UNDERGRADUATE

About this Bulletin
The University of Denver Undergraduate Bulletin has been prepared by the faculty and administration to serve as the governing document for University's undergraduate academic programs, courses and policies. The Undergraduate Bulletin represents the University's best planning at the time of publication. Course and curriculum changes; modification to tuition, fees or other charges; and unforeseen changes in other aspects of the University of Denver sometimes occur after the bulletin has been published, but before the changes can be incorporated in a later edition and apply to all students as of the date they become effective, regardless of whether they were in effect at the time the student initially enrolled at the University of Denver. Students are responsible for knowing all academic and administrative policies and regulations affecting their program of study and for abiding by all such policies and regulations during their period of enrollment at the University. The Undergraduate Bulletin does not constitute a contract between the University of Denver and its students on either a collective or individual basis.

The Undergraduate Bulletin is published and distributed annually in both a web and a PDF version. Maintaining document fidelity, both versions remain static after publication. Corrections to published errors can be obtained on the errata page accessed through the table of contents and on the Registrar's Office website.

About DU
The University of Denver
Founded in 1864, the University of Denver is an independent coeducational institution located in a residential neighborhood eight miles southeast of downtown Denver. Colleges, schools and divisions of the University include the following:

- College of Arts, Humanities and Social Sciences
- College of Natural Sciences and Mathematics
- Colorado Women's College
- Daniel Felix Ritchie School of Engineering and Computer Science
- Daniels College of Business
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Morgridge College of Education
- Sturm College of Law
- University College

Students
University of Denver students come from all 50 states, in addition to the District of Columbia and from several U.S. territories, and from 82 different countries. Enrollment is approximately 12,700: 5,900 undergraduates and 8,000 graduate students.

Accreditation
Institutional Accreditation
The University of Denver is accredited as a doctoral degree-granting institution by the Higher Learning Commission (HLC) and is authorized to offer post-secondary education in the state of Colorado by the Colorado Department of Higher Education.

Higher Learning Commission
230 South LaSalle Street, Suite 7-500
Chicago, IL 60604-1413

Specialized Accreditation

Individual academic programs undergo periodic review by accreditation or certification bodies in their field.

- Accrediting Board for Engineering and Technology
- American Bar Association
- American Chemical Society
- American Library Association
- American Psychological Association
- Association to Advance Collegiate Schools of Business International
- Colorado Department of Education
- Council for Accreditation of Educator Preparation
- Council on Social Work Education
- National Association for the Education of Young Children
- National Association of Schools of Arts and Design
- National Association of School Psychologists
- National Association of Schools of Music

Academic Calendar

Courses for programs other than the Sturm College of Law are offered on the quarter system; the Sturm College of Law operates on a semester calendar.

Quarter System

The academic calendar is divided into fall, winter and spring quarters and a summer session. Each quarter is approximately ten weeks long and summer session is nine weeks. There are two interterm sessions. Students may complete degree requirements through continuous enrollment, including summers, or may arrange the normal work of a three-quarter academic year in any desirable sequence of quarters and summer session.

Semester System

The academic calendar is divided into fall, spring and summer semesters.

Summer Session

Summer session (http://www.du.edu/summer/) is an avenue for continuing undergraduate and graduate students to accelerate their programs or complete necessary coursework. Elective, Common Curriculum and required courses for majors and minors are offered in a variety of time frames. Travel and other unique courses including short, intensive workshops are part of the summer program. Visiting students, professionals and individuals from the community interested in attending for the summer only are encouraged to attend and are admitted (p. 31) under an open-enrollment policy.

Interterms

Interterms are the periods preceding each academic quarter, during which short, innovative on-campus, online, and travel experiences for undergraduate and graduate students are offered. Hours completed in interterms are applied as credit toward graduation requirements and may be applied to the major or minor. Students can find more information about and register for interterm classes through the Academic Programs (https://www.du.edu/interterm/) office. Questions about interterms should be directed to Academic Programs, Mary Reed Building, Room 301, 2199 S. University Blvd., Denver, CO 80208-2360, or by emailing uap@du.edu.

Academic Calendar: Quarter System (p. 13)

Academic Calendar: Semester System (p. 14)

Attendance

Students are expected to attend all meetings of classes for which they are registered, including the first and last scheduled meetings and the final examination period. Students who fail to attend the first class and who have not previously notified their instructors of their absence may be withdrawn from the course by the Office of the Registrar in consultation with the instructor. Instructors have the right and responsibility to establish attendance policies for their courses.

Participation in official University activities, personal emergencies and religious observances are valid reasons for absences. Students are responsible for informing instructors about their absence and for completing assignments given during their absence. A student may not attend classes without being officially enrolled. Registrations are not processed after the designated registration period of the quarter.

Final Exams

Any final exam for a course must be scheduled during the final exam period. Students must attend all final exams as scheduled by faculty. The final exam schedule has been created to avoid conflicting exams; however, time conflicts are possible. Students should check their final exam schedules early in the term to identify possible conflicts. Students are expected to let their instructors know when they have more than one exam being held at the same time. The Office of the Registrar will attempt to resolve conflicts whenever possible. Final exams are not rescheduled if a student has multiple exams on the same day. It is at the discretion of individual instructors to accommodate student requests for moving an exam in the event that a student has multiple exams on the same day. Final exams are not changed to accommodate student travel plans, and students should only plan travel after the official end date of the term.

The Office of the Registrar schedules final exams for classes held during standard meeting times in fall, winter and spring quarters. Final exams are also scheduled for certain classes meeting one day per week. Since summer quarter is a truncated term, we do not schedule any final exams for that quarter.
Bereavement Policy

The Office of Student Outreach & Support (SOS) is the designated office to help support students in the event of a death in the student’s immediate family or household. The student bereavement policy (https://www.du.edu/studentlife/studentsupport/media/documents/student-bereavement-policy.pdf) allows students a certain number of excused absences. Students can request verification of these absences by completing the verification request form (https://cm.maxient.com/reportingform.php?UnivofDenver&layout_id=94). Student Outreach & Support staff will then notify the student's instructors of the verified absences.

Campus Weather Closures

Sometimes severe storms may create such a hazard that the University makes a decision to close and cancel operations for a period of time. Students can receive information about campus weather closures via email, telephone or text message by registering for the Emergency Notification System (https://www.du.edu/emergency/notification/).

Religious Accommodations and Class Attendance

The University of Denver has an enduring commitment to diversity and inclusive excellence, including religious diversity. The University honors and respects students’ rights to observe sincerely held religious beliefs or practices and provides an educational environment in which all students are free from harassment and discrimination based on religion consistent with the requirements of federal, state and local law. As part of this commitment, the University provides reasonable accommodations for students’ sincerely held religious beliefs or practices unless the University determines that such an accommodation would fundamentally alter the curriculum or academic program.

Religious Accommodation Procedures

Students should follow these procedures in requesting a religious accommodation for academic requirements:

- By the end of the second week of a course, students are expected to examine the course syllabus for potential conflicts with religious beliefs or practices and email their instructor to seek any requested absence(s). In the case of exams or assignments that are added to the syllabus or otherwise announced after the first two weeks of the course, students should email their instructors as soon as possible and in advance of the requested absence(s).
- For courses that are shorter than the traditional quarter or semester, within the first week of the course, students are expected to examine the course syllabus for potential conflicts with religious beliefs or practices and email their instructors to seek any requested absence(s). In the case of exams or assignments that are added to the syllabus or otherwise announced after the first week of the course, students should email their instructors as soon as possible and in advance of the requested absence(s).
- Students who have conflicts with the overall course pedagogy or delivery method, such as the time and date the class is offered or the modality, are encouraged to find an alternative section for the class or the modality.
- Requests for absences from an internship, externship, field placement, or other practical learning experience outside the classroom will be assessed on an individual, case-by-case basis in consultation with the University placement supervisor and the field placement supervisor. Students should understand that if an accommodation is granted, missing time from an internship, externship, field placement, or other practical learning experience may require the student to make up the missed time or work. Students who have conflicts with the overall schedule for an internship, externship, field placement, or other practical learning experience are encouraged to consider scheduling the internship, externship, field placement, or other practical learning experience at another time. The student should consult with the University placement supervisor for the program regarding such scheduling needs.

After receiving a request for religious accommodation (webform above automatically emails student-provided instructors), instructors must consider the request and determine whether the accommodation is reasonable and does not fundamentally alter the curriculum or academic program. The instructor should evaluate the request on a case-by-case basis, taking into account relevant factors including, but not limited to:

- the fundamental requirements of the applicable academic program and/or related technical standards;
- the requirements of the course;
- the requirements of the department or major;
- the potential effects of the accommodation on the individual and fellow students;
- the duration of the accommodation request; and
- the availability of alternative accommodations.

Prior to denying a request for religious accommodation or offering an alternative accommodation, if an instructor has concerns regarding whether a request for religious accommodation fundamentally alters the curriculum or academic program, the instructor should consult with the The Associate Vice Chancellor of Equal Opportunity and Title IX (via contact information at right).
The University is not required to accept the student's requested, preferred accommodation if there is more than one alternative that eliminates the religious conflict. When there is more than one alternative, the University may select any of the accommodations, provided that the accommodation will effectively eliminate the religious conflict.

Students are responsible for fulfilling the course requirements, including obtaining the materials and information provided during any missed class(es), and for working with course instructors in advance on an appropriate timeline to submit any missed assignments, take any exams, or complete organized activities.

Once a religious accommodation request is granted, the instructor will provide the student the opportunity to make-up the missed assignments, take any exams, or complete organized activities. In providing this opportunity, the instructor should provide alternatives that are substantially equivalent to the original assignment, exam, or activity.

Appeals for Denial of Religious Accommodation for Academic Requirements

Students may appeal an instructor's decision denying a request for religious accommodation by submitting a written appeal to the chair of the department, or to the program director if there is no chair, within five (5) business days of the instructor's decision. The chair of the department or program director, as applicable, must consult with the Associate Vice Chancellor for Equal Opportunity and Title IX and/or the Vice Chancellor of Student Affairs or their designee and issue a decision in writing within five (5) business days of receiving the appeal and shall include the reasons for the decision.

The student may appeal the decision of the chair of the department or program director denying the appeal to the dean of the appropriate academic unit, or the dean's designee, within five (5) business days of receiving the decision. The dean, or dean's designee, must consult with the Associate Vice Chancellor for Equal Opportunity and Title IX and/or the Vice Chancellor of Student Affairs or their designee and issue a decision within five (5) business days of receiving the appeal. The decision of the dean, or dean's designee, is final.

Concerns of Harassments of Discrimination

Students who believe that they have been harassed or discriminated against based on religion may contact the Office of Equal Opportunity & Title IX (EOIX), EOIX (https://www.du.edu/equalopportunity/), by phone at 303-871-7016, by email at equalopportunity@du.edu, or in person at the Driscoll Commons, 2050 E. Evans. Suite 30.

Information for Faculty and Staff can be found at https://www.du.edu/human-resources/media/documents/employee_handbook_may2013.pdf

2022-2023 Academic Calendar: Quarter System

### Autumn Quarter 2022
- **September 10**: Saturday  
  Classes begin
- **November 18**: Friday  
  Last day of classes
- **November 19-22**: Saturday-Tuesday  
  Final examination period

Unit of Credit

Unit of Credit

Credit hours are the unit of measure of the amount of work represented by specified learning outcomes in an academic program. Academic programs at the University of Denver are scheduled on both quarter and semester (College of Law) calendars. Each academic program specifies the number of (quarter- or semester-hour) credits required. Courses award credit based on learning outcomes for the course. For lecture courses, one credit hour represents one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-classroom student work each week the quarter or semester. Credit for non-lecture courses such as laboratories, internships, practica, studios or music performance classes represent equivalent learning outcomes. The amount of scheduled times for these courses vary.

More information regarding the University of Denver’s credit guidelines and instructional methodology definitions can be found on the Registrar website (https://www.du.edu/registrar/course/credithourguidelines.html).
Equal Opportunity and Non-Discrimination Policy

The University of Denver is an Equal Opportunity Institution. It is the policy of the University not to discriminate in the admission of students, in the provision of services, or in employment on the basis of race, color, national origin, ancestry, age, religion, creed, disability, sex, sexual orientation, gender identity, gender expression, marital status, pregnancy, genetic information, military enlistment or veteran status. The University prohibits all discrimination, harassment, gender-based violence, and retaliation, and complies with all applicable federal, state and local laws, regulations and Executive Orders.

Inquiries concerning allegations of discrimination based on any of the above factors may be referred to the Office of Equal Opportunity & Title IX:

University of Denver
Office of Equal Opportunity & Title IX
Driscoll Commons, Suite 30
2050 E Evans Avenue
Denver, CO 80208
Phone: 303-871-7016
Email: equalopportunity@du.edu or titleix@du.edu

For more information or to report an incident, please call the above number or see the website at https://www.du.edu/equalopportunity. You also may contact the Office of Equal Opportunity & Title IX with concerns regarding determinations of religious or disability accommodations and/or issues about access.

Authorization and Disclosure

In October 2010, the Federal Department of Education issued “Program Integrity” regulations that require all Title IV eligible schools to obtain approval to operate in every state in which a student is located while receiving instruction. This is true for all educational programs, including distance education.

If an institution is offering postsecondary education through distance or correspondence education in a state in which it is not physically located, the institution must meet any state requirements for it to be legally offering distance or correspondence education in that state.

In order to offer online educational opportunities to other states’ residents, DU must comply with those states’ policies for distance education and be able to demonstrate compliance upon request.

In 2014, the University of Denver was approved by Colorado to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education. Participating in NC-SARA allows the university to offer online education in all states except California. The University of Denver maintains contact with that state to ensure the ability to offer distance programs there. We are currently authorized to offer distance programs in all 50 states.

Please direct questions about state authorization to the Office of the Registrar (http://www.du.edu/registrar/).

Student Complaint State Contacts

This list below includes contact information for all 50 states, the District of Columbia and US territories and should not be construed as informative of what agencies regulate the institution or in what states the institution is licensed or required to be licensed. States, through the relevant agencies or Attorneys General Offices, may accept complaints regardless of whether the institution is required to be licensed in that state.

Admission

Admission to the traditional bachelor's program and the bachelor of arts completion program are handled through separate offices and application processes. Requirements for both the traditional bachelor's and the bachelor of arts completion programs are outlined within this section.

Requirements for Entrance to Special Programs and Courses

Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

Traditional Bachelor's Program

Build the Foundation for Your Future

Open the door to a world of possibilities. As an undergraduate student at DU, you'll get a multidisciplinary education that's rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of the global culture. In the end, you'll be uniquely prepared to confront the challenges and opportunities ahead.

Innovative Degree Programs

Select from more than 100 areas of study, including both traditional and progressive offerings. We also offer compelling dual degree programs that span a variety of disciplines, including accounting, education, social work, art history, geographic information science, international studies, public policy, engineering, computer science and law.

Admission

The University of Denver seeks students who have challenged themselves academically and who have demonstrated success in English, math, social studies, science and foreign language. In selecting the incoming class, Undergraduate Admission considers all available information including evidence of academic achievement, contributions to school and community, extracurricular activities and leadership.

The University of Denver uses the Common Application. We encourage you to apply online at https://www.du.edu/admission-aid/undergraduate/how-to-apply (https://www.du.edu/admission-aid/undergraduate/how-to-apply/).
Undergraduate Admission invites students to learn more about the DU experience through our many visit programs. During a campus visit, you will learn about our admission process, tour our facilities, speak with current students and investigate the different programs of study, extracurricular activities and social offerings available to students.

To register for a campus visit program, go to www.du.edu/visit (http://www.du.edu/visit/) or call Undergraduate Admission at 303-871-7711.

**Admission Standards**

When reviewing an application, our admission committee considers the following:

- academic achievement
- grade point average
- standardized test scores
- DU's whole-person assessment, essay and letters of recommendation

**Academic Achievement**

The typical accepted high school student has taken a strong, competitive class schedule, which may include honors, college preparatory, Advanced Placement and/or International Baccalaureate courses.

**Grade Point Average (GPA)**

The average high school GPA of students accepted for Fall 2021 was 3.78. The middle 50 percent ranged from 3.62–4.0.

**Standardized Tests**

Academic performance in high school is the most important factor in our admission process. However, we are a test-optional university, and submitting test scores is your choice. If you choose to submit your SAT and/or ACT scores, they will be considered along with your other application materials for both admission and merit scholarships.

- DU will accept either the SAT or the ACT. SAT Code: 4842 and ACT Code: 0534.
- We do not consider subject test or writing sections.
- If you've taken either test more than once, we'll combine the best scores from the individual sections of each test to create an ideal “super score.”
- If you are a student attending a non-graded high school that does not provide a letter or numerical grade, you are required to submit official ACT or SAT scores with your application.

If you have questions about the University of Denver's test-optional path, please explore the FAQs and exceptions on the test-optional (https://www.du.edu/test-optional/) webpage or contact your admission counselor.

The middle 50 percent test scores of students accepted for Fall 2021 were the following:

<table>
<thead>
<tr>
<th>Test</th>
<th>Score Range</th>
<th>Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAT</td>
<td>1230-1410</td>
<td>1316</td>
</tr>
<tr>
<td>ACT</td>
<td>28-32</td>
<td>30</td>
</tr>
</tbody>
</table>

**Whole-Person Assessment**

DU students assume responsibilities outside the classroom; they are leaders, volunteers, artists, musicians, athletes, actors and people who contribute to their community as a whole. Our admission committee seeks well-rounded students who have contributed to their high school and local communities and who will contribute to the DU community as well. We welcome you to submit a ZeeMee (https://www.zeemee.com/) profile (a free service designed to help students bring their application to life by highlighting your personal story via photos, videos and text). Simply copy and paste your ZeeMee link into your University of Denver application.

**Programs with Additional Admission Requirements**

Daniels College of Business degree programs, Lamont School of Music degree programs and the bachelor of fine arts in the School of Art and Art History have requirements for admission beyond the criteria listed above.

**Daniels College of Business**

Applicants who wish to pursue an undergraduate business major in Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application for students who indicate business as their intended major on their application to DU. Students will be considered for direct admission to Daniels when accepted to the University of Denver. If applicants are not directly admitted through the DU application process, they are encouraged to work through the fast track or pre-business pathways as an enrolled student.

There are three possible admission routes into Daniels:

a. Secure direct admission upon application to the University of Denver, based on indication of business interest on application and overall strength of application credentials. Transfer applicants are evaluated on GPA, transfer coursework, and work experience; or
28  Traditional Bachelor’s Program

b. Earn Fast Track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion (C- or higher) of MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I; or
c. Pursue the Pre-business pathway through the successful completion (C- or higher) of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Economics: A Critical Introduction, INFO 1010 Analytics I: Data Management and Analysis, INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I, in addition to Microsoft Certifications for Excel, Word, and PowerPoint. A 2.5 minimum cumulative GPA is required to apply. Application are accepted on a rolling basis throughout the year, once applicants have fulfilled all requirements.

This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan/) outlines recommended paths for completing the courses required to earn Fast Track admission or to apply to Daniels.

Please refer to the Daniels website (http://daniels.du.edu/) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu (dsp@du.edu?subject=), 303–871-3939 or www.du.edu/studentlife/disability (http://www.du.edu/studentlife/disability/).

**Lamont School of Music**

In addition to being accepted for study by the University, students desiring admission to the Lamont School of Music must audition with the appropriate music faculty and complete a Lamont application. Audition requirements differ by area. Requirements can be reviewed at www.du.edu/lamont. An in-person audition is preferable; however, students may submit a high quality video recording for review.

**School of Art and Art History**

If admitted to the University and the School of Art & Art History (SAAH), all students will be entered into the BA program in their area of interest. Students interested in pursuing a BFA in Studio Art apply under the guidance of a faculty member once enrolled in SAAH. Contact the School of Art and Art History (p. 146) for details.

**Early Experience Applicants**

After completing their sophomore or junior year in high school, students may enroll for limited study at the University through our Early Experience Program (https://www.du.edu/admission-aid/undergraduate/early-experience/), provided they meet admission requirements and are recommended by a high school counselor. Courses completed can be applied toward a University of Denver degree if the student is admitted as a degree candidate.

**First-Year Domestic Student Application Options**

**Application and Decision Dates**

For first-year domestic students, DU offers four application programs for the fall quarter: Early Action, Early Decision I, Early Decision II and Regular Decision.

**Early Action**

Early Action is a nonbinding program through which students obtain an early admission decision.

- Apply by November 1
- Decision letter: mid-December
- Deposit by May 1

**Early Decision I**

Early Decision I is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by November 1
- Decision letter: early December
- Deposit by late December

**Early Decision II**

Early Decision II is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by January 15
- Decision letter: late February
- Deposit by early March
Regular Decision

Regular Decision is the final admission deadline for consideration for the fall quarter and is nonbinding.

- Apply by January 15
- Decision letter: mid-March
- Deposit by May 1

Late Action Applications

First-year applications submitted after January 15 will be considered on a case-by-case, space-available basis.

International Students

The University of Denver currently enrolls over 500 international students from more than 90 countries. All non-U.S. citizens applying for undergraduate admission, including U.S. permanent residents, undocumented/DACA students, and those with refugee or asylum status must complete the Common Application at https://www.commonapp.org.

Deadlines for International Students

International first-year applicants will be considered for fall (September) admission only. Applications must be submitted by November 1 for Early Decision I or Early Action consideration or January 15 for Early Decision II or Regular Decision consideration.

The recommended application deadlines for transfer students are as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>(Month)</th>
<th>(Season)</th>
<th>(Day)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall quarter</td>
<td>(September)</td>
<td>April 1 (priority deadline); July 1 (final deadline)</td>
<td></td>
</tr>
<tr>
<td>Winter quarter</td>
<td>(January)</td>
<td>October 15</td>
<td></td>
</tr>
<tr>
<td>Spring quarter</td>
<td>(March)</td>
<td>February 1 (limited space)</td>
<td></td>
</tr>
<tr>
<td>Summer quarter</td>
<td>(June)</td>
<td>May 1</td>
<td></td>
</tr>
</tbody>
</table>

All undergraduate international applicants will be automatically considered for merit-based scholarships. Applicants will be notified in their admission letter if they have been awarded a merit scholarship.

Admission Standards for International Students

In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires a minimum score of 80 iBT (Internet-based) on the Test of English as a Foreign Language (TOEFL) with at least 18 on all subscores or a score of 6.5 with no band scores below 5.5 on the International English Language Testing System (IELTS), or a minimum grade of C on the Cambridge Certificate in Advanced English (CAE). A Duolingo English Test score of 105 or higher can be considered in lieu of these scores. For more information regarding English Proficiency, please visit: www.du.edu/apply/admission/apply/international/proficiency.html.

As part of the Common Curriculum at DU, most students must complete a foreign language requirement. Based on their language assessment scores, students must complete 4, 8, or 12 language credits in order to fulfill the requirement. If you are a non-native speaker of English, you are required to take English language credit courses in the LAUNCH Curriculum (http://www.du.edu/apply/media/documents/englishlanguagecreditcourses.pdf) for which you will receive credit toward your degree and fulfill the language requirement. Placement in these courses is based on your submitted English proficiency scores (TOEFL, IELTS, or CAE) or the results of the English Language Proficiency Assessment (ELPA) (http://www.du.edu/apply/media/documents/elpa.pdf). The LAUNCH courses are designed to help students be more successful in their academic programs by improving their proficiency in English, learning about being part of an American institution of higher education, and learning more about U.S. culture.

Exemptions: Students are considered for exemption from the English proficiency test requirement if they have any of the following:

- completed final two years and earned a diploma from a secondary/high school where the language of instruction is English
- SAT Evidence-Based Reading and Writing (EBRW) score of 600 or higher
- ACT English subscore of 22 or higher
- 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination or completion of the first-year English I and II requirements in a U.S. college or university
- GCSE/IGCSE grade of A, B or C on the English Examination
- HKDSE level of 5 on the English Language Core Subject examination

For more information regarding admission for international students, contact the University of Denver Office of International Student Admission by mail: 114 University Hall, 2197 S. University Blvd., Denver, CO (http://bulletin.du.eduwebextlink://2197 S. University Blvd., Denver, CO 80208-9401; telephone: 303-871-2790; fax: 303-871-3522; email: intladm@du.edu (INTLADM@du.edu); or web: http://www.du.edu/apply/admission/apply/international/).
Transfer Students

Each year, the University of Denver welcomes more than 200 transfer students to our community. Qualified applicants are admitted on a rolling basis, provided space is available. An application is not considered complete until official transcripts have been received.

Deadlines for Transfer Applicants

Application and all supporting materials should be completed and received no later than the following dates:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Quarter</td>
<td>April 1 (priority deadline); July 1 (final deadline)</td>
</tr>
<tr>
<td>Winter Quarter</td>
<td>October 15</td>
</tr>
<tr>
<td>Spring Quarter</td>
<td>February 1 (limited space)</td>
</tr>
<tr>
<td>Summer Quarter</td>
<td>May 1</td>
</tr>
</tbody>
</table>

Admission Standards for Transfer Students

To be considered for admission, students transferring to DU from another regionally accredited institution must have a competitive grade point average in all college coursework. The admission committee looks for:

- grades that reflect solid work at the college level—generally “B” grades or better, and
- course work that demonstrates serious intentions.

In addition, we consider any special situations or circumstances that may have influenced your academic performance in college. You must submit official transcripts from each college or university you have attended. If you have not successfully completed 30 college-level semester hours (45 quarter hours), you must also submit your official high school transcript. Test scores can be submitted in this case, too, but are optional. If you are unsure about your candidacy to the University of Denver, please call Undergraduate Admission at 303-871-2036.

Readmitted Students

A student in academic good standing who withdraws from the University for one or more quarters (except summer session) but less than five calendar years must contact the Office of the Registrar and submit official transcripts of any college study completed during the time of absence.

Students who have not been enrolled at the University for more than five calendar years from their last term of enrollment must resubmit their application for admission to the University through Undergraduate Admission. Students who are accepted for readmission may choose to complete their degree under the requirements of their original University bulletin or the current bulletin.

Second Baccalaureate Degrees

A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements for transfer students. Please note that students pursuing a second baccalaureate degree will not be eligible for most forms of aid and will need to complete the following:

- residence requirement of at least 45 credits (one year of full-time study)
- major and minor requirements as defined by the appropriate departments and schools
- undergraduate degree requirements (p. 78)
- academic good standing (GPA of 2.0 or higher) at the time of graduation
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Consult Concurrent and Second Baccalaureate Degrees (p. 93) for specific requirements.

Non-Degree Student

Visiting students from another college or university who wish to pursue one to three quarters of study at DU and wish to transfer the credit to their home institution may apply as a non-degree student. This also applies to students seeking limited coursework for personal interest or professional growth. A student seeking a DU degree should not use a non-degree application. Students who have previously earned a bachelor’s degree and wish to take classes should contact the Office of Graduate Education (https://www.du.edu/graduate-education/admission/non-degree-students/) to complete a Graduate Non-Degree Application.

A non-degree student must submit an application, official transcript from the last institution attended and a nonrefundable $65 application fee. Coursework completed as a non-degree student may be limited and is not automatically accepted toward a degree at the University of Denver. Students wishing to pursue coursework over the summer should register as a visiting summer student (p. 31) instead.
Visiting Summer Students

Domestic students visiting for summer quarter register directly through the Office of the Registrar; they do not apply, nor do they submit transcripts.

Additional information about the summer quarter is available in the academic calendar (p. 11) section of this Bulletin and on the Office of the Registrar’s website (https://www.du.edu/registrar/).

Bachelor of Arts Completion Program

Bachelor’s Admission Criteria

Candidates for the Bachelor of Arts Completion Program are evaluated based on the following criteria. Entrance exams such as the ACT and SAT are not required.

a. Applicants must have completed 24 quarter hours (16 semester hours) of transferable credits in academic subjects. Applicants with between 24 and 44 quarter hours of total college credit earned may also need to submit high school transcripts or official verification of the High School Equivalency Diploma (GED) for financial aid verification purposes. Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer.

b. Applicants must have at least three years of employment/professional experience.

c. The applicant’s academic and professional commitments and written language skills are evaluated through the Personal Statement, submitted as part of the admission application.

d. We consider special situations or circumstances that may have influenced previous academic performance; applicants should address these in their Personal Statement.

Bachelor’s Admission Criteria For non-Native English Speakers

Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Cambridge English: Advanced (CAE) are required of all University College applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL, IELTS or CAE score is received. The TOEFL, IELTS and CAE scores are valid for two years from the test date and are considered official only when received directly from the testing agency.

- TOEFL: The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (pBT). Applicants should achieve at least 20 in all TOEFL subscores on the internet-based exam. When requesting official TOEFL scores, please refer to institutional code 4842 and department code 02.

- IELTS: The minimum IELTS score accepted by the University is 6.5. Each individual band score must be 6.0 or higher.

- Advanced (CAE) Certificate: The minimum CAE score accepted by the University is 169.

- English Language Exemption: Students are generally exempt from the English proficiency test requirement if they have one of the following:
  • Secondary/high school diploma from a school where the language of instruction is English. Or,
  • 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination.

Bachelor's Admission Process

Bachelor of Arts Completion Program applications are reviewed for admission on a quarterly basis. Applicants will be notified of a decision via email approximately two to four weeks following receipt of all application materials. Detailed application information and application deadlines are located on the University College website (http://universitycollege.du.edu/answers/admission/bachelors.cfm).

- Application: Applicants must complete the application online (https://gradadmissions.du.edu/apply/) (gradadmissions.du.edu/apply)

- Application Fee: A $75 non-refundable application fee is required for an application to be processed.

- One Official Transcript from each Post-Secondary Institution: Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed. This includes transcripts for credit earned as transfer work and study abroad.

- Personal Statement: A statement of purpose and commitment (two-pages double-spaced, 450-550 words) is required. The statement should include information on how the degree will enhance professional and educational goals. Please include one example illustrating when you have been faced with a challenge and how you have overcome the challenge drawing on resources and personal strengths. In addition, please identify any obstacles that may stand in your way toward completion and ideas you have for managing these obstacles.

- Résumé/Curriculum Vitae (CV).

- English language proficiency (non-native English speakers)

- Admission Interview: An interview may be required at the program director’s request.
UnderGraduate Certificate (4-Course) ADMISSION CRITERIA

Candidates for the 4-course Undergraduate Certificate are evaluated based on the following criteria. Entrance exams such as the ACT and SAT are not required.

a. High school diploma or High School Equivalency Diploma (GED)

Undergraduate Certificate (4-Course) Admission Criteria For non-Native English Speakers

Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Cambridge English: Advanced (CAE) are required of all University College applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language. Applications will not be processed until the required TOEFL, IELTS or CAE score is received. The TOEFL, IELTS and CAE scores are valid for two years from the test date and are considered official only when received directly from the testing agency.

• TOEFL: The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (pBT). Applicants should achieve at least 20 in all TOEFL subscores on the internet-based exam. When requesting official TOEFL scores, please refer to institutional code 4842 and department code 02.
• IELTS: The minimum IELTS score accepted by the University is 6.5. Each individual band score must be 6.0 or higher.
• Advanced (CAE) Certificate: The minimum CAE score accepted by the University is 169.

English Language Exemption: Students are generally exempt from the English proficiency test requirement if they have one of the following:

• Secondary/high school diploma from a school where the language of instruction is English. Or,
• 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination.

UnderGraduate Certificate (4-Course) ADMISSION Process

Undergraduate certificate applications are reviewed for admission on a quarterly basis. Applicants will be notified of a decision via email approximately two to four weeks following receipt of all application materials. Detailed application information and application deadlines are located on the University College website (http://universitycollege.du.edu/answers/admission/bachelors.cfm).

• Application: Applicants must complete the application online (https://gradadmissions.du.edu/apply/) (gradadmissions.du.edu/apply)
• Application Fee: A $50 non-refundable application fee is required for an application to be processed.
• Official high school transcript with graduation date, official verification of the High School Equivalency Diploma (GED), or official college transcripts with credits earned after high school graduation
• Résumé

International Admission

Admission Standards for International Students

In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires a minimum score of 80 iBT (Internet-based) on the Test of English as a Foreign Language (TOEFL) with at least 18 on all subscores or a score of 6.5 with no band scores below 5.5 on the International English Language Testing System (IELTS), or a minimum grade of C on the Cambridge Certificate in Advanced English (CAE). A Duolingo English Test score of 105 or higher can be considered in lieu of these scores. For more information regarding English Proficiency, please visit: www.du.edu/apply/admission/apply/international/proficiency.html (http://www.du.edu/apply/admission/apply/international/proficiency.html).

As part of the Common Curriculum at DU, most students must complete a foreign language requirement. Based on their language assessment scores, students must complete 4, 8, or 12 language credits in order to fulfill the requirement. If you are a non-native speaker of English, you are required to take English language credit courses in the LAUNCH Curriculum (http://www.du.edu/apply/media/documents/englishlanguagecreditcourses.pdf) for which you will receive credit toward your degree and fulfill the language requirement. Placement in these courses is based on your submitted English proficiency scores (TOEFL, IELTS, or CAE) or the results of the English Language Proficiency Assessment (ELPA) (http://www.du.edu/apply/media/documents/elpa.pdf). The LAUNCH courses are designed to help students be more successful in their academic programs by improving their proficiency in English, learning about being part of an American institution of higher education, and learning more about U.S. culture.

Exemptions: Students are considered for exemption from the English proficiency test requirement if they have any of the following:

• completed final two years and earned a diploma from a secondary/high school where the language of instruction is English
• SAT Evidence-Based Reading and Writing (EBRW) score of 600 or higher
• ACT English subscore of 22 or higher
- 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination or completion of the first-year English I and II requirements in a U.S. college or university
- GCSE/IGCSE grade of A, B or C on the English Examination
- HKDSE level of 5 on the English Language Core Subject examination

For more information regarding admission for international students, contact the University of Denver Office of International Student Admission by mail: 114 University Hall, 2197 S. University Blvd., Denver, CO (http://bulletin.du.eduwebextlink://2197 S. University Blvd., Denver, CO 80208-9401); telephone: 303-871-2790; fax: 303-871-3522; email: intladm@du.edu (INTLADM@du.edu); or web: http://www.du.edu/apply/admission/apply/international/.

## Undergraduate Programs and Requirements

The University of Denver offers bachelor's degrees through a traditional bachelor's program and a bachelor of arts completion program through University College. The programs have separate application and admission processes. Each of the programs has distinct overall curriculum requirements as well as requirements associated with individual degrees.

This section of the bulletin provides information on admission and degree requirements under each program. Requirements for specific majors and minors are outlined separately in the Major and Minor Requirements (p. 100) section of the bulletin. The chart on the Degrees and Programs of Study (p. 33) page provides information about applicable degree, major and minor combinations.

## Requirements for Entrance to Special Programs and Courses

Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

## Degrees and Programs of Study

The chart below lists the majors, minors, concentrations and applicable degrees available. Many majors, and some minors, may only be pursued in conjunction with specific degree programs. If a major or minor may only be pursued with a specific degree program, this is indicated by the degree acronym in the chart below.

Programs of study available as "secondary majors (p. 93)" in the traditional bachelors program, which may be pursued as a secondary curriculum regardless of the student's degree program, are also indicated below.

## Traditional Bachelor's Program

**Build the Foundation for Your Future**

Open the door to a world of possibilities. As an undergraduate student at DU, you’ll get a multidisciplinary education that’s rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of the global culture. In the end, you’ll be uniquely prepared to confront the challenges and opportunities ahead.

### Innovative Degree Programs

As an undergraduate, you can choose from over 100 degree programs and focus on what inspires you. Our programs are built for exploration, meaning you can complement your degree with courses across subjects—take engineering classes as a biology major or explore international business through the lens of world history. We’ll help you customize your college learning experience to match your interests and build a foundation for a career you’ll love.

### Selecting a Degree Program

The University of Denver awards eleven distinct baccalaureate degrees. The curriculum for each program varies based on the major discipline and ancillary courses taken.

### BA and BS Degrees

The BA (Bachelor of Arts (p. 82)) degree is the principal undergraduate degree in the arts, humanities and social sciences and is awarded in most natural sciences as well. The BS (Bachelor of Science) degree is awarded in most natural science disciplines and Psychology.
The BA degree assures students of a breadth of study in the liberal arts and offers greater flexibility in study. For example no more than sixty credit hours may be taken from any one department and students may declare majors in numerous disciplines. The BA degree requires 183 credits, a major (40-60 quarter hours), a minor (20-28 quarter hours) or second major as well as completion of the Common Curriculum.

The BS (Bachelor of Science (p. 84)) degree provides greater focus on the major field of study and related (cognate) subjects. The BS degree requires 183 credits. The major requires at least 45 credits, at least 25 or which must be 2000- and 3000-level courses. The BS degree requires two minors, or two majors and a minor, as well as completion of the Common Curriculum. One minor must be in one of the following disciplines: Astrophysics, Biological Sciences, Chemistry, Computer Science, Electrical Engineering, Environmental Science, Geography, Geographic Information Science, Geology, Human Health Science & Systems, Mathematics, Mechanical Engineering, Medical Physics, Physics, and Psychology. Students who double major in BS programs can use the second major in place of one of the listed minors.

Academically, a Bachelor of Arts degree and a Bachelor of Science degree are equally valued. Both the BA and the BS degrees prepare students for graduate study.

Specialized Degrees

Specialized undergraduate degrees are offered in specific disciplines, most often in fields with distinct accreditation. Specialized undergraduate degrees at the University of Denver are:

- BFA Bachelor of Fine Arts (p. 83)
- BM Bachelor of Music (p. 83)
- BSAcc Bachelor of Science in Accounting (p. 85)
- BSBA Bachelor of Science in Business Administration (p. 87)
- BSCh Bachelor of Science in Chemistry (p. 90)
- BScpE Bachelor of Science in Computer Engineering (p. 90)
- BSEE Bachelor of Science in Electrical Engineering (p. 91)
- BSME Bachelor of Science in Mechanical Engineering (p. 92)

Course Plans

Course plans provide a suggested sequence of classes for each term. Many arts and humanities, business, engineering, international studies, natural sciences and mathematics, music, and social sciences students will find course plans for majors and degrees in the same section listing program of study requirements for those curricula. Plans in those areas address course sequencing and requirements specific to those programs of study.

Students pursuing other bachelor of arts majors and students who have yet to declare a major have the freedom to explore and discover academic interests and construct a highly-personalized curriculum. Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should also anticipate taking an average course load of 16 credits each quarter in order to complete the requirements to graduate in four years.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

Students considering but who have yet to declare majors in business should plan on fulfilling the Analytical Inquiry: Natural and Physical World (p. 40) requirement through either MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I. Students considering but who have yet to declare a major in the natural sciences should select MATH 1951 Calculus I to fulfill the requirement. Similarly, students considering majors in the natural sciences will fulfill the Scientific Inquiry: Natural Physical World (p. 69) requirement through the sequence of courses in that requirement intended for students majoring in natural science or engineering.

The sample course plans below show what courses a student pursuing a bachelor of arts might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Analytical Inquiry: Natural and Physical World Courses

Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today's physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student’s major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.

COMP 1101 Analytical Inquiry I (4 Credits)
Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

</table>

1  CNP 1200 is offered in fall, winter and spring quarters and is recommended for students have not declared a major.
2  INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
COMP 1201 Introduction to Computer Science I (2 Credits)
This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. Ideally taken concurrently with COMP 1351.

COMP 1202 Introduction to Computer Science II (2 Credits)
This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. Prerequisite: COMP 1201.

COMP 1351 Introduction to Programming I (3 Credits)
This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

COMP 1352 Introduction to Programming II (3 Credits)
This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. Prerequisite: COMP 1351.

COMP 1671 Introduction to Computer Science I (4 Credits)
Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

MATH 1150 Foundations Seminar (4 Credits)
The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

MATH 1200 Calculus for Business and Social Sciences (4 Credits)
This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models. Students are required to attend weekly labs. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

MATH 1951 Calculus I (4 Credits)
Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

MATH 2050 Symbolic Logic (4 Credits)
Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

PHIL 2040 Practical Logic (4 Credits)
In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

PHIL 2160 Symbolic Logic (4 Credits)
Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

**Analytical Inquiry: Society and Culture Courses**

Through these courses, students gain knowledge essential for today’s global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.
ANTH 1910 Ancient Worlds (4 Credits)
This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history, the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2020 Artifacts, Texts, Meaning (4 Credits)
How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2323 Global Health (4 Credits)
This course is an introduction to global health. As one of the world’s faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2420 Science, Technology and Human Values (4 Credits)
This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)
This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested.

ARTH 1010 Images of Culture (4 Credits)
This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1020 Highlights of Medieval Art (4 Credits)
The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTH 1030 Highlights of Renaissance Art (4 Credits)
The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.
**ARTH 1040 Sacred Spaces in Asia (4 Credits)**
This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1050 Highlights of American Art (4 Credits)**
This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterpiece; learn something about the featured artist’s life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1060 Contemporary Art Worlds (4 Credits)**
Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)**
This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2802 World Art II: c.1000-1700 (4 Credits)**
This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2814 Medieval Art (4 Credits)**
This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2840 Survey of Asian Art (4 Credits)**
An introduction to major monuments, traditions and civilizations of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)**
This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ASIA 2714 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**
This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the guru/śi#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2114.

**CHIN 1516 Contemporary China in Literature and Films (4 Credits)**
This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with ASIA 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.
CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)
Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecocinema and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2020 On the Black Panther Party (4 Credits)
This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often uninstitutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2030 Social Movement Rhetoric (4 Credits)
This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often uninstitutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2200 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2210 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

COMN 2220 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2210 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

COMN 2300 Fundamentals of Argumentation (4 Credits)
This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2400 Landmarks in Rhetorical Theory (4 Credits)
This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.
COMN 2450 Between Memory & Imagination (4 Credits)
How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2471 The Social Construction of Travel (4 Credits)
Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

EDPX 2710 Critical Game Cultures (4 Credits)
This course introduces the fundamental concepts of speculation from a critical perspective and treats these as central to understanding contemporary digital culture. What will the future be and how can we imagine it to be a more advanced and better one? Students will explore the different cultural aspects of critical speculation through theory, literature, art, and making. Cyborgs, speculative/science fiction, and the posthuman are examined as key components of the class. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee.

EDPX 2730 Understanding Digital Art (4 Credits)
An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class.

EDPX 2770 Exploring Digital Cultures (4 Credits)
This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy.

EDPX 2771 Cybercultures: Art, Technology, and the Extended Body (4 Credits)
This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists.

EDPX 2772 Cybercultures: The Social Science of Virtual Spaces (4 Credits)
This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. Cross listed with EDPX 4770.

EDPX 3770 Exploring Digital Cultures (4 Credits)
This course introduces the fundamental concepts of speculation from a critical perspective and treats these as central to understanding contemporary digital culture. What will the future be and how can we imagine it to be a more advanced and better one? Students will explore the different cultural aspects of critical speculation through theory, literature, art, and making. Cyborgs, speculative/science fiction, and the posthuman are examined as key components of the class. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee.

ENGL 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.
ENGL 2110 The African Imagination (4 Credits)
Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective.

ENGL 2120 Chaucer-Selected Poetry (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2130 World Literature (4 Credits)
A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2221 Shakespeare Seminar (4 Credits)
This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2230 Shakespeare and Film (4 Credits)
An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2300 English Literature III (4 Credits)
A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2350 Early Globalisms (4 Credits)
A study of the commonalities and connections among cultures and texts across the world from the medieval and early modern periods.

ENGL 2402 Later Romantics (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2544 Globalization and Cultural Texts (4 Credits)
The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)
Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonization to the Civil War.

ENGL 2710 American Novel-19th & 20th Century (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2718 Latina/o Literature (4 Credits)
This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)
This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it’s for, and its forms and aesthetics.

ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.
ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in American culture and in different linguistic communities. Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with JUST 2743.

ENGL 2816 Advanced Writing (4 Credits)
This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student’s choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)
This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by a range of diverse writers from Plato and Thomas More, to Charlotte Perkins Gilman, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Albert Camus, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, Claire G. Coleman, etc. *In some years this course may count for international literature under the diversity/distribution attribute in the English curriculum. This course counts toward the Analytical Inquiry: Society and Culture requirement.

FREN 2301 Capitalism vs. Socialism: Émile Zola (4 Credits)
This course analyzes the complex interrelationship between the economic ideologies and practices of capitalism and socialism in the works of the nineteenth-century French novelist Émile Zola. Three novels in which these themes are a major driving force of the action will be studied. In the first, Germinal, the capitalist system is viewed from the outside by poor, oppressed workers who feel victimized by it. In the second novel, Money, the author delves into capitalism at its very heart, the Stock Exchange of Paris. He explores all its machinations but also shows the growing cracks in the system as socialist protestations make inroads at the top. The third work, The Ladies Paradise, proposes a possible reconciliation of capitalism and socialism, inspired in part by the writings of French socialist thinkers earlier in the century. In a new era department store, workers' rights and commercial profit are seen to be mutually beneficial.

FREN 2302 The French Shakespeares: From Feudalism to Absolutism in 17th-Century France (4 Credits)
This course studies the works of the three leading French playwrights of the seventeenth century: the tragedians Pierre Corneille and Jean Racine and the comic genius Molière. Each of these authors explores various forms of power play that played an important role in the society of their time. These include competitions for political dominance between the feudal aristocracy and an increasingly absolutist monarchy, between the same aristocracy and an emerging middle class, allied with the monarchy, between women and men in their conflicting assertions of rights and privileges, between traditional religion and modern secularism, between the established church and Protestants, between rival liberal and conservative factions within the established church, and between Christian Western Europe and the Muslim Ottoman Empire. Students will read and analyze two plays by each of the three dramatists. This course counts toward the fulfillment of the Analytical Inquiry: Society and Culture requirement.

FREN 2500 Qu'est-ce que la littérature? (4 Credits)
Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or equivalent.

FREN 2501 La Nature et les animaux (4 Credits)
Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (La Fontaine) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course many be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

FREN 2504 La Culture au Cinema (4 Credits)
We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

FREN 2701 Sujets spéciaux (4 Credits)
Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.
FREN 3505 Masques du moi (4 Credits)
Qui suis-je?? The question of self, identity, and discovering "who I am" has preoccupied many writers, filmmakers, or other artists. Identity, or one's sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the "true" facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of "writing the self" represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)
This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GERM 2022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)
This is an introduction to 20th- and 21st-century German culture, history, and politics through film analysis. Studying the most famous and influential films in the history of German cinema, students explore a wide range of topics (including political propaganda, national identity, multiculturalism, terrorism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1416 Myths of Greece & Rome (4 Credits)
Introduction to the goddesses and gods, heroes and heroines, and not a few monstrosities from popular tradition, literature, and visual arts of the ancient Greeks and Romans. Activities include imaginative and creative assignments. No prerequisite. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1716 It's Really Epic! The Ancient Heroic Epics of Homer and Virgil in Contemporary Translation (4 Credits)
Foundations of Western values and aspiration, good one and not so good ones, may be found at the beginning of Western/European literature in the "Homeric" epics Iliad and Odyssey. The very notions of "tragedy" and "romance" originate in them. For the past twenty six or seven centuries men and women have wrestled with problems, often moral dilemmas and contradictions, that are first dramatized there. Centuries later, though still two millennia before our time, the Roman poet Virgil confronts the triumphant individualism of the Greek epics in his Aeneid and answers them with compassion and a vision of a very different way to build a person and a community. A better one? We address that question by studying these three timeless texts in award-winning-winning 21st-century English versions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1816 Ancient Tragedy Ever Modern (4 Credits)
Three great Athenian tragedians of the 400s BCE–Aeschylus, Sophocles, and certainly most modernist of all Euripides–offer us of the 2000s CE much to experience, much to ponder, much that still challenges or provokes us. We experience their democratic Athenian community and its political and social, its religious and philosophic innovations as actualized in tragedy. We read and analyze, enact (in parts) and even imitate both widely known "world classics" Antigone and Oedipus Tyrannus , Medea and Bacchae with fresh approaches proper to our turbulent times, but also less familiar, often distressing "problem" plays that include Euripides' Andromache, Hecuba, and Heracles. This course bears the Analytical Inquiry: Society and Culture attribute in Common Curriculum.

GREK 1916 Comedy Old and New (4 Credits)
Reading and discussion of and experiment with comedies from ancient Rome and even more ancient Greece. We begin, however, with modernizations in American-musical form, and end with our own product in 21st-century emulation. Students' participation, even broad clownish histrionics, required. Students must also be eager to laugh–knowingly and intelligently, of course.

GWST 2212 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities “from the ground up.” This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)
This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will well examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.
GWST 2710 Introduction to Queer Studies (4 Credits)
This course provides an introduction to the discipline of Gender and Women's Studies by focusing on mostly queer theory. Queer theory is a comparatively new approach to understanding gender, sexuality, and the world around us, and it has created controversy and disagreement regarding its aims and approaches. What does it mean to queer something? Why is language — the words that we use and that are used on us — so important to queer theory, and what does it mean for how we approach ourselves and those around us? The world in general? How is queer theory different from, and complementary to, women's and gender studies broadly speaking?

HIST 1110 Ancient Rome (4 Credits)
This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1240 Comparative History of Medicine (4 Credits)
This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1250 Food in East Asian History (4 Credits)
This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1320 European Culture in the World Wars (4 Credits)
This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1330 History of Ireland (4 Credits)
We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of 'Irishness,' competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland's evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1340 The British Monarchy (4 Credits)
This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1350 History of the British Empire (4 Credits)
This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies placed in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1360 World War One (4 Credits)
Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens’ lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.
HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)
When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered.

HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)
From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1510 War and the Presidency (4 Credits)
This course examines four wars in American history and the relationships of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1520 Immigrant Voices in Modern America (4 Credits)
This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony--autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1530 History of the United States since 1865 (4 Credits)
This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1550 America in the Sixties (4 Credits)
This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)
The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1705 Modern African History (4 Credits)
This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question.

HIST 2022 The Roman Empire (4 Credits)
This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

HIST 2330 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of "Islamic empire," connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2113.

HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)
In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2910 Colonial Latin America (4 Credits)
This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2920 The Making of Modern Latin America (4 Credits)
This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2955 Latin America at the Movies (4 Credits)
This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2201 20th-Century History and Culture (4 Credits)
This course provides a historical and cultural approach to 20th-century Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ITAL 2355 Images of Rome in Literature & Film (4 Credits)
The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorstep than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 1616 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with HIST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2355 Images of Rome in Literature & Film (4 Credits)
The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorstep than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)
Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group’s significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

JUST 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre’s non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and RLGS 2014.

JUST 2026 Race: Black, Jew, Other (4 Credits)
This course is cross-listed with PHIL 2026 and RLGS 2026. In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are engaged and written within new paradigms across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Apiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses/practices to a range of other anti-Other discourses/practices at play in the world around us.

JUST 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2050.

JUST 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with ENGL 2104 and RLGS 2104.

JUST 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2202.

JUST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America’s Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with HIST 2320.

JUST 2350 Israeli Culture Through Film: Society, Ethnicity, and Inter-Cultural Discourse (4 Credits)
This course presents Israeli society and culture development as reflected in Israeli films from the 1950s to present day Israel. Topics include history and collective memory, ethnicities and the experiences of immigration, Israelis in their spatial Mediterranean/Middle-Eastern context and Judaism in its old and new representations. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)
This course analyzes fundamental aspects of Israeli-Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

JUST 2741 American Jewish Literature (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoirs, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.

JUST 2742 Modern Hebrew Literature (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the soil political, and historically changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)
 Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with ENGL 2743.

JUST 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2000 Introduction to Film Criticism (4 Credits)
Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MFJS 2170 Globalization and Film (4 Credits)
MFJS 2170 (Globalization and Film) explores the varying ways that globalization impacts cinema on a national and transnational level. This course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what “globalization” means and how it influences films, both behind-the-scenes and onscreen. In addition to several in-class screenings, you will be required to view a few films on your own. Finally, you will have the opportunity to research and write original scholarship on one of two angles to engage further and apply course material: 1) the impact of globalization on the film industry of your choice, or 2) the impact of globalization on representational issues in the film of your choice.

MFJS 2200 Emergent Digital Practices and Cultures (4 Credits)
This course introduces students to the historical, economic, legal and social contexts of emergent digital practices and explores the various ways technology shapes and is shaped by culture. The rapid growth of participatory culture online through, for example, social networking sites, interactive news sites, gaming, mobile apps, and blogging has significant social implications and brings up issues of privacy, intellectual property, and the nature of community and public engagement. This class will explore these issues through various theoretical lenses and concrete cases including politics, youth culture, activism, news and art. Particular emphasis will be placed on the question of how new media differs from mass media across various fields of cultural production (music, news, advertising, for example) and on what influence new digital products and practices might have on these industries and on cultures and societies more generally. This course counts towards the Analytical Inquiry: Society and Culture requirement. Cross-listed with EDPX 2200.

MFJS 2260 Music, Race, and Ethnicity in Latin America (4 Credits)
In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and “blackness” will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America.
MFJS 2290 Innovations in Media and Communications (4 Credits)
Today, it is difficult to imagine a life free of the media. There are more than 4 billion mobile phones in the world, and a billion people are now able to access the Internet. Television is available to close to 100% of people living in the media-saturated societies of North America, western and Eastern Europe, and East Asia, with radio widely available almost everywhere else. Moreover, with YouTube, blogs, online gaming, citizen journalism, experimental film, and peer-to-peer file sharing, people are actively creating and sharing their own news and entertainment experiences like never before. Communication technologies are changing the way money circulates, how and where business is conducted, the ways in which labor is deployed, and how people communicate between home and work, national and diasporic contexts. The media are facilitating both globalization and cultural hybridity, at times securing social cohesion and at other moments facilitating social movements for change. Where do these technologies come from? Who controls them? Who profits from them? How are they used, and with what potential implications? What does the future hold? These are some of the questions the class will address. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1000 Fundamentals of Music Theory (4 Credits)
Meant for students with little to no experience with music notation, Fundamentals of Music Theory introduces pitch, rhythm, scales, chords, and other elements of Western notation. Students will develop facility in reading and hearing music, as well as an understanding of the syntax of tonal music, ranging from the music of Mozart to film music to Miles Davis.

