergraduate Commencement)

#### Summer Session 2020
- **June 15**: Monday (Classes begin)
- **August 21**: Friday (Last day of classes)
- **August 22**: Saturday (Commencement)

#### University Holidays
- **September 2, 2019**: Monday (Labor Day)
- **November 28-29, 2019**: Thursday-Friday (Thanksgiving)
- **December 25-31, 2019**: Wednesday-Tuesday (Winter Holiday)
- **January 1, 2020**: Wednesday (New Year’s Day)
- **January 20, 2020**: Monday (Martin Luther King Jr. Day)
- **May 25, 2020**: Monday (Memorial Day)
- **July 3, 2020**: Friday (Independence Day (observed))
- **July 4, 2020**: Saturday (Independence Day)

Unit of Credit

Credit hours are the unit of measure of the amount of work represented by specified learning outcomes in an academic program. Academic programs at the University of Denver are scheduled on both quarter and semester (College of Law) calendars. Each academic program specifies the number of (quarter- or semester-hour) credits required. Courses award credit based on learning outcomes for the course. For lecture courses, one credit hour represents one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-classroom student work each week the quarter or semester. Credit for non-lecture courses such as laboratories, internships, practica, studios or music performance classes represent equivalent learning outcomes. The amount of scheduled times for these courses vary.

Equal Opportunity and Non-Discrimination Policy

The University of Denver is an Equal Opportunity Institution. It is the policy of the University not to discriminate in the admission of students, in the provision of services, or in employment on the basis of race, color, national origin, age, religion, disability, sex, sexual orientation, gender identity, gender expression, marital status, pregnancy, genetic information, military enlistment or veteran status. The University prohibits all discrimination, harassment, violence, and retaliation, and complies with all applicable federal, state and local laws, regulations and Executive Orders.

Inquiries concerning allegations of discrimination based on any of the above factors may be referred to the Office of Equal Opportunity & Title IX:

University of Denver
Office of Equal Opportunity & Title IX
Mary Reed Building, 4th Floor
2199 S. University Blvd
Denver, CO 80208
Phone: 303-871-7016
Fax: 303-871-7982
Discrimination or Harassment Complaint Procedures

The Office of Equal Opportunity & Title IX established these Procedures to assist in carrying out its responsibilities in the administration and enforcement of the University of Denver’s ("the University") policies related to nondiscrimination, and in assuring the University's compliance with applicable laws, including: Executive Order 11246; Title VI and Title VII of the Civil Rights Act of 1964; the Equal Pay Act (EPA) of 1963; the Age Discrimination in Employment Act; Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975; the Americans with Disabilities Act (ADA) of 1990 and as amended by ADA Amendments Act of 2008; the Rehabilitation Act of 1973; the Vietnam Era Veterans' Readjustment Assistance Act (VEVRAA) of 1974; Uniformed Services Employment and Reemployment Rights Act (USERRA) of 1994; the Genetic Information Nondiscrimination Act (GINA) of 2008; Title 24, Article 34 of the Colorado Revised Statutes; and Denver Municipal Ordinances, and other applicable federal and state anti-discriminatory laws. University Policy and these Procedures are intended to comply with the prohibitions of these laws, as amended, as well as other applicable federal, state, and local anti-discrimination laws.

The Office of Equal Opportunity & Title IX accepts and investigates complaints alleging discrimination, harassment, violence, or retaliation in violation of University of Denver policy and applicable laws. Consistent with federal, state and local law and University policies related to non-discrimination, the Office conducts neutral investigations of complaints of discrimination, harassment, violence - including pay discrimination - on the basis of race, color, national origin, age, religion, disability, sex, sexual orientation, gender identity, gender expression, marital status, pregnancy, military enlistment, veteran status, or genetic information; complaints of retaliation; and complaints alleging failure to provide reasonable accommodations for disability and religion.

Office of Equal Opportunity Procedures (https://www.du.edu/equalopportunity/policies_procedures)

Authorization and Disclosure

In October 2010, the Federal Department of Education issued “Program Integrity” regulations that require all Title IV eligible schools to obtain approval to operate in every state in which a student is located while receiving instruction. This is true for all educational programs, including distance education.

If an institution is offering postsecondary education through distance or correspondence education in a state in which it is not physically located, the institution must meet any state requirements for it to be legally offering distance or correspondence education in that state.

In order to offer online educational opportunities to other states’ residents, DU must comply with those states’ policies for distance education and be able to demonstrate compliance upon request.

In 2014, the University of Denver was approved by Colorado to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education. Participating in NC-SARA allows the university to offer online education in all states except California. The University of Denver maintains contact with that state to ensure the ability to offer distance programs there. We are currently authorized to offer distance programs in all 50 states.

Please direct questions about state authorization to the Office of the Registrar (http://www.du.edu/registrar).

Student Complaint State Contacts

This list below includes contact information for all 50 states, the District of Columbia and US territories and should not be construed as informative of what agencies regulate the institution or in what states the institution is licensed or required to be licensed. States, through the relevant agencies or Attorneys General Offices, may accept complaints regardless of whether the institution is required to be licensed in that state.

Discrimination or Harassment Complaint Procedures

The Office of Equal Opportunity & Title IX established these Procedures to assist in carrying out its responsibilities in the administration and enforcement of the University of Denver's ("the University") policies related to nondiscrimination, and in assuring the University's compliance with applicable laws, including: Executive Order 11246; Title VI and Title VII of the Civil Rights Act of 1964; the Equal Pay Act (EPA) of 1963; the Age Discrimination in Employment Act; Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975; the Americans with Disabilities Act (ADA) of 1990 and as amended by ADA Amendments Act of 2008; the Rehabilitation Act of 1973; the Vietnam Era Veterans' Readjustment Assistance Act (VEVRAA) of 1974; Uniformed Services Employment and Reemployment Rights Act (USERRA) of 1994; the Genetic Information Nondiscrimination Act (GINA) of 2008; Title 24, Article 34 of the Colorado Revised Statutes; and Denver Municipal Ordinances, and other applicable federal and state anti-discriminatory laws. University Policy and these Procedures are intended to comply with the prohibitions of these laws, as amended, as well as other applicable federal, state, and local anti-discrimination laws.

The Office of Equal Opportunity & Title IX accepts and investigates complaints alleging discrimination, harassment, violence, or retaliation in violation of University of Denver policy and applicable laws. Consistent with federal, state and local law and University policies related to non-discrimination, the Office conducts neutral investigations of complaints of discrimination, harassment, violence - including pay discrimination - on the basis of race, color, national origin, age, religion, disability, sex, sexual orientation, gender identity, gender expression, marital status, pregnancy, military enlistment, veteran status, or genetic information; complaints of retaliation; and complaints alleging failure to provide reasonable accommodations for disability and religion.

Office of Equal Opportunity Procedures (https://www.du.edu/equalopportunity/policies_procedures)

Admission

Admission to the traditional bachelor's program and the bachelor of arts completion program are handled through separate offices and application processes. Requirements for both the traditional bachelor’s and the bachelor of arts completion programs are outlined within this section.
Requirements for Entrance to Special Programs and Courses
Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

Traditional Bachelor's Program
Build the Foundation for Your Future
Open the door to a world of possibilities. As an undergraduate student at DU, you'll get a multidisciplinary education that's rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of the global culture. In the end, you'll be uniquely prepared to confront the challenges and opportunities ahead.

Innovative Degree Programs
Select from more than 100 areas of study, including both traditional and progressive offerings. We also offer compelling dual degree programs that span a variety of disciplines, including accounting, education, social work, art history, geographic information science, international studies, public policy, engineering, computer science and law.

Admission
The University of Denver seeks students who have challenged themselves academically and who have demonstrated success in English, math, social studies, science and foreign language. In selecting the incoming class, Undergraduate Admission considers all available information including evidence of academic achievement, contributions to school and community, extracurricular activities and leadership.

The University of Denver uses both the Common Application and the DU Pioneer Application. We encourage you to apply online at www.du.edu/admission.

Undergraduate Admission invites students to learn more about the DU experience through our many visit programs. During a campus visit, you will learn about our admission process, tour our facilities, speak with current students and investigate the different programs of study, extracurricular activities and social offerings available to students.

To register for a campus visit program, go to www.du.edu/visit or call Undergraduate Admission at 303-871-7711.

Admission Standards
When reviewing an application, our admission committee considers the following:

• academic achievement
• grade point average
• standardized test scores
• DU's whole-person assessment, essay and letters of recommendation

Academic Achievement
The typical accepted high school student has taken a strong, competitive class schedule, which may include college preparatory, Advanced Placement and International Baccalaureate courses.

Grade Point Average (GPA)
The average high school GPA of students accepted for fall 2019 was 3.77. The middle 50 percent ranged from 3.60–4.0.

Standardized Tests
Although academic performance in high school is the most important factor in our admission process, we also factor in your SAT or ACT scores for both admission and merit aid purposes. Here's what we'll need to see:

• Either the SAT Reasoning Test or the ACT. We accept either test and don't have a preference. SAT Code: 4842 and ACT Code: 0534.
• We do not consider subject test or writing sections.
• If you've taken either test more than once, we'll combine the best scores from the individual sections of each test to create an ideal "super score."

If you believe your SAT and ACT scores don't accurately reflect your academic abilities, we offer a test-optional process. (https://www.du.edu/test-optional) Test optional applicants will receive full consideration for both admission and merit scholarships. Our top awards are very competitive, but all applicants, with or without standardized testing, will be considered for merit scholarships. Notification regarding merit aid is included in the admission decision letter.
The middle 50 percent test scores of students accepted for fall 2019 were the following:

<table>
<thead>
<tr>
<th>Test</th>
<th>Range</th>
<th>Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAT</td>
<td>1190-1370</td>
<td>1286</td>
</tr>
<tr>
<td>ACT</td>
<td>26-32</td>
<td>29</td>
</tr>
</tbody>
</table>

**Whole-Person Assessment**

DU students assume responsibilities outside the classroom; they are leaders, volunteers, artists, musicians, athletes, actors and people who contribute to their community as a whole. Our admission committee seeks well-rounded students who have contributed to their high school and local communities and who will contribute to the DU community as well. We welcome you to submit a ZeeMee (https://www.zeeemee.com) profile (a free service designed to help students bring their application to life by highlighting your personal story via photos, videos and text). Simply copy and paste your ZeeMee link into your University of Denver application.

**Programs with Additional Admission Requirements**

Daniels College of Business degree programs, Lamont School of Music degree programs and the bachelor of fine arts in the School of Art and Art History have requirements for admission beyond the criteria listed above.

**Daniels College of Business**

Applicants who wish to pursue an undergraduate business major at Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application, for students who indicate business as the intended major on the application to DU. Qualified students will be considered for direct admission to Daniels when accepted to the University of Denver. Applicants not directly admitted through the DU application process apply to Daniels via the secondary admission process, as an enrolled student, upon successful completion of pre-requisite coursework.

The Daniels secondary admission process supports academic quality, small and engaged classes, and strong student-faculty connections. Most students apply in their second year by submitting an application, resume and cover letter. Application cycles are offered fall, winter, and spring quarters. A holistic assessment of each applicant is conducted by evaluating students’ academic performance and career readiness components. Involvement within the Daniels College of Business is important as it shows a genuine interest in a business major, knowledge of expectations within the major, and wanting to contribute to the community in a meaningful way. Students working through secondary admission take the same preliminary business courses as directly admitted students.

There are three possible admission routes into Daniels:

1. Direct admission upon application to the University of Denver, based on indication of business interest on application and eligibility for university merit scholarships. Transfer students are evaluated on GPA, transfer coursework, and work experience.
2. Fast track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion of MATH 1200 or 1951.
3. Secondary admission upon completion of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Introduction to Micro- and Macroeconomics I: History and Theories, FSEM 1111 First Year Seminar, INFO 1010 Analytics I: Data Management and Analysis INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences/MATH 1951 Calculus I, WRIT 1122 Rhetoric and Academic Writing, WRIT 1133 Writing and Research, and Microsoft Certification (Excel, Word, PowerPoint). This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan) outlines a recommended path for completing the courses required to apply for secondary admission. During fall, winter, and spring application cycles students submit their resume and cover letter for consideration. A 2.5 minimum cumulative GPA is required to apply. Completion of these requirements does not guarantee admission.

Please refer to the Daniels website (http://daniels.du.edu) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu, 303-871-3939 or www.du.edu/studentlife/disability.

**Lamont School of Music**

In addition to being accepted for study by the University, students desiring admission to the Lamont School of Music must audition with the appropriate music faculty and complete a Lamont application. Audition requirements differ by area. Requirements can be reviewed at www.du.edu/ lamont. An in-person audition is preferable; however, students may submit a high quality video recording for review.

**School of Art and Art History**

If admitted to the University and the School of Art & Art History (SAAH), all students will be entered into the BA program in their area of interest. Students interested in pursuing a BFA in Studio Art apply under the guidance of a faculty member once enrolled in SAAH. Contact the School of Art and Art History (p. 123) for details.
Early Experience Applicants

After completing their sophomore or junior year in high school, students may enroll for limited study at the University through our Early Experience Program (https://www.du.edu/admission-aid/undergraduate/early-experience), provided they meet admission requirements and are recommended by a high school counselor. Courses completed can be applied toward a University of Denver degree if the student is admitted as a degree candidate.

First-Year Domestic Student Application Options

First-Year Domestic Student Application Options
Application and Decision Dates

For first-year domestic students, DU offers four application programs for the fall quarter: Early Action, Early Decision I, Early Decision II and Regular Decision.

Early Action

Early Action is a nonbinding program through which students obtain an early admission decision.

- Apply by November 1
- Decision letter: mid-December
- Deposit by May 1

Early Decision I

Early Decision I is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by November 1
- Decision letter: early December
- Deposit by late December

Early Decision II

Early Decision II is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by January 15
- Decision letter: late February
- Deposit by early March

Regular Decision

Regular Decision is the final admission deadline for consideration for the fall quarter.

- Apply by January 15
- Decision letter: mid-March
- Deposit by May 1

Late Action Applications

First-year applications postmarked after January 15 will be considered on a case-by-case, space-available basis.

International Students

The University of Denver currently enrolls over 900 international students from 83 countries. Non-U.S. citizens applying for undergraduate admission may complete the Common Application at https://www.commonapp.org or the Pioneer Application at https://denveradmission.du.edu/web. U.S. permanent residents and those with refugee or asylum status applying for undergraduate admission should do so directly through Undergraduate Admission.

Deadlines for International Students

International first-year applicants will be considered for fall (September) admission only. Applications must be submitted by November 1st for Early Decision I or Early Action consideration or January 15th for Early Decision II or Regular Decision consideration.

The recommended application deadlines for transfer students are as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Application Deadline</th>
<th>Preference Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (September)</td>
<td>April 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Winter (January)</td>
<td>October 15</td>
<td></td>
</tr>
</tbody>
</table>
All undergraduate international applicants will be automatically considered for merit-based scholarships. Applicants will be notified of their scholarship award in their admission letter.

Admission Standards for International Students
In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires a minimum score of 80 iBT (Internet-based) on the Test of English as a Foreign Language (TOEFL) with at least 20 on all subscores or a score of 6.5 with no band scores below 6.0 on the International English Language Testing System (IELTS), or a minimum grade of C on the Cambridge Certificate in Advanced English (CAE). For more information regarding English Proficiency, please visit: www.du.edu/apply/admission/apply/international/proficiency.html.

As part of the Common Curriculum at DU, most students must complete a foreign language requirement. Based on their language assessment scores, students must complete 4, 8, or 12 language credits in order to fulfill the requirement. If you are a non-native speaker of English, regardless of TOEFL, IELTS, or CAE test scores, you will be required to take the English Language Proficiency Assessment (ELPA) (http://www.du.edu/apply/media/documents/elpa.pdf). The results of the assessment will determine your placement into English language credit courses in the LAUNCH Curriculum (http://www.du.edu/apply/media/documents/englishlanguagecreditcourses.pdf) for which you will receive credit toward your degree and fulfill the language requirement. The LAUNCH courses are designed to help students be more successful in their academic programs by improving their proficiency in English, learning about being part of an American institution of higher education, and learning more about U.S. culture.

Exemptions: Students are generally exempt from the English proficiency test requirement if they have any of the following:

- secondary/high school diploma from a school where the language of instruction is English
- SAT Evidence-Based Reading and Writing (EBRW) score of 600 or higher
- ACT English subscore of 22 or higher
- 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination or completion of the first-year English I and II requirements in a U.S. college or university
- GCSE/IGCSE grade of A, B or C on the English Examination
- HKDSE level of 5 on the English Language Core Subject examination
- Successful completion of the appropriate level of intensive English at the University of Denver’s English Language Center

Academically admissible applicants who do not meet the University of Denver’s English proficiency requirements may be offered English Conditional Admission (ECA). ECA students are accepted with the condition that they study at the University’s English Language Center full-time until they have successfully completed the program. Students who are English Conditionally Admitted to the University and fulfill their English proficiency requirements through the English Language Center are required to take 12 credits in the LAUNCH (http://www.du.edu/apply/media/documents/englishlanguagecreditcourses.pdf) curriculum.

Contact the English Language Center by mail: 1958 S. Josephine St., Denver, CO 80208-9300; telephone: 303-871-3075; fax: 303-871-6622; or email: elc@du.edu. Completion of an intensive English program other than that offered by the University of Denver’s English Language Center does not satisfy this requirement. Note that admission to the English Language Center does not automatically grant admission to University of Denver degree programs.

For more information regarding admission for international students, contact the University of Denver Office of International Student Admission by mail: 114 University Hall, 2197 S. University Blvd., Denver, CO 80208-9401; telephone: 303-871-2790; fax: 303-871-3522; email: INTLADM@du.edu; or web: http://www.du.edu/apply/admission/apply/international/.

Transfer Students
Each year, the University of Denver welcomes more than 200 transfer students to our community. Qualified applicants are admitted on a rolling basis, provided space is available. An application is not considered complete until official transcripts have been received.

Deadlines for Transfer Applicants
Application and all supporting materials should be completed and received no later than the following dates:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Quarter</td>
<td>April 1 (priority deadline); June 1 (final deadline)</td>
</tr>
<tr>
<td>Winter Quarter</td>
<td>October 15</td>
</tr>
<tr>
<td>Spring Quarter</td>
<td>February 1 (limited space)</td>
</tr>
<tr>
<td>Summer Quarter</td>
<td>May 1</td>
</tr>
</tbody>
</table>
Admission Standards for Transfer Students
To be considered for admission, students transferring to DU from another regionally accredited institution must have a competitive grade point average in all college coursework. The admission committee looks for

- grades that reflect solid work at the college level—generally “B” grades or better, and
- course work that demonstrates serious intentions.

In addition, we consider any special situations or circumstances that may have influenced your academic performance in college. You must submit official transcripts from each college or university you have attended. If you have not successfully completed 30 college-level semester hours (45 quarter hours), you must also submit your high school transcript and test scores. If you are unsure about your candidacy to the University of Denver, please call Undergraduate Admission at 303-871-2036.

Readmitted Students
A student in academic good standing who withdraws from the University for one or more quarters (except summer session) but less than five calendar years must submit an Application for Re-Entry (http://www.du.edu/studentlife/advising/policies-forms/re-entry-form.html) with Academic Advising and official transcripts of any college study completed during the time of absence.

Students who have not been enrolled at the University for more than five calendar years from their last term of enrollment must reapply for admission to the University through Undergraduate Admission. Students who are accepted for readmission may choose to complete their degree under the requirements of their original University bulletin or the current bulletin.

Second Baccalaureate Degrees
A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements for transfer students. Please note that students pursuing a second baccalaureate degree will not be eligible for most forms of aid and will need to complete the following:

- residence requirement of at least 45 credits (one year of full-time study)
- major and minor requirements as defined by the appropriate departments and schools
- undergraduate degree requirements (p. 72)
- academic good standing (GPA of 2.0 or higher) at the time of graduation
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Consult Concurrent and Second Baccalaureate Degrees (p. 88) for specific requirements.

Non-Degree Student
Visiting students from another college or university who wish to pursue one to three quarters of study at DU and wish to transfer the credit to their home institution may apply as a non-degree student. This also applies to students seeking coursework for personal interest or professional growth. A student seeking a DU degree should not use a non-degree application. Students who have previously earned a bachelor’s degree and wish to take classes should contact the Graduate Education office to complete a Graduate Non-Degree Application.

A non-degree student must submit an application, official transcript from the last institution attended, and a nonrefundable $65 application fee. Coursework completed as a non-degree student may be limited and is not automatically accepted for a degree at the University of Denver. Students wishing to pursue coursework over the summer should register as a visiting summer student (p. 27) instead.

Visiting Summer Students
Domestic students visiting for summer quarter register directly through the Office of the Registrar; they do not apply, nor do they submit transcripts.

Additional information about the summer quarter is available in the academic calendar (p. 11) section of this Bulletin and at the summer session (http://www.du.edu/summer) website.

Bachelor of Arts Completion Program
Admission Criteria
Candidates for the Bachelor of Arts Completion Program are evaluated based on the following criteria. Entrance exams such as the ACT and SAT are not required.
1. Applicants must have completed 40 quarter hours (27 semester hours) of transferable credits in academic subjects. Applicants with between 40 and 44 quarter hours of total college credit earned must also submit high school transcripts or official verification of the High School Equivalency Diploma (GED). Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer.

2. Applicants must have at least three years of work experience beyond high school. Preference will be given to candidates with more than three years work with substantial and increasing levels of responsibility.

3. The applicant's academic and professional commitments and written language skills are evaluated through the Personal Statement, submitted as part of the admission application.

4. We consider special situations or circumstances that may have influenced previous academic performance; applicants should address these in their Personal Statement.

**Admission Process**

Bachelor of Arts Completion Program applications are reviewed for admission on a quarterly basis. Applications and all supplemental materials must be submitted online, with the exception of transcripts, which must be received by the stated application deadline. Applicants will be notified of a decision via email approximately two to four weeks following receipt of all application materials. Detailed application information and application deadlines are located on the University College website (http://universitycollege.du.edu/answers/admission/bachelors.cfm).

- **Application:** Applicants must complete the application online (https://gradadmissions.du.edu/apply) (gradadmissions.du.edu/apply)
- **Application Fee:** A $75 non-refundable application fee is required for an application to be processed.
- **One Official Transcript from each Post-Secondary Institution:** Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed. This includes transcripts for credit earned as transfer work and study abroad.
- **Personal Statement:** A statement of purpose and commitment (two-pages double-spaced, 450-550 words) is required. The statement should include information on how the degree will enhance professional and educational goals. Please include one example illustrating when you have been faced with a challenge and how you have overcome the challenge drawing on resources and personal strengths. In addition, please identify any obstacles that may stand in your way toward completion and ideas you have for managing these obstacles.

- **Résumé/Curriculum Vitae (CV).**
- **Language Proficiency:** Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Cambridge English: Advanced (CAE) are required of all University College applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL, IELTS or CAE score is received. The TOEFL, IELTS and CAE scores are valid for two years from the test date and are considered official only when received directly from the testing agency.
  - **TOEFL:** The minimum TOEFL score accepted by the University is **80** (iBT) or **550** (pBT). Generally, applicants should achieve at least 20 in all TOEFL subscores on the internet-based exam. When requesting official TOEFL scores, please refer to institutional code 4842 and department code 02.
  - **IELTS:** The minimum IELTS score accepted by the University is **6.5**. Each individual band score must be 6.0 or higher.
  - **Advanced (CEA) Certificate:** The minimum CAE score accepted by the University is **169**.

**ENGLISH LANGUAGE EXEMPTION**

Exemptions: Students are generally exempt from the English proficiency test requirement if they have any of the following:

- Secondary/high school diploma from a school where the language of instruction is English. Or,
- 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination. Or,
- Successful completion of the appropriate level of intensive English at the University of Denver’s English Language Center.

- **Proof of Permanent Residency:** Permanent Residents must provide a copy of their Registration Alien Card (green card).
- **Admission Interview:** An interview may be required at the program director's request.

**International Admission**

**Admission Standards for International Students**

In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires a minimum score of 80 iBT (Internet-based) on the Test of English as a Foreign Language (TOEFL) **with at least 20 on all subscores** or a score of 6.5 with no band scores below 6.0 on the International English Language Testing System (IELTS), or a minimum grade of C on the

As part of the Common Curriculum at DU, most students must complete a foreign language requirement. Undergraduate Programs and Requirements

The University of Denver offers bachelor's degrees through a traditional bachelor’s program and a bachelor of arts completion program through University College. The programs have separate application and admission processes. Each of the programs has distinct overall curriculum requirements as well as requirements associated with individual degrees.

This section of the bulletin provides information on admission and degree requirements under each program. Requirements for specific majors and minors are outlined separately in the Major and Minor Requirements (p. 95) section of the bulletin. The chart on the Degrees and Programs of Study (p. 29) page provides information about applicable degree, major and minor combinations.

Requirements for Entrance to Special Programs and Courses

Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

Degrees and Programs of Study

The chart below lists the majors, minors, concentrations and applicable degrees available. Many majors, and some minors, may only be pursued in conjunction with specific degree programs. If a major or minor may only be pursued with a specific degree program, this is indicated by the degree acronym in the chart below.

Programs of study available as "secondary majors (p. 88)” in the traditional bachelors program, which may be pursued as a secondary curriculum regardless of the student’s degree program, are also indicated below.

### Traditional Bachelor's Program

#### Build the Foundation for Your Future

Open the door to a world of possibilities. As an undergraduate student at DU, you’ll get a multidisciplinary education that’s rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of the global culture. In the end, you’ll be uniquely prepared to confront the challenges and opportunities ahead.

#### Innovative Degree Programs

Select from more than 60 undergraduate majors, including both traditional and progressive offerings. We also offer compelling dual degree programs that span a variety of disciplines, including business, education, social work, art history, geographic information science, international studies, public policy, engineering and law.

#### Selecting a Degree Program

The University of Denver awards eleven distinct baccalaureate degrees. The curriculum for each program varies based on the major discipline and ancillary courses taken.

BA AND BS DEGREES

The BA (Bachelor of Arts (p. 76)) degree is the principal undergraduate degree in the arts, humanities and social sciences and is awarded in most natural sciences as well. The BS (Bachelor of Science) degree is awarded in most natural science disciplines and Psychology.

The BA degree assures students of a breadth of study in the liberal arts and offers greater flexibility in study. For example no more than sixty credit hours may be taken from any one department and students may declare majors in numerous disciplines. The BA degree requires 183 credits, a major (40-60 quarter hours), a minor (20-28 quarter hours) or second major as well as completion of the Common Curriculum.

The BS (Bachelor of Science (p. 79)) degree provides greater focus on the major field of study and related (cognate) subjects. The BS degree requires 183 credits. The major requires at least 45 credits, at least 25 or which must be 2000- and 3000-level courses. The BS degree requires two minors, or two majors and a minor, as well as completion of the Common Curriculum. One minor or the second major must be in the natural sciences. (Interdisciplinary area majors are exempt from the last requirement.)

Academically, a Bachelor of Arts degree and a Bachelor of Science degree are equally valued. Both the BA and the BS degrees prepare students for graduate study.

SPECIALIZED DEGREES

Specialized undergraduate degrees are offered in specific disciplines, most often in fields with distinct accreditation. Specialized undergraduate degrees at the University of Denver are:

BFA Bachelor of Fine Arts (p. 77)
BM Bachelor of Music (p. 78)
BSAcc Bachelor of Science in Accounting (p. 80)
BSBA Bachelor of Science in Business Administration (p. 82)
BSCh Bachelor of Science in Chemistry (p. 84)
BSCpE Bachelor of Science in Computer Engineering (p. 85)
BSEE Bachelor of Science in Electrical Engineering (p. 86)
BSME Bachelor of Science in Mechanical Engineering (p. 87)

Course Plans

Course plans provide a suggested sequence of classes for each term. Many arts and humanities, business, engineering, international studies, natural sciences and mathematics, music, and social sciences students will find course plans for majors and degrees in the same section listing program of study requirements for those curricula. Plans in those areas address course sequencing and requirements specific to those programs of study.

Students pursuing other bachelor of arts majors and students who have yet to declare a major have the freedom to explore and discover academic interests and construct a highly-personalized curriculum. Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should also anticipate taking an average course load of 16 credits each quarter in order to complete the requirements to graduate in four years.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

Students considering but who have yet to declare majors in business should plan on fulfilling the Analytical Inquiry: Natural and Physical World (p. 36) requirement through either MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I. Students considering but who have yet to declare a major in the natural sciences should select MATH 1951 Calculus I to fulfill the requirement. Similarly, students considering majors in the natural sciences will fulfill the Scientific Inquiry: Natural Physical World (p. 64) requirement through the sequence of courses in that requirement intended for students majoring in natural science or engineering.

The sample course plans below show what courses a student pursuing a bachelor of arts might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### Analytical Inquiry: Natural and Physical World Courses

Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today’s physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student’s major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.
COMP 1101 Analytical Inquiry I (4 Credits)
Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

COMP 1670 Introduction to Computing (4 Credits)
Overview of computing, including history and impact, use of computer as a tool in various disciplines, logical process of problem solving, and concepts of programming using a high-level language. Appropriate for students who wish to learn more about computers but are not planning to continue in computer science. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

COMP 1671 Introduction to Computer Science I (4 Credits)
Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

COMP 1771 Introduction to Computer Science I - Honors (4 Credits)
This is an honors section of Introduction to Computer Science I meant for incoming freshman who are already experienced in computer programming. This course is meant to be faster paced than its counterpart COMP 1672/1671. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: AP credit in Java, at least one quarter of programming, or permission of instructor.

MATH 1150 Foundations Seminar (4 Credits)
The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

MATH 1200 Calculus for Business and Social Sciences (4 Credits)
This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models.

MATH 1951 Calculus I (4 Credits)
Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

MATH 2050 Symbolic Logic (4 Credits)
Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

PHIL 2040 Practical Logic (4 Credits)
In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

PHIL 2160 Symbolic Logic (4 Credits)
Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

Analytical Inquiry: Society and Culture Courses

Through these courses, students gain knowledge essential for today's global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.

ANTH 1910 Ancient Worlds (4 Credits)
This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history—the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ANTH 2020 Artifacts, Texts, Meaning (4 Credits)
How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2323 Global Health (4 Credits)
This course is an introduction to global health. As one of the world’s faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2420 Science, Technology and Human Values (4 Credits)
This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they influence human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1010 Images of Culture (4 Credits)
This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1020 Highlights of Medieval Art (4 Credits)
The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1030 Highlights of Renaissance Art (4 Credits)
The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1040 Sacred Spaces in Asia (4 Credits)
This course explores a variety of natural and man-made “Sacred Spaces” as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1050 Highlights of American Art (4 Credits)
This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist’s life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1060 Contemporary Art Worlds (4 Credits)
Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ARTH 1070 Artists on Film (4 Credits)
Artists with turbulent lives have often captured the popular imagination. Typically, novels, plays and films about such artists perpetuate myths of tormented souls overcoming hardships, enduring romantic catastrophes and struggling with their creative genius. Usually, the reality is quite different as an artist’s path is one of developing talent, hard work, persistence and great personal courage. This class explores the lives and works of several famous artists. We evaluate the myths and the realities of their lives by comparing their art to films and documentaries that have been made about them. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)
This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2802 World Art II: c. 1000-1700 (4 Credits)
This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2814 Medieval Art (4 Credits)
This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expance of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2840 Survey of Asian Art (4 Credits)
An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)
This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ASIA 2702 Religions of China & Japan (4 Credits)
This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2103.

ASIA 2714 History of Yoga (4 Credits)
This course explores different ancient and medieval forms of yoga in their Indian cultural contexts as well as modern forms of yoga in India and North America. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2114.

CHIN 1516 Contemporary China in Literature and Films (4 Credits)
This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with ASIA 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.
CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)
Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecoliterature and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week’s speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2020 On the Black Panther Party (4 Credits)
This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party’s newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2030 Social Movement Rhetoric (4 Credits)
This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"— as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2210 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

COMN 2220 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2300 Fundamentals of Argumentation (4 Credits)
This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2400 Landmarks in Rhetorical Theory (4 Credits)
This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.
COMN 2450 Between Memory & Imagination (4 Credits)
How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2471 The Social Construction of Travel (4 Credits)
Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

EDPX 2200 Computing and Society (4 Credits)
This course examines the computing and communication antecedents of digital media and the critical underpinnings of digital media studies. Starting with historical overview of the development of the computing machine, the class progresses to an examination of the effects of digital technologies on work, social life, the business world and the arts. We investigate the developments of the digital computer through the twentieth century as well as the development and growth of the software industry and the Internet. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MFJS 2200.

EDPX 2901 Computing and Society (4 Credits)
This course introduces students to the historical, economic, legal and social contexts of emergent digital practices and explores the various ways technology shapes and is shaped by culture. The rapid growth of participatory culture online through, for example, social networking sites, interactive news sites, gaming, mobile apps, and blogging has significant social implications and brings up issues of privacy, intellectual property, and the nature of community and public engagement. This class will explore these issues through various theoretical lenses and concrete cases including politics, youth culture, activism, news and art. Particular emphasis will be placed on the question of how new media differs from mass media across various fields of cultural production (music, news, advertising, for example) and on what influence new digital products and practices might have on these industries and on cultures and societies more generally. This course counts towards the Analytical Inquiry: Society and Culture requirement. Cross-listed with MFJS 2200.

EDPX 3710 Critical Game Studies (4 Credits)
An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

EDPX 3730 21st Century Digital Art (4 Credits)
This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practice of play. This course is taught with a hybrid teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course satisfies a cultures requirement for emergent digital practices majors and minors. This course counts toward the Analytical Inquiry: Society and Culture requirement. Lab fee. Prerequisite: EDPX 2200.

EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)
This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists.

ENGL 1110 Literary Inquiry (4 Credits)
Literary Inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2080 London as Global City: From Empire to Commonwealth (4 Credits)
London as Global City is designed to accommodate the newly structured London Program for Fall 2011. It entails biweekly meetings and site visits for 14 weeks and examines the origins of the British Empire, starting with the founding of the East India Company in 1600 and moving to 21st century London as a repository of peoples from across the globe, particularly descendants of former British colonies in India, Africa and the West Indies. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.

ENGL 2120 Chaucer-Selected Poetry (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2130 World Literature (4 Credits)
A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2221 Shakespeare Seminar (4 Credits)
This course traces Shakespeare’s development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2230 Shakespeare and Film (4 Credits)
An examination of film adaptation and staging of Shakespeare’s plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2300 English Literature III (4 Credits)
A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2402 Later Romantics (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2544 Globalization and Cultural Texts (4 Credits)
The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2613 Excavating Italy (4 Credits)
This class provides an introduction to the art, history and literature of the Italian cities of Rome, Florence and Venice from classical antiquity through the High Renaissance, as well as visual and literary responses to Italy, by artists and writers. Students are encouraged to recognize the importance of classical architecture and sculpture as the artistic precedents for Renaissance art. We see how religious and literary themes provided much of the iconography of Renaissance painting. Students are also encouraged to become intimately acquainted with the works of a few selected major artists, such as Giotto, Botticelli, and Michelangelo, while also developing a wider understanding of the general stylistic features of Italian Renaissance art. The literature component focuses on a variety of genres from classical texts to Shakespeare’s Italian plays to British travelers’ impressions of Italian artists and scenes. This is a team-taught course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ARTH 2613.

ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)
Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonization to the Civil War.

ENGL 2710 American Novel-19th & 20th Century (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2718 Latina/o Literature (4 Credits)
This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field’s major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.
ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with JUST 2742.

ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in American from a comparative context. But is there such a things as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with JUST 2743.

ENGL 2816 Advanced Writing (4 Credits)
This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student's choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)
This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by writers such as Thomas More, Charlotte Gilman Perkins, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, etc. This course counts toward the Analytical Inquiry: Society and Culture requirement.

FREN 2500 Qu’est-ce que la littérature? (4 Credits)
Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or equivalent.

FREN 2501 La Nature et les animaux (4 Credits)
Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (La Fontaine) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course may be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

FREN 2504 La Culture au Cinema (4 Credits)
We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

FREN 2701 Sujets spéciaux (4 Credits)
Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.

FREN 3505 Masques du moi (4 Credits)
Qui suis-je??? The question of self, identity, and discovering "who I am" has preoccupied many writers, filmmakers, or other artists. Identity, or one’s sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the "true" facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of "writing the self" represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)
This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.
Inquiry: Society and Culture requirement. Of historical knowledge. We also dip into the past for primary documents—the stuff of historical analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1230 Asia and the Modern World (4 Credits)**

This course considers the recent history of Asia in a broad world-historical context and, in doing so, asks students to examine commonly held assumptions about the nature (and presumed uniqueness) of the modern world and the "place" of Asia in it. The aim in doing so is to reconsider how we might better understand the past and the present. We proceed on two levels, using both primary and secondary sources. We critically examine assumptions about the nature (and presumed uniqueness) of the modern world and the "place" of Asia in it. The aim in doing so is to reconsider how we might better understand the past and the present. We proceed on two levels, using both primary and secondary sources. We critically examine Robert Marks' bold challenge to standard historiography, in "The Origins of the Modern World," for what it can teach us about the ongoing development of historical knowledge. We also dip into the past for primary documents—the stuff of historical analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1220 Warring States and Middle Kingdoms (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 2022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)**

This is an introduction to 20th- and 21st-century German culture, history, and politics through film analysis. Studying the most famous and influential films in the history of German cinema, students explore a wide range of topics (including political propaganda, national identity, multiculturalism, terrorism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERK 1416 Myths of Greece & Rome (4 Credits)**

Introduction to the goddesses and gods, heroes and heroines, and not a few monstrousities from popular tradition, literature, and visual arts of the ancient Greeks and Romans. Activities include imaginative and creative assignments. No prerequisite. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERK 1716 It's Really Epic! The Ancient Heroic Epics of Homer and Virgil in Contemporary Translation (4 Credits)**

Foundations of Western values and aspiration, good one and not so good ones, may be found at the beginning of Western/European literature in the "Homerian" epics Iliad and Odyssey. The very notions of "tragedy" and "romance" originate in them. For the past twenty six or seven centuries men and women have wrestled with problems, often moral dilemmas and contradictions, that are first dramatized there. Centuries later, though still two millennia before our time, the Roman poet Virgil confronts the triumphant individualism of the Greek epics in his Aeneid and answers them with compassion and a vision of a very different way to build a person and a community. A better one? We address that question by studying these three timeless texts in award-winning-winning 21st-century English versions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GREK 1816 Ancient Tragedy Ever Modern (4 Credits)**

Three great Athenian tragedians of the 400s BCE—Aeschylus, Sophocles, and certainly most modernist of all Euripides—offer us of the 2000s CE much to experience, much to ponder, much that still challenges us. We experience their democratic Athenian community and its political and social, its religious and philosophic innovations as actualized in tragedy. We read and analyze, enact (in parts) and even imitate both widely known "world classics" Antigone and Oedipus Tyrannus, Medea and Bacchae with fresh approaches proper to our turbulent times, but also less familiar, often distressing "problem" plays that include Euripides' Andromache, Hecuba, and Heracles. This course bears the Analytical Inquiry: Society and Culture attribute in Common Curriculum.

**GREK 1916 Comedy Old and New (4 Credits)**

Reading and discussion of and experiment with comedies from ancient Rome and even more ancient Greece. We begin, however, with modernizations in American-musical form, and end with our own product in 21st-century emulation. Students' participation, even broad clownish histrionics, required. Students must also be eager to laugh—knowingly and intelligently, of course.

**GWST 2212 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

**GWST 2740 Gender, (De)Colonization, and Science Fiction (4 Credits)**

This course uses intersectional feminist theory to explore how authors and artists construct the past, present, and possible futures through the speculative arts—including imaginative constructions of gender, sexuality, statehood, tradition, labor, magic, and science—in order to imagine decolonial possibilities.

**HIST 1110 Ancient Rome (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1220 Waring States and Middle Kingdoms (4 Credits)**

The study of history at American universities has, in recent decades, moved beyond a narrow focus on Western civilization to embrace the study of broader world historical issues. Other academic disciplines have, to some extent, followed suit. Yet, despite the globalization of our lives and culture, the intellectual categories we normally employ to understand both the present and the past remain, to a considerable degree, bound by old restrictions. History—even world history—remains stuck in the past. This course aims to use concepts derived from East Asian history to interrogate and challenge received concepts and categories—not to impose another paradigm but to continue the quest for a better one. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1230 Asia and the Modern World (4 Credits)**

This course considers the recent history of Asia in a broad world-historical context and, in doing so, asks students to examine commonly held assumptions about the nature (and presumed uniqueness) of the modern world and the "place" of Asia in it. The aim in doing so is to reconsider how we might better understand the past and the present. We proceed on two levels, using both primary and secondary sources. We critically examine Robert Marks' bold challenge to standard historiography, in "The Origins of the Modern World," for what it can teach us about the ongoing development of historical knowledge. We also dip into the past for primary documents—the stuff of historical analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1240 Comparative History of Medicine (4 Credits)
This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1250 Food in East Asian History (4 Credits)
This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1310 Crime and Punishment (4 Credits)
We focus specifically on the history of crime and the history of punishment by examining the nineteenth century (1800s), considered by many to be the great age of criminology and the era of the birth of the modern prison system. Over the course of the nineteenth century, the meaning of crime underwent a radical change; whereas in earlier periods, crime was synonymous with sin and criminals were prosecuted for offenses against the common good, by the nineteenth century, criminals were individuals who did what they did for all sorts of complicated reasons and the scope of crime extended to offenses against individuals, property, and morality. Not surprisingly, the nature of punishment changed to meet the shifting definitions of crime. Punishment became less about torturing the body and more about reforming the will or character of the individual criminal. We study this change over time by looking mostly at Britain and Europe, considered to be at the forefront in criminology and penology at the time. We examine the implications of the shifting meanings of crime and punishment by looking at the criminologists' own words, media coverage of crimes, and the opinions of historians and other contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1320 European Culture in the World Wars (4 Credits)
This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1330 History of Ireland (4 Credits)
We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of 'Irishness', competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland's evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1340 The British Monarchy (4 Credits)
This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1350 History of the British Empire (4 Credits)
This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland, explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies placed in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1360 World War One (4 Credits)
Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens’ lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.
HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)
When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered.

HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)
From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1510 War and the Presidency (4 Credits)
This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1520 Immigrant Voices in Modern America (4 Credits)
This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony--autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1530 History of the United States since 1865 (4 Credits)
From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans’ everyday lives, and what legacies did these events leave for our own day? How have Americans defined and divided themselves--by race, gender, class, or otherwise--and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about "big business," "big government," "American exceptionalism," or the "American dream"? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1540 Society, Culture, and Popular Politics in the Making of Early America, 1607-1815 (4 Credits)
This course examines the foundations and development of American society and culture from 1607 to 1815. We study Native American societies and the establishment of European colonies in America, and the complex processes and events that led to the American Revolution and the creation of a republic in North America. Through class discussions, lectures, group work, and reading, we examine American society and culture from a variety of perspectives and viewpoints. Themes and topics include empire and colonization, race, gender, class; politics and society; and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1550 America in the Sixties (4 Credits)
This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties"? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1630 Social Revolts in Latin America (4 Credits)
This course examines major revolutionary events that helped define the history of present-day Latin America. Major revolutions and rebellions, their agendas, underpinnings, accomplishments, and shortcomings are studied. The underlying interpretive lens is to understand the political, economic, and cultural forces at work that compelled revolutionary behavior to emerge. While covering a large time period, the course is structured along transformative historical cases which are closely analyzed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2000 Ancient Egypt (4 Credits)
This course examines the history and culture of ancient Egypt. We focus particularly on political and military developments during the Old, Middle, and New Kingdoms. We also study the social and cultural practices of the ancient Egyptians. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2016 Contemporary Israel-Palestinian Conflict, 2000-Today (4 Credits)
This course deals with the political, religious, and social dimensions of the Israeli-Palestinian conflict from the failure of the Oslo Accords to the present. It provides students with a brief overview of the history and key issues in the conflict, turning to domestic, regional, and global developments, allegiances, and enmities — political, religious, and economic — that have shaped the past 15+ years of conflict. At a time when even optimistic observers call the two-state solution a vain hope, this course concludes with a look at viable approaches for domestically and internationally acceptable peace plans. This course is cross-listed with JUST 2016 and RLGS 2016.

HIST 2022 The Roman Empire (4 Credits)
This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2107 Culture/Conscience in Vienna (4 Credits)
This study-abroad course focuses on the cultural and social history of the city of Vienna as the hub of politics, culture, and religion for Central Europe with special attention to its religious heritage as the seedbed for its rich cultural traditions. The course examines how its religious heritage, particularly Judaism, shaped its rich cultural heritage and the birth of modernism. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2107, JUST 2107.

HIST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America’s Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

HIST 2330 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of "Islamic empire," connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2113.

HIST 2380 Israeli History & Society; 1948-2011 (4 Credits)
Through historical sources, documentaries, movies and scholarly research, the course examines the major wars and clashes between Israel and its neighbors in the years 1948 to 2011. In this way, we will examine in depth the complexities of Israel's relationship with their Arab neighbor States, with a particular focus on the details of the Israeli-Palestinian conflict. Moving chronologically, the course aims to develop historical perspectives on the State of Israel, and the impact of emerging historical realities on Israeli society, including implications for religious identities, economics, political parties, security issues, and nationalist movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2395 Contemporary India, 1947-2000 (4 Credits)
This course examines the history of India after independence from Britain in 1947. It traces the historical roots of the economy, society and polity of contemporary India. Understanding the hot button issues of the Kashmir conflict, nuclear weaponization, globalization and terrorism cannot be separated from and requires a historical grasp of the underlying processes of state formation, national identity, economic development and gender and social empowerment that have characterized India. While India will be the main focus, South Asia’s shared colonial history and its legacies mean that the issues of regional tensions, ethnic and gender conflict, communal violence, secularism, the unevenness of electoral democracy and the fragility of civil society have wider application in the subcontinent as a whole. Therefore, the course constantly and continuously draws useful comparisons with events and processes in other South Asian nations such as Pakistan, Bangladesh, Sri Lanka, Nepal and Bhutan. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2395.
HIST 2515 Print and Politics in the American Revolution (4 Credits)
This course examines the impact of the American Revolution on American society, politics, and culture. It combines social history with a print-centered approach to explore how different groups used newspapers, pamphlets, magazines, and other media to articulate their respective and at times competing needs and interests during the conflict. The sources for this course consist primarily of the seminal texts produced during the Revolutionary era. These writings range from Thomas Paine's pamphlet Common Sense and the Declaration of the Independence to the sermons of the African-American minister Lemuel Haynes and the letters exchanged between John and Abigail Adams. In addition to studying the key arguments forwarded in these texts, we focus on how their production, circulation, and reception influenced the outcome of Revolutionary events. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2535 Warfare and Society in Colonial America (4 Credits)
From the earliest English settlements to the struggle for independent, military strife and warfare have played a central role in shaping the course of American colonial history. Throughout this period, Anglo-Americans engaged in numerous conflicts, waging war against indigenous peoples, Europeans, and sometimes each other. For this course, we adopt the methodologies of "New Military History" - a discipline focusing on the interaction of warfare with society, politics, economics, and culture - to better understand the full impact and pervasive nature of colonial warfare. Our investigation therefore focuses on how the practices and heritage of warfare intersected with and influenced imperial rivalry, religious beliefs, cross-cultural encounters, racial formation, gender relations, as well as military strategy and technology, from 1607 to 1776. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)
In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2910 Colonial Latin America (4 Credits)
This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2920 The Making of Modern Latin America (4 Credits)
This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2955 Latin America at the Movies (4 Credits)
This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2201 20th-Century History and Culture (4 Credits)
This course provides a historical and cultural approach to 20th-century Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2355 Images of Rome in Literature & Film (4 Credits)
The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1216 Popular Culture of Japan (4 Credits)
In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)
This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1616 Samurai and Merchants: Cultures of Tokugawa Japan (4 Credits)
Introduction to the cultures of Tokugawa, Japan, focusing on the tension between the samurai and merchant classes, the images they construct of self and other, and the morals and mores of their respective worlds. As well as examining Tokugawa fiction, drama, and other cultural artifacts, this course also considers later representation of the period and of its people in twenty- and twenty-first-century text, cinema, and television to understand the importance of contemporaneous influences on historical representation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1816 Classical Japanese Literature (4 Credits)
The course covers one thousand years of Japanese writing, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, the classic The Tale of Genji, medieval tales of wars and hermits, the no drama, and the haiku and travel diaries. It will focus on such key binaries as orality and literacy, poetry and prose, native and foreign, popular and high-brow, and masculine and feminine. The course will also stress principles of literary analysis and interpretation. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with HIST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 1610.

JUST 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre’s non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and RLGS 2014.

JUST 2016 Contemporary Israeli-Palestinian Conflict, 2000-Today (4 Credits)
This course deals with the political, religious, and social dimensions of the Israeli-Palestinian conflict from the failure of the Oslo Accords to the present. It provides students with a brief overview of the history and key issues in the conflict, turning to domestic, regional, and global developments, allegiances, and enmities – political, religious, and economic – that have shaped the past 15+ years of conflict. At a time when even optimistic observers call the two-state solution a vain hope, this course concludes with a look at viable approaches for domestically and internationally acceptable peace plans. This course is cross-listed with JUST 2016 and RLGS 2016.

JUST 2026 Race: Black, Jew, Other (4 Credits)
This course is cross-listed with PHIL 2026 and RLGS 2026. In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses/practices to a range of other anti-Other discourses/practices at play in the world around us.

JUST 2040 Israel Between Wars: History and Society (4 Credits)
Through historical sources, documentaries, movies and scholarly research, this course examines the major wars and clashes between Israel and its neighbors in the years 1948 to 2011. In this way, we examine in depth the complexities of Israel’s relationship with their Arab neighbor states with a particular focus on the details of the Israeli-Palestinian conflict. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2050.

JUST 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with ENGL 2104 and RLGS 2104.

JUST 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with ENGL 2202.

JUST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America’s Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with HIST 2320.

JUST 2350 Israeli Culture Through Film: Society, Ethnicity, and Inter-Cultural Discourse (4 Credits)
This course presents Israeli society and culture development as reflected in Israeli films from the 1950s to present day Israel. Topics include history and collective memory, ethnicities and the experiences of immigration, Israelis in their spatial Mediterranean/Middle-Eastern context and Judaism in its old and new representations. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)
This course analyzes fundamental aspects of Israeli-Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

JUST 2410 Religious Diversity in Israel (4 Credits)
Through religious, sociological and historical sources, as well as documentaries, movies and scholarly readings, this course examines religious diversity in Israel since its establishment in 1948 to current events today. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2410.

JUST 2741 American Jewish Literature (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.

JUST 2742 Modern Hebrew Literature (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the soil political, and historically changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with ENGL 2743.

JUST 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2000 Introduction to Film Criticism (4 Credits)
Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2002 Introduction to Film Criticism (4 Credits)
Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. This course counts toward the Analytical Inquiry: Society and Culture requirement. Course open to Colorado Women’s College students only.

MFJS 2200 Emergent Digital Practices and Cultures (4 Credits)
This course introduces students to the historical, economic, legal and social contexts of emergent digital practices and explores the various ways technology shapes and is shaped by culture. The rapid growth of participatory culture online through, for example, social networking sites, interactive news sites, gaming, mobile apps, and blogging has significant social implications and brings up issues of privacy, intellectual property, and the nature of community and public engagement. This class will explore these issues through various theoretical lens and concrete cases including politics, youth culture, activism, news and art. Particular emphasis will be placed on the question of how new media differs from mass media across various fields of cultural production (music, news, advertising, for example) and on what influence new digital products and practices might have on these industries and on cultures and societies more generally. This course counts towards the Analytical Inquiry: Society and Culture requirement. Cross-listed with EDPX 2200.
MFJS 2290 Innovations in Media and Communications (4 Credits)
Today, it is difficult to imagine a life free of the media. There are more than 4 billion mobile phones in the world, and a billion people are now able to access the Internet. Television is available to close to 100% of people living in the media-saturated societies of North America, western and Eastern Europe, and East Asia, with radio widely available almost everywhere else. Moreover, with YouTube, blogs, online gaming, citizen journalism, experimental film, and peer-to-peer file sharing, people are actively creating and sharing their own news and entertainment experiences like never before. Communication technologies are changing the way money circulates, how and where business is conducted, the ways in which labor is deployed, and how people communicate between home and work, national and diasporic contexts. The media are facilitating both globalization and cultural hybridity, at times securing social cohesion and at other moments facilitating social movements for change. Where do these technologies come from? Who controls them? Who profits from them? How are they used, and with what potential implications? What does the future hold? These are some of the questions the class will address. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1012 Music, Society, and Culture (4 Credits)
This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music’s relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1016 History of Jazz (4 Credits)
The “birth of rock” occurred in the mid 1950’s as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1017 History of Rock and Roll (4 Credits)
The "birth of rock" occurred in the mid 1950’s as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1018 Understanding Music (4 Credits)
This course examines the interaction of mathematics and music composition since 1970, an interaction that has grown more vibrant with the advent of electronic music and modern computation. In this course, we will use mathematical concepts and methods to address basic questions about music, mathematics, and musical works. The questions include, (a) how do pieces by contemporary composers reflect an affinity for mathematical concepts?, (b) are the intervals preferred by cultures as diverse as ancient Greece and the contemporary Levant inherently beautiful?, (c) what is the relationship between complexity and chance on the listening experience?, and several others. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1023 Mathematics in Music after 1970 (4 Credits)
This course examines the interaction of mathematics and music composition since 1970, an interaction that has grown more vibrant with the advent of electronic music and modern computation. In this course, we will use mathematical concepts and methods to address basic questions about music, mathematics, and musical works. The questions include, (a) how do pieces by contemporary composers reflect an affinity for mathematical concepts?, (b) are the intervals preferred by cultures as diverse as ancient Greece and the contemporary Levant inherently beautiful?, (c) what is the relationship between complexity and chance on the listening experience?, and several others. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1024 Black Sacred Music: A Survey (4 Credits)
This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

MUAC 1025 Hip-Hop and Rap Music (4 Credits)
From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Auto-tune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music’s relation with gender, race, identity, and politics.
MUAC 1026 American Musical Mavericks (4 Credits)
This course examines music history in the United States through the figure of the "maverick," a rugged individualist who operates outside the mainstream of society. Using Michael Broyles's Mavericks and Other Traditions in American Music as a primary textbook, this course surveys American music from the 18th to the 21st centuries, introducing students to a variety of musical traditions, pieces, composers, performers, and artistic strategies. Central themes include: the impact of Puritanism on U.S. arts and culture, the dilemma of art music in a democratic society, and the struggle to develop a uniquely American musical voice in a nation of immigrants. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity (performance, composition, etc.). Analyze the relationship between texts, ideas, or creative works and a broader context (intellectual, political, artistic, etc.) in ways appropriate to disciplines in the arts or humanities. No prior musical experience is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1027 Global Pop (4 Credits)
This survey of global pop explores musical thought and processes through an examination of the development of "world music" and "world beat," including its meaning and importance to contemporary culture as well as its history and impact. Intended to provide students with a basic understanding of the international popular music scene from its explosion at the close of the 20th century through the present day, this course questions the meaning and importance of this trend in contemporary culture. It explores the complex relationships of music and mass media while addressing themes of nationalism, popular resistance and subversion, censorship, transnational identity, gender representation, and cultural hegemony. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1028 Hearing the Movies (4 Credits)
Although we usually say that we watch movies, we might more accurately say that we “see-hear” or “audioview” them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required.

MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2053 Musicology: Baroque Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2054 Musicology: Classical Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2055 Musicology: Romantic Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1830 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2056 Musicology: Modern Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.
MUAC 2057 Musicology: Introduction to World Musics (3 Credits)
This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music’s connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3043 Senegalese Drum/Dance Ensemble (0-1 Credits)
This ensemble is dedicated to learning the art of sabar dance and drumming, vibrant traditions of the Wolof people of Senegal, West Africa. In Senegal, sabar drums are played exclusively by griots, a caste of hereditary musicians. Sabar drum troupes perform at a variety of events, baptisms, weddings, wrestling matches, political meetings, and neighborhood dance parties. At most of these events, dance is an essential counterpart to drumming. The drum ensemble consists of numerous parts that come together to create complex polyrhythms. Ensemble members learn various drum parts that form rhythms over which a lead drummer solos, and dance movements that accompany these drum rhythms. They also learn bakks, extended musical phrases played in unison, and songs in the Wolof language. This course may be taken multiple times. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3044 Ghanaian Drumming Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to the drumming and singing traditions of Ghana, West Africa. Through hands-on instruction and oral transmission, students learn ceremonial and recreational music styles of select ethnic groups. Assigned readings, film viewing, guided listening, and in-class discussion familiarizes students with the social and cultural meanings of the musics performed in class. The course culminates in an end of the quarter concert. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3046 Indonesian Music Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to Indonesian performance traditions from the islands of Bali and Java. Through hands-on instruction and oral transmission, students will learn a variety of gamelan (gong/chime ensemble) traditions. While learning this sophisticated cyclic music, class discussions, assigned readings, films, and guided listening will further familiarize students with the social and cultural meanings of the musics performed in class. Additionally, students will have the opportunity to learn basic hand, foot, and eye movements for Balinese and Javanese dance, as well as to study kecak, a Balinese vocal music that imitates the sound of the gamelan. The course will culminate in an end of the quarter concert.

MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)
The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all “classical” and “jazz” instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3048 Bluegrass Ensemble (0-1 Credits)
In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers' style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3710 Opera (0-1 Credits)
Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3712 Lamont Chorale (0-1 Credits)
The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

MUEN 3730 American Heritage Chorale (1 Credit)
This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3740 Lamont Men's Choir (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2005 Philosophy of Religion (4 Credits)
This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2005.
PHIL 2007 Philosophy and Video Games (4 Credits)
Traditional and novel metaphysical, ethical, political, and aesthetic issues both arising within video games and posed by this still developing medium. No prerequisites. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with JUST 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2010 Existentialism (4 Credits)
Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses/practices to a range of other anti-Other discourses/practices at play in the world around us. This course is cross-listed with JUST 2026 and RLGS 2026. This course counts for the AI/Society requirement.

PHIL 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.

PHIL 2100 Philosophy of Mind (4 Credits)
Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind—epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2110 Classical Greek Philosophy (4 Credits)
The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato's student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the "Golden Age of Greece' has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2111 Greek Moral Philosophy (4 Credits)
In this course we examine the "Good Life" in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)
A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2126 Suicide, Philosophy, Community (4 Credits)
Since its beginning among the ancient Greeks, the story of philosophy has been complexly intertwined with the two other stories, that of reflection on suicide, and that of reflection on the nature and nurture of community. In the first half of this course, we first examine a classic ancient Greek philosophical text addressing suicide, the we consider some 20th century philosophical reflections on that same topic, culminating in an impassioned defense — written and first published shortly before his own suicide by a philosophically trained writer who survived Auschwitz — of the individual's right to choose "voluntary death." Then, in the second half of the course, we turn to the issue of community, especially as thinking about the possibility of establishing a genuinely universal community inclusive of all humans without exception is surprisingly affected by serious reflection on the issues of suicide examined in the first part of the course. To aid and direct us, we examine some challenging contemporary philosophical writings concerning just such a possibility of truly inclusive human community. This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2130 Philosophy of Early Modern Age (4 Credits)
Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2140 Kant to Nietzsche (4 Credits)
German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2144 20th-Century Philosophy (4 Credits)
A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2145 Between Deleuze and Foucault (4 Credits)
Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2150 Philosophy of Law (4 Credits)
Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2180 Ethics (4 Credits)
Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)
Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?" together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)
A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the "modern world." This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2184 Ethics, Individuals, & the Law (4 Credits)
Furnish students with a detailed and lasting understanding of a range of philosophical and ethical problems that arise in the law. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2200 Social & Political Philosophy (4 Credits)
Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2260 Philosophical Perspectives on Perception and Reality (4 Credits)
An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call "the physical world"). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)
Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2402 London and Paris: Medieval to Postmodern (4 Credits)
This is a 3-week summer session course involving one week on campus and two weeks travel to London and Paris. It traces the development of philosophical ideas, politics, social institutions, architecture, and the visual arts from the Middle Ages to the present as they occurred in these two major capitals. Its approach is both historical and comparative and emphasizes understanding and interpreting the contemporary experience of these cities in light of their shared as well as divergent historical paths.

PHIL 2700 Biomedical Ethics (4 Credits)
Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2770 Philosophy of Science (4 Credits)
This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 1101 Religious Lives: Jesus (4 Credits)
The title of this course has a double meaning. On the one hand, the title suggests ours is a study of a religiously important figure. Jesus is one such historical personage. Hence his life is the object of study. The course title also points to the character of the gospels. They are “lives,” “religious lives” of Jesus that arose out of storytelling cultures. In those contexts, stories were read and heard aloud, often “performed” and adapted. Gospels are not “biographies” of Jesus, as we typically think of that genre. It is important to recognize that in “telling the story of Jesus,” the gospel writers were also telling us a story of their own communities, framing stories that would influence how early Christians lived out their religious commitments to Jesus in a world shaped by the forces of late ancient Judaism and Greco-Roman imperialism. We must follow tantalizing clues and draw conclusions from texts—usefully compared to the scripts of plays—that were not interested, primarily, in objective, non-partisan, historical description. Both Jesus and the gospels rivet our attention in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2005 Philosophy of Religion (4 Credits)
What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a “God friendly” approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2005.

RLGS 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2014 and JUST 2014.

RLGS 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and JUST 2014.

RLGS 2016 Contemporary Israeli-Palestinian Conflict, 2000-Today (4 Credits)
This course deals with the political, religious, and social dimensions of the Israeli-Palestinian conflict from the failure of the Oslo Accords to the present. It provides students with a brief overview of the history and key issues in the conflict, turning to domestic, regional, and global developments, alliances, and enmities – political, religious, and economic – that have shaped the past 15+ years of conflict. At a time when even optimistic observers call the two-state solution a vain hope, this course concludes with a look at viable approaches for domestically and internationally acceptable peace plans. This course is cross-listed with JUST 2016 and HIST 2016.
RLGS 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-ness" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. Cross-listed with JUST-2026 and PHIL-2026.

RLGS 2101 Exploring Religion in America (4 Credits)
What do Americans believe? Is there a singular religion or set of religious beliefs that bind together the varieties of American faith traditions and ethnic cultures into a common national identity? E pluribus unum—from the plurality a unity is formed—is one of three official mottoes adopted in 1782 to define and represent the U.S. To what extent is this true, both today and in the past? Americans are faced with the difficult task of creating a harmonious society from the encounter, repulsion, and attraction of discrete civilizations. At the vanguard of modern republican democracy, the U.S. is the central playing field upon which cultural/religious pluralism is negotiated, defined, and legislated. The course explores the evolution of the American nation as a pluralistic belief or faith community and explores the meaning and potential for a singular national religious community. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2102 Judaism, Christianity & Islam (4 Credits)
This course introduces students to the three major monotheistic religious traditions: Judaism, Christianity, and Islam. In the process of tracing the long and rich histories of Judaism, Christianity, and Islam, we examine the beliefs and practices that became central and definitive for Jews, Christians, and Muslims. We begin with the ancient heritage of each religion (scriptures, founders, early institutions). Then we explore how these foundational traditions were preserved and re-invigorated in response to centuries of social change and critical moments of political upheaval. Most significant, in this regard, is the Jewish, Christian, and Muslim encounter with their respective holy Scriptures—successive generation of adherents have attempted to understand the revealed words of God, to proclaim their continual relevance for all places and all times and to inscribe them upon their bodies and hearts through prayer, worship, and daily life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2103 Religions of China & Japan (4 Credits)
This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2702.

RLGS 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and JUST 2104.

RLGS 2105 Works and Lives (4 Credits)
This course is an introduction to the study of religion through the examination of religious works and lives. For purposes of our exploration, we think of religion as a system of relationships between major ideas and everyday life practices that orients people to a view of the whole of existence. "Works" is a term that covers two major aspects of religious traditions: rituals and moral codes. The term "works" has to do with behaviors, whether they are the behaviors involved in a specifically religious situation (often rituals) or the behaviors in everyday life that are addressed by religious commands and prohibitions (often morals). We also consider stories of works and guidelines for "lives." Some of these lives are clearly related to daily life within the religious traditions. Some are stories of lives that seem utterly fantastic. We question why such lives are written, what the reader can take from them, and what points they might make. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2106 Religious and Social Justice in Vienna (4 Credits)
This special travel course provides an opportunity for students to learn how certain major religions are globally engaged in the promotion of social justice through humanitarian relief work and cultural exchanges. In addition to a brief survey of the historical relationship between the beliefs, teachings, and social practices of the major Western traditions, the course offers hands-on experience and interaction with Jewish, Catholic, and Protestant relief agencies as well as other non-governmental organizations in Vienna, Austria, which has become the international center for UN-directed human services and humanitarian relief efforts as well as global headquarters for leading NGOs. Students discover how the culture, history, and geography of Vienna have nurtured the vast global human services "economy" to which these religious organizations contribute and which are built around the work of the United Nations. This course counts toward the Analytical Inquiry: Society and Culture requirement.
RLGS 2107 Culture and Conscience in Vienna (4 Credits)
This study abroad course focuses on the cultural and social history of the city of Vienna as the hub of politics, culture, and religion for Central Europe with special attention to its religious heritage as the seedbed for its rich cultural traditions. The course examines how its religious heritage, particularly Judaism, shaped its rich cultural heritage and the birth of modernism. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2107, JUST 2107.

RLGS 2108 Islam in the United States (4 Credits)
A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with "American" accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2109 Religions of Tibet (4 Credits)
This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2110 Buddhism in the U.S.A. (4 Credits)
Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the "two-way traffic" between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2111 Islam and United States Politics (4 Credits)
This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans' relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2112 Major Islamic Thinkers 1900s-2000s (4 Credits)
This course offers students a substantive introduction to the major Islamic thinkers of the 20th and 21st centuries. Starting with Abu `Ala Maududi, whose work on Qur’anic interpretation and the meaning of jihad laid the groundwork for new waves of radical activism in the modern Muslim world, this course exposes students to the works of major "movers and shakers" like Sayyid Qutb and Ayotollah Ruhollah Khomeini. Students engage these thinkers through a mixture of primary and secondary sources, developing a sense of context as they work through these thinkers' arguments. The course continues with an examination of some of the major later 20th-Century Islamic thinkers active in Muslim-minority spaces, focusing on Bosnian Grand Mufti Mustafai Ceric and the late Moroccan-French scholar Mohammed Arkoun. It concludes by looking at two major figures of the early 21st century, noting how they blend intellectual and political activism: Iranian cleric Mohsen Kadivar and American scholar Amina Wadud. Throughout the course, student groups present on various contemporary issues, helping them develop presentation and writing skills while allowing them to apply course knowledge to real-world issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2113 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of "Islamic empire," connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2114 History of Yoga (4 Credits)
This course explores different ancient and medieval forms of yoga in their Indian cultural contexts as well as modern forms of yoga in India and North America. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2714.

RLGS 2115 Major figures in the Bible and Qur'an (4 Credits)
This course offers students a thematic introduction to the key common figures in the Bible and Qur'an, focusing on the major prophets, from Adam to Jesus, as well as Eve and Mary. Grounded in the primary source texts while exposing students to classic and contemporary scholarly work on these figures, it concludes with a look at the figure of God in the two scriptures.
RLGS 2117 Religions of India (4 Credits)
The religions of India include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. Students will be introduced to the history and literature of each of these religious traditions. These religious traditions are not completely separate entities. Indian religious groups are always in dialogue and often in competition with one another. The course will explore the dominant religious groups and their intersections in various historical periods. Common religious places—temples, monasteries, pilgrimage sites, and sacred geography—function as points for interaction and mutual influence between rival religious traditions. Religion is what you do, not what you think. As such, ritual practice and literature will be emphasized over philosophy and dogma. The dominant mode of study will be history of religions, with an emphasis on history. This course counts toward the Scientific Inquiry: Society and Culture requirement.

RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)
This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions and contexts of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified "feminine" and the construction of gender within modern South Asia.

RLGS 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2202.

RLGS 2301 American Indian Religion (4 Credits)
This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the “Great Plains Indians” (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues.

RLGS 2303 Lived Religions (4 Credits)
The concept of “lived religions” has become prominent in religious studies since the 2000’s. While people may think of religions as sets of sacred writings, rules, and rituals, the “lived religions” approach focuses on the ways that people incorporate religion into their activities. The approach is new enough that scholars have not yet come to full agreement on what the term “lived religions” should include and what it implies about religions and how to study them. The course will make room, therefore, to debate the advantages and drawbacks of studying religions through the ways people use religion to shape their life. Students will examine examples of how people live their religion and trace the relationships of these practices to religious teachings and ideas. This effort will involve asking a variety of questions. How closely are religious practices related to teachings and ideas? Does a specific religion put greater emphasis on engaging in specific activities or on agreeing with particular teachings? If people’s behavior does not fit with a religion’s teachings but the people still consider it to be related to key aspects of religion, does it count as religious? Or have these people moved away from religion into a practice that is spiritually meaningful but not religious? Or is spirituality something even more sharply different from religion? Or is spirituality also part of religion? If we look closely at how people in a religious tradition live, what do we see that we would not notice if we were looking at the religion as only a system of beliefs? For instance, does the sense of time of people who adhere to the religion’s calendar of remembrances differ from the sense of time of people who do not? And what specifically would we do to learn about religion, if we concentrate on people’s actions? In opening up such inquiries students will learn both about studying religions and about major facets of religious traditions. The course will require reading and successful completion of tests. Visits to off-campus sites and completion of reports on site visits will facilitate learning through encounter and participation. Students will also undertake a project using concepts from the course to imagine and interpret lived religion in behaviors or in aspects of the physical or social world. The religions, practices, and sites for study, observation, and interpretation—as well as the assignments—may vary each time the course is offered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2310 World Christianities (4 Credits)
This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as its foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization.

RLGS 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)
Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.
RLGS 2410 Religious Diversity in Israel (4 Credits)
Through religious, sociological and historical sources, as well as documentaries, movies and scholarly readings, this course examines religious diversity in Israel since its establishment in 1948 to current events today. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2410.

RLGS 2501 Islam on Film (4 Credits)
This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 1416 Introduction to Russian Culture: Evil and the Supernatural (4 Credits)
What is evil? Where does it come from and what place does it have in our world? What, if anything, are we supposed to do about it? We examine how Russian writers wrestle with these thorny questions, and how they engage in a dialogue with the Russian folk tradition and the Orthodox church—two rich resources for thinking about and coping with evil. We read world-famous Russian classics such as Dostoevsky, Pushkin, Gogol, and Bulgakov, as well as Russian folk tales, writings produced by Russian Orthodox clergy, and recent critical studies that represent a broad range of approaches to the problem of evil. No knowledge of Russian is necessary; all class discussion, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RUSS 2416.

RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)
This course surveys Russia's cultural past and present. Although it touches on aspects of Soviet Culture, the main emphasis is what has been called the "real Russian Culture," eclipsed for seventy years under the communist regime. The course surveys the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, film, music) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. The course includes several significant Russian films. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 1860 The Russian Short Story (4 Credits)
This course will introduce students to Russian literature through some of its shorter "masterpieces" of fiction. Students will explore the lives and ideas of some of Russia's greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 1917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature and history of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of literature and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No Prerequisites.

RUSS 1919 The Soviet Experiment in Literature and Film (4 Credits)
Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagandized by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovski, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevskaya, and watch ground-breaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 2111 Linguistic Politeness and Intercultural Communication (4 Credits)
In this course, students will explore how American and Russian speakers perceive politeness, and how sociocultural values underlying both cultures affect the speakers' communicative styles, their performance and perception of speech acts, and expression of emotions. Although this course focuses on Russian, other cultures will also be analyzed, such as German and Polish, and those of students' heritage. This course will help students to improve their communicative competence and deepen their understanding of some European cultures. The course will be conducted in English. Highly recommended for students planning on studying in Russia, Germany, or Poland. The course format consists of lectures, presentations, as well as class and group discussions. Students who major in Russian may get credit by providing coursework in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement. No Prerequisites.

RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)
This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator's voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country's intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women's place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.
RUSS 2416 Russian Classics in the Original: Evil and the Supernatural (4 Credits)
What is evil? Where does it come from and what place does it have in our world? What - if anything - are we supposed to do about it? We examine how Russian writers wrestle with these thorny questions, and how they engage in a dialogue with the Russian folk tradition and the Orthodox church - two rich resources for thinking about and coping with evil. We read world-famous Russian Classics such as Dostoevsky, Pushkin, Gogol, and Bulgakov, as well as Russian folk tales, writings produced by Russian Orthodox clergy, and recent critical studies that represent a broad range of approaches to the problem of evil. Readings and writing in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RUSS 1416. May not be taken with or after RUSS 1416. Prerequisite: RUSS 2110 or equivalent.

RUSS 2917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature and history of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of literature and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. Students develop their Russian reading and writing skills. Selected readings and all essays in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RUSS 1917.

RUSS 3232 Russian Avant-Garde (4 Credits)
This interdisciplinary course addresses various manifestations of the avant-garde in Russian art, literature, poetry, theatre and film in the late 19th – early 20th century. Its objective is to provide an understanding of rapid, drastic, and often conflicting cultural and artistic transformations as a whole, rather than a mixture of separate events, trends, and works. Major artistic and literary movements, such as Symbolism, Futurism, Cubo-futurism, Neo-Primitivism, Suprematism, Rayonism and Constructivism will be studied in the context of Russian pre-revolutionary, revolutionary and post-revolutionary social, political, philosophical and cultural developments, with a special attention paid to the cultural dialogue between Russia and the West. Selected philosophical essays, films, plays, poems and short stories are studied, in addition to a variety of works of art created during this period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s.

SPAN 1500 Understanding Contemporary Spain (4 Credits)
This course examines the key political, social and cultural issues at play in contemporary Spanish society. Via the analysis of various texts —historical, sociological, literary, filmic—this course will familiarize students with the key issues that define Spanish society today. The themes that will be the primary focus of class discussions and assignments include national vs. regional identities, gender roles, multiculturalism, Spain and the European Union and the legacy of the Franco dictatorship. Students will also read short stories by contemporary Spanish authors that address these same themes in order to have the opportunity to analyze and interpret artistic representations of the key issues at play in Spanish society today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

SPAN 2300 Iberian Culture & Civilization (4 Credits)
Intensive study of culture of Spain; manifestations of culture found in history, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2350 Latin American Culture and Societies (4 Credits)
An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2400 Latino Cultures in the United States (4 Credits)
Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2350 or equivalent.

THEA 1810 The Process of Theatre: Page to Stage (4 Credits)
Exploration of the process playwrights, directors, actors, and designers use in creating a theatrical production. Individual sections may focus on single areas only—please see department for current offerings. In this course, students will demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture. They will also identify and analyze the connections between these things and the human experience/perception of the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 1861 Theatre Imagination (4 Credits)
Beginning exploration of nature of theatricality through exercises and study of specific plays; explore acting, directing, designing and writing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 1862 How to Read a Play (4 Credits)
Close analysis of selected dramatic texts from Aeschylus to Caryl Churchill. This course counts toward the Analytical Inquiry: Society and Culture requirement.
THEA 1880 Fundamentals of Theatre Design (4 Credits)
The work of the theatre designer is to transform a text into visual and aural expression, by planning and creating the physical environment of a live performance. Students will learn about – and learn appreciation for – theatre design in order to be better theatre artists (and audience members) themselves, through the applied practice of designing a "paper" production, collaboratively with a small team.

THEA 2870 Acting I (4 Credits)
Exploration of acting through physical and vocal exercises, followed by scene study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2880 Scene Design I (4 Credits)
Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2881 Lighting Design I (4 Credits)
Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2890 Theatre History I (4 Credits)
This course examines the development of Western theatre and drama from the Ancient Greeks to the 19th-Century, concentrating on the intellectual, social and artistic foundations of theatre and drama. The course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among the students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from Fifth-Century B.C.E. into the early 19th-Century. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2891 Theatre History II (4 Credits)
This course examines the development of Western theatre and drama from the 19th-Century to the present. Concentrating on the intellectual, social and artistic foundations of theatre and drama, this course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from the 19th-Century to the present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**Scientific Inquiry: Natural and Physical World Courses**

Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

**Courses for Students in Majors Outside of Natural Sciences or Engineering**

**BIOL 1220 Molecules to Humankind I (4 Credits)**
First class in a three-quarter sequence for non-majors that examines the mechanisms that sustain life. Emphasis is placed on understanding the human body at the molecular, cellular and physiological levels. In the fall quarter our discussions start with the atom and basic chemistry. We next consider the properties of complex molecules, including DNA, proteins, carbohydrates and lipids, in order to see how such molecules are used and organized by living organisms. Our discussions of large and complex molecules lead naturally to the basic unit of life, the cell. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1221 Molecules to Humankind II (4 Credits)**
Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
BIOL 1222 Molecules to Humankind III (4 Credits)
Third class in a three-quarter sequence focuses for non-majors on cell biology, genetics, and human reproduction and development. After a review of cell structure and function, focusing on how cells are capable of replication with modification, the mechanisms by which information is passed on from one cell to another and from one generation to the next are considered. The second half of the quarter concerns sexual reproduction and early development. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1260 Sustaining Life I (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life — and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function — including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1261 Sustaining Life II (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life — and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function — including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

BIOL 1262 Sustaining Life III (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life — and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function — including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

BIOL 1270 Living in the Microbial World I (4 Credits)
Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1271 Living in the Microbial World II (4 Credits)
For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

BIOL 1272 Living in the Microbial World III (4 Credits)
In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

CHEM 1001 Science of Contemporary Issues I (4 Credits)
CHEM 1001 is the first class is a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
CHEM 1002 Science of Contemporary Issues II (4 Credits)
CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

CHEM 1003 Science of Contemporary Issues III (4 Credits)
CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1216 Our Dynamic Earth I (4 Credits)
This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornadoes, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1217 Our Dynamic Earth II (4 Credits)
This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

GEOG 1218 Our Dynamic Earth III (4 Credits)
This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

GEOG 1264 Global Environmental Change I (4 Credits)
First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1265 Global Environmental Change II (4 Credits)
Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

GEOG 1266 Global Environmental Change III (4 Credits)
Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

PHYS 1011 21st-Century Physics and Astronomy I (4 Credits)
First class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

PHYS 1012 21st-Century Physics and Astronomy II (4 Credits)
Second class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

PHYS 1013 21st-Century Physics and Astronomy III (4 Credits)
Third class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
Courses for Students within the Natural Science and Engineering

BIOL 1010 Physiological Systems (4 Credits)
The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)
The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

BIOL 1020 Physiological Systems Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

CHEM 1010 General Chemistry I (3 Credits)
The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

CHEM 1020 General Chemistry II (3 Credits)
The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

CHEM 1240 General Chemistry I Laboratory (1 Credit)
Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

CHEM 1250 General Chemistry II Laboratory (1 Credit)
Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

CHEM 2131 Chemistry of the Elements (3 Credits)
Descriptive chemistry of main group and transition elements including redox and coordination chemistry. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

CHEM 2141 Chemistry of the Elements Lab (1 Credit)
Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course.

CHEM 2240 Introduction to Environmental Chemistry (4 Credits)
An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

CHEM 2451 Organic Chemistry I (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2452 Organic Chemistry II (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451 and CHEM 2461.

CHEM 2461 Organic Chemistry Lab I (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2451.

CHEM 2462 Organic Chemistry Lab II (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2452.
GEOG 1201 Environmental Systems: Weather (4 Credits)
First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

PHYS 1111 General Physics I (5 Credits)
This is the first of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in mechanics (kinematics, dynamics) including forces, one and two dimensional motion, work, energy and momentum. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

GEOG 1202 Environmental Systems: Hydrology (4 Credits)
Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

GEOG 1203 Environmental Systems: Landforms (4 Credits)
Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

PHYS 1112 General Physics II (5 Credits)
This is the second of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

PHYS 1113 General Physics III (5 Credits)
This is the third of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

PHYS 1211 University Physics I (5 Credits)
First of a three-quarter sequence. Kinematics, vectors, force, energy and work, linear momentum, rotation of rigid bodies. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The course includes a rigorous calculus-based laboratory that exposes students to a broad range of the real physical phenomena studied in the lecture course. Through the use of experimental apparatus, computerized instrumentation and data acquisition, data analysis and graphical representation, students use the observed phenomena to exemplify the laws of physics. Physics theory and other relevant background information are explored individually by students in weekly prelab exercises. Students learn to write introductory-level laboratory reports and become familiar with good laboratory technique. Emphasis for this lab is on mechanics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisite: MATH 1951.

PHYS 1212 University Physics II (5 Credits)
Second of a three-quarter sequence. Gravitation, fluids; oscillatory motion; waves; thermal physics. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1211 lab portion and builds on laboratory skills and knowledge from that course. Emphasis for this lab is on waves, oscillations, sound, fluids and thermodynamics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: PHYS 1211. Corequisite: MATH 1952.
PHYS 1213 University Physics III (5 Credits)
Third of a three-quarter sequence. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1221 and 1222 lab portions and builds on the students' laboratory skills and knowledge from those labs. Emphasis for this lab is on electricity, magnetism, and circuits. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1214. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

Scientific Inquiry: Society and Culture Courses

Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

ANTH 1006 Paranormal Archaeology (4 Credits)
This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 1010 Anthropology: Humankind in Context (4 Credits)
This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species’ place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2060 Human Migration (4 Credits)
This course on transnational migration introduces students to the important theoretical discussions of why and how people migrate and maintain transnational lives. The course examines how migrants change, and in turn bring social, economic and cultural changes to their new destinations as well as to the places that they left behind. Research on transnational migration examines the flows of people, ideas, behaviors, and goods that tie together migrants’ communities of origin and destination, and the subsequent creation of new cultures and identities. While the process of transnational migration is not new, the scale of current transnational migration patterns makes today’s migration streams different from earlier ones. The lives of migrants today span multiple countries as they maintain social and economic networks across national borders. The ethnographic studies assigned give students an understanding of the changing gender roles and expectations of migrants; the transnational practices migrants carry out to maintain ties to their counties of origin; the maintenance of households in which members are dispersed across borders; and the collective involvement of migrants in the political process and economic development of their countries of origin. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2061 Gender, Change, Globalization (4 Credits)
Gender, Change and Globalization introduces students to anthropological approaches to the study of gender and globalization with a focus on social and cultural change. Globalization involves interconnected linkages and flows of commodities, and people and media that are dictated by market demands, facilitated by advanced technologies and regulated by state policies. Difference groups of individuals are located in varying positions within global flows that reflect larger power structures. While globalization brings about uniformity, it also produces differences as people respond to and oppose changes to local cultural practices and economic conditions. The reach of global processes has social and cultural implications for locally established gender ideologies, norms and division of labor. The course presents a survey of cross-cultural variations in gender identities and practices and analyzes how men and women are affected differently by the economic and cultural changes brought about by globalization, such as international development policies, migration and media productions. Contemporary social issues are discussed to explore these transformations and the effects they have on people’s everyday lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

COMN 1210 Foundations of Communication Studies (4 Credits)
This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.
COMN 2100 Fundamentals of Communication Theory (4 Credits)
Basic concepts, theories and models of the communication process.

COMN 2140 The Dark Side of Relationships (4 Credits)
This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes.

ECON 1020 Introduction to Micro- and Macroeconomics I: History and Theories (4 Credits)
This course presents an introductory analysis of how the economic aspects of our society operate. We begin with a brief examination of the development of human economic arrangements and how these developed into the kind of economy we have today. We then look at some of the historical development of how people thought that economic activity works and how they thought it should work. Then we go into an examination of the workings of markets and economic competition—what we call micro-economics—by examining some of the relevant theory as well as its embodiment in developments in the U.S. economy. Following that, we examine in much more detail the theory and some current issues involved in what we call macro-economics—the study of the workings of the national economy as a whole, with its concerns to explain such matters as the national rates of unemployment and price inflation, along with a study of the monetary and financial aspects of the economy and the promises and problems of gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 1410 People, Places & Landscapes (4 Credits)
In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2401 The Human Population (4 Credits)
This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2430 World Cities (4 Credits)
The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2511 Principles of Sustainability - Honors (4 Credits)
Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

GWST 1112 Introduction to Gender and Women's Studies (4 Credits)
This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women's studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of types of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GWST 2750 Race, Gender and Genetics (4 Credits)
This course examines science's construction of race historically—a process intimately connected to gender—to understand contemporary trends in medicine and genetics. Starting in the 1700s and spanning to the present, we'll look at how and why race and gender are articulated by scientists, how those constructions slip into the mainstream, and how these histories inform present practices in science.

GWST 2760 Gender & Environmental Racism (4 Credits)
This course surveys the field of environmental racism and its connections to gender. Together, we will use intersectional feminist theory to untangle how environmental racism shapes broad practices (e.g. locating dangerous industry and waste near communities of color and in developing nations) and specific cases (e.g. Dakota Access Pipeline). As we examine these practices, we will explore how environmental practices affect people with different biological, personal, and social genders.
MFJS 2210 Introduction to Media and Culture (4 Credits)
Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

MFJS 2280 Politics and Media (4 Credits)
We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1000 Introduction to American Politics (4 Credits)
Philosophical traditions, historical background, structure and functioning of American government, and political attitudes and behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1110 Comparing Politics around the World (4 Credits)
This course introduces the basic concepts of comparative politics. Key questions include: are countries becoming more democratic, and will all states follow something akin to the model of the United States? Or are differences between countries becoming even more apparent, with old ethnic rivalries, styles of governance, and religious movements having an impact on the divergent evolution of regimes? The class compares politics primarily in four countries: the United Kingdom, Japan, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1610 Introduction to Political Thought: Power, Liberty, and Justice (4 Credits)
This course presents an introduction to some of the key ideas and questions in the study of politics. As an introductory course, it cannot present a systematic overview of the entire study of politics; rather, it seeks to introduce students to some central concerns in the study of politics. In this course we learn about the basic principles of human conduct in social contexts and explain how social scientific methods are used to understand these underlying principles. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1810 Introduction to Law and Society (4 Credits)
This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the "law-on-the-books" and "law-in-action," and what can we learn from gaps between formal law and the "real" law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 2001 Law and Politics (4 Credits)
Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing.

PLSC 2050 Anarchy or Order? World Politics (4 Credits)
World politics is characterized by the absence of any overarching governmental authority; the "sovereignty" of individual states creates an international anarchy. This anarchy creates a permissive environment that influences how states and other global actors relate to each other. This course introduces the evolution of the modern international system and provides an overview of the major concepts and theoretical approaches used in the study of world politics. The principle aim of the course is to provide an analytical framework to understand and evaluate international events and issues. Satisfies department distribution requirement in comparative/international politics. Prerequisite: Sophomore standing.

PLSC 2340 Political Economy of Development: From Smith to Sachs (4 Credits)
Free-market capitalism is supposed to improve people's lives, yet we know it is also associated with economic inequality and political instability. This is especially true in numerous developing countries that attempted to transition to free market, 'democratic' political systems after the end of the Cold War. We begin by examining the founding doctrines of free market capitalism during the industrial revolution and then jump forward in time to study the evolution of the current international foreign aid regime, and international financial institutions (i.e., the International Monetary Fund and the World Bank). Students are expected to devote substantial time to reading and writing in the course, and will use theory and history to examine issues related to 'development' and globalization. Additionally, as a part of the Scientific Inquiry: Society and Culture component of the core curriculum, students will learn to: (1) describe and examine core principles of human behavior, organization, and conduct across social and cultural contexts, and (2) describe, explain, and critique the use of social scientific methods to understand underlying principles of human functioning as they relate to political and social responses to economic change. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 2415 Campaigns and Elections (4 Credits)
The U.S. holds hundreds of elections every year, but presidential elections stand alone as the only truly national contests. What influences presidential selection? What information can we gain as citizens and scholars from national presidential debates? These elections are guided by distinct rules (including nominations via primaries and caucuses, evolving campaign finance laws, and the strict requirements of the Electoral College) with ever-changing strategies to maximize support under these rules. This class provides students with the historic context and political science concepts and theories to better understand the many steps involved in electing U.S. presidents. This course counts toward the Scientific Inquiry: Society and Culture requirement.
PPOL 1910 Hard Choices in Public Policy (4 Credits)
This course provides an opportunity to develop comprehensive knowledge of America’s most intriguing public policy dilemmas. Policy issues to be discussed include intergenerational equity, competitiveness, the budget and trade deficits, crime, AIDS, education, health care, the environment, entitlements, immigration, race and affirmative action, public involvement, and social welfare. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PPOL 2710 Demography of Public Policy (4 Credits)
Demography is destiny.” The consequences for American public policy are profound. America is aging, but becoming more diverse. A society in the midst of dynamic change is a society full of possibilities, but vulnerable to conflict. Values become indeterminate, with traditional communities vying for legitimacy with emergent cultures. Social movements, often populist in nature, challenge the established political order. This course focuses on the delineation of effective public policies to deal with demographic challenges, including (1) immigration policy; (2) the process of assimilation; (3) education; (4) geographic realignment; (5) competitive advantage of the United States relative to the European Union, Russia, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PSYC 1001 Foundations of Psychological Science (4 Credits)
This course is an introduction to the scientific study of mind and behavior. It includes topics such as the biological basis of behavior, the developmental transitions from infancy through old age, the principles underlying perception, learning and memory, and the ways in which behavior is affected by its physical, social, and cultural context. This course counts toward the Scientific Inquiry: Society and Culture requirement.

SOCI 1810 Understanding Social Life (4 Credits)
This course is an introduction to the discipline of sociology and to the insights it provides into the human condition. This course counts toward the Scientific Inquiry: Society and Culture requirement.

SOCI 2250 Criminology (4 Credits)
Social meaning of criminal behavior; relationship between crime and society in particular, how production and distribution of economic, political and cultural resources shape construction of law, order and crime; different types of crime, criminals and victims, and efforts to understand and control them. This course counts toward the Scientific Inquiry: Society and Culture requirement.

SOCI 2540 Current Social Problems (4 Credits)
We often think about social problems in our social worlds. However, rarely do we consider how certain situations come to be defined as problems and why some “problems” remain a focal point of public attention while others fade, even when the circumstances around that issue have not improved. In this course, we look at these very issues. Using current social problems, we explore how a social phenomenon comes to be seen as a social problem, what is at stake in this process, and how these dynamics matter in terms of thinking about inequality. This course counts toward the Scientific Inquiry: Society and Culture requirement.

Common Curriculum and Degree Requirements

Major and Minor Requirements
The departmental major or minor is a program of courses taken in one department or, in the case of an interdisciplinary major or minor, a program of related courses taken in more than one department. The University offers a number of different degree options. Please review specific degree information for major and minor requirements. Students usually declare a major (or majors) by the end of their sophomore year.

• The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.

• Credits in the major and the minor must be earned at the level of “C–” or better.

• At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Double Majors
In certain degree programs (BA, BS and BSBA), students may complete a second major. A second major will substitute for a minor, if required. The second major must be offered in that particular degree program (p. 29); e.g., business majors are only available in the BSBA program. The University also offers the option of a secondary major (p. 88) for some programs of study. Secondary majors allow students to pursue a major outside the primary degree program.

Upper Division Requirement
• Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Common Curriculum
The University of Denver’s Common Curriculum provides students with a well-rounded education, creates context for major or minor course of study and introduces students to new areas of interest. The Common Curriculum is grounded in a breadth of experiences and ways of inquiry congruent with DU’s goal of providing an outstanding educational experience that empowers students to integrate and apply knowledge from across the disciplines.
and imagine new possibilities for themselves, their communities and the world. Consistent with DU’s mission, the Common Curriculum promotes learning by engaging with students in advancing scholarly inquiry, cultivating critical and creative thought, and generating knowledge.

Common Curriculum courses contribute to an intellectually vibrant campus community and create, in turn, a challenging, inclusive, ethical and liberating learning environment. From students’ initial First-Year Seminar to the Common Curriculum’s culminating Advanced Seminar, the curriculum encourages connections across modes of learning. By engaging in course work across diverse experiences and areas of knowledge, DU students cultivate critical and creative thought, preparing them for leadership and citizenship in our global society.

Common Curriculum Requirements
The Common Curriculum at the University of Denver plays a central role in every undergraduate student’s education. Please review the Common Curriculum requirements matrix below, which provides a summary of DU’s Common Curriculum requirements, along with short statements that explain why the courses in the various parts of the curriculum are important in today’s world. These descriptions are summaries of what students should be able to achieve through the successful completion of these classes. The matrix is followed by descriptive paragraphs that explain why each class a student takes is important and where it fits in the educational plan of the University.

An undergraduate at the University typically takes 52 to 60 credits in the Common Curriculum:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>

<tr>
<td>Total Credits</td>
<td>52-60</td>
</tr>
</tbody>
</table>

Because certain programs have slightly different requirements in the Common Curriculum and because AP and IB courses or transfer courses from other universities and colleges may change the distribution of the requirements for individual students, always consult an advisor regarding Common Curriculum planning for courses at the University and abroad.

First-Year Seminar
1 course (4 credits)
First-Year Seminars (p. 256) are designed to provide students with an in-depth academic experience that will be rigorous and engaging. Students develop the kinds of academic skills that prepare them for successful college work, which might include one or more of the following:

- critical reading and thinking
- writing and discussion
- quantitative reasoning
- argument and debate

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 80–85 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars also serve as students’ academic advisors and faculty mentors for the entire first year. Students meet individually with their mentors during winter and spring quarters for advising and registration help. This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet with the Associate Provost for Undergraduate Programs to request a new academic advisor and to determine the means by which this degree requirement may be fulfilled. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

Writing and Rhetoric
2 courses (8 credits)
Being able to convey written information and ideas in ways that are compelling to specific audiences is essential both in college and beyond. Beginning in the winter quarter of their first year, students take two sequenced writing courses, usually WRIT 1122 and WRIT 1133. Together, these courses teach strategies for writing to well-educated readers in diverse academic and nonacademic situations. Students learn rhetorical principles, the analysis and use of readings and source materials, and techniques for generating, revising and editing texts for specific situations. They also learn to present and justify positions and to produce researched writing in various scholarly traditions, including

- textual/interpretive (the analysis of texts or artifacts such as images or events);
- qualitative (analyses based on observations or interviews); or
- quantitative (information gained through measurement).

In each course, students complete several writing exercises and, through sustained practice and systematic instructor guidance, they complete at least four polished papers, totaling some 20–25 pages. By the end of the two-course sequence, students have completed at least 40–50 pages of
polished writing. These courses lay the foundation for writing in further Common Curriculum courses (including the Advanced Seminar), writing in students’ majors and writing in professional and civic life after graduation.

Language
1–3 courses (4–12 credits)
The faculty of the University of Denver believe that studying culture through language at the university level is crucial in our globalized world, and courses in this area reflect that belief.

1. Students who have completed academic secondary education wholly or in large part in a language other than English are exempt from the language requirement. The Registrar determines if students’ transcripts qualify them for this exemption. Most international students, however, will be required to take at least one class from the English Language Center on living in the USA and our Mountain West.
2. Students are exempt from the language requirement in the BFA, BSEE, BSME and BSCpE degree programs. [Note for Music students: Candidates for the BM degree may choose between completing eight credits in one foreign language or eight credits in a Scientific Inquiry: The Natural and Physical World sequence. If they choose language, the below rules about placement apply.]
3. Students with certain documented learning disabilities as officers our Disability Services Program determine are also exempt, although they must instead take twelve credits (three classes) taught in English from an approved list of internationalizing courses.
4. All other incoming students who know or have studied one of the languages that we offer at DU (Arabic, Chinese, French, German, Hebrew, Italian, Latin, Japanese, Russian, or Spanish) are required to take our language placement test before registering for a class in that language, so that we may place them properly in its curriculum.
5. Students must either complete the elementary sequence of a language they have not studied before (or into elementary level of which they are placed) or take one four-credit course at the higher level into which each places. If we offer no advanced courses in their first language other than English, students who are not exempt (see 1-3 above) must take a first-year sequence of a different one.
6. Students may always choose to learn a new language and complete its first-year sequence. We offer more world languages than they will have had the opportunity to study in secondary school.

In all of our courses, students acquire linguistic skills in a language other than English. We are an internationalizing university that encourages multi-skill language learning. Students in language classes will also be studying a different expression of culture through language. By this experience they learn both about a new culture and about themselves and their personal, social, and cultural backgrounds. Our young linguists learn to appreciate human diversity as it is expressed between and among languages and nationalities in the twenty-first century.

Analytical Inquiry: The Natural and Physical World (p. 36)
1 course (4 credits)
Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today’s physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student’s major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.

Analytical Inquiry: Society and Culture (p. 37)
2 course minimum (8 credits)
Through these courses, students gain knowledge essential for today’s global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/ minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.

Scientific Inquiry: The Natural and Physical World (p. 64)
3 sequential courses (12 credits)
Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the
connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

**Scientific Inquiry: Society and Culture (p. 69)**

*2 course minimum (8 credits)*

Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

**Advanced Seminar**

*1 course (4 credits)*

While knowledge and professional skills found in a student's major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex political, social, cultural and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the demands of contemporary life, instructors teach an Advanced Seminar (p. 101) (ASEM) based in their area of expertise and passion. The topic will be approached from multiple perspectives in a course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas through intensive writing on that topic. This course must be taken at the University of Denver. Students must complete all other Common Curriculum requirements before taking the Advanced Seminar.

Major and Minor Requirements

The major (40–60 credits) is a planned program of courses taken in one department or, in the case of an interdisciplinary major, a program of related courses taken in more than one department. For the bachelor of arts, at least 40 credits are required in the major. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 25 credits must be in 2000- or 3000-level (upper-division) courses.

The minor (20–28 credits) is a program of courses in a second area of concentration. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 5 credits must be in 2000- or 3000-level (upper-division) courses.
• The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.

• Credits in the major and the minor must be earned at the level of “C–” or better.

• At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 29) section of this bulletin for information on major and minor programs of study available with the bachelor of arts degree.

Double Major
For the bachelor of arts, students may choose majors in two departments and eliminate the minor.

Upper Division Requirement
• Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Degree GPA Requirement
• Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

Residence Requirement
• The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Additional Policies
• A total of 60 credits earned in any one department is the maximum accepted toward meeting the minimum 183 credits for the degree. (Exception: BA with a major in music.)

Bachelor of Fine Arts (BFA)

Specific status sheets for the various BM programs may be obtained from the Lamont School of Music.

**Music Performance Requirements**

**Convocation Attendance**
- All music majors must attend all scheduled Convocations per quarter.

**Sophomore Proficiency**
- All BM students must pass a sophomore proficiency exam to continue the BM degree in the junior year.

**Recitals**
- BM in Jazz Studies and Commercial Music and BM in Performance students must present recitals for the completion of the degree. The specific requirements are as follows:
  - bachelor of music, concentration in piano—half recital in sophomore year, full recital in junior year, full recital in senior year
  - bachelor of music, all other emphases—half recital in junior year, full recital in senior year

**Piano Proficiency Examination**
- All bachelor of music students must pass all piano proficiency requirements as designated for their degree by the end of sophomore year. This is not required for piano concentration students.
Major and Minor Requirements

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.

- Credits in the major and the minor must be earned at the level of "C–" or better.

- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 29) section of this bulletin for information on major and minor programs of study available with the bachelor of music degree.

Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Major and Minor Requirements

In the bachelor of science curriculum, at least 45 credits are required for the major. Of these, at least 25 must be in 2000- and 3000-level courses. Minors approved for the BS degree range from 15–28 credits each. Students pursuing a BS degree must complete a major and two minors or two majors and one minor. One minor must be in one of the natural sciences or psychology. A secondary major (p. 72) may be used to fulfill the requirement for a minor or additional major. Students completing an area major are not required to complete any minors.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.

- Credits in the major and the minor must be earned at the level of "C–" or better.

- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.
 Visit the Degree and Program of Study (p. 29) section of this bulletin for information on major and minor programs of study available with the bachelor of science degree.

**Area Major**

The area major meets the needs of students whose interests require a broad program of related interdepartmental study. At this time, the only area major available for bachelor of science students is environmental science. Please review the environmental science section for specific major requirements.

**Upper Division Requirement**

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

**Degree GPA Requirement**

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

**Residence Requirement**

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

**Bachelor of Science in Accounting (BSAcc)**

**Total Credits Required for the BSAcc: 186**

Total Credits 186

1 this course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement
2 either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement

Upper Division Requirement
• Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

General Policies
• At least 50 percent of required business courses for the degree must be completed at the University of Denver.
• Students must earn a minimum GPA of 2.5 overall, in all business courses and in the major.
• Students must earn a minimum grade of "C-" in their additional non-business and business core requirements.

Residence Requirement
• The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Student International Experience Requirement
Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student’s native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.

The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

ACTG 3284 Consolidated Financial Statement 2
ACTG 3285 Accounting for Foreign Operations 2
ACTG 3701 Topics in Accounting (International Accounting travel course) 4
ACTG 4284 Consolidated Financial Statements 2

REAL 3140 Global Perspectives in Real Estate 4
Any INTS (International Studies) course 4
Secondary Admission

Applicants who wish to pursue an undergraduate business major at Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application, for students who indicate business as the intended major on the application to DU. Qualified students will be considered for direct admission to Daniels when accepted to the University of Denver. Applicants not directly admitted through the DU application process apply to Daniels via the secondary admission process, as an enrolled student, upon successful completion of pre-requisite coursework.

The Daniels secondary admission process supports academic quality, small and engaged classes, and strong student-faculty connections. Most students apply in their second year by submitting an application, resume and cover letter. Application cycles are offered fall, winter, and spring quarters. A holistic assessment of each applicant is conducted by evaluating students’ academic performance and career readiness components. Involvement within the Daniels College of Business is important as it shows a genuine interest in a business major, knowledge of expectations within the major, and wanting to contribute to the community in a meaningful way. Students working through secondary admission take the same preliminary business courses as directly admitted students.

There are three possible admission routes into Daniels:

1. Direct admission upon application to the University of Denver, based on indication of business interest on application and eligibility for university merit scholarships. Transfer students are evaluated on GPA, transfer coursework, and work experience.
2. Fast track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion of MATH 1200 or 1951.
3. Secondary admission upon completion of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Introduction to Micro- and Macroeconomics I: History and Theories, FSEM 1111 First Year Seminar, INFO 1010 Analytics I: Data Management and Analysis, INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences/MATH 1951 Calculus I, WRIT 1122 Rhetoric and Academic Writing, WRIT 1133 Writing and Research, and Microsoft Certification (Excel, Word, PowerPoint). This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan) outlines a recommended path for completing the courses required to apply for secondary admission. During fall, winter, and spring application cycles students submit their resume and cover letter for consideration. A 2.5 minimum cumulative GPA is required to apply. Completion of these requirements does not guarantee admission.

Please refer to the Daniels website (http://daniels.du.edu) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu, 303-871-3939 or www.du.edu/studentlife/disability.