MUAC 1012 Music, Society, and Culture (4 Credits)
This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music’s relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1016 History of Jazz (4 Credits)
This course examines the short history of jazz and all its sub-styles (swing, bop, cool, etc.) from its roots to the early eighties. Students have access to the entire course online, including all the fantastic listening. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1017 History of Rock and Roll (4 Credits)
The “birth of rock” occurred in the mid 1950’s as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1018 Understanding Music (4 Credits)
In this course, students acquire a greater appreciation of musical history, context, composers, and genres. Through listening activities, texts, movies, and live concerts, students become educated listeners, able to describe intelligently musical experiences using appropriate vocabulary. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

MUAC 1019 American Popular Music (4 Credits)
American Popular Music combines the study of social and cultural history on the one hand with the analytical study of music styles on the other. Basically, it serves as an introduction to the wealth of American popular music from minstrelsy to hip hop. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1023 Mathematics in Music after 1970 (4 Credits)
This course examines the interaction of mathematics and music composition since 1970, an interaction that has grown more vibrant with the advent of electronic music and modern computation. In this course, we will use mathematical concepts and methods to address basic questions about music, mathematics, and musical works. The questions include, (a) how do pieces by contemporary composers reflect an affinity for mathematical concepts?, (b) are the intervals preferred by cultures as diverse as ancient Greece and the contemporary Levant inherently beautiful?, (c) what is the relationship between complexity and chance on the listening experience?, and several others. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1024 Black Sacred Music: A Survey (4 Credits)
This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1025 Hip-Hop and Rap Music (4 Credits)
From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics.
MUAC 1026 American Musical Mavericks (4 Credits)
This course examines music history in the United States through the figure of the “maverick,” a rugged individualist who operates outside the mainstream of society. Using Michael Broyles’s Mavericks and Other Traditions in American Music as a primary textbook, this course surveys American music from the 18th to the 21st centuries, introducing students to a variety of musical traditions, pieces, composers, performers, and artistic strategies. Central themes include: the impact of Puritanism on U.S. arts and culture, the dilemma of art music in a democratic society, and the struggle to develop a uniquely American musical voice in a nation of immigrants. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity (performance, composition, etc.). Analyze the relationship between texts, ideas, or creative works and a broader context (intellectual, political, artistic, etc.) in ways appropriate to disciplines in the arts or humanities. No prior musical experience is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1027 Global Pop (4 Credits)
This survey of global pop explores musical thought and processes through an examination of the development of “world music” and “world beat,” including its meaning and importance to contemporary culture as well as its history and impact. Intended to provide students with a basic understanding of the international popular music scene from its explosion at the close of the 20th century through the present day, this course questions the meaning and importance of this trend in contemporary culture. It explores the complex relationships of music and mass media while addressing themes of nationalism, popular resistance and subversion, censorship, transnational identity, gender representation, and cultural hegemony. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 1028 Hearing the Movies (4 Credits)
Although we usually say that we watch movies, we might more accurately say that we “see-hear” or “audioview” them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required.

MUAC 1029 Methods of Mastery (4 Credits)
Musicians, athletes, artists, software engineers, actors, financial managers, dancers, writers, mathematicians, scientists, game designers, and even social media influencers spend their days in radically different ways, but top performers share habits and approaches that contribute to success. “Methods for Mastery” offers students an opportunity to explore the habits and mindsets of great achievers in different disciplines, ranging from classical music to creative writing to sports, finance, and more. What do writer Isabel Allende, dancer Twyla Tharp, soccer star Cristiano Ronaldo, Apple inventor Steve Jobs, cellist Yo-Yo Ma, and the artist formerly known as Prince have in common? What is required to do life-changing work? Inspiration or Perspiration? The Seven Habits of Highly Effective People? Can everyone be a virtuoso, genius, or prodigy? Through shared assignments, the class will discuss performances and research in four different areas: “Practice and Work Habits”; “Mindfulness Techniques”; “Performance Anxiety, Stage Fright, and other Mental Blocks”; and “Flow”. Videos, podcasts, live performances, trade paperbacks, websites, and academic research will inform our understanding of these topics. In addition, each student will develop two personal projects—one on cultural attitudes towards mastery, and one on a specific technique for creating better work routines, overcoming stage fright, or maintaining focus. Students from different disciplines will share their ideas with peers. Throughout, each class member will keep a daily journal, culminating in a final reflection that charts progress over the quarter. By the end of the quarter, students will integrate their research with new skills and greater awareness of their own path towards achievement.

MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2053 Musicology: Baroque Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2054 Musicology: Classical Music (3 Credits)
Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.
MUAC 2055 Musicology: Romantic Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1830 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2056 Musicology: Modern Music (3 Credits)
Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2057 Musicology: Introduction to World Musics (3 Credits)
This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music’s connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)
This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. Cross listed with RLGS 2251.

MUAC 2260 Music, Race, and Ethnicity in Latin America (4 Credits)
In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and “blackness” will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America.

MUEN 3046 Indonesian Music Ensemble (0-1 Credits)
This class provides a practical and theoretical introduction to Indonesian performance traditions from the islands of Bali and Java. Through hands-on instruction and oral transmission, students will learn a variety of gamelan (gong/chime ensemble) traditions. While learning this sophisticated cyclic music, class discussions, assigned readings, films, and guided listening will further familiarize students with the social and cultural meanings of the musics performed in class. Additionally, students will have the opportunity to learn basic hand, foot, and eye movements for Balinese and Javanese dance, as well as to study kecak, a Balinese vocal music that imitates the sound of the gamelan. The course will culminate in an end of the quarter concert.

MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)
The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all “classical” and “jazz” instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3048 Bluegrass Ensemble (0-1 Credits)
In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers’ style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3049 Opera (0-1 Credits)
Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3710 Opera (0-1 Credits)
MUEN 3712 Lamont Chorale (0-1 Credits)
The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

MUEN 3730 American Heritage Chorale (1 Credit)
This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3731 The Spirituals Project Choir (0-1 Credits)
This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3740 Lamont Men's Choir (0-1 Credits)

MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3752 Lamont Wind Ensemble (0-1 Credits)
Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)
Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)
The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

MUEN 3900 Lamont Women's Chorus (0-1 Credits)
The Lamont Women's Chorus is a treble voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

PHIL 1610 Discovering Philosophy (4 Credits)
In this course we explore a range of philosophical questions and examine the replies that have been made by historical figures. We also think through the methods and strategies that have been used for thinking through those replies and explore these questions further on our own. Topics may include how do we know what actions are moral? What is knowledge? What is the basic structure of the world? What is justice? What assumptions are made by the disciplines that take themselves to study the natural world? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2001 Philosophy and Fiction (4 Credits)
Examination of diverse aspects of the relationship between philosophy and fiction. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2003 Philosophy and Popular Culture (4 Credits)
This course critically explores philosophical questions and issues in the context of contemporary popular culture. On the one hand, it considers more general questions about the nature and function of popular culture, including how popular culture has been defined and "theorized"; the connections between popular culture and the traditional and new media; the economic bases and functions of popular culture; and the political implications of popular culture. On the other, it explores particular philosophical issues—historical, ethical, political, aesthetic, and metaphysical—as they appear in selected areas or examples of popular culture: literature, film, the visual arts, digital media, graphic novels, music, television, etc. The aims are both to enhance students' critical understanding of the ways in which philosophical assumptions and ideas underlie popular culture and to present traditional and contemporary philosophical arguments, movements, and ideas using examples drawn from popular culture as reference points. As examples, we might explore ethical dilemmas posed in the "Sopranos" or "Mad Men"; mind-body problems in the "Matrix" or "Avatar"; or metaphysical issues in "Donny Darko" or "Run, Lola, Run." This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2004 Philosophy of Race (4 Credits)
This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2005 Philosophy of Religion (4 Credits)
What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2005.

PHIL 2007 Philosophy and Video Games (4 Credits)
Traditional and novel metaphysical, ethical, political, and aesthetic issues both arising within video games and posed by this still developing medium. No prerequisites. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with JUST 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2010 Existentialism (4 Credits)
Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2014 and JUST 2014.

PHIL 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred" Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course is cross-listed with JUST 2026 and RLGS 2026. This course counts for the AI: Society requirement.

PHIL 2050 Jewish Philosophy (4 Credits)
This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadaya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.
PHIL 2100 Philosophy of Mind (4 Credits)
Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind—epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2110 Classical Greek Philosophy (4 Credits)
The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato’s student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the "Golden Age of Greece’ has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2111 Greek Moral Philosophy (4 Credits)
In this course we examine the "Good Life" in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)
A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2130 Philosophy of Early Modern Age (4 Credits)
Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibinz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2140 Kant to Nietzsche (4 Credits)
German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2144 20th-Century Philosophy (4 Credits)
A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2145 Between Deleuze and Foucault (4 Credits)
Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2150 Philosophy of Law (4 Credits)
Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2151 Between Deleuze and Foucault (4 Credits)
In this course we examine the “Good Life” in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2160 Ethics (4 Credits)
Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)
Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?,” together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)
A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the ‘modern world.’ This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2200 Social & Political Philosophy (4 Credits)
Topics covered include the relation of the “social” to the “political,” the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2260 Philosophical Perspectives on Perception and Reality (4 Credits)
An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call “the physical world”). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)
Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2402 London and Paris: Medieval to Postmodern (4 Credits)
This is a 3-week summer session course involving one week on campus and two weeks travel to London and Paris. It traces the development of philosophical ideas, politics, social institutions, architecture, and the visual arts from the Middle Ages to the present as they occurred in these two major capitals. Its approach is both historical and comparative and emphasizes understanding and interpreting the contemporary experience of these cities in light of their shared as well as divergent historical paths.

PHIL 2700 Biomedical Ethics (4 Credits)
Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2770 Philosophy of Science (4 Credits)
This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2002 Comparative Religion and Interreligious/Interfaith Dialogue (4 Credits)
This course is an introduction to the comparative study of religion, a venerable sub-discipline in the field of religious studies. It is also an introduction to a new, emerging sub-discipline: interfaith or interreligious dialogue. It seeks to equip students with the knowledge base and skill set needed to engage religious diversity in ways that promote, admittedly, idealistic, 21st-century goals: cooperation, stability, and peace. The course seeks to increase religious literacy by 1) introducing students to the world’s great religious traditions and 2) to theoretical approaches that enable an appropriate comparison of those traditions. By means of 3) site visits to several religious communities and 4) interaction with religious leaders and practitioners in the Denver metropolitan area, students will gain experience-based knowledge of religious traditions other than their own. The course will also provide 5) leadership strategies for promoting genuine interreligious understanding. While this course fulfills a Common Curriculum, AI-S requirement and invites all interested students from across the campus, it also serves as the entry ramp course for majors in Religious Studies or other programs to fulfill the College of Arts, Humanities & Social Sciences (CAHSS) Keystone Experience requirement in Comparative Religion & Interfaith Dialogue.

RLGS 2005 Philosophy of Religion (4 Credits)
What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a “God friendly” approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2005.

RLGS 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week’s speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)
Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

RLGS 2014 Religious Existentialism: Christian and Jewish (4 Credits)
Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre’s non-religious statement of existentialism in Existentialism is a Humanism (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and JUST 2014.

RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)
The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces.

RLGS 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the “Jew's Body” and “Jewish Self-Hatred;” Bernasconi's work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. Cross-listed with JUST 2026 and PHIL 2026.

RLGS 2102 Judaism, Christianity & Islam (4 Credits)
This course introduces students to the three major monotheistic religious traditions: Judaism, Christianity, and Islam. In the process of tracing the long and rich histories of Judaism, Christianity, and Islam, we examine the beliefs and practices that became central and definitive for Jews, Christians, and Muslims. We begin with the ancient heritage of each religion (scriptures, founders, early institutions). Then we explore how these foundational traditions were preserved and re-invigorated in response to centuries of social change and critical moments of political upheaval. Most significant, in this regard, is the Jewish, Christian, and Muslim encounter with their respective holy Scriptures—as generation after generation of adherents have attempted to understand the revealed words of God, to proclaim their continual relevance for all places and all times and to inscribe them upon their bodies and hearts through prayer, worship, and daily life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2103 Religions of China & Japan (4 Credits)
This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2702.

RLGS 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and JUST 2104.
RLGS 2106 Religious and Social Justice in Vienna (4 Credits)
This special travel course provides an opportunity for students to learn how certain major religions are globally engaged in the promotion of social justice through humanitarian relief work and cultural exchanges. In addition to a brief survey of the historical relationship between the beliefs, teachings, and social practices of the major Western traditions, the course offers hands-on experience and interaction with Jewish, Catholic, and Protestant relief agencies as well as other non-governmental organizations in Vienna, Austria, which has become the international center for UN-directed human services and humanitarian relief efforts as well as global headquarters for leading NGOs. Students discover how the culture, history, and geography of Vienna have nurtured the vast global human services “economy” to which these religious organizations contribute and which are built around the work of the United Nations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2108 Islam in the United States (4 Credits)
A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with “American” accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2109 Religions of Tibet (4 Credits)
This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2110 Buddhism in the U.S.A. (4 Credits)
Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the “two-way traffic” between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2111 Islam and United States Politics (4 Credits)
This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans’ relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2113 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of “Islamic empire,” connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2330.

RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)
This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the the guru/si#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement.Cross listed with ASIA 2714.

RLGS 2115 Common Figures in the Bible and Qur’an (4 Credits)
This course offers students a thematic introduction to the key common figures in the Bible and Qur’an, focusing on the major prophets, from Adam to Jesus, as well as Eve and Mary. Grounded in the primary source texts while exposing students to classic and contemporary scholarly work on these figures, it concludes with a look at the figure of God in the two scriptures.
RLGS 2116 American Mythology (4 Credits)
Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish “symbolic articulation of the social patterns” of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, “How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they “performed” today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the “idea of America” has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American “civil religion”—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study.

RLGS 2117 Religions of India (4 Credits)
This course introduces students to the religions of India, which include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. These religious traditions are distinct but always in dialogue and often in competition with one another. Students will explore how different religious communities intersect and overlap in different contexts and historical periods, including in religious spaces: temples, monasteries, pilgrimage sites, and sacred spaces. Students will learn about histories, rituals, and literature, with a focus on lived religions, past and present. This course counts toward the Analytic Inquiry: Society and Culture requirement.

RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)
This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified “feminine” and the construction of gender within modern South Asia.

RLGS 2119 Caste, Race and Colonialism (4 Credits)
This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how “identity” and “privilege” are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/ accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast in order for them to “see” how they both produce and are “produced” by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces?

RLGS 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2202.

RLGS 2250 Introduction to African American Religions (4 Credits)
This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America.

RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)
This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. Cross-listed with MUAC 2251.
RLGS 2301 American Indian Religion (4 Credits)
This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the “Great Plains Indians” (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues.

RLGS 2303 Lived Religions (4 Credits)
The concept of “lived religions” has become prominent in religious studies since the 2000’s. While people may think of religions as sets of sacred writings, rules, and rituals, the “lived religions” approach focuses on the ways that people incorporate religion into their activities. The approach is new enough that scholars have not yet come to full agreement on what the term “lived religions” should include and what it implies about religions and how to study them. The course will make room, therefore, to debate the advantages and drawbacks of studying religions through the ways people use religion to shape their life. Students will examine examples of how people live their religion and trace the relationships of these practices to religious teachings and ideas. This effort will involve asking a variety of questions. How closely are religious practices related to teachings and ideas? Does a specific religion put greater emphasis on engaging in specific activities or on agreeing with particular teachings? If people’s behavior does not fit with a religion’s teachings but the people still consider it to be related to key aspects of religion, does it count as religious? Or have these people moved away from religion into a practice that is spiritually meaningful but not religious? Or is spirituality something even more sharply different from religion? Or is spirituality also part of religion? If we look closely at how people in a religious tradition live, what do we see that we would not notice if we were looking at the religion as only a system of beliefs? For instance, does the sense of time of people who adhere to the religion’s calendar of commemorations differ from the sense of time of people who do not? And what specifically would we do to learn about religion, if we concentrate on people’s actions? In opening up such inquiries students will learn both about studying religions and about major facets of religious traditions. The course will require reading and successful completion of tests. Visits to off-campus sites and completion of reports on site visits will facilitate learning through encounter and participation. Students will also undertake a project using concepts from the course to imagine and interpret lived religion in behaviors or in aspects of the physical or social world. The religions, practices, and sites for study, observation, and interpretation—as well as the assignments—may vary each time the course is offered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2310 World Christianities (4 Credits)
This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as its foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization.

RLGS 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)
Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2501 Islam on Film (4 Credits)
This course uses the medium of film to introduce students to the history, faith, practice, cultural practice(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2600 Religion and Popular Culture (4 Credits)
Although religion and popular culture are often seen as separate conceptual spheres—the former dealing with the “sacred” and the latter with the “profane”—these two spheres are deeply intertwined and shape one another. Religion often expresses itself in popular culture through the arts and various forms of media, while popular religion frequently expresses itself through religious memes and other representations. This course will explore the complex relationship between religion and popular culture. By studying film, comics, music, tattooing, and other cultural products, we will discover how beliefs, ideals, practices, institutions from various religious traditions shape popular culture and how symbols that are embedded in popular culture shape religious traditions.

RUSS 1416 Introduction to Russian Culture: The Wondrous and the Supernatural (4 Credits)
How do we explain the enchanting and mysterious world of Russian Culture? How have Russians imagined their world and themselves? To answer these questions, we will examine the various manifestations of the wondrous and the supernatural in Russian art. We will begin by reading Russian fairy tales to learn about the people’s folk beliefs and their Eastern Orthodox faith. We will then trace the Russian fantastic tradition by studying the works of nineteenth- and twentieth-century writers who wrestled to explain the marvelous and the demonic myths at the foundation of Russian culture. We will focus our attention on Russia’s cultural capitals St. Petersburg and Moscow and discuss how supernatural themes reflected social and historical realities. Authors may include Pushkin, Gogol, Dostoevsky, Bely, and Bulgakov. No knowledge of Russian is necessary; all class discussions, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.
RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)
This course surveys Russia's cultural past and present—from the beginnings of the Russian state over a thousand years ago through the Soviet Union and, after its disintegration in 1991, to the Russian Federation. The course surveys the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, music, ballet, film) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. By working across disciplines, students will discover the fascinating cultural interconnectedness of Russian politics, art, faith, and national identity. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 1860 The Russian Short Story (4 Credits)
This course will introduce students to Russian literature through some of its shorter "masterpieces" of fiction. Students will explore the lives and ideas of some of Russia's greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 2111 Linguistic Politeness and Intercultural Communication (4 Credits)
In this course, students will explore how American and Russian speakers perceive politeness, and how sociocultural values underlying both cultures affect the speakers' communicative styles, their performance and perception of speech acts, and expression of emotions. Although this course focuses on Russian, other cultures will also be analyzed, such as German and Polish, and those of students' heritage. This course will help students to improve their communicative competence and deepen their understanding of some European cultures. The course will be conducted in English. Highly recommended for students planning on studying in Russia, Germany, or Poland. The course format consists of lectures, presentations, as well as class and group discussions. Students who major in Russian may get credit by providing coursework in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)
This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator's voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country's intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women's place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 2461 Russian Science Fiction (4 Credits)
This course studies the fascinating world of Russian science fiction in the twentieth and twenty-first centuries. Throughout the term, students will examine how Russian and Soviet writers and film-makers reimagined society, science, technology, and space. We will discuss Soviet futuristic utopias, interplanetary voyages, and post-apocalyptic visions. Students will further probe the figure of the alien as a dissident or cultural Other, as Soviet authors grappled with questions of cultural and ideological difference. We will examine how sci-fi writers glorify or critique Soviet society in their visions of space flight, technologically advanced societies, alien worlds, or post-nuclear disasters. Ultimately, we will reflect on the philosophical quandaries that Russian science fiction explores. Works include pre-revolutionary sci-fi texts by Bryusov and Kuprin; Soviet dystopias by Zamiatin and Bulgakov; sci-fi classics by the Strugatsky Brothers; Tarkovsky's filmic masterpieces; and post-Soviet science fiction by Viktor Pelevin and Sergei Lukyanenko. All readings are in English translation. No prior knowledge of Russian is required. This course fulfills part of the Common Curriculum's "Ways of Knowing: Analytical Inquiry. #Society and Culture" requirement. In this class, students will 1) demonstrate the ability to create or interpret the texts, ideas, or artifacts of human culture; 2) identify and analyze the connections between the texts, ideas or cultural artifacts and the human experience and/or perception of the world.

RUSS 2917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature, history, and art of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of art and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.
RUSS 3232 Russian Avant-Garde (4 Credits)
This interdisciplinary course addresses various manifestations of Russian Modernism and the Russian avant-garde in art, literature, poetry, music, theatre, and film in the late 19th – early 20th century. Its objective is to provide an understanding of the time's rapid, drastic, and often conflicting cultural and artistic transformations by examining in depth major Russian Modernist works. Students will explore such artistic and literary movements as Symbolism, Cubo-Futurism, Neo-Primitivism, Suprematism, Rayonism, and Constructivism in the context of Russian late Imperial, revolutionary, and early Soviet social, political, and philosophical developments. We will pay special attention to the cultural dialogues between Russia and the West and investigate the aesthetic, erotic, and social utopias of Russian Modernism. The course examines philosophical essays, films, plays, poems, short stories, music, and art created during the period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s.

SPAN 2300 Iberian Culture & Civilization (4 Credits)
Intensive study of culture of Spain; manifestations of culture found in history, art, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2350 Latin American Culture and Societies (4 Credits)
An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or equivalent.

SPAN 2400 Latino Cultures in the United States (4 Credits)
Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2350 or equivalent.

SPAN 2801 Writing, Memory & Terror. Post-Dictatorship Literature of the Southern Cone (4 Credits)
This course explores the representation of violence, repression and disappearance in the post-dictatorship literature of Argentina, Chile and Uruguay in literature and memorialization projects. Students will examine literary testimony in a variety of genres: narrative, poetry, theatre, and critical essays in their social, political and historical contexts, as well as its manifestations in music and film. We will discuss the role of memory in reconstructing discourses; testimonial literature and the modern and postmodern views of representation and memorialization; and points of convergence between this literature and other survivor testimonial narratives, particularly those of the Shoah. No knowledge of Spanish is required or expected. This class does not count toward the major or minor in Spanish.

SPAN 2802 Afro-Latinos in the US (4 Credits)
Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish.

SPAN 2900 Introduction to Literary and Cultural Studies (4 Credits)
Intended as a transition between 2000-level advanced language and cultural courses and 3000-level cultural and literature analysis courses, SPAN 2900 presents students with the opportunity to refine their analytical and interpretive skills, by examining a wide variety of Spanish language texts drawn from the literary cultural milieux of Latin America, Spain, and the United States. Throughout this course, students will acquire and utilize fundamental tools and strategies for contemporary literary and cultural studies in Spanish, including: gender and sexuality studies; race and ethnicity; decolonial thinking; pop culture; nationalism; ideology; and formal elements of interpreting texts. At the end of this course, students should be able to demonstrate relationships between distinct texts of varied media and genre (journalism, essay, short story, autobiography/memoir, historiography, oral tradition, film, photography, the plastic arts, etc.) in the interdisciplinary perspective that characterizes literary and cultural studies in the 21st century. Prerequisites: SPAN 2100 and SPAN 2300 or SPAN 2350.
THEA 1600 Stagecraft for Theatre (4 Credits)
Stagecraft introduces students to the basic skills that allow us to realize the art of Theatre. Students will have the chance to learn construction, craft and design skills in the scenic and costume areas that can be applied in advanced Theatre classes, and in everyday life. Theatre technicians and artisans need breadth and problem-solving skills with a wide range of techniques and materials, and an awareness of the performance from all aspects. Having technical awareness makes all students better at what they do. 1. Learn through doing: experience the work of the theatre technician through complex hands-on projects in which the students have opportunities to work as craftsman and artist. 2. Learn and use the fundamental vocabulary and tools of design, as they apply to theatre production 3. Learn about -and experience creating- following the process that theatre technicians use to create multi-phase artistic projects. 4. Be introduced to the intersection of theatre design and theatre production as we practice it today in the profession- personnel, practices, the collaborative nature of the art form and our industry. 5. Students will learn safety practices, including personal protection equipment, fire code, safe tool handling, and environmental health and safety practices for the beginning artist. 6. Students will learn to use power tools, including saws, Sanders, pneumatic tools and hand tools. 7. Students will learn techniques for hand and machine sewing. 8. Students will learn to select materials and techniques to build projects. 9. Students will plan a project from idea to scaled drawing to realizing the project using power and hand tools. 10. Students will learn painting techniques, and plan and execute a multi-step painted surface.

THEA 1810 The Process of Theatre: Page to Stage (4 Credits)
Exploration of the process playwrights, directors, actors, and designers use in creating a theatrical production. Individual sections may focus on single areas only—please see department for current offerings. In this course, students will demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture. They will also identify and analyze the connections between these things and the human experience/perception of the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 1861 Theatre Imagination (4 Credits)
Beginning exploration of nature of theatricality through exercises and study of specific plays; explore acting, directing, designing and writing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 1862 How to Read a Play (4 Credits)
Close analysis of selected dramatic texts from Aeschylus to Caryl Churchill. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 1880 Fundamentals of Theatre Design (4 Credits)
The work of the theatre designer is to transform a text into visual and aural expression, by planning and creating the physical environment of a live performance. Students will learn about – and learn appreciation for – theatre design in order to be better theatre artists (and audience members) themselves, through the applied practice of designing a “paper” production, collaboratively with a small team.

THEA 2230 Movement and Voice Training for Actors (4 Credits)
Actors often learn movement and vocal training separately, despite the fact that speaking is a physical act and that an actor’s voice and body are constantly working in relationship to each other. This course has two main objectives: 1) to train your actor instrument through rigorous physical and vocal training, and 2) to help you understand the essential and dynamic relationship between an actor’s breath, body, and voice. You’ll explore how physical actor training strengthens and improves the ability to speak while ultimately allowing you to embody a character more successfully. Drawing from many areas of study in movement and voice, you will connect physical and vocal action through a series of exercises and explorations. Specifically, we’ll investigate 1) how to prepare your body for performance circumstances and to successfully support your vocal needs, and 2) how your body and voice can work symbiotically during performance to deliver a more powerful, precise, engaging performance. The course will begin with extensive physical and vocal actor training; then we’ll apply this training to specific theatrical texts; it will culminate in a collaborative performance that will provide opportunities for both individual and group performances. This work will strengthen stage presence and characterization and will heighten your emotional and physical power and commitment to each moment onstage. By the end of the quarter, if you do the work, you will be vocally and physically transformed, armed with a new approach to moving and speaking onstage.

THEA 2870 Acting I (4 Credits)
Exploration of acting through physical and vocal exercises, followed by scene study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2880 Scene Design I (4 Credits)
Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2881 Lighting Design I (4 Credits)
Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

THEA 2890 Theatre History I (4 Credits)
This course examines the development of Western theatre and drama from the Ancient Greeks to the 19th-Century, concentrating on the intellectual, social and artistic foundations of theatre and drama. The course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among the students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material’s relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from Fifth-Century B.C.E. into the early 19th-Century. This course counts toward the Analytical Inquiry: Society and Culture requirement.
THEA 2891 Theatre History II (4 Credits)
This course examines the development of Western theatre and drama from the 19th-Century to the present. Concentrating on the intellectual, social and artistic foundations of theatre and drama, this course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from the 19th-Century to the present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

Scientific Inquiry: Natural and Physical World Courses

Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

BIOL 1010 Physiological Systems (4 Credits)
The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)
The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

BIOL 1020 Physiological Systems Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

BIOL 1220 Molecules to Humankind I (4 Credits)
First class in a three-quarter sequence for non-majors that examines the mechanisms that sustain life. Emphasis is placed on understanding the human body at the molecular, cellular and physiological levels. In the fall quarter our discussions start with the atom and basic chemistry. We next consider the properties of complex molecules, including DNA, proteins, carbohydrates and lipids, in order to see how such molecules are used and organized by living organisms. Our discussions of large and complex molecules lead naturally to the basic unit of life, the cell. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1221 Molecules to Humankind II (4 Credits)
Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1222 Molecules to Humankind III (4 Credits)
Third class in a three-quarter sequence focuses for non-majors on cell biology, genetics, and human reproduction and development. After a review of cell structure and function, focusing on how cells are capable of replication with modification, the mechanisms by which information is passed on from one cell to another and from one generation to the next are considered. The second half of the quarter concerns sexual reproduction and early development. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
BIOL 1260 Sustaining Life I (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1261 Sustaining Life II (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

BIOL 1262 Sustaining Life III (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

BIOL 1270 Living in the Microbial World I (4 Credits)
Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1271 Living in the Microbial World II (4 Credits)
For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

BIOL 1272 Living in the Microbial World III (4 Credits)
In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

CHEM 1001 Science of Contemporary Issues I (4 Credits)
CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

CHEM 1002 Science of Contemporary Issues II (4 Credits)
CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.
CHEM 1003 Science of Contemporary Issues III (4 Credits)
CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

CHEM 1010 General Chemistry I (3 Credits)
The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

CHEM 1020 General Chemistry II (3 Credits)
The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

CHEM 1240 General Chemistry I Laboratory (1 Credit)
Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

CHEM 1250 General Chemistry II Laboratory (1 Credit)
Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

CHEM 2131 Chemistry of the Elements (3 Credits)
Descriptive chemistry of main group and transition elements including redox and coordination chemistry. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

CHEM 2141 Chemistry of the Elements Lab (1 Credit)
Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course.

CHEM 2240 Introduction to Environmental Chemistry (4 Credits)
An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

CHEM 2451 Organic Chemistry I (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2452 Organic Chemistry II (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451 and CHEM 2461.

CHEM 2461 Organic Chemistry Lab I (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2451.

CHEM 2462 Organic Chemistry Lab II (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2452.

CHEM 2460 Organic Chemistry Lab III (1 Credit)

CHEM 2200 General Chemistry Laboratory (1 Credit)

GEOG 1201 Environmental Systems: Weather (4 Credits)
First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1202 Environmental Systems: Hydrology (4 Credits)
Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.
GEOG 1203 Environmental Systems: Landforms (4 Credits)
Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

GEOG 1216 Our Dynamic Earth I (4 Credits)
This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornados, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

GEOG 1217 Our Dynamic Earth II (4 Credits)
This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

GEOG 1218 Our Dynamic Earth III (4 Credits)
This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

GEOG 1264 Global Environmental Change I (4 Credits)
First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

GEOG 1265 Global Environmental Change II (4 Credits)
Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

GEOG 1266 Global Environmental Change III (4 Credits)
Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

PHYS 1011 21st-Century Physics and Astronomy I (4 Credits)
First class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

PHYS 1012 21st-Century Physics and Astronomy II (4 Credits)
Second class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

PHYS 1013 21st-Century Physics and Astronomy III (4 Credits)
Third class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.
PHYS 1111 General Physics I (5 Credits)
This is the first of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in mechanics (kinematics, dynamics) including forces, one and two dimensional motion, work, energy and momentum. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

PHYS 1112 General Physics II (5 Credits)
This is the second of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

PHYS 1113 General Physics III (5 Credits)
This is the third of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

PHYS 1211 University Physics I (5 Credits)
First of a three-quarter sequence. Kinematics, vectors, force, energy and work, linear momentum, rotation of rigid bodies. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The course includes a rigorous calculus-based laboratory that exposes students to a broad range of the real physical phenomena studied in the lecture course. Through the use of experimental apparatus, computerized instrumentation and data acquisition, data analysis and graphical representation, students use the observed phenomena to exemplify the laws of physics. Physics theory and other relevant background information are explored individually by students in weekly prelab exercises. Students learn to write introductory-level laboratory reports and become familiar with good laboratory technique. Emphasis for this lab is on mechanics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisite: MATH 1951.

PHYS 1212 University Physics II (5 Credits)
Second of a three-quarter sequence. Gravitation, fluids; oscillatory motion; waves; thermal physics. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1211 lab portion and builds on laboratory skills and knowledge from that course. Emphasis for this lab is on waves, oscillations, sound, fluids and thermodynamics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: PHYS 1211. Corequisite: MATH 1952.

PHYS 1213 University Physics III (5 Credits)
Third of a three-quarter sequence. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1221 and 1222 lab portions and builds on the students’ laboratory skills and knowledge from those labs. Emphasis for this lab is on electricity, magnetism and circuits. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1214. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

PHYS 1214 University Physics III for Engineers (4 Credits)
This is the third course of a three-quarter sequence and is for engineers only; this is equivalent to PHYS 1213, but does not include lab component. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all engineering majors. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1213. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

Scientific Inquiry: Society and Culture Courses
Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/
minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

**ANTH 1006 Paranormal Archaeology (4 Credits)**
This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—Bigfoot, the Great Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthly Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1010 Anthropology: Humankind in Context (4 Credits)**
This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species’ place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2105 Human Nature (4 Credits)**
Human biological variation in time and space; investigation of the environmental and cultural impacts on the human organism that have led to the present diversity of the species. A scientific, evolutionary approach to human nature. Required for all anthropology majors.

**ANTH 2125 Primates (4 Credits)**
Non-human primates are used within numerous disciplines as models for understanding the evolution of our own behavior. This course examines non-human primates within the framework of anthropology and explores the ways that the study of other primates contributes to our understanding of human behavior and evolution, and serves to connect us to the living world. The course will examine three aspects of primate life (the three F’s: feeding, fighting, and family) first from the non-human primate perspective and then through the lens of human behavior and social organization. To better understand the methods of primatology, students will develop their own research project to take place at the Denver Zoo. As an SI: Society course students will develop an understanding of the defining principles central to inquiry within the discipline of anthropology as well as become proficient in the use and application of anthropological, and specifically primatological, research methods.

**ANTH 2424 The Social Determination of Health (4 Credits)**
This course is an introduction to sociocultural epidemiology. As the scientific basis of public health, epidemiology is the discipline that aims to describe the distribution and causes of health problems in a society, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, disease and health care and their manifestations around the world. This course presents an overview of epidemiology’s history and methods, to then concentrate on the social and cultural aspects of health. The course offers an in-depth exploration of the notion of disease causation, with historical and current examples. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, and sociology. We will explore ideas and behaviors related to disease causation in different societies and social groups. Topics include the history of epidemiology and theories of disease causation, research methods in epidemiology, social determinants of health, and the notions of disease causation and determination. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of cases in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects.

**COMN 1001 Practicing Communication (4 Credits)**
Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities.

**COMN 1002 Theorizing Communication (4 Credits)**
Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars’ attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students’ understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed.
COMN 1210 Foundations of Communication Studies (4 Credits)
This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

COMN 2100 Fundamentals of Communication Theory (4 Credits)
Basic concepts, theories and models of the communication process.

COMN 2130 Introduction to Organizational Communication (4 Credits)
This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students’ understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives.

COMN 2140 The Dark Side of Relationships (4 Credits)
This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes.

COMN 2270 Intro to Health Communication (4 Credits)
This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices.

ECON 1020 Economics: A Critical Introduction (4 Credits)
The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society; and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the “new economy”; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the “new economy”, but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the “economic” one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOS 1410 People, Places & Landscapes (4 Credits)
In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOS 2401 The Human Population (4 Credits)
This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOS 2511 Principles of Sustainability - Honors (4 Credits)
Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.
GWST 1112 Introduction to Gender and Women's Studies (4 Credits)
This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women's studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of types of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

HNRS 2701 Wildlife Conservation & Cultur (4 Credits)
The focus of the course is the intersection of conservation and culture. The goal is to generate new and creative ways to think about conservation. Students will be exposed to different examples of conservation governance, ranging from state-controlled access commonly found in national parks to indigenous communities that are assisting conservation efforts. They will inquire as to what impacts different projects are having in not only helping stem the loss of habitat and wildlife, but also the informal governance institutions managing their unique ecosystems in sustainable ways. Importantly, we will consider our main questions through a very broad and informal cost/benefit analysis that encompasses more than the limiting economic factors normally used.

INTS 1500 Contemporary Issues in the Global Economy (4 Credits)
Introduction to a range of pressing problems and debates in today’s global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy.

INTS 1700 Introduction to International Politics (4 Credits)
This course critically examines the nature of contemporary global society. It is designed to familiarize students with the broad parameters of international politics and takes into account numerous methodological and theoretical perspectives. The course explores both the historical development of international politics and how the business of international politics is “done.” The course examines issues such as war and peace, human security, the politics of climate change, and international human rights. The overall goal of this course is to introduce students to the field of International Politics and to make them conversant about the major issues facing the global system in the 21st century.

MFJS 2160 Sexualities and Screens (4 Credits)
This course offers a critical introduction to the ways that sexual identities and practices are rendered (in)visible within screen-based, digital media culture: television, film, online spaces and platforms, and video games. As a socially contested, disruptive, and liberatory element of social life, sexuality’s mediation offers a lens for us to think about cultural norms, ideologies, and politics, as well as issues related to the commodification of bodies. Throughout the quarter, you will immerse yourself in diverse perspectives, reflective writing exercises, textual analysis, small group discussions, and other active learning measures that will deepen your critical thinking around the intersection of media culture and sexuality. Issues such as sexualization, intimacy coordinators, the mediation of consent, queer digital activism, and the politics of casting will be explored through the lens of Media Studies, Cultural Studies and Intersectional Feminism.

MFJS 2205 International & Development Communication (4 Credits)
Virtually everywhere we look, whether we are watching a speech by President Donald Trump, or responding to one of his Tweets on Twitter, whether we are streaming music on Spotify, an international music distribution service started in Sweden, or trying to find a toy for someone made anywhere but China, there is much evidence that we are living in an increasingly inter-connected and “globalizing” world. What does this mean for us as individuals? As Coloradorans? As Americans? What does an increasingly inter-connected and globalized world mean for “them” – meaning other individuals, in, and outside of the U.S.? For Bavarians (in Germany)? For Germans, or for the Japanese, or for Australians, etc.? More broadly, what does this mean for global humanity? Are we moving toward forming a so-called “transnational” social order and a “global” culture? And, if so, what and/or who is (and is not) driving this process? Why? How? And what are the potential implications of intensifying processes of global interaction, interconnection, and cultural production, distribution and consumption? These are some of the broader questions we will be addressing in this class, with a special eye toward the ways in which media, culture, and communication might be understood as fitting into the larger network of questions that swirl around “globalization.” Overall, the primary aim of this course will be a simple but important one: To inspire all of us to knowledgeably and critically reflect on how we are both affecting, and being affected by, processes of globalization, especially as these relate to media, communication and culture.

MFJS 2210 Introduction to Media and Culture (4 Credits)
Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

MFJS 2220 Hip Hop as Medicine: CRES Intro to Media & Community Engagement (4 Credits)
This course brings together media studies, critical race/ethnic studies, and project-based learning to introduce students to the economics of the media industries and their historical role in U.S. cultural and racial hegemony. This course counts toward the Scientific Inquiry: Society and Culture requirement.
MFJS 2270 Activist Media (4 Credits)
In the mediated digital era, communication is changing fast and shifting the dynamics of real-world power, expanding spaces for journalism and activist communication aimed at working for social change and social justice. This dynamic space has enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for activism and social change. Media has played a key role in social and political movements of the past and more recent online movements ranging from climate change, the #MeToo and women’s/feminist movement, the March for our Lives following the Stoneman Douglas High School Shooting in Parkland, Black Lives Matter, immigrant rights and others. Social media platforms such as Twitter, Facebook, Instagram and Snapchat have provided new tools to resist the domination and limitations of mainstream corporate media and create new media strategies and messages to promote social change. But these platforms have also created new risks and challenges for activists. In this course, we will address these issues of communication power dynamics and also media strategies and tools of social and political movements working towards social change.

MFJS 2280 Politics and Media (4 Credits)
We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1000 Introduction to American Politics (4 Credits)
Philosophical traditions, historical background, structure and functioning of American government, and political attitudes and behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1110 Comparing Politics around the World (4 Credits)
This course introduces students to the study of comparative politics, a sub-field within political science that uses a "comparative method" to compare and contrast countries to understand questions such as Where do 'states' come from? Why are only some democratic? How do states promote economic development? Why are some states increasingly rich while others remain poor? Why do people mobilize peacefully to influence politics in some places while they violently attack the established order in others? How do distinct identities rooted in ethnicity, gender, race, and religion influence politics differently around the world? How does globalization affect various countries, and why do some seem to cope with contemporary challenges more effectively than others? This course counts toward the "Scientific inquiry: Society and culture" requirement.

PLSC 1610 Introduction to Political Thought (4 Credits)
This course presents an introduction to some of the key ideas and questions in the study of politics. As an introductory course, it cannot present a systematic overview of the entire study of politics; rather, it seeks to introduce students to some central concerns in the study of politics. In this course we learn about the basic principles of human conduct in social contexts and explain how social scientific methods are used to understand these underlying principles. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PLSC 1810 Introduction to Law and Society (4 Credits)
This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the "law-on-the-books" and "law-in-action," and what can we learn from gaps between formal law and the "real" law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PPOL 1910 Hard Choices in Public Policy (4 Credits)
This course provides an opportunity to develop comprehensive knowledge of America's most intriguing public policy dilemmas. Policy issues to be discussed include intergenerational equity, competitiveness, the budget and trade deficits, crime, AIDS, education, health care, the environment, entitlements, immigration, race and affirmative action, public involvement, and social welfare. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PPOL 2710 Demography of Public Policy (4 Credits)
Demography is destiny. The consequences for American public policy are profound. America is aging, but becoming more diverse. A society in the midst of dynamic change is a society full of possibilities, but vulnerable to conflict. Values become indeterminate, with traditional communities vying for legitimacy with emergent cultures. Social movements, often populist in nature, challenge the established political order. This course focuses on the delineation of effective public policies to deal with demographic challenges, including (1) immigration policy; (2) the process of assimilation; (3) education; (4) geographic realignment; (5) competitive advantage of the United States relative to the European Union, Russia, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

PSYC 1001 Foundations of Psychological Science (4 Credits)
The goal of this course is to provide a general introduction to psychology examining the biological basis of behavior, perception, learning, memory, developmental transitions, personality, psychopathology, treatment, and social contexts for behavior. After completing this course, students will be able to (1) demonstrate an understanding of the defining principles and perspectives central to the inquiry of psychological science, (2) understand appropriate methods, technologies, and data that social and behavioral scientists use to investigate human functioning and conduct, and (3) develop and communicate alternative explanations or solutions for social issues considering cultural and social contexts. This course counts toward the Scientific Inquiry: Society and Culture requirement.

SOCI 1810 Understanding Social Life (4 Credits)
This course is an introduction to the discipline of sociology and to the insights it provides into the human condition. This course counts toward the Scientific Inquiry: Society and Culture requirement.
Common Curriculum and Degree Requirements

Major and Minor Requirements

The departmental major or minor is a program of courses taken in one department or, in the case of an interdisciplinary major or minor, a program of related courses taken in more than one department. The University offers a number of different degree options. Please review specific degree information for major and minor requirements. Students usually declare a major (or majors) by the end of their sophomore year.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of "C–" or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Double Majors

In certain degree programs (BA, BS and BSBA), students may complete a second major. A second major will substitute for a minor, if required. The second major must be offered in that particular degree program (p. 33); e.g., business majors are only available in the BSBA program. The University also offers the option of a secondary major (p. 93) for some programs of study. Secondary majors allow students to pursue a major outside the primary degree program.

Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Common Curriculum

The University of Denver’s Common Curriculum provides students with a well-rounded education, creates context for major or minor course of study and introduces students to new areas of interest. The Common Curriculum is grounded in a breadth of experiences and ways of inquiry congruent with DU’s goal of providing an outstanding educational experience that empowers students to integrate and apply knowledge from across the disciplines and imagine new possibilities for themselves, their communities and the world. Consistent with DU’s mission, the Common Curriculum promotes learning by engaging with students in advancing scholarly inquiry, cultivating critical and creative thought, and generating knowledge.

Common Curriculum courses contribute to an intellectually vibrant campus community and create, in turn, a challenging, inclusive, ethical and liberating learning environment. From students’ initial First-Year Seminar to the Common Curriculum’s culminating Advanced Seminar, the curriculum encourages connections across modes of learning. By engaging in course work across diverse experiences and areas of knowledge, DU students cultivate critical and creative thought, preparing them for leadership and citizenship in our global society.

Common Curriculum Requirements

The Common Curriculum at the University of Denver plays a central role in every undergraduate student’s education. Please review the Common Curriculum requirements matrix below, which provides a summary of DU’s Common Curriculum requirements, along with short statements that explain why the courses in the various parts of the curriculum are important in today's world. These descriptions are summaries of what students should be able to achieve through the successful completion of these classes. The matrix is followed by descriptive paragraphs that explain why each class a student takes is important and where it fits in the educational plan of the University.

An undergraduate at the University typically takes 52 to 60 credits in the Common Curriculum:

Because certain programs have slightly different requirements in the Common Curriculum and because AP and IB courses or transfer courses from other universities and colleges may change the distribution of the requirements for individual students, always consult an advisor regarding Common Curriculum planning for courses at the University and abroad.

First-Year Seminar

1 course (4 credits)
First-Year Seminars (p. 310) are designed to provide students with an in-depth academic experience that will be rigorous and engaging. Students develop the kinds of academic skills that prepare them for successful college work, which might include one or more of the following:

- critical reading and thinking
- writing and discussion
- quantitative reasoning
- argument and debate

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 80–85 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars also serve as students’ academic advisors and faculty mentors for the entire first year. Students meet individually with their mentors during winter and spring quarters for advising and registration help. This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet with the Vice Provost of Academic Affairs to request a new academic advisor and to determine the means by which this degree requirement may be fulfilled. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

Writing and Rhetoric

2 courses (8 credits)
Being able to convey written information and ideas in ways that are compelling to specific audiences is essential both in college and beyond. Beginning in the winter quarter of their first year, students take two sequenced writing courses, usually WRIT 1122 and WRIT 1133. Together, these courses teach strategies for writing to well-educated readers in diverse academic and nonacademic situations. Students learn rhetorical principles, the analysis and use of readings and source materials, and techniques for generating, revising and editing texts for specific situations. They also learn to present and justify positions and to produce researched writing in various scholarly traditions, including

- textual/interpretive (the analysis of texts or artifacts such as images or events);
- qualitative (analyses based on observations or interviews); or
- quantitative (information gained through measurement).

In each course, students complete several writing exercises and, through sustained practice and systematic instructor guidance, they complete at least four polished papers, totaling some 20–25 pages. By the end of the two-course sequence, students have completed at least 40–50 pages of polished writing. These courses lay the foundation for writing in further Common Curriculum courses (including the Advanced Seminar), writing in students’ majors and writing in professional and civic life after graduation.

Language

1–3 courses (4–12 credits)
The faculty of the University of Denver believe that studying culture through language at the university level is crucial in our globalized world, and courses in this area reflect that belief.

a. Students who have completed academic secondary education wholly or in large part in a language other than English are exempt from the language requirement. The Registrar determines if students’ transcripts qualify them for this exemption. Most international students, however, will be required to take at least one class from the English Language Center on living in the USA and our Mountain West.

b. Students are exempt from the language requirement in the BFA, BSEE, BSME and BSCpE degree programs. [Note for Music students: Candidates for the BM degree may choose between completing eight credits in one foreign language or eight credits in a Scientific Inquiry: The Natural and Physical World sequence. If they choose language, the below rules about placement apply.]

c. Students with certain documented learning disabilities as officers our Disability Services Program determine are also exempt, although they must instead take twelve credits (three classes) taught in English from an approved list of internationalizing courses.

d. All other incoming students who know or have studied one of the languages that we offer at DU (Arabic, Chinese, French, German, Hebrew, Italian, Latin, Japanese, Russian, or Spanish) are required to take our language placement test before registering for a class in that language, so that we may place them properly in its curriculum.

e. Students must either complete the elementary sequence of a language they have not studied before (or into elementary level of which they are placed) or take one four-credit course at the higher level into which each places. If we offer no advanced courses in their first language other than English, students who are not exempt (see 1-3 above) must take a first-year sequence of a different one.
Students may always choose to learn a new language and complete its first-year sequence. We offer more world languages than they will have had the opportunity to study in secondary school.

In all of our courses, students acquire linguistic skills in a language other than English. We are an internationalizing university that encourages multiskill language learning. Students in language classes will also be studying a different expression of culture through language. By this experience they learn both about a new culture and about themselves and their personal, social, and cultural backgrounds. Our young linguists learn to appreciate human diversity as it is expressed between and among languages and nationalities in the twenty-first century.

Analytical Inquiry: The Natural and Physical World (p. 40)
1 course (4 credits)
Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today’s physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student’s major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.

Analytical Inquiry: Society and Culture (p. 41)
2 course minimum (8 credits)
Through these courses, students gain knowledge essential for today’s global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.

Scientific Inquiry: The Natural and Physical World (p. 69)
3 sequential courses (12 credits)
Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

Scientific Inquiry: Society and Culture (p. 73)
2 course minimum (8 credits)
Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

Advanced Seminar
1 course (4 credits)
While knowledge and professional skills found in a student’s major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex political, social, cultural and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the demands of contemporary life, instructors teach an Advanced Seminar (p. 108) (ASEM) based in their area of expertise and passion. The topic will be approached from multiple perspectives in a course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas through intensive
writing on that topic. This course must be taken at the University of Denver. Students must complete all other Common Curriculum requirements before taking the Advanced Seminar.

### AREAS OF INQUIRY

#### First-Year Seminar

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| The Natural & Physical World | 4 credits | In these courses, students will:  
  - demonstrate what it means to be an active member of an intellectual community by meeting rigorous academic expectations through critical reading, discussion, research and/or writing;  
  - practice newly acquired skills in an active learning environment where writing, performing, laboratory experiments, quantitative analyses or other forms of experiential and/or creative activities will shape the goals and activities of the seminar. |

#### Writing & Rhetoric

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| The Natural & Physical World | 8 credits | In these courses, students will:  
  - analyze strategies used in a variety of rhetorical situations and employ those principles in their own writings and communications;  
  - analyze research and writing strategies used in a range of academic traditions and use those strategies in their own writings;  
  - adapt, to specific situations, a strong repertory of writing processes, including generating, shaping, revising, editing, proofreading and working with other writers. |

#### Language

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| The Natural & Physical World | 4-12 sequential credits | In these courses, students will:  
  - based on writing samples at the start and end of the first year of language, students will demonstrate increased proficiency in a language of choice in a specific skill (e.g., writing, speaking, listening or reading);  
  - demonstrate proficiency in learning about a culture as embodied in a skill (e.g., writing, speaking, listening or reading) in a language of choice. |

#### Ways of Knowing: Analytical Query

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| The Natural & Physical World | 4 credits | In these courses, students will:  
  - apply formal reasoning, mathematics or computational science approaches to problem solving within mathematics or computational science, and other disciplines;  
  - understand and communicate connections between different areas of logic, mathematics or computational science, or their relevance to other disciplines;  
  - communicate formalisms in logic, mathematics or computing sciences. |

#### Ways of Knowing: Scientific Inquiry

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| The Natural & Physical World | 12 sequential credits | In these courses, students will:  
  - apply knowledge of scientific practice to evaluate evidence for scientific claims;  
  - demonstrate an understanding of science as an iterative process of knowledge generation with inherit strengths and limitations;  
  - demonstrate skills for using and interpreting qualitative and quantitative information. |

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| Society & Culture | 8 credits | In these courses from two different disciplines, students will:  
  - demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture;  
  - identify and analyze the connections between texts, ideas or cultural artifacts and the human experience and/or perception of the world. |

#### Advanced Seminar

<table>
<thead>
<tr>
<th>Areas of Inquiry</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
</table>
| Society & Culture | 4 credits | In these courses, students will:  
  - integrate and apply knowledge and skills gained from Common Curriculum courses to new settings and complex problems;  
  - write effectively, providing appropriate evidence and reasoning for assertions. |

Major and Minor Requirements

The major (40–60 credits) is a planned program of courses taken in one department or, in the case of an interdisciplinary major, a program of related courses taken in more than one department. For the bachelor of arts, at least 40 credits are required in the major. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 25 credits must be in 2000- or 3000-level (upper-division) courses.

The minor (20–28 credits) is a program of courses in a second area of concentration. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 5 credits must be in 2000- or 3000-level (upper-division) courses.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of “C–” or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 33) section of this bulletin for information on major and minor programs of study available with the bachelor of arts degree.

Double Major

For the bachelor of arts, students may choose majors in two departments and eliminate the minor.

Credit Hour POLICY

- A total of 60 credits earned in any one department is the maximum accepted toward meeting the minimum 183 credits for the degree. (Exception: BA with a major in music.)

Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.
Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Bachelor of Fine Arts (BFA)

Total Credits Required for the BFA: 189-192

Non-Course Requirements
Please consult the individual pages in the Bulletin for each major within the BM degree as well as the Lamont Student Handbook for details regarding all non-course requirements.

Major and Minor Requirements
• The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
• Credits in the major and the minor must be earned at the level of "C−" or better.
• At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 33) section of this bulletin for information on major and minor programs of study available with the bachelor of music degree.

Upper Division Requirement
• Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Degree GPA Requirement
• Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

Residence Requirement
• The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Major and Minor Requirements

In the bachelor of science curriculum, at least 45 credits are required for the major. Of these, at least 25 must be in 2000- and 3000-level courses. Minors approved for the BS degree range from 15–28 credits each. Students pursuing a BS degree must complete a major and two minors or two majors and one minor. One minor must be in one of the following disciplines: Astrophysics, Biological Sciences, Chemistry, Computer Science, Electrical Engineering, Environmental Science, Geography, Geographic Information Science, Geology, Human Health Science & Systems, Mathematics, Mechanical Engineering, Medical Physics, Physics, and Psychology. Students who double major in BS programs can use the second major in place of one of the listed minors.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of "C–" or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 33) section of this bulletin for information on major and minor programs of study available with the bachelor of science degree.

Area Major

The area major meets the needs of students whose interests require a broad program of related interdepartmental study. At this time, the only area major available for bachelor of science students is environmental science. Please review the environmental science section for specific major requirements.

Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

<tbody>
<tr>
<td>186</td>
</tr>
</tbody>
</table>

1. this course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement
2. either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement

### Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

### General Policies

- At least 50 percent of required business courses for the degree must be completed at the University of Denver.
- Students must earn a minimum GPA of 2.5 overall, in all business courses and in the major.
- Students must earn a minimum grade of ‘C-’ in their additional non-business and business core requirements.

### Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

### Student International Experience Requirement

Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student's native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.
The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

- ACTG 3284 Consolidated Financial Statement 2
- ACTG 3285 Accounting for Foreign Operations 2
- ACTG 3701 Topics in Accounting (International Accounting travel course) 4
- ACTG 4284 Consolidated Financial Statements 2
- ACTG 4285 Accounting for Foreign Operations 2
- ECON 2610 International Economics 4
- ECON 3610 International Trade Theory & Policy 4
- FIN 3410 Multinational Financial Management 4
- LGST 3600 Business and Global Values 4
- LGST 3700 International Business Law 4
- MGMT 2420 Global Management 4
- MKTG 2945 Global Product Innovation 4
- MKTG 3380 Supply Chain Management 4
- MKTG 3630 International Marketing 4
- MKTG 3635 International Consumer Behavior 4
- REAL 3140 Global Perspectives in Real Estate 4
- Any INTS (International Studies) course 4

Secondary Admission

Applicants who wish to pursue an undergraduate business major in Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application for students who indicate business as their intended major on their application to DU. Students will be considered for direct admission to Daniels when accepted to the University of Denver. If applicants are not directly admitted through the DU application process, they are encouraged to work through the fast track or pre-business pathways as an enrolled student.

There are three possible admission routes into Daniels:

a. Secure direct admission upon application to the University of Denver, based on indication of business interest on application and overall strength of application credentials. Transfer applicants are evaluated on GPA, transfer coursework, and work experience; or
b. Earn Fast Track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion (C- or higher) of MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I; or
c. Pursue the Pre-business pathway through the successful completion (C- or higher) of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Economics: A Critical Introduction, INFO 1010 Analytics I: Data Management and Analysis, INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I, in addition to Microsoft Certifications for Excel, Word, and PowerPoint. A 2.5 minimum cumulative GPA is required to apply. Application are accepted on a rolling basis throughout the year, once applicants have fulfilled all requirements.

This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan/) outlines recommended paths for completing the courses required to earn Fast Track admission or to apply to Daniels.

Please refer to the Daniels website (http://daniels.du.edu) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu (dsp@du.edu?subject=), 303–871-3939 or www.du.edu/studentlife/disability (http://www.du.edu/studentlife/disability/).

**Major Requirements**

See section below 32-52

**Minor**

Although a minor is not required for BSBA students, they may complete any minor (except business administration)

**Electives**

Remaining hours of student’s choice

**Total Hours** 185

---

1. this course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement
2. either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement

**Major Requirements**

Major requirements generally consist of 32–52 credits.

Visit the Degree and Program of Study (p. 33) section of this bulletin for information on major and minor programs of study available with the bachelor of science in business administration degree.

**Double Major**

BSBA students may also complete a double major, combining two of the majors previously listed for the BSBA.

**Upper Division Requirement**

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

**General Policies**

- At least 50 percent of required business courses for the degree must be completed at the University of Denver.
- Students must earn a minimum GPA of 2.0 (“C”) overall, in all business courses and in the major.
- Students must earn a minimum grade of “C-” in their additional non-business and business core requirements.
Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

Secondary Admission

Applicants who wish to pursue an undergraduate business major in Daniels must first apply to, and be accepted by, the University of Denver. The application to the university serves as the Daniels College of Business application for students who indicate business as their intended major on their application to DU. Students will be considered for direct admission to Daniels when accepted to the University of Denver. If applicants are not directly admitted through the DU application process, they are encouraged to work through the fast track or pre-business pathways as an enrolled student.

There are three possible admission routes into Daniels:

a. Secure direct admission upon application to the University of Denver, based on indication of business interest on application and overall strength of application credentials. Transfer applicants are evaluated on GPA, transfer coursework, and work experience; or

b. Earn Fast Track admission upon completing two quarters as a full-time student at DU with a 3.5 cumulative GPA or higher, including successful completion (C- or higher) of MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I; or

c. Pursue the Pre-business pathway through the successful completion (C- or higher) of the following: BUS 1440 The Fourth Industrial Revolution, BUS 1099 Daniels Professional Development Program Part I, ECON 1020 Economics: A Critical Introduction, INFO 1010 Analytics I: Data Management and Analysis, INFO 1020 Analytics II: Business Statistics and Analysis, MATH 1200 Calculus for Business and Social Sciences or MATH 1951 Calculus I, in addition to Microsoft Certifications for Excel, Word, and PowerPoint. A 2.5 minimum cumulative GPA is required to apply. Application are accepted on a rolling basis throughout the year, once applicants have fulfilled all requirements.

This sample quarter-by-quarter course plan (http://bulletin.du.edu/courseplan/) outlines recommended paths for completing the courses required to earn Fast Track admission or to apply to Daniels.

Please refer to the Daniels website (http://daniels.du.edu) for specific information related to the admission process and requirements. Students needing special accommodations should contact University Disability Services at dsp@du.edu (dsp@du.edu?subject=), 303–871-3939 or www.du.edu/studentlife/disability (http://www.du.edu/studentlife/disability/).

Student International Experience Requirement

Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student's native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.

The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

Residence Requirement  
• The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.  

Secondary Majors and Concurrent and Second Baccalaureate Degrees  
Secondary Majors  
Secondary majors offer the opportunity to earn one baccalaureate degree in one program supplemented by a rich intellectual experience in a second field of specialization outside that primary program. The “secondary major” offers the option of studying two subjects from two different degree programs while earning a baccalaureate degree in the first major without the requirement of earning a second baccalaureate degree in the secondary major.  

Specifically, this option allows a student from one degree program to earn a secondary major from a participating department within a different program by fulfilling the requirements (normally 40–45 quarter hours) set forth by that participating department but without requiring students to complete additional courses that comprise that other program’s core curriculum. Through the secondary major option, upon graduation, a student earns one baccalaureate degree from DU (through the fulfillment of all requirements from the student’s primary degree program). Although that student will not be awarded a second degree, the student’s transcript will reflect that he or she earned a secondary major in that second area of study.  

As an illustration, if a BS in computer science student wishes to earn a secondary major in philosophy, he or she will need to satisfy all of the requirements of both the BS degree in computer science and the secondary major in philosophy. The student will graduate with a “BS in Computer Science.” The transcript will note that the student earned a BS degree in Computer Science with a Secondary Major in Philosophy.  

A current list of secondary majors may be found under the Degrees and Programs of Study (p. 33) section.  

Concurrent Baccalaureate Degree  
Students who wish to pursue two separate undergraduate degrees simultaneously should request an approval form from the Center for Academic and Career Development. A concurrent degree is different than a double major where the majors are within the same degree. Students must work with advisors in both degree areas to establish an academic plan for completing requirements for both degrees. Students should submit the form and their academic plan to the registrar’s office for final approval.  

A student who wants to pursue concurrent undergraduate degrees must complete the following:
• a minimum of 228 quarter hours (Note: Certain degrees may require additional hours.)
• all University requirements for both degrees (Common Curriculum requirements need only be completed once, but any unique requirements for each degree program must be met)
• major and minor requirements as defined by the appropriate departments and schools
• academic good standing at the time of graduation (GPA of 2.0 or higher as required by the degree programs)

Second Baccalaureate Degree
A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements and complete the following:
• residence requirement of at least 45 quarter hours (one year of full-time study)
• major and minor requirements as defined by the appropriate departments and schools
• undergraduate degree requirements (p. 78)
• academic good standing (GPA of 2.0 or higher) at the time of graduation (Note: The accounting program requires a higher GPA.)
• At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Courses taken for the first degree may apply as part of the University of Denver undergraduate requirements for the second degree. Courses previously taken and now being applied to the major or minor are allowed with permission of the chair of the appropriate department. In general, courses used for a minor in the first degree may be built on for a major in the second degree. However, the major in the first degree cannot count as a minor for the second.

Possession of a bachelor’s degree does not automatically fulfill the common degree requirements as defined by the University.

University College Bachelor of Arts Completion Program

Program Outcomes
The Bachelor of Arts Completion Program grew from the input of business, government, and community leaders, and the design meets learning outcomes critical for your success at work and fosters life-long learning. According to the National Association of Colleges and Employers, the top skills and qualities sought in job candidates by employers include verbal and written communication skills, strong work ethic, teamwork skills, analytical skills, and initiative. The Bachelor of Arts Completion Program enhances these skills through six critical outcomes that will have a lasting effect throughout your career and personal life:

• **Creativity:** the ability to conceptualize and rework problems and to generate solutions to those problems
• **Critical thinking:** the skill of analyzing and defining issues, developing an appreciation for multiple viewpoints, and generating well-crafted arguments
• **Knowledge utilization:** the ability to find useful information, ideas, concepts and theories; to synthesize them and build on them; and to apply them in the workplace as well as in personal life
• **Decision making:** the ability to analyze options and outcomes for decisions in terms of their values and effects and to make decisions that are rational, legal, and ethical
• **Empowerment:** the confidence that comes from knowing how to act, when to act, and how to respond to the opportunities and constraints that affect your efforts to get things done. With a sense of empowerment comes the ability to lead and to bring about change for the good
• **Effective communication:** knowing your audience and learning how to empathize with them; reading, writing, and speaking effectively; making presentations that are persuasive and entertaining; and arguing to powerful effect

Bachelor of Arts Completion Program Degree Requirements
The Bachelor of Arts Completion Program (BACP) enables adult working professionals employed in business, government, and not-for-profit organizations to complete the BA degree and acquire the intellectual skills associated with a liberal arts education. It offers students an adult-level education that is interdisciplinary and problem-based, emphasizing the multiple skills needed to be creative, effective, and successful in a highly competitive and global society.

Common Learning Experience
The Common Learning curriculum includes ten carefully selected courses in five areas where students can sharpen their skills and develop essential knowledge needed for thriving in the knowledge age. The common learning courses are a set of interdisciplinary courses for people who have been in the working world and are highly motivated. Interdisciplinary simply means that the perspectives and materials of several disciplines have been brought together in the design of each course. These courses provide a common foundational experience for instruction in advanced courses. The Common Learning Experience will help students learn how to learn, think critically, and improve communication skills, which will serve them in their future academic and professional careers.
The Experience with your major

The major builds on the Common Learning Experience and provides a way for students to specialize and pursue their interests. In most colleges and universities, the major is comparable to studying in an academic discipline, but at University College, your major is interdisciplinary; it draws on several disciplines especially useful for exploring the topics in that major. Students will become conversant with key knowledge in the arts and sciences disciplines, and it will be packaged in a way that helps them to examine key topics in an interdisciplinary field of study. The chief purpose of the major is to provide opportunities for learning how to draw on various liberal arts and professional disciplines when addressing real-world problems within organizations and society.

There are six majors from which to choose:

- Communication Arts (p. 617)
- Transportation and Supply Chain (p. 627)
- Global Studies (p. 619)
- Healthcare Administration (p. 621)
- Information Technology (p. 623)
- Leadership and Organization Studies (p. 625)

At University College, students have a fresh academic start as the first 96 transferable quarter credits (64 semester hour credits) apply toward a University of Denver bachelor’s degree. University College welcomes past undergraduate credit to be put directly toward the completion of the degree. Bachelor of Arts Completion Program students will choose a major that relates to their interests and career focus, gaining real-world skills they can begin using right away. An opportunity to complete both the bachelor’s degree and a master’s degree is available to Bachelor of Arts Completion Program students, who can pursue a dual degree to reduce the time and cost of earning both degrees.

The following academic policies apply to major requirements for bachelor’s students at the University.

- The GPA must be at least 2.0.
- Credits in the major must be earned at the level of “C–” or better.

Remaining credits to meet minimum 180 for the degree

Total Credits 180-188

Major Requirements

- Credits in the major and the minor must be earned at the level of “C–” or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.
Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

Credit Earned through Examinations

A maximum of 45 quarter hours can be awarded for all AP and IB credit.

Advanced Placement (AP)

Through the College Entrance Examination Board (CEEB) program, the University of Denver grants credit to secondary school students who complete an AP examination with appropriate scores. Placement and/or credit is granted in courses commonly taught at the first-year level. Departments of the University vary in their score requirements for credit and placement. The following table identifies the amount and placement of AP credit.

Note: This table was prepared based on spring 2022 exams. The credit in this table is for students who begin classes at DU in the 2022-2023 academic year. Students who started at DU in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

### International Baccalaureate (IB)

Students may receive college credit through the IB program, which is offered at many high schools. Higher-Level Subject Exams may be awarded credit. With the exception of foreign language, no credit is given for Standard-Level Subject Exams. The number of credits awarded varies depending on the subject area. The amount and placement of IB credit is summarized in the following table.

**COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)**

The College Level Examination Program (CLEP) is a group of standardized tests created and administered by the College Board. These tests assess college-level knowledge in thirty-six subject areas and provide a mechanism for earning college credits without taking college courses. The University of Denver will consider awarding college credit for exams in disciplines we teach. All credit awarded for CLEP exams is contingent on departmental approval. Scores below 50 will not be considered.
Transfer of Credit

University of Denver Undergraduate Transfer of Credit Policy

Purpose
The University ensures that transparency in our policies exists for our students and those who administer these policies, allowing for consistent interpretation and application throughout the institution and, as new types of learning opportunities emerge, allowing for responsiveness on the part of the University in a changing educational environment.

Policy
Three general factors affect the transferability of credits: the subject matter, the institution where the credits were earned and the course grade.

Subject Matter
Usually, courses taken in baccalaureate disciplines taught at the University of Denver are readily transferable. Credits from professional programs will be examined on a course-by-course basis and are often transferable. In general, courses in vocational or occupational subjects are not transferable. Finally, applicability to the degree for which a student is a candidate and comparability to an existing University of Denver course may be used as factors for the acceptance or denial of transfer credit.

Transferring Institution

Domestic Institutions
Credit will be considered for courses taken at institutions that are accredited by an agency recognized by the U.S. Department of Education. Credits are more readily accepted from a collegiate institution with regional accreditation although credits earned at a collegiate institution with national or special accreditation will also be considered. Credits that meet the subject matter requirements will be considered on a course-by-course basis when earned at an institution lacking regional accreditation. Institutions that have been granted official candidacy status by a regional accrediting association will be accorded like treatment to those that are fully accredited.

Foreign Institutions
Credit will be considered for courses taken at foreign institutions that are formally recognized as an institution of higher education by a given country’s Ministry of Education. The same general parameters apply for course content and grades as they do for U.S. credit consideration.

Two-Year Institutions
Credit from two-year institutions generally is considered lower division. Advanced courses from two-year institutions are considered upper division when validated by the appropriate departments. The maximum credit that may be accepted from a two-year institution is 96 quarter hours.

Study Abroad
Credit earned within non-DU study abroad programs is treated as transfer credit.

Military Courses
Military courses documented through Army/American Council on Education Registry Transcript System (AARTS), Form DD 295, “Application for the Evaluation of Learning Experiences During Military Service,” or DD Form 214, “Armed Forces of the United States Report of Transfer or Discharge,” may be eligible for consideration in the evaluation process. Military courses must be validated by the department with which the subject matter is most closely aligned.

Course Grades
Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer. Transfer grades are not included in a student’s DU GPA, and transfer credits cannot be used to reduce DU grade-point deficiencies.

Credit earned as pass/fail can be transferred only as elective credit. This credit does not apply to specific degree requirements other than total hours for graduation, and the University must determine that “P” (pass) equals 1.7 (C-) or better performance.

Instructional Methodologies
Online courses and those offered electronically are not categorically restricted, but they may be refused based on instruction methodologies not equivalent to those at the University of Denver.

Maximum Transfer Hours and Residency Requirements
The following specific transfer guidelines regarding residency and maximum transfer hours apply:

- A maximum of 135 quarter hours of credit may be transferred.
- The final 45 credits must be earned at the University of Denver.
- For students studying for one or more terms in an approved study abroad program, the residency requirement is waived.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.
• At least 50 percent of required business credits for undergraduate business degrees must be completed at the University of Denver.

AP and IB Credit
A maximum of 45 quarter hours can be awarded for all AP and IB credit.

Authority and Course Equivalencies
Initial transferability decisions are made by the Office of the Registrar. Approval of transfer applies toward the overall credit needed to meet degree requirements and does not necessarily guarantee or result in equivalency with specific University courses or requirements. Transfer credit appeals may be made through departmental chairs. Final authority for transfer credit and determination of course equivalency rests with the appropriate academic department.

Transfer of Credit by Continuing Students
Approval
Continuing students must receive approval in advance for transfer credit.

Concurrent Registration
Students may not enroll at the University of Denver and other institutions concurrently without prior permission.

Articulation Agreements
The University of Denver may enter into transfer articulation agreements with other institutions as deemed mutually beneficial. Such agreements are administered by the Office of the Registrar. Transfer articulation agreements will include transfer course guides. The University of Denver may establish transfer course guides independent of formal articulation agreements.

Determination of Quarter Hour Equivalent Value Assigned
University transfer credit hour values are based on the credit hour value assigned by the originating institution. If the academic calendar of the originating institution is other than the quarter system, the appropriate conversion of the assessed credit hours of coursework will take place based on the calendar of the originating institution and the formula for converting them to quarter credit hours. While semester hours are multiplied by 1.5 to convert them to quarter hours, other formulae are used for the conversion when the originating institution is not on a standard, quarter/semester calendar. Conversion of the assessed credit hours from institutions on calendars other than a quarter calendar may result in conversions other than whole quarter credits (e.g., 3 semester credits is the equivalent of 4.5 quarter credits); conversions are not rounded up or down.

Requests for Transfer Transcript
Students must request that official transcripts be delivered directly from other institutions to the Office of the Registrar. All transcripts must be received in an official sealed envelope or through a secure electronic sending agency. Student will be notified after transcripts have been processed.

Transfer and International Education Reporting System
The University of Denver’s Transfer and International Education Reporting System (http://myweb.du.edu/mdb/du_bwcktart.P_DU_Choose_Geog_Area/) (TIERS) allows students to access a list of approved transfer and study abroad courses. Courses that do not appear in the system are not necessarily unacceptable for transfer. Courses will continue to be added as new ones are evaluated and equivalents determined. You can access TIERS through PioneerWeb under the Student tab.

For more information regarding how to utilize the TIERS system for study abroad, please see this page:

Traditional Bachelor’s Program Majors and Minors

Most majors, and some minors, may only be pursued in conjunction with specific degree programs. The Degrees and Programs of Study (p. 33) section of this bulletin lists possible degree and major/minor combinations. Students must meet overall requirements for their degree as well as specific requirements outlined in majors and minors.

The School of Accountancy’s mission is to foster Enlightened Practice, Professional Achievement, Knowledge Creation, and a Commitment to Community among its students, graduates, faculty, and others engaged in the accounting profession and related disciplines.

• *Enlightened Practice* means ensuring that our graduates understand the theory and practice of accounting and its ramifications on society, the profession, and organizations.
• *Professional Achievement* includes accomplishment at each level of one’s career and commitment to lifelong learning, competence, and integrity.
• *Knowledge Creation* means scholarship which improves our understanding of accounting, the practice of accounting, and the process of educating future accountants.
• *Commitment to Community* is the process of giving of oneself both to the community that supports one’s efforts and achievements and to the community at large. *Commitment to Community* is a vital aspect of the accounting profession and is critical to the School’s ongoing success.

Our programs achieve this mission by emphasizing technical knowledge and analytical ability, interpersonal skills and intercultural understanding, and ethically based leadership and social responsibility. In the School of Accountancy, students learn to integrate accounting concepts and business applications in the context of communication, ethics, values, and technology. This integration is accomplished in the undergraduate business core and in the School of Accountancy core.

The School of Accountancy’s strengths include the following:

• an established reputation as a provider of quality programs
• highly qualified faculty who emphasize teaching and relevant research
• student access to faculty—both individually and in relatively small classes
• innovative curricula
• emphasis on state-of-the-art technology throughout the curricula
• emphasis on practical experience
• a rigorous educational experience

The degree prepares students to work as strategic business advisors who can analyze and understand today’s complex business environment. Students gain expertise in the traditional accounting arenas of managerial accounting, financial reporting, systems, auditing and tax, as well as in the nontraditional areas of technology, marketing, strategic planning, and finance. The School of Accountancy offers a bachelor of science in accounting (BSAcc), a master of accountancy (MAcc) and a dual degree option that allows completion of the bachelor’s and master’s degrees in five years.

Refer to the appropriate sections of this bulletin for the admission, retention, and graduation requirements for the School of Accountancy, which differ from the general requirements of the Daniels College of Business.

Program Objectives

Objectives of the BSAcc are to prepare students for entry-level positions in accounting. In this program, students will learn how to

a. prepare and interpret financial statements for business enterprises;
b. use accounting data to evaluate performance and enable decision-making;
c. apply the principles related to the design, integrity, and effectiveness of accounting information systems;
d. explain the role of auditing in society, including auditing procedures and reporting requirements;
e. apply federal tax laws pertaining to individuals; and
f. Analyze the legal, ethical and legislative constructs that govern the conduct of business.
Criteria for Admission to the BSAcc Program

Continuing Students

- Students must have a minimum 2.5 GPA (overall, in ACTG, and in the following courses: ACTG 2200, FIN 2800 and ACTG 2300).
- If a student fails to meet the required GPA, he or she may still be able to qualify for the School of Accountancy. Please consult with the director of the School of Accountancy.
- Other specific admission requirements apply. Please see the School of Accountancy for details.

Transfer Students

Undergraduate transfer students must meet the requirements listed for continuing students. Credits are considered for transfer only if they meet the following standards:

- Accounting courses beyond principles must be taken at an AACSB-accredited institution or approved by the School of Accountancy.
- Courses must be comparable to required courses offered in the School of Accountancy. Any required courses that do not meet the above criteria must either be validated by examination or retaken. In computing the GPA for purposes of admission to the School of Accountancy, work transferred from previous schools and work at the University of Denver are included.

Retention Requirement for Bachelor of Science in Accounting

To remain in the program, a student must maintain a GPA of 2.5 or higher, both overall and in accounting courses.

Accounting

Bachelor of Science in Accounting Major Requirements

(186 credits required for the degree (p. 85))

Minimum of 40 credits. Students must earn a minimum 2.5 GPA, both overall, in all business courses, and in accounting courses. If a GPA deficiency exists at the time the prescribed program is completed, no more than 10 credits of approved additional accounting courses and non-accounting courses may be taken in an attempt to correct the deficiency.

Total Credits 40

Core in Accountancy

The core in accountancy is a yearlong, fully integrated series of courses. Each quarter must be completed in its entirety before the student can move on to the next quarter. Any student with an ACTG GPA below 2.5 at the end of any quarter will not be permitted to continue in the accounting major.
Minor Requirements

The Accounting minor is available only to students pursuing a Bachelor of Science in Business Administration degree.

16 credits, including the following:

1 Finance majors must substitute an advisor-approved accounting course for ACTG 3220 Understanding Financial Statements. ACTG 3462 Corporate & Partnership Tax is recommended.

Undergraduate/Graduate Dual Degree Program in Accounting

The School of Accountancy offers undergraduates an accelerated program leading to the master of accountancy (MAcc). Students may apply for admission to the graduate program after completing the accounting core. Admission is based on academic performance and faculty evaluation. Contact the School of Accountancy for more information. Students accepted to the program normally complete the BSAcc and MAcc in a total of five years or less.

Requirements for Distinction in the Major in Accounting

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

Accounting

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

ITEC 3155  
4 Elective  

ACTG 3551  
4 Common Curriculum Course

Elective  
4 Common Curriculum Course

Total Credits: 187-188

1. Fulfills Analytical Inquiry: The Natural and Physical World
2. Fulfills Scientific Inquiry: Society and Culture
3. Common Curriculum Requirements (http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegreerequirements/)
4. INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Common Curriculum requirements in the First Year are generally satisfied through the sequential full-year foreign language (FOLA) requirement.

ACTG 1988 Study Abroad Resident Credit (0–18 Credits)

ACTG 2010 Survey of Accounting (4 Credits)
Accounting for running a business, with modules on financial accounting and a focus on managerial accounting. Prerequisite: Sophomore standing. Business minors only.

ACTG 2200 Introduction to Financial Reporting (4 Credits)
The purpose of this course is to introduce students to accounting and its relevance in the business world. Students learn how to analyze transactions and prepare financial statements. In addition, students are introduced to publicly traded company’s annual reports and 10K’s.

ACTG 2300 Accounting for Decision Making (4 Credits)
Introduces or reinforces concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting financial information and making business decisions, not accumulating or preparing accounting information. Students will learn the concepts of cost behavior, cost-volume-profit analysis, master budgeting, relevant factors for short-term decision making and cost allocation. Prerequisites: ACTG 2200 and Microsoft Excel Certification. Must have Daniels student status.

ACTG 2988 Study Abroad Resident Credit (0–18 Credits)

ACTG 3014 Accounting Core I - Accounting Fundamentals (4 Credits)
The course prepares the future accountant to understand how the accounting system and profession functions within marketplace. At the conclusion of this course the student should understand: (1) the fundamental elements and terminology of business transactions and related financial accounting (2) the accounting system of recording, classifying and summarizing information, (3) economic and ethical issues relating to financial accounting, and (4) technical and communication skills necessary for the professional accountant. The practice of technical skills is supplemented with learning concepts and techniques for effective oral and written business functions, with a focus on reinforcing speaking and writing skills through practice and feedback. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.

ACTG 3017 Accounting Information Systems & Controls (4 Credits)
The objective of this course is to provide an integrated learning opportunity that encompasses financial internal controls and accounting information systems. Students will learn skills that can immediately be translated to their jobs/internships. The first part of the course focuses on advanced Excel concepts and certification, as well as learning some basic concepts for database systems using Access. The second part of the course will focus on completing the accounting cycle for a business in a manual environment. The purpose being to understand the relationship of all of the documents and the needed controls. The third part of the course focuses on the use of accounting software to automate the processes from the second part of the course. The emphasis being on understanding the impact on the controls within the system. Prerequisites: ACTG 2200, ACTG 2300, and FIN 2800.

ACTG 3018 Intermediate Financial Accounting I (4 Credits)
Foundations of financial statement content, including structure of financial accounting theory; accounting process and cycle; income determination and reporting; compound interest concepts and relationship to accounting; accounting and reporting for current assets. Case studies of open-ended accounting problems requiring application of GAAP guidance to fact patterns. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800. Must be a Daniels Student.

ACTG 3019 Cost Management (4 Credits)
This course introduces objectives, methods and problems encountered in cost accounting. Cost accounting is a broad field that often links financial and management accounting, involving communication between accountants and management. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.
ACTG 3034 Accounting Data Analytics (4 Credits)
In today's information world, accountants must be well equipped to understand and utilize the vast and varying data systems that feed a company's decision-making process. The course fosters a data analytics mindset in accounting students by providing hands on skills with software tools with a strong emphasis on interpreting and communicating the results to the business. Students will gain experience coding in SQL, loading and manipulating data files in Alteryx, and visualizing data for effective storytelling in Tableau. Projects focus on large scale business cycles and challenge students to craft appropriate questions of the data and dig beyond initial data results to identify trends and root causes. Strong focus is placed on visually and verbally communicating the results of the data analysis to a non-technical business audience.

ACTG 3036 Accounting Core II - Federal Income Taxation (4 Credits)
This is the first course in taxation which introduces the federal taxation system, the importance of tax authorities, the concepts of gross income and tax deductions and the tax implications of common property transactions. This course generally focuses on property transactions, but the taxation of individuals is emphasized with an objective being that students are able to properly prepare complex individual tax returns. Prerequisites: ACTG 3014, ACTG 3018 and ACTG 3019.

ACTG 3037 Cost Management (4 Credits)
Cost Management builds upon basic concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting both high-level and detailed financial information and making business decisions, not accumulating or preparing accounting information. After completing this course, the student should understand: • Cost behavior. • Techniques and uses of cost-volume-profit analysis. • Relevant factors for short-term decision-making. • Cost accumulation, tracing, and allocation. • Components and uses of the master budget. To master the course material, the student will need a basic understanding of historical financial accounting, but the course emphasizes present and future management actions. Prerequisites: ACTG 2300 and ACTG 3018.

ACTG 3038 Accounting Core II - Intermediate Financial Accounting II (4 Credits)
The focus of this course is the foundation and content of published financial statements. Specifically, it covers the following two modules: 1) assets: recognition, measurement and reporting issues, a) fixed assets and b) intangible assets; 2) liabilities: recognition, measurement and reporting issues, a) current liabilities, b) contingencies, and c) long-term liabilities. Common to each of the modules is an emphasis on reading GAAP and applying the GAAP guidance to fact patterns. In particular, the course is designed to enhance each student's ability to identify, discuss, and resolve open-ended problems (i.e., those having no single "correct" answer). Therefore, each student must commit to being an active participant in the class discussions. The two main reasons to participate are that (1) the class will be a richer experience if we hear a variety of views on each issue and (2) it is important to develop confidence in your ability to analyze and discuss complex technical issues, and to explain and justify your conclusions. Prerequisites: ACTG 3014, ACTG 3019 and ACTG 3018.

ACTG 3049 Accounting Information Systems (4 Credits)
The objective of this course is to provide an integrated learning opportunity that encompasses financial statement assurance and accounting information systems. The first part of the course exposes these issues using a hypothetical company based on an actual company. The student should develop a knowledge and understanding of this particular industry and how it provides assurance of the company's financial statements as well as address a variety of challenging accounting information systems issues. The second part of the course focuses on a conceptual framework to emphasize the professional and legal responsibility of accountants, auditors, and management for the design, operation, and control of AIS applications.

ACTG 3068 Intermediate Financial Accounting III (4 Credits)
This course is a continuation of ACTG 3018 and ACTG 3038 and completes the examination of the foundation and content of published financial statements. Specific topics include: stockholders' equity, investments in debt and equity securities, revenue recognition, income taxes, pensions, leases, statement of cash flows, accounting changes and errors, and interim reporting.

ACTG 3069 Accounting Communications (4 Credits)
This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and team building.

ACTG 3130 RPA in the Business and Accounting Environment (4 Credits)
Robotic Process Automation (RPA) is an emerging technology that is changing the way businesses process data. RPA allows many business processes to be automated and remove the human from performing repetitive tasks. This course will teach the basics of the technology using one of the most popular RPA software programs, UiPath. Students will learn the theory, design an application of RPA through small projects.

ACTG 3220 Understanding Financial Statements (4 Credits)
Provides business majors with the necessary understanding to read, interpret, and use published financial statements. Cross listed with ACTG 4220. Prerequisite: ACTG 2200 and admission to Daniels.

ACTG 3230 Financial Statement Analysis (4 Credits)
Consolidated financial statements, accounting for leases, currency translation, and options and futures impacts, GAAP to restate financial statements for differences between companies. Impact of financial transactions and evaluating a firm's performance from a user's perspective.

ACTG 3284 Consolidated Financial Statement (2 Credits)
Consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements.
ACTG 3285 Accounting for Foreign Operations (2 Credits)
Financial statement impact from doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

ACTG 3340 Topics and Cases in Managerial Accounting (4 Credits)
Topics & Cases in Managerial Accounting focuses upon contemporary methodologies used by managerial accountants. Such methodologies are examined through classroom discussions of case studies and related articles. The course is designed to develop and enhance skills that are essential for the long-term success of career in accounting and finance. Prerequisites: ACTG 2300.

ACTG 3360 Profit, Planning & Control (4 Credits)
Comprehensive planning in the corporate environment involving in-depth study of goals, procedures, responsibility, and coordination of planning and control process. Objectives and structuring of planning process, significant problem areas, benchmarks for alternative evaluation processes, and correction and control tools. Prerequisite: ACTG 2300.

ACTG 3440 Business and Investment Tax Issues (4 Credits)
Income tax conceptual framework applicable to common business and investment transactions, including tax implications of business decisions. How effective business planning depends on accurate assessment of relevant tax factors. Prerequisites: ACTG 2200.

ACTG 3461 Individual Income Tax (4 Credits)
Federal income tax as it applies to individuals, including discussion of rates, exemptions, deductions, and accounting methods; gross income, property transactions, tax deferred exchanges; business operating taxpayer issues. Prerequisites: ACTG 2200.

ACTG 3462 Corporate & Partnership Tax (4 Credits)
Federal income tax as applied to the formation, operation and dissolution of business entities. Determination of corporate taxable income, special deductions, credits, methods of computing tax liability and estimated tax requirements. Determination of partnership and S Corporation ordinary income; classification and amount of separately stated items allocable to partners and S Corporation shareholders in accordance with the conduit principle.

ACTG 3551 Auditing (4 Credits)
This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports.

ACTG 3620 Accounting Ethics (4 Credits)
This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed.

ACTG 3701 Topics in Accounting (1-4 Credits)
ACTG 3702 Topics in Accounting (1-4 Credits)
ACTG 3703 Topics in Accounting (1-4 Credits)
ACTG 3704 Topics in Accounting (1-4 Credits)
ACTG 3705 Topics in Accounting (4 Credits)
Prerequisite: ACTG 3068 or instructor’s permission.

ACTG 3740 Valuation and Modeling (4 Credits)
Professional decisions in the face of uncertainty are made using a combination of judgment and sound analysis. Even skilled professionals in any field will make incorrect decisions when working with incorrect or insufficient information or when making careless analyses. One key to improving decision-making is superior analytical insights and skills. Given this, the ultimate purpose of the course is to: 1. Provide you with experience in identifying critical decisions that can best be improved through analysis of data and modeling. Once key issues are identified. 2. Provide you with the knowledge and insight necessary to identify appropriate (and reject inappropriate) models or analyses. Once an appropriate model or models are identified: 3. Provide you with the tools and skills necessary to correctly use those models by identifying, measuring and evaluating critical factors, data and assumptions. 4. Gain experience in critically evaluating and auditing your work and the work of other professionals. For example, has management used appropriate models, appropriate data and reasonable assumptions in their estimates of fair value for various assets. Prerequisites: INFO 1020, ACTG 2200 and FIN 2800.

ACTG 3880 Internship - Undergraduate (0-4 Credits)
Practical work experience.

ACTG 3885 Undergraduate Field Experience (0 Credits)
Compensated work experience; no academic credit. Prerequisite: instructor’s permission.

ACTG 3988 Study Abroad Resident Credit (0-18 Credits)

ACTG 3991 Independent Study (1-10 Credits)
Independent research/study; requires written report. Prerequisite: instructor’s permission.
ACTG 3995 Independent Research (1-10 Credits)

Nathan Waddoups, Assistant Professor, PhD, University of South Carolina
Robert K. Zimmer, Professor, Emeritus, PhD, The Ohio State University

Advanced Seminar

All undergraduates at the University of Denver are required to take an Advanced Seminar, an upper-level course capped at 15 students.

While knowledge and professional skills found in a student's major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex physical, ethical, social, political, cultural, aesthetic, and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the challenges, opportunities, and responsibilities of contemporary life, instructors teach an advanced seminar based in their area of expertise and passion. The topic will be approached from multiple perspectives in a capstone course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas, informational sources, and ways of knowing through intensive writing on that topic. This course must be taken at the University of Denver. Students must complete all other common curriculum requirements before taking the Advanced Seminar.

Advanced Seminar courses meet four criteria in terms of writing.

a. Students will write a minimum of 20 pages (about 6000 words), some of which may be informal, but some of which must be revised, polished and intended for an educated readership.

b. Students will complete a minimum of three writing projects that are distributed over the quarter; exceptions might include a cumulative project completed in multiple stages.

c. Students will be required to revise some of their work based on feedback from their professor.

d. There will be some instructional time given to writing.
ASEM 2401 'Extreme' Philosophy: Major Philosophical Issues of the 21st Century (4 Credits)
This course involves an exploration and critical assessment of several of the most important 21st century philosophical issues: the "Doomsday Argument," the "Singularity Argument," the "Simulation Argument," and various views surrounding the possibility (and probability) of extraterrestrial intelligence (ETI). There are no prior knowledge prerequisites; all necessary background information will be presented in the course. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2402 Culture and Identity in American Political Development (4 Credits)
This course considers the development of American politics over time, through the lens of struggles over culture and identity. We discuss how political and institutional change around these topics happens in the American political system. The first section of the course reviews broad theories in the field of American Political Development, addressing the role of culture, institutions, and policy. We then turn to closer consideration of the ways in which scholars from multiple disciplines have applied these theories to specific areas of American politics. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2403 Versions of Egypt (4 Credits)
This course will study a handful of books that lead up to and study the recent Egyptian Revolutions. We will read Alifa Rifaat's Distant View of the Minaret, Amitav Ghosh's In an Antique Land, Alaa al Aswany's The Yacoubian Building, Wael Ghonim's Revolution 2.0, and excerpts from Peter Hessler's forthcoming book about post-revolutionary Egypt. The class will attempt to understand both 21st century Egypt and the aftereffects of the dramatic changes in Egypt since the first revolution of February 2011. Students will write both critical and creative essays for this seminar.

ASEM 2404 Music Preference, Identity, Genre, and Recommendation (4 Credits)
Students examine the relationship between music preferences, personality, and identity. Because music preferences are strongly mediated by cultural industries and institutions, students also examine two of the music industry's tools for connecting listeners to their preferred music: genre systems and a more recent tool, automated music recommendation engines. The course includes three medium-length papers and many written responses to scholarly writing drawn from music psychology, musicology, and music informatics.

ASEM 2405 Decision-making and Neuroeconomics (4 Credits)
How do you decide what to buy, who to trust, which job to take, or what you'll want to eat tomorrow? This seminar-style course integrates perspectives from psychology, neuroscience, and economics to understand decision-making, how it is affected by emotions or social contexts, and how it is implemented in the human brain. The course emphasizes active participation, and relies upon primary scientific sources (i.e. peer-reviewed empirical articles). Recommended: a familiarity with at least one of cognitive psychology, human neuroscience, or behavioral economics.

ASEM 2406 Myths of Medieval Encounter (4 Credits)
Using three case studies (Vikings, Crusaders, and Conquistadors) this course examines how pre-modern authors shaped the image of Europe by depicting foreign cultures and how we sue the texts of the past to understand not just the cultures they describe, but also the changing face of Europe across the centuries.

ASEM 2407 The Individual in Modern Economies (4 Credits)
This course discusses the role of the individual in modern economies, and the impact that modern economic systems have on individuals and their lives. The course will include objectives that people pursue in societies, and how the structure of the economic system can help or hinder achieving them. To that end, a conceptual understanding of different perspectives on modern economies will be at the center of the class. Those perspectives will be drawn not only from economic concepts in a narrow sense, but also be informed by sociology, political science, and psychology, among other disciplines.

ASEM 2408 Income and Wealth Inequality in the 21st Century (4 Credits)
The work of Emmanuel Saez and Thomas Piketty in the early 2000s revealed that the share of income being captured by the top 1% of income earners has been rising steadily for the past three decades. Their observation was the key stylized fact behind the Occupy Movement rallying cry "We are the 99%!" This seminar on income and wealth inequality takes a closer look at the key empirical discoveries and theoretical insights. In the course of reading Piketty's book Capital in the 21st Century and supplemental texts representing multiple traditions and perspectives, students engage critically with these topics and the controversies around them. The objective of this course is for students to leave with an in-depth understanding of issues in income and wealth inequality, the controversies around works like Piketty's book, and their relevance for the economic and political present. Enforced Prerequisites: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2409 Performing India: Performance, Ritual, and the Indian Body Politic (4 Credits)
This course explores "performance" as an organizing principle of Indian cultural, political, and religious expression. We delve into the shared poetic and spiritual experience of the performer and spectator as a foundational aspect of performance that fundamentally shapes the Indian body politic. This interaction between spectator and performer functions as a guide trope as we examine the Pan-Indian oral performance tradition through the transmission, rewriting, recasting, regionalization, and politicization of canonical Indian epics, the "Mahabharata" and "Ramayana".
ASEM 2410 Science & Religion in Dialogue (4 Credits)
This course examines the relationship between science and religion. Our key question is “What is the best way to understand or construe this relationship?” We begin by attempting to identify and, then, dispel certain popular “myths” about science and religion. Then we turn our attention to the life, the scientific discoveries, the religious commitments and struggles of Charles Darwin. Darwin's career is the perfect entry point for considering much broader issues in the relationship between science and religion. Darwin's evolutionary theory fundamentally shaped modern science. But in so doing it also raised significant challenges to traditional religious belief, particularly in Christian communities of faith. For that reason, Darwin is as controversial today as he was 150 years ago, especially in (tho’ not limited to) America. With that foundation, we shall be in a position to wrestle with a quite recent, thorough-going reassessment of the science/religion debate, one that is both critical and constructive. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2411 Race and the Politics of Punishment (4 Credits)
This course uses perspectives from history and politics to explore questions about race-based practices and policies in contemporary America. One rich lens on these questions is provided by the current of mass incarceration. Michelle Alexander’s book, The New Jim Crow, argues "we have not ended racial caste in America; we have merely redesigned it." The course investigates her argument: what would it mean for mass incarceration to be the New Jim Crow? What does that framing reveal, and what does it conceal? Students develop a solid understanding of the origins and consequences of race-based practices and policies (whether explicit or implicit) in American politics, as well as of mass incarceration. Specific examples raise broader questions about racism in American political history; political power; and political change.

ASEM 2412 Emotions in Theatre and the Brain (4 Credits)
This course examines one core aspect of human nature: emotion, exploring its dimensions from the perspectives of philosophy, psychology, neuroscience, and theatre.

ASEM 2413 Applied Neural Networks (4 Credits)
Artificial neural networks (ANN) are a set of important technological tools that have a wide array of practical applications, ranging from weather forecasting to engineering. This course defines and explains ANNs and how they have been applied to a wide variety of real phenomena.

ASEM 2414 Wealth, Power & Justice in the European Union (4 Credits)
This course explores the regional integration of Europe in the postwar era. Since the European Union "began" back in 1950, the central question we consider is why states that fought devastating wars for centuries chose to put down their arms and merge their destinies with a common market, single currency, and binding "supranational" legal system. We focus on the evolution of economic and political motivations for integration and the legal pressures that erode state sovereignty today. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2415 Friendships and Communities (4 Credits)
Students will examine traditional understandings of social capital and how we form and maintain relationships for personal, social, and political ends. From this background, students will examine new insights about social capital from an interdisciplinary approach (e.g., evolutionary psychology, philosophy, and anthropology). Finally, students will explore these "new syntheses" in relation to contemporary critical issues that cross race, class, and national borders. Possible examples of such issues include incarceration, homelessness, or the function/effects of social networks like Facebook.

ASEM 2416 France and Germany: From Carnage to Community (4 Credits)
Today, much to the United Kingdom's chagrin, the European Union is dominated by a closely cooperating "dyarchy" of the French Republic and the Federal Republic of Germany. Go back a century, however, or two or three, and you find France--whether republic (1909), empire (1809), or kingdom (1709)--preparing for war with Germany (1909) or catching her breath between campaigns against various German states (1809, 1709). Hundreds of years of European history are marked and marred by increasingly devastating collisions between these two proud nations. When we review and appreciate that bloody "back-story," their present harmony, indeed on many important matters their unison, is an astonishing outcome, which this course attempts to explain, examining implications for the future of Europe, of the Western alliance, and of the world.

ASEM 2417 Cultural Dynamics-African American Music (4 Credits)
This course examines the cultural and psychological functions of various genres of African American music both historically and in contemporary society. The course is built around the thesis that various forms of African American music--e.g., the spirituals, the blues, gospel, jazz, rap - have served common functions in the culture historically (even while serving distinctive needs at different points in history), and have all served as core features of both African American culture and, more broadly, American aesthetic sensibility.

ASEM 2418 Innovation Nation (4 Credits)
An in-depth discussion of the American future, which will be defined for the Millennial generation as one in which a confluence of trends will combine to alter the structure of opportunity. Focus on technological change and who it affects economic and national security, privacy and personal liberty, and employment opportunities. Completion of all other Common Curriculum requirements is required before registering for this class.

ASEM 2419 Girl Power: Gender in the Media (4 Credits)
This course employs an interdisciplinary feminist lens to explore the historical construction and meaning of gender and "girlhood" in contemporary American media culture. It explores how the various discourses of girlhood are constructed through media images and stories about female youth in mainstream culture. Students learn and practice different forms of critical writing. Completion of all other Common Curriculum requirements is required before registering for this class.

ASEM 2420 The Cultured Ape (4 Credits)
Examines the field of human evolutionary psychology. Evolutionary Psychology examines how human behavior is influenced by our heritage as evolved primates. It challenges the understanding of humans as "blank slates" primarily shaped by their social and cultural environments. The course considers the implications of this perspective for social policy.
ASEM 2421 War and Peace in Japanese Film (4 Credits)
War and Peace in Japanese Film looks at Japanese films of the 20th century as documents of the transformation of Japan from an imperialistic and aggressive state to something quite different. It considers contrasting interpretations of Japanese film, ranging from orientalist stereotyping to postmodern critiques of standard categories. The course examines the work of established directors like Kurosawa and Ozu, but also newer filmmakers and challenges too-narrow cultural preconceptions.

ASEM 2422 Textual Bodies: Discourse and the Corporeal in American Culture (4 Credits)
This course explores how bodies acquire meanings, and how those meanings are created, represented, disseminated, or contested through discursive and embodied means. Course practices include close readings of literary, philosophical and visual texts; creative and auto-ethnographic writing exercises; and in-class dance-based movement drills. Prerequisite: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2423 The American Road Trip (4 Credits)
As Frederick Jackson Turner told us back in the 19th Century, American cultural identity has hinged on the idea of an ever-receding frontier and the possibility of reaching it. We will chart how the road figures as both a promise and a burden, and how it reflects changing social and cultural issues in American life. We will consider documents of fiction, philosophy and history as well as film and aspects of popular culture as we consider the America fascination with the road and the careers of its many and diverse travelers. Enrollment restricted to students in the Honors Program.

ASEM 2424 Poetic Minds (4 Credits)
How do we know who we are? How do we know what is real? How do we decide what is right? In this ASEM, course participants will trace these key questions from Enlightenment philosophy to British Romantic literature and, finally, to their echoes and afterlives in contemporary literature.

ASEM 2425 Humans vs. Machines: When will the Robots Leave Us in the Dust? (4 Credits)
The rise of robotics, automation, big data, cloud computing and artificial intelligence have widely delivered both positive and negative impacts to our economy and society. On the one hand, robots, machines and complex algorithms have drastically improved production, national outputs and economic growth. On the other hand, they have also displaced jobs, weakened human interactions and substantially altered the nature of work and employer-employee relationship across developed and developing countries. This seminar assesses the rise of technology, the disruptions that it entails and the policies needed to confront those changes. The objective of this course is for students to be informed and engaged with opposing arguments and approaches that characterize the creation, promotion, use and problems created by the current and future waves of technological change. The "replicants" are rising; can the humans fight back?

ASEM 2426 Narrating Memory, History, Space in the City (4 Credits)
This course draws on a variety of anthropological questions, theoretical approaches, and methodological techniques to examine the city and city life. It begins with the origins and development of cities and the identification of urban areas as sites for investigation in social theory. It next turns attention to exploring how ethnographers link everyday life on the social periphery to larger historical, political, and economic processes. A major course theme is understanding how urban spaces shape identities and communities, and it uses Denver’s changing urban landscape to illustrate the theme. The course considers the basic human practice of listening to stories, as well as the meaning of narration in and about the city.

ASEM 2427 Mid-Century Mod, Redrawn (4 Credits)
Studying the art history of the mid-20th Century is not an exercise in nostalgia but a study of the way we think, communicate, and innovate. Artists like Grace Hartigan, Tadeusz Kantor, and El Anatsui illustrate creative labor in a rapidly changing, globalizing world. This course, designed for all majors as part of the advanced seminar common curriculum requirement, takes in part its inspiration from MoMA’s initiative Contemporary and Modern Art Perspectives, which aims to redraw understandings of modernism within the purview of global art history and larger cultural framework, including social, political, economic, and intellectual. The course reconsiders the 1950s and 1960s and the notion of “modernity” from multiple geographies and identities: Western and Central-Eastern Europe, Latin and North America, and Africa.

ASEM 2428 Religion, Nation, and Money (4 Credits)
Primarily through the lens of Religious Studies, this course, accessible to students from various majors, explores the intellectual history and continued existence of Manifest Destiny in the United States and fosters nuanced perspective concerning the construction of American Identity and U.S. Nationalism. Students examine the relationship between the following: religion and capitalism, religion and national identity, religion and ethnic particularity, religion and race, and religion and armed conflict. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2429 Media Infrastructures and Materiality (4 Credits)
While people often think of the internet as existing over the air and cell phones as untethered allowing fluid mobility, these digital technologies have a physical and material infrastructure. This course examines and interrogates the materiality of digital technology (cell towers, underwater sea cables, data centers, internet cafes, etc.) and explores "the digital" as a feature of the human within social and historical contexts. The course draws on multiple perspectives to examine the intersection of technology and society in everyday lives by using an ethnographic methodology. Participants working in research teams to carry out ethnographic research, media studies research, and interview-based research to produce media products (audio or video documentary, social media campaign, public art installation, website, or so on) to report about a media infrastructure to be shared publicly in Denver. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.
ASEM 2430 Romanticism in Germany (4 Credits)
The German Romantic movement of the late 18th and early 19th-centuries was one of the most exciting and perilous intellectual adventures in the history of western culture. Some of the most daring, creative and prophetic work was done at this time, and it dramatically affected nearly every facet of German culture, inspiring novel, sometimes unprecedented, developments in philosophy, aesthetics, poetry, literature, music and criticism. Nor were these developments limited to German culture, but extended to its politics and efforts to form a unified national front against the deracinating effects of industrialization and modernization. The course traces these developments through an exploration of some of the seminal figures, themes and ideas of the Romantic period, primarily in relation to their intersection with philosophy, politics and art and German history. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2434 American Film Censorship and the Hollywood Production Code (4 Credits)
This course focuses on the evolution of censorship in American cinema and its wider implications. Such focus involves careful examination of the moral, political, and social choices that impact “what” stories can be told and “how” they are told. The course emphasizes critical analyses of how social values and norms influence cinematic storytelling and aesthetics. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2435 Utopia and Dystopia: Brazilian Art & Culture in the Latin American Context (4 Credits)
This course is an interdisciplinary examination of utopia, and its counterpart dystopia, in Brazilian art and culture. "Utopia and Dystopia" traces the history of these concepts through theoretical readings and in-depth analyses of specific projects in Brazilian art, architecture, literature, music, and cinema. Upon successful completion of the course, students understand how these two concepts have shaped Brazilian identities both from within and as imposed by colonialist projects from without. Students develop advanced writing skills by comparing and contrasting different expressions of the utopia/dystopia dichotomy and by analyzing cultural artifacts from several different traditions in Brazil and, more widely, in Latin America.

ASEM 2436 Life and Death (4 Credits)
In this course, students examine several of the moral issues concerning the circumstances under which it is appropriate for humans to bring about life or death. For example, is it morally permissible to bring about, and subsequently destroy, human life in a petri dish? Is it permissible to bring about the death of people who have killed others? We examine and evaluate others’ responses to such issues. En route to answering these questions, we pay significant attention to the scientific and empirical factors relevant to which moral responses we should have and to the legal factors determining the actual policies we do have.

ASEM 2437 Rhetorics of Monstrosity (4 Credits)
In this course we will examine how the construct of monstrosity can help us understand societal, political, and cultural meanings around race, class, gender, sexuality, and ability. Monsters can tell us a great deal about the cultures that produce them, such as their social anxieties and ideological struggles. We will examine monstrosity rhetorically in order to gain tools to critically unpack nuanced and complex issues of power and difference.

ASEM 2438 Music and Language (4 Credits)
Music and language are two of the most complex and powerful communication systems shared by humans globally. Drawing on methods and theories from anthropology, ethnomusicology, cognitive psychology, and literary theory, students in this seminar explore the music-language interface from interdisciplinary and cross-cultural perspectives.

ASEM 2439 Music, Politics, and Policy (4 Credits)
Music is often considered a positive, peace-building force in the world. Like all other forms of human expression (e.g., speech, prose), however, music engages with diverse political agendas and ideals, from peaceful humanist ones to violent nationalist ones. This course examines the ways in which politics and policies engage with popular, jazz, folk, and classical musics around the world. Students will explore contemporary and historical cases in which governments and NGOs foster, transform, reject, and otherwise use musics to promote their own ideas about local economies, national cultures, diplomacy, democracy, innovation, cultural diversity, and even criminal law. The course asks how might music and the arts more broadly have a unique role in these contexts? How is artistic expression different from other forms of human expression here? Can music promote peace? Democracy? How? How do governments create local and national music scenes? Which local and national cultures do they promote and protect? To what end? It looks at how the Cuban government has embraced rap music as emblematic of the nation’s revolutionary ethos; how the United States government used jazz as a diplomatic tool during the Cold War; how NGOs in Israel and Palestine used popular and classical musics to promote peace and understanding; how American courts have used rap music as evidence in criminal cases; and how funding and intellectual property laws impact musical ownership, tradition, innovation, and creativity.

ASEM 2440 Traumatic Encounters through the Lenses of Philosophy and Literature (4 Credits)
The course explores the intersection of philosophy and literature in relationship to trauma, art, politics and the modern ecological crisis. The course is divided into three parts, each exploring a way that philosophy and literature address the challenges and dilemmas of our contemporary situation, from questions about human sovereignty, freedom and dignity to questions concerning technology, the natural world and global economic justice. In part one, “Sovereignty and Bare Life,” questions related to state power, love, intergenerational conflict and displacement are explored through considering Shakespeare’s King Lear and Giorgio Agamben’s Homo Sacer. Part two, “Remembering the Future: Trauma and Time’s Remainders,” considers how F. W. J. Schelling’s Ages of the World and Toni Morrison’s Beloved respond to personal and historical traumas, and how these works redefine time, memory and belonging. Part three, “The Ends of the World: Poetry and Philosophy in a Time of Crisis,” confronts the unfolding ecological crisis through an exploration of W. S. Merwin’s poetry and the late, poetically inspired philosophy of Martin Heidegger. The course is multiperspectival in terms of disciplinary and thematic content an in terms of methodology. Readings highlight how concepts, methods and interpretive strategies of philosophy, can augment analysis of literary works, while literature can not only enliven philosophical argument but approach the limits of what can be communicated philosophically.
ASEM 2441 Changing Meaning of Adulthood (4 Credits)
When does a person reach adulthood? Age 18? Age 40? Never? What is adulthood, and how do we measure it? Is it when one’s frontal lobe matures, when one starts a family of their own, or simply when one feels "mature"? This class surveys various, competing perspectives on what adulthood means and questions whether adulthood has changed. It approaches adulthood from several disciplinary perspectives, mainly neuroscience, psychology, sociology. Students also engage with the media’s angst about Millennials “failure to adult” by writing Op-eds that draw on academic research. Prerequisites: Completion of all of Common Curriculum Requirements.

ASEM 2442 Mental Health from a Public Health Perspective (4 Credits)
This course examines mental health as a public health issue. It addresses a wide range of topics relevant to public mental health care, from the micro-level focus of the psychiatric domain to the macro-level focus of the sociological domain. Particular attention is focused on the structure and function of the mental health care system, the measurement and burden of mental disorder, the social determinants of mental illness, and cross-cultural perspectives on mental health. Also emphasized are the roles that mental health and illness play in un/intentional injury, in the experience of and recovery from disaster, and in the American criminal justice system.

ASEM 2443 "All the world's a stage": Shakespeare Then and Now (4 Credits)
"All the world’s a stage": Shakespeare Then and Now is an ASEM team-taught by faculty from the Departments of English and Literary Arts and Theatre. It emphasizes close reading, writing and interpretation as well as acting techniques and dramatic performance of selected scenes. The four plays and two contemporary novels based on the plays are chosen to underscore the range and diversity Shakespeare displayed in his choice of plot, setting and character to demonstrate Shakespeare's continuing relevance to political, racial, religious and gender issues. Prerequisites: Completion of all other Common Curriculum Requirements.

ASEM 2444 Colonialism/Race/Decolonization (4 Credits)
This class examines how colonialism and race function as different but interlocking systems that cannot be understood separately. The course examines how the two continue to have an effect on the world and continue to be important to understand global inequalities. The writings of anti-colonial and anti-racist indigenous, black, feminist, and third world intellectuals, along with texts from European figures such as Hobbes, will be used to explore colonialization and racism. Prerequisites: Completion of all other Common Curriculum Requirements.