Major Requirements
See section below  32-52

Minor
Although a minor is not required for BSBA students, they may complete any minor (except business administration)

Electives
Remaining hours of student’s choice

Total Hours  185

1  this course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement
2  either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement

Major Requirements
Major requirements generally consist of 32–52 credits.
Visit the Degree and Program of Study (p. 29) section of this bulletin for information on major and minor programs of study available with the bachelor of science in business administration degree.

Double Major
BSBA students may also complete a double major, combining two of the majors previously listed for the BSBA.

Upper Division Requirement
- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

General Policies
- In general, a total of 45 credits earned in any major is the maximum allowed toward meeting the minimum 185 credits for the degree.
- At least 50 percent of required business courses for the degree must be completed at the University of Denver.
- Students must earn a minimum GPA of 2.0 (‘C’) overall, in all business courses and in the major.
- Students must earn a minimum grade of ‘C-’ in their additional non-business and business core requirements.

Residence Requirement
- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Secondary Admission
Applicants who wish to pursue an undergraduate business major at Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application, for students who indicate business as the intended major on the application to DU. Qualified students will be considered for direct admission to Daniels when accepted to the University of Denver. Applicants not directly admitted through the DU application process apply to Daniels via the secondary admission process, as an enrolled student, upon successful completion of pre-requisite coursework.

The Daniels secondary admission process supports academic quality, small and engaged classes, and strong student-faculty connections. Most students apply in their second year by submitting an application, resume and cover letter. Application cycles are offered fall, winter, and spring quarters. A holistic assessment of each applicant is conducted by evaluating students’ academic performance and career readiness components. Involvement within the Daniels College of Business is important as it shows a genuine interest in a business major, knowledge of expectations within the major, and wanting to contribute to the community in a meaningful way. Students working through secondary admission take the same preliminary business courses as directly admitted students.

There are three possible admission routes into Daniels:
1. Direct admission upon application to the University of Denver, based on indication of business interest on application and eligibility for university merit scholarships. Transfer students are evaluated on GPA, transfer coursework, and work experience.

2. Fast track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion of MATH 1200 or 1951.

3. Secondary admission upon completion of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Introduction to Micro- and Macroeconomics I: History and Theories, FSEM 1111 First Year Seminar, INFO 1010 Analytics I: Data Management and Analysis, INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences/MATH 1951 Calculus I, WRIT 1122 Rhetoric and Academic Writing, WRIT 1133 Writing and Research, and Microsoft Certification (Excel, Word, PowerPoint). This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan) outlines a recommended path for completing the courses required to apply for secondary admission. During fall, winter, and spring application cycles students submit their resume and cover letter for consideration. A 2.5 minimum cumulative GPA is required to apply. Completion of these requirements does not guarantee admission.

Please refer to the Daniels website (http://daniels.du.edu) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu, 303-871-3939 or www.du.edu/studentlife/disability.

**Student International Experience Requirement**

Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student’s native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.

The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Secondary Majors and Concurrent and Second Baccalaureate Degrees

Secondary Majors

Secondary majors offer the opportunity to earn one baccalaureate degree in one program supplemented by a rich intellectual experience in a second field of specialization outside that primary program. The "secondary major" offers the option of studying two subjects from two different degree programs while earning a baccalaureate degree in the first major without the requirement of earning a second baccalaureate degree in the secondary major.

Specifically, this option allows a student from one degree program to earn a secondary major from a participating department within a different program by fulfilling the requirements (normally 40–45 quarter hours) set forth by that participating department but without requiring students to complete additional courses that comprise that other program’s core curriculum. Through the secondary major option, upon graduation, a student earns one baccalaureate degree from DU (through the fulfillment of all requirements from the student’s primary degree program). Although that student will not be awarded a second degree, the student’s transcript will reflect that he or she earned a secondary major in that second area of study.

As an illustration, if a BS in computer science student wishes to earn a secondary major in philosophy, he or she will need to satisfy all of the requirements of both the BS degree in computer science and the secondary major in philosophy. The student will graduate with a “BS in Computer Science.” The transcript will note that the student earned a BS degree in Computer Science with a Secondary Major in Philosophy.

A current list of secondary majors may be found under the Degrees and Programs of Study (p. 29) section.

Concurrent Baccalaureate Degree

Students who wish to pursue two separate undergraduate degrees simultaneously should request an approval form from the Center for Academic and Career Development. A concurrent degree is different than a double major where the majors are within the same degree. Students must work with advisors in both degree areas to establish an academic plan for completing requirements for both degrees. Students should submit the form and their academic plan to the registrar's office for final approval.

A student who wants to pursue concurrent undergraduate degrees must complete the following:

- a minimum of 228 quarter hours (Note: Certain degrees may require additional hours.)
- all University requirements for both degrees (Common Curriculum requirements need only be completed once, but any unique requirements for each degree program must be met)
- major and minor requirements as defined by the appropriate departments and schools
- academic good standing at the time of graduation (GPA of 2.0 or higher as required by the degree programs)

Second Baccalaureate Degree

A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements and complete the following:

- residence requirement of at least 45 quarter hours (one year of full-time study)
- major and minor requirements as defined by the appropriate departments and schools
undergraduate degree requirements (p. 72)

- academic good standing (GPA of 2.0 or higher) at the time of graduation (Note: The accounting program requires a higher GPA.)

- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Courses taken for the first degree may apply as part of the University of Denver undergraduate requirements for the second degree. Courses previously taken and now being applied to the major or minor are allowed with permission of the chair of the appropriate department. In general, courses used for a minor in the first degree may be built on for a major in the second degree. However, the major in the first degree cannot count as a minor for the second.

Possession of a bachelor's degree does not automatically fulfill the common degree requirements as defined by the University.

University College Bachelor of Arts Completion Program

Program Outcomes

The Bachelor of Arts Completion Program was developed with the input of business, government, and community leaders, and it was designed to meet learning outcomes critical for your success at work and to create a satisfying and productive life. According to the National Association of Colleges and Employers, the top skills and qualities sought in job candidates by employers include verbal and written communication skills, strong work ethic, teamwork skills, analytical skills, and initiative. These skills are enhanced in the Bachelor of Arts Completion Program through six critical outcomes that will have a lasting effect throughout your career and personal life:

- **Creativity**: the ability to conceptualize and rework problems and to generate solutions to those problems
- **Critical thinking**: the skill of analyzing and defining issues, developing an appreciation for multiple viewpoints, and generating well-crafted arguments
- **Knowledge utilization**: the ability to find useful information, ideas, concepts and theories; to synthesize them and build on them; and to apply them in the workplace as well as in personal life
- **Decision making**: the ability to analyze options and outcomes for decisions in terms of their values and effects and to make decisions that are rational, legal, and ethical
- **Empowerment**: the confidence that comes from knowing how to act, when to act, and how to respond to the opportunities and constraints that affect your efforts to get things done. With a sense of empowerment comes the ability to lead and to bring about change for the good
- **Effective communication**: knowing your audience and learning how to empathize with them; reading, writing, and speaking effectively; making presentations that are persuasive and entertaining; and arguing to powerful effect

Bachelor of Arts Completion Program Degree Requirements

The Bachelor of Arts Completion Program (BACP) enables adult working professionals employed in business, government, and not-for-profit organizations to complete the BA degree and acquire the intellectual skills associated with a liberal arts education. It offers students an adult-level education that is interdisciplinary and problem-based, emphasizing the multiple skills needed to be creative, effective, and successful in a highly competitive and increasingly global society.

Common Learning Experience

The Common Learning curriculum includes ten carefully selected courses in five areas where students can sharpen their skills and develop essential knowledge needed for thriving in the information age. This is a set of interdisciplinary courses for people who have been in the working world and are highly motivated. Interdisciplinary simply means that the perspectives and materials of several disciplines have been brought together in the design of each course. These courses provide a common foundational experience for instruction in advanced courses. The Common Learning Experience will help students learn how to learn, which will serve them in their future academic careers.

The Experience with your major

The major builds on the Common Learning Experience and also provides a way for students to specialize and pursue their own interests. In most colleges and universities, the major is synonymous with studying in an academic discipline, but at University College your major is interdisciplinary; it draws on several disciplines especially useful for exploring the topics in that major. Students will become conversant with key knowledge in the arts and sciences disciplines, and it will be packaged in a way that helps them to examine key topics in an interdisciplinary field of study. The chief purpose of the major is to provide opportunities for learning how to draw on various liberal arts disciplines when addressing real world problems within organizations and society.

There are six majors from which to choose:

- Communication Arts (p. 508)
- Global Commerce and Transportation (p. 509)
- Global Studies (p. 511)
• Healthcare Administration (p. 513)
• Information Technology (p. 515)
• Leadership and Organization Studies (p. 516)

At University College, students have a fresh academic start as the first 96 transferable quarter credits (64 semester hour credits) go directly toward a University of Denver bachelor’s degree. Unlike other bachelor completion programs that arbitrarily limit the number of credits and try to match your courses to a set of requirements, University College welcomes past undergraduate credit to be put directly toward the completion of the degree. Bachelor of Arts Completion Program students will choose a major that relates to their interests and career focus, gaining real-world skills they can begin using right away. An opportunity to complete both the bachelor’s degree and a master’s degree is also afforded to Bachelor of Arts Completion Program students, who can pursue a dual degree to reduce the time and cost of earning both degrees.

The following academic policies apply to major requirements for bachelor’s students at the University.

• The GPA must be at least 2.0.

• Credits in the major must be earned at the level of “C–” or better.

**Bachelor of Arts (BA)**

**Total Credits Required for the BA: 180**

| Remaining credits to meet minimum 180 for the degree | 0-56 |

**Total Credits**

| 180 |

**Major Requirements**

• Credits in the major and the minor must be earned at the level of “C–” or better.

• At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

**Upper Division Requirement**

• Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

**Credit Earned through Examinations**

A maximum of 45 quarter hours can be awarded for all AP and IB credit.

**Advanced Placement (AP)**

Through the College Entrance Examination Board (CEEB) program, the University of Denver grants credit to secondary school students who complete an AP examination with appropriate scores. Placement and/or credit is granted in courses commonly taught at the first-year level. Departments of the University vary in their score requirements for credit and placement. The following table identifies the amount and placement of AP credit.

5. Additional information at https://www.du.edu/writing/studentinfo/ap-ibcredit.html
6. Students may receive credit for one exam in one language and does not fulfill foreign language requirement. Subject to validation by placement exam. Additional information at https://www.du.edu/cwlc/take-a-test/incomingstudents.html

**International Baccalaureate (IB)**

Students may receive college credit through the IB program, which is offered at many high schools. Higher-Level Subject Exams may be awarded credit. With the exception of foreign language, no credit is given for Standard-Level Subject Exams. The number of credits awarded varies depending on the subject area. The amount and placement of IB credit is summarized in the following table.

### Transfer of Credit

#### University of Denver Undergraduate Transfer of Credit Policy

**Purpose**
The University ensures that transparency in our policies exists for our students and those who administer these policies, allowing for consistent interpretation and application throughout the institution and, as new types of learning opportunities emerge, allowing for responsiveness on the part of the University in a changing educational environment.

**Policy**
Three general factors affect the transferability of credits: the subject matter, the institution where the credits were earned and the course grade.

**Subject Matter**
Usually, courses taken in baccalaureate disciplines taught at the University of Denver are readily transferable. Credits from professional programs will be examined on a course-by-course basis and are often transferable. In general, courses in vocational or occupational subjects are not transferable. Finally, applicability to the degree for which a student is a candidate and comparability to an existing University of Denver course may be used as factors for the acceptance or denial of transfer credit.

**Transferring Institution**

**Domestic Institutions**
Credit will be considered for courses taken at institutions that are accredited by an agency recognized by the U.S. Department of Education. Credits are more readily accepted from a collegiate institution with regional accreditation although credits earned at a collegiate institution with national or special accreditation will also be considered. Credits that meet the subject matter requirements will be considered on a course-by-course basis when earned at an institution lacking regional accreditation. Institutions that have been granted official candidacy status by a regional accrediting association will be accorded like treatment to those that are fully accredited.

**Foreign Institutions**
Credit will be considered for courses taken at foreign institutions that are formally recognized as an institution of higher education by a given country’s Ministry of Education. The same general parameters apply for course content and grades as they do for U.S. credit consideration.

**Two-Year Institutions**
Credit from two-year institutions generally is considered lower division. Advanced courses from two-year institutions are considered upper division when validated by the appropriate departments. The maximum credit that may be accepted from a two-year institution is 96 quarter hours.

**Study Abroad**
Credit earned within non-DU study abroad programs is treated as transfer credit.

**Military Courses**
Military courses documented through Army/American Council on Education Registry Transcript System (AARTS), Form DD 295, “Application for the Evaluation of Learning Experiences During Military Service,” or DD Form 214, “Armed Forces of the United States Report of Transfer or Discharge,” may be eligible for consideration in the evaluation process. Military courses must be validated by the department with which the subject matter is most closely aligned.
Course Grades

Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer. Transfer grades are not included in a student’s DU GPA, and transfer credits cannot be used to reduce DU grade-point deficiencies.

Credit earned as pass/fail can be transferred only as elective credit. This credit does not apply to specific degree requirements other than total hours for graduation, and the University must determine that "P" (pass) equals 1.7 (C-) or better performance.

Instructional Methodologies

Online courses and those offered electronically are not categorically restricted, but they may be refused based on instruction methodologies not equivalent to those at the University of Denver.

Maximum Transfer Hours and Residency Requirements

The following specific transfer guidelines regarding residency and maximum transfer hours apply:

- A maximum of 135 quarter hours of credit may be transferred.
- The final 45 credits must be earned at the University of Denver.
- For students studying for one or more terms in an approved study abroad program, the residency requirement is waived.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.
- At least 50 percent of required business credits for undergraduate business degrees must be completed at the University of Denver.

AP and IB Credit

A maximum of 45 quarter hours can be awarded for all AP and IB credit.

Authority and Course Equivalencies

Initial transferability decisions are made by the Office of the Registrar. Approval of transfer applies toward the overall credit needed to meet degree requirements and does not necessarily guarantee or result in equivalency with specific University courses or requirements. Transfer credit appeals may be made through departmental chairs. Final authority for transfer credit and determination of course equivalency rests with the appropriate academic department.

Transfer of Credit by Continuing Students

Approval

Continuing students must receive approval in advance for transfer credit.

Concurrent Registration

Students may not enroll at the University of Denver and other institutions concurrently without prior permission.

Articulation Agreements

The University of Denver may enter into transfer articulation agreements with other institutions as deemed mutually beneficial. Such agreements are administered by the Office of the Registrar. Transfer articulation agreements will include transfer course guides. The University of Denver may establish transfer course guides independent of formal articulation agreements.

Determination of Quarter Hour Equivalent Value Assigned

University transfer credit hour values are based on the credit hour value assigned by the originating institution. If the academic calendar of the originating institution is other than the quarter system, the appropriate conversion of the assessed credit hours of coursework will take place based on the calendar of the originating institution and the formula for converting them to quarter hours. While semester hours are multiplied by 1.5 to convert them to quarter hours, other formulae are used for the conversion when the originating institution is not on a standard, quarter/semester calendar. Conversion of the assessed credit hours from institutions on calendars other than a quarter calendar may result in conversions other than whole quarter credits (e.g., 3 semester credits is the equivalent of 4.5 quarter credits); conversions are not rounded up or down.

Requests for Transfer Transcript

Students must request that official transcripts be delivered directly from other institutions to the Office of the Registrar. All transcripts must be received in an official sealed envelope or through a secure electronic sending agency. Student will be notified after transcripts have been processed.

Transfer and International Education Reporting System

The University of Denver’s Transfer and International Education Reporting System (http://myweb.du.edu/mdb/du_bwcktart.P_DU_Choose_Geog_Area) (TIERS) allows students to access a list of approved transfer and study abroad courses. Courses that do not appear in the system are not necessarily unacceptable for transfer. Courses will continue to be added as new ones are evaluated and equivalents determined. You can access TIERS through PioneerWeb under the Student tab.
For more information regarding how to utilize the TIERS system for study abroad, please see this page:

**Major and Minor Requirements and Course Descriptions**

- Traditional Bachelor's Program Majors and Minors (p. 96)

  - Physics and Astronomy (p. 424)
  - Political Science (p. 436)
  - Psychology (p. 443)
  - Public Policy (p. 453)
  - Real Estate & Construction Management (p. 457)
  - Religious Studies (p. 463)
Traditional Bachelor's Program Majors and Minors

Most majors, and some minors, may only be pursued in conjunction with specific degree programs. The Degrees and Programs of Study (p. 29) section of this bulletin lists possible degree and major/minor combinations. Students must meet overall requirements for their degree as well as specific requirements outlined in majors and minors.

Accounting

Office: Daniels College of Business, Suite 355
Mail Code: 2101 S. University Blvd. Denver, CO 80208
Phone: 303-871-2032
Web Site: http://daniels.du.edu/accountancy/

The School of Accountancy’s mission is to foster Enlightened Practice, Professional Achievement, Knowledge Creation, and a Commitment to Community among its students, graduates, faculty, and others engaged in the accounting profession and related disciplines.

- **Enlightened Practice** means ensuring that our graduates understand the theory and practice of accounting and its ramifications on society, the profession, and organizations.
- **Professional Achievement** includes accomplishment at each level of one’s career and commitment to lifelong learning, competence, and integrity.
- **Knowledge Creation** means scholarship which improves our understanding of accounting, the practice of accounting, and the process of educating future accountants.
- **Commitment to Community** is the process of giving of oneself both to the community that supports one’s efforts and achievements and to the community at large. **Commitment to Community** is a vital aspect of the accounting profession and is critical to the School’s ongoing success.

Our programs achieve this mission by emphasizing technical knowledge and analytical ability, interpersonal skills and intercultural understanding, and ethically based leadership and social responsibility. In the School of Accountancy, students learn to integrate accounting concepts and business applications in the context of communication, ethics, values, and technology. This integration is accomplished in the undergraduate business core and in the School of Accountancy core.

The School of Accountancy’s strengths include the following:

- an established reputation as a provider of quality programs
- highly qualified faculty who emphasize teaching and relevant research
- student access to faculty—both individually and in relatively small classes
- innovative curricula
- emphasis on state-of-the-art technology throughout the curricula
- emphasis on practical experience
- a rigorous educational experience

The degree prepares students to work as strategic business advisors who can analyze and understand today’s complex business environment. Students gain expertise in the traditional accounting arenas of managerial accounting, financial reporting, systems, auditing and tax, as well as in the nontraditional areas of technology, marketing, strategic planning, and finance. The School of Accountancy offers a bachelor of science in accounting (BSAcc), a master of accountancy (MAcc) and a dual degree option that allows completion of the bachelor’s and master’s degrees in five years.
Refer to the appropriate sections of this bulletin for the admission, retention, and graduation requirements for the School of Accountancy, which differ from the general requirements of the Daniels College of Business.

**Program Objectives**

Objectives of the BSAcc are to prepare students for entry-level positions in accounting. In this program, students will learn how to

1. prepare and interpret financial statements for business enterprises;
2. use accounting data to evaluate performance and enable decision-making;
3. apply the principles related to the design, integrity, and effectiveness of accounting information systems;
4. explain the role of auditing in society, including auditing procedures and reporting requirements;
5. apply federal tax laws pertaining to individuals; and
6. analyze the legal, ethical and legislative constructs that govern the conduct of business.

**Criteria for Admission to the BSAcc Program**

**Continuing Students**

- Students must have a minimum 2.5 GPA (overall, in ACTG, and in the following courses: ACTG 2200, FIN 2800 and ACTG 2300).
- If a student fails to meet the required GPA, he or she may still be able to qualify for the School of Accountancy. Please consult with the director of the School of Accountancy.
- Other specific admission requirements apply. Please see the School of Accountancy for details.

**Transfer Students**

Undergraduate transfer students must meet the requirements listed for continuing students. Credits are considered for transfer only if they meet the following standards:

- Accounting courses beyond principles must be taken at an AACSB-accredited institution or approved by the School of Accountancy.
- Courses must be comparable to required courses offered in the School of Accountancy. Any required courses that do not meet the above criteria must either be validated by examination or retaken. In computing the GPA for purposes of admission to the School of Accountancy, work transferred from previous schools and work at the University of Denver are included.

**Retention Requirement for Bachelor of Science in Accounting**

To remain in the program, a student must maintain a GPA of 2.5 or higher, both overall and in accounting courses.

**Accounting**

**Bachelor of Science in Accounting Major Requirements**

(186 credits required for the degree (p. 80))

Minimum of 43 credits. Students must earn a minimum 2.5 GPA, both overall, in all business courses, and in accounting courses. If a GPA deficiency exists at the time the prescribed program is completed, no more than 10 credits of approved additional accounting courses and non-accounting courses may be taken in an attempt to correct the deficiency.

1 Core in Accountancy
The core in accountancy is a yearlong, fully integrated series of courses of 12 credits each quarter, for a total of 36 credits. Each quarter must be completed in its entirety before the student can move on to the next quarter. Any student with an ACTG GPA below 2.5 at the end of the third quarter will not be permitted to continue in the accounting major. Both accounting and non-accounting subjects are covered in the core. The accounting material includes courses in cost and managerial accounting, financial reporting, systems, tax and auditing. Non-accounting material includes oral and written communications, technology, ethics and legal issues. Classes in the core normally are completed during the junior year.

Minor Requirements
The Accounting minor is available only to students pursuing a Bachelor of Science in Business Administration degree.

16 credits, including the following:

Total Credits 16

1 Finance majors must substitute a finance advisor-approved accounting course for ACTG 3220 Understanding Financial Statements. ACTG 3462 Corporate & Partnership Tax is recommended.

Undergraduate/Graduate Dual Degree Program in Accounting
The School of Accountancy offers undergraduates an accelerated program leading to the master of accountancy (MAcc). Students may apply for admission to the graduate program after completing the junior accounting core. Admission is based on academic performance, interview, GMAT scores, and reference letters. The GMAT requirement may be waived if the student has met grade requirements in undergraduate coursework. Contact the School of Accountancy for more information. Students accepted to the program may complete the BSAcc and MAcc in a total of five years.

Requirements for Distinction in the Major in Accounting
Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

Accounting
This course plan is a sample schedule. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. Please meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.
INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

ACTG 2010 Survey of Accounting (4 Credits)
Accounting for running a business, with modules on financial accounting and a focus on managerial accounting. Prerequisite: Sophomore standing. Business minors only.

ACTG 2200 Introduction to Financial Reporting (4 Credits)
The purpose of this course is to introduce students to accounting and its relevance in the business world. Students learn how to analyze transactions and prepare financial statements. In addition, students are introduced to publicly traded company’s annual reports and 10K’s.

ACTG 2300 Accounting for Decision Making (4 Credits)
Introduces or reinforces concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting financial information and making business decisions, not accumulating or preparing accounting information. Prerequisites: ACTG 2200. Must have Daniels student status.

ACTG 2992 Directed Study (1-10 Credits)

ACTG 3014 Accounting Core I - Accounting Fundamentals (4 Credits)
The course prepares the future accountant to understand how the accounting system and profession functions within marketplace. At the conclusion of this course the student should understand: (1) the fundamental elements and terminology of business transactions and related financial accounting (2) the accounting system of recording, classifying and summarizing information, (3) economic and ethical issues relating to financial accounting, and (4) technical and communication skills necessary for the professional accountant. The practice of technical skills is supplemented with learning concepts and techniques for effective oral and written business functions, with a focus on reinforcing speaking and writing skills through practice and feedback.

ACTG 3018 Intermediate Financial Accounting I (4 Credits)
Foundations of financial statement content, including structure of financial accounting theory; accounting process and cycle; income determination and reporting; compound interest concepts and relationship to accounting; accounting and reporting for current assets. Case studies of open-ended accounting problems requiring application of GAAP guidance to fact patterns. Prerequisite: degree checkpoint 2.

ACTG 3019 Cost Management (4 Credits)
This course introduces objectives, methods and problems encountered in cost accounting. Cost accounting is a broad field that often links financial and management accounting, involving communication between accountants and management. Prerequisite: DCB checkpoint 2.

ACTG 3036 Accounting Core II - Federal Income Taxation (4 Credits)
This is the first course in taxation which introduces the federal taxation system, the importance of tax authorities, the concepts of gross income and tax deductions and the tax implications of common property transactions. This course generally focuses on property transactions, but the taxation of individuals is emphasized with an objective being that students are able to properly prepare complex individual tax returns.
ACTG 3038 Accounting Core II - Intermediate Financial Accounting II (4 Credits)
The focus of this course is the foundation and content of published financial statements. Specifically, it covers the following two modules: 1) assets: recognition, measurement and reporting issues, a) fixed assets and b) intangible assets; 2) liabilities: recognition, measurement and reporting issues, a) current liabilities, b) contingencies, and c) long-term liabilities. Common to each of the modules is an emphasis on reading GAAP and applying the GAAP guidance to fact patterns. In particular, the course is designed to enhance each student’s ability to identify, discuss, and resolve open-ended problems (i.e., those having no single “correct” answer). Therefore, each student must commit to being an active participant in the class discussions. The two main reasons to participate are that (1) the class will be a richer experience if we hear a variety of views on each issue and (2) it is important to develop confidence in your ability to analyze and discuss complex technical issues, and to explain and justify your conclusions.

ACTG 3049 Accounting Information Systems (4 Credits)
The objective of this course is to provide an integrated learning opportunity that encompasses financial statement assurance and accounting information systems. The first part of the course exposes these issues using a hypothetical company based on an actual company. The student should develop a knowledge and understanding of this particular industry and how it provides assurance of the company’s financial statements as well as address a variety of challenging accounting information systems issues. The second part of the course focuses on a conceptual framework to emphasize the professional and legal responsibility of accountants, auditors, and management for the design, operation, and control of AIS applications.

ACTG 3068 Intermediate Financial Accounting III (4 Credits)
This course is a continuation of ACTG 3018 and ACTG 3038 and completes the examination of the foundation and content of published financial statements. Specific topics include: stockholders’ equity, investments in debt and equity securities, revenue recognition, income taxes, pensions, leases, statement of cash flows, accounting changes and errors, and interim reporting.

ACTG 3069 Accounting Communications (4 Credits)
This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and team building.

ACTG 3220 Understanding Financial Statements (4 Credits)
Provides business majors with the necessary understanding to read, interpret, and use published financial statements. Cross listed with ACTG 4222. Prerequisite: ACTG 2200.

ACTG 3230 Financial Statement Analysis (4 Credits)
Consolidated financial statements, accounting for leases, currency translation, and options and futures impacts, GAAP to restate financial statements for differences between companies. Impact of financial transactions and evaluating a firm’s performance from a user’s perspective.

ACTG 3284 Consolidated Financial Statement (2 Credits)
Consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements.

ACTG 3285 Accounting for Foreign Operations (2 Credits)
Financial statement impact from doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

ACTG 3340 Topics and Cases in Managerial Accounting (4 Credits)
Research and presentation (oral and written) of cases in managerial accounting involving internal reporting, internal uses of financial data, and effects on and considerations of interpersonal and inter-organizational relationships.

ACTG 3360 Profit, Planning & Control (4 Credits)
Comprehensive planning in the corporate environment involving in-depth study of goals, procedures, responsibility, and coordination of planning and control process. Objectives and structuring of planning process, significant problem areas, benchmarks for alternative evaluation processes, and correction and control tools. Prerequisite: ACTG 2300.

ACTG 3440 Business and Investment Tax Issues (4 Credits)
Income tax conceptual framework applicable to common business and investment transactions, including tax implications of business decisions. How effective business planning depends on accurate assessment of relevant tax factors. Prerequisites: ACTG 2200.

ACTG 3461 Individual Income Tax (4 Credits)
Federal income tax as it applies to individuals, including discussion of rates, exemptions, deductions, and accounting methods; gross income, property transactions, tax deferred exchanges; business operating taxpayer issues. Prerequisites: ACTG 2200.

ACTG 3462 Corporate & Partnership Tax (4 Credits)
Federal income tax as applied to the formation, operation and dissolution of business entities. Determination of corporate taxable income, special deductions, credits, methods of computing tax liability and estimated tax requirements. Determination of partnership and S Corporation ordinary income; classification and amount of separately stated items allocable to partners and S Corporation shareholders in accordance with the conduit principle.

ACTG 3551 Auditing (4 Credits)
This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports.
**ACTG 3607 Not-For-Profit and Governmental Accounting (4 Credits)**
Accounting methods and managerial analysis used for governmental bodies and private and public not-for-profit institutions. Cross listed with ACTG 4607. Prerequisites: degree checkpoint 2 and ACTG 3282 or ACTG 3068.

**ACTG 3701 Topics in Accounting (1-4 Credits)**

**ACTG 3702 Topics in Accounting (1-4 Credits)**

**ACTG 3703 Topics in Accounting (1-4 Credits)**

**ACTG 3704 Topics in Accounting (1-4 Credits)**

**ACTG 3705 Topics in Accounting (4 Credits)**
Prerequisite: ACTG 3068 or instructor’s permission.

**ACTG 3740 Valuation and Modeling (4 Credits)**
Professional decisions in the face of uncertainty are made using a combination of judgment and sound analysis. Even skilled professionals in any field will make incorrect decisions when working with incorrect or insufficient information or when making careless analyses. One key to improving decision-making is superior analytical insights and skills. Given this, the ultimate purpose of the course is to: 1. Provide you with experience in identifying critical decisions that can best be improved through analysis of data and modeling. Once key issues are identified. 2. Provide you with the knowledge and insight necessary to identify appropriate (and reject inappropriate) models or analyses. Once an appropriate model or models are identified: 3. Provide you with the tools and skills necessary to correctly use those models by identifying, measuring and evaluating critical factors, data and assumptions. 4. Gain experience in critically evaluating and auditing your work and the work of other professionals. For example, has management used appropriate models, appropriate data and reasonable assumptions in their estimates of fair value for various assets. Prerequisites: INFO 1020, ACTG 2200 and FIN 2800.

**ACTG 3880 Internship - Undergraduate (0-4 Credits)**
Practical work experience.

**ACTG 3885 Undergraduate Field Experience (0 Credits)**
Compensated work experience; no academic credit. Prerequisite: instructor’s permission.

**ACTG 3991 Independent Study (1-10 Credits)**
Independent research/study; requires written report. Prerequisite: instructor’s permission.

**Advanced Seminar**
All undergraduates at the University of Denver are required to take an Advanced Seminar, an upper-level course capped at 15-18 students.

While knowledge and professional skills found in a student’s major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex political, social, cultural and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the demands of contemporary life, instructors teach an advanced seminar based in their area of expertise and passion. The topic will be approached from multiple perspectives in a course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas through intensive writing on that topic. This course must be taken at the University of Denver. Students must complete all other common curriculum requirements before taking the Advanced Seminar.

Advanced Seminar courses meet four criteria in terms of writing.

1. Students will write a minimum of 20 pages (about 6000 words), some of which may be informal, but some of which must be revised, polished and intended for an educated readership.
2. Students will complete a minimum of three writing projects that are distributed over the quarter; exceptions might include a cumulative project completed in multiple stages.
3. Students will be required to revise some of their work based on feedback from their professor.
4. There will be some instructional time given to writing.

**Courses**

**ASEM 2401 'Extreme' Philosophy: Major Philosophical Issues of the 21st Century (4 Credits)**
This course involves an exploration and critical assessment of several of the most important 21st century philosophical issues: the "Doomsday Argument," the "Singularity Argument," the "Simulation Argument," and various views surrounding the possibility (and probability) of extraterrestrial intelligence (ETI). There are no prior knowledge prerequisites; all necessary background information will be presented in the course. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.
ASEM 2403 Versions of Egypt (4 Credits)
This course will study a handful of books that lead up to and study the recent Egyptian Revolutions. We will read Alifa Rifaat's Distant View of the Minaret, Amitav Ghosh's In an Antique Land, Alaa al Aswany's The Yacoubian Building, Wael Ghonim's Revolution 2.0, and excerpts from Peter Hessler's forthcoming book about post-revolutionary Egypt. The class will attempt to understand both 21st century Egypt and the aftereffects of the dramatic changes in Egypt since the first revolution of February 2011. Students will write both critical and creative essays for this seminar.

ASEM 2404 Music Preference, Identity, Genre, and Recommendation (4 Credits)
Students examine the relationship between music preferences, personality, and identity. Because music preferences are strongly mediated by cultural industries and institutions, students also examine two of the music industry's tools for connecting listeners to their preferred music: genre systems and a more recent tool, automated music recommendation engines. The course includes three medium-length papers and many written responses to scholarly writing drawn from music psychology, musicology, and music informatics.

ASEM 2409 Performing India: Performance, Ritual, and the Indian Body Politic (4 Credits)
This course explores "performance" as an organizing principle of Indian cultural, political, and religious expression. We delve into the shared poetic and spiritual experience of the performer and spectator as a foundational aspect of performance that fundamentally shapes the Indian body politic. This interaction between spectator and performer functions as a guide trope as we examine the Pan-Indian oral performance tradition through the transmission, rewriting, recasting, regionalization, and politicization of canonical Indian epics, the "Mahabharata" and "Ramayana".

ASEM 2410 Science & Religion in Dialogue (4 Credits)
This course examines the relationship between science and religion. Our key question is "What is the best way to understand or construe this relationship?" We begin by attempting to identify and, then, dispel certain popular "myths" about science and religion. Then we turn our attention to the life, the scientific discoveries, the religious commitments and struggles of Charles Darwin. Darwin's career is the perfect entry point for considering much broader issues in the relationship between science and religion. Darwin's evolutionary theory fundamentally shaped modern science. But in so doing it also raised significant challenges to traditional religious belief, particularly in Christian communities of faith. For that reason, Darwin is as controversial today as he was 150 years ago, especially in (though not limited to) America. With that foundation, we shall be in a position to wrestle with a quite recent, thorough-going reassessment of the science/religion debate, one that is both critical and constructive. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2416 France and Germany: From Carnage to Community (4 Credits)
Today, much to the United Kingdom's chagrin, the European Union is dominated by a closely cooperating "dyarchy" of the French Republic and the Federal Republic of Germany. Go back a century, however, or two or three, and you find France--whether republic (1909), empire (1809), or kingdom (1709)--preparing for war with Germany (1909) or catching her breath between campaigns against various German states (1809, 1709). Hundreds of years of European history are marked and marred by increasingly devastating collisions between these two proud nations. When we review and appreciate that bloody "back-story," their present harmony, indeed on many important matters their unison, is an astonishing outcome, which this course attempts to explain, examining implications for the future of Europe, of the Western alliance, and of the world.

ASEM 2417 Cultural Dynamics-African American Music (4 Credits)
This course examines the cultural and psychological functions of various genres of African American music both historically and in contemporary society. The course is built around the thesis that various forms of African American music—e.g., the spirituals, the blues, gospel, jazz, rap—have served common functions in the culture historically (even while serving distinctive needs at different points in history), and have all served as core features of both African American culture and, more broadly, American aesthetic sensibility.

ASEM 2421 War and Peace in Japanese Film (4 Credits)
War and Peace in Japanese Film looks at Japanese films of the 20th century as documents of the transformation of Japan from an imperialistic and aggressive state to something quite different. It considers contrasting interpretations of Japanese film, ranging from orientalist stereotyping to postmodern critiques of standard categories. The course examines the work of established directors like Kurosawa and Ozu, but also newer filmmakers and challenges too-narrow cultural preconceptions.

ASEM 2422 Textual Bodies: Discourse and the Corporeal in American Culture (4 Credits)
This course explores how bodies acquire meanings, and how those meanings are created, represented, disseminated, or contested through discursive and embodied means. Course practices include close readings of literary, philosophical, and visual texts; creative and auto-ethnographic writing exercises; and in-class dance-based movement drills. Prerequisite: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2424 Poetic Minds (4 Credits)
How do we know who we are? How do we know what is real? How do we decide what is right? In this ASEM, course participants will trace these key questions from Enlightenment philosophy to British Romantic literature and, finally, to their echoes and afterlives in contemporary literature.

ASEM 2427 Mid-Century Mod, Redrawn (4 Credits)
Studying the art history of the mid-20th Century is not an exercise in nostalgia but a study of the way we think, communicate, and innovate. Artists like Grace Hartigan, Tadeusz Kantor, and El Anatsui illustrate creative labor in a rapidly changing, globalizing world. This course, designed for all majors as part of the advanced seminar common curriculum requirement, takes in part its inspiration from MoMA's initiative Contemporary and Modern Art Perspectives, which aims to redraw understandings of modernism within the purview of global art history and larger cultural framework, including social, political, economic, and intellectual. The course reconceives the 1950s and 1960s and the notion of "modernity" from multiple geographies and identities: Western and Central-Eastern Europe, Latin and North America, and Africa.
ASEM 2428 Religion, Nation, and Money (4 Credits)
Primarily through the lens of Religious Studies, this course, accessible to students from various majors, explores the intellectual history and continued existence of Manifest Destiny in the United States and fosters nuanced perspective concerning the construction of American Identity and U.S. Nationalism. Students examine the relationship between the following: religion and capitalism, religion and national identity, religion and ethnic particularity, religion and race, and religion and armed conflict. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2436 Life and Death (4 Credits)
In this course, students examine several of the moral issues concerning the circumstances under which it is appropriate for humans to bring about life or death. For example, is it morally permissible to bring about, and subsequently destroy, human life in a petri dish? Is it permissible to bring about the death of people who have killed others? We examine and evaluate others' responses to such issues. En route to answering these questions, we pay significant attention to the scientific and empirical factors relevant to which moral responses we should have and to the legal factors determining the actual policies we do have.

ASEM 2438 Music and Language (4 Credits)
Music and language are two of the most complex and powerful communication systems shared by humans globally. Drawing on methods and theories from anthropology, ethnomusicology, cognitive psychology, and literary theory, students in this seminar explore the music-language interface from interdisciplinary and cross-cultural perspectives.

ASEM 2443 "All the world's a stage." Shakespeare Then and Now (4 Credits)
"All the world's a stage": Shakespeare Then and Now is an ASEM team-taught by faculty from the Departments of English and Literary Arts and Theatre. It emphasizes close reading, writing and interpretation as well as acting techniques and dramatic performance of selected scenes. The four plays and two contemporary novels based on the plays are chosen to underscore the range and diversity Shakespeare displayed in his choice of plot, setting and character and to demonstrate Shakespeare's continuing relevance to political, racial, religious and gender issues. Prerequisites: Completion of all other Common Curriculum Requirements.

ASEM 2444 Colonialism/Race/Decolonization (4 Credits)
This class examines how colonialism and race function as different but interlocking systems that cannot be understood separately. The course examines how the two continue to have an effect on the world and continue to be important to understand global inequalities. The writings of anti-colonial and anti-racist indigenous, black, feminist, and third world intellectuals, along with texts from European figures such as Hobbes, will be used to explore colonialization and racism. Prerequisites: Completion of all other Common Curriculum Requirements.

ASEM 2453 London and Media: Then and Now (4 Credits)
This seminar explores London's "popular" and "high culture" media in the 19th and 20th centuries. Taking advantage of both the University of Denver's online databases and London library holding, students explore a number of the major 19th century London-based British newspapers and journals that proliferated after the abolition of the Stamp Tax in 1855. Students explore significant differences between popular and high culture in 19th century newspapers and journals that target different audiences. Simultaneously, students read articles from contemporary London newspapers. They have a constant commentary on contemporary issues to counterpoint the 19th century readings. From these parallel readings, students discover not only similarities and differences in key issues but also learn how rhetoric, style, diction and voice differ between 19th- and 20th-century journalism. Class discussions and writing assignments focus on comparisons between 19th- and 20th-century topics, intended readership, style and rhetoric.

ASEM 2455 Music, Virtuosity, and Value (4 Credits)
This course explores the concept and phenomenon of musical virtuosity across multiple historical and historical contexts. We consider the meanings of musical skill and how debates about virtuosity's merits or dangers reflect aesthetic and ethical values. There are no prior knowledge prerequisites; necessary background information will be presented in the course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2458 Satire in the Arts & Media (4 Credits)
This course explores how satire, in its myriad manifestations, juggles immediacy and universality in the cultures and time periods in which it is born. The course's interdisciplinary nature makes it unique, and its celebration of satire as a discipline that traverses a multitude of forms gives the course an exciting, dynamic quality.

ASEM 2459 Anti-Social Media (4 Credits)
This course addresses the negative effects of our connective technologies. Examining the media landscape of 100 years ago through the lenses of literary analysis, media theory, and history, it presents the 20th-century origins of our concerns with the media "bubble," with the threat that new media pose to democracy, and with loneliness. By grounding the question of media in history and in the disciplined analysis of literary form, this course seeks to generate more effective modes of thinking about the mediated life. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2460 Latina/o Religious Traditions (4 Credits)
This course is organized around the broad question: Is there enough commonality in the texts (including cultural texts) we have studied to name a singular field of social relations we can rightly call “Latina/o Religion?” This course engages and excites students by enabling them to study religious traditions in an academic place removed from direct faith commitments. Toward this end, we will view art, hear music, watch films and talk to religious leaders.
ASEM 2469 Imagining the Amazon (4 Credits)
Representations of Amazonia often invoke images of either an earthly paradise or a green inferno. This course begins by challenging students to critically reframe their images of the Amazon by underscoring the unequal power dynamics that have come into play whenever outsiders have represented the landscapes and the peoples of Amazonia over the past 500 years. Using a variety of theoretical paradigms, students in this course study representations of Amazonia created both by indigenous writers and activists, as well as several widely disseminated (and critically heralded) novels, films, and journalistic essays created by 'outsider' authors and auteurs from Latin America, the U.S., and Europe.

ASEM 2479 Environmental Culture in East Asia (4 Credits)
This course explores current environmental and ecological challenges in major East Asian countries such as Korea, Japan, China and Taiwan through the lens of ancient and contemporary cultural and philosophical traditions. The course examines 1) primary traditional Asian philosophic and religious concepts about Nature, such as Confucianism, Taoism, and Buddhism, as well as traditional literatures and arts that reflect those concepts; 2) contemporary eco-literature and eco-cinema that function as responses to, and critical reflections of, the urgent environmental crises in those countries; 3) cultural practices that are officially, communally, or privately implemented for eco-preservation and environmental-protection. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2481 Witchcraft & Renaissance Drama (4 Credits)
Witchcraft and Renaissance Drama traces how the rise of the witchcraft panic in England is reflected in and fueled by several venues of cultural production in England from 1558-1621. The course takes a historical journey through the laws against witchcraft, the witch trial transcripts, the emerging gender pamphlet wars and the popular drama as all manifestations of how the metaphor of witchcraft served to address several cultural fears of the transition between Early Tudor, Late Elizabethan and Early Jacobean to explore how the drama both responded to and shaped the development of the Witch craze.

ASEM 2482 Africa (4 Credits)
In this course, we study the literature, politics and culture of Africa from pre-colonial times to the present. We begin by examining Africa as the locus of the world's oldest civilization and by discussing some key moments in African history. We then focus on the four regions of Africa, on country- or region-based examples of culture and politics in Africa—such as colonial rule in East Africa, war of independence in North Africa, military rule in West Africa, Apartheid in Southern Africa. We also discuss Africa and the world, or Africa in the context of modern-day globalization. In each case, we discuss historical accounts and literary representations as well as political and cultural contexts.

ASEM 2486 Chaucer's London (4 Credits)
This course is a study of the medieval London - the people, customs and social order—by looking through the lens of the great satirist of the fourteenth century, Geoffrey Chaucer. We read a few of the Canterbury Tales and some medieval documents that give a fuller picture of medieval London. Our focus is on seeing the medieval origins of the modern city, and comparing the medieval cosmopolitan city with the cosmopolitan city of the early twenty-first century. In addition to reading original documents and secondary research on medieval London, we take virtual trips to Canterbury, the medieval university towns of Oxford and Cambridge, the medieval cites of York and Norwich, the Museum of London, and learn about the historical significance of the Tower, Westminster Abbey, Guildhall, Inns of Court, and St. Bartholomew-the-Great.

ASEM 2488 Exploring Contemporary Art “in situ” (4 Credits)
Exploring Contemporary Art “in situ” is an exploration of contemporary artworks situated in galleries, museums, and public sites in greater Denver. Students will closely observe artworks by various living artists and read them as primary texts to which they will respond with their own writings in contemporary social media. The course will meet on location at least once each week to be in the presence of the source art works.

ASEM 2491 Art and the Environment (4 Credits)
This course takes an historic approach to a discussion of art and the environment. While certainly we could go back to the integration of art and its environs in the Prehistoric period, this class focuses on the contemporary art world.

ASEM 2492 Animals and Human Societies (4 Credits)
This course considers human-animal relationships from a variety of disciplinary perspectives. Focusing on Western Europe and America, we explore the many ways in which people interact with non-human species–killing them for pleasure, eating them, observing them and caring for them—and the effects of these interactions on both animals and people. Thinking about animals sheds light on crucial issues in today's society, with implications for everything from environmental change to the impact of consumer culture to the ethics of euthanasia.

ASEM 2494 Global Ecology of America (4 Credits)
Ecology is the science of interconnections, and "The Global Ecology of America" encourages students to think anew about the ways the United States interconnects with the rest of the world. As the word "ecology" suggests, our primary focus is on environmental interconnection. This class is concerned with both communities and environments. It seeks to make students more aware of the essential links between the two, and it also seeks to shed light on the often unseen or ignored ways our lives, as Americans, shape—and are in turn shaped by—the lives of other people in other places all around the planet.

ASEM 2501 The Addictive Self (4 Credits)
This course examines the interconnections between addiction and the formation of the sense of self or "self-identity." Students construct a working theory of addiction in relationship to selfhood, considering narratives of addiction, and explore the stories not only of alcoholism and drug addiction, but also of food and "process" addictions. The course explores the texts and issues involved from a variety of disciplinary perspectives, including especially those of psychology, sociology, psychoanalysis, literary criticism cultural theory and philosophy.
ASEM 2516 Do the Wicked Prosper? (4 Credits)
This course revolves around a question, which is famously quoted from the Bible, "Why do the wicked prosper?" The quotation presupposes that the wicked do prosper, but many strands of human thought challenge the supposition. This course examines the students' reactions to this question and leads them to approach the question and their reactions to it from a variety of academic perspectives.

ASEM 2517 Prostitutes of the Pen and Novel: 18th Century Women Novelists (4 Credits)
In Seductive Forms (1986), leading feminist scholar Ros Ballaster famously coined the phrase "prostitutes of the pen" to describe the common perception regarding the first English professional female authors of the late seventeenth and early eighteenth centuries. It encapsulates the cultural conditions with which women had to contend and their extremely limited options for earning a living. We will trace the social, economic, and historical issues with which English society, particularly the women of the eighteenth century, faced. The eighteenth century witnessed the rise of capitalism, trade, the merchant class, and with these various developments also saw "the separation of spheres"—the domestic from the public. This separation of the domestic from the public constructed a division between men and women, whereby men ruled the public world: economy, politics, and education, and women were relegated to the home and excluded from the public sphere. One of the major effects of this division was the lack of professional opportunities for women. Other than acting as domestic servants, there was little chance for financial independence. Therefore, these "prostitutes of the pen" were true pioneers, women who created a profession for themselves and a way to survive. Beginning with these early British novelists, this course intends to investigate the history and work of English women writers in the eighteenth century, extending to the end of the century. Additionally, this course seeks to explore women's history in the eighteenth century—their educational and professional opportunities and the ways in which patriarchy, property, and English law affected women and informed their fictional works. Moreover, this course will assess how novels afforded these women authors a voice of protest as well as at times becoming a voice of consent within popular culture.

ASEM 2518 Exploring Italy (4 Credits)
This class combines a seminar meeting throughout fall quarter with two weeks travel to Italy following exams. Students focus on the art and literature of Rome, Florence and Venice in preparation for their travels. Students concurrently enroll in Excavating Italy (ARTH 2613 or ENGL 2613) as a prerequisite.

ASEM 2519 Music of Southeast Asia (4 Credits)
This course examines traditional, popular, and diasporic musical genres in Southeast Asia, using that lens to explore more broadly how music and culture interact on a critical global scale, drawing on histories of colonialism and power. From Javanese gamelan, to Thai Luk Thung, and from karaoke among immigrant Vietnamese communities in the United States, to Malaysian shadow puppet theater, the course explores the varied and diverse region that is Southeast Asia. It examines both classical and popular musical traditions, approaching music not from a music theory perspective, but rather from an ethnomusicological standpoint—drawing on cultural studies, history, sound studies, critical theory, anthropology, sociology, and religious studies. Content includes music and performances, academic articles, first-hand accounts, and documentary films, focused on topics in music, dance, genocide, and social and political movements. Students will develop writing, listening, thinking, and oral skills. No formal music training or previous musical experience is required for this course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2520 Contemporary Theory and Art (4 Credits)
This course examines continually changing theoretical perspectives that have influenced culture, using artworks and artists to understanding those theories and their influences on creation and interpretation. A larger concern is how these perspectives affect contemporary world views and how we have arrived in the current cultural climate; to those ends, the course offers a broad overview from Enlightenment thought through Postmodernism. While these theories circulate among various discourses in philosophy, physics, sociology, psychology and politics, the main focus and example is how art and culture have moved through this epoch. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2521 Representations of Youth: The Case of Italian Fiction (4 Credits)
This class explores broad questions about the representation of youth and adolescence, using the lens of fictional representations of youth in Italian literature and cinema of the 20th and 21st century, especially contemporary Italy. In addition to studying novels and films, the course will feature historical and sociological sources (including from youth studies), and will provide tools for a methodological approach to storytelling. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2522 Social Change and Interview-Based Theatre (4 Credits)
Theatre for Social Change is the practice of using theatre for or with a community with the intention to create social change. It is one of several types of community-based projects designed for these ends. This course uses case studies and readings from theatre, social work, and international education to explore perspectives and complexities of this work, including issues of design, implementation and evaluation, as well as larger themes of ethics, aesthetics and representation, from the perspectives of both facilitator/theatre creators and participating populations. The course fosters broad conversation on participatory action research and its place within social change and community-based initiatives. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2527 Life's Aim (4 Credits)
How do our everyday activities and our short-term goals, like graduating from college and finding a job, fit together with some of our less concrete and more long-term concerns like finding happiness and meaning in our lives? Is there some way to understand our daily activities as coherent with and supportive of these overarching goals? Using philosophical, literary, psychological and economic texts, this course consists of an examination of the conceptual dichotomy of means vs. ends and the role that it plays in our analysis of human activity.
ASEM 2531 Culture of Desire (4 Credits)
Sex—we talk about it all the time. Talk shows, online, in magazines, in plays and music, sex shows up everywhere. Why do we expend so much energy on something that, in most cultures, isn’t really discussed much in public? And what is sex, exactly? How do we define it? How do we legitimate sex, and why have we decided to categorize people as heterosexual, homosexual, bisexual...? What structures have we developed to make us conform to those categories, and what discrepancies have we chosen to ignore? Why is it problematic to base arguments about relationships on historical evidence? In this course, students find out answers to these questions, answers that will lead to even more questions and problems.

ASEM 2532 Death & Dying in Hindu Traditions (4 Credits)
This course explores the meanings of death and dying in Hindu perspectives. The inevitability of death has led cultures throughout the world to speculate on what happens to the individual during, at the moment of, and after death. Until the modern period, religions have typically been the first or only place where people turned for answers to basic questions of existence: What happens at death? Will I and the people I love disappear forever? Or will we continue on after death in some way? Is this the only life we have? What is the relationship between the life we lead now and what happens at and after death? These kinds of universal questions have led to culturally specific and conditioned answers and speculations, some of which we will examine in this course.

ASEM 2535 The Multiracial Individual (4 Credits)
This course explores the historical racial tensions in the U.S. that have made it difficult to acknowledge the reality of multi-racial peoples in its midst, and traces the trends in culture and national consciousness that made it possible for a change to occur in the 2000 census. We survey the varying ways in which multiracial people have been regarded by the larger society in different social contexts, as well as the ways in which the sociological, psychological and political dynamics of multiracial identity have changed over time and have impacted the experience of multiracial people themselves.

ASEM 2542 Knowledge and Ignorance in Contemporary Scientific Practice (4 Credits)
Over the last few decades, an increasing number of scientists, philosophers, historians, and sociologists have emphasized that the traditional depiction of science as a progressive accumulation of true - or approximately true - descriptions is an oversimplification. We have come to realize that the right kind of ignorance and failure can truly be a gateway to success, to deeper understanding. But how is this possible? What kind of failure can be turned into knowledge? How does science deal with ignorance? How does one use ignorance to its advantage? This course provides a long answer to these questions. Specifically, it recasts some classic philosophical issues by bringing attention to a widespread scientific practice that can be aptly called “black-boxing.” The course examines and illustrates these issues with some prominent episodes in the history of science, from fields ranging from biology and psychology to economics. Beyond completing the Common Curriculum, there are no prerequisites for this course, which is introductory in character; presupposes no previous acquaintance with philosophy, the natural sciences, or the social sciences, and is entirely self-contained.

ASEM 2550 Music, Gender, and Sexuality (4 Credits)
Can music express gender and sexual identities? When a small group of scholars tenaciously raised this question in the 1990s, it created a contentious moment in the study of music history. Students will trace this lively debate through seminal interpretations of classical and popular music while honing listening and interpretive skills. Prior study of music is not required.

ASEM 2555 India and Historical Film (4 Credits)
This is a course that utilizes films, fiction and writings of professional historians to explore themes in Indian society and culture such as the colonizer ‘self’ and the colonized ‘other’, the mechanisms of difference whether based on race, gender or religion, the processes of identity formation through national movements or community ties, real or imagined, and the quest for modernity through economic development and societal reform.

ASEM 2556 Social Media (4 Credits)
Social media enable individuals to create, collaborate, and share messages with networks of all sizes. They are also tools for surveillance that are radically changing how governments and corporations engage with publics, challenging long established notions of privacy, freedom, and civil liberties. This course introduces students to the historical, economic, legal, and cultural context of social media and explores the ways we shape and are shaped by these emergent and ever-changing tools.

ASEM 2557 Body & Sexuality in Religions (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a “human” does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity devalued sexuality, procreation and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modification? How can we understand “out-of-body” experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective.

ASEM 2562 Modern and Postmodern Music (4 Credits)
Students explore multiple musical styles and genres, primarily from the 20th century to the present, as they develop new cognitive pathways for experiencing all music. The course devotes substantial time to developing a vocabulary of descriptive terms that apply universally to music even outside the modern and postmodern subject matter.
ASEM 2566 Society Through Literature and Cinema (4 Credits)
This course will study the interconnection of human societies (or nation states) as evident in different kinds of narratives. Discussing literary and film narratives in particular, we will examine the beliefs and influences that shape relationships within the same society as well as the beliefs and influences that shape relationships between different peoples and societies. Our examination will include an exploration of how these beliefs and influences are generated and modified. Our study will be aided by the interpretive insights of artists and visionaries. Our examples will be taken from different regions of the world.

ASEM 2567 Violence, Law, & the State (4 Credits)
This class is built on interrogating arguably the fundamental issue facing every state: how to deal with violence. Through a mix of academic readings, films, documentaries, and reputable media, we will consider a range of issues regarding violence and the state in the modern world. The three organizing themes for the class are understanding the lived problems of violence, the nature and value of freedom in relation to violence and the state, and the question of how law relates to violence and the state.

ASEM 2568 Outsiders in Italian Fiction (4 Credits)
This class addresses the recurring representation of the character as an outsider in the Italian literary and cinematic tradition of the 20th and 21st centuries. Novels, theatrical plays, and films will be supplemented by a collection of secondary sources on psychology and sociology, providing the tools for a correct thematic and methodological approach to storytelling.

ASEM 2572 Philosophy, Psychology, Neuroscience, and Free Will (4 Credits)
This seminar introduces students to the topic of human freedom from the perspective of philosophy, neuroscience, and psychology. If everything that you do and have ever done is the inevitable byproduct of the political, social, economic, cultural, familial, psychological, and neurological forces at work within and around you, in what sense could you be free and morally accountable for your actions? In what sense could you be worthy of praise for your accomplishments and blame for your failures? The course will address the topic of free will using contemporary scholarship in philosophy, neuroscience, and developmental and social psychology, and we will ask questions such as: What, exactly, is free will? What can our understanding of causation tell us about free will? What is moral responsibility, and how is it related to free will? What brain processes underlie our decisions?
Prerequisite: Completion of all other Common Curriculum requirements.

ASEM 2576 Art, Thought, Spirituality (4 Credits)
This course examines the close and complex relationship between esthetic expression and private religiosity, or "spirituality." The course will examine how theories as well as personal accounts of artistic creativity, experience and appreciation can both broaden and deepen our understanding of the inner life that is otherwise communicated in religious terms and how artistic expression can also have a quasi-religious or "spiritual" character. The central objective will be to illumine the way in which the construction of the individual self and the formation of the personal identity are intimately tied to different quests that are artistic and spiritual at once.

ASEM 2577 Cultural Intersections (4 Credits)
In this course, we explore the dynamics of cultural reception or the translational dimension of modern culture, particularly the reception of narratives within particular cultures and beyond. Our main focus is the principles that integrate and divide people along the lines of race, class, ethnicity and culture. Our journey involves studies of cultural contacts, contexts and narratives from Africa and the Caribbean, Asia and the Middle East, Europe and the Americas.

ASEM 2578 Travel Writing Through the Ages: Exploring Italy and the Self (4 Credits)
A panorama of the evolution of the Travel Writing genre shows how different travelers have interacted with foreign environments for centuries and provides students the model to create their own travel journal. The course focuses on travel narratives to, from, and within Italy. The reading list includes Italian and American writers such as Christopher Columbus, Margaret Fuller, Mark Twain, Carlo Levi, Italo Calvino and Umberto Eco. Excursions to different parts of Italy, visits to historical sites and museums and screenings of relevant Italian films complement the class.

ASEM 2579 From Literature to Film (4 Credits)
In this course, we examine the adaptation of literary works into films. We closely study selected modern literary works and the film interpretations of each work. Focusing on the transition from one narrative form to another, the course enhances the critical skill of students as well as their creative ability with respect to cinematic translations. We, therefore, also have mini scriptwriting workshops as a way of imaginatively highlighting the sort of considerations that go into the making of the film script.

ASEM 2580 Celtic Identities and Nationalisms (4 Credits)
Every March 17th, millions of people around the world engage in invented rituals of drinking, parades, & music in celebration of St. Patrick's Day. Summer finds Scottish Highland Games enacted by kilt-wearing, bagpipe-playing, Celtic-culture aficionados across the English-speaking world. The European Union has funded Celtic-History Trails & sites across Western Europe to link itself to an earlier period of 'unification.' Millions of people claim Celtic heritage and ancestry in the U.S.A. and across the globe. But what does that really mean? Who is entitled to claim such identities? Who is not? How do people reconcile 'Celticness' with other elements of individual, national, and group identities across the globe? This course uses Celtic identity as a means of engaging students in a critical examination of the meaning and process of identity formation. Students identify, compare, and evaluate the methods used to define and claim legitimate and illegitimate definitions of "Celtic" identity espoused by past and current nationalists, musicians, archaeologists, political scientists, historians, governments, film-makers, shopkeepers in Wales, Scotland, Ireland, Brittany, Europe.
ASEM 2640 New England: Myth and Memory (4 Credits)
This course focuses on region--New England--and its racial history as a case study of the process of fabricating historical memory. New England's history is there have been (and continue to be) contests over which version of key historical events or movements is to be disseminated to the public. This been called "the invention of tradition," but most people do not appreciate the constructed nature of the past and do not recognize the possibility that the subject of this course is historical memory or, to put it simply, the relationship of the present to the past. Historians take for granted what has passed as reality and accept many of our assumptions without question. We will study the ways in which the past is constructed and reimagined through written and visual media. This course will explore the diversity of interpretations of New England's history, including those of Native Americans, African Americans, and other minorities. The course will also examine the role of popular culture in shaping historical memory, including films, novels, and other forms of media. The course will be taught in English and will be open to students from all backgrounds and majors.

ASEM 2650 Disease in World History (4 Credits)
This course examines the social and political impact of disease in global history, and also considers how understandings of disease have changed over time. We will explore the relationship between religion and medicine at the time of the Black Death; to early twentieth-century tuberculosis and the social stigma of the disease; to the eradication of smallpox in the 1970s, and debates about the wisdom of pursuing disease eradication; to Ebola and its significance in the broader global health inequities of the modern period. Students will not only learn about the history of disease but will also learn to evaluate historians' arguments about disease and its significance.

ASEM 2660 Literature of Trauma (4 Credits)
This course examines the relation between memory, trauma and history in postwar American literature and culture, as those have become major themes in novels and films. The works examined in this course provide us a window into experiences of victims of trauma, while extending the possibility of forming a more sensitive and inclusive conception of American history and culture. Readings include literary works and a selection of secondary critical and historical texts. Completion of all other Common Curriculum requirements is required prior to registering for this course.

ASEM 2670 Literature of Nature and Apocalypse (4 Credits)
This course introduces various ways that indigenous communities in the U.S. and Canada have understood and attempted to navigate issues gender and sexuality in a religious context. It introduces foundational understandings of gender and sexuality that inform both Western and Indigenous cultures, and it explores the fundamental differences between those understandings. The course also presents emergent theories that challenge assumptions common within the Euro-American tradition. Through research and writing, students add to the contextual breadth of the class.

ASEM 2682 Latina/o Identity & Community (4 Credits)
This course analyzes the complexity of Latinos' unique social position, using an interdisciplinary approach to understand the construction, maintenance, and change of Latino identity and community formation over time in the United States. As students will learn, Latino identity in the U.S. has experienced a continual process of negotiation between dominant discourses--regarding gender, race, politics, economics and culture--and the socio-political and cultural histories of their own communities. Accordingly, we explore the variety of ways in which identity and culture are socially constructed and actively contested, with particular regard to the diversity among and within Latino groups.

ASEM 2690 Interpreting the Holocaust Through Film (4 Credits)
This course takes students on a journey from Nazi Germany to the present day through the lens of the camera. We examine how the Nazis used film to convey their messages, explore the varied experiences of those who lived during the time of the Holocaust as depicted in films, view movies that address various ethical dilemmas presented to Jews and Gentiles as a result of these trying times, and discuss the ways that the Holocaust has been represented and memorialized through films in more contemporary times.

ASEM 2700 Russian Revolutions & Utopias (4 Credits)
This course examines Russian culture and society from the late 1800s to the 1930s, when Moscow and Saint Petersburg/Petrograd were synonymous with cutting-edge and avant-garde, staging revolutions--and dreaming of utopias--in politics, art, sex and science, to name but a few areas. The course compares the ideals of those times with Russia today as well as with developments in Western Europe and North America.

ASEM 2715 Truth and Treason in the Cold War (4 Credits)
This course takes an intensive look at American history from 1945 to 1955 in order to investigate the relationship among international relations, domestic politics, and American culture. While anticommunism was perhaps the preeminent influence over American politics and culture, this course also investigates other related cultural developments, such as the moral and cultural anxiety resulting from the revelations of the Holocaust and Stalinism, the anguish represented by the height of existentialism in American thought, the exploding popularity of abstract expressionism, the gradual growth of consumerism, and the effects of the baby boom.

ASEM 2725 Literature of Trauma (4 Credits)
This course examines the relation between memory, trauma and history in postwar American literature and culture, as those have become major themes in novels and films. The works examined in this course provide us a window into experiences of victims of trauma, while extending the possibility of forming a more sensitive and inclusive conception of American history and culture. Readings include literary works and a selection of secondary critical and historical texts. Completion of all other Common Curriculum requirements is required prior to registering for this course.

ASEM 2730 New England: Myth and Memory (4 Credits)
The subject of this course is historical memory or, to put it simply, the relationship of the present to the past. Historians take for granted what has been called "the invention of tradition," but most people do not appreciate the constructed nature of the past and do not recognize the possibility that there have been (and continue to be) contests over which version of key historical events or movements is to be disseminated to the public. This course focuses on region--New England--and its racial history as a case study of the process of fabricating historical memory. New England's history is particularly useful for this purpose because the region has had an inordinate impact on our national history.
ASEM 2646 Dance in India (4 Credits)
As a discipline in which the body is trained to become "naturalized" in very specific ways, dance tells us much about the culture in which it is a part. Dance movements and meanings also become sites of conflict during periods of cultural transition, and yet because of dance's ephemeral nature, its relative adherence to tradition, or lack thereof, is difficult to ascertain, and thus often hotly contested. This course explores the tension between change (innovation) and continuity (tradition) in four different forms of dance from the Indian subcontinent: Bharata Natyam, a classical dance form from South India; Kathak, a classical dance form from North India; Bhangra, a folk dance form from Northwestern India; and the mass-mediated, syncretic form of dance predominant in the Bollywood film industry.

ASEM 2652 Conspiracy Theories and Contemporary Culture (4 Credits)
What have become called "Conspiracy Theories" (CTs) have been around since some of the earliest human narratives but have only quite recently been studied as a distinctive phenomenon. Underlying this explosion of popular interest in CTs are a number of intriguing philosophical, psychological and socio-political issues that reveal a great deal about how social discourse is pursued, formed, circulated and empowered (or disempowered) in the contemporary world. In this course, we will view this broad phenomenon of CTs from three different perspectives: (1) philosophical, (2) psychological, (3) social and political.

ASEM 2657 Harry Potter and Esotericism (4 Credits)
Today's students have grown up with J. K. Rowling's seven Harry Potter books. This incredible publishing phenomenon has inspired children and adults alike to devour 500-page books within days of publication, at a time when statistics seem to indicate that people are no longer reading. Why would these tales of English school children learning a curriculum of magical skills have so captured the imagination of a generation of young people living in a post-modern world? The purpose of this class then is to examine the role of esoteric themes that pervade the Harry Potter books and to investigate the history of those subjects from the Middle Ages to the present, by focusing on the visual traditions they inspired. Areas discussed include the history of magic and witchcraft, classical and Celtic mythology, alchemy, astrology, fantastic beasts, "books of secrets" and their healing potions, the mythic lore of botany, divination and various esoteric paths of enlightenment.

ASEM 2661 The French Revolution (4 Credits)
This course is an interdisciplinary exploration of the French Revolution. Students learn about the many ways in which the Revolutionary decade of 1789 to 1799 marked a significant break with the French past - politically, socially and culturally. Yet these profound changes could not occur without some continuities. Students reflect upon political, sociological and philosophical questions that make the Revolution relevant today: How do democratic values take root in a traditionally monarchical society? Can these values be exported to societies without democratic traditions? Are liberty and equality compatible? How are nations defined? Can people thrive in a strictly secular--or fundamentalist--society? What is the role of violence and war in effecting political and social change?.

ASEM 2662 Testimony, Memory and Allegory: the Representations of the Chinese Cultural Revolution (4 Credits)
This course investigates how the Cultural Revolution serves as a critical link of the Revolutionary Era (1919-1980) and Reform Era (from 1980 on), via closely and critically examining various representations and surreal fiction, melodramatic and avant-garde cinema, lyric poems, music and visual arts. Although much of the material discussed is socio-politically oriented, the focus of the course is within the realm of literary and cultural criticism. This course explores complicated and often interwoven relationships between testimony, memory, signs, meanings of both writing and reading about traumatic events of the Cultural Revolution, ethical (personal and communal) commitment to memory and the engrossing historical, literary and artistic representations of the past expressed in different media. By doing so, the course reveals how each representative account copes with its producer's distinctive memories of the Cultural Revolution and, more importantly, responds to the cultural and political contingencies of the producer's time, as well as the artistic conventions of the producer. As such, it functions not only as a connection to the past but also a reconfiguration of the present.

ASEM 2664 Contemporary Issues in Africa (4 Credits)
Through the study of a variety of literary, visual, and oral cultural artifacts, this course will investigate contemporary issues of gender identity, education, development, and political culture in different areas of the African continent.

ASEM 2665 Occupied France in Perspective (4 Credits)
This course deals with the Occupation of France during World War II. Students, throughout the course, learn to understand, describe and articulate selected crucial aspects of this four-year period of military occupation. This course examines the question of the image of the Resistance and Occupation in cultural memory; this is a much studied and debated issue today, and forms the conclusion to the course. Forms of collaboration and resistance are very much in question in historical, cultural and literary debates today.

ASEM 2667 Magic and Religion (4 Credits)
The course examines, first, magic and witchcraft described in the Hellenistic world, India, and Medieval Europe and, second, magic and witchcraft in twentieth-century settings in the Upper Nile and rural France. The course also includes a study of twentieth and twenty-first century esotericism and occultism. Magic practices include pragmatic rites that cause effects ranging from love to murder, astrology-based medicine, conjuring and transacting with invisible creatures, creating power-bestowing diagrams, consecration of amulets, deploying and removing curses and disease, and weather control. Witchcraft includes sorcery and counter-sorcery rites, divination, and folk medicines. Magic is usually described as opposing religion, but the religious lives of most religious people contain magic practices; therefore, studying magic is a tool for studying cultures in both theory and practice. Research projects engage a magic practice to garner insights into the culture or cultures that circulate such lore.
ASEM 2670 Development in Latin America (4 Credits)
This is a writing-intensive course centered on examining in a critical manner the continued efforts made by several countries in Latin America throughout the 20th century in promoting different projects of national economic and political development. Among other topics, we analyze the incorporation of Latin American countries into the international economy and the consolidation of its local oligarchic regimes (circa 1880s to 1930s); the importance of populism and elite pacts (of the 1940s and 1950s) for the promotion of industrial programs; the process of radicalization of the left, the democratic breakdowns and the ensuing military rule (of the mid-1960s and 1970s); the transitions to democratic rule (1980s); the implementation of market-reforms (1990s); and the current challenges for democratic consolidation.

ASEM 2672 The Berlin Republic: Germany since 1990 (4 Credits)
For roughly two decades, Germany, a once divided nation in the heart of Europe held responsible for World Wars, has been re-united. Forty years of division between West- and East-Germany—a division exacerbated by their respective geopolitical roles in the Cold War—left its mark on what many intellectuals considered a 'cultural nation' in spite of their political separation. This class examines the gains and gains of twenty years of unity, a process that has repeatedly been described as an attempt to "normalize" Germany's complicated history. We analyze various political, historical, but mostly cultural developments (and debates) that have accomplished and, at times, questioned this unification.

ASEM 2677 The Sixties: Swinging London (4 Credits)
Most of us are familiar with the main images of the 1960s in Britain, miniskirts, Mods, scooters, hippies, free love, the Beatles, the Rolling Stones, and James Bond. Considered the great decade of change, students' parents and other baby-boomers look back on it with nostalgia and the media continues to romanticize the period as being more innocent than today. Yet scholars continue to argue about the degree to which the Sixties really changed British society. While popular culture was clearly departing from that of the pre and immediately post-war era, many scholars from various disciplines assert that these changes, including the rise of the music industry, the teenager and youth culture, consumer-oriented society, spy literature, gender and racial issues found their roots in the post-war experience. Other scholars assert that the decade was dominated by contradictory impulses and that the major changes were uneven and often on the surface. This course traces the major themes of the period, including the rise of popular youth-based consumer culture, an unfettered media in Fleet Street, the center of world fashion-Carnaby Street, espionage literature on the page and on the screen, race and immigration issues, challenges to gender norms and sexual 'liberation', Britain's changing position in the world, the end of the British Empire, and the redefining of British national identity. These themes are investigated using a variety of sources including popular and documentary films, personal memoirs, novels, primary documents, secondary literature, fashion, poster art and other non-traditional sources.

ASEM 2679 Thinking, Eating, and Writing: Food History (4 Credits)
Nearly everything related to food and drink has a fascinating history: origins of dishes, food habits, customs, traditions, manners and modes of consuming food. This course integrates academic and some popular histories of food with student-created histories based on research, experience, and observation. Students read widely to understand the production of knowledge in food history and its vast scope, from a range of approaches, including theoretical, geographical and topical. Students engage in exercises to strengthen skills as historians and produce original archival research.

ASEM 2680 Jewish Literature of Latin America: Tradition and Innovation (4 Credits)
This course examines Jewish presence in Latin America from colonial times to the present, focusing on Jewish writers in Spanish America throughout the 20th century and considering Jewish-Brazilian and Jewish-Latino writers, Jewish themes in non-Jewish Latin American literature, and the various waves of Jewish immigration to Latin America. This course considers how they helped shape their specific communities and their responses to assimilation, state-sponsored anti-Semitism and Aliyah. Topics to be discussed include assimilation vs. integration; the construction of Jewish and national identities; and anti-Semitism in literature, film and political discourse. The course integrates critical readings alongside the literature, specifically in the areas of trauma and representation. No knowledge of Spanish is required, as the language of instruction is English and all required texts are available in English translation.

ASEM 2682 Strange Beasts: Nuclear Japan (4 Credits)
This course is a critical examination of literary and popular culture from Japan's experience of the Atomic bomb, through the "economic miracle" years of the 1960s to the present, focusing on the paired themes of humanity and monstrosity in nuclear experience during the acceleration of technological change.

ASEM 2683 Bad Girls, Riot Grrrls and Misbehaving Women (4 Credits)
This course introduces women who subvert mainstream expectations of femininity and explore misbehaving as a means of self-definition and empowerment in popular culture. From "Bad Girl" artists and the Riot Grrrl movement in the 1990s, to current day roller derby skaters and burlesque queens, the course traces the intersections of feminist art, DIY (do-it-yourself) approaches, creative production, performative outlets and socio-political consciousness. Unladylike behavior is explored as a strategy to articulate personal, social, political and cultural identity.

ASEM 2685 Religion and Filmmaking (4 Credits)
This course examines film and television representations of religions from around the world in an effort to understand the goals of the media makers and the effects of their productions. The techniques, theory and rhetoric of the films viewed are dissected and discussed. The course enables students to participate in critical, yet respectful debates about the cinematic mediation of religious concepts.

ASEM 2688 Music and Consciousness (4 Credits)
This course explores ways of framing and defining individual and collective responses to musical arts, and, in turn, how understanding these responses can lead to a broader view of human consciousness. Through studying different musical cultures (and subcultures), students critically examine their own musical preferences and respond to other's aesthetic positions. Students explore 20th-century musical writings and compositions; examine themes of development, change, unity and variety in different musical genres; entertain musical manifestos written by various composers and musicians; and write their own "musical constitution."
ASEM 2692 Philosophy of Migration and Global Citizenship (4 Credits)
The 21st century is already being described by many as “The Age of Migration.” This course explores the implications of mass global migration for the political philosophies of citizenship on which sovereign states are founded. Is something like a global citizenship possible? This seminar offers a cross-disciplinary perspective on this and other related issues. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2693 The Unfathomable Russian Soul: Identity and Self-Perception in 19th Century Literature and Culture (4 Credits)
This course explores Russian identity and the idea that it resides in the "unfathomable Russian soul" that defies rational explanation. Students examine how classic Russian authors (Pushkin, Gogol, Turgenev) imagined and shaped "Russian soul" in their dialogues with Western European cultures and Russia’s native traditions (folklore, Orthodox Christianity). Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2694 The Golden Age of Musicals (4 Credits)
This course maps and analyzes the developments, constructs, creators and canonical works of the musical theatre genre up to and through its formative, formidable period known as the “Golden Age” (c. 1943-1964) as well as the genre’s wider social/cultural implications and contemporary relevance. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2695 Religion and Politics in China (4 Credits)
This course explores the concept of "religion" in the political history of modern China. Students gain new insight into two concurrent and divergent historical processes—state-driven secularization and religious revival—in China and Taiwan. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2698 Justice, Legal Obligation and Judicial Decision Making (4 Credits)
This course provides students with an introduction to the major theories of judicial decision-making and the basic philosophical problems involved in understanding the concept of how law binds citizens, especially judges, in a liberal democracy. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2715 Belonging in America (4 Credits)
Who belongs in America? Who is on the inside/outside, and why? How do we define, experience, maintain, reject, and embrace our own insider/outsider status? Finally, how do American novels and dramas conceptualize and dramatize the many negotiations involved in belonging? This course explores the social, cultural, and experiential aspects of belonging in America. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2716 Tango: Border Crossings in Art, Race, Gender, and Politics (4 Credits)
This course is a study of the appeal of Argentine tango and why a dance so closely linked to one culture appeals so intensely to people with such different cultural identities. We consider competing answers from academics in many fields – from gender, film, and rhetorical studies to art, politics, and dance – as well as testimonies of dancers and teachers, in Buenos Aires and from around the world. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2720 Nazi Germany: History, Literature, Culture (4 Credits)
This course explores Germany’s Nazi era. It focuses on themes like redemption, temptation, national community, conflict and memory while analyzing both texts and visuals from and related to the period. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2722 Contemporary Art in Context (4 Credits)
This course examines key trends that have shaped contemporary art and considers how artists have turned to traditional media such as painting and photography and created new forms of art through performance, social media, and digital technologies to produce aesthetic and physical experiences that reflect on contemporary life. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2727 Seduction and Satire in British Women’s Novels of the 18th Century (4 Credits)
This course explores how fiction by 18th century British women relates to larger themes of gender (and genre) construction. What is the gender of the novel in the eighteenth century? Why do these female authors make sustained use of the seduction narrative, and how do they work to combine it with more traditionally “masculine” forms such as satire? Are they conforming to or subverting received notions of femininity with such use?

ASEM 2730 Queer Lives in Musical Theatre (4 Credits)
Musicals are one of the most popular forms of American theatre, commonly considered family friendly and mainstream. However, since its beginning musical theatre has also been strongly connected to queer culture. Through watching and listening to musicals as well as studying queer theory, students identify and analyze depictions of queer life throughout musical theatre history.

ASEM 2734 Music and Spirituality (4 Credits)
At a time when "spiritual" music appears in a wide variety of contexts such as churches, yoga studios, raves, and radio broadcasts, "Music and Spirituality" explores individual and collective perspectives on music and transcendence, and teaches how a deeper understanding of those perspectives can lead to a broader view of meaning in human experience.

ASEM 2736 Spirituals and the Blues (4 Credits)
This course examines spirituals and the blues, two song forms from the canon of African American music. A multifaceted approach (both historical and analytical) reveals the ways in which the music is transformative, healing, and liberating, as well as providing a vehicle for agency. The course also studies the music’s larger sociopolitical landscape.
ASEM 2739 Can College Teach Reasoning? (4 Credits)
In the last several years, colleges and universities have made national news with a series of controversies over diversity, inclusivity, and free speech. Many commentators see free speech at odds with diversity and inclusivity. Those who stress the importance of free speech on campus often embrace an idea with a long philosophical history: the “thinking cure.” According to this line of thinking, a principal task of education—particularly higher education—is to teach critical thinking. A well-functioning university (not to mention a well-functioning democracy) is a marketplace of ideas where participants are free to rationally debate the issues of the day. The best ideas will eventually win out. People need the skills to debate rationally, which education should provide, and the freedom to deploy those skills in arguing for their versions of the true and the good, which educational institutions and the courts should protect. This course aims to understand and critically analyze this line of thinking through the lens of philosophy, empirical psychology, and contemporary journalism. Can we really be trained to reason in the way that this line of thinking requires? The course considers arguments that emphasize the limitations on our ability to reason, arguments that we are frequently subject to (sometimes insuperable) biases. We examine how these arguments bear on the aims of education generally, and on free speech provisions in particular.

ASEM 2741 Music in Science Fiction Film (4 Credits)
This course examines music and sound design in science fiction film 1895–2015, exploring key concepts and practices in music, and placing films studied in social and political context, as well as the aesthetic and technological trajectory of the genre. The course addresses recurring themes in science fiction, as well as the impact of new sound technology, non-traditional orchestration, and sound effects on the development of the film genre. The course presumes no prior specialized knowledge of music or film.

ASEM 2745 American Jews, Zionism, and Israel (4 Credits)
It is often taken as a given, by both Jewish and non-Jewish Americans, that American Jews have always supported Zionism and, since its creation in May 1948, supported the state of Israel’s actions. However, the historical relationship between American Jews, Zionism, and the state of Israel has been complex and multifaceted. This course examines and analyzes this historical relationship from multiple perspectives, beginning approximately fifty years before the creation of the state of Israel, while also paying attention to recent shifts in the ways in which contemporary American Jews relate to and view the state of Israel.

ASEM 2746 Music and Disaster (4 Credits)
This course examines the role of music within the context of disaster. Understood to be catalysts for artistic expression, disasters produce musical expressions related to trauma in myriad forms. Following an historical overview of large-scale natural and man-made disasters and the kinds of music produced in relation to them, we examine how disaster figures into the production and consumption of music in Haiti, New Orleans, Indonesia, South Africa, Cambodia, Uganda, and in the Post-9/11 world. The course additionally examines music as a tool in social justice, considering how music provides social commentary, critique, and a form of social activism. Students understand how music and disaster are historically intertwined, and how music shapes understandings of conflict and catastrophe. No previous musical experience is required.

Air Force Aerospace Studies
University of Denver students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program through an agreement with the University of Colorado at Boulder. Air Force ROTC programs lead to a commission in the U.S. Air Force upon receipt of the bachelor’s degree.

Standard Four-Year Course
This program is offered in three parts: the general military courses for lower-division (freshman and sophomore) students; the professional officer courses for upper-division students; and Leadership Laboratory (attended by all students). Completion of a two-week summer training program is required prior to entry into the professional officer courses.

ROTC Course Credit
DU students may apply up to 16 credits as electives for ROTC classes. In some cases, ROTC credit may be applied to program requirements with the approval of the specific program. Students register for AFROTC courses through regular DU registration, though they are taught on the CU-Boulder campus and follow the CU semester calendar.

Additional Information
For further information, visit www.afrotc.com (http://bulletin.du.eduHTTP://www.afrotc.com) or the AFROTC Detachment 105 website at http://afrotc.colorado.edu.

Courses
RTC2 1010 Heritage and Values I (1.5 Credit)
This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. Classes meet on CU-Boulder campus on the semester calendar.
The department provides the Thomas A. Bogard Scholarship for a senior majoring in anthropology. Students interested in careers in archaeology, cultural anthropology or museum anthropology can find courses designed to meet their needs. The department also has computer-catalogued collections, working relationships with Denver-area museums and archaeological field opportunities. The department has an archaeology lab, ethnology lab and a museum housing collections of archaeological and ethnographic materials. Anthropology is the study of the origin, history and nature of people and cultures. It explains the relationships among biology, culture and the environments in which people live. Anthropology addresses modern problems, such as the integration of cultural and ethnic diversity, the conduct of international relations, human rights and the management of environmental and cultural resources.

The faculty members of the Department of Anthropology are experts in analyzing human differences in the context of the material (political and economic) conditions of life. They are concerned with the interaction of gender, race, ethnicity, class and other variables in human affairs, and with the consequences of these relationships for social change and development. Drawing on the resources of the Museum of Anthropology, they are concerned with how the material world expresses and sustains human relationships and ways of thinking. The department has an archaeology lab, ethnology lab and a museum housing collections of archaeological and ethnographic materials. The department also has computer-catalogued collections, working relationships with Denver-area museums and archaeological field opportunities. Students interested in careers in archaeology, cultural anthropology or museum anthropology can find courses designed to meet their needs. The department provides the Thomas A. Bogard Scholarship for a senior majoring in anthropology.

SECONDARY MAJOR

44 credits. Same requirements as for BA degree.

Minor Requirements

20 credits of anthropology.

Requirements for Distinction in the Major in Anthropology

• Completion of an honors thesis

BA in Anthropology

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 48
This course is an introduction to cultural anthropology. As one of anthropology's main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically. Students will also work on an ethnographic project, derived from the service-learning component that consists on volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

ANTH 2020 Artifacts, Texts, Meaning (4 Credits)
How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

Courses

ANTH 1006 Paranormal Archaeology (4 Credits)
This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance--Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena--in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 1010 Anthropology: Humankind in Context (4 Credits)
This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species' place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 1910 Ancient Worlds (4 Credits)
This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history: the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 1992 Directed Study (1-10 Credits)

ANTH 2000 Pioneers of Anthropology (4 Credits)
Explores the development of anthropology as a field of study, including important thinkers, ideas and relationships between the discipline and its wider intellectual and societal context.

ANTH 2010 Cultural Anthropology (4 Credits)
This course is an introduction to cultural anthropology. As one of anthropology's main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically. Students will also work on an ethnographic project, derived from the service-learning component that consists on volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

ANTH 2020 Artifacts, Texts, Meaning (4 Credits)
How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ANTH 2040 Historical Archaeology (4 Credits)
Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus but also address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 4040. Prerequisite: ANTH 2310 or permission of instructor.

ANTH 2060 Human Migration (4 Credits)
This course on transnational migration introduces students to the important theoretical discussions of why and how people migrate and maintain transnational lives. The course examines how migrants change, and in turn bring social, economic and cultural changes to their new destinations as well as to the places that they left behind. Research on transnational migration examines the flows of people, ideas, behaviors, and goods that tie together migrants’ communities of origin and destination, and the subsequent creation of new cultures and identities. While the process of transnational migration is not new, the scale of current transnational migration patterns makes today’s migration streams different from earlier ones. The lives of migrants today span multiple countries as they maintain social and economic networks across national borders. The ethnographic studies assigned give students an understanding of the changing gender roles and expectations of migrants; the transnational practices migrants carry out to maintain ties to their counties of origin; the maintenance of households in which members are dispersed across borders; and the collective involvement of migrants in the political process and economic development of their countries of origin. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2061 Gender, Change, Globalization (4 Credits)
Gender, Change and Globalization introduces students to anthropological approaches to the study of gender and globalization with a focus on social and cultural change. Globalization involves interconnected linkages and flows of commodities, and people and media that are dictated by market demands, facilitated by advanced technologies and regulated by state policies. Difference groups of individuals are located in varying positions within global flows that reflect larger power structures. While globalization brings about uniformity, it also produces differences as people respond to and oppose changes to local cultural practices and economic conditions. The reach of global processes has social and cultural implications for locally established gender ideologies, norms and division of labor. The course presents a survey of cross-cultural variations in gender identities and practices and analyzes how men and women are affected differently by the economic and cultural changes brought about by globalization, such as international development policies, migration and media productions. Contemporary social issues are discussed to explore these transformations and the effects they have on people’s everyday lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2105 Human Nature (4 Credits)
Human biological variation in time and space; investigation of the environmental and cultural impacts on the human organism that have led to the present diversity of the species. A scientific, evolutionary approach to human nature. Required for all anthropology majors.

ANTH 2200 Native North America (4 Credits)
This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. Emphasis is placed on the period following the creation of the United States and Canada and especially on the latter half of the 20th Century, in which Indians mounted increasingly vocal efforts to retake control of their lives and destinies. These efforts will be seen in the light of colonial history, forced acculturation, struggles over resource ownership and management, internal colonialism, and the challenges of Indians’ multiple citizenship of the United States and in one or more domestic dependent sovereign nations. Topics include social change; ecological exploitation; Indians in popular culture; gender issues; the power of ritual; struggles for sovereignty and protection of indigenous homelands; identity, assimilation and ethnic conflict.

ANTH 2310 Fundamentals of Archaeology (4 Credits)
This course focuses on the practice of archaeology—why and how archaeologists recover and analyze their data. By the end of this course, students have an understanding not only of the nature of the archaeological record, but also how models of the past are built and interact with general public knowledge.

ANTH 2323 Global Health (4 Credits)
This course is an introduction to global health. As one of the world’s faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.
ANTH 2400 Social Change in Latin America (4 Credits)
Modern Latin America as part of the contemporary Third World, focusing on the social anthropology of peasant and urban peoples, and how economic development and dependency affect them; emphasis on Mexico, Brazil and the Andean nations.

ANTH 2420 Science, Technology and Human Values (4 Credits)
This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2600 Museums and Public Culture (4 Credits)
A critical introduction to how cultures and peoples are presented in museums, festivals, tourism venues and the popular media. The course introduces students to the historical and contemporary role of museums and anthropology in public culture and the importance of both in civic life.

ANTH 2992 Directed Study (1-10 Credits)

ANTH 3000 Anthropology of Tourism (4 Credits)
Considers the interaction of host and visitor cultures in foreign tourism. Explores the effects of tourism on the host culture and the expectations of the visitors. Discusses tourism's relationship to development and the various levels of needs of the tourists.

ANTH 3001 Race, Sex and Evolution (4 Credits)
The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

ANTH 3020 Native Religions (4 Credits)
A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channelling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

ANTH 3030 Digital Anthropology (4 Credits)
Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

ANTH 3040 Anthropologies of Place (4 Credits)
This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropological of a place. Must be junior standing or above.

ANTH 3060 Cultural Narratives (4 Credits)
Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non- anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

ANTH 3070 Folklore and Cultural Heritage (4 Credits)
Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Prerequisite: introductory social science course. Cross-listed with ANTH 4070.
ANTH 3080 Memory and Memorialization (4 Credits)
The course focuses on how social groups represent, experience, and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past and its materialization through monuments, ruins, and landscapes are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as "authenticity," "tradition," and "modernity" in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)
This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

ANTH 3110 The Cultured Ape (4 Credits)
This course is an examination of human evolutionary psychology. Evolutionary Psychology deals with how contemporary human behavior is constrained by our heritage as evolved primates. It questions the standard social science and mainstream anthropological model of humans as "blank slates" who are primarily shaped by their social and cultural environments. In other words, Evolutionary Psychology views humans as "cultured apes.

ANTH 3130 The Archaeology of Gender (4 Credits)
This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)
Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

ANTH 3155 Native American Resistance in the Digital Age (4 Credits)
Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

ANTH 3170 Applied Heritage Management (4 Credits)
Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

ANTH 3200 Human Origins and Evolution (4 Credits)
Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

ANTH 3225 Human Rights in Latin America (4 Credits)
This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

ANTH 3255 Ancient North America (4 Credits)
This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.
ANTH 3290 Art and Anthropology (4 Credits)
Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

ANTH 3310 Indigenous Environment (4 Credits)
The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples’ cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

ANTH 3320 Medical Anthropology (4 Credits)
This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

ANTH 3330 Human Rights of Indg Peoples (4 Credits)
This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

ANTH 3350 Latin American Archaeology (4 Credits)
Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

ANTH 3360 Cross-Cultural Perspective: Women (4 Credits)
Confronts question about women's lives and women's status in a global perspective. It addresses issues such as why women have been subordinate to men in so many cultures, how one actually measures dominance and subordination, and whether there is some biological basis for gender inequality. Broad theoretical questions on the status of women are discussed and form the basis for the analytical inquiry which follows. Cross-listed with ANTH 4360.

ANTH 3370 Sex, Class and Race in Latin America (4 Credits)
This course uses an intersectional approach to the study of sex, class and race in Latin America. Intersectionality aims at understanding the interlocking relation between sex, class, race and other aspects, and how these are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. In this course we will aim at understanding such history, culture and peoples with a special emphasis on examining their heterogeneity, and aiming at understanding how such heterogeneity is also related with social inequality. We will also examine some contemporary issues such as women's rights, indigenous movements, human rights, migrations, and economy with an emphasis on their manifestations at the intersections of sex, class, and race.

ANTH 3380 Women and Development (4 Credits)
A case study approach to understanding women's status and the problems of combining productive and reproductive responsibilities in developing countries. Cross-listed with ANTH 4380, INTS 3390.

ANTH 3390 Geoarchaeology (4 Credits)
Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

ANTH 3430 Visions, Utopias and Messiahs (4 Credits)
Ghost dance, peyote religion, cargo cults, peasant revolution, charismatic leaders, messianic movements in cross-cultural perspectives; roles played by cultural systems, historical circumstances and social conditions in generating social movements.

ANTH 3460 Peasant Culture and Society (4 Credits)
The problems, evolution, and variable organization of peasant society cross-culturally. Emphasis on causes of persistence and change in economic, social and ideological aspects of peasantry.

ANTH 3470 Applied Anthropology (4 Credits)
The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

ANTH 3485 Anthropology and Underdevelopment (4 Credits)
Anthropological approach to some of the developing world's most pressing social problems and how anthropologists can make a relevant contribution in confronting, studying and changing the nature of underdevelopment.

ANTH 3500 Culture and The City (4 Credits)
Examines the past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of cities in antiquity and ends with contemporary urban landscapes. Analysis is sensitive to both the technologies and aesthetics of urban form. Emphasis is on the possibilities for urban redesign to meet the problems of 21st century city life.
ANTH 3510 The Ancient City (4 Credits)
The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

ANTH 3540 The Nature of Language (4 Credits)
Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

ANTH 3550 Africa: Peoples and Cultures (4 Credits)
Survey course in the anthropology of Africa designed to explore the diversity of African people and cultures. The course examines issues of contemporary life in the continent as well as the way it has been portrayed by the media, anthropologists, historians, and writers. Topics such as geography, history, society, politics, religion, ethnicities, and material culture of different regions are central to the discussion.

ANTH 3560 Anthropological Theory and Context (4 Credits)
Examination of an understanding of human history and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology.

ANTH 3570 Language and Society (4 Credits)
Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

ANTH 3600 Ethnoarchaeology (4 Credits)
Ethnoarchaeology has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

ANTH 3620 Ethnoarchaeology (4 Credits)
Examination of an understanding of human history and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology.

ANTH 3630 Archaeological Method and Theory (4 Credits)
This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

ANTH 3640 Race and Human Evolution (4 Credits)
Examos the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

ANTH 3650 Dynamics of Culture Change (4 Credits)
Considers culture change and the agents of change. Focuses on changes in indigenous cultures around the world resulting from colonialism 1850-1950, forced acculturation, the tension between worldwide economic development and human rights, and the changing nature of the post-colonial world.

ANTH 3660 Anthropological Theory and Context (4 Credits)
Examination of an understanding of human history and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology.

ANTH 3661 Museums and their Visitors (4 Credits)
This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors' experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences? Cross listed with ARTH 3661.

ANTH 3670 Quantitative Methods-Anthropology (4 Credits)
The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

ANTH 3701 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

ANTH 3702 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

ANTH 3703 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.
ANTH 3741 Introduction to Conservation (4 Credits)
Introduction to physical properties of materials found in museum artifacts and specimens. Discusses preventative conservation principles and methods.

ANTH 3742 Museum Exhibit Development (4 Credits)
Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

ANTH 3743 Managing Collections (4 Credits)
Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

ANTH 3750 Ethnographic Methods (4 Credits)
In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association’s Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

ANTH 3790 Field Methods in Archaeology (4 Credits)
The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field. Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)
This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and event natural environment that was used and marked by human action.

ANTH 3800 Capstone Seminar Anthropology (4 Credits)
This seminar brings anthropology to bear on a topic of special significance. It assesses grasp of the key concepts, theories and insights of anthropology, and critically reflects on the nature and history of the discipline. Prerequisite: Senior standing.

ANTH 3875 Research Methods in Anthropology (4 Credits)
This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

ANTH 3880 Culture, Ecology, Adaptation (4 Credits)
This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

ANTH 3890 Context of Material Culture (4 Credits)
Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnoLOGY, archaeology, folklore, geography, history, art and architecture.

ANTH 3890 Internship (1-8 Credits)

ANTH 3891 Museum Internship (1-6 Credits)

ANTH 3990 Summer Field School-Archaeology (4-6 Credits)
Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.
Army Reserve Officers’ Training Corps

University of Denver students may participate in the Army Reserve Officers’ Training Corps (AROTC) program through an agreement with the University of Colorado Boulder. Army ROTC programs lead to a commission in the Active Army, National Guard or Army Reserve. Classes may be taken at the University of Colorado Boulder, Colorado School of Mines in Golden or the Metropolitan State University of Denver on the Auraria campus in downtown Denver.

Four-Year Program

The standard four-year program consists of two phases. The basic course, normally completed during the freshman and sophomore years, consists of courses in military science, officer career development, leadership theory and management. The advanced course coincides with the junior and senior years. Subject areas include leadership techniques, methods of instruction, tactics and unit operations, military law, history, national strategy and Army policies. Completion of a four-week Advanced Camp in the summer is required prior to commissioning, with attendance at this camp normally between the junior and senior years. Students should check with the military science department at the University of Colorado Boulder about the required courses.

Two-Year Program

The abbreviated two-year program consists of the same courses offered in the advanced course; however, both undergraduate and graduate students may become qualified for this program through successful completion of a four-week summer basic camp. Students should contact a professor of military science at the University of Colorado Boulder for specific requirements and options available based on each student’s status at the time of program entry. Students who are veterans of military service or who have participated in Junior ROTC or similar organizations may have a portion or all the basic requirements waived by a professor of military science at the University of Colorado Boulder.

Scholarships

Students enrolled full time may compete for three-year and two-year scholarships. The scholarship also pays a book allowance of $1,200 per year and a monthly tax-free stipend ranging from $300 to $500.

Guaranteed Reserve Forces Duty (GRFD) and Dedicated Army National Guard (ARNG) Scholarships

The GRFD and Dedicated ARNG scholarships are two- and three-year scholarships available for members of the Army Reserve (AR) and Army National Guard (ARNG) who desire to commission in the Reserve Forces. Applicants must join or be members of the AR or ARNG and participate in the Simultaneous Membership Program (SMP) as a cadet. Scholarships are awarded on a competitive basis. Students apply for this scholarship during the spring semester of their freshman or sophomore year. Contact the Army ROTC enrollment officer at 303-492-3549 for more information.

ROTC Course Credit

Students register for AROTC classes listed as RTC1 courses through regular DU registration, though they are taught on other campuses in the Denver metro area and follow the semester calendar.

Additional Information

Interested students may contact the professor of military science, University of Colorado Boulder, 303-492-6495. For further information, visit the Army ROTC web page at www.goarmy.com/rotc/ (http://www.goarmy.com/rotc), or the Army ROTC Golden Buffalo Battalion Web page at www.colorado.edu/aroct/ (http://www.colorado.edu/AROTC), or email armyrotc@colorado.edu.

Courses

RTC1 1011 Adventures in Leadership 1 (1-3 Credits)
Introduces fundamentals of leadership and the United States Army. Examines its organization, customs and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing, techniques and some basic military tactics.

RTC1 1021 Adventures in Leadership 2 (0-3 Credits)
Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.
RTC 2031 Methods of Leadership and Management 1 (1-4.5 Credits)
Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadre organization.

RTC 2041 Methods of Leadership and Management 2 (0-4.5 Credits)
Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

RTC 3052 Military Operations and Training 1 (0-4.5 Credits)
Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Instructor permission required.

RTC 3062 Military Operations and Training 2 (0-4.5 Credits)
Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Instructor permission required.

RTC 3072 Adaptive Leadership (0-4.5 Credits)
This course focuses on developing leaders of character that will excel in a complex, ambiguous and dynamic future operating environment. While centered on leadership within the military, and designed to ensure future second lieutenants are prepared for their professional responsibilities, the course develops universal leadership attributes. We will discuss personal growth, effective communication, critical thinking, problem solving, and ethical leadership. The objectives of the course are to understand basic leadership principles – to include knowledge of one’s self as well as techniques to effectively influence others, improve communication – both written and oral, enhance the ability to analyze issues, articulate a problem, extrapolate pertinent information, make valid assumptions to overcome knowledge gaps, identify potential solutions and develop a way forward, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

RTC 3082 Leadership in a Complex World (0-4.5 Credits)
Continues RTC 3072 study by focusing on developing leaders of character that will excel in a complex, ambiguous, and dynamic future operating environment. The course will center on Students’ understanding of their environment. The objectives of the course are to understand organizational leadership principles – to include leading diverse teams, leading change, and creating a vision, improve communication – both written and oral, enhance one’s understanding of the contemporary operating environment, gain an appreciation for other actors in the national security arena; appreciate cultures of other military services as well as civilian organizations and agencies, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

Art and Art History

Office: Shwayder Art Building, Room 132
Mail Code: 2121 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2846
Email: saah-interest@du.edu (jason.kellermeyer@du.edu)
Web Site: http://www.du.edu/art

The School of Art and Art History (SAAH) teaches the technical processes of art, methods of analyzing and criticizing visual culture and the diverse histories of art. We educate students to think critically and conceptually, to express themselves creatively, to articulate their ideas clearly and to make significant contributions to the society in which they live. Our faculty promote these qualities through their creative activity, scholarship and public service.

The School of Art and Art History grants the following degrees:

- Bachelor of arts (BA) and bachelor of fine arts (BFA) degrees in studio art. Both studio degrees include exposure to ceramics, drawing, painting, photography, printmaking and sculpture.
- Bachelor of fine arts degree in pre-art conservation.
- Bachelor of arts and master of arts (MA) degrees in art history (with an option of a museum studies concentration at the graduate level).
- There are two 4+1 options to allow motivated students to complete both an undergraduate and graduate degree in five years. In art history, a BA and MA in art history/museum studies is available. In studio studies, a BA or a BFA in studio art/MA in curriculum and instruction with certification to teach K–12 art is offered in partnership with the Morgridge College of Education.

Students seeking to transfer to the University of Denver with admission to SAAH are encouraged to contact the School with questions about degree programs and transfer credit options prior to applying. If admitted to the University and SAAH, all students enter as a BA in either art history or studio,
depending on their interest. Students interested in pursuing a BFA in studio art or pre-art conservation apply under the guidance of a faculty member once enrolled in SAAH. Upon admission to SAAH for the fall quarter, students will be provided with instructions on how to submit a portfolio for merit-based scholarship consideration. Flexible options to minor in SAAH are also available.

**Bachelor of Arts Major Requirements**
(183 credits required for the degree (p. 76))

60 credits of art, including the following:

<table>

A modern or contemporary art history course

An upper-division art history course

**Art electives**

32 credits of studio art courses of which two need to be at the 3000 level.

**Total Credits**

60

BA students may combine majors or minors within the School of Art and Art History, but no reduction in total credits will be allowed.

1 May be fulfilled with another world art course.

**Secondary Major**

60 credits. Same requirements as for BA degree.

**Minor Requirements**

The Studio Art Minor offers students the opportunity to focus on Studio Art courses specifically. Six courses are required for the minor, consisting of

- ARTS 1250 Drawing
- ARTS 1100 2D Approaches or ARTS 1200 3D Approaches
- four elective ARTS courses, at least two of which are upper division (2XXX or above)
- one Art History course may be substituted for an upper division Studio Art course if desired.

One of the 1000-level Common Curriculum classes can be applied to either the major or minor. BA students may combine majors or minors within the School of Art & Art History, but no reduction in total credits will be allowed.

**Art History**

**Bachelor of Arts Major Requirements**
(183 credits required for the degree (p. 76))

60 credits, including the following:

</tr>
</tbody>
</table>

Five Art History Elective Courses: 20

No more than one course may be 1000-level

At least one course must be 3000-level

One ARTS course may be used towards the elective

Total Credits 24

**Additional Information:**

- AP credit is apportioned according to University guidelines. Any impact on the world art course requirement will be determined by the undergraduate art history advisor, Scott Montgomery.

**Pre-Art Conservation**

If admitted to the University and the School of Art & Art History (SAAH), all students will be entered into the BA program in their area of interest. Students interested in pursuing a BFA in Studio Art apply under the guidance of a faculty member once enrolled in SAAH. Contact the School of Art and Art History (p. 123) for details.

**Bachelor of Fine Arts Major Requirements**

(189-192 credits required for the degree (p. 77))

Minimum of 116 credits of art. In addition to major coursework, 24 credits of chemistry, including the organic chemistry sequence (CHEM 2451, CHEM 2461, CHEM 2452, CHEM 2462, CHEM 2453, CHEM 2463) and 24 credits of language are required.

Art coursework includes the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

**Requirements for Distinction in the Major in Art**

- Minimum of 3.3 major GPA
- Minimum 3.5 cumulative GPA
• Completion of three classes studio art classes beyond the introductory level
• Completion of a special project with distinction

Requirements for Distinction in the Major in Art History

• Minimum of 3.3 major GPA
• Minimum 3.5 cumulative GPA
• Completion of three 3000-level art history courses with A- or higher
• Completion of a senior paper with distinction

Requirements for Distinction in the Major in Pre-Art Conservation

• Minimum of 3.3 major GPA
• Minimum 3.5 cumulative GPA
• Completion of three classes studio art classes beyond the introductory level
• Completion of a special project with distinction and accompanying paper

Requirements for Distinction in the Major in Studio Art

• Minimum of 3.3 major GPA
• Minimum 3.5 cumulative GPA
• Completion of three classes studio art classes beyond the introductory level
• Completion of a special project with distinction and accompanying paper

BA in Art and Art History

The following course plan is a suggested first and second-year schedule. The School of Art & Art history (SAAH) strongly recommends completion of the Art Foundations requirements to best prepare them for 2000-level studio coursework.

Individual course plans will vary based on incoming transfer credit, prerequisites, availability of courses, minors, and other scheduling factors. We welcome all students, including first-years, to attend quarterly open advising at the SAAH Advising Day to meet faculty and staff for recommendations about studio courses!

SAAH encourages first-year students to begin taking art major requirements immediately! The Art Foundations program consists of ARTS 1100 2D Approaches, ARTS 1200 3D Approaches, ARTS 1250 Drawing, ARTS 1300 Concepts. Multiple sections of 2D, 3D, and Drawing are offered every quarter. 2D and 3D are prerequisites for Concepts.

¹ Students that plan to pursue the BFA might want to take another common curriculum course instead.

² INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
Art - Studio Courses

ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)
This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTS 1100 2-D Approaches (4 Credits)
Students are introduced to the elements of design, vocabulary of art and visual analysis. Explorations of the formal language of two-dimensional media include color, digital processes and mark making. Students also develop an understanding of compositional strategies, materials and processes. Verbal and written exercises supplement group activities and visual learning. Students explore across material boundaries. Increasing emphasis is placed on subjectivity, content and conceptual development. Lab fee. No prerequisites.

ARTS 1200 3-D Approaches (4 Credits)
Students are introduced to spatial thinking, the fundamentals of structure and construction, and the formal language of three dimensional forms. Applying a variety of materials, explorations include additive and subtractive methods, basic mold making, and an introduction to hand and power tools. Verbal and written exercises supplement the Studio environment and visual learning, and basic digital methods and color relationships are explored. Emphasis is placed on subjectivity, artistic choice and craft, alongside the beginnings of content and conceptual development. Lab fee. No prerequisites.

ARTS 1250 Drawing (4 Credits)
Fundamental drawing practice and history based on selected exercises, slide presentations, comprehensive group/individual critiques and workshops. Still-life and figure drawing are covered in this course. Projects focus on ways to comprehend and draw three-dimensional forms, with emphasis on conceptual issues and use of materials. This class is required of all majors in studio art prior to taking upper-level courses. It is also required of all EDP students.

ARTS 1300 Concepts (4 Credits)
Students integrate the skills and principles acquired from ARTS 1100 and ARTS 1200. Two topics are explored: 'Culture & Context' and 'Time, Space & Duration'. A greater complexity of studio activity is stressed through collaborative exercises and individual approaches to themes. Greater exploration of context and concept is expected, with emphasis on visual communication and personal awareness. Lab fee. Prerequisites: ARTS 1100 and ARTS 1200.

ARTS 1400 4D Approaches (4 Credits)
Students are introduced to the fundamental principles of four-dimensional art and design through a survey of concepts, techniques, and practices. Emphasis is placed on critical thinking, creative problem-solving, and experimentation through investigations of technological form and innovation, time and motion, and the ephemeral. Verbal and written exercises supplement group activities and visual learning. Lab fee. No prerequisites.

ARTS 1992 Directed Study (1-10 Credits)

ARTS 2000 Open Media Studio (4 Credits)
This course is a topic driven, interdisciplinary research studio. Students investigate the topic and their relationship to it in a variety of media, and supplement their inquiry with research that occurs outside the classroom. An exploration of different processes, materials, expression and connection with the larger world is emphasized. Lab fee. All students must complete ARTS 1300 first.

ARTS 2045 Intermediate Drawing (4 Credits)
This course covers a wide range of materials and ideas, both traditional and experimental. Emphasis is divided between technical and conceptual issues, building on the skills established in ARTS 1250 Drawing. Lab fee. Prerequisite: ARTS 1250 or permission of instructor.

ARTS 2055 Color (4 Credits)
Color is a studio-based course focused on developing a more sophisticated and practical understanding of how colors act on us and vice versa, physiologically, psychologically, emotionally and culturally. It is designed specifically to enhance the abilities of people who work with color, be they painters, web designers, video artists, art historians, art therapists or conservators. However, because of the intentionally basic level of art skills involved, this is a course that is also taken by non-art majors with success. It includes in-class color work that retrains students in their ability to "see" more color and to become confident in their ability to interpret and manipulate color for any specific need. In addition, there is required reading on the physics of color, and discussion of the historical influences and legacy of color in primarily Western culture. Lab fee. Majors should complete ARTS 1250 and ARTS 1300 first.

ARTS 2115 Introduction to Oil Painting (4 Credits)
Introduction to Oil Painting builds on the ideas and skills learned in Drawing. Working with oil paint, students explore the possibilities of creating the illusion of three-dimensional form and space on the flat surface of a canvas. Emphasis is on really looking to heighten one's visual awareness of the physical world and seeing the effects light has on form, color and space. Students work from objects, the human form (models), imagination and art history. Critical abilities will be developed as students learn to think, speak and write about art. Discussions and critiques explore the social, political and the expressible possibilities of art-making. Students are given individual work-space to focus and develop their paintings. Students complete paintings in and out of class; contemporary and historical artists' work is explored, and students visit an area museum or gallery. Lab fee.
ARTS 2125 Exploring Paint Materials: New Forms and Ancient Materials in Painting (4 Credits)
After painting from life and creating the illusion of reality in Intro to Oil Painting, students break away and experiment in this course with new forms of image-making using both modern and ancient paint materials. By learning how to make the ancient paint media of egg tempera and encaustic, students learn that the old can be made new again. In the beginning students examine new ways of generating abstract imagery and gradually return to recognizable imagery at the end. Students discover that the choice of materials and forms influences the way an idea is communicated. Reliance on chance and learning to trust one's instincts will be encouraged. Students get inspiration from a range of sources such as the natural environment, dreams and current cultural issues. Students also begin to discover where their work fits into the ever changing world of contemporary art through written and oral presentations, discussion, critiques and visits to area museums and galleries. Lab fee. Prerequisite: ARTS 2115 or permission of instructor.

ARTS 2215 Relief Printmaking (4 Credits)
Concentration on selected areas of relief printmaking and related contemporary attitudes. This course covers relief, ranging from linoleum and woodcut processes to experimental approaches. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2225 Intaglio Printmaking (4 Credits)
Concentration on selected areas of Intaglio printmaking. Emphasis is placed on conceptual and technical development, and on personal expression through this medium. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2235 Screen Printing (4 Credits)
This course focuses on water-based screen printing and its applications in a workshop/studio intensive atmosphere. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2415 Introduction to Photography (4 Credits)
This course approaches the medium of photography as a fine art. Fundamental techniques in traditional black and white photography, as well as digital photographic image making, are covered. Topics include camera operation, exposure, film developing, film and print scanning, and traditional and digital printing. Projects are viewed and discussed in group critique sessions. Students must have a camera with manual metering capabilities. Lab fee. Art majors must complete ARTS 1250 and ARTS 1300 first.

ARTS 2425 Personal Histories of Photography (4 Credits)
This course is a practical, studio-based introduction to the history of photography. The focus of the course is to trace the evolution of photography as a personal expressive medium. Students are required to complete photography assignments and must have a camera, film or digital. Lab fee. Prerequisite: ARTS 2415 or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

ARTS 2435 Color Photography (4 Credits)
This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. Intermediate issues and processes will be studied through photographing in color. Traditional color printing, digital scanning and printing, and color theory are covered. Projects are viewed and discussed as group critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisite: ARTS 2415 or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

ARTS 2445 Digital Photography and Experimentation (4 Credits)
This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. In traditional and/or digital darkrooms, a variety of alternative photographic techniques may be introduced, such as cyanotype, Vandyke brown printing, Polaroid emulsion transfer, liquid light emulsion, medium- and large-format cameras, digital negatives, pinhole camera, plastic camera, etc. Projects are viewed and discussed in group critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisite: ARTS 2415 or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

ARTS 2515 Introduction to Ceramics (4 Credits)
This course investigates the unique, material nature of clay as a medium for exploring artistic concepts and ideas. Studio assignments and demonstrations introduce several basic handbuilding methods as well as glazing and firing techniques. This course provides the fundamentals upon which students build their own direction and invention. Emphasis is on experimentation and individuality. Lab fee. Majors must complete ARTS 1250 and ARTS 1300 first.

ARTS 2535 Ceramics: Food and Function (4 Credits)
Gastronomy is the study of the relationship between culture and food. In this class, we explore gastronomic objects associated with food, both functional and sculptural. The importance of food is intimately involved with our concepts and design choices. Studio assignments and demonstrations serve as springboards for the student's own research and interpretations. Students use many different technical approaches such as throwing, handbuilding, casting as well as mixed media. Ultimately, students investigate, create and EAT! Lab fee. Prerequisite: ARTS 2515 or permission of instructor.
ARTS 2545 Ceramics: The Figure (4 Credits)
This course explores the human body as a means for artistic expression. A variety of styles and techniques are employed, such as realism, abstraction, fragment, narrative, mold making, and handbuilding. No previous figurative experience necessary! We work from images, models and, of course, ourselves. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

ARTS 2555 Ceramics: Multiples (4 Credits)
This course investigates the many aspects of working with repetition and multiples. Assignments fall under the headings of Repetition, The Series, The Unit and The Collection. Students learn mold making and slipcasting techniques in addition to handbuilding and glazing. Students develop ideas on a conceptual level first and then move into building their pieces, combining the appropriate construction methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

ARTS 2565 Ceramics: Surface (4 Credits)
This course explores the ceramic surface as a canvas for decoration and narrative in both functional and sculptural forms. Students do extensive exploration and experimentation combining traditional ceramics techniques with those of drawing and printmaking. Students develop ideas on a conceptual level first and then move into creating their pieces, combining the appropriate methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

ARTS 2615 Introduction to Sculpture (4 Credits)
This course offers a supportive but critical context to extend students' understanding of three dimensional form and its creation. Building on construction methods and spatial relationships formed in ARTS 1200, the course emphasizes the experiential and conceptual aspects of sculpture, and the interrelationship of ideas, form, material and technical means. Lab fee. Prerequisite: ARTS 1200. Majors should complete foundations sequence first (ARTS 1100, ARTS 1200, ARTS 1250, ARTS 1300).

ARTS 2625 Intermediate Sculpture (4 Credits)
This course is oriented toward students who have some experience in working with sculptural concepts and have some exposure to different materials and methods. Experimentation, investigation and self-examination are looked at in relation to the expanded field of sculpture. Prerequisite: ARTS 2615 or permission of instructor.

ARTS 2701 Topics in Studio Art (4 Credits)
Selected topics in studio art research. May be repeated to a maximum of 12 credits.

ARTS 2992 Directed Study (1-10 Credits)
This class should only be used when a required ARTS 2000-level course listed in this catalog is not offered in the quarter in which the student must take it. Permission of an instructor and the Director of the School of Art and Art History are required. Permission/registration form is available from the Office of the Registrar.

ARTS 3055 Advanced Drawing (4 Credits)
Working with a variety of materials and techniques, students hone their drawing skill and at the same time create finished drawings defined by content. Problems posed encourage independent thinking, experimentation and the development of a personal technical base. Lab Fee. Prerequisite: ARTS 2045 or ARTS 3065 or permission of instructor.

ARTS 3065 Life Drawing (4 Credits)
An intensive course in drawing the human figure, clothed and unclothed, to explore the human form in terms of proportion, movement, light and shadow, composition, color and personal expression. Students experiment with a range of materials. Lab Fee. Prerequisite: ARTS 1250 or permission of instructor.

ARTS 3125 Figure Painting (4 Credits)
An intensive course in painting the human body—the most timeless subject of art. Students work mainly in oils and experiment with a variety of surfaces and techniques. Students also investigate line, proportion, light and shadow, composition and color. Final project: life-size painting of two figures. Lab fee. Prerequisite: ARTS 2115 or ARTS 3065 or permission of instructor.

ARTS 3145 Painting Workshop (4 Credits)
Concentration on selected techniques and approaches to painting. Topics change. Course may be repeated to a maximum of 12 credits. Lab Fee.

ARTS 3245 Printmaking Workshop (4 Credits)
This upper-level course focuses on various topics and processes as the definition of contemporary printmaking evolves. Subjects such as lithography or intermediate screen printing, photo-based prints, or current themes relevant to printmaking are possible core formats for the course. Group and individual critiques, digital image presentations and examination of prints and reproductions. Lab fee. Prerequisites: sophomore standing and ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first. Course may be repeated to a maximum of 12 credits.

ARTS 3347 Professional Practice (4 Credits)
This course is required of BFA studio art majors and is open to BA art majors. It covers practical artist survival skills, including resume and cover letter writing, exhibition proposals, documentation of art work, artist statements, portfolio development and professional presentation of self and work. The course is reinforced by field trips and guest speakers who introduce both academic and non-academic art experiences and professions. Lab fee.

ARTS 3348 Senior Practicum in the Visual Arts (4 Credits)
Required for all studio BFA candidates. Students are expected to begin research and investigation for work that may be included in the BFA exhibitions. Emphasis is placed on a three-pronged assessment consisting of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.
ARTS 3349 Senior Seminar in the Visual Arts (4 Credits)
Required for all studio BFA candidates. Students pursue work individually and demonstrate a synthesis of ongoing research, demonstrate development and participate in structured weekly critiques with other studio BFA majors and faculty. This work is a meaningful extension of fall and winter quarters and extends beyond the installation of BFA exhibition. Emphasis is placed on discussions and critiques centered on the three-pronged assessment initiated in winter quarter of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

ARTS 3445 Photography Portfolio (4 Credits)
From the photographic assignment work produced in this class, students are required to construct a portfolio. The completed portfolio may take the form of matted prints in a box, a book of photographs and/or a website. Students may also be required to participate in a group exhibition during this class. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera. Lab fee. Prerequisite: ARTS 2415.

ARTS 3450 Portrait Photography (4 Credits)
This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. The class focuses on the genre of photographic portraiture. Through labs and classroom lectures, many interpretations of portraiture are covered. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisites: ARTS 2415 and any one of the following: ARTS 2425, ARTS 2435, ARTS 2440, ARTS 2445, or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

ARTS 3455 Photography Workshop: Alternative Processes in Photography (4 Credits)
Concentration on selected techniques and approaches to photography. Topics change. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisites: ARTS 2415 Introduction to Photography or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

ARTS 3555 Ceramic Workshop (4 Credits)
Concentration on selected techniques and experimental approaches to ceramics. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: ARTS 2515 or approval of instructor.

ARTS 3635 Advanced Sculpture (4 Credits)
Students work at an individual pace in production of sculptural ideas and objects. Lab fee. Prerequisite: ARTS 2625.

ARTS 3655 Sculpture Workshop (4 Credits)
Concentration on selected techniques and experimental approaches to sculpture. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee.

ARTS 3701 Topics in Studio Art (4 Credits)
Selected topics in advanced studio art research. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: instructor’s permission.

ARTS 3865 Senior Project: Conservation (4 Credits)
Required for, and limited to, BFA pre-art conservation majors. It is normally taken spring quarter of the senior year. The student works with a professional art conservator on a major conservation project that will become part of his or her portfolio and will be exhibited in the senior BFA exhibition.

ARTS 3915 Advanced Problems in Art (1-5 Credits)
This course is for students who have completed all 3000-level courses in a given area of concentration to show proficiency and wish to pursue more advanced work. A proposal form must be obtained from the art office and signed by the instructor and the Director of the School of Art and Art History before the student registers for this course. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

ARTS 3960 Conservation Internship (4 Credits)
The internship is normally taken during the fall of a major's senior year, under the direction of a professional Conservator, either in private practice or in a conservation department. Students should work closely with their advisor to arrange the Conservation Internship during the quarter before it will be taken. The student works on a wide variety of materials and problems in conservation during this internship, gaining as varied an experience as possible and developing a professional portfolio. Must be a BFA major in Pre-Art Conservation.

ARTS 3966 Studio Art Travel (1-4 Credits)
A travel course to selected locations to visit galleries, museums and artists' studios. Location and content of course change. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

ARTS 3980 Studio Art Internship (1-4 Credits)
The student is responsible for locating the internship and gaining approval for it, using the internship guidelines and contract form in the art office. Typical internships have been located in commercial galleries, fine art printmaking houses, professional artists' studios and non-profit arts organizations.

ARTS 3991 Independent Study (1-6 Credits)
Supervised studies not addressed in this catalog of classes. Advanced projects must be faculty approved. Permission/registration form is available from the Office of the Registrar.

ARTS 3992 Directed Study (4 Credits)
This class should only be used when a required ARTS 3000-level course listed in this catalog is not offered in the quarter in which the student must take it. Permission of an instructor and the Director of the School of Art and Art History are required. Permission/registration form is available from the Office of the Registrar.
Art History Courses

ARTH 1010 Images of Culture (4 Credits)
This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1020 Highlights of Medieval Art (4 Credits)
The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1030 Highlights of Renaissance Art (4 Credits)
The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1040 Sacred Spaces in Asia (4 Credits)
This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1050 Highlights of American Art (4 Credits)
This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist’s life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1060 Contemporary Art Worlds (4 Credits)
Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1070 Artists on Film (4 Credits)
Artists with turbulent lives have often captured the popular imagination. Typically, novels, plays and films about such artists perpetuate myths of tormented souls overcoming hardships, enduring romantic catastrophes and struggling with their creative genius. Usually, the reality is quite different as an artist’s path is one of developing talent, hard work, persistence and great personal courage. This class explores the lives and works of several famous artists. We evaluate the myths and the realities of their lives by comparing their art to films and documentaries that have been made about them. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1080 Directed Study (1-10 Credits)

ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)
This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2802 World Art II: c. 1000-1700 (4 Credits)
This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2803 World Art III: 1700 to the Present (4 Credits)
This is the third quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1700 to the present. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts.
ARTH 2814 Medieval Art (4 Credits)
This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2819 Survey of Art I: Caves to Renaissance (4 Credits)
An introduction to the painting, sculpture, architecture and book illustration of Europe from prehistoric times to 1500. The art of prehistory, the ancient Near East, Egypt, ancient Greece, ancient Rome, as well as Early Christian, Byzantine, Carolingian, Romanesque, Gothic and early Renaissance periods are explored. Major monuments are analyzed according to style, technique and iconography. Attention is paid to the historical and cultural context in which works of art were produced and used. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2820 Survey of Art II: Renaissance to Present (4 Credits)
An introduction to the art and architecture of Europe and North America from 1500 through the present. The major artists and architects of the following movements are covered: High Italian Renaissance and Northern Renaissance; 17th-century Northern and Southern Baroque, 18th-century Rococo to Revolution; 19th-century Romanticism, Realism, Impressionism and Post-Impressionism; 20th-century Cubism and Abstraction, Dada, Surrealism, Abstract Expressionism, Pop Art and various contemporary art movements. Students develop their ability to analyze the stylistic, iconographic, cultural and technical aspects of art works, while obtaining historical perspectives of the movements and artists covered within the class.

ARTH 2840 Survey of Asian Art (4 Credits)
An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 2992 Directed Study (1-5 Credits)

ARTH 3300 Seminar in Art History (4 Credits)
This seminar is primarily designed to introduce students to the advanced research techniques and methods of art history. The thematic content of this course changes. Students develop skills to analyze scholarly literature, to refine research papers and to deliver oral presentations.

ARTH 3400 Portfolio* Professional Development and Creative Practices in Art History (4 Credits)
Portfolio* is a professional development and creative practices course, introducing the practicalities of staple jobs for Art History majors and minors as well as the range of other possible career tracks and additional academic studies. The course combines an inquiry-based classroom experience with a signature seminar format and guest lecture series. Such a teaching+learning approach will not only improve your criticality but also strengthen your adeptness at investigation and analysis; deepen your knowledge of concepts, principles, and platforms for today’s creative industries; expand your professional networks; and provide hands-on, career-oriented experiences as you prepare your own portfolio for the contemporary marketplace.

ARTH 3652 Internship (1-4 Credits)
By arrangement, advanced undergraduate art history students may intern in an art gallery, small museum, historic house, non-profit art organization, archive or library. See guidelines and contract form in the School of Art and Art History office.

ARTH 3656 Curatorial Practicum (4 Credits)
Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

ARTH 3661 Learning in Museums (4 Credits)

ARTH 3701 Topics in Art History (1-4 Credits)
Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

ARTH 3702 Topics in Contemporary Art (4 Credits)
This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

ARTH 3812 From New Republic to the Gilded Age: 19th Century American Art (4 Credits)
This is a thematic study of American art and architecture, 1790-1910, including national identity, domesticity, nature, industrialization, death and mourning, westward expansion, Civil War, spirituality, and internationalism. Lectures, discussions and field trips.

ARTH 3813 Arts of the American West (4 Credits)
This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.
ARTh 3815 American Art and Religion (4 Credits)
This class examines sacred art forms, as well as art that documented or commented upon religious experience in the U.S., from the 17th century to the present. It includes fine, decorative, and popular arts as well as architecture, in slide-lecture-discussions and field trips. The diversity of religious experience and spirituality in American art is emphasized.

ARTh 3817 Gothic Art (4 Credits)
This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world - its beliefs, aspirations, social and political realities.

ARTh 3818 Art of Renaissance Europe (4 Credits)
This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

ARTh 3822 Northern Renaissance Art (4 Credits)
This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

ARTh 3823 17th-Century European Art (4 Credits)
This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

ARTh 3832 19th-Century Art (4 Credits)
This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

ARTh 3833 20th-Century Art (4 Credits)
This class studies the development of early 20th-century art in Europe and the U.S., as the center of the avant-garde shifted to America around World War II. The class follows the development of modernism and its theories from 1900 to around 1960. Artists and movements will be considered according to stylistic and theoretical development, and also in relation to social, political and cultural developments of their time.

ARTh 3834 Contemporary Art (4 Credits)
This course surveys the development of contemporary art, focusing primarily on recent decades, but making connections to earlier movements from 1970 to the present. This includes painting, sculpture, performance art, installations and new media art. Students become familiar with various issues of recent art theory and criticism to put these paintings into a theoretical perspective. In addition to an in-depth look at the broad stylistic movements of the past forty years, this course also examines those figures whose work has come to define the major approaches and concerns for the art of our time.

ARTh 3835 Contemporary Painting: Body, Light, Motion (4 Credits)
As prompt for this course, we will expand on an ambitious, open question posed by Jonathan Harris for the 2001 exhibition Hybrids at the Tate Liverpool: “What is contemporary, international, painting?” What knowledge can be derived from such a traditional medium? How have ever-new technologies affected the image, and how have discourses on the human body influenced the painterly practice? What are the many possibilities for materializing, analyzing, and displaying canvases today? And, in what ways has the globality of networks and connectivity destabilized or rejuvenated painting? The practices and philosophies that formulate hypotheses to such ambitious questions will be investigated from cross-cultural perspectives. Our conversations, which will start with an inquiry into modern and postmodern paintings and theories, will expand into contemporary considerations of religion in art, the relationship between the street and the gallery, the impressions of body politics within the event of painting, the dimensions of space and intersections of technology, as well as the dynamics of the global art scene.

ARTh 3838 Connoisseurship (4 Credits)
In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum’s collection.

ARTh 3839 Topics in Modern Art (4 Credits)
Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.
ARTH 3850 Art and the History of Science (4 Credits)
This class explores the connections between art and the history of science, using a broad span of visual material, mainly European art from the Middle Ages to the present. Coverage of the material is thematic, focusing on three major categories: Art and the Natural World; Art and the Human Body; and Art and the Human Mind. We read a wide variety of art historical articles and selected chapters that examine works of art related in the first section to astrology, astronomy and alchemy; botanical, zoological and geological illustration; and color theory, perspective, optics, maps, contemporary earthworks and ecology. In the second section, we explore the evolution of anatomic illustration, as well as mythic, religious and genre images related to medicine, pharmacy and healing as well as works by contemporary artists who are concerned with genetic codes, hybridization and cloning. In the third section, we examine depictions of human temperaments, emotions and madness through the images of selected artists.

ARTH 3862 Mesoamerican Art (4 Credits)
This course is an introduction to the art and archaeology of the native peoples of Mesoamerica in Pre-Columbian times, or from about 2000 BC to AD 1521. Cultures covered include the Olmec, Teotihuacan, Mixtec, Zapotec, Aztec and others. This class presents the cultural sequence of Pre-Columbian Mesoamerica and explores how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, and human sacrifice. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.

ARTH 3863 Art of the Maya (4 Credits)
This course is an introduction to the art and archaeology of the Maya from about 300 BC to the present. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.

ARTH 3864 Buddhism and the Fine Arts (4 Credits)
This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

ARTH 3865 Native American Art (4 Credits)
This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History.

ARTH 3866 Art of the Andes (4 Credits)
This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

ARTH 3871 Women in Art (4 Credits)
This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

ARTH 3872 Introduction to Conservation (4 Credits)
This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

ARTH 3875 History of Collections (4 Credits)
This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)
What is ‘Islamic’ in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists’ response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.
ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)
Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists’ acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

ARTH 3910 Art History Travel (4 Credits)
A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor’s permission.

ARTH 3991 Independent Study (1-10 Credits)
This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

ARTH 3992 Directed Study (1-5 Credits)
This class should only be used when a required ARTH course listed in this catalog is not offered in the quarter in which the student must take it. Permission of an instructor and the Director of the School of Art and Art History are required. Permission/registration form is available from the Office of the Registrar.

ARTH 4314 Seminar in Medieval Art (4 Credits)
Selected topics in Medieval Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

Asian Studies Program
Office: Sturm Hall, Room 345
Mail Code: 2000 E. Asbury Ave, Denver, CO 80208
Phone: 303-871-6663
Email: Li.Peters@du.edu
Web Site: http://www.du.edu/ahss/areasofstudy/joint_dual_programs/asian_studies

The Asian Studies Program takes a multi-disciplinary approach to the cultures, history, literature and languages of China and Japan, with a minor focus on Indian music and religion. We train students to think and write critically about Asian cultures; to conduct original research on issues that are relevant to one or more parts of Asia; and to develop international and intercultural knowledges and skills that are necessary in order to engage meaningfully with people and issues relevant to East Asia.

Majors may find their training valuable in a wide range of careers, given that the tiny minority of graduates of American universities who are skilled in Asian languages and cultures rank among the most desirable employees for many public- and private-sector organizations. Careers for majors include government service, education, journalism, international business and any other job requiring knowledge of and cultural understandings about China or Japan. The academic training that majors receive is competitive with similar programs at peer institutions across the United States, providing a firm basis for applying to graduate programs.

Students are required to take at least two years of Japanese, Chinese or another approved Asian language. First-year language courses may not be used to fulfill this requirement. However, the requirement may be waived for transfer students who have already had at least three years of Asian language training or for students who demonstrate competency in the language. The requirement is also waived for native speakers of Japanese, Chinese or another approved Asian language; such students complete 60 credits of non-language study instead.

Asian Studies majors are strongly encouraged to study in Asia for up to one year; excellent programs exist in Japan, South Korea, China, India and many other countries. In many cases, students can use their financial aid and receive University of Denver course credit for successfully completing study abroad programs. Interested students should consult with their Asian Studies advisor and the Study Abroad Office.

A student wishing to pursue an Asian studies major must make an appointment with the program director, Professor Li Peters (Li.Peters@du.edu), who assigns an advisor according to the student’s main interests. The student meets quarterly with the program director for approval of courses taken for the major.

Requirements for Distinction in the Asian Studies Major

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Nomination by an Asian Studies faculty member or the program director
- Submission of a portfolio of representative work that completed in the major
- Completion of a thesis project that goes beyond a normal Asian Studies senior thesis

BA in Asian Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 46

1. Majors are required to take two years of intermediate and advanced Japanese, Chinese or another approved Asian language. Please note that 1st-year language study may NOT be counted for credit toward the major.

2. INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### Courses

**ASIA 1516 Contemporary China in Literature and Films (4 Credits)**
This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with CHIN 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ASIA 2102 Topics in Chinese Art (4 Credits)**
Selected topics in Chinese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3841.

**ASIA 2105 Topics in Japanese Art (4 Credits)**
Selected topics in Japanese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3842.

**ASIA 2106 Chinese Painting: Masters and Masterpieces (4 Credits)**
Exploration of pictorial art in China from the third century BCE to the present. Cross listed with ARTH 3846.

**ASIA 2403 Modern Japan (4 Credits)**
Themes in early and late modern Japan - ideology and politics, culture and society, class and gender, empire and nation, Japan from Tokugawa peace through modern wars to post-war world. Cross listed with HIST 2810.

**ASIA 2414 American Occupation of Japan (4 Credits)**
Studies the important issues in a vital period of both U.S. and Japanese history. Cross listed with HIST 3861.

**ASIA 2601 Japanese Politics (4 Credits)**
How did Japan rapidly catch up with more advanced industrial powers? Can other developing countries copy the Japanese model? What was the “darker side” behind Japan’s economic miracle? How do we come to terms with the sudden burst of Japan’s “Bubble Economy”? Will Japan’s current economic recovery process, which started in 2002, be sustainable? Is a genuine international reconciliation between Japan and its neighbors possible? These are just some of the questions we will examine in this class. Prerequisite: sophomore standing. Cross listed with PLSC 2260.

**ASIA 2701 Topics in Asian Studies (1-4 Credits)**

**ASIA 2702 Religions of China & Japan (4 Credits)**
This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2103.

**ASIA 2703 Modern Hinduism (4 Credits)**
Doctrines, practices and history of South Asian Hinduism; conceptions of the sacred, paths to liberation and modern religious attitudes. Cross listed with RLGS 3814.

**ASIA 2704 Buddhism (4 Credits)**
Buddhist life and thought from origins to present in India, Tibet, Japan and China. Cross listed with RLGS 3820.
ASIA 2870 Modern China (4 Credits)
In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years. Cross listed with HIST 2870.

ASIA 3701 Topics in Asian Studies (1-4 Credits)
Specialized topics in Asian Studies. Topic varies per offering. Check with the Asian Studies program director for more information. Open to majors and non-majors. May be repeated for credit.

ASIA 3901 Asian Studies Directed Readings (4 Credits)
Students will read deeply in a specific field of scholarship directed by a core faculty member in the Asian Studies program and will write a methodological essay that discusses the scholarship in their chosen field of research. This is the first part of a required, two-quarter sequence that will culminate in the senior thesis. Enrollment is restricted to Asian Studies majors.

ASIA 3902 Asian Studies Senior Thesis (4 Credits)
Students will pursue a primary document research project under the supervision of their core faculty member in Asian Studies. The goal of this course is the writing and completion of the senior thesis in Asian Studies. Prerequisite: ASIA 3901.

ASIA 3980 Asian Studies Internship (1-4 Credits)
Provides academic credit for off-campus internships in areas related to the Asian Studies major. The purpose of the internship is to gain valuable work experience, explore various career options, develop job competencies and/or apply theoretical knowledge to practical concerns of the world. Must be an Asian Studies major and have cumulative GPA of 3.0 and have taken at least two Asian Studies content courses, not counting language training. Requires approval of Asian Studies director.

ASIA 3991 Independent Study (1-4 Credits)

Biological Sciences

Office: F.W. Olin Hall, Room 102
Mail Code: 2190 E. Iliff Ave. Denver, CO 80208
Phone: 303-871-3661
Fax: 303-871-3471
Email: biology@du.edu (Biology@du.edu)
Web Site: http://biology.du.edu

The Department of Biological Sciences offers four distinct life sciences majors provided by a nationally recognized faculty that excels in teaching and research. Many faculty members have received University wide recognition for outstanding teaching. Research programs are funded by grants from agencies such as the National Institutes of Health and the National Science Foundation.

The department has three excellent teaching and research facilities. F.W. Olin Hall is a state-of-the-art facility for lectures and laboratories. Faculty offices and research labs are located across the science quad from Olin Hall in the Seeley G. Mudd building, which has teaching laboratories for advanced technique courses in molecular biology, cell biology and microbiology. Field-oriented courses are offered at the Mount Evans Field Station.

The up-to-date and highly integrated curriculum provides a sound foundation in molecular, cellular, developmental, organismal, ecological and environmental biology. The curriculum prepares students for futures in medicine, dentistry, veterinary medicine, graduate programs in the life sciences, graduate programs in health-related fields like physical therapy or physician assistant programs, ecology, environmental science, conservation biology and science education at the secondary school level.

Programs of Study in Biological Sciences
The department offers majors in the following areas: biological sciences, molecular biology, ecology and biodiversity, and integrated sciences.

Biological Sciences
The biological sciences major provides a curriculum that encompasses the spectrum of disciplines in the life sciences.

Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))

45 credits of biology. Requirements include:

</tr>
<tr>
<td>BIOL 2120 &amp; BIOL 2121</td>
<td>Cell Structure and Function and Cell Structure &amp; Function Lab</td>
<td>5</td>
</tr>
</tbody>
</table>

At least two of the following courses:

- BIOL 3160: Biophysics: Ion Channels & Disease
- BIOL 3640: Introductory Neurobiology
- BIOL 3641: Systems Neuroscience
- BIOL 3642: Neuropharmacology
- BIOL 3644: Neuromuscular Pathophysiology
- BIOL 3650: Endocrinology
- BIOL 3646: Seminar: Cognitive Neuroscience

Total Credits: 25

Molecular Biology Major

The Molecular Biology major features upper-division courses that share the common theme of gene expression in biological systems and cellular function. This major is intended for students interested in professional postgraduate programs (medicine, dentistry, veterinary medicine), graduate
programs in the life sciences and careers in the biotech industry. Students interested in biotech careers are encouraged to consider completing a master of business administration (MBA). See the chair of Biological Sciences (Olin Hall, room 102) for details concerning this dual degree program.

**Bachelor of Arts Major Requirements**

MATH 1951 & MATH 1952 & MATH 1953
Calculus I and Calculus II and Calculus III

Total Credits: 39

1. Only 5 credits of Undergraduate Research (BIOL 3950) and/or Independent Study (BIOL 3991) may be counted toward the credit requirement for the major.
2. Only 6 credits of Undergraduate Research (BIOL 3950) and/or Independent Study (BIOL 3991) may be counted toward the 45-credit requirement for the major.

Requirements for Distinction in the Major in Biological Science
- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3950 Undergraduate Research or BIOL 3991 Independent Study)
- Completion of a thesis

Requirements for Distinction in the Major in Molecular Biology
- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3950 Undergraduate Research or BIOL 3991 Independent Study)
- Completion of a thesis

Distinction in the Major in Ecology and Biodiversity
- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3950 Undergraduate Research or BIOL 3991 Independent Study)
- Completion of a thesis

The course plans below are intended to give students an example of how they might complete their degree requirements in the first two years. Please note that plans can vary greatly in year 2, and students should work with their Biology advisor to determine their academic path.

Total Credits: 101
Courses

BIOL 1005 Perspectives-Veterinary Medicine (2 Credits)
Introduction to career areas in veterinary medicine through lectures, guest speakers and demonstrations. The credits for this course are general elective only. They do not apply to any major or minor in NSM or to SI-NPW of the common curriculum. Prerequisites: BIOL 1010 and BIOL 1020, or by departmental permission.

BIOL 1010 Physiological Systems (4 Credits)
The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)
The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

BIOL 1020 Physiological Systems Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

BIOL 1220 Molecules to Humankind I (4 Credits)
First class in a three-quarter sequence for non-majors that examines the mechanisms that sustain life. Emphasis is placed on understanding the human body at the molecular, cellular and physiological levels. In the fall quarter our discussions start with the atom and basic chemistry. We next consider the properties of complex molecules, including DNA, proteins, carbohydrates and lipids, in order to see how such molecules are used and organized by living organisms. Our discussions of large and complex molecules lead naturally to the basic unit of life, the cell. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1221 Molecules to Humankind II (4 Credits)
Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1222 Molecules to Humankind III (4 Credits)
Third class in a three-quarter sequence focuses for non-majors on cell biology, genetics, and human reproduction and development. After a review of cell structure and function, focusing on how cells are capable of replication with modification, the mechanisms by which information is passed on from one cell to another and from one generation to the next are considered. The second half of the quarter concerns sexual reproduction and early development. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1260 Sustaining Life I (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student’s health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
BIOL 1261 Sustaining Life II (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student’s health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

BIOL 1262 Sustaining Life III (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student’s health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

BIOL 1270 Living in the Microbial World I (4 Credits)
Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1271 Living in the Microbial World II (4 Credits)
For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role of microbial microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

BIOL 1272 Living in the Microbial World III (4 Credits)
In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

BIOL 1990 Independent Study (1-5 Credits)
BIOL 1992 Directed Study (1-10 Credits)

BIOL 2010 General Ecology (4 Credits)
Topics in ecosystems, population and community ecology, as well as behavioral ecology. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

BIOL 2011 General Ecology Lab (1 Credit)
Exercise and experimentation to compliment the lecture. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021 with a minimum grade of D-.

BIOL 2050 Conservation Biology (4 Credits)
Biological diversity explained, including endangered species small populations, habitat fragmentation and other causes of species extinction. Also preservation and management of biological diversity. Co-requisite: BIOL 2051 and BIOL 2010 with a minimum grade of D-.

BIOL 2051 Conservation Biology Lab (1 Credit)
Exercises and experimentation to compliment the lecture. Co-requisite: BIOL 2050.

BIOL 2090 Biostatistics (4 Credits)
Statistics in biological research. Computer-aided statistical analysis and hypothesis testing focusing on experiments and data unique to the biological sciences. Cross listed with BIOL 4090.
BIOL 2120 Cell Structure and Function (4 Credits)
Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. Prerequisites: BIOL 1011. Corequisite: BIOL 2121 lab section. CHEM 1010 prerequisite or corequisite.

BIOL 2121 Cell Structure & Function Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. Co-requisite: BIOL 2120.

BIOL 2200 Medical Terminology (3 Credits)
This course presents fundamentals and applications of medical terminology using online learning modules and assessment. This review and application of human anatomy and physiology is suitable for students who have completed introductory biology (BIOL 1010 or its equivalent) and who are working toward a career in medicine or for whom communication with health care providers is essential. Students study basic anatomy and physiology at a level that is intermediate between introductory and advanced courses, discover the medical history behind medical terminology, analyze medical case studies, and work to develop skills for clear and concise articulation of the basic concepts of anatomy and physiology behind medical diagnosis and treatment. This mastery of medical terminology helps to build a strong foundation for advanced coursework in anatomy and physiology. Prerequisite: BIOL 1010 or equivalent with instructor approval.

BIOL 2450 Human Anatomy (5 Credits)
Detailed structural analysis of the tissues, organs and organ systems of the human body. Four lectures and one 3-hour laboratory each week. Lab fee associated with this course. Prerequisites: BIOL 2120 AND 2121.

BIOL 2510 General Genetics (4 Credits)
Mechanisms of heredity with application to all forms of life. One 3-hour laboratory per week. Lab fee associated with this course. Prerequisites: BIOL 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.

BIOL 2511 General Genetics Lab (1 Credit)
The laboratory component of BIOL 2510. COREQUISITES: BIOL 2510 PREREQUISITES: BIOL 1020 AND BIOL 1021 RECOMMENDED PREREQUISITES: BIOL 2121.

BIOL 2600 Vertebrate Zoology I (4 Credits)
Evolutionary history, morphology, physiology and ecology of fish, amphibians and reptiles. Laboratory exercises focus on the structure and function of the vertebrate body, especially those of the skeletal, muscle and organ systems. Prerequisites: BIOL 1010, BIOL 1011 or permission of instructor.

BIOL 2610 Vertebrate Zoology II (4 Credits)
Evolutionary history, morphology, physiology and ecology of birds and mammals. Laboratory exercises focus on the structure and function of the vertebrate body, especially those of the skeletal, muscle and organ systems. Prerequisites: BIOL 1010, BIOL 1011 or permission of instructor.

BIOL 2992 Directed Study (1-10 Credits)

BIOL 3010 Evolution and Speciation (4 Credits)
Theories and supporting evidence explaining evolution from origin of universe to complex interrelationships of species. Prerequisites: BIOL 1010, BIOL 1011 and BIOL 2510.

BIOL 3020 Aquatic Ecology (4 Credits)
An introduction to the ecology of fresh-water and marine organisms including aquatic adaptations, community organization, food chains, nutrient cycling and man's impact on aquatic ecosystems. Prerequisite: BIOL 2010 or instructor's permission.

BIOL 3025 Science and the Law (2,4 Credits)
This course will focus on the intersection of science and US law. Four major areas of focus that will be covered are the admissibility of expert witnesses / scientific evidence in court; how advances in forensic genetics and national DNA databases raise legal issues pertaining to expectations of privacy and the standards for reaching a verdict; the impact of US Supreme Court opinions on the patenting of genes used as diagnostic markers for human disease and the legal landscape surrounding issues of evolution and creationism/intelligent design. Students will then explore how the law impacts their own areas of scientific interest. The goal of this course is to increase our understanding as scientists of how advances in science impact and are impacted by the US judicial system. PREREQUISITES: BIOL 1010 AND BIOL 1011.

BIOL 3030 Alpine Ecology (4 Credits)
Ecology of alpine and subalpine regions of Colorado; organization and distribution of communities and populations, succession, energy flow, nutrient cycling, population adaptations in life-history physiology, behavior and morphology. Prerequisite: BIOL 2010.

BIOL 3035 Invasive Species Ecology (4 Credits)
This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

BIOL 3044 Coral Reef Ecology (3 Credits)
Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef reef conservation. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).
BIOL 3045 Coral Reef Ecology Lab (1 Credit)
Ecology of coral reefs laboratory to supplement lecture material; travel to the Caribbean over spring break to observe coral reefs firsthand; introduction to research methods. SCUBA certification and permission of instructor required. A travel and dive fee is associated with this course.

BIOL 3055 Ecology of the Rockies (4 Credits)
A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 2010 or permission of instructor.

BIOL 3060 Tropical Ecology (3 Credits)
Biological composition of tropical ecosystems; biodiversity, biogeochemistry; causes and biological consequences of tropical deforestation; ecologically based approaches toward sustainable tropical forest use. Includes laboratory. Prerequisite: BIOL 2010.

BIOL 3070 Ecological Field Methods (4 Credits)
Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 2010.

BIOL 3085 Insect Ecology (4 Credits)
A general introduction to insect biology and the science of entomology. Arthropods are the most diverse group of animals on Earth and insects account for more than half of all known living organisms. This course explores the biodiversity of insects on Earth, insect morphology and physiology. The evolutionary history and taxonomy of key orders of insects is emphasized as well as the importance of insects to our everyday lives. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010.

BIOL 3090 Microbial Ecology (4 Credits)
Interactions among microorganisms and their environment. Impact of ecological principles on microbial diseases, pollutant degradation, nutrient cycles and global change. Prerequisites: BIOL 1010, BIOL 1020, AND BIOL 2010.

BIOL 3095 Global Change Ecology (4 Credits)
Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth's organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITES/COREQUISITES: BIOL 2090.

BIOL 3100 Histology: Medical Microanatomy (4 Credits)
Microscopic organization of tissues and organs; correlation of organization of organs with functions and pathologies; emphasis on mammalian systems. Includes laboratory. Lab fee associated with this course. Prerequisite: BIOL 2120.

BIOL 3110 Special Topics: Biology (1-5 Credits)
Topics of special interest to teaching/research faculty of department presented as needed to complement and expand existing curriculum. May be repeated for credit. PREREQUISITES: BIOL 1010.

BIOL 3120 General Microbiology (4 Credits)
Fundamental principles of microorganisms in the world and in disease; role of bacteria in biological phenomena. Includes laboratory. Lab fee associated with this course. Prerequisite: BIOL 2120.

BIOL 3130 Molecular Evolution (4 Credits)
Evolution of macromolecules and reconstruction of evolutionary history of genes and organisms. Prerequisite: BIOL 2510 or permission of instructor.

BIOL 3135 Topics in Cell Motility (4 Credits)
Fibrous elements of the cytoskeleton and associated proteins and their role in cellular motility is examined in detail. The physical forces involved in cellular motile function is applied in understanding cellular motile behavior. Prerequisite: BIOL 2120.

BIOL 3145 Cellular and Molecular Biology of Cancer (2-4 Credits)
This course examines the mechanisms that underlie the development and progression of cancer. The cellular and molecular events that drive uncontrolled cell proliferation and eventual metastasis of tumors are discussed. Prerequisite: BIOL 2120.

BIOL 3150 Intracellular Dynamics (4 Credits)
Focuses on spatial and temporal control of intracellular processes with an emphasis on neuronal and endocrine cells. Topics include vesicular traffic, protein targeting, dynamics and spatial organization of signaling complexes. Emphasis on modern techniques of cell and molecular biology with examples from primary literature. Prerequisite: BIOL 2120.

BIOL 3160 Biophysics: Ion Channels & Disease (4 Credits)
Examines ion channel structure and function and the ways in which this information provides insight into human disease. The focus is on the use of biophysical techniques in combination with molecular and genetic analysis of channel genes. General Physics recommended. Prerequisite: BIOL 2120.

BIOL 3200 Invertebrate Evolution (4 Credits)
Introduction to remarkable diversity of invertebrate life, both in terms of numbers of species, novel body plan and physiological adaptations. Includes laboratory. Prerequisites: BIOL 1010, BIOL 1011.
BIOL 3230 Nutrition (3 Credits)
Investigation of metabolism, all nutrients and various applications of nutrition to sports and healthy living. Prerequisite: BIOL 3250.

BIOL 3250 Human Physiology (5 Credits)
Functional relationships of human organ systems with coordinated laboratory activities and experiments that demonstrate and test physiological principles. Lab fee associated with this course. Prerequisites: BIOL 1010.

BIOL 3260 Nutrition (3 Credits)
From physiological and biochemical perspectives, this course explores the relationships of energy metabolism, nutrients, vitamins and minerals to human health. Prerequisite: BIOL 3250.

BIOL 3300 Biodiversity-Flowering Plants (4 Credits)
Basic techniques and principles of systematics with application to the origin, evolution, radiation, classification and biodiversity of flowering plants (angiosperms). Lab fee associated with this course. Prerequisites: (BIOL 1010 AND BIOL 1011) or (GEOG 1201, GEOG 1202, AND GEOG 1203), OR instructor’s permission.

BIOL 3400 Ornithology (4 Credits)
Biology of birds with emphasis on ecology and behavior; field and laboratory work to stress bird identification and ecological relationships of birds. Lab fee associated with this course. Prerequisites: BIOL 1010, BIOL 1011.

BIOL 3410 Animal Behavior (4 Credits)
This class examines animal behavior from an evolutionary and ecological perspective. The course provides the background needed to understand behavioral evolution, including a focus on the inheritance of behavior, natural selection, sexual selection, and kin selection. This class studies the evolution of a variety of behaviors, including communication and displays, mate choice, parental care, cooperation, mating systems, social behavior, habitat selection, foraging, and anti-predator behavior. The emphasis is on theoretical principles, design of experiments, and interpretation of data. Prerequisites: BIOL 1010 and BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITE: BIOL 2090.

BIOL 3560 Molecular Biology Laboratory (4 Credits)
Laboratory based course that covers techniques in gene excision, cloning and reinsertion and gene sequencing. Lab fee associated with this course. Prerequisite: BIOL 2510, or permission of instructor.

BIOL 3570 Proteins in Biological Systems (3 Credits)
Proteins considered in their biological setting; protein synthesis and degradation; survey of protein functions in vivo; evolution of proteins; introduction to protein biotechnology. Prerequisites: BIOL 2120, CHEM 2451, CHEM 2452 and CHEM 2453.

BIOL 3610 Developmental Biology (4 Credits)
Processes and mechanisms of development, exemplified by higher animal embryogenesis, with consideration of microbial model systems. Prerequisite: BIOL 2510 and BIOL 2120.

BIOL 3620 Vertebrate Embryology (4 Credits)
Development processes in placental mammals; analysis of vertebrate cyto-differentiation and morphogenesis. Laboratory on embryonic anatomy of amphibians, birds and mammals. Prerequisites: BIOL 1010, BIOL 1011 and BIOL 2120. Corequisites: BIOL 1010.

BIOL 3630 Cell Biology of Development (4 Credits)
Every organism has a stereotypical shape, but how does this shape arise? This course examines the cellular and molecular mechanisms that direct the forming of body and tissue shape. Prerequisite: BIOL 2120.

BIOL 3640 Introductory Neurobiology (4 Credits)
Organization and function of vertebrate central nervous system; nature of action potential, biochemistry of neurotransmitters, neuropeptides, functional anatomy of nervous system, phylogeny of nervous system. Prerequisite: BIOL 2120.

BIOL 3641 Systems Neuroscience (4 Credits)
Structure and function of the brain and spinal cord, emphasis on functional systems including sensory perception, motor control and consciousness. Prerequisite: BIOL 2510.

BIOL 3642 Neuropharmacology (4 Credits)
How psychoactive drugs exert their effects on the nervous system; drugs of abuse and drugs used in the treatment of psychotic and neurodegenerative disorders. Prerequisite: BIOL 2120. Recommended prerequisites: BIOL 3640.

BIOL 3643 Developmental Neurobiology (4 Credits)
This course investigates the mechanisms involved in the maturation of neurons, and signals that direct neurons to their proper position in the central nervous system. Prerequisite: BIOL 3640.

BIOL 3644 Neuromuscular Pathophysiology (4 Credits)
Cellular and molecular basis for normal nerve and muscle functions and the alteration of these functions by toxins, trauma and diseases of the brain, nerves and muscles; how specific insults produce clinical symptoms and pathology. Prerequisite: BIOL 2120. Recommended Prerequisite: BIOL 3640 or BIOL 3250.

BIOL 3646 Seminar: Cognitive Neuroscience (2 Credits)
This seminar is the capstone course for the neuroscience portion of the cognitive neuroscience program. Seminar topics include but are not limited to neurological disorders, model systems in neuroscience and sensory systems.
BIOL 3650 Endocrinology (4 Credits)
Mechanisms of hormone action, evolution of vertebrate endocrine systems, analysis of function integration of hormonal responses in maintenance of homeostasis. Prerequisite: BIOL 2120.

BIOL 3651 Comparative Endocrinology (4 Credits)
Intercellular communication systems are essential for the proper coordination of trillions of cells in multi-cellular animals. This course will evaluate the evolution of neuroendocrine networks in both invertebrates and vertebrates with a focus on how these neuroendocrine networks influence growth, reproduction, osmoregulation, and metabolism. Prerequisite: BIOL 3650.

BIOL 3655 Molecular Neuroendocrinology (4 Credits)
Advanced laboratory course that uses anatomical/immunological, biochemical and molecular approaches to analyze neuroendocrine pathways in the hypothalamus/pituitary system. Lab fee associated with this course. Prerequisites: BIOL 3650 and instructor’s permission.

BIOL 3656 Cellular Aspects of Diabetes and Obesity (4 Credits)
This course focuses on specific cellular and molecular events key to the understanding of the pathological conditions of diabetes and obesity. Topics include the endocrine pancreas, adipose tissue and neuroendocrine control energy expenditure and feeding behavior. Prerequisite: BIOL 2120.

BIOL 3670 Molecular Immunology (4 Credits)
The ability to distinguish self from non-self is crucial to all organisms. In humans Organs, cells and other higher animals, this task fall to the immune system. Suppression of this system is key to numerous pathogenic viruses including Ebola and human immunodeficiency virus. The failure to adequately regulate immune response underlies allergic reactions, arthritis and diabetes. This course will introduce students to the organs, cells and molecules that underlie mammalian immune response; immunogenetics and the fundamental mechanisms of cell mediated and humoral immune response; and the relationship of immune system to human disease. Prerequisite: BIOL 2510.

BIOL 3675 Virology (4 Credits)
Viruses are the ultimate cell biologists. They usurp essential cellular components to create new virus progeny leading to pathological cellular physiology. This course will delve into the genetic and cellular principles that govern virus entry, replication, and assembly and cover a broad range of DNA and RNA-based virus families. Prerequisites: BIOL 2120 and BIOL 2510.

BIOL 3680 Advanced Techniques in Cell Biology (4 Credits)
Advanced laboratory course that covers current techniques used in cell biology research. Lab fee associated with this course. Prerequisite: BIOL 2120.

BIOL 3700 Topics in Ecology (1-4 Credits)
Topics vary; may include plant, animal, biochemical, alpine or aquatic; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: one quarter of undergraduate ecology and/or instructor’s permission.

BIOL 3701 Topics in Genetics (1-4 Credits)
Topics vary; may include genetic methods, molecular genetics, human genetics, chromosomes or population genetics; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: BIOL 2510 and/or instructor’s permission.

BIOL 3702 Advanced Topics in Regulatory Biology (1-4 Credits)
Topics vary; may include endocrinology, physiology or immunology; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: varies with topic and instructor; instructor’s permission usually required.

BIOL 3703 Advanced Topics in Developmental Biology (1-4 Credits)
Topics vary; may include gene expression in development, developmental immunogenetics, developmental biochemistry or aging; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: instructor’s permission.

BIOL 3704 Advanced Topics in Cell Biology (1-4 Credits)
Topics vary; may include supramolecular structure, microscopy, membranes and techniques. May be repeated for credit. Taught from original literature. Prerequisites: BIOL 2120.

BIOL 3705 Advanced Topics in Molecular Biology (1-4 Credits)
Topics vary, but may include biochemistry, supramolecular structure and function, molecular genetics, membrane biology. May be taken more than once for credit. Taught from original literature. Prerequisite: varies with course and instructor; instructor’s permission usually required.

BIOL 3706 Topics in Evolution (1-4 Credits)
Topics vary, but may include molecular evolution, plant evolution and animal evolution. Prerequisite: BIOL 2120 and BIOL 2510.

BIOL 3707 Advanced Topics in Conservation Biology (1-4 Credits)

BIOL 3800 Human Molecular Biology (4 Credits)
Medical Genetics is the 24th member of the American Board of Medical Specialties. This course will introduce students to the fundamentals of molecular biology with an emphasis on understanding of how the field is applied in the context of medical diagnostics, personalized/precision medicine and other commercial applications. Students will be introduced to published research reports and provided with opportunities to critically examine the application of molecular biology to central questions in such areas as oncology, inherited diseases and genetically engineered organisms. Prerequisite: BIOL 2510.

BIOL 3870 Medical Ethics (4 Credits)
This course presents knowledge and discussion of ethical issues that arise from advances in the biomedical sciences and medicine. Several specific ethical issues and policies related to methodologies and procedures, emerging medical technologies, treatment decisions, doctor-patient relationship, informed consent, medical experimentation / clinical research, and health care reform. Prerequisites: BIOL 2120 or instructor approval.
BiOL 3910 Viruses & Infectious Human Diseases (4 Credits)
From sexually transmitted viruses to bacterial pneumonia, infectious pathogens are the number one threat to human health. This course will introduce students to prions, viruses and bacterial pathogens with an emphasis on those commonly encountered in clinical medical practice. Through the use of technical/scientific research journals students will be encouraged to investigate the etiology, pathogenesis and treatment of human infectious disease with an emphasis on the clinical, molecular diagnostic and therapeutic aspects of the disease. Prerequisite: BIOL 2510. Recommended prerequisite: BIOL 3800.

BiOL 3920 Forensic Pathology (2-4 Credits)
In its broadest definition, forensic science represents a fusion of the natural sciences, criminology and jurisprudence. The field of forensic pathology in particular focuses on the investigation of sudden, unnatural, unexplained or violent deaths. Using the most authoritative books available and a multimedia lecture format, students in this course gain an introductory understanding of the pathophysiology of wounding and death as well as the clinical antemortem symptomology of physical abuse, neglect and extrajudicial wounding. Students also learn about the processes responsible for the decomposition of corpses as well as the use of molecular and geometric tools for the reconstruction of crime scenes from bloodstain evidence. Finally, students learn how to integrate a variety of forensic tools in investigations of sexual assault, serial killers, traffic fatalities and mass deaths. Prerequisite: BIOL 2120 or permission of instructor.

BiOL 3950 Undergraduate Research (1-10 Credits)
Participation in faculty research programs by agreement between student and faculty member. Maximum of 5 quarter hours of BIOL 3950 and/or BIOL 3991 may be applied to the 45-quarter-hour requirement for a major in biological sciences.

BiOL 3991 Independent Study (1-10 Credits)
Topic in biology studied under faculty supervision. Student’s responsibility to identify faculty supervisor before registering for class. Maximum of 5 quarter hours of BIOL 3991 and/or BIOL 3950 may be applied toward the 45-quarter-hour requirement for a major in biological sciences.

Business Administration Program
The Business Administration minor, which is only open to non-business majors, requires coursework in business law, accounting, finance, management and marketing. This minor allows students to learn basic knowledge about all business areas.

Business Administration
The Business Administration minor, which is only open to non-business majors, requires coursework in business law, accounting, finance, management and marketing. This minor allows students to learn basic knowledge about all business areas.

Requirements for the Minor

Courses
BUS 1000 Gateway to Business (4 Credits)
Practical glimpse into the global and competitive nature of business. From product ideation to product development, this course introduces students to business’s role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in team, and product/service innovation and creativity are introduced. No prerequisites.

BUS 1099 Daniels Professional Development Program Part I (0 Credits)
Some experiences are essential to a student’s development, but don’t fit well within the confines of a traditional course. This is a face-to-face zero-credit course intended to provide students with a framework to master professional development through experiential-based learning opportunities that will give them the necessary tools to identify a career path prior to graduation and succeed in their career development. Key topics include resume and cover letter development, understanding the business majors and associated career paths, and professional skill development such as appropriate business dress, communication, and etiquette.
BUS 1440 The Fourth Industrial Revolution (4 Credits)
This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

BUS 1900 Managing Your Financial Affairs (4 Credits)
This course provides an overview of topics that are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life and especially as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children. Open to all business and non-business undergraduate students.

BUS 1999 Daniels College of Business Checkpoint 1 Assessment (0 Credits)
Daniels College of Business graduation requirements include separate assessment exams to show mastery and retention of course content within the business core. The assessment should be taken immediately after completing all of the business core courses assessed (BUS 1000, INFO 1010, INFO 1020, and LGST 2000). Students must pass BUS 1999 before registering for MGMT 2850. This course is for business majors only.

BUS 2099 Daniels Professional Development Program Part II (0 Credits)
This course is the second part of the Daniels Professional Development Program (DPDP). Similar to DPDP I, this course will expose students experiential-based learning opportunities that will provide the necessary tools and skills to successfully land an internship and full-time position prior to graduation. This will include attending a career fair, completing a mock interview and receiving real-time feedback, creating a professional LinkedIn profile, and attendance to career services workshops focused on professional development. Prerequisite: BUS 1099.

BUS 2999 Daniels College of Business Checkpoint 2 Assessment (0 Credits)
Daniels College of Business graduation requirements include separate assessment exams to show mastery and retention of course content within the business core. This assessment should be taken immediately after completing all of the business core courses assessed (ACTG 2200, ACTG 2300, FIN 2800, MGMT 2100, and MKTG 2800). Students must pass BUS 2999 before registering for MGMT 3800. This course is for business majors only.

BUS 3000 Strategic Business Communications (4 Credits)
Leading CEOs know what multiple studies confirm: competence in communication is an essential skill for entry-level positions in business, and excellence in communication is necessary to become an industry leader. This course is designed to allow extensive time to practice and receive expert coaching. Since communication skills develop over time, you will build proficiency through multiple oral and written assignments that increase in rigor and complexity. The assignments will give you the individual and team skills you will need to be successful in both your academic and professional career. The quarter culminates in a client project addressing real campus or community issues. Prerequisites: BUS 1099 and admission to Daniels.

BUS 3700 Topics in Business (1-10 Credits)
BUS 3800 Pioneering Business for the Public Good (4 Credits)
The vision of Business for the Public Good is to provide an impactful culminating experience in the Daniels Core in which students think critically and creatively to address a societal issue through the lens of business. In this capstone to the business core, students will identify a real-world problem and use business tools and knowledge to address the issue. Topics include stakeholder management, corporate social responsibility, models of business, globalization, the natural environment, technology, public policy, innovative design thinking, among others. This course is designed to explore the place of business in the context of society. The course will familiarize students with the relationships among the private, public and nonprofit sectors. The course will challenge students by engaging them in projects focused on pioneering business to achieve public good and public benefit. Enforced Prerequisites and Restrictions: Junior year status, Completion of business core courses, other than BUS 3800.

BUS 3980 Internship (0-4 Credits)
Initial for-credit internship experience for students pursuing a business major, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1000.

Business Ethics and Legal Studies

Office: Daniels College of Business, Suite 687
Mail Code: 2101 S. University Blvd. Denver, CO 80208
Phone: 303-871-3213
Email: nikol.harder@du.edu
Web Site: https://daniels.du.edu/business-ethics-legal-studies/

Today’s managers, professionals and entrepreneurs operate in a complex legal environment that affects all facets of an organization. Firms need business graduates with knowledge of the legal and regulatory climate for jobs in human resources, marketing, purchasing and environmental affairs. Business and trade associations depend on staff members who monitor legislative and judicial decisions. A Business Ethics and Legal Studies minor provides a foundation for careers in the public or private sector.
Business Ethics & Legal Studies

Minor Requirements

The Business Ethics & Legal Studies minor is available to all undergraduate students.

"LGST 2000 Foundations of Business Law" is a prerequisite for all other Business Ethics & Legal Studies courses. Business students take this course as part of the Business Core, and only require an additional 16 hours in order to complete the minor.

Total Credits 20

1 LGST 2000 will not show up in the minor area for business students. Business students take this course as part of the Business Core, and only require 16 additional hours in order to complete the minor.

Courses

**LGST 1992 Directed Study (1-4 Credits)**

**LGST 2000 Foundations of Business Law (4 Credits)**
Managerial perspective on the role of law and its relationship to business environment; emphasis on American legal system (history of law, courts and civil procedure), private law (business torts, contracts, corporate responsibilities and business ethics), and governmental intervention (constitutional law, employment law, white collar criminal law and corporate/securities law). Prerequisites: BUS 1000 and sophomore standing.

**LGST 2560 The Constitution & Business (4 Credits)**
Current real world issues are analyzed in the exploration of constitutional law as it relates to business and free enterprise. Prerequisites: LGST 2000.

**LGST 2570 Contracts for Business (4 Credits)**
This course includes a comprehensive discussion of major contractual topics—including drafting and negotiation - and how they relate to legal and ethical elements of business. Prerequisites: LGST 2000.
LGST 2910 Daniels Ethics Fellows I: Community Impact (2 Credits)
This course comprises the first half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact their community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent community leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and community leaders, and (5) engage in a series of online quizzes designed to evaluate ethical reasoning and growth.

LGST 2920 Daniels Ethics Fellows II: Business Impact (2 Credits)
This course comprises the final half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact the business community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent business leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and business leaders, and (5) engage in a serious writing assignment designed to evaluate ethical reasoning and growth.

LGST 2960 Employment Law & Ethics (4 Credits)
Designed to offer insight into important employment law issues including employment-at-will, employees privacy rights, employment discrimination and labor law. Prerequisites: LGST 2000.

LGST 2992 Directed Study (1-4 Credits)

LGST 3100 Business Ethics & Social Responsibility (4 Credits)
The purpose of this course is to introduce students to ethical concepts, theories and issues as they relate to business and managerial decision making. A primary focus includes topics such as employee privacy, sales responsibility, sexual harassment, discrimination, intellectual property, whistle blowing, and career/family conflicts. The course is also designed to introduce students to more general approaches or ways of thinking about ethics, and students grapple with some of the basic and fundamental problems of ethics. Cross listed with MGMT 3100. Prerequisites: LGST 2000.

LGST 3510 Navigating Corporations & LLCs (4 Credits)
One of the most important decisions an entrepreneur can make is selecting a form of business entity, and it is crucial that business leaders understand the mechanical and organizational features of the entity they operate. In this course, we will explore the documents required to form a corporation and a limited liability company, as well as how each entity operates in terms of management and decision-making authority. Students will also work together to answer questions and solve problems while referencing corporate and LLC documents based on real-world examples. In this course, we will also explore how legal requirements guide and constrain the authority and discretion of corporate directors and officers. Various perspectives on governance will be presented and scrutinized. Prerequisite: LGST 2000.

LGST 3520 Legal and Ethical Issues in Purchasing a Home (4 Credits)
In this course, we will be considering some of the legal and ethical considerations that purchasers, sellers and agents face when buying or selling a home. This course will take students through the process of purchasing a home, from the initial stage of working with a real estate broker (including brokerage agreements and agency law), to submitting an offer/negotiations, understanding the contract terms, contingencies and implications, loan/financing considerations, title review, appraisal, inspections, objections and negotiations, and the closing of the purchase/sale.

LGST 3550 Topics in Business Law II (4 Credits)
Law relating to general and limited partnerships, corporations, property, securities law, professional responsibilities and related studies. Accounting students only. Prerequisites: LGST 2000.

LGST 3600 Business and Global Values (4 Credits)
This course explores the current state of globalization and its impact on business. In the context of ethical and legal norms, the course will examine how formal governmental and intergovernmental organizations (IGOs), as well as non-governmental organizations (NGOs), pressure business and affect business strategy and decisions. The course will also examine how business can adapt to comparative values and cultures in the international system, as well as universal values, and analyze issues and cases from both idealist and realist perspectives. Students will apply analytical tools from ethics, law, and public policy in examining leading business cases on the following topics: global terrorism and political risk,.

LGST 3700 International Business Law (4 Credits)
Introduction to public international law (rights and duties of states and intergovernmental organizations) and to private international law (rights and duties of individuals, businesses and nongovernmental organizations) in international affairs. Key issues include alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of business and legal issues. Prerequisites: LGST 2000.

LGST 3701 Topics in Legal Studies (1-4 Credits)
Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.
LGST 3710 E-Commerce Law and Ethics (4 Credits)
Over the past 20 years, changes in technology have been dramatic and far-reaching, and navigating the future will continually challenge the business professional. This course examines the legal and ethical dimensions of online privacy, security, marketing, contracts and intellectual property. Prerequisites: LGST 2000.

LGST 3720 Negotiation & Conflict Resolution in Business (4 Credits)
This course is a rigorous exploration of negotiating business deals. Students will learn to develop strategies in a variety of conflict situations. Students will work closely with the professor and each other in simulations to address negotiation challenges, engage in mediation and arbitration, and become effective masters at resolving conflict. Prerequisites: LGST 2000.

LGST 3790 Entrepreneur & Family Business (4 Credits)
This course covers (1) how an individual starts a business, (2) what you must know to get a new business off the ground and moving towards success, (3) the most current issues involving the creation of value, (4) strengthening and growing family businesses through the process of adopting best practices in governance, coupled with ethical conduct, value based leadership and legal compliance. Students are moved along tracks from which they can both observe and absorb a means to insure success and longevity in operating an individually owned or family owned business. Cross listed with LGST 4790. Prerequisites: LGST 2000.

LGST 3980 Internship (1-5 Credits)

LGST 3991 Independent Study (1-8 Credits)
Independent research/study; requires written report. Prerequisites: LGST 2000 and instructor’s permission.

LGST 3992 Directed Study (1-4 Credits)

Business Information and Analytics

Office: Daniels College of Business, Suite 580
Mail Code: 2101 S. University Blvd. Denver, CO 80208
Phone: 303.871.3695
Email: bia@du.edu
Web Site: http://daniels.du.edu/business-information-analytics/

Analytics is a challenging and exciting field that helps people make important informed decisions based on quantitative information. Business analysts make extensive use of data modeling, statistical techniques, and scenarios to manipulate data to find meaning, explain causation, and make predictions.

Currently, massive amounts of structured and unstructured data are collected and stored by computers as a result of business and society’s greater dependence on information technologies and software applications to transact business and everyday life. As such, data analytics skills are highly portable and becoming a frequently sought competency in workers. Analytics is a valuable partner to almost any field of study, including engineering, agriculture, social science, medical science, environmental science, forestry, marketing, accounting, and finance.

Business Analytics

Total Credits

20

¹ BSBA and BSAcc students take INFO 1010, INFO 1020 and INFO 2020 as part of the business core, and may not use these courses towards the minor. Business students must select four electives in order to complete this minor.

² INFO 2020 is not an option for BSBA or BSAcc students.

**Requirements for Distinction in the Major in Business Analytics**

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

**Business Analytics**

This course plan is a sample schedule. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. Please meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

Total Credits: 189-190

1 Analytical Inquiry: The Natural and Physical World
2 Scientific Inquiry: Society and Culture
3 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Business InformationAnalytics Courses

INFO 1010 Analytics I: Data Management and Analysis (4 Credits)
The amount of data businesses are able to maintain and process is growing exponentially, and the ability to manage that data successfully can give a business a tremendous competitive advantage. This course introduces the student to the business data landscape, as well as basic data management and analysis skills through spreadsheet and database applications. Student projects focus on data collection, data cleansing and mining, statistical and graphical analysis, basic modeling, and written presentation skills. No prerequisites.

INFO 1011 Microsoft Office Certification I Lab (0 Credits)
Learning lab and exam with successful completion resulting in award of formal Microsoft Office certification for Excel. BSBA/BSACC degrees only. Prerequisites:INFO 1010.

INFO 1020 Analytics II: Business Statistics and Analysis (4 Credits)
Businesses can never have perfect information; therefore, they must employ statistical techniques to improve the decision-making process. This course introduces students to the basic tenets of probability and statistics, with an emphasis on business applications. Statistical models as decision-support tools are taught. Student projects focus on data collection, data analysis, decision analysis, and written presentation skills. Prerequisites: INFO 1010, MATH 1200, or MATH 1951 and MOS Excel certification.

INFO 1021 Microsoft Office Certification II Lab (0 Credits)
Learning lab and exam with successful completion resulting in award of formal Microsoft Office certification for Word and PowerPoint. BSBA/BSACC degrees only. Prerequisites: MATH 1200 or MATH 1951 and STAT 1400 or INFO 1020.

INFO 2020 Analytics III: Business Modeling and Analysis (4 Credits)
Businesses make decisions and improve processes using a variety of modeling and analytic techniques. This course introduces the student to the techniques of multiple regression analysis, time series analysis, optimization, and simulation for solving a variety of business problems. Applications include economic forecasting, supply chain management, and project management. Student projects focus on using spreadsheet modeling for problem solving, and emphasizes written and oral presentation techniques. Prerequisites: INFO 1020 and all MOS certifications.
INFO 3100 Automating Business Processes (4 Credits)
This course focuses on using Microsoft Excel to support decision making for managers. This course covers advanced Excel functions and menu options along with basic spreadsheet modeling design and good practices. It also covers automating tasks in Excel using VBA and creating Excel Add-in programs. We finish the class by covering object oriented programming such as Visual Basic. Prerequisite: INFO 1020 and DCB checkpoint 2.

INFO 3110 Applied Nonparametric Statistics (4 Credits)
This course introduces students to the basic statistical techniques one employs in reporting the results of surveys or in analyzing randomly collected data. We have all taken surveys seeking our opinions about various topics; the course evaluations we fill out at the end of each course we take is an example. Non-parametric statistics has become increasingly more important in analyzing data and reporting results. Our course is very applied in nature.

INFO 3140 Foundations of Information Management (4 Credits)
This course introduces the student to database management systems. Specifically, this course focuses on database theory, appropriate database design, modeling tools, and the practical issues of implementation and management. This course consists of four primary components (or modules): (1) database theory, (2) database design tools and techniques (ERD's), (3) Structured Query Language (SQL), and (4) applying database concepts (using Microsoft Access). Corequisite: INFO 3100. Prerequisite: INFO 1020.

INFO 3200 Business Forecasting and Visualization (4 Credits)
This course explores the concepts of business forecasting and visualizations of business data. It covers the concepts of forecasting and visualization terminology along with all the steps of the forecasting process: define goal, get data, explore & visualize series, pre-process data, partition the data series, apply forecasting method(s), evaluation and compare performance, implement the forecasts/system, and communicate the results. This course also covers the creation and interpretation of real-time business data in terms of dashboards and scorecards. Prerequisite: INFO 2020 and DCB checkpoint 2.

INFO 3240 Enterprise Information Management (4 Credits)
This is the second in the series of two courses designed to expose students to database management systems. This course focuses on advanced topics in database theory, SQL, and an introduction to an enterprise database system using Microsoft SQL server and an integrated development environment using Visual Studio. Prerequisite: INFO 3140.

INFO 3300 Data Warehousing and Data Mining (4 Credits)
Data warehouse components and construction, extraction, transforming, and loading (ETL) and data cleansing, predictive analytics (trees, neural networks), descriptive analytics (drillable/OLAP reports, published reports, SQL queries), cluster and association modeling. Prerequisite: INFO 3240.

INFO 3330 Statistical Computing (4 Credits)
This course will provide the student with a base of skills necessary to program in one or more common scripting software packages. No prior programming knowledge is required. Upon completion of the course the student will be able to independently perform most basic statistical procedures using either software package. The student will also have the tools necessary to learn advanced topics from the software package documentation by themselves. Prerequisites: INFO 1020.

INFO 3340 Project Management and Simulation (4 Credits)
This course introduces the student to database management systems. Specifically, this course focuses on database theory, appropriate database design, modeling tools, and the practical issues of implementation and management. This course consists of four primary components (or modules): (1) database theory, (2) database design tools and techniques (ERD's), (3) Structured Query Language (SQL), and (4) applying database concepts (using Microsoft Access). Corequisite: INFO 3100. Prerequisite: INFO 1020.

INFO 3350 Optimization Modeling (4 Credits)
This course introduces concepts and techniques for the modeling and solution of business decision problems. It gives broad coverage to the formulation of optimization models and the use of commercially available software tools for solving them. These models include topics such as linear programming, integer programming, the transportation and assignment problems, network optimization models and non-linear programming. Emphasis is placed on the process of analyzing business scenarios, formulating models in spreadsheet software, and presenting oral and written project reports. Prerequisite: INFO 2020 and DCB checkpoint 2.

INFO 3377 Database-Driven Websites (4 Credits)
The programming course provides an in-depth look at the main techniques surrounding the development of dynamic web applications. This intensive lab/lecture course offers a detailed look at building a database-driven website. Databases are not new, but designing and applying them in a web environment presents new challenges, as well as new opportunities for data exploration. Students conceive, build and deploy a website using a database as its core. Topics include: creating database-gearied pages with HTML, CSS, and ASP; using SQL combined with modeling languages to build web database schemas, and interfacing the website via VBScript (or JavaScript) and ADO. Prerequisite: INFO 3140.

INFO 3500 Capstone/Senior Project (4 Credits)
This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from problem definition, data collection, and model construction, through analysis and presentation of results to recommendations for specific business decisions. Prerequisite: INFO 3340.
INFO 3700 Topics in Business Analytics (1-4 Credits)
Exploration of various topics and issues related to timely analytics applications. Prerequisites: DCB checkpoint 2.

INFO 3980 Internship (0-10 Credits)
Internship; requires written report.

INFO 3991 Independent Study (0-4 Credits)
Independent research/study; requires written report.

INFO 3992 Business Analytics Directed Study (1-10 Credits)

Info Tech E-Commerce Courses

ITEC 3155 Database for Financial Applications (4 Credits)
In this course, you will explore databases and other information systems used in financial applications. You will learn to build and to document a small financial database. You will learn to read and interpret entity-relationship diagrams and process flowcharts. You will also gain an understanding of many of the topics covered in the Business Environment Concepts portion of the CPA exam.

ITEC 3325 Emerging Technologies (4 Credits)
This course is for students who want a strategic edge: to understand how the advanced information technologies that are emerging today will impact business in the near to medium future. This course will equip students with an understanding of the key information technologies central to the knowledge economy, their current and prospective business uses, and lifelong skills in how to think about business uses of these technologies - to identify, critically analyze, and evaluate them. This course is for students who want to become key players in the coming economy by combining substantial understanding of the technology side with substantial understanding of the business side – applications and strategy. Prerequisites: Degree checkpoint 2.

ITEC 3377 Introduction to Business Intelligence (4 Credits)
Corporate decision making and tools that support this process, including database theory, database design, the decision process, data warehousing fundamentals, data mining, decision support systems (DSS), decision support and data warehousing tools, the impact of e-business and e-commerce, and DSS in support of customer relationship management (CRM). This course will consider the practical issues of analysis, selection, implementation and management of these systems, and will incorporate a hands-on component using current data warehousing tools and technology. Prerequisite: ITEC 3485 and degree checkpoint 2.

ITEC 3378 Data Warehouse & Managing Enterprise Data (4 Credits)
This course is focused on the process of creating a data warehouse. The process includes requirements definition, design, modeling, establishing an architecture, integration, data conversion, data cleansing, and ETL (Extraction, Transformation, and Loading). Cross listed with ITEC 4378. Prerequisites: ITEC 3377 and degree checkpoint 2.

ITEC 3379 Data Warehouse and Business Intelligence III (4 Credits)
This course is focused on the process of corporate decision making and the tools that support this process. Early DSSs in support of customer relationship management have made strides in focusing on the support of the strategic decision making process. Through business intelligence tools, this process is becoming a science in itself. This course focuses on this emerging science. Prerequisites: ITEC 3378 and degree checkpoint 2.

ITEC 3380 Data Warehouse and Business Intelligence IV (4 Credits)
This course is focused on the overall process of creating a data warehouse from requirements through implementation. The format is that of a Practicum course designed to have each student build a small data warehouse or to build a component of a larger data warehouse in conjunction with a group. Prerequisites: ITEC 3379 and degree checkpoint 2.

ITEC 3410 Information System Analysis (4 Credits)
Current theory and approaches to information systems analysis, focusing on the development of requirements from the perspective of classes and objects found in the vocabulary of any domain. Prerequisites: ITEC 3540, ITEC 3475 and degree checkpoint 2.

ITEC 3420 Information System Design (4 Credits)
Design methods that encompass the process of information system design decomposition and a notation for depicting both logical and physical as well as static and dynamic models of the information system under design. Prerequisites: ITEC 3410 and degree checkpoint 2.

ITEC 3700 Topics in Information Technology and E-Commerce (1-4 Credits)
Topics vary each term. View the Schedule of Classes for specific information on topics.

ITEC 3810 Networks & Telecommunication (4 Credits)
Examination of network-enabling technologies and concepts, including LANs and WANs. Network design management and trouble-shooting issues are covered. Network design in the age of the Internet is emphasized, including intranets, extranets, design issues, security and firewalls. Pros and cons of private networks, including virtual private networks and discussed. Alternative technologies such as wire line, wireless, satellite and cable are covered. Cross listed with ITEC 4320. Prerequisites: Degree checkpoint 2.

ITEC 3840 Practicum (1-4 Credits)
Faculty supervised work experience. Instructor approval required.

ITEC 3980 Internship (1-5 Credits)
Practical experience (field study); requires written report. Instructor approval required.
ITEC 3991 Independent Study (1-8 Credits)
Independent research/study; requires written report. Instructor approval required.

ITEC 3992 Directed Study (1-4 Credits)

The Department of Chemistry and Biochemistry offers a program of study that combines a traditional classroom emphasis with an innovative laboratory experience. In addition to providing excellent training for graduate study in chemistry and biochemistry, the program also is a strong pre-professional degree. A degree in chemistry, biochemistry or environmental chemistry prepares students for a variety of careers in chemical and biochemical research, medicine, life sciences, environmental science, atmospheric sciences, materials science, oceanography and teaching in chemistry or science in general. It also prepares students for employment with chemical, pharmaceutical, biotechnology, medical products, natural resources and environmental companies.

Because most medical and dental schools require a minimum of two years of chemistry for admission, a major in chemistry or biochemistry provides an excellent background for premed or pre-dental majors. Students who complete the bachelor of science in chemistry curriculum are certified by the American Chemical Society.

Chemistry

Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))

Minimum of 40 credits of chemistry. Requirements include the following:

<table>
<thead>
<tr>

¹ Of the two minors required for this BS degree, one must be in biology, environmental science, GIS or sustainability.

### Requirements for Distinction in the Major for the Bachelor of Arts or Bachelor of Science Degrees

- Minimum 3.0 cumulative GPA
- Minimum 3.5 major GPA
- CHEM 3500 (Frontiers) or CHEM 3820 (Biochemistry Lab)
- Six credits of research
- Completion of a thesis
- Presentation of poster at Undergraduate Research Symposium

The recommended order of courses is listed below for each degree. Please consult your advisor each quarter.

### Chemistry

**Bachelor of Arts (p. 76)**

Chemistry credit: 40; calculus credit: 12; physics credit: 15

Total Credits: 183

1 One year of calculus is required. One year of University Physics (recommended) or General Physics is required. Physics is a prerequisite for Physical Chemistry. The third quarter of physics may be taken at the same time as Physical Chemistry I. Students are encouraged to take Physical Chemistry II and III.

Courses

CHEM 1001 Science of Contemporary Issues I (4 Credits)
CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

CHEM 1002 Science of Contemporary Issues II (4 Credits)
CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

CHEM 1003 Science of Contemporary Issues III (4 Credits)
CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

CHEM 1010 General Chemistry I (3 Credits)
The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.
CHEM 1020 General Chemistry II (3 Credits)
The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

CHEM 1240 General Chemistry I Laboratory (1 Credit)
Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

CHEM 1250 General Chemistry II Laboratory (1 Credit)
Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

CHEM 1992 Directed Study (1-10 Credits)

CHEM 2131 Chemistry of the Elements (3 Credits)
Descriptive chemistry of main group and transition elements including redox and coordination chemistry. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

CHEM 2141 Chemistry of the Elements Lab (1 Credit)
Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course.

CHEM 2240 Introduction to Environmental Chemistry (4 Credits)
An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

CHEM 2270 Quantitative Chemical Analysis (4 Credits)
This combined lecture-laboratory course is primarily focused on understanding and applying the principles and techniques associated with making quantitative chemical measurements. Topics covered include statistics, applications of acid-base, complexation, precipitation, and redox titrations in chemical measurements, activity, electroanalytical techniques, and gravimetric analysis. Lab Fee associate with this course. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2451 Organic Chemistry I (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2452 Organic Chemistry II (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451 and CHEM 2461.

CHEM 2453 Organic Chemistry III (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451, CHEM 2452, CHEM 2461, and CHEM 2462.

CHEM 2461 Organic Chemistry Lab I (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2451.

CHEM 2462 Organic Chemistry Lab II (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2452.

CHEM 2463 Organic Chemistry Lab III (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2453.

CHEM 2992 Directed Study (1-10 Credits)

CHEM 3110 Chemical Systems I (3 Credits)
Advanced discussion of modern concepts of organic chemistry; bonding, stereochemistry, reaction mechanisms. Prerequisites: CHEM 2453 and equivalent of one year of physical chemistry.

CHEM 3120 Chemical Systems II (3 Credits)
Interpretation of trends in the chemistry of the elements in terms of orbital interactions. Most examples will be taken from the third row transition metals and the boron and carbon groups. Prerequisites: CHEM 2131, CHEM 3310 and CHEM 3110.
CHEM 3130 Chemical Systems III (3 Credits)
Advanced-level physical biochemistry course intended for advanced-level undergraduates and graduate students. Focuses on kinetic, thermodynamic and dynamic aspects of biopolymers; delineates the relationship of these properties to the mechanism and function of biological macromolecules. Prerequisites: CHEM 3811, CHEM 3812, CHEM 3813, CHEM 3610 or the equivalent.

CHEM 3210 Instrumental Analysis (4 Credits)
Course focus is toward students' understanding of instrumental components and the theory behind both component's and instrument's operation. Emphasis is on techniques such as spectroscopy and chromatography. Students will experience extensive hands-on use of a number of instruments. Course provides a strong background for Chemistry Frontiers (CHEM 3500) and emphasizes techniques and skills sought by chemical and biotechnology industries. Lab fee associated with this course. Prerequisites: CHEM 2011 or CHEM 2270.

CHEM 3220 Advanced Analytical Chemistry (3 Credits)
Principles of chemical instrumentation applied to analytical measurements; principles, instrumentation and applications of spectrometric and chromatographic measurements. Prerequisites: CHEM 3210 and CHEM 3621, or the equivalent.

CHEM 3310 Structure and Energetics I (3 Credits)
Fundamentals of quantum chemistry, and introduction to symmetry and molecular structure of small and large systems. Prerequisite: one year of physical chemistry.

CHEM 3320 Structure and Energetics II (3 Credits)
Computational methods in chemistry. Prerequisites: CHEM 3310, one year of physical chemistry.

CHEM 3410 Atmospheric Chemistry (3 Credits)
The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 or CHEM 3610) and CHEM 2453.

CHEM 3411 Aquatic Chemistry (3 Credits)
The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 or CHEM 3610) and CHEM 2453.

CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)
A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: (CHEM 2270 or CHEM 3610) and CHEM 2453.

CHEM 3500 Chemistry Frontiers (3 Credits)
Advanced-level laboratory course required for all undergraduates majoring in chemistry or environmental chemistry. Emphasis on the development of oral, written, computer and presentation skills necessary for success as a scientist. Skills will be honed through state-of-the-art laboratory experiences from diverse areas of chemistry. Lab fee associated with this course. Prerequisites: CHEM 3210 and CHEM 3610.

CHEM 3610 Physical Chemistry I (3 Credits)
Fundamentals of thermodynamics, including phase and reaction equilibria, properties of solutions, and electrochemistry needed for advanced study in life sciences and for Physical Chemistry II and III. May be taken for graduate credit by nonchemistry majors. Prerequisites: CHEM 2453, calculus and physics.

CHEM 3620 Physical Chemistry II (3 Credits)
Fundamentals of quantum chemistry, including theories of atomic and molecular structure and spectroscopy. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3610.

CHEM 3621 Physical Chemistry III (3 Credits)
Fundamentals of kinetic theory and statistical mechanics. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3620.

CHEM 3703 Topics in Organic Chemistry (3 Credits)
May include organic photochemistry, organic synthesis, organic electrochemistry or natural products. May be repeated for credit. Prerequisites: CHEM 3110 or equivalent and others depending on topic.

CHEM 3705 Topics in Biochemistry (3,4 Credits)
May include physical techniques for exploring biological structure, biological catalysis, and selected fields within biochemistry taught from original literature. May be repeated for credit. Prerequisites: CHEM 3831 and 3813.

CHEM 3811 Biochemistry-Proteins (3 Credits)
Protein structure and function, starting with the building blocks and forces that drive the formation of protein structure and the basic concepts of protein structure, and continuing with enzyme catalysis, kinetics, and regulation. Prerequisites: CHEM 2453 or instructor permission.

CHEM 3812 Biochemistry-Membranes/Metabolism (3 Credits)
Membranes and membrane mediated cellular processes, energy and signal transduction, and metabolic/biosynthetic pathways. Prerequisite: CHEM 3811 or CHEM 3831.
CHEM 3813 Biochemistry-Nucleic Acids (3 Credits)
Molecular processes underlying heredity, gene expression and gene regulation in prokaryotes and eukaryotes. Prerequisites: CHEM 2453 and CHEM 3811.

CHEM 3820 Biochemistry Lab (3 Credits)
Purification and properties of biological molecules and structures. Lab fee associated with this course. Prerequisites: CHEM 3811 AND (CHEM 2011 OR CHEM 2270).

CHEM 3831 Advanced Protein Biochemistry (3 Credits)
This course provides fundamental insights into the chemistry and physics of proteins. It investigates how amino acids form proteins with highly complex three-dimensional structures and how these structures mediate function. We examine key research articles and their contribution to our current understanding of proteins. Topics range from protein folding to enzyme kinetics and emphasize basic principles. Prerequisites: CHEM 2453 and instructor permission.

CHEM 3991 Independent Study (1-10 Credits)
May be repeated for credit.

CHEM 3992 Directed Study (1-10 Credits)

CHEM 3995 Research in Chemistry (1-10 Credits)
Research project conducted under guidance of a faculty member. Credit hours and projects arranged on an individual basis. May be repeated for credit.

Communication Studies
Office: Sturm Hall, Room 200
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Undergraduates studying communication in the Department of Communication Studies are offered an exciting window into the role that communication plays in the human condition. That is, we are committed to the notion that communication plays a crucial role in shaping the world around us and that, as a result, the way that we communicate can contribute to the type of world in which we wish to live. Thus, our courses are committed to exploring the role of communication in fostering high-quality human relations in interpersonal, organizational, cultural and public contexts.

We see the merit in asking a range of empirical, interpretive and critical questions about how our communication with one another occurs. Such questions are grounded in the foundational premise that human interaction is fundamental to the construction, development and maintenance of personal, social and institutional relationships and to the organization of social life as we know it today.

College graduates face a world where they can expect to change careers several times over but know that, no matter what career they choose, they will have to communicate in order to be successful. Further, workplace success depends on the ability to communicate with others. Workers across all careers in all fields communicate through various means—face-to-face and electronic. A major in communication studies cultivates the skills and theory that go together to help create successful lives and careers.

Studying communication offers excellent preparation for students interested in careers in law, politics, business, health, nonprofits, the arts and many more. Additionally, many of our graduates attend graduate school to study communication studies, business and law. Further, our students know that their ability to understand communication will have a profound influence on the quality of their lives beyond their careers, extending into their personal, familial and civil lives.

Communication Studies
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))

40 credits, including the following:

COMN 1015  Voice and Gender

**Communication Inquiry Courses**

Select two of the following:

- COMN 2110  Quantitative Inquiry in Communication
- COMN 2150  Rhetorical/Critical Communication Inquiry
- COMN 2200  Qualitative Inquiry in Communication

**Breadth Requirements**

A minimum of 12 credits (three courses) is required. One of which must be a 1000 level course (with the exception of COMN 1210, COMN 1011, COMN 1012, COMN 1015). One of which must be a 2000 level course (with the exception of COMN 2110, COMN 2200, COMN 2150).

**Depth Electives**

A minimum of three 3000 level courses (12 credits) is required. One of which must be a Capstone Seminar or an Internship (by application only).

**Total Credits**

40

**SECONDARY MAJOR**

40 credits. Same requirements as for BA degree.

**Minor Requirements**

20 credits, including the following:

For Performative Courses, please add: COMN 2000 Identities in Dialogue as an option on the last underneath COMN 1015 Voice & Gender. We also need to add, under Communication Contexts Courses, Select two communication contexts courses: "(Note that COMN 2000 may count as either a Peformative Course OR a 2000-level Communication Contexts Course)"

**Requirements for Distinction in the Major in Communication Studies**

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Completion of three 3000-level courses
- Completion of a culminating project

**BA in Communication Studies**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students
can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

\footnote{INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.}

**Courses**

**COMM 1011 Comm through Literature (4 Credits)**
This course emphasizes the analysis and performance of diverse forms of literature. In addition to the dramaturgical elements of interpretation that are highlighted in this course, students learn how to contextualize serious public issues through literature while developing confidence and skills as performers and public speakers.

**COMM 1012 Speaking on Ideas that Matter (4 Credits)**
The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts.

**COMM 1015 Voice and Gender (4 Credits)**
In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today’s society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.
COMN 1100 Communication in Personal Relationships (4 Credits)
Relationships have a direct and lasting impact on us: they shape who we are, and the paths we take toward who we will become. The purpose of this course is to analyze and apply theories and research relevant to communication processes in a variety of personal relationships. Discussion of issues such as attachment, identity, hetero- and homosexual relationships, family communication, conflict, and intrapersonal discourses will provide students a foundation on which to build skills useful in a variety of personal relationships. In Communication in Personal Relationships, students will: sensitively express attitudes and discuss research about different issues pertinent to the study of personal relationships; develop the skills to critically analyze their own relationships and the relationships of others; reflect on and challenge their and others’ ideas in a critically constructive manner so that we arrive at a new level of understanding together; and demonstrate the ability to apply communication and interpersonal theories and research outside of this classroom upon completion of the course.

COMN 1200 Small Group Communication (4 Credits)
This course approaches small group communication through a combination of theory and practice. Theories related to group development and leadership, collaborative communication, dialogue and rhetorical sensitivity, and principled negotiation and consensus, are explored through group discussions, research, case studies and presentations. Students have the opportunity to: strengthen their critical thinking and listening skills; confidently voice their identity within a greater community; increase their ability in writing and presenting their thoughts; and develop communication competence by facilitating civility within small group settings.

COMN 1210 Foundations of Communication Studies (4 Credits)
This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

COMN 1500 Communication in the Workplace (4 Credits)
This course offers a topics-based introduction to the study and practice of communication in a variety of organizational settings. The emphasis is on issues of power, politics, globalization, culture, diversity, relationships, and conflict. Students learn how to recognize, diagnose, and solve communication related problems in the workplace.

COMN 1600 Communication and Popular Culture (4 Credits)
This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or ‘lenses’ to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

COMN 1700 Fundamentals of Intercultural Communication (4 Credits)
This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

COMN 1992 Directed Study (1-10 Credits)

COMN 2000 Identities in Dialogue (4 Credits)
This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others’ experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

COMN 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week’s speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
COMN 2020 On the Black Panther Party (4 Credits)
This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2030 Social Movement Rhetoric (4 Credits)
This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the “right” and the “left”– as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2100 Fundamentals of Communication Theory (4 Credits)
Basic concepts, theories and models of the communication process.

COMN 2110 Quantitative Inquiry in Communication (4 Credits)
This course is designed to introduce students to the process of reading, analyzing, conducting and critiquing quantitative research in communication studies. Research is a pervasive aspect of contemporary life, both inside and outside of the university. As such, many of the jobs taken by communication studies majors require, or are at the very least enhanced by, the ability to conduct and interpret research. This course introduces students to the various aspects associated with quantitative research methods in an effort to illuminate the significance of research about communication in our lives and help students act as critical consumers of the research encountered.

COMN 2115 Performance & Social Change (4 Credits)
In this course students explore the possibilities of making political performances, or making performances political. We examine and create performances that take place in public by-ways rather than theatre buildings, and that are intended to question or re-envision dominant arrangements of power. We are particularly concerned with how performance may contribute to processes of social change. The course also guides students through the process of creating new works of theatre for social change, focusing on political issues chosen by students themselves.

COMN 2120 Collaborative Leadership (4 Credits)

COMN 2130 Introduction to Organizational Communication (4 Credits)
This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, and critical perspectives. The course uses these perspectives to deepen students’ understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives.

COMN 2140 The Dark Side of Relationships (4 Credits)
This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes.

COMN 2150 Rhetorical/Critical Communication Inquiry (4 Credits)
This course focuses on the process of interpreting, understanding, and evaluating everyday persuasive acts for the purpose of sharing insights and influencing the community audience. This course fosters a variety of analytical skills, including how to describe primary rhetorical acts (such as speeches, films, news coverage, television programs, songs, advertisements, and public commemorative art, among others) in rich, relevant detail; how to situate or make sense of rhetorical acts within their historical, cultural moments; and how to use theory to develop a critical perspective that helps to render a judgment about a text or act. Students sharpen critical instincts by working through the invention process to produce a piece of rhetorical or cultural criticism.

COMN 2200 Qualitative Inquiry in Communication (4 Credits)
This course focuses on introducing students to a selection of qualitative methods used in communication research. The class covers the basic techniques for collecting, interpreting, and analyzing qualitative data. Throughout the term, the course operates on two interrelated dimensions: one focused on the theoretical approaches to various types of qualitative research, and the other focused on the practical techniques of data collection and analysis, such as interviewing and collecting field notes.

COMN 2210 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities “from the ground up.” This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.
COMN 2220 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2300 Fundamentals of Argumentation (4 Credits)
This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2400 Landmarks in Rhetorical Theory (4 Credits)
This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2450 Between Memory & Imagination (4 Credits)
How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2470 Gender and Communication (4 Credits)
Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

COMN 2471 The Social Construction of Travel (4 Credits)
Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2541 Advanced Debate and Forensic Activities (1-4 Credits)
This course serves as a practicum for students interested in developing advanced argumentation skills. The focus is on preparing students for competition in intercollegiate debate. Students engage in in-depth research of debate topics, as well as participate in substantial practice of arguments and positions developed as necessary to prepare for intercollegiate competition.

COMN 2542 Directed Study (1-10 Credits)

COMN 3005 Diverse Family Communication (4 Credits)
This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

COMN 3010 Critical Sexuality Studies (4 Credits)
This course takes a critical approach to the study of sexualities by asking us to challenge our assumptions and everyday knowledges about identities, gender, sexuality, race, class, and ethnicity. This course is organized thematically as we explore various topics within the larger study of critical sexuality studies and communication studies. We examine contemporary issues within queer theory, critical race studies, identity politics, feminism, performance studies, and popular culture.
COMN 3015 Culture and Pedagogy (4 Credits)
This seminar invites students to analyze and reflect upon the ways in which individuals and groups have created cultural ideals, images, and constructs of education. The course focuses upon pedagogy broadly conceived as an integral part of a diverse and conflictual society and on how pedagogies shape our understanding and reproduction of, as well as our resistance to, such a society. We explore a variety of conflicting views of what it means to be educated, for what purpose, for what kind of society, and towards what future.

COMN 3020 Conflict Management (4 Credits)
Substantive and relational types of conflict, various strategies for conflict resolution.

COMN 3025 Latina/o Communication Studies (4 Credits)
As the Latina/o population continues to grow in the United States, having become the largest “minority” population in the United States, it becomes increasingly important to understand and respect the cultures of this heterogeneous community. Latina/os are often erroneously subsumed or rendered invisible by dominant constructions of race within the United States that rely on a hegemonic black/white binary. Given the increasing visibility and growth of this course, this course examines the development of Latina/o Studies within the field of communication studies by taking both an historical and a contemporary approach.

COMN 3030 Performance Studies (4 Credits)
This course focuses on the study of performance within the field of communication studies. Unlike theater which tends to focus primarily on traditionally staged performance, in this course we are concerned with performances of everyday life as they relate to identities, ritual, culture, and personal narrative.

COMN 3035 Performing Culture (4 Credits)
This course examines performance as theory and method to understand how everyday and mediated performances communicate a variety of cultural, social, and political perspectives and identities. This course also explores aesthetic, rhetorical, and ethnographic functions of performance and how they implicate cultural identity constructions of self and others.

COMN 3050 Feminism and Intersectionality (4 Credits)
This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

COMN 3110 Intergroup Communication (4 Credits)
This course is designed to provide students with insight into the nature of communication related to the ways that we socially categorize ourselves and others as members of ingroups and outgroups. In particular, students exit the course with a greater understanding of the (a) theoretical foundations of social identity and intergroup relations, (b) communicative and cognitive processes related to social comparison, prejudice, discrimination, and conflict within and between groups, (c) outcomes associated with intergroup contact, and (d) intergroup and social identity processes that underlie past, present, and future social issues.

COMN 3120 Asian Pacific American Communication Studies (4 Credits)
This course examines Asian Pacific American Studies within the field of communication studies by exploring performances, constructions, and representations of Asian Pacific American identities in U.S. education, popular culture, and other everyday contexts. This course will also investigate the implications of U.S. historical, political, and social discourses of race, culture, and identity on Asian Pacific Americans.

COMN 3130 Organizational Communication (4 Credits)
This is an applied course, service learning course, based on a consulting model. While the course will extend and enrich the topical and theoretical knowledge developed in COMN 1550 and COMN 2130, the primary purpose of this course will be to help students explore how they can put such knowledge into practice by collectively working with a local non-profit organization to first diagnose and then propose (and, in some cases implement) solutions to an organizational communication problem faced by that organization.

COMN 3140 Advanced Intercultural Communication (4 Credits)
This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

COMN 3230 Principles of Leadership (4 Credits)
Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

COMN 3240 Group Methods and Facilitation (4 Credits)
Discussion and small group methodologies and their theoretical rationale.

COMN 3245 Building Group/Team Effectiveness (4 Credits)
The objectives of this course are to help students acquire a deeper understanding of groups and teams, how they function, and what contributes to their success or failure. It also aims to help students develop the skills and capacities that will allow them to contribute in concrete and significant ways to successful outcomes and satisfying experiences for themselves and others in groups and teams. Cross listed with LDRS 2540.

COMN 3270 Health Communication (4 Credits)
This course examines the role of health communication in our everyday lives. We will focus on communication strategies that inform and influence individuals, families and communities in decisions that enhance health. We will also explore the dynamics and impact of health communication between individuals and the health care system such as doctor-patient communication, dissemination of health related information, and the role of mediated communication in examining health communication.
COMN 3280 Family Communication (4 Credits)
The purpose of this course is to enhance understanding about communication patterns within families. In this course, we will examine theory/research on the role of communication in creating and maintaining healthy marriages and families. Specifically, we will study communication and the family life cycle, different family forms, family race/ethnicity, power in families, conflict in families, communication and stress in families, and communication in the aging family. The course format includes lectures, discussions, analysis of case studies, and in class applications.

COMN 3285 Advanced Relational Communication (4 Credits)
Advanced Relational Communication is intended to increase understanding of relationships from diverse perspectives. The three main perspectives we will investigate show how relationships affect and are affected by the context, the individuals involved, and the relational system. The goals of this course are for students to increase their skill in (1) explaining how knowledge about context, individuals, and relational systems increases understanding of communication processes in a variety of relationships; (2) evaluating critically the information about relationships that we encounter in our everyday lives; (3) asking and investigating questions about real-life relationships.

COMN 3290 Communication and Aging (4 Credits)
In this course, we will focus on the communication processes associated with aging. We will explore the implications of aging and how aging affects the process and outcomes social and relational interactions. We will examine communication and aging through interactional processes (intraperosnal, interpersonal and relational) and through context (organization, family, health, and culture). Emphasis will be placed on the theoretical and applied research in communication and aging.

COMN 3300 Principles of Persuasion (4 Credits)
This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

COMN 3310 Globalization, Culture, and Communication (4 Credits)
Drawing from a critical multidisciplinary perspective, this course examines how culture and communication are impacted by globalization. The course explores issues of power and positionality, as well as economic, political, and cultural implications of globalization on people, products, and ideologies in both local and transnational contexts.

COMN 3315 Public Deliberation (4 Credits)
During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?

COMN 3425 Rhetoric and Governance (4 Credits)
An introduction to the works of Michel Foucault and his influence on contemporary rhetorical theory. Permission of instructor is required.