ASEM 2445 Freestyle: Technology, Culture, and Improvisation (4 Credits)
This course introduces the recent history of musical and cultural forms devoted to improvisation, including jazz, free music, psychedelic and progressive rock, and jam bands, culminating with a focus on the practice of freestyling within hip-hop. It explores the importance of civil rights and human rights discourses to these musical and cultural forms, as well as the critical role these forms have played in civil and human rights movements. The course emphasizes how diverse subcultures of artists, producers, concert organizers, and audience/listeners form around these types of musical expression. It examines improvisation as a response to emerging technological forms (new musical instruments, recording technologies, concert presentation, accessibility and distribution, particularly those enabled by networking technologies) by which musicians and listeners embody new personal as well as collective identities.

ASEM 2446 Ethics of Creating the Impossible in Modernity and Postmodernity (4 Credits)
In modernity and post-modernity, good intentions have not always led to good results, and even “good” results come with costs. Creating the Impossible turns to ethical studies to analyze the most amazing technological successes—and the social, ecological, and economic costs associated with scientifically and technologically engineering the impossible. Using a case study model covering topics including ecology, biomedical research, enslavement, gender reassignment, urban planning/policing, the technological singularity, internet privacy, contemporary eugenics, and cutting-edge military research and development, this course addresses a central question: “Sure, we can make that happen, but should we?”

ASEM 2447 Arab Feminisms in Everyday Life (4 Credits)
This course is designed to introduce students to Arab feminism. We use Arab feminism to analyze and reflect on everyday life experiences of Arabs around the world and how they relate to larger political and social structures. Feminism is represented as incompatible with Arab societies. The goal for this class is to engage with texts that privilege Arab feminist perspectives to analyze issues of social and political importance. Further, we focus on texts that resist historical and contemporary Orientalist discourses that directly link Islam to the Middle East and Arab identity. The main objective of this course is to offer an overview of the study of feminism through a non-white and underrepresented positionality taking into account religion, race, class, gender and citizenship. Completion of all other Common Curriculum requirements is required before registering for this class.

ASEM 2448 Letters to the History of Photography (4 Credits)
Through presentations, readings and writing assignments, this course advances the multidisciplinary impact of photography and how photography is directly or obliquely linked to all fields of experience and knowledge. The course objectives embrace interdisciplinary learning and promote the premise that absolutely everything is connected. Employing an epistolary approach (wring letters) students respond to weekly assignments by corresponding with a diversity of practitioners and scholars related to the cultural, historical, and scientific evolution of photography. Completion of all other Common Curriculum requirements is required before registering for this class.

ASEM 2449 American Material Culture: Honors (4 Credits)
The aim of the class is to engender a richer understanding of everyday life in the United States, both in the past and the present. Material culture around which the course centers is broadly defined and includes settlement structure, architecture, domestic artifacts, art, foodways, and trash disposal. These phenomena are investigated teleoscopically, as a way to view national structures and trends and, microscopically, to focus on individual actions and lives. Enrollment restricted to students in the Honors Program.
ASEM 2450 Settler Colonialism: Pasts/Presents/Futures (4 Credits)
Informed by work in critical indigenous studies, this course examines settler colonialism as a particular form of colonialism which is not a phenomena of the past but one that is central to the organization of contemporary society. Starting with the theft of indigenous lands, settlers unleashed processes that have had far-reaching impact across several domains. These range from altering the sexual organization of the family and the economic organization of society to the use of technologies and processes developed against indigenous people to oppress non-indigenous racial and other minorities. This class explores all these phenomena starting with the profound life-altering impact that settler-colonialism has for indigenous people and then branches out to explore the place of settlers, non-indigenous people of color, and other minorities in the settler-colonial matrix. Furthermore, the class explores settler colonialism as a transnational phenomenon by looking at other settler-colonial sites such as Palestine/Israel, Australia, and New Zealand, among others. The course ends by considering decolonization as a politics that is committed to indigenous liberation and as an ethic that is both incommensurable with other political projects but can also profoundly transform them. Writing intensive. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2452 Media and Terrorism (4 Credits)
A 2018 Pew national survey showed that Americans rank terrorism as the top priority the U.S. President and Congress should address despite terrorism accounting for 0.05% of deaths worldwide. The media play a role in that disconnect. We live in a world where no single entity can exercise a monopoly over communication channels. Hence, partisan media, ideologically-driven news outlets, social networking sites, and encrypted messaging apps serve as venues harboring polarizing, contested rhetoric that catalyzes fear. This seminar investigates the media-terrorism nexus. The readings, discussions, and writing projects empower students to grasp how the media cover terrorism, violent actors co-opt the media, and various players craft anti-extremism messaging.

ASEM 2453 London and Media: Then and Now (4 Credits)
This seminar explores London's "popular" and "high culture" media in the 19th and 20th centuries. Taking advantage of both the University of Denver's online databases and London library holding, students explore a number of the major 19th century London-based British newspapers and journals that proliferated after the abolition of the Stamp Tax in 1855. Students explore significant differences between popular and high culture in 19th century newspapers and journals that target different audiences. Simultaneously, students read articles from contemporary London newspapers. They have a constant commentary on contemporary issues to counterpoint the 19th century readings. From these parallel readings, students discover not only similarities and differences in key issues but also learn how rhetoric, style, diction and voice differ between 19th- and 20th-century journalism. Class discussions and writing assignments focus on comparisons between 19th- and 20th-century topics, intended readership, style and rhetoric.

ASEM 2454 Psychology of Religious and Spiritual Practices (4 Credits)
This writing-intensive course focuses on understanding religious and spiritual practices integrating multiple sources of information. Examples include meditation, prayer, group worship, psychedelics, and gratitude. Students find and analyze scholarly and non-scholarly information and integrate multiple disciplines and perspectives in understanding these practices. Students communicate and extend their understandings through discussion, writing, and presentation. The goal is for students to gain a deeper understanding of these practices, learn multiple approaches to studying human activities, and improve their writing skills. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2455 Music, Virtuosity, and Value (4 Credits)
This course explores the concept and phenomenon of musical virtuosity across multiple historical and historical contexts. We consider the meanings of musical skill and how debates about virtuosity's merits or dangers reflect aesthetic and ethical values. There are no prior knowledge prerequisites; necessary background information will be presented in the course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2456 Remembering Medieval Iberia, from 711 to 2020 (4 Credits)
Medieval Iberia was home to Muslims, Christians, and Jews who lived together and interacted in complex ways that were both conflictive and cooperative. This course explores the complexities and contradictions of medieval Iberia by paying particular attention to the divergent ways that the period itself has been understood and instrumentalized in post-medieval times. The course uses a range of disciplinary perspectives, informed by religious studies, literary and cultural studies, history, political science, anthropology, and linguistics, to address some key questions. How has the 'coexistence' of Islam, Christianity, and Judaism in Iberia been interpreted in modern times? How do the categories of politics, nationalism, race, language, or faith shape opposing readings of the past? What can medieval Iberia teach us today about the world we live in? Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2457 Bioethics in Today's World (4 Credits)
Bioethics is a field fueled by the need for information, analysis and consultation among policy makers, health-care professionals and institutions. Ethical issues related to scientific research and health care have recently gained much attention, generating significant demand for students and citizens to understand their moral, legal and risk/benefit aspects. This course operates on a cooperative learning basis, using a debate model to inform and involve students in controversies in bioethics. Course readings represent the arguments of leading philosophers and social commentators, treating such topics as death and dying; choices in reproduction; children and bioethics; and genetics. Additionally, the course examines some basic ethics tests: harm/beneficence, publicity, reversibility, code of ethics, and feasibility. Completion of all other Common Curriculum requirements is required before registering for this class.

ASEM 2458 Satire in the Arts & Media (4 Credits)
This class explores how satire, in its myriad manifestations, juggles immediacy and universality in the cultures and time periods in which it is born. The course's interdisciplinary nature makes it unique, and its celebration of satire as a discipline that traverses a multitude of forms gives the course an exciting, dynamic quality.
ASEM 2459 Anti-Social Media (4 Credits)
This course addresses the negative effects of our connective technologies. Examining the media landscape of 100 years ago through the lenses of literary analysis, media theory, and history, it presents the 20th-century origins of our concerns with the media “bubble,” with the threat that new media pose to democracy, and with loneliness. By grounding the question of media in history and in the disciplined analysis of literary form, this course seeks to generate more effective modes of thinking about the mediated life. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2460 Latina/o Religious Traditions (4 Credits)
This course is organized around the broad question: Is there enough commonality in the texts (including cultural texts) we have studied to organize and name a singular field of social relations we can rightly call “Lainta/o Religion?” This course engages and excites students by enabling them to study religious traditions in an academic place removed from direct faith commitments. Toward this end, we will view art, hear music, watch films and talk to religious leaders.

ASEM 2461 Fairy Tale Morality (4 Credits)
Stories and books for children carry implicit and explicit messages about stereotypes, beliefs and expectations in our culture, and make assumptions about the cognitive, social and emotional maturity of the child. This course explores a range of children’s books, examining the cultural messages they send and the assumptions they make about children’s development. Selected books will be those written for different ages and cultures, as well as from different historical periods, to highlight how children’s literature mirrors and propagates cultural norms. We examine selected works using literary, psychological, sociological and educational perspectives.

ASEM 2462 Psychedelia in the Age of Artificial Intelligence (4 Credits)
This course introduces the history and current status of psychedelic music. In pop, rock, electronic dance music and techno, hip-hop, and other forms, psychedelia is examined as a symptom of and response to emerging cultural, technological, and scientific ways of knowing and being in the world. Particular attention is given to the intersection of contemporary psychedelic research and recent developments in cognitive and computer science, including machine learning and artificial intelligence. Prerequisites: Completion of all other common curriculum requirements.

ASEM 2463 Identity and Politics: Multidisciplinary Approaches (4 Credits)
What is identity? Are some types of identity (e.g., religion or “race”) more likely to influence political outcomes than other types of identity (e.g., profession or class)? If so, why? This course introduces three different approaches to the study of identity and politics, including political science, evolutionary psychology (and biology), and comparative historical sociology. We analyze what is useful and problematic about each approach, and use these periods of reflection to hone critical reading, writing, and discussion skills. students walk away from the course with significantly greater insights into the processes by which individuals and societies construct identities, including our conscious social behavior, unconscious cognitive tendencies, and struggles over political institutions and social norms. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2465 Environmental Controversies (4 Credits)
This course concentrates on how various political actors and institutions have constructed the relationship between humans and the natural environment. Through important rhetorical texts and controversies in American history, this class critically engages diverse voices and styles of discourse, including those of elected officials, bureaucrats, lobbyists, grassroots activists and citizens more generally.

ASEM 2466 When Love Becomes Weapon: Charm in International Relations (4 Credits)
Scholars of international relations have long believed that it is better to be feared than to be loved. However, as America prevailed over the Soviet Union in the Cold War, a new theory emerged: America won simply because it was perceived to be more attractive than the Soviet Union. America won because of its values, not its guns. How might we assess this argument? What goes into the making of American power: missiles or Rock’n’Roll? To what extent has China, among other competitors, challenged American soft power? Where should one draw the line between soft power and propaganda? What is the future of soft power, as countries’ pursuits of their national interest often collide with transnational common issues like protecting the environment? This course explores these questions through multiple perspectives drawn not only from political science and history but also from sociology, philosophy, cultural studies/popular culture, and so on. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2467 Queer Memoirs (4 Credits)
The memoir, or the fictionalized autobiography, holds an important place in LGBTQ culture. In some ways it is the most complex and lasting form of coming out, a permanent announcement of the author’s queer identity to a potentially vast audience in a way that allows for intricate explorations of the body, gender, sex, and the self. The course traces the importance and predominance of this queer art form over the past half century, starting with very recent work, such as Akwaeke Emezi’s Freshwater and Ocean Young’s On Earth We’re Briefly Gorgeous, and work its way back to earlier work dealing with moments in which homosexuality was still criminalized in Great Britain and the United States, such as James Baldwin’s Giovanni’s Room and Quentin Crisp’s Naked Civil Servant. Objects of study will include literary works as well as other art forms, such as the Magnetic Field’s 50 Song Memoir, Alison Bechdel’s Fun Home, and Mike Nichols’s adaptation of Tony Kushner’s Angels in America. Such a topic and a trajectory will necessitate an interdisciplinary approach. In examining literary texts, music, film, and other forms of visual arts, the course will approach them with methods drawn from art history, history, legal studies, literature, media studies, music, philosophy, and sociology. Students produce different sorts of writing, including advanced scholarly and creative work. Completion of all Common Curriculum requirements is required prior to registering for this class.
ASEM 2468 In Search of Eudaimonia: The Art and Science of Student Wellbeing (4 Credits)
Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this Advanced Seminar explores current research on health and wellbeing and engages broader questions of how higher education contributes (or doesn't) to student wellness. The course draws on scholarship from disciplines including health, psychology, philosophy, sociology, and others to explore various wellness approaches. This writing-intensive course includes research-driven projects culminating in proposals to improve student wellbeing. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2469 Imagining the Amazon (4 Credits)
Representations of Amazonia often invoke images of either an earthly paradise or a green inferno. This course begins by challenging students to critically (re)frame their images of the Amazon by underscoring the unequal power dynamics that have come into play whenever outsiders have represented the landscapes and the peoples of Amazonia over the past 500 years. Using a variety of theoretical paradigms, students in this course study representations of Amazonia created both by indigenous writers and activists, as well as several widely disseminated (and critically heralded) novels, films, and journalistic essays created by 'outsider' authors and auteurs from Latin America, the U.S., and Europe.

ASEM 2470 Words, Music and Social Change (4 Credits)
Words, Music and Social Change examines how critical conflicts in several countries and historical time periods can be understood by studying music and musical performances in those places and time. The course focuses on song performances and videos in relation to societal changes. Among conflicts explored are the American civil rights movement, immigrant issues, the crisis of AIDS, the South African revolt against British diaspora, Russian youth embrace of the Beatles, and the role of singing in Estonian to independence from Russia. In addition to the music itself, primary and secondary source readings articulate the power of songs to elicit societal change. Prerequisites: completion of all other common curriculum requirements.

ASEM 2472 Islamic Art and Mysticism (4 Credits)
This course introduces Islamic art and architecture, focusing on appreciating and understanding formal qualities of works of art, their meaning, and their cultural significance in larger contexts. The course discusses the intimate connections between art, literature, and historical events, with readings that include texts in art history, Middle Eastern history, the rise of Islam, and translated literature. The course includes units in Painting and Literature, Early Islamic Literature and Material Culture, and Islamic Mysticism and the Arts. Like all ASEM courses, Islamic Art and Mysticism is writing intensive. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2473 Climate Science and Policy (4 Credits)
Climate Science and Policy (CSP) addresses the scientific principles and data that show the climate is changing and that humans are causing a significant portion of that change. CSP also addresses the nature of the current American discourse on climate change and climate policy. CSP finally provides students with the opportunity to suggest ways out of our present policy paralysis, with prescriptions that address the current scientific findings and principles, economic realities and American policy practices.

ASEM 2474 Media & Democratization: A Comparative Perspective (4 Credits)
This class treats the media as a crucial linkage institution between state and society. It examines the interactions between the media (as a socially constructed functional group) and their larger political, social and economic environments. It also explores the relations that govern these interactions.

ASEM 2475 U.S. Immigrant Narratives (4 Credits)
U.S. immigrant narratives tell a story about nation-building, citizenship, and globalization. This course explores the diverse ethno-racial experiences of migration in the 20th and 21st century through literature and film. Course readings provide a nuanced lens for considering the broader policies and discourses on nativism, immigration law, media representations, and border fortification. What do these stories tell us about the past, present, and future of migration/immigration? How are these narratives encoded with popular and political practices and discourses? How do these stories disrupt, challenge, or consolidate these discourses? Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2476 Capital Punishment (4 Credits)
This course draws on research from multiple academic disciplines to examine the following: (1) the history of capital punishment in America (temporal trends, public opinion, landmark Supreme Court cases and the impact on parties); (2) the case against capital punishment (race, class, gender, cost, juror qualification, juror error and innocence); and (3) the case for capital punishment (deterrence, incapacitation, quelling vigilantism and retribution). Most students have an opinion on capital punishment despite limited knowledge. Regardless of whether a student is in favor of capital punishment or opposed, the course is exciting and challenging because the student is forced to question and perhaps even reconsider her/his opinion in light of the evidence.

ASEM 2479 Environmental Culture in East Asia (4 Credits)
This course explores current environmental and ecological challenges in major East Asian countries such as Korea, Japan, China and Taiwan through the lens of ancient and contemporary cultural and philosophical traditions. The course examines 1) primary traditional Asian philosophic and religious concepts about Nature, such as Confucianism, Taoism, and Buddhism, as well as traditional literatures and arts that reflect those concepts; 2) contemporary eco-literature and eco-cinema that function as responses to, and critical reflections of, the urgent environmental crises in those countries; 3) cultural practices that are officially, communally, or privately implemented for eco-preservation and environmental-protection. Prerequisite: Completion of all other Common Curriculum Requirements.
ASEM 2481 Witchcraft & Renaissance Drama (4 Credits)
Witchcraft and Renaissance Drama traces how the rise of the witchcraft panic in England is reflected in and fueled by several venues of cultural production in England from 1558-1621. The course takes an historical journey through the laws against witchcraft, the witch trial transcripts, the emerging gender pamphlet wars and the popular drama as all manifestations of how the metaphor of witchcraft served to address several cultural fears of the transition between Early Tudor, Late Elizabethan and Early Jacobean to explore how the drama both responded to and shaped the development of the Witch craze.

ASEM 2482 Africa (4 Credits)
In this course, we study the literature, politics and culture of Africa from pre-colonial times to the present. We begin by examining Africa as the locus of the world’s oldest civilization and by discussing some key moments in African history. We then focus on the four regions of Africa, on country- or region-based examples of culture and politics in Africa—such as colonial rule in East Africa, war of independence in North Africa, military rule in West Africa, Apartheid in Southern Africa. We also discuss Africa and the world, or Africa in the context of modern-day globalization. In each case, we discuss historical accounts and literary representations as well as political and cultural contexts.

ASEM 2483 Beyond Play: Board Games as Social Texts (4 Credits)
Since the early 2000s, board and tabletop games have experienced a renaissance of sorts in sales and popularity. These games and the contexts in which they exist and are played provide interesting foci for cultural study and production. This ASEM focuses on possibilities and implications within the realm of physical games. It complicates traditional understandings of understand gaming or “play” in the sense of diversion, a framework in which games are viewed mostly as sold through major markets as tools for fun. This course values that form of cultural meaning but pushes class members to study and make games that serve different purposes. The course examines cultural and psychological studies of games and players, histories of gaming, statistical modeling, rhetoric and other topics and disciplinary lenses. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2484 Culture of Desire (4 Credits)
How does desire shape the identity of a culture or society, how is it expressed, and how is it limited? This course examines four different postulated societies to see how they shape their gendered desire. Using queer theory and its impact on interpreting the body and its limitations and freedom, the course examines questions raised by these future imaginings, testing them in applications to contemporary society and our understanding of ourselves. This course brings together literature, sociology, anthropology, linguistics in queer journey through reality and the imagination. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2485 Sustainable Living (4 Credits)
In light of today's global environmental exigencies, and in keeping with the university's new sustainability priorities, this course challenges students to work out the sustainable provisioning of shelter, power, water and food at the residential level. In this course, students examine the ways in which our current practices are unsustainable, explore more sustainable alternatives (some very old, some very new), and explore the politics and policies that hinder or help the movement toward these more sustainable alternatives. Material is presented in the form of readings, some field trips and campus walks, and some hands-on learning in workshops.

ASEM 2486 Chaucer's London (4 Credits)
This course is a study of the medieval London - the people, customs and social order—by looking through the lens of the great satirist of the fourteenth century, Geoffrey Chaucer. We read a few of the Canterbury Tales and some medieval documents that give a fuller picture of medieval London. Our focus is on seeing the medieval origins of the modern city, and comparing the medieval cosmopolitan city with the cosmopolitan city of the early twenty-first century. In addition to reading original documents and secondary research on medieval London, we take virtual trips to Canterbury, the medieval university towns of Oxford and Cambridge, the medieval cites of York and Norwich, the Museum of London, and learn about the historical significance of the Tower, Westminster Abbey, Guildhall, Inns of Court, and St. Bartholomew-the-Great.

ASEM 2487 Environmental Issues in Italy (4 Credits)
This course explores the geography of Italy from the cities to the coasts with a specific focus on environmental issues. From the more highly urbanized and industrial north to the more rural and agrarian south, Italy’s regions display fascinating contrasts in physical geography, population, culture, politics, and economic/social development. Within each of the regional contexts, a focus on the cities reveals insights into the nature of the Italian urban landscape, while discussion of environmental issues in both urban and rural settings highlights the importance of sustainable development in Italy.

ASEM 2488 Exploring Contemporary Art “in situ” (4 Credits)
Exploring Contemporary Art “in situ” is an exploration of contemporary artworks situated in galleries, museums, and public sites in greater Denver. Students will closely observe artworks by various living artists and read them as primary texts to which they will respond with their own writings in contemporary social media. The course will meet on location at least once each week to be in the presence of the source art works.

ASEM 2490 Politics of Rights (4 Credits)
This course explores the relationship between politics and rights from a comparative perspective.

ASEM 2491 Art and the Environment (4 Credits)
This course takes an historic approach to a discussion of art and the environment. While certainly we could go back to the integration of art and its environs in the Prehistoric period, this class focuses on the contemporary art world.
ASEM 2492 Animals and Human Societies (4 Credits)
This course considers human-animal relationships from a variety of disciplinary perspectives. Focusing on Western Europe and America, we explore the many ways in which people interact with non-human species—killing them for pleasure, eating them, observing them and caring for them—and the effects of these interactions on both animals and people. Thinking about animals sheds light on crucial issues in today’s society, with implications for everything from environmental change to the impact of consumer culture to the ethics of euthanasia.

ASEM 2493 Caring in a Capitalist Economy (4 Credits)
How does a good society address the needs of members of that society who cannot fully take care of themselves? Does caring have a place in our capitalist economy? Do we organize the provision of care in a just way? How do we balance our caregiving responsibilities in our daily lives? Through course lecture, discussion and community caregiving, we explore these challenging questions using insight from economists, philosophers, sociologists and others to help us better understand how we provide care within our capitalist economy.

ASEM 2494 Global Ecology of America (4 Credits)
Ecology is the science of interconnections, and “The Global Ecology of America” encourages students to think anew about the ways the United States interconnected with the rest of the world. As the word “ecology” suggests, our primary focus is on environmental interconnection. This class is concerned with both communities and environments. It seeks to make students more aware of the essential links between the two, and it also seeks to shed light on the often unseen or ignored ways our lives, as Americans, shape—and are in turn shaped by—the lives of other people in other places all around the planet.

ASEM 2499 Mountains: Ecology, Imagination, Aesthetics, and Challenges (4 Credits)
Why are people drawn to mountains? What geological and biological features account for our interest, and how might the psychology and philosophy of aesthetics explain why mountains have multiple uses and effects, recreational to religious? How have writers, artists, filmmakers, climbers, skiers, and hikers historically represented mountain experiences? And what are the economic and ecological consequences of all this attention? Can we “nuin” mountains? This writing-intensive course addresses these complex questions through multiple perspectives drawn from the several disciplines noted above. Equally complementing scholarly readings are several popular personal and creative works: films, stories, adventure memoirs, diaries, and so on. Course may include, when circumstances permit, field experiences in the Colorado Rockies and archival work at the American Alpine Club Library in Golden. This ASEM course is open and accessible to advanced undergraduates from all majors, regardless of experience and academic background. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2501 The Addictive Self (4 Credits)
This course examines the interconnections between addiction and the formation of the sense of self or “self-identity.” Students construct a working theory of addiction in relationship to selfhood, considering narratives of addiction, and explore the stories not only of alcoholism and drug addiction, but also of food and “process” addictions. The course explores the texts and issues involved from a variety of disciplinary perspectives, including especially those of psychology, sociology, psychoanalysis, literary criticism cultural theory and philosophy.

ASEM 2502 Fictitious Ecologies: Envisioning Provisioning Through Science Fiction (4 Credits)
This course uses science fiction to examine some of humankind’s social and ecological ills through multiple perspectives and disciplines. These include environmental science, ecology, ecocriticism, and science fiction, especially its history, genres, and topics, for example, climate fiction (cli-fi), Afrofuturism, cyberpunk, indigenous epistemologies, eco-utopias, and post-apocalypses. The course also includes different paradigms of economic analysis, including ecological, feminist, and institutional. A goal of the course is to envision future provisioning possibilities that are in line with Earth System stabilization and reducing social disharmony. As an ASEM, the course is writing intensive. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2503 AIDS: Then and Now (4 Credits)
HIV/AIDS is for the most part forgotten in the developed world; it has morphed into a manageable chronic disease. But it has not disappeared, and it has had an enormous impact on our lives and identities. This course will examine the ongoing cultural legacy of HIV/AIDS, concentrating on activist movements in the United States, followed by an examination of HIV/AIDS in sub-Saharan Africa today. This course brings together biology, literature, sociology, and linguistics in a queer journey through the impact of HIV/AIDS. As an Advanced Seminar, this course is writing-intensive, and you will be working on your written expression during the quarter. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2504 Land and Law in Africa: The Politics of Land Acquisition and Distribution (4 Credits)
In settler colonies in Southern and East Africa, millions of African people were displaced from the land on which they had lived for centuries to make way for European settlement and agriculture. In the postcolonial era, these countries have attempted to redress these legacies by legally redistributing land from the descendants of white farmers to Black farmers and shareholders, with controversial results. Focusing on Kenya, Zimbabwe, and South Africa, this class considers the histories of precocious systems of land tenure and the colonial legal mechanisms enforced in the often-forced acquisition of land, and how contested meanings over land to different communities are articulated in the postcolonial world in considering who the land belongs to today. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2505 Early Social Experiences and Health Throughout the Lifespan (4 Credits)
This writing-intensive course focuses on how social experiences during infancy, childhood, and adolescence influence mental and physical health throughout the lifespan. It covers social experiences broadly, including close relationships, neighborhood-level factors, policy, built environments, and social stress, among others. It discusses the positive and negative experiences that can shape development directly and indirectly, and students innovate ways to enhance the public good through applying research. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.
ASEM 2507 Earth Sound - Earth Listening (4 Credits)
This course is an environmental humanities seminar that takes an art/science approach to the study of ecoacoustics: the relationship between human beings and their environment through sound. The seminar approaches ecoacoustics through sound studies and ecological sciences. It emphasizes transdisciplinary problem-solving and developing proficiencies in critical dialogue. The course introduces ecoacoustic literacy as an exemplary art/science toolkit for understanding noise pollution and acoustic ecology extinction as emerging environmental crises, and it develops the case for preserving personal, societal and biospheric spaces. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2508 The Cinematic Essay (4 Credits)
As an Advanced Seminar, The Cinematic Essay is a creative and critical praxis course which focuses on formal and thematic analysis of documentary films from a wide range of international directors for the purpose of developing new methods of visual written work. Directors include filmmakers like Dziga Vertov, Anges Varda, Farrough Farakzad, Chris Marker, Abas Kiarostami, John Akomfrah, Ari Folman, and Chantal Akerman. Students watch films, read theory related to both cinematic technique and lyric essay, write both critical and creative short assignments, with the goal toward transferring cinematic documentary techniques and cinematic theoretical approach into creative, nonfiction essays, developed in a workshop environment. The course also promotes cultural knowledge, investigates hidden biases, and explores culture privilege. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2509 Communication and Production of Cultures (4 Credits)
Profound changes in the last two decades on the global, national and local scales have brought about a collapse in people’s traditional sources of self-definition, notably those ethnic, racial, geographic, sexual and national bases of group belonging and identity. Given such undermining of the old certainties, answers to the question “Who am I?” have become more tenuous, if not totally “up for grabs.” Fragmentation of identities, ethnic conflict, social alienation and a loss of a sense of grounding are only some of the noted hallmarks of the present time. This course is designed to address the implications of this shift in signification—from identity to difference—for the dynamics of identity formation and the search for alternative bases for consensus-formation in the new millennium.

ASEM 2510 India: Caste/race/religion (4 Credits)
India: Caste/race/religion explores the idea that caste is the foundational structure of Indian society and that all the modern problems that plague India—casteism and untouchability, the genocidal treatment of Dalits and Muslims, the degradation of women and queer people, communalism, and the systematic disenfranchisement of a majority of Indian society, to name a few—have their foundations in caste. We will also pay special attention to how progressive movements founded on anticaste values have challenged social exclusion by drawing upon indigenous and other liberatory philosophical traditions.

ASEM 2511 Race, Class and Gender (4 Credits)
Issues of race, class and gender are of salient importance as the population demographics of the United States have shifted dramatically over the last decade. The experience of working and living in isolation from people different from oneself will be increasingly rare in the years ahead. In this course, using a multidisciplinary anthology of essays as the primary text, the focus is on the psychological experience of intercultural discourse that stems from the intersection of race, class and gender in the United States at the beginning of the 21st century.

ASEM 2512 Humor Theory and Application (4 Credits)
Students in this course study psychology of humor and practice skills in comedic performance. Students learn the psychological theories of humor and apply these theories to the work of a variety of comedians and humorists and to satires or parodies, such as mockumentaries. Additionally, students analyze humor from a cross cultural perspective and learn about humor and laughter research in experimental psychology. As the ability to understand and use humor appropriately is a key component of interpersonal and occupational success, this course additionally helps students recognize and develop their own humor styles.

ASEM 2513 Constructing Freedom and Bondage (4 Credits)
Historically, claims about what it means to be free – or even human – have been made through discourses about enslavement and imprisonment; some have used bondage as a trope to explore philosophical or artistic projects, while others have used it to interrogate the assumptions of various political and economic paradigms. Others, still, have used these tropes as a means of advocating for social change, notably through slavery and prison abolition movements. This course examines how writers such as Hegel, Frederick Douglass, Angela Davis, and Dylan Rodríguez define the relationship between freedom and bondage, and it examines the stakes of those definitions for an American ethos deeply invested in the concept of freedom.

The course uses frameworks of critical discourse analysis to consider peer-reviewed scholarship, political speeches, reality TV, music videos, and documentary films. The course also explores conceptions of civic identity in the United States. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2516 Do the Wicked Prosper? (4 Credits)
This course revolves around a question, which is famously quoted from the Bible, "Why do the wicked prosper?" The quotation presupposes that the wicked do prosper, but many strands of human thought challenge the supposition. This course examines the students' reactions to this question and leads them to approach the question and their reactions to it from a variety of academic perspectives.
ASEM 2517 Prostitutes of the Pen: 18th Century Women Novelists (4 Credits)
In Seductive Forms (1986), leading feminist scholar Ros Ballaster famously coined the phrase “prostitutes of the pen” to describe the common perception regarding the first English professional female authors of the late seventeenth and early eighteenth centuries. It encapsulates the cultural conditions with which women had to contend and their ex-tremely limited options for earning a living. We will trace the social, economic, and historical issues with which English society, particularly the women of the eighteenth century, faced. The eighteenth century witnessed the rise of capitalism, trade, the merchant class, and with these various developments also saw “the separation of spheres”—the domestic from the public. This separation of the domestic from the public constructed a division between men and women, whereby men ruled the public world: economy, politics, and education, and women were relegated to the home and excluded from the public sphere. One of the major effects of this division was the lack of professional opportunities for women. Other than acting as domestic servants, there was little chance for financial independence. Therefore, these “prostitutes of the pen” were true pioneers, women who created a profession for themselves and a way to survive. Beginning with these early British novelists, this course intends to investigate the history and work of English women writers in the eighteenth century, extending to the end of the century. Additionally, this course seeks to explore women’s history in the eighteenth century—their educational and professional opportunities and the ways in which patriarchy, property, and English law affected women and informed their fictional works. Moreover, this course will assess how novels afforded these women authors a voice of protest as well as at times becoming a voice of consent within popular culture.

ASEM 2518 Exploring Italy (4 Credits)
This class combines a seminar meeting throughout fall quarter with two weeks travel to Italy following exams. Students focus on the art and literature of Rome, Florence and Venice in preparation for their travels. Students concurrently enroll in Excavating Italy (ARTH 2613 or ENGL 2613) as a co-requisite.

ASEM 2519 Music of Southeast Asia (4 Credits)
This course examines traditional, popular, and diasporic musical genres in Southeast Asia, using that lens to explore more broadly how music and culture interact on a critical global scale, drawing on histories of colonialism and power. From Javanese court gamelan, to Thai Luk Thung, and from karaoke among immigrant Vietnamese communities in the United States, to Malaysian shadow puppet theater, the course explores the varied and diverse region that is Southeast Asia. It examines both classical and popular musical traditions, approaching music not from a music theory perspective, but rather from an ethnomusicological standpoint – drawing on cultural studies, history, sound studies, critical theory, anthropology, sociology, and religious studies. Content includes music and performances, academic articles, first-hand accounts, and documentary films, focused on topics in music, dance, genocide, and social and political movements. Students will develop writing, listening, thinking, and oral skills. No formal music training or previous musical experience is required for this course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2520 Contemporary Theory and Art (4 Credits)
This course examines continually changing theoretical perspectives that have influenced culture, using artworks and artists to understand those theories and their influences on creation and interpretation. A larger concern is how these perspectives affect contemporary world views and how we have arrived in the current cultural climate; to those ends, the course offers a broad overview from Enlightenment thought through Postmodernism. While these theories circulate among various discourses in philosophy, physics, sociology, psychology and politics, the main focus and example is how art and culture have moved through this epoch. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2521 Representations of Youth: The Case of Italian Fiction (4 Credits)
This course explores broad questions about the representation of youth and adolescence, using the lens of fictional representations of youth in Italian literature and cinema of the 20th and 21st century, especially contemporary Italy. In addition to studying novels and films, the course will feature historical and sociological sources (including from youth studies), and will provide tools for a methodological approach to storytelling. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2522 Social Change and Interview-Based Theatre (4 Credits)
This course is an exploration of the theory, techniques and processes used to create interview-based theatre. This course will explore both the theoretical and practical side of this specific theatre form. Students will read, analyze and reflect on past examples of interview-based theatre in order to gain a stronger sense of the ethics, limitations, possibilities and aesthetics that impact this particular theatre practice. In addition to the theoretical, students will have the opportunity to craft an interview-based play as groups in class, based on an exploration of the theme of their choosing. In a small group, students will craft interview questions, facilitate interviews, transcribe interviews, craft a script and have a staged reading of the final text. Additionally, students will write short reflections and a final paper. The objective of this course is to provide students, regardless of previous experience, with a deeper understanding of how to tell stories using interview as data - through a practical and analytical lens. This course will give students a general and specific understanding of the creative process used to produce an interview-based play as well as give them an opportunity to critique and analyze the form.

ASEM 2524 Paranormal Phenomena (4 Credits)
Whether paranormal phenomena exist is an open and controversial question. “Believers” are convinced the evidence in support of paranormal phenomena is compelling, if not indisputable. “Skeptics” believe that extraordinary claims demand extraordinary evidence, and that the evidence for paranormal phenomena is nowhere near extraordinary, if it exists at all. This course examines the evidence for and against the reality of paranormal phenomena.
ASEM 2525 Expressive Culture in Everyday Life (4 Credits)
This class examines expressive culture as a site for analyzing the role of concepts like aesthetics, creativity and style in our daily lives. The seminar will explore the importance and meanings of expressive cultural forms, such as music, dance, theater, festival, narrative, in a variety of cultural contexts and which contribute to group solidarity and cohesion.

ASEM 2526 Communication in Close Relationships (4 Credits)
Communication in Close Relationships emphasizes the relationship between the self and others at a personal level. We examine research from a variety of disciplines, including communication, psychology, sociology, family studies and history, to increase our understanding of relationships from diverse perspectives. The three main perspectives we investigate show how relationships affect and are affected by their context, the individuals involved and the relational system. The goals of this course are for students to increase their understanding of relationships from diverse perspectives; evaluate critically the information about relationships that we encounter in our everyday lives; ask and investigate questions about real-life relationships; and communicate insights into communication and relationships in a variety of formats.

ASEM 2527 Life's Aim (4 Credits)
How do our everyday activities and our short-term goals, like graduating from college and finding a job, fit together with some of our less concrete and more long-term concerns like finding happiness and meaning in our lives? Is there some way to understand our daily activities as coherent with and supportive of these overarching goals? Using philosophical, literary, psychological and economic texts, this course consists of an examination of the conceptual dichotomy of means vs. ends and the role that it plays in our analysis of human activity.

ASEM 2529 Analyzing the American Dream - Expressionist Film in 1950's Hollywood (4 Credits)
This course focuses on the output of a few Hollywood directors (primarily Ida Lupino, Nicholas Ray and Douglas Sirk) who seem to reflect the dominant ideologies of post-war Hollywood. On the surface, their films celebrate middle-class success, a simple American can-do attitude and, most important for this class, characters who seem to reestablish pre-war expectations of femininity and masculinity. Rules of femininity, masculinity and sexuality are a constant focus for these directors, and each has his or her own approach to exploring the repercussions of strict gender assignment.

ASEM 2530 Deportation Nation (4 Credits)
The U.S. is engaged in the greatest mass deportation in its history. This course examines the evolution of deportation laws, their functions, and their effects. Controversies related to undocumented migration will be explored from multiple perspectives and through experiential learning activities. Students will develop evidence-based ideas for effective and humane reform.

ASEM 2531 Culture of Desire (4 Credits)
Sex--we talk about it all the time. Talk shows, online, in magazines, in plays and music, sex shows up everywhere. Why do we expend so much energy on something that, in most cultures, isn't really discussed much in public? And what is sex, exactly? How do we define it? How do we legitimize sex, and why have we decided to categorize people as heterosexual, homosexual, bisexual..? What structures have we developed to make us conform to those categories, and what discrepancies have we chosen to ignore? Why is it problematic to base arguments about relationships on historical evidence? In this course, students find out answers to these questions, answers that will lead to even more questions and problems.

ASEM 2532 Death & Dying in Hindu Traditions (4 Credits)
This course explores the meanings of death and dying in Hindu perspectives. The inevitability of death has led cultures throughout the world to speculate on what happens to the individual during, at the moment of, and after death. Until the modern period, religions have typically been the first or only place where people turned for answers to basic questions of existence: What happens at death? Will I and the people I love disappear forever? Or will we continue on after death in some way? Is this the only life we have? What is the relationship between the life we lead now and what happens at and after death? These kinds of universal questions have led to culturally specific and conditioned answers and speculations, some of which we will examine in this course.

ASEM 2534 Trade Wars and Agreements (4 Credits)
Trade between nations and its governance are as old as the history of interaction among human beings. But they have gone through major changes throughout the history since changing economic and geopolitical conditions have long challenged the international system of trade governance. This course investigates the evolution of international trade agreements as well as wars. It is about an inquiry of trade wars and agreements in the context of case studies (such as the 2018 US-China trade war) from a political economy perspective. Have the parties involved in trade been (un)fair to each other (e.g., China vs. the U.S.)? Are they (e.g., the U.S. and China) so interdependent that they must resolve trade conflicts? These questions remain valid even when countries reach a trade agreement. The course addresses those questions from the perspectives of various fields such as economics, political science, history, and cultural studies, and it illustrates the effects of trade wars on ordinary citizens. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2535 The Multiracial Individual (4 Credits)
This course explores the historical racial tensions in the U.S. that have made it difficult to acknowledge the reality of multi-racial peoples in its midst, and traces the trends in culture and national consciousness that made it possible for a change to occur in the 2000 census. We survey the varying ways in which multiracial people have been regarded by the larger society in different social contexts, as well as the ways in which the sociological, psychological and political dynamics of multiracial identity have changed over time and have impacted the experience of multiracial people themselves.
ASEM 2537 Politics and Art (4 Credits)
From the political monuments of the Roman Empire to the installation of Kehinde Wiley's Rumor of War in Richmond, Virginia, near several confederate statues, art and artists have shaped the way many interpret and react to important historical and current events. This course evaluates a broad range of imagery, focusing on the artists’ choices for representation, the cultural climate of the time period in which the art was created, and the political influence of the resulting imagery. The course, drawing on art history/theory, political science, cinema studies, history, and other fields, explores issues of repatriation of artworks, political bans of imagery, photographic manipulation, and political portraiture. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2538 Critical Animal Studies (4 Credits)
Critical Animal Studies will analyze a range of approaches to human and nonhuman animal relationships from the disciplines of philosophy, zoology, literature, art history, and media studies. Students will critically analyze a variety of disciplinary approaches to animal subjects, and reflect on their personal values, lifestyles, and identities as human animals.

ASEM 2539 Health, Media and the Self (4 Credits)
What are cultural beliefs about health, about prevention and about risk? We focus on how culture, media, peers, medical professionals and family influence how we construct and define health and the many key concepts scholars have linked to the notion of being healthy, preventing ill health and pursuing good health. We also examine the impact and function of these definitions on our everyday lives by exploring what health perceptions have to do with one’s self concept, identity, self esteem, relationships, expectations, attitudes, beliefs and behaviors.

ASEM 2540 Culture, Media and Power (4 Credits)
Often, films, television programs (both entertainment and journalistic), print journalism and advertising are viewed as having the inherent power to shape the individual’s values and beliefs about the identity of one’s self as well as that of others. The cultural studies’ perspective of this course takes the position that the power to shape values about identity is not solely the providence of cultural texts, but stems from the complex intersection of media institutions, various social groups and the interpretive process. This class explores how various forms of textual, interpretive, social and economic power come to bear on the production of different kinds of cultural media texts and the range of possible meanings about identity available within them. By the end of the course, students should be able to critically analyze the links between various media texts and messages and the definition of their self-identity.

ASEM 2541 Engaged Learning Portfolios: A Pilot Course in Synthesizing Curricular and Co-Curricular Learning (4 Credits)
In this pilot offering of ASEM, students investigate their curricular and co-curricular experiences at DU through the lenses of engaged pedagogy, community engagement, and the public good. They consider the purposes and implications of a liberal arts education in relation to these complex and diverse experiences. Students discover and articulate connections between their various Common Curriculum courses and their experiences beyond the classroom, including study abroad and internships. The main course project requires students to analyze and synthesize artifacts of their learning to create a digital portfolio. This course is conducted primarily in a workshop format.

ASEM 2542 Knowledge and Ignorance in Contemporary Scientific Practice (4 Credits)
Over the last few decades, an increasing number of scientists, philosophers, historians, and sociologists have emphasized that the traditional depiction of science as a progressive accumulation of true - or approximately true - descriptions is an oversimplification. We have come to realize that the right kind of ignorance and failure can truly be a gateway to success, to deeper understanding. But how is this possible? What kind of failure can be turned into knowledge? How does science deal with ignorance? How does one use ignorance to its advantage? This course provides a long answer to these questions. Specifically, it recasts some classic philosophical issues by bringing attention to a widespread scientific practice that can be aptly called "black-boxing." The course examines and illustrates these issues with some prominent episodes in the history of science, from fields ranging from biology and psychology to economics. Beyond completing the Common Curriculum, there are no prerequisites for this course, which is introductory in character, presupposes no previous acquaintance with philosophy, the natural sciences, or the social sciences, and is entirely self-contained.

ASEM 2545 Medievalism in Music and Popular Culture (4 Credits)
This course explores the phenomenon of medievalism—that is, the perception and representation of medieval culture in post-medieval eras—and examines its impact on Western (that is, primarily European-derived and influenced) popular cultures, especially in music. The course examines ways that artists past and present have used images of the medieval past to connote authenticity, spirituality, liberty, virtue, class, gender, race, rebellion, democracy, alienation, horror, romanticism, and magic. Sites of medievalism discussed in the course include novels, films, operas and musical theatre, folk songs, visual art and architecture, politics (including disturbing elements such as fascist and white supremacist movements), hip-hop, new media, and digital cultures that draw on medievalism. As are all ASEM courses, this one is writing-intensive. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

ASEM 2546 Gender and Power in Africa (4 Credits)
This course explores how gender relations are enacted in Africa, including how those relations were (and are) impacted by colonial and post-colonial influences of western powers. The course examines multiple beliefs, attitudes, symbols, behavior and actions that define women and men in various African societies, in ways that are not binary or polar, but rather situational and dynamic. Illustrations of these issues are drawn from ethnographies, movies, novels and so on. The course employs mainly anthropological perspectives and research, but it also includes historical and literary materials. Completion of all other Common Curriculum is required before students can register for this course.
ASEM 2547 Writing About Music in the 21st Century (4 Credits)
Students analyze music from a variety of disciplinary perspectives, including historical, political, and sociological approaches, and then learn to write about music in genres ranging from album reviews, musician and/or scene profiles, cultural criticism, liner notes, music blogs, performance reviews, and personal essays. Students read nonfiction about music, attend concerts, and research musicians, their music, and musical communities. With an eye toward broader publication, students craft and share their findings with public audiences. Course texts such as How to Write About Music will be supplemented by historical and theoretical readings and by works from music writers like Lester Bangs, Amiri Baraka, Jeff Chang, Gerald Early, bell hooks, Amanda Petrusich, Ellen Willis, and so on.

ASEM 2548 Critical Consumer Culture (4 Credits)
Students will engage in critical analysis of consumer culture, with a focus on how media, social media, advertising, spectacles/mega-events, and consumption spaces are a part of meaning-making in everyday life. In addition to reading historical and contemporary research articles about many facets of advertising and consumption, students will conduct their own analysis and write about various practices that make up this culture. To the extent possible, students will approach the study of consumer culture in the United States as if they were anthropologist or ethnographers, attempting to 'make strange' a set of familiar spaces and practices around consumption.

ASEM 2550 Music, Gender, and Sexuality (4 Credits)
Can music express gender and sexual identities? When a small group of scholars tenaciously raised this question in the 1990s, it created a contentious moment in the study of music history. Students will trace this lively debate through seminal interpretations of classical and popular music while honing listening and interpretive skills. Prior study of music is not required.

ASEM 2555 India and Historical Film (4 Credits)
This is a course that utilizes films, fiction and writings of professional historians to explore themes in Indian society and culture such as the colonizer 'self' and the colonized 'other', the mechanisms of difference whether based on race, gender or religion, the processes of identity formation through national movements or community ties, real or imagined, and the quest for modernity through economic development and societal reform.

ASEM 2556 Social Media (4 Credits)
Social media enable individuals to create, collaborate, and share messages with networks of all sizes. They are also tools for surveillance that are radically changing how governments and corporations engage with publics, challenging long established notions of privacy, freedom, and civil liberties. This course introduces students to the historical, economic, legal, and cultural context of social media and explores the ways we shape and are shaped by these emergent and ever-changing tools.

ASEM 2557 Body & Sexuality in Religions (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modification? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective.

ASEM 2560 America Through Foreign Eyes (4 Credits)
The United States, and Americans, occupy a unique, privileged and powerful position in the contemporary world order. Indeed, according to many scholarly and public accounts, the U.S. has achieved unprecedented status as the preeminent world power. Yet, despite or, paradoxically, perhaps because of its status as what some have called a world "hyperpower," large numbers of Americans are mostly, if not totally unaware of what U.S. global preeminence means to them and to other people around the world. This course aims to inspire critical reflection on the student's part about the role of the United States - its political and economic systems and practices, its culture, and most fundamentally its social actors, meaning its people(s), in a globalizing world.

ASEM 2562 Modern and Postmodern Music (4 Credits)
Students explore multiple musical styles and genres, primarily from the 20th century to the present, as they develop new cognitive pathways for experiencing all music. The course devotes substantial time to developing a vocabulary of descriptive terms that apply universally to music even outside the modern and postmodern subject matter.

ASEM 2565 The Power of Place-Making (4 Credits)
Places are imbued with meaning, functioning as intersections of identity, memory, and power. Through an interdisciplinary critical perspective, students will explore place-making: how various forms of textual, interpretive, social, and economic power affect the production and experience of places, and the range of possibilities for social justice available through them.

ASEM 2566 Society Through Literature and Cinema (4 Credits)
This course will study the interconnection of human societies (or nation states) as evident in different kinds of narratives. Discussing literary and film narratives in particular, we will examine the beliefs and influences that shape relationships within the same society as well as the beliefs and influences that shape relationships between different peoples and societies. Our examination will include an exploration of how these beliefs and influences are generated and modified. Our study will be aided by the interpretive insights of artists and visionaries. Our examples will be taken from different regions of the world.
ASEM 2567 Violence, Law, & the State (4 Credits)
This class is built on interrogating arguably the fundamental issue facing every state: how to deal with violence. Through a mix of academic readings, films, documentaries, and reputable media, we will consider a range of issues regarding violence and the state in the modern world. The three organizing themes for the class are understanding the lived problems of violence, the nature and value of freedom in relation to violence and the state, and the question of how law relates to violence and the state.

ASEM 2568 Outsiders in Italian Fiction (4 Credits)
This class addresses the recurring representation of the character as an outsider in the Italian literary and cinematic tradition of the 20th and 21st centuries. Novels, theatrical plays, and films will be supplemented by a collection of secondary sources on psychology and sociology, providing the tools for a correct thematic and methodological approach to storytelling.

ASEM 2572 Philosophy, Psychology, Neuroscience, and Free Will (4 Credits)
This seminar introduces students to the topic of human freedom from the perspective of philosophy, neuroscience, and psychology. If everything that you do and have ever done is the inevitable byproduct of the political, social, economic, cultural, familial, psychological, and neurological forces at work within and around you, in what sense could you be free and morally accountable for your actions? In what sense could you be worthy of praise for your accomplishments and blame for your failures? The course will address the topic of free will using contemporary scholarship in philosophy, neuroscience, and developmental and social psychology, and we will ask questions such as: What, exactly, is free will? What can our understanding of causation tell us about free will? What is moral responsibility, and how is it related to free will? What brain processes underlie our decisions? Prerequisite: Completion of all other Common Curriculum requirements.

ASEM 2573 Violence, Law and the State (4 Credits)
This class will interrogate what is arguably the most fundamental issue facing every government: how to deal with violence. Through a mixture of academic readings, films, documentaries, and reputable media, the course will consider a range of issues regarding violence and the state in the modern world. Prerequisite: completion of all other Common Curriculum requirements.

ASEM 2576 Art, Thought, Spirituality (4 Credits)
This course examines the close and complex relationship between esthetic expression and private religiosity, or "spirituality." The course will examine how theories as well as personal accounts of artistic creativity, experience and appreciation can both broaden and deepen our understanding of the inner life that is otherwise communicated in religious terms and how artistic expression can also have a quasi-religious or "spiritual" character. The central objective will be to illumine the way in which the construction of the individual self and the formation of the personal identity are intimately tied to different quests that are artistic and spiritual at once.

ASEM 2577 Cultural Intersections (4 Credits)
In this course, we explore the dynamics of cultural reception or the translational dimension of modern culture, particularly the reception of narratives within particular cultures and beyond. Our main focus is the principles that integrate and divide people along the lines of race, class, ethnicity and culture. Our journey involves studies of cultural contacts, contexts and narratives from Africa and the Caribbean, Asia and the Middle East, Europe and the Americas.

ASEM 2578 Travel Writing Through the Ages: Exploring Italy and the Self (4 Credits)
A panorama of the evolution of the Travel Writing genre shows how different travelers have interacted with foreign environments for centuries and provides students the model to create their own travel journal. The course focuses on travel narratives to, from, and within Italy. The reading list includes Italian and American writers such as Christopher Columbus, Margaret Fuller, Mark Twain, Carlo Levi, Italo Calvino and Umberto Eco. Excursions to different parts of Italy, visits to historical sites and museums and screenings of relevant Italian films complement the class.

ASEM 2579 From Literature to Film (4 Credits)
In this course, we examine the adaptation of literary works into films. We closely study selected modern literary works and the film interpretations of each work. Focusing on the transition from one narrative form to another, the course enhances the critical skill of students as well as their creative ability with respect to cinematic translations. We, therefore, also have mini scriptwriting workshops as a way of imaginatively highlighting the sort of considerations that go into the making of the film script.

ASEM 2580 Celtic Identities and Nationalisms (4 Credits)
Every March 17th, millions of people around the world engage in invented rituals of drinking, parades, & music in celebration of St. Patrick's Day. Summer finds Scottish Highland Games enacted by kilt-wearing, bagpipe-playing, Celtic-culture aficionados across the English-speaking world. The European Union has funded Celtic-History Trails & sites across Western Europe to link itself to an earlier period of 'unification.' Millions of people claim Celtic heritage and ancestry in the U.S.A. and across the globe. But what does that really mean? Who is entitled to claim such identities? Who is not? How do people reconcile 'Celticness' with other elements of individual, national, and group identities across the globe? This course uses Celtic identity as a means of engaging students in a critical examination of the meaning and process of identity formation. Students identify, compare, and evaluate the methods used to define and claim legitimate and illegitimate definitions of "Celtic" identity espoused by past and current nationalists, musicians, archaeologists, political scientists, historians, governments, film-makers, shopkeepers in Wales, Scotland, Ireland, Brittany, Europe.

ASEM 2581 Forgiveness, Politics and Film (4 Credits)
This course covers a number of reconciliation frameworks that have been employed as transformative and peacemaking strategies in various interpersonal, social and political contexts. We discuss the value (and limitations) of core reconciliation concepts, see how they have been used productively, and consider their possible application to ongoing problems in the world today.
ASEM 2582 Latina/o Identity & Community (4 Credits)
This course analyzes the complexity of Latinos' unique social position, using an interdisciplinary approach to understand the construction, maintenance, and change of Latino identity and community formation over time in the United States. As students will learn, Latino identity in the U.S. has experienced a continual process of negotiation between dominant discourses—regarding gender, race, politics, economics and culture—and the socio-political and cultural histories of their own communities. Accordingly, we explore the variety of ways in which identity and culture are socially constructed and actively contested, with particular regard to the diversity among and within Latino groups.

ASEM 2583 Individuals, Individuality, and Society (4 Credits)
Individual" is a key term in discussions of human life and human interaction, but it tends to be inadequately defined. We often assume that we already understand all which a given individual is. In social science, especially, "individual" is typically assumed to correspond to individualism, and, particularly, to methodological individualism, the view that the individual parts making up a whole entirely and exhaustively define and determine that whole; from which it follows that each individual is to be understood as what it is in isolation, unrelated to any other individual. This course, by contrast, starts from the claim that the question "what is an individual?" is genuinely difficult, and that much too little attention has been given to it.

ASEM 2584 Thinking (4 Credits)
This course helps students both learn how to think well and to understand why they often don't think well. The course addresses a wide range of topics in which thinking is relevant including creativity, science, argumentation, rhetoric and intelligence. Students come to understand their personal strengths and weaknesses in thinking and students spend a substantial amount of time improving their areas of both strength and weakness.

ASEM 2586 Memoirs of Madness (4 Credits)
We examine mental illness from a literature perspective—through analysis of memoirs, and in concert with a scientific perspective—through psychological-based texts and lectures. This unique approach to study mental illness should be inherently interesting for students because of the subject matter and the chance to engage the material through personal narratives. The use of memoirs allows for a rich understanding of a variety of impairments with the added benefit of the firm anchor of clinical science.

ASEM 2590 Interpreting the Holocaust Through Film (4 Credits)
This course takes students on a journey from Nazi Germany to the present day through the lens of the camera. We examine how the Nazis used film to convey their messages, explore the varied experiences of those who lived during the time of the Holocaust as depicted in films, view movies that address various ethical dilemmas presented to Jews and Gentiles as a result of these trying times, and discuss the ways that the Holocaust has been represented and memorialized through films in more contemporary times.