COMN 3431 Rhetoric and Communication Ethics Seminar: Communication and Climate Change (4 Credits)
Since the release of Al Gore's "An Inconvenient Truth," American public discourse has become increasingly concerned with global warming. Not only is there nearly 100% consensus among climate scientists that human-induced climate change exists, but the severity of global warming is entering the popular imaginary, in the form of journalism, films, etc. But while scientists are committed to slowing global warming, the types of sweeping policy and behavioral changes needed to abate the projected climate catastrophe have been very slow in coming. As such, communication scholars–particularly those concerned with the art of public persuasion–are in a unique position to contribute to this significant and complex issue. In the words of climate scientists Susanne Moser and Lisa Dilling, "We need to open up the communication process to a wider community, in which participants own the process and content of communication." The goal of this course is to produce original scholarly research in response to Moser and Dilling's call, to invite more and better communication concerning climate change.

COMN 3435 Rhetoric and Public Life (4 Credits)
An introduction to the conceptual and political history of the public sphere. The course pays particular attention to how the normative assumptions of public communication are affected by the demands of cultural pluralism. Permission from instructor is required.

COMN 3470 Seminar in Free Speech (4 Credits)
This course will survey some of the major conceptual innovations in the justifications of freedom of speech. We will begin with an exploration of the traditional defenses of free speech and then move to a reexamination of those defenses in light of modern communication theory and the challenges of pluralism. In particular we will ask if the justifications of free speech need to be rethought given our understanding of speech as a social force that constitutes identities and values rather than merely expressing private opinions. Moreover, given our understanding of the social force of speech, should we regulate speech that is racist, sexist and seems to erode the foundations of a public culture based on mutual respect and public deliberation over social goods? Can we devise a robust defense of free speech based on its social force that both protects those that may be harmed by antidemocratic discourses and still provides the resources for democratic dissent?

COMN 3500 Advanced Public Speaking (4 Credits)
Theory, preparation, delivery and evaluation of public speeches.
COMN 3680 Gender and Communication (4 Credits)
This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

COMN 3700 Topics in Communication (1-4 Credits)
COMN 3701 Topics in Communication (1-4 Credits)
COMN 3702 Topics in Communication (1-4 Credits)
COMN 3703 Topics in Communication (1-4 Credits)
COMN 3704 Topics in Communication (1-4 Credits)
COMN 3705 Topics in Communication (1-4 Credits)
COMN 3770 Mediated Communication and Relationships (4 Credits)
This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

COMN 3800 Philosophies of Dialogue (4 Credits)
This course explores the philosophies of dialogue of Martin Buber, Mikhail Bakhtin and others in the context of contemporary communication scholarship on ethics, culture, and relationship. Prerequisite: permission of instructor.

COMN 3850 Communication Ethics (4 Credits)
This class is not just about how to be ethical communicators but it is also about how to discover ethics—the good life and care for others, answerability and responsibility—deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

COMN 3980 Internship (1-8 Credits)
COMN 3990 Communication Capstone (4 Credits)
This course allows students to synthesize knowledges across the communication studies major through original research presentation.

COMN 3991 Independent Study (1-5 Credits)
COMN 3992 Directed Study (1-10 Credits)
COMN 3995 Independent Research (1-10 Credits)
Topics and quarter hours vary. Prerequisite: instructor’s permission.

Computer Science

Office: Aspen Hall North, Suite 100
Mail Code: 2280 S. Vine St. Denver, CO 80208
Phone: 303-871-3010
Email: info@cs.du.edu
Web Site: http://www.du.edu/rsecs/departments/cs

The Information Age affects every aspect of society—computer applications, multimedia, and the Internet. The Department of Computer Science offers four undergraduate programs. Graduates of the program have found employment in all areas of the computer software industry and in the application of computers in a wide variety of companies, ranging from aerospace to game development to insurance. Our graduates work at companies including IBM, Microsoft, Google, Oracle, LinkedIn, Facebook, Raytheon and Amazon. Many alumni have pursued graduate studies in computer science or management information systems at DU and other highly respected universities around the country.

The department offers majors in computer science, applied computing, and game development.

Computer Science

Computer science encompasses the theory and techniques by which information is encoded, stored, communicated, transformed and analyzed. It is concerned with the theory of algorithms (that is, effective procedures or programs), with the structure of languages for the expression of algorithms and with the design of algorithms for the solution of practical problems. A central concern is the study of the computer systems (hardware and software) for the automatic execution of these algorithms.
The Department of Computer Science at the University of Denver offers a bachelor of science in computer science. The degree is strongly based in mathematics and, in fact, a student will automatically acquire sufficient credits for a minor in mathematics. One additional minor is required. The second minor may be in any discipline other than mathematics or computer science.

**Bachelor of Science in Computer Science Major Requirements**
(183 credits required for the degree (p. 79))

In addition to major course work, a minor in mathematics is required. Please refer to the Department of Mathematics (p. 361) for details.

56 credits, including the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</table>

¹If this course is used towards the MATH minor, it must be replaced with a 2000-level or above COMP elective, i.e. the total number of COMP credits, including COMP 2300, should equal 60 when there are only 16 hours of MATH minor credits.

²COMP 3904 Internship/Co-Op in Computing may not be used to satisfy 3000-level computer science elective credits.

**Minor in Computer Science Requirements**

A minor in Computer Science requires a total of 20 credits. The goal of the minor is to provide students with a foundation in computer programming while allowing some flexibility in elective courses to compliment their interests. Students are required to take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 1671</td>
<td>Introduction to Computer Science I</td>
<td>12</td>

**Applied Computing**
The Bachelor of Arts in Applied Computing (BA in AC) provides a quality education for a serious computer user. It complements the department’s Bachelor of Science in Computer Science by providing a program that combines collaboration with other departments and an applications-oriented emphasis. A prospective BA in AC major must satisfy all the requirements for a Bachelor of Arts (p. 76) degree as outlined in the University Undergraduate Bulletin.

The BA in AC is a suitable degree for many collaborative programs within the University and would be ideal for students in graphic arts and electronic publishing or would provide an appropriate foundation for a student who wishes to pursue a career in the field of educational technology. A graduate with a BA in AC would be very attractive in the data processing unit of large financial, banking, or insurance institutions, as a network or system administrator or as a World Wide Web designer/programmer. Holders of the BA in AC degree would also be well suited to continue in any number of specialized Master’s or certificate programs in fields as diverse as video an graphics production, fashion design, telecommunications, instructional technology, or management information systems.

**Bachelor of Arts in Applied Computing Major Requirements**
(183 credits required for the degree (p. 76))
This major requires 45 credits of computer science or other approved computer applications and mathematics courses of which 25 credits must be at or above the 2000 level. Per University requirements (p. 76), no more than 60 credit hours in any one department can be applied towards a Bachelor of Arts (p. 76) degree. Required courses are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 1671</td>
<td>Introduction to Computer Science I</td>
<td>12</td>

<tr>
<td>COMP 3421</td>
<td>Database Organization &amp; Management I</td>
<td>4</td>
</tr>
</tbody>
</table>

Electives

Selected in consultation with a departmental advisor. See suggested elective courses below.  

Total Credits 45

At most, 15 credits of approved computer applications courses can be applied from other University departments.

**Suggested Elective courses from the Department of Computer Science for the Bachelor of Arts in Applied Computing**

The choice of electives depends solely on the anticipated needs of the student. The following list suggests typical advanced departmental courses that a student might take. Elective courses and direction of study should be chosen in consultation with the departmental advisor:

- Intro to Systems Programming (COMP 2355)
- Software Tools (COMP 2400)
- Computing and Society (COMP 2901)
- World Wide Web Programming (COMP 3410)
- Introduction Computer Graphics (COMP 3801)
- Software Engineering I (COMP 3381)

**Elective Courses from Other Units Acceptable in this Program**

Here are some typical courses from other departments that might establish areas of interest for students in the Applied Computing Major. Several of these classes have prerequisites (not listed here) that students need to be aware of. A student will typically be minoring or double-majoring in another department and will usually have been prepared for the courses listed here. No more than 16 credit hours can be applied to the BA in AC from other units. Students will choose appropriate sequences in consultation with an advisor from the other department and with the approval of an advisor in the Department of Computer Science.

**Emergent Digital Practices Theme:**

- Imaging in Emergent Digital Practices (EDPX 2000)
- Time in Emergent Digital Practices (EDPX 2400)
- Data Visualization (EDPX 3200)
- Tangible Interactivity (EDPX 3310)

**Geographic Information Systems Theme:**

- Introduction to Geographic Information Systems (GIS) (GEOG 2100)
- Geographic Information Analysis (GEOG 3010)
- GIS Database Design (GEOG 3140)

**Media, Film Studies, and Journalism Theme:**

- Online & Visual Journalism (MFJS 2240)
- Digital Graphic Design (MFJS 3201)
- Introduction to Field Production & Editing (MFJS 3215)
- Web Design & Content Development (MFJS 3501)
Game Development

The game development programs are a joint effort by the University of Denver Computer Science, Emergent Digital Practices and Art programs. Specific degrees offered are:

- Bachelor of Arts with a major in Game Development, and
- Bachelor of Science with a major in Game Development.

Graduates of these programs not only have solid computer science, graphics and game-programming skills, but also a strong foundation in art and/or the critical, technical and design aspects of digital media. To obtain this foundation, the major requires work in allied fields. Allied areas include Studio Art and Emergent Digital Practices. The depth of allied knowledge is dependent on the degree (BA or BS) chosen.

Bachelor of Arts in Game Development Major Requirements
(183 credits required for the degree (p. 76))

The Bachelor of Arts in Game Development is a degree which prepares students to be capable of creating artistic content and designing game play for games while having a strong technical background, enabling them to bridge the gap between artist, programmer and designer. The BA requires a major in Game Development and a Minor in Emergent Digital Practices (p. 207). A graduate of this program will be able to study and work as a developer, game designer and an artist. The BA requires more courses in the allied art fields than the BS and is balanced by having fewer required Math and Computer Science courses.

52 credits, including the following:

Total Credits 52-56

Bachelor of Science in Game Development Major Requirements
(183 credits required for the degree (p. 79))

The Bachelor of Science in Game Development is a combination of a Computer Science degree, specific courses in Game Development, and requires a Minor in Mathematics (p. 361), a second minor of your choice, and a cognate of five approved classes from Art (p. 123) and Emergent Digital Practices (p. 207). In addition, both degrees require satisfying the University Common Curriculum requirements for the BS degree.

This program provides a strong computer science and technical background, preparing students for all aspects of game programming, while providing them with (1) a foundation in art that includes both appreciation and understanding of the significance of art, with some ability to create art themselves, or (2) a foundation in the critical, technical and design foundations in Emergent Digital Practices. Thus, graduates of this program are able to help in the programming and development of games, while understanding and being able to communicate effectively with the artists and designers who are part of any game development project. The BS requires more mathematics and more required COMP classes than the BA and is balanced with fewer classes in the allied fields.

The following courses are required for the BS in Game Development:
Bachelor of Science in Computer Science

The following is a typical plan of study for a BS in Computer Science major. Note that flexibility in the junior and senior years allows students to study abroad in any quarter fairly easily.

Total Credits: 181-184
### Bachelor of Arts in Game Development

The following is a typical plan of study for BA in Game Development majors. Students have the flexibility to study abroad typically in their junior year and have significant flexibility to either double major in Emergent Digital Practices (p. 207) (instead of just the minor) or take a second minor.

#### First Year

**Total Credits: 177-184**

### Requirements for Distinction in the Major in Computer Science

- Minimum 3.3 cumulative GPA in major courses
- Research project including paper and presentation
Requirements for Distinction in the Major in Applied Computing
• Minimum 3.3 cumulative GPA in major courses

Requirements for Distinction in the Major in Game Development
• Minimum 3.3 cumulative GPA in major courses

Courses

COMP 1101 Analytical Inquiry I (4 Credits)
Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

COMP 1571 Procedural Programming I (3 Credits)
The C programming language is used to introduce fundamental procedural programming including engineering applications. Programming topics include an overview of computers and programming languages, variables and data types, arithmetic operators, input/output, comments, control structures, user-defined functions, scope, constants, file I/O, and pointers. Prerequisite: high school algebra.

COMP 1572 Procedural Programming II (3 Credits)
The Java programming language is used to introduce object-oriented programming. Topics include fundamental object-oriented concepts, class design and implementation, inheritance, polymorphism, exceptions, and event-driven programming. Prerequisite: COMP 1571.

COMP 1670 Introduction to Computing (4 Credits)
Overview of computing, including history and impact, use of computer as a tool in various disciplines, logical process of problem solving, and concepts of programming using a high-level language. Appropriate for students who wish to learn more about computers but are not planning to continue in computer science. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

COMP 1671 Introduction to Computer Science I (4 Credits)
Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

COMP 1672 Introduction to Computer Science II (4 Credits)
Advanced programming techniques; arrays, recursion, dynamic data structures, algorithm abstraction, object-oriented programming including inheritance and virtual functions. Prerequisite: COMP 1671.

COMP 1771 Introduction to Computer Science I - Honors (4 Credits)
This is an honors section of Introduction to Computer Science 1 meant for incoming freshman who are already experienced in computer programming. This course is meant to be faster paced than its counterpart COMP 1672/1671. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: AP credit in Java, at least one quarter of programming, or permission of instructor.

COMP 1991 Independent Study (1 Credit)
COMP 1992 Directed Study (1-10 Credits)

COMP 2001 Bridge Course I: Computer Science Theory Basics (4 Credits)
This accelerated course covers the basics of discrete mathematics including functions, relations, counting, logic, proofs etc that is necessary to attend CS graduate school. In addition, it includes an introduction to programming and algorithm analysis.

COMP 2002 Bridge Course II: Computer Science Theory Advanced (4 Credits)
This accelerated course continues to build on the basics of discrete mathematics by covering material including advanced counting, recurrences, graphs, trees, traversals, automata etc that is necessary to attend Computer Science graduate school. In addition, it includes an introduction to additional algorithms and data structures. Prerequisite: COMP 2001.

COMP 2003 Bridge Course III: Computer Science Systems Basics (4 Credits)
This accelerated course covers the basics of computer systems including assembly language programming, addressing modes, logic design etc necessary to attend CS graduate school. In addition, it includes an introduction to C programming language. In particular, standard I/O, data manipulation, pointers, and dynamic memory management.

COMP 2004 Bridge Course IV: Computer Science Systems Advanced (4 Credits)
This accelerated course continues to build on the basics of computer systems by covering material including UNIX tools, version control, process creation, concurrent programming etc that is necessary to attend Computer Science graduate school. In addition, it includes an introduction to a scripting language. Prerequisites: COMP 2003.

COMP 2300 Discrete Structures in Computer Science (1-4 Credits)
Number systems and basic number theory, propositional and predicate logic, proof techniques, mathematical induction, sets, counting and discrete probability, case studies with applications from computer science, such as data representation, algorithm analysis and correctness, and system design.
COMP 2355 Intro to Systems Programming (4 Credits)
The prerequisites for this class are a good understanding of imperative and object-oriented programming in Java. The prerequisites for this class include a good understanding of basic programming constructs, such as branches (if, switch), loops (for, while, do), exceptions (throw, catch), functions, objects, classes, packages, primitive types (int, float, boolean), arrays, arithmetic expressions and boolean operations. Computer organization is a parallel prerequisite; if possible, students should register for both this course and COMP 2691. You must have a good understanding of basic data structures such as arrays, lists, sets, trees, graphs and hash-tables. This is a class on systems programming with focus on the C programming language and UNIX APIs. There will be programming assignments designed to make you use various Debian GNU/Linux system APIs. Programming assignments involve writing code in C or C++. Prerequisite: COMP 2673.

COMP 2370 Introduction to Algorithms & Data Structures (4 Credits)
Performance analysis of algorithms; data structures and their physical storage representation; recursive techniques; stacks, queues, lists, trees, sets, graphs; sorting and searching algorithms. Prerequisites: MATH 2200 or COMP 2300 and COMP 2673.

COMP 2400 Software Tools (4 Credits)
Introduction to tools for program development and efficient use of a workstation environment. Topics include UNIX commands, emacs environment, X-windows, separate compilation of large projects, user-defined libraries, makefiles, intelligent debugging, perl, HTML, rcs/sccs, tcl/tk and assorted additional topics. Prerequisite: COMP 2370 or instructor’s permission.

COMP 2555 Principles of Computer Forensics (4 Credits)
Data recovery techniques, auditing methods and services, data seizure, preservation of computer evidence, reconstruction of events, and information warfare. Prerequisite: COMP 1672 or programming experience.

COMP 2673 Introduction to Computer Science III (4 Credits)
An introduction to several advanced topics in computer science. Topics vary from year to year and may include any of the following: theory of computing, cryptography, databases, computer graphics, graph theory, game theory, fractals, mathematical programming, wavelets, file compression, computational biology, genetic algorithms, neural networks, simulation and queuing theory, randomized algorithms, parallel computing, complexity analysis, numerical methods. Prerequisite: COMP 1672 or COMP 1771.

COMP 2691 Introduction to Computer Organization (4 Credits)
This course covers basic topics in Computer Organization and is a required course in the BS in Computer Science, BS in Game Development, and BS in Computer Engineering degrees. Topics include: instruction set architectures, integer and floating point arithmetic, processors, memory systems, and topics in storage and Input/Output.

COMP 2701 Topics in Computer Science (1-5 Credits)

COMP 2821 Introductory Game Design (4 Credits)
Learn the fundamental game design practices and how to transition from a design, to a prototype, to a final game. This course covers theory, design, 2D game art, and culminates in the creation of a (simple) 2D computer game or other games. Prerequisites: COMP 1672 or COMP 1771 or EDPX 2100.

COMP 2901 Computing and Society (4 Credits)
This course is designed to explore the social implications of computing practices, organization and experience. These topics and other issues are correlated with examples from the older and modern history of technology and science. Some formal experience with computing is assumed, but students who have a good familiarity with ordinary computing practice should be ready. Students are also expected to contribute their expertise in one or more of the areas of their special interest. Cross listed with DMST 3901.

COMP 2992 Directed Study (1-10 Credits)

COMP 3000 Seminar: The Real World (1 Credit)
Series of lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with MATH 3000.

COMP 3200 Discrete Structures (4 Credits)
Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: MATH 2200 or COMP 2300 and COMP 1672 or COMP 1771.

COMP 3341 Multimedia Systems (4 Credits)
This course covers fundamental issues in design and implementation of multimedia applications. This course also covers technologies in multimedia systems such as multimedia data representation, compression, coding, networking, data management, and I/O technologies. Prerequisite: COMP 3361.

COMP 3351 Programming Languages (4 Credits)
Programming language as a component of software development environment; binding, scope, lifetime, value and type of a variable; run-time structure--static, stack-based and dynamic languages; parameter passing--call by reference, value, result, value-result and name; subprogram parameters; role played by side effects, dangling pointers, aliases and garbage; garbage collection; data abstraction - study of object-oriented, functional, and logic languages. Prerequisites: COMP 2370, COMP 2691, and COMP 2355.

COMP 3352 Elements of Compiler Design (4 Credits)
Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.
COMP 3353 Compiler Construction (4 Credits)
Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

COMP 3361 Operating Systems I (4 Credits)
Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: COMP 2355, COMP 2370, and COMP 2691 or for MS Cybersecurity COMP 3001, 3002, 3003, 3004, COMP 4355, and COMP 4370.

COMP 3371 Advanced Data Structures & Algorithms (4 Credits)
Design and analysis of algorithms; asymptotic complexity, recurrence equations, lower bounds; algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, etc. Prerequisites: COMP 2370, MATH 3200.

COMP 3381 Software Engineering I (4 Credits)
An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351, COMP 3361 or instructor permission.

COMP 3382 Software Engineering II (4 Credits)
Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

COMP 3400 Advanced Unix Tools (4 Credits)
Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool-building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

COMP 3410 World Wide Web Programming (4 Credits)
Creating WWW pages with HTML, accessing user-written programs via CGI scripts, creating forms, imagemap and tables, and Java programming principles and techniques. Prerequisite: COMP 2355.

COMP 3421 Database Organization & Management I (4 Credits)
An introductory class in databases explaining what a database is and how to use one. Topics include database design, ER modeling, database normalization, relational algebra, SQL, and B trees. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). An introduction to a NoSQL database will be included. Prerequisite: COMP 3006. Co-requisite: COMP 3007.

COMP 3431 Data Mining (4 Credits)
Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

COMP 3441 Introduction to Probability and Statistic for Data Science (4 Credits)
The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R.

COMP 3501 Introduction to Artificial Intelligence (4 Credits)
Programming in LISP and Prolog with applications to artificial intelligence; fundamental concepts of artificial intelligence; emphasis on general problem-solving techniques including state-space representation, production systems, and search techniques. Prerequisites: MATH 2200, COMP 2370.

COMP 3621 Computer Networking (4 Credits)
An introduction to computer networks with an emphasis on Internet protocols. Topics include: network topologies, routing, Ethernet, Internet protocol, sockets, operating system impact and client/server implementations. Prerequisites: COMP 2355 and COMP 2370.

COMP 3681 Networking for Games (4 Credits)
Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.
COMP 3701 Topics in Computer Graphics (4 Credits)
COMP 3702 Topics in Database (4 Credits)
COMP 3703 Topics-Artificial Intelligence (4 Credits)
COMP 3704 Advanced Topics: Systems (4 Credits)
COMP 3705 Topics in Computer Science (1-4 Credits)
COMP 3721 Computer Security (4 Credits)
This course gives students an overview of computer security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 3361.

COMP 3722 Network Security (4 Credits)
Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. Prerequisites: COMP2355 and COMP3721, or permission of instructor.

COMP 3723 Ethical Hacking (4 Credits)
Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, footprinting targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP3361.

COMP 3731 Computer Forensics (4 Credits)
Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 2355 or for MS Cybersecurity COMP 3001, 3002, 3003, and 3004.

COMP 3801 Introduction Computer Graphics (4 Credits)
Fundamentals of graphics hardware, scan conversion algorithms, 2D and 3D viewing transformations, windows, viewports, clipping algorithms, mathematics for computer graphics, graphics programming using a standard API. Prerequisites: COMP 2370, MATH 1952 or 1962, and MATH 2060.

COMP 3821 Game Programming I (4 Credits)
An introduction to computer game programming. Use of a game engine to create 3D computer games. Topics to include game scripting, simple 3D asset creation, incorporation of assets, keyboard/mouse event handling, animation, game phases and score keeping. Prerequisite: COMP 2370.

COMP 3822 Game Programming II (4 Credits)
An introduction to computer game engine programming. Major class goal is to understand how game engines are created by building subsets of a game engine. Non-exhaustive set of topics include how terrains are generated, how animations are supported, how particle systems are implemented, how physics systems are coded, and how support is provided for higher level scripting languages. All coding will be done in low-level graphics languages. Prerequisites: COMP 3801 and COMP 3821.

COMP 3831 Game Capstone I (2-4 Credits)
Students design, build, test and debug a fully working game from scratch. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students learn group collaboration, software processes, testing, and the methodology for researching new game concepts to implement in their final project. Prerequisite: COMP 3821.

COMP 3832 Game Capstone II (2-4 Credits)
Students design, build, test and debug their existing game from Game Capstone I. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students alter their game design document to add new features, making corrections to prior design issues, and focus on making the game playable and "fun." Prerequisite: COMP 3831.

COMP 3833 Game Capstone III (2-4 Credits)
Students design, build, test and debug their working game from Game Capstone II. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students modify their design document and implement changes in their game, create new concept art for the features, build an introduction level into their game, test the game with "Play testers", and focus on creating a game that is "fun" to play. By the end of the quarter, their game is ready for distribution on an appropriate platform. Prerequisite: COMP 3832.

COMP 3904 Internship/Co-Op in Computing (0-10 Credits)
Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).
COMP 3991 Independent Study (1-10 Credits)
Cannot be arranged for any course that appears in the regular course schedule for that particular year.

COMP 3992 Directed Study (1-10 Credits)

COMP 3995 Independent Research (1-10 Credits)

Critical Race and Ethnic Studies

The minor in Critical Race and Ethnic Studies provides students an opportunity to examine race and ethnicity as categories of social, political, historical, and cultural analysis, in the United States and globally, through varied courses offering multiple perspectives. Students are encouraged to think critically across disciplines and gain important skills necessary for ethical and engaged citizenship in today's diverse, global society. Knowledge and understanding of race and ethnicity provides excellent training for careers in business, law, education, social work, journalism, the arts, nonprofits, government and public policy agencies, and increasingly in science and technology fields.

The minor in critical race and ethnicity seeks to educate students to:

• Consider and utilize a variety of academic disciplines and approaches to engage in a critical examination of race and ethnicity
• Analyze and explore race and ethnicity as active social, political, historical, and cultural processes in the distribution of power, construction of identity, and maintenance of community
• Uncover and understand the social, cultural, and historical contributions and lived experiences of racialized populations in the United States, and around the world
• Compare racial and ethnic experiences and perspectives across groups, historical time periods, geography, and national origin
• Explore how race and ethnicity intersect with other identities, such as gender, sexuality, class, religion, national origin, and citizenship
• Critically evaluate primary and secondary sources; draw on diverse theoretical frameworks and methodologies; develop analyses, and present those analyses logically and coherently in written form and/or creative expression
• Engage in intersectional analysis and other critical methodologies that will support the development of cultural competency skills needed to flourish in diverse and collaborative environments

The undergraduate minor in Critical Race and Ethnic Studies at the University of Denver offers an academic program that provides a careful examination of race and ethnicity as categories of social, political, historical, and cultural analysis, in the United States and globally, through a multitude of disciplinary perspectives. Drawing primarily from humanities and social science courses, Critical Race and Ethnic Studies will attract any student interested in the intersectional study of race and ethnicity in the United States, and analysis of the comparative and transnational dimensions of race and ethnicity around the world.

Minor in Critical Race and Ethnic Studies

Minimum of 20 credits as follows: Students will select courses from several of the disciplines participating in the minor, with required exposure to at least three different disciplines. Eight of the credits toward the minor must be 2000-level or above. Courses will be listed with a Critical Race and Ethnic Studies attribute. If desired, students can create a targeted plan of study that focuses on specific academic interests and/or a specific community/population. There is also potential for a relevant internship, service-learning course, or study abroad course to be approved toward the minor; students will need to meet with the minor program advisor to secure approval.

The following is a list of courses that apply toward this minor at the time of this publication. Additional courses that may apply toward this minor will expand throughout the student's academic career.

To find current course offerings that count toward the Critical Race & Ethnic Studies minor:

• Go to PioneerWeb > Student Tab > Registration
• Browse the online Schedule of Classes
• Choose quarter from drop-down
• In Attribute field, search “Critical Race & Ethnic Studies” > Search

Current Courses Which Apply to the Minor

Economics

Office: Sturm Hall, Room 246
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2685
Email: Economics@du.edu
Web Site: http://www.du.edu/ahss/economics

Economics is the study of the production and distribution of material wealth. This study offers an understanding of the market and non-market institutions—and their historical evolution—that govern such production and distribution at the local, national and global levels. Students examine
how individual markets for products, labor and finance work, and why they function well or poorly in part and in whole. They analyze economic structural changes and learn theories of business cycles, as well as investigate the choices and consequences of government policy alternatives. The Economics major can prepare students for a variety of careers in business, banking, government, and education. Economists hold positions in private industry and government as leaders, consultants, or advisors. Economics is also a good major for students who are interested in pursuing advanced degrees in Law, Business, International Studies, and, of course, Economics.

**Economics**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

44 credits, including the following:

<table>

Total Credits: 20

**Requirements for Distinction in the Major in Economics**

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Of the five electives, two must be at the 3000-level
- Completion of ECON 3997 Economics Honors Thesis (4 credits)
- Total of 48 credits

**BA in Economics**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.
Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

1. INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**Courses**

**ECON 1020 Introduction to Micro- and Macroeconomics I: History and Theories (4 Credits)**

This course presents an introductory analysis of how the economic aspects of our society operate. We begin with a brief examination of the development of human economic arrangements and how these developed into the kind of economy we have today. We then look at some of the historical development of how people thought that economic activity works and how they thought it should work. Then we go into an examination of the workings of markets and economic competition—what we call micro-economics—by examining some of the relevant theory as well as its embodiment in developments in the U.S. economy. Following that, we examine in much more detail the theory and some current issues involved in what we call macro-economics—the study of the workings of the national economy as a whole, with its concerns to explain such matters as the national rates of unemployment and price inflation, along with a study of the monetary and financial aspects of the economy and the promises and problems of gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1030 Introduction to Micro- and Macroeconomics II: Theories and Policies (4 Credits)**

Examination of how markets work and the process of competition; public policy toward markets; antitrust, regulation, deregulation, public enterprise vs. privatization, etc.; distribution of income, labor-management and management-ownership-finance relations; impact of macroeconomic and international issues and policies on business, labor and consumers. Prerequisite: ECON 1020.

**ECON 1992 Directed Study (1-10 Credits)**

**ECON 2020 Intermediate Microeconomics (4 Credits)**

Microeconomic foundations to determine prices and production; consumer behavior, the behavior of firms in competitive and imperfectly competitive markets, and factor markets. Prerequisite: ECON 1030.

**ECON 2030 Intermediate Macroeconomics (4 Credits)**

Determinants of aggregate levels of production, employment and prices, focusing on the short-run dynamics of an economy consisting of a complex structure of interrelated markets; includes analysis of investment decisions, monetary structures and labor markets. Prerequisite: ECON 1030.

**ECON 2050 History of Economic Thought (4 Credits)**

Development of economic thought; leading writers and schools, their influence and theories. Prerequisite: ECON 1030.

**ECON 2150 Cost Benefit Analysis (4 Credits)**

This course explores the methodology of cost-benefit in applied policy analysis of health, safety, and environmental regulations. Students explore the economic reasoning, and financial/quantitative tools, used in CBA to identify, quantify, and summarize positive and negative effects of public policy decisions. Prerequisite: ECON 1030.
ECON 2180 Experimental Economics (4 Credits)

Economics courses covering mainstream theories are often based upon a priori reasoning, which is in turn built upon certain assumptions about individual optimizing behavior. This course introduces students to the new and expanding field of experimental economics. Instead of taking the mainstream assumptions and conclusions for granted, we critically examine individuals' economic behavior and their 'social' consequences in various experimental settings. We review the historical development of experiments and then cover specific topics that experiments have been designed to investigate. The course has a heavy lab focus, with students themselves participating in simulations of most of the experiments discussed. Topics include market functioning, public goods and open access environmental resources, fairness and equity, and individual decision-making. Students are encouraged to think about empirical and policy implications highlighted by both experiments and economic theory. Students also gain an understanding of the scientific methodology required to create controlled experiments. Prerequisite: ECON 1030.

ECON 2280 Gender in the Economy (4 Credits)

This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1020.

ECON 2300 Comparative Economic Systems (4 Credits)

The purpose of this course is to develop an understanding of the methods (both theoretical and empirical) used to compare economic systems around the world. As a learning objective, by the end of the course students should be able to explain the differences between economic, financial, and legal institutions, policies, and economic performance in alternative economic systems and to critically evaluate changes occurring in transition economies (particularly China, Russia, and Central and Eastern Europe) and their implications for economic growth. Prerequisite: ECON 1030.

ECON 2330 China and the Global Economy (4 Credits)

This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

ECON 2400 Public Finance (4 Credits)

Public-sector economics, including public finance and expenditures; effects of different types of taxes and various government programs; government budgeting; cost benefit analysis. Prerequisite: ECON 1030.

ECON 2410 Industrial Organization Economics (4 Credits)

This course explores some applied topics in microeconomic theory such as innovation and technological change; cost of production and decision making by firms; market structures and competition; labor market; the changing role of the state; antitrust; regulation and deregulation; and international trade. Prerequisite: ECON 1030.

ECON 2500 Economic Development (4 Credits)

This course introduces the student to several dimensions of, and forces pertaining to, development processes, including nature's inequalities, colonial legacies, the role and limitations of primary production, labor utilization, industrialization, trade, technology acquisition, foreign direct investment and other forms of capital flow, and the role of the state. If time permits, discussion include environmental concerns and cultural factors. Prerequisite: ECON 1030.

ECON 2510 The Asian Economies (4 Credits)

This course is based on a comparative approach, examining several Asian economies' colonial background, their primary producing sectors, the development state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

ECON 2590 Urban Economic Problems (4 Credits)

This course covers theories of regional economic development and applies these theories to the economy. This course considers how individuals and firms locate in space using the tools of economic analysis. The first part of the courses focuses on city formation and land use. The second part of the course focuses on policy questions including rent control, crime, urban transportation and environmental issues. Finally, we consider the role of government in managing both positive and negative externalities. Prerequisite: ECON 1030.

ECON 2600 International Economics (4 Credits)

The student learns about balance of payments, accounting, international monetary arrangements, international trade, and international investment. Certain policies that have a direct impact on a country's balance of payments, e.g. macroeconomic policies, exchange rate policy, and commercial policies, are examined. Some features of recent US trade policy stances is also be surveyed. Prerequisite: ECON 1030.

ECON 2670 Quantitative Methods (4 Credits)

This course offers an introduction to empirical work and statistics relevant to the study of economics. The course begins with a discussion of the use and creation of data, and various sources of data. It then presents the basic foundations of statistical methods for the description and analysis of data. Students learn how to calculate common descriptive statistics, test hypotheses related to the mean and differences between means, and how to perform and interpret bivariate linear regression analysis. In the process, students learn and use a popular software package commonly used for statistical analysis in economics. Prerequisite: ECON 1030.
This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.
Emergent Digital Practices Program

Email: edp@du.edu

ECON 3670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)
This course develops the foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Prerequisites: ECON 2670 and either ECON 2020 or ECON 2030. Restriction: Junior standing.

ECON 3701 Topics in Economics (4 Credits)
Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

ECON 3740 Health Economics (4 Credits)
This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

ECON 3830 Topics in Macroeconomics (4 Credits)
Coverage varies but may include advanced topics in monetary theory, the study of business cycles, or the works of important monetary and macroeconomic theorists. Restriction: junior standing. Prerequisite: ECON 2030.

ECON 3850 Mathematics for Economists (4 Credits)
Restriction: junior standing. Prerequisite: ECON 2020 and 2670.

ECON 3900 Growth, Technology and Economic Policy (4 Credits)
This course will introduce students to the important issues related to technological change and how it relates to economic growth. The lectures seek to explain how technology and innovation determine growth and development with special emphasis on learning-by-doing, organizational capability, appropriation and spillover effects. The core topics that will be covered include: (1) origins of new technology and its market introduction, (2) the process of technological adoption and advancement, (3) the dissemination of technology and innovations within and across firms, industries and countries, (4) the impacts of technological change, including benefits and costs, on individual and society at large and (5) policy implications to promote innovation and to reduce its negative effects. The rest of the course will focus on the relationship of technological change to human development, social welfare, as well as prior experiences of industrialized economies and emerging economies. Prerequisites: ECON 2020 and junior standing.

ECON 3970 Environmental Economics (4 Credits)
This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

ECON 3991 Independent Study (1-8 Credits)
Prerequisites: ECON 1030.

ECON 3992 Directed Study (1-10 Credits)

ECON 3995 Independent Research (1-4 Credits)
This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

ECON 3996 Senior Paper Research (2-4 Credits)
This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor will be assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what she/he has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

ECON 3997 Economics Honors Thesis (4 Credits)
Students pursuing Departmental Distinction will write an Economics Honors Thesis of between 30 and 50 pages during their senior year. The subject of the Thesis must concern some important topic in Economics, the precise nature of which will be determined by the student and an advisor chosen from among the Economics faculty. A student wanting to try for this Distinction must first meet with the Department Chair to discuss which Professor he or she will request to supervise his or her Thesis. The Professor who agrees to supervise an Honors Thesis is responsible for certifying that the work is of sufficient quality for Departmental Distinction in Economics.
Emergent Digital Practices Program

Web Site: http://www.du.edu/ahss/edp

Emergent Digital Practices (EDP) provides undergraduate students with a broad understanding of the history, theory and emerging status of multiple cultural practices, both mainstream and alternative, which are evolving alongside digital technologies. The EDP major emphasizes the new forms of interaction, collaboration, engagement, and performance developing as technology converges with bodies of knowledge and practices from across the arts, humanities, and sciences. Shaped by an investment in participatory forms of creativity and critical engagement, EDP asks students to work together to develop strategies and processes for addressing complex interdisciplinary topics and problems beyond the realm of industry standards and proven application. Together, EDP faculty and students will strive to create new forms of art, experiences, media, and ways of knowing in the 21st century.

The Emergent Digital Practices program brings together art, design, media, culture, and technology studies in a hands-on, collaborative environment. Technology links academic disciplines with professional fields and joins shared communities with our personal lives in many new and exciting ways. To understand and explore this landscape, we infuse the digital practices of making and writing with contemporary critical approaches to cultural technologies, media philosophy, the critique and investigation of electronic and new media arts, and studies in science fiction, trans-global politics and science.

Emergent Digital Practices appeals to students who are more broadly defined creative types and critical thinkers because the lines between artists, designers, scholars, and inventors have largely dissolved. The EDP program prepares students who seek to work in spaces beyond what is already defined and familiar. To help students acquire a broad spectrum of media literacies and practical artistic skills, the EDP major combines cutting-edge classrooms with new learning spaces that are equal parts laboratory, studio, think-tank, and stage. Integrating powerful desktop computer stations and highly mobile technologies within a variety of interactive smart-spaces, the EDP program supports new kinds of student-to-peer and student-to-faculty interactions and collaborations.

Emergent Digital Practices

The Bachelor of Arts in Emergent Digital Practices at the University of Denver promotes critical knowledge and creation with digital tools. The BA student majoring in emergent digital practices should be able to demonstrate both understanding and skills within interdisciplinary contexts. The BA student should also be able to synthesize ideas and practices from across the spectrum of historical and contemporary contexts, focusing not just on making the new, but making the needed. The BA student's work should demonstrate synergy with the student's second major, minor or dual-degree program. The Emergent Digital Practices Minor brings the power of basic technical know-how and critical sensibility to your major. The BA minor will be able to leverage digital ideas to infuse 21st-century methodologies into their other areas of interest, better preparing the student for either the marketplace or future academic studies in any discipline. Through both exploration of new ideas and hands-on experiences, the minor will prepare students to shift with our rapidly changing future.

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 76))

* Students with a Computer Science major with a minor in Emergent Digital Practices:
  * cannot receive credit toward the minor for either EDPX 2100 or EDPX 2300
  * may need to seek prerequisite waivers to enroll in EDPX 3100, 3200, 3450, 3110, 3250, 3310, 3340, 3350

Bachelor of Fine Arts Major Requirements

(189-192 credits required (p. 77))

The Bachelor of Fine Arts in Emergent Digital Practices at the University of Denver builds on the same foundation as the BA and extends into a fine arts-focused practice. While demonstrating a foundational understanding of emergent digital practices within interdisciplinary contexts, the BFA student should be able to articulate a deeper understanding of the historical and contemporary contexts of art, technology and sciences. The BFA student should be prepared for public engagement through his or her knowledge of the significance of established cultural institutions and frameworks such as galleries, museums, festivals and other public spaces. Additionally the BFA student should be prepared for the development and organization of emerging venues for the exhibition and public engagement with experimental works of art and digital media. The BFA student does not need a second major or minor.

Minimum of 116 credits; maximum of 135 credits, including the following:

<table>

Credits outside Emergent Digital Practices and Art History
4 credits in a course approved by an EDP advisor

Upper division EDP electives
Select 52 upper-division EDP electives, including one Collaboration focused course

Upper-division courses
Select 16 credits in Studio Art, Art History, Computer Science, Media, Film and Journalism Studies

Capstone Credits
EDPX 3960  BFA Capstone (Taken in Spring of Senior Year)  4
EDPX 3990  Capstone (Taken in Winter of Senior Year)  4

Total Credits 116

The BFA major in Emergent Digital Practices is capped at a maximum of 135 credits.

Requirements for Distinction in the Major in Emergent Digital Practices
- Minimum of 3.5 major GPA
- Creative research project, paper, and presentation required

BA in Emergent Digital Practices

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 98

\(^1\) See Program of Study (p. 208) tab for explanation of EDP Foundations courses
\(^2\) INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
Courses

EDPX 2000 Imaging in Emergent Digital Practices (4 Credits)
This course introduces digital imaging and digital illustration. Foundational technical methods and semiotics are introduced as ways to explore contemporary visual language. Students gain understanding in the digital creation and deciphering of images in 2D space. The essential language and concepts concerning representation and digital reproduction are developed through critical study and making. Lab fee. No prerequisites.

EDPX 2100 Coding in Emergent Digital Practices (4 Credits)
This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

EDPX 2300 Systems in Emergent Digital Practices (4 Credits)
This course studies the fundamental concepts of systems, both analog and digital, analyzing how structure and operation combine to produce complex results and effect change in the world. Students will learn how the components of digital systems from simple electronics to complex software and distributed networks function systematically to solve problems and share information. Through study of the development of the computer, the internet and digital interfaces students will gain a critical understanding of how these systems have been historically shaped. Reading, writing, and making will synthesize practice and critical ideas. No prerequisites. Lab fee.

EDPX 2400 Time in Emergent Digital Practices (4 Credits)
This course introduces the fundamental concepts of time-based media, with an emphasis on audio and video production. Basic recording, capturing, editing and manipulation of time are covered. Students gain understanding on how to utilize, analyze, and manipulate time in digital media. Students learn the basic language and critical analysis techniques needed to understand when and how to take advantage of each time-based media for their practice. Lab fee. No prerequisites.

EDPX 2901 Computing and Society (4 Credits)
This class examines the computing and communication antecedents of digital media and the critical underpinnings of digital media studies. Starting with historical overview of the development of the computing machine, the class progresses to an examination of the effects of digital technologies on work, social life, the business world and the arts. We investigate the developments of the digital computer through the twentieth century as well as the development and growth of the software industry and the Internet. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MFJS 2200.

EDPX 3100 Programming for Play (4 Credits)
This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

EDPX 3110 Rapid Game Design and Prototyping (4 Credits)
This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3112 Rapid Physical Game Design & Prototyping (4 Credits)
This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 2300. Lab fee.

EDPX 3120 Making Critical Games (4 Credits)
Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintaining an essential ludic quality. Public good and civic engagement projects are welcomed. The course may be repeated with instructor permission when projects vary. Specific topics will vary each time the course is offered, and the course is repeatable up to 3 times. Lab fee. Prerequisites: EDPX 3100 or COMP 1671, and EDPX 3110, or permission of the instructor. Cross listed with EDPX 4120.
EDPX 3200 Data Visualization (4 Credits)
This course explores the creation of informational graphics for the visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations are also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 4200. Prerequisites: EDPX 2000 and EDPX 2100, or permission of the instructor.

EDPX 3210 Typographic Landscapes (4 Credits)
This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered interletter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 2000 or permission of the instructor.

EDPX 3250 Making Networks (4 Credits)
This course provides students with the skills necessary to establish network presence across a range of platforms and technologies. Current web technologies and standards are covered but an emphasis is placed on identifying emerging platforms and developing innovative methodologies for critical engagement with emergent digital practices. Technologies studied may include content management and delivery systems, web APIs, big data, digital mapping platforms, data visualization, augmented reality and locative media. Prerequisite: EDPX 2300 or instructor permission. Lab fee. Crosslisted with EDPX 4250.

EDPX 3270 Making Networked Art (4 Credits)
In this course networked art is understood in the broadest sense from art that natively exists on digital networks to art that critiques and engages with the concept of the network in contemporary society. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will engage with network architectures and platforms developing experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 2400 and EDPX 3250, or permission of the instructor. Lab fee. Crosslisted with EDPX 4270.

EDPX 3310 Tangible Interactivity (4 Credits)
Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3320 Interactive Art (4 Credits)
This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta data/multimedia asset acquisition and authoring environments. While utilizing student skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 4320. Prerequisite: EDPX 3310 or EDPX 3450, or permissions of the instructor.

EDPX 3330 Designing Social Good (4 Credits)
This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and then to make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross-listed with EDPX 4340. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3350 Sustainable Design (4 Credits)
This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

EDPX 3400 Video Art (4 Credits)
This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4400.

EDPX 3410 Advanced Video Art (4 Credits)
This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on off-screen time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into space, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 3400 or permission of the instructor.

EDPX 3430 2.5D Motion (4 Credits)
This course provides students an opportunity to create multi-dimensionally active poetic orchestrations of text, video and audio using the post-production processing and animation tool After Effects. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4430.
EDPX 3440 Site-Specific Installation (4 Credits)
This class produces projects investigating physical space, virtual space and site-specific public installation. Lab fee. Cross listed with EDPX 4440. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3450 Visual Programming (4 Credits)
This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.

EDPX 3460 Visual Programming II (4 Credits)
This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 4460. Prerequisite: EDPX 3450 or permission of the instructor.

EDPX 3490 Expanded Cinema (4 Credits)
This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3500 Sonic Arts (4 Credits)
This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3510 Sonic Arts II (4 Credits)
This class extends and applies the techniques and theories of the sonic arts to include loop-based composition, generative creation and modular processing. Students learn to add richness and complexity to audio work based on a combination of modern and classic techniques for audio production and the sonic arts. Class assignments include creation of audio for video and games, live performance and installation. Lab fee. Prerequisite: EDPX 3500 or permission of the instructor.

EDPX 3520 Voice & Sonic Environments (4 Credits)
This course covers environmental sound design with an emphasis on the human voice and acoustic ecologies. Studying and exploring a range of documentary, narrative and experimental approaches to sound design and the spoken word, students write and produce several short audio pieces. The final output consists of a podcast, voice-oriented performance and/or sonic installation. Lab fee. Prerequisite: EDPX 3500 or permission of the instructor. Cross listed with EDPX 4520.

EDPX 3600 3D Modeling (4 Credits)
This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of composting in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 4600, MFJS 3600. Prerequisite: EDPX 2000 or permission of the instructor.

EDPX 3610 3D Animation (4 Credits)
This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class processes. Lab fee. Cross listed with EDPX 4610. Prerequisite: EDPX 3600 or permission of the instructor.

EDPX 3620 3D Spaces (4 Credits)
An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisite: EDPX 3600 or permission of the instructor.

EDPX 3700 Topics in Emergent Digital Culture (4 Credits)
This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

EDPX 3701 Topics in Emergent Digital Making (1-4 Credits)
Topics in Emergent Digital Practices.
EDPX 3710 Critical Game Studies (4 Credits)
This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practice of play. This course is taught with a hybrid teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course satisfies a cultures requirement for emergent digital practices majors and minors. Cross listed with EDPX 4725, MFJS 3150. At least junior standing required or permission of the instructor.

EDPX 3725 Activist Media (4 Credits)
Today’s alternative cultures use internet and mobile technologies to access and circulate mainstream information, but also to exchange rapidly information that exists outside mainstream media channels. Activist movements today with access to digital tools and networks are no longer dependent on newspapers and broadcast networks to represent them and to disseminate their message. We are, however, just beginning to see how the proliferation of alternative networks of communication, and the content, practices, and identities they facilitate, interact with traditional political and business organizations as well as with traditional media products and practices. This course focuses on media activism over the past half-century tied to various social movements with an emphasis on contemporary protest movements and their use of new and old media tools and strategies. This course satisfies a cultures requirement for emergent digital practices majors and minors. Cross listed with EDPX 2200.

EDPX 3730 21st Century Digital Art (4 Credits)
An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

EDPX 3740 Performance Cultures (4 Credits)
This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, V.jing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. For output, students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab fee. Prerequisites: EDPX 2200 and EDPX 2400, or permission of the instructor.

EDPX 3750 Sound Cultures (4 Credits)
This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course’s emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 2200 and 2400.

EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)
This course encompasses a variety of lenses through which to view, evaluate and critique ideas of ‘community’ and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including ‘identity and racial tourism’); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are ‘good’ for you and your communities. Cross listed with EDPX 4770. Prerequisite: EDPX 2200 or permission of the instructor.

EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)
This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists.

EDPX 3780 Speculative Cultures: Science Fiction in Emergent Digital Practices (4 Credits)
This course explores the intersections of emergent digital practices and cultures with extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write, and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). For output, students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 4780. Prerequisite: EDPX 2200 or permission of the instructor.
EDPX 3800 Topics in Digital Making (4 Credits)
This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. This course may be repeated. Lab fee. Prerequisite: varies with topic.

EDPX 3960 BFA Capstone (4 Credits)
This course is required for all BFA students prior to taking the undergraduate capstone course. Students work independently with a faculty member to research and develop their capstone project in detail addressing ideas, making, venues, distribution, and other aspects of professional practice. Lab fee. Senior standing required. Must be a BFA student.

EDPX 3980 Internship (1-8 Credits)
Instructor approval required.

EDPX 3990 Capstone (4 Credits)
This course provides time and guidance for individual students to develop complex works that are a culmination of their studies. All projects must synthesize the principles of experience, emergence, and engagement taught throughout the program. All projects require both writing and making, the balance of these two to be determined by the nature of the work. Lab fee. Senior standing required.

EDPX 3991 Independent Study (1-8 Credits)
Independent Study form required.

EDPX 3992 Directed Study (1-8 Credits)
Independent Study form required.

Electrical & Computer Engineering and Mechanical & Materials Engineering

Electrical and Computer Engineering

Web Site: http://ritchieschool.du.edu/departments/MME

The mission of the Departments of Electrical and Computer Engineering (ECE) and Mechanical and Materials Engineering (MME) at the undergraduate level is to offer programs that support and complement the University mission; to provide a general undergraduate education in computer, electrical, and mechanical engineering that prepares students for employment or graduate study; to include interdisciplinary engineering work in all programs; to encourage the professional status of the faculty; and to foster the professional awareness of the students. This statement concisely sums up the goals and objectives of our programs. All Engineering degrees are accredited by the Engineering Accreditation Commission of ABET. ¹

You will find information about the following topics below:

• Program Educational Objective
• Program Components
• Engineering Design
• Course of Study
• PINs and Undergraduate Research Assistantships
• Study Abroad
• Fundamentals of Engineering (FE) Exam & Enrollment as an Engineer-Intern (EI)

Program Educational Objectives
The undergraduate program objectives of the Electrical and Computer and Mechanical and Materials Engineering Departments are to produce graduates who, within a few years of graduation:
1. Apply their engineering and problem solving skills towards engineering practice, engineering graduate school, or non-engineering fields such as medicine, science, business, law, or public policy, while continuing to engage in life-long learning.

2. Value and demonstrate character in their chosen vocation by acting responsibly, ethically, and professionally while contributing to a sustainable common good for society.

3. View their educational experience as valuable and instrumental to their professional success.

**Program Components**

All of our engineering programs have several components:

1. The University of Denver’s Common Curriculum, which includes First-year Seminar, Writing and Rhetoric, Ways of Knowing, and Advanced Seminar;
2. Basic sciences and mathematics, including chemistry, physics, and mathematics;
3. A common engineering background, with contributions from basic material in computer, electrical, and mechanical engineering;
4. A four-year integrated engineering sequence, stressing engineering design and project work, much of which is interdisciplinary and involves constructive teamwork;
5. An engineering discipline (computer engineering, electrical engineering, mechanical engineering);
6. A specialization giving the discipline more depth, or complementing it, according to the student's individual interests.

**Engineering Design**

The feature of engineering programs that most differentiates them from programs in basic or applied science and mathematics is engineering design, which is both an art and a science. Our programs feature a four-year stem of course work required of all students, regardless of curriculum, which emphasizes design, project work, team-work, and the application of scientific and technical knowledge and design skills already acquired to the solution of interdisciplinary engineering problems. As the student progresses in the curriculum, more and more reliance is placed on previous work, and more realistic constraints and considerations are required for success. The sequence culminates in a three-quarter capstone design project carried out in the final year. Additional design work is contained in specialized courses.

**Course of Study**

Engineering curricula are highly structured; acquisition of certain knowledge and skills must precede acquisition of more advanced ones. There is, thus, very little flexibility in the order in which courses must be completed, and there are few electives. Most engineering courses are offered only once a year, so an omission or deletion can add a year to the time required to complete the degree program. Although a high percentage of our students graduate in four years, it should be noted that, nationwide, nearly half of all engineering graduates take more than four years to complete their degrees, so students should not become discouraged if this is needed. The additional year may also be used to acquire additional expertise.

**Engineering Common Curriculum:** The curricula in all programs are the same for the first 5 quarters; a student can delay choosing an engineering major until the beginning of the spring quarter of their second year.

**Advanced Curriculum (Four Year Program):**

The curricula for the last two years have several components:

1. Advanced work in the engineering discipline chosen;
2. Integrated engineering project work and design;
3. Development of a specialized area (details of the areas of specialization for each degree program are given later in this booklet);
4. Completion of the University of Denver Common Curriculum

**Advanced Curriculum (Five-Year Dual-Degree (BS/MS) Program):**

The curricula for the last three years have several components:

1. Advanced work in the engineering discipline chosen;
2. Integrated engineering project work and design;
3. Completion of the University of Denver Common Curriculum;
4. Completion of the requirements for the MS in the engineering discipline.
For more information on any of these programs, please contact an advisor from either Electrical and Computer Engineering or Mechanical and Materials Engineering. Students interested in these options should discuss them with an advisor as early as possible in their undergraduate careers. For further information regarding these programs, visit the ECE (http://ritchieschool.du.edu/departments/ECE) and MME (http://ritchieschool.du.edu/departments/MME) web sites.

**PINS and Undergraduate Research Assistantships**

Students wishing to participate in faculty research projects may be eligible for participation in PINS (Partners in Scholarship) or Undergraduate Research Assistantships (URA’s). PINS is a University-wide program in which a student performs research in conjunction with a faculty member. More information on PINS is available at http://www.du.edu/urc/. URA’s work directly with faculty, often for compensation, on current research efforts. Students can read about faculty research interests on the ECE (http://ritchieschool.du.edu/departments/ECE) and MME (http://ritchieschool.du.edu/departments/MME) web sites. Such work enhances the student’s ability to compete for scholarships, internships, entrance to graduate study and permanent employment. A limited number of these are available and are typically restricted to upper-division students with good academic backgrounds. An agreement with a specific faculty member is required and the URA is requested by, and granted to, the faculty member.

**Study Abroad**

The University of Denver strongly encourages students to participate in study abroad programs, particularly the Cherrington Global Scholars Program; more information about which can be found at: http://www.du.edu/intl/abroad/

The engineering curricula have been structured so that students may take advantage of this opportunity in the autumn quarter of the senior year, rather than in the autumn quarter of the junior year, as is more usual in other DU programs.

Engineering students must be especially careful in planning this experience because of the highly restrictive and sequential nature of engineering curricula. It should also be noted that the abroad sites at which the required courses can be found are limited, vary depending on degree, and may change from one year to the next. Drs. Matt Gordon and Ron DeLyser are the department contacts for students interested in the Cherrington Global Scholar Program.

**Cooperative Education Program**

Recognizing the value of experiential learning, we have created a paid co-op program which is optional and competitive for all Ritchie School students, though ideally suited for current sophomores and juniors. Through this collaborative program between academia and industry, students work full time at participating companies earning valuable work experience. Typically, students will not take classes for one full academic year, resuming their studies upon their return exactly in sequence but one year removed. In some cases, DU courses can be taken while on co-op. Dr. Matt Gordon is the department contact for students interested in the co-op program.

**Fundamentals of Engineering (FE) Examination and Enrollment as an Engineer-Intern (EI)**

As an essential part of our assessment program, all mechanical engineering students in our ABET/EAC accredited curricula must register for and take the FE exam before graduation. This is optional for all electrical and computer engineering students, but highly recommended. The FE Exam is the first of a two-step process in order to become registered as a Professional Engineer (PE).

The FE exam is a national 6-hour examination administered by NCEES (National Council of Examiners for Engineering and Surveying) in conjunction with the Colorado State Board for Professional Engineers and Land Surveyors. Students must have completed at least 135 credits to apply to take the FE exam, for which a fee is charged. For more information please contact the MME department chair.

After passing the FE exam, the student must send a final transcript recording the receipt of an engineering degree to the Colorado State Board for Professional Engineers and Land Surveyors. Typically, after passing the FE exam, the requirements for registration as a PE are 4 years of engineering experience under the supervision of a PE with increasing engineering responsibility and passing the PE examination.

**Criteria for Entering Any of the Engineering Programs**

In the first year, students should plan to take the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1951</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1952</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1953</td>
<td>Calculus III</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1211</td>
<td>University Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 1212</td>
<td>University Physics II</td>
<td>5</td>
</tr>
</tbody>
</table>
Students lacking the mathematics preparation to begin calculus in the first quarter may take MATH 1070 College Algebra and Trigonometry followed by the usual calculus sequence; these students should meet with an advisor from the engineering department before enrolling for courses. Failure to complete the courses listed above in the first year may lead to an additional year of study.

Minors in Engineering for Non-Engineering Students

Students desiring to minor in any of the engineering disciplines must take 20 hours of discipline specific engineering courses in addition to the equivalent of MATH 1951 Calculus I, MATH 1952 Calculus II, and MATH 1953 Calculus III. It is recommended that they have PHYS 1211 University Physics I, PHYS 1212 University Physics II, and PHYS 1213 University Physics III in their curriculum. Degree programs that “naturally flow” into an engineering minor are: chemistry, computer science, biology, mathematics and physics.

Computer Engineering

Bachelor of Science in Computer Engineering Requirements

(198 credits required for the degree (p. 85))

This degree requires a minimum of 198 credits. Students not in the BSCPE/MBA combined program select a specialty area from communications, digital signal processing and networking; robotics, embedded systems and instrumentation, and computer systems engineering; or, under special circumstances, an individualized specialization may also be approved. Faculty mainly associated with computer engineering pursue research in microprocessors, microsystems, biomedical systems, computer architecture, complex VLSI systems design, digital systems modeling and simulation, networks, parallel and distributed control, and processing.

Requirements

198 credits are required for the degree including 48 credits of mathematics and basic science, 75 - 83 credits of engineering topics, and additional credit in computer science.

Please see advisor for MATH/Sci/UCC requirements.

Areas of Specialization
All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization. For specific courses in the specialization areas, please see Degree Program Plan.
• Communications, DSP, and Networking
• Computer Systems Engineering
• Robotics, Embedded Systems, and Instrumentation
• Individualized Option

Nine credits of upper division technical courses selected with advisor’s approval. A letter signed by the student’s advisor giving the reason for the courses selected must be on file in the student’s records.

Minor Requirements for Computer Engineering

20 credits, including:

Electrical Engineering

Bachelor of Science in Electrical Engineering Requirements

(202 credits required for the degree (p. 86))

This program requires a minimum of 202 credits. Students not in the BSEE/MBA combined program select a specialization from communication systems and digital signal processing; robotics, electronics, photonics and microsystems; or power and energy; or, under special circumstances, an individualized specialization may also be approved. Faculty mainly associated with electrical engineering pursue research in the areas of communication systems and networks, digital signal processing, optical communication devices and systems, photonics, robotics and controls, and autonomous systems.

Requirements

202 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

Electrical Engineering with a Concentration in Mechatronic Systems Engineering

This degree program requires a minimum or 200 credits. Students not in the BSEE with a concentration in mechatronic systems engineering/MBA combined program select a specialization from mechanical systems, computer control and systems; or, under special circumstances, an individualized specialization may also be approved. Faculty associated with mechatronic systems engineering pursue research in the areas of robotics and controls and unmanned aerial systems.

Requirements for the Concentration

(200 credits required for the degree (p. 86))

200 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

**Notes**

**UCC – University Common Curricula** - These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society.

**ASEM 2XXX - Advanced Seminar Engineering** students are required to take a writing-intensive advanced seminar. Junior standing is also required.

**Technical Elective.** Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.

**Math/Sci.** One (1) math or science course from the approved list (11 credits). Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years.

Total credits may vary based on technical elective options.

**Approved Math/Sci Courses (subject to participating department course offerings):**

**Biology**

BIOL 1010 Physiological Systems w/ BIOL 1020 Physiological Systems Lab; BIOL 1011 Evolution, Heredity and Biodiversity w/ BIOL 1021 Evolution, Heredity and Biodiversity Lab; BIOL 2090 Biostatistics; BIOL 2120 Cell Structure and Function w/ BIOL 2121 Cell Structure & Function Lab; BIOL 3250 Human Physiology

**Chemistry**

CHEM 1020 General Chemistry II w/ CHEM 1250 General Chemistry II Laboratory; CHEM 2131 Chemistry of the Elements w/ CHEM 2141 Chemistry of the Elements Lab; CHEM 2240 Introduction to Environmental Chemistry; CHEM 2270 Quantitative Chemical Analysis

**Math**
MATH 2060 Elements of Linear Algebra; MATH 3080 Introduction to Probability; MATH 3090 Mathematical Probability; MATH 3851 Functions

**Physics**

PHYS 2251 Modern Physics I; PHYS 2252 Modern Physics II w/ PHYS 2260 Modern Physics Lab; PHYS 2259 Uncertainty and Error Analysis; PHYS 2300 Physics of the Body; PHYS 2340 Medical Imaging Physics; PHYS 3510 Analytical Mechanics I; PHYS 3711 Optics I

**Areas of Specialization**

All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization.

### Communications, DSP, and Networking

Select three courses from the following:  

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENCE 3261</td>
<td>Fault Tolerant Computing</td>
</tr>
<tr>
<td>ENCE 3321</td>
<td>Network Design</td>
</tr>
<tr>
<td>ENCE 3630</td>
<td>Pattern Recognition</td>
</tr>
<tr>
<td>ENEE 3130</td>
<td>Principles of Communication Systems</td>
</tr>
<tr>
<td>ENEE 3141</td>
<td>Digital Communications</td>
</tr>
<tr>
<td>ENEE 3670</td>
<td>Introduction to Digital Signal Processing</td>
</tr>
</tbody>
</table>

### Computer Systems Engineering

Select three courses from the following:  

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 3501</td>
<td>Introduction to Artificial Intelligence</td>
</tr>
<tr>
<td>COMP 3801</td>
<td>Introduction Computer Graphics</td>
</tr>
<tr>
<td>ENCE 3261</td>

### Notes

**University Common Curriculum** - These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society.

**ASEM 2XXX - Advanced Seminar Engineering** students are required to take a writing-intensive advanced seminar. Junior standing is also required.

**Technical Elective**. Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.

### Areas of Specialization

All Bachelor of Science in Electrical Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives.

### Communications Systems and Digital Signal Processing

**Required:**

- ENEE 3141 Digital Communications
- ENCE 3321 Network Design
- ENEE 3620 Optical Fiber Communications
- ENEE 3670 Introduction to Digital Signal Processing

And two of the following: 1

- ENEE 3322
- ENEE 3622
- ENEE 3630
- ENEE 3670

Total Credits: 202
Robotics
Select three courses from the following:

- ENCE 3100 Advanced Digital System Design 4 credits
- ENGR 3620 Computer Vision 4 credits
- ENGR 3100 Instrumentation and Data Acquisition 4 credits
- ENGR 3730 Robotics 3 credits
- ENME 3545 Mechanisms 4 credits
- ENMT 3220 Mechatronics II - Real-Time Systems 4 credits

Electronics, Photonics, and Microsystems
Select three courses from the following:

- ENEE 3030 Optoelectronics 4 credits
- ENEE 3035 Photonics 4 credits
- ENEE 3620 Optical Fiber Communications 4 credits
- ENGR 3210 Intro Nano-Electro-Mechanics 4 credits
- ENGR 3520 Introduction to Power Electronics 4 credits
- ENGR 3525 Power Electronics and Renewable Energy Laboratory 1 credit

Power and Energy
One of the following:

- ENGR 3525 Power Electronics and Renewable Energy Laboratory 1 credit
- ENGR 3535 Electric Power Engineering Laboratory 1 credit

And two of the following:

- ENGR 3520 Introduction to Power Electronics 4 credits
- ENGR 3540 Electric Power Systems 4 credits
- ENGR 3545 Electric Power Economy 3 credits

Individualized Option
Nine credits of upper-division technical courses selected with advisor's approval. A letter signed by the student's advisor giving the reason for the courses selected must be on file in the student's records.

Students may also take Special Topics or Independent Study as appropriate for this option

**Total Credits: 192**

### NOTES:

**UCC – University Common Curricula.** These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society (16 credits).

**ASEM 2XXX - Advanced Seminar.** Required writing-intensive advanced seminar. Junior or senior standing is required (4 credits)

**OOOO - Open Elective.** May be any course at the 1000 level or above (3 or 4 credits as needed to reach 192 total QH).

**Math/Sci/Tech/Law.** Three (3) 3000 or higher engineering courses (ENGR, ENME, ENEE, ENCE, ENBI, ENMT, or MTSC), which are not required for the major (12 credits). 2-4 math or science courses from the approved list (10 credits). 1 math or science or technical or computer science or law school course (3 or 4 credits). Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years.

**Approved Math/Sci/Law Courses (subject to participating department course offerings):**

**Biology**

BIOL 1010 Physiological Systems w/BIOL 1020 Physiological Systems Lab; BIOL 1011 Evolution, Heredity and Biodiversity w/BIOL 1021 Evolution, Heredity and Biodiversity Lab; BIOL 2450 Human Anatomy; BIOL 2090 Biostatistics; BIOL 2120 Cell Structure and Function w/BIOL 2121 Cell Structure & Function Lab; BIOL 3250 Human Physiology

**Chemistry**

CHEM 1020 General Chemistry II w/ CHEM 1250 General Chemistry II Laboratory; CHEM 2131 Chemistry of the Elements w/ CHEM 2141 Chemistry of the Elements Lab; CHEM 2240 Introduction to Environmental Chemistry; CHEM 2270 Quantitative Chemical Analysis
Math

MATH 2060 Elements of Linear Algebra; MATH 3080 Introduction to Probability; MATH 3090 Mathematical Probability; MATH 3851 Functions Complex Variable

Physics

PHYS 2251 Modern Physics I; PHYS 2252 Modern Physics II w/ PHYS 2260 Modern Physics Lab; PHYS 2259 Uncertainty and Error Analysis; PHYS 2300 Physics of the Body; PHYS 2340 Medical Imaging Physics; PHYS 3510 Analytical Mechanics I; PHYS 3711 Optics I

Law School

LAWS 4310 Introduction to Intellectual Property; LAWS 4220 Environmental Law

Requirements for Distinction in the Major in Computer Engineering

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

Requirements for Distinction in the Major in Electrical Engineering

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

Requirements for Distinction in the Major in Mechanical Engineering

- Minimum 3.3 cumulative GPA

Engineering, Bio Courses

ENBI 3500 Biofluids (4 Credits)
The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 4500. Prerequisites: ENME 2661.

ENBI 3510 Biomechanics (4 Credits)
An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include analysis of the human musculoskeletal system as sensors, levers, and actuators; joint articulations and their mechanical equivalents; kinematic and kinetic analysis of human motion; introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; mechanical properties of hard and soft tissues; mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; orthopedic implants. Cross listed with ENBI 4510. Prerequisites: ENME 2410, ENME 2520, and ENME 2541.

ENBI 3800 Topics in Bioengineering (1-4 Credits)
Special topics in bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENBI 3992 Directed Study (1-5 Credits)

Engineering, Computer Courses

ENCE 1992 Directed Study (1-10 Credits)

ENCE 2101 Digital Design (0-3 Credits)
Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM’s, PLA’s and PAL’s; data selectors and multiplexors; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

ENCE 2992 Directed Study (1-10 Credits)

ENCE 3100 Advanced Digital System Design (4 Credits)
Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

ENCE 3110 Introduction to High Speed Digital Design (4 Credits)
Fundamental topics related to the development of high speed digital systems. Topics include signal integrity and reliability related to crosstalk, parasitic, and electromagnetic interference caused by device clocking speed and system complexity. At least junior standing required. Must be a computer or electrical engineering student. Cross listed with ENCE 4100.
ENCE 3210 Microprocessor Systems I (4 Credits)
Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

ENCE 3231 Embedded Systems Programming (4 Credits)
Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

ENCE 3241 Computer Organization and Architecture (3 Credits)
Organization of digital computers; memory, register transfer and datapath; Arithmetic Logic Unit; computer architecture; control unit; I/O systems. Prerequisite: ENCE 2101.

ENCE 3250 HDL Modeling & Synthesis (3 Credits)
Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor's permission.

ENCE 3261 Fault Tolerant Computing (3 Credits)

ENCE 3321 Network Design (4 Credits)
Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

ENCE 3501 VLSI Design (3 Credits)
Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA’s, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

ENCE 3620 Computer Vision (4 Credits)
This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisite: ENEE 3311.

ENCE 3630 Pattern Recognition (4 Credits)
This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.

ENCE 3631 Machine Learning (4 Credits)
This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

ENCE 3830 Topics in Computer Engineering (1-5 Credits)
Special topics in computer engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENCE 3991 Independent Study (1-5 Credits)
Topics in computer engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENCE 3992 Directed Study (1-10 Credits)
ENCE 3995 Independent Research (1-10 Credits)
### Engineering, Electrical Courses

**ENEE 1992 Directed Study (1-10 Credits)**

**ENEE 2012 Circuits I and Laboratory (4 Credits)**
An introduction to electrical circuit analysis, design and evaluation. Emphasis on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and basic circuit theorems are stressed. AC signals are introduced. Computer analysis software integrated throughout the course. Cross-listed with PHYS 2111. Prerequisites: PHYS 1214, MATH 1953.

**ENEE 2022 Circuits II (4 Credits)**
AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is placed on the Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single pole cascade, Butterworth, Chebychev), and step response circuits. Phasor applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit analysis. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Prerequisites: ENEE 2012, MATH 2070.

**ENEE 2211 Electronics (4 Credits)**
Circuit behavior of semiconductor devices. Bipolar and field-effect transistors and their models; basic physical explanation of the functioning of these devices; large- and small-signal analysis of practical circuits; electronic design using both hand and computer methods of calculation and design; biasing methods for amplifier circuits; power supplies and current-source circuits. Design laboratory. Prerequisites: ENEE 2222.

**ENEE 2223 Advanced Electronics (4 Credits)**
High-frequency transistor models and determination of parameters; Laplace and Fourier analyses of common amplifier circuits; design and analysis of broad-band amplifiers and multistage amplifiers. Basis feedback topologies; Nyquist, root-locus and Bode plots on the stability; introduction to amplifier noise; active filter design; sinusoidal oscillators. Prerequisite: ENEE 2211.

**ENEE 2611 Engineering Electromagnetics (4 Credits)**
The study of Maxwell’s equations and their experimental and theoretical foundations. Topics include Static electromagnetic fields, time-varying electromagnetic fields, wave propagation, transmission lines, and antennas. Prerequisites: PHYS 1213, PHYS 1214. Corequisite: ENGR 3610 or ENGR 3620.

**ENEE 2992 Directed Study (1-10 Credits)**

**ENEE 3011 Physical Electronics (4 Credits)**
The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field-effect transistors (JFT, MESFET, MOSFET) and optoelectronic effect transistors (JFT, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010, CHEM 1610, PHYS 1213, PHYS 1214 or permission of instructor.

**ENEE 3030 Optoelectronics (4 Credits)**
The active and passive optical elements. Includes principles of light, optical sources (LED, LASER, Fiber Laser), optical fibers, photodetectors (APD, PIN, MSM) and practical optical transmitter and receivers. Laboratory. Cross listed with ENEE 4030. Prerequisite: ENEE 3011 or ENEE 2211 or permission of instructor.

**ENEE 3035 Photonics (4 Credits)**
Theory and techniques for the application of the optical electromagnetic spectrum from infrared to ultraviolet to engineering problems in communications, instrumentation and measurement. May include lasers, optical signal processing, holography, nonlinear optics, optical fiber communications, optical behavior of semiconductors, and similar topics in modern optics, depending on the interests and requirements of the students. Cross-listed with ENEE 4800. Prerequisite: ENEE 2611 or instructor’s permission.

**ENEE 3111 Signals & Systems (4 Credits)**
Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for continuous time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Prerequisites: ENEE 2021, MATH 2070.

**ENEE 3130 Principles of Communication Systems (3 Credits)**
Introduction to the theory and analysis of communication systems. Emphasis on analog systems; application of probability and statistics, modulations and demodulations; noise and signal-to-noise ratio analysis; the measure of information, channel capacity, coding and design factors. Prerequisites: ENEE 3111, ENGR 3610 or permission of instructor.

**ENEE 3141 Digital Communications (3 Credits)**
Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3610 or permission of instructor.

**ENEE 3611 Analysis and Design of Antennas and Antenna Arrays (4 Credits)**
Maxwell’s equations applied to antenna analysis and design. Topics include fundamental parameters of antennas, radiation integrals and auxiliary potential functions, analysis and design of linear wire antennas, loop antennas, arrays, broadband antennas, frequency independent antennas, aperture antennas and horns. Integrated lab included. Prerequisite: ENEE 2611.
ENEE 3620 Optical Fiber Communications (4 Credits)
A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

ENEE 3641 Introduction to Electromagnetic Compatibility (4 Credits)
The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Cross listed with ENEE 4640. Prerequisites: ENEE 3111, ENEE 2611 and ENEE 2223.

ENEE 3670 Introduction to Digital Signal Processing (4 Credits)
Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

ENEE 3810 Topics Electrical Engineering (1-5 Credits)
Various topics in electrical engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENEE 3991 Independent Study (1-5 Credits)
Topics in electrical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENEE 3992 Directed Study (1-10 Credits)

Engineering, Mechanical Courses

ENME 2410 Materials Science I (3 Credits)

ENME 2421 Materials Science II (3 Credits)

ENME 2510 Statics with Lab (4 Credits)
Study of static force systems. Topics include resolution and composition of forces and moments, equilibrium of two-dimensional and three-dimensional force systems, shear and moments in beams, friction, and moments of inertia. Includes a laboratory component where students will engage in hands-on projects that apply loading equilibrium, design of structures, and stress/strain. Prerequisites: MATH 1951 AND PHYS 2520.

ENME 2520 Dynamics I with Lab (4 Credits)

ENME 2530 Dynamics II (3 Credits)
Rotating reference frames, rigid body kinematics, rigid body kinetics, Euler’s Laws, inertia, energy and momentum, and three-dimensional motion. Cross listed with PHYS 2530. Prerequisites: ENME 2520.

ENME 2540 System Dynamics (3 Credits)
This course covers modeling, analysis, and control of single and multiple degree-of freedom dynamical systems, including mechanical, electrical, thermal, fluid systems and their combinations (mixed systems). Basic concepts in system theory, such as state variables and stability concepts, will be introduced as well as bond graph notation and approach. Prerequisites: ENME 2530, ENME 2661, ENGR 1572, and ENEE 2012.

ENME 2541 Mechanics of Materials (3 Credits)
Normal and shear stress and strain; elasticity, mechanical properties of materials, principal stresses; torsion, beams, deflection of beams under loads, methods of superposition, failure theory, columns. Prerequisite: ENME 2510.

ENME 2651 Fluid Dynamics I (3 Credits)
Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2510 and MATH 2070.
ENME 2661 Fluid Dynamics II/Heat Transfer I (3 Credits)
Course series provides students with the basic skills levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2651.

ENME 2571 Heat Transfer II with Lab (4 Credits)
Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2661.

ENME 2710 Engineering Thermodynamics I (3 Credits)

ENME 2720 Engineering Thermodynamics II (3 Credits)

ENME 2810 Mechanical Engineering Lab I (3 Credits)
Engineering experiments illustrating selected topics in heat transfer, fluid mechanics, solid mechanics, thermodynamics, measurement and control. Use of microcomputers in experimentation and control. This course encourages the development of laboratory experimentation skills, design skills and technical writing skills. Prerequisites: ENME 2540 AND ENME 2671.

ENME 2820 Mechanical Engineering Lab II (3 Credits)
Engineering experiments illustrating selected topics in heat transfer, fluid mechanics, solid mechanics, thermodynamics, measurement and control. Use of microcomputers in experimentation and control. This course encourages the development of laboratory experimentation skills, design skills and technical writing skills. Prerequisite: ENME 2810.

ENME 2892 Directed Study (1-10 Credits)
ENME 3310 Computational Methods for Mechanics and Materials (4 Credits)
An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals of the numerical methods used in mechanical and materials engineering. Cross listed with ENME 4310.

ENME 3320 Computer Aided Design and Analysis (4 Credits)
Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems.

ENME 3400 Fatigue (4 Credits)
A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue, and reliability. Cross listed with ENME 4400.

ENME 3511 Machine Design (3 Credits)
Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

ENME 3545 Mechanisms (4 Credits)
Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

ENME 3651 Computational Fluid Dynamics (4 Credits)
This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

ENME 3661 Mechanical Energy Systems Engineering (4 Credits)
This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

ENME 3720 Introduction to Aerospace Engineering (4 Credits)
This course provides and introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.
ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)
This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

ENME 3820 Topics Mechanical Engineering (0-5 Credits)
Mechanical engineering topics as announced. May be taken more than once. Prerequisite: vary with offering.

ENME 3991 Independent Study (1-5 Credits)
Topics in mechanical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENME 3992 Directed Study (1-10 Credits)

ENME 3995 Independent Research (1-10 Credits)

Engineering, Mechatronic Syst Courses

ENMT 3210 Mechatronics I (4 Credits)
This course provides basic concepts from electrical, mechanical, and computer engineering as applied to mechatronic systems and is intended to serve as a foundation course for further exploration in the area of mechatronics. Prerequisite: senior or graduate standing in engineering.

ENMT 3220 Mechatronics II - Real-Time Systems (4 Credits)
Real-time systems require timely response by a computer to external stimuli. This course examines the issues associated with deterministic performance including basic computer architecture, scheduling algorithms, and software design techniques including data flow diagrams, real-time data flow diagrams, stat transition diagrams, and petri nets. In the lab portion of this class, students program a microcontroller to interact with mechatronic devices. Prerequisite: ENMT 3210, ENCE 3210 or COMP 3354.

ENMT 3800 Topics (Mechatronics) (1-4 Credits)
Various topics in mechatronics system engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENMT 3991 Independent study (1-5 Credits)
Topics in mechatronics engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

Engineering Courses

ENGR 1511 Engineering Connections (1 Credit)
This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

ENGR 1572 Applied MATLAB Programming (3 Credits)
The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671, and MATH 1952.

ENGR 1611 Introduction to Mechanical Systems with CAD (4 Credits)
Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.

ENGR 1622 Introduction to Mechatronic Systems I with MultiSim and MathCAD (4 Credits)
Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multiscan circuit analysis software and Mathcad are among other topics covered in this course.
ENGR 1632 Introduction to Mechatronic Systems II with LabView (4 Credits)
Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

ENGR 1700 Machine Shop Practice (1 Credit)
Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

ENGR 1911 Introduction to CAD (2 Credits)
This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

ENGR 1921 Introduction in Engineering II (1 Credit)
This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

ENGR 1931 Introduction to Engineering III (1 Credit)
This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

ENGR 1992 Directed Study (1-10 Credits)

ENGR 2610 Engineering Integration I (3 Credits)
Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: ENGR 2035 and junior standing in the appropriate engineering discipline.

ENGR 2620 Engineering Integration II (3 Credits)
Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects.

ENGR 2905 Engineering Cooperative Education (0-12 Credits)
For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

ENGR 2910 Engineering Economics and Ethics (3 Credits)
This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

ENGR 2950 Engineering Assessment I (0 Credits)
Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2012 AND ENGR 1572.

ENGR 2951 Engineering Assessment II (0 Credits)
Undergraduate students in Mechanical Engineering must register for and take the Fundamentals of Engineering Examination (FE). All students must complete an engineering exit interview and other assessment related tasks. To be taken in the last quarter of attendance. Prerequisites: ENGR 3323.

ENGR 2992 Directed Study (1-10 Credits)

ENGR 3100 Instrumentation and Data Acquisition (4 Credits)
This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.
ENGR 3200 Introduction to Nanotechnology (4 Credits)
In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2671.

ENGR 3210 Intro Nano-Electro-Mechanics (4 Credits)
Familiarize science and engineering students with the electromechanical aspects of the emerging field of Nanotechnology (NEMS). NEMS is a relatively new and highly multidisciplinary field of science and technology with applications to state of the art and future sensors, actuators, and electronics. Starting with an overview of nanotechnology and discussion on the shifts in the electromechanical behavior and transduction mechanisms when scaling the physical dimensions from centimeters to micro-meters and then down to nanometers. Several electromechanical transduction mechanisms at the micro and nanoscale are presented and discussed in an application based context. New electromechanical interactions appearing in the nano and molecular scale, such as intra-molecular forces and molecular motors, are discussed. A detailed discussion and overview of nanofabrication technologies and approaches are also provided. Cross listed with ENGR 4210. Prerequisite: must be an engineering or science major of at least junior standing.

ENGR 3313 Engineering Design Project I (2 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENME 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

ENGR 3323 Engineering Design Project II (3 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing.

ENGR 3333 Engineering Design Project III (3 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include: 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing.

ENGR 3340 Product Development and Market Feasibility (4 Credits)
In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

ENGR 3350 Reliability (4 Credits)
An overview of reliability-based design. Topics include fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM), Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 4350.

ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)
This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2211.

ENGR 3520 Introduction to Power Electronics (4 Credits)
This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.
ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)
In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

ENGR 3535 Electric Power Engineering Laboratory (1 Credit)
In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.

ENGR 3540 Electric Power Systems (4 Credits)
This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

ENGR 3545 Electric Power Economy (3 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

ENGR 3550 Introduction to Machine Drive Control (4 Credits)
This course provides the basic theory for the analysis and application of adjustable-speed drive systems employing power electronic converters and ac or dc machines. Prerequisites: ENGR 3520 and ENGR 3530.

ENGR 3611 Engineering Mathematics (3 Credits)
Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

ENGR 3620 Advanced Engineering Mathematics (4 Credits)

ENGR 3621 Advanced Engineering Mathematics (4 Credits)
Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

ENGR 3630 Finite Element Methods (4 Credits)
Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

ENGR 3650 Probability and Statistics for Engineers (4 Credits)
This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

ENGR 3721 Controls (3,4 Credits)
Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2021, ENGR 3610 or permission of instructor.

ENGR 3722 Control Systems Laboratory (1 Credit)
This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

ENGR 3730 Robotics (3 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

ENGR 3731 Robotics Lab (1 Credit)
Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.
ENGR 3735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3610, ENGR 3721/3722, or permission of the instructor.

ENGR 3742 LabVIEW Programming, a primer for certification as an Applications Developer (4 Credits)
The LabVIEW course covers numeric, Boolean, and string controls; programming structures include loops, sequences, formula, and case structures. VISA (virtual instrumentation and software structure) and SCPI (standard commands for programmable instruments) are used to control test equipment and acquire data via the GPIB (general purpose interface bus, IEEE488 standard). VIs (virtual instruments) for data acquisition and analysis are developed utilizing mathematical, signal processing, and statistical LabVIEW programming modules. LabVIEW structures will be used to mathematically model and solve second order differential equations and Laplace transforms.

ENGR 3800 Topics (ENGR) (1-4 Credits)
Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENGR 3900 Engineering Internship (0-4 Credits)
Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

ENGR 3991 Independent Study (1-5 Credits)
Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENGR 3992 Directed Study (1-10 Credits)
ENGR 3995 Independent Research (1-10 Credits)

Materials Science Courses
MTSC 3010 Mechanical Behavior of Materials (4 Credits)
Effects of microstructure on mechanical behavior of materials (metals, polymers, ceramics and composites); emphasis on recent developments in materials science, modulus, fracture (fracture toughness and brittle strength), fatigue, creep, wear, friction, stress rupture and deformation. Cross listed with MTSC 4010. Prerequisites: ENME 2421.

MTSC 3020 Composite Materials I (4 Credits)

MTSC 3450 Fracture Mechanics (4 Credits)
Topics include stress field at a crack tip, linear fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 4450. Prerequisites: ENME 2421 and ENME 2541.

MTSC 3800 Topics in Materials Science (1-5 Credits)
Various topics in materials science as announced. May be taken more than once. Prerequisite: varies with each topic.

MTSC 3992 Directed Study (1-10 Credits)

English and Literary Arts

Office: Sturm Hall, Room 495
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2266
Email: joel.lewis@du.edu
Web Site: http://www.du.edu/ahss/schools/english

The undergraduate mission of the Department of English and Literary Arts is to help fulfill the University's commitment to provide a liberal undergraduate education and to contribute to the University's general education program. For most of its 150-year history, the academic study of English has been the study of literatures written in this language. That is, the focus of English study includes the history, production and interpretation of literature in English with accompanying emphasis on critical reception of texts, on the diverse cultures that contextualize literary writing and on other kinds of "texts." No single perspective dominates the study of this discipline. Recently, it has also become apparent that even predominantly English-speaking cultures are highly diverse and comprise many different cultures in different languages. In broad terms, then, the discipline of English and Literary Arts at DU includes a) the study of the history of literature in English and in English translation; b) the production of literature as a
creative act; and c) the interpretation of literature within the context of aesthetics, which has a complex relationship to social, economic, cultural and political conditions. Like most English departments, we accommodate several different approaches to and emphases on the study of literature and the teaching of creative writing. However, the Department of English and Literary Arts is united in its acceptance of these three broad activities of study as aspects of our mission.

**English and Literary Arts**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

Minimum of 44 credits in English; maximum of 60 credits. No more than 12 credits of coursework at the 1000 level may be taken, and at least 12 credits must be taken at the 3000 level.

The Department of English and Literary Arts offers three concentrations:

**Literary Studies**

This concentration is for students who wish to pursue the traditional approach to the discipline of English literary criticism, scholarship, and theory. Students interested in a broad knowledge of the discipline and/or continued study in graduate or professional programs should choose this concentration.

Creative Writing

This concentration is for students who wish to create original works in poetry, fiction, nonfiction, or translation, and who seek training from practicing writers in these areas. The program emphasizes, more than many such programs, the study of literature and theory. It is appropriate for students who plan to seek the MFA or PhD in English.

English Education

This concentration is for students who wish to teach English language and literature at the secondary school level. Students explore a range of writings from medieval British to postcolonial literatures of the Americas, and in addition take courses in language and writing.

Please note: Students who want to receive teaching certification upon completion of the BA or to go on for the dual degree option in teacher education must complete all requirements for this concentration by the end of the junior year with a minimum grade point average of 3.0. In their senior year, these students must complete the 40-hour Teacher Education Program. Inasmuch as the student may take an additional 16 credits in the major beyond the 44 required credits (or a maximum of 60 credits), we highly recommend that students in English education confer with the Morgridge College of Education's teacher education department for its recommendations on additional areas students might want or need to cover in their English major.

Course Requirements:

- 4 credits Introductory Topics in English (ENGL 1010)
- 8 credits British Literature Survey
- 8 credits American Literature Survey
- 4 credits Shakespeare (e.g., ENGL 2221, ENGL 2220)
- 4 credits English Grammar or History and Structure of the English Language (e.g., ENGL 2026, ENGL 3813)
- 4 credits Literary Interpretation (e.g., ENGL 3823, ENGL 3825)
- 4 credits Poetry Genre (e.g., ENGL 1007, ENGL 2716, ENGL 2001)
- 8 credits Senior Seminar (ENGL 3900)

(12 hours of coursework must meet department diversity requirement.)

All majors must complete the following core requirements in addition to specific concentration requirements (see below):

**Foundations** (1000-level): 4 credits

"Introductory Topics in English." This is a required course for all majors. It should be taken in the first or second year. It is a pre-requisite for all 3000-level advanced study courses.

**Core Studies** (2000-level): 12 credits

*Core Studies* courses are broad, entry-level courses that provide historical or synoptic overviews of a field or large subject area. Examples may include traditional literary/historical surveys; histories of genres, ideas, or other literary practices; introductions to regional, national, or international literatures, etc.

**Advanced Studies** (3000-level): 8 credits

*Advanced Studies* are courses conceived as further, more focused investigations of topics from within subject fields. Such courses offer narrower literary or genre histories, studies of authors or author groups, theoretical or methodological studies, cross-disciplinary topics, or other, more specific subjects not available in Core Studies classes.

**Senior Sequence** (3000-level): 8 credits

*Senior Seminars* are deep, investigative courses that take students into a specific, usually narrow topic within a subject field. These courses emphasize the further, more complex application of skills introduced in the department's "Introduction to the Major" course. Faculty should be encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors.
Examples could include courses devoted to a single book or set of major works; courses designed to develop research/archival skills around a specific topic; courses that consciously prepare students for graduate work, etc.

Total credit hours: 32

**Secondary Major**

44 credits. Same requirements as for BA degree.

**Minor Requirements**

Students minoring in English and Literary Arts must take a minimum of 24 credits in English. No specific courses are required; students are encouraged to design a minor that reflects their interests. No more than 8 credits may be taken at the 1000 level. Minimum GPA in the minor is 2.0.

**Requirements for Distinction in the Major in English and Literary Arts**

- Minimum 3.5 GPA
- Thesis Requirement: Students seeking recognition for "Distinction in English" are required to complete a thesis during the fall and winter quarters of their senior year. Students who wish to write a critical thesis must write a 40-50 page analytic research paper; students who wish to write a creative thesis must write a fiction and/or poetry project of a length to be determined by the student and the faculty director.
- Students who intend to write a critical literary thesis must also complete: 3800 Bibliography & Research, 3995 Independent Research, one 3000-level Literary Theory course, and one additional 3000-level English course.
- Students who intend to write a creative thesis must also complete: 3852 Topics in Poetics or 3800 Bibliography & Research, 3991 Independent Study with Thesis Director, one 3000-level Literary Theory course, and one 3000-level Creative Writing course.

**BA in English and Literary Arts**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

ENGL 1000 Introduction to Creative Writing (4 Credits)
Basic techniques of fiction and poetry.

ENGL 1006 Art of Fiction (4 Credits)
An introduction to the appreciation of fiction as an art form through practice in interpretation and creation.

ENGL 1007 Art of Poetry (4 Credits)
An introduction to the appreciation of poetry as an art form through practice in interpretation and creation.

ENGL 1008 Art of Drama (4 Credits)
An introduction to the appreciation of drama as an art form through practice in interpretation and creation.

ENGL 1009 Art of Creative Non-fiction (4 Credits)
An introduction to the appreciation of creative non-fiction as an art form through practice in interpretation and creation.

ENGL 1010 Introductory Topics in English (4 Credits)
Various topics in literary studies approached at the introductory level.

ENGL 1110 Literary Inquiry (4 Credits)
Literary Inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 1200 International Short Fiction (4 Credits)
This class considers masterpieces of short fiction—stories and novellas—from around the world. Various linguistic communities, national traditions, and historical periods are represented through a wide-range of global texts. One goal of this course is synchronic: to identify significant themes, techniques, and conventions appearing in both western and non-western literary traditions. A second goal of this course is diachronic: to identify key developments in the forms of short fiction. Significant theoretical models are presented to provide a thorough overview of the concept of “world literature” and its associated problems.

ENGL 1992 Directed Study (1-10 Credits)

ENGL 2001 Creative Writing-Poetry (4 Credits)
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

ENGL 2002 Creative Writing-Poetry (4 Credits)
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

ENGL 2003 Creative Writing-Poetry (4 Credits)
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

ENGL 2004 Magical Realism in Literature and Cinema (4 Credits)
This course examines the relationships between human groups and their social and aesthetic environments through the conjunction of history and myth or magical realism. We study magical realism both as auctorial flights of the imagination based on alternative ways of seeing and telling as well as a community-inspired idiom shaped by a reperception of history and the environment. Our study is region-specific in sociocultural details as well as global in scope and involves the exploration of magical realism in literature and cinema. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2010 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2011 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2012 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2013 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2020 Studies in Non-Fiction (4 Credits)

ENGL 2021 Business Technical Writing (3,4 Credits)
Course open to Colorado Women’s College students only.
ENGL 2026 English Grammar (4 Credits)
ENGL 2031 Poetry Since 1945 (4 Credits)
ENGL 2035 History of Genre-Poetry (4 Credits)
ENGL 2036 History of Genre-Fiction (4 Credits)
ENGL 2040 Introduction to Publishing (4 Credits)
Through lectures and field trips, students will learn how books get published - with all the steps involved. Cross listed with ENGL 3040, MFJS 3140.
ENGL 2060 Modern/Post Modern Literature (4 Credits)
ENGL 2070 Postcolonial Literature and Theory (4 Credits)
An examination of the phenomenon of postcolonialism, taking into account the ways in which it has been conceptualized. Key interests include the contexts of imperialism and decolonization as well as critical readings of pertinent literature.
ENGL 2080 London as Global City: From Empire to Commonwealth (4 Credits)
London as Global City is designed to accommodate the newly structured London Program for Fall 2011. It entails biweekly meetings and site visits for 14 weeks and examines the origins of the British Empire, starting with the founding of the East India Company in 1600 and moving to 21st century London as a repository of peoples from across the globe, particularly descendants of former British colonies in India, Africa and the West Indies. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2100 English Literature I: Beowulf-Spenser (4 Credits)
A survey of English literature from the earliest extant texts through works written in the late 16th century, ending with Spenser. Its purpose is to give students a historical grasp of the development and continuity of English literature during the Middle Ages and the 16th century. Old English and most Middle English texts will be read in translation, but Chaucer and Middle English lyrics will be read in the original.
ENGL 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.
ENGL 2120 Chaucer-Selected Poetry (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2125 Arthurian Literature (4 Credits)
Building upon Malory’s classic Arthurian cycle, this course will follow the major developments in the legend of Arthur into the 20th century.
ENGL 2130 World Literature (4 Credits)
A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world–such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2200 English Literature II: Donne-Johnson (4 Credits)
This course explores the literatures of the 17th and 18th centuries. This 200-year period marks England's transition from a medieval, relatively static society bound by hierarchy, religion and shared cultural values into a restless early-modern society of cities, social mobility, civic unrest, colonies and cosmopolitanism. Students work on understanding genres and styles, the basics of scansion, and the terminologies, methods and ideologies of literary criticism. The course is divided into generic categories.
ENGL 2202 Renaissance Poetry & Prose (4 Credits)
ENGL 2220 Shakespeare-Representative Plays (4 Credits)
Introduction covering about eight plays and some sonnets.
ENGL 2221 Shakespeare Seminar (4 Credits)
This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2230 Shakespeare and Film (4 Credits)
An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2300 English Literature III (4 Credits)
A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.
English and Literary Arts

ENGL 2311 English Novel to 1800 (4 Credits)

ENGL 2401 Blake, Wadsworth and Contemporaries (4 Credits)
The first generation of British Romantic writers came of age during a time of revolution (American, French, Haitian). The inheritors of radical eighteenth-century ideas about natural rights, the first-generation Romantics found optimism in human feeling as well as human reason. They believed that the capacity for sympathy and lyrical transport would lead to a new, benevolent society, but their belief in social progress was checked by revolutionary violence and the rise of a hyper-rationalism that seemed more dangerous than the superstition it was meant to replace.

ENGL 2402 Later Romantics (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2536 Shakespeare Plays in London (4-4.5 Credits)
Cross listed with THEA 2220.

ENGL 2544 Globalization and Cultural Texts (4 Credits)
The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2613 Excavating Italy (4 Credits)
This class provides an introduction to the art, history and literature of the Italian cities of Rome, Florence and Venice from classical antiquity through the High Renaissance, as well as visual and literary responses to Italy, by artists and writers. Students are encouraged to recognize the importance of classical architecture and sculpture as the artistic precedents for Renaissance art. We see how religious and literary themes provided much of the iconography of Renaissance painting. Students are also encouraged to become intimately acquainted with the works of a few selected major artists, such as Giotto, Botticelli, and Michelangelo, while also developing a wider understanding of the general stylistic features of Italian Renaissance art. The literature component focuses on a variety of genres from classical texts to Shakespeare's Italian plays to British travelers' impressions of Italian artists and scenes. This is a team-taught course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ARTH 2613.

ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)
Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonialization to the Civil War.

ENGL 2705 Literature of the American South (4 Credits)
An introductory course on the literature emanating from the American south. Texts may include fiction, poetry, drama, and non-fiction primarily spanning the 18th through the 21st century.

ENGL 2706 Writing the American West (4 Credits)
An introductory course on the literature emanating from the American west. Texts may include fiction, poetry, drama, and non-fiction spanning the 19th through the 21st century.

ENGL 2707 Contemporary Literature (4 Credits)
The course surveys contemporary books. The novel has never been a coherent genre, but especially since the 1960s its features, in some practitioners, have begun to resemble history, anthropology, poetry, science writing, or all of these. The course will include readings from Asia, South America, Europe and North America.

ENGL 2708 Topics in English (1-4 Credits)

ENGL 2709 Topics in English (1-10 Credits)

ENGL 2710 American Novel-19th & 20th Century (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2711 20th Century American Fiction (4 Credits)
Students read, evaluate and discuss the genre of the American immigrant novel. Topics include how this is a uniquely American literary form and what it says about life in America; the similarities and differences in how ethnic groups understand their experiences; how language and narrative techniques are used to convey the life of a new immigrant; how the experiences of men and women differ; how the immigrant novel has evolved as a literary genre. The readings will be analyzed as a means to consider how the immigration novel in America became a genre that expressed a variety of topics related to the American experience. The class will consider how these works helped to shape and define what it meant to be an American, and how that definition has changed over the last 100 years.

ENGL 2712 American Short Story (4 Credits)
Wide range of American short stories, quintessential American genre, from the early 19th century to present.

ENGL 2715 Native American Literature (4 Credits)
Native American Literature explores the relationships between contemporary Native American narratives and Native American oral traditions. We will examine the intellectual underpinnings of Native American literary expressions, focusing on tribally specific Native American concepts of language, perception, and process in relation to Native cultural and political survival. This course aims to celebrate Native American cultural expression through lectures and discussion, group work and intellectual exercises.
ENGL 2716 American Poetry (4 Credits)
This course examines American poetry by way of historical, thematic, and/or formalist approaches. Possible topics could include: post-WWII poetry, the New York School, Self and Other in American Poetry, Language poetry, etc.

ENGL 2717 African American Writers (4 Credits)
Defines, describes and analyzes the African-American aesthetic.

ENGL 2718 Latina/o Literature (4 Credits)
This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and immigration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoirs, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.

ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)
 Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in American from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with JUST 2743.

ENGL 2750 American Literature Survey I (4 Credits)
First part of American survey; introduction to major authors and genres.

ENGL 2751 American Literature Survey II (4 Credits)
Second part of American survey; further examination of major authors and genres.

ENGL 2752 American Literature Survey III (4 Credits)
A survey of American literature, including representative works of fiction, poetry and drama from the 1930s to the present.

ENGL 2815 Studies in Rhetoric (4 Credits)

ENGL 2816 Advanced Writing (4 Credits)
This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student’s choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2820 Philosophy and Literature (4 Credits)
Hermeneutics, sometimes called “the art of interpretation,” offers us the opportunity to explore strategies of engagement and exegesis that seeks to observe, question, and celebrate the ways in which we read and write the world. By bringing critical and creative inquiry to bear on the event of interpretation itself we can consider the ethical implications of how we deal with our individual identities as well as our collective, national, and global identities. In this course we pose big questions--What are we talking about when we talk about existence? What does it mean to have a body? How does desire and memory construct history and identity? Walking these questions through a variety of literary and philosophical texts and artistic lenses, we consider how “the creative” (writing, the literary) performs, becomes, and is “the critical” and vice-versa. Students should be prepared to write, read, and participate in discussion.

ENGL 2825 Cultural Criticism (4 Credits)
This course will introduce students to some of the major moments in the development of cultural studies and will show how the discipline "works" to make sense of culture at large. Cross listed with ENGL 3825.

ENGL 2830 Representations of Women (4 Credits)
Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with GWST 2830.
ENGL 2845 Politics and Literature (4 Credits)

ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)
This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by writers such as Thomas More, Charlotte Gilman Perkins, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, etc. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2980 Internship in English (1-5 Credits)
This course provides academic credit for off-campus internships in fields related to the English major. One paper is required at the end, articulating how the internship complemented the student's studies in English. Requires approval by director of undergraduate studies in English.

ENGL 2992 Directed Study (1-10 Credits)

ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.

ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.

ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.

ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.

ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

ENGL 3013 Adv Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)

ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)
A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

ENGL 3040 Introduction to Publishing (4 Credits)
Cross listed with ENGL 2040, MFJS 3140.

ENGL 3101 Non-Chaucerian Middle English Literature (4 Credits)
A study of Chaucer's near-contemporaries, Gower, Langland, and the Pearl poet as well as drama and lyrics.

ENGL 3121 Chaucer: Canterbury Tales (4 Credits)
Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

ENGL 3320 Oral Literature and Orality in Literature (4 Credits)
The term "oral literature" generally refers to narratives and poems—including songs—performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. Some of the questions that we therefore explore in this course are as follows: How did oral literature develop? What are its types and their characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature—from the traditional (such as folklore) to the contemporary (such as spoken work poetry). We also study the use of orality as a literary device in written literature. Our studies involve the examination of material and texts from different parts of the world.

ENGL 3402 Early Romantics (4 Credits)

ENGL 3404 England and Empire: Ambivalent Imperialism in Victorian and Edwardian Literature (4 Credits)
A course investigating the literary accounts of and responses to British imperialism in Victorian and Edwardian England in which students read works by Conrad, Kipling and Forster as well as several 20th-21st works by post Commonwealth authors in London.
ENGL 3405 Postmodern Visions of Israel (4 Credits)
This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual “multiverses.” A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

ENGL 3706 Writing the American West (4 Credits)
Explores historical and contemporary writing produced in and about the American West.

ENGL 3711 20th-Century American Fiction (4 Credits)
Fiction, poetry, drama, and non-fiction on selected themes by 20th and 21st century American writers. Topics for study may include issues related to regionalism, ethnicity and gender, as well as specific social and historical concerns.

ENGL 3731 Topics in English (1-4 Credits)

ENGL 3732 Topics in English (1-4 Credits)

ENGL 3733 Topics in English (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

ENGL 3742 Jesus in Jewish Literature (4 Credits)
This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus’ life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

ENGL 3743 Modern Jewish Literature (4 Credits)
Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

ENGL 3744 African American Literature (4 Credits)
This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

ENGL 3800 Bibliography/Research Method (4 Credits)

ENGL 3803 Modernism/Postmodernism (4 Credits)

ENGL 3810 ISL Dharamsala: Tibet, Global Citizenship, & Community Literacies (4 Credits)
ISL Dharamsala presents DU students with the unique opportunity to study international community literacies as a practical component of global citizenship through service-learning placements and study in Dharamsala, India. Home of the Dalai Lama and the Tibetan government-in-exile, Dharamsala is a multi-generational community located in the northern Indian foothills of the Himalayas. During fall quarter, students will study community literacies in the practice of global citizenship and service while immersed in the geo-political, religious, and other contexts experienced by Tibetans in exile. During their time in Dharamsala, cultural immersion and a service-learning placement will give students insight into the complexities of social justice issues and cultural nuances they have been studying and provide opportunities to contribute to local and global society through informed and reflective practice. This course is cross-listed with WRIT 3810.

ENGL 3813 History and Structure of the English Language (4 Credits)
A composite course studying both the structure of modern English and the history of the English language.

ENGL 3815 Studies in Rhetoric (4 Credits)
This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

ENGL 3817 History of Rhetoric (4 Credits)

ENGL 3818 Composition Theory (4 Credits)

ENGL 3819 Old English (4 Credits)
This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)

ENGL 3822 Literary Criticism: 20th Century (4 Credits)
Critical methods and philosophies of 20th-century critics; their relationship to traditions.
ENGL 3823 Interpretation Theory (4 Credits)
ENGL 3825 Cultural Criticism (4 Credits)
Cross listed with ENGL 2835.
ENGL 3852 Topics in Poetics (4 Credits)
ENGL 3900 Senior Seminar (4 Credits)
The Senior Seminar is a deep, investigative course that takes students into a specific, usually narrow topic within a subject field. Such courses emphasize the further, more complex application of skills introduced in the department's "Introduction to the Major" course. Faculty are encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors. Students should have taken ENGL 1010 and be in their final year of study before taking this course.

ENGL 3982 Writers in the Schools (2, 4 Credits)
This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

ENGL 3991 Independent Study (1-17 Credits)
ENGL 3992 Directed Study (1-10 Credits)
ENGL 3995 Independent Research (1-10 Credits)
ENGL 4621 Adv Studies-20th C. Literature (2-4 Credits)
This course will offer (and be required of) graduate students an advanced foundation in 20th century literature; the primary texts and their cultural/historical/theoretical contexts.

ENGL 4650 Special Topics: 20th Cent Lit (4 Credits)

English-General

The English Language Center (ELC) offers three courses specifically designed to help international students more successfully integrate into campus life while also fine-tuning their language skills. These are regular, on-campus classes designed for matriculated students and students at their final level of their English studies at the ELC. These courses earn regular DU undergraduate credit that will count toward graduation.

As part of the Common Curriculum at DU, most students must complete a foreign language requirement. Based on their assessment scores, students must complete 4, 8, or 12 language credits in order to fulfill the requirement. Similarly, non-native English speaking international students who are directly admitted to the University will take the English Language Proficiency Assessment (ELPA) during orientation in order to place them in their Common Curriculum language requirement. This language requirement will help both improve their level of English, and also teach what it means to be part of an American institution of higher learning.

Students who are identified through the ELPA as needing no further English language training will be required to enroll in one 4-credit class focusing on US culture. Students who are identified as needing additional training in either writing or speaking will be required to take 8 credits: a 4-credit course in the skill where additional assistance is needed, as well as the aforementioned culture course. Students who are identified as needing both writing and speaking will be required to take 12 credits: the writing, speaking, and culture courses. Students who have been conditionally admitted to the University will take all three courses as their final level in the English Language Center.

Courses
ENGG 1080 Speaking Strategically (4 Credits)
Designed as a foundational course for international students, this course prepares students to effectively communicate orally for a variety of academic purposes. Through the use of content selected by the instructor, students learn to synthesize information from a variety of different sources, deliver a critical and comprehensible prepared presentation, initiate successful oral discussion strategies during classroom discussions, and critically contribute to a variety of academic conversations. Students are also expected to demonstrate the ability to critically listen and respond to sustained lectures or speeches. Corequisite: ENGG 1100, Exploring US Culture.

ENGG 1090 Writing that Matters (4 Credits)
Designed as a foundational course for international students, this course prepares students to effectively communicate through writing for a variety of academic purposes. Through the use of content selected by the instructor, students learn to synthesize texts, critically respond to a variety of source materials, critically write in a way that contributes to the greater academic discussion, and analyze written texts of various genres and styles according to author purpose, audience, and ways of reasoning or logic.
ENG 1100 Exploring US Culture (4 Credits)
Designed as a foundational course for international students, this course examines the dynamic nature of US culture. While acquiring a language is the first step for successful integration into a nonnative country, it is only the beginning. Once the language is acquired, one must learn the dynamic and pluralistic nuances every culture has. Students are introduced to the pluralistic nature of contemporary American values and reflect on how these values interact. Students are also given the opportunity to locate their cultural identity and role in the greater multicultural community at DU.

Finance
Office: Daniels College of Business, Room 555
Mail Code: 2101 S. University Blvd. Denver, CO 80208
Phone: 303-871-3322
Web Site: https://daniels.du.edu/finance/bachelors/

The program in finance is a broad area of study directed toward the financial elements of business organizations and government units, focusing on investments, corporate finance, financial institutions and international finance. Courses in these areas prepare students for careers in business finance, investment analysis and financial institutions.

Finance
Bachelor of Science in Business Administration Major Requirements
(185 credits required for the degree (p. 82))

Minimum of 36 credits. Requirements include the following:

Total Credits: 189-190

1 Analytical Inquiry: The Natural and Physical World
2 Scientific Inquiry: Society and Culture
3 INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### Courses

**FIN 1992 Directed Study (1-4 Credits)**

**FIN 2010 Survey in Finance (4 Credits)**

Introduces basic concepts, financial principles and analytical skills for non-business majors. Students gain an appreciation of how markets, investments and financial management are interrelated, and methods for basic financial decisions in both business and personal life. Prerequisites: sophomore standing, ACTG 2010 and LGST 2000.

**FIN 2800 Financial Decision Making (4 Credits)**

Basic financial principles and analytical skills including ratio analysis, breakeven analysis and leverage, net present value, internal rate of return, and standard forecasting techniques. Prerequisites: ACTG 2200.

**FIN 2992 Directed Study (1-4 Credits)**

**FIN 3110 Financial Institutions (4 Credits)**

Analysis of financial markets institutions and how they operate within the markets. Management of commercial banks and other financial institutions and relationship to money and capital markets. Prerequisites: C- in FIN 2800.
FIN 3120 Commercial Bank Management (4 Credits)
Comprehensive view of banking and changing environment banks operate in; developing solutions to current bank management problems. Prerequisite or Co-requisite: FIN 3110.

FIN 3200 Corporate Financial Problems (4 Credits)
Advanced application of financial decision making in areas of valuation, dividend policy, working capital, capital budgeting, cost of capital, leasing and special types of financing. Prerequisite: FIN 2800.

FIN 3210 Corporate Financial Theory (4 Credits)
Expansion of FIN 3200 to include mergers and acquisitions, risk analysis, valuation and capital structure, corporate financial planning, and financial applications of decision theory. Prerequisite: FIN 3200.

FIN 3230 Entrepreneurial Finance (4 Credits)
Financial planning for new and small businesses; emphasis on the new enterprise, funds acquisition and valuation. Prerequisite: FIN 3200.

FIN 3250 Raising Capital and Investment Banking (4 Credits)
This course is an advanced Corporate Finance course, focusing on the activities involved in investment banking and the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with many outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance, and going private. Prerequisite: FIN 3200.

FIN 3300 Investments (4 Credits)
Survey of marketable securities, markets, regulation, and risk and return measurement with introduction to fundamental and technical analysis. Prerequisite: FIN 2800.

FIN 3310 Analysis of Securities (4 Credits)
Analysis, valuation and selection of equity securities. Prerequisite: FIN 3300.

FIN 3340 Fixed Income Securities (4 Credits)
Analysis and valuation of various types of fixed income securities. Prerequisites: FIN 3300.

FIN 3360 Analysis of Derivatives (4 Credits)
This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisites: FIN 3300.

FIN 3410 Multinational Financial Management (4 Credits)
Survey and analysis of financial management within and among multinational corporations; Eurodollars, Euromarkets and foreign currencies. Prerequisite: FIN 2800.

FIN 3410 Multinational Financial Management (4 Credits)
Survey and analysis of financial management within and among multinational corporations; Eurodollars, Euromarkets and foreign currencies. Prerequisite: FIN 2800.

FIN 3500 Financial Modeling (4 Credits)
Use of Excel functions and macros to construct financial models from corporate finance, investments and financial markets. Prerequisite: C- in FIN 2800.

FIN 3610 Financial Forecasting (4 Credits)
Methods of forecasting both economic and financial variables; emphasis on techniques used by business forecasters. Cross listed with STAT 3620, STAT 4783. Prerequisite: FIN 2800.

FIN 3700 Topics in Finance (4 Credits)
Exploration of various topics and issues related to finance. Prerequisite: FIN 2800.

FIN 3710 Reiman Fund I (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the first in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 2800 and instructor’s permission.

FIN 3720 Reiman Fund II (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the second in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3710.

FIN 3730 Reiman Fund III (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the third in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3720.
FIN 3800 Organized Walk Down Wall Street (4 Credits)
First part of course requires foundational readings in investment exchanges, commodities markets, investment banking, mergers, restructuring, asset management, and commercial banking. This is followed by five days in New York visiting the exchanges, brokerage firms, investment bankers, asset managers, and commercial banks. A related research paper is also required. Prerequisites: FIN 2800 and instructor’s permission.

FIN 3980 Finance Internship (0-4 Credits)
Practical experience (field study); requires written report. Prerequisites: FIN 2800 and instructor’s permission.

FIN 3991 Independent Study (1-4 Credits)
Independent research/study; requires written report. Prerequisites: FIN 2800 and instructor’s permission.

FIN 3992 Directed Study (1-4 Credits)

First-Year Seminar
First-Year Seminars are designed to provide students with an in-depth academic experience that will be rigorous and engaging. Students develop the kinds of academic skills that prepare them for successful college work, which might include one or more of the following:

- critical reading and thinking
- writing and discussion
- quantitative reasoning
- argument and debate

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 80–85 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars serve as students’ academic advisors and faculty mentors for the entire first year. Students meet individually with their mentors during winter and spring quarters for advising and registration help. This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet the requirement through an additional Advanced Seminar course. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

Courses
FSEM 1110 First Year Seminar: Enhancing Speaking Skills for International Students (4 Credits)
This course introduces undergraduate first-year international students to academic culture. In addition, the course introduces some aspects of American cultural ideals and values as they pertain to academic life. Many first-year undergraduate students face challenges with course work, balancing academic and campus life. The demands can be much more intense for first-year undergraduate international students, who navigate all the same issues while in a foreign culture. The instructors in these courses are sensitive to the demands placed on international students, and serve as formal advisors to the students in this course. In this class, students are challenged to participate as members of an intellectual community. The course work is designed to improve critical thinking skills and logical reasoning through impromptu and prepared discussion as well as classroom presentations. Students are expected to read articles and watch video outside class, refer to assigned texts during class discussion, synthesize ideas from course materials, and state and support their personal ideas regarding course topics. Must be a first-year international student to enroll in this course.

FSEM 1111 First Year Seminar (4 Credits)
First Year Seminar topics reflect the intellectual passions of the faculty who lead them. Seminars introduce students to the rigorous academic expectations of university-level work; as small, highly interactive courses, they help students improve skills in one or more of the following areas: writing, quantitative reasoning, critical thinking, presentation and argument, and/or information literacy. The instructor of the seminar serves as the student’s academic advisor and mentor for the student’s entire first year. This course is required for all first-year students.

Gender and Women’s Studies Program
Office: Merle Catherine Chambers Center for the Advancement of Women, Room 111
Mail Code: 1901 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-4419
Email: gwst@du.edu (gwst@du.edu?subject=website inquiry)
Web Site: http://www.du.edu/ahss/gwst

The Gender and Women’s Studies Program offers a cross-disciplinary undergraduate major and minor composed of courses taught throughout the University by a diverse faculty. Reflecting the vitality of recent feminist, ethnic and queer scholarship, these courses examine the roles of gender, race, sexuality and other categories of identity in the lives of all people. The mission of the Gender and Women’s Studies program is to explore gender as a primary category of analysis for the understanding of individuals and human societies in historical and cultural contexts.

The baccalaureate degree in gender and women’s studies is a cross-disciplinary major with a minimum of 44 credits. All students must take GWST 1112 Introduction to Gender and Women’s Studies.
Seniors are also required to fulfill a four credit GWST capstone course. The remaining number of credits to get a student to 44 credit hours are taken from a combination of Gender and Women's studies courses and cross-listed courses in other departments.

A minor in gender and women's studies requires 24 credits, beginning with GWST 1112 Introduction to Gender and Women's Studies. The remaining 20 credit hours may be selected from other Gender and Women's studies courses, including the colloquia, and courses in other departments also listed with the Gender and Women's Studies Program.

**Gender and Women's Studies**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

A minimum of 44 credits of Gender and Women's Studies including GWST 1112 Introduction to Gender and Women's Studies. Required courses* include, but are not limited to, the following:

Select one course from each of the four following areas:

- History
- Identity and Rhetoric
- Institutions and Power
- Intersectionality

*These interdisciplinary GWST classes are taught in other departments; see GWST course offerings each quarter and consult with the GWST advisor.

**Capstone Requirement**

GWST 3975 Capstone Seminar 1 4

**Electives**

Any Gender and Women's Studies listed or also-listed course 8

Total Credits

44

* Please consult with your GWST advisor and the schedule of classes for additional courses which may meet these requirements.

1 Must be a senior.

**SECONDARY MAJOR REQUIREMENTS**

40 credits. Same requirements as for BA degree.

**Minor Requirements**

24 credits in Gender and Women's Studies. Required: GWST 1112 Introduction to Gender and Women's Studies.

**Requirements for Distinction in the Major in Gender and Women's Studies**

- Minimum 3.25 major GPA, 3.0 overall GPA
- Honors thesis (minimum 40 pages)
• The thesis research, analysis, and writing will be done over the course of the student’s senior year, and will include the student’s own original research/creative work that draws upon or contributes to gender theory. This project is done in close consultation with a faculty mentor, and must be evaluated by a committee of at least three faculty members (including the major thesis adviser).

BA in Gender and Women's Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 88-92

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

**GWST 1015 Voice and Gender (4 Credits)**

In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creativity through strengthening both their written and oral communication skills. The course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with COMN 1015.

**GWST 1112 Introduction to Gender and Women's Studies (4 Credits)**

This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of ‘gendering’ occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of assigning power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women’s studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.
GWST 2212 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)
This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.

GWST 2220 Sociology of Childhood (4 Credits)
This course explores the social meanings of childhood. In this course we will examine aspects of the symbolic meanings of childhood as well as the experiences of being a child. The commercialization of childhood through marketing to children, contradictory messages about children as innocent or problematic, the experience of gender socialization for children, and the expectations of creating perfect children will be explored in detail. Cross listed with SOCI 2220. Prerequisites: SOCI 1810.

GWST 2223 Gender in a New Era of Empire (4 Credits)
This course examines the concept of empire in the 21st-Century through a transnational feminist analysis of international state politics, corporate globalization, and cultural imperialism, focusing on how these forces have converged to move people, ideas, and ideologies across and between state borders in recent years. Emphasizing the cultural dimensions of imperialism, it explores how new forms of commercial empire and militarism rely upon and influence gendered, sexed, raced, and national identities, differences, and inequities across the globe, as well as racial, gendered, and sexual modes of conquest and imperialism. Prerequisite: GWST 1112: Introduction to Gender and Women's Studies, or instructor permission.

GWST 2280 Gender in the Economy (4 Credits)
This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with ECON 2280. Prerequisite: ECON 1020.

GWST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women's education, political activism, and labor.

GWST 2420 Social Inequality (4 Credits)
Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with SOCI 2420.

GWST 2565 Men and Masculinities (4 Credits)
Many of us believe that anatomy is what determines our behavior and that our bodies dictate our social and psychological temperament. Looking specifically at men and masculinities, this course tests that general notion, investigates the various ways male behavior is gendered and critically explores the meanings of masculinity in contemporary institutions. Throughout the course, we look at the multidimensional and multicultural ways masculinity is produced, constructed, enacted, and resisted; how masculinities structure power and resources; and how masculinities benefit, regulate, and hurt men's lives. Cross-listed with SOCI 2565. Prerequisite: SOCI 1810 or permission of instructor.

GWST 2530 American Women's History (4 Credits)
This course is a survey of American women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women's experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with HIST 2630.

GWST 2560 Feminist Qualitative Research Methods and Design (4 Credits)
This course will introduce the fundamental elements of feminist qualitative research methods and design. We will begin by examining various research methods, including ethnography, interviews, oral history, media studies/discourse analysis, and community-based research and analyze the ways in which they aid (and help counter) ways of knowing and understanding the social world. In addition to gaining awareness of the more commonly used qualitative and ethnographic methodologies, you will be challenged to think critically about the mechanics, ethics, and politics of such research, including the role of researcher within it. Prerequisite: Introduction to Gender and Women's Studies (GWST 1112) or Instructor Approval.

GWST 2700 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.
GWST 2701 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2702 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2703 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2704 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2730 Gender in Society (4 Credits)
How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with SOCI 2730. Prerequisite: SOCI 1810.

GWST 2740 Gender, (De)Colonization, and Science Fiction (4 Credits)
This course uses intersectional feminist theory to explore how authors and artists construct the past, present, and possible futures through the speculative arts—including imaginative constructions of gender, sexuality, statehood, tradition, labor, magic, and science—in order to imagine decolonial possibilities.

GWST 2750 Race, Gender and Genetics (4 Credits)
This course examines science's construction of race historically—a process intimately connected to gender—to understand contemporary trends in medicine and genetics. Starting in the 1700s and spanning to the present, we'll look at how and why race and gender are articulated by scientists, how those constructions slip into the mainstream, and how these histories inform present practices in science.

GWST 2760 Gender & Environmental Racism (4 Credits)
This course surveys the field of environmental racism and its connections to gender. Together, we will use intersectional feminist theory to untangle how environmental racism shapes broad practices (e.g. locating dangerous industry and waste near communities of color and in developing nations) and specific cases (e.g. Dakota Access Pipeline). As we examine these practices, we will explore how environmental practices affect people with different biological, personal, and social genders.

GWST 2765 The Female Offender (4 Credits)
Female offenders are one of the fastest growing segments in both the juvenile and adult justice systems. This course introduces students to debates and issues surrounding girls, women, and crime; explores different theoretical perspectives of gender and crime; and examines the impact of gender on the construction and treatment of female offenders by the justice system. In addition, this course specifically looks at girls' and women's pathways to offending and incarcerations; understanding girls' violence in the inner city; exploring the reality of prison life for women, with a particular focus on the gender-sensitive programming for incarcerated mothers; and ending with an examination of how capital punishment has affected women offenders historically and contemporarily. Cross listed with SOCI 2765. Prerequisite: SOCI 1810 or permission of instructor.

GWST 2830 Representations of Women (4 Credits)
Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with ENGL 2830.

GWST 2981 Colloquium in GWST (2 Credits)
Theme changes each year. May be repeated for credit as long as course titles are different.

GWST 2982 Colloquium in GWST (2 Credits)
Theme changes each year. May be repeated for credit as long as course titles are different.

GWST 2983 Colloquium in GWST (2 Credits)
Theme changes each year. May be repeated for credit as long as course titles are different.

GWST 2991 Independent Study (1-10 Credits)

GWST 2992 Directed Study (1-10 Credits)

GWST 2995 Independent Research (1-10 Credits)

GWST 3050 Feminism and Intersectionality (4 Credits)
This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with COMN 3050.

GWST 3130 The Archaeology of Gender (4 Credits)
This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data, and specific case studies of engendered lives in the past. Cross listed with ANTH 3130.
GWST 3652 Culture, Gender and Global Communication (4 Credits)
This course explores the ways in which culture, gender, and communication intersect and shape a variety of issues from an international and intercultural perspective. Using a global feminist perspective, it also focuses on paradigms and paradigm shifts in creating social change. Also explored are alternative paradigms of thought, action and media communications by women and indigenous peoples, which have often been ignored, discounted or buried in history. Cross listed with MFJS 3652.

GWST 3680 Gender and Communication (4 Credits)
This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies four priorities for the class. First, the course explores multiple ways in which communication in families, media, and society in general creates and perpetuates gender roles. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Fourth, the course connects course content to student service learning experiences. Simultaneously, service informs academic content. All students volunteer during the quarter at a community organization and reflect on these experiences on a regular basis, using course materials as a basis for analysis and understanding. This course has a required service learning project. Cross listed with COMN 3680, HCOM 3680.

GWST 3700 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3701 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3702 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3703 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3704 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3740 Bodies and Souls (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with JUST 3740, RLGS 3740.

GWST 3787 Women in Art (4 Credits)
This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with ARTH 3871.

GWST 3873 The Goddess in Art (4 Credits)
This course will survey the image of the goddess in art from prehistoric times until the present day from a feminist perspective. Beginning with anthropological and art historical theories about the numerous female figurines of Paleolithic and Neolithic times, the course will continue to explore representations of female goddesses from ancient Mesopotamia, Egypt, Crete, Greece, and Rome. Polarized images of Eve, the Virgin Mary and several female saints during the Middle Ages will be examined. From the Renaissance through the Baroque periods, classical goddesses, especially Venus/Aphrodite, are revived and adapted to both Christian and secular contexts. Images of the sexualized female body will be explored, along with its counterpart, the witch, who was persecuted during the 16th and 17th centuries. This course will be interspersed with examples of contemporary art inspired by the "Great Goddess," especially by feminist artists of the 1970s and 1980s. Some discussion of the goddess as she appears in contemporary popular culture will conclude the class. Cross listed with ARTH 3873.

GWST 3950 Theories in GWST (4 Credits)
This course examines the major theoretical approaches (feminist, womanist, queer, etc.) to understanding gender and other intersecting systems of oppression and privilege. It explores the historical evolution of the theoretical traditions that have informed feminism, queer theory, and gender and women's studies, as well as examining more recent developments within these fields of inquiry. Students apply these theories to a range of texts, empirical data and/or the experiential world. This course may be repeated for credit as long as course subtitles are different. Prerequisite: GWST 1112; minimum of junior standing.

GWST 3975 Capstone Seminar (4 Credits)
This course provides students the opportunity to complete a substantial final project for their degree in gender and women's studies, which may take the form of preparation for a thesis, community-based research or service project, or a substantial creative or research project. Students work closely with the director of the program or a faculty member affiliated with the program to devise these projects after spending the first part of the course exploring recent research within the field of gender and women's studies. Prerequisites: GWST major or minor, GWST 1112, GWST 3950, senior standing, or permission of instructor.
Geography and the Environment

Office: Boettcher West, Room 120
Mail Code: 2050 E. Iliff Ave. Denver, CO 80208
Phone: 303-871-2513
Email: geog-info@du.edu
Web Site: http://www.du.edu/nsm/departments/geography

Geography is an academic discipline that focuses on the spatial distribution of human and physical features around the Earth and changes over time of those phenomena. Because geography bridges the boundary between the natural world and human societies, geographers often collaborate with colleagues in related disciplines in the natural and social sciences. Geographers are taught to think in spatial and chronological terms and to analyze landscapes for indications of physical and cultural features. Geographers also create maps to illustrate spatial relationships and use geographically based data sets to answer spatial questions and analyze spatial data. The field is often subdivided into physical geography, human geography, human-environment interaction and geographic information science (GISc). Our undergraduate majors are required to take introductory coursework in each of these subdisciplines, followed by more advanced courses in each of the main fields.

The central goal of the undergraduate curriculum in geography is to produce students with a solid foundation in geographic principles and perspectives, and the professional skills to put them into practice. More specifically, the program aims to provide students with skills and techniques that will allow them to apply what they learn in the classroom, laboratory and field. Students are provided with skills in problem identification and solution; training in geotechnical tools, including geographic information systems, cartography, remote sensing, geographic statistics and spatial analysis; and experience in field and laboratory techniques. The discipline of geography is, by nature, integrative and broadly based, so interdisciplinary approaches to problem solving are also emphasized. Our ultimate goal is to provide graduates with training and preparation for employment as professional geographers in government, private industry, education and nongovernmental agencies, and to prepare students for graduate school.

The environmental science program is an interdisciplinary program with the mission of preparing students with the knowledge and skills to identify, analyze and resolve environmental issues. Atmospheric pollution, water supply and quality, global climate change, waste management, species extinction—these are just a few of the better-known issues encompassed by environmental science, a field that addresses the totality of relationships between humans and the natural environment. Through a combination of small lecture, lab and field-oriented courses, students are given hands-on experience with environmental questions and problem solving. Extended field experiences, including alpine ecology at our field station at Mount Evans, are integrated into courses. Students also have the opportunity to participate in the field quarter, spending 10 weeks traveling throughout the western United States, Baja Mexico and other international destinations to study environmental problems and issues.

Geography

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 76))

Students majoring in geography may not also major in environmental science.

45 credits of geography. Requirements include the following:

<table>
<thead>
<tr>

</tbody>
</table>

Total Credits 45

1. Must be completed during senior year.
2. GEOG 1264, 1265, 1266 are for Honors Program students only.
3. A list of acceptable courses is available from the Department of Geography and the Environment.

The student may choose one of the following tracks of emphasis:

- natural resource management
- atmosphere and climate
- cultural and regional geography
- earth processes
- geographic analyses
- land use or urban planning

Students preparing for entrance to graduate school or intending to use geography professionally should consult regularly with their departmental advisors.

**Minor Requirements**
20 credits of geography at the 2000- or 3000-level.

**Geographic Information Science**

**Minor Requirements**
20 credits of coursework. Requirements include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 2100</td>
<td>Introduction to Geographic Information Systems (GIS)</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 3200</td>
<td>Remote Sensing</td>
<td>3</td>
</tr>
</tbody>
</table>

A list of acceptable elective courses is available from the geography department.

Note: As geography majors may emphasize GISc as part of their degree program, they are not eligible to complete the minor in GISc.

Prerequisites: Students are expected to have completed the Analytical Inquiry-Natural Science requirement or equivalent prior to enrolling in GEOG 2000 Geographic Statistics. Completion of an introductory course in geography such as GEOG 1410 People, Places & Landscapes; GEOG 1201 Environmental Systems: Weather; or GEOG 1216 Our Dynamic Earth I is encouraged but not required.

**Geology**
A minor in geology may be arranged by consultation with the faculty of the Department of Geography and the Environment.

**Minor Requirements**
Minimum of 20 credits of geology.

**Environmental Science**

**Bachelor of Arts Major Requirements**
(183 credits required for the degree (p. 76))

Students majoring in environmental science may not also major in geography.

75 credits. Requirements include:
### Bachelor of Science Major Requirements

Total Credits: 183

1 Recommended as one of the Scientific Inquiry: Society and Culture Common Curriculum courses.
2 Or GEOG 2500 Sustainability and Human Society.
Environmental Science Courses

ENVI 2660 Environmental History of Sonora & Baja Mexico (5 Credits)
Geography and ecology of desert southwest emphasizing Mexican states of Sonora, Baja California del Sur and Baja California. Traveling by van and lodging in tents, trip covers 3,500 miles, offers hands-on experience with principles and problems of physical geography and ecology in desert environments. Offered only during Interterm.

ENVI 2801 Water Quality of Western Rivers and Streams (2,4 Credits)
This course covers the physical, chemical, and biological aspects of water quality of Colorado rivers and streams. Impacts from human activities, including mining and agriculture are evaluated. Significant time is spent assessing the water quality of surface and ground waters by completing a course-long project that evaluates the water quality of three surface rivers/streams near the University of Denver: Sand Creek, Clear Creek, and the headwaters of the Arkansas River. The course is an integrate lab/lecture course with significant time spent in the field collecting data. Prerequisite: GEOG 1203 or CHEM 1010.

ENVI 2950 Topics in Env. Science (1-4 Credits)
An in-depth coverage of a specific environmental issue, topic, or problem. Topics vary with instructor.

ENVI 2992 Directed Study (1-10 Credits)

ENVI 3000 Environmental Law (4 Credits)
Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

ENVI 3550 Environmental Issues-Colorado (4 Credits)
This course focuses on the identification, analysis and mitigation of landscape-scale environmental issues or concerns, using watersheds as units of study. Emphasis is on field data collection and analysis to answer specific questions or address particular problems.

ENVI 3991 Independent Study (1-5 Credits)
Study of a topic not covered in existing course offerings. May be used for work completed in off-campus internships that focus primarily on the mastery of existing knowledge.

ENVI 3992 Directed Study (1-10 Credits)

ENVI 3995 Undergraduate Research (1-5 Credits)
Original research in environmental science topic under sponsorship of a faculty member; applicable to studies that focus primarily on discovery of new knowledge through application of scientific method.

ENVI 3999 Environmental Science Internship (1-5 Credits)
Supervised internship in a state, local, or federal office or in the private sector. Prerequisites: 15 quarter hours in the environmental science major and approval of supervising faculty. Maximum of 5 quarter hours total.

Geography Courses

GEOG 1201 Environmental Systems: Weather (4 Credits)
First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1202 Environmental Systems: Hydrology (4 Credits)
Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

GEOG 1203 Environmental Systems: Landforms (4 Credits)
Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

GEOG 1216 Our Dynamic Earth I (4 Credits)
This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornados, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
GEOG 1217 Our Dynamic Earth II (4 Credits)
This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

GEOG 1218 Our Dynamic Earth III (4 Credits)
This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

GEOG 1264 Global Environmental Change I (4 Credits)
First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

GEOG 1265 Global Environmental Change II (4 Credits)
Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

GEOG 1266 Global Environmental Change III (4 Credits)
Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

GEOG 1410 People, Places & Landscapes (4 Credits)
In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2000 Geographic Statistics (0-4 Credits)
An introduction to statistics primarily for geography and environmental science students focusing on the scientific method, the nature of data, descriptive statistics, and analytical or inferential statistics.

GEOG 2010 Digital Earth (4 Credits)
Paper maps will always with us but clearly society has turned to a "digital earth" to enhance our spatial awareness. Digital date are available in many formats and via countless applications for locating, sharing, and analyzing geographic data about the world around us. In this class we will explore the fundamentals of geospatial technology, including Geographic Information Systems (GIS), Global positioning systems (GPS), remote sensing, and spatial analysis through a series of computer exercises. Students will learn how to use geospatial technology to address social and environmental issues. This course is a survey of geospatial technology but can be used as an entry-level course into a geospatial program.

GEOG 2020 Computer Cartography (4 Credits)
Basic map design and execution using existing maps. Topics include map projections, symbolizing quantitative data, use of space, layout, compilation, verbal content, and the use of computer technology in design and production of maps.

GEOG 2030 Field Methods (4 Credits)
Part I, outdoor instruction in use of Brunton compass, level, plane table, and alidade; Part 2, data-gathering techniques and preparation for field work in urban problems.

GEOG 2100 Introduction to Geographic Information Systems (GIS) (4 Credits)
Overview of GIS, including background, development, trends, and prospects in this technological field; software package and hands-on exercises used to examine basic geographic concepts and spatial data characteristics associated with automated mapping, projections, scales, geocoding, coordinate referencing, and data structures for computerized land-based data bases. Cross listed with GEOG 3100.

GEOG 2310 The Political Ecology of Natural Resources in Guatemala (4 Credits)
This class, through the lens of political ecology and action-oriented research, introduces students to the extremes of Guatemala and how one of the most unequal societies in the West has evolved over the past 500 years. With a firm understanding of Guatemala's social reality we then conduct initial community-based research with several communities in the highlands and lowland return refugee frontier communities with the goal of identifying the best options for sourcing and then providing potable water and/or other vital resources. The class also introduces students to field methods in cultural geography and then how to apply them in field in international settings.

GEOG 2320 Andean Landscapes (4 Credits)
This class introduces students to intensive field activities pertinent to the study of Andean individuals and societies. Students study the characteristics of people, activities, as well as landscapes across the locations of Lima, Cusco and Puno in Peru. This course focuses on geography, history, archaeology, anthropology, biology, ecology and sustainability issues surrounding the above mentioned destinations. This course involves moderate physical activity (Inca Trail hike).
GEOG 2401 The Human Population (4 Credits)
This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2410 Economic Geography (4 Credits)
Economic elements as spatially arranged, distribution of economic activities on the Earth’s surface; market, resource and transportation factors in location theory.

GEOG 2420 Geography of Tourism (4 Credits)
Major cultural and environmental motivations for tourism; major tourism flow patterns; and predominant domestic and international tourist regions.

GEOG 2430 World Cities (4 Credits)
The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world’s major regions, including in-depth analysis of focus case study cities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2500 Sustainability & Human Society (4 Credits)
Sustainability has become a catch phrase in discussions concerning the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students are introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, and social justice, and various metrics used to assess sustainable behavior and practices. Students study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings.

GEOG 2511 Principles of Sustainability - Honors (4 Credits)
Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

GEOG 2550 Issues in Sustainabilities (4 Credits)
The capstone seminar focuses on a particular problem related to sustainability. Seminar topics vary by instructor, but include a combination of readings, discussion, guest speakers, a group project (either service learning or research), and individual research presentations. Prerequisite: GEOG 2500 and completion of all other requirements for the sustainability minor.

GEOG 2608 Human Dimensions of Global Change (4 Credits)
This course documents and explores the transformations of the global environment that have occurred in the last 300 years and relates them to cotemporaneous changes in population and society. Students examine the complexity of human-induced environmental changes by looking at the various social, economic, political, institutional and behavioral components of these forces at work. By using various case studies, students examine the processes and spatial distributions of anthropological changes to the world’s lands, freshwater, biota, oceans and atmosphere.

GEOG 2700 Contemporary Environmental Issues (4 Credits)
Principles, practices, issues, and status of care of environment; lectures, readings, and discussions focus on causes, effects, and mitigation of a selection of topical regional, national, and international environmental problems including Denver’s air pollution, acid deposition, hazardous waste management, global warming, and tropical deforestation.

GEOG 2750 Paleoenvironmental Field Methods (3 Credits)
Paleoenvironmental Field Methods is a short course that focuses on the use of Quaternary paleoenvironmental research techniques, including extracting and interpreting sediment cores from wetlands and lakes to reconstruct and understand paleoclimatic events.

GEOG 2810 Geography of Latin America (4 Credits)
This course studies the countries and islands of Middle America; the interrelationships of peoples, resources and physical features. Cross listed with GEOG 4810.

GEOG 2830 Geography of Europe (4 Credits)
A field course that examines relationships between humans and the environment in Europe. We study both urban and rural environments to understand the following questions: What are the elements (climate, vegetation, landforms) that characterize European natural landscapes? How have humans modified these natural landscapes? How have environmental conditions influenced human activities (e.g. agriculture, architecture, economic development)? How are these human activities manifested at the landscape scale, and how are they organized in geographic space? How have humans attempted to preserve natural landscapes? Prerequisites: GEOG 1201, GEOG 1202, GEOG 1203 and field quarter application process through the geography department.
GEOG 2860 Geography of the Middle East (4 Credits)
In-depth study of the physical and human geography of the Middle East. Upon completion of this course, students will be able to think and speak effectively about the Middle East, particularly about relationships between villagers, nomads and city folk; about the history of the region; about management of environmental problems such as desertification and water shortages; about the civilization of Islam, about culture and the role of all religions; about the reasons for war, the need for peace, and the role of terrorism; about oil and more importantly, the oil curse, and finally about the role of US foreign policy.

GEOG 2870 Geography of India (4 Credits)
This course will provide students with a comprehensive idea about India, which is considered as a major emerging power of this century. India is extremely diverse in terms of physical features and cultural practices. It has a very dynamic economic and political system. The long history of the land and its rich cultural heritage has made its lifestyle very different from the people outside the subcontinent. This course deals with all the above issues in brief and helps the students to gain an overall knowledge of the subcontinent. This is a good foundation course for those who participate in the study abroad program in India and also others who are interested in this region of the world.

GEOG 2880 Geographies of South Africa (4 Credits)
This travel course is designed to give students a first-hand look at the physical and cultural landscapes of South Africa. We will study the varied natural landscapes that produce the commodities (e.g., gold, diamonds, wine, and agriculture) that have attracted the interest of outsiders for centuries and that have influenced the cultural landscapes particular to South Africa. A systematic presentation of the geology of South Africa, and its human history, will unfold throughout our travels.

GEOG 2990 Professional Development for Geography & Environmental Science (0 Credits)
This course is designed to prepare graduating seniors for the transition to the working world or graduate study. Lectures and workshops focus on the use of LinkedIn and social media as a means of career networking, employment opportunities, professional development, and resume writing and related career services.

GEOG 2992 Directed Study (1-10 Credits)

GEOG 3000 Advanced Geographic Statistics (4 Credits)
The second in a sequence of two courses that address general statistical applications particular to geography, environmental science and other disciplines dealing with a spatial dimension in the data they work with. The focus of this second course is on the more advanced multivariate statistical techniques. The course has a strong applied orientation as particular attention is given to which technique is the most appropriate to use for a given type of problem and how to interpret and apply the resulting statistics. Extensive use is made of computer statistics packages. Homework exercises involving such statistical techniques as multiple correlation and regression analysis, principle components analysis, discriminate analysis and canonical correlation. Prerequisite: GEOG 2000.

GEOG 3010 Geographic Information Analysis (4 Credits)
Reviews many basic statistical methods and applies them to various spatial datasets. In addition, several spatial statistical methods are applied to spatial datasets. This course is an in-depth study of the interface between GIS, spatial data, and statistical analysis. Preferred prerequisite: GEOG 2000. Prerequisite: GEOG 2100.

GEOG 3030 Advanced Field Methods (4 Credits)
Various field methods used by researchers in physical geography; techniques include field mapping, laboratory analyses, geologic field methods. Prerequisite: GEOG 1201 or equivalent.

GEOG 3040 GPS for Resource Mapping (4 Credits)
This course is an introduction to GPS (Global Positioning Systems) concepts, techniques, and applications as they relate to GIS data collection. Lectures focus on satellite surveying, GPS technology, error sources, program planning, data collection design, and Quality Control and Quality Assurance issues for data collection programs. Hands-on lab exercises include navigation, mission planning for a GPS survey, designing a field data collection plan and associated data dictionary, field data collection, differential correction, and data integration into a GIS and map production.

GEOG 3100 Geospatial Data (4 Credits)
This graduate-level course is designed to provide graduate students from a broad range of disciplines with the skills to carry out applied research tasks and projects requiring the integration of geographic information systems technology and geospatial data. Students are introduced to a collection of techniques and data sources with a focus on acquiring and integrating data. Legal, ethical, and institutional problems related to data acquisition for geospatial information systems are also discussed. Cross listed with GEOG 2100.

GEOG 3110 GIS Modeling (4 Credits)
This course focuses on the concepts and procedures used in discovering and applying relationships within and among maps. It extends the mapping and geo-query capabilities of GIS to map analysis and construction of spatial models. The course establishes a comprehensive framework that addresses a wide range of applications from natural resources to retail marketing. Topics include the nature of spatial data introduction to spatial statistics and surface modeling in the first five weeks followed by spatial analysis operations and modeling techniques in the second five weeks. The lectures, discussions and independent exercises provide a foundation for creative application of GIS technology in spatial reasoning and decision making.

GEOG 3130 Advanced Geographic Information Systems (4 Credits)
This advanced course explores the more technical aspects of GIS functions and data structures. Students have hands-on access to both raster (grid-cell) and vector-based software packages in the form of lab exercises that culminate in a small student-designed GIS project. Prerequisite: GEOG 2100.
This course examines politics and patterns of migration, transnational migration, and immigration to the United States. The processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.
GEOG 3350 Qualitative Methods in Geography (4 Credits)
This course focuses upon qualitative methods in the production of geographic knowledge. Qualitative methods are widely employed by geographers to understand patterns and underlying processes of human and human-environment issues in society. The course is designed to expose participants to the theories, purpose, scope, and procedures of qualitative research. Specific topics include: epistemological theories (ways of knowing); ethics and power in research; research design; data collection techniques in interviewing, participant observation and landscape interpretation, discourse and archive analysis, and case studies; data analysis; and writing and disseminating qualitative findings.

GEOG 3400 Urban Landscapes (4 Credits)
Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

GEOG 3410 Urban Applications in GIS (4 Credits)
This course uses the tools of geographic information systems (GIS) to explore concepts of traditional urban geography, including defining cities/ metropolis, internal urban structures, urban systems, industrial location, social and residential patterns, urban form, environmental problems, and urban planning. The course allows students to practice fundamental skills in GIS (e.g., working with attribute tables, spatial analysis, spatial queries) and cartography (map design, color theory, display of information). Depending on the quarter, students pursue individual projects of interest or client-based projects. Prerequisite: GEOG 2100 or GEOG 3100 or equivalent.

GEOG 3420 Urban and Regional Planning (4 Credits)
Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

GEOG 3425 Urban Sustainability (4 Credits)
The 21st century is being called the 'century of the city.' Now more than ever, humans across the globe call the city their home. Many of the world's most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As 'sustainability' becomes part of mainstream discourse, this course explores what sustainability means for urban contexts around the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

GEOG 3440 Urban Transportation Planning (4 Credits)
A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

GEOG 3445 Sustainability and Transportation (4 Credits)
Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.

GEOG 3450 Transportation and Mobilities (4 Credits)
The geographical study of transport has grown considerably and become more diverse, encompassing new areas of inquiry generated from economic, urban, environmental, political, social, and cultural geography, as well as from transport geography itself. The most notable expansion has been in the area of ‘mobilities’ research, which is focused on the social aspects of mobility, including both the large-scale movements of people, objects, capital, and information across the world, as well as the more local processes of daily transportation, movement through public space and the travel of material things within everyday life.

GEOG 3460 Air Transportation & Tourism (4 Credits)
This course delves into the world of commercial air passenger transportation, studying the foundations of the industry, its role in the travel and tourism, and strategies for the future. Foundational topics include the history and geography of air transportation, air travel and tourism, the geography of tourism, airline corporate cultures, the role of government, aviation law, regulation, deregulation, and globalization. Study of the principal elements of airline economics, finance, planning, management, operations, pricing, promotion, cost containment, marketing, and policy provide the opportunity for consideration of strategic options within the contemporary airline industry. Further discussion focuses on the planning and management of airport and airway system infrastructure, the issue of sustainable air transportation, and the role of the airline industry within the context of intermodalism.

GEOG 3470 GIS & Environmental Health Geography (4 Credits)
This course is designed to acquaint students with the spatial distributions of populations and their relationships to environmental pollution sources and health outcomes. It utilizes real-life scenarios using population data from the U.S. census, EPA pollution data and various types of vital statistics data. The goal is to implement novel geographic techniques such as spatial analytical techniques and atmospheric modeling of pollutants to assess possible health risks and outcomes. This class requires basic GIS knowledge.
GEOG 3500 Reconstructing Quaternary Environments (4 Credits)
Nature, magnitude, sequence and causes of Pleistocene and Holocene climatic changes; effects of climatic change on plant/animal distributions and human populations; paleoclimatic research methods. Laboratory and field trips. Prerequisites: GEOG core, ENVI 3000.

GEOG 3510 Biogeography (4 Credits)
Biogeography focuses on present and past distributions of plants and animals. In this course we consider a number of themes central to biogeography, including plate tectonics and biogeography, the effects of climate change of plant and animal distributions, biogeographic realms, island biogeography, biodiversity, human impacts on plants and animals, and the origins of agriculture.

GEOG 3520 Geography of Soils (4 Credits)
Spatial variation in soil characteristics; soil processes, soil morphology, their application in soil studies. Prerequisite: GEOG 1201-1203 Environmental Systems or instructor’s permission.

GEOG 3550 Topics in Physical Geography (1-5 Credits)
Investigations into various aspects of physical environment.

GEOG 3560 Fluvial Geomorphology (4 Credits)
Examines how water and sediment interact at Earth's surface to create a variety of landforms ranging from small rills to continental-scale river systems. Introduces fundamental fluvial processes or channel hydraulics and sediment transport. Examines common fluvial landforms including alluvial streams, bedrock streams, floodplains and alluvial fans. Combines traditional lectures and in-class discussions with numerous field excursions to rivers in the Rocky Mountains and Great Plains. Prerequisite: GEOG 1203, GEOG 1218, or GEOG 1266.

GEOG 3600 Meteorology (4 Credits)
The basic theory and skills of weather forecasting. Topics include thorough coverage of atmosphere dynamics and thermodynamics, the evolution of various weather types, the mechanics of storm systems (cyclones, severe storms, hurricanes), creation and interpretation of weather maps, and forecasting techniques.

GEOG 3610 Climatology (4 Credits)
Climatology is the study of the processes that result in spatial and temporal variation of weather. This course introduces the student to the processes responsible for the transfer of matter and energy between the Earth's surface and the atmosphere and the average weather conditions that result. In addition, topics of global concern, such as greenhouse effect, El Nino, urban heat islands and acid rain, are discussed. Laboratory exercises provide an opportunity to investigate climate variation and climatic change through the use of a variety of computer simulations.

GEOG 3620 Applied Climatology (4 Credits)
Climatic impact on environmental systems and human behavior; techniques to investigate climatic characteristics of environmental extremes (floods, blizzards), urban climatology and socioeconomic impacts of climate. Prerequisite: GEOG 1201. Recommended Prerequisite: GEOG 3600 or GEOG 3610.

GEOG 3630 Dendroclimatology (2-4 Credits)
Systematic variations in tree ring width and/or density can be used to reconstruct changes in precipitation or temperature well before humans were around to record the variability. This class utilizes hands on methods to introduce the fundamental principles of dendroclimatology. Through readings and lectures, students will learn how tree ring growth can be correlated to climate change. Students will then undertake several research projects to reconstruct past climate variability in the Denver metro area using tree rings. Prerequisite: permission of instructor.

GEOG 3640 Climate Change and Society (4 Credits)
The science of anthropogenic climate change will be presented with an emphasis on critical evaluation of the evidence of climate change and future scenarios and migration strategies. Students will be introduced to the latest climate change research, including the Intergovernmental Panel on Climate Change report, and the most recent literature from the field. The societal and cultural implications of climate change will also be discussed. Prerequisites: GEOG 1201, GEOG 1216, or GEOG 1264.

GEOG 3700 Environment & Development (4 Credits)
Course examines interrelated nature of environmental and development issues in the Third World; addresses the place of environment in development theory and practice and the political ecology of Third World environmental problems and sustainable development approaches.

GEOG 3701 Topics in Geographic Information Science (1-4 Credits)
Topics vary by instructor.

GEOG 3710 Environmental Change in the Eastern Mediterranean (2 Credits)
We tend to associate environmental problems with modern societies and high technology. However, humans have had impacts on the environment, and have had to cope with challenges brought by the environment, throughout their history. Western cultures are intimately linked to the eastern Mediterranean, where some of the earliest centralized governments arose, agriculture developed, and humans first began living in permanent settlements, so the region has a long history of human-environment interaction. This class focuses on historical, archaeological, and paleoenvironmental records from the region to investigate the impacts of human activities, including deforestation, intensive agriculture, and urban development, on the environment, and the ways in which societies in the region responded to natural environmental perturbations, including drought, earthquakes, and volcanic eruptions.

GEOG 3720 Mountain Environments and Sustainability (4 Credits)
Mountain Environments and Sustainability explores the unique physical and cultural aspects of high relief and/or high altitude environments. Covering one quarter of the Earth's land surface, mountains directly or indirectly impact the lives of millions of people. We examine the significance of mountains to climate, water resources, and human activities, and discuss the sustainability of these environments and communities in light of rapid changes in many mountain regions resulting from anthropogenic factors and global change. GEOG 1201, 1202, and 1203 or instructor approval.
**GEOG 3730 International Environmental Policy (4 Credits)**
This course acquaints students with the global perspective on current problems of environmental protection and resource use. Population growth, food production, industrialization, technology and cultural change are considered, with heavy emphasis on the social dynamics of environmental problems. A variety of political views are studied, and an attempt is made to develop a perspective useful to students in personal and political decisions.

**GEOG 3740 Environmental Justice in the City (4 Credits)**
This course is designed to acquaint students with environmental justice in the urban environment. This class focuses on the City of Denver as a laboratory to explore the disproportionate impacts of social justice issues, particularly urban pollution, healthy food sources, gentrification, light rail, and employment opportunities, on neighborhoods and communities. A variety of views are studied, and an attempt is made to develop a perspective useful to students to explain urban social justice conditions.

**GEOG 3750 Topics in Human-Environment Interactions (1-4 Credits)**
This course investigates various aspects of the relationships between human societies and the natural environment.

**GEOG 3755 Geography of Health (4 Credits)**
The geography of health is a thriving area of study that considers the impact of natural, built, and social environments on human health. This course introduces students to three geographical contributions to health studies. First, it emphasizes the importance of ecological approaches to health, which consider interactions between humans and their environments, including topics such as how climate change might influence disease distributions, and how the built environment can influence patterns of physical activity. A second focus is social theory, exploring how aspects such as race, socioeconomic status, and identity play a critical role in influencing human health. A third section of the course considers how spatial methods (cartography, GIS, and spacial statistics) can help answer health-related questions.

**GEOG 3760 Health & Environment, England (4 Credits)**
This field course meets in England, visiting several sites in the Midlands. It focuses on ecological approaches to health, which emphasize the relationship between humans and their environment as a critical influence on the health status of populations. This environmental influence may come from the natural, built, or social environment. The course will use a case study approach to emphasize i) the importance of the natural, built, and social environment to human health, and ii) how the relationship between humans and their environments and its sustainability has changed over time. We will explore eight different time periods, asking in each case how people’s relationships with their natural, built, and social environments have influenced health at the population scale, and how these influences can inform sustainable health and environment in the future.

**GEOG 3800 Geography of Colorado (4 Credits)**
This course focuses on the physical and human geography of Colorado, a state that includes the western Great Plains, the southern Rocky Mountains, and the eastern Colorado Plateau. Colorado’s varied natural landscapes provide equally varied settings for human settlement and resource use. Recommended Prerequisites: GEOG 1201, GEOG 1202, and GEOG 1203.

**GEOG 3825 Geographies of International Development in Africa (4 Credits)**
What are the historical roots of (under)development in sub-Saharan Africa? How is sub-Saharan Africa typically depicted in the media? How can we explain the fact that the Niger Delta provides the bulk of Nigeria’s revenue, and yet, it remains the poorest part of the country? Is climate change the major cause of persistent food insecurity in the drylands of Ethiopia and Burkina Faso? How can we make sense of the uneven geography of poverty in Ghana? What explains urban food insecurity in Cape Town, or land struggles in rural South Africa? What are the social processes underlying the spatial disparity in health status in Malawi, or gender differences in HIV rates in Nyanza province, Kenya? And why do land users often resist state conservation efforts in Tanzania? These are some of the critical questions explored in this course. The primary aim is to provide a critical introduction to the geography of sub-Saharan Africa. We will begin by exploring how “the Africa story” is told by the media, scholars and policymakers. Attention will then shift to understanding the key historical processes that shape (under)development in the region. We will cover a broad range of topics, including governance, colonial history, debt and structural adjustment, foreign aid, food and agriculture, gender, climate change, land grabbing, health, population growth, migration, remittances, and resource extraction. We cannot possibly cover all these topics in greater detail; indeed, some are too vast and complex. We will however use specific case studies to illustrate and discuss each of the topics.

**GEOG 3830 Natural Resource Analysis & Planning (4 Credits)**
Natural resources provide the basis for all human agricultural and industrial activities. This course discusses our resource distribution, conservation, management and sustainable use.

**GEOG 3840 Water Resource Analysis (4 Credits)**
The focus of this course is on complex policy, economic and local, national and international, and political issues surrounding resource use in the western U.S. Issues include exploitation of nonrenewable and renewable energy and mineral resources; and flexible responses to changing public policy.

**GEOG 3860 GIS Applications and Natural Resources (4 Credits)**
In this course we will use a case study approach to examine domestic and international natural resources such as oil, coal, timber, minerals, and recycled materials. We will use a case study approach to look at resource distribution, and the environmental impacts of extraction, production, and disposal, as well as the legal and economic context. We will use GIS data and analysis to enhance our understanding of these case studies, and students will do a project and paper using GIS data and image analysis at a local, regional or global scale. Prerequisite: Introduction to GIS or Introduction to GIS Modeling.
GEOG 3870 Water Resources & Sustainability (4 Credits)
In this course, we look at water as both a local and global resource and examine what sustainability means for human and ecological realms. After an overview of the physical processes that drive the hydrologic cycle, surface and groundwater hydrology, we examine how humans have harnessed water for our use and how we both alter and treat its quality. We examine the legal aspects of water allocation in the U.S. and the groups and agencies that are most involved in managing and overseeing water issues. Finally, we examine the most pressing water "issues" related to wildlife, development, scarcity and conflict. We look forward to imagining the power of both the individual and the collective in meeting our future, global water needs.

GEOG 3880 Cleantech and Sustainability (4 Credits)
Cleantech has only recently become part of our vernacular and it refers to the technology that enables us to produce energy in a manner that has little or no environmental impact (solar, geothermal, wind, responsible biofuels). Clean technology will not only offer us a chance to rehabilitate the climate, but should make us more aware of how fundamental our approach to everyday life needs a more sustainable consciousness. As part of the debate, we will examine some of the problems facing civilization, why we are not sustainable, who the major players are, and how a more sustainable existence is not just our moral obligation, but it is also good economics and sound foreign policy that will accelerate poverty alleviation.

GEOG 3890 Ecological Economics (4 Credits)
Ecological Economics is an emerging transdisciplinary endeavor that reintegrates the natural and social sciences toward the goal of developing a united understanding of natural and human-dominated ecosystems and designing a sustainable and desirable future for humans on a materially finite planet. In this course we start with a basic overview and summary of the neo-classical economic perspective with a particular focus on the recognized market failures of public goods, common property, and externalities. We begin with a reconceptualization of economic theory by imposing scientific constraints (e.g. conservation of mass and energy, the laws of thermodynamics, evolutionary theory, etc.). Using the ideas developed in this reconceptualization of economic theory we explore the implications for international trade and myriad public policies associated with the ethical, environmental, and economic aspects of sustainability.

GEOG 3910 Geomorphology (4 Credits)
An advanced course that examines how Earth’s landforms are created by a range of physical processes. Most landforms can be viewed as a result of some combination of erosion, transport and deposition of rock, soil and sediment. The most common agents causing these geomorphic processes are water, wind, ice and waves. This course examines the processes responsible for eroding, transporting and depositing earth materials and compares these processes with the resulting landforms. Prerequisites: GEOG 1202 or GEOG 1217 or instructor’s permission.

GEOG 3920 Remote Sensing Seminar (4 Credits)
Special topics in advanced remote sensing.

GEOG 3930 Cultural Geography Seminar (4 Credits)
Topics, methods and current research in cultural geography.

GEOG 3940 Urban Geography Seminar (4 Credits)
International comparison of economic and social, positive and negative aspects of urban systems.

GEOG 3950 Physical Geography Seminar (2-4 Credits)
GEOG 3955 Pollen Analysis Seminar (3 Credits)
Pollen grains preserved in sediment provide long-term records of vegetation conditions. Changing proportions of pollen types may reflect climatic fluctuation or human impacts. We review important recent research in pollen analysis (palynology), pollen sampling, laboratory techniques and pollen identification. Students are responsible for counting a number of samples and contributing data for a pollen diagram.

GEOG 3990 Undergraduate Research Seminar (1 Credit)
This course is designed to prepare students who will participate in faculty-supervised summer research projects. Students are introduced to research design, use of the scientific method, research expectations and reporting of results. Preparation of formal research proposal with adviser.

GEOG 3991 Independent Study (1-5 Credits)
GEOG 3992 Directed Study (1-10 Credits)
GEOG 3995 Independent Research (1-5 Credits)
GEOG 3999 Geographic Internship (0-5 Credits)
Supervised internship in a government office at local, state or federal level or within private sector. Prerequisite: permission of instructor.

GEOG 4170 Geospatial Analysis and Project Management (4 Credits)
This course provides an opportunity for students to apply geospatial data analysis to real-world applications. Students will work as a team to develop a project that requires GIS analysis and/or application development, design a project work flow and management plan, and implement a solution. Students will demonstrate competence in GIS techniques, geospatial data analysis, and project management at a professional level. This course may substitute for GEOG 3150 - GIS Project Management. Prerequisites: Completion of a minimum of two GISc courses.

Geology Courses
GEOL 1010 Physical Geology (4 Credits)
Physical geology examines the internal structure of the Earth, the nature and properties of Earth materials, their distribution through the Earth, and the processes by which rocks are formed, altered, and transported. This course serves as an introduction to the geological sciences and is a prerequisite to advanced study.
GEOL 1992 Directed Study (1-10 Credits)

GEOL 2020 Historical Geology (4 Credits)
Historical geology is the study of the evolution of Earth through geologic time. Geologic features such as rock types and fossils are used to interpret and date past events. This course specifically introduces the basic geologic principles underlying historical geology, the geologic evolution of North America, and the evolution of life on Earth.

GEOL 2380 Rocks and Minerals (4 Credits)
This class focuses on the identification, classification, and formation of common rock types and rock-forming minerals. Students will learn to reconstruct geologic conditions and earth history from rock and mineral features. Prerequisite: GEOL 1010, GEOG 1203 or permission of instructor.

GEOL 2400 Geology and Ecology of the Southwest (5 Credits)
This field class emphasizes firsthand observations of the interactions among environmental properties (including substrate geology, soils, and climate) and natural vegetation in the Colorado Front Range, Rio Grande Rift, and Chihuahuan desert regions of New Mexico and southeastern Arizona. The course also examines Pliocene and Quaternary volcanism in southern Colorado and New Mexico in addition to Paleozoic and Mesozoic geology along the uplands of the Rio Grande Rift. Prerequisite: permission of instructor.

GEOL 2800 Geology of National Parks (4 Credits)
The geology and landforms of the United States are not better illustrated than in our national parks. This course presents the physical and geological processes that have shaped many of our national parks. Focus of the course will include Yosemite, Grand Canyon, Rocky Mountain, Yellowstone, Grand Teton, Zion, and Bryce National Parks as well as selected others. Prerequisites: one of the following: GEOG 1203, GEOG 1217, GEOL 1010, an introductory course in geology, or instructor’s permission.

GEOL 2992 Directed Study (1-10 Credits)

GEOL 3010 Process Geomorphology (4 Credits)
The land surface of Earth is continuously altered by geomorphic processes. This class focuses upon the nature of these processes, the work that they perform and the resulting landforms. In addition, the student becomes familiar with various methods of geomorphic analysis through the laboratory component of the class. Cross listed with GEOG 3910. Prerequisite: GEOL 1010, GEOG 1202 or permission of instructor.

GEOL 3100 Environmental Geology (4 Credits)
Environmental geology examines geologic hazards, both natural and those attributable to human impacts on the environment from urban and regional development. Specific topics may include disposal of municipal solid waste and radioactive waste; flood, earthquake, volcanic hazards; groundwater pollution and withdrawal; mass-wasting phenomena; and energy-related issues. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission.

GEOL 3200 Sedimentology/Stratigraphy (4 Credits)
This course reviews the origin, geologic history, and depositional environments of sediments and sedimentary rocks. Course work concentrates on the identification of sedimentary rocks and depositional environments by first-hand observations of rocks in the Denver area. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission.

GEOL 3300 Petroleum Geology (4 Credits)
This class examines the geological occurrences of petroleum including the origin, migration, and accumulation of oil and natural gas. This class differs from traditional petroleum geology classes by offering an examination of the economics and politics underlying the oil and gas industry, and by considering alternatives to traditional hydrocarbon resources. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission.

GEOL 3520 Erosion Process & Measurement (4 Credits)
Soil erosion is arguably the most serious environmental problem worldwide. This course focuses upon the significance of this problem, the factors affecting erosion rates, the nature of the processes themselves, methods of measurement, estimation of erosion rates and erosion control practices. Prerequisites: GEOG 1203, GEOG 1218, or GEOG 1266.

GEOL 3540 Hydrology (4 Credits)
This course provides an overview of the hydrologic cycle with emphasis placed on the study of applied hydrology. Discussions include the fundamental characteristics of precipitation, runoff processes, calculation of flood hazards, aquifers (porosity and permeability), the geologic settings of groundwater, the basic physics of groundwater flow, and water supply and use. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission. Recommended prerequisite: one introductory statistics course.

GEOL 3900 Geomorphology Seminar (1-5 Credits)
Hill slopes comprise the vast majority of the Earth’s land surface. It is upon these surfaces that nearly all of the human population must exist and, hopefully, flourish. Hill slopes assume various forms, and their shape influences their utility for various human endeavors. Numerous geomorphic processes operate upon hill slopes to determine their form, and human activities strongly influence the frequency and magnitude of these geomorphic processes. Consequently, hill slopes are an interface between the Earth and the human population. Prerequisite: GEOL 3010 or permission of instructor.

GEOL 3991 Independent Study (1-5 Credits)

GEOL 3992 Directed Study (1-10 Credits)

Distribution Requirement

Of the previously listed courses, students must take at least one course in four of the following categories: ²

- Asian history
- European history
- American history
- Latin American history
- Middle Eastern history
- Pre-Modern history

Total Credits 44

¹ Elective credits may come from any history department course, as well as approved study abroad courses.
² See the department website for course listings by category. Students should consult with their faculty advisor or the department chair to make sure they have correctly fulfilled this requirement.

Students may be given elective credit for high school Advanced Placement (AP) or International Baccalaureate (IB) examination scores, at the discretion of the chair of the department. Ordinarily, no more than 4 credits of AP or IB work may go toward the history major.

Secondary Major Requirements
44 credits. Same requirements as for BA degree.

Minor Requirements
20 credits in history, of which at least 8 must be at the 2000 or 3000 level.

Requirements for Distinction in the Major in History

The History Department encourages students to consider seeking Departmental Distinction. This requires a curricular plan, which includes the following:

An additional 3000-level seminar beyond the two ordinarily required for the major
An average of B+ or higher for the history major, an A- or higher for HIST 3989 (Senior Seminar I), and the successful completion of HIST 3990 (Senior Seminar II).

Students will be invited to apply for distinction in winter quarter of their senior year.

a. By the end of the Winter Quarter examination period, the student must turn in a proposal (approximately 1 page) to his/her primary advisor. The proposal must be approved by all three faculty members who will serve on the student’s defense committee (the primary adviser and two others). It should explain what the honors thesis will involve and how it will differ from the Senior Seminar paper.

b. No more than one committee member can come from outside the Department. The student should consult with his or her advisor about the constitution of the committee, but final responsibility for getting each member’s signature lies with the student.

c. In Spring Quarter, the student should enroll in HIST 3993: History Honors Thesis.

d. At the end of Spring Quarter, the student must participate in an oral defense of the thesis, conducted by the three members of the defense committee.

e. Permission to pursue distinction will be made at the discretion of the faculty.

Note: The additional 3000-level seminar and HIST 3993 may count toward the 8 elective credits in the major. Students who graduate with distinction may complete all requirements with 44 credits.

\(^6\) May count toward major.
\(^7\) May not count toward major.
Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

Courses

HIST 1110 Ancient Rome (4 Credits)
This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1220 Warring States and Middle Kingdoms (4 Credits)
The study of history at American universities has, in recent decades, moved beyond a narrow focus on Western civilization to embrace the study of broader world historical issues. Other academic disciplines have, to some extent, followed suit. Yet, despite the globalization of our lives and culture, the intellectual categories we normally employ to understand both the present and the past remain, to a considerable degree, bound by old restrictions. History—even world history—remains stuck in the past. This course aims to use concepts derived from East Asian history to interrogate and challenge received concepts and categories—not to impose another paradigm but to continue the quest for a better one. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1230 Asia and the Modern World (4 Credits)
This course considers the recent history of Asia in a broad world-historical context and, in doing so, asks students to examine commonly held assumptions about the nature (and presumed uniqueness) of the modern world and the "place" of Asia in it. The aim in doing so is to reconsider how we might better understand the past and the present. We proceed on two levels, using both primary and secondary sources. We critically examine Robert Marks' bold challenge to standard historiography, in "The Origins of the Modern World," for what it can teach us about the ongoing development of historical knowledge. We also dip into the past for primary documents—the stuff of historical analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1240 Comparative History of Medicine (4 Credits)
This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1250 Food in East Asian History (4 Credits)
This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1310 Crime and Punishment (4 Credits)
We focus specifically on the history of crime and the history of punishment by examining the nineteenth century (1800s), considered by many to be the great age of criminology and the era of the birth of the modern prison system. Over the course of the nineteenth century, the meaning of crime underwent a radical change; whereas in earlier periods, crime was synonymous with sin and criminals were prosecuted for offenses against the common good, by the nineteenth century, criminals were individuals who did what they did for all sorts of complicated reasons and the scope of crime extended to offenses against individuals, property, and morality. Not surprisingly, the nature of punishment changed to meet the shifting definitions of crime. Punishment became less about torturing the body and more about reforming the will or character of the individual criminal. We study this change over time by looking mostly at Britain and Europe, considered to be at the forefront in criminology and penology at the time. We examine the implications of the shifting meanings of crime and punishment by looking at the criminologists' own words, media coverage of crimes, and the opinions of historians and other contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1320 European Culture in the World Wars (4 Credits)
This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1330 History of Ireland (4 Credits)
We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of 'Irishness', competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland's evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1340 The British Monarchy (4 Credits)
This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1350 History of the British Empire (4 Credits)
This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies placed in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1360 World War One (4 Credits)
This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.

HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)
When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered.

HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)
From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1510 War and the Presidency (4 Credits)
This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1520 Immigrant Voices in Modern America (4 Credits)
This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony--autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1530 History of the United States since 1865 (4 Credits)
From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans’ everyday lives, and what legacies did these events leave for our own day? How can Americans define and divide themselves—by race, gender, class, or otherwise—and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about “big business,” “big government,” “American exceptionalism,” or the “American dream”? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1540 Society, Culture, and Popular Politics in the Making of Early America, 1607-1815 (4 Credits)
This course examines the foundations and development of American society and culture from 1607 to 1815. We study Native American societies and the establishment of European colonies in America, and the complex processes and events that led to the American Revolution and the creation of a republic in North America. Through class discussions, lectures, group work, and reading, we examine American society and culture from a variety of perspectives and viewpoints. Themes and topics include empire and colonization; race, gender, class; politics and society; and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1550 America in the Sixties (4 Credits)
This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes “the sixties”? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)
The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography’s 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1630 Social Revolts in Latin America (4 Credits)
This course examines major revolutionary events that helped define the history of present-day Latin America. Major revolutions and rebellions, their agendas, underpinnings, accomplishments, and shortcomings are studied. The underlining interpretive lens is to understand the political, economic, and cultural forces at work that compelled revolutionary behavior to emerge. While covering a large time period, the course is structured along transformative historical cases which are closely analyzed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1992 Directed Study (1-10 Credits)

HIST 2000 Ancient Egypt (4 Credits)
This course examines the history and culture of ancient Egypt. We focus particularly on political and military developments during the Old, Middle, and New Kingdoms. We also study the social and cultural practices of the ancient Egyptians. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2015 Ancient Greece (4 Credits)

HIST 2016 Contemporary Israel-Palestinian Conflict, 2000-Today (4 Credits)
This course deals with the political, religious, and social dimensions of the Israeli-Palestinian conflict from the failure of the Oslo Accords to the present. It provides students with a brief overview of the history and key issues in the conflict, turning to domestic, regional, and global developments, allegiances, and enmities—political, religious, and economic—that have shaped the past 15+ years of conflict. At a time when even optimistic observers call the two-state solution a vain hope, this course concludes with a look at viable approaches for domestically and internationally acceptable peace plans. This course is cross-listed with JUST 2016 and RLGS 2016.
HIST 2222 The Roman Empire (4 Credits)
This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2203 Ancient Near East (4 Credits)
This course traces the history of the ancient Near East from the earliest civilizations in the Fertile Crescent down through the Persian Empire. Particular attention is given to the political, military, and social developments in the region as well as the cultural contributions of Mesopotamia to the history of the ancient Mediterranean world.

HIST 2105 The Dark Ages: Survey in Early Medieval History (4 Credits)
This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning with the late Roman Empire and stretching to the year 1000, a period often referred to as the "Dark Ages." Throughout the semester we will read primary texts representative of ideas and historical developments that shaped the Early Middle Ages. Central to this course will be three major themes: the development of western Christianity, the ongoing struggle between centralizing governments and local powers, and the effects of cross-cultural contact on western society. As we examine topics such as the fall of Rome, the rise of the three great cultures of the early medieval period (Christendom, Byzantium, and the Islamic world), and the formation of kingdoms and states our readings and lectures will focus on one or more of these major themes as a way of approaching the complex and often unfamiliar pre-modern world. By analyzing and evaluating these texts and their authors we will gain a better understanding of the past and a clearer idea of how the institutions and ideas of the pre-modern world changed over time and how they continue to impact and influence modern societies.

HIST 2106 The High Middle Ages: From Dark Age to Rebirth (4 Credits)
This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning in the year 1000 and culminating in the end of the medieval period in 1453. The "High Middle Ages" was a period of tremendous development and innovation. The first universities appeared, men and women argued about belief and practice, traders and warriors forged new connections with the wider world, and the very structures of modern Europe appeared for the first time. As we examine topics such as the Crusades, heresy, popular revolt, and cross-cultural trade our readings, lectures, and discussions will examine how we can understand the development of "Western" civilization and the ways in which the medieval past continues to inform our modern lives.

HIST 2107 Culture/Conscience in Vienna (4 Credits)
This study-abroad course focuses on the cultural and social history of the city of Vienna as the hub of politics, culture, and religion for Central Europe with special attention to its religious heritage as the seedbed for its rich cultural traditions. The course examines how its religious heritage, particularly Judaism, shaped its rich cultural heritage and the birth of modernism. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2107, JUST 2107.

HIST 2110 Europe in the Middle Ages (4 Credits)
Medieval European social, intellectual and political history.

HIST 2112 Europe in the Renaissance/Reformation (4 Credits)
Social, political, intellectual and cultural history.

HIST 2125 Cold War Europe (4 Credits)
Examines key issues in the history of Europe from the end of the Second World War to the disintegration of the Soviet Union. The clash of twentieth-century ideologies provides a framework for understanding European relations with the United States and the Soviet Union, along with broader political and cultural trends, decolonization, economic and social change, and class, gender, and race relations.

HIST 2131 Early Modern Europe: 1600-1789 (4 Credits)
Social, political and intellectual history of Europe during period of the Old Regime and Enlightenment.

HIST 2132 19th-Century Europe (4 Credits)
Social, political and intellectual patterns from French Revolution to outbreak of World War I.

HIST 2200 France: The Revolution-1900 (4 Credits)
This course covers the history of France from the late 18th century and the French Revolution to 1900. Although it is organized chronologically around French political history, we will address issues that transcend the various regimes: economic and social change, class and gender relations, anti-Semitism and other forms of racism, artistic production and cultural trends.

HIST 2210 The French Revolution and Napoleon (4 Credits)
This course examines the many ways in which the French Revolution and Napoleonic period (1789-1815) marked a significant break with the past—politically, socially and culturally. Yet these changes could not occur with some continuity in social and political institutions. We will work to answer a central question: as Napoleon dominated most of the European continent militarily and established a dictatorship at home, to what degree was he promoting ideals of the Revolution?.

Examines key issues in the history of Europe from the end of the Second World War to the disintegration of the Soviet Union. The clash of twentieth-century ideologies provides a framework for understanding European relations with the United States and the Soviet Union, along with broader political and cultural trends, decolonization, economic and social change, and class, gender, and race relations.
HIST 2242 American Jewish History (4 Credits)
This course will explore how the American Jewish experience developed and changed over time, from the colonial period to modern times. It will begin with the first group of Jews who arrived in 1654 in what is now New York and focus on successive waves of immigration, continuing through World War II, and the post-war period. We will explore the varied ways in which the immigrants and subsequent generations constructed their American Jewish identities, as well as such pivotal issues as acculturation, assimilation, and ethnic tensions. One of the major goals of the course is to encourage clear and effective writing, as well as to expose students to primary and secondary sources and offer tools to help evaluate evidence. Primary source materials relevant to each unit will be analyzed and reviewed at each class session. Cross listed with JUST 2242.

HIST 2245 History of the Modern Jewish Experience (4 Credits)
Concepts, documents, movements and practices of modern Jewish history. Cross listed with JUST 2245.

HIST 2272 Twentieth-Century France (4 Credits)
This course will address central issues in the history of France in the twentieth century, from the World Wars to the end of the Cold War. We will discuss the French search for grandeur as a former Great Power, examining political and cultural trends, decolonization, economic and social change, and class, gender and race relations.

HIST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of the peoples in Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics in the mid to late 20th century, Israel's military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross listed with JUST 2300.

HIST 2310 The Modern Middle East: 1798-1991 (4 Credits)
This course traces the history and development of the modern Middle East from Napoleon's invasion of Egypt in 1798 through the First Gulf War in 1991. We pay special attention to the impact of colonialism and Great Power diplomacy on the region. Cross listed with JUST 2310.

HIST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women's education, political activism, and labor.

HIST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

HIST 2330 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of "Islamic empire," connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2113.

HIST 2380 Israeli History & Society: 1948-2011 (4 Credits)
Through historical sources, documentaries, movies and scholarly research, the course examines the major wars and clashes between Israel and its neighbors in the years 1948 to 2011. In this way, we will examine in depth the complexities of Israel's relationship with their Arab neighbor States, with a particular focus on the details of the Israeli-Palestinian conflict. Moving chronologically, the course aims to develop historical perspectives on the State of Israel, and the impact of emerging historical realities on Israeli society, including implications for religious identities, economics, political parties, security issues, and nationalistic movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2395 Contemporary India, 1947-2000 (4 Credits)
This course examines the history of India after independence from Britain in 1947. It traces the historical roots of the economy, society and polity of contemporary India. Understanding the hot button issues of the Kashmir conflict, nuclear weaponization, globalization and terrorism cannot be separated from and requires a historical grasp of the underlying processes of state formation, national identity, economic development and gender and social empowerment that have characterized India. While India will be the main focus, South Asia's shared colonial history and its legacies mean that the issues of regional tensions, ethnic and gender conflict, communal violence, secularism, the unevenness of electoral democracy and the fragility of civil society have wider application in the subcontinent as a whole. Therefore, the course constantly and continuously draws useful comparisons with events and processes in other South Asian nations such as Pakistan, Bangladesh, Sri Lanka, Nepal and Bhutan. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2395.
HIST 2450 History of the Italian Mafia (4 Credits)
For two centuries, an entity called "Costa Nostra" has dominated the histories of Sicily and Italy. Costa Nostra has long been a shadowy and poorly-understood organization, yet it has changed the world in dramatic and unexpected ways. In this class, students learn what the Italian Mafia is and explore its history in Italy, particularly the Mafia's developing relationship to the law, the Italian government, and Sicilian culture. Students examine the nineteenth-century origins of the Mafia as well as the more recent "Mafia Wars" (1962-69 and 1970-82) that rocked Italy and resulted in the first widespread prosecution of Mafiosi. The recent trials of notorious Mafiosi have led to political scandal and charges of conspiracy, collaboration, and cover-up at the highest levels of Italian government. Lastly, students learn about the efforts of the Anti-Mafia movement to reform and redirect Italian and Sicilian culture and society.

HIST 2510 American History to 1789 (4 Credits)
Encounters between Native Americans, Europeans, and Africans in the American colonies; the Revolution, the confederation period; the framing and adoption of the Constitution.

HIST 2515 Print and Politics in the American Revolution (4 Credits)
This course examines the impact of the American Revolution on American society, politics, and culture. It combines social history with a print-centered approach to explore how different groups used newspapers, pamphlets, magazines, and other media to articulate their respective and at times competing needs and interests during the conflict. The sources for this course consist primarily of the seminal texts produced during the Revolutionary era. These writings range from Thomas Paine's pamphlet Common Sense and the Declaration of the Independence to the sermons of the African-American minister Lemuel Haynes and the letters exchanged between John and Abigail Adams. In addition to studying the key arguments forwarded in these texts, we focus on how their production, circulation, and reception influenced the outcome of Revolutionary events. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2520 American History: 19th Century (4 Credits)
Establishment and development of new nation; emphasis on political history; experience in analysis of source materials.

HIST 2525 Great Depression in America (4 Credits)
This course will investigate the social, political, economic, and cultural dimensions of the Great Depression in America. Students will be exposed to a variety of sources, including photographs, posters, film, fiction, and documentaries, as well as more traditional historical sources, both primary and secondary.

HIST 2530 American History: 20th Century (4 Credits)
This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

HIST 2531 Twentieth Century Native American History (4 Credits)
This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures – such as federal and state governments, or the US legal system – and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

HIST 2535 Warfare and Society in Colonial America (4 Credits)
From the earliest English settlements to the struggle for independent, military strife and warfare have played a central role in shaping the course of American colonial history. Throughout this period, Anglo-Americans engaged in numerous conflicts, waging war against indigenous peoples, Europeans, and sometimes each other. For this course, we adopt the methodologies of "New Military History" - a discipline focusing on the interaction of warfare with society, politics, economics, and culture - to better understand the full impact and pervasive nature of colonial warfare. Our investigation therefore focuses on how the practices and heritage of warfare intersected with and influenced imperial rivalry, religious beliefs, cross-cultural encounters, racial formation, gender relations, as well as military strategy and technology, from 1607 to 1776. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2541 The Roots of Modern America (4 Credits)
This course surveys one of the most tumultuous periods in U.S. history, one that encompassed industrialization, massive immigration, urbanization, settlement in the American west, and the confrontation between Victorian and Modern culture. Special attention is paid to asking how political, cultural, and social dissent has been defined through time. Topics include Darwinism and social Darwinism, capitalism and its dislocations, agrarian and labor radicalism, cultural and political radicalism, the progressive movement, feminism, the home front during World War I, and the aftermath of the war.

HIST 2551 The American West Since 1860 (4 Credits)
Everyone knows the romantic and violent mythology of the Old West: cowboys and Indians, lawmen and gunslingers, trappers, miners, railroaders, homesteaders. This course explores the history behind the myths. Sweeping from the Civil War era to the resorts and suburb of today's West, we follow such themes as the history of western land and resource use; the migration of peoples and the communities they created; the story of racial, religious, cultural, and political conflict; and the significance of those famous western myths to the nation as a whole.

HIST 2555 United States Since 1945 (4 Credits)
This course examines the social, cultural, economic and political developments that have shaped life in the United States since the 1940s. Special attention is given to the Cold War, suburban America, the civil rights movement, social conflict in the 1960s, and the rise of postwar conservatism.
HIST 2565 The Church in American History: Challenges and Changes in the Protestant Tradition (4 Credits)
For most of its history, a Protestant majority dominated religion in America. At times, Protestants seized new opportunities to shape and reshape the course of the nation. At other times, influence waned and tensions mounted. This course surveys the history of religion in the U.S. with a primary focus on the challenges and changes within the Protestant church as it has navigated a shifting and increasingly pluralistic culture. We explore how the faithful—from John Winthrop to the modern day evangelicals—have attempted to create a "city upon a hill" through their beliefs, practices, movements, and institutions. Special attention is given to Puritanism, disestablishment, revivalism, Mormonism, the Civil War, the Social Gospel, fundamentalism, civil rights, modern evangelicalism, and pluralism. Cross listed with RLGS 2565.

HIST 2570 Civil War & Reconstruction (4 Credits)
This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states’ rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.

HIST 2575 Yellow Jack and Black Vomit: Disease and the Making of Early America (4 Credits)
Scholars have recently focused their attention on the way that diseases—Yellow Fever, Smallpox, Measles, Malaria—shaped the social and political landscapes of early America. In this course, we take up this investigation by examining both the diversity and pervasiveness of disease and the ways that non-human agents such as pathogens and insects had a destructive impact on African, European, and Indian peoples and influenced the course of events in early America. Our study therefore ranges from the virgin soil epidemics that decimated indigenous peoples to how smallpox outbreaks affected the Revolutionary conflict. In addition to examining the medical discourse of causes, symptoms, and treatments, we consider how disease influenced perceptions of personal and familial interactions, race and class relations, community and public health, and national culture and literature. For our investigation, we pay particular attention to the 1793 Yellow Fever outbreak in Philadelphia.

HIST 2630 American Women's History (4 Credits)
This course is a survey of U.S. women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women’s experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with GWST 2630.

HIST 2640 Race and Ethnicity in Twentieth Century America (4 Credits)
This course will examine America through its cultural and racial diversity, comparing and contrasting the historical experiences of African Americans, Latina/os, European Americans, and Asian Americans over the “long” twentieth century. Together we will investigate the ways in which major events and episodes in the century affected a variety of racialized populations, and how these groups responded to their social and political environment. Attention will also be paid to changes in American national identity and citizenship over time, helping students think about such questions as: who is an “American”? And how did that definition change over time? How did debates over citizenship reflect Americans’ ideas of race, class, ethnicity, and gender? How were racial and ethnic minorities, women, and immigrants defined at various times in opposition to Americanness?

HIST 2645 Immigration in Twentieth Century America (4 Credits)
Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

HIST 2680 Historical Memory (4 Credits)
Why do successive generations rewrite the stories that teach Americans their history? Why do various social groups endorse alternate versions of past occurrences? This course explores the idea of historical memory by examining the narratives (stories) that have been composed about our country's past and how these stories have been revised over the years. We will focus on several major symbols of the American past and the narratives that have developed surrounding them. Our goals are to understand how and why these sites of memory have been interpreted and reinterpreted over the years.

HIST 2701 Topics in History (4 Credits)
HIST 2702 Topics in History (4 Credits)
HIST 2703 Topics in History (4 Credits)
HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)
In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 2720 Paved Paradise? Nature and History in Modern America (4 Credits)
Oil drilling and outdoor recreation, "medical miracles" and natural disasters, the making of national parks and suburban landscapes, and political battles over pollution, property rights, energy, wilderness, endangered species, and toxic waste all belong to the environmental history of the recent U.S. In this class we explore that history, weighing how Americans from the late nineteenth century to the present day have thought about nature, modified and made use of it, and competed for control of resources and land.

HIST 2810 Modern Japan (4 Credits)
Themes in early and late modern Japan—ideology and politics, culture and society, class and gender, empire and nation; Japan from Tokugawa peace through modern wars to post-war world. Cross listed with ASIA 2403.

HIST 2820 Contemporary Japan (4 Credits)
This course uses contemporary Japanese culture to examine political and social trends. Cross listed with ASIA 2404.

HIST 2850 Imperial China (4 Credits)
In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term. Cross-listed with ASIA 2850.

HIST 2870 Modern China (4 Credits)
In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years. Cross-listed with ASIA 2870.

HIST 2910 Colonial Latin America (4 Credits)
This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2920 The Making of Modern Latin America (4 Credits)
This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2925 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)
This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.

HIST 2950 U.S. and Latin American Relations: The Historical Struggle for Autonomy (4 Credits)
This course examines how Latin American nations have tried to maneuver in the world sphere under the dominant role played by the United States in the hemisphere. Latin American countries and the United States have had a complex and, at times, difficult relationship that dates back to the early nineteenth century. In response to the challenges of this complicated relationship, Latin American nations have adopted a range of strategies to deal with the United States, most of which are examined in this course.

HIST 2955 Latin America at the Movies (4 Credits)
This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2990 What is History? (4 Credits)
Introduction to historical concepts, methodologies and historiography. Intended for history majors who will take Senior Seminar the following fall.

HIST 2992 Directed Study (1-10 Credits)

HIST 2998 Issues in Comparative History (4 Credits)
This is a team-taught course in comparative (either geographical or temporal) history. Each time it is taught, it addresses a particular theme or topic from a comparative approach. Students are exposed to different approaches to the study of history, as embodied in the work of the individual faculty members.
HIST 3100 Cities and Society in Latin America (4 Credits)
This course approaches the history of Latin America through the prism of its cities, paying particular attention to the ways in which the urban environment defined and was affected by the regional path of socio-economic and cultural development. In addition to examining how cities evolved, and how people have therein lived (worked, engaged in political activities, etc.), we seek to understand how cities were historically conceived as a primary focus of public policies and projects to the goal of modernization in the region.

HIST 3190 Immigrants in American History (4 Credits)
Interpretations of immigrants’ roles in American society, focusing on the 19th and 20th centuries.

HIST 3305 Warfare and Politics in Ancient Greece (4 Credits)
This course examines the representation of warfare and politics in ancient Greece. Our primary focus is on analyzing ancient sources and considering how they function as both literary and historical texts. We also discuss the major developments in Greek military and political institutions and how these changed over time.

HIST 3335 The Viking World (4 Credits)
In the late eighth century Europe was rocked by the first of the Viking attacks. Over the next two centuries they left a legacy that has been immortalized in books, TV shows, and movies. But what drove these renowned seafarers to set sail from Scandinavia to shores as far as North America and the Black Sea? In this course we will examine the world of the Vikings, looking at the social, cultural, and political changes that the Viking Age ushered in not just in Scandinavia but across Europe. We will discuss how raiding and trade went hand in hand, how new ideas of kingship and worship crossed cultural boundaries, and the ways in which history and legend overlap, coloring our ideas of the medieval past.

HIST 3340 Popular Culture in Early Modern Europe (4 Credits)
Early modern European popular culture including witch-craft, magic, fertility cults, popular religion, gender roles, carnivals and festivals, riots, and folktales.

HIST 3345 Women and Gender in Early Modern Europe, 1500-1800 (4 Credits)
It is easy to assume that today's ideas about gender roles have always existed, but beliefs about women's and men's "natural" behavior have changed dramatically over time. In 1500, for instance, it was a well-known fact that women are sexually voracious creatures who needed strict control to keep their appetites in check; by 1800, it was an equally well-known fact that women are inherently chaste and modest. The ideal male in 1500 was someone who used violence to maintain his authority; in 1800, masculinity was about self-discipline and politeness. In this course, we explore changing ideas about femininity and masculinity in the early modern period and consider how those changes related to broader shifts in culture and society.

HIST 3350 Social History-Modern Britain (4 Credits)
This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissension as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with MUAC 3350.

HIST 3355 Latin America's Cold War (4 Credits)
The Cold War is usually thought of as a conflict between superpowers in a bipolar world. Often, this interpretation omits the important histories of non-industrial or developing countries. This course will explore the experiences of Latin America during on the most important and impacting socio-political, economic, ideological, cultural, and diplomatic contests ever faced by human societies. The course will explore the motives and consequences of the US government's actions to counter the perceived Communist threat, as successive administrations expanded intelligence gathering, increased military and economic aid, backed anti-communist government in Latin America, and used US troops in direct military interventions. Students will engage with materials and learn about the interaction between historical experiences taking place in a global, regional, national, and local realities. In so doing, the history of the Cold War will be examined as a complex web of interconnected conflicts, projects and events. Students will get an overview of the events and major interpretations of the Cold War in Latin America. By engaging with class materials and assignments, students will refine their analytical skills, research abilities, historiographical knowledge and narrative expressions.

HIST 3370 Comparative Fascism in Europe (4 Credits)
A comparative survey of fascist Italy and Nazi Germany, from the origins of fascist movements in the 19th century to the establishment of political regimes, World War II and the Holocaust.

HIST 3372 Nations and Nationalism (4 Credits)
This seminar will focus on the twin processes of nation-building and nationalism in Europe. We will look at how the idea of an organized nation-state took root and how people came to think of themselves as belonging to a particular nation. We will examine these processes by using different national examples and by taking a variety of approaches--cultural, social, political--to understanding what a nation is.
HIST 3375 Empire: Revolt and Repression (4 Credits)
This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

HIST 3380 World War II History & Memory (4 Credits)
This seminar examines the ways in which people have commemorated the events of World War II, reflected upon the war’s tragedies and honored its victims. The geographical area changes, and may include France, Germany, Russia, Italy, Britain, the United States or Japan. Students will analyze a variety of sources, such as diaries, memoirs, poetry, radio and television broadcasts.

HIST 3510 American Revolution and Its Background (4 Credits)
Causes, progress, consequences and significance of movement for independence in light of American colonial experience and problems of imperial authority.

HIST 3570 American Thought and Culture (4 Credits)
This course exposes students to writers, artists, philosophers, and reformers who have addressed some of the major intellectual and cultural transformations related to modernity: the problems of knowledge and communication, the struggle to achieve a democratic and equal community, and the endeavor to build a national culture.

HIST 3573 Celebration: American Holidays (4 Credits)
This course examines the invention, celebration and commercialization of various sorts of American holidays - as a means of addressing larger questions of ethnic and national identity, the transformation of public memory, and the rise of consumer culture.

HIST 3600 United States - Israeli Relations, 1948-Present (4 Credits)
This course deals with the history of United States-Israeli relations from 1948 - 2011. Some of the key topics covered include: the U.S. decision to recognize Israel; cultural foundations for U.S. support of Israel; Christian Zionism; the origins of the U.S.-Israeli "Special Relationship"; the Cold War in the Middle East; U.S. peacemaking successes and failures; the role of the pro-Israeli lobby; and the impact of September 11, 2001 on U.S.-Israeli relations. Cross listed with JUST 3600.

HIST 3620 United States Involvement in the Persian Gulf, 1933-Present (4 Credits)
This course looks at U.S. involvement in the Persian Gulf from the initial search for oil in Saudi Arabia up until the so-called “Arab Spring”. The main focus of the course is on U.S. relations with Saudi Arabia, Iran, and Iraq although Kuwait and other Gulf States, as well as broader regional developments, will also be discussed. Emphasis is placed on developments related to the free flow of oil during the Cold War and increasing U.S. involvement in the region following the first Gulf War of 1991.

HIST 3670 The U.S. Home Front in World War II (4 Credits)
This course examines the social changes taking place on the U.S. home front between the late 1930s and 1940s, including an investigation of the effects of war on American government, society, culture, and economy. Particular attention is paid to the war’s impact on gender, ethnicity, race, and everyday people's lives.

HIST 3680 The Strange History of American Suburbia (4 Credits)
Everyone knows the emblems of American suburbia: single-family houses with attached garages, grassy lawns, curving streets and cul-de-sacs, office parks and shopping malls. But there’s a history behind these settings that's poorly understood - that is key to understanding much about the U.S. Suburbia sheds light on American popular attitudes toward nature, technology, health, politics, and patriotism, and on the complicated dynamics of race, gender, family, class, and religion in American society. In this course, we explore how the U.S. became a “suburban nation,” from the Romantic retreats of the nineteenth century, through suburbia’s triumphant yet troubled “golden age” in the 1950s, to the stereotype-shattering suburbs of own time. We consider the surprisingly powerful ways suburbia history has shaped U.S. history more broadly.

HIST 3703 Topics in History (4 Credits)
HIST 3704 Topics in History (4 Credits)
HIST 3705 Topics in History (1-4 Credits)
HIST 3861 American Occupation of Japan (4 Credits)
Studies the important issues in a vital period of both U.S. and Japanese history. Cross listed with ASIA 2414.

HIST 3875 Chinese Science and Global History (4 Credits)
This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected. Crosslisted with ASIA 3875.

HIST 3980 Internship (1-8 Credits)
HIST 3989 Senior Seminar I (4 Credits)
Development of research skills and historiographical understanding; preparation for senior research seminar.
HIST 3990 Senior Seminar II (4 Credits)
Completion of a substantial research project, based on original sources. Students should consult their departmental mentor no later than beginning of spring quarter of their junior year to begin the formulation of the research project.

HIST 3991 Independent Study (1-10 Credits)

HIST 3993 History Honors Thesis (4 Credits)
Independent study specifically for graduating seniors wishing honors. Prerequisites: HIST 3989 and HIST 3990.

HIST 3995 Independent Research (1-10 Credits)

Hospitality Management

Office: Joy Burns Center, Room 320
Mail Code: 2044 E. Evans Ave. Denver, CO 80208

### Requirements for Distinction in the Major in Hospitality Management

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

### Hospitality Management

This course plan is a sample schedule. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. Please meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

Total Credits: 192-193

1. Analytical Inquiry: The Natural and Physical World
2. Scientific Inquiry: Society and Culture
3. May be taken any quarter within the first year.
4. INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

HOSP 1100 Exploring Hospitality Mgmt (2 Credits)
This is an introductory course designed to provide students with a broad overview of the hospitality industry and the various segments that comprise the industry. The course focuses particularly on the industry areas captured by the concentrations available to Knoebel students, the elements that make hotels and resorts what they are—food and beverage/restaurants; lodging; sales, marketing, and revenue management; lodging real estate; conference services; and on other facets of hospitality.

HOSP 1101 Hip Hotels: Delivering Amazing Guest Experiences (2 Credits)
Through an immersive, behind-the-scenes experience in Denver’s hotels, students learn about: The challenges hotel executives face; the interplay between hotel design and service delivery; how to positively influence the guest experience, and the career paths available in the industry.

HOSP 1120 Distinguished Lecture Series (1 Credit)
Senior executives from various segments of the hospitality industry provide students with their insights about competition and challenges within the industry.

HOSP 1200 Industry Work Experience (0 Credits)
Faculty supervised work experience. Prerequisites: HOSP 1100 and completion of 500 hours of approved work experience. Advisor will register students for course as needed.

HOSP 1992 Directed Study (1-4 Credits)

HOSP 2201 International Experience (0 Credits)
Students spend one quarter in an international setting taking courses while touring and observing overseas hospitality operations. Advisor will register students for course as needed.

HOSP 2202 Management Intern Program (0 Credits)
Preferably, this internship is full-time, continuous employment for ten-weeks with a minimum of 400 hours and is designed to allow students to increase their exposure to the hospitality industry and continue to reconcile their classroom learning with industry practice. Advisor will register students for course as needed. Prerequisites: HOSP 1200.

HOSP 2322 Cooking Well, Eating well (4 Credits)
This course educates students about current food/health trends, basic nutrition, and trains them to produce healthy, restaurant quality meals. This course is for non-majors only.

HOSP 2360 Managing a Restaurant Business (4 Credits)
In HOSP 1100, Exploring Hospitality Management, students are introduced to various aspects of restaurant/food and beverage management and basics about them. From here, we advance to a more thorough overview of the management of various food and beverage operations, specifically focusing on restaurants. Topics include safe food and beverage service, product specification and procurement, labor scheduling, revenue control and collection, and other management functions required for success in food and beverage operations. Prerequisite: HOSP 1100.

HOSP 2361 Contemporary Cuisine (4 Credits)
Judging by their high failure rate, restaurants can be one of the most difficult and complex businesses to manage. This course builds on previous food and beverage courses by providing hands-on experience running and managing a restaurant environment. Through the opening and running of two live restaurant operations for a night each, the course enables students to put into practice the managerial aspects of full-service restaurant operation, from menu planning and implementation to financial analysis, including systems, tools and reporting. Prerequisites: HOSP 2360 and HOSP 2401.
HOSP 2401 Hotel and Resort Management (4 Credits)
This course presents an overview of the management of a various lodging properties, specifically focusing on rooms division operations. The perspective taken is strategic perspective, identifying and considering issues of concern to general managers of all types of lodging properties, with a particular focus on profit maximization (yield/revenue management) and distribution channel management. The broader political, economic, social, and technological environments and trends and their impact on lodging operations are considered. The perspective is global and includes considering how lodging operations differ in various parts of the world. Prerequisite: HOSP 1100.

HOSP 2402 Revenue Management (4 Credits)
This course provides an introduction to the basic principles and practices of revenue management in the hotel and restaurant industry. Students acquire the fundamental analytical skills needed to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels and restaurants. The course includes certification in STR tools. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2200.

HOSP 2501 Managing Human Capital in Hospitality (4 Credits)
People are the heart of any organization and can be a source of competitive advantage, particularly in a hospitality environment. This course prepares students to develop and manage successfully the processes and systems that help hospitality firms develop a competitive advantage through people and build a service culture, including recruiting, selecting, onboarding, and developing employees in order to retain them in both union and non-union environments. Prerequisites: HOSP 2360 and HOSP 2401.

HOSP 2502 Hospitality Cost Management (4 Credits)
The use of industry statistics and a uniform system of accounts for hotels and restaurants to determine an operation's position in the marketplace. Prerequisites: HOSP 1100, HOSP 2360, HOSP 2401 and ACTG 2300.

HOSP 2504 Hospitality Technology and Analytics (4 Credits)
Hospitality Technology and Analytics serve as an introduction to hospitality technologies and technology-enabled data analytics. This course surveys diverse aspects of consumer-facing hospitality technologies (social media, mobile, distribution channel, sharing economy, etc.) and in-house systems of hospitality operation (event-planning system, property management system, and point-of-sale system, etc.) In addition, this course provides an introduction to the field of business intelligence and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and fact-based management to drive decisions and actions in the hospitality industry. Specifically, the course looks at the managerial aspects associated with the application of hospitality technologies and technology-enabled data analytics to achieve strategic business goals. Prerequisites: HOSP 1100, HOSP 2360, HOSP 2401.

HOSP 2506 Hospitality Sales & Marketing (4 Credits)
This course addresses all that is involved in hotel and resort sales, including lodging/room group sales and catering sales. Also addressed are negotiation, the production of catered events, trade shows, and meetings, from the perspective of planners, venue salespeople, and event managers. Students learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other sales and planning functions. Prerequisites: HOSP 2360, HOSP 2401 and MKTG 2800.

HOSP 2605 Hospitality E-business (4 Credits)
Advances in information technology (IT), the Internet, mobile technologies, and social media create opportunities and threats for hospitality organizations. Electronic business (e-business) addresses technology application in all aspects of a business and the guest lifecycle to expand market reach, achieve efficiencies and scale, grow revenues, manage relationships, and reduce labor to create value for the firm. This course focuses on hospitality technology trends, strategies, and tactics to support business-to-business (B2B), business-to-consumer (B2C), business-to-employee (B2E) interactions and commerce transactions through technology.

HOSP 2640 Franchising and Entrepreneurship (4 Credits)
The franchising and entrepreneurial aspects of hospitality ownership including franchising, franchising law, contracts, assessments, and ownership. Prerequisite: HOSP 2502.

HOSP 2992 Directed Study (1-4 Credits)
HOSP 3000 Wines of the World (4 Credits)
A survey course of the wines of the world, including old and new world wines; still, sparkling, dessert and fortified wines; viticulture and viniculture. Prerequisite: must be at least 21 years of age. Non-HPM majors only.

HOSP 3120 Distinguished Lecture Series (1 Credit)
This course is the springboard for seniors to transition from a student mindset to that of a professional. It enables personal exploration, values clarification, and the narrowing in on an initial career focus. Hearing from and networking with senior executives from various segments of the hospitality industry who provide students with their insights about competition and challenges within the industry motivate the introspection described above.

HOSP 3301 Beverage Management (4 Credits)
Organization and management of the beverage operation of resorts, restaurants, hotels, clubs and other licensed premises. Emphasis on product knowledge, responsible beverage service, facility design and operational practices. Prerequisites: senior standing in the HPM major and must be 21 years of age.
HOSP 3302 Advanced Beverage Management (4 Credits)
This course helps students develop an understanding of the management of alcoholic beverage outlets in resorts, hotels, restaurants and clubs; it is a continuation of the introductory course and expands students’ knowledge and experience with wines and spirits in commercial settings. Product knowledge continues to include the agricultural elements, production, and marketing of beverages containing alcohol. Topics relative to the social, cultural, political and economic aspects of alcohol and alcohol service are discussed. A significant component of those discussions is the duty to provide responsible service in both licensed premises and in social settings, including the social and legal ramifications of disregarding such duties. Field trips are an integral part of this course and attendance is expected. Prerequisites: HOSP 3301. Advisor will enroll students in course.

HOSP 3360 Rest/F&B Concept Devel (4 Credits)
In previous food and beverage courses you obtained the knowledge and skills to perform the basic management functions required for a successful career in F&B operations, put these skills into practice and opened two “restaurants for a night.” In this course you will acquire the skills required to develop and brand a new restaurant. Prerequisites: Senior standing in the HPM major, HOSP 2361 and HOSP 3301 and restricted to students pursuing the Restaurant/Food & Beverage Management Concentration.

HOSP 3400 Advanced Revenue Management (4 Credits)
This course provides students with the advanced knowledge, skills, and abilities to make sound business decisions and implement revenue management strategies and solutions to influence consumer behavior and maximize revenue and profits for hotels. Students will acquire the analytical skills to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels. Prerequisites: HOSP 2402, ACTG 2300.

HOSP 3402 Hospitality Asset Management (4 Credits)
This course examines the fiduciary responsibilities associated with managing lodging operations to achieve ownership goals. The asset manager’s role in building value is examined at both the portfolio and property levels. Guest speakers from the field provide insight into current lodging market and operational challenges. Prerequisites: senior standing, and enrolled in either the Revenue Management or Lodging Real Estate concentrations.

HOSP 3506 Special Event Management (4 Credits)
This course addresses all that is involved in the sales and production of catered events, trade shows, and meetings, from the perspectives of planners, venue salespeople, and event managers. Students will learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other event and meeting sales and planning functions. Prerequisite: HOSP 2506.

HOSP 3560 Resort and Tourism Marketing (4 Credits)
In examining the tourism system the traditional 4 ‘Ps’ of marketing are recast to examine what makes a successful destination (Product), how services are priced (Price), how destinations promote themselves (Promotion) and the role of various channels of distribution (Place).

HOSP 3600 Lodging Valuation Principles (4 Credits)
This course introduces students to the basic fundamental analysis of methods and techniques of real estate investment, finance, and valuation as they apply to the lodging industry. The course covers time value of money, basic discounted cash flow techniques, financing instruments, appraisal methods, and valuation techniques for income producing lodging properties. Students utilize computer software and spreadsheets for solving real estate problems. Practical applications provide students with the analytical tools and techniques to make effective real estate investment and financing decisions. Prerequisites: HOSP 2502, HOSP 2504.

HOSP 3601 Hotel Development & Feasibility (2 Credits)
This advanced capstone experiential learning course integrates lodging real estate financial analysis and valuation techniques to emphasize the fundamental concepts and techniques involved in the hotel development process and the various steps involved in performing a market feasibility study of a proposed hotel. Students will propose, establish and refine a concept from inception to completion, perform a market and site analysis, plan the development and construction, estimate the cost, and determine the financial viability of a full-service or limited-service hotel. Additional discussion topics include the regulatory process, financing, and risk management. Guest speakers, site visits, cases, text, practical examples and extensive use of spreadsheet software will provide students with specialized real-world knowledge and enhance their understanding of the complexities and challenges faced in lodging real estate development projects. Prerequisite: HOSP 3600.

HOSP 3602 Facility Layout and Design (4 Credits)
Foodservice layout and design is related to operating issues, new building construction, and renovations. Must have senior standing in the HPM major.

HOSP 3650 Leadership in Hospitality (3 Credits)
This course provides students with the knowledge, skills, and attitudes necessary to undertake leadership responsibilities in complex organizations. This course applies concepts and methodologies from the social and behavioral sciences in the analysis of leadership behavior in diverse organizational and community settings. Must have senior standing in the HPM major.

HOSP 3675 Club Management (4 Credits)
Organization and operation of private, corporate and public clubs; history and evolution of club field, types of clubs, organizational structure, management roles; operations focus on management of diverse functions such as clubhouse, recreational facilities and entertainment; emphasis on the similarities and differences between club and other food and beverage operations. Prerequisites: HOSP 2501, HOSP 2502 and HOSP 2504.

HOSP 3700 Topics in Hospitality Management (1-4 Credits)
Exploration of various topics and issues related to the hospitality industry. Prerequisite: HOSP 1100.
HOSP 3800 Hospitality Services Management (4 Credits)
The evaluation, design, and management of service delivery systems through operations management topics from a service perspective. Included are other related topics such as customer satisfaction and managing organizational change. Must have senior standing in the HPM major.

HOSP 3991 Independent Study (1-10 Credits)
Independent research/study; requires written report. Prerequisite: instructor's permission.