ASEM 2591 Latina/os in Popular Culture (4 Credits)
This course examines trajectories of representations of Latina/o identities in popular culture (i.e. film, music, television), both produced by the dominant culture, as well as self-produced. Students first work to understand the complexity that comprises Latina/o communities by reading some foundational works on Latina/o identities (i.e. Gloria Anzaldúa’s Borderlands/La Frontera: The New Mestiza). Following this, through a historical perspective we trace the emergence of Latina/o images in popular culture and how those images are tied to contemporary events of the time.

ASEM 2592 Memory and Memorialization (4 Credits)
This course focuses on how social groups represent, experience and commemorate the remembered past. We explore issues of construction of memory, particularly addressing issues of how the representations of the past—and its materialization through monuments, ruins and landscapes—are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Memory and its material representation are addressed through interdisciplinary readings and case studies from different geographical areas, and as much as possible, we use the city of Denver and Colorado as our study site to apply our observations and readings.

ASEM 2594 Politics of Reconciliation (4 Credits)
This class addresses the national and international efforts to seek justice and achieve reconciliation. It examines how state and non-state actors reflect on an unfortunate or hostile past with a designated "other": how did their relations and interactions with this targeted "other" go wrong? What were the material, philosophical and emotional grounds to breed such hostilities? What were the consequences? Has the memory of the "past self" and "past others" shaped the way the two groups interact today? Why do some actors refuse to say "sorry," and why do some victims refuse to forgive? What are the similarities and differences among various reconciliation projects? In this class, we lead students to explore these challenging yet exciting questions.

ASEM 2595 Unwrapping the Rhetoric of Consumption (4 Credits)
Unwrapping the Rhetoric of Consumption: A Critical Investigation of the Relationship between Communication, Consumption, Shopping, and Identity is a writing intensive course that offers an introduction to the study of consumption as a communicative phenomenon. People often use consumption to demonstrate who they are, their worth/importance, their relational ties, their gender, etc. The course will examine the socially positive and negative implications of these practices of consumption. Completion of all Liberal Curriculum requirements is required prior to registering for this class.

ASEM 2596 Sport, Deviance, Social Control (4 Credits)
This course explores four broad themes: sociological theories of sport, sport identities, sport deviance and the confluence of sport, media and social control. It examines timely real-world examples and draws on a range of disciplines that have investigated sport in society, including cultural studies, sociology, psychology, anthropology, criminology and kinesiology. Completion of all other Liberal Curriculum is required before students can register for this course.

ASEM 2602 The Black Spiritual (4 Credits)
This course examines the role of traditional black, or "Negro," spirituals (the songs created and first sung by African Americans in slavery) in the evolution of American ideals of freedom, justice and grounded spirituality. A history of the spiritual as folk and concert music is paralleled by an examination of the very concept of "American" that evolved, both from the perspective of those excluded and those included in that concept.
ASEM 2603 Indigenous Approaches to Gender and Sexuality (4 Credits)
This course introduces various ways that indigenous communities in the U.S. and Canada have understood and attempted to navigate issues of gender and sexuality in a religious context. It introduces foundational understandings of gender and sexuality that inform both Western and Indigenous cultures, and it explores the fundamental differences between those understandings. The course also presents emergent theories that challenge assumptions common within the Euro-American tradition. Through research and writing, students add to the contextual breadth of the class.

ASEM 2604 Russia: Revolutions & Utopias (4 Credits)
This course examines Russian culture and society from the late 1800s to the 1930s, when Moscow and Saint Petersburg/Petrograd were synonymous with cutting-edge and avant-garde, staging revolutions—and dreaming of utopias—in politics, art, sex and science, to name but a few areas. The course compares the ideals of those times with Russia today as well as with developments in Western Europe and North America.

ASEM 2605 Society, Nature and Animals (4 Credits)
Society, Nature and Animals examines the enormously engaging and complex relationships between human communities/societies, on the one hand, and the natural world and nonhuman animals on the other. The course focuses principally, though not exclusively, on the United States, where these relationships have been imbued with special significance, and prominent political and intellectual figures have cast the country as "nature's nation." The course also considers how different social groups, particularly those structured around gender, race/ethnicity, cultural/national identity and social class, are connected to the natural world and nonhuman animals.

ASEM 2606 Japanese Film (4 Credits)
This course examines some of the most iconic films in the Japanese cinematic tradition in order to identify and critically engage in narratives of Japanese aesthetics and cultural identity, especially ones that take culture as the site for locating tradition and/or modernity. No previous knowledge of Japanese or film required.

ASEM 2609 Literature of Nature and Apocalypse (4 Credits)
Concern about the declining state of the environment has been a topic of longstanding interest, from Henry David Thoreau to John Muir, and writers like Edward Abbey, Ernest Callenbach, Louise Erdrich, T.C. Boyle, Octavia Butler, Cormac McCarthy and others. This writing intensive course examines questions relating to environmental activism and social structures predicated upon technological and materialist culture. It considers how American writers have reassessed the relation between religious beliefs and notions of utopia and apocalypse. It examines and analyzes timely and relevant historical, literary, and philosophical issues relating to the current state of the environment.

ASEM 2611 Being Human: Sex and Sexuality (4 Credits)
Relationships are the greatest thing in the world—until they end. Many people have experienced both the exhilaration and the misery of a romantic relationship. The same can be true for other types of social relationships. How do you make sense of the relationships around you? To navigate better our complex human landscape, understanding the basis of human sexuality and sexual expression is important. This course examines behavior and emotion by introducing the results of high-quality scientific studies of sexual behavior and its evolution and expression. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2615 Disease in World History (4 Credits)
This course examines the social and political impact of disease in global history, and also considers how understandings of disease have changed over time. Participants will explore topics from the relationship between religion and medicine at the time of the Black Death; to early twentieth-century tuberculosis and the social stigma of the disease; to the eradication of smallpox in the 1970s, and debates about the wisdom of pursuing disease eradication; to Ebola and its significance in the broader global health inequities of the modern period. Students will not only learn about the history of disease but will also learn to evaluate historians’ arguments about disease and its significance.

ASEM 2616 Globalization and its Discontents (4 Credits)
This course examines the expansion of the world economy in a comparative historical perspective and draws on the disciplines of economics, history and political science. The course begins by introducing the current popular/journalistic debates using social science and historical arguments and evidence. The purpose is to provide the students with tools for critical analysis and a conceptual map to understanding the debate.

ASEM 2620 Inventing America (4 Credits)
This class introduces students to exemplary public documents, primarily in the form of speeches, which address the promises set out in the preamble of the U.S. Declaration of Independence: the rights to life, liberty and the pursuit of happiness. The course traces how these promises have been articulated by a succession of public actors ranging from U.S. Presidents to members of radical political factions. The course always addresses three major political movements: (1) the movement for political inclusion of Blacks, beginning with early abolitionists and extending to the struggle for civil rights, including the black power movement; (2) the movement for the political inclusion of women, beginning with the suffragists and extending to include feminism, including the fights over sexual freedom; and (3) the struggle over economic rights, beginning with early U.S. socialist and anarchist movements and extending into the contest over the creation and pruning of the U.S. welfare system.

ASEM 2625 Rough Draft History: Film and Video Documentary (4 Credits)
This course presents a historical study of documentary film and video, from the films of the Lumière brothers in the 1890s to several contemporary examples. We will explore such issues as the nature of documentary and what distinguishes it from fiction, the development of various documentary modes or styles, propaganda and ideology in documentary film, documentary ethics, borderline forms that combine documentary and fiction, and documentary’s role in supporting established institutions and regimes and/or promoting social change.
ASEM 2626 Politics, Policy and Economics of Healthcare (4 Credits)
This course takes an intensive look at American history from 1945 to 1955 in order to investigate the relationship among international relations, domestic politics and American culture. While anticommunism was perhaps the preeminent influence over American politics and culture, this course also investigates other related cultural developments, such as the moral and cultural anxiety resulting from the revelations of the Holocaust and Stalinism, the anguish represented by the height of existentialism in American thought, the exploding popularity of abstract expressionism, the gradual growth of consumerism, and the effects of the baby boom.

ASEM 2629 Truth and Treason in the Cold War (4 Credits)
This course takes an intensive look at American history from 1945 to 1955 in order to investigate the relationship among international relations, domestic politics, and American culture. While anticommunism was perhaps the preeminent influence over American politics and culture, this course also investigates other related cultural developments, such as the moral and cultural anxiety resulting from the revelations of the Holocaust and Stalinism, the anguish represented by the height of existentialism in American thought, the exploding popularity of abstract expressionism, the gradual growth of consumerism, and the effects of the baby boom.

ASEM 2633 Literature of Trauma (4 Credits)
This course examines the relation between memory, trauma and history in postwar American literature and culture, as those have become major themes in novels and films. The works examined in this course provide us a window into experiences of victims of trauma, while extending the possibility of forming a more sensitive and inclusive conception of American history and culture. Readings include literary works and a selection of secondary critical and historical texts. Completion of all other Common Curriculum requirements is required prior to registering for this course.

ASEM 2640 New England: Myth and Memory (4 Credits)
The subject of this course is historical memory or, to put it simply, the relationship of the present to the past. Historians take for granted what has been called "the invention of tradition," but most people do not appreciate the constructed nature of the past and do not recognize the possibility that there have been (and continue to be) contests over which version of key historical events or movements is to be disseminated to the public. This course focuses on region--New England--and its racial history as a case study of the process of fabricating historical memory. New England's history is particularly useful for this purpose because the region has had an inordinate impact on our national history.

ASEM 2641 Globalization from Above and Below (4 Credits)
This course provides a unique and challenging opportunity for students to clarify the concept of globalization by exploring parallel and interesting forces "from above and below." This course draws widely from international studies, economics, political science, sociology, environmental studies, and feminist theory to examine processes of global social change and conflict. Through academic theorizing and activist writings, the course familiarizes students with some of the landmark debates on globalization. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2642 Between Persecution and Revolution (4 Credits)
This course will investigate how women in America, France and Iran have written their way into and beyond male power structures. Ranging from the 17th to the 21st centuries, we will study literary, religious, political, psychological, and biological writings that probe the vexed power of female voices in the public sphere. Completion of all Common Curriculum requirements is required prior to registering for this course.

ASEM 2643 Comparative Democratization: East and West (4 Credits)
The purpose of this course is to examine the contested meanings of revolution and to clarify its paths and goals. To advance these purposes, this course highlights the experiences of a variety of revolutionary projects in different regions, eras and cultures. It also explores the weights that different actors (state, society, global orders, charismatic leaders, etc.) hold in shaping the processes of radical political changes. The course will conclude by exploring new thinking on the politics of revolution for the twenty-first century. We will ask how issues of ecology, gender, changing values, indigenous movements (to name just a few) can liberate our imagination about revolution in specific and political change in general in a post-modern world.

ASEM 2646 Dance in India (4 Credits)
As a discipline in which the body is trained to become "naturalized" in very specific ways, dance tells us much about the culture in which it is a part. Dance movements and meanings also become sites of conflict during periods of cultural transition, and yet because of dance's ephemeral nature, its relative adherence to tradition, or lack thereof, is difficult to ascertain, and thus often hotly contested. This course explores the tension between change (innovation) and continuity (tradition) in four different forms of dance from the Indian subcontinent: Bharata Natyam, a classical dance form from South India; Kathak, a classical dance form from North India; Bhangra, a folk dance form from Northwestern India; and the mass-mediated, syncretic form of dance predominant in the Bollywood film industry.

ASEM 2648 Good Vibrations - Electronic Music: Technology and Culture (4 Credits)
This course hopes to supply the answer to the question, "How did we get here?" To answer that question, we need to look at the phenomenon from many different perspectives. History frames the topics of the course. In order to understand characteristics of electronic instruments, we start with traditional mechanical-acoustic instruments. Their characteristics are the model for many modern electronic instruments. Although in the experimental years early in the 20th century, all traditional models of music were questioned; those included musical notation which has been in place since Charlemagne's rule in A.D. 800, the number of notes within an octave, the number of notes within a span of time, and dynamic range (loudness and softness). We look at the anatomy, physiology and perception (psychoacoustics) of human auditory response in order to frame the limits of the characteristics of electronic music and the means to produce them. Of course, the "electronics" are presented at a higher system level to promote understanding of the electronic instruments themselves. (NOTE: No human subjects will be harmed or subjected to any inhumane treatment by presentation of analog or digital circuits during the delivery of this course.)
ASEM 2651 The Peopling of the Western Hemisphere: Science, Evidence, Controversy (4 Credits)
The migration and colonization of North and South America is analyzed based on data and observations made from the archaeological record. While it is evident that people did arrive in the Western Hemisphere in the distant past, there is a great deal of dispute about where they came from, when they arrived, and how they adapted to the new environments they encountered. The course evaluates various claims about all these important aspects of human migration. It tests conflicting models about which people arrived first, where they first landed, and what they did when they got here. The primary tools for this analysis are archaeological materials, but the course also draws on recent DNA and linguistic evidence of living Native American groups.

ASEM 2652 Conspiracy Theories and Contemporary Culture (4 Credits)
What have become called “Conspiracy Theories” (CTs) have been around since some of the earliest human narratives but have only quite recently been studied as a distinctive phenomenon. Underlying this explosion of popular interest in CTs are a number of intriguing philosophical, psychological and socio-political issues that reveal a great deal about how social discourse is pursued, formed, circulated and empowered (or disempowered) in the contemporary world. In this course, we will view this broad phenomenon of CTs from three different perspectives: (1) philosophical, (2) psychological, (3) social and political.

ASEM 2653 Law & Politics of Reproduction (4 Credits)
This course engages issues by examining them from multiple perspectives, using analytical tools from multiple disciplines. We explore historical and cultural changes over time, tracing them through historical and political writings, U.S. Supreme Court cases, legislation, statistical data, memoir, and sociological, philosophical and anthropological analyses. In drawing on these multiple sources, we examine past and present while also considering the relationship of these issues to the future.

ASEM 2654 The French Revolution (4 Credits)
This course explores the French Revolution–focusing on the ongoing struggles for racial equity in education. While the course is broadly historical in scope, covering debates about public education over the last century, it explores historical and cultural changes in education by focusing on three primary struggles: (1) the African American quest for equal education; (2) the Mexican-American fight for bilingual education; and (3) the Native American pursuit of self-determination through education. Throughout the course we consider how these historical struggles echo in contemporary debates of race, education and equity.

ASEM 2655 Cinematic Storytelling (4 Credits)
The course acquaints students with basic concepts and methods used in the analysis of stories, the theoretical assumptions and models describing and justifying those concepts and models, and practical applications of story analysis in cinematic and script form. We begin with Aristotle, provide an interdisciplinary and historical overview of narratology, move to literary narrative analysis, and then focus on film-theoretical approaches while gaining practical skills in analysis of the elements of storytelling in fiction, film and television. In this way, students gain some historical perspectives on the form and function of story - its timeless prevalence as well as its more current iterations.

ASEM 2656 The Long Civil Rights Movement (4 Credits)
This course explores the Long Civil Rights Movement–focusing on the ongoing struggles for racial equity in education. While the course is broadly historical in scope, covering debates about public education over the last century, it explores historical and cultural changes in education by focusing on three primary struggles: (1) the African American quest for equal education; (2) the Mexican-American fight for bilingual education; and (3) the Native American pursuit of self-determination through education. Throughout the course we consider how these historical struggles echo in contemporary debates of race, education and equity.

ASEM 2657 Harry Potter and Esotericism (4 Credits)
Today's students have grown up with J. K. Rowling's seven Harry Potter books. This incredible publishing phenomenon has inspired children and adults alike to devour 500-page books within days of publication, at a time when statistics seem to indicate that people are no longer reading. Why would these tales of English school children learning a curriculum of magical skills have so captured the imagination of a generation of young people living in a post-modern world? The purpose of this class then is to examine the role of esoteric themes that pervade the Harry Potter books and to investigate the history of those subjects from the Middle Ages to the present, by focusing on the visual traditions they inspired. Areas discussed include the history of magic and witchcraft, classical and Celtic mythology, alchemy, astrology, fantastic beasts, "books of secrets" and their healing potions, the mythic lore of botany, divination and various esoteric paths of enlightenment.

ASEM 2658 The Long Civil Rights Movement (4 Credits)
This course explores the Long Civil Rights Movement–focusing on the ongoing struggles for racial equity in education. While the course is broadly historical in scope, covering debates about public education over the last century, it explores historical and cultural changes in education by focusing on three primary struggles: (1) the African American quest for equal education; (2) the Mexican-American fight for bilingual education; and (3) the Native American pursuit of self-determination through education. Throughout the course we consider how these historical struggles echo in contemporary debates of race, education and equity.

ASEM 2659 Aesthetic Philosophy (4 Credits)
This course is an interdisciplinary exploration of the French Revolution. Students learn about the many ways in which the Revolutionary decade of 1789 to 1799 marked a significant break with the French past - politically, socially and culturally. Yet these profound changes could not occur without some continuities. Students reflect upon political, sociological and philosophical questions that make the Revolution relevant today. How do democratic values take root in a traditionally monarchical society? Can these values be exported to societies without democratic traditions? Are liberty and equality compatible? How are nations defined? Can people thrive in a strictly secular--or fundamentalist--society? What is the role of violence and war in effecting political and social change?

ASEM 2660 Testimony, Memory, Allegory: the Representations of the Chinese Cultural Revolution (4 Credits)
This course investigates how the Cultural Revolution serves as a critical link of the Revolutionary Era (1919-1980) and Reform Era (from 1980 on), via closely and critically examining various representations and surreal fiction, melodramatic and avant-garde cinema, lyric poems, music and visual arts. Although much of the material discussed is socio-politically oriented, the focus of the course is within the realm of literary and cultural criticism. This course explores complicated and often interwoven relationships between testimony, memory, signs, meanings of both writing and reading about traumatic events of the Cultural Revolution, ethical (personal and communal) commitment to memory and the engrossing historical, literary and artistic representations of the past expressed in different media. By doing so, the course reveals how each representative account copes with its producer’s distinctive memories of the Cultural Revolution and, more importantly, responds to the cultural and political contingencies of the producer’s time, as well as the artistic conventions of the producer. As such, it functions not only as a connection to the past but also a reconfiguration of the present.
mostly cultural developments (and debates) that have accomplished and, at times, questioned this unification. We analyze various political, historical, but intellectuals considered a 'cultural nation' in spite of their political separation. This class examines the pains and gains of twenty years of unity, a division between West- and East-Germany--a division exacerbated by their respective geopolitical roles in the Cold War--left its mark on what many for roughly two decades, Germany, a once divided nation in the heart of Europe held responsible for World Wars, has been re-united. Forty years of division between West- and East-Germany--a division exacerbated by their respective geopolitical roles in the Cold War--left its mark on what many intellectuals considered a 'cultural nation' in spite of their political separation. This class examines the pains and gains of twenty years of unity, a process that has repeatedly been described as an attempt to "normalize" Germany's complicated history. We analyze various political, historical, but mostly cultural developments (and debates) that have accomplished and, at times, questioned this unification.
ASEM 2677 The Sixties: Swinging London (4 Credits)
Most of us are familiar with the main images of the 1960s in Britain, miniskirts, Mods, scooters, hippies, free love, the Beatles, the Rolling Stones, and James Bond. Considered the great decade of change, students’ parents and other baby-boomers look back on it with nostalgia and the media continues to romanticize the period as being more innocent than today. Yet scholars continue to argue about the degree to which the Sixties really changed British society. While popular culture was clearly departing from that of the pre and immediately post-war era, many scholars from various disciplines assert that these changes, including the rise of the music industry, the teenager and youth culture, consumer-oriented society, spy literature, gender and racial issues found their roots in the post-war experience. Other scholars assert that the decade was dominated by contradictory impulses and that the major changes were uneven and often on the surface. This course traces the major themes of the period, including the rise of popular youth-based consumer culture, an unfettered media in Fleet Street, the center of world fashion-Carnaby Street, espionage literature on the page and on the screen, race and immigration issues, challenges to gender norms and sexual 'liberation', Britain's changing position in the world, the end of the British Empire, and the redefining of British national identity. These themes are investigated using a variety of sources including popular and documentary films, personal memoirs, novels, primary documents, secondary literature, fashion, poster art and other non-traditional sources.

ASEM 2679 Thinking, Eating, and Writing: Food History (4 Credits)
Nearly everything related to food and drink has a fascinating history: origins of dishes, food habits, customs, traditions, manners and modes of consuming food. This course integrates academic and some popular histories of food with student-created histories based on research, experience, and observation. Students read widely to understand the production of knowledge in food history and its vast scope, from a range of approaches, including theoretical, geographical and topical. Students engage in exercises to strengthen skills as historians and produce original archival research.

ASEM 2680 Jewish Latin America (4 Credits)
This course examines Jewish presence in Latin America from colonial times to the present, focusing on Jewish writers in Spanish America throughout the 20th century and considering Jewish-Brazilian and Jewish-Latino writers, Jewish themes in non-Jewish Latin American literature, and the various waves of Jewish immigration to Latin America. This course considers how they helped shape their specific communities and their responses to assimilation, state-sponsored anti-Semitism and Aliyah. Topics to be discussed include assimilation vs. integration; the construction of Jewish and national identities; and anti-Semitism in literature, film and political discourse. The course integrates critical readings alongside the literature, specifically in the areas of trauma and representation. No knowledge of Spanish is required, as the language of instruction is English and all required texts are available in English translation.

ASEM 2682 Strange Beasts: Nuclear Japan (4 Credits)
This course is a critical examination of literary and popular culture from Japan's experience of the Atomic bomb, through the "economic miracle" years of the 1960s to the present, focusing on the paired themes of humanity and monstrosity in nuclear experience during the acceleration of technological change.

ASEM 2683 Bad Girls, Riot Grrrls and Misbehaving Women (4 Credits)
This course introduces women who subvert mainstream expectations of femininity and explore misbehaving as a means of self-definition and empowerment in popular culture. From "Bad Girl" artists and the Riot Grrrl movement in the 1990s, to current day roller derby skaters and burlesque queens, the course traces the intersections of feminist art, DIY (do-it-yourself) approaches, creative production, performative outlets and socio-political consciousness. Unladylike behavior is explored as a strategy to articulate personal, social, political and cultural identity.

ASEM 2685 Religion and Filmmaking (4 Credits)
This course examines film and television representations of religions from around the world in an effort to understand the goals of the media makers and the effects of their productions. The techniques, theory and rhetoric of the films viewed are dissected and discussed. The course enables students to participate in critical, yet respectful debates about the cinematic mediation of religious concepts.

ASEM 2687 Sex and Globalization (4 Credits)
This course examines the complex phenomena of "globalization" within the framework of critical gender, sexuality and race studies. Topics range from sexual dimensions of war and empire building to the ways in which sexuality and gender shape global migration, tourism and commerce. In addition to consulting scholarly readings, we also examine and research representations of these phenomena as they occur in the media, online, and in popular culture.

ASEM 2688 Music and Consciousness (4 Credits)
This course explores ways of framing and defining individual and collective responses to musical arts, and, in turn, how understanding these responses can lead to a broader view of human consciousness. Through studying different musical cultures (and subcultures), students critically examine their own musical preferences and respond to other's aesthetic positions. Students explore 20th-century musical writings and compositions; examine themes of development, change, unity and variety in different musical genres; entertain musical manifestos written by various composers and musicians; and write their own "musical constitution.

ASEM 2692 Philosophy of Migration and Global Citizenship (4 Credits)
The 21st century is already being described by many as "The Age of Migration." This course explores the implications of mass global migration for the political philosophies of citizenship on which sovereign states are founded. Is something like a global citizenship possible? This seminar offers a cross-disciplinary perspective on this and other related issues. Completion of all Common Curriculum requirements is required prior to registering for this class.
ASEM 2693 The Unfathomable Russian Soul: Identity and Self-Perception in 19th Century Literature and Culture (4 Credits)
This course explores Russian identity and the idea that it resides in the "unfathomable Russian soul" that defies rational explanation. Students examine how classic Russian authors (Pushkin, Gogol, Turgenev) imagined and shaped "Russian soul" in their dialogues with Western European cultures and Russia's native traditions (folklore, Orthodox Christianity). Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2694 The Golden Age of Musicals (4 Credits)
This course maps and analyzes the developments, constructs, creators and canonical works of the musical theatre genre up to and through its formative, formidable period known as the "Golden Age" (c. 1943-1964) as well as the genre's wider social/cultural implications and contemporary relevance. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2695 Religion and Politics in China (4 Credits)
This course explores the concept of "religion" in the political history of modern China. Students gain new insight into two concurrent and divergent historical processes--state-driven secularization and religious revival--in China and Taiwan. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2696 Communication and Adoption (4 Credits)
This course explores the communicative dynamics of adoptive families. This course focuses on issues surrounding identity, cultural context, race, sexual orientation, loss and ethics. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2697 Muslims and Identity in Europe (4 Credits)
This course introduces students to the diverse Muslim populations across Europe, taking a case study approach that focuses on the histories, national politics, and societal contexts that help form Muslim European identities. Students gain exposure to anthropological, historical, political science, and religious studies techniques and perspectives, while writings focus on real-world genres that support students' professional development. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2698 Justice, Legal Obligation and Judicial Decision Making (4 Credits)
This course provides students with an introduction to the major theories of judicial decision-making and the basic philosophical problems involved in understanding the concept of how law binds citizens, especially judges, in a liberal democracy. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2710 Free Form Film (4 Credits)
Unlike Hollywood studio films, the works of video artists, experimental filmmakers and avant-garde auteurs almost never make their way to a theatre near you. Instead, many media artists find they need to make work for a culture that is already prepared for something other than mainstream filmmaking. How does this "fringe" film culture function and how do critics, curators and "underground" media-makers define their world of film festivals, gallery exhibits and grant proposals? Exploring aesthetic, critical, economic and technical aspects, this course features visits from influential filmmakers and others within the art-film community as we assess and critique groundbreaking ideas that have absolutely nothing to do with Hollywood. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2712 Participatory Culture and Fandom (4 Credits)
Students explore practice and theories of participatory culture. From writers to fan fiction to grassroots activists to proponents of Web 2.0, those who consume culture are also those who produce it, and this state of affairs raises critical questions about taste, intellectual property, subcultures, and globalization.

ASEM 2713 Food Culture: Foodies, Foragers and Food Politics (4 Credits)
Culture, history, identity, sustainability, power. food is the bridge that connects us. Food is used to nourish and heal, mark celebrations, build community, and symbolize identity. This seminar investigates the connections between our food choices and political and cultural power. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2714 Framing the Debate (4 Credits)
This seminar conducts a bipartisan, multimedia, interdisciplinary investigation of historical and contemporary presidential debates. In addition to following campaign and debate-related news, we read studies from multiple fields -- history, political science, communications, sociology, psychology, rhetoric -- and apply their insights and methods to analyze debate performances and research debate effects.

ASEM 2715 Belonging in America (4 Credits)
Who belongs in America? Who is on the inside/outside, and why? How do we define, experience, maintain, reject, and embrace our own insider/outside status? Finally, how do American novels and dramas conceptualize and dramatize the many negotiations involved in belonging? This course explores the social, cultural, and experiential aspects of belonging in America. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2716 Tango: Border Crossings in Art, Race, Gender, and Politics (4 Credits)
This course is a study of the appeal of Argentine tango and why a dance so closely linked to one culture appeals so intensely to people with such different cultural identities. We consider competing answers from academics in many fields -- from gender, film, and rhetorical studies to art, politics, and dance -- as well as testimonies of dancers and teachers, in Buenos Aires and from around the world. Completion of all common curriculum requirements is required prior to registering for this class.
ASEM 2717 Pursuing Equality: Gender, Politics and Law (4 Credits)
This seminar combines theoretical and empirical insights from law with sociology, economics, political science, anthropology, and women’s studies to introduce students to the conceptual frameworks, legal mechanisms, and practical realities affecting gender equality primarily in the United States, but with some cross-national comparisons. Completion of all common curriculum requirements is required prior to registering for this class.

ASEM 2719 Presidents, War, and the Constitution (4 Credits)
The United States government is based on the idea of limited power. In this course, students analyze the kinds of power presidents have claimed in wartime, how courts have responded, and the consequences for individual rights with a study of the Civil War, World War II and the War on Terror. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2720 Nazi Germany: History, Literature, Culture (4 Credits)
This course explores Germany’s Nazi era. It focuses on themes like redemption, temptation, national community, conflict and memory while analyzing both texts and visuals from and related to the period. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2722 Freaks: Stigma and Resistance (4 Credits)
The “freak” exists in a system of mutually reinforcing cultural categories: normal/deviant, masculine/feminine, white/nonwhite, civilized/savage, heterosexual/homosexual, able-bodied/disabled, and so on. The course examines how these categories arrange societies and cultural practices in ways that reject the heterogeneity of human experience. Using films, images, and texts from a wide range of fields, the course asks, “How do people become stigmatized?” More importantly, “How do stigmatized people resist marginalization?” Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2723 Contemporary Art in Context (4 Credits)
This course examines key trends that have shaped contemporary art and considers how artists have turned to traditional media such as painting and photography and created new forms of art through performance, social media, and digital technologies to produce aesthetic and physical experiences that reflect on contemporary life. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2724 Jammin: Technoculture and Improvisation (4 Credits)
This course introduces students to the recent history of musical and cultural forms devoted to improvisation, including jazz, free music, psychedelic rock, funk, jam bands, and electronic dance music. Improvisation is examined as a response to emerging technological forms by which musicians and listeners embody new personal and collective identities. The course includes perspectives from cultural studies, philosophy, history, media studies, sound studies, and critical theory. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2725 The Female Outlaw (4 Credits)
This course examines female outlaws and renegades in politics, art, literature, and popular culture. Students assess how women intervene in the masculine mode of transgressive art and fiction, engaging themes of violence, difference, and empowerment. The female outlaw provides a model for writing with conviction, and challenging boundaries. Prerequisite: Completion of all other Common Curriculum Requirements. Course open to Colorado Women’s College students only.

ASEM 2726 Belonging: State and Family in our World (4 Credits)
This course examines the state regulation of belonging in families and the international ambiguities of rights and belonging to states. It develops concepts by looking closely at histories and stories of adoption and of people who have been caught in-between in the regulation of citizenship: people who lose or mistrust the value of their citizenship, or can’t claim the rights of citizens, or flee their countries. Prerequisite: Completion of all other Common Curriculum Requirements.

ASEM 2728 Identity, Power, and Media Culture (4 Credits)
In our contemporary cultural landscape, information is delivered in many formats, through various mediums, to global audiences. Understanding media systems as information delivery is often tied to journalism and/or financial institutions; “news” and “data,” have become synonymous with what we officially learn from media culture. However, those same images and messages that help us understand our social condition are also delivering important meanings about ourselves and those around us. This course focuses on this branch of inquiry within media studies—highlighted by the work of cultural studies—and focuses on the intersections of identity and power. As a fundamental source of the signification of identity, media culture becomes a social tool, and therefore must be understood as a system that shapes our relationships to individuals and communities. This course will explore the importance of this process, will equip students with the means to critically analyze media texts and production, and will sharpen awareness to dominant norms and values in our society. Overall, this course provides students an opportunity to directly confront the questions: How do media shape our understandings of intersecting identities such as gender, race, ability and class? How can we critically identify stereotypes and misrepresentation, including our own privilege? How do dynamics of identity operate at the production level(s)? What are the implications of these representations and how are they related to power dynamics in contemporary culture?.

ASEM 2729 Seduction and Satire in British Women’s Novels of the 18th Century (4 Credits)
This course explores how fiction by 18th century British women relates to larger themes of gender (and genre) construction. What is the gender of the novel in the eighteenth century? Why do these female authors make sustained use of the seduction narrative, and how do they work to combine it with more traditionally “masculine” forms such as satire? Are they conforming to or subverting received notions of femininity with such use?.

ASEM 2730 Queer Lives in Musical Theatre (4 Credits)
Musicals are one of the most popular forms of American theatre, commonly considered family friendly and mainstream. However, since its beginning musical theater has also been strongly connected to queer culture. Through watching and listening to musicals as well as studying queer theory, students identify and analyze depictions of queer life throughout musical theatre history.
ASEM 2731 Postcolonial Lit and Performance (4 Credits)
Postcolonial studies investigates contemporary cultures as an embodied consequence of historical power struggles. The major questions covered in this course are: What is colonialism and what are its lingering effects on society? How do we collectively experience, record, and resist dominant modes of oppression through artistic expression?

ASEM 2732 New Media, Conflict and Control (4 Credits)
This course explores the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts illustrate how citizens and regimes use new media to communicate, report, mobilize, monitor, and/or control. Students utilize new media as they research instances of democracy and control.

ASEM 2733 Media, Culture and Globalization (4 Credits)
This course explores the importance of understanding media as it relates and impacts globalization, and equips students with the means to critically confront the ways that globalized media impacts culture, and sharpens awareness through written assignments that highlight connections between theory and lived experience.

ASEM 2734 Music and Spirituality (4 Credits)
At a time when "spiritual" music appears in a wide variety of contexts such as churches, yoga studios, raves, and radio broadcasts, "Music and Spirituality" explores individual and collective perspectives on music and transcendence, and teaches how a deeper understanding of those perspectives can lead to a broader view of meaning in human experience.

ASEM 2735 Perspectives on Climate Change (4 Credits)
This course explores the complex, controversial issue of global climate change from multiple perspectives and using multiple types of sources. The goal is for each student to develop an educated perspective on this issue and be able to advocate for her perspective. Students write at least twenty pages in the class, including short weekly online posts, an op-ed piece, a film review, and a position statement based on knowledge acquired during the class. Writing intensive. Prerequisite: Completion of all other Common Curriculum Requirements or permission of instructor.

ASEM 2736 Spirituals and the Blues (4 Credits)
This course examines spirituals and the blues, two song forms from the canon of African American music. A multifaceted approach (both historical and analytical) reveals the ways in which the music is transformative, healing, and liberating, as well as providing a vehicle for agency. The course also studies the music's larger sociopolitical landscape.

ASEM 2737 Experiencing the Future (4 Credits)
This course introduces students to the study of the representation and evaluation of possible futures. Students observe the mechanisms impacting future-oriented thinking, and trace the ways that our thoughts about the future shape our day-to-day living. Students draw on insights from literature from a wide array of disciplines--including Sociology, Psychology, Economics and Public Policy--to explore the many ways in which the future is being visualized, colonized, calculated and produced in the society where they live.

ASEM 2738 Brands, Culture, and Identity (4 Credits)
Brands have become ubiquitous in every aspect of life in contemporary culture. How has this come to pass and what are the social, political and cultural consequences of living in a culture saturated by brands? This course explores critically the roles and meanings of brands in the making of cultures and identities.

ASEM 2739 Can College Teach Reasoning? (4 Credits)
In the last several years, colleges and universities have made national news with a series of controversies over diversity, inclusivity, and free speech. Many commentators see free speech at odds with diversity and inclusivity. Those who stress the importance of free speech on campus often embrace an idea with a long philosophical history: the "thinking cure." According to this line of thinking, a principal task of education—particularly higher education—is to teach critical thinking. A well-functioning university (not to mention a well-functioning democracy) is a marketplace of ideas where participants are free to rationally debate the issues of the day. The best ideas will eventually win out. People need the skills to debate rationally, which education should provide, and the freedom to deploy those skills in arguing for their versions of the true and the good, which educational institutions and the courts should protect. This course aims to understand and critically analyze this line of thinking through the lens of philosophy, empirical psychology, and contemporary journalism. Can we really be trained to reason in the way that this line of thinking requires? The course considers arguments that emphasize the limitations on our ability to reason, arguments that we are frequently subject to (sometimes insuperable) biases. We examine how these arguments bear on the aims of education generally, and on free speech provisions in particular.

ASEM 2740 Rhetorics of Belonging (4 Credits)
This course explores how particular uses of language shape and convey historical and current understandings of American citizenship. Students examine how language creates, reinforces, and challenges the idea of "belonging." What is at stake in accepting or denying identities for certain groups? The course analyzes the role literacy has played in constructions of citizenship, pertinent relationships between culture and language, and the rhetorics of belonging. The course uses both primary and secondary texts to examine the complicated, dynamic, and nuanced history of immigration from multiple perspectives.

ASEM 2741 Music in Science Fiction Film (4 Credits)
This course examines music and sound design in science fiction film 1895–2015, exploring key concepts and practices in music, and placing films studied in social and political context, as well as the aesthetic and technological trajectory of the genre. The course addresses recurring themes in science fiction, as well as the impact of new sound technology, non-traditional orchestration, and sound effects on the development of the film genre. The course presumes no prior specialized knowledge of music or film.
ASEM 2742 Media and Marketplace Feminism (4 Credits)
This course tracks the historical trajectory of marketplace feminism—also known as commodity feminism, lifestyle feminism, or white feminism—through its dynamic relationship to media culture. In an effort to highlight the complexities surrounding both feminism as political praxis, as well as feminism as a commodity, multiple perspectives are offered for classroom discussion and critique, including readings from feminists, pop culture/ literary critics, media studies scholars and feminist media studies scholars.

ASEM 2743 Bad Words: The Ideologies of Profanity (4 Credits)
Students explore bad words in all of their variations (e.g., expletives, obscenities, profanities, etc.). The course combines an historical study of bad words with an examination of current usage and issues, looking at bad words through a range of readings from history, neurology, ideology, psychology, and other fields.

ASEM 2744 The Academy Awards & Academia (4 Credits)
This course introduces students to the history and politics of the Academy Awards, through weekly film screenings and a variety of scholarly texts from across the disciplines. From war sagas and romantic comedies to horror flicks and musicals, the films covered represent the best of the best, at least according to members of the voting Academy. The course’s scholarly lenses will range from statistical analyses of features of Best Picture winners to historical, political, sociological, and cultural interpretations of how the Oscars have reflected shifting societal values.

ASEM 2745 American Jews, Zionism, and Israel (4 Credits)
It is often taken as a given, by both Jewish and non-Jewish Americans, that American Jews have always supported Zionism and, since its creation in May 1948, supported the state of Israel’s actions. However, the historical relationship between American Jews, Zionism, and the state of Israel has been complex and multifaceted. This course examines and analyzes this historical relationship from multiple perspectives, beginning approximately fifty years before the creation of the state of Israel, while also paying attention to recent shifts in the ways in which contemporary American Jews relate to and view the state of Israel.

ASEM 2746 Music and Disaster (4 Credits)
This course examines the role of music within the context of disaster. Understood to be catalysts for artistic expression, disasters produce musical expressions related to trauma in myriad forms. Following an historical overview of large-scale natural and man-made disasters and the kinds of music produced in relation to them, we examine how disaster figures into the production and consumption of music in Haiti, New Orleans, Indonesia, South Africa, Cambodia, Uganda, and in the Post-9/11 world. The course additionally examines music as a tool in social justice, considering how music provides social commentary, critique, and a form of social activism. Students understand how music and disaster are historically intertwined, and how music shapes understandings of conflict and catastrophe. No previous musical experience is required.

ASEM 2747 Complexity in the Social Sciences with a Focus on Economics (4 Credits)
The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. Completion of all Common Curriculum requirements is required prior to registering for this class.

ASEM 2789 Deviant Bodies (4 Credits)
Students will explore the meanings of deviant bodies. They will examine narratives of fatness, illness, disabilities, sexualities, femininities, masculinities, race, and contamination from sociological, historical, anthropological, and feminist perspectives. Discussions and intensive writing about deviant bodies will be prompted by scholarship on embodiment, gender, and social inequality, through examinations of popular culture, social media, film, and students’ own social interactions.

ASEM 2860 Critical Disability and Culture (4 Credits)
This course explores how the concept of disability (physical, developmental, cognitive, emotional, psychosocial and so on) is constructed through a variety of lenses. Topics may include biomedical discourse of disability in everyday life; relationships and the workspace; the discourse of normalcy as it is constructed by persons with disabilities; and meaning-making process of disability in various cultural and contextual spaces. Utilizing academic research, popular culture references, visual media and writing, students deconstruct, critique, and analyze the different discourses of disability through basic character-driven gaming, using standards of Universal Design.

Air Force Aerospace Studies

University of Denver students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program through an agreement with the University of Colorado at Boulder. Air Force ROTC programs lead to a commission in the U.S. Air Force upon receipt of a bachelor's degree.
**Standard Four-Year Course**

This program is offered in three parts: the general military courses for lower-division (freshman and sophomore) students; the professional officer courses for upper-division students; and Leadership Laboratory (attended by all students). Completion of a two-week summer training program is required prior to entry into the professional officer courses.

**ROTC Course Credit**

Air Force ROTC students may use their upper division ROTC courses to meet the requirements toward the AFROTC Leadership minor. In some cases, ROTC credit may be applied to program requirements with the approval of the specific program. Students register for AFROTC courses through regular DU registration, though they are taught on the CU-Boulder campus and follow the CU semester calendar.

**LEADERSHIP STUDIES MINOR**

Air Force ROTC courses are eligible to count towards a Leadership Studies Minor through the Pioneer Leadership Program, please visit the Pioneer Leadership Program (p. 397) for details.

**Additional Information**

For further information, visit [www.afrotc.com](http://www.afrotc.com) or the AFROTC Detachment 105 website at [http://afrotc.colorado.edu](http://afrotc.colorado.edu).

**RTC2 1010 Heritage and Values I (0-1.5 Credits)**

This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1020 Heritage and Values II (0-1.5 Credits)**

A continuation of RTC2 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1234 Leadership Laboratory (0 Credits)**

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. *Special Students* NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab). These courses are taken at CU Boulder. Co-requisites: One of RTC2 1010, RTC2 1020, RTC2 3010, RTC2 3030.

**RTC2 2010 Team and Leadership Fundamentals 1 (0-1.5 Credits)**

This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 2020 Team and Leadership Fundamentals 2 (0-1.5 Credits)**

A continuation of RTC2 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3010 Leading People and Effective Communication 1 (0-4.5 Credits)**

This course is designed to build on the leadership fundamentals. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3020 Leading People and Effective Communication 2 (0-4.5 Credits)**

Continuation of RTC2 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3030 National Security, Leadership Responsibilities/Commissioning Preparation 1 (0-4.5 Credits)**

This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3031 National Security, Leadership Responsibilities/Commissioning Preparation 2 (0-4.5 Credits)**

This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. Classes meet on CU-Boulder campus on the semester calendar.
Anthropology is the study of the origin, history and nature of people and cultures. It examines the relationships among biology, culture and the natural and social environments in which people live. Anthropology teaches about humanity in all its complexity from its earliest beginnings to the present, and from historical, comparative, cross-cultural and holistic perspectives. The field addresses contemporary issues and problems, such global public health, urban development and gentrification, human rights, social injustice and inequality, and the stewardship of environmental and cultural resources.

The faculty members of the Department of Anthropology are experts in analyzing human differences in the context of the material (political and economic) conditions of life. They are concerned with the interaction of gender, race, ethnicity, class and other variables in human affairs, and with the consequences of these relationships for social change and development. Drawing on the resources of the Museum of Anthropology, they are concerned with how tangible and intangible culture expresses and sustains relationships among people, ideas, things, and natural and non-human worlds.

The department has an archaeology lab, ethnology lab and a museum housing collections of archaeological and ethnographic materials. The department also has computer-catalogued collections, working relationships with Denver-area museums and archaeological field opportunities. Students interested in careers in archaeology, cultural anthropology or museum anthropology can find courses designed to meet their needs.

The department provides the Thomas A. Bogard Scholarship for a senior majoring in anthropology.

**Anthropology**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

44 credits, including the following:

**Secondary Major**

44 credits. Same requirements as for BA degree.

**Minor Requirements**

20 credits of anthropology.

**Requirements for Distinction in the Major in Anthropology**

- Completion of an honors thesis

**BA in Anthropology**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common
Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**ANTH 1006 Paranormal Archaeology (4 Credits)**

This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—the Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1010 Anthropology: Humankind in Context (4 Credits)**

This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species' place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1910 Ancient Worlds (4 Credits)**

This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history: the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ANTh 1988 Study Abroad Resident Credit (0-18 Credits)

ANTh 2000 Genealogies of Anthropology: Foundations and Futures (4 Credits)
Explores the development of anthropology as a field of study, including important thinkers, ideas, and movements in their historical and social contexts as well as their relevance to contemporary issues.

ANTh 2004 Anthropology of Jews & Judaism (4 Credits)
This course is cross-listed with JUST 2004 and RLGS 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

ANTh 2010 Cultural Anthropology (4 Credits)
This course is an introduction to cultural anthropology. As one of anthropology’s main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically.

ANTh 2011 Religion, Environmentalism, and Politics (4 Credits)
How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans’ responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we’ll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with JUST 2011 and RLGS 2011.

ANTh 2020 Artifacts, Texts, Meaning (4 Credits)
How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTh 2040 Historical Archaeology (4 Credits)
Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus but also address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 4040. Prerequisite: ANTH 2310 or permission of instructor.

ANTh 2070 American Jewish Experience (4 Credits)
This course is cross-listed with JUST 2070 and RLGS 2070. In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry’s religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life.

ANTh 2105 Human Nature (4 Credits)
Human biological variation in time and space; investigation of the environmental and cultural impacts on the human organism that have led to the present diversity of the species. A scientific, evolutionary approach to human nature. Required for all anthropology majors.
ANTH 2125 Primates (4 Credits)
Non-human primates are used within numerous disciplines as models for understanding the evolution of our own behavior. This course examines non-human primates within the framework of anthropology and explores the ways that the study of other primates contributes to our understanding of human behavior and evolution, and serves to connect us to the living world. The course will examine three aspects of primate life (the three F’s: feeding, fighting, and family) first from the non-human primate perspective and then through the lens of human behavior and social organization. To better understand the methods of primatology, students will develop their own research project to take place at the Denver Zoo. As an SI: Society course students will develop an understanding of the defining principles central to inquiry within the discipline of anthropology as well as become proficient in the use and application of anthropological, and specifically primatological, research methods.

ANTH 2200 Contemporary Issues of Native North America (4 Credits)
This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land.

ANTH 2310 Fundamentals of Archaeology (4 Credits)
This course focuses on the practice of archaeology—why and how archaeologists recover and analyze their data. By the end of this course, students have an understanding not only of the nature of the archaeological record, but also how models of the past are built and interact with general public knowledge.

ANTH 2323 Global Health (4 Credits)
This course is an introduction to global health. As one of the world’s faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ANTH 2420 Science, Technology and Human Values (4 Credits)
This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ANTH 2424 The Social Determination of Health (4 Credits)
This course is an introduction to sociocultural epidemiology. As the scientific basis of public health, epidemiology is the discipline that aims to describe the distribution and causes of health problems in a society, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, disease and health care and their manifestations around the world. This course presents an overview of epidemiology’s history and methods, to then concentrate on the social and cultural aspects of health. The course offers an in-depth exploration of the notion of disease causation, with historical and current examples. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, and sociology. We will explore ideas and behaviors related to disease causation in different societies and social groups. Topics include the history of epidemiology and theories of disease causation, research methods in epidemiology, social determinants of health, and the notions of disease causation and determination. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of cases in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects.

ANTH 2600 Museums and Public Culture (4 Credits)
A critical introduction to how cultures and peoples are presented in museums, festivals, tourism venues and the popular media. The course introduces students to the historical and contemporary role of museums and anthropology in public culture and the importance of both in civic life.
ANTH 2988 Study Abroad Resident Credit (0-18 Credits)

ANTH 3001 Race, Sex and Evolution (4 Credits)
The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

ANTH 3020 Native Religions (4 Credits)
A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channeling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

ANTH 3030 Digital Anthropology (4 Credits)
Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

ANTH 3040 Anthropologies of Place (4 Credits)
This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

ANTH 3060 Cultural Narratives (4 Credits)
Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non- anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity, both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

ANTH 3070 Folklore and Cultural Heritage (4 Credits)
Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the “folklore process.” Prerequisite: introductory social science course. Cross-listed with ANTH 4070.

ANTH 3080 Memory and Memorialization (4 Credits)
The course focuses on how social groups represent, experience and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past- and its materialization through monuments, ruins, and landscapes- are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as “authenticity,” ”tradition,” and ”modernity” in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)
This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.
ANTH 3110 The Cultured Ape (4 Credits)
This course is an examination of human evolutionary psychology. Evolutionary Psychology deals with how contemporary human behavior is constrained by our heritage as evolved primates. It questions the standard social science and mainstream anthropological model of humans as "blank slates" who are primarily shaped by their social and cultural environments. In other words, Evolutionary Psychology views humans as "cultured apes."

ANTH 3130 The Archaeology of Gender (4 Credits)
This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)
Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

ANTH 3155 Native American Resistance in the Digital Age (4 Credits)
Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

ANTH 3170 Applied Heritage Management (4 Credits)
Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

ANTH 3200 Human Origins and Evolution (4 Credits)
Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

ANTH 3225 Human Rights in Latin America (4 Credits)
This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

ANTH 3255 Ancient North America (4 Credits)
This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.

ANTH 3290 Art and Anthropology (4 Credits)
Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

ANTH 3310 Indigenous Environment (4 Credits)
The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

ANTH 3320 Medical Anthropology (4 Credits)
This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.
ANTH 3330 Human Rights of Indg Peoples (4 Credits)
This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

ANTH 3350 Latin American Archaeology (4 Credits)
Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

ANTH 3370 Sex, Class and Race in Latin America (4 Credits)
This course uses an intersectional approach to the study of sex, class and race in Latin America. Intersectionality aims at understanding the interlocking relation between sex, class, race and other aspects, and how these are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. In this course we will aim at understanding such history, culture and peoples with a special emphasis on examining their heterogeneity, and aiming at understanding how such heterogeneity is also related with social inequality. We will also examine some contemporary issues such as women's rights, indigenous movements, human rights, migrations, and economy with an emphasis on their manifestations at the intersections of sex, class, and race.

ANTH 3390 Geoarchaeology (4 Credits)
Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

ANTH 3470 Applied Anthropology (4 Credits)
The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

ANTH 3500 Culture and The City (4 Credits)
Examines the past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of cities in antiquity and ends with contemporary urban landscapes. Analysis is sensitive to both the technologies and aesthetics of urban form. Emphasis is on the possibilities for urban redesign to meet the problems of 21st century city life.

ANTH 3510 The Ancient City (4 Credits)
The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

ANTH 3540 The Nature of Language (4 Credits)
Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

ANTH 3620 Ethnoarchaeology (4 Credits)
Ethnography has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

ANTH 3630 Archaeological Method and Theory (4 Credits)
This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

ANTH 3640 Race and Human Evolution (4 Credits)
Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.
ANTH 3655 Indigenous Feminisms (4 Credits)
This course examines a wide array of Indigenous feminisms. Rather than think of Indigenous feminisms as one static thing, we will inspect the field from multiple viewpoints and perspectives. We will draw from various thematic and transnational contexts across the Americas and Native Pacific in order to analyze the scope and significance of such knowledges, particularly as they relate to broader theories and practices of decolonization.

We will begin by examining the foundational inquiries and methods of Indigenous feminist scholarship. Is gender a useful category of analysis? How have Indigenous women thought of gender? How have Indigenous women thought about, and responded to, feminism? With an emphasis on Indigenous scholars and feminists, we will cover a range of topics including (but not limited to) how Indigenous feminism fits into the feminist project, the connection between colonization and violence against Native women, the reclamation of women’s initiations, gender and sovereignty, queer indigeneity, Indigenous feminist allies, and decolonial love.

We will draw from readings across feminist movements, and as feminist Kanaka Maoli Professor Lani Teves says, we will attempt to “make links between Indigenous feminisms and Latinx feminisms, Black feminisms, and transnational feminisms. Rather than shy away from the tensions that emerge between multiple feminisms, instead we will attempt to cultivate nodes of alliance and solidarity to diversify our feminist tactics.”

ANTH 3660 Anthropological Theory and Context (4 Credits)
History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographical research.

ANTH 3661 Museums and their Visitors (4 Credits)
This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors’ experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences?

Cross-listed with ARTH 3661.

ANTH 3680 Quantitative Methods-Anthony (4 Credits)
The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

ANTH 3701 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

ANTH 3702 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

ANTH 3703 Topics in Anthropology (4 Credits)
Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

ANTH 3742 Museum Exhibit Development (4 Credits)
Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

ANTH 3743 Managing Collections (4 Credits)
Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

ANTH 3750 Ethnographic Methods (4 Credits)
In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association’s Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

ANTH 3790 Field Methods in Archaeology (4 Credits)
The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field.

Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)
This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and event natural environment that was used and marked by human action.
ANTH 3800 Capstone Seminar Anthropology (4 Credits)
This seminar brings anthropology to bear on a topic of special significance. It assesses grasp of the key concepts, theories and insights of anthropology, and critically reflects on the nature and history of the discipline. Prerequisite: Senior standing.

ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)
Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

ANTH 3875 Research Methods in Anthropology (4 Credits)
This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

ANTH 3880 Culture, Ecology, Adaptation (4 Credits)
This course is organized around these concepts: “ecology,” “adaptation,” “landscape,” “technology,” “artifact,” and “architecture.” The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

ANTH 3890 Context of Material Culture (4 Credits)
Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnology, archaeology, folklore, geography, history, art and architecture.

ANTH 3980 Internship (1-8 Credits)

ANTH 3981 Museum Internship (1-6 Credits)

ANTH 3988 Study Abroad Resident Credit (0-18 Credits)

ANTH 3990 Summer Field School-Archaeology (4-6 Credits)
Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.

ANTH 3991 Independent Study (1-15 Credits)

ANTH 3995 Independent Research (1-10 Credits)

Faculty
Alejandro Ceron, Associate Professor and Department Chair, PhD, University of Washington
Bonnie J. Clark, Professor, PhD, University of California-Berkeley
Richard Clemmer-Smith, Professor, Emeritus, PhD, University of Illinois at Urbana-Champaign
Lawrence Conyers, Professor, PhD, University of Colorado-Boulder
Tracy Ehlers, Associate Professor, Emerita, PhD, University of Colorado
Kelly Fayard, Assistant Professor, PhD, University of Michigan
Esteban Gomez, Assistant Professor, PhD, University of California-Berkeley
Nicole M. Herzog, Assistant Professor, PhD, University of Utah, Salt Lake City
Christina Kreps, Professor, PhD, University of Oregon
Dean J. Saitta, Professor, PhD, University of Massachusetts Amherst
Army Reserve Officers’ Training Corps

University of Denver students may participate in the Army Reserve Officers’ Training Corps (AROTC) program through an agreement with the University of Colorado Boulder. Army ROTC programs lead to a commission in the Active Army, National Guard or Army Reserve. Classes may be taken at the University of Colorado Boulder, Colorado School of Mines in Golden or the Metropolitan State University of Denver on the Auraria campus in downtown Denver.

Four-Year Program

The standard four-year program consists of two phases. The basic course, normally completed during the freshman and sophomore years, includes topics in military science, officer career development, leadership theory and management. The advanced course coincides with the junior and senior years. Subject areas include leadership techniques, methods of instruction, tactics and unit operations, military law, history, national strategy and Army policies. Completion of a four-week Advanced Camp in the summer is required prior to commissioning, with attendance at this camp normally between the junior and senior years. Students should check with the military science department at the University of Colorado Boulder about the required courses.

Two-Year Program

The abbreviated two-year program consists of the same courses offered in the advanced course; however, both undergraduate and graduate students may become qualified for this program through successful completion of a four-week summer basic camp. Students should contact a professor of military science at the University of Colorado Boulder for specific requirements and options available based on each student's status at the time of program entry. Students who are veterans of military service or who have participated in Junior ROTC or similar organizations may have a portion or all the basic requirements waived by a professor of military science at the University of Colorado Boulder.

Scholarships

Students enrolled full time may compete for three-year and two-year scholarships. The scholarship also pays a book allowance of $1,200 per year and a monthly tax-free stipend ranging from $300 to $500.

Guaranteed Reserve Forces Duty (GRFD) and Dedicated Army National Guard (ARNG) Scholarships

The GRFD and Dedicated ARNG scholarships are two and three-year scholarships available for members of the Army Reserve (AR) and Army National Guard (ARNG) who desire to commission in the Reserve Forces. Applicants must join or be members of the AR or ARNG and participate in the Simultaneous Membership Program (SMP) as a cadet. Scholarships are awarded on a competitive basis. Students apply for this scholarship during the spring semester of their freshman or sophomore year. Contact the Army ROTC enrollment officer at 303-492-3549 for more information.

ROTC Course Credit

Students register for AROTC classes listed as RTC1 courses through regular DU registration, though they are taught on other campuses in the Denver metro area and follow the semester calendar.

Leadership Studies Minor

Army ROTC courses are eligible to count towards a Leadership Studies Minor through the Pioneer Leadership Program, please visit the Pioneer Leadership Program (p. 397) for details.

Additional Information

Interested students may contact the professor of military science, University of Colorado Boulder, 303-492-6495. For further information, visit the Army ROTC web page at www.goarmy.com/rotc/ (http://www.goarmy.com/rotc/), or the Army ROTC Golden Buffalo Battalion Web page at www.colorado.edu/arotc/ (http://www.colorado.edu/AROTC/), or email armyrotc@colorado.edu.

RTCl 1011 Adventures in Leadership 1 (1-3 Credits)
Introduces fundamentals of leadership and the United States Army. Examines its organization, customs and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing, techniques and some basic military tactics.

RTCl 1021 Adventures in Leadership 2 (0-3 Credits)
Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.
The School of Art and Art History grants the following degrees: Bachelor of arts (BA) and bachelor of fine arts (BFA) degrees in studio art. Both studio degrees include exposure to ceramics, drawing, painting, photography, printmaking and sculpture.

Bachelor of fine arts degree in pre-art conservation.

Bachelor of arts and master of arts (MA) degrees in art history (with an option of a museum studies concentration at the graduate level).

---

**RTC1 2031 Methods of Leadership and Management 1 (1-4.5 Credits)**
Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

**RTC1 2041 Methods of Leadership and Management 2 (0-4.5 Credits)**
Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

**RTC1 3052 Military Operations and Training 1 (0-4.5 Credits)**
Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Instructor permission required.

**RTC1 3062 Military Operations and Training 2 (0-4.5 Credits)**
Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Instructor permission required.

**RTC1 3072 Adaptive Leadership (0-4.5 Credits)**
This course focuses on developing leaders of character that will excel in a complex, ambiguous and dynamic future operating environment. While centered on leadership within the military, and designed to ensure future second lieutenants are prepared for their professional responsibilities, the course develops universal leadership attributes. We will discuss personal growth, effective communication, critical thinking, problem solving, and ethical leadership. The objectives of the course are to understand basic leadership principles — to include knowledge of one's self as well as techniques to effectively influence others, improve communication — both written and oral, enhance the ability to analyze issues, articulate a problem, extrapolate pertinent information, make valid assumptions to overcome knowledge gaps, identify potential solutions and develop a way forward, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

**RTC1 3082 Leadership in a Complex World (0-4.5 Credits)**
Continues RTC1 3072 study by focusing on developing leaders of character that will excel in a complex, ambiguous, and dynamic future operating environment. The course will center on Students' understanding of their environment. The objectives of the course are to understand organizational leadership principles — to include leading diverse teams, leading change, and creating a vision, improve communication — both written and oral, enhance one's understanding of the contemporary operating environment, gain an appreciation for other actors in the national security arena; appreciate cultures of other military services as well as civilian organizations and agencies, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

**RTC1 3090 Military Theory and Tactical Leadership (0 Credit)**
Application of military domain knowledge, small until leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. Co-requisites: One of RTC1 1011, RTC1 1021, RTC1 2031, RTC1 2041, RTC1 3062, RTC1 4072 or RTC1 4082.

**Art and Art History**
Office: Shwayder Art Building, Room 132
Mail Code: 2121 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2846
Email: saah-interest@du.edu (jason.kellermeyer@du.edu)
Web Site: [http://www.du.edu/art/](http://www.du.edu/art/)

The School of Art and Art History (SAAH) teaches the technical processes of art, methods of analyzing and criticizing visual culture and the diverse histories of art. We educate students to think critically and conceptually, to express themselves creatively, to articulate their ideas clearly and to make significant contributions to the society in which they live. Our faculty promote these qualities through their creative activity, scholarship and public service.

The School of Art and Art History grants the following degrees:

- Bachelor of arts (BA) and bachelor of fine arts (BFA) degrees in studio art. Both studio degrees include exposure to ceramics, drawing, painting, photography, printmaking and sculpture.
- Bachelor of fine arts degree in pre-art conservation.
- Bachelor of arts and master of arts (MA) degrees in art history (with an option of a museum studies concentration at the graduate level).
There are two 4+1 options to allow motivated students to complete both an undergraduate and graduate degree in five years. In art history, a BA and MA in art history/museum studies is available. In studio studies, a BA or a BFA in studio art/MA in curriculum and instruction with certification to teach K–12 art is offered in partnership with the Morgridge College of Education.

Students seeking to transfer to the University of Denver with admission to SAAH are encouraged to contact the School with questions about degree programs and transfer credit options prior to applying. If admitted to the University and SAAH, all students enter as a BA in either art history or studio, depending on their interest. Students interested in pursuing a BFA in studio art or pre-art conservation apply under the guidance of a faculty member once enrolled in SAAH. Upon admission to SAAH for the fall quarter, students will be provided with instructions on how to submit a portfolio for merit-based scholarship consideration. Flexible options to minor in SAAH are also available.

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

60 credits of art, including the following:

A modern or contemporary art history course

An upper-division art history course

**Art electives**

32 credits of studio art courses of which two need to be at the 3000 level.

**Total Credits**

60

BA students may combine majors or minors within the School of Art and Art History, but no reduction in total credits will be allowed.

1 May be fulfilled with another world art course.

**Secondary Major**

60 credits. Same requirements as for BA degree.

**Minor Requirements**

The Studio Art Minor offers students the opportunity to focus on Studio Art courses specifically. Six courses are required for the minor, consisting of

- ARTS 1250 Drawing
- ARTS 1100 2D Approaches or ARTS 1200 3D Approaches
- four elective ARTS courses, at least two of which are upper-division (2XXX or above)
- one Art History upper-division course may be substituted for an upper-division Studio Art course if desired.

One of the 1000-level Common Curriculum classes can be applied to either the major or minor. BA students may combine majors or minors within the School of Art & Art History, but no reduction in total credits will be allowed.

**Art History**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

60 credits, including the following:
Art and Art History

48 credits in art history, as follows:

ARTH 2801 World Art I, ARTH 2802 World Art II, ARTH 2803 World Art III, ARTH 3300 Undergraduate Seminar, a Pre-17th Century art history course, a post-1700 and 24 more credits in art history.

Studio Art

Select 12 credits of studio art

Total Credits

60

BA students may combine majors or minors within the School of Art and Art History, but no reduction in total credits will be allowed.

Secondary Major

60 credits. Same requirements as for BA degree.

Minor Requirements

At Least One of the Following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

Total Credits

24

Additional Information:

• AP credit is apportioned according to University guidelines (http://www.du.edu/registrar/media/documents/apib20152016.pdf). Any impact on the world art course requirement will be determined by the undergraduate art history advisor, Scott Montgomery.

Pre-Art Conservation

If admitted to the University and the School of Art & Art History (SAAH), all students will be entered into the BA program in their area of interest. Students interested in pursuing a BFA in Studio Art apply under the guidance of a faculty member once enrolled in SAAH. Contact the School of Art and Art History (p. 146) for details.

Bachelor of Fine Arts Major Requirements

(189-192 credits required for the degree (p. 83))

Minimum of 116 credits of art. In addition to major coursework, 24 credits of chemistry, including the organic chemistry sequence (CHEM 2451, CHEM 2461, CHEM 2452, CHEM 2462, CHEM 2453, CHEM 2463) and 24 credits of language are required.

Art coursework includes the following:

<table>
<thead>
<tr>
<th>Code</th>

BA in Art

The following course plan is a suggested first and second-year schedule. The School of Art & Art History (SAAH) strongly recommends completion of the Art Foundations requirements to best prepare them for 2000-level studio coursework.

Individual course plans will vary based on incoming transfer credit, prerequisites, availability of courses, minors, and other scheduling factors. We welcome all students, including first-years, to attend quarterly open advising at the SAAH Advising Day to meet faculty and staff for recommendations about studio courses!
SAAH encourages first-year students to begin taking art major requirements immediately! The Art Foundations program consists of ARTS 1100 2D Approaches, ARTS 1200 3D Approaches, ARTS 1250 Drawing, ARTS 1300 Concepts. Multiple sections of 2D, 3D, and Drawing are offered every quarter. 2D and 3D are prerequisites for Concepts.

Total Credits: 97-98

1 Students that plan to pursue the BFA might want to take another common curriculum course instead.

2 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**ARTH 1010 Images of Culture (4 Credits)**
This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1020 Highlights of Medieval Art (4 Credits)**
The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1030 Highlights of Renaissance Art (4 Credits)**
The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1040 Sacred Spaces in Asia (4 Credits)**
This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1050 Highlights of American Art (4 Credits)**
This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist’s life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1060 Contemporary Art Worlds (4 Credits)**
Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.
ARTh 1988 Study Abroad Resident Credit (0-18 Credits)

ARTh 2801 World Art I: Prehistory to c. 1000 (4 Credits)
This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTh 2802 World Art II: c.1000-1700 (4 Credits)
This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTh 2803 World Art III: 1700 to the Present (4 Credits)
This is the third quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1700 to the present. Students will consider the crucial role of these image and objects in the formation of their respective historical and cultural contexts.

ARTh 2814 Medieval Art (4 Credits)
This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTh 2840 Survey of Asian Art (4 Credits)
An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTh 3300 Seminar in Art History (4 Credits)
This seminar is primarily designed to introduce students to the advanced research techniques and methods of art history. The thematic content of this course changes. Students develop skills to analyze scholarly literature, to refine research papers and to deliver oral presentations.

ARTh 3400 Portfolio* Professional Development and Creative Practices in Art History (4 Credits)
Portfolio is a professional development and creative practices course, introducing the practicalities of staple jobs for Art History majors and minors as well as the range of other possible career tracks and additional academic studies. The course combines an inquiry-based classroom experience with a signature seminar format and guest lecture series. Such a teaching+learning approach will not only improve your criticality but also strengthen your adeptness at investigation and analysis; deepen your knowledge of concepts, principles, and platforms for today’s creative industries; expand your professional networks; and provide hands-on, career-oriented experiences as you prepare your own portfolio for the contemporary marketplace.

ARTh 3652 Internship (1-4 Credits)
By arrangement, advanced undergraduate art history students may intern in an art gallery, small museum, historic house, non-profit art organization, archive or library. See guidelines and contract form in the School of Art and Art History office.

ARTh 3656 Curatorial Practicum (4 Credits)
Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

ARTh 3661 Learning in Museums (4 Credits)

ARTh 3701 Topics in Art History (1-4 Credits)
Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

ARTh 3702 Topics in Contemporary Art (4 Credits)
This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

ARTh 3813 Arts of the American West (4 Credits)
This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.
ARTH 3815 Puritan, Shaker, Hindu: Material Religion in North America (4 Credits)
The diversity of religious experience and spirituality is emphasized in this historical examination of image and artifact in North America. Beginning
with sacred indigenous arts and including Puritans, Shakers, Judaism, Mormons, Ghost Dance religion, Buddhists, Hindus, and others, this
class considers the ways in which different spiritual worldviews are expressed through and shaped by the art and objects people create and the
environments they build. It looks at the encounters between cultures in colonial and post-colonial contexts that result in ever changing material forms
of religion. Students learn through slide-lecture-discussions, reading, small group discussions, research papers or presentations, and field trips.

ARTH 3817 Gothic Art (4 Credits)
This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and
the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic
Cathedral - that quintessential window into the medieval world–its beliefs, aspirations, social and political realities.

ARTH 3818 Art of Renaissance Europe (4 Credits)
This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter,
this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in
fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound
knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This
class may be repeated for a maximum of 8 credits.

ARTH 3822 Northern Renaissance Art (4 Credits)
This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe
from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early
15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role
played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in
shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the
artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

ARTH 3823 17th-Century European Art (4 Credits)
This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the
seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans
Hals. This class may be repeated for a maximum of 8 credits.

ARTH 3825 Abstract Expressionism (4 Credits)
In the years immediately following World War II, American art flourished through a generation of artists whose work successfully moved beyond (and
at its best, matched) the substantial innovations of modern artists working in Europe around the time of World War I. From richly varied backgrounds
and equipped with a deep understanding of art history, these artists forged careers during the Depression and, though fiercely independent, united
in the late 1940s with the goal of establishing a new American modern art. Their monumental, highly singular, expressive abstractions (and near-
abstractions) gave rise to the movement called Abstract Expressionism, which dominated American painting in the 1950s and beyond.

ARTH 3832 19th-Century Art (4 Credits)
This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors,
printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-
Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural
milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

ARTH 3834 Global Contemporary Art (4 Credits)
This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the
lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will
also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify
and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the
international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction
and discussion of contemporary art.

ARTH 3838 Connoisseurship (4 Credits)
In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from
the museum's collection.

ARTH 3839 Topics in Modern Art (4 Credits)
Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

ARTH 3840 Sacred Arts of Asia (4 Credits)
This course explores the sacred art and architecture of Asia, including but not limited to India, China, and Japan. Major religious traditions, including
Buddhism, Hinduism, and Islam, are viewed through the lens of artistic development; indigenous religious traditions and philosophical constructs,
including Shintoism, Daoism, Confucianism, and Bon are also explored for their influence in art, architecture, and visual culture more broadly in and
between Asian regions.
ARTH 3862 Olmec to Aztec: Mesoamerica (4 Credits)
This course is an introduction to the art and archaeology of the indigenous peoples of Mesoamerica from about 2000 BC to AD 1521. The course explores the early royal art of the Olmec, the colossal pyramids of Teotihuacan, the manuscripts of the Mixtecs, and the imperial power of the Aztecs. This class presents a timeline of Mesoamerica and investigates how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, gender, and human sacrifice.

ARTH 3863 Kings and Cosmology: Maya Art (4 Credits)
This course is an introduction to the art and archaeology of the Maya from about 300 BCE to 1200 CE, although the beliefs and traditions of the living Maya will inform this study of the past. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos.

ARTH 3864 Buddhism(s) and Arts (4 Credits)
This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

ARTH 3867 The Circle and the Four Corners: Native North American Art (4 Credits)
This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures.

ARTH 3868 Art of the Andes (4 Credits)
This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

ARTH 3871 Women in Art (4 Credits)
This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

ARTH 3872 Introduction to Conservation (4 Credits)
This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

ARTH 3875 History of Collections (4 Credits)
This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)
What is 'Islamic' in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists' response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.

ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)
Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists' acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

ARTH 3910 Art History Travel (4 Credits)
A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.
ARTH 3988 Study Abroad Resident Credit (0-18 Credits)

ARTH 3991 Independent Study (1-10 Credits)
This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)
This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ARTS 1100 2-D Approaches (4 Credits)
Students are introduced to the elements of design, vocabulary of art and visual analysis. Explorations of the formal language of two-dimensional media include color, digital processes and mark making. Students also develop an understanding of compositional strategies, materials and processes. Verbal and written exercises supplement group activities and visual learning. Students explore across material boundaries. Increasing emphasis is placed on subjectivity, content and conceptual development. Lab fee. No prerequisites.

ARTS 1200 3-D Approaches (4 Credits)
Students are introduced to spatial thinking, the fundamentals of structure and construction, and the formal language of three dimensional forms. Applying a variety of materials, explorations include additive and subtractive methods, basic mold making, and an introduction to hand and power tools. Verbal and written exercises supplement the Studio environment and visual learning, and basic digital methods and color relationships are explored. Emphasis is placed on subjectivity, artistic choice and craft, alongside the beginnings of content and conceptual development. Lab fee. No prerequisites.

ARTS 1250 Drawing (4 Credits)
Fundamental drawing practice and history based on selected exercises, slide presentations, comprehensive group/individual critiques and workshops. Still-life and figure drawing are covered in this course. Projects focus on ways to comprehend and draw three-dimensional forms, with emphasis on conceptual issues and use of materials. This class is required of all majors in studio art prior to taking upper-level courses. It is also required of all EDP students.

ARTS 1300 Concepts (4 Credits)
Students integrate the skills and principles acquired from ARTS 1100 and ARTS 1200. Two topics are explored: 'Culture & Context' and 'Time, Space & Duration'. A greater complexity of studio activity is stressed through collaborative exercises and individual approaches to themes. Greater exploration of context and concept is expected, with emphasis on visual communication and personal awareness. Lab fee. Prerequisites: ARTS 1100 and ARTS 1200.

ARTS 1400 4D Approaches (4 Credits)
Students are introduced to the fundamental principles of four-dimensional art and design through a survey of concepts, techniques, and practices. Emphasis is placed on critical thinking, creative problem-solving, and experimentation through investigations of technological form and innovation, time and motion, and the ephemeral. Verbal and written exercises supplement group activities and visual learning. Lab fee. No prerequisites.

ARTS 1988 Study Abroad Resident Credit (0-18 Credits)

ARTS 2000 Open Media Studio (4 Credits)
This course is a topic driven, interdisciplinary research studio. Students investigate the topic and their relationship to it in a variety of media, and supplement their inquiry with research that occurs outside the classroom. An exploration of different processes, materials, expression and connection with the larger world is emphasized. Lab fee. All students must complete ARTS 1300 first.

ARTS 2045 Intermediate Drawing (4 Credits)
This course covers a wide range of materials and ideas, both traditional and experimental. Emphasis is divided between technical and conceptual issues, building on the skills established in ARTS 1250 Drawing. Lab fee. Prerequisite: ARTS 1250 or permission of instructor.

ARTS 2055 Color (4 Credits)
Color is a studio-based course focused on developing a more sophisticated and practical understanding of how colors act on us and vice versa, physiologically, psychologically, emotionally and culturally. It is designed specifically to enhance the abilities of people who work with color, be they painters, web designers, video artists, art historians, art therapists or conservators. However, because of the intentionally basic level of art skills involved, this is a course that is also taken by non-art majors with success. It includes in-class color work that retrained students in their ability to "see" more color and to become confident in their ability to interpret and manipulate color for any specific need. In addition, there is required reading on the physics of color, and discussion of the historical influences and legacy of color in primarily Western culture. Lab fee. Majors should complete ARTS 1250 and ARTS 1300 first.
ARTS 2115 Introduction to Oil Painting (4 Credits)
Introduction to Oil Painting builds on the ideas and skills learned in Drawing. Working with oil paint, students explore the possibilities of creating the illusion of three-dimensional form and space on the flat surface of a canvas. Emphasis is on really looking to heighten one's visual awareness of the physical world and seeing the effects light has on form, color and space. Students work from objects, the human form (models), imagination and art history. Critical abilities will be developed as students learn to think, speak and write about art. Discussions and critiques explore the social, political and the expressive possibilities of art-making. Students are given individual work-space to focus and develop their paintings. Students complete paintings in and out of class; contemporary and historical artists' work is explored, and students visit an area museum or gallery. Lab fee.

ARTS 2215 Relief Printmaking (4 Credits)
Concentration on selected areas of relief printmaking and related contemporary attitudes. This course covers relief, ranging from linoleum and woodcut processes to experimental approaches. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2225 Intaglio Printmaking (4 Credits)
Concentration on selected areas of Intaglio printmaking. Emphasis is placed on conceptual and technical development, and on personal expression through this medium. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2235 Screen Printing (4 Credits)
This course focuses on water-based screen printing and its applications in a workshop/studio intensive atmosphere. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

ARTS 2415 Introduction to Photography (4 Credits)
This class presents the basic concepts of photographic practice and discourse regarding; the historical, cultural and personal impact of photography. The goals are: introduce camera basics: digital photography workflow; (camera, image processing and digital printing); creative cell phone photography; online book publishing; development of an artistic and aesthetic way of seeing; engagement in critical analysis of photography; and most importantly, have fun learning a new skill. Participants will practice basic principles of photography, such as; camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing tools. Emphasis will be on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited selection of prints, or published online. Creation of a personal website will be encouraged. Community engaged collaboration may be a component of this course. Collaboration with another DU class may also be a component. No prerequisites. MUST HAVE A DIGITAL CAMERA WITH MANUAL METERING CAPABILITY. If you are unable to meet this requirement, please contact the professor. Lab fee. Art majors must complete ARTS 1250 and ARTS 1300 first.

ARTS 2445 Digital Photography and Experimentation (4 Credits)
This course is designed to improve student's skill level as an artist/photographer, both technically and conceptually. Projects are viewed and discussed in critique sessions. Students must have a digital camera with manual metering capabilities. Lab fee. Prerequisite: ARTS 2415 Introduction to Photography or permission of instructor. This requires demonstrating your proficiency in photography via a portfolio or website.

ARTS 2515 Introduction to Ceramics (4 Credits)
This course investigates the unique, material nature of clay as a medium for exploring artistic concepts and ideas. Studio assignments and demonstrations introduce several basic handbuilding methods as well as glazing and firing techniques. This course provides the fundamentals upon which students build their own direction and invention. Emphasis is on experimentation and individuality. Lab fee. Majors must complete ARTS 1250 and ARTS 1300 first.

ARTS 2535 Ceramics: Food and Function (4 Credits)
Gastronomy is the study of the relationship between culture and food. In this class, we explore gastronomic objects associated with food, both functional and sculptural. The importance of food is intimately involved with our concepts and design choices. Studio assignments and demonstrations serve as springboards for the student's own research and interpretations. Students use many different technical approaches such as throwing, handbuilding, casting as well as mixed media. Ultimately, students investigate, create and EAT! Lab fee. Prerequisite: ARTS 2415 Intro to Photography or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

ARTS 2555 Ceramics: Multiples (4 Credits)
This course investigates the many aspects of working with repetition and multiples. Assignments fall under the headings of Repetition, The Series, The Unit and The Collection. Students learn mold making and slipcasting techniques in addition to handbuilding and glazing. Students develop ideas on a conceptual level first and then move into building their pieces, combining the appropriate construction methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

ARTS 2565 Ceramics: Surface (4 Credits)
This course explores the ceramic surface as a canvas for decoration and narrative in both functional and sculptural forms. Students do extensive exploration and experimentation combining traditional ceramics techniques with those of drawing and printmaking. Students develop ideas on a conceptual level first and then move into creating their pieces, combining the appropriate methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.
ARTS 2615 Introduction to Sculpture (4 Credits)
This course offers a supportive but critical context to extend students’ understanding of three dimensional form and its creation. Building on construction methods and spatial relationships formed in ARTS 1200, the course emphasizes the experiential and conceptual aspects of sculpture, and the interrelationship of ideas, form, material and technical means. Lab fee. Prerequisite: ARTS 1200. Majors should complete foundations sequence first (ARTS 1100, ARTS 1200, ARTS 1250, ARTS 1300).

ARTS 2645 Mold Making and Casting (4 Credits)
This course explores molding and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced to techniques for reproducing form such as open face molds, two-part molds, and castings from life. Students learn to express ideas by exploring the conceptual significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content introduces students to contemporary artists and critical dialog.

ARTS 2701 Topics in Studio Art (4 Credits)
Selected topics in studio art research. May be repeated to a maximum of 12 credits.

ARTS 2775 Integrated Practice (4 Credits)
The overall approach of Integrated Practice (IP) is to offer students ways to articulate their individual "non-art" degree interests and knowledge as artistic outcomes. Modeled as a Studio course in format (curiosity, research, and making) the course encourages the expression of knowledge in other areas (Biology or International Studies, for example) through the vehicle of art. Additionally, the course offers students opportunities to pursue and further existing art skills and experiment with new ones, so choices of medium and process are flexible. For example, if a student enjoys photography or sculpture, there will be options to explore the projects using those mediums or technical approaches. Projects in IP will examine different means to translate non-visual knowledge to that which is visual or tangible. Examples may include ways to visualize "data" (broadly), exploring the approaches of mapping to examine the real and the imaginary, and more site-specific/interactive means of addressing ideas of place. There are options for 2 dimensional, 3 dimensional and virtual explorations of ideas, building further bridges between disciplines. Overall, the course encourages a holistic synthesis between "non-art" knowledge (academic or otherwise) and art making practice. Course pre-requisites include at least two prior ARTS (Studio) courses and/or permission of the instructor.

ARTS 2988 Study Abroad Resident Credit (0-18 Credits)

ARTS 3055 Advanced Drawing (4 Credits)
Working with a variety of materials and techniques, students hone their drawing skill and at the same time create finished drawings defined by content. Problems posed encourage independent thinking, experimentation and the development of a personal technical base. Lab Fee. Prerequisite: ARTS 2045 or ARTS 3065 or permission of instructor.

ARTS 3065 Life Drawing (4 Credits)
An intensive course in drawing the human figure, clothed and unclothed, to explore the human form in terms of proportion, movement, light and shadow, composition, color and personal expression. Students experiment with a range of materials. Lab Fee. Prerequisite: ARTS 1250 or permission of instructor.

ARTS 3125 Figure Painting (4 Credits)
An intensive course in painting the human body—the most timeless subject of art. Students work mainly in oils and experiment with a variety of surfaces and techniques. Students also investigate line, proportion, light and shadow, composition and color. Final project: life-size painting of two figures. Lab fee. Prerequisite: ARTS 2115 or ARTS 3065 or permission of instructor.

ARTS 3145 Painting Workshop (4 Credits)
Concentration on selected techniques and approaches to painting. Topics change. Course may be repeated to a maximum of 12 credits. Lab Fee.

ARTS 3245 Printmaking Workshop (4 Credits)
This upper-level course focuses on various topics and processes as the definition of contemporary printmaking evolves. Subjects such as lithography or intermediate screen printing, photo-based prints, or current themes relevant to printmaking are possible core formats for the course. Group and individual critiques, digital image presentations and examination of prints and reproductions. Lab fee. Prerequisites: sophomore standing and ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first. Course may be repeated to a maximum of 12 credits.

ARTS 3347 Professional Practice (4 Credits)
This course is required of BFA studio art majors and is open to BA art majors. It covers practical artist survival skills, including resume and cover letter writing, exhibition proposals, documentation of art work, artist statements, portfolio development and professional presentation of self and work. The course is reinforced by field trips and guest speakers who introduce both academic and non-academic art experiences and professions. Lab fee.

ARTS 3348 Senior Practicum in the Visual Arts (4 Credits)
Required for all studio BFA candidates. Students are expected to begin research and investigation for work that may be included in the BFA exhibitions. Emphasis is placed on a three-pronged assessment consisting of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

ARTS 3349 Senior Seminar in the Visual Arts (4 Credits)
Required for all studio BFA candidates. Students pursue work individually and demonstrate a synthesis of ongoing research, demonstrate development and participate in structured weekly critiques with other studio BFAs and faculty. This work is a meaningful extension of fall and winter quarters and extends beyond the installation of BFA exhibition. Emphasis is placed on discussions and critiques centered on the three-pronged assessment initiated in winter quarter of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.
ARTS 3450 Portrait Photography (4 Credits)
This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. The class focuses on the
genre of photographic portraiture. Through labs and classroom lectures, many interpretations of portraiture are covered. Projects are viewed and
discussed in critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisites: ARTS 2415
and any one of the following: ARTS 2425, ARTS 2435, ARTS 2440, ARTS 2445, or permission of the instructor (requires demonstrating proficiency in
photography via a portfolio or website).

ARTS 3452 Photography and Society (4 Credits)
This course celebrates the enduring tradition of social documentary photography and visual storytelling. Participants will practice basic principles
of photography, such as: camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing
tools. Contemporary Social Documentary Photography practice will be positioned within the context of the history of photography. Emphasis will be
on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited
selection of prints, or published online. Creation of a personal website will be required. Community engaged collaboration will be a component of this
course. Collaboration with another DU class may also be a component. No prerequisites. This course may satisfy one requirement for a Photography
and Society Certificate. “Photography and Society.” Students must have a digital camera with manual metering capability; contact the professor if you
cannot meet this requirement.

ARTS 3455 Photography Workshop: Alternative Processes in Photography (4 Credits)
Concentration on selected techniques and approaches to photography. Topics change. Projects are viewed and discussed in critique sessions.
Students must have a film or digital camera. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisites: ARTS 2415 Introduction to
Photography or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

ARTS 3555 Ceramic Workshop (4 Credits)
Concentration on selected techniques and experimental approaches to ceramics. Topics change. Course may be repeated to a maximum of 12 credits.
Lab fee. Prerequisite: ARTS 2515 or approval of instructor.

ARTS 3645 Advanced Mold Making & Casting (4 Credits)
This course explores moldmaking and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced
to advanced techniques for reproducing form such as multiple part molds and rotocasting. Students hone their ideas by exploring the conceptual
significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content supports in-depth
student research into contemporary art and fosters critical dialog.

ARTS 3655 Sculpture Workshop (4 Credits)
Concentration on selected techniques and experimental approaches to sculpture. Topics change. Course may be repeated to a maximum of 12 credits.
Lab fee.

ARTS 3701 Topics in Studio Art (4 Credits)
Selected topics in advanced studio art research. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: instructor's permission.

ARTS 3865 Senior Project: Conservation (4 Credits)
Required for, and limited to, BFA pre-art conservation majors. It is normally taken spring quarter of the senior year. The student works with a
professional art conservator on a major conservation project that will become part of his or her portfolio and will be exhibited in the senior BFA
exhibition.

ARTS 3915 Advanced Problems in Art (1-5 Credits)
This course is for students who have completed all 3000-level courses in a given area of concentration to show proficiency and wish to pursue more
advanced work. A proposal form must be obtained from the art office and signed by the instructor and the Director of the School of Art and Art History
before the student registers for this course. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

ARTS 3960 Conservation Internship (4 Credits)
The internship is normally taken during the fall of a major’s senior year, under the direction of a professional Conservator, either in private practice or
in a conservation department. Students should work closely with their advisor to arrange the Conservation Internship during the quarter before it will
be taken. The student works on a wide variety of materials and problems in conservation during this internship, gaining as varied an experience as
possible and developing a professional portfolio. Must be a BFA major in Pre-Art Conservation.

ARTS 3966 Studio Art Travel (1-4 Credits)
A travel course to selected locations to visit galleries, museums and artists’ studios. Location and content of course change. Variable credit. May be
repeated to a maximum of 12 credits. Lab fee.

ARTS 3980 Studio Art Internship (1-4 Credits)
The student is responsible for locating the internship and gaining approval for it, using the internship guidelines and contract form in the art
office. Typical internships have been located in commercial galleries, fine art printmaking houses, professional artists’ studios and non-profit arts
organizations.

ARTS 3988 Study Abroad Resident Credit (0-18 Credits)

ARTS 3991 Independent Study (1-6 Credits)
Supervised studies not addressed in this catalog of classes. Advanced projects must be faculty approved. Permission/registration form is available
from the Office of the Registrar.
ARTS 3999 Exit Survey (0 Credits)
All majors in the School of Art and Art History are required to register for ARTS 3999 during their final quarter of study at the University of Denver. The course is completed by taking the online exit survey. It does not bear credit; no tuition is assessed and no grade is given. Majors cannot graduate until they complete this requirement. The information from this anonymous survey is used by the school to improve its programs. We greatly appreciate our students’ help in this regard.

Asian Studies Program
Office: Sturm Hall, Room 345
Mail Code: 2000 E. Asbury Ave, Denver, CO 80208
Phone: 303-871-6663
Email: Hilary.Smith@du.edu
Web Site: http://www.du.edu/ahss/areasofstudy/joint_dual_programs/asian_studies

The Asian Studies Program takes a multi-disciplinary approach to the cultures, history, literature and languages of China and Japan, with a minor focus on Indian music and religion. We train students to think and write critically about Asian cultures; to conduct original research on issues that are relevant to one or more parts of Asia; and to develop international and intercultural knowledges and skills that are necessary in order to engage meaningfully with people and issues relevant to Asia.

Majors may find their training valuable in a wide range of careers, given that the tiny minority of graduates of American universities who are skilled in Asian languages and cultures rank among the most desirable employees for many public- and private-sector organizations. Careers for majors include government service, education, journalism, international business and any other job requiring knowledge of and cultural understandings about China or Japan. The academic training that majors receive is competitive with similar programs at peer institutions across the United States, providing a firm basis for applying to graduate programs.

Students are required to take at least two years of Japanese, Chinese or another approved Asian language. First-year language courses may not be used to fulfill this requirement. However, the requirement may be waived for transfer students who have already had at least three years of Asian language training or for students who demonstrate competency in the language. The requirement is also waived for native speakers of Japanese, Chinese or another approved Asian language; such students complete 60 credits of non-language study instead.
Asian Studies majors are strongly encouraged to study in Asia for up to one year; excellent programs exist in Japan, South Korea, China, India and many other countries. In many cases, students can use their financial aid and receive University of Denver course credit for successfully completing study abroad programs. Interested students should consult with their Asian Studies advisor and the Study Abroad Office.

A student wishing to pursue an Asian studies major must make an appointment with the program director, Hilary Smith (https://www.du.edu/ahss/history/facultystaff/smith.html), who assigns an advisor according to the student’s main interests. The student meets quarterly with their advisor for approval of courses taken for the major.

**Electives** 12
Select three courses from the list of major electives

**Total Credits**

24

**Requirements for Distinction in the Asian Studies Major**

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Nomination by an Asian Studies faculty member or the program director
- Submission of a portfolio of representative work completed in the major
- Completion of a thesis project that goes beyond a normal Asian Studies senior thesis

**BA in Asian Studies**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

¹ Majors are required to take two years of intermediate and advanced Japanese, Chinese or another approved Asian language. Please note that 1st-year language study may NOT be counted for credit toward the major.

² INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**ASIA 2102 Topics in Chinese Art (4 Credits)**

Selected topics in Chinese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3841.

**ASIA 2105 Topics in Japanese Art (4 Credits)**

Selected topics in Japanese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3842.
ASIA 2701 Topics in Asian Studies (1-4 Credits)

ASIA 2714 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)
This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to studying the guru/si#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2114.

ASIA 2850 Imperial China (4 Credits)
In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term. Cross listed with HIST 2850.

ASIA 3701 Topics in Asian Studies (1-4 Credits)
Specialized topics in Asian Studies. Topic varies per offering. Check with the Asian Studies program director for more information. Open to majors and non-majors. May be repeated for credit.

ASIA 3875 Chinese Science and Global History (4 Credits)
This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected. Cross listed with HIST 3875.

ASIA 3901 Asian Studies Directed Readings (4 Credits)
Students will read deeply in a specific field of scholarship directed by a core faculty member in the Asian Studies program and will write a methodological essay that discusses the scholarship in their chosen field of research. This is the first part of a required, two-quarter sequence that will culminate in the senior thesis. Enrollment is restricted to Asian Studies majors.

ASIA 3902 Asian Studies Senior Thesis (4 Credits)
Students will pursue a primary document research project under the supervision of their core faculty member in Asian Studies. The goal of this course is the writing and completion of the senior thesis in Asian Studies. Prerequisite: ASIA 3901.

ASIA 3980 Asian Studies Internship (1-4 Credits)
Provides academic credit for off-campus internships in areas related to the Asian Studies major. The purpose of the internship is the gain valuable work experience, explore various career options, develop job competencies and/or apply theoretical knowledge to practical concerns of the world. Must be an Asian Studies major and have cumulative GPA of 3.0 and have taken at least two Asian Studies content courses, not counting language training. Requires approval of Asian Studies director.

ASIA 3991 Independent Study (1-4 Credits)

Biological Sciences

Office: F.W. Olin Hall, Room 102
Mail Code: 2190 E. Iliff Ave. Denver, CO 80208
Phone: 303-871-3661
Fax: 303-871-3471
Email: biology@du.edu (Biology@du.edu)
Web Site: http://biology.du.edu (https://www.du.edu/nsm/departments/biologicalsciences/)

The Department of Biological Sciences offers five distinct life sciences majors provided by a nationally recognized faculty that excels in teaching and research. Many faculty members have received University wide recognition for outstanding teaching. Research programs are funded by grants from agencies such as the National Institutes of Health and the National Science Foundation.

The up-to-date and highly integrated curriculum provides a sound foundation in molecular, cellular, developmental, organismal, ecological and environmental biology. The curriculum prepares students for futures in medicine, dentistry, veterinary medicine, graduate programs in the life sciences, graduate programs in health-related fields like physical therapy or physician assistant programs, ecology, environmental science, conservation biology and science education at the secondary school level.

Programs of Study in Biological Sciences
The department offers majors in the following areas: biological sciences, molecular biology, physiology in health and disease, ecology and biodiversity, and integrated sciences. We also offer a minor in human health science and systems.
Biological Sciences

The biological sciences major provides a curriculum that encompasses the spectrum of disciplines in the life sciences.

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 82))

45 credits of biology. Requirements include:

<table>
<thead>
<tr>
<th>Code</th>

Calculus I and Calculus II and Calculus III

or

MATH 1951 & MATH 1952 & BIOL 2090
Calculus I and Calculus II and Biostatistics

or

MATH 1951 & MATH 1952 & PSYC 2300
Calculus I and Calculus II and Introduction to Statistics

Total Credits 67

1 Only six credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

**Minor Requirements**

20 credits of biology. Requirements include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1010 &amp; BIOL 1020</td>
<td>Physiological Systems and Physiological Systems Lab</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 1011 &amp; BIOL 1021</td>
<td>Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab</td>
<td>5</td>
</tr>
</tbody>
</table>

10 credits of courses at the 2000 level including one from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 2120 &amp; BIOL 2121</td>
<td>Cell Structure and Function and Cell Structure &amp; Function Lab</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 2510 &amp; BIOL 2511</td>
<td>General Genetics and General Genetics Lab</td>
<td>5</td>

</tbody>
</table>
Molecular Biology Major

The Molecular Biology major features upper-division courses that share the common theme of gene expression in biological systems and cellular function. This major is intended for students interested in professional postgraduate programs (medicine, dentistry, veterinary medicine), graduate programs in the life sciences and careers in the biotech industry.

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 82))

44 credits of biology. Requirements include:

**Additional Requirements**

Two minors are required for the BS, one of which must be Medical Physics.

In addition, one year of Chemistry and one year of Mathematics are required.

**Medical Physics minor is required**

Only six (6) credits of BIOL 3995 Undergraduate Research and/or BIOL 3991 Independent Study may be counted toward the 50-credit requirement for the major.
Requirements for Distinction in the Major in Biological Science

- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3995 Independent Research or BIOL 3991 Independent Study)
- Completion of a thesis

Requirements for Distinction in the Major in Molecular Biology

- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3995 Independent Research or BIOL 3991 Independent Study)
- Completion of a thesis

Requirements for Distinction in the Major in Ecology and Biodiversity

- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3995 Independent Research or BIOL 3991 Independent Study)
- Completion of a thesis

Requirements for Distinction in the Major in Physiology in Health and Disease

- Minimum 3.5 cumulative GPA
- At least three quarters of research (BIOL 3995 Independent Research or BIOL 3991 Independent Study)
- Completion of a thesis

The course plans below are intended to give students an example of how they might complete their degree requirements in the first two years. Please note that plans can vary greatly in year 2, and students should work with their Biology advisor to determine their academic path.

Total Credits: 97

1 This "slot" will be needed for biology in Winter and Spring quarters, so do not start another full-year sequence during Fall quarter.

BIOL 1005 Perspectives-Veterinary Medicine (2 Credits)
Introduction to career areas in veterinary medicine through lectures, guest speakers and demonstrations. The credits for this course are general elective only. They do not apply to any major or minor in NSM or to SI-NPW of the common curriculum. Prerequisites: BIOL 1010 and BIOL 1020, or by departmental permission.
BIOL 1010 Physiological Systems (4 Credits)
The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)
The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

BIOL 1020 Physiological Systems Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

BIOL 1220 Molecules to Humankind I (4 Credits)
First class in a three-quarter sequence for non-majors that examines the mechanisms that sustain life. Emphasis is placed on understanding the human body at the molecular, cellular and physiological levels. In the fall quarter our discussions start with the atom and basic chemistry. We next consider the properties of complex molecules, including DNA, proteins, carbohydrates and lipids, in order to see how such molecules are used and organized by living organisms. Our discussions of large and complex molecules lead naturally to the basic unit of life, the cell. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1221 Molecules to Humankind II (4 Credits)
Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1222 Molecules to Humankind III (4 Credits)
Third class in a three-quarter sequence focuses for non-majors on cell biology, genetics, and human reproduction and development. After a review of cell structure and function, focusing on how cells are capable of replication with modification, the mechanisms by which information is passed on from one cell to another and from one generation to the next are considered. The second half of the quarter concerns sexual reproduction and early development. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1260 Sustaining Life I (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student’s health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

BIOL 1261 Sustaining Life II (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student’s health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.
BIOL 1262 Sustaining Life III (4 Credits)
A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

BIOL 1270 Living in the Microbial World I (4 Credits)
Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

BIOL 1271 Living in the Microbial World II (4 Credits)
For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

BIOL 1272 Living in the Microbial World III (4 Credits)
In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. Honors only. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

BIOL 1988 Study Abroad Resident Credit (0-18 Credits)

BIOL 1990 Independent Study (1-5 Credits)

BIOL 2010 General Ecology (4 Credits)
Topics in ecosystems, population and community ecology, as well as behavioral ecology. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

BIOL 2011 General Ecology Lab (1 Credit)
Exercise and experimentation to compliment the lecture. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021 with a minimum grade of D-.

BIOL 2090 Biostatistics (4 Credits)
Statistics in biological research. Computer-aided statistical analysis and hypothesis testing focusing on experiments and data unique to the biological sciences. Cross listed with BIOL 4090.

BIOL 2120 Cell Structure and Function (4 Credits)
Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. Prerequisites: BIOL 1011. Corequisite: BIOL 2121 lab section. CHEM 1010 prerequisite or corequisite.

BIOL 2121 Cell Structure & Function Lab (1 Credit)
Exercises and experimentation to complement lecture material. Lab fee associated with this course. Co-requisite: BIOL 2120.

BIOL 2320 Andean Landscapes (4 Credits)
This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in the Andes of Peru through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits and occurs during winter interterm. Over a period of 11 days we will visit the cities and surroundings of Lima, Arequipa, and Cusco, Peru where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The Andean environment offers unique challenges for environment and societies and by understanding the locations and patterns of human activity in the Andes, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in situ critical thinking skills and the promotion of cultural diversity and global awareness. This course counts toward the sustainability minor and the intercultural global studies minor.

BIOL 2510 General Genetics (4 Credits)
Mechanisms of heredity with application to all forms of life. Topics include classical genetics (mendelian inheritance, meiosis, epistasis, recombination gene mapping, chromosomal mutations) and an introduction to modern molecular genetics (DNA structure and function, gene expression and regulation). Prerequisites: BIOL 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.
BIOL 2511 General Genetics Lab (1 Credit)
The laboratory component of BIOL 2510. COREQUISITES: BIOL 2510 PREREQUISITES: BIOL 1020 AND BIOL 1021 RECOMMENDED PREREQUISITES: BIOL 2121.

BIOL 2825 Biogeographies of Conservation in Serengeti & Zanzibar (4 Credits)
This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem and Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfils biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements.

BIOL 2988 Study Abroad Resident Credit (0-18 Credits)

BIOL 3005 Science Communication (4 Credits)
Science communication has shaped, and continues to shape, the world in which we live (e.g., why you wash your hands, why we don’t feed bears in U.S. national parks anymore, and why some students imagine themselves becoming scientists or not). Sharing how science is conducted and how new knowledge is generated through the scientific method also plays a critical role in our future: creating engaged citizens, shaping the next generation of scientists, increasing diversity and diverse perspectives in the sciences, informing policy-makers and lawyers, combatting misconceptions, increasing trust of scientists, and guiding our own individual behaviors. But, like any other complex skillset, science communication takes practice. This course provides students with a range of resources and skills for effective, ethical, and evidence-based communication of complex socio-scientific issues. It provides a supportive environment in which students will practice and refine their science communication through peer feedback and engagement with real audiences. The focus is on cultivating practical communication skills, with emphasis on effective speaking, writing and exhibition of scientific topics with the variety of audiences students will encounter in their future careers. Course readings, activities, and final projects also examine how identity shapes both the science we do and the lenses we and other stakeholders bring to communication tasks. The course is hybrid, highly interactive, and writing-intensive.

BIOL 3010 Evolution and Speciation (4 Credits)
Theories and supporting evidence explaining evolution from origin of universe to complex interrelationships of species. Prerequisites: BIOL 1010, BIOL 1011 and BIOL 2510.

BIOL 3025 Science and the Law (2,4 Credits)
This course will focus on the intersection of science and US law. Four major areas of focus that will be covered are the admissibility of expert witnesses / scientific evidence in court; how advances in forensic genetics and national DNA databases raise legal issues pertaining to expectations of privacy and the standards for reaching a verdict; the impact of US Supreme Court opinions on the patenting of genes used as diagnostic markers for human disease and the legal landscape surrounding issues of evolution and creationism/intelligent design. Students will then explore how the law impacts their own areas of scientific interest. The goal of this course is to increase our understanding as scientists of how advances in science impact and are impacted by the US judicial system. PREREQUISITES: BIOL 1010 AND BIOL 1011.

BIOL 3035 Invasive Species Ecology (4 Credits)
This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

BIOL 3044 Coral Reef Ecology (3 Credits)
Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef reef conservation. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).

BIOL 3045 Coral Reef Ecology Lab (1 Credit)
Ecology of coral reefs laboratory to supplement lecture material; travel to the Caribbean over spring break to observe coral reefs firsthand; introduction to research methods. SCUBA certification and permission of instructor required. A travel and dive fee is associated with this course.

BIOL 3055 Ecology of the Rockies (4 Credits)
A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 210 or permission of instructor.

BIOL 3070 Ecological Field Methods (4 Credits)
Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 210.
BIOL 3085 Insect Ecology (4 Credits)
A general introduction to insect biology and the science of entomology. Arthropods are the most diverse group of animals on Earth and insects account for more than half of all known living organisms. This course explores the biodiversity of insects on Earth, insect morphology and physiology. The evolutionary history and taxonomy of key orders of insects is emphasized as well as the importance of insects to our everyday lives. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010.

BIOL 3090 Microbial Ecology (4 Credits)
Interactions among microorganisms and their environment. Impact of ecological principles on microbial diseases, pollutant degradation, nutrient cycles and global change. Prerequisites: BIOL 1010, BIOL 1020, AND BIOL 2510.

BIOL 3095 Global Change Ecology (4 Credits)
Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth’s organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITES/COREQUISITES: BIOL 2090.

BIOL 3110 Special Topics: Biology (1-5 Credits)
Topics of special interest to teaching/research faculty of department presented as needed to complement and expand existing curriculum. May be repeated for credit. PREREQUISITE: BIOL 1010.

BIOL 3120 General Microbiology (4 Credits)
Fundamental principles of microorganisms in the world and in disease; role of bacteria in biological phenomena. Includes laboratory. Lab fee associated with this course. Prerequisite: BIOL 2120.

BIOL 3145 Cellular and Molecular Biology of Cancer (4 Credits)
This course examines the mechanisms that underlie the development and progression of cancer. The cellular and molecular events that drive uncontrolled cell proliferation and eventual metastasis of tumors are discussed. Prerequisite: BIOL 2120.

BIOL 3150 Intracellular Dynamics (4 Credits)
Focuses on spatial and temporal control of intracellular processes with an emphasis on neuronal and endocrine cells. Topics include vesicular traffic, protein targeting, dynamics and spatial organization of signaling complexes. Emphasis on modern techniques of cell and molecular biology with examples from primary literature. Prerequisite: BIOL 2120.

BIOL 3160 Biophysics: Ion Channels & Disease (4 Credits)
Examines ion channel structure and function and the ways in which this information provides insight into human disease. The focus is on the use of biophysical techniques in combination with molecular and genetic analysis of channel genes. General Physics recommended. Prerequisite: BIOL 2120.

BIOL 3230 Nutrition (3 Credits)
Investigation of metabolism, all nutrients and various applications of nutrition to sports and healthy living. Prerequisite: BIOL 3250.

BIOL 3241 Anatomy and Physiology of the Skeletal, Nervous and Muscular systems (5 Credits)
This course is designed to introduce students to the fundamental concepts, content and scientific bases of Skeletal, Muscular, and Nervous system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisites: BIOL 2120.

BIOL 3242 Human Anatomy and Physiology - Systems of homeostasis (5 Credits)
This course is designed to introduce students to the fundamental concepts, content and scientific bases of Cardiovascular, Respiratory, Urinary, Digestive, Immune and Reproductive system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisites: BIOL 2120.

BIOL 3245 Human Anatomy (5 Credits)
This course is designed to introduce you to the fundamental concepts, content and scientific bases of human anatomy. Specific content covered in the course includes: the Language of Anatomy, Body Organization, Histology, and Integument, Skeletal, Muscular, Nervous, Cardiovascular, Respiratory, Urinary, Digestive and Reproductive anatomy at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisite: BIOL 2120 Cell Structure and Function.

BIOL 3250 Human Physiology (5 Credits)
Functional relationships of human organ systems with coordinated laboratory activities and experiments that demonstrate and test physiological principles. Lab fee associated with this course. Prerequisites: BIOL 1010.

BIOL 3251 Exercise Physiology (4 Credits)
This course will cover exercise physiology topics included but not limited to: energy systems, physiological response to exercise/training, and exercise programming. A strong background in human physiology is recommended. Prerequisite: BIOL 1010.
BIOL 3252 High Altitude Physiology (4 Credits)
This is a one quarter course intended for advanced biology and human health and performance majors with an interest in high altitude physiology in health and disease. This course builds upon basic understanding of human physiology and explores adaptations that occur under conditions of high altitude exposure, training and living. It will explore in greater depth the mechanisms of physiologic adaptations to short and long-term exposure to high altitude environments for conditions of improved health and also health deficits and disease states. In addition to didactic content, students will complete evaluation of primary literature and final project related to high altitude physiology. Prerequisite BIOL 3250 Human Physiology.

BIOL 3253 Environmental Physiology of Animals (4 Credits)
By studying species across the animal kingdom, we will learn about the vast array of physiological strategies that have evolved to help animals maintain homeostasis in the face of varied environmental challenges. We will cover foundational principals of animal physiological ecology and evolution, as well as new and exciting discoveries through weekly discussions of primary literature. We will focus primary literature discussions on "extreme environments" as Earth's harshest landscapes provide exciting and powerful examples of adaptations of physiological systems. This course will be delivered through a combination of lectures, active learning assignments, readings from the scientific literature, and group discussions. By the end of this course, you will develop a new perspective on the ecological and evolutionary factors that shape physiological similarities and differences among the animals of our planet (including humans). Prerequisites: BIOL 1010 and BIOL 1011.

BIOL 3256 Advanced Human Anatomy & Physiology (5 Credits)
This one quarter course is intended for advanced biology and physiology majors with an interest in the anatomical structure and physiological functioning of body systems. This course builds upon the Human Anatomy and Human Physiology courses that are prerequisites. This advanced course will explore in greater depth understanding mechanisms of action of major body systems and elaborate on the relationship between structure and function. In addition to didactic content, students will complete evaluation of primary literature and design laboratory experiments to test hypotheses of interest. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, models, dissections, inquiry-based learning, experimentation and a variety of assessments. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. Please note that the lab portion of this course requires dissection. Prerequisites: BIOL 3245 and BIOL 3250.

BIOL 3250 Nutrition (3 Credits)
From physiological and biochemical perspectives, this course explores the relationships of energy metabolism, nutrients, vitamins and minerals to human health. Prerequisite: BIOL 3250.

BIOL 3280 Intro to Pathophysiology (4 Credits)
This course is designed as an introduction of the mechanisms and consequences of disease based on physiological dysfunction in the major organ systems. The course will focus on the fundamental concepts and processes of human pathophysiology through exploration of the unique physiological roles of several body systems, how these systems have important integrative relationships that underlie the overall physiological functioning of healthy humans, and how system function is altered in disease and the clinical manifestations of these changes. Prerequisite: BIOL 2120. A course in Human Physiology would be recommended.

BIOL 3350 Conservation Biology (5 Credits)
Conservation Biology is the study of documenting the earth's biodiversity, its threats, and how it may be protected. It is a multidisciplinary science within ecology with contributions from environmental chemistry, geography, sociology, and political science, among other fields. In this class students learn the language of conservation biology, the methods used by conservation biologists, and the nuances of current issues. In class, material is learned through both lecture and interactive exercises in the classroom portion, with hands-on practice in techniques and applications during the lab. Prerequisite: BIOL 2010.

BIOL 3410 Animal Behavior (4 Credits)
This course examines animal behavior from an evolutionary and ecological perspective. The course provides the background needed to understand behavioral evolution, including a focus on the inheritance of behavior, natural selection, sexual selection, and kin selection. This class studies the evolution of a variety of behaviors, including communication and displays, mate choice, parental care, cooperation, mating systems, social behavior, habitat selection, foraging, and anti-predator behavior. The emphasis is on theoretical principles, design of experiments, and interpretation of data. Prerequisites: BIOL 1010 and BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITE: BIOL 2090.

BIOL 3560 Molecular Biology Laboratory (4 Credits)
Laboratory based course that covers techniques in gene excision, cloning and reinsertion and gene sequencing. Lab fee associated with this course. Prerequisite: BIOL 2510, or permission of instructor.

BIOL 3570 Proteins in Biological Systems (4 Credits)
Proteins considered in their biological setting; protein synthesis and degradation; survey of protein functions in vivo; introduction to protein biotechnology. Prerequisites: BIOL 2120.

BIOL 3610 Developmental Biology (4 Credits)
Processes and mechanisms of development, exemplified by higher animal embryogenesis, with consideration of microbial model systems. Prerequisite: BIOL 2510 and BIOL 2120.