HOSP 3992 Directed Study (1-10 Credits)

Innovation and Entrepreneurship

The university-wide entrepreneurship minor at Daniels focuses on action, decision-making, experimentation, and hypothesis testing in the face of an uncertain future within a business context. Students who complete the entrepreneurship minor will understand how to shape the business, economic, political, and social context along with the creation of their products or services. To help students understand how to start successful businesses or to innovate within existing businesses, the entrepreneurship minor offers courses from several different perspectives such as financial, legal, marketing, and leadership.

entrepreneurship Minor

The minor in Entrepreneurship is available to all University of Denver undergraduate students. BUS 1440 The Fourth Industrial Revolution is prerequisite for all Entrepreneurship minor courses. Business students take this course as part of the Business Core, and only require an additional 20 hours in order to complete the minor.

1: This course will not show up in the minor area for business students. Business students take this course as part of the Business Core, and only require 20 additional hours in order to complete the minor.

Courses

**EVM 3350 From Idea to First Dollar Sale (4 Credits)**
This course is based on actually starting a company, launching a product, creating a market, and learning how to embrace failure and manage uncertainty. As hands-on course, student teams will actually create and run their own startups. All types of businesses are welcome: retail, services, technology, hospitality, etc. Class discussion, presentations, and guest speakers will explore the principles of planning, testing, measuring, analyzing, and rapidly iterating. Startups require significant effort, commitment and passion. This class is no different. Prerequisites: BUS 1440.

**EVM 3351 Planning the New Venture (4 Credits)**
In this course, students will encounter the conceptualization, development, documentation, and presentation of the business plan for an innovative new business initiative. Students will submit their plan to a panel of experienced professionals and receive critical feedback. Cross listed with EVM 4351. Prerequisite: EVM 3350.

**EVM 3360 Business Law for Entrepreneurs: Legal Issues for Emerging Businesses (4 Credits)**
This course will highlight the legal and business issues entrepreneurs face as they conceive and launch a new venture. Using real world scenarios, we will explore issues throughout the new venture lifecycle from pre-formation, organization and financing to intellectual property, employment issues, regulatory environment, and exits. The course is designed for students who want to start, join, or invest in a start-up or new business during their career. The goal is to develop an understanding of legal concepts necessary for decision making around the multitude of issues that entrepreneurs and would-be entrepreneurs face including an understanding of how the law can help and possibly hinder new enterprise creation. Prerequisites: BUS 1000.

Students are taught to link physical activity occurring in the business venture to the movement of numbers on financial statements. They draft 3 years of flexible profit and loss, cash flow, and balance sheet statements; Year 1 is monthly, Year 2 is quarterly, and Year 3 is one annual period. Students learn how to visualize the activity, metrics, and assumptions needed to support the customer experience they intend to build and how these numbers flow through their financial statements including: Generating revenue leads; Convert leads to sales; Producing the product/service; Delivering the product/service; Converting customers into repeat business; Set-up and maintain Quick Books. Cash impact of corporate governance costs (indirect) are included, such as risk management (insurance), employee benefits and compensation, facilities, technology, legal and capital expenditures, etc., understanding the tax implication of setting up different governance devices and understanding recapitalization and its implications. Students learn to identify activity metrics to drive cash basis break-even for daily, monthly, and annual periods. They will also learn how to create a Use of Funds Statement linked to their proforma'd financial statements. Students will learn different types of financing and under which circumstances these types are used-credit cards, factor loans on inventory, bank loans- including small business administration loans, angel funding, and venture capital funding. Exit strategies like M&A and IPO will also be covered. Prerequisites: BUS 1000.

**EVM 3380 Leadership, Management, and Execution (4 Credits)**
The final course in the entrepreneurship minor is a project based course designed to cultivate, coordinate, and integrate The University of Denver's diverse resources for the development and application of more creative entrepreneurial behavior and achievement. It builds on the overlap of three clusters of programs: business, engineering, and music. After having completed the other four courses in the minor, the final course offers an opportunity for students to form multidisciplinary entrepreneurship project teams (E-Teams) for transforming products or projects into practical realities, and to interact with alumni and community entrepreneurs. In this course, each E-Team project group develops a comprehensive business or operational plan for its entrepreneurial venture based on projects from engineering, music, and approved business school projects. Students are required to write and defend their business plan for a panel of potential investors. This course incorporates wisdom, insight, and experiences for successful entrepreneurs and explains the benefits and risks involved in the proposed entrepreneurship ventures. Students in the course will be based in the college where the project originates. However, student teams, regardless of where they are based, will be required to meet with an advisor in Daniels College of Business three times during the quarter to get counsel on their business plan project. In addition, students will be required to attend speaker series comprised of three outside entrepreneurship speakers. Finally, the course culminates with presentations to successful entrepreneurs who will judge the merits of the business. Prerequisites: EVM 3350.

**EVM 3400 The Innovation Amphitheater (1 Credit)**
Want to start your own business and invent your own future but haven't landed on a great product/service idea? Already have a business and want to expand into new spaces and offerings? This course is for people who answered yes to either of those questions. The Innovation Amphitheater takes you through 16 proven strategies and techniques to help you innovate into new spaces and find opportunities. You'll explore such strategies as crossovers, combos, silvercasting, inside-out, old school and retro, and many more.
EVM 3401 Project Management Using Trello and Asana (1 Credit)
Learn the basic fundamentals of project management, focused specifically on high-performing teams while starting and running an early-stage business. Explore how to implement proven project management concepts and techniques using popular tools like Trello and Asana. 1 credit hour. Prerequisite: EVM 3350.

EVM 3402 Creating Your Digital Presence (1 Credit)
Creating awareness of your new business venture is one of the most important tasks in the early stages of building your business. Creating awareness by driving traffic through and to your digital presence is essential. To help you as you embark on an entrepreneurial effort, this course focuses on building an integrated digital presence with a website, Facebook Business Page, Twitter account, Pinterest account, and an Instagram account. Prerequisite: EVM 3350.

EVM 3403 Ethics in Entrepreneurship (1 Credit)
Creating a business for the sake of generating profit is not enough. Businesses must contribute to the betterment of society through social, environmental, and financial gains. This course will help you build the right vision for your business by 1) engaging you in ongoing reflection and dialogue about your ethical responsibilities in product and service innovation, and 2) helping you understand cognitive, behavioral, and principled approaches to ethical issues in product and service innovation. Prerequisite: EVM 3350.

EVM 3404 Primary Research (1 Credit)
To be successful in your business venture, you need to make data-driven decisions. Much of that data can come from internal operations or perhaps secondary sources. But, to truly be successful, you need to gather, analyze, and make decisions based on primary research data from your external market. In this course, you'll learn the basic tenets of performing primary research activities including defining your market segment, building a primary research instrument, gathering data using a primary research instrument, analyzing the data, and making recommendations. Prerequisite: EVM 3350.

EVM 3405 Crowdfunding (1 Credit)
Funding a business startup is perhaps one of the biggest stumbling blocks of all new ventures. Angels and VCs aren't yet interested in you because you have no or limited sales, traction, and stickiness. And generating activity is difficult because you have no money for building your product, and therefore have nothing to sell. Fortunately, you can raise startup funds in the form of pre-sales through various crowdfunding platforms such as Kickstarter and Indiegogo. This course takes you through the process of getting a campaign up and going on those platforms so you can generate early-stage funds so desperately needed for your new business venture. Prerequisite: EVM 3350.

EVM 3406 Gamification (1 Credit)
Gamification is the application of game principles, elements, and techniques to non-game contexts. Gamification includes such things as badges, virtual currency, trophies, progress bars, leaderboards, leveling up, etc. Gamification is particularly useful for customer retention, product stickiness, and in general “making un-fun things fun to do.” Gamification is widely used in health and fitness, education, personal budgeting, surveys, and the like. In this course, we'll start with the theory behind gamification and then move quickly into gamification strategies and techniques, focusing on their appropriate application within specific contexts and how you can use gamification in your new business venture. Prerequisite EVM 3350.

EVM 3407 The Perfect Pitch (1 Credit)
Essential to most new business ventures is the ability to raise capital, most notably from angel investors and venture capitalists (VCs). Raising capital starts with the “pitch,” a presentation that is exciting, informative, realistic, and addresses what funds are needed, how they will be used, and how the investor will financially benefit from providing the funds. This course will help you learn how to create the perfect pitch for your new business venture. We will review both successful and unsuccessful pitch presentations. As well, several angel investors and VCs will be present in multiple class sessions to discuss how they evaluate pitches. Prerequisite EVM 3350.

EVM 3408 Accounting Basics (1 Credit)
Accounting is an activity in any business that measures, processes, and communicates financial information and transactions. This vitally important activity will help you track your expenses, recognize your revenue, and in general keep an accurate and detailed view of the financial strength of your business. In this class, you'll learn how to process operating expense transactions (e.g., advertising and payroll expenses) and revenue transactions (both actual sales and sales on credit). You'll also learn how to appropriately handle the depreciation of long-term assets like vehicles and buildings. Finally, you'll learn how all of these transactions enable you to build a balance sheet for your new business venture. Prerequisite EVM 3350.

EVM 3409 Financial Statements (1 Credit)
The four major financial statements, the most important to a new business venture are the balance sheet, the income statement, and the statement of cash flows. Knowing how to build and interpret these are critical to your success during not only the early stages of spinning up your business but throughout the lifetime of your business. In this class, based on a wide variety of financial transactions, you will learn how to build and interpret an income statement and a statement of cash flows. (It is assumed that you already know how to build and interpret a balance sheet.) You'll also learn how to build a proforma income statement and statement of cash flows, based on the financial projections of your new business venture. Prerequisite: EVM 3350, EVM 3408.

EVM 3410 HTML and CSS (1 Credit)
SquareSpace, Weebly, or any number of other tools can help you create basic websites without writing a single line of code. But, if you want to build the next big startup, the first languages you'll need to learn are HTML and CSS. In this course, you'll learn the foundations of HTML and CSS and why they exist. You'll then learn best practices for building on the web. You'll then be responsible for building 3 websites with HTML and CSS: A landing page for your business, a personal portfolio site, and a site of your choosing. Prerequisite: EVM 3350.
EVM 3411 Sketch and InVision (1 Credit)
Building a business and a product is no longer restricted to people who can code or construct. Modern design tools have enabled anyone aspiring founder to present a vision in real pixels, earning customers and credibility that puts their company ahead of the competition. The new standard of digital prototyping revolves around Sketch and InVision, two simple, yet highly effective, tools that anyone can learn. With a comprehension of the basic features of these tools, anyone can deliver the same quality of digital products as Google, Apple, and Uber. Prerequisite: EVM 3350.

EVM 3412 UI/UX Design (1 Credit)
In highly competitive markets, the differentiator for products is no longer just technology or customer service, but a fluid and intuitive product that is easy to use. User Interface (UI) and User Experience (UX) design are the backbone of a good product and convince customers and investors to buy-in to your product or business before it even exists. Good UI and UX are rooted in empathy for a customer and fluency in modern design methodology. In this course, you’ll learn about these modern design methodologies in such a way that you can build an exceptional digital product. Prerequisite: EVM 3350.

EVM 3413 Design Thinking (1 Credit)
Design Thinking is a creative problem solving process that builds your ability to first see and then solve human-centered opportunities. It starts with empathetically looking at frustrations inside and around your organization, then moves through a variety of brainstorming sessions to build customer centric solutions. Design Thinking is a wonderful tool to help you monetize the human capital in your organization. Once we know the process, we will ask students to bring real challenges into the classroom where we will use Design Thinking to build potential new products, services and solutions. Prerequisite: EVM 3350.

EVM 3414 Market Discovery and Product-Market Fit (1 Credit)
Market discovery is about identifying opportunities that you believe are worth exploring. Some markets have already been established; others have yet to be created. Is the product right for the market? Is the market right for the product you want to build? This course is for people who are eager to use their existing ideas or develop new ideas to improve an existing market or discover a new market. We will study the market discovery and product-market fit for companies such as Uber, AirBnB, Tesla, Snap and Slack. You will learn how to quickly identify and test product-fit for your target market. Prerequisite: EVM 3350.

EVM 3415 A/B Testing (1 Credit)
When you first launch your new venture business, you may think you know exactly what customers want and how they will react to various features and services, but you don’t. It’s as simple as that. You can do all the planning, designing, and interviewing that you want, but you’ll never truly know what your customers want and how they will react until you put something in front of them. A/B testing is a methodology for creating a controlled live experiment, giving two groups of users different experiences, features, touch points, pricing strategies, and so on to determine what they like and how they will best react to your offering. In this course, you’ll learn both the art and science of A/B testing. Prerequisite: EVM 3350.

EVM 3417 Branding and Messaging (4 Credits)
Branding is an essential element for any startup. Your brand is created by you and grows as your business grows. It’s more than a logo, colors, and fonts contained in a style guide. It’s the experience that you create for your customers. It’s something your business should aspire to. Something memorable. And as you work through this course, you will get an understanding of what it takes to build the brand for your business. Prerequisite: EVM 3350.

EVM 3418 MVP Build and Validation (1 Credit)
Deciding what to build, how to build it and who to build it for is THE basis for every business concept. This applies not only to startups, but also existing companies that want to expand their enterprise. When building a new product, service or venture, it’s important to create a buyable product efficiently with usually limited resources. In short, you don’t want to build products your customers don’t want and you want to find that out as soon as possible. This course will help students understand the concept of MVP (Minimum Viable Product) by taking their own team-created concept from idea to inception. Concepts covered will include business-hypothesis-driven experimentation, iterative product releases, and validated learning. The process will include team formation, ideation, collection of information to learn and translating the data into action through market testing. The big project is an MVP you present. Prerequisite: EVM 3350.

EVM 3420 Cloud Technologies (1 Credit)
Welcome to the Cloud! What is the cloud, is it a thing, a concept, a nifty term? If you are starting a new business, thinking about starting a new business or improving the efficiencies in an existing business, you need to understand the available technologies and tools in the Cloud. Where do I host my website, how do I handle accounting, where is the email server, how do I track customers, how do I share information, what tools are available for customer support? These are just a few questions the Cloud will solve efficiently and cost effectively. The Cloud has dramatically changed the competitive landscape for startups by reducing the cost of starting a new business. The Cloud removes costly equipment, software and support expenditures; with the Cloud, you pay for what you use. This course will focus on identifying, analyzing, and implementing Cloud technologies to help run your business. Here are some of the topics we will explore and discuss: flexible costs, how and when to implement these tools, is your data is safe, comparing similar services, improving collaboration. Prerequisite: EVM 3350.

EVM 3421 Intellectual Property Issues for Startup Businesses (1 Credit)
All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and – equally as important – your responsibilities for not infringing on the IP assets of other organizations. Prerequisite: EVM 3350.
EVM 3422 Startup Legal Issues (1 Credit)
Starting a business involves a host of activities, from product/service development, to marketing, to sales and service. At the foundation of all of these activities are legal considerations. Legal considerations for startup businesses range from establishing a form of business operation, to registering with the government and obtaining the appropriate licenses, to filing sales taxes, to the management of employees (hiring, contracts, etc.), and a host of other essential activities. To get your business off “on the right foot,” this course introduces you to the legal considerations that are vitally important to your success. Prerequisite: EVM 3350.

EVM 3424 Visualizing & Presenting Data (1 Credit)
Being able to tell a compelling story, in particular with data, is a skill that is rarely taught. Today, most people either adopt reports that have existed in an organization for as long as time, or they create flashy reports using the latest tools. In most cases, neither of these reports give the end users what they want. This course will focus on giving you the tools to create purposeful reports by helping you answer the age old question around any design... Form, Fit and Function. Prerequisite: EVM 3350.

EVM 3700 Real Business Cases in Entrepreneurship (4 Credits)
The Real Business course is designed to provide students with an opportunity to examine entrepreneurial business challenges through case studies, guest speaker, discussions and field experience. In addition to standard entrepreneurial start-ups, the course will cover international start-ups, gender issues relating to start-ups as well as fostering an entrepreneurial spirit in large organizations. Throughout the course, entrepreneurship will be examined from the perspective of business challenge as well as career choice. Prerequisites: EVM 3351 and degree checkpoint 2.

EVM 3704 Topics in Innovation and Entrepreneurship (1-4 Credits)
This course is custom designed to address topics that are currently in demand, such as social entrepreneurship, financing the startup after the Wall Street greed bust, finding angel investors and venture capitalists in Colorado, preparing for a pitch to investors, moving beyond startup stage, and others. Prerequisites: EVM 3350.

EVM 3710 Innovation/Creativity-Business (4 Credits)
This course is about identifying and creating customer needs, looking for innovative ways to address these needs, and pursuing those approaches that appear to have real profit potential. There are exercises to address and stimulate creativity, discussion of organizations that are considered to be creative businesses, and critical evaluation of the hurdles they face and the techniques they use. The course also includes innovative approaches to organizational effectiveness. Cross listed with EVM 4710. Prerequisites: LGST 2000 and degree checkpoint 2.

EVM 3991 Independent Study (1-10 Credits)
Student devises and completes a special learning project under faculty supervision. Topic and outline must be approved by supervising instructor and department. Prerequisite: EVM 3351.

EVM 3992 Directed Study (1-4 Credits)

Integrated Sciences

Integrated sciences is an interdisciplinary major designed for the student who desires general preparation for a career in an allied-health or science-related field, including physical therapy, occupational therapy, physician-assistant programs and nursing. In addition, students interested in teaching science at the primary, middle school or secondary level can benefit from the broad spectrum of courses available through the major.

Advising
The curriculum for the bachelor of arts in integrated sciences is tailored to the student in accordance with the requirements for the major listed below. Students usually work with a faculty advisor from the Department of Biological Sciences to design a curriculum that fits each student's career aspirations. See the chair of biological sciences (p. 140) for advising.

Integrated Sciences

Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))

A total of 60 credits in approved science disciplines is required; hence majors are not required to pursue a minor. Courses may be selected from the following departments: biological sciences, chemistry and biochemistry, engineering, geography/geology, mathematics, and physics and astronomy. The 60 credits must be distributed in the following way: a minimum concentration of 20 credits each from two different science departments with a minimum of 30 upper-division credits (2000 level or above). Integrated sciences majors are required to complete the general education requirements stipulated for science majors pursuing a BA.

Requirements for Distinction in the Major in Integrated Sciences

- Minimum 3.5 cumulative GPA
- At least three quarters of research (Undergraduate Research or Independent Study)
- Completion of a thesis
Intercultural Global Studies Program

Office: Sturm Hall, Room 486C
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2855
Email: emcnees@du.edu
Website: http://www.du.edu/ahss/igs

The Intercultural Global Studies minor, housed in the College of Arts, Humanities and Social Sciences, represents an innovative interdisciplinary approach to understanding cultural similarities and differences of diverse groups living in the United States and throughout the world. In an increasingly interconnected society, this minor serves to develop essential intercultural critical and analytical skills and to bridge the gap between the knowledge of these skills and their application through coursework and structured domestic and international engagement experiences. The purpose of the minor is to integrate and complement the student’s major fields of study with humanistic and social science training in navigating today’s global society.

Intercultural Global Studies

When you declare a minor in Intercultural Global Studies (IGS), we assign you a faculty advisor. Your advisor helps you build a cohesive, interdisciplinary set of courses.

Minor Requirements

24 credits, including the following:

Total Credits: 24

1 Please consult with your ICGS advisor and the schedule of classes for additional courses which may meet these requirements.

**International Studies**

Office: Anna and John J. Sie International Relations Complex, Suite 2030
Mail Code: 2201 S. Gaylord St. Denver, CO 80208
Phone: (303) 871-6451
Email: baints@du.edu
We interact with the global community in a thousand different ways every day. We connect with friends near and far via computer and phone. We view updates on elections and currency crises, we track the spread of diseases and civil unrest, and we even follow the latest in music and dance from blogs and videos posted by people around the world. We do this using devices designed by international teams and built with materials and components from dozens of countries. We are part of a truly globalized planet.

The sheer volume and the speed of trans-border movement of people, products and data mean that no country or individual exists as an island isolated from international forces. Our interdependence is a fact of life. The challenges of the 21st century are great: from controlling weapons of mass destruction to minimizing the impacts of climate change, from managing borderless trade and investment to tackling entrenched poverty and food insecurity, modern issues require international cooperation and collective solutions.

The BA program in international studies offers undergraduate students at the University of Denver critical knowledge and skills for succeeding in a world that has gone global. Understanding how global institutions and exchanges work, and bringing an international perspective to one’s professional development is a necessity for modern life. DU’s International Studies curriculum gives students this foundation. Join us to learn about international events that directly affect your life.

Students are required to complete a minimum of 44 credits in international studies to fulfill the major requirements. Students must also choose a specialization within the broad field of international studies. Specialization areas include global political economy and international politics; international development and health; and international organizations, security, and human rights. In addition, students are required to complete an approved study abroad program, as well as attain intermediate proficiency in at least one foreign language. Students should verify detailed requirements with the department.

### Graduate Degree Options for Undergraduate International Studies majors

Whether you are following a traditional four-year plan or are moving through your undergraduate degree at an accelerated pace, we offer two pathways for qualified international studies majors to earn a master of arts degree at the Josef Korbel School of International Studies (via the Dual Degree BA/MA Program in INTS [http://www.du.edu/korbel/programs/dual.html](http://www.du.edu/korbel/programs/dual.html) or the Priority MA Admission [http://www.du.edu/korbel/admission/priority.html](http://www.du.edu/korbel/admission/priority.html)) option). Prospective students must be in touch with their advisor early on for planning purposes and must meet normal standards of graduate admission at the time of application. For specific requirements, please contact the BA program in international studies.

### International Studies

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

44 credits required as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTS majors must successfully complete the following coursework and requirements:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 1500</td>
<td>Contemporary Issues in the Global Economy</td>
<td>4</td>
</tr>
<tr>
<td>INTS 1700</td>
<td>Introduction to International Politics</td>
<td>4</td>
</tr>
<tr>
<td>INTS 2975</td>
<td>Global Issues Research Practicum</td>
<td>4</td>
</tr>
<tr>
<td>At least three INTS courses in the student's selected area of specialization</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Select at least five additional INTS courses as electives toward the major.</td>
<td>20-36</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>44-60</td>
</tr>
</tbody>
</table>

### Additional Requirements

**Foreign Language Proficiency Requirement**

International Studies majors are required to demonstrate intermediate level proficiency in at least one foreign language. This is not necessarily a credit-bearing requirement. Any coursework taken to satisfy the international studies foreign language proficiency requirement will be in addition to the 44 minimum credit hours required for the major.

**Study Abroad Requirement**

Students are required to complete an approved study abroad program. Coursework must be pre-approved by the department prior to the start of the study abroad program.

### SECONDARY MAJOR

44 credits. Same requirements as for BA degree.
Minor Requirements

20 minimum credits:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

</tbody>
</table>

Select at least three additional INTS courses as electives toward the minor.

Total Credits 20

Requirements for Distinction in the Major in International Studies

- Minimum 3.5 cumulative GPA (at the time of application and graduation);
- Minimum 3.7 major GPA (at the time of application and graduation);
- Prerequisites: successful completion of all INTS core courses (i.e. INTS 1500, INTS 1700, and INTS 2975), and at least two, 3000 level INTS courses;
- Submission of Departmental Distinction application, by November 01 of junior year. Applications will be reviewed by the BA Program Committee in INTS and, if accepted, students will be notified prior to the registration period for Spring Quarter of their junior year. The application form is available on our BA Program Portfolio Community site (https://portfolio.du.edu/baints), under the "Distinction Program" tab. Failure to apply on time will invalidate a student’s eligibility to participate in the program. (Note: If a student plans to study abroad during spring quarter of junior year, they must submit their application by November 1st of sophomore year to remain eligible for Departmental Distinction.)

Students accepted to the Departmental Distinction Program must successfully complete the following curriculum in a satisfactory manner in order to achieve distinction in INTS:

- INTS 3000 Research Methods & Design (4 credit hours) - Spring Quarter of junior year. (Spring quarter of sophomore year if student is planning to study abroad spring quarter of junior year)
- INTS 3990 Thesis (4 credit hours) - Fall or Winter Quarter of senior year.

International Studies
must complete the final course in the intermediate sequence, or above, of one foreign language taught at DU with a C- or better to fulfill INTS FOLA requirement.

INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

INTS 1500 Contemporary Issues in the Global Economy (4 Credits)
Introduction to a range of pressing problems and debates in today’s global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy.

INTS 1700 Introduction to International Politics (4 Credits)
Central concepts and major theories to assist in organizing an understanding of international politics including balance of power, international organizations, foreign policy decision making, and conflict theory; application of current topics.

INTS 2160 Labor in the Global Political Economy (4 Credits)
This course explores and examines the role of labor in different parts of the global economy. According to world systems theory (Wallerstein et al.), there is a global division of labor into three zones: (1) core (essentially the wealthier, high-tech, highly industrialized economies), (2) periphery (generally, but not always those that provide basic food stuffs and unprocessed raw materials to the richer countries), and (3) what is referred to the 'semi-periphery' (countries that have elements of both the core and the periphery, which tend to be 'in the middle' economically, so to speak). In each of these three zones of the global economy, labor tends to function in quite different ways in terms of wages and working conditions, technical pre-conditions (education of the work force), etc. In a similar light, many manufactured products today are not made in one place, but are the products of this global division of labor. Often one part of the manufacturing process begins in one zone, but the refining and final manufacture takes place somewhere else - making the process truly global. The global division of labor is made possible by increasingly cheap transportation costs and cheap sources of energy. Consequently, the course examines the processes of the global division of labor, how it seems to influence global production and its fundamental dynamism (but also instability), as production moves from one part of the world to another.

INTS 2180 Politics of Development (4 Credits)
This course seeks to answer an overarching question that plagues development studies: why are some countries poor while other countries are rich? Furthermore, we ask why poverty is persistent around the world, and how the economic, political, and social structures of a society can improve conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development became the focus in the decade following the end of the Cold War. The course covers the major documents promoting theories of development, as well as looks at the historical record of the implementation of development policies (noting the divergence between theory and practice). We consider specific case studies in the process of asking why some countries are poor and others are rich, Furthermore, we are concerned with the role of country policies and implementation practices, with the impact of international organizations (multilateral development organizations), and the influence of bilateral foreign aid, on development progress or decline within countries.

INTS 2235 Gender and International Relations (4 Credits)
The study of gender and international relations (IR) is multi-faceted and complex. Both in theory and in practice, gender inheres in all aspects of IR – from globalization, to development, to security and human rights. Conversely, the ideas and processes that comprise the international political realm directly impact the everyday lives of women and men all over the world. What is it like to be a woman in post-Taliban Afghanistan? Why is homosexuality taboo in Iran, but not in many other parts of the world? Did Soviet communism really promote gender equality? These are only a few of the questions that are addressed over the ten weeks of the course. After an introductory discussion of the broad implications of gender for international political issues and vice-versa, we embark upon a quest to unravel the ways in which gender identities and sexualities come to be defined and practiced in different times and places, while simultaneously considering how these same identities constitute the contexts in which they are situated. At each stop along the way, we will endeavor to discover the mechanisms through which gender and sexuality are constructed, and reflect critically upon what these diverse constructions mean for the lived realities of men and women in different parts of the world.

INTS 2270 Sustainable Energy (4 Credits)
This course examines the political and policy problems, national and international, involved in trying to create a sustainable energy system. The class begins by learning about how to think about energy as a system, how it is made up of interlinked technological, political, social, and economic components. After discussing what is unsustainable about the current system, the class delves into the challenges of changing the system to a more sustainable one. In addition to learning about some alternative energy technologies, the class studies how different countries, and international agreements, are trying to push the system into a new direction. This field is moving very rapidly. For that reason, students learn about diverse sources of information on energy and energy and energy policy, form mass media to think tank and government reports to more traditional journal articles and books.
INTS 2320 European Union (4 Credits)
Some observers argue that European economic integration is quickly leading to the creation of a European super-state for the first time in history. Using approaches from both international and comparative political economy, this course will examine the extent to which this is true. Four issue areas to explore are the introduction of a common currency (the Euro), trade, the welfare state and European Union enlargement. Throughout, the course will address whether changes in European economic arrangements in fact lead to cross-national harmonization, or whether the political consequences are rather new manifestations of national styles.

INTS 2370 Globalization and the Knowledge Economy (4 Credits)
Much has been made of a new “knowledge economy” in which human capital has ascended to prominence over the traditional components of capital and labor. Further, the concept of “economic globalization” captures the realities of increasing interactions but exaggerates the notion of a single world economy connecting all producers, distributors, and consumers. In this class we examine the meaningful yet variable processes of increased knowledge diffusion and economic interaction to identify clusters of innovation, indicative of the knowledge economy. We then assess the applicability of globalization on a sector/industry basis to identify ongoing transformations and future implications for knowledge development.

INTS 2380 Comparative Development Strategies (4 Credits)
The course is comparative in nature, discussing the development of the First World in contrast to those development paths now being advocated for and implemented by the Third World. Are developing countries really constrained in the ability to implement the sorts of policies common in the First World during the late 18th and 19th centuries? What are the differences and similarities between First World development theory and practice, and Third World development theory and practice? What are the implications of these comparisons for development policy today?

INTS 2430 History of the Middle East (4 Credits)
This course treats the emergence of the modern Middle East in the modern period, roughly from the late 18th century to the present and examines the following topics: reformist attempts to meet the European challenge; the age of colonialism; the rise of nationalism; development strategies of socialism and capitalism; the impact of Israeli and Palestinian nationalism; the petroleum factor; the Islamic revolution in Iran; Saddam Hussein’s Iraq; the Gulf War and the war on terror.

INTS 2470 Crime & International Politics (4 Credits)
What constitutes a crime in one location may constitute a personal right, a survival strategy or legitimate business opportunity in another. So how then does one address criminality in a global society? This course explores the roots of transnational crime and both domestic and international response to criminal networks. Topics include corruption, the drug trade, and human trafficking.

INTS 2490 Introduction to Global Health (4 Credits)
This class is an introduction to the field of global health and explores relationships between social, political, cultural, and economic conditions of mostly low and middle-income countries and their impact on health and health services. We will spend some time covering health issues in high-income countries as well. A major focus of the course is the evolution of primary health care and alternative strategies in global health. Topics addressed include: maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies, and funding sources. The course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to global health challenges.

INTS 2700 Topics in Int’l Studies (4 Credits)
INTS 2701 Topics in Int’l Studies (4 Credits)
INTS 2702 Topics in Int’l Studies (4 Credits)
INTS 2703 Topics in Int’l Studies (4 Credits)
INTS 2704 Topics in Int’l Studies (4 Credits)
INTS 2708 Contemporary US Foreign Policy (4 Credits)
When the United States first won its independence, its leaders sought to avoid at all costs the countless problems awaiting any country engaging in foreign affairs. Indeed, John Quincy Adams, in 1821, warned the United States of the dangers of “going abroad in search of monsters to destroy.” In September of 2002, however, as American forces occupied one country and prepared to invade another, the Bush Administration released its National Security Strategy of the United States, which states: “To contend with uncertainty and to meet the many challenges we face, the United States will require bases and stations within and beyond Western Europe and Northeast Asia, as well as temporary access arrangements for long-distance deployment of U.S. forces.” How did we go from isolation to empire? In this course, we will attempt to answer this question by exploring the progression of American foreign policy from its emergence out of isolation to its current stage of interventionist superpower. We will also identify and discuss key issues that are driving America’s conduct abroad as well as evaluate the strengths and weaknesses of the given policies addressing these important issues. By the end of the class, students should have a solid knowledge of the major themes and developments in the history of American foreign policy as well as the ability to reflect critically upon on-going foreign policy debates.
INTS 2715 Introduction to Comparative Politics (4 Credits)
This course offers an introduction to the comparative study of political systems throughout the world. In the years following World War II, social scientists traveled extensively to newly decolonized regions of the world to examine societies there. Many found conditions so distinct from those of the western world that they warranted new models of political development. The distinguishing of development patterns in remote regions from those of western nations became the origin of modern comparative politics. The course considers both the impact of internal and external variables on political development. Internal or "domestic" variables include ideology, geography, economics and culture, while external variables include "globalization" and international conflict. Class includes understanding and critique of models of political development including classical liberal, authoritarian, communist, post-communist, "late" development, and social democratic models. It also includes discussion of possible new models in light of globalization and other factors.

INTS 2760 Epidemics, Pandemics, and Panic (4 Credits)
Sickness has terrorized humankind for centuries. Be it the Black Death, HIV/AIDS, Ebola, or the flu, diseases sweep through society leaving death and destruction in their wake. At times, it is the microbes that cause the greatest amount of suffering. Smallpox, for example, is believed to have killed 200-300 million people in the 20th century alone. But at other times, it is the people, who respond with ignorance and fear, that exacerbate the situation and inflict untold pain. Public policies which punished the poor for their poverty resulted in a million plus deaths during the Irish Potato Famine is one such example. Likewise, community responses couched in fear and victim blaming left tens of thousands to die from HIV/AIDS before serious public efforts to attack the disease began.

INTS 2930 Latin American Culture, Politics and Society: A Contemporary Approach (4 Credits)
This course is dedicated to a search for the cultural and social continuity that can inform and transcend the economic and political disunity and fragmentation of the Latin American world. Despite the huge historical obstacles related to the long authoritarian traditions of the Pre-Colombian and Iberian Empires, a genuine rediscovery of cultural and social values can provide Latin America with the necessary economic and political convergence to implement successfully models of development related to its own cultural actuality.

INTS 2975 Global Issues Research Practicum (4 Credits)
This is the third and final required course for all international studies majors. In the first two introductory classes, you acquired knowledge about international politics and the global economy. In this class, we investigate where that knowledge came from. How do researchers learn things about the political world? And how can you do this kind of research yourself? Students will learn about different types of international studies research, and will practice collecting and evaluating evidence from interviews, surveys, the written record, and quantitative sources. You will learn to ask a compelling research question, critically evaluate existing research on your subject, and find evidence that will help you answer your question. Your final project will be to design a research project that you could feasibly conduct in a future quarter. Prerequisites: INTS 1500 and INTS 1700, must be a declared INTS major or minor.

INTS 2992 Directed Study (1-8 Credits)
INTS 3000 Research Methods & Design (4 Credits)
This course is designed for advanced International Studies majors, including Department Distinction, that intend to write a thesis in INTS. It introduces students to the fundamental elements of social science research and will serve as a workshop to complete a literature review and write a research proposal. The basis of any scientific investigation is the research proposal in which you formulate a question and design a process by which you will explore that question through a systematic collection and analysis of evidence. The design process is the same whether you are writing a short class research paper, or are conducting a major research project, such as a thesis. The manner in which evidence is gathered and analyzed, however, will vary based upon the research question, research goals, and resources. We will therefore go through the process of research design. Because international studies provides multiple methods of inquiry, we will also explore quantitative and qualitative methods that may be used to gather and analyze evidence. Prerequisites: INTS 1500 and INTS 1700. Must be an INTS major and receive departmental permission.

INTS 3002 International Trade and Development (4 Credits)
This course introduces students to the politics and economics of international trade. Special attention is paid to the relationship between international trade and economic development and to the experiences of developing countries in the international trading system. Alternative perspectives are introduced and applied, both historically and to a selection of contemporary issues that affect developing countries.

INTS 3003 Politics of Germany (4 Credits)
Through this course we begin to engage and understand Germany's past, present, and future developments in defining identity and how identity influences internal and external politics. We conduct the course in the politically-charged eastern German regions of Berlin and Saxony where both historic and current events carry additional relevance, including the rise and fall of fascism, post-Cold War divisions, the hope and realities of reunification, and ongoing debates concerning national identity.

INTS 3014 Illicit Markets (4 Credits)
This course explores the relation between illicit networks, security and the state in the global economy. We study the links between what is considered formal and informal, and legal and illegal, in order to examine what official views obscure in everyday relations of transnational activities. The material largely examines illegal practices from the ground up from the perspectives of everyday civilians, communities, and those involved in extra-legal activities. We begin with a critical examination of the categories of "illegal," "illicit," "the state," and "corruption." We reveal these categories as cultural and political constructs rather than as pre-existent neutral categories of analysis. Some questions we ask are: Who applies these definitions? How have they changed and what interests do they serve? Are distinctions between "illegal" and "illicit" useful, or do they obscure the power of the state to determine legitimacy? Are some activities inherently illegal? Moreover, we explore the impacts of state security and militarization efforts on extra-legal networks and experiences of insecurity. Prerequisites: INTS 1500 and INTS 1700.
INTS 3015 Social Movements: Latin America and South Asia (4 Credits)
Latin America is the site of important movements to constitute new collective identities, deepen democracy, chart alternative patterns of development, and re-organize the international system. Some of the most important impulses for these efforts come from below, in the form of social movements that articulate the demands and the dreams of excluded populations. This course addresses major theories of social movements, including classical, structural, new social movement theories, as well as approaches to contentious politics. These theories have attempted to answer the fundamental questions of what triggers mobilization among excluded groups, how the overcome obstacles to stand up to oppression, what organizational strategies and tactics facilitate their action, and what changes they potentially trigger to basic rights, political institutions, and identities. The course also explores individual cases of social movements, approaching them as struggles against the oppression and exploitation that have faced Latin American people at different moments of history. Among the cases we'll address are workers, peasants, indigenous, women, environmentalists, and advocates for democracy and human rights. We will also explore newly emerging and transnational movements, including those that articulate alternative models of globalization. The course takes an interdisciplinary approach, drawing on economics, sociology, anthropology, and political science. It places special emphasis on the political economy of popular organization, acknowledging the contested nature of development and the ongoing struggle for deeper democracies and more equitable societies. Prerequisites: INTS 1500 and INTS 1700.

INTS 3020 Introduction to Middle East and Islamic Politics (4 Credits)
The contemporary politics of the Middle East cannot be understood without some debate of the West's relationship with the region and the associated view of the Orient that grew out of this relationship. In light of this reality, the state system that has emerged in the region since the demise of colonialism forms a suitable framework in which to understand the major themes of this course. The first major theme to be discussed is the impact of colonialism on the region, particularly in the latter half of the nineteenth century and first half of the twentieth century. In this section of the course we explore the nature of political rule and government and the prevailing economic motive behind this imperial and colonial relationship. The second theme of this course explores political ideologies, both secular and religious. A historical overview of this development will be explored in the context of current theories of nationalism posited by authors such as Benedict Anderson, Eric Hobsbawm and Ernest Gellner. The final section of this course briefly explores the theme of democratization and its discontents in the Middle East. The focus is on recent debates about democratization that have been promoted from outside the region as a means of combating tyranny within the region, particularly the perceived anti-democratic nature of political Islam. Prerequisites: INTS 1500 and INTS 1700.

INTS 3025 Current Issues in Human Security (4 Credits)
This course surveys the various debates, concepts, and issues clustered around human security. Human security is a relatively new concept that challenges the traditional, state-centric approach of "national" security. A more inclusive term, human security includes economic, environmental, and social concerns such as poverty, climate change, crime, and disease in addition to the traditional focus on conflict and political violence. This course will explore the development of human security as a term, focusing particularly on the emergence of human security as a category of global governance. It will also investigate a range of issues that challenge human security. Students will engage with these issues through assigned readings, class discussion, policy assessment, and in-depth case studies. Prerequisites: INTS 1500 and INTS 1700.

INTS 3030 Sports and International Politics (4 Credits)
This advanced undergraduate course in international studies explores the complex connections between sports and international politics in the past and present and sport's relationships to international peace, both historically and in contemporary times. At the heart of this contribution is the need to examine sport as an international issue, to explore and its relationship to the protection and advancement of human rights (to include gender equality and the rights of those with disabilities), and to critically examine the role of sport in fostering community-level social cohesion and inclusive national unity. Participants in the course will gain a critical knowledge of the origins, background, and issues in global sport, especially the Olympic Games, and a critical awareness of the potential opportunities and obstacles for sport in social development. Learning outcomes are attained through faculty presentations, guided discussions, and student-led research. The course is designed as a research colloquium in which participants develop and share a research dossier on course topics with a capstone seminar to integrate learning and share findings on historical and contemporary issues at the intersection of sport, power, profit, and peace.

INTS 3040 Technology and Development (4 Credits)
From the classic works of Adam Smith and Karl Marx to contemporary analyses by noted development economists Jeffrey Sachs and William Easterly, the role of technology in fostering economic growth and wider well being is firmly established. As the application of embodied knowledge, technology enables increased productivity, as well as new capabilities, goods, and services. While the role of technology in promoting human advancement is well established, the specific processes required for the effective development and use of technologies is less understood. Further, technological development varies considerably between developed and developing contexts with persistent inequalities hindering basic needs for billions.

INTS 3075 Security Research and Policy Analysis (4 Credits)
The objective of this course is to improve the skills that any security professional, be they in the academic and/or the policy communities, needs to successfully address complex national and international security questions. These skills include the ability to analyze and assess the work of others in the field critically, the ability to construct and execute the analysis and research necessary to address real world security questions, and the ability to articulate results, both in written and oral form, to a high professional standard. By developing an understanding of research method and design, students will have the foundational skills necessary to conduct security analysis. By both reading the work of others with a critical eye toward their method/design and seeking to use method/design to address real world security questions themselves, as well as being tasked to present the results of these efforts, students should complete the course in a much better position to both complete their short term academic goals and to participate in the security community after graduation. Prerequisites: INTS 1500 and INTS 1700.
INTS 3080 United States and the Middle East: Special Relationships (4 Credits)
The Middle East has been a focus of U.S. interests since the 19th century, from encounters with the Barbary pirates to the founding of major universities, such as the American University of Beirut. Until World War II, these interests were primarily private in nature, with little involvement by the governments of the countries involved. Private relationships, however, laid the groundwork for the strategic and economic alliances of the post-War period. U.S. involvement in the development of the Saudi oil industry, for example, went well beyond commercial bonds, as ARAMCO engineers, with U.S. government approval, constructed much of the Saudi infrastructure. The U.S. invasions of Afghanistan and Iraq have added two comparatively new, and extremely complex, relationships to the traditional ones. This class examines the nature of U.S. special relationships in the Middle East, with emphasis on five countries: pre- and post-revolutionary Iran, Saudi Arabia, Israel, Jordan, and Egypt. It then evaluates how these relationships continue to have an impact on regional affairs, particularly on Iraq and Afghanistan. During the course of the class, students should gain an overview of the historical record, as well as an appreciation of how the Middle East has served in the past as a crucible for the interplay of external interests. In addition, students should acquire a detailed knowledge of the studied countries, enabling them to present a paper and an oral presentation on likely outcomes in the Middle East over the next decade. Prerequisites: INTS 1500 and INTS 1700.

INTS 3111 Migration and Development (4 Credits)
This course will discuss the multifaceted relationships between human migration and development. We will explore both the ways that development influences migration and the ways that migration, in turn, shapes development. While the course will be global in scope, we will pay particular attention to the way that these global processes impact communities locally, applying our classroom learning to economic and social development challenges faced by immigrants and refugees in the Denver area. The course will focus on how human mobility (and immobility) affects prospects for economic and social development on three levels: the development of (a) the communities and countries people leave, (b) migrants themselves, and (c) the communities and countries that people enter. We will also consider modern barriers to mobility and the economic and ethical implications of modern migration management regimes. Students will be actively involved in their learning through group projects, debates, and reflective writing. Prerequisites: INTS 1500 and INTS 1700.

INTS 3120 Global Social Movements (4 Credits)
It is not only the economy that has become ‘global’ in the past 600 or so years. So have the social movements that spring out of the contradictions in the system. In some cases these social movements are the result of developments in one country (French, Russian Revolutions). But there is also a phenomenon of movements of a world-wide character that emerge more or less at the same time all over the world. These movements are not particularly new. One can cite the anti-slavery movements of the late 18th century and early 19th century and the anti-colonial movements of the 20th century as examples. More recently, there are a series of social movements that are global in character—the environmental movement, the peace (anti-nuclear, anti-war) movement, the movement to combat AIDS, and many human rights movements (Amnesty International, Human Rights Watch), which are international in character. Some of the interesting theoretical questions concerning social movements include the following: What are the factors in the global economy that trigger global social movements? What is ‘the social chemistry’ that results in the creation of a global social movement? Why is it that global social movements seem to have an almost organic quality about them (they are born, mature, grow old and often die)? How have the powers-that-be responded to global social movements across time (absorption, repression, etc.)? What determines the success, the failure of a global social movement? What seem to be the direction/characteristics of global social movements today? This course examines such questions and more. It explores a few ‘universal’ movements, either because they happened across the world at about the same time (revolution of 1848, 1968) or because, like the French or Russian Revolutions, they started in one place but spread because they were global in character. Prerequisites: INTS 1500 and INTS 1700.

INTS 3130 International Relations Theory (4 Credits)
This course examines the important classical, behavioral, and post-behavioral theories of international relations, and the nature of theory in international relations. Topics include the role normative theory; levels of analysis, structure-agent relationships, and concepts of foreign policy behavior and decision making; utopian/neo-liberal and realist/neo-realist theory, and democratic peace theory; theories of power and its management; theories of integration, cooperation, conflict, war, and geopolitical and ecological/environmental relationships; constructivism; systems theory; regime analysis; the relationship between theory and the international system in the early 21st century; traditional and contemporary paradigms of the international system. Prerequisites: INTS 1500 and INTS 1700.

INTS 3140 Russian Identity (4 Credits)
Russia, it has been said, is "a riddle wrapped in a mystery inside an enigma." Embroiled in perpetual change and uncertainty, Russia has, for centuries, attempted to forge an identity that is uniquely its own. Through an exploration of literature, film, and political writings, we will endeavor in this course to unravel the complex and ever-changing dynamics of Russian identity, considering the implications of this constructed identity for both domestic and international political processes. Taking a historical approach, we will look in particular at the ways in which categories of analysis such as class, religion, gender, and ethnicity have played into constructions of the nation, and investigate the ways in which these constructions have been carefully resisted in both historical and contemporary contexts. Prerequisites: INTS 1500 and INTS 1700.

INTS 3171 Political Economy of the European Union (4 Credits)
Some observers argue that European economic integration is quickly leading to the creation of a European super-state for the first time in history. Using approaches from both international and comparative political economy, this course examines the extent to which this is true. To unpack the debate, we explore four issue areas, including the introduction of a common currency (the Euro); the Common Agricultural Policy and global trade; European Union enlargement; and the evolutions of a common defense policy. Throughout, the course addresses whether changes in the European economic arrangements in fact lead to cross-national harmonization, or whether the political consequences are rather new manifestations of national styles. Prerequisites: INTS 1500 and INTS 1700.
INTS 3210 Political Violence and its End (4 Credits)
This course centers on the nature, character, strategies and termination of the range of forms political violence – violence used to achieve political ends be it by states, the international community, or non-state actors – takes in the early 21st century. After a general discussion of the lexicon of security, force, war, and war termination, each of the five forms of political violence are explored beginning with a discussion of the fundamentals, an exploration of the current context and character of the form centering on a leading book on the subject, and then a discussion of counter-strategies and broader political/societal considerations. The course ends with a similar three part discussion of the political/military realities and necessities of violence termination. Prerequisites: INTS 1500 and INTS 1700.

INTS 3215 Major Issues in International Security (4 Credits)
This course begins (in Part I) by considering the threat that created the field of "security studies" following the second World War: the origins and evolution of the nuclear danger. Part I ends with an assessment of the most dangerous manifestation of that threat in several decades: North Korea’s acquisition of nuclear weapons and long-range missiles. We turn next to addressing (in Part II) a question that seemed answered since the dawn of the nuclear age, when the United States moved from its defeat of Fascism in World War II to the containment of communism in the Cold War, to expanding the zone of free market democracies during the post-Cold War era: What does the United States seek to secure? Even if all could agree on the nature of particular security threats and the fundamental goals of security policy (as occurred for the United States after the attack on Pearl Harbor), enormous challenges confront the formation and implementation of national security strategy and policy. Part III of the course will identify and evaluate those challenges, using the 2003 decision to invade Iraq as a case study of the enduring problems that confront national security policy-making. We finally turn (in Part IV) to analyzing a series of current issues, including the threat posed by violent Islamist organizations, the consequences of U.S. disengagement in the Middle East, the impact of changing technology on the international security environment, (drones, surveillance, cyberwar, hybrid warfare), and the risk of conflict between the United States and two other major powers: Russia, and China. Prerequisites: INTS 1500 and INTS 1700.

INTS 3220 Human Trafficking (4 Credits)
Through the Education for Justice (E4J) initiative, the United Nations Office on Drugs and Crime (UNODC) has developed a series of university modules with a focus on the subject areas of crime prevention and criminal justice, anti-corruption, organized crime, trafficking in persons and smuggling of migrants, firearms, cybercrime, wildlife, forest and fisheries crime, counter-terrorism as well as integrity and ethics. In recent years there have been few topics garnering as much widespread interest as trafficking in persons (TIP) and smuggling of migrants (SOM). These issues have attracted the attention of Governments, NGOs, International Organizations, the media as well as academia. While this attention tends to provoke vivid discussions in political circles, social networks and other media platforms, there is little solid understanding of TIP and SOM, the difference between them and their implications. Last Spring, I joined 12 other academics with expertise in human trafficking and human smuggling from around the world for a work week in Doha, Qatar to create a syllabus primarily for the teaching of TIP and SOM at universities and colleges. The 14 Modules on TIP and SOM will provide students with a practically oriented, though still theoretically grounded, tool to understand these issues. Thanks to the inputs received from an addition 100+ academics from all around the world, the Modules' contents are substantively robust. This strength is reinforced with a series of illustrative examples and exercises aimed at generating debates and consolidating knowledge among students. Given the considerable safety risks posed by TIP and SOM and the related need to ensure that perpetrators are made accountable, the course relies heavily on a legal approach, acknowledging the importance of clarifying concepts and employing rigorous terminology. This notwithstanding, the course is also grounded in a multidisciplinary methodology, recognizing that the complexity of the trafficking in persons and migrant smuggling phenomena extends beyond the legal realm. Consequently, a comprehensive understanding of TIP and SOM is not possible without the convergence of various disciplines, expertise and perspectives, including the historical, economic, social, political, and gender prisms, that are all considered in developing the course. Prerequisites: INTS 1500 and INTS 1700.

INTS 3245 Population, Politics and Development (4 Credits)
This course examines past and future global population trends, with an eye on the theories, techniques and abuses of limiting population growth beginning with the early 20th Century Eugenics movement and the Birth Control movement of the same period, looking at its evolution in the post-World War II period. In the post-WW II period, we look at the factors leading to the postwar population explosion, finishing off with current and future trends. Throughout the course, we explore how population theories have been connected to economic development and GNP and how it has affected, or tried to affect, global demographic patterns. Along the way, we study the Eugenics movement in the U.S. and Nazi Germany, the post-war attempts at birth control as a result of new technologies and some of the more famous studies: post-World War II sterilization campaigns in Puerto Rico, the birth control movements in China and India, and recent cases of sterilization abuse (Native Americans in the 1870s, Peru under Fugimori). We end by looking at the different predictions for population growth in the coming decades. Prerequisites: INTS 1500 and INTS 1700.

INTS 3310 Disasters, Hazards & Response (4 Credits)
While we have substantial literature on how countries and communities respond to internal natural and manmade disasters, we know much less about international response. Through concentration on a number of important catastrophes, students focus on the variables that explain how and why the international community responds to disaster with both vigor and, in some cases, little interest. Prerequisites: INTS 1500 and INTS 1700.

INTS 3365 African Development: Patterns, Issues and Prospects for the SDGs (4 Credits)
This is an undergraduate course on Development in sub-Saharan Africa (SSA). It introduces the student to the main issues and themes confronting contemporary African development. It draws on literature from development economics, history, comparative politics, sociology, anthropology, geography and international relations, as well as a broad range of country case studies. The course reviews patterns of development in the SSA region. It then engages with the main theories of economic growth and development and evaluates their application to Sub-Saharan Africa. The main issues include the impact of Africa's geography, natural resources endowments and climate; the legacy of slavery and colonialism; independence, state formation and failure; patrimonialism, clientelism and corruption; Africa's economic crisis and reform efforts; foreign aid and debt; democratization and; reflections on Africa and the sustainable development goals. The course will equip the student with knowledge and skills to be a positive and effective player in the area of African development. Prerequisites: INTS 1500 and INTS 1700.
INTS 3385 Migrants and Refugees: Humanity on the Move (4 Credits)
This course begins with the pre-history and history of human migrations and moves to cover the era of European colonization and forced dispersal (and in some cases aggregation) of peoples in the Americas, Southeast Asia, and Africa. The "contemporary" (i.e., post-WWII) era then covers not only the movements of peoples from Central Africa, Southeast Asia, the Balkans, and elsewhere, but will highlight the achievements of immigrants and refugees in such areas as technology, the arts, and the field of human rights. Issues of ethnicity, nationalism, and political diasporas will bring the contemporary era to a close. Prerequisites: INTS 1500 and INTS 1700.

INTS 3390 Gender and Development (4 Credits)
This course looks at issues of international development from the dual perspectives of gender analysis and cultural anthropology. While it is heavily based on political economy and assumptions about dependency and underdevelopment, it takes a strong micro-level, case study approach as well. That is to say, while we are concerned about policy issues, we expand our analysis to the women and their families whose day-to-day existence is at the heart of the topics. Finally, we engage in gender training workshops to learn lessons of facilitation and participatory change in grassroots development. Prerequisites: INTS 1500 and INTS 1700.

INTS 3415 State Department Tradecraft (4 Credits)
This is a foreign policy skills-based course designed to foster an ability to more effectively engage internal leadership, the press, and foreign audiences while working in a government context. Students will draft a range of communication products including policy memos, diplomatic cables, and talking points and practice essential oral communications skills ranging from negotiation, speaking to the media, and delivering briefings to officials. The State Department's communications model will be used as a template for engagement, but the skills will be broadly useful to any individual planning to formulate, implement, and educate on policy in executive and legislative settings. Prerequisites: INTS 1500 and INTS 1700.

INTS 3420 Climate Security (4 Credits)
Since the dawn of agriculture (~7000 BCE), but rapidly accelerating in the industrial age (1750 CE to the present), humanity has conducted an uncontrolled experiment in bending the natural environment to fit human needs and desires. Despite the perceived distance that technology has placed between our physical environments and our daily lives, human interactions with our natural environment are still fundamental – and set to be disrupted by climate change, one of the most vexing issues of our time. It poses a wicked problem: a socio-cultural problem that is seemingly impossible to solve due to incomplete knowledge, the number of people and opinions involved, the large changes required, and the linked nature of the problem with other major social issues and problems. Since the end of the Cold War, much attention has been paid to the role of natural resources and environmental scarcity as a source of conflict, ranging from "water wars" between states sharing a common river basin to communal conflict between pastoralists and farmers in the Sahel and even the Syrian Civil War. This course will survey the impacts of climate change on livelihoods and human security, evaluate the expanding literature on environmental impacts on conflict, and address the emerging role of environmental stressors and climate change as US national security issues. Prerequisite: INTS 1500 and INTS 1700.

INTS 3431 International Futures (4 Credits)
Countries vary in relative levels of income, wellbeing, and stability for a variety of reasons, often involving complex interactions that limit our ability to divine a single, general explanation. That said, social science theory, data collection, and quantitative methods have improved significantly over the past several decades providing novel insights into complex, systemic, interactions. These relationships not only help to understand past outcomes but also indicate potential future trajectories under variable scenarios. Using the International Futures (IFs) system, we can begin to understand "where we've been", "where we're headed", and "where might we want to be".

INTS 3485 The Role of Religion in International Affairs (4 Credits)
The role of religion in international affairs was largely unexplored by scholars prior to September 11, 2001 when religiously based acts of terrorism shook the world. Since that time there has been an increased interest in examining religion in terms of its impact on the international system. Is religion a force for good or evil within the international system? How influential is religion in international politics? Does religion matter or is it merely background noise in our study of the international system? In short, this course examines the role of religion in international affairs with an eye toward understanding political violence, political economy and conflict resolution in terms of religion and religious actors. Prerequisites: INTS 1500 and INTS 1700.

INTS 3505 International Health and Development (4 Credits)
Investment in health and investment in development work symbiotically in the production of economic and human well-being. However, what constitutes health and development varies across context, institutions, and geographies. This course will focus on the meaning, measurement, financing and delivery of inputs to human well-being and other aspects of development. This course will explore dominant models of health and development, what assumptions inform these models, and who is left unaccounted for within each. We will examine how macro-level decisions, decisions made by global or national institutions, impact both options and outcomes at the community and individual level. The exchange between development policies and health interventions will be explored. We will examine and critique the instruments and methods that are used to measure health and development and the assumptions that inform mainstream development and health paradigms.

INTS 3520 Environment, Security and Conflict (4 Credits)
This class examines the intersection between the environment and security, and the ways in which “green” issues can lead to international conflict, either as underlying causes or as catalysts. The class looks at a variety of broadly defined environmental factors, including competition for scarce resources and environmental degradation that occur both naturally (e.g., desertification) and by the hand of man (e.g., the contamination of soil because of munitions, land mines, etc.). It considers the potential for weather modification as both a means of cooperation and as a military tool. We pay particular attention to an overriding environmental concern: water and its ownership, management and use. A continual determinant of internal and external policy, water has the potential for becoming either a fundamental political weapon or a means for cooperation that could provide a basis for wide-ranging regional stability. Additional, we look at the significance of oil as a natural resource and as a security issue, regionally and internationally. Prerequisites: INTS 1500 and INTS 1700.
INTS 3530 Feeding the World: The Politics and Economics of World Food and Agriculture (4 Credits)
This course asks students to critically explore contemporary debates about the global food and farming system with an eye to understanding its structure, operation, ideological basis, and impacts on people around the world. Of special interest in the course is the manner in which the global food and farming system both creates and aggravates global inequalities. Students focus partly on theories of and ideas about the role of agriculture in the economy, society and the development process, the appropriate structure and orientation of agricultural production and distribution, the role of the state in directing food production and distribution, and the nature of justice for farmers and eaters. Students further engage a spectrum policy debates and case studies that particularly illustrate the workings of the global food and farming system and the harsh contradictions that underpin it. Among other topics, students are exposed to debates about food prices, hunger and famine, obesity, commercial production and agribusiness, the peasantry and subsistence farming, biotechnology, free agricultural trade, fair trade, agricultural pollution and agriculturally-induced climate change. Prerequisites: INTS 1500 and INTS 1700.

INTS 3540 Contemporary China (4 Credits)
This course provides an overview of the rise of China and its likely future course, focusing on five essential components: (i) the Legacy of the Past in which we examine the legacies from the Imperial, warlord, Guomindang and Maoist traditions; (ii) the Chinese Economic Boom, which examines the massive, and even unprecedented, Chinese economic boom unleashed by Deng Xiamping’s Four Modernizations in 1978; (iii) Chinese Politics: Democracy, Nationalism, and Foreign Policy, in which we cover the People’s Republic of China’s path toward great power status, which differs dramatically from the path followed by the West. In this section we look at issues of democracy, nationalism, and foreign policy as crucial to understanding China today; (iv) Chinese Culture Today, explores the rapid modernization of Chinese culture in the last two decades, with emphasis on pop culture, commercial culture and movies; and (v) Rural China, in which we consider the lives and the future of the majority of the Chinese population that still lives in the countryside but is undergoing massive transformation. Prerequisites: INTS 1500 and INTS 1700.

INTS 3560 Globalization and International Security (4 Credits)
Globalization moved a long time ago from social science to omnipresent buzz word, but with increased usage has not always come increased understanding. Globalization is the increased participation, and consciousness of that participation, by individuals in global, that is to say trans-regional or transnational, networks. Today’s globalization is made possible in large part by dramatic and continuing changes in technology, but its impacts are social, economic, political, and potentially military changes in perception, in scale, in magnitude, and in threat. This course specifically concentrates at the intersection of global networks, the technology that makes them possible today and tomorrow, and current political and military security challenges to include national and internal state security, global terrorism, global insurgency, and cyber warfare. Prerequisites: INTS 1500 and INTS 1700.

INTS 3565 The Human Dimensions of Globalization (4 Credits)
This course explores the effects of neoliberal globalization on the lives of individuals and their communities. In an increasingly interconnected world, how do everyday people and communities negotiate the opportunities, dislocation, and/or disjunctions engendered by neoliberal globalization? Does globalization contribute to increasing global homogeneity or does it restructure difference and inequality in new ways? We explore how a ground-up view of globalization can highlight some of its contradictory effects. We discuss how globalization influences increasing inequality, restructures individual and group identities, as well as the relation between globalization and migration. From a ground-up perspective, we attune to growing global connections to understand how transnational commodity circuits intersect with individual lives and communities. We ask: How are commodity chains also cultural objects that shape, and are shaped by, how we see the world? Moreover, we pay attention to the development of grassroots networks and social movements that forge connections across borders to channel and/or challenge the current trajectory of globalization. We also find it imperative to understand the affective dimension-how do human beings think about their emotional relationships, families, and identities in relation to changing global dynamics? A central question we ask is: As everyday life becomes increasingly commoditized, how do people cope, find support and value, and reveal alternative ways of conceptualizing how we can all connect to one another? Prerequisites: INTS 1500 and INTS 1700.

INTS 3575 Agriculture & Rural Development (4 Credits)
This course addresses some of the major socio-economic and political aspects of rural and agricultural development in low- and middle-income countries. The course provides an introduction to the political economy of export agriculture in the Global South, which includes an analysis of global agricultural commodity value chains, national agricultural modernization and rural poverty reduction strategies, and local food production and marketing relations. We will examine the socioeconomic conditions for an integration of smallholder farmers and small-scale fishers into global value chains and assess agriculture’s contribution to decent employment, food security and overall welfare improvement in low- and middle-income countries. The central role of environmental sustainability in agricultural development will be addressed from local and global perspectives, with a particular focus on the social and economic development prospects of smallholder farmers, small-scale fishers and agricultural laborers. Using diverse country case studies from across Africa, Latin America and Asia, the course applies approaches from social anthropology, political ecology and development economics to the analysis of structural change in largely agriculture-based societies. The course will enable students to better understand the structures of accumulation and dispossession that shape agrarian change processes, and to analyze the political and economic conditions for sustainable agricultural development in the global South. Prerequisites: INTS 1500 and INTS 1700.

INTS 3590 Politics in Africa: A Theoretical Approach with a Comparative Perspective (4 Credits)
This course introduces students to basic concepts and arguments in the study of contemporary African politics. The focus is on the politics in Africa post-independence. The course emphasizes theory in a comparative perspective as a way to understand politics in Africa. The basic question is whether politics differ so much in Africa as to be in a category by itself or is it simply a variation on patterns, habits, and institutions found in other regions and countries in the world? The course goal is to provide students with important concepts so as to gain a better understanding of processes in Africa and the problems that in some fashion or other account for the continent’s current marginality in the world and persistent underdevelopment. In addition, the course exposes students to the application and usefulness of general theories of development in comparative politics. Prerequisites: INTS 1500 and INTS 1700.
INTS 3600 International Monetary Relations (4 Credits)
We investigate the operation and evolution of today's international monetary system; the course will investigate both the politics and economics of international monetary negotiations, and will examine several key public policy debates that concern governments and investors around the world. The course will be an introduction to these timely and important issues, and will be organized around lecture, class debates, and discussion. Prerequisites: ECON 1020, INTS 1500 and INTS 1700.

INTS 3621 Comparative Democracies in Western Europe (4 Credits)
This course is a comparative study of democratic governments in Western Europe and how these polities are structured and function, particularly with regard to the regulation of conflict. Democracy is the institutionalization of conflict, but democratic regimes vary with regard to the ways that they structure the arenas within which conflict is expressed. Presidential vs. parliamentary systems, as well as fragmented multi-party systems vs. majoritarian two-party systems, for example, are extremely important distinctions that have important consequences for the nature of politics within a society. So, too, are the nature of political parties and the dynamics of party systems and the shape and structure of the public opinion and major political attitudes. The study of Western Democratic polities, however, requires some retrospective historical analysis of the nature of the conflicts emerging since the creation of the Modern States. Many of the present conflicts in Contemporary Democratic Regimes are still legacies from the long lasting and conflictual emergence of the contemporary States. We also spend some time in analyzing retrospectively. Prerequisites: INTS 1500 and INTS 1700.

INTS 3630 Global Environment (4 Credits)
The linkages between social change, economic change and alterations to ecosystems have been apparent, if not overtly acknowledged, throughout history. It was not until 1987, however, with the publication of Our Common Future, that such linkages were couched in terms of development and explicitly placed on the international development agenda. The idea appears simple—environmental change, patterns of social change and economic development, social and political factors operate together and impact local, national, regional and global ecosystems. But impacts of the change in any one sector are seldom confined within national boundaries. How then does one address environmental issues across different regulatory, political, institutional and geographic scales? This course examines the connectivity between diverse elements of our planet’s ecosystem, explores how a change in one element can have immediate and long-term impacts across local and global territory, and looks at strategies to create greater harmony across environmental, social, political and economic interests. Prerequisites: INTS 1500 and INTS 1700.

INTS 3660 States in Transition and European Integration (4 Credits)
This course examines states in transition in Europe and on its periphery. The central question the course asks is why, looking across the post-communist world, many states have joined the European Union and also the North Atlantic Treaty Organizations, while many others have held on to authoritarian means or rule or have been party to armed conflict. While Poland, the Czech Republic, Slovakia and the Baltic States have acclimated themselves to many European Union rules relatively smoothly, Hungary has become the least democratic state in the Union. At the same time, Georgia, Ukraine and Russia are embroiled in protracted and in some ways interrelated conflicts, with democratic consolidation either seriously compromised or not even on the agenda. This course examines these diverging trends, drawing on a range of international relations and comparative politics approaches to explain highly variable outcomes across the region. Prerequisites: INTS 1500 and INTS 1700.

INTS 3670 Sustainable Development and Tourism (4 Credits)
In 2006, a record 846 million tourists travelled internationally spending US $733 billion in their travels. This course explores the motivation behind developing the tourism industry, especially in low and middle income regions, and examines the diverse outcomes of the same. The central question we address is whether or not tourism is a viable means of creating and sustaining improvements in the quality of life for host communities. Case studies include eco-tourism, island tourism, medical tourism, and sex tourism. Prerequisites: INTS 1500 and INTS 1700.

INTS 3692 Conflict Resolution (4 Credits)
Ending conflict is one of the great dreams and great challenges facing the global community today. This course examines approaches to mitigating and ending inter- and intra-state conflict. This course looks at the short and long term diplomatic and military strategies used to end conflict, and then explores the social, economic, and psychological tools available not only to end hostilities, but to build lasting peace. Prerequisites: INTS 1500 and INTS 1700.

INTS 3701 Topics in Int’l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3702 Topics in Int’l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3703 Topics in Int’l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3705 Topics in Int’l Studies (1-5 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3708 Topics in Int’l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.
INTS 3731 Comparative Health Care Policy (4 Credits)
Regardless of who we are, where we live, and what we believe, we are all born, we all age, and at various points in time, we all get sick thus making health a universal concern and a universal human right. While our concern about health may be universal, the experience of sickness and health is not. The reality of limited human and fiscal resources for health care provision creates a diverse landscape of choice and outcomes. Globally, nations are confronting a health care crisis as policy makers consider trade-offs between differing paradigms of public responsibility and resource allocation. A central concern for public policy is thus, "At what cost, health?" It is with this in mind that we explore dominant models of health care financing and delivery. We first look at the ethical, philosophical, and economic questions that underpin public healthcare policy. We then explore the specific models of health care financing and delivery currently used in the United States. Next, we compare the principles and mechanisms of health care in the U.S. to those in the United Kingdom. We conclude by examining pluralistic health care (and change) in the context of resource-poor nations. Prerequisites: INTS 1500 and INTS 1700.

INTS 3762 Contemporary Russia (4 Credits)
This course will offer an understanding of the politics, economics and society in transition in contemporary Russia. A review of the Soviet past is incorporated, but it will concentrate mainly on understanding the dynamics of the post-Soviet era. Prerequisites: INTS 1500 and INTS 1700.

INTS 3775 Introduction to International Law (4 Credits)
This course is an introduction to the basic principles and structures of international law, the history and development of the international legal system, the sources of international law, the interplay between the laws of nation-states and international legal principles, the roles play by multistate organizations, including the United Nations, regional customs unions and non-state actors such as non-governmental organizations and multinational corporations. This course will map out rules and methods of international legal agreement, treaty and contract interpretation and dispute resolution and the principles of state immunity and responsibility. Finally, this course will focus on the major areas in which international law is made and relied upon, and disputed, including criminal proceedings, international trade and commerce, international human rights, environmental policy, and this use of force. Prerequisites: INTS 1500 and INTS 1700.

INTS 3780 The Ethical Foundations of the Global Economy (4 Credits)
This course explores the ethics that underlie the most pressing debates today in global economic policymaking. Most people know that economists typically endorse the policy of "free trade," or the outcome of "economic growth." Indeed, economists advocate these so often that it seems self-evident that these are obviously desirable. But why is this so? What is the ethical grounding for the economist's stance on these matters? Unfortunately, economists themselves don't often explore the ethical foundations that underlie their policy perspectives. They typically write as if these foundations are obviously correct and beyond doubt. But in fact, the ethical foundations of economics are hotly contested—both within economics and in philosophy and other disciplines. This course is intended to help students make ethical sense of contemporary global economic policy debates. To that end, we move back and forth between abstract theoretical debates (in economics and philosophy) and concrete, applied policy matters. For instance, we examine the current debate over "free trade" versus "fair trade." We see why most advocates for labor, women's and human rights and most environmentalists demand fair trade, and why most neoclassical economists reject these claims and instead advocate free trade. Prerequisites: INTS 1500 and INTS 1700.

INTS 3820 United Nations (4 Credits)
This course provides an introduction to the United Nations and related agencies and programs. It examines the background and institutional arrangements of the UN System but gives special attention to the activities of the UN designed to advance peace and security. Case studies of UN responses to recent crises in Asia, Africa, Europe and the Western Hemisphere will be included. Prerequisites: INTS 1500 and INTS 1700.

INTS 3850 Foreign Aid, Debt and Development (4 Credits)
This course analyzes third world debt relief including the role of major powers, the World Bank and IMF in creating debt and the relationship between debt relief and poverty alleviation. The effects of debt relief upon globalization issues are also covered. Prerequisites: INTS 1500 and INTS 1700.

INTS 3900 Global Humanitarianism (4 Credits)
The purpose of this course is four-fold: (1) to provide an overview of the diverse array of events (both human-caused and natural) that trigger humanitarian responses; (2) to detail the methods used by first- and second-responders, as well as other humanitarians, as they deal with disasters; (3) to detail the methods used by human service professionals as they assist migrants and refugees; and (4) to present the theories and premises essential to social science's analyses of global humanitarianism. Therefore, extremely well-known "bellwether events" such as the 2001 attacks on New York, the 2004 Southeast Asian tsunami and 2005's Hurricane Katrina are covered in depth. Less well-known events, such as New York's "triangle fire," the Bhopal gas explosion and the Longmont, Colorado airliner bombing are also considered. Events associated with warfare, especially the forcible displacement of refugees, are essential. Class lectures and readings are grounded in understandings of human rights, community development and social service. Humanitarian intervention (that is, civil-military cooperation in relief) is considered in places as diverse as East Timor and Romania. Another key to the course is the discussion of "practitioner profiles," i.e., the careers of humanitarians working in various settings worldwide, and the discussion of "institutional profiles," i.e., the operations of organizations such as the Red Cross and FEMA. Overseas case studies (Bosnia, Sudan, Ethiopia, El Salvador, Indonesia and the U.S.) are also used. Prerequisites: INTS 1500 and INTS 1700.

INTS 3952 Human Rights in the Global World (4 Credits)
This course will examine the nature, utility and effectiveness of international efforts to define, promote and protect human rights. Particular attention will be given to activities of the United Nations and related programs and agencies. The roles of governments, regional intergovernmental organizations and nongovernmental organizations will also be explored. Prerequisites: INTS 1500 and INTS 1700.
INTS 3975 Data Science in International Relations (4 Credits)
Students will use research methods and data science tools to describe, analyze, and evaluate contemporary topics in international security. We will use the R statistical programming language to generate descriptive statistics, visualizations, and basic inferential statistics while using data on international conflict, human security, trade, development, and many other topics relevant to INTS. The course will culminate in a group presentation and report on a specific topic related to international studies. These tools will help equip students for additional coursework, research, and careers that use data science and quantitative analysis. Prerequisites: INTS 1500, INTS 1700 and INTS 2975 (Global Issues Research Practicum) are required, or the consent of the instructor. There is no prerequisite in terms of statistics or computer science, but students should be willing to engage with new and challenging content.

INTS 3980 Internships in International Studies (0-4 Credits)
Experience is an important asset when applying for any job. As you will find after graduation, the job market is incredibly competitive, and becoming more so. Gaining real world experience during college will make you a much stronger candidate when seeking that first position after graduation. Through INTS 3980, you have the opportunity to earn between 0 and 5 quarter credit hours for internships of 100 hours or more. The internship portfolio facilitates a student's academic, professional, and personal growth by providing documentation and representation of the internship experience. Elements of the portfolio will help bridge academic experience with career possibilities, and provides an opportunity for self-reflection through your experience. Analysis of your internship will help identify areas of success and points where you could improve overall. The objective of all aspects is to enable you to be more competitive in a global job market. Internships require departmental approval and must be undertaken during the quarter in which you register for credit. The BA program in INTS will not award credit retroactively for internships completed prior to the quarter in which students are registered. Prerequisites: Must be an INTS major and receive departmental permission.

INTS 3990 Thesis (4 Credits)
The thesis project is an original contribution to the understanding of issues relevant to international studies and to at least one of the concentration areas in international studies. The thesis must feature original research; that is, it must critically investigate a theoretically informed hypothesis, using sources to support an evaluation of the research question. The thesis must show clearly the following elements: excellent critical thinking and writing quality, coherent presentation, and adherence to the general guidelines set forth by the faculty advisor. Prerequisites: Must be an INTS major and receive departmental permission.

INTS 3991 Independent Study (1-8 Credits)
In-depth study of a particular issue under the guidance of a professor. Prerequisite: prior agreement with department and permission from registrar.

INTS 3992 Directed Study (1-8 Credits)

INTS 4706 Topics in Int'l Studies (1-4 Credits)

Internationalization
The University of Denver's emphasis on internationalization reflects a cosmopolitan engagement with a complex and connected world that is grounded in our local intercultural diversity. The Office of Internationalization provides leadership and support for the University of Denver community by mobilizing international and intercultural resources locally and abroad, in cooperation with academic and administrative units. The offices and programs in Internationalization provide the knowledge and tools to shape responsible members of a community whose perspectives are local, regional, and international. Courses available for undergraduate credit through the Office of Internationalization and the Center for World Languages & Courses build competencies that connect the local to the global, cultivating critical thinking, learning, and intercultural understanding from the multiple perspectives that serious international engagement offers. Courses intersecting with study abroad focus on identity, globalization, and cross-cultural communication to contextualize international experiential learning. Directed independent, hybrid and strategic partner online language study offers students the opportunity to study less commonly taught languages and cultures.

Courses
INTZ 1101 Swedish as a Foreign Language: Level 1 (Lund SFSA11) (4 Credits)
This course is an introduction to the Swedish Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Sweden and Swedish society aim to facilitate students' transition into study abroad. This course is delivered synchronously via an online meeting software platform, such as Zoom, by a Swedish as a Foreign Language instructor at Lund University in Sweden. Students engage as a class remotely through both audio and video connection; students receive login instructions prior to week 1. Remote attendance and participation during class sessions is mandatory. NOTE: This course is offered for elective credit only. Successful completion of this course prepares students to register for Swedish as a Foreign Language: Level 2 (SFSA12) at Lund University.

INTZ 1201 Korean: Beginning Level 1 (4 Credits)
This course is an introduction to the Korean Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Korean society aim to facilitate students' transition into study abroad. This is a hybrid course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Korean Instructor at the University of Western Australia and face-to-face classes with a Korean Teaching Assistant on campus at DU. Attendance in both remote and in-person class sessions is mandatory.
INTZ 1234 Directed Independent Language Study: Yoruba (4 Credits)
Directed Independent Language Study (DILS): Yoruba provides students the opportunity to study Yoruba language and culture. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students with cultural, academic and professional interests in Nigeria, Benin and/or the Yoruba language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1255 Directed Independent Language Study: Swahili (4 Credits)
Directed Independent Language Study (DILS): Swahili provides students the opportunity to study Swahili (Kiswahili) language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in the African Great Lakes region and the Swahili Coast, as well as those with cultural, academic and professional interests in the Swahili language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1301 Portuguese: Beginning Level 1 (4 Credits)
This course is an introduction to the Portuguese Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Portuguese and Brazilian society aim to facilitate students' transition into study abroad. This is an online course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Portuguese Instructor at the Universidade Catolica Portuguesa. Attendance at remote class sessions is mandatory.

INTZ 1891 Directed Independent Language Study: Hindi (4 Credits)
Directed Independent Language Study (DILS): Hindi provides students the opportunity to study Hindi language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in India, as well as those with cultural, academic and professional interests in the Hindi language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1946 Directed Independent Language Study: Swedish (4 Credits)
Directed Independent Language Study (DILS): Swedish provides students the opportunity to study Swedish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Sweden, as well as those with cultural, academic and professional interests in the Swedish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1955 Directed Independent Language Study: Portuguese (4 Credits)
Directed Independent Language Study (DILS): Portuguese provides students the opportunity to study Portuguese language and Portuguese-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Brazil or Portugal, as well as those with cultural, academic and professional interests in the Portuguese language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1982 Directed Independent Language Study: Korean (4 Credits)
Directed Independent Language Study (DILS): Korean provides students the opportunity to study Korean language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in South Korea, as well as those with cultural, academic and professional interests in the Korean language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).
INTZ 1990 Directed Independent Language Study: Turkish (4 Credits)
Directed Independent Language Study (DILS): Turkish provides students the opportunity to study Turkish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Turkey, as well as those with cultural, academic and professional interests in the Turkish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 2501 Exploring Global Citizenship (1-2 Credits)
Examining questions of identity, globalization, and cross-cultural communication, this course is required of all students at DU intending to study abroad. The intent of the class is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken within the year prior to study abroad and is followed while abroad by the second course in the sequence, INTZ 2502, also required for students on unaffiliated programs. This is a 2 credit course. To take the course for 1 credit, students must provide documentation forwarded by academic and major advisor(s) directly to the course director that they have not been able to nor would be able to take the course for 2 credits prior to study abroad based on required (non-elective) course selection for the entire year prior. The department will then review the materials and determine whether the petition process is warranted.

INTZ 2502 Global Citizenship in Practice: Maximizing Study Abroad (1 Credit)
Examining questions of identity, globalization, and cross-cultural communication, this is a pilot course that may eventually be required of all students at DU to be taken while studying abroad. The intent of the course is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken during a student’s study abroad experience and is preceded by INTZ 2501.

INTZ 2700 Topics in Cultures and Languages Across the Curriculum (1-2 Credits)
Cultures and Languages Across the Curriculum (CLAC) provides students the opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major course, students will discuss the content in the target language extending their intercultural and international perspectives on the course content, as well as maintaining and enriching their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

INTZ 3700 Topics in Culture and Language Across the Curriculum (1-2 Credits)
Cultures and Languages Across the Curriculum (CLAC) provides students an opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major “parent” course, students discuss course content in the target language. Students extend their intercultural and international perspectives on the course content, as well as maintain and enrich their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

Judaic Studies
Office: Sturm Hall, Suite 157
Mail Code: 2000 E. Asbury Avenue, Denver CO 80208
Phone: 303-871-3020
Email: cjs@du.edu
Web Site: http://www.du.edu/ahss/cjs

The Center for Judaic Studies (http://www.du.edu/ahss/cjs) (CJS) is a vibrant source of in-depth Jewish learning on campus and across Colorado. Our faculty are research and teaching experts in a wide range of interdisciplinary areas of Judaic Studies. Their work is internationally recognized, and they offer an impressive annual lineup of undergraduate and graduate courses in fields of Jewish history, religion, language, literature, philosophy, film, and culture.

In addition to being home to our own faculty experts (http://www.du.edu/ahss/cjs/facultystaff), CJS hosts annual visiting scholars, performing artists, authors, poets and filmmakers from around the world.

We offer a minor in Judaic studies, and a number of joint MA and PhD degrees with programs across campus. We are home to the Holocaust Awareness Institute, the Holocaust Memorial Social Action Site and The Rocky Mountain Jewish Historical Society. We also serve the broader community through many annual events and co-sponsored activities across Colorado.

The Judaic Studies program combines courses in Judaic studies (JUST), English (ENGL), Hebrew (HEBR), History (HIST), Philosophy (PHIL) and Religious Studies (RLGS) to give students a well-rounded perspective on Jewish culture, thought and history.
Judaic Studies

Minor Requirements

There are two core requirements to complete the Judaic studies minor:

1. Students must demonstrate proficiency in the Hebrew language equivalent to one year (HEBR 1001, HEBR 1002, HEBR 1003).
2. Students must complete at least 20 credits of approved Judaic studies courses. Sixteen of those credits must be at the 2000 level or above.

The Judaic studies program combines courses from several disciplines and departments. We encourage you to combine courses that reflect the interdisciplinary nature of our program, choosing from the various departments represented by our faculty.

Students may also choose a minor in Judaic studies with an emphasis in Hebrew. For this option, students complete the minor requirements listed above by taking HEBR 2001, HEBR 2002, and HEBR 2003 toward their additional 20 credits of approved Judaic Studies courses. (*Note: While HEBR 2001, HEBR 2002 and HEBR 2003 are not JUST cross-listed, they count as approved Judaic Studies courses).

Since the Judaic Studies minor includes Hebrew study, CJS works in partnership with the Department of Languages & Literatures at DU where the Hebrew program is housed. For more information about the Hebrew program, please see the Languages and Literatures Department (p. 324).

Hebrew Courses

HEBR 1001 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence.

HEBR 1002 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1001 or equivalent.

HEBR 1003 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1002 or equivalent.

HEBR 2001 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 1003 or equivalent.

HEBR 2002 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2001 or equivalent.

HEBR 2003 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2002 or equivalent.

HEBR 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)
The course goals are three-fold: a) to facilitate students’ communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students’ knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with JUST 2745. Prerequisite: HEBR 2003 or equivalent.

HEBR 3010 Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion (4 Credits)
This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with JUST 3010. Prerequisite: HEBR/JUST 2003.

HEBR 3701 Hebrew Readings (1-4 Credits)
Selected authors or genres in Hebrew literature. Prerequisite: JUST/HEBR 2003 or equivalent, or instructor's permission.

HEBR 3991 Independent Study (1-5 Credits)

HEBR 3992 Directed Study (1-4 Credits)

Judaic Studies Courses

JUST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with HIST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with HIST 1610.

JUST 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week’s speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre’s non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and RLGS 2014.

JUST 2016 Contemporary Israeli-Palestinian Conflict, 2000-Today (4 Credits)
This course deals with the political, religious, and social dimensions of the Israeli-Palestinian conflict from the failure of the Oslo Accords to the present. It provides students with a brief overview of the history and key issues in the conflict, turning to domestic, regional, and global developments, allegiances, and enmities – political, religious, and economic – that have shaped the past 15+ years of conflict. At a time when even optimistic observers call the two-state solution a vain hope, this course concludes with a look at viable approaches for domestically and internationally acceptable peace plans. This course is cross-listed with JUST 2016 and RLGS 2016.

JUST 2026 Race: Black, Jew, Other (4 Credits)
This course is cross-listed with PHIL 2026 and RLGS 2026. In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses/practices to a range of other anti-Other discourses/practices at play in the world around us.

JUST 2030 Spaces of Memory: Texts and Contexts of Argentina’s Dirty War (4 Credits)
From 1976-1983, the Argentine military government engaged in a campaign of terror against its citizens, some of whom were suspected of disidence and subversion while many others were considered a threat "by association" to the stability of the regime. It is estimated that during the seven years of this "Dirty War" some 30,000 civilians were "disappeared," abducted by the government and sent to secret spaces where they were detained, tortured, and eventually killed. This course, taught in Buenos Aires, explores the construction of memory in both texts and physical spaces touched by the violence, repression and disappearance in Argentina. It will further examine anti-Semitism during the military dictatorship. While at the time of the military Junta, the Jewish population of Argentina was estimated at just over 1% and it accounted for an estimated 10% of those who disappeared during the "Dirty War." The report of the National Commission of the Disappeared (CONADEP) attests to a particular brutality in the treatment of prisoners of Jewish origin, as Jews were not only tortured, but the torture they were subjected to often took on an anti-Semitic form. We will also examine the role of memory in reconstructing discourses; testimonial literature and the modern and postmodern views of representation; narratives of exile and dispersion; and points of convergence between this literature and other survivor testimonial narratives, particularly those of the Shoah. We will have the opportunity to meet with writers and activists whose work is informed by the atrocities of the "Dirty War," and visit the Organization of the Mothers of the Plaza de Mayo, and public spaces of memory, such as the Parque de la Memoria, the ESMA, the AMIA building, the Baldosas, etc.

JUST 2040 Israel Between Wars: History and Society (4 Credits)
Through historical sources, documentaries, movies and scholarly research, this course examines the major wars and clashes between Israel and its neighbors in the years 1948 to 2011. In this way, we examine in depth the complexities of Israel's relationship with their Arab neighbor states with a particular focus on the details of the Israeli-Palestinian conflict. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadaya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2050.

JUST 2070 American Jewish Experience (4 Credits)
In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry’s religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life. Cross-listed with ANTH 2070 and RLGS 2070.

JUST 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and RLGS 2104.

JUST 2107 Culture and Conscience in Vienna (4 Credits)
This course focuses on the cultural and social history of the city of Vienna as the hub of politics, cultural, and religion for Central Europe with special attention to its religious heritage as the seedbed for its rich cultural traditions. The course examines how the city’s religious heritage, particularly Judaism, shaped its rich cultural heritage and the birth of modernism. A special segment of the course is devoted to the Nazi period and the Holocaust, including a study of the resistance of religious groups. The course concludes with a history of the post-Nazi period with attention to the development of Vienna as the hub of international social justice projects. The class is taught in seminar format and combines lectures with site visits to major cultural and historical sites around the city. The course consists of a weekly colloquium that discusses in a moderated format the implications, religious, social and cultural issues, and common experiences of students engaged in international service learning as part of a faculty-led international service learning quarter-long program in Vienna, Austria. Cross listed with HIST 2107, RLGS 2107.

JUST 2201 Introduction to the Hebrew Bible (4 Credits)
The legacy of the Hebrew Bible has been great for both Western and world culture. In this course, we read the books of the Hebrew Bible critically as literature, as religious text and as a source of sociological knowledge. The students gain a general overview of the narrative and historical development of the text while simultaneously being introduced to the various modes of biblical interpretation. Emphasis is placed on situating the literature and religious expression of the Bible within its ancient Near Eastern milieu. Cross listed with RLGS 2201.

JUST 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2202.

JUST 2242 American Jewish History (4 Credits)
This course will explore how the American Jewish experience developed and changed over time, from the colonial period to modern times. It will begin with the first group of Jews who arrived in 1654 in what is now New York and focus on successive waves of immigration, continuing through World War II, and the post-war period. We will explore the varied ways in which the immigrants and subsequent generations constructed their American Jewish identities, as well as such pivotal issues as acculturation, assimilation, and ethnic tensions. One of the major goals of the course is to encourage clear and effective writing, as well as to expose students to primary and secondary sources and offer tools to help evaluate evidence. Primary source materials relevant to each unit will be analyzed and reviewed at each class session. Cross listed with HIST 2242.

JUST 2245 History of the Modern Jewish Experience (4 Credits)
Concepts, documents, movements and practices of modern Jewish history. Cross listed with HIST 2245.

JUST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of the peoples in Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics in the mid to late 20th century, Israel’s military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross-listed with HIST 2300.
JUST 2310 The Modern Middle East: 1798-1991 (4 Credits)
This course traces the history and development of the modern Middle East from Napoleon's invasion of Egypt in 1798 through the First Gulf War in 1991. We pay special attention to the impact of colonialism and Great Power diplomacy on the region. Cross listed with HIST 2310.

JUST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women's education, political activism, and labor.

JUST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2320.

JUST 2350 Israeli Culture Through Film: Society, Ethnicity, and Inter-Cultural Discourse (4 Credits)
This course presents Israeli society and culture development as reflected in Israeli films from the 1950s to present day Israel. Topics include history and collective memory, ethnicities and the experiences of immigration, Israelis in their spatial Mediterranean/Middle-Eastern context and Judaism in its old and new representations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)
This course analyzes fundamental aspects of Israeli-Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

JUST 2410 Religious Diversity in Israel (4 Credits)
Through religious, sociological and historical sources, as well as documentaries, movies and scholarly readings, this course examines religious diversity in Israel since its establishment in 1948 to current events today. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2410.

JUST 2700 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2701 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2702 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2704 Topics in Judaic Studies (4 Credits)
Topics vary, reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2741 American Jewish Literature (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.

JUST 2742 Modern Hebrew Literature (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the soil political, and historically changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with ENGL 2743.
JUST 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)
The course goals are three-fold: a) to facilitate students’ communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students’ knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with HEBR 2745. Prerequisite: HEBR 2003 or equivalent.

JUST 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2991 Independent Study (1-5 Credits)

JUST 3000 Judaism (4 Credits)
A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with RLGS 3001.

JUST 3002 Creation & Humanity (4 Credits)
Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity’s role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity's relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

JUST 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)
The “Abrahamic Traditions” (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions – Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with RLGS 3003.

JUST 3010 Aspects of Modern Hebrew (4 Credits)
This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with HEBR 3010. Prerequisite: HEBR 2003 or equivalent.

JUST 3023 Great Thinkers: Maimonides-Politics, Prophecy and Providence (4 Credits)
Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on: principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and RLGS 3023. Prerequisite: junior standing or instructor’s permission.

JUST 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)
Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides’ core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics"?; God’s unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God’s ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect, the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God.” In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with PHIL 3024 and RLGS 3024. Prerequisite: Junior standing or instructor’s permission.
JUST 3026 Levinas and the Political (4 Credits)
Emmanuel Levinas (1906-1995), famous for his arresting insight of "ethics as first philosophy," is a key figure in the histories of phenomenology, metaphysics, and theology. In this course, we examine the implications of Levinas' thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as "Reflections on the Philosophy of Hitlerism" (1934), Totality and Infinity (1961), Otherwise Than Being or Beyond Essence (1974), and "Peace and Proximity" (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other "Jewish theologies" of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hostilities and strangers, friends and enemies; liberalism, socialism, fascism; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporalities of covenant and justice; fraternity; forgiveness and its limits; "the 3rd"; rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

JUST 3086 The Emergence of Monotheism (4 Credits)
This course is cross-listed with RLGS 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

JUST 3090 God and Giving? Religion and Philanthropy in America (4 Credits)
This course is cross-listed with ANTH 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

JUST 3102 Early Judaism (4 Credits)
This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with RLGS 3102.

JUST 3146 Great Thinkers: Levinas (4 Credits)
Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, Ethics and Infinity and Otherwise Than Being or Beyond Essence, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with PHIL 3146.

JUST 3150 The Bible and the Dead Sea Scrolls (4 Credits)
This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with RLGS 3150. Prerequisites: One year of Hebrew language or equivalent or by special permission of the instructor.

JUST 3151 Dead Sea Scrolls (4 Credits)
The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with RLGS 3151.
JUST 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)
Neoplatonism is a unique genre - somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we investigate a host of philosophical writings, including the Theology of Aristotle and the Liber de Causis, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Avicenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection, and the call to virtue. Cross listed with PHIL 3152. Prerequisite: junior standing or instructor’s permission.

JUST 3215 Modern Jewish Philosophy (4 Credits)
Covering a range of modern thinkers from the seventeenth to the late-twentieth century, topics include reason and revelation, human autonomy and responsibility, aesthetics, post-Holocaust theology, responses to Kant, responses to Heidegger, ethics, and the quest for authenticity. Cross listed with PHIL 3215. Prerequisite: junior standing or instructor permission.

JUST 3405 Postmodern Visions of Israel (4 Credits)
This course investigates how representations of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual “multiverses.” A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. This course is cross-listed with ENGL 3405.

JUST 3600 United States - Israeli Relations, 1948-Present (4 Credits)
This course deals with the history of United States-Israel relations from 1948 - 2011. Some of the key topics covered include: the U.S. decision to recognize Israel; cultural foundations for U.S. support of Israel; Christian Zionism; the origins of the U.S.-Israeli "Special Relationship"; the Cold War in the Middle East; U.S. peacemaking successes and failures; the role of the pro-Israeli lobby; and the impact of September 11, 2001 on U.S.-Israeli relations. Cross listed with HIST 3600.

JUST 3700 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3702 Colloquium in Jewish Studies (1-4 Credits)
Topics in Judaic Studies reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3703 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3704 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3740 Bodies and Souls (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)value sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, RLGS 3740.

JUST 3742 Jesus in Jewish Literature (4 Credits)
This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture’s engagement with Jesus’ life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as ENGL 3742.

JUST 3743 Modern Jewish Literature (4 Credits)
Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with ENGL 3743.

JUST 3890 Religion and Diaspora (4 Credits)
When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with RLGS 3890.
JUST 3891 Justice: A Biblical Perspective (4 Credits)
This course explores the ways in which the Bible has been applied to questions of social justice in contemporary society. In addition to studying major theological and philosophical theories of justice, students read a variety of biblical texts related to major issues of social and economic justice such as world hunger, the poor, revolution, just war theory and pacifism, environmentalism, and the role of government. This course includes a service-learning component. Cross listed with RLGS 3891.

JUST 3982 Internship (1-5 Credits)
JUST 3991 Independent Study (1-5 Credits)
Prerequisites: HEBR 1003 or JUST 1003 or equivalent and instructor's permission.
JUST 3992 Directed Study (1-5 Credits)

Languages and Literatures
Office: Sturm Hall, Room 391
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2662
Email: langlit@du.edu
Web Site: http://www.du.edu/ahss/langlit

The Department of Languages and Literatures provides instruction in an array of languages and literatures at the basic and advanced levels. Programs are designed to immerse students in the speech and thought of other nations and in their cultural and literary heritages.

Our mission is to educate by developing and refining linguistic and intellectual abilities that permit our students to engage with us in advancing scholarly inquiry, in cultivating critical and creative thought and in generating knowledge that at once discovers, respects and transcends differences. New and exciting cultures “come to life” when we study another language and increased cultural awareness provides for enriched interpersonal exchanges and experiences. By learning to respect and appreciate different ethnic and cultural values, students gain a new perspective of their own cultures, understanding them in a whole new way. Learning a new language helps students build relationships with people all over the world, discover unique histories and traditions and experience international films, music and literature in the original language.

Major and minor programs are offered in French, German, Italian, Russian and Spanish. Minors are available in Chinese and Japanese as well and, by tutorial arrangements, in Hebrew and Latin. Undergraduate offerings also include course work in Arabic and (tutorial) classical Greek. The overwhelming majority of our students take advantage of DU’s unique Cherrington Global Scholars program to study abroad at universities in Europe and Latin America, East Asia and Africa. DU maintains bilateral exchange relationships with the University of Tübingen and the University of Bologna and also participates in the International Student Exchange Program that permits study at scores of universities worldwide.

Not only in classes taught by experienced, dedicated teacher-scholars who use innovative teaching techniques, but also outside the classroom, our undergraduates experience a strong sense of enthusiasm and community both among themselves and with their instructors. Senior faculty are involved at every level of instruction as well as in student advising and mentoring.

Alumni of the department have pursued diverse international careers immediately upon graduation or have undertaken post-graduate studies, often with fellowships (e.g., Fulbright, Guggenheim), in a variety of academic and professional fields. Among institutions to which they have recently gone are American University, George Washington University, Michigan State University, the University of New Mexico, the University of Pittsburgh, SUNY-Buffalo and the University of Colorado at Boulder; they have also gone overseas to attend the University of Oxford and to Germany with the US Congress-Bundestag Youth Exchange Program (CBYX). Others have gone on to earn advanced degrees in DU’s own excellent graduate schools (business or law, international studies, social work and education). Opportunities for public sector, private sector and NGO careers on five continents are as boundless as an educated student linguist’s ambitions.

Chinese
Minor Requirements
A minimum of 24 credits of approved courses above CHIN 2001. Four credits must be CHIN 3300 or above, or equivalent from study in China. CHIN 1516 Contemporary China in Literature and Films, which partially fulfills the Analytical Inquiry: Society and Culture requirement, can be used for credit toward the minor. Students who study abroad in China are strongly encouraged to enroll in a Chinese course (CHIN 3300 or above) upon their return.

French and Francophone Studies
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))

44 credits of approved courses beyond FREN 1003.

1: Advanced Seminars in the French department are courses FREN 3500 - FREN 3900. These are not ASEM courses.

**German**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

44 credits of approved courses beyond GERM 1003.

Four of these 44 credits must be from GERM 1416. No fewer than eight of these 44 credits must be from 3000-level courses. Students may count one additional course in English on German culture, history or literature toward the major. Students majoring in German are encouraged to study abroad in Germany. Majors who choose to study abroad in Germany are strongly encouraged to enroll in a German course upon their return.

**Secondary Major Requirements**

44 credits. Same requirements as for BA degree.
Minor Requirements
A minimum of 24 credits of approved courses beyond GERM 1003. Four of these 24 credits must be from GERM 1416. Students who minor in German are encouraged to study abroad in Germany. Minors who choose to study abroad in Germany are strongly encouraged to enroll in a German course upon their return.

Hebrew
Minor Requirements
A minimum of 20 credits of study beyond HEBR 1003.

Italian
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))
44 credits of approved courses beyond ITAL 1003.

Four of these 44 credits must be from ITAL 2500 or ITAL 3010. No fewer than eight of these 44 credits must be from 3000-level Italian topics courses. Students may count one course taught in English on Italian culture, history or literature toward the major. Students who major in Italian are encouraged to study abroad in Italy. Credits earned from classes in Italy that have been approved by the faculty are counted as DU credits toward an Italian major. Majors who choose to study abroad in Italy are strongly encouraged to enroll in an Italian course upon their return.

Secondary Major Requirements
44 credits. Same requirements as for BA degree.

Minor Requirements
A minimum of 24 credits of approved courses beyond ITAL 1003. No fewer than four of these 24 credits must be from a course in Italian at the 3000 level. Students may count one course taught in English on Italian culture, history or literature toward the minor. Students who minor in Italian are encouraged to study abroad in Italy. Credits earned from classes in Italy that have been approved by the faculty are counted as DU credits toward the Italian minor. Minors who choose to study abroad in Italy are strongly encouraged to enroll in an Italian course upon their return.

Japanese
Minor Requirements
A minimum of 24 credits of approved courses. 20 credits must be language classes beyond JAPN 2001. One course must be JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture.

Latin
Minor Requirements
A minimum of 20 credits of study beyond LATN 1003.

Russian
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))
44 credits of approved courses beyond RUSS 1003.

Requirements include two 3000-level courses and RUSS 3101; students are encouraged to take either RUSS 1416 or RUSS 2416 for credit in the major. Study abroad in Russia through the Cherrington Global Scholars Program and a service learning/internship in Denver's Russian-speaking community, though not required, are strongly encouraged. The number of credits earned through these experiences is established by agreement with faculty in Russian and is subject to institutional requirements.

Secondary Major Requirements
44 credits. Same requirements as for BA degree.
Minor Requirements
A minimum of 24 credits of approved courses beyond RUSS 1003, including one 3000-level course; students are encouraged to take either RUSS 1416 or RUSS 2416 for credit in the minor. Study abroad in Russia through the Cherrington Global Scholars Program and a service learning/internship in Denver’s Russian-speaking community, though not required, are strongly encouraged. The number of credits earned through these experiences is established by agreement with faculty and is subject to institutional requirements.

Spanish
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 76))
44 credits of approved courses above the level of SPAN 2001.

Required courses include SPAN 2100, SPAN 2300, SPAN 2350, and SPAN 3990. SPAN 3990 must be taken at DU and a student must have senior standing and have taken a minimum of 12 credits at the 3000 level prior to enrolling in this course.

Secondary Major Requirements
44 credits. Same requirements as for BA degree.

Minor Requirements
A minimum of 24 credits of courses above the level of SPAN 2001 including SPAN 2100, SPAN 2300, SPAN 2350. A minimum of four credits must be at the 3000 level.

Requirements for Distinction in the Major in French and FrancoPhone Studies
• Minimum 3.2 cumulative GPA
• Minimum 3.6 major GPA
• Completion of a thesis written in French

Requirements for Distinction in the Major in German
• Minimum 3.5 cumulative GPA
• Minimum 3.6 major GPA
• Completion of a thesis

Requirements for Distinction in the Major in Italian
• Minimum 3.5 cumulative GPA
• Minimum 3.5 major GPA
• Completion of a thesis

Requirements for Distinction in the Major in Russian
• Minimum 3.3 cumulative GPA
• Minimum 3.7 major GPA
• Completion of a thesis written in Russian

Requirements for Distinction in the Major in Spanish
• Minimum 3.3 cumulative GPA
• Minimum 3.6 major GPA
• Completion of a thesis

Arabic Courses
ARAB 1001 Elementary Arabic (4 Credits)
Basics of Modern Standard Arabic. Three quarter sequence.

ARAB 1002 Elementary Arabic (4 Credits)
Basics of Modern Standard Arabic. Three quarter sequence. Prerequisite: ARAB 1001 or equivalent.

ARAB 1003 Elementary Arabic (4 Credits)
Basics of Modern Standard Arabic. Three quarter sequence. Prerequisite: ARAB 1002 or equivalent.
ARAB 1992 Directed Study (1-4 Credits)
ARAB 2001 Intermediate Arabic (4 Credits)
Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 1003 or equivalent.

ARAB 2002 Intermediate Arabic (4 Credits)
Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 2001 or equivalent.

ARAB 2100 Conversation & Composition (4 Credits)
This is the third quarter of the second year. Intensive practice in oral skills and grammar review. Writing, discussion and reading based on a topic or topics in Arabic language and culture. Increased attention paid to writing skills. Prerequisite: ARAB 2002, equivalent, or permission of instructor.

ARAB 3700 Topics in Arabic (1-4 Credits)
ARAB 3701 Topics in Arabic (1-4 Credits)
ARAB 3702 Topics in Arabic (1-4 Credits)
ARAB 3703 Topics in Arabic (1-4 Credits)
ARAB 3704 Topics in Arabic (1-4 Credits)

Chinese Courses

CHIN 1001 Elementary Chinese (4 Credits)
Part one of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters.

CHIN 1002 Elementary Chinese (4 Credits)
Part two of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1001, equivalent, or permission of instructor.

CHIN 1003 Elementary Chinese (4 Credits)
Part three of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1002, equivalent, or permission of instructor.

CHIN 1516 Contemporary China in Literature and Films (4 Credits)
This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with ASIA 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.

CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)
Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecocinema and ecoliterature, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

CHIN 1992 Directed Study (1-10 Credits)

CHIN 2001 Intermediate Chinese (4 Credits)
A three quarter sequence of courses continues to build students’ basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 1003, equivalent, or permission of instructor.

CHIN 2002 Intermediate Chinese (4 Credits)
A three quarter sequence of courses continues to build students’ basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2001, equivalent, or permission of instructor.