BIOL 3615 Blood Vessel Development and Disease (4 Credits)
This course details the underlying biological programs during blood vessel development and mechanisms that lead to vascular pathologies. The class will incorporate aspects embryology, signaling transduction, and genetics as well as current techniques in developmental biology to comprehensively cover how blood vessels are formed embryonically. Additionally, we will discuss in detail how defects in blood vessel-related signaling programs later manifest into disease. Prerequisite for this course is Cell Structure and Function (BIOL2120/2121).
BIOL 3630 Cell Biology of Development (4 Credits)
Every organism has a stereotypical shape, but how does this shape arise? This course examines the cellular and molecular mechanisms that direct the forming of body and tissue shape. Prerequisite: BIOL 2120.

BIOL 3640 Introductory Neurobiology (4 Credits)
Organization and function of vertebrate central nervous system; nature of action potential, biochemistry of neurotransmitters, neuropeptides, functional anatomy of nervous system, phylogeny of nervous system. Prerequisite: BIOL 2120.

BIOL 3641 Systems Neuroscience (4 Credits)
Structure and function of the brain and spinal cord, emphasis on functional systems including sensory perception, motor control and consciousness. Prerequisite: BIOL 3640.

BIOL 3642 Neuropsychology (4 Credits)
How psychoactive drugs exert their effects on the nervous system; drugs of abuse and drugs used in the treatment of psychotic and neurodegenerative disorders. Prerequisite: BIOL 2120. Recommended prerequisites: BIOL 3640 or BIOL 3250.

BIOL 3644 Neuromuscular Pathophysiology (4 Credits)
Cellular and molecular basis for normal nerve and muscle functions and the alteration of these functions by toxins, trauma and diseases of the brain, nerves and muscles; how specific insults produce clinical symptoms and pathology. Prerequisite: BIOL 2120. Recommended Prerequisite: BIOL 3640 or BIOL 3250.

BIOL 3646 Seminar: Cognitive Neuroscience (2 Credits)
This seminar is the capstone course for the neuroscience portion of the cognitive neuroscience program. Seminar topics include but are not limited to neurological disorders, model systems in neuroscience and sensory systems.

BIOL 3647 Neuroscience of Movement (4 Credits)
Producing the vast array of movements that humans (and many animals) use everyday represents one of the body's greatest challenges and greatest successes. These various movements require that the nervous, muscular, and skeletal systems work in concert to achieve a common goal. This course will explore the scientific basis of movement production, with particular emphasis on the neuroscience of motor control. We will explore how the nervous system drives the development of movement strategies at an early age, modifies movement strategies to adapt to changing demands throughout life, and how injury, dysfunction, and/or aging can lead to movement challenges. Required prerequisite: Cell Structure & Function (BIOL 2120); Recommended prerequisite (1 or more of the following): Human Anatomy (BIOL 2450), Human Physiology (BIOL 3250), Introduction to Neuroscience (BIOL 3640) or permission of instructor.

BIOL 3648 Molecular Mechanisms of Neurological Disease (4 Credits)
This course will be an in-depth study into some of the key molecular mechanisms involved in the pathogenesis of human neurological disease. A particular emphasis will be placed on the role of RNA regulation and metabolism. The primary focus will be on five devastating diseases: 1. Spinal Muscular Atrophy (SMA) 2. Fragile X Syndrome (FXS) and Fragile X Tremor Ataxia Syndrome (FXTAS) 3. Myotonic Dystrophy type 1 and 2 (DM1 and DM2) 4. Spinocerebellar Ataxia type 2 (SCA2) 5. Amyotrophic Lateral Sclerosis (ALS) and Frontotemporal Dementia (FTD) This course will cover a variety of topics including disease pathophysiology and pathogenesis. However, readings will be assigned from the recent primary literature discussing cellular and molecular mechanisms. Prerequisite: BIOL 2510 Genetics.

BIOL 3650 Endocrinology (4 Credits)
Mechanisms of hormone action, evolution of vertebrate endocrine systems, analysis of function integration of hormonal responses in maintenance of homeostasis. Prerequisite: BIOL 2120.

BIOL 3651 Comparative Endocrinology (4 Credits)
Intercellular communication systems are essential for the proper coordination of trillions of cells in multi-cellular animals. This course will evaluate the evolution of neuroendocrine networks in both invertebrates and vertebrates with a focus on how these neuroendocrine networks influence, growth, reproduction, osmoregulation, and metabolism. Prerequisite: BIOL 3650.

BIOL 3656 Cellular Aspects of Diabetes and Obesity (4 Credits)
This course focuses on specific cellular and molecular events key to the understanding of the pathological conditions of diabetes and obesity. Topics include the endocrine pancreas, adipose tissue and neuroendocrine control energy expenditure and feeding behavior. Prerequisite: BIOL 2120.

BIOL 3670 Molecular Immunology (4 Credits)
The ability to distinguish self from non-self is crucial to all organisms. In humans, cells and other higher animals, this task falls to the immune system. Suppression of this system is key to numerous pathogenic viruses including Ebola and human immunodeficiency virus. The failure to adequately regulate immune response underlies allergic reactions, arthritis and diabetes. This course will introduce students to the organs, cells and molecules that underlie mammalian immune response; immunogenetics and the fundamental mechanisms of cell mediated and humoral immune response; and the relationship of immune system to human disease. Prerequisite: BIOL 2510.

BIOL 3675 Virology (4 Credits)
Viruses are the ultimate cell biologists. They usurp essential cellular components to create new virus progeny leading to pathological cellular physiology. This course will delve into the genetic and cellular principles that govern virus entry, replication, and assembly and cover a broad range of DNA and RNA-based virus families. Prerequisites: BIOL 2120 and BIOL 2510.
BIOL 3690 Cellular Microbiology (4 Credits)
The field of cellular microbiology broadly defines the interface between commensal or pathogenic microbes, prokaryotes or lower eukaryotes, and their host. The burgeoning field of cellular microbiology has seen an explosion of new knowledge related to the feedback regulation between commensal microbes and their hosts. Furthermore, our knowledge of virulence factors that promote host and pathogenic microbe niches has continued to expand. This topics course will build a medically relevant and coherent picture of the host-microbe interface on genetic, molecular, cellular, and organismal scales by surveying relevant literature that has uncovered interspecies communication and control pathways. Prerequisites: BIOL 2120 and BIOL 2150.

BIOL 3700 Topics in Ecology (1-4 Credits)
Topics vary; may include plant, animal, biochemical, alpine or aquatic; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: one quarter of undergraduate ecology and/or instructor’s permission.

BIOL 3701 Topics in Genetics (1-4 Credits)
Topics vary; may include genetic methods, molecular genetics, human genetics, chromosomes or population genetics; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: BIOL 3510 and/or instructor’s permission.

BIOL 3702 Advanced Topics in Regulatory Biology (1-4 Credits)
Topics vary; may include endocrinology, physiology or immunology; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: varies with topic and instructor; instructor’s permission usually required.

BIOL 3703 Advanced Topics in Developmental Biology (1-4 Credits)
Topics vary; may include gene expression in development, developmental immunogenetics, developmental biochemistry or aging; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: instructor's permission.

BIOL 3704 Advanced Topics in Cell Biology (1-4 Credits)
Topics vary; may include supramolecular structure, microscopy, membranes and techniques. May be repeated for credit. Taught from original literature. Prerequisites: BIOL 2120.

BIOL 3705 Advanced Topics in Molecular Biology (1-4 Credits)
Topics vary, but may include biochemistry, supramolecular structure and function, molecular genetics, membrane biology. May be taken more than once for credit. Taught from original literature. Prerequisite: varies with course and instructor; instructor’s permission usually required.

BIOL 3706 Topics in Evolution (1-4 Credits)
Topics vary, but may include molecular evolution, plant evolution and animal evolution. Prerequisite: BIOL 2120 and BIOL 2510.

BIOL 3707 Advanced Topics in Conservation Biology (1-4 Credits)

BIOL 3708 Topics in Integrative Physiology (2-4 Credits)
Topics for this course include, but are not limited to, human physiology and disease, integrative physiology, environmental or social impacts on human physiology and health, and comparative physiology. Students will gain knowledge of a specific topic in physiology and/or pathophysiology through discussion of current literature and research. May be repeated for credit.

BIOL 3800 Human Molecular Biology (4 Credits)
Medical Genetics is the 24th member of the American Board of Medical Specialties. This course will introduce students to the fundamentals of molecular biology with an emphasis on understanding of how the field is applied in the context of medical diagnostics, personalized/precision medicine and other commercial applications. Students will be introduced to published research reports and provided with opportunities to critically examine the application of molecular biology to central questions in such areas as oncology, inherited diseases and genetically engineered organisms. Prerequisite: BIOL 2510.

BIOL 3850 Genetic Engineering (4 Credits)
This course will cover principles in gene manipulation and its application in research, medicine and industry. More specifically, this course will explain emerging technologies in genetic engineering and its practical and ethical implications. Topics will incorporate historical and emerging aspects of developmental biology, chemistry, and genetics as well as current techniques in genetic manipulation that are related to genomic editing. Additionally, students will be trained to interface with genomic databases and employ DNA sequence editing software to manipulate DNA sequences to achieve novel cloned products. Prerequisite for this course is Genetics (BIOL2510).

BIOL 3855 Model Organisms & Health (4 Credits)
This course is focused on how basic science studies using genetic model organisms have had a major impact on human health and disease in addition to helping us understand fundamental aspects of biology. We will cover clinically relevant recent advances from bacterial studies (i.e. CRISPR/Cas9-mediated genome editing) to how studies in fruit flies revealed insights into immune disease. Students will gain a better appreciation for why researchers using model organisms were awarded Nobel prizes as well as why major medical funding organizations like the National Institutes of Health, American Cancer Society, and American Heart Association support research using non-human systems. This course will prepare students to understand health-relevant research from varied model systems. Students will learn practical aspects for determining which model systems are best suited to answer which types of questions. They will also practice designing experiments and defending their importance in grant abstract-style essays. Prerequisites: BIOL 2120 and BIOL 2510.

BIOL 3870 Medical Ethics (4 Credits)
This course presents knowledge and discussion of ethical issues that arise from advances in the biomedical sciences and medicine. Several specific ethical issues and policies related to methodologies and procedures, emerging medical technologies, treatment decisions, doctor-patient relationship, informed consent, medical experimentation / clinical research, and health care reform. Prerequisites: BIOL 2120 or instructor approval.
Biol 3910 Viruses & Infectious Human Diseases (4 Credits)
From sexually transmitted viruses to bacterial pneumonia, infectious pathogens are the number one threat to human health. This course will introduce students to viruses, prokaryotic and eukaryotic pathogens with an emphasis on those commonly encountered in clinical medical practice. Through the use of technical/scientific research journals students will be encouraged to investigate the etiology, pathogenesis and treatment of human infectious diseases with an emphasis on the clinical, molecular diagnostic and therapeutic aspects of the disease. Prerequisite: BIOL 2510. Recommended prerequisite: BIOL 3800.

Biol 3920 Forensic Pathology (2-4 Credits)
In its broadest definition, forensic science represents a fusion of the natural sciences, criminology and jurisprudence. The field of forensic pathology in particular focuses on the investigation of sudden, unnatural, unexplained or violent deaths. Using the most authoritative books available and a multimedia lecture format, students in this course gain an introductory understanding of the pathophysiology of wounding and death as well as the clinical antemortem symptomology of physical abuse, neglect and extrajudicial wounding. Students also learn about the processes responsible for the decompositon of corpses as well as the use of molecular and geometric tools for the reconstruction of crime scenes from bloodstain evidence. Finally, students learn how to integrate a variety of forensic tools in investigations of sexual assault, serial killers, traffic fatalities and mass deaths. Prerequisite: BIOL 2120 or permission of instructor.

Biol 3950 Undergraduate Research (1-10 Credits)
Participation in faculty research programs by agreement between student and faculty member. Maximum of 5 quarter hours of BIOL 3950 and/or BIOL 3991 may be applied to the 45-quarter-hour requirement for a major in biological sciences.

Biol 3988 Study Abroad Resident Credit (0-18 Credits)

Biol 3991 Independent Study (1-10 Credits)
Topic in biology studied under faculty supervision. Student's responsibility to identify faculty supervisor before registering for class. Maximum of 5 quarter hours of BIOL 3991 and/or BIOL 3950 may be applied toward the 45-quarter-hour requirement for a major in biological sciences.

Biol 3995 Independent Research (1-10 Credits)

Hlth 2000 Science of Human Health (4 Credits)
This keystone course focuses on individual, community and population health. Students will be introduced to topics including health & wellness through the lifespan, population and public health, health promotion and education, and social determinants of health and health equity. This course will provide students not only the insight about the scientific basis, but also the social and cultural contexts of human health and health care. Students will gain an understanding about how behavioral health and social factors affect human biology and health. In addition, students will learn to effectively employ the critical skills and competencies necessary for understanding and evaluating human health and health care, as well as to effectively identify and learn to contribute to evidence-based health care.

Hlth 2010 Health Systems Science (4 Credits)
This keystone course will provide knowledge about how education, policy and healthcare delivery function within health care systems. Students will be introduced to topics including healthcare delivery systems and management, health policy and economics, and health informatics and technology. Students will gain an understanding about the healthcare delivery organizations and systems in the United States, contributions of government and public policy to health care, and the economics that drive healthcare systems. These content areas will be presented within the themes of the 3 pillars of health equity: access to health care, quality of care, and health outcomes. Students will gain an appreciation of a perspective from the patient experience in the healthcare system. Furthermore, this course will challenge students to effectively identify and critically consider the interactions and conflicts between these entities.

Hlth 2200 Medical Terminology: Fundamentals and Applications (4 Credits)
This course presents fundamentals and applications of medical terminology. This review and application of human anatomy and physiology is suitable for students who have completed some introductory biology and who are working toward a career in medicine or for whom communication with healthcare providers is essential. Students study basic anatomy and physiology at a level that is intermediate between introductory and advanced courses. Discover the medical history behind medical terminology, analyze medical case studies, and work to develop skills for clear and concise articulation of the basic concepts of anatomy and physiology behind medical diagnosis and treatment. This mastery of medical terminology helps to build a strong foundation for advanced coursework in anatomy and physiology. Prerequisites: BIOL 1010 and 1011, or BIOL 1222, or BIOL 1262.

Hlth 2210 Health Education and Promotion (4 Credits)
This course will provide students foundational knowledge about how to deliver health education and promote healthy behaviors to community. Students will focus on integrating evidence-based research into instructional strategies including preparing culturally sensitive presentations, leading difficult conversations, and activities to reinforce healthy behaviors. This course includes a weekly service-learning activity, where students will present approved workshops to youth on topics such as: mental health, sexual health, healthy behaviors and harm prevention, and accessing health care. The content delivered to youth aligns with the National Health Education Standards. Prerequisites: HLTH 2000 or HLTH 2010.

Hlth 3000 Seminar in Health Science (1-2 Credits)
This seminar is the capstone course for the Human Health Science & Systems program. This class will focus on the current understanding of several topics in human health. Emphasis will be on critical reading and discussion of current scientific literature related to human health and health care. Students will learn to recognize and appreciate different approaches and methods of health-related research. Students will utilize and integrate knowledge from previous courses to understand to present effective discussions on current topics in health. For students' continued development of strong oral communication skills, student presentations of primary literature will generate the basis of discussion. Prerequisites: HLTH 2000 and 2010.
HLTH 3155 Leadership in Health (1 Credit)
This course addresses the basic leadership skills necessary to succeed in the dynamic professional environment of health science and healthcare. Topics covered include individual and team leadership strategies and professional skills related to communication, management, strategic planning, implementation of change, negotiation, conflict resolution, and team building. Students will determine leadership strengths and weaknesses and learn to adapt their leadership approach to meet specific situations and challenges. Students will strengthen their leadership practices through a series of lectures, case studies, guided interactions and group exercises. Prerequisites: HLTH 2000 and 2010.

HLTH 3700 Topics in Health (1-4 Credits)
Topics in the area of, but are not limited to, human health and disease, environmental or social impacts on health, healthcare delivery, evidence-based medicine. Students will gain knowledge of a specific topic in human health and/or health care through discussion of current literature and research. May be repeated for credit. Prerequisites: HLTH 2000 or 2010.

HLTH 3870 Medical Ethics (4 Credits)
This course will present knowledge and discussion of ethical issues that arise from advances in the biomedical sciences and medicine. Several specific ethical issues and policies related to methodologies and procedures, emerging medical technologies, treatment decisions, doctor-patient relationship, informed consent, medical experimentation/clinical research, and health care reform. The overall objective of this course is to enhance awareness and critical thinking skills for future science professionals who are able to express their views in a culturally-responsive manner and listen to and appreciate others’ perspectives. This course will focus on discussions, case studies, and projects. Prerequisites: BIOL 2010, or HLTH 2000 and 2010.

HLTH 3991 Independent Study in Human Health Science and Systems (1-4 Credits)
In this course, students can engage in independent study focused on a topic in human health science and/or human health system science under faculty supervision. The independent study in Human Health Science and Systems provides individualized opportunities to gain knowledge on a specific health topic of interest to the student. This course complements the student's didactic coursework in established health topics and provides an opportunity for students to delve deeper into a specific health-related topic. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or HLTH 2010.

HLTH 3993 Internship in Human Health Science & Systems (0-4 Credits)
An internship is the opportunity to engage in a unique educational experience outside of the didactic setting of the classroom. This course includes a structured practical and productive internship experience that allows for the integration and application of coursework in a professional setting. The internship can be administrative, clinical, programmatic, or research focused. The internship must be a new experience for the student. If the proposed internship is within same setting as previous experience, the internship activities must be clearly different from past experiences. The course credit is variable (1-5 credits) depending on the rigor and time commitment required to complete the internship. Prerequisites: HLTH 2000 or HLTH 2010.

HLTH 3995 Independent Research in Human Health Science and Systems (1-4 Credits)
Independent research is an opportunity for students to be engaged in research within the fields of human health science or health systems studied under the guidance of a faculty member. This course complements the student’s didactic coursework in established health topics and provides an opportunity for students to engage in focused research on health-related questions. Research. Students will effectively employ the critical research skills and competencies necessary to critique and understand current literature, identify gaps in current knowledge, and understand and employ appropriate research approaches and methods for addressing the health-related research question. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or 2010.

BUS 1099 Daniels Professional Development Program Part I (0 Credits)

Some experiences are essential to a student’s development, but don’t fit well within the confines of a traditional course. This is a face-to-face zero-credit course intended to provide students with a framework to master professional development through experiential-based learning opportunities that will give them the necessary tools to identify a career path prior to graduation and succeed in their career development. Key topics include resume and cover letter development, understanding the business majors and associated career paths, and professional skill development such as appropriate business dress, communication, and etiquette.
BUS 1440 The Fourth Industrial Revolution (4 Credits)
This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

BUS 2099 Daniels Professional Development Program Part II (0 Credits)
This course is the second part of the Daniels Professional Development Program (DPDP). Similar to DPDP I, this course will expose students experiential-based learning opportunities that will provide the necessary tools and skills to successfully land an internship and full-time position prior to graduation. This will include attending a career fair, completing a mock interview and receiving real-time feedback, creating a professional LinkedIn profile, and attendance to career services workshops focused on professional development. Prerequisite: BUS 1099.

BUS 3000 Strategic Business Communications (4 Credits)
Leading CEOs know what multiple studies confirm: competence in communication is an essential skill for entry-level positions in business, and excellence in communication is necessary to become an industry leader. This course is designed to allow extensive time to practice and receive expert coaching. Since communication skills develop over time, you will build proficiency through multiple oral and written assignments that increase in rigor and complexity. The assignments will give you the individual and team skills you will need to be successful in both your academic and professional career. The quarter culminates in a client project addressing real campus or community issues. Prerequisites: BUS 1099 (with Passing - “P” grade) and admission to Daniels.

BUS 3099 Daniels Professional Development Program Part 3 (0 Credits)
Some skills and certifications are essential to student success in landing an internship and full-time job at graduation but do not fit well within the confines of a traditional course. This zero-credit course will provide students with a platform to master skills to prepare them for a career in the Fourth Industrial Revolution. Relevant skills and certifications will vary based on a student’s major and career interests. Common examples include Google Analytics, the Advanced Excel Certification, Python, SalesForce, and Robotic Process Automation.

BUS 3441 The IoT Build (2 Credits)
The Internet of Things (IoT) is moving rapidly toward “The Internet of All Things.” From water bottles to clothing to furniture, everything in our everyday world will be connected to the Internet, sharing information about our lives. In this course, you’ll get hands-on experience building IoT applications. You’ll learn how to gather data from sensors such as weight, occupancy, sound, proximity, pressure, gas, and infrared. By 2030, there will be 500 billion devices connected to the Internet. This class will show you how.

BUS 3442 Python Programming (4 Credits)
Python is a general-purpose, high-level programming language suitable to a wide variety of tasks in today's interconnected and technology-based world. Python is also an object-oriented language, a necessity for real-time, dynamic, and web-based applications. In this course, you’ll learn how to apply Python to basic programming elements such as data types, arithmetic operations, control structures, methods/functions, arrays, and file handling.

BUS 3446 Blockchain and Cryptocurrency (2 Credits)
Bitcoin was created in 2009 and eight years later it reached a record high of $20,000 per coin. Bitcoin is a virtual currency, or more commonly known as a cryptocurrency, that is managed by a decentralized network of users instead of a government or central bank. Anonymity, low transaction fees, built-in scarcity, and borderless transactions are some of the benefits that Bitcoin provides. This course will provide a high-level overview of blockchain and cryptocurrency, starting from the beginning with the basic fundamentals of blockchain technology. You will gain a comprehensive understanding of blockchain, what it is, and how it is used in cryptocurrency and the opportunities available with decentralized applications. We will explore the concept of money as a medium of exchange for goods and services and how cryptocurrencies such as Bitcoin aim to replace traditional Fiat currencies.

BUS 3450 Blockchain, Cryptocurrency & FinTech: What You Need To Know (4 Credits)
Bitcoin made blockchain technology famous, it highlighted a transformative technology that facilitates the transfer of value between two entities without a trusted 3rd party. Blockchain technology has the potential to disrupt industries, financial systems and social norms. This course will study the fundamentals of Blockchain, cryptocurrency and financial technology (FinTech). We will begin with a high-level overview on the origin and concept of money and how it is valued. It will progress through an in-depth dive into the business of Blockchain, Bitcoin, Smart-Contracts and Financial Technology. This course will expose students to the opportunities, risks and challenges an immutable, decentralized system based on consensus presents. We will explore the consequence and application of blockchain technology in decentralized applications, DAOs, non-fungible tokens (NFTs), and the Metaverse. No prior knowledge of Blockchain, Cryptocurrency, and FinTech is required to take this course.
BUS 3700 Topics in Business (0-10 Credits)

BUS 3800 Business for the Public Good (4 Credits)
The vision of Business for the Public Good is to provide an impactful culminating experience in the Daniels Core in which students think critically and creatively to address a societal issue through the lens of business. In this capstone to the business core, students will identify a real-world problem and use business tools and knowledge to address the issue. Topics include stakeholder management, corporate social responsibility, models of business, globalization, the natural environment, technology, public policy, innovative design thinking, among others. This course is designed to explore the place of business in the context of society. The course will familiarize students with the relationships among the private, public and nonprofit sectors. The course will challenge students by engaging them in projects focused on pioneering business to achieve public good and public benefit. Enforced Prerequisite: MGMT 3000 (minimum grade of C-).

BUS 3980 Internship (0-4 Credits)
Initial for-credit internship experience for students pursuing a business major, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

Business Ethics and Legal Studies
Office: Daniels College of Business, Suite 687
Mail Code: 2101 S. University Blvd. Denver, CO 80208
Phone: 303-871-3213
Email: nikol.harder@du.edu
Web Site: https://daniels.du.edu/business-ethics-legal-studies/

Today's managers, professionals and entrepreneurs operate in a complex legal environment that affects all facets of an organization. Firms need business graduates with knowledge of the legal and regulatory climate for jobs in human resources, marketing, purchasing and environmental affairs. Business and trade associations depend on staff members who monitor legislative and judicial decisions. A Business Ethics and Legal Studies minor provides a foundation for careers in the public or private sector.

Business Ethics & Legal Studies

Minor Requirements
The Business Ethics & Legal Studies minor is available to all undergraduate students.

"LGST 2000 Foundations of Business Law" is a prerequisite for all other Business Ethics & Legal Studies courses. Business students take this course as part of the Business Core, and only require an additional 16 hours in order to complete the minor.

Total Credits  43-50

LGST 2000 Foundations of Business Law (4 Credits)
Managerial perspective on the role of law and its relationship to business environment; emphasis on American legal system (history of law, courts and civil procedure), private law (business torts, contracts, corporate responsibilities and business ethics), and governmental intervention (constitutional law, employment law, white collar criminal law and corporate/securities law). Prerequisites: Grade of C- in BUS 1440 and sophomore standing.

LGST 2560 The Constitution & Business (4 Credits)
Current real world issues are analyzed in the exploration of constitutional law as it relates to business and free enterprise. Prerequisites: LGST 2000.

LGST 2570 Contracts for Business (4 Credits)
This course includes a comprehensive discussion of major contractual topics—including drafting and negotiation - and how they relate to legal and ethical elements of business. Prerequisites: LGST 2000.

LGST 2910 Daniels Ethics Fellows I: Community Impact (2 Credits)
This course comprises the first half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact their community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent community leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and community leaders, and (5) engage in a series of online quizzes designed to evaluate ethical reasoning and growth.

LGST 2920 Daniels Ethics Fellows II: Business Impact (2 Credits)
This course comprises the final half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact the business community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent business leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and business leaders, and (5) engage in a serious writing assignment designed to evaluate ethical reasoning and growth. Prerequisite: LGST 2910.

LGST 2960 Employment Law & Ethics (4 Credits)
Designed to offer insight into important employment law issues including employment-at-will, employees privacy rights, employment discrimination and labor law. Prerequisites: LGST 2000.

LGST 3030 The Supreme Court & Your Life (2 Credits)
This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual’s life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.
LGST 3100 Business Ethics & Social Responsibility (4 Credits)
The purpose of this course is to introduce students to ethical concepts, theories and issues as they relate to business and managerial decision making. A primary focus includes topics such as employee privacy, sales responsibility, sexual harassment, discrimination, intellectual property, whistle blowing, and career/family conflicts. The course is also designed to introduce students to more general approaches or ways of thinking about ethics, and students grapple with some of the basic and fundamental problems of ethics. Cross listed with MGMT 3100. Prerequisites: LGST 2000.

LGST 3200 Ethics & Your World (2 Credits)
This course evaluates the how ethical decision-making can benefit a person professionally, personally, and as part of a community operating under a social contract more generally. This holistic approach evaluates ethics from many different viewpoints such as: (1) a professional calling, (2) happiness versus joyfulness, (3) moral sacrifices, (4) money and ethics, (5) beauty and ethics, (6) popularity and esteem and ethics, (7) priorities, (8) daily motivation, (9) ethical decision-making frameworks, and (10) a consistent and moral worldview. The ethical decision-making frameworks include Utilitarianism, Deontology, Virtue Ethics, Ethical Egoism, Libertarianism, and the Real Rabbits approach.

LGST 3400 White Collar & Corporate Crime (4 Credits)
This course offers an essential overview of corporate and “white collar” crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduate registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)
This course evaluates the how the United States Supreme Court interacts with and affects an individual’s life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)
Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our “Impact of Driverless Mobility” course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

LGST 3510 CEOs and Corporate Governance (4 Credits)
The course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Each student will complete four papers or projects during the quarter, which will focus on a single corporate case study. The course projects will be designed to address and research the major dimensions of the course. Guest speakers will include corporate CEOs, board members, corporate general counsel, regulators, and investors.

LGST 3520 Legal and Ethical Issues in Purchasing a Home (4 Credits)
In this course, we will be considering some of the legal and ethical considerations that purchasers, sellers and agents face when buying or selling a home. This course will take students through the process of purchasing a home, from the initial stage of working with a real estate broker (including brokerage agreements and agency law), to submitting an offer/negotiations, understanding the contract terms, contingencies and implications, loan/financing considerations, title review, appraisal, inspections, objections and negotiations, and the closing of the purchase/sale. Prerequisite: LGST 2000.

LGST 3550 Topics in Business Law II (4 Credits)
Law relating to general and limited partnerships, corporations, property, securities law, professional responsibilities and related studies. Accounting students only. Prerequisites: LGST 2000.

LGST 3600 Business and Global Values (4 Credits)
This course explores the current state of globalization and its impact on business. In the context of ethical and legal norms, the course will examine how formal governmental and intergovernmental organizations (IGOs), as well as non-governmental organizations (NGOs), pressure business and affect business strategy and decisions. The course will also examine how business can adapt to comparative values and cultures in the international system, as well as universal values, and analyze issues and cases from both idealist and realist perspectives. Students will apply analytical tools from ethics, law, and public policy in examining leading business cases on the following topics: global terrorism and political risk. Prerequisite: LGST 2000.
LGST 3700 International Business Law (4 Credits)
Introduction to public international law (rights and duties of states and intergovernmental organizations) and to private international law (rights and duties of individuals, businesses and nongovernmental organizations) in international affairs. Key issues include alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of business and legal issues. Prerequisites: LGST 2000.

LGST 3701 Topics in Legal Studies (1-4 Credits)
Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.

LGST 3710 E-Commerce Law and Ethics (4 Credits)
Over the past 20 years, changes in technology have been dramatic and far-reaching, and navigating the future will continually challenge the business professional. This course examines the legal and ethical dimensions of online privacy, security, marketing, contracts and intellectual property. Prerequisites: LGST 2000.

LGST 3720 Negotiation & Conflict Resolution in Business (4 Credits)
This course is a rigorous exploration of negotiating business deals. Students will learn to develop strategies in a variety of conflict situations. Students will work closely with the professor and each other in simulations to address negotiation challenges, engage in mediation and arbitration, and become effective masters at resolving conflict. Prerequisites: minimum grade C- in LGST 2000.

LGST 3740 Daniels Fund Ethics Consortium Case Competition Seminar (2 Credits)
The Daniels Fund Ethics Consortium Case Competition — a component of the Daniels Fund Ethics Initiative Collegiate Program — exposes students to a thought-provoking business ethics case on principle based crisis management in business. The competition builds on the principle-based ethical framework central to decision making in a complex business environment. Students in this class will learn how to work in teams in order to collaboratively analyze, present, and respond to various scenarios of businesses in crisis as well as respond to questions posed by a panel of judges. The course challenges students’ ethical reasoning and provides a significant opportunity to increase awareness of the importance of principle-based ethics for business crisis management.

LGST 3790 Entrepreneur & Family Business (4 Credits)
This course covers (1) how an individual starts a business, (2) what you must know to get a new business off the ground and moving towards success, (3) the most current issues involving the creation of value, (4) strengthening and growing family businesses through the process of adopting best practices in governance, coupled with ethical conduct, value based leadership and legal compliance. Students are moved along tracks from which they can both observe and absorb a means to insure success and longevity in operating an individually owned or family owned business. Cross listed with LGST 4790. Prerequisites: LGST 2000.

LGST 3980 Internship (1-5 Credits)

LGST 3991 Independent Study (1-8 Credits)
Independent research/study; requires written report. Prerequisites: LGST 2000 and instructor’s permission.

Email: bia@du.edu
Web Site: http://daniels.du.edu/business-information-analytics/
Analytics is a challenging and exciting field that helps people make important informed decisions based on quantitative information. Business analysts make extensive use of data modeling, statistical techniques, and scenarios to manipulate data to find meaning, explain causation, and make predictions.

Currently, massive amounts of structured and unstructured data are collected and stored by computers as a result of business and society's greater dependence on information technologies and software applications to transact business and every-day life. As such, data analytics skills are highly portable and becoming a frequently sought competency in workers. Analytics is a valuable partner to almost any field of study, including engineering, agriculture, social science, medical science, environmental science, forestry, marketing, accounting, and finance.

**Total Credits**

24

¹ BSBA and BSAcc students take INFO 1010 and INFO 1020 as part of the business core.

² INFO 2020 is not an elective option for BSBA or BSAcc students, as this course is required in the business core.

**Statistics**

The Statistics minor is available to all traditional DU undergraduate students.

**Minor Requirements**

Minimum 20 credits for non-business majors and 16 credits for business majors. Requirements include:
Select three of the following courses (four for business majors):

INFO 2020  Analytics III: Business Modeling and Analysis  
INFO 3100  Automating Business Processes
INFO 3200  Data Mining and Visualization
INFO 3340  Project Management and Simulation
INFO 3400  Complex Data Analytics
INFO 3440  Optimization Modeling
INFO 3700  Topics in Business Analytics

Total Credits  20

1  BSBA and BSAcc students take INFO 1010, INFO 1020 and INFO 2020 as part of the business core, and may not use these courses towards the minor. Business students must select four electives in order to complete this minor.
2  INFO 2020 is not an option for BSBA or BSAcc students.

Requirements for Distinction in the Major in Business Analytics

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

Business Analytics

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

INFO 3140 Foundations of Information Management (4 Credits)

This course introduces students to the foundations of information management (e.g. database management). Specifically, this course will focus on database theory, appropriate database design, modeling tools, and the practical issues of database implementation and management. Designing and developing databases is an iterative process, and the class approach will be practical and hands-on. Corequisite: INFO 3100. Prerequisite: INFO 2020.

INFO 3110 Applied Nonparametric Statistics (4 Credits)

Businesses can never have perfect information; therefore, they must employ statistical techniques to improve the decision-making process. This course introduces students to the basic tenets of probability and statistics, with an emphasis on business applications. Statistical models as decision-support tools are taught. Student projects focus on data collection, data analysis, decision analysis, and written presentation skills. Prerequisites: INFO 1010, INFO 1011, and (MATH 1200 or MATH 1951). Corequisite: INFO 1021.

INFO 3100 Automating Business Processes (4 Credits)

This course focuses on using Microsoft Excel and Python to support decision making for managers. This course will cover advanced Excel functions and menu options along with basic spreadsheet modeling design and good practices. It will also cover automating tasks in Excel using VBA. We will then transition into using Python to create programs outside of the Microsoft Office environment. In both platforms the focus is on basic programming logic, reading and writing data, creating data summaries and pivot tables and basic statistical tests and summaries. Prerequisite: INFO 2020.

INFO 3110 Applied Nonparametric Statistics (4 Credits)

This course develops a more advanced understanding of the fundamental concepts of probability and statistics, and how they relate to managerial type problems and decision making. You will develop experience performing and interpreting standard and particularly nonparametric data analysis methodologies, such as the sign test, the signed rank test, the rank sum test, and nonparametric correlations. You will obtain familiarity with a statistical software package. Prerequisite: INFO 2020 (minimum grade of C-).

INFO 3140 Foundations of Information Management (4 Credits)

This course introduces students to the foundations of information management (e.g. database management). Specifically, this course will focus on database theory, appropriate database design, modeling tools, and the practical issues of database implementation and management. Designing and developing databases is an iterative process, and the class approach will be practical and hands-on. Corequisite: INFO 3100. Prerequisite: INFO 2020.
INFO 3200 Data Mining and Visualization (4 Credits)
This course explores the concepts of storytelling with data, prediction modeling, and presenting statistical results. It covers the concepts of visualization terminology along with all the steps of the modeling process: define goal, get data, explore & visualize data, pre-process data, partition the data series, apply modeling technique(s), evaluation and compare performance, implement the model, and communicate the results. The modeling techniques covered include Time Series Forecasting, Clustering, Principal Components Analysis, Decision Trees, Naive Bayes, K-Nearest Neighbor, Multiple and Logistic Regression, and Machine Learning Approaches. This course also covers the interpretation of real-time business data in terms of dashboards and scorecards. Prerequisite: INFO 2020.

INFO 3240 Enterprise Information Management (4 Credits)
This is the second in a series of two courses designed to introduce students to information management. This course focuses on procedural programming using T-SQL, an introduction to an enterprise information management system using Microsoft SQL Server and an introduction to an integrated development environment using Microsoft Visual Studio. Prerequisite: INFO 3140.

INFO 3300 Data Warehousing and Business Intelligence (4 Credits)
This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisite: INFO 3240.

INFO 3320 Sports Analytics (4 Credits)
This course serves as an introduction to sports analytics. Analytical topics will include, but are not limited to, regression (or predictive) modeling, optimization, ranking methodologies, web scraping, among others. Sports topics will include topics from most professional sports, gambling (daily fantasy sports), and business operations. In addition, the students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools.

INFO 3330 Statistical Computing (4 Credits)
This course will provide the student with a base of skills necessary to program in one or more common scripting software packages. No prior programming knowledge is required. After completion of the course, the student will be able to independently perform most basic statistical procedures using either software package. The student will also have the tools necessary to learn advanced topics from the software package documentation by themselves. Prerequisite: INFO 2020.

INFO 3340 Project Management and Simulation (4 Credits)
“Cheaper, better, faster” is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one-time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Monte Carlo simulation modeling is also covered to explore the benefits and limitations of simulation as a tool for solving business problems, and to present students with the opportunity to build, analyze, and report on Monte Carlo simulations. Prerequisite: INFO 2020.

INFO 3350 Complex Data Analytics (4 Credits)
This course explores the concepts of the considerations and management of big data projects. It also explores technical aspects of performing text analytics and natural language processing, social network analysis, and social media analysis. We focus on social data for many of the examples and also explore how disparate data sources can be combined to provide insight for business decisions. Prerequisite: INFO 3200.

INFO 3377 Database-Driven Websites (4 Credits)
This course provides a comprehensive overview of website development. Students explore the prevailing vocabulary, tools, and standards used in the field and learn how the various facets including HTML5, CSS, JavaScript, VBScript, ASP, PHP, HTTP, clients, servers, and databases function together in today’s web environment. In addition, software and services that are easily incorporated into a website (e.g. maps, checkout, blogs, content management) are surveyed and discussed. Students produce an interactive website on the topic of their choice for the final project and leave the course prepared to develop real world database driven websites. Prerequisite: INFO 3140.

INFO 3500 Capstone/Senior Project (4 Credits)
This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from problem definition, data collection, and model construction, through analysis and presentation of results to recommendations for specific business decisions. Prerequisites: All other Business Analytics major courses.

INFO 3700 Topics in Business Analytics (1-4 Credits)
Exploration of various topics and issues related to timely analytics applications. Prerequisite: INFO 2020.
INFO 3980 Internship (0-10 Credits)
Internship; requires written report.

INFO 3991 Independent Study (0-4 Credits)
Independent research/study; requires written report.

ITEC 3155 Database for Financial Applications (4 Credits)
This course is designed to help students understand how data underlying common business operations are organized and used to help facilitate these operations. In addition to learning to use the python programming language to interact with databases, students will cover a series of papers that deal with company culture and technology. Upon completing the course, students will understand how to pull data from a database and create reports, how to diagram program logic, and how to document business processes. Prerequisites: ACTG 3036, ACTG 3038 and ACTG 3049.

ITEC 3325 Emerging Technologies (4 Credits)
This course is for students who want a strategic edge: to understand how the advanced information technologies that are emerging today will impact business in the near to medium future. This course will equip students with an understanding of the key information technologies central to the knowledge economy, their current and prospective business uses, and lifelong skills in how to think about business uses of these technologies - to identify, critically analyze, and evaluate them. This course is for students who want to become key players in the coming economy by combining substantial understanding of the technology side with substantial understanding of the business side – applications and strategy. Prerequisites: INFO 2020.

ITEC 3980 Internship (1-5 Credits)
Practical experience (field study); requires written report. Instructor approval required.

ITEC 3991 Independent Study (1-8 Credits)
Independent research/study; requires written report. Instructor approval required.

Faculty
Kellie Keeling, Associate Professor and Department Chair, PhD, University of North Texas
Valerie Bartelt, Assistant Professor, PhD, Indiana University
Paul M. Bauer, Clinical Professor, Emeritus, PhD, University of Kansas
Philip Beaver, Professor of the Practice of Business Information and Analytics, PhD, Naval Postgraduate School
Tianjie Deng, Assistant Professor, PhD, Georgia State University
Ryan Thomas Elmore, Associate Professor, PhD, Pennsylvania State University
Ronald Farina, Associate Professor, Emeritus, PhD, University of Colorado
Stephen E. Haag, Professor of the Practice of Business Information and Analytics, PhD, University of Texas at Arlington
Tamara Lynn Brod Hannaway, Teaching Associate Professor, PhD, University of Colorado Denver
Anthony Hayter, Professor, PhD, Cornell University
Young Jin Lee, Associate Professor, PhD, University of Washington
Kerry-Ann Lewis Pearcy, Teaching Assistant Professor, PhD, University of Denver
Zlatana Dobrilova Nenova, Assistant Professor, PhD, University of Pittsburgh
Thomas Obremski, Associate Professor, Emeritus, PhD, Michigan State University
Amy L. Phillips, Teaching Professor, MEd, Plymouth State College
Holly L. Roof, Teaching Assistant Professor, PhD, University of Denver
Richard Scudder, Associate Professor, Emeritus, PhD, University of Colorado-Boulder
Scott Toney, Teaching Associate Professor, MS, University of Texas at Dallas

Benjamin Michael Williams, Assistant Professor, PhD, Southern Methodist University

Center for World Languages and Cultures
Office: Anderson Academic Commons, Room 336
INTZ 1201 Korean: Beginning Level 1 (4 Credits)
This course is an introduction to the Korean Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Korean society aim to facilitate students’ transition into study abroad. This is a hybrid course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Korean Instructor at the University of Western Australia and face-to-face classes with a Korean Teaching Assistant on campus at DU. Attendance in both remote and in-person class sessions is mandatory. NOTE: This course is offered for elective credit only. Successful completion of this course prepares students to register for Swedish as a Foreign Language: Level 2 (SFSA12) at Lund University.

INTZ 1234 Directed Independent Language Study: Yoruba (4 Credits)
Directed Independent Language Study (DILS): Yoruba provides students the opportunity to study Yoruba language and culture. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students with cultural, academic and professional interests in Nigeria, Benin and/or the Yoruba language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).
INTZ 1255 Directed Independent Language Study: Swahili (4 Credits)
Directed Independent Language Study (DILS): Swahili provides students the opportunity to study Swahili (Kiswahili) language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various South American countries, as well as those with cultural, academic and professional interests in Quechua. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1301 Portuguese: Beginning Level 1 (4 Credits)
This course is an introduction to the Portuguese Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Portuguese and Brazilian society aim to facilitate students' transition into study abroad. This is an online course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Portuguese Instructor at the Universidade Catolica Portuguesa. Attendance at remote class sessions is mandatory.

INTZ 1486 Directed Independent Language Study: Arabic (4 Credits)
Directed Independent Language Study (DILS): Arabic provides students the opportunity to study Arabic language and Arabic-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in India, as well as those with cultural, academic and professional interests in Arabic. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA) or approval.

INTZ 1891 Directed Independent Language Study: Hindi (4 Credits)
Directed Independent Language Study (DILS): Hindi provides students the opportunity to study Hindi language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various Middle-Eastern countries, as well as those with cultural, academic and professional interests in the Hindi language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1910 Directed Independent Language Study: Quechua (4 Credits)
Directed Independent Language Study (DILS): Quechua provides students the opportunity to study Quechua language and Quechua-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various South American countries, as well as those with cultural, academic and professional interests in the Quechua language, Andean Studies, Indigenous languages and cultures. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1946 Directed Independent Language Study: Swedish (4 Credits)
Directed Independent Language Study (DILS): Swedish provides students the opportunity to study Swedish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Sweden, as well as those with cultural, academic and professional interests in the Swedish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1955 Directed Independent Language Study: Portuguese (4 Credits)
Directed Independent Language Study (DILS): Portuguese provides students the opportunity to study Portuguese language and Portuguese-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Brazil or Portugal, as well as those with cultural, academic and professional interests in the Portuguese language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).
INTZ 1982 Directed Independent Language Study: Korean (4 Credits)
Directed Independent Language Study (DILS): Korean provides students the opportunity to study Korean language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in South Korea, as well as those with cultural, academic and professional interests in the Korean language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1990 Directed Independent Language Study: Turkish (4 Credits)
Directed Independent Language Study (DILS): Turkish provides students the opportunity to study Turkish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Turkey, as well as those with cultural, academic and professional interests in the Turkish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

ARAB 1001 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Arabic 1001 is designed for students with no prior knowledge of Arabic. Students with experience with the Arabic language should complete the placement test to determine the appropriate course level for their background.

ARAB 1002 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1001 or equivalent.

ARAB 1003 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1002 or equivalent.

CHIN 1001 Elementary Chinese (4 Credits)
Part one of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters.

CHIN 1002 Elementary Chinese (4 Credits)
Part two of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1001, equivalent, or permission of instructor.

CHIN 1003 Elementary Chinese (4 Credits)
Part three of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1002, equivalent, or permission of instructor.

FREN 1001 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. In each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. First quarter in a three-quarter sequence. FREN 1001 is designed for students with no previous French experience. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course.
FREN 1002 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. In each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. Second quarter in a three-quarter sequence. Prerequisite: FREN 1001 or equivalent.

FREN 1003 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. In each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. Third quarter in a three-quarter sequence. Prerequisite: FREN 1002 or equivalent.

GERM 1001 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. First quarter of three quarter sequence.

GERM 1002 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Second quarter of three quarter sequence. Prerequisite: GERM 1001 or equivalent.

GERM 1003 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Third quarter of three quarter sequence. Prerequisite: GERM 1002 or equivalent.

GREK 1001 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor.

GREK 1002 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1001 or equivalent.

GREK 1003 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1002 or equivalent.

HEBR 1001 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence.

HEBR 1002 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1001 or equivalent.

HEBR 1003 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1002 or equivalent.

ITAL 1001 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Italian 1001 is designed for students with no prior knowledge of Italian. Students with experience with the Italian language should complete the placement test to determine the appropriate course level for their background.

ITAL 1002 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1001 or equivalent.

ITAL 1003 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1002 or equivalent.

JAPN 1001 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. First quarter of a three-quarter sequence. Japanese 1001 is designed for students with no prior knowledge of Japanese. Students who have experience with the Japanese language should complete the placement test to determine the appropriate course level for their background.
JAPN 1002 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Second quarter of a three-quarter sequence. Prerequisite: JAPN 1001 or equivalent.

JAPN 1003 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Third quarter of a three-quarter sequence. Prerequisite: JAPN 1002 or equivalent.

LATN 1001 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence.

LATN 1002 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1001 or equivalent.

LATN 1003 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1002 or equivalent.

RUSS 1001 Elementary Russian (4 Credits)
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Russian 1001 is designed for students with no prior knowledge of Russian. Students who have experience with the Russian language should complete the placement test to determine the appropriate course level for their background.

RUSS 1002 Elementary Russian (4 Credits)
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

RUSS 1003 Elementary Russian (4 Credits)
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1002 or permission of instructor.

SPAN 1001 Beginning Spanish (4 Credits)
The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Span 1001 is designed for students with no previous Spanish experience. Students with more than 2 years of high school Spanish or who grew up in a Spanish-speaking environment must take the placement exam and enroll in a higher-level course.

SPAN 1002 Beginning Spanish (4 Credits)
The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1001 or equivalent.

SPAN 1003 Beginning Spanish (4 Credits)
The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1002 or equivalent.

Faculty

Virginie M. Cassidy, Teaching Associate Professor and Director, PhD, University of Maryland

Stefan Dubois, Teaching Assistant Professor, PhD, University of California Santa Barbara

Maha Saliba Foster, Teaching Professor, PhD, University of Colorado Boulder

Miho Hamamoto, Teaching Assistant Professor, MA, Southern Illinois University Carbondale
The Department of Chemistry and Biochemistry offers a program of study that combines a traditional classroom emphasis with an innovative laboratory experience. In addition to providing excellent training for graduate study in chemistry and biochemistry, the program also is a strong pre-professional degree. A degree in chemistry, biochemistry or environmental chemistry prepares students for a variety of careers in chemical and biochemical research, medicine, life sciences, environmental science, atmospheric sciences, materials science, oceanography and teaching in chemistry or science in general. It also prepares students for employment with chemical, pharmaceutical, biotechnology, medical products, natural resources and environmental companies.

Because most medical and dental schools require a minimum of two years of chemistry for admission, a major in chemistry or biochemistry provides an excellent background for premed or pre-dental majors. Students who complete the bachelor of science in chemistry curriculum are certified by the American Chemical Society.

**Chemistry**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

Minimum of 40 credits of chemistry. Requirements include the following:

<table>
<thead>
<tr>

27

1 Of the two minors required for this BS degree, one must be in biology, environmental science, GIS or sustainability.

Requirements for Distinction in the Major for the Bachelor of Arts or Bachelor of Science Degrees  

- Minimum 3.0 cumulative GPA  
- Minimum 3.5 major GPA  
- CHEM 3500 (Frontiers) or CHEM 3820 (Biochemistry Lab)  
- Six credits of research  
- Completion of a thesis  
- Presentation of poster at Undergraduate Research Symposium

The recommended order of courses is listed below for each degree. Please consult your advisor each quarter.

Chemistry  

Bachelor of Arts (p. 82)  
Chemistry credit: 40; calculus credit: 12; physics credit: 15

1 One year of calculus is required. One year of University Physics (recommended) or General Physics is required. Physics is a prerequisite for Physical Chemistry. The third quarter of physics may be taken at the same time as Physical Chemistry I. Students are encouraged to take Physical Chemistry II and III.

CHEM 1001 Science of Contemporary Issues I (4 Credits)
CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

CHEM 1002 Science of Contemporary Issues II (4 Credits)
CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

CHEM 1003 Science of Contemporary Issues III (4 Credits)
CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

CHEM 1010 General Chemistry I (3 Credits)
The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.
CHEM 1020 General Chemistry II (3 Credits)
The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

CHEM 1240 General Chemistry I Laboratory (1 Credit)
Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

CHEM 1250 General Chemistry II Laboratory (1 Credit)
Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

CHEM 2131 Chemistry of the Elements (3 Credits)
Descriptive chemistry of main group and transition elements including redox and coordination chemistry. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

CHEM 2141 Chemistry of the Elements Lab (1 Credit)
Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course.

CHEM 2240 Introduction to Environmental Chemistry (4 Credits)
An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

CHEM 2270 Quantitative Chemical Analysis (4 Credits)
This combined lecture-laboratory course is primarily focused on understanding and applying the principles and techniques associated with making quantitative chemical measurements. Topics covered include statistics, applications of acid-base, complexation, precipitation, and redox titrations in chemical measurements, activity, electroanalytical techniques, and gravimetric analysis. Lab Fee associate with this course. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2451 Organic Chemistry I (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisites: CHEM 2131 and CHEM 2141.

CHEM 2452 Organic Chemistry II (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451 and CHEM 2461.

CHEM 2453 Organic Chemistry III (3 Credits)
Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451, CHEM 2452, CHEM 2461, and CHEM 2462.

CHEM 2461 Organic Chemistry Lab I (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2451.

CHEM 2462 Organic Chemistry Lab II (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2452.

CHEM 2463 Organic Chemistry Lab III (1 Credit)
Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2453.

CHEM 3110 Chemical Systems I (3 Credits)
Advanced discussion of modern concepts of organic chemistry; bonding, stereochemistry, reaction mechanisms. Prerequisites: CHEM 2453 and equivalent of one year of physical chemistry.

CHEM 3120 Chemical Systems II (3 Credits)
Interpretation of trends in the chemistry of the elements in terms of orbital interactions. Most examples will be taken from the third row transition metals and the boron and carbon groups. Prerequisites: CHEM 2131, CHEM 3310 and CHEM 3110.

CHEM 3130 Chemical Systems III (3 Credits)
Advanced-level physical biochemistry course intended for advanced-level undergraduates and graduate students. Focuses on kinetic, thermodynamic and dynamic aspects of biopolymers; delineates the relationship of these properties to the mechanism and function of biological macromolecules. Prerequisites: CHEM 3811, CHEM 3812, CHEM 3813, CHEM 3610 or the equivalent.
CHEM 3210 Instrumental Analysis (4 Credits)
Course focus is toward students' understanding of instrumental components and the theory behind both component's and instrument's operation. Emphasis is on techniques such as spectroscopy and chromatography. Students will experience extensive hands-on use of a number of instruments. Course provides a strong background for Chemistry Frontiers (CHEM 3500) and emphasizes techniques and skills sought by chemical and biotechnology industries. Lab fee associated with this course. Prerequisites: CHEM 2011 or CHEM 2270.

CHEM 3220 Advanced Analytical Chemistry (3 Credits)
Principles of chemical instrumentation applied to analytical measurements; principles, instrumentation and applications of spectrometric and chromatographic measurements. Prerequisites: CHEM 3210 and CHEM 3621, or the equivalent.

CHEM 3310 Structure and Energetics I (3 Credits)
Fundamentals of quantum chemistry, and introduction to symmetry and molecular structure of small and large systems. Prerequisite: one year of physical chemistry.

CHEM 3320 Structure and Energetics II (3 Credits)
Computational methods in chemistry. Prerequisites: CHEM 3310, one year of physical chemistry.

CHEM 3410 Atmospheric Chemistry (3 Credits)
The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 and CHEM 2453) OR CHEM 2240.

CHEM 3411 Aquatic Chemistry (3 Credits)
The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 and CHEM 2453) or CHEM 2240.

CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)
A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: (CHEM 2270 or CHEM 2011) and CHEM 2453.

CHEM 3500 Chemistry Frontiers (3 Credits)
Advanced-level laboratory course required for all undergraduates majoring in chemistry or environmental chemistry. Emphasis on the development of oral, written, computer and presentation skills necessary for success as a scientist. Skills will be honed through state-of-the-art laboratory experiences from diverse areas of chemistry. Lab fee associated with this course. Prerequisites: CHEM 3210 and CHEM 3610.

CHEM 3610 Physical Chemistry I (3 Credits)
Fundamentals of thermodynamics, including phase and reaction equilibria, properties of solutions, and electrochemistry needed for advanced study in life sciences and for Physical Chemistry II and III. May be taken for graduate credit by nonchemistry majors. Prerequisites: CHEM 2453, calculus and physics.

CHEM 3620 Physical Chemistry II (3 Credits)
Fundamentals of quantum chemistry, including theories of atomic and molecular structure and spectroscopy. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3610.

CHEM 3621 Physical Chemistry III (3 Credits)
Fundamentals of kinetic theory and statistical mechanics. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3620.

CHEM 3703 Topics in Organic Chemistry (3 Credits)
May include organic photochemistry, organic synthesis, organic electrochemistry or natural products. May be repeated for credit. Prerequisites: CHEM 3110 or equivalent and others depending on topic.

CHEM 3705 Topics in Biochemistry (3,4 Credits)
May include physical techniques for exploring biological structure, biological catalysis, and selected fields within biochemistry taught from original literature. May be repeated for credit. Prerequisites: CHEM 3831 and 3813.

CHEM 3811 Biochemistry-Proteins (3 Credits)
Protein structure and function, starting with the building blocks and forces that drive the formation of protein structure and the basic concepts of protein structure, and continuing with enzyme catalysis, kinetics, and regulation. Prerequisites: CHEM 2453 or instructor permission.