CHIN 2003 Intermediate Chinese (4 Credits)
A three quarter sequence of courses continues to build students’ basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2002, equivalent, or permission of instructor.
CHIN 2100 Advanced Intermediate Chinese (4 Credits)
This single-quarter course is one of the transitional courses from intermediate Chinese to advanced Chinese. The course materials, while continuing from the CHIN 2001-2002-2003 sequence, give students more opportunities to synthesize vocabulary and grammatical patterns they have learned from previous courses. The introduction of major grammatical patterns is completed by the end of this course. Prerequisite: CHIN 2003, equivalent, or permission of instructor.

CHIN 2301 Chinese Conversation and Composition I (4 Credits)
This single quarter course is particularly designed to develop further students’ speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2100, equivalent, or permission of instructor.

CHIN 2302 Chinese Conversation and Composition II (4 Credits)
This single quarter course is particularly designed to develop further students’ speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2301, equivalent, or permission of instructor.

CH 2992 Directed Study (1-10 Credits)

CHIN 3300 Chinese Society in Transition (4 Credits)
Through studying selected texts and focusing on topics about various aspects of Chinese society in transition, this class aims at strengthening and further developing students’ overall skills, in particular, skills of reading comprehension, presenting information and one's opinions, and debating with other people. Prerequisite: CHIN 2003 plus study in China OR CHIN 2302; or permission of instructor.

CHIN 3400 Chinese Cinema and Chinese Society (4 Credits)
This advanced class is designed to strengthen and to develop further students’ overall proficiency and in-depth understanding of the contemporary societies of greater China, including mainland China, Hong Kong and Taiwan, by means of studying the representative Chinese language films produced in these three areas. Prerequisite: CHIN 2302 or above, equivalent, or permission of instructor.

CHIN 3500 Advanced Reading in Modern Chinese Literature (4 Credits)
This course requires students to read closely and examine critically the many sophisticated and subtle cultural, historical and linguistic aspects of the selected literary works of various genres in modern Chinese literature. Prerequisite: CHIN 3300 and CHIN 3400, equivalent, or permission of instructor.

CHIN 3601 Business Chinese I (4 Credits)
Advanced reading course designated for students who have an advanced level of Chinese language proficiency or who are in their fourth year of a Chinese language curriculum either at the undergraduate or graduate level. Prerequisite: CHIN 2003 plus study in China; or CHIN 2302; or permission of instructor.

CHIN 3650 Chinese-English Translation I (4 Credits)
This seminar is designed for students with advanced-level proficiency in Chinese and English to learn basic translation theories and to develop fundamental skills in translating, from Chinese to English and vice versa, texts which primarily deal with general social needs and everyday communications. Prerequisite: CHIN 3300 or above, equivalent, or permission of instructor.

CHIN 3700 Topics in Chinese Cultural Studies (4 Credits)
Advanced studies of selected topics on Chinese cultural studies. Prerequisite: CHIN 3300, equivalent, or instructor approval.

CHIN 3991 Independent Study (1-5 Credits)

CHIN 3992 Directed Study (1-10 Credits)

French Courses

FREN 1001 Français élémentaire (4 Credits)
Basic grammar, syntax and vocabulary with emphasis on oral skills; introduction to French and Francophone cultures. First quarter in a three quarter sequence.

FREN 1002 Français élémentaire (4 Credits)
Basic grammar, syntax and vocabulary with emphasis on oral skills; introduction to French and Francophone cultures. Second quarter in a three quarter sequence. Prerequisite: FREN 1001 or equivalent.

FREN 1003 Français élémentaire (4 Credits)
Basic grammar, syntax and vocabulary with emphasis on oral skills; introduction to French and Francophone cultures. Third quarter in a three quarter sequence. Prerequisite: FREN 1002 or equivalent.

FREN 1992 Directed Study (1-10 Credits)

FREN 2001 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. First quarter of a three quarter sequence. Prerequisite: FREN 1003 or equivalent.

FREN 2002 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. Second quarter of a three quarter sequence. Prerequisite: FREN 2001 or equivalent.
FREN 2003 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. Third quarter in a three quarter sequence. Prerequisite: FREN 2002 or equivalent.

FREN 2100 Ecrite, lire et parler (4 Credits)
Writing, discussion and reading based on a topic or topics in French and Francophone cultures. Close attention paid to paper-writing skills. Prerequisite: FREN 2003 or equivalent.

FREN 2400 Conversation et composition (4 Credits)
Intensive practice in spoken and written French. All aspects of the course, including vocabulary acquisition, phonetics, structural review, compositions, readings, oral presentations and comprehension exercises are presented through a topical approach to everyday French and Francophone life, literature, and contemporary issues. Prerequisites: FREN 2003 or FREN 2100.

FREN 2500 Qu’est-ce que la littérature? (4 Credits)
Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

FREN 2501 La Nature et les animaux (4 Credits)
Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (La Fontaine) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the “normal” places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course many be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

FREN 2502 La France et ses autres mondes (4 Credits)
In Les Petits garçons naissent aussi des étoiles (1988), a humoristic novel which retraces the history of an anonymous African country from colonization to its present days, Emmanuel Dongala’s narrator relates: “[t]hey ruled over us, ran the country, exploited us, taught us their language, sent us to their schools, gave us new ancestors called Gauls. That’s why we still speak French, love French food, and still like to spend our vacations in France, even if these days it is easier to get visa to the moon than to that country.” This seminar reexamines these well captured relations in Dongala’s novel between France and its “other” worlds. How and why has France built and maintained its empire in Africa, Asia and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers such as Aimé Césaire, Patrice Lumumba, Sékou Touré, Christiane Taubira, Tahar Ben Jelloun, Kim Lefèvre, Samin Nair, Jacques Kane, Isabelle Boni-Claverie and Raoul Peck will help us answer the aforementioned questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afropeanism and Afropolitanism. This course is conducted in French. It counts toward our Analytical Inquiring: Society and Culture. Prerequisite: FREN 2400.

FREN 2503 La Satire (4 Credits)
This course is an introduction to satire in French and Francophone literature. A classical literary technique of denunciation, satire has been recently adopted and adapted in popular televised shows (Les Guignols de l’info in France, Kouthia Show in Senegal, SNL in the US) to recapture important sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as Alioune Badara Bèye's Les Larmes de la patrie, Moussa Absa Sène's Tableau Ferraille and Dieudonné’s Le Président africain, we will analyze why and how authors make use of satire to denounce sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as Alioune Badara Bèye’s Les Larmes de la patrie, Moussa Absa Sène’s Tableau Ferraille and Dieudonné’s Le Président africain, we will analyze why and how authors make use of satire to denounce the most prevailing problems faced by French and Francophone societies at given times of their historical trajectories. Prerequisite: FREN 2400 or its equivalent.

FREN 2504 La Culture au Cinema (4 Credits)
We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of “French” culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

FREN 2701 Sujets spéciaux (4 Credits)
Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.

FREN 2992 Directed Study (1-10 Credits)
A business or community experience related to French language or culture. Opportunity to work with business or community organizations. Prerequisite: FREN 2003 or above.

FREN 3110 La Grammaire à l’oeuvre (4 Credits)
Our most advanced language course, students perfect their knowledge of French grammar in all of its intricacies. Written and oral practice. Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.
FREN 3150 L'Art de la traduction: français-anglais et vice versa (4 Credits)
In this course you will study techniques of translation from French to English and from English to French. There will be lots of practice which will allow a thorough review of French grammar. In addition, by translating texts we become more aware of the complexities of both English and French, and attuned to the working of literary or other styles of language. The course includes some study of theories of translation or commentaries on its cultural implications or its history. There will be time for reflection on the broader implications of translation such as intercultural understanding, differences, the question of what is a “faithful” translation, or the experience of living bilingually or in cultural translation Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.

FREN 3500 Voltaire et Rousseau (4 Credits)
French Enlightenment including Voltaire, Diderot, Rousseau. Prerequisite: FREN 2500 or equivalent.

FREN 3501 L’Afrique aux Antilles (4 Credits)
This seminar examines the literary and political enterprises undertaken by Francophone Caribbean novelists, essayists, filmmakers and artists in re-rooting/routing Africa in the Caribbean. We will particularly focus on how and why the Afro-Caribbean tradition is captured in the distinctive movements of Negritude, Antillanité and Créolité. We will use the latter as viewpoints from which to examine the affective, historical, and political implications of Africa in the social lives of Caribbean people. We will also discuss the visions and stances of these writers and theorists on the Black Experience and the correlations that exist between the historical and the fictional in essays as well as novels and films. The seminar is conducted in French and emphasizes discussion, writing, and critical thinking. Prerequisite: Two courses at the 25XX level.

FREN 3502 Siècle de Louis XIV (4 Credits)
An analytical study of seventeenth-century French theatre in its three greatest exemplars: the tragedies of Corneille and Racine and the comedies of Molière. Prerequisite: FREN 2500.

FREN 3504 Identité et Altérité (4 Credits)
This course offers an examination of the complex notions of Self and Other in contemporary texts in French and Francophone Studies at a crucial time when the political debate on national identity reemerges in the West in general and in France in particular. Two fundamental questions have been at the center of the national debate in France: “Pour vous, qu’est-ce qu’être français aujourd’hui?” [For you, what does it mean to be French today?] and “Quel est l’apport de l’immigration à l’identité nationale?” [What is the contribution of immigration to national identity?]. These “controversial” questions subtly divide France into La France française [French France] and La France étrangère [foreign France]. Our textual and filmic selection features writers and filmmakers from France and the Francophone world who address these aforementioned issues by analyzing the power dynamics between the Self and the Other, the Français/es de souche [People of French descent] and the Immigré/es français/es [French Immigrants].

FREN 3505 Masques du moi (4 Credits)
Qui suis-je?? The question of self, identity, and discovering “who I am” has preoccupied many writers, filmmakers, or other artists. Identity, or one’s sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the “true” facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of “writing the self” represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

FREN 3507 Auteurs classiques (4 Credits)
A comprehensive and analytical study of women authors of France from the Middle Ages to 2000. Prerequisite: two courses beyond 2400.

FREN 3701 Séminaire (4 Credits)
Selected authors, literary movements and genres in French-speaking world. May be repeated for credit. Prerequisite: FREN 2500.

FREN 3980 Internship (1-4 Credits)
FREN 3991 Independent Study (1-4 Credits)
FREN 3992 Directed Study (1-10 Credits)
FREN 3998 Undergraduate Honors Thesis (1-4 Credits)

German Courses
GERM 1001 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. First quarter of three quarter sequence.

GERM 1002 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Second quarter of three quarter sequence. Prerequisite: GERM 1001 or equivalent.

GERM 1003 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Third quarter of three quarter sequence. Prerequisite: GERM 1002 or equivalent.
GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)
This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GERM 2001 Intermediate German (4 Credits)
Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. First quarter of three quarter sequence. Prerequisite: GERM 1003 or equivalent.

GERM 2002 Intermediate German (4 Credits)
Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. Second quarter of three quarter sequence. Prerequisite: GERM 2001 or equivalent.

GERM 2003 Intermediate German (4 Credits)
This course challenges students to continue expanding their vocabulary in German and to increase their fluency in speaking, listening and reading. Students are expected to demonstrate a growing awareness of - and sensitivity to - German culture and express their ideas in a manner consistent with advanced language work. Prerequisite: GERM 2002 or equivalent.

GERM 2022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)
This is an introduction to 20th- and 21st-century German culture, history, and politics through film analysis. Studying the most famous and influential films in the history of German cinema, students explore a wide range of topics (including political propaganda, national identity, multiculturalism, terrorism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GERM 2100 Conversation and Composition (4 Credits)
Intensive practice in oral skills, reading and writing. Prerequisite: GERM 2003 or equivalent.

GERM 2350 German Film (4 Credits)
Analysis of selected films centered on major themes in the humanities. Prerequisite: GERM 2100 or equivalent.

GERM 2701 Topics in German Literature (4 Credits)
Selected authors or movements in literature of the German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent.

GERM 2800 Advanced German Grammar and Composition (4 Credits)
This course offers an in-depth review of advanced grammar structures. Review of grammar in context, as well as practice in composition. Prerequisite: GERM 2100 or equivalent.

GERM 3125 Einigkeit, Recht, Freiheit: German Culture & Society 1815-1871 (4 Credits)
The course examines the impact and aftermath of the French Revolution, Napoleon Bonaparte, and the Wars of Liberation on those German states that until 1806 formed the "Holy Roman Empire of German Nation." The Congress of Vienna in 1815 greatly simplified the political division of Germany, preparing the eventual economic and political unification of Germany in 1871. We trace issues such as freedom, restoration, revolution, and reaction, as well as the rise of socialism. The course closes with the ascent of Otto von Bismarck and German unification in 1871. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3225 Das Kaiserreich: German Culture & Society 1871-1918 (4 Credits)
This course analyzes how, under the leadership of Prussia and Bismarck, Germany emerged as a nation and world power in the late 19th century. We investigate the interplay of politics and culture at a time when German society experienced rapid and drastic changes from an agrarian-based economy to modern industrial capitalism under nationalist tutelage. We study a variety of cultural manifestations and responses to, among other things, industrialization and social reform, urbanization, socialism, Germanization policies, "Kulturkampf" with the Catholic Church, and German colonialism under William II to contextualize the eruption of Europe into World War I that marked, in 1918, the end of the Empire. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3325 Die Weimarer Republik: German Culture & Society 1918-1933 (4 Credits)
This course analyzes how violence, economic and political volatility, technology, and changing moral codes affected German society and culture (literature, visual arts, film and music) from the onset of the First World War to the rise of Nazism. Germany's first experiment in democracy, the Weimar Republic, can be viewed both as a prelude to Fascism (and therefore a failure) and as a period of radical socio-cultural change, experimentation, and even progress. This course is taught primarily in German, but occasionally we discuss particular texts in English. Prerequisite: GERM 2003 or equivalent.
GERM 3425 Nachkriegsdeutschland: German Culture & Society 1945-1990 (4 Credits)
This course introduces the student to crucial aspects of the immediate postwar years: Germany's "Stunde Null"; denazification & reeducation; occupation; 'Americanization' of Germany; 'Berlin Blockade'; the divided memory in East and West Germany; democracy in Germany; the Cold War and 'Berliner Mauer.' Via film, literature, and historical studies we explore how both Germanies (East and West) dealt with the legacy of World War II and the Holocaust. During the first third of the course we have a close look at the concerns of the immediate postwar years 1945-49. Most Germans considered these years of occupation, hunger, homelessness, and despair in a vastly destroyed homeland as much worse than the war that preceded them. Then we investigate critiques of the so-called 'normalization' of Germany's internal and external affairs between the founding of two separate German states and the ensuing 'economic miracle' in West Germany (1949-61). Finally, we trace the development of this 'divided nation' until collapse and reunification in 1989/90. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3525 Die Berliner Republik: German Culture & Society 1990-today (4 Credits)
For roughly two decades, Germany, a once divided nation in the heart of Europe held responsible for two World Wars, has been re-united. Forty years of division between West and East Germany--a division exacerbated by their respective geopolitical roles in the Cold War--left their mark on what many intellectuals considered a 'cultural nation' in spite of their political separation. Our class examines the pains and gains of twenty years of unity. We analyze various political, historical, but mostly cultural developments (and debates) that have accompanied and, at times, questioned this unification. Prerequisite: GERM 2003 or equivalent.

GERM 3625 Business German--From Culture-Shock to Cross-Cultural Competence (4 Credits)
This course is designed to enhance the students' speaking, reading and writing skills, in addition to helping them build a strong foundation in business vocabulary. Course objectives include acquiring skills in cross cultural communication, teamwork, business management, and creating a business plan. German grammar is covered on a need be basis. This course prepares students to perform and contribute while in a German-speaking business environment. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3701 Topics in German Literature (1-4 Credits)
Selected authors, literary movements and genres in German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3991 Independent Study (1-5 Credits)
GERM 3995 Independent Research (1-10 Credits)
GERM 3997 Internship in German (1-4 Credits)
GERM 3998 Honors Thesis in German (1-5 Credits)

Greek Courses

GREK 1001 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor.

GREK 1002 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1001 or equivalent.

GREK 1003 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1002 or equivalent.

GREK 1416 Myths of Greece & Rome (4 Credits)
Introduction to the goddesses and gods, heroes and heroines, and not a few monstrosities from popular tradition, literature, and visual arts of the ancient Greeks and Romans. Activities include imaginative and creative assignments. No prerequisite. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1716 It's Really Epic! The Ancient Heroic Epics of Homer and Virgil in Contemporary Translation (4 Credits)
Foundations of Western values and aspiration, good one and not so good ones, may be found at the beginning of Western/European literature in the "Homicric" epics Iliad and Odyssey. The very notions of "tragedy" and "romance" originate in them. For the past twenty six or seven centuries men and women have wrestled with problems, often moral dilemmas and contradictions, that are first dramatized there. Centuries later, though still two millennia before our time, the Roman poet Virgil confronts the triumphant individualism of the Greek epics in his Aeneid and answers them with compassion and a vision of a very different way to build a person and a community. A better one? We address that question by studying these three timeless texts in award-winning-winning 21st-century English versions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1816 Ancient Tragedy Ever Modern (4 Credits)
Three great Athenian tragedians of the 400s BCE--Aeschylus, Sophocles, and certainly most modernist of all Euripides--offer us of the 2000s CE much to experience, much to ponder, much that still challenges or provokes us. We experience their democratic Athenian community and its political and social, its religious and philosophic innovations as actualized in tragedy. We read and analyze, enact (in parts) and even imitate both widely known "world classics" Antigone and Oedipus Tyrannus , Medea and Bacchae with fresh approaches proper to our turbulent times, but also less familiar, often distressing "problem" plays that include Euripides' Andromache, Hecuba, and Heracles. This course bears the Analytical Inquiry: Society and Culture attribute in Common Curriculum.
GREK 1916 Comedy Old and New (4 Credits)
Reading and discussion of and experiment with comedies from ancient Rome and even more ancient Greece. We begin, however, with modernizations in American-musical form, and end with our own product in 21st-century emulation. Students’ participation, even broad clownish histrionics, required. Students must also be eager to laugh—knowingly and intelligently, of course.

GREK 1992 Directed Study (1-4 Credits)
GREK 3991 Independent Study (1-5 Credits)

Hebrew Courses
HEBR 1001 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence.

HEBR 1002 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1001 or equivalent.

HEBR 1003 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1002 or equivalent.

HEBR 2001 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 1003 or equivalent.

HEBR 2002 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2001 or equivalent.

HEBR 2003 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2002 or equivalent.

HEBR 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)
The course goals are three-fold: a) to facilitate students’ communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students’ knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with JUST 2745. Prerequisite: HEBR 2003 or equivalent.

HEBR 3010 Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion (4 Credits)
This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with JUST 3010. Prerequisite: HEBR/JUST 2003.

HEBR 3701 Hebrew Readings (1-4 Credits)
Selected authors or genres in Hebrew literature. Prerequisite: JUST/HEBR 2003 or equivalent, or instructor’s permission.

HEBR 3991 Independent Study (1-5 Credits)
HEBR 3992 Directed Study (1-4 Credits)

Italian Courses
ITAL 1001 Elementary Italian (4 Credits)
Elementary Italian is a 3-part communicative sequence in Italian. It is designed for students who have no prior knowledge of Italian. The objective of the sequence is to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. Elementary Italian also includes the study of contemporary Italian culture, which serves as the basis both for at-home work and in-class discussion.

ITAL 1002 Elementary Italian (4 Credits)
Elementary Italian is a 3-part communicative sequence in Italian. It is designed for students who have no prior knowledge of Italian. The objective of the sequence is to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. Elementary Italian also includes the study of contemporary Italian culture, which serves as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1001 or equivalent.

ITAL 1003 Elementary Italian (4 Credits)
Elementary Italian is a 3-part communicative sequence in Italian. It is designed for students who have no prior knowledge of Italian. The objective of the sequence is to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. Elementary Italian also includes the study of contemporary Italian culture, which serves as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1002 or equivalent.
ITAL 2001 Intermediate Italian (4 Credits)
Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1003 or equivalent.

ITAL 2002 Intermediate Italian (4 Credits)
Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 2001 or equivalent.

ITAL 2005 Reading and Conversation (4 Credits)
In Reading and Conversation, students learn the ease of expression in Italian through the intermediate-level reading of cultural and literary materials and through the study of vocabulary. Readings and contemporary issues are discussed in class. Prerequisite: ITAL 2002 or equivalent.

ITAL 2201 20th-Century History and Culture (4 Credits)
This course provides a historical and cultural approach to 20th-century Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2355 Images of Rome in Literature & Film (4 Credits)
The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2500 Introduction to Italian Literature (4 Credits)
Introduction and overview of Italian literature from 13th century to present; works representing major authors, periods, themes and forms. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 3010 Advanced Conversation and Composition (4 Credits)
This course continues to refine students' oral and written skills while enhancing their cultural awareness. Concepts, such as contemporary Italian politics, economy, and gastronomy, are introduced through authentic texts. Specific emphasis is placed on written skills—providing students with the necessary writing skills for continued study in Italian. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

ITAL 3201 19th-Century History and Culture I (4 Credits)
This course aims to provide a historical and cultural approach to 19th-century Italy, while improving students' Italian language skills. The course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include Italian unification, the historical novel, film adaptation, industry vs. nature, etc. Prerequisite: ITAL 2005 or equivalent.

ITAL 3350 Italy through Cinema (4 Credits)
This film course enhances students' knowledge of Italian culture, politics and the economy. Prerequisite: ITAL 2005, equivalent or instructor's permission.

ITAL 3701 Topics in Italian Studies (4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.
ITAL 3702 Topics in Italian Studies (1-4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor’s permission.

ITAL 3703 Topics in Italian Studies (1-4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor’s permission.

ITAL 3991 Independent Study (1-5 Credits)
ITAL 3995 Independent Research (1-10 Credits)
ITAL 3998 Undergraduate Honors Thesis (1-5 Credits)
This course will guide students who are majoring in Italian in the selection of a topic for their honors thesis, research materials, and individual meetings with the professor(s) directing the thesis.

Japanese Courses

JAPN 1001 Elementary Japanese (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Japanese culture. First quarter of three quarter sequence.

JAPN 1002 Elementary Japanese (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Japanese culture. Second quarter of three quarter sequence. Prerequisite: JAPN 1001 or equivalent.

JAPN 1003 Elementary Japanese (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Japanese culture. Third quarter of three quarter sequence. Prerequisite: JAPN 1002 or equivalent.

JAPN 1216 Popular Culture of Japan (4 Credits)
In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)
This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1616 Samurai and Merchants: Cultures of Tokugawa Japan (4 Credits)
Introduction to the cultures of Tokugawa, Japan, focusing on the tension between the samurai and merchant classes, the images they construct of self and other, and the morals and mores of their respective worlds. As well as examining Tokugawa fiction, drama, and other cultural artifacts, this course also considers later representation of the period and of its people in twenty- and twenty-first-century text, cinema, and television to understand the importance of contemporary influences on historical representation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1816 Classical Japanese Literature (4 Credits)
The course covers one thousand years of Japanese writing, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, the classic The Tale of Genji, medieval tales of wars and hermits, the nô drama, and the haiku and travel diaries. It will focus on such key binaries as orality and literacy, poetry and prose, native and foreign, popular and high-brow, and masculine and feminine. The course will also stress principles of literary analysis and interpretation. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1992 Directed Study (1-10 Credits)

JAPN 2001 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. First quarter of three quarter sequence. Prerequisite: JAPN 1003 or equivalent.

JAPN 2002 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Second quarter of three quarter sequence. Prerequisite: JAPN 2001 or equivalent.
JAPN 2003 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Third quarter of three quarter sequence. Prerequisite: JAPN 2002 or equivalent.

JAPN 2101 Conversation and Composition I (4 Credits)
Intensive practice in oral skills, grammar review, reading and writing. Prerequisite: JAPN 2003 or equivalent.

JAPN 2102 Conversation & Composition II (4 Credits)
Intermediate training in speaking, reading and writing. Prerequisite: JAPN 2101 or equivalent.

JAPN 2103 Conversation & Composition III (4 Credits)
Advanced-intermediate training in speaking, reading and writing. Prerequisite: JAPN 2102 or equivalent.

JAPN 2992 Directed Study (1-10 Credits)

JAPN 3701 Topics in Japanese Culture (4 Credits)
Selected topics in Japanese culture. Texts and films in both Japanese and English, with a focus on modern and contemporary Japanese culture. May be repeated for credit. Prerequisite: JAPN 3100 or equivalent.

JAPN 3991 Independent Study (1-5 Credits)

JAPN 3992 Directed Study (1-10 Credits)

JAPN 3995 Independent Research (1-10 Credits)

Latin Courses
LATN 1001 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence.

LATN 1002 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1001 or equivalent.

LATN 1003 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1002 or equivalent.

LATN 1991 Independent Study (1-10 Credits)

LATN 1992 Directed Study (1-4 Credits)

LATN 2001 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 1003 or equivalent.

LATN 2002 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2001 or equivalent.

LATN 2003 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2002 or equivalent.

LATN 3991 Independent Study (1-5 Credits)
Prerequisite: LATN 2003 or equivalent.

Russian Courses
RUSS 1001 Elementary Russian (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Russian culture. First quarter of three quarter sequence.

RUSS 1002 Elementary Russian (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Russian culture. Second quarter of three quarter sequence. Prerequisite: RUSS 1001 or permission of instructor.

RUSS 1003 Elementary Russian (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills; introduction to Russian culture. Third quarter of three quarter sequence. Prerequisite: RUSS 1002 or permission of instructor.

RUSS 1416 Introduction to Russian Culture: Evil and the Supernatural (4 Credits)
What is evil? Where does it come from and what place does it have in our world? What, if anything, are we supposed to do about it? We examine how Russian writers wrestle with these thorny questions, and how they engage in a dialogue with the Russian folk tradition and the Orthodox church—two rich resources for thinking about and coping with evil. We read world-famous Russian classics such as Dostoevsky, Pushkin, Gogol, and Bulgakov, as well as Russian folk tales, writings produced by Russian Orthodox clergy, and recent critical studies that represent a broad range of approaches to the problem of evil. No knowledge of Russian is necessary; all class discussion, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RUSS 2416.
RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)
This course surveys Russia's cultural past and present. Although it touches on aspects of Soviet Culture, the main emphasis is what has been called the "real Russian Culture," eclipsed for seventy years under the communist regime. The course surveys the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, film, music) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. The course includes several significant Russian films. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 1860 The Russian Short Story (4 Credits)
This course will introduce students to Russian literature through some of its shorter "masterpieces" of fiction. Students will explore the lives and ideas of some of Russia's greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials are in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 1917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature and history of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of literature and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 1918 The Soviet Experiment in Literature and Film (4 Credits)
Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagated by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovski, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevs'kaya, and watch groundbreaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 1920 Directed Study (1-10 Credits)

RUSS 2001 Second Stage Russian I (4 Credits)
Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 1003 or equivalent. First quarter of two quarter sequence.

RUSS 2002 Second Stage Russian II (4 Credits)
Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 2001 or equivalent. Second quarter of two quarter sequence.

RUSS 2110 Russian in a Cultural Context (4 Credits)
Continued development of Russian language and cultural skills with focus on all aspects of Russian culture, particularly Russian literature. Prerequisite: RUSS 2002 or equivalent.

RUSS 2111 Linguistic Politeness and Intercultural Communication (4 Credits)
In this course, students will explore how American and Russian speakers perceive politeness, and how sociocultural values underlying both cultures affect the speakers' communicative styles, their performance and perception of speech acts, and expression of emotions. Although this course focuses on Russian, other cultures will also be analyzed, such as German and Polish, and those of students' heritage. This course will help students to improve their communicative competence and deepen their understanding of some European cultures. The course will be conducted in English. Highly recommended for students planning on studying in Russia, Germany, or Poland. The course format consists of lectures, presentations, as well as class and group discussions. Students who major in Russian may get credit by providing coursework in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)
This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator's voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country's intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women's place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 2416 Russian Classics in the Original: Evil and the Supernatural (4 Credits)
What is evil? Where does it come from and what place does it have in our world? What - if anything - are we supposed to do about it? We examine how Russian writers wrestle with these thorny questions, and how they engage in a dialogue with the Russian folk tradition and the Orthodox church - two rich resources for thinking about and coping with evil. We read world-famous Russian Classics such as Dostoevsky, Pushkin, Gogol, and Bulgakov, as well as Russian folk tales, writings produced by Russian Orthodox clergy, and recent critical studies that represent a broad range of approaches to the problem of evil. Readings and writing in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RUSS 1416. May not be taken with or after RUSS 1416. Prerequisite: RUSS 2110 or equivalent.
RUSS 2917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature and history of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of literature and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. Students develop their Russian reading and writing skills. Selected readings and all essays in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: RUSS 2110 or instructor approval. May not be taken after or together with RUSS 1917.

RUSS 2992 Directed Study (1-10 Credits)

RUSS 3101 Advanced Conversation & Composition (4 Credits)
Continued improvement of Russian language skills in areas of style and syntax. First quarter of two quarter sequence. Prerequisite: RUSS 2110 or equivalent.

RUSS 3232 Russian Avant-Garde (4 Credits)
This interdisciplinary course addresses various manifestations of the avant-garde in Russian art, literature, poetry, theatre and film in the late 19th – early 20th century. Its objective is to provide an understanding of rapid, drastic, and often conflicting cultural and artistic transformations as a whole, rather than a mixture of separate events, trends, and works. Major artistic and literary movements, such as Symbolism, Futurism, Cubo-futurism, Neo-Primitivism, Suprematism, Rayonism and Constructivism will be studied in the context of Russian pre-revolutionary, revolutionary and post-revolutionary social, political, philosophical and cultural developments, with a special attention paid to the cultural dialogue between Russia and the West. Selected philosophical essays, films, plays, poems and short stories are studied, in addition to a variety of works of art created during this period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s.

RUSS 3300 Short Russian Prose (4 Credits)
An advanced conversation and composition course based on Russian prose. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

RUSS 3500 Structure of Russian (4 Credits)
Linguistic study of how Russian vocabulary building and Russian grammar operate. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

RUSS 3650 Soviet and Post Soviet Cinema (4 Credits)
Film course concentrating on the works of Andrei Tarkovskii. Open to non-Russian speaking students. Prerequisite: RUSS 3500 or equivalent, or permission of instructor.

RUSS 3701 Topics in Russian Literature (4 Credits)
Selected topics, authors and movements in medieval, Russian, Soviet and post-Soviet literature. May be repeated for credit. Prerequisite: RUSS 3500 or equivalent, or permission of instructor.

RUSS 3850 Working with Russian Media (4 Credits)
Multimedia course emphasizing new media in Russian culture and society. Prerequisite: RUSS 3500 or equivalent, or permission of instructor.

SPAN 1001 Beginning Spanish (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills. Three quarter sequence.

SPAN 1002 Beginning Spanish (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills. Three quarter sequence. Prerequisite: SPAN 1001 or equivalent.

SPAN 1003 Beginning Spanish (4 Credits)
Basic grammar, syntax and vocabulary; emphasis on oral skills. Three quarter sequence. Prerequisite: SPAN 1002 or equivalent.

SPAN 1500 Understanding Contemporary Spain (4 Credits)
This course examines the key political, social and cultural issues at play in contemporary Spanish society. Via the analysis of various texts—historical, sociological, literary, filmic—this course will familiarize students with the key issues that define Spanish society today. The themes that will be the primary focus of class discussions and assignments include national vs. regional identities, gender roles, multiculturalism, Spain and the European Union and the legacy of the Franco dictatorship. Students will also read short stories by contemporary Spanish authors that address these same themes in order to have the opportunity to analyze and interpret artistic representations of the key issues at play in Spanish society today. This course counts toward the Analytical Inquiry: Society and Culture requirement.
SPAN 1992 Directed Study (1-10 Credits)

SPAN 2001 Intermediate Spanish (4 Credits)
Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 1003 or equivalent. Three quarter sequence.

SPAN 2002 Intermediate Spanish (4 Credits)
Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2001 or equivalent. Three quarter sequence.

SPAN 2003 Intermediate Spanish (4 Credits)
Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2002 or equivalent. Three quarter sequence.

SPAN 2100 Conversation and Composition (4 Credits)
Intensive practice in written and oral skills, grammar review, and introduction to Spanish thought and cultural patterns. Prerequisite: SPAN 2003 or equivalent.

SPAN 2200 Spanish for Heritage/Bilingual Speakers I (4 Credits)
Development of the linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. Overview of topics relevant to Spanish-speaking communities in the United States. This section is for bilingual/heritage speakers of Spanish only.

SPAN 2250 Spanish for Heritage Speakers II (4 Credits)
Second course of the 2-course sequence for heritage speakers. Continuation of the development of linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. This section is for heritage speakers of Spanish only. Prerequisite: SPAN 2200.

SPAN 2300 Iberian Culture & Civilization (4 Credits)
Intensive study of culture of Spain; manifestations of culture found in history, art, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2350 Latin American Culture and Societies (4 Credits)
An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2400 Latino Cultures in the United States (4 Credits)
Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2350 or equivalent.

SPAN 2701 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: at least one of SPAN 2300, SPAN 2350 or equivalent.

SPAN 2702 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2300 or equivalent.

SPAN 2703 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2350 or equivalent.

SPAN 2704 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: SPAN 2300 and SPAN 2350.

SPAN 2705 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2400.
SPAN 2992 Directed Study (1-10 Credits)
SPAN 3010 Latino Presence in the United States (4 Credits)
An interdisciplinary survey about Mexican Americans (Chicanos) from 1845 to the present. Lectures, readings and discussions provide an overview of influences that continue to shape the culture, character, history, and literature of Chicanos in the United States. A major focus is an exploration of the various ways in which Chicanos have struggled to achieve social change and equality. Culture, ethnicity, language, education, immigration, economics, political action, oppression and discrimination, and current events are also included through readings of representative works including narrative, poetry, theater, and essay. Prerequisite: SPAN 2350 or 2400 or equivalent.

SPAN 3110 Critical View of Latin America through Film (4 Credits)
This course is designed from an analytical perspective to provide a cultural and historical overview of Latin America. The class begins with feature films and documentaries that focus on the Conquest, exploration and colonization, and continues with contemporary issues of cultural, socio-economic, and philosophical relevance. Analytical focus on indigenous issues, religion, race relations, women’s issues, economic and socio-political concerns as students develop a more complete appreciation of the complex world which is Latin America. Prerequisite: SPAN 2350 or equivalent.

SPAN 3120 Mexican Film: Historical and Cultural Representation (4 Credits)
A critical perspective on Mexican reality by examining the role of cinema as a means of cultural, historical, ideological, economic and/or political expression. The focus is on Mexican film production in relation to three important periods: the Silent Cinema, the Golden Age in Mexican film, and the Contemporary Era or “new cinema” movement. In addition to feature films, documentaries connect the evolution of Mexican cinema with specific historical and cultural periods. Prerequisite: SPAN 2350 or equivalent.

SPAN 3200 Eroticism and Nation in the Latin American Novel (4 Credits)
A study of the foundational fictions of Latin America and their twentieth-century rewriting. Nineteenth-century novels showcasing the interplay of sentimental love, eroticism, class struggle, and political agendas in the formative years of the Latin American nations are analyzed and contrasted with twentieth-century narratives where such nation (and narrative) building is put to question. Prerequisite: SPAN 2350 or equivalent.

SPAN 3230 Musicalized Literature (4 Credits)
Introduction to musicalized literature: a study of literary texts that provoke in the reader a sense of being related to music or prompt a "musical" experience while reading. The course focuses on various Latin American narrative texts whose relation with songs or genres of popular music is more or less explicit. The analysis aims first to illuminate their musical aspects, but also addresses other angles (social, historical, political). Basic information about several genres of popular music is provided in order to facilitate comprehension. Prerequisite: SPAN 2350 or equivalent.

SPAN 3250 Latin America Since the Conquest (4 Credits)
An exploration of literary strategies in relation to power and domination rooted in the conquest of Latin America through the present. The focal point is the shaping of a vertical power structure by colonial and postcolonial powers such as Spain, England, France and the United States. The course examines the function of literature in sustaining as well as resisting violence, economic exploitation, identity, and the denial of humanity. Prerequisite: SPAN 2350 or equivalent.

SPAN 3280 Creative Writing in Spanish (4 Credits)
Writing means the production of thoughts and the elaboration of perspectives that enable the writer to construct and deconstruct reality. It is working conscientiously and methodically with language to expand the boundaries of knowledge in imaginative ways through a subjective and critical perspective. This course explores these notions through theory, textual analysis, and practice. It combines literary readings of Latino/a and Latin American writers with compositional theory and literary criticism. The student will understand the creative writing process and what makes a piece successful. Prerequisite: at least one 3000 level course or equivalent.

SPAN 3290 Literature and Human Rights in Latin America (4 Credits)
An analysis of human rights literature from the 16th century to the present within a historical, national and transnational context. A critical perspective on power in relation to political memory, collective violence, the diasporic experience, authoritarianism, official cultural discourses, consequences of globalization and social transformation, among other contested spaces. An exploration of colonial and neocolonial legacy and a testimony of the violence experienced by women, indigenous and other ethnic communities, and immigrants, among others, in areas such as Argentina, Chile, Mexico, Central America, and the United States. Prerequisite: SPAN 2350 or equivalent.

SPAN 3300 Travel Narratives (4 Credits)
Travel accounts, rather than candid and unbiased testimonies about places and people, are challenging texts that require critical analysis. This class offers an overview of the evolution of travel narratives, from the times of the Grand Tour to contemporary accounts representing cross-cultural interactions between Spaniards and their ‘others’. Travelogues by authors such as Washington Irving, Domingo Faustino Sarmiento, Julio Camba and Juan Goytisolo. Prerequisite: SPAN 2300 or equivalent.

SPAN 3320 Class and Gender in 19th-Century Spain (4 Credits)
Spain underwent social and political revolutions during the nineteenth century from which new values emerged. Through the analysis of literary, political and cultural texts from the late nineteenth-century, students explore the changed view of gender and class identity. Students will read and critically examine several works by prominent authors of the Spanish Realist tradition, including Benito Pérez Galdós, Leopoldo Alas (Clarín) and Emilia Pardo Bazán. Prerequisite: SPAN 2300 or equivalent.

SPAN 3330 Rebels, Lovers and Outlaws in Spanish Romanticism (4 Credits)
This course studies the literary and cultural tropes of Spanish Romanticism. Themes discussed include the rebellion against an unjust social order, the portrayal of marginal social groups and the creation of subjectivity in the Spanish Romantic tradition. The literary genres studied are drama, essay and poetry; the primary authors include Larra, Zorrilla, Espronceda, Bécquer, and de Castro. Prerequisite: SPAN 2300 or equivalent.
SPAN 3333 The Fertile Friendship: Bunuel, Lorca, Dali and Spanish Surrealism (4 Credits)
An interdisciplinary study of the relationships of three Spanish artists (Salvador Dali, Federico Garcia Lorca and Luis Buñuel) and the development of Surrealism in Spain. Through the intriguing intersections of the life and art of the painter, the poet, and the filmmaker, a better understanding of this fascinating artistic movement is achieved. Prerequisite: SPAN 2300 or equivalent.

SPAN 3400 Spanish Theatre in Performance (4 Credits)
Reading, discussion and performance of plays written in Spanish. The focus will be on improving pronunciation, intonation and dramatic expression as well as providing a better understanding of contemporary theatrical movements in the Spanish speaking world such as teatro del absurdo, teatro posibilista or teatro campesino. The course includes a final performance (in front of a real audience) of the play. Plays by authors such as Susana Torres Molina (argentine), Federico Garcia Lorca (Spain), Emilio Carballido (Mexico), and other authors from the Spanish speaking world. No prior experience in theater is required. Prerequisite: SPAN 2300 or SPAN 2350 or equivalent.

SPAN 3420 Contemporary Film in Spain (4 Credits)
Through contemporary Spanish film and essays this course examines the representation of key cultural aspects of Spanish society, such as national and regional identities, immigration, and gender issues. Students critically evaluate the causes, cultural manifestations and consequences of the social themes studied first by reading about them and then by viewing films that consider the same issues. They learn to identify the formal elements of film and develop a critical vocabulary with which they analyze and write about them. Prerequisite: SPAN 2300 or equivalent.

SPAN 3490 The Quixote Archive: Cervantes in Context (4 Credits)
This course offers students a critical introduction to one of the most influential texts ever written: Miguel de Cervantes' "Don Quixote" (1605, 1615). Careful attention will be paid to the historical, social, political, and literary contexts with which Cervantes' text dialogues. We will also assess a variety of adaptations of Cervantes' work in other media, and will engage with the substantive body of secondary critical literature informing interpretations of "Don Quixote" for the past 400 years. Prerequisite: SPAN 2300 or equivalent.

SPAN 3500 Interrogating 'convivencia': Muslims, Christians, and Jews in Iberia (4 Credits)
This course proposes to critically interrogate the complex relationship between the Muslim, Christian, and Jewish communities of the Iberian Peninsula, and the lasting impact of the historical relationship between these communities on the culture, literature, art, politics, and economy of Spain, with particular emphasis on the period 711-1700. Special attention is paid to problematizing the notion of 'convivencia' and to considering how diverse representations of the 'three cultures' are appropriated in the construction of national(ist) ideals that are overtly reflected in literature and art, both in Medieval and Early Modern Iberia and in contemporary Spain. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400, or equivalent.

SPAN 3510 Sex, Bodies, and Power in Imperial Spain (4 Credits)
This course considers the body a key locus of social and political struggle in the 16th and 17th Centuries in Spain and in the Indies. Contemplating the role of a variety of discourses from diverse fields (medicine, law, philosophy, theology, politics), we will ask such questions as: What is the body and how does it work in physical terms? How is the body used to perform or problematize legal, moral, and social identities? How is the body used as a mechanism to marginalize, control, or exclude individuals or groups, or to legitimize the authority and power of other individuals or groups? We will contemplate representations of the body in diverse media and genres (painting, sculpture, engravings, theater, novels, poetry, autobiography, medical treatises, moralizing tracts) in order to reconstruct the complex epistemology through which the body, and especially problems of race, gender, and sexuality, was conceptualized in the 16th and 17th Centuries. Particular attention will be paid to the representation of the materiality of the body (physiology as a key to moral and cultural difference), eroticism, homosexuality, cross-dressing, 'monsters,' sickness, and reproduction, considering the representation of such corporeal phenomena to be a privileged space for interrogating the ideologies and structures upon which Power is built. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400 or equivalent.

SPAN 3525 Transgressing Borders: Latina Writers in the United States (4 Credits)
An introduction to the written and oral tradition of Latina writers of Mexican heritage in the United States from the 19th century to the present. The course reflects on how Latinas position themselves, and are positioned within the context of history, culture, and society. It includes an exploration of identity construction and transgression, literary and cultural myths, icons, and archetypes, and the geopolitical and symbolic space of writing. Prerequisite: SPAN 2350 or SPAN 2400 or equivalent.

SPAN 3560 The Fantastic Short Story in Latin America (4 Credits)
Introduction to the genre of the fantastic short story in nineteenth- and twentieth-century Latin American literature. Study of the rise of the short story genre in Latin America and the ways in which we can understand the Fantastic and its relationship to the Gothic and the Magical Real. Assigned readings by authors such as Horacio Quiroga, Jorge Luis Borges, Julio Cortazar, Gabriel Garcia Marquez, Carlos Fuentes, Silvina Ocampo and Rosario Ferre. Class discussions, theoretical texts and student analyses focus on a text's themes, literary devices, and writing styles, as well as metatextual and historical references. Prerequisite: SPAN 2350 or equivalent.
SPAN 3670 Exploring the Amazon: A Literary, Filmic and Ethnographic Journey (4 Credits)
Introduces the student to the Amazonian region of South America and the ways in which this fascinating landscape and the diverse peoples who inhabit it have been portrayed and exploited by "outsider" novelists, filmmakers, explorers, anthropologists, businessmen, and scientists beginning in the sixteenth century. This course also includes a survey of texts selected from the oral traditions of indigenous Amazonian groups such as the Ashaninka, Machiguenga, Cashinahua and Ese'eja. Assigned readings underscore the course's interdisciplinary focus and encourage students to hone their course reading and analytical writing skills through the study of anthropological, historical, literary and filmic texts. Prerequisite: SPAN 2350 or equivalent.

SPAN 3680 Food, Power and Identity in Latin American Literatures and Cultures (4 Credits)
A study of culinary representations and the role of food in Latin American literature, film, culture and politics. Assigned texts include short stories, novels, films and a selection of literary, historical and political essays that relate to food politics and poetics. A review of key food policies and politics throughout colonial and contemporary Latin America reveal legacies of colonial power struggles, as well as the important intersections between food and constructions of identity, nationality, and socioeconomic and cultural emancipation. The course also explores themes such as the art of cooking as a tool for seduction, culinary witchcraft, and contemporary national and regional struggles to achieve food sovereignty in an era of globalization and neoliberal politics. Prerequisite: SPAN 2350 or equivalent.

SPAN 3702 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

SPAN 3703 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

SPAN 3704 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

SPAN 3705 Topics in Spanish (4 Credits)
Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)
Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

SPAN 3990 Senior Seminar (4 Credits)
This is the capstone course of the Spanish major and requires students to complete an in depth, scholarly study of a topic or issue pertinent to their seminar’s central theme(s). Spanish majors must take a minimum of one senior seminar and this course must be taken at DU once a student has reached senior standing. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level. A selection of seminar topics includes Latin American Popular Culture, Contemporary Spanish Novel, Pre-Columbian and Colonial Andean Literature and Culture, Puerto Rican Literature and Society, Layqas, Ñakáqs and Saqras: Representations of the ‘Supernatural’ in Quechua Oral Traditions, Latin American Narrative, El Romancero, Contemporary Socio-Political Poetry in Latin America, Latin American Women Poets, and Masterpieces of Latin American Literature. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level and senior standing.

SPAN 3991 Independent Study (1-4 Credits)

SPAN 3992 Directed Study (1-10 Credits)

SPAN 3997 Internship in Spanish (1-4 Credits)

SPAN 3998 Honors Thesis (1-10 Credits)

Leadership Studies Program

Office: Driscoll Student Center South, Suite 13
Mail Code: 2050 E. Evans Ave, Denver, CO 80208
Phone: 303.871.2462
Email: applyplp@du.edu
Web Site: http://www.du.edu/leadership

The Pioneer Leadership Program (PLP) has been developing the leadership skills of some of the University of Denver's most talented undergraduate students since 1995. PLP is a unique academic minor and Living and Learning Community at the University of Denver that emphasizes leadership ignited by community, curiosity, courage, and action.

Each year the Pioneer Leadership Program (PLP) selects 88 incoming students who are ready to embrace the ever-increasing challenges of our world.
Leadership Studies Program

PLP is a transformational learning experience that combines course work, a residential community, civic engagement, and professional networks to equip 21st century citizen leaders. Through the study and practice of leadership, you will acquire the knowledge, skills and experience necessary to become an effective, collaborative leader in whatever field you choose.

The vision of the Pioneer Leadership Program is "Transforming students to inclusively lead and serve the world".

Leadership Studies

Minor Requirements - Pioneer Leadership

The minor requires 24 credits. In addition, students must complete a total of 80 service hours.

Leadership Studies Program

Courses

LDRS 2000 Foundations of Leadership (4 Credits)
LDRS 2000 focuses on developing an understanding of the foundations of leadership through an overview of leadership theories and definitions, an exploration of the present and future contextual demands on leaders, and in-depth self-assessment which includes identification of strengths, weaknesses, social identity, and leadership practices. The course will also explore the role of leadership and followership in teams. LDRS 2000 is designed to broaden your understanding of what constitutes leadership while challenging you to understand yourself better and begin to apply civically engaged leadership in new ways. This course is designed to broaden your understanding of "who" and "what" constitutes leadership.

LDRS 2017 Inclusive Leadership (1,2 Credit)
In this academic entree to the study of leadership, we explore the fundamental nature of leadership and how to develop as students of leadership in a diverse world. This course encourages students to discover their personal identities, values, preferences, risk-taking propensity and other characteristics as these relate to their leadership potential. Students integrate learning in a Personal Leadership Statement, declaring what they stand for as an inclusive leader. We explore the idea of "community" and our obligations to take on a leadership role in the community with whom we identify. Service as an act of leadership will be expected both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisite: membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

LDRS 2018 Leadership: Theory to Innovation (1,2 Credit)
This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017 and membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

LDRS 2019 Teaming for Social Change (1,2 Credit)
Teams are the primary vehicle by which many, if not most, complex tasks are accomplished in our society. As a result, there is an increasing demand for leaders who can build, lead and participate in effective teams. With this course, you are completing your first-year sequence as a student of leadership. It will help lay the theoretical and conceptual foundations you need to prepare you to (a) reflect on teams of which you have been a part; (b) develop strategies for making your teams more effective, whether you are a leader or a team member; and (c) help you develop skills for your sophomore service project. Prerequisites: LDRS 2018 and membership in the Pioneer Leadership Program, or permission of PLP faculty.

LDRS 2040 Leading Community Change (4 Credits)
This course builds on the themes we began in the first-year PLP sequence. Specifically, we continue to expand your understanding of community, citizenship, and spheres of influence. Last year, you explored theories of leadership as well as your own assets and passions you carry into leadership. During the second-year course series we learn how to think strategically and act purposefully to make change happen in a larger context—the community. This course asks you to look at and practice leadership as a relational process that brings people together around common interests in order to effect positive change within institutions and/or communities. We will examine and practice key leadership concepts including self-interest, power, and collaboration. We will also practice specific leadership strategies, including 1-1 interviewing techniques, issue research, developing mission statements and action plans, and conducting community research. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), or permission of the PLP faculty.

LDRS 2050 Collaborative Leadership: Local Perspectives (2 Credits)
In this two-course sequence, students have a chance to lead and implement a model of community based change involving service that was envisioned in COMN 2040. The sequence represents an important step in the Pioneer Leadership Program experience and in the student’s development as a citizen leader. By the end of this sequence, the student should be able to lead community based change efforts and learn from the experiences associated with those efforts. Prerequisites: LDRS 2050 and PLP membership or PLP approval.

LDRS 2060 Collaborative Leadership: Global Perspectives (2 Credits)
In this two-course sequence, students have a chance to lead and implement a model of community based change involving service that was envisioned in COMN 2040. The sequence represents an important step in the Pioneer Leadership Program experience and in the student’s development as a citizen leader. By the end of this sequence, the student should be able to lead community based change efforts and learn from the experiences associated with those efforts. Prerequisites: LDRS 2050 and PLP membership or PLP approval.

LDRS 2300 Transformational Leadership (4 Credits)
This course focuses on an introduction to leadership theory and integration of this theory into the student’s leadership development and service in all sectors. This class is designed to develop a particular understanding of citizen leadership as an avenue to create change and transformation of communities. Additionally, students gain a greater awareness of their own leadership style, develop a stronger appreciation for teamwork and create goals for leadership in their own context. We examine personal leadership development through three main lenses. First, students gain a better understanding of the contextual demands for leadership. The second focus entails conducting self-exploration of one’s own leadership style through identifying values, personality, and strengths and weaknesses as a leader. Finally, the course includes developing a greater awareness of how one relates to others and engages in transformative change.

LDRS 2310 Leadership in a Virtual World (4 Credits)
Distributed organizations are commonplace in the high-tech world in which we now find ourselves living and working. Leading in private and public settings requires a developed set of skills to utilize the virtual environment to advance a shared goal. Technical skills and communication take on new importance for leading virtually. This course focuses on these new realities of today’s work and community environments. Through readings of current research on virtual work and team leadership as well as online assignments to recognize, practice and develop needed skills, students gain a strong foundational understanding of what constitutes effectiveness in virtual work and community leadership.

LDRS 2320 Presidential Leadership (4 Credits)
The University of Denver had the privilege to host the first 2012 Presidential Debate in October. With all of the attention this brings to campus, it is appropriate to examine the role of a president as a leader and the process of becoming president. What does it take to be a successful U.S. president? What characteristics and behaviors are more commonly found in effective presidential leadership? How do campaigns and parties frame the success or failure of presidential candidates? How can the average citizen understand the role of this leadership position and become informed on the leadership capacity of various candidates to fill that role effectively? This course examines the extensive research and theorizing about presidential leadership and their success factors. Various approaches to studying the leadership of presidents are utilized including case studies, memoirs, research projects, and guest speakers. Guests include past presidential candidates, campaign managers, speechwriters and party officials from all sides. A variety of readings are selected to inform and frame this discussion-intense course. The goal is to review the literature and a number of varied approaches to understand presidential leadership with a focus on the role of the president as chief leader of our nation.

LDRS 2330 Sustainability Leadership in Denver (4 Credits)
The wicked problems to be addressed by sustainability leadership include climate change, deforestation, water shortages, overpopulation, and waste disposal, among many others. This course will explore how community, government and business leaders in Denver are addressing environmental problems while balancing economic and social equity concerns. Students will understand multiple models of sustainable development through course readings and offsite experiences.

LDRS 2400 Leadership and Sustainability in Belize (4 Credits)
Every day, decisions are made by leaders in business, government, and non-profit settings that impact sustainability in its many forms. This course explores multiple meanings and interpretations of sustainability. The course location of Belize provides a perfect learning laboratory to examine how one country is attempting to balance the sometimes competing demands of economic, cultural, and environmental sustainability. Course activities include staying at a low-environmental impact conference center in the rainforest, visiting a model environmentally sustainable island community, hearing guest lectures from various country experts, and exploring Mayan ruins. Through these activities students examine the role that leadership plays in contributing to small and large scale sustainability efforts. Students must apply and receive instructor permission to register for this course.

LDRS 2410 Global Leadership: A Yucatan Experience (4 Credits)
Developing the capacity to work and lead in a global environment has never been more important for university graduates. Strong personal awareness, coupled with mature intercultural competencies and knowledge, is required of any graduate hoping to take a meaningful role in a globalizing world. This course is designed to couple intercultural awareness with critical principles for global leadership effectiveness in a unique cross-cultural environment: Yucatan, Mexico. Using Merida as a base camp, this class focuses on the challenges of leading in a region with a strong colonial past, a proud Mayan culture influencing the present, and globalization that attracts many foreign interests through tourism and natural resource development. Through a unique partnership with Project C.U.R.E., a non-profit organization dedicated to building sustainable healthcare infrastructure, students hear and see the work of an international non-profit dedicated to building strong healthy communities. In addition, students learn from leaders within the government and business community, examining local and regional issues that challenge and must be understood to create vibrant sustainable communities. Course activities include lectures from local and international leaders, organizational and cultural site visits, intercultural and leadership assessments, and a hospital work project service opportunity. Days are filled with experiential learning and evenings are set aside for group and personal reflections. Required pre-course reading helps all begin with a common language of leadership principles, globalization understanding and awareness of pertinent challenges facing the Yucatan region.

LDRS 2510 Outdoor Leadership: Developing Leaders in Colorado’s Backcountry (4 Credits)
This experiential-based leadership course is designed to engage the student learner in the theory and practice of adventure education as it applies to leadership development for university students. The course includes three hours of pre-trip planning. The expedition portion of the course is eight full days with seven days of backpacking in the Raggeds Wilderness Area, which spans the White River and Gunnison National Forest. The proposed course is 44 miles round trip and includes two high altitude mountain passes and an opportunity for a peak attempt on Treasury Mountain. The course area is located between Paonia and Crested Butte, Colorado. With the support of professional instructor facilitators, students follow a traditional outdoor leadership course progression that allows them to practice and improve their leadership skills. This includes group management, navigation, lesson planning, outdoor ethics and Leave No Trace philosophy, risk management, facilitation, group processing and transfer of learning. The pinnacle of the course includes a professionally facilitated overnight solo, peak attempt and completion of the outdoor leadership competencies included in the curriculum.
Management

LDRS 2901 Women, Careers and Leadership I: Job & Internship Search Preparation (2 Credits)
This course is designed to give students the unique resources, skills, confidence and tools necessary to be successful in the internship search and develop a mindset for strong workplace excellence and leadership. While women are entering the workforce in numbers that equal men, their earnings equity and ascent to leadership is slow. This course will explore the gender challenges and opportunities that exist for women in the complex workforce. Internships can create an important learning experience for developing the requisite skills to overcome obstacles and seize opportunities for future success. Through in-class activities and homework assignments, you will understand workplace complexities and learn how to create a strong resume to address those complexities, how to market your skills to employers and how to find internship openings for your field. The course will include content delivered by career and professional development professionals, employers, and alumni.

LDRS 2902 Women, Careers and Leadership II: Preparing for your Internships (2 Credits)
Progressing in one's career requires the acquisition of hands-on experience to gain the knowledge and skills to be marketable in specific industries. Additionally, cultivating personal and professional development specific to women in the workplace is vital to successfully navigating their career and professional development. As such, a prerequisite to this course is Women, Careers and Leadership I. This second course in the series, entitled Women, Careers and Leadership II, is intended to support students who identify as female in developing their knowledge, skills and strategies to be successful in, and maximize on their internship. Students will learn about organizational structure and culture and how those factors impact workplace dynamics, including communication. In addition, students will learn the key traits of leadership with a focus on building self-esteem and self-efficacy while increasing emotional intelligence. Prerequisite: LDRS 2901.

LDRS 2911 Careers & Leadership I: Job and Internship Search Preparation (2 Credits)
This course is designed to give students the unique resources, skills, confidence and tools necessary to be successful in the internship search and develop a mindset for strong workplace excellence and leadership. The internship search process involves much more than simply submitting a resume in the current economy. Internships can create an important learning experience for developing the requisite skills to overcome obstacles and seize opportunities for future success. Through in-class activities and assignments, students will understand workplace complexities and learn how to create a strong resume to address those complexities. The course will include content delivered by Career & Professional Development professionals, employers, and alumni.

LDRS 2912 Careers and Leadership II: Preparing for your Internship (2 Credits)
Progressing in one's career requires the acquisition of hands-on experience to gain the knowledge and skills to be marketable in specific industries. Additionally, cultivating personal and professional development specific to women in the workplace is vital to successfully navigating their career and professional development. As such, a prerequisite to this course is Careers &Leadership I. This second course in the series, entitled Careers & Leadership II, is intended to support students in developing their knowledge, skills and strategies to be successful in, and maximize on their internship. Students will learn about organizational structure and culture and how those factors impact workplace dynamics, including communication. In addition, students will learn the key traits of leadership with a focus on building self-esteem and self-efficacy while increasing emotional intelligence. Prerequisite: LDRS 2911.

LDRS 3000 Capstone: Leadership Ethics (4 Credits)
This course completes leadership studies as an undergraduate at DU, and the process is designed to help students think in a structured, reflective way about the ethical considerations surrounding leadership acts and consequences. As a result, students should leave with a greater understanding of your own and others' leadership, as well as with tools to help students navigate ambiguous situations and conflicting interests associated with their future leadership roles. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019, LDRS 2040, LDRS 2050, and LDRS 2060.

LDRS 3980 Internship (1-6 Credits)
The PLP Internship program provides individualized opportunities to gain valuable professional experience and build leadership skills. This hands-on program complements a student's academic major or a specified interest area that supports the student's leadership development through careful placement in community based learning. All three sectors of government, not-for-profit and private enterprise are available for internship learning opportunities.

LDRS 3991 Independent Study (1-5 Credits)

1 Analytical Inquiry: The Natural and Physical World
2 Scientific Inquiry: Society and Culture
3 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Courses

MGMT 2021 Managing Complex Organizations (4 Credits)
The course will consider the dynamics of corporate governance, beginning with a brief history of management thought and its relevance to decision-making today. It will introduce strategic planning, problem solving and the criteria for competitive market choice. It will consider risk, ethics and CSR as components to decision making. It will introduce modern organizational design and culture (including global cultures) and their impact on effective governance. It will review the dynamics of agency theory, conflict, ADR and corporate politics on governance. Prerequisite: C- in MGMT 2100 and admission to Daniels.

MGMT 2040 Managing Human Resources (4 Credits)
This course focuses on the administration of human resources, including the processes of personnel management and personnel systems in complex organizations, both public and private. Techniques for recruiting and staffing; orienting, training and development; motivation, performance management, employee relations, compensation systems, and reward and retention systems; and safety and health issues will be addressed. Prerequisite: C- in MGMT 2100 and admission to Daniels.
MGMT 2100 Leading High Performance Organizations (4 Credits)
Have you ever wondered why some organizations thrive while competitors with the same technology and capital resources fail? Often the difference is the human factors: the many ways in which savvy organizations harness the commitment and creativity of their workers. In this course, you learn about the human factors that foster career success for you and high performance for your organization. Technical skills are important entry level requirements for leaders and managers. What sets the great ones apart is their ability to motivate and inspire colleagues and employees alike. In MGMT 2100 you learn the essentials of organizational behavior and acquire a toolkit of evidence-based people skills that complement the technical skills you gain in other DCB core courses. Prerequisite: BUS 1000.

MGMT 2300 Leading for Collaboration (4 Credits)
Leading for Collaboration is an advanced undergraduate course to prepare students for a working environment where they are required to collaborate with others to reach individual and organizational goals. Students learn about the fundamental design principles of high-performing teams and groups, as well as how and when it is best to use them. Students also learn how to sustain team performance through effective decision-making, group communication, conflict management, and reward and motivation systems. Students also cover current topics in teams such as virtual teams, self-managed teams, and team-based innovation. Students also learn about and improve their ability for formal and informal leadership in a group or team. Prerequisites: C- in MGMT 2100 and admission to Daniels.

MGMT 2420 Global Management (4 Credits)
Introduction to multinational corporations and management of international profit and non-profit organizations; how management theory and practice are impacted by particular cultural contexts; analysis of current issues related to international trade and investments, and problems and opportunities of multinational operations. Prerequisites: C- in MGMT 2100 and admission to Daniels.

MGMT 2650 Introduction to Management Consulting (4 Credits)
This course is designed to provide a broad overview of the management consulting profession, including its industry and competitive dynamics, major practice areas, approaches to implementation, management of consulting firms and the future of consulting. In addition, emphasis is given to the practice of consulting through the development of certain high impact skills in evaluation, proposal writing, data gathering and client presentations. The course is relevant to those who: 1) are specifically interested in consulting careers, 2) have job interests that involve staff positions in corporations, 3) want to become line managers who might one day use consultants, 4) wish to develop general consulting skills and familiarity with the consulting industry. The learning process in class will consist of lectures, cases, readings, exercises and guest speakers. This wide variety of learning methods is intended to convey both the necessary knowledge and practical skills necessary for building a sound foundation for becoming a professional consultant. It is essential that everyone comes well-prepared to class, as the learning process depends heavily upon participation. Prerequisite: MGMT 2100 and admission to Daniels.

MGMT 2700 Topics in Management (1-4 Credits)
Consideration and in-depth analysis of current issues in the field of management. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 2850 Business and Society (4 Credits)
Business and Society is the core course designed to familiarize students with the relationships among the private, public and nonprofit sectors. It acquaints students with the broad range of issues and the various methods and processes used to resolve issues and solve problems faced by stakeholders in these various sectors in these turbulent times. Managerial, entrepreneurial, and governmental approaches to address and resolve business and public policy issues and problems in our dynamic environment are explored and analyzed. Prerequisites: MGMT 2100 and BUS 1999.

MGMT 3000 Business Policy and Strategy (4 Credits)
Management 3000 focuses on the strategic management of an organization as a whole. This course will introduce students to key decisions that top executives have to make when developing and implementing strategies, methodologies for informing those decisions, and how to interpret information from those approaches to guide strategic decision-making. Overall, from the perspective of leading an organization, students will learn how strategic decisions impact upon a firm’s performance and success. Enforced Prerequisites and Restrictions: Junior year status DCB2, Accounting 2300, Finance 2800, Business 3000, Marketing 2800.

MGMT 3010 Developing a Business Plan (4 Credits)
This is the culminating course for the business minor. It integrates the various functional areas (e.g., business law, management, accounting, marketing, and finance) with environmental scanning, competitive strategy, market feasibility, and innovation. Students study various business models through case studies, learning what leads to business success and failure. Students also learn about the business planning process, from start to finish, and develop an actual business plan for either a new, entrepreneurial venture or an established business. Prerequisites: BUS 1000, LGST 2000, ACTG 2010, FIN 2010, and MKTG 2800. For Business minors only.

MGMT 3100 Business Ethics and Social Responsibility (4 Credits)
This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 3150 Creativity, Innovation, and Design Thinking (4 Credits)
Design is a profoundly human endeavor. At its best, design thinking and practice allows humans to, in the words of Nobel Prize winner Herbert Simon: “Change existing situations to preferred ones.” Designers work within the need for action, yet operate in a world of constraints. In the words of Tim Brown, of IDEO, a renowned product design firm, “designers strive to achieve a harmonious balance between human desire, technological feasibility and economic viability.” This course gives students a new set of tools for and experience in finding and developing creative and innovative alternatives for addressing business problems with particular emphasis on leading such initiatives. Students will explore creativity from individual and team perspectives and identify innovation opportunities and roadblocks in organizational settings. Prerequisites: MGMT 2100 and admission to Daniels.
MGMT 3200 Employee Relations (4 Credits)
This course provides a practical and orderly perspective on how to create an effective employer/employee relationship. Students learn the components and factors that promote and destroy effective employee relations. We learn the evolution of the labor movement in the United States and its influence on the business workplace. We learn techniques that can be used in fostering effective employee relations and learn about the challenges that face management. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 3220 Leading a Not-For-Profit Organization (4 Credits)
To educate students on management strategies to enable them to successfully lead and fund a not-for-profit (NFP) organization.

MGMT 3270 Dispute Resolution (4 Credits)
Various dispute resolution techniques in business contexts as developed through case studies. Prerequisites: C- in MGMT 2100 and admission to Daniels.

MGMT 3280 Business Plan (4 Credits)
This course integrates the practical functional areas of industry and competitive analysis, finance, accounting, information technology, marketing, legal studies, operations management, general management, corporate social responsibility and exit strategy issues, culminating in the development of an entrepreneurial business plan. Careful attention to environmental and industry issues that impact new venture startup, as well as market potential and funding sources, are critical to planning and launching a new business. Junior standing required. Prerequisites: C- in MGMT 2100 and admission to Daniels.

MGMT 3500 Growth Strategies: How to Grow the Organization (4 Credits)
This course will introduce students to the decisions on selecting among alternatives for growing organizations, including internal development, licensing and alliances, mergers and acquisitions, and how the resulting business combinations can be governed most effectively to create value for the organization. Students will learn about the relative strengths and weaknesses of the major growth modes, when to use each, how to avoid traps and errors, how managers combine the alternatives as part of a larger growth campaign and how joint value can be shared to maximize partner contributions. Overall, students will learn that how leaders select, implement and manage growth alternatives can influence the trajectory of the firm and its success. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 3550 Leadership of the Future (4 Credits)
In nearly every aspect of life—science, business, pop culture, environment, technology, global politics—we are inundated with data about how much and how fast the world is changing. How will these major shifts impact what we think of as leadership, and how can one develop to be prepared to lead in a fast-moving, volatile, and complex world? Leadership of the Future is a course that takes a deep look at how we’ve thought about what “leadership” is in the past from a business perspective, and considers what the future will require of leaders as they seek to effectively lead and make a difference in a complex world. The course is founded upon an interdisciplinary approach, drawing from a variety of disciplines including psychology, administrative science, literature, medicine, and philosophy. The course will center around behavioral analysis and active reflective practice: together we will think deeply about leadership as a behavior within a particular context, and as a practice to cultivate. Students will articulate a set of leadership development goals for themselves and engage experientially in service of self-observation, personal growth, and learning. Cross-listed with MGMT 4560. Prerequisites: MGMT 2100 and completion of undergraduate core.

MGMT 3560 Leadership of the Future (4 Credits)
In nearly every aspect of life - science, business, pop culture, environment, technology, global politics - we are inundated with data about how much and how fast the world is changing. How will these major shifts impact what we think of as leadership, and how can one develop to be prepared to lead in a fast-moving, volatile, and complex world? Leadership of the Future is a course that takes a deep look at how we’ve thought about what “leadership” is in the past from a business perspective, and considers what the future will require of leaders as they seek to effectively lead and make a difference in a complex world. The course is founded upon an interdisciplinary approach, drawing from a variety of disciplines including psychology, administrative science, literature, medicine, and philosophy. The course will center around behavioral analysis and active reflective practice: together we will think deeply about leadership as a behavior within a particular context, and as a practice to cultivate. Students will articulate a set of leadership development goals for themselves and engage experientially in service of self-observation, personal growth, and learning. Cross-listed with MGMT 4560. Prerequisites: MGMT 2100 and completion of undergraduate core.

MGMT 3700 Stress Management (1-8 Credits)
Exploration of various topics and issues related to management. Prerequisites: Degree checkpoint 2 and MGMT 2100.

MGMT 3710 Business Process Management (4 Credits)
Change is one of the foremost, if not the most important business topic today. To address these rapidly changing critical organizational, management, and technology issues, Business Process Management, Modeling and Analysis has become the preeminent innovative business performance technique over the past five years. This course helps all individuals to understand better Business Process Management, Modeling and Analysis by gaining insights into business process management concepts and principles, the use of process change enablers, a structured business process management methodology, business process management tools and techniques, change management and why organizations fail or succeed in implementing Business Process Management, Modeling and Analysis, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 3720 Knowledge Management (4 Credits)
To become more innovative, responsive to customers and suppliers and adaptable to change, leading organizations are learning how to learn from high numbers of knowledgeable people. This course helps all individuals to understand Knowledge Management by gaining insights into knowledge management concepts and principles, the use of knowledge management enablers, a structured methodology and framework for knowledge management, tools and techniques for knowledge management, effective change management programs for implementing knowledge management, and why organizations fail or succeed in implementing knowledge management, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.
**MGMT 3730 Nongovernmental Organizations and Business (4 Credits)**
Nongovernmental Organizations (NGOs), with increasing credibility and authority, have a measurable impact on the intersection of business, government and society. NGOs are defined broadly as nonstate, nonfirm actors. NGOs may include environmental and consumer groups, business associations, labor unions, human rights organizations, church and religious groups, academic institutions, think tanks, trade and industry associations, and grassroots not-for-profit organizations. NGOs have emerged as important stakeholders in discussions over the terms and conditions under which business, government, multilateral institutions and local communities manage the process of globalization, one of the most complex issues facing public policy makers, corporate executives, and broader society. These NGOs conduct business by undertaking research, organizing boycotts, and often publicizing the shortcomings of multinational corporations in terms of social, ethical, and environmental responsibility. Yet these impressions are only the most public, and often the most negative images of NGO activism. This course examines the intersections of NGOs, MNEs and respective business practices with a goal of developing informed perspectives. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3800 Business Policy and Strategy (4 Credits)**
This course examines the roles and responsibilities of top managers in developing, implementing, and managing an effective organization-wide strategy. Students learn new perspectives and concepts as well as integrate learning from previous course work to solve complex and challenging business problems. Prerequisites: senior standing, MGMT 2850, and BUS 2999.

**MGMT 3980 Internship in Management (1-6 Credits)**
Practical experience (field study); requires written report. Prerequisites: MGMT 2100 and instructor’s permission.

**MGMT 3991 Independent Study (1-10 Credits)**
Independent research/study; requires written report. Prerequisites: MGMT 2100 and instructor’s permission.

**MGMT 3992 Directed Study (1-4 Credits)**

**Marketing**

Office:
Daniels College of Business, Suite 480 Mail Code: 2101 S.University Blvd. Denver, CO 80208
Phone: 303-871-3317
Web Site: http://daniels.du.edu/faculty-research/marketing

While advertising is part of marketing, it is not ALL of marketing. Peter Drucker, a very famous businessperson, describes the role of marketing in business this way: "Because the purpose of business is to create a customer, the business enterprise has two—and only two—basic functions: marketing and innovation. Marketing and innovation produce results; all the rest are costs. Marketing is the distinguishing, unique function of the business.”

In our program, we will help you learn to solve marketing problems, to innovate, to think strategically, critically and creatively about the information with which you are presented, as well as to communicate your thoughts effectively. You will work in teams, you will think globally about marketing, you will be able to recognize the ethical and legal issues with which you may be confronted. You will also consider the digital opportunities available as you practice using your marketing knowledge to create value for customers, shareholders, employees, and other stakeholders of the business.

We will expect you to take responsibility for your learning by attending every class, contributing to your teams and to your class discussions, keeping your word, and reaching your goals.

Marketing is an exciting area that addresses many of the changes taking place in business-to-consumer and business-to-business environments. Our field includes digital and other media promotions including working for either clients or ad agencies, planning social and mobile campaigns, and analyzing the results of your work. We prepare you to go into business-to-business sales or to be part of a global marketing organization, to work in supply chain management or in services marketing. Our internship program is one of the best in the college. You will have many opportunities available to secure at least one internship over the course of your studies. Students have found that the experience gained through the internship process has helped them better understand classroom discussion topics.

Along with the required major courses of consumer behavior, business-to-business marketing, marketing research, international marketing and integrated marketing strategy, you will take four electives chosen from a very broad selection of courses.

Total Credits: 189-190

1. Analytical Inquiry: The Natural and Physical World
2. Scientific Inquiry: Society and Culture
3. INTZ 2501 Exploring Global Citizenship: Preparing for Study Abroad is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### Courses

**MKTG 2800 Introduction to Marketing (4 Credits)**

Marketing is, at its core, the interface a company has with its customers, and what could be more important in business? This introductory course is a must for any business professional, and anyone seeking to be a savvy consumer or to learn about promoting oneself. It is a challenging, hands-on course with an integrated approach to learning the basic fundamentals of the subject. It develops a student's ability to make sound planning decisions using real information from the external environment to determine market feasibility for a real product. The course has a segmented approach, allowing students to practice application of important concepts in the classroom and engage in teamwork. The segments build upon one another to allow students to create a complete and logically reasoned marketing plan for their chosen product. In teams, students prepare a written report and deliver an oral presentation about their product. Prerequisites: (MGMT 2100 and INFO 1020) or Marketing Minor Non-Business 1. Students must earn a minimum grade of C- in MKTG 2800 in order to progress further in MKTG major/minor courses.

**MKTG 2910 Consumer Behavior (4 Credits)**

What's the real reason some consumers want a big SUV? Maybe it's not for off-roading after all! This course is a fascinating look at why consumers buy what they do, and there is often more than meets the eye. CB uses frameworks from psychology and other disciplines to describe how consumers learn and how they make decisions about their purchases. The course also delves deeper into consumer demographic and psychographic characteristics and all of these concepts are then integrated and applied to designing appropriate marketing strategies for different segments. Students have an excellent opportunity to learn more about the human mind and practical applications for marketing efforts. Prerequisites: MKTG 2800 and degree checkpoint 2 or marketing minor.
MKTG 2920 Business-to-Business Marketing (4 Credits)
Have you ever considered how a Fortune 500 company provides new computers for its 5,000-plus employees? Organizations are customers too, and the B2B market is the largest of all the markets, far surpassing the consumer market in dollar value. While the lines between B2B and B2C marketing are often blurred, B2B marketing strategies are often unique and more specialized. While consumers choose products based not only on price but on popularity, status, and other emotional triggers, B2B buyers make decisions focused more on valuable relationships, price and profit potential. Fostering relationships through compelling and relevant content is key. This calls for unique marketing techniques in approaching and building relationships with organizational customers, the dynamics of which will be explored and discussed in this class. Prerequisite: MKTG 2800.

MKTG 2930 Methods of Marketing Research (4 Credits)
The modern marketing department is held just as responsible for the dollars it spends as any other business function. To be efficient, marketing professionals must learn to gather the information they need to make evidence-based decisions, understand current and potential target markets, and even generate new ideas. This course covers methods of collecting and analyzing market-related data. In addition to learning basic research concepts, students design their own surveys, collect data, conduct data analysis in Excel, and present results. Class activities in recent quarters have included a live focus group with the clothing retailer, Sport Couture and as a guest speaker, VP of research from Media News Group. The useful aspects of handling data in this course add essential elements to a student's toolkit for professional practice. Prerequisites: MKTG 2800 and INFO 1020.

MKTG 2945 Global Product Innovation (4 Credits)
In this course, students learn how products are introduced and managed including developing an understanding of the product innovation process. Companies exist, thrive and prosper by delivering products and services to their customers. As customer needs and desires change and competitive offerings make product selection more difficult, companies must develop products and services that most closely match customer requirements at a maximized speed to market. This course provides students with principles, philosophies, concepts, techniques, processes and models of new product management, and also with the practical aspects of how to analyze and manage new product development issues and situations in the turbulent environments facing business organizations. Prerequisite: MKTG 2800.

MKTG 2992 Directed Study (1-4 Credits)

MKTG 3110 The Power of Professional Selling (4 Credits)
Do you want to have multiple job offers when you graduate? Studies suggest that students who embrace sales as a professional career are in greater demand than any other type of job. This course explores personal selling as an integral part of the promotional mix and an extension of the marketing concept. Students learn how to create value for customers by producing and presenting a consultative sales strategy. The course work includes opportunities to put theory into action through a series of team challenges that enable students to hone individual selling and presentation skills. Prerequisite: MKTG 2800.

MKTG 3130 Selling in a Digital World (4 Credits)
Selling is no longer about knocking on doors and cold-calling strangers. Business has been disrupted by the integration of digital processes and communication. As power continues to shift to customers, sales professionals must be equipped to build relationships and create value in a digital world. In this course, students will learn how to leverage the power of digital selling in the way salespeople manage interactions with customers, solve problems, and measure their impact. Through lecture, activities, and interactions with sales professionals, students will build on their foundation of sales concepts to learn how to create value for their future stakeholders. Prerequisites: MKTG 2800 and MKTG 3110.

MKTG 3140 Sales Management and Leadership (4 Credits)
Salespeople are the primary channel of communication between enterprise and customers and therefore, managing them is of paramount importance to sales organizations. Studies suggest that students who undertake sales curriculum are more likely to land a sales job upon graduation and have a higher success rate in their first position. This course uses lectures, case studies, and role-plays to cover critical topics in salesforce management and sales leadership including recruiting, training, deployment, compensation, and evaluation. Prerequisites: MKTG 2800, MKTG 3110.

MKTG 3360 Global Transportation Systems (4 Credits)
Managing a global supply chain involves applying increased discipline to a process with many parts. The key parts of the supply chain over which a company has the least control are the transportation carriers that connect a company with its customers and suppliers in all parts of the world. Global Transportation Systems covers the various modes of transportation including ocean vessel, barge, railroads, truck and air freight. The course touches on the operating characteristics, service, infrastructure, sustainability, ownership, finances, prices and each mode’s place in the global supply chain both across borders and domestically in several target countries including the U.S. In addition Global Transportation Systems provides students with an understanding of how public policy affects transportation infrastructure investment, security, cost and service around the world. Cross listed with MKTG 4360. Prerequisite: MKTG 2800.

MKTG 3370 Marketing Channels and Logistics (4 Credits)
Of the four Ps (product, price, promotion, and place), MKTG 3370 explores the “place” in a firm’s marketing efforts to gain sustainable competitive advantage. Marketing channels are the routes to market used to sell every product and service that consumers and business buyers purchase everywhere in the world. Logistics is the other half; delivering the right product at the right time to the right place in the right quantities to keep satisfied loyal customers, a crucial element in making the sale. In this course, students learn the design of marketing channels to deliver sustainable competitive advantage while building channel power and managing channel conflict. Sound strategic and tactical channel decisions are taught via an on-line computer simulation. Logistics design and execution includes best practices for demand management, order management, customer service, inventory strategy, transportation, and distribution, all of which are taught through lecture, hands-on exercises, and case studies of the world’s best supply chains. Cross listed with MKTG 4370. Prerequisite: MKTG 2800.
MKTG 3375 Strategic Sourcing (4 Credits)
Current businesses face relentless pressure to provide additional value in an ever more competitive world. Globalization of world markets has reconfigured supply networks across the globe, causing increasing complexities and challenges in sourcing. In this course, the student learns about the strategic sourcing process, from the development of a sourcing strategy to establishing, managing, and optimizing the firm's supply base. A framework for aligning corporate, business unit and functional department objectives with a sourcing strategy for each commodity purchased by the firm will be presented, along with spend analysis, portfolio analysis, and other best practices for improving a firm's cost and financial performance through improved supply chain performance. Cross listed with MKTG 4375. Prerequisite: MKTG 2800.

MKTG 3380 Supply Chain Management (4 Credits)
Today's economy of globally sourced manufacturing, developing markets, synchronized e-commerce, international trade lanes, and intertwined economies demand supply chains of global reach to bring goods and services from around the world to local stores or even the consumer's front door. This course addresses the challenges and illustrates the tools required to build, maintain, and expand global supply chains. The course develops the ability to make sound strategic, tactical, and operational supply chain decisions via an on-line simulation tool, and superior supply chain design and performance is taught through in-depth case studies from the world's top 25 supply chains. Students connect improvements in supply chain design and performance to the financial performance of a firm. Cross listed with MKTG 4380. Prerequisite: MKTG 2800.

MKTG 3400 Introduction to Advertising (4 Credits)
Tap into your creativity and get some practical experience with this popular and omnipresent form of promotion! This exciting and dynamic course is intended to give the student a firm understanding of the principles and practice of advertising. It includes an introduction to advertising agency operations, and the many department functions. With "agency" team members, the student creates an advertising campaign, from strategy brief to execution, and present the work to an actual client. The real-life aspect of this course creates a memorable and very useful experience for undergraduate students. Recent clients for student projects have included McDonald's and Vail Resorts. Prerequisite: MKTG 2800.

MKTG 3415 Integrated Marketing Communication (4 Credits)
IMC is a critical component of marketing strategy and is vital to business success in today's economy. Organizational, technological, and social trends of the past few years have considerably impacted marketing communications by necessitating new communication strategies and adding new delivery tools (e.g., digital and social). Thus, it is important to integrate all marketing communication activities into one master plan. This course is based upon the notion that marketing communications include much more than advertising. The course provides students with a foundation in the development and execution of communications strategies for any organization (large, small, public, or private). Primary emphasis is placed on consumer insight, branding, market segmentation and positioning, message strategy, sales promotion and the execution of marketing communications through appropriate media technologies. Students will develop an understanding of marketing communications practice through readings, lectures, case analysis and discussions. Prerequisites: MKTG 2800, MKTG 2910, and MKTG 2930.

MKTG 3425 Brand Management (4 Credits)
How do leading organizations create compelling brands that inspire trust, build a sense of community, and fuel loyalty? As consumers find their digital voice, how are brands co-created by firms and users alike? And what can brand managers do to insure their brand equity is sustainable throughout the product life cycle? In this course, you'll learn the elements of brand management based on the consumer-based brand equity model, including a deep understanding of the "design and implementation of marketing programs and activities to build, measure, and manage brand equity." (Keller 2008, p.xv). Prerequisite: MKTG 2800.

MKTG 3435 SXSWi: Marketing, Technology & Innovation (4 Credits)
This class is focused on documenting/sharing lessons learned from the SXSWi conference in Austin Texas, the premier innovation conference in the US. The course is divided into two distinct halves. First, we will research the SXSWi sessions around subject matter and speaker background as well as planning the final deliverable that summarizes the entire SXSWi event. The second half includes participation in the conference to learn the most up-to-date digital marketing techniques in social, mobile, data and usability. Prerequisite: MKTG 2800.

MKTG 3450 Advertising Media Strategy (4 Credits)
This course is based upon the notion that marketing communications include much more than advertising. The course provides students with a foundation in the development and execution of communications strategies for any organization (large, small, public, or private). Primary emphasis is placed on consumer insight, branding, market segmentation and positioning, message strategy, sales promotion and the execution of marketing communications through appropriate media technologies. Students will develop an understanding of marketing communications practice through readings, lectures, case analysis and discussions. Prerequisites: MKTG 2800, MKTG 2910, and MKTG 2930.

MKTG 3460 Advertising Creative Strategy (4 Credits)
This popular course provides an opportunity to go even further with advertising concepts and strategy. This course is designed to let the student experience the life of an ad agency team member. Students learn what it takes to collaborate with a team in creating brand-building, power ideas, and are given a campaign assignment by a "real world" client. Students work from strategy brief to execution, and present the ideas to the group, at times individually, and at times as a team. The course includes evaluation of one's own work and that of others, application of theories about the presentation of information and images, and strengthening of presentation skills. The student's work in developing a creative campaign should be based on past learning about advertising as well as class lectures and handouts. Creativity is emphasized in all tasks, from ad design through media selection to presentations. Recent clients for student projects include Nestle, Purina, and Leo Burnett USA. Prerequisite: MKTG 2800.
MKTG 3470 Public Relations (4 Credits)
Public relations is the practice of managing the spread of information between an individual or an organization (such as a business, government agency, or a nonprofit organization) and the public. You will learn how to gain exposure for an organization or individual, which appeals to their audiences using topics of public interest and news items that do not require direct payment. You will learn how to create coverage for clients for free, rather than paying for advertising. An example of good public relations is generating an article featuring a client, rather than paying for the client to be advertised next to the article. You will identify how to inform the public, prospective customers, investors, partners, employees and other stakeholders and ultimately to persuade them to maintain a certain view about the organization, its leadership, products, or political decisions. Prerequisite: MKTG 2800.

MKTG 3475 Mobile Marketing (4 Credits)
Smartphones are the device for today's consumer. Mobile usage easily eclipses all other digital venues and you will be learning how to harness this ever-evolving field. Knowledge of mobile search, mobile applications, mobile advertising and location-based services are essential for today's business leaders. This course will enable students to build creative mobile marketing campaigns that complement digital and traditional marketing strategies. This fast-paced course is a must for people interested in marketing. Prerequisite: MKTG 2800.

MKTG 3480 Foundations of Digital Marketing (4 Credits)
Knowing how to use digital marketing tools as part of an integrated marketing strategy is critical in today's marketplace. This course provides the knowledge and skills to plan and implement a digital marketing strategy using three powerful digital marketing elements: (1) UX/UI - User eXperience design is one of the most difficult aspects for businesses to define and yet it's essential to map out when creating a holistic strategy. User Interface design is one part of the user experience and we will work together to show you best-in-class examples. (2) Facebook Advertising – Facebook is quickly becoming the hyper-targeted advertising platform for businesses of any size. You will walk through Facebook's Blueprint training to help you understand what types of digital advertising are possible. (3) Email Marketing – Email has long been a staple in digital marketing. We will show you the ins and outs of this digital medium and teach you how to take control of this evolving channel. Prerequisite: MKTG 2800.

MKTG 3485 Search Engine Marketing: Google Analytics & AdWords (4 Credits)
The digital marketing landscape has thousands of tools that marketers can utilize to increase revenue, execute on strategies and develop deep brands. This course will review the most essential of those tools: Google Analytics and Google AdWords. Our goal is to enable students to attain individual certification in Google Analytics and begin the process of getting Google AdWords Fundamentals certified. You will be working with real-world clients, helping them increase revenue! Prerequisite: MKTG 2800.

MKTG 3490 Social Media Marketing (4 Credits)
Social media marketing is an evolving field with consumers driving the changes marketers are seeing. Based on your business model, social media may be more than just distribution and prosumers may be a part of your long-term business strategy. This class illuminates the increasing importance of social media as it relates to consumer behavior and the purchase cycle. This course also develops a strategic model for a diverse range of businesses (B2B, B2C, Product, Service, Online, Online with Brick and Mortar) that empowers students as a marketer to determine their best strategy. Cross listed with MKTG 4815. Prerequisite: MKTG 2800.

MKTG 3495 Tech in Marketing: Design Tools and Digital Foundations (4 Credits)
“Software is eating the world.” That was the quote from Marc Andreesen way back in 2011. His point was now that software had disrupted the tech industry, it was now evolving into every other industry. Agriculture. Mass transit. Construction. Everything. This prediction has become true with companies like Google and Uber. We’re at a point where coding/technology are now a matter of literacy. We are going to work together as a class to make you more literate. We are going to learn how to utilize digital design tools such as Adobe Photoshop and Illustrator to create brand imagery. We’ll then move on to learn HTML/CSS and APIs: the building blocks of the internet. We’ll also spend some time prototyping software such as Axure and tap into memes and Gifs. This will be a tactical, hands-on class. Cross-listed with MKTG 4845. Prerequisite: MKTG 2800.

MKTG 3605 Current Marketing Perspectives (4 Credits)
Like most disciplines, marketing is evolving constantly. One can learn about marketing and its classic terms and notions by reading a textbook. But to familiarize oneself with the current pressing issues, emerging ideas, and innovative applications, one must consult both industry practitioners and academic gurus. In this course, students and faculty will meet and interview several top business executives in Denver area as well as visit their facilities. Such interaction with the managers and faculty will help the students understand the interface of theory and application. In addition, by identifying the current issues in marketing and learning how to develop strategies to handle them, students add to their preparation for the job market. Cross-listed with MKTG 4605. Prerequisite: MKTG 2800.

MKTG 3630 International Marketing (4 Credits)
The shrinking planet and constant pressure to maintain a firm’s growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these international environmental factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international context. It is designed based on a combination of lectures and discussions of relevant concepts, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisite: MKTG 2800.
MKTG 3635 International Consumer Behavior (4 Credits)
The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond one's home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Cross-listed with MKTG 4635. Prerequisites: MKTG 2910 or instructor permission.

MKTG 3640 Services Marketing (4 Credits)
The unique challenges of selling the "invisible" characteristics inherent to services marketing are identified and addressed in this course. You will investigate customer requirements, alignment of service design and standards, service failure and recovery strategies, and the complexity of long-term customer relationships relevant to service organizations. Because of the difficulty in describing and depicting service development, you will design a service blueprint that serves as an innovative tool in the strategic process. In addition to relevant industry speakers, experiential learning through field trips contributes significantly to your overall understanding of the service environment. Prerequisite: MKTG 2800.

MKTG 3650 Innovation Strategies (4 Credits)
This course is a fresh and dynamic course, which both challenges and leverages traditional marketing thinking in new and creative ways. Students read a variety of pieces from contemporary thought-leaders in the world of business, marketing, philosophy, and education to give context and perspective to innovative thinking and ideation techniques which are relevant and necessary for today’s marketing leaders. Hands-on activities, reality-based projects, and interactive debates are the hallmarks of this course. Recent guest speakers have included William Espey (CMO, Chipotle), Justin Breseler (VP Marketing, Visit Denver) and recent alumni. One past Innovation Strategies student recently said, “After going through this intellectually stimulating class marketing no longer feels like consumer manipulation but rather it feels like strategy, design, and solutions that can come together and make culture and business better – it is really important.” Prerequisite: MKTG 2800.

MKTG 3660 Sports & Entertainment Marketing (4 Credits)
There are few products about which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorship or driving event ticket sales. Cross listed with MKTG 4660. Prerequisite: MKTG 2800.

MKTG 3704 Topics in Marketing (1-4 Credits)
Topics in Marketing.

MKTG 3705 Topics in Marketing (1-4 Credits)
Prerequisites: MKTG 2800 and Daniels UG Checkpoint 2 1 or Marketing Minor Non-Business 2 1.

MKTG 3950 Integrative Marketing Strategy (4 Credits)
You may have heard the saying that “The journey is as important as the destination.” In organizations the corollary is the strategic planning as important as the plan. As a result, the planning process has become increasingly important for all business functions (e.g., production, accounting, R & D, marketing). The objective of this course is to enable students to utilize a rigorous planning process to develop marketing programs. This activity involves integrated problem solving using concepts, theories and primary and secondary information, and is characterized by logical use of facts leading to alternatives, which in turn lead to solutions. By the end of the course students should be able to develop effective marketing programs, and to understand the applications and limitations of the principal planning tools a marketing manager has at his/her disposal. This course needs to be taken within 2 quarters of graduation. Prerequisites: MKTG 2910, MKTG 2920, and MKTG 2930.

MKTG 3980 Marketing Internship (1-8 Credits)
We learn by doing. That’s what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the U.S. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein’s, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will students earn school credit, but also they may very well land a paid internship and eventually a full-time job. Course requirements include an internship report that covers the students’ experience on the job, a study of the industry, and what they learned from their company. It’s a win-win course where students put into practice the marketing concepts they have learned at DU, and discover new marketing tactics from their company co-workers. “Thanks to the University of Denver for fostering this partnership and providing such great students” (NCM Media Networks). Prerequisites: marketing major and instructor’s permission.

MKTG 3991 Independent Study (1-10 Credits)
Independent research/ study; requires written report. Restricted to marketing majors. Prerequisites: Marketing major and instructor’s permission.

MKTG 3992 Directed Study (1-4 Credits)
The Department of Mathematics offers a bachelor of arts in mathematics, bachelor of arts in mathematics with concentration in finance and bachelor of science in mathematics. These programs provide a strong foundation in theoretical and applied mathematics with particular emphasis on the development of logical and analytical problem-solving skills. This major is often combined with a major or minor in natural sciences, computer science, business and related fields. It is an excellent preparation for graduate school in quantitative subjects. Math majors find jobs in academia, high-tech industry, financial industry and government agencies, with positions including research mathematician, applied mathematician, engineer, computer programmer, financial analyst, economist, actuary and teacher.

**Mathematics**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 76))

This degree requires completion of 48 credits of MATH courses numbered 1951 or higher, including at least 20 credits at the 3000-level or higher. The following courses are required:

<table>
<thead>
<tr>

4

### MATH 3170
Introduction to Abstract Algebra
4

A MATH course at the 3000-level or higher that (a) is different from MATH 3161 and MATH 3170 and (b) has either MATH 2200 or another 3000-level MATH course as a prerequisite.

### Additional courses
12

### Total Credits
52

### Notes
- In addition, students must complete the ETS Major Field Test in Mathematics as instructed by the department, and satisfy all requirements for the Bachelor of Science degree as outlined in the University of Denver Undergraduate Bulletin.
- It is recommended that students take MATH 3151 Advanced Linear Algebra after MATH 2200 Mathematical Reasoning & Proof but before MATH 3161 Introduction to Real Analysis and MATH 3170 Introduction to Abstract Algebra.
- Students are encouraged to complete the analysis sequence MATH 3161 Introduction to Real Analysis, MATH 3162 Introduction to Real Analysis II, MATH 3110 Topology, or the algebra sequence MATH 3170 Introduction to Abstract Algebra, MATH 3166 Group Theory, MATH 3176 Rings and Fields.

## Bachelor of Arts with a Concentration in Finance Major Requirements
(183 credits required for the degree (p. 76))

This degree requires completion of 48 credits of MATH courses numbered 1951 or higher, including at least 20 credits at the 3000-level or higher. In addition, ACTG 2200, FIN 2800 and at least 12 credits in FIN courses at the 3000-level or higher are required. Students should work with Daniels advisors in order to make appropriate choices. The following courses are required:

<table>

### Notes
- In addition, students must complete the ETS Major Field Test in Mathematics as instructed by the department, and satisfy all requirements for the Bachelor of Arts degree with concentration in Finance as outlined in the University of Denver Undergraduate Bulletin.
- Students may enroll in ACTG 2200 Introduction to Financial Reporting only if they are formally enrolled in this degree, have completed MATH 2200 Mathematical Reasoning & Proof and have Microsoft Excel certification.
• Students in this program should work with Daniels advisors in order to make appropriate choices for 3000-level FIN electives, and ensure that prerequisites are followed.

• Students in this degree are not eligible for a Business Administration minor or a Finance minor. Good choices for complementary minors include economics, statistics, or computer science.

SECONDARY MAJOR
48 credits. Same requirements as for BA degree.

Minor Requirements
This minor requires completion of at least 20 credits in MATH courses numbered 1951 or higher. COMP 2300 Discrete Structures in Computer Science may be counted toward the math minor. Courses not covered by these requirements must be approved in writing by a mathematics faculty advisor.

Requirements for Distinction in the Major in Mathematics
• Minimum 3.5 major GPA
• Completion of a thesis

The course plans below are intended to give students an example of how they might complete their degree requirements in four years. All of the required courses are included, but the quarters in which certain courses are taken can vary significantly from student to student.

For the first quarter of the first year, math majors are typically advised to take an FSEM, at least one math course (MATH 1951, or something else depending on credit earned through examinations [http://bulletin.du.edu/undergraduate/undergraduateprograms/examinations]) and enough other credits so that the student is enrolled in 16 or more credits total. Those additional other credits may include common curriculum courses, courses in a second major or minor, or electives.

Total Credits: 193-194

1INTZ 2501 (http://bulletin.du.edu/search/?P=INTZ%202501) is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

2Besides MATH 3080, MATH 3161 and MATH 3151 (or MATH 3170), an additional 8 MATH credits at the 3000-level are required

Courses

**MATH 1010 Elements of College Algebra (2,4 Credits)**
This course is designed to review the required algebra skills to be successful in Business Calculus. The following topics are covered: review of basic algebra, solving equations and inequalities, rectangular coordinate systems and graphing, polynomial and rational functions, exponential and logarithmic functions, and solving exponential and logarithmic equations. Students who completed a MATH course numbered 1200 or higher may not take this course.

**MATH 1070 College Algebra and Trigonometry (4 Credits)**
Selected topics in algebra and analytic trigonometry intended to prepare students for the calculus sequence. Cannot be used to satisfy the Analytical Inquiry: The Natural and Physical World requirement. Students who completed a MATH course numbered 1951 or higher may not take this course.

**MATH 1150 Foundations Seminar (4 Credits)**
The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1200 Calculus for Business and Social Sciences (4 Credits)**
This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models. Students are required to attend weekly labs. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1951 Calculus I (4 Credits)**
Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

**MATH 1952 Calculus II (4 Credits)**
Differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisite: MATH 1951.

**MATH 1953 Calculus III (4 Credits)**
Integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisite: MATH 1952 OR math 1962.
MATH 1962 Honors Calculus II (4 Credits)
Same topics as MATH 1952 treated rigorously and conceptually. Topics include differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisites: MATH 1951 and permission of instructor.

MATH 1963 Honors Calculus III (4 Credits)
Same topics as MATH 1953 treated rigorously and conceptually. Topics include integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisites: MATH 1952 or MATH 1962 and permission of instructor.

MATH 1992 Directed Study (1-10 Credits)

MATH 2050 Symbolic Logic (4 Credits)
Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

MATH 2060 Elements of Linear Algebra (4 Credits)
Matrices, systems of linear equations, vectors, eigenvalues and eigenvectors; idea of a vector space; applications in the physical, social, engineering and life sciences. Prerequisite: MATH 1200 or MATH 1951.

MATH 2070 Introduction to Differential Equations (4 Credits)
Solution of linear differential equations; special techniques for nonlinear problems; mathematical modeling of problems from physical and biological sciences. Prerequisite: MATH 1953 or MATH 1963.

MATH 2080 Calculus of Several Variables (4 Credits)
Multivariable processes encountered in all sciences; multiple integration, partial differentiation and applications; algebra of vectors in Euclidean three-space; differentiation of scalar and vector functions. Prerequisite: MATH 1953 or MATH 1963.

MATH 2200 Mathematical Reasoning & Proof (4 Credits)
Introduction to theory of sets; relations and functions; logic, truth tables and propositional calculus; proof techniques; introduction to combinatorial techniques.

MATH 2992 Directed Study (1-10 Credits)

MATH 3000 The Real World Seminar (1 Credit)
Lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with COMP 3000.

MATH 3010 History of Mathematics (4 Credits)
This course surveys major mathematical developments beginning with ancient Egyptians and Greeks and tracing the development through Hindu-Indian mathematics, Arabic mathematics, and European mathematics up to the 18th century. Prerequisite: MATH 1953 or MATH 1963.

MATH 3040 Lattices and Order (4 Credits)
Ordered sets, lattices as relational and as algebraic structures, ideals and filters, complete lattices, distributive and modular lattices. Prerequisite: MATH 2200.

MATH 3050 Set Theory (4 Credits)
Zermelo-Fraenkel axioms, axiom of choice, Zorn's Lemma, ordinals, cardinals, cardinal arithmetic. Prerequisite: MATH 2200.

MATH 3060 Mathematical Logic (4 Credits)
Classical propositional calculus (deductive systems and truth-table semantics), first-order logic (axiomatization and completeness), elements of recursion theory, introduction to nonclassical logics. Prerequisite: MATH 2200.

MATH 3080 Introduction to Probability (4 Credits)
Basic probability models, combinatorial methods, random variables, independence, conditional probability, probability laws, applications to classical problems. Prerequisite: MATH 1953 or MATH 1963.

MATH 3090 Mathematical Probability (4 Credits)
Limit theorems for independent random variables, multivariate distributions, generating functions. Prerequisites: MATH 2080 and MATH 3080.

MATH 3110 Topology (4 Credits)
Point set topology including topological spaces, connectedness, compactness and separate axioms; preparation for advanced courses in analysis. Prerequisite: MATH 3161. Cross listed with MATH 4110.

MATH 3151 Advanced Linear Algebra (4 Credits)
Vector spaces, linear mappings, matrices, inner product spaces, eigenvalues and eigenvectors. Prerequisite: MATH 2060 and MATH 2200.

MATH 3161 Introduction to Real Analysis (4 Credits)
A theoretical introduction to the structure of real numbers, to convergence of sequences and series, and to the topology of the real line, including limits and continuity. Prerequisites: MATH 2080 and MATH 2200.

MATH 3162 Introduction to Real Analysis II (4 Credits)
A rigorous introduction to the analysis of functions of a real variable, including differentiation, Riemann integration, and the notions of pointwise and uniform convergence for sequences of functions. Prerequisite: MATH 3161.
MATH 3166 Group Theory (4 Credits)
Groups and homomorphisms, isomorphism theorems, symmetric groups and G-sets, the Sylow theorems, normal series, fundamental theorem of finitely generated abelian groups. Cross listed with MATH 4166. Prerequisite: MATH 3170.

MATH 3170 Introduction to Abstract Algebra (4 Credits)
Examples of groups, permutations, subgroups, cosets, Lagrange theorem, normal subgroups, factor groups, homomorphisms, isomorphisms, rings, integral domains, quaternions, rings of polynomials, Euclid algorithm, ideals, factor rings, maximal ideals, principal ideals, fields, construction of finite fields. Prerequisite: MATH 2060 and MATH 2200.

MATH 3176 Rings and Fields (4 Credits)
Rings, domains, fields; ideals, quotient rings, polynomials; PIDs, UFDs, Euclidean domains; maximal and prime ideals, chain conditions; extensions of fields, splitting fields, algebraic and transcendental extensions; brief introduction to Galois theory. Cross listed with MATH 4176. Prerequisite: MATH 3170 or equivalent.

MATH 3260 Metric Spaces (4 Credits)
Metric spaces and continuous functions; completeness and compactness; examples including norm spaces; pointwise and uniform convergence; Baire Category Theorem. Cross listed with MATH 4260. Prerequisite: MATH 3161 or equivalent.

MATH 3311 Linear Programming (4 Credits)
Linear optimization models, simplex algorithm, sensitivity analysis and duality, network models, dynamic programming, applications to physical, social and management sciences. Prerequisite: MATH 2060.

MATH 3312 Markov Chains (4 Credits)
Discrete-time and continuous Markov Chains, ergodic theorems, random processes, elementary queueing theory, applications. Prerequisite: MATH 2060 and MATH 3080.

MATH 3400 Introduction to Geometry (4 Credits)
Specific geometrical systems including finite, Euclidean, non-Euclidean and projective geometries. Prerequisite: MATH 2200.

MATH 3451 Chaos, Dynamics & Fractals (4 Credits)
Introduction to one-dimensional dynamical systems, fractals; fixed and periodic points; sources and sinks; period doubling and tangent node bifurcations; chaotic dynamical systems; Sarkovskii’s Theorem. Prerequisite: MATH 3161.

MATH 3550 Introduction to Theory of Numbers (4 Credits)
Concepts of nonanalytic number theory and its history; prime numbers, divisibility, continued fractions, modular arithmetic, Diophantine equations and unsolved conjectures. Prerequisites: MATH 2200.

MATH 3651 Ordinary Differential Equations (4 Credits)
Modeling of phenomena by ordinary differential equations; techniques of analysis and solution of such equations; oscillation theory and boundary value problems, power series methods, special functions, Laplace transforms and difference equations. Prerequisites: MATH 2060 and MATH 2070.

MATH 3661 Partial Differential Equations (4 Credits)
First and second order linear equations, Fourier series, the wave equation, the Cauchy problem, the heat equation, maximum principles, Laplace's equation, Green's functions. Prerequisites: MATH 2070 and MATH 2080.

MATH 3701 Combinatorics (4 Credits)
The principle of inclusion and exclusion, elementary counting techniques, systems of distinct representatives, partitions, recursion and generating functions, Latin squares, designs and projective planes. Prerequisite: MATH 2200.

MATH 3705 Topics in Mathematics (4 Credits)
Varying selected advanced topics in mathematics, depending on student demand and instructor interest.

MATH 3710 Graph Theory (4 Credits)
Paths, cycles, trees, Euler tours and Hamilton cycles, bipartite graphs, matchings, basic connectivity theorems, planar graphs, Kuratowski’s theorem, chromatic number, n-color theorems, introduction to Ramsey theory. Prerequisite: MATH 2200.

MATH 3720 Coding Theory (4 Credits)
Goals of coding theory and information theory, instantaneous and Huffman codes, Shannon theorems, block and linear codes, generating and parity-check matrices, Hamming codes, perfect codes, binary Golay code, Reed-Muller codes, cyclic codes, BCH codes, Reed-Solomon codes, ideas of convolutional and turbo codes. Prerequisite: MATH 3170.

MATH 3851 Functions Complex Variable (4 Credits)
Complex numbers, analytic functions, complex integration, series expansions, residue theory, conformal maps, advanced topics and applications. Prerequisites: MATH 2060 and MATH 2080 and MATH 2200.

MATH 3991 Independent Study (1-10 Credits)
Cannot be arranged for any course that appears in regular course schedule for that particular year.

MATH 3992 Directed Study (1-10 Credits)

MATH 3995 Independent Research (1-10 Credits)
The Department of Media, Film and Journalism Studies is devoted to exploring the ways in which television, film, radio, print, web and social media connect individuals with the world and how these mediated relationships help shape the societies in which people live. The department has an innovative and creative faculty with many areas of specialization. Faculty expertise is centered in these areas of study:

- Digital media studies: Web and multimedia design, programming, digital video/audio, influence of digital media on individuals, culture and society
- Film studies and production: film and digital video production; narrative, documentary and experimental styles; script/screenwriting; film, broadcasting and cable-casting history and criticism
- Journalism studies: online journalism, politics and media, activist and community media, newswriting, design and layout, media law, policy and ethics
- Media studies: media and society; interactive and digital media; media influence; globalization and media; history and future of the media industries; social, political, economic and cultural implications of media practices and processes; reading and analysis of media texts
- Strategic communication: public relations, communication campaigns, health communication, global and multicultural communication, branding, media law, policy and ethics, advertising and audience research

The four majors all provide the theoretical grounding and leading-edge experience necessary to address the complex challenges of mediated communication. We also offer a minor in film/media studies and production.

The department also offers internship experiences with local, regional, national and international placements. Career opportunities for graduates in communications, film and television, journalism and digital media studies include a wide range of positions in business, nonprofit organizations, media, government and education.

**Film Studies and Production**

The film studies and production major facilitates a solid grounding in the history, theory, production and criticism of motion picture arts. Students acquire critical skills in the reading and analysis of media texts together with those involved in various modes of motion-picture production. Students are encouraged to consider the consequences and ethical implications of the approaches to style and content they choose, and are encouraged to situate their work within the many historical contexts presented in the various production, history and criticism classes. The major teaches narrative, documentary and experimental modes of script/screenwriting and filmmaking; establishes a technical proficiency in camera use, lighting, digital editing software and sound design; and develops the ability to write script treatments and project proposals, as well as critical arguments about media representations and constructions.

**Bachelor of Arts Major Requirements**

### Documentary Sequence
Journalism Studies

Students are encouraged to develop understandings of the media through coursework that aims to challenge them and prepare them for the changing journalism environment by developing their basic understandings in law, ethics, theory and history of the media.

Total Credits 40
1 Must have completed 12 credits in the major, including MFJS 2140 Newswriting and Reporting, and MFJS 2240 Online and Visual Journalism; and must have a 3.0 GPA.

2 Approved by the student's advisor.

## Media Studies

This major is designed for students who want to gain a broad knowledge of media industries and of media studies grounded in history, foundations, globalization and media theory. It is also intended to take advantage of the particular skills and resources of the faculty in the Department of Media, Film and Journalism Studies. Contemporary communications media—including traditional mass media as well as interactive and digital media—are integral to political, economic and cultural life today. The major emphasizes course work that examines the role and influence of media in society from various perspectives.

---

1. Must have completed 12 credits in the major, including MFJS 2140 Newswriting and Reporting, and MFJS 2240 Online and Visual Journalism; and must have a 3.0 GPA.
2. Approved by the student's advisor.
Strategic Communication

The strategic communication major emphasizes communication theory and practice, grounded in history and strategic planning. This major introduces students to the concepts, skills and issues associated with different types of public information campaigns and other forms of strategic messaging. Students benefit from the varied expertise of our faculty in nonprofit, international, intercultural, health, corporate, crisis and political messaging as they learn what it means to be a strategic, ethical and culturally sensitive communicator in the fields of public relations, advertising and health communication.

1 Prereq: For general media internships (such as media management), students must complete 12 credits in the major, including two of the Foundational courses (MFJS 2000, 2200, 2210, 2280); must also have a 3.0 GPA. OR, for topic-specific internships (such as Film, Strategic Communication or Journalism), students must complete 12 credits in the major including the following two courses from that area: Film: MFJS 2000 & MFJS 3215 Strategic Communication: MFJS 2400 & MFJS 3410 Journalism: MFJS 2140 & MFJS 2240 And must have a 3.0 GPA.
MFJS 2290  Innovations in Media and Communications
MFJS 3020  Media Effects
MFJS 3110  Audience Research
MFJS 3150  Activist Media: A Historical Overview 1960-Present
MFJS 3160  Networked Journalism
MFJS 3700  New Media Law & Regulation

Writing, Design, Production  8
Select two of the following:
- MFJS 2140  Newswriting & Reporting
- MFJS 2240  Online & Visual Journalism
- MFJS 3201  Digital Graphic Design
- MFJS 3208  Narrative and Longform Journalism
- MFJS 3215  Introduction to Field Production & Editing
- MFJS 3310  Advanced Newswriting & Reporting
- MFJS 3330  Broadcast & Video Journalism
- MFJS 3501  Web Design & Content Development
- MFJS 3503  Social Media Strategies
- MFJS 3504  Advanced Multimedia Storytelling and Publishing
- MFJS 3506  Audio Documentaries
- MFJS 3852  Advanced Design, Layout, and Editing

Interterm or Summer Courses
These courses are offered intermittently. They can be taken in lieu of MFJS 3420: Strategic Communication Seminar, or as electives toward the major.
- MFJS 3200  (Crisis Communications or Special Events Planning)

Total Credits  40

1  Must have completed 12 credits in the major, including MFJS 2400 Strategic Communication Planning, and MFJS 3410 Strategic Messaging; And must have a 3.0 GPA

Requirements for Distinction in the Major in Film Studies and Production
For distinction in the Film Studies and Production major, a student must have a 3.75 cumulative GPA and a 3.8 GPA in the major.

Requirements for Distinction in the Major in Journalism Studies
For distinction in the Journalism Studies major, a student must have a 3.75 cumulative GPA and a 3.8 GPA in the major.

Requirements for Distinction in the Major in Media Studies
For distinction in the Media Studies major, a student must have a 3.75 cumulative GPA and a 3.8 GPA in the major.

Requirements for Distinction in the Major in Strategic Communication
For distinction in the Strategic Communication major, a student must have a 3.75 cumulative GPA and a 3.8 GPA in the major.

BA in Media, Film and Journalism Studies
MFJS 2400 Strategic Communication Planning (4 Credits)
This course introduces students to foundational principles in strategic communication and covers both public relations and advertising. Students learn and apply the elements of a comprehensive strategic communication plan, including conducting research, setting communication goals, designing messaging strategies and tactics, and evaluating the plan’s effectiveness. An emphasis on ethical communication practices is central to the course. Prerequisite: sophomore standing.

Courses
MFJS 2000 Introduction to Film Criticism (4 Credits)
Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2140 Newswriting & Reporting (4 Credits)
Fundamentals of newswriting and reporting for print and broadcast journalism. Laboratory fee required.

MFJS 2150 Scriptwriting (4 Credits)
Fundamentals of writing for film and television. Cross listed with MFJS 4450. Prerequisite: MFJS 2000 or permission of instructor.

MFJS 2200 Emergent Digital Practices and Cultures (4 Credits)
This course introduces students to the historical, economic, legal and social contexts of emergent digital practices and explores the various ways technology shapes and is shaped by culture. The rapid growth of participatory culture online through, for example, social networking sites, interactive news sites, gaming, mobile apps, and blogging has significant social implications and brings up issues of privacy, intellectual property, and the nature of community and public engagement. This class will explore these issues through various theoretical lens and concrete cases including politics, youth culture, activism, news and art. Particular emphasis will be placed on the question of how new media differs from mass media across various fields of cultural production (music, news, advertising, for example) and on what influence new digital products and practices might have on these industries and on cultures and societies more generally. This course counts towards the Analytical Inquiry: Society and Culture requirement. Cross-listed with EDPX 2200.

MFJS 2210 Introduction to Media and Culture (4 Credits)
Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

MFJS 2240 Online & Visual Journalism (4 Credits)
An introduction to web-based, print, video, and audio news in a rolling deadline format. It also includes a project-based cross-cultural component to highlight internationalization of the news industries and to build upon the internationalization focus of the University. Prerequisite: MFJS 2140.

MFJS 2280 Politics and Media (4 Credits)
We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

MFJS 2290 Innovations in Media and Communications (4 Credits)
Today, it is difficult to imagine a life free of the media. There are more than 4 billion mobile phones in the world, and a billion people are now able to access the Internet. Television is available to close to 100% of people living in the media-saturated societies of North America, western and Eastern Europe, and East Asia, with radio widely available almost everywhere else. Moreover, with YouTube, blogs, online gaming, citizen journalism, experimental film, and peer-to-peer file sharing, people are actively creating and sharing their own news and entertainment experiences like never before. Communication technologies are changing the way money circulates, how and where business is conducted, the ways in which labor is deployed, and how people communicate between home and work, national and diasporic contexts. The media are facilitating both globalization and cultural hybridity, at times securing social cohesion and at other moments facilitating social movements for change. Where do these technologies come from? Who controls them? Who profits from them? How are they used, and with what potential implications? What does the future hold? These are some of the questions the class will address. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2400 Strategic Communication Planning (4 Credits)
This course introduces students to foundational principles in strategic communication and covers both public relations and advertising. Students learn and apply the elements of a comprehensive strategic communication plan, including conducting research, setting communication goals, designing messaging strategies and tactics, and evaluating the plan’s effectiveness. An emphasis on ethical communication practices is central to the course. Prerequisite: sophomore standing.

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
MFJS 2420 #CannabisJournalism: Studying the Culture of America's New Normal (4 Credits)
This course will examine the legalization of marijuana — both medical and recreational — as it is being covered in Colorado and in states across the country. Ever since the 2012 legalization of recreational marijuana, Colorado has been a leader in considering the medical, political, social and legal issues emergent with legalization. In this course, which is the first of its kind in the U.S., not only will we be investigating the scope of the marijuana legalization movement and its many political and practical intricacies, we will also be conducting a research project with original data and multimedia elements conceived and designed to push and promote enterprising storytelling. Students will visit dispensaries, interview industry professionals and produce a portfolio piece of narrative journalism using the modes and methods of their choice, with direction of the instructor.

MFJS 2992 Directed Study (1-10 Credits)

MFJS 3000 MFJS Undergraduate Assessment Requirement (0 Credits)
This zero credit hour course is designed to enable undergraduate students enrolled in the Department of Media, Film and Journalism Studies majors and minors to complete an assessment file prior to their graduation. The requirement does not take place in conjunction with a single quarter but is rather completed throughout the student’s academic career according to the required coursework within the major or minor.

MFJS 3020 Media Effects (4 Credits)
Behavioral science theory as applied to mass communications systems and audiences.

MFJS 3040 Media Law (4 Credits)
Introduction to freedom of expression and media law. Students learn how the American legal system works and gain an understanding and appreciation of the philosophical foundations of free expression. In addition, students confront many of the issues facing professional communicators today. Topics include incitement, hate speech, student speech, copyright, defamation, and other issues crucial to mass media professionals. The course examines also explores challenges to free expression brought by new(er) communication technologies. The purpose of this class is to give students the knowledge and critical thinking skills needed to be successful in today’s rapidly changing communication environment. Cross-listed with MFJS 4300.

MFJS 3110 Audience Research (4 Credits)
Analysis of behavioral research methods as applied to mass communication audiences. Prerequisite: Junior Standing.

MFJS 3120 Media Ethics (4 Credits)
Analysis of problems affecting mass communications profession that result from interaction among governmental, legal, institutional and socioeconomic forces in mass communications systems. Senior standing required.

MFJS 3150 Activist Media: A Historical Overview 1960-Present (4 Credits)
Today's alternative cultures use internet and mobile technologies to access and circulate mainstream information, but also to rapidly exchange information that exists outside mainstream media channels. Activist movements today with access to digital tools and networks are no longer dependent on newspapers and broadcast networks to represent them and to disseminate their messages. We are, however, just beginning to see how the proliferation of alternative networks of communication, and the content, practices, and identities they facilitate, interact with traditional political and business organizations, as well as with traditional media products and practices. This course focuses on media activism over the past half-century tied to various social movements with an emphasis on contemporary protest movements and their use of new and old media tools and strategies. Cross listed with EDPX 3725, MFJS 4725. Prerequisite: junior standing or permission of instructor. MFJS, SCOM, MDST, COMN, JOUR, MCOM, IIC, or DMST majors only.

MFJS 3160 Networked Journalism (4 Credits)
This course traces the shift that has taken place over the past 15 years from mass-mediated journalism to networked journalism, with emphasis on experiments in citizen and participatory news and on the changing relationship between journalists and their publics. It explores emergent communication technologies and practices and how they are changing the news media landscape. Prerequisite: junior standing or permission of instructor. MFJS, SCOM, MDST, COMN, JOUR, MCOM, IIC, or DMST majors only.

MFJS 3170 Data Journalism (4 Credits)
We swim in a world of data - from election results, budgets and census reports, to Facebook updates and image uploads. Journalists need to know how to find stories in data and shape them in compelling ways. This hands-on course teaches reporters and editors to gather, analyze, and visualize interactive data-driven stories. This emerging discipline touches on information and interactivity design, mapping, graphing, animation tools, and data analysis. You are expected to think like a journalist by evaluating data critically and applying what you learn to news stories, information graphics or web applications. Familiarity with HTML/CSS is helpful, but not required. This is not a course in coding, but programmers of all skill levels are welcome.

MFJS 3201 Digital Graphic Design (4 Credits)
Students explore digital publication and graphic design, from printed layouts (newspaper and magazines) to digital packages (eBooks and mobile apps). Courses focuses on raster and vector tools to create effective presentations and user interfaces. Laboratory fee required. Prerequisites: MFJS 2140 or instructor approval.

MFJS 3203 Women and Film (4 Credits)
This course explores the major intersections of the terms "women" and "film." It is concerned, for example, with the representation of women in film, both in the dominant Hollywood cinema and in alternative filmmaking practices (independent, experimental, documentary, and other national cinemas), with films by women and with women as cinema viewers or spectators. This course examines a variety of feminist approaches (historical, critical, theoretical) relevant to the subject matter. Lab fee. Cross listed with GWST 3203. Prerequisites: MFJS 200 or GWST 1112 or permission of instructor.
MFJS 3205 International & Development Communication (4 Credits)
The course uses a variety of methods and approaches to inspire critical reflection about the complex relationship between communication, culture, media and globalization, (trans)national identity(ies) and development.

MFJS 3206 Film History I: Silent Cinema (4 Credits)
This course explores the international history of film, from the origins of cinema through the late silent period. We examine the ways in which important events such as massive immigration, the Progressive movement, colonialism, World War I, modernism, and the Bolshevik Revolution have altered the face of film history, and look at some of the most important cinematic movements of the period. We discuss film historiography and the special challenges posed by film historical research and writing. Lab fee required. Note: This course is writing-intensive. Prerequisite: Permission of the instructor.

MFJS 3208 Narrative and Longform Journalism (4 Credits)
Students spend time learning the nature and functions of in-depth news reporting for online and print, with a focus on magazine-style feature article writing and editing. Laboratory fee required. Prerequisite: MFJS 2140.

MFJS 3212 Film History II: Sound Cinema (4 Credits)
This course explores the international history of film, from the development of sound cinema through the post-World War II period, 1926-1960. We examine the ways in which important events such as the Great Depression, the rise of fascism, the Second World War, and the Cold War have altered the face of film history, and look at some of the most important cinematic movements of the period. We discuss film historiography and the special challenges posed by film historical research and writing. Lab fee required. Prerequisite: Permission of the instructor.

MFJS 3215 Introduction to Field Production & Editing (4 Credits)
Application of video production principles and methods to multi-camera studio and field production. Laboratory fee required. Cross listed with MFJS 4470. Prerequisite: MFJS 2000.

MFJS 3216 Film History III: Contemporary Cinema (4 Credits)
This course explores the history of film from 1960 to the present. We examine the ways in which important events such as the Cold War, struggles against colonialism, the Vietnam War, globalization, and the rise of religious fundamentalisms have altered the face of film history and look at some of the most important cinematic movements of the period. We discuss film historiography and the special challenges posed by film historical research and writing. Note: Lab fee required. This course is writing-intensive. Lab fee required. Prerequisite: Permission of the instructor.

MFJS 3218 Narrative Film/Video Production I (4 Credits)
Technical and personnel management skills required for successful production of motion pictures and television programming. Cross listed with MFJS 4218. Prerequisites: MFJS 2000, MFJS 2150 and MFJS 3215.

MFJS 3219 Documentary Film/Video Production I (4 Credits)
The first half of a two-course sequence, this class focuses on the various modes and styles of documentary and on selecting and researching a topic for documentary production. Cross listed with MFJS 4219. Prerequisites: MFJS 2000 and MFJS 3215.

MFJS 3220 Narrative Film/Video Production II (4 Credits)
Application of film and video production techniques to creation of narrative/dramatic projects. Laboratory fee required. Cross listed with MFJS 4220. Prerequisites: MFJS 2150, MFJS 3215 and MFJS 3218.

MFJS 3221 Documentary Film/Video Production II (4 Credits)
The second half of a two course sequence, this class focuses on the production of a 10 minute documentary film. Cross listed with MFJS 4221. Prerequisites: MFJS 2000, MFJS 3215 and MFJS 3219.

MFJS 3222 Experimental Film/Video Theory & Production (4 Credits)
Historical, critical overview of experimental film/video movements; training in experimental production techniques; production of own experimental projects. Laboratory fee required. Cross listed with MFJS 4222. Prerequisite: MFJS 3215.

MFJS 3223 Advanced Editing (4 Credits)
Building on the basic non-linear editing skills gained in Introduction to Field Production & Editing, this course focuses on advanced techniques of image and color manipulation, movement and graphic effects, advanced sound sweetening and manipulation and advanced text/credit effects. Cross listed with MFJS 4223. Prerequisite: MFJS 3215.

MFJS 3224 Introduction to 16mm Film and HD Digital Cinematography (4 Credits)
This course focuses on the visual aspects of telling a cinematic Story. Students learn the basics of black and white cinematography using 16mm film cameras and/or the basics of color cinematography using high definition digital cameras. The class emphasizes silent storytelling, using lighting, art design and camera movement to develop character and theme. Students read from seminal film theorists about varying approaches to cinematography and write analyses of their own work. Lab fee required.

MFJS 3225 Video Editing is for Everybody (4 Credits)
The goal for this course is for students to have a basic working knowledge of editing using various media elements (video, audio, photos, music, graphics), developing proficiencies using different editing software, and applying a mixture of editing theories and techniques. This is a summer course only.

MFJS 3230 Advanced Newswriting & Reporting (4 Credits)
Application of investigative techniques to interpretive reporting in areas of contemporary social concern. Laboratory fee required. Prerequisite: MFJS 2140.
MFJS 3320 Screenwriting for TV & Film (4 Credits)
This course leads students through advanced scriptwriting formats based on instructor expertise. Lab fee required. Prerequisite: MFJS 2150.

MFJS 3330 Broadcast & Video Journalism (4 Credits)
Students in this course learn and practice the techniques used by broadcast journalists as they write, shoot and edit news packages for television. Laboratory fee required. Prerequisite: MFJS 2140.

MFJS 3410 Strategic Messaging (4 Credits)
This course focuses on learning and applying strategic communication principles to the creation of strategic messages for a client. Students also evaluate strategic communication techniques as they learn how to target a specific audience and learn how strategic messages fit within an overall strategic communication plan. Prerequisite: MFJS 2400.

MFJS 3420 Strategic Communication Seminar (4 Credits)
This course is the capstone course in the strategic communication sequence. In this course, students examine special topics in strategic communication and apply what they have learned to group projects in which they take on a client and work together as a team on a strategic communication campaign. Cross listed with MFJS 4070. Prerequisites: MFJS 2400 and MFJS 3410.

MFJS 3440 Global & Multicultural Campaigns (4 Credits)
This course explores several issues and aspects of global and multicultural campaigns, using a combination of readings, lectures, discussions, and presentations from guest speakers with experience in this rapidly expanding field. Students discuss real-world campaigns and learn about the challenges and necessities of planning, implementing and evaluating global and multicultural campaigns. Prerequisite: MFJS 2400.

MFJS 3501 Web Design & Content Development (4 Credits)
This course covers the building and management of web pages. Students must be comfortable planning, creating and integrating social media and third-party content into web sites, along with analytical tools that measure audience engagement. Laboratory fee required. Prerequisite: MFJS 2140.

MFJS 3502 Advanced Multimedia Storytelling and Publishing (4 Credits)
In this course, students tap the reporting, writing, editing and multimedia production and editing skills and knowledge learned and practiced in previous journalism studies classes and apply them to building from scratch, an open content management based multimedia web site. Laboratory fee required. Prerequisites: MFJS 2140 and MFJS 2240.

MFJS 3506 Audio Documentaries (4 Credits)
In the past decade, an explosion in the production and accessibility of audio documentary work has created an unprecedented interest and expansion of the documentary form in nearly all sectors of public life. Building on this trend, this course teaches the skills of ethnographically informed audio documentary work that can record and interpret culture and lived experience. We focus on learning the techniques of non-fiction storytelling used in established public radio programs like This American Life, Radio Lab, or Snap Judgement, as well as newer podcasts like Reply All, Invisibilia, or Embedded. The course will prepare students to tell complex stories using strong character-driven narrative. Sound documentation and representation will not be done along journalistic principles, but instead through rigorous ethnography that relies on participant-observation and immersion. Through practical application and the exploration of ethnography and documentary approaches to communication, the course explores questions that surround the interpretation and representation of socio-cultural experience via a sonic medium. To understand the basic mechanics of sound and its narrative form, participants will learn to digitally record and edit audio. Storytelling will then become more complex as students learn to conduct ethnography, interviews, and develop a script for radio. Students will ultimately analyze and create audio documentaries in an effort to understand a significant form of digital storytelling. There are three central learning objectives that will guide us through the course: (1) we will practice ethnographic and documentary methodology, (2) learn to write for radio, and (3) learn the workflow of audio editing to produce an audio documentary. Prerequisites: MFJS 3215 OR MFJS 2140. Enrollment restricted to MFJS students.

MFJS 3510 Web Application Development (4 Credits)
The goal of this course is to provide students with the fundamentals of planning and building web database applications using macromedia ColdFusion MX. Students will acquire a range of skills in planning, designing, developing and implementing a web database application. This course is focused on four core areas: Website Management, ColdFusion language, Database Design, and SQL. Prerequisite: DMST 3501 or MFJS 3501.

MFJS 3550 Digital Audio Production (4 Credits)
This class introduces the tools and techniques of digital audio production, including sampling and synthesis; sound editing and effects processing; multitrack recording; audio sequencing and mastering; and distribution.

MFJS 3652 Culture, Gender, and Global Communication (4 Credits)
This course explores the ways in which culture, gender, and communication intersect and shape a variety of issues from an international and intercultural perspective. Using a global feminist perspective, it also focuses on paradigms and paradigm shifts in creating social change. Also explored are alternative paradigms of thought, action and media communications by women and indigenous peoples, which have often been ignored, discounted or buried in history. Cross listed with MFJS 4652 and GWST 3652.

MFJS 3655 Multicultural Journalism (4 Credits)
This course focuses on multicultural approaches to journalism and media, including representations and news coverage related to gender, race/ethnicity, class, and sexuality, disabilities, religion, and nationality, etc. The class explores culture and intercultural communication and ways to apply these to journalistic writing as a creative process and craft. Prerequisite: MFJS 2140: News Writing & Reporting. Cross-listed with MFJS 4655.
MFJS 3656 Cross-cultural Travel Seminar: Immigration, Communication & Border Cultures (4 Credits)
This is a one-week intensive travel course that takes place in Tucson, Arizona and south to the US-Mexican border region. The focus of this experiential learning class is to study immigration issues, border cultures, and the role of communication and media through testimonies of immigrants, and visits to key sites such as the migrant trail, immigration detention center and courts. Also included are talks by activists and officials involved in the immigration debate. Class meets for two pre-class sessions in spring quarter. Requires junior standing. Cross-listed with MFJS 4656.

MFJS 3700 New Media Law & Regulation (4 Credits)
An examination of recent conflicts in mass communication law; topics vary with current developments. Particular emphasis is given to the legal problems of broadcasting, cable and the new communications technologies.

MFJS 3852 Advanced Design, Layout, and Editing (4 Credits)
This course teaches students advanced layout and design for media publications using contemporary software applications for journalists and public relations professionals.

MFJS 3900 Topics in Media Film & Journalism (1-4 Credits)

MFJS 3980 Internship in Mass Communication (1-10 Credits)

MFJS 3991 Independent Study (1-10 Credits)

MFJS 3992 Directed Study (1-5 Credits)

MFJS 3995 Independent Research (1-10 Credits)

Music

Office: Newman Performing Arts Center
Mail Code: 2344 E. Iliff Ave. Denver, CO 80208
Phone: 303-871-6400
Web Site: http://www.du.edu/lamont

With its wide array of degrees and certificates, outstanding faculty, and superior new facilities, the Lamont School of Music is one of the most distinguished music programs in the United States.

The Lamont School of Music offers bachelor of music programs with majors in composition, jazz studies and commercial music, performance, and recording and production, as well as a bachelor of arts in music.

The faculty is composed of professors and instructors who actively perform, compose, publish, and lecture worldwide. The Lamont School of Music is located in the Robert and Judi Newman Center for the Performing Arts, a 186,000-square-foot state-of-the-art facility opened in 2002 and officially inaugurated in 2003. The Newman Center includes an academic building, a 225-seat recital hall, a 1,000-seat concert/opera hall, and a 250-seat flexible theater. The academic building is replete with teaching studios, practice rooms (some of which are digitally enhanced as “virtual” acoustic practice rooms), large rehearsal spaces, a music library, a digital keyboard laboratory, two recording studios, an electronic music lab, classrooms with smart-to-the-seat technology, and an 80-seat recital salon.

MUEN (3000-level)  Ensembles as assigned (Must audition for and participate in two ensembles per quarter as assigned. See Lamont Student Handbook for details.)  24

Area requirements listed below by department  12

Brass

Horn
- MUAC 3662  Orchestral Studies for Brass
- MUAC 3708  Pedagogy & Repertoire Horn
- MUAC 3765  Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
  Music elective to be approved by studio professor

Trombone/Euphonium
- MUAC 3662  Orchestral Studies for Brass
- MUAC 3712  Pedagogy & Repertoire Trombone
- MUAC 3765  Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
  Music elective to be approved by studio professor

Trumpet
- MUAC 3662  Orchestral Studies for Brass
- MUAC 3742  Pedagogy & Repertoire Trumpet
- MUAC 3765  Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
  Music elective to be approved by studio professor

Tuba
- MUAC 3662  Orchestral Studies for Brass
- MUAC 3706  Pedagogy & Repertoire Tuba
- MUAC 3765  Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
  Music elective to be approved by studio professor

Carillon
- MUAC 3698  Carillon History and Mechanics
- MUAC 3698  Carillon History and Mechanics
- MUAC 3710  Carillon Pedagogy I
- MUAC 3710  Carillon Pedagogy I

Guitar
- MUAC 3590  Guitar History
- MUAC 3724  Pedagogy & Repertoire Guitar
- MUAC 3724  Pedagogy & Repertoire Guitar

Harp
- MUAC 3736  Pedagogy & Repertoire Harp
- MUAC 3737  Pedagogy & Repertoire Harp
  Music elective to be approved by studio professor

Musical Theater
Choose from the following to complete twelve credits:
- THEA 2870  Acting I
- THEA 2871  Acting I
- THEA 1010  Stage Movement & Dance
- THEA 1011  Stage Movement & Dance
- THEA 1012  Stage Movement & Dance
- MUAC 3165  Music Theater Survey
- MUAC 3166  Music Theater Survey II
- MUAC 3240  Vocal Pedagogy I
- MUAC 3241  Vocal Pedagogy I
- MUAC 3686  Choral Pedagogy I
- MUAC 3688  Choral Pedagogy I
- MUAC 3684  Choral Literature I
- MUAC 3689  Choral Literature I
- MUAC 4492  History of Opera: From Monteverdi to Minimalism and Beyond (Instructor permission required.)

**Violin**

Choose from the following to complete twelve credits:

- MUAC 3030  Seminar-Performance Psychology
- MUAC 3061  Audio Production I (Instructor permission required.)
- MUAC 3092  The Business Side of Music
- MUAC 3470  Suzuki Violin Seminar I
- MUAC 3471  Suzuki Violin Seminar I
- MUAC 3472  Suzuki Violin Seminar I
- MUAC 3660  Orchestral Excerpts-Violin
- MUAC 3860  Basic Jazz Improvisation
- MUPR 3120  Alexander Technique

**Voice**

Choose from the following to complete twelve credits:

- MUEN 1701  IPA & Lyric Italian Diction
- MUEN 1702  Lyric French Diction
- MUEN 1703  Lyric German Diction
- MUAC 2413  Vocal Literature Survey I: Italian and English Composers
- MUAC 2414  Vocal Literature Survey II: German and French Composers
- MUAC 2415  Acting and Movement for the Stage I
- MUAC 2416  Acting and Movement for the Stage II
- MUAC 3240  Vocal Pedagogy I
- MUAC 3241  Vocal Pedagogy II

Choose from the following to complete two credits:

- MUAC 3243  Recitative in Opera
- MUAC 3686  Choral Pedagogy I
- MUAC 3684  Choral Literature I
- MUPR 3120  Alexander Technique

**Woodwinds**

**Bassoon**

Choose from the following to complete the required credits:

- MUAC 3761  Pedagogy & Repertoire Bassoon
- & MUAC 3762  and Pedagogy & Repertoire Bassoon

Choose from the following to complete four credits:

- MUAC 3860  Basic Jazz Improvisation
- MUAC 3030  Seminar-Performance Psychology
- & MUPR 3120  and Alexander Technique

**Clarinet**

Choose from the following to complete the required credits:

- MUAC 3751  Pedagogy & Repertoire Clarinet
- & MUAC 3752  and Pedagogy & Repertoire Clarinet

Choose from the following to complete four credits:

- MUAC 3860  Basic Jazz Improvisation
- MUAC 3030  Seminar-Performance Psychology
- & MUPR 3120  and Alexander Technique

**Flute**

Choose from the following to complete the required credits:

- MUAC 3748  Pedagogy & Repertoire Flute
- & MUAC 3749  and Pedagogy & Repertoire Flute

Choose from the following to complete four credits:

- MUAC 3860  Basic Jazz Improvisation
- MUAC 3030  Seminar-Performance Psychology
- & MUPR 3120  and Alexander Technique

In addition, students must fulfill requirements for piano proficiency, sophomore music recording proficiency, music beyond the primary culture, Convocation attendance, internship, and senior production project. Piano proficiency must be completed by the end of sophomore year. Students must complete an internship approved by the department chair; students must complete the audio production course sequence before beginning the internship. Students must complete a senior production project approved by the department chair.

Admission and Audition Requirements
In addition to being accepted for study by the University, students desiring admission to the Lamont School of Music must audition with the appropriate music faculty and complete a Lamont application. Audition requirements differ by area. Requirements can be reviewed at www.du.edu/lamont. An in-person audition is preferable; however, students may submit a high quality video recording for review.

Participation, Attendance and Examination Requirements
Performance Juries
To ensure students are progressing appropriately on their major instrument, juries are given at least once a year but may be held every quarter depending on the department. Contact the appropriate faculty member for more details.

Sophomore Proficiency Examination
The sophomore proficiency examination is designed to determine if a student is prepared to continue in one of the Bachelor of Music degree programs. More information is available in the Lamont Student Handbook or from department chairs.

Ensemble Participation
Ensemble requirements for each degree program and specific requirements for some concentrations can be found in the Lamont Student Handbook.

Piano Proficiency Examination
All Bachelor of Music and Bachelor of Arts students must pass piano proficiency requirements designated for their degrees no later than the end of the sophomore year. This is not required of piano concentrations.

Theory and Aural Skills Placement Examination
All music students must take the theory and aural skills placement examination, which is only given the week before fall quarter classes begin.

Convocation Attendance
All Bachelor of Music and Bachelor of Arts students must attend all scheduled Convocations each quarter.
Requirements for Distinction in the Major in Music

BA students majoring in Music who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete a project, as approved by the student's faculty advisor and an appropriate supervising Lamont faculty member (as per agreement between the student and the student’s chosen faculty member), to make their BA in Music degree truly distinctive. Note that the faculty advisor and supervising Lamont faculty member may be one and the same person. Possible projects include, but are not limited to:
  
  A. A lecture-recital co-supervised by the student's applied teacher and a Musicology/Ethnomusicology/Theory faculty member.
  
  B. An innovative recital or other artistic endeavor that involves the participation of several other people.
  
  C. An expanded version of an exemplary paper written in an upper division class suitable, for example, for presentation at a Lamont Colloquium and/or submission for the undergraduate journal WRITlarge for possible publication.
  
  D. An exemplary PINS project.

- Earn a 3.75 GPA in the major, 3.50 GPA overall.

Requirements for Distinction in the Major in Composition

BM students in Composition who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete, as approved by the student’s studio professor and Composition department chair, and in addition to the required quarterly performances of the student’s compositions, one of the following:
  
  A. Independent study in a theoretical, musicological, or ethnomusicological topic.
  
  B. An in-depth exploration of a topic outside music, followed by the composition of a new work that reflects this exploration, with the premiere performance supplemented by an explanatory essay or lecture.
  
  C. An interdisciplinary collaboration, culminating either in the performance of an opera scene or in the composition of incidental or background music for film, dance, theater, video, or an electronic game.
  
  D. Modification of existing music that is in public domain – e.g., editing early music, reducing music from orchestral scores to piano for two or four hands, or simplifying difficult instrumental music to expand the repertoire for beginning players.
  
  E. Performance art or other work that is outside traditional boundaries of musical composition and performance. The topic and format of a project must be pre-approved by the Composition faculty.
  
  F. An alternative project that is not listed here.

- Earn a 3.75 GPA in the major, 3.50 GPA overall.

Requirements for Distinction in the Major in Jazz and Commercial Music

BM students in Jazz Studies who wish to receive Distinction in the Major upon graduating must achieve the following:

- Propose and complete, as approved by the student’s studio professor and Lamont department chair, an additional element for the junior or senior recital to make it truly distinctive;

- Receive the Outstanding Recital Award for either junior or senior recital, or demonstrate significant performance activity as recognized by the student’s department at Lamont;

- Earn a 3.75 GPA in the major, 3.50 GPA overall.

Requirements for Distinction in the Major in Performance

BM students in Performance who wish to receive Distinction in the Major upon graduating must achieve the following:

- Propose and complete, as approved by the student’s studio professor and Lamont department chair, an additional element for the junior or senior recital to make it truly distinctive;

- Receive the Outstanding Recital award for either junior or senior recital, or demonstrate significant performance activity as recognized by the student’s department at Lamont;

- Earn a 3.75 GPA in the major, 3.50 GPA overall.
Requirements for Distinction in the Major in Recording and Audio Production

BM students in Recording and Production who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete, as approved by the director of the Recording and Production program, additional elements for the senior project to make it truly distinctive;
- Demonstrate consistent excellence, professionalism, and leadership as a student audio engineer, including the completion of an exemplary senior project;
- Earn a 3.75 GPA in the major, 3.50 GPA overall.

The following course plans represent the minimum courses students should plan to take each quarter for each degree. Students should select additional Music and Common Curriculum courses to complete their course loads each quarter in consultation with the Lamont advisor.

Music-Academic Classes Courses

MUAC 1000 Fundamentals of Music Theory (4 Credits)
Meant for students with little to no experience with music notation, Fundamentals of Music Theory introduces pitch, rhythm, scales, chords, and other elements of Western notation. Students will develop facility in reading and hearing music, as well as an understanding of the syntax of tonal music, ranging from the music of Mozart to film music to Miles Davis.

MUAC 1001 Music Theory I (2 Credits)
The Fall quarter of Theory I covers fundamentals (key signatures, triads, seventh chords rhythm and meter, etc.) and first-species counterpoint, in both creative and analytic contexts. Although some entering students may be familiar with these concepts, the course emphasizes speed and mastery.

MUAC 1002 Music Theory I (2 Credits)
The Winter quarter of Theory I introduces basic voice-leading and analytic techniques, emphasizing syntax and grammar of music so that students can begin to write their own music. Second species counterpoint is also covered.

MUAC 1003 Music Theory I (2 Credits)
The Spring quarter continues the study of voice-leading and musical progression, building part-writing skill and analytic accuracy. The final project in this course is the composition and performance of a theme and variations set.

MUAC 1012 Music, Society, and Culture (4 Credits)
This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music’s relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1013 Jazz Theory and Aural Skills (4 Credits)
The foundational study of jazz theory and aural skills. Must be a BM student with a major in Jazz Studies or Commercial Music.

MUAC 1014 Jazz Theory and Aural Skills (4 Credits)
The foundational study of jazz theory and aural skills.

MUAC 1015 Jazz Theory and Aural Skills (4 Credits)
The foundational study of jazz theory and aural skills.

MUAC 1016 History of Jazz (4 Credits)
This course examines the short history of jazz and all its sub-styles (swing, bop, cool, etc.) from its roots to the early eighties. Students have access to the entire course online, including all the fantastic listening. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1017 History of Rock and Roll (4 Credits)
The "birth of rock" occurred in the mid 1950’s as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1018 Understanding Music (4 Credits)
In this course, students acquire a greater appreciation of musical history, context, composers, and genres. Through listening activities, texts, movies, and live concerts, students become educated listeners, able to describe intelligently musical experiences using appropriate vocabulary. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1019 American Popular Music (4 Credits)
American Popular Music combines the study of social and cultural history on the one hand with the analytical study of music styles on the other. Basically, it serves as an introduction to the wealth of American popular music from minstrelsy to hip hop. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class is not available to music or performance majors.

MUAC 1020 Aural Skills I (2 Credits)
Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

MUAC 1021 Aural Skills I (2 Credits)
Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

MUAC 1022 Aural Skills I (2 Credits)
Development of aural analysis in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.
MUAC 1023 Mathematics in Music after 1970 (4 Credits)
This course examines the interaction of mathematics and music composition since 1970, an interaction that has grown more vibrant with the advent of electronic music and modern computation. In this course, we will use mathematical concepts and methods to address basic questions about music, mathematics, and musical works. The questions include, (a) how do pieces by contemporary composers reflect an affinity for mathematical concepts?, (b) are the intervals preferred by cultures as diverse as ancient Greece and the contemporary Levant inherently beautiful?, (c) what is the relationship between complexity and chance on the listening experience?, and several others. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1024 Black Sacred Music: A Survey (4 Credits)
This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

MUAC 1025 Hip-Hop and Rap Music (4 Credits)
From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics.

MUAC 1026 American Musical Mavericks (4 Credits)
This course examines music history in the United States through the figure of the “maverick,” a rugged individualist who operates outside the mainstream of society. Using Michael Broyles’s Mavericks and Other Traditions in American Music as a primary textbook, this course surveys American music from the 18th to the 21st centuries, introducing students to a variety of musical traditions, pieces, composers, performers, and artistic strategies. Central themes include: the impact of Puritanism on U.S. arts and culture, the dilemma of art music in a democratic society, and the struggle to develop a uniquely American musical voice in a nation of immigrants. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity (performance, composition, etc.). Analyze the relationship between texts, ideas, or creative works and a broader context (intellectual, political, artistic, etc.) in ways appropriate to disciplines in the arts or humanities. No prior musical experience is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1027 Global Pop (4 Credits)
This survey of global pop explores musical thought and processes through an examination of the development of “world music” and “world beat,” including its meaning and importance to contemporary culture as well as its history and impact. Intended to provide students with a basic understanding of the international popular music scene from its explosion at the close of the 20th century through the present day, this course questions the meaning and importance of this trend in contemporary culture. It explores the complex relationships of music and mass media while addressing themes of nationalism, popular resistance and subversion, censorship, transnational identity, gender representation, and cultural hegemony. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1028 Hearing the Movies (4 Credits)
Although we usually say that we watch movies, we might more accurately say that we “see-hear” or “audioview” them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required.

MUAC 1030 Convocation Attendance (0 Credits)
All undergraduate-level music majors at Lamont School of Music are required to attend three all-School convocations each quarter they are enrolled. Convocations are scheduled for Fridays at 2:30. Each quarter’s schedule can be found on the Lamont tab of PioneerWeb. Convocations include essential information about Lamont and DU, performances by Lamont students who have won School-wide competitions, performances by professional groups and soloists, career discussions and other professional development opportunities, and an annual end-of-the-year student award ceremony.
MUAC 1120 Seminar in Music Theory (1-5 Credits)

MUAC 1134 Music in Film (3 Credits)

MUAC 1161 Theory at the Keyboard I (4 Credits)
This course is the first of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

MUAC 1162 Theory at the Keyboard II (4 Credits)
This course is the second of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

MUAC 1163 Theory at the Keyboard III (4 Credits)
This course is the third of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

MUAC 1189 Jazz Performance Techniques (2 Credits)
Individual study of Jazz performance techniques in a directed study environment.

MUAC 1190 Jazz at the Keyboard (4 Credits)

MUAC 1211 Music Technology (4 Credits)
This course is a one quarter survey exploring inventive ways today’s musician/creative can incorporate technology as competitive advantage in their future careers. Musicians must be aware that emerging and disruptive technologies are moving faster than they can be assimilated. This course accelerates student functionality by providing a practical and hands-on approach to web-based professional resources, notation software, MIDI sequencing and electronic instruments, digital audio and video applications, and the laptop as a performance instrument. The course spends significant time on professional development including the design of web based promotional materials. Although tailored for music majors, this course is open to, and often taken by, non-majors.

MUAC 1700 Lyric Diction-English/Italian (2 Credits)
Diction and international phonetic rules; singing technique for English/Italian stressing International Phonetic Alphabet, pronunciation, accent, word order, translation and poetic meter. English will last four weeks and Italian six weeks.

MUAC 1701 Lyric Diction:German/French (2 Credits)
Diction and international phonetic rules; singing technique for German/French stressing International Phonetic Alphabet, pronunciation, accent, word order, translation and poetic meter. German will last five weeks and French five weeks.

MUAC 1920 Basic Conducting (2 Credits)
Introduction to techniques of conducting; a basis and prerequisite for specialized courses in choral, orchestral, and wind conducting. Prerequisites: MUAC 1001, MUAC 1002, MUAC 1003, MUAC 1020, MUAC 1021, and MUAC 1022.

MUAC 1950 Workshop in Advanced Ear Training (1-5 Credits)

MUAC 1992 Directed Study (1-10 Credits)

MUAC 2004 Music Theory II (2 Credits)
The Fall quarter of Theory II reviews common musical progressions and places them in the context of phrase structures such as the period and the sentence.

MUAC 2005 Music Theory II (2 Credits)
The Winter quarter of Theory II introduces tonicization, modulation, and other chromatic techniques and applies these topics to binary forms and art song.

MUAC 2006 Music Theory II (2 Credits)
The Spring quarter of Theory II adds additional chromatic harmonies (e.g., Neapolitan triad) and examines complete movement forms, including ternary, rondo, and sonata forms.

MUAC 2020 Aural Skills II (2 Credits)
Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

MUAC 2021 Aural Skills II (2 Credits)
Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.
MUAC 2022 Aural Skills II (2 Credits)
Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

MUAC 2051 Musicology: Foundations of Musicology (3 Credits)
This course introduces students to "doing musicology." The theme is "beyond the boundaries": music is rarely neat and tidy; it defies the stereotypes, and it spills over its borders. To highlight this perspective, we focus on pieces that bring to the surface contemporary American society's code words for going beyond the boundaries: sex, drugs, and rock 'n' roll. Students develop two skills: articulating what they are hearing and connecting different approaches to understanding music (including musical style, musical structure, history, context, reception, historiography, performance practice, and music in and as culture). The course provides a rigorous background for all the following quarters of musicology coursework, which may include Western art music from the medieval period through the present, jazz and commercial music, and music from other cultures around the world. Prerequisite for music majors: MUAC 1002 or MUAC 1014.

MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2053 Musicology: Baroque Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2054 Musicology: Classical Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2055 Musicology: Romantic Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1820 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2056 Musicology: Modern Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2057 Musicology: Introduction to World Musics (3 Credits)
This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music's connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.
MUAC 2060 Introduction to Electronic Music/Synthesizer Programming (4 Credits)
In this class students will learn how to create musical sounds using music synthesizers. Most modern synthesizers, whether hardware or software, are designed after paradigms established by designers of the modular analog synthesizer systems of the late 1960's (Moog, Buchla, et al.). A basic foundation of the physics of sound and electricity will comprise the first module of the course. After that follows an in depth program of training in the creation of sound using a modern modular analog synthesizer (ModCan) as well as free, open source modular synth emulation software (VCV Rack). Students will learn synthesis techniques from a historical perspective including but not limited to subtractive, additive, FM, wavetable, sample based, and granular. Modularity will be emphasized as mastery of this approach makes it possible to quickly learn any existing hardware or software synthesizer. After this class the successful student will be proficient on a wide variety of devices real and virtual, on the DAW of their choice. This proficiency will empower students who record and produce their own music in electro-acoustic, rock, or EDM genres.

MUAC 2067 Audio Practicum (1-4 Credits)
Clinical training in audio recording and sound reinforcement for bachelor of music audio production concentration majors.

MUAC 2068 Songwriting Workshop (2 Credits)
Songwriting can connect our deepest sense of self to others through the art of emotive expression and the craft of creative communication and collaboration. This course focuses on growth, engagement, and connection through real-life experience, practice, and performance. Included are creative assignments, in-class performances, community performances, and recording and producing an original song in the Lamont School of Music recording studio.

MUAC 2189 Jazz Performance Techniques (2 Credits)
Individual study of jazz performance techniques in a directed study environment.

MUAC 2190 Jazz at the Keyboard (2 Credits)

MUAC 2192 Vocal Literature Survey (2 Credits)
A survey of song literature, concentrating on the major 18th, 19th and 20th century composers.

MUAC 2193 Vocal Literature Survey I: Italian and English Composers (1 Credit)
This course is a Vocal Literature Survey of Art Songs in English, Italian, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

MUAC 2194 Vocal Literature Survey II: German and French Composers (1 Credit)
This course is a Vocal Literature Survey of Art Songs in German and French, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

MUAC 2415 Acting and Movement for the Stage I (2 Credits)
In this beginning course, students develop a basic understanding of stagecraft, and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work.

MUAC 2416 Acting and Movement for the Stage II (1 Credit)
In this continuing course, students develop a more advanced understanding of stagecraft and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work. Prerequisites: Acting and Movement I (MUAC 2415).

MUAC 2420 Introduction to Piano Pedagogy I (2 Credits)
Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

MUAC 2421 Introduction to Piano Pedagogy II (2 Credits)
Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

MUAC 2929 Tutorials-Theoretical Topics (1-5 Credits)

MUAC 2940 Choral Conducting (2 Credits)
Beginning course in choral conducting. Fall quarter only.

MUAC 2950 Orchestral Conducting (2 Credits)
Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Prerequisite: MUAC 1920 Basic Conducting. Spring quarter only.

MUAC 2970 Wind Conducting (2 Credits)
Beginning course in wind conducting. Winter quarter only.

MUAC 2992 Directed Study (1-10 Credits)

MUAC 3002 Form and Analysis (4 Credits)
Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2066.
MUAC 3005 Post-Tonal Theory and Analysis: Set-Theory and Serialism (4 Credits)
This course has two components: (1) A study of selected analytical techniques for post-tonal music, primarily pitch-class set theory and twelve-tone (serial) theory; (2) Analysis of representative works from the twentieth century, focusing on the music from the first half of the century (Schoenberg, Berg, Webern, Stravinsky, and Bartok). Six credits of Theory 2 or permission of instructor required.

MUAC 3023 Rhythm & Meter in Tonal Music (4 Credits)
This course gives a general background, including the history of rhythm and meter, different rhythmic analyses, and various topics (dissonance, ambiguity, Schenker, motives, biology, and perception).

MUAC 3024 Introduction to Tonal Analysis (4 Credits)
This course introduces students to various types of musical analysis for tonal music that are more advanced than what is introduced in first- and second-year music theory. Prerequisites: MUAC 2006 and MUAC 2022.

MUAC 3025 Topics in Analysis: Brahms (4 Credits)
This course explores a variety of analytical techniques used to understand the compositions of Brahms. We examine works by musicologists and theorists such as Allen Forte, Walter, Frisch, Arnold Schoenberg, Carl Schachter, and David Lewin. Issues discussed include developing variations, rhythm, form, and ambiguity in Brahms. We cover a wide range of repertoire, ranging from piano works to choral works to symphonies.

MUAC 3030 Seminar-Performance Psychology (2 Credits)

MUAC 3036 Internship (1-5 Credits)

MUAC 3045 Introduction to Studio Recording (3 Credits)
A hands-on introduction to recording popular music in the state of the art Lamont Recording Studio. Students will participate in pre-production and recording of a professional four piece rock band. Students will also learn basic audio theory as it applies to the use of microphones, signal processing, and other studio equipment. Topics to be covered include drum sounds, guitar and bass sounds, basic audio theory and acoustics, basic electricity, digital recording, microphones and DI's, signal routing in the studio, tracking with ProTools HD and Logic Pro7, equalization, dynamics, reverberation and delay, special effects, mixing to stereo.

MUAC 3058 Audio Production III (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the second sequence in the audio production concentration.

MUAC 3059 Audio Production II (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the first sequence in the audio production concentration.

MUAC 3060 Extra-Musical Roles of the Music Director (1 Credit)
Under the supervision and guidance of the director of orchestral studies, students will gain hands-on, actual experience with many of the non-musical tasks that conductors face. These experiences will include managing orchestra personnel, librarian activities, running auditions, and recruiting. Open only to Artist Diploma in orchestral conducting students.

MUAC 3061 Audio Production I (4 Credits)
An introduction to analog and digital synthesis, MIDI sequencing, and DAW software.

MUAC 3064 Audio Production IV (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the third sequence in the audio production concentration.

MUAC 3065 Audio Production V (4 Credits)
This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as onsite training at Lamont School of Music performances. This is the fourth sequence in the audio production concentration.

MUAC 3066 Audio Production VI (4 Credits)
This course is an advanced seminar wherein students propose and execute complex, professional level audio production projects toward the goal of establishing a professional audio production portfolio. Students may also incorporate pre-production work in preparation for the audio production concentration senior project. Students serve as engineers and producers at Lamont School of Music recording sessions and live performances.
MUAC 3068 Audio Production for Working Musicians (4 Credits)
In this course, students are taught a solid foundation of basic audio production skills that will enable them to record any style of music. Students are also taught the basics of digital music synthesis and how to create music with digital synthesizers and MIDI. The primary digital audio workstation software used in this course will be ProTools, and each student is required to purchase ProTools (about $250 academic price) and an iLok license dongle (about $40). However, the course has been designed so that skills acquired can be easily applied to any regular DAW platform, such as Logic, Cubase, Ardour, etc. Production techniques for various musical genres will be presented, including Rock, Jazz, Classical, Techno, experimental electro-acoustic, etc. This course will be of great value to performing musicians, singer/songwriters, ensemble directors and conductors, composers, or anyone who wants to record and/or produce music. Students are encouraged but not required to purchase an audio interface and microphone or other input device depending on their area of interest, and are advised in class as to what purchases make sense.

MUAC 3069 Jazz Rhythm Section (4 Credits)
Jazz Rhythm Section provides students with detailed performance practice skills and knowledge. This class may be used to fulfill four hours of Jazz Studies and Commercial Music Area Requirements and may only be taken once for credit. Jazz Studies and Commercial Music Major or the performance ability sufficient to perform on a rhythm section instrument in one of the JSCM ensembles.

MUAC 3090 Produce Your Own Music CD (2 Credits)
To obtain the skills and knowledge necessary for creating your own professional music CD or demo. You will learn the step-by-step process of selecting songs, recording, mastering, manufacturing, and financing your own CD. Furthermore, you will also learn basics about visual presentation using computer graphics (i.e., CD cover, liner notes with lyrics, copyright, bar codes, etc.) and how to market your CD on the internet and in your local area.

MUAC 3091 How to Write Your Own Songs (2 Credits)
To obtain skills and knowledge necessary for writing your own songs. You will learn the step-by-step process of songwriting which includes how to write lyrics, compose melodies and chord progressions, and most importantly, how to combine those two elements to create a “hook.” Furthermore, you will also learn common song forms, how to write lead sheets and how to make your song a complete arrangement using vocals, horns, and rhythm section.

MUAC 3092 The Business Side of Music (4 Credits)
A personal and clinical approach to developing music business skills and strategies.

MUAC 3105 Studies in Style: Movement, Mannerisms, Gesture and Physical Comedy (3 Credits)
The exploration of period styles in theatrical and historical genres will be introduced to broaden the singer/actor’s repertoire of physical gesture and comedic forms of stage movement. The focus of the course will include studies in rhythm, timing, pacing, musicality and lyricism as these elements apply to heightened expressivity within scene work, character development and ensemble performance. Considerable time will be devoted to the physical practice of related skills as preparation and facilitation of performance projects that will serve as an opportunity for peer observation, group discussion and commentary, and student assessment.

MUAC 3106 The Dynamic Body: Foundations in Movement Methods and Body Awareness Principles (2 Credits)
An introduction to fundamental body awareness principles in relationship to physical performance skills for vocal performance majors. Methods for heightening kinesthetic awareness will be learned in the form of movement explorations, improvisations, structures, and learned phrases to gain somatic insight into the performer’s sense of verticality in all places and dimensions of space. The concepts of the body in motion will be a primary context and focus for the progression of studies or ‘etudes,’ and for the reflective and analytical processes that include observation, journaling, discussion and peer commentary. Studio activities in solo, partnering, and group work will further the student’s knowledge of how to become more responsive, expressive, and communicative when interacting with the surrounding environment and with others. Integrated with the body-mind practice and theoretical study, students will be encouraged to inquire, examine and articulate possible philosophies regarding why the mastery of the performer’s physical body requires an essential sense of discipline that is cultivated in the performing arts, and how the somatic practices being investigated can serve his/her performance presence and support one’s vocal training and health for the long-term.

MUAC 3124 Composition Seminar (1 Credit)
Composition Seminar focuses on the reading and performance of modern scores by Lamont and recognized composers. Any student composing music or wishing to perform new compositions at Lamont may register and participate. Requirements for composers include the completion, rehearsal and performance of a piece of music at the New Music Ensemble concert each quarter. Non-composers are required to rehearse and perform at the New Music Ensemble concert. Composers enrolled in the ensemble may be required to play compositions submitted as well.

MUAC 3165 Music Theater Survey (2 Credits)
A historical overview of the American Broadway musical, performance technique, audition preparation and repertoire. Must be prepared to sing and perform.

MUAC 3166 Music Theater Survey II (2 Credits)
Fundamentals of music theater performance will be addressed through readings of the text, “Acting in Music Theater” by Joe Dee and Rocco dal Vera. Application of these techniques through performance of musical theater literature will be incorporated during the last number of weeks. Additionally, we will highlight prominent composers and their works throughout the quarter.

MUAC 3196 Advanced Composition Tutorial (4 Credits)
 MUAC 3200 Recitative in Opera & Oratorio (2 Credits)
The fluid singing of recitative in German, English, Italian and French will be explored and practiced in this class. Students will harmonically analyze examples, add ornamentation, and perform recitative with a knowledge of the translation and emotional content.
MUAC 3212 Digital Music Creation (4 Credits)
In this course, students will create, produce, and present their own digital music. Using one of the industry’s leading digital music creation platforms (such as Ableton Live), students will learn the history of electronic music creation, create their own digital music portfolios, become familiar with relevant copyright issues, and oversee public performances of their music.

MUAC 3234 Cycle of Seasons-Resources (1 Credit)

MUAC 3235 Preschool Music Workshop (3 Credits)

MUAC 3236 Family Music Workshop (1 Credit)

MUAC 3237 Music Makers at the Keyboard (3 Credits)
This 30-hour workshop presents the keyboard method for groups of young beginners ages 5-9.

MUAC 3238 Music Makers at Home & World (3 Credits)
This 30-hour workshop presents the method for a sequential two-year program that guides the musical development of children ages 4-7. Different world cultures are celebrated through music, songs, dances, stories, and rituals.

MUAC 3240 Vocal Pedagogy I (1 Credit)
Psychological and physical aspects of teaching of singing.

MUAC 3241 Vocal Pedagogy II (1 Credit)
Psychological and physical aspects of teaching of singing.

MUAC 3243 Recitative in Opera (2 Credits)
Working as a professional singer your proficiency with recitative should be high. Though a major part of many operas recitative is still often overlooked as a skill set. Through this course we will explore several different approaches to recitative from various compositional styles and time periods.

MUAC 3282 Suzuki Violin Seminar II (2 Credits)

MUAC 3283 Suzuki Violin Seminar II (2 Credits)

MUAC 3284 Suzuki Violin Seminar II (2 Credits)

MUAC 3333 Advanced Vocal Pedagogy (2 Credits)
An advanced study of the science behind the singing voice, including the biomechanics of phonation, identifying systems and changes in the voice, posture and breathing that impact phonation, and a physiologic approach to vocal exercises in preparation for teaching voice. Prerequisite: MUAC 3242.

MUAC 3350 Social History-Modern Britain (4 Credits)
This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissension as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with HIST 3350.

MUAC 3439 Teaching Note Reading (2 Credits)

MUAC 3460 Suzuki Cello Practicum (1 Credit)

MUAC 3461 Suzuki Cello Practicum (1 Credit)

MUAC 3462 Suzuki Cello Practicum (1 Credit)

MUAC 3463 Suzuki Cello Seminar I (2 Credits)

MUAC 3464 Suzuki Cello Seminar I (2 Credits)

MUAC 3465 Suzuki Cello Seminar I (2 Credits)

MUAC 3466 Suzuki Cello Seminar II (2 Credits)

MUAC 3467 Suzuki Cello Seminar II (2 Credits)

MUAC 3468 Suzuki Cello Seminar II (2 Credits)

MUAC 3470 Suzuki Violin Seminar I (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

MUAC 3471 Suzuki Violin Seminar I (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.
MUAC 3472 Suzuki Violin Seminar I (2 Credits)
Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

MUAC 3477 Suzuki Violin Practicum (1 Credit)
The Suzuki Violin Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and teaching philosophy covered in the seminar classes. The course will include some lecture focusing on teaching strategies for effective technical development and effective communication in the lessons. Prerequisite: MUAC 3470.

MUAC 3497 Studying Music in the Field: Theory and Method in Ethnomusicology (4 Credits)
This course introduces issues that motivate ethnomusicological research and techniques for carrying out fieldwork, the ethnographic method which has largely come to define the discipline. Our primary texts include Bruno Nettl's classic text, The Study of Ethnomusicology, and Shadows in the Field, a seminal volume of essays discussing ethnomusicological fieldwork. This course also involves hands-on experience in some of the major fieldwork techniques, including field observation and writing fieldnotes, musical transcription and interviewing. This course culminates in a field research project in a Denver musical community determined in consultation with the professor. Note: this course is not open to freshman; sophomores with permission of instructor.

MUAC 3502 Gender & Genre in World Music (4 Credits)
How are concepts of "maleness," "femaleness" and other gendered categories constructed, maintained, and contested through musical performance? This course examines the issues explored and debated in recent studies of gender relation to music of various cultures including Western art music, popular music, and other world genres. We focus on reading and discussion of ethno-musicological and anthropological ethnographies, musicological studies focusing on gender and theoretical writings from gender and women's studies. Lectures and discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores can register with instructor approval.

MUAC 3537 Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music (4 Credits)
André Crouch, Walter Hawkins, and Richard Smallwood have each influenced the course of black gospel music for the last 50 years. Through listening to recordings, watching video performances, score analysis, readings, performance, and improvisation, this course will examine the music of these unique composer/performers and how their contributions have impacted black gospel music. Rather than simply read about and analyze the music, students will play the music of these composers and literally have hands-on experience with the colors and textures of the music that has shaped church music and the gospel music industry for the last five decades.

MUAC 3550 Major Composers-J.S. Bach (4 Credits)
Music of Bach, including chronological development, form and style, studied against background of baroque musical practice and circumstances of Bach's life and temperament. Prerequisites: MUAC 1621, 1622 and 1623.

MUAC 3570 Major Composers: Beethoven (4 Credits)

MUAC 3578 Advanced Composition (4 Credits)
Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression.

MUAC 3579 Advanced Composition (3 Credits)
Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression. May be taken more than once for credit. Prerequisite: MUAC 3020.

MUAC 3590 Guitar History (4 Credits)
This course traces the history of rock from the Beatles in the early 60's to the most recent developments of the 90's. The course provides a concise overview of this most influential musical phenomenon. Designed for the non-music major, it requires no prerequisites. Classes consist of lectures and listening. All listening examples are available via computer to each student.

MUAC 3600 The Evolution of Rock (4 Credits)
A study and practical analysis of the foundational techniques involved with composing and orchestrating for small group jazz ensembles. This course will cover the basics of form, notation, and orchestration in the small group jazz idiom, consisting of one to four horns and/or vocals, guitar, piano, bass, and drums.

MUAC 3650 Orchestral Excerpts-Cello (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3655 Orchestral Excerpts-Bass (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock audition and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.
MUAC 3660 Orchestral Excerpts-Violin (4 Credits)
This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3661 Orchestral Excerpts Viola (4 Credits)
This course explores excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students are given a list of excerpts and coached on how to prepare them. They participate in mock auditions and receive feedback. This course also addresses the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

MUAC 3662 Orchestral Studies for Brass (2 Credits)
Study of orchestral literature brass players are likely to be asked to play at auditions for professional orchestras. Undergraduate participants should have passed their Sophomore Proficiency jury with distinction.

MUAC 3663 Orchestral Excerpts, Viola II (4 Credits)
Companion course to Orchestral Excerpts Viola I, this section expands the repertoire list beyond the standard works used for auditions today. In addition to further honing basic requisite material from section I, students study and prepare less frequently required works and principle viola solo repertoire. There is more extensive discussion of the audition process and mock auditions as a part of the course. While it is advised and preferable that students complete the first section of this course it is possible to take the course with the approval of the instructor.

MUAC 3677 Bow Art Ensemble (0-1 Credits)
The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

MUAC 3682 Topics-Orchestral Repertoire (4 Credits)
We explore the history of the orchestra and orchestral literature from the baroque through modern eras, and examine a number of test cases in which conventional understanding has been challenged in recent years. The course concludes with individual research projects and presentations on topics students choose and develop.

MUAC 3683 History of Chamber Music (4 Credits)
Chamber music from baroque trio sonata to contemporary electronic works. Prerequisites: MUAC 1621, MUAC 1622 and MUAC 1623. Winter quarter only.

MUAC 3684 Choral Literature I (2 Credits)
This course is an analysis of the development of choral repertoire from the Middle Ages through the Baroque era.

MUAC 3686 Choral Pedagogy I (2 Credits)
The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

MUAC 3688 Choral Pedagogy II (2 Credits)
The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

MUAC 3689 Choral Literature II (2 Credits)
This course is an analysis of the development of choral repertoire from the Classical period until the present day. This course is meant to be taken in sequence after Choral Literature I.

MUAC 3698 History and Mechanics of the Carillon (4 Credits)
A survey of the evolution of signal bells into the musical instrument known as the carillon. This subject is often called “campanology.” The history will be traced from the 16th century in the Low Countries through modern times in Europe, North America, Australia/New Zealand and Japan. Topics will include bell foundries, bell casting and tuning, bell chambers, playing actions, carillonneurs, carillon schools, carillon organizations, the use of the carillon in its various regions and basic carillon maintenance.

MUAC 3700 Carillon Repertoire (4 Credits)
A survey of the music expressly produced for carillon from the earliest times through the present. Categories include automatic music (e.g., De Sany, Wyckaert, Eggert), the earliest compositions for manual play (Van den Gheyn and the Louvain manuscripts of the 18th century), and the 20th-century categories: Flemish, Dutch, French and North American. Mainstream publishers as well as incidental publications will be covered. The labs will focus on analysis through recordings and live performances by participants.

MUAC 3704 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.
MUAC 3705 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.

MUAC 3706 Pedagogy & Repertoire Tuba (4 Credits)
Teaching techniques and survey of literature and teaching materials for the tuba.

MUAC 3707 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3708 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3709 Pedagogy & Repertoire Horn (4 Credits)
Teaching techniques and survey of literature and teaching materials for the horn.

MUAC 3710 Carillon Pedagogy I (2 Credits)
An exploration of the physical and psychological elements that can lead to effective carillon teaching: technique, handling/pedaling ("fingering" on the piano), and developing an attitude that fosters successful performance.

MUAC 3711 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3712 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3713 Pedagogy & Repertoire Trombone (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trombone.

MUAC 3717 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3718 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3719 Pedagogy & Repertoire Percussion (4 Credits)
Teaching techniques and survey of literature and teaching materials for percussion.

MUAC 3724 Pedagogy & Repertoire Guitar (4 Credits)
Teaching techniques and survey of literature and teaching materials for the guitar.

MUAC 3726 Pedagogy & Repertoire Viola (4 Credits)
Teaching techniques and survey of literature and teaching materials for the viola.

MUAC 3727 Pedagogy & Repertoire Viola (4 Credits)
Teaching techniques and survey of literature and teaching materials for the viola.

MUAC 3730 Pedagogy & Repertoire Cello (4 Credits)
Teaching techniques and survey of literature and teaching materials for the cello.

MUAC 3733 Pedagogy & Rep Double Bass (4 Credits)
Teaching techniques and survey of literature and teaching materials for the double bass.

MUAC 3735 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3736 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3737 Pedagogy & Repertoire Harp (4 Credits)
Teaching techniques and survey of literature and teaching materials for the harp.

MUAC 3738 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3739 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3740 Pedagogy & Repertoire Organ (2 Credits)
Teaching techniques and survey of literature and teaching materials for the organ.

MUAC 3741 Pedagogy & Repertoire Trumpet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trumpet.

MUAC 3742 Pedagogy & Repertoire Trumpet (4 Credits)
Teaching techniques and survey of literature and teaching materials for the trumpet.
MUAC 3743 Pedagogy & Repertoire Trumpet (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the trumpet.

MUAC 3747 Pedagogy & Repertoire Flute (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the flute.

MUAC 3748 Pedagogy & Repertoire Flute (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the flute.

MUAC 3749 Pedagogy & Repertoire Flute (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the flute.

MUAC 3750 Pedagogy & Repertoire Clarinet (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3751 Pedagogy & Repertoire Clarinet (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3752 Pedagogy & Repertoire Clarinet (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the clarinet.

MUAC 3753 Pedagogy & Repertoire Saxophone (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3754 Pedagogy & Repertoire Saxophone (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3755 Pedagogy & Repertoire Saxophone (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the saxophone.

MUAC 3756 Pedagogy & Repertoire Oboe (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3757 Pedagogy & Repertoire Oboe (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3758 Pedagogy & Repertoire Oboe (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the oboe.

MUAC 3759 Pedagogy & Repertoire Bassoon (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3761 Pedagogy & Repertoire Bassoon (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3762 Pedagogy & Repertoire Bassoon (4 Credits)  
Teaching techniques and survey of literature and teaching materials for the bassoon.

MUAC 3765 Professional Brass Techniques (4 Credits)  
This 4-hour per week course will be divided into a lecture/seminar for two hours and performance practicum for two hours. Topics discussed and performed include orchestral playing, sight reading, practice, solo performance, jazz survival, ornamentation, transposition, and warm-up/maintenance routine.

MUAC 3804 Topics in Music (1-5 Credits)  
MUAC 3810 Voice Repertoire (2 Credits)  
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3811 Voice Repertoire (2 Credits)  
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3812 Voice Repertoire (2 Credits)  
Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

MUAC 3822 Piano Repertoire I (2 Credits)  
Performance and analysis.

MUAC 3823 Piano Repertoire II (3 Credits)  
Performance and analysis.

MUAC 3824 Piano Repertoire III (3 Credits)  
Performance and analysis.

MUAC 3830 Advanced Jazz Arranging I (2 Credits)  
A study and practical analysis of small to medium jazz ensemble writing with extended instrumentation. Consisting of nonette-style orchestration including orchestral instruments such as horn, tuba, woodwinds, and voice along with extended electronic textures, this course will cover the basics of from, notation and orchestration in the 21st Century hybrid small to medium size jazz ensemble idiom.
MUAC 3831 Advanced Jazz Arranging II (2 Credits)
A study and practical analysis of large "studio orchestra" type jazz writing with extended instrumentation. Consisting of medium to full orchestral string section, woodwinds, harp, percussion, brass plus jazz rhythm section, voices, and soloists. Exemplified by such modern ensembles as Snarky Puppy with the Metropole Orchestra, this will be a full studio orchestra with modern 21st Century jazz, rock, and pop sensibilities. String bowings and aspects of dynamic ensemble balances in the studio orchestra will be studied, as well as writing for the harp.

MUAC 3832 Arranging for Computer-Based Media (2 Credits)
This course will be an introduction to techniques of composition and arranging music for media, with an emphasis on practical assignments that the student will encounter in the professional world of media composition. Students will learn how to work in collaboration with filmmakers, master techniques of timing and synchronization, use traditional techniques of composition/arranging/orchestration to serve dramatic needs, and work efficiently in the recording studio under time and budget restraints.

MUAC 3841 Jazz & Commercial Music History/Repertoire (4 Credits)
MUAC 3842 Jazz & Commercial Music History/Repertoire (4 Credits)
Writing for small and large jazz groups; accompaniment skills; writing for live performance versus writing for recorded performance. Prerequisite: MUAC 3830.

MUAC 3843 Jazz & Commercial Music History/Repertoire (4 Credits)
Writing for small and large jazz groups; accompaniment skills; writing for live performance versus writing for recorded performance. Prerequisite: MUAC 3830.

MUAC 3844 21st Century Artistry I (2 Credits)
21st Century Artistry I is a course of study that examines the full spectrum of attributes and skills necessary for a student to "survive and thrive" in the every-changing landscape of the 21st Century. With a two-fold approach of examining effective strategies for a "modern artistry mindset" along with extensive case studies of successful 21st Century professionals, this course will offer the student a wide array of important recourses to guide their career. The case study aspect of 21st Century Artistry I will be based on multiple evaluations of successful artists in the 21st Century in partnership with local presenters.

MUAC 3845 Writing for The Modern Large Jazz Ensemble I (2 Credits)
A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Frank Foster, Sammy Nestico, Slide Hampton, Bob Brookmeyer and other modern practitioners. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

MUAC 3846 Writing for the Modern Large Jazz Ensemble II (2 Credits)
A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Bob Brookmeyer, Maria Schneider, Gil Evans, Darcy James Argue, and others. A special emphasis will be placed on creating full works for the large jazz ensemble that uses textures and modern extended form approaches indicative of these artists. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

MUAC 3847 Hip-Hop: Theory and Practice (4 Credits)
Students in this class will examine the socio-cultural, economic, and political significance of hip-hop as a medium of expression for youth around the world. Through analysis of poplar writing and media, as well as academic texts, we critically explore issues of race, social justice, masculinity, misogyny, censorship, technology, and intellectual property, as they relate to mainstream and underground hip-hip in America. Having discussed hip-hop's roots in the U.S., the remainder of the quarter will be devoted to tracing hip-hop's global routes.

MUAC 3860 Basic Jazz Improvisation (4 Credits)
The study of jazz improvisation techniques and forms. Open to music majors or by instructor permission.

MUAC 3870 Jazz Improvisation & Composition (4 Credits)
Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

MUAC 3872 Jazz Improvisation & Composition (4 Credits)
Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

MUAC 3910 Orchestration (4 Credits)
Techniques of instrumental scoring.

MUAC 3993 Graduate Music History Review (0 Credits)
MUAC 3950 Workshop: Advanced Ear Training (4 Credits)
Intensive application of procedures involving dictation and sight singing. Two-, three-, four-voiced examples emphasized. Summer session only.

MUAC 3955 Advanced Aural Skills (4 Credits)
In this course, students will acquire advanced rhythmic, melodic, and harmonic aural skills, through a combination of listening exercises, sight singing, and performing on their own instruments. Material for study will include atonal melody and harmony, complex rhythmic patterns, advanced exercises in traditional tonal patterns, and performance issues. Prerequisites: MUAC 1002, MUAC 1021 or equivalent.
MUAC 3959 Movement and Expression for Conductors (4 Credits)
Conductors use their whole body to communicate and elicit successful performances from their ensemble. If you have unnecessary tension or lack of ease in your body, this is communicated unconsciously to your ensemble, hindering quality of performance. Additionally, physical tension can prevent your ability to communicate and think clearly under pressure. This course is an exploration of freedom of movement and the physicality of musical expression. Classes will include group activities in free-movement, dance, acting, keeping your cool, poise, balance, tension release, as well as hands-on instruction applying Alexander technique to your conducting.

MUAC 3960 Advanced Orchestral Conducting (2 Credits)
Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Required of MM Conducting students with Choral or wind concentrations. Open to other students with permission of instructor. Prerequisite: Permission of instructor (not needed for MM Conducting students with Choral or Wind concentration). Fall quarter only.

MUAC 3961 Advanced Choral Conducting (2 Credits)
Conducting complex choral works, including those with instrumental accompaniment; phrasing, interpretation and score reading. Prerequisite: MUAC 2940. Fall quarter only.

MUAC 3962 Advanced Wind Conducting (2 Credits)
Conducting complex wind compositions; phrasing interpretation and score reading. Prerequisite: MUAC 2970. Spring quarter only.

MUAC 3973 Advanced Wind Literature I (2 Credits)
This course is an overview of wind literature appropriate for junior high school, high school, college and professional programs including strategies in effective programming and creation of appropriate program notes.

MUAC 3974 Advanced Wind Literature II (2 Credits)
An in-depth study of successful compositional techniques by prominent composers of wind literature. Prerequisite: MUAC 3973.

MUAC 3980 Advanced Jazz Improvisation and Composition (4 Credits)
A three term sequence continuing the in-depth study of the theory, performance practices, style, and history of jazz improvisation and composition. Prerequisite: satisfactory completion of the three terms of Jazz Improvisation and Composition or consent of the instructor.

MUAC 3990 Internship in Music (0-8 Credits)
Internship in Music will offer opportunities for music majors to experience actual music related careers within a sponsoring music organization chosen by the student and accepted by the supervising faculty of the School of Music.

MUAC 3991 Independent Study (1-10 Credits)
MUAC 3992 Directed Study (1-10 Credits)

Music-Ensembles Courses
MUEN 1701 IPA & Lyric Italian Diction (1 Credit)
Learn the practical application of proper pronunciation in Italian for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

MUEN 1702 Lyric French Diction (1 Credit)
Learn the practical application of proper pronunciation in French for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

MUEN 1703 Lyric German Diction (1 Credit)
Learn the practical application of proper pronunciation in German for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

MUEN 3025 Ensemble Block (3 Credits)
Ensemble Block can be taken by students who are assigned to multiple ensembles in one quarter without full participation in each group. Instructor permission is required for registration.

MUEN 3028 Album Combo (0-1 Credits)
The study and performance of the skills and practices of collective improvisation and composition.

MUEN 3029 Steel Drum Ensemble (0-1 Credits)
The steel drum music of Trinidad and Tobago as well as other styles of music from around the world are studied and performed by this ensemble. Participation in this ensemble does not require music notation. Participation in the ensemble is limited; therefore, students are selected by a simple audition process.

MUEN 3030 Hard Bop Combo (0-1 Credits)
The Hard Bop Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Hard Bop jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo’s Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.
MUEN 3031 Bebop Combo (0-1 Credits)
The Bebop Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Bebop jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3032 Latin Combo (0-1 Credits)
The Latin Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with Latin jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3033 Standards Combo (0-1 Credits)
The Standards Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with standard jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3034 Traditional Jazz Combo (0-1 Credits)
The Traditional Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with traditional (Dixieland) jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3035 Fusion Combo (0-1 Credits)
The Fusion Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with fusion jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3036 Commercial Music Combo (0-1 Credits)
The Commercial Music Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with commercial music repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3037 Vocal Repertoire Combo (0-1 Credits)
The Vocal Repertoire Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz solo repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3038 Vocal Jazz Combo (0-1 Credits)
The Vocal Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3039 Modal Combo (0-1 Credits)
The Modal Combo is coached by one of our faculty of performing jazz and commercial artists and is concerned with modal jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3040 Contemporary Combo (0-1 Credits)
The Contemporary Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with contemporary jazz repertoire and performance practices. The combo performs one concert each term on campus, one performance at Flo's Underground Jam sessions, and frequent concerts in the community and on tour. Admission is by audition.

MUEN 3041 North Indian Classical Ensemble (0-1 Credits)
The arts of India are distinguished by their close interrelationship; rhythm, melody and movement are all encompassed by the term "sangeet." In keeping, DU's North Indian Classical Ensemble is dedicated to the practice of all three of these arts, through singing, rhythmic recitation and dance. Participation in this ensemble involves studying the ornate and highly refined systems of Hindustani music and Kathak dance. No prior experience is necessary; all that is required is a positive attitude and a desire to learn!

MUEN 3042 Advanced Vocal Jazz Repertoire (0-1 Credits)
This combo is intended for vocal jazz majors who have completed the first year of Vocal Jazz Repertoire and are ready to progress into more advanced repertoire, as well as composing and arranging for small group settings.

MUEN 3043 Senegalese Drum/Dance Ensemble (0-1 Credits)
This ensemble is dedicated to learning the art of sabar dance and drumming, vibrant traditions of the Wolof people of Senegal, West Africa. In Senegal, sabar drums are played exclusively by griots, a caste of hereditary musicians. Sabar drum troupes perform at a variety of events, baptisms, weddings, wrestling matches, political meetings, and neighborhood dance parties. At most of these events, dance is an essential counterpart to drumming. The drum ensemble consists of numerous parts that come together to create complex polyrhythms. Ensemble members learn various drum parts that form rhythms over which a lead drummer solos, and dance movements that accompany these drum rhythms. They also learn bakks, extended musical phrases played in unison, and songs in the Wolof language. This course may be taken multiple times. This course counts toward the Analytical Inquiry, Society and Culture requirement.
MUEN 3044 Ghanaian Drumming Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to the drumming and singing traditions of Ghana, West Africa. Through hands-on instruction and oral transmission, students learn ceremonial and recreational music styles of select ethnic groups. Assigned readings, film viewing, guided listening, and in-class discussion familiarizes students with the social and cultural meanings of the musics performed in class. The course culminates in an end of the quarter concert. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3045 Flex Jazz Ensemble (0-1 Credits)
The Flex Jazz Ensemble is a modern jazz group with open-ended instrumentation. The ensemble consists of traditional jazz instruments and vocalists as well as nontraditional jazz instruments (such as double reed, French Horns, strings, etc). While there is no specific instrumentation for the ensemble, the core of the group will always be the traditional modern jazz rhythm section: piano (keys-synth), bass (acoustic and electric), drums (plus an extra percussionist as needed), and guitar (hollow body and Stratocaster-styles with the full range of pedals and gear. With the addition of non-traditional instrumentation, the ensemble reaches out to the classical side of Lamont to give those students a jazz opportunity. Along with the regular fare of programmed concerts, this ensemble also provides opportunities to other departments (theatre, creative writing, studio art, EDP, etc) to incorporate their disciplines in performances.

MUEN 3046 Indonesian Music Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to Indonesian performance traditions from the islands of Bali and Java. Through hands-on instruction and oral transmission, students learn a variety of gamelan (gong/chime ensemble) traditions. While learning this sophisticated cyclic music, class discussions, assigned readings, films, and guided listening will further familiarize students with the social and cultural meanings of the musics performed in class. Additionally, students will have the opportunity to learn basic hand, foot, and eye movements for Balinese and Javanese dance, as well as to study kecak, a Balinese vocal music that imitates the sound of the gamelan. The course will culminate in an end of the quarter concert.

MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)
The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all "classical" and "jazz" instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3048 Bluegrass Ensemble (0-1 Credits)
In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers' style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3100 Lamont Jazz Small Group (0-1 Credits)
All Lamont jazz small groups will focus on the basic elements of communication and musicality that make up high-level jazz performance practices. Students will transcribe, compose and or arrange their own material and will have numerous opportunities to perform each quarter. Admission to all small groups is by audition only.

MUEN 3677 Bow Art Ensemble (0-1 Credits)
The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

MUEN 3710 Opera (0-1 Credits)
Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3712 Lamont Chorale (0-1 Credits)
The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

MUEN 3720 Pioneer Pep Band (0-1 Credits)
This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.
MUEN 3731 The Spirituals Project Choir (0-1 Credits)
This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3740 Lamont Men's Choir (0-1 Credits)

MUEN 3750 Modern Music Ensemble (1 Credit)
The 20th- and 21st-Centuries have produced some of the most expressive, intriguing, and diverse music ever written. In this course, students have the opportunity to prepare and perform chamber music by 20th-Century masters, as well as recent works by living composers and new pieces written for them by students. This repertoire often involved unusual combinations of instruments (potentially including strings, woodwinds, brass, percussion, plucked instruments, keyboards, vocals, and electronics), providing an opportunity for students to work in less familiar ensembles. Students may also participate in the course by conducting or composing. The course is limited to music majors who are graduate students or advanced undergraduate students. Students in their first or second undergraduate year, and music non-majors may enroll with instructor approval.

MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3752 Lamont Wind Ensemble (0-1 Credits)
Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)
Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3754 University Jazz Ensemble (0-1 Credits)
The study of large ensemble jazz works for non-music majors. Must have high school performance ability.

MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)
The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3769 Organ Accompanying (0-1 Credits)
Major choral/vocal and major instrumental repertoire with organ accompaniment are studied and prepared for possible performance with chamber groups or local professional/church choirs.

MUEN 3770 Chamber Ensemble-Piano (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3771 Chamber Ensemble-Accordion (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3772 Chamber Ensemble-Harp (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3774 Chamber Ensemble-Brass (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3775 Piano Accompanying (0-2 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3776 Chamber Ensemble-Percussion (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3777 Chamber Ensemble-Strings (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3778 Chamber Ensemble-Woodwind (0-1 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3781 Chamber Ensemble-Guitar (0-2 Credits)
Small ensembles studying chamber music repertoire for various groups.

MUEN 3800 Vocal Chamber Ensemble (0-1 Credits)
A small group of outstanding singers interested in singing soloist vocal chamber music.
MUEN 3900 Lamont Women's Chorus (0-1 Credits)
The Lamont Women's Chorus is a treble voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

BM performance.

MUPR 2800 Accordion (2 Credits)  
BA music emphasis.

MUPR 2810 Accordion (4 Credits)  
BM performance.
MUPR 2900 Carillon (2 Credits)

MUPR 2910 Carillon (4 Credits)

MUPR 2920 Composition (2 Credits)
One-on-one instruction for composition majors.

MUPR 2925 Composition (4 Credits)
One-on-one instruction for composition majors.

MUPR 3120 Alexander Technique (2 Credits)
The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion.

MUPR 3121 Alexander Technique (4 Credits)
The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns may affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion. This class is tailored to the needs of students who are experiencing pain or injury and cannot take their regular studio lesson in a given quarter.

MUPR 3190 Jazz Piano (2 Credits)

MUPR 3210 Piano (2 Credits)

MUPR 3230 Voice (2 Credits)

MUPR 3250 Violin (2 Credits)

MUPR 3290 Viola (2 Credits)

MUPR 3310 Bass Violine (2 Credits)

MUPR 3350 Organ Improvisation (2 Credits)
This course is designed for organ students to introduce them to the art of organ improvisation, hymn and ensemble playing, as well as all possible forms of accompaniment. It is meant for undergraduate students (upper division), graduate students, and artist diploma graduates. Prerequisites: knowledge of music history, figured bass, and counterpoint. Permission of instructor required.

**Philosophy**

Office: Sturm Hall, Room 257
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2063
Email: philosophy@du.edu (philosophy@du.edu?subject=website inquiry)
Web Site: http://www.du.edu/ahss/philosophy

The curriculum in philosophy is designed to give students a broad grounding in the literature and methods of philosophy and in philosophical approaches to contemporary problems. Philosophy is inherently foundational for all other disciplines and philosophical training sharpens the student's ability to reason soundly, to formulate basic concepts and questions clearly and to work intelligently at solving human problems.

The philosophy curriculum is balanced among historical study, philosophical problem areas and applied courses. Graduates from the philosophy department have distinguished themselves in a variety of fields. A 1982 graduate was recently nominated for a Pulitzer Prize and numerous former students have attended some of the country's finest graduate programs. Study in philosophy provides an excellent basis for careers in law, business, government, journalism, teaching, social work and the sciences.

PHIL 3999 Philosophy Assessment (must complete prior to graduation)

Total Credits

Area of specialization

Students are not required to choose an area of specialization.

Critical Theory

Students must take at least one course in these three major areas of critical theory at the undergraduate or graduate level listed below. These courses must be approved by the undergraduate advisor. These courses may be taken outside of the Philosophy Department. Students must declare the specialization by filing a declaration form with the department. Completion of the critical theory specialization will not be reflected on the student’s transcript or degree.

19th Century Critical Theory

- Freud
- Hegel
- Kant
- Marx
- Nietzsche

20th Century Critical Theory

- Adorno
- Agamben
- Badiou
- Benjamin
- Deleuze
- Derrida
- Foucault
- Gramsci
- Horkheimer
- Irigaray
- Kristeva
- Lacan
- Lukcas
- Marcuse
- Ranciere

Contemporary Topics in Critical Theory

- Critical Literature Theory
- Critical Race and Post-Colonial Theory
- Feminist Theory
- Queer Theory
- Structuralism and Post-Structuralism

Secondary Major Requirements

40 credits. Same requirements as for BA degree.

Minor Requirements

20 credits in philosophy above the 1000 level.

Prerequisites
All seminars (3000-level courses) require at least junior standing or instructor’s permission.

**Area of specialization**

Students are not required to choose an area of specialization.

**Critical Theory**

Students must take at least one course in these three major areas of critical theory at the undergraduate or graduate level listed below. These courses must be approved by the undergraduate advisor. These courses may be taken outside of the Philosophy Department. Students must declare the specialization by filing a declaration form with the department.

**19th Century Critical Theory**

- Freud
- Hegel
- Kant
- Marx
- Nietzsche

**20th Century Critical Theory**

- Adorno
- Agamben
- Badiou
- Benjamin
- Deleuze
- Derrida
- Foucault
- Gramsci
- Horkheimer
- Irigaray
- Kristeva
- Lacan
- Lukcas
- Marcuse
- Marcuse
- Ranciere

**Contemporary Topics in Critical Theory**

- Critical Literature Theory
- Critical Race and Post-Colonial Theory
- Feminist Theory
- Queer Theory
- Structuralism and Post-Structuralism

**Requirements for Distinction in the Major in Philosophy**

- Minimum 3.4 cumulative GPA
- Minimum 3.85 major GPA
- Completion of a thesis

**BA in Philosophy**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 76) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.
Ideally, Common Curriculum (p. 72) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 37) and Scientific Inquiry: Society and Culture (p. 69) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

### Courses

**PHIL 1610 Discovering Philosophy (4 Credits)**
In this course we explore a range of philosophical questions and examine the replies that have been made by historical figures. We also think through the methods and strategies that have been used for thinking through those replies and explore these questions further on our own. Topics may include how do we know what actions are moral? What is knowledge? What is the basic structure of the world? What is justice? What assumptions are made by the disciplines that take themselves to study the natural world? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 1611 Philosophy and Social Justice (4 Credits)**
This course examines classic works in the philosophy of social justice: social contract theories, theories of political obligation, and theories of justice, especially the theory of John Rawls. There is particular focus on civil disobedience, economic justice, equal opportunity, and community action. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 1992 Directed Study (1-10 Credits)**

**PHIL 2001 Philosophy and Fiction (4 Credits)**
Examination of diverse aspects of the relationship between philosophy and fiction. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2003 Philosophy and Popular Culture (4 Credits)**
This course critically explores philosophical questions and issues in the context of contemporary popular culture. On the one hand, it considers more general questions about the nature and function of popular culture, including how popular culture has been defined and "theorized"; the connections between popular culture and the traditional and new media; the economic bases and functions of popular culture; and the political implications of popular culture. On the other, it explores particular philosophical issues—historical, ethical, political, aesthetic, and metaphysical—as they appear in selected areas or examples of popular culture: literature, film, the visual arts, digital media, graphic novels, music, television, etc. The aims are both to enhance students’ critical understanding of the ways in which philosophical assumptions and ideas underlie popular culture and to present traditional and contemporary philosophical arguments, movements, and ideas using examples drawn from popular culture as reference points. As examples, we might explore ethical dilemmas posed in the "Sopranos" or "Mad Men"; mind-body problems in the "Matrix" or "Avatar"; or metaphysical issues in "Donny Darko" or "Run, Lola, Run." This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2004 Philosophy of Race (4 Credits)
This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2005 Philosophy of Religion (4 Credits)
What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2005.

PHIL 2006 Self, Soul, and Public (4 Credits)
This course examines the place of the individual in relationship to public life, systems of knowledge, and the natural world. It asks basic questions such as, Who am I? What is my place in the world? What is free will? What is the place of spirituality and contemplation in a secular society? Drawing from the humanities, natural sciences and social sciences, the course provides foundational material for responding to these questions. The methodology of the course is first-person experiential inquiry involving sustained periods of contemplation and meditation.

PHIL 2007 Philosophy and Video Games (4 Credits)
Traditional and novel metaphysical, ethical, political, and aesthetic issues both arising within video games and posed by this still developing medium. No prerequisites. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with JUST 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2010 Existentialism (4 Credits)
Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2014 and JUST 2014.

PHIL 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course is cross-listed with JUST 2026 and RLGS 2026. This course counts for the AI:Society requirement.
PHIL 2040 Practical Logic (4 Credits)
In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

PHIL 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.

PHIL 2080 Asian Philosophy (4 Credits)
Philosophical viewpoints, classical texts, and issues raised within one or more such traditions as Buddhism, Hinduism and Confucianism.

PHIL 2100 Philosophy of Mind (4 Credits)
Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind–epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2110 Classical Greek Philosophy (4 Credits)
The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato's student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the "Golden Age of Greece" has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2111 Greek Moral Philosophy (4 Credits)
In this course we examine the "Good Life" in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)
A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2121 Suicide, Philosophy, Community (4 Credits)
Since its beginning among the ancient Greeks, the story of philosophy has been complexly intertwined with the two other stories, that of reflection on suicide, and that of reflection on the nature and nurture of community. In the first half of this course, we first examine a classic ancient Greek philosophical text addressing suicide, the we consider some 20th century philosophical reflections on that same topic, culminating in an impassioned defense — written and first published shortly before his own suicide by a philosophically trained writer who survived Auschwitz — of the individual's right to choose "voluntary death." Then, in the second half of the course, we turn to the issue of community, especially as thinking about the possibility of establishing a genuinely universal community inclusive of all humans without exception is surprisingly affected by serious reflection on the issues of suicide examined in the first part of the course. To aid and direct us, we examine some challenging contemporary philosophical writings concerning just such a possibility of truly inclusive human community. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2130 Philosophy of Early Modern Age (4 Credits)
Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibinz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2140 Kant to Nietzsche (4 Credits)
German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2144 20th-Century Philosophy (4 Credits)
A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2145 Between Deleuze and Foucault (4 Credits)
Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2150 Philosophy of Law (4 Credits)
Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2160 Symbolic Logic (4 Credits)
Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

PHIL 2180 Ethics (4 Credits)
Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)
Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?," together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)
A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the 'modern world.' This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2184 Ethics, Individuals, & the Law (4 Credits)
Furnish students with a detailed and lasting understanding of a range of philosophical and ethical problems that arise in the law. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2200 Social & Political Philosophy (4 Credits)
Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2250 Philosophical Perspectives on Perception and Reality (4 Credits)
An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call "the physical world"). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)
Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2402 London and Paris: Medieval to Postmodern (4 Credits)
This is a 3-week summer session course involving one week on campus and two weeks travel to London and Paris. It traces the development of philosophical ideas, politics, social institutions, architecture, and the visual arts from the Middle Ages to the present as they occurred in these two major capitals. Its approach is both historical and comparative and emphasizes understanding and interpreting the contemporary experience of these cities in light of their shared as well as divergent historical paths.
PHIL 2555 The Philosophy of Technology (4 Credits)
Serious thought about technology commences with the beginnings of philosophy itself, although it becomes an urgent theme and explicit field of philosophical inquiry only in the 20th century. This course will approach the theme of technology from five perspectives: (1) Historical: How did technology arise as a philosophical concern and how did the development of technology influence thought about it? (2) Metaphysical: What role does technology play in our understanding of 'reality'? Is technology one element among others in what we take to be 'real', or does it determine our views of 'reality'? (3) Epistemological: What is the relation between science and technology? Is technology a result or application of 'scientific knowledge,' or does technology govern or drive science itself? (4) Ethical/Political: In what ways does technology influence and/or challenge our views about what is 'valuable' about our individual and collective ways of living? Is the development of technology something to be embraced or rejected/limited with respect to human values and aspirations? (5) 'Futurist': Can the 'digital revolution' be understood as continuous with the history of technology itself or does it represent some new metamorphosis of both what it means to be 'human' and of 'reality' itself?

PHIL 2700 Biomedical Ethics (4 Credits)
Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2701 Topics in Philosophy (1-4 Credits)
PHIL 2702 Topics in Philosophy (1-4 Credits)
PHIL 2703 Topics in Philosophy (1-4 Credits)
PHIL 2704 Topics in Philosophy (1-4 Credits)
PHIL 2705 Topics in Philosophy (1-4 Credits)
PHIL 2706 Topics in Philosophy (1-4 Credits)
PHIL 2707 Topics in Philosophy (1-4 Credits)
PHIL 2708 Topics in Philosophy (1-4 Credits)
PHIL 2709 Topics in Philosophy (1-4 Credits)
PHIL 2710 Topics in Philosophy (1-4 Credits)
PHIL 2711 Topics in Philosophy (1-4 Credits)

PHIL 2770 Philosophy of Science (4 Credits)
This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2785 Environmental Ethics (4 Credits)
A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

PHIL 2992 Directed Study (1-10 Credits)

PHIL 3000 Plato's Metaphysics (4 Credits)
A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

PHIL 3003 Plato's Theory of Knowledge (4 Credits)
A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

PHIL 3005 Cosmopolitics (4 Credits)
This class will be a close reading of Plato's dialogue Timaeus, with a special focus on the cosmological, theological, and political dimensions of the text.

PHIL 3010 Great Thinkers: Aristotle (4 Credits)
A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)
Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.
PHIL 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)
Using the “Guide of the Perplexed” as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides’ core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is “metaphysics?”; God’s unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God’s ways as well as “negative theology”—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the “separate intellects”; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for “living in the world with/out God.” In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and RLGS 3024. Prerequisite: Junior standing or instructor’s permission.

PHIL 3026 Levinas and the Political (4 Credits)
Emmanuel Levinas (1906-1995), famous for his arresting insight of “ethics as first philosophy,” is a key figure in the histories of phenomenology, metaphysics, and theology. In this class, we examine the implications of Levinas’ thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as “Reflections on the Philosophy of Hitlerism” (1934), Totality and Infinity (1961), Otherwise Than Being or Beyond Essence (1974), and “Peace and Proximity” (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other “Jewish theologies” of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hostilities and strangers, friends and enemies; liberalisms, socialisms, fascisms; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporalities of covenant and justice; fraternity; forgiveness and its limits; “the 3rd”; rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

PHIL 3050 Great Thinkers: Hume (4 Credits)
A detailed study of Hume’s "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor’s permission.

PHIL 3061 Kant’s Ethics/Aesthetics/Politics (4 Credits)
A study of Kant’s "value theory" and its historical significance. Prerequisite: junior standing or instructor’s permission.

PHIL 3062 Kant’s Epistemology and Logic (4 Credits)
A study of Kant’s theory of knowledge, logic and related issues. Prerequisite: junior standing or instructor’s permission.

PHIL 3063 Kant on Religion (4 Credits)
A study of Immanuel Kant’s major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor’s permission.

PHIL 3070 Great Thinkers: Hegel (4 Credits)
Hegel’s "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor’s permission.

PHIL 3075 Marxism (4 Credits)
This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Cross listed with ECON 3075.

PHIL 3090 Great Thinkers: Heidegger (4 Credits)
Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor’s permission.

PHIL 3092 Great Thinkers: The Later Heidegger (4 Credits)
Study of the works of Heidegger after 1930. Prerequisite: junior standing or instructor’s permission.

PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)
A detailed study of Kierkegaard's "Journey to Spirituality" and its impact on contemporary existential philosophy. Prerequisite: junior standing or instructor’s permission.

PHIL 3111 Contemporary Continental Philosophy: The Figure of the Migrant (4 Credits)
The 21st century has been described as the century of “people on the move” by UNHCR High Commissioner Antonio Guterres. Some 11 million people are refugees worldwide, fleeing political violence and/or persecution at home; whole more than 20 million are internally displaced within the borders of their own countries. Accordingly, the figure of the migrant/refugee has emerged as one of the most important, if not the most important, political figures of contemporary continental philosophy. Despite differences in philosophical orientation, thinkers such as Gilles Deleuze, Judith Butler, Jacques Ranciere, Julia Kristeva, Alain Badiou, and Jacques Derrida have all written at length on the centrality of the figure of the migrant for contemporary political thought. Not only does the figure of the migrant define the people of our time, according to many of these authors, it also defines a positive political way forward. This course thus provides not only a survey of the different traditions in contemporary European philosophy over the last twenty years (post-structuralism, deconstruction, neo-classicism, post-Marxism, third-wave feminism) but also offers a thematic look at the politico-philosophical figure of the migrant and other issues related to migration (human rights, borders, camps, sovereignty, territory, nomadism, and resistance).
PHIL 3120 Metaphysics (4 Credits)
In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

PHIL 3130 Knowledge Problems (4 Credits)
Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

PHIL 3146 Great Thinkers: Levinas (4 Credits)
Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we will set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, Ethics and Infinity and Otherwise Than Being or Beyond Essence, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with JUST 3146.

PHIL 3150 Metaphysics of Matter: Theory-Building from Science to Philosophy to Theology (4 Credits)
What is matter? How do we make sense of philosophical discussions of an "I know not what"? Of a "nothing" which is something? Of a "pure potency" that lacks any actual characteristics? In what sense does matter mark the very limits of human theorizing, and how do theories of matter reveal differences (or similarities) between the methods of theorizing that we use in physics, metaphysics, and theology? In this course, we work to understand the metaphysics and metametaphysics of matter, focusing on a number of views of matter as well as on methodological questions of what it means to theorize about matter in (1) scientific, (2) philosophical, and (3) theological contexts. Drawing on theory ranging from ancient physics and cosmology to contemporary metametaphysics, philosophy of science, and philosophy of language, we engage in close readings of ancient, medieval, and modern texts to challenge the ways we think about matter (and theory itself) in the history of philosophy. Requires junior standing or higher.

PHIL 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)
Neoplatonism is a unique genre—somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we will investigate a host of philosophical writings, including the Theology of Aristotle and the Liber de Causis, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Acecenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection and the call to virtue. Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3152.

PHIL 3175 Morality and the Law (4 Credits)
A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

PHIL 3176 Advanced Topics in Philosophy of Law: Rights, Legal Institutions, and Justice (4 Credits)
A critical examination of rights claims and an exploration of those rights claims ought to affect legal institutions. What are rights? How are they justified? How do various different rights claims conflict with each other? Does a theory or rights help provide a justified theory of criminalization? Are there any rights we have just in virtue of being human? How does the concept of human rights apply to issues such as international law, the right to life and whether human rights require a right to democracy?

PHIL 3178 Metaethics (4 Credits)
This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency; or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn't the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

PHIL 3179 Virtue Ethics (4 Credits)
Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

PHIL 3180 Socratic Ethics (4 Credits)
A study of Plato's early dialogues in order to discern the ethical views of the historical Socrates. Prerequisite: junior standing or instructor's permission.
PHIL 3185 Philosophy of Action and Agency (4 Credits)
Wittgenstein once asked, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Understanding the difference between mere happening and an intentional action became central to the philosophical investigation of action and agency in the 20th century. In this course we examine this distinction and why it should matter to us. Our topics include intentional action, the causal theory of action, the metaphysics of action, agent causation, basic action, acting and trying to act, intentions, weakness of will, strength of will, and mental action. Requires junior standing or permission of instructor.

PHIL 3201 Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge (4 Credits)
A study of Wittgenstein, Quine, and Kripke on the nature of necessity, a priori knowledge and their relation to understanding philosophy. Prerequisite: junior standing or instructor’s permission.

PHIL 3210 Philosophy of Movement (4 Credits)