CHEM 3812 Biochemistry-Membranes/Metabolism (3 Credits)
Membranes and membrane mediated cellular processes, energy and signal transduction, and metabolic/biosynthetic pathways. Prerequisite: CHEM 3811 or CHEM 3831.

CHEM 3813 Biochemistry-Nucleic Acids (3 Credits)
Molecular processes underlying heredity, gene expression and gene regulation in prokaryotes and eukaryotes. Prerequisites: CHEM 2453 and CHEM 3811.

CHEM 3820 Biochemistry Lab (3 Credits)
Purification and properties of biological molecules and structures. Lab fee associated with this course. Prerequisites: CHEM 3811 AND (CHEM 2011 OR CHEM 2270).
CHEM 3831 Advanced Protein Biochemistry (3 Credits)
This course provides fundamental insights into the chemistry and physics of proteins. It investigates how amino acids form proteins with highly complex three-dimensional structures and how these structures mediate function. We examine key research articles and their contribution to our current understanding of proteins. Topics range from protein folding to enzyme kinetics and emphasize basic principles. Prerequisites: CHEM 2453 and instructor permission.

CHEM 3980 Internship-Undergraduate (0 Credits)
Practical work experience.

CHEM 3991 Independent Study (1-10 Credits)
May be repeated for credit.

CHEM 3995 Independent Research (1-10 Credits)
Research project conducted under guidance of a faculty member. Credit hours and projects arranged on an individual basis. May be repeated for credit.

Faculty
Brian Jacob Majestic, Associate Professor and Department Chair, PhD, University of Wisconsin - Madison
Keith E. Miller, Associate Professor and Associate Provost, PhD, University of Washington
Emily Faye Barter, Teaching Associate Professor, PhD, Indiana University
Lawrence J. Berliner, Professor, Emeritus, PhD, Stanford University
Erich Galen Chapman, Assistant Professor, PhD, University of Oregon
Bryan L. Cowen, Teaching Associate Professor, PhD, Yale University
Gareth Eaton, Professor, PhD, Massachusetts Institute of Technology
Sandra Eaton, Professor, PhD, Massachusetts Institute of Technology
Scott Horowitz, Assistant Professor, PhD, University of Michigan
Alex Huffman, Associate Professor, PhD, University of Colorado - Boulder
Ogar Ofuka Ichire, Teaching Assistant Professor, PhD, University of Montana
Michelle Knowles, Associate Professor, PhD, University of Oregon
Sunil Kumar, Assistant Professor, PhD, Clemson University
Martin Margittai, Professor, PhD, Freie Universität Berlin
Brian William Michel, Associate Professor, PhD, University of Utah
Debbie Gale Mitchell, Teaching Associate Professor, PhD, University of Denver
Balasingam Murugavel, Teaching Associate Professor, PhD, University of Denver
Dwight Smith, Professor, Emeritus, PhD, Pennsylvania State University

The Department of Communication Studies calls students to engage communication meaningfully, creatively, ethically, and with intellectual curiosity, in order to enhance their personal and public lives, as well as contribute to a sustainable common good.
A major or minor in Communication Studies prepares students with the communication knowledge and skills necessary to navigate their relationships and communities, as well as careers in a multitude of contexts, such as advocacy, business, education, and healthcare. Through coursework and collaboration with faculty, peers, and the communities around them, students learn to find their voice, take risks, express their convictions, become transformational leaders, deliberate, and contribute to a more socially just, inclusive, and equitable world. We invite students to explore and re-examine accepted truths about communication in private contexts, as well as from local to international settings. Students gain insight into communication theories and contexts, as well as learn to conduct research using diverse methods of inquiry in order to ask and answer important and innovative questions. As means toward individual, relational, and community well-being, students apply and critically reflect on communication skills, such as advocacy, conflict, debate, dialogue, leadership, persuasion, empathy, and compassion.

Communication Studies

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 82))

40 credits, including the following:

COMN 1700 Fundamentals of Intercultural Communication

Exploring Communication Contexts and Depth Electives 8

Choose two (8 credits) 2000-level or 3000-level courses with the exception of inquiry (COMN 2110, COMN 2200, COMN 2150) and capstone (COMN 3990) courses.

Total Credits 20

Requirements for Distinction in the Major in Communication Studies

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Completion of three 3000-level courses
- Completion of a culminating project

BA in Communication Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 50

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
COMN 1001 Practicing Communication (4 Credits)
Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities.

COMN 1002 Theorizing Communication (4 Credits)
Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars' attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students' understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed.

COMN 1011 Comm through Literature (4 Credits)
This course emphasizes the analysis and performance of diverse forms of literature. In addition to the dramaturgical elements of interpretation that are highlighted in this course, students learn how to contextualize serious public issues through literature while developing confidence and skills as performers and public speakers.

COMN 1012 Speaking on Ideas that Matter (4 Credits)
The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts.

COMN 1015 Voice and Gender (4 Credits)
In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.

COMN 1010 Communication in Personal Relationships (4 Credits)
Relationships have a direct and lasting impact on us: they shape who we are, and the paths we take toward who we will become. The purpose of this course is to analyze and apply theories and research relevant to communication processes in a variety of personal relationships. Discussion of issues such as attachment, identity, hetero- and homosexual relationships, family communication, conflict, and intrapersonal discourses will provide students a foundation on which to build skills useful in a variety of personal relationships. In Communication in Personal Relationships, students will: sensitively express attitudes and discuss research about different issues pertinent to the study of personal relationships; develop the skills to critically analyze their own relationships and the relationships of others; reflect on and challenge their and others’ ideas in a critically constructive manner so that we arrive at a new level of understanding together; and demonstrate the ability to apply communication and interpersonal theories and research outside of this classroom upon completion of the course.

COMN 1011 Comm through Literature (4 Credits)
This course approaches small group communication through a combination of theory and practice. Theories related to group development and leadership, collaborative communication, dialogue and rhetorical sensitivity, and principled negotiation and consensus, are explored through group discussions, research, case studies and presentations. Students have the opportunity to: strengthen their critical thinking and listening skills; confidently voice their identity within a greater community; increase their ability in writing and presenting their thoughts; and develop communication competence by facilitating civility within small group settings.

COMN 1210 Foundations of Communication Studies (4 Credits)
This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

COMN 1550 Communication in the Workplace (4 Credits)
This course offers a topics-based introduction to the study and practice of communication in a variety of organizational settings. The emphasis is on issues of power, politics, globalization, culture, diversity, relationships, and conflict. Students learn how to recognize, diagnose, and solve communication related problems in the workplace.
COMN 1600 Communication and Popular Culture (4 Credits)
This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or 'lenses' to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

COMN 1700 Fundamentals of Intercultural Communication (4 Credits)
This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

COMN 1988 Study Abroad Resident Credit (0-18 Credits)
This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others' experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

COMN 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2020 On the Black Panther Party (4 Credits)
This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2030 Social Movement Rhetoric (4 Credits)
This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)
This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals.
COMN 2100 Fundamentals of Communication Theory (4 Credits)
Basic concepts, theories and models of the communication process.

COMN 2110 Quantitative Inquiry in Communication (4 Credits)
This course is designed to introduce students to the process of reading, analyzing, conducting and critiquing quantitative research in communication studies. Research is a pervasive aspect of contemporary life, both inside and outside of the university. As such, many of the jobs taken by communication studies majors require, or are at the very least enhanced by, the ability to conduct and interpret research. This course introduces students to the various aspects associated with quantitative research methods in an effort to illuminate the significance of research about communication in our lives and help students act as critical consumers of the research encountered.

COMN 2130 Introduction to Organizational Communication (4 Credits)
This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives.

COMN 2140 The Dark Side of Relationships (4 Credits)
This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes.

COMN 2150 Rhetorical/Critical Communication Inquiry (4 Credits)
This course focuses on the process of interpreting, understanding, and evaluating everyday persuasive acts for the purpose of sharing insights and influencing the community audience. This course fosters a variety of analytical skills, including how to describe primary rhetorical acts (such as speeches, films, news coverage, television programs, songs, advertisements, and public commemorative art, among others) in rich, relevant detail; how to situate or make sense of rhetorical acts within their historical, cultural moments; and how to use theory to develop a critical perspective that helps to render a judgment about a text or act. Students sharpen critical instincts by working through the invention process to produce a piece of rhetorical or cultural criticism.

COMN 2200 Qualitative Inquiry in Communication (4 Credits)
This course focuses on introducing students to a selection of qualitative methods used in communication research. The class covers the basic techniques for collecting, interpreting, and analyzing qualitative data. Throughout the term, the course operates on two interrelated dimensions: one focused on the theoretical approaches to various types of qualitative research, and the other focused on the practical techniques of data collection and analysis, such as interviewing and collecting field notes.

COMN 2210 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities “from the ground up.” This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

COMN 2220 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2270 Intro to Health Communication (4 Credits)
This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices.

COMN 2300 Fundamentals of Argumentation (4 Credits)
This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Analytical Inquiry: Society and Culture requirement.
COMN 2400 Landmarks in Rhetorical Theory (4 Credits)
This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2450 Between Memory & Imagination (4 Credits)
How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2470 Gender and Communication (4 Credits)
Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

COMN 2471 The Social Construction of Travel (4 Credits)
Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2541 Advanced Debate and Forensic Activities (1-4 Credits)
This course serves as a practicum for students interested in developing advanced argumentation skills. The focus is on preparing students for competition in intercollegiate debate. Students engage in in-depth research of debate topics, as well as participate in substantial practice of arguments and positions developed as necessary to prepare for intercollegiate competition.

COMN 2700 Topics in Communication (1-4 Credits)
COMN 2701 Topics in Communication (1-4 Credits)
COMN 2702 Topics in Communication (1-4 Credits)
COMN 2703 Topics in Communication (1-4 Credits)
COMN 2704 Topics in Communication (1-4 Credits)
COMN 2705 Topics in Communication (1-4 Credits)
COMN 2988 Study Abroad Resident Credit (0-18 Credits)

COMN 3005 Diverse Family Communication (4 Credits)
This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

COMN 3010 Critical Sexuality Studies (4 Credits)
This course takes a critical approach to the study of sexualities by asking us to challenge our assumptions and everyday knowledges about identities, gender, sexuality, race, class, and ethnicity. This course is organized thematically as we explore various topics within the larger study of critical sexuality studies and communication studies. We examine contemporary issues within queer theory, critical race studies, identity politics, feminism, performance studies, and popular culture.

COMN 3015 Culture and Pedagogy (4 Credits)
This seminar invites students to analyze and reflect upon the ways in which individuals and groups have created cultural ideals, images, and constructs of education. The course focuses upon pedagogy broadly conceived as an integral part of a diverse and conflictual society and on how pedagogies shape our understanding and reproduction of, as well as our resistance to, such a society. We explore a variety of conflicting views of what it means to be educated, for what purpose, for what kind of society, and towards what future.

COMN 3020 Conflict Management (4 Credits)
Substantive and relational types of conflict, various strategies for conflict resolution.

COMN 3050 Feminism and Intersectionality (4 Credits)
This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

COMN 3130 Organizational Communication (4 Credits)
This is an applied course, service learning course, based on a consulting model. While the course will extend and enrich the topical and theoretical knowledge developed in COMN 1550 and COMN 2130, the primary purpose of this course will be to help students explore how they can put such knowledge into practice by collectively working with a local non-profit organization to first diagnose and then propose (and, in some cases implement) solutions to an organizational communication problem faced by that organization.
COMN 3140 Advanced Intercultural Communication (4 Credits)
This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

COMN 3230 Principles of Leadership (4 Credits)
Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

COMN 3270 Health Communication (4 Credits)
This course examines the role of health communication in our everyday lives. We will focus on communication strategies that inform and influence individuals, families and communities in decisions that enhance health. We will also explore the dynamics and impact of health communication between individuals and the health care system such as doctor-patient communication, dissemination of health related information, and the role of mediated communication in examining health communication.

COMN 3280 Family Communication (4 Credits)
The purpose of this course is to enhance understanding about communication patterns within families. In this course, we will examine theory/research on the role of communication in creating and maintaining healthy marriages and families. Specifically, we will study communication and the family life cycle, different family forms, family race/ethnicity, power in families, conflict in families, communication and stress in families, and communication in the aging family. The course format includes lectures, discussions, analysis of case studies, and in class applications.

COMN 3285 Advanced Relational Communication (4 Credits)
Advanced Relational Communication is intended to increase understanding of relationships from diverse perspectives. The three main perspectives we will investigate show how relationships affect and are affected by their context, the individuals involved, and the relational system. The goals of this course are for students to increase their skill in (1) explaining how knowledge about context, individuals, and relational systems increases understanding of communication processes in a variety of relationships; (2) evaluating critically the information about relationships that we encounter in our everyday lives; (3) asking and investigating questions about real-life relationships.

COMN 3290 Communication and Aging (4 Credits)
In this course, we will focus on the communication processes associated with aging. We will explore the implications of aging and how aging affects the process and outcomes in social and relational interactions. We will examine communication and aging through interactional processes (intrapersonal, interpersonal and relational) and through context (organization, family, health, and culture). Emphasis will be placed on the theoretical and applied research in communication and aging.

COMN 3300 Principles of Persuasion (4 Credits)
This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

COMN 3310 Globalization, Culture, and Communication (4 Credits)
Drawing from a critical multidisciplinary perspective, this course examines how culture and communication are impacted by globalization. The course explores issues of power and positionality, as well as economic, political, and cultural implications of globalization on people, products, and ideologies in both local and transnational contexts.

COMN 3315 Public Deliberation (4 Credits)
During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?.

COMN 3425 Rhetoric and Governance (4 Credits)
An introduction to the works of Michel Foucault and his influence on contemporary rhetorical theory. Permission of instructor is required.

COMN 3430 Rhetoric and Communication Ethics Seminar: Communication and Climate Change (4 Credits)
Since the release of Al Gore’s “An Inconvenient Truth,” American public discourse has become increasingly concerned with global warming. Not only is there nearly 100% consensus among climate scientists that human-induced climate change exists, but the severity of global warming is entering the popular imaginary, in the form of journalism, films, etc. But while scientists are committed to slowing global warming, the types of sweeping policy and behavioral changes needed to abate the projected climate catastrophe have been very slow in coming. As such, communication scholars—particularly those concerned with the art of public persuasion—are in a unique position to contribute to this significant and complex issue. In the words of climate scientists Susanne Moser and Lisa Dilling, “We need to open up the communication process to a wider community, in which participants own the process and content of communication.” The goal of this course is to produce original scholarly research in response to Moser and Dilling’s call, to invite more and better communication concerning climate change.

COMN 3435 Rhetoric and Public Life (4 Credits)
An introduction to the conceptual and political history of the public sphere. The course pays particular attention to how the normative assumptions of public communication are affected by the demands of cultural pluralism. Permission from instructor is required.
COMN 3470 Seminar in Free Speech (4 Credits)
This course will survey some of the major conceptual innovations in the justifications of freedom of speech. We will begin with an exploration of the traditional defenses of free speech and then move to a reexamination of those defenses in light of modern communication theory and the challenges of pluralism. In particular we will ask if the justifications of free speech need to be rethought given our understanding of speech as a social force that constitutes identities and values rather than merely expressing private opinions. Moreover, even if our understanding of the social force of speech, should we regulate speech that is racist, sexist and seems to erode the foundations of a public culture based on mutual respect and public deliberation over social goods? Can we devise a robust defense of free speech based on its social force that both protects those that may be harmed by antidemocratic discourses and still provides the resources for democratic dissent?.

COMN 3680 Gender and Communication (4 Credits)
This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

COMN 3700 Topics in Communication (1-4 Credits)
COMN 3701 Topics in Communication (1-4 Credits)
COMN 3702 Topics in Communication (1-4 Credits)
COMN 3703 Topics in Communication (1-4 Credits)
COMN 3704 Topics in Communication (1-4 Credits)
COMN 3705 Topics in Communication (1-4 Credits)

COMN 3770 Mediated Communication and Relationships (4 Credits)
This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

COMN 3800 Philosophies of Dialogue (4 Credits)
This course explores the philosophies of dialogue of Martin Buber, Mikhail Bakhtin and others in the context of contemporary communication scholarship on ethics, culture, and relationship. Prerequisite: permission of instructor.

COMN 3850 Communication Ethics (4 Credits)
This class is not just about how to be ethical communicators but it is also about how to discover ethics--the good life and care for others, answerability and responsibility--deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

COMN 3980 Internship (1-8 Credits)
COMN 3988 Study Abroad Resident Credit (0-18 Credits)
COMN 3990 Communication Capstone (4 Credits)
This course allows students to synthesize knowledges across the communication studies major through original research presentation.

COMN 3991 Independent Study (1-5 Credits)

COMN 3993 Communication Capstone Sequence 1 (2 Credits)
In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student’s work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the first half of the sequence.

COMN 3994 Communication Capstone Sequence 2 (2 Credits)
In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student’s work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the second half of the sequence.

COMN 3995 Independent Research (1-10 Credits)
Topics and quarter hours vary. Prerequisite: instructor’s permission.
Faculty

Mary Claire Morr Loftus, Associate Professor and Department Chair, PhD, Arizona State University

Santhosh ChandraShekar, Assistant Professor, PhD, University of New Mexico

Frank Dance, Professor, Emeritus, PhD, Northwestern University

Joshua Hanan, Associate Professor, PhD, University of Texas at Austin

Darrin Hicks, Professor, PhD, Southern Illinois University Carbondale

Jeremy D. Johnson, Assistant Professor, PhD, Pennsylvania State University

Youllee Kim, Assistant Professor, PhD, Pennsylvania State University

Carl Larson, Professor, Emeritus, PhD, University of Kansas

Dakota E. Park-Ozee, Assistant Professor, PhD, University of Texas at Austin

Summer Lane Preston, Visiting Teaching Assistant Professor, PhD, Arizona State University

Elizabeth Suter, Professor, PhD, University of Illinois at Urbana-Champaign

Cris J. Tietsort, Assistant Professor, PhD, Arizona State University

Computer Science

Office: Department of Computer Science, Suite 379
Mail Code: Ritchie School of Engineering & Computer Science
2155 E. Wesley Avenue, Denver, CO 80208
Phone: 303-871-3192
Email: info@cs.du.edu
Web Site: http://www.du.edu/rsecs/departments/cs

Computer Science affects every aspect of society and the world: in the apps we use on devices and on the web, in our entertainment through games, videos and movies, in the way we advance science and mathematics and design products in engineering, and in the way we vote, bank, and run businesses. The Department of Computer Science offers five undergraduate programs and teaches students a solid theoretical foundation of computer science while allowing students to specialize in various areas through electives. Graduates of the program have found employment in all areas of the computer software industry and in the application of computer science in a wide variety of companies and fields. Our graduates work at companies including IBM, Microsoft, Google, Amazon, Oracle, LinkedIn, Facebook, Twitter, Raytheon, and Lockheed Martin. Graduates of these programs also are prepared to pursue graduate school in computer science or other related fields. The department offers majors in computer science, applied computing, and game development.

Computer Science

Computer science encompasses the theory and techniques by which information is encoded, stored, communicated, transformed and analyzed. It is concerned with the theory of algorithms (that is, effective procedures or programs), with the structure of languages for the expression of algorithms and with the design of algorithms for the solution of practical problems. A central concern is the study of the computer systems (hardware and software) for the automatic execution of these algorithms.

The Department of Computer Science at the University of Denver offers a bachelor of science in computer science. The degree is strongly based in mathematics and, in fact, a student will automatically acquire sufficient credits for a minor in mathematics. One additional minor is required. The second minor may be in any discipline other than mathematics or computer science.

Bachelor of Science in Computer Science Major Requirements

(183 credits required for the degree (p. 84))

The Bachelor of Science in Computer Science prepares students for jobs in highly technical fields or related disciplines where computing is used and needed. Students learn how to problem solve, develop software, analyze the space and time performance of data structures and algorithms, work with and comprehend low-level systems, and apply modern programming techniques. Electives in the major allow them to expand their knowledge of computer science in areas they're interested in pursuing but ensure students receive some breadth of knowledge in the discipline.
59 credits of COMP courses are required by the Bachelor of Science in Computer Science requires that are broadly classified as *Core* courses and *Breadth* courses. The list below lists all the *Core* classes required, totaling 35 credits. Students are also required to satisfy 24 credits of 3000-level COMP electives through the *Breadth* requirement: 4 credits must be taken from courses that are classified into the following 4 categories: 1) ethics, diversity, equity, justice, inclusivity; 2) systems; 3) theory; 4) programming languages. This totals 16 credits and the remaining 8 credits may have one of these classifications.

Students must also satisfy a Math cognate consisting of 12 Math credits at Calculus I (MATH 1951) or higher. These Math courses may be used to satisfy a Math minor. Please refer to the Department of Mathematics (p. 418) for details about the Math minor.

**Core Courses**

**Breadth Courses**

Complete 24 credits of 3000-level computer science courses, where at least one course must satisfy each of the categories: ethics/DEI, systems, theory, and programming languages.

**Math Cognate**

12 additional credits of Math electives at MATH 1951 or higher.

Total Credits 71

1. These courses are typically taken in parallel with Introduction to Programming I (COMP 1351), Introduction to Programming II (COMP 1352), and Introduction to Data Structures & Algorithms I (COMP 1353).
2. If used towards the Mathematics minor, 4 additional COMP credits must be taken as this course cannot count both towards the Mathematics minor and the total COMP credits required by the degree.
3. Internship/Co-Op in Computing (COMP 3904) may not be used to satisfy 3000-level computer science breadth credits.
4. Courses satisfying the Math cognate may also be used to satisfy the Mathematics minor.

**Bachelor of Arts in Computer Science major requirements**

The Bachelor of Arts in Computer Science prepares a student for a job in a highly technical field or related discipline where computing is needed. Students learn how to problem solve, develop software, analyze the space and time performance of data structures and algorithms, work with and comprehend low-level systems, and apply modern programming techniques. Electives in the major allow them to expand their knowledge of computer science in areas they're interested in pursuing but ensure students receive some breadth of knowledge in the discipline. This program is similar to the Bachelor of Science in Computer Science, except that it does not require the Math cognate.

59 credits of COMP courses are required in the Bachelor of Arts in Computer Science that are broadly classified as *Core* courses and *Breadth* courses. The table below lists all the *Core* classes required, totaling 35 credits. Students are also required to satisfy 24 credits of 3000-level COMP electives through the *Breadth* requirement: 4 credits must be taken from courses that are classified into the following 4 categories: 1) ethics, diversity, equity, justice, inclusivity; 2) systems; 3) theory; 4) programming languages. This totals 16 credits and the remaining 8 credits may have one of these classifications.

\(^1\) Internship/Co-Op in Computing (COMP 3904) may not be used to satisfy 3000-level computer science elective credits.

\(^2\) Computer Science courses may be designated as covering topics in theory, systems, programming languages, and ethics/DEI (diversity, equity, inclusivity). One course must be taken from each of these 4 categories, and the other courses may be from any (or no) category.

## Minor in Computer Science Requirements
A minor in Computer Science requires a total of 21 credits. The goal of the minor is to provide students with a foundation in computer programming and a basic understanding of the discipline, while allowing some flexibility in elective courses to complement their interests. Note that the Minor in Computer Science may also be used to satisfy the Computer Science course requirements of the Computational Physics Concentration (p. 507). The following courses are required for the Minor in Computer Science:

### Code  Title  Credits
<table>
<thead>

\(^1\) COMP 3904 Internship/Co-Op in Computing cannot be used to satisfy the elective requirements of the minor.

### Applied Computing
The Bachelor of Arts in Applied Computing (BA in AC) provides a quality education for a serious computer user. It complements the department's Bachelor of Science in Computer Science by providing a program that combines collaboration with other departments and an applications-oriented emphasis. A prospective BA in AC major must satisfy all the requirements for a Bachelor of Arts (p. 82) degree as outlined in the University Undergraduate Bulletin.

The BA in AC is a suitable degree for many collaborative programs within the University and would be ideal for students in graphic arts and electronic publishing or would provide an appropriate foundation for a student who wishes to pursue a career in the field of educational technology. A graduate with a BA in AC would be very attractive in the data processing unit of large financial, banking, or insurance institutions, as a network or system administrator or as a World Wide Web designer/programmer. Holders of the BA in AC degree would also be well suited to continue in any number of specialized Master’s or certificate programs in fields as diverse as video and graphics production, fashion design, telecommunications, instructional technology, or management information systems.

### Bachelor of Arts in Applied Computing Major Requirements
(183 credits required for the degree (p. 82))

The Bachelor of Arts in Applied Computing prepares students for a job in a technical field or a discipline where computing is used as a tool for problem solving. Students learn how to problem solve, develop software, and apply computer science techniques to any discipline. The flexibility in this program allows students to more easily double-major in another area of their interest to understand better how to apply computing principles to that field.

This major requires 47 credits of computer science and other approved computer applications and mathematics courses. Students are required to take 19 credits in core computer science courses and 4 credits in courses that contain topics in ethics, diversity, equity, inclusivity, and social justice.
Majors pick a computer science stream to focus on and will complete 12 credits in that stream. In addition, majors will select a cognate in an allied field where they will complete 12 credits of computational-related courses (note, these cannot be used for the major also).

Per University requirements (p. 82), no more than 60 credit hours in any one department can be applied towards a Bachelor of Arts (p. 82) degree. Required courses are as follows:

<table>
<thead>

Computer Science Streams for the Bachelor of Arts in Applied Computing

Students must complete 12 credits in one of the following streams. Computing streams not listed may be approved by the department and advisor, but must consist of COMP courses. The following streams are pre-approved but may not list all possible courses that apply towards a stream, and in particular, computer science topics courses may be used to fulfill the requirements of a stream (e.g., Topics in Computer Science (COMP 3705)).

- **Data**: Database Organization & Management I (COMP 3421), NoSQL Databases (COMP 3424), Data Visualization (COMP 3433)
- **Web Development**: World Wide Web Programming (COMP 3410), Web Programming II (COMP 3411), one or more of (Web Projects: Web Development III (COMP 3412), Database Organization & Management I (COMP 3421), NoSQL Databases (COMP 3424))
- **Systems**: Systems I (COMP 2361), Systems II (COMP 2362), one or more of (Operating Systems I (COMP 3361), Computer Networking (COMP 3621), Computer Security (COMP 3721), Network Security (COMP 3722), COMP 3723 Ethical Hacking, COMP 3731 Computer Forensics)

Cognate in Allied Fields

Students must also complete 12 credits that are computational and/or data oriented in nature in one of the approved allied fields. These should be chosen with and approved by their advisor and can include continued coursework in Computer Science. Courses used to satisfy this requirement, may not also be used to satisfy other major or minor requirements. The allied disciplines include, but are not limited to:

- Emergent Digital Practices ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/emergentdigitalpractices/))
- Geographic Information Science ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/geographyandtheenvironment/#programofstudytext))
- Mathematics ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mathematics/))
- Accounting ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/accounting/))
- Finance ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/finance/))
- Business Information and Analytics ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/businessintelligenceandanalytics/))
- Innovation and Entrepreneurship ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/innovationandentrepreneurship/))
- Media, Film, and Journalism Studies ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mediafilmampjournalismstudies/))
- Social Sciences
- Natural Sciences
- Arts, Humanities, and Music ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mediafilmampjournalismstudies/))
- Computer Science ([link](http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/))
Game Development

The game development programs are a joint effort by the University of Denver Computer Science, Emergent Digital Practices and Art programs. Specific degrees offered are:

- Bachelor of Arts with a major in Game Development, and
- Bachelor of Science with a major in Game Development.

Graduates of these programs not only have solid computer science, graphics and game-programming skills, but also a strong foundation in art and/or the technical, critical and design aspects of digital media. To obtain this foundation, the major requires work in allied fields. Allied areas include Studio Art and Emergent Digital Practices. The depth of allied knowledge is dependent on the degree (BA or BS) chosen.

**Bachelor of Arts in Game Development Major Requirements**

(183 credits required for the degree (p. 82))

The Bachelor of Arts in Game Development is a degree which prepares students to be capable of creating artistic content and designing game play for games while having a strong technical background, enabling them to bridge the gap between artist, programmer and designer. The BA in Game Development requires a Minor in Emergent Digital Practices (p. 286). A graduate of this program will be able to study and work as a developer, game designer and an artist. The BA requires more courses in the allied art fields than the BS and is balanced by having fewer required Math and Computer Science courses.

59 credits, including the following:

</tbody>
</table>

**Additional Electives**

8 credits of COMP or EDPX electives, where 4 credits must satisfy ethics/DEJI designation

Total Credits 59

1 Electives in computer science may have an ethics/DEJI (diversity, equity, justice, inclusivity) designation. 4 credits of the electives in COMP or EDPX must have this designation.

**Bachelor of Science in Game Development Major Requirements**

(183 credits required for the degree (p. 84))

The Bachelor of Science in Game Development is a combination of a Computer Science degree, specific courses in Game Development, and requires a cognate in Mathematics, a second minor of your choice, and a cognate of five approved classes from Art (p. 146), Emergent Digital Practices (p. 286), Creative Writing (http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/english/), or Music (http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/music/). In addition, both degrees require satisfying the University Common Curriculum requirements for the BS degree.

This program provides a strong computer science and technical background, preparing students for all aspects of game programming, while providing them with a foundation in art, emergent digital practices, creative writing, or music. Thus, graduates of this program are able to help in the programming and development of games, while understanding and being able to communicate effectively with the artists, designers, writers and
musicians who are part of any game development project. The BS requires more mathematics and more required COMP classes than the BA and is balanced with fewer classes in the allied fields.

Courses in this program are broadly classified as Core, Breadth, and Cognate courses. Core and Breadth courses total 63 credits in Computer Science. Cognate Courses are divided between the Math Cognate at 12 credits and the Art Cognate at 20 credits. Both cognates can be used, and usually are, to satisfy the courses and credits of their respective minors.

**Breadth Course**

COMP Elective designated as ethics/DEI

**Math Cognate**

12 additional credits at MATH 1951 or higher

**Art Cognate**

20 credits from art, emergent digital practices, creative writing, or music.

**Total Credits**

95

1 These courses are usually taken in sequence with Introduction to Programming I (COMP 1351), Introduction to Programming II (COMP 1352), and COMP 1353 Introduction to Data Structures & Algorithms I.

2 COMP Electives may be designated as containing ethics or DEI (diversity, equity, inclusivity) content and must be used to satisfy this requirement.

3 These cognate credits may also be used to satisfy a Math minor.

4 These cognate courses may also be used to satisfy credits in a minor in one of these fields.

**Bachelor of Science and Bachelor of Arts in Computer Science**

The following is a typical plan of study for a BS or BA in Computer Science major. BA students do not need to complete the Math cognate requirement and can replace these with Common Curriculum or other major/minor courses as needed. Flexibility in the junior and senior years allows students to study abroad in any quarter fairly easily.

## Bachelor of Arts in Game Development

The following is a typical plan of study for BA in Game Development majors. Students have the flexibility to study abroad typically in their junior year and have significant flexibility to either double major in Emergent Digital Practices (p. 286) (instead of just the minor) or take a second minor.

Requirements for Distinction in the Major in Computer Science, Game Development, or Applied Computing

Distinction in any of the majors granted through the Department of Computer Science require the following:

- Minimum 3.3 cumulative GPA in major courses
- Research project including thesis and presentation

Research Project

The undergraduate research project is an advanced project conducted with a faculty advisor in the Computer Science Department that a student may spend multiple quarters working on. The recommendation is that students find a faculty advisor in their junior year so that they may begin planning out the project which could be carried out over the summer and in their senior year. While a student may use work from a Independent Research (COMP 3995) or Independent Study (COMP 3991) as the basis for their distinction project, the scope of the distinction project must be larger than what was accomplished in those courses. The additional work required to complete the distinction project cannot have credits awarded for it. The determination of what additional work is sufficient to complete the distinction project is left to the faculty advisor overseeing the project.

In addition to the work carried out to complete the project, students are required to write an undergraduate thesis describing the related work, methodology used, and their results. While it is not a requirement that the undergraduate thesis is published, it is expected that the work is of publishable quality.

To defend their work, students are required to give a presentation in front of a committee, which consists of the faculty advisor and at least one other faculty member of the Computer Science Department. After the presentation, all non-committee members are asked to leave and the committee then may ask questions directly to the candidate about the project. When this phase is complete, the committee then holds a vote without the candidate to determine whether or not they pass. The results of the vote are then given to the student.

COMP 1101 Analytical Inquiry I (4 Credits)
Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

COMP 1201 Introduction to Computer Science I (2 Credits)
This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. Ideally taken concurrently with COMP 1351.

COMP 1202 Introduction to Computer Science II (2 Credits)
This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. Prerequisite: COMP 1201.

COMP 1203 Introduction to Computer Science III (2 Credits)
This course introduces testing and software development in computer science. Topics covered include using debuggers, version control systems, unit testing and general testing, Unified Modeling Language (UML), computing ethics, and software development in a team setting. Prerequisite: COMP 1202.
COMP 1351 Introduction to Programming I (3 Credits)
This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

COMP 1352 Introduction to Programming II (3 Credits)
This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. Prerequisite: COMP 1351.

COMP 1353 Introduction to Data Structures & Algorithms I (3 Credits)
This course introduces data structures used in computation, including their behavior, usage, implementation, and the analysis of their space usage. In addition, the algorithms used for access, manipulation, and updating the data structures is covered. Data structures and algorithms addressed include contiguous and linked lists, stacks, queues, hash tables, heaps, trees, self-balancing trees, graphs, and graph traversal. Introductory runtime analysis is used to prove time and space requirements for data structures and their performance while being used. Prerequisite: COMP 1352.

COMP 1601 Computer Science Pathways (1 Credit)
This course is designed to help first year computer science and game development students succeed in a very challenging major. Topics and activities may include academic success strategies; personal inventory exercises; interviewing computer science alumni; exploring ethical concerns within the profession; seminars by industry and academic experts; establishing the relationships between computing and other disciplines; critical and creative thinking activities; disseminating information on the dual degree programs, the honors program requirements, the honor code, and computer science department program structures; and readings from and discussions about computing related articles and publications.

COMP 1671 Introduction to Computer Science I (4 Credits)
Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

COMP 1672 Introduction to Computer Science II (4 Credits)
Advanced programming techniques; arrays, recursion, dynamic data structures, algorithm abstraction, object-oriented programming including inheritance and virtual functions. Prerequisite: COMP 1671.

COMP 1991 Independent Study (1 Credit)

COMP 2300 Discrete Structures in Computer Science (4 Credits)
Number systems and basic number theory, propositional and predicate logic, proof techniques, mathematical induction, sets, counting and discrete probability, case studies with applications from computer science, such as data representation, algorithm analysis and correctness, and system design. Prerequisites: COMP 1672 or COMP 1352.

COMP 2355 Intro to Systems Programming (4 Credits)
The prerequisites for this class are a good understanding of imperative and object-oriented programming in Java. The prerequisites for this class include a good understanding of basic programming constructs, such as branches (if, switch), loops (for, while, do), exceptions (throw, catch), functions, objects, classes, packages, primitive types (int, float, boolean), arrays, arithmetic expressions and boolean operations. Computer organization is a parallel prerequisite; if possible, students should register for both this course and COMP 2691. You must have a good understanding of basic data structures such as arrays, lists, sets, trees, graphs and hash-tables. This is a class on systems programming with focus on the C programming language and UNIX APIs. There will be programming assignments designed to make you use various Debian GNU/Linux system APIs. Programming assignments involve writing code in C or C++. Prerequisite: COMP 2673.

COMP 2361 Systems I (4 Credits)
This course introduces low-level computer systems and programming. Topics covered include Linux, the C programming language, pointers, dynamic memory management, number systems, instruction set architectures, debugging, and caching. Prerequisites: COMP 1353.

COMP 2362 Systems II (4 Credits)
This course introduces computer operating systems and parallel programming. Topics covered include processes, process forks, threads, race conditions, synchronization, scheduling, memory systems, resource sharing, and sockets. Prerequisite: COMP 2361.

COMP 2370 Introduction to Data Structures & Algorithms II (4 Credits)
This course introduces the performance analysis of algorithms, including proof techniques; data structures and their physical storage representation, including space and performance analysis; recursive techniques; stacks, queues, lists, trees, sets, graphs; sorting and searching algorithms. Prerequisites: MATH 2200 or COMP 2300; COMP 2673.

COMP 2381 Object-Oriented Software Development (4 Credits)
Some problems are most naturally modeled by a hierarchy of objects and the relationships between those objects. This course introduces object-oriented design and development as a problem solving technique. Topics covered include the Java programming language, including classes, methods, fields, inheritance, interfaces, polymorphism, generics, static typing, design patterns, and the Java Collections Framework. Prerequisite: COMP 1353.
COMP 2673 Introduction to Computer Science III (4 Credits)
An introduction to several advanced topics in computer science. Topics vary from year to year and may include any of the following: theory of computing, cryptography, databases, computer graphics, graph theory, game theory, fractals, mathematical programming, wavelets, file compression, computational biology, genetic algorithms, neural networks, simulation and queuing theory, randomized algorithms, parallel computing, complexity analysis, numerical methods. Prerequisite: COMP 1672 or COMP 1771.

COMP 2691 Introduction to Computer Organization (4 Credits)
This course covers basic topics in Computer Organization and is a required course in the BS in Computer Science, BS in Game Development, and BS in Computer Engineering degrees. Topics include: instruction set architectures, integer and floating point arithmetic, processors, memory systems, and topics in storage and Input/Output. Prerequisite: COMP 1672.

COMP 2701 Topics in Computer Science (1-5 Credits)

COMP 2821 Introductory Game Design (4 Credits)
Learn the fundamental game design practices and how to transition from a design, to a prototype, to a final game. This course covers theory, design, 2D game art, and culminates in the creation of a (simple) 2D computer game or other games. Prerequisites: COMP 1672 or COMP 1771 or EDPX 2100.

COMP 2901 Computing and Society (4 Credits)
This course is designed to explore the social implications of computing practices, organization and experience. These topics and other issues are correlated with examples from the older and modern history of technology and science. Some formal experience with computing is assumed, but students who have a good familiarity with ordinary computing practice should be ready. Students are also expected to contribute their expertise in one or more of the areas of their special interest. Cross listed with DMST 3901.

COMP 3000 Seminar: The Real World (1 Credit)
Series of lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with MATH 3000.

COMP 3100 Human-Computer Interaction (4 Credits)
Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. No prerequisites are required to take the course and students from all disciplines are welcome. Cross listed with COMP 4100.

COMP 3200 Discrete Structures (4 Credits)
Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: (COMP 2300 or MATH 2200) and (COMP 2673 or COMP 1353).

COMP 3351 Programming Languages (4 Credits)
Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Prerequisites: COMP 2370 and ((COMP 2355, COMP 2691) or COMP 2362).

COMP 3352 Elements of Compiler Design (4 Credits)
Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

COMP 3353 Compiler Construction (4 Credits)
Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

COMP 3361 Operating Systems I (4 Credits)
Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: COMP 2355, COMP 2370, and COMP 2691 or for MS Cybersecurity COMP 3001, 3002, 3003, 3004, COMP 4355, and COMP 4370.

COMP 3371 Data Structures & Algorithm (4 Credits)
Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms. Prerequisites: COMP 2370 or equivalent and COMP 3200.

COMP 3372 Advanced Algorithms (4 Credits)
Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks. Cross Listed with COMP 4372.

COMP 3381 Software Engineering I (4 Credits)
An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351, COMP 3361 or instructor permission.
COMP 3382 Software Engineering II (4 Credits)
Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

COMP 3400 Advanced Unix Tools (4 Credits)
Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool-building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

COMP 3410 World Wide Web Programming (4 Credits)
The World Wide Web (WWW, or web for short) has revolutionized how people communicate with one another and is one of the major technological advances in making the Internet visible around the world. Most people think of the web when they think of the Internet, but in fact the web is a method of organizing and accessing information on top of the Internet. Conceptually the web has a simple design, but it relies heavily on the underlying technology of the Internet. Students will learn what the web is, how it was designed, how it currently works, and how to develop apps on top of it through HTML, CSS and Javascript. Prerequisite: COMP 2673.

COMP 3411 Web Programming II (4 Credits)
In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain web applications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

COMP 3412 Web Projects: Web Development III (4 Credits)
In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

COMP 3421 Database Organization & Management I (4 Credits)
An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included. Graduate students will read one or two relevant technical papers and write a summary report. Prerequisite: COMP 2673 for undergrads. COMP 3006 & 3007 are enforced co-requisites for data science grad students.

COMP 3424 NoSQL Databases (4 Credits)
In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: COMP 2355 is required, and COMP 3421 is suggested.

COMP 3431 Data Mining (4 Credits)
Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

COMP 3432 Machine Learning (4 Credits)
This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 2370 and COMP 2355.

COMP 3433 Data Visualization (4 Credits)
This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 1353 and Python Programming.

COMP 3441 Introduction to Probability and Statistics for Data Science (4 Credits)
The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R.
COMP 3455 Shell Scripting and System Tools (4 Credits)
This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Students should have experience with Python prior to taking this course.

COMP 3501 Introduction to Artificial Intelligence (4 Credits)
Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2673 or COMP 1353.

COMP 3510 Software for AI Robotics (4 Credits)
This course provides an introduction to the key artificial intelligence issues involved in the development of intelligent robotics. We will examine a variety of algorithms for autonomous mobile robot behavior, exploring issues that include software control architectures, localization, navigation, sensing, planning, and uncertainty. We also introduce the Robot Operating System (ROS) middleware, which is popular in academic, industry, and government research. This course does not assume any prior knowledge of artificial intelligence or robotics. The course will be project focused. In the project assignments you will learn ROS and learn to implement algorithms essential for conducting AI robotics research.

COMP 3591 Computational Geometry (4 Credits)
This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 2300 and COMP 2370.

COMP 3621 Computer Networking (4 Credits)
An introduction to computer networks with an emphasis on Internet protocols. Topics include; network topologies, routing, Ethernet, Internet protocol, sockets, operating system impact and client/server implementations. Prerequisites: COMP 2355 and COMP 2370.

COMP 3681 Networking for Games (4 Credits)
Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

COMP 3701 Topics in Computer Graphics (4 Credits)
COMP 3702 Topics in Database (4 Credits)
COMP 3703 Topics-Artificial Intelligence (4 Credits)
COMP 3704 Advanced Topics: Systems (4 Credits)
COMP 3705 Topics in Computer Science (1-4 Credits)
COMP 3721 Computer Security (4 Credits)
This course gives students an overview of computer security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 3361.

COMP 3722 Network Security (4 Credits)
Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. Prerequisites: COMP2355 and COMP3721, or permission of instructor.

COMP 3723 Ethical Hacking (4 Credits)
Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, footprinting targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP3361.
COMP 3731 Computer Forensics (4 Credits)
Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 2355 or for MS Cybersecurity COMP 3001, 3002, 3003, and 3004.

COMP 3732 Human-Centered Data Security and Privacy (4 Credits)
With an increasing digital presence, it is critical to understand users’ needs and requirements in using technological equipment to secure interactions and adhere to privacy perceptions. Thus, it is essential to analyze the cognitive, social, organizational, commercial, and cultural factors in mind. This course will provide a socio-technical approach for analyzing critical user interaction with devices encountered in everyday life, including web, mobiles, and wearables. This course will help students develop an understanding of technological interactions from the perspectives of multiple stakeholders such as users, developers, system administrators, and others and build tools to protect user data.

COMP 3801 Introduction Computer Graphics (4 Credits)
Fundamentals of graphics hardware, scan conversion algorithms, 2D and 3D viewing transformations, windows, viewports, clipping algorithms, mathematics for computer graphics, graphics programming using a standard API. Prerequisites: COMP 2370, MATH 1952 or 1962, and MATH 2060.

COMP 3821 Game Programming I (4 Credits)
Introduces the fundamentals of digital game programming that are essential as future game programmers or game designers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites and animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 2821.

COMP 3822 Game Programming II (4 Credits)
In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3801, COMP 3821.

COMP 3831 Game Capstone I (2-4 Credits)
Students design, build, test and debug a fully working game from scratch. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students learn group collaboration, software processes, testing, and the methodology for researching new game concepts to implement in their final project. Prerequisite: COMP 3821.

COMP 3832 Game Capstone II (2-4 Credits)
Students design, build, test and debug their existing game from Game Capstone I. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students alter their game design document to add new features, making corrections to prior design issues, and focus on making the game playable and “fun.” Prerequisite: COMP 3831.

COMP 3833 Game Capstone III (2-4 Credits)
Students design, build, test and debug their working game from Game Capstone II. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students modify their design document and implement changes in their game, create new concept art for the features, build an introduction level into their game, test the game with “Play testers”, and focus on creating a game that is “fun” to play. By the end of the quarter, their game is ready for distribution on an appropriate platform. Prerequisite: COMP 3832.

COMP 3904 Internship/Co-Op in Computing (0-10 Credits)
Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).

COMP 3991 Independent Study (1-10 Credits)
Cannot be arranged for any course that appears in the regular course schedule for that particular year.

COMP 3995 Independent Research (1-10 Credits)

Faculty
Chris GauthierDickey, Associate Professor and Department Chair, PhD, University of Oregon
Mohammed Moussa Ismail Albow, Teaching Associate Professor, MS, University of Denver
Anneliese K. Amschler Andrews, Professor, Emerita, PhD, Duke University
Don A. Dalton, Visiting Teaching Assistant Professor, MBA, University of Colorado Boulder
Sanchari Das, Assistant Professor, PhD, Indiana University
Rinku Dewri, Associate Professor, PhD, Colorado State University
The minor in Critical Race and Ethnic Studies (CRES) provides students an opportunity to examine race and ethnicity as categories of social, political, historical, and cultural analysis, in the United States and globally, through varied courses offering multiple perspectives. Students are encouraged to think critically across disciplines and can gain important skills necessary for ethical and engaged citizenship in today's diverse, global society. Knowledge and understanding of race and ethnicity provides excellent training for careers in business, law, education, social work, journalism, the arts, nonprofits, government and public policy agencies, and increasingly in science and technology fields.

The CRES minor seeks to educate students to:

- Consider and utilize a variety of academic disciplines and approaches to engage in a critical examination of race and ethnicity
- Analyze and explore race and ethnicity as active social, political, historical, and cultural processes in the distribution of power, construction of identity, and maintenance of community
- Uncover and understand the social, cultural, and historical contributions and lived experiences of racialized populations in the United States, and around the world
- Compare racial and ethnic experiences and perspectives across groups, historical time periods, geography, and national origin
- Explore how race and ethnicity intersect with other identities, such as gender, sexuality, class, religion, national origin, and citizenship
- Critically evaluate primary and secondary sources; draw on diverse theoretical frameworks and methodologies; develop analyses, and present those analyses logically and coherently in written form and/or creative expression
- Engage in intersectional analysis and other critical methodologies that will support the development of cultural competency skills needed to flourish in diverse and collaborative environments

The undergraduate minor in Critical Race and Ethnic Studies at the University of Denver offers an academic program that provides a careful examination of race and ethnicity as categories of social, political, historical, and cultural analysis, in the United States and globally, through a multitude of disciplinary perspectives. Drawing primarily from humanities and social science courses, Critical Race and Ethnic Studies will attract any student interested in the intersectional study of race and ethnicity in the United States, and analysis of the comparative and transnational dimensions of race and ethnicity around the world.
**Minor in Critical Race and Ethnic Studies**

Minimum of 20 credits as follows: Students will select courses from several of the disciplines participating in the minor, with required exposure to at least three different disciplines. Eight of the credits toward the minor must be 2000-level or above. Courses will be listed with a Critical Race and Ethnic Studies attribute. If desired, students can create a targeted plan of study that focuses on specific academic interests and/or a specific community/population. There is also potential for a relevant internship, service-learning course, or study abroad course to be approved toward the minor; students will need to meet with the minor program advisor to secure approval.

The following is a list of courses that apply toward this minor at the time of this publication. Additional courses that may apply toward this minor will expand throughout the student’s academic career.

**To find current course offerings that count toward the Critical Race & Ethnic Studies minor:**

- Go to PioneerWeb > Student Tab > Registration
- Browse the online Schedule of Classes
- Choose quarter from drop-down
- In Attribute field, search "Critical Race & Ethnic Studies" > Search

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical

anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures.

These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of

relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and

how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

ANTH 3640 Race and Human Evolution (4 Credits)

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century
to the present day. Considers scientific and poplar models for explaining the evolution of racial differences, male-female reproductive behavior
gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prequisite: ANTH 2010.

ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical

anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures.

These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of

relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and

how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)

This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with
diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social

analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle

East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the

particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes

surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab

world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested.

ARTH 3813 Arts of the American West (4 Credits)

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe

paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions--Native

American, Spanish and Mexican, European, Asian and Latin American--as they converge in this geographic space.
COMN 1600 Communication and Popular Culture (4 Credits)
This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or 'lenses' to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

COMN 1700 Fundamentals of Intercultural Communication (4 Credits)
This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

COMN 2000 Identities in Dialogue (4 Credits)
This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others’ experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

COMN 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker’s assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2020 On the Black Panther Party (4 Credits)
This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 2220 Race and Popular Culture (4 Credits)
This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

COMN 3005 Diverse Family Communication (4 Credits)
This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

COMN 3050 Feminism and Intersectionality (4 Credits)
This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

COMN 3140 Advanced Intercultural Communication (4 Credits)
This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.
ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)
This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

ECON 2450 Race in the Economy (4 Credits)
This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

ECON 2540 Law and Economics (4 Credits)
This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

ENGL 2718 Latina/o Literature (4 Credits)
This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field’s major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)
This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it’s for, and its forms and aesthetics.

ENGL 3826 Latinx Cultural Studies (4 Credits)
This course introduces students to cultural texts and theories by U.S. Latinx subjects and asks students to consider various forms of cultural and critical methodologies.

HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)
The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics in the mid to late 20th century, Israel's military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross listed with JUST 2300.

HIST 2531 Twentieth Century Native American History (4 Credits)
This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures – such as federal and state governments, or the US legal system – and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

HIST 2570 Civil War & Reconstruction (4 Credits)
This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states’ rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.
HIST 2640 Race and Ethnicity in Twentieth Century America (4 Credits)
This course will examine America through its cultural and racial diversity, comparing and contrasting the historical experiences of African Americans, Latina/o, European Americans, and Asian Americans over the "long" twentieth century. Together we will investigate the ways in which major events and episodes in the century affected a variety of racialized populations, and how these groups responded to their social and political environment. Attention will also be paid to changes in "American" national identity and citizenship over time, helping students think about such questions as: who is an "American"? And how did that definition change over time? How did debates over citizenship reflect Americans' ideas of race, class, ethnicity, and gender? How were racial and ethnic minorities, women, and immigrants defined at various times in opposition to Americanness?.

HIST 2645 Immigration in Twentieth Century America (4 Credits)
Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)
This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megalopolis. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

HIST 2940 Sports and Empire (4 Credits)
This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

HIST 2945 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)
This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.

HIST 3275 The Past and Afterlives of Apartheid (4 Credits)
In 1948, after a close election, a government founded on the platform of apartheid, or a radical form of racial segregation, came into power in South Africa. Apartheid as a system remained in place until 1994. This seminar delves into the roots and trajectory of apartheid, and considers its effects on the lives of South Africans. As a 3000-level topics course, the readings for this course will be interdisciplinary, but will be founded in historical methodology and process, while also considering representations of apartheid and the history of South Africa through mediums such as literature, film, music, and sports. While the origins and institutions of apartheid will be studied, as well as the history of South African nationalist and resistance movements, one of the goals of this course will be to look at the lives of ordinary South Africans, and how they resisted the apartheid state in more quotidian ways. This course will also focus on the moment of 1994 and the legacy of apartheid in South Africa's postcolonial future, one in which the ideal of a rainbow nation was disrupted by the persistence of structural inequality and the memories of violence brought up by the Truth and Reconciliation Commission. We will also explore the comparative literature between apartheid South Africa and Jim Crow in the United States, considering the transnational implications of institutions of white supremacy and the legacy of British colonialism and white nationalism across the globe, as well as the fight against apartheid led by the independent nations of the global south in the United Nations.
HIST 3375 Empire: Revolt and Repression (4 Credits)
This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

HIST 3650 Native Crude: Indigenous Oil Politics and Activism (4 Credits)
The extraction and development of oil is one of the central issues driving U.S. geopolitical policy in the late 20th and early 21st centuries. As the U.S. government engages in covert and overt overseas incursions in order to secure oil supply, we have also reevaluated our domestic supply priorities. Both these dynamics— as well as the work by multinational oil companies to continually explore and develop/exploit new oil resources— have led to fraught negotiations between states, multinational corporations, and indigenous populations across the globe. This course explores the history of such past and present negotiations using books, articles, and documentary films.

INTS 2160 Labor in the Global Political Economy (4 Credits)
This course explores and examines the role of labor in different parts of the global economy. According to world systems theory (Wallerstein et al.), there is a global division of labor into three zones: (1) core (essentially the wealthier, high-tech, highly industrialized economies), (2) periphery (generally, but not always those that provide basic food stuffs and unprocessed raw materials to the richer countries), and (3) what is referred to the 'semi-periphery' (countries that have elements of both the core and the periphery, which tend to be 'in the middle' economically, so to speak). In each of these three zones of the global economy, labor tends to function in quite different ways in terms of wages and working conditions, technical pre-conditions (education of the work force), etc. In a similar light, many manufactured products today are not made in one place, but are products of this global division of labor. Often one part of the manufacturing process begins in one zone, but the refining and final manufacture takes place somewhere else - making the process truly global. The global division of labor is made possible by increasingly cheap transportation costs and cheap sources of energy. Consequently, the course examines the processes of the global division of labor, how it seems to influence global production and its fundamental dynamism (but also instability), as production moves from one part of the world to another.

INTS 2235 Gender and International Relations (4 Credits)
The study of gender and international relations (IR) is multi-faceted and complex. Both in theory and in practice, gender inheres in all aspects of IR – from globalization, to development, to security and human rights. Conversely, the ideas and processes that comprise the international political realm directly impact the everyday lives of women and men all over the world. What is it like to be a woman in post-Taliban Afghanistan? Why is homosexuality taboo in Iran, but not in many other parts of the world? Did Soviet communism really promote gender equality? These are only a few of the questions that are addressed over the ten weeks of the course. After an introductory discussion of the broad implications of gender for international political issues and vice-versa, we embark upon a quest to unravel the ways in which gender identities and sexualities come to be defined and practiced in different times and places, while simultaneously considering how these same identities constitute the contexts in which they are situated. At each stop along the way, we will endeavor to discover the mechanisms through which gender and sexuality are constructed, and reflect critically upon what these diverse constructions mean for the lived realities of men and women in different parts of the world.

ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)
This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world.

JUST 2004 Anthropology of Jews & Judaism (4 Credits)
This course is cross-listed with ANTH 2004 and RLGS 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.
systems are promoting patient-centered health care that takes intersectionality and identity into consideration. In health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural conceptions of health and disease and how those conceptions are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered health care that takes intersectionality and identity into consideration.

JUST 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)
Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

JUST 2026 Race: Black, Jew, Other (4 Credits)
This course is cross-listed with PHIL 2026 and RLGS 2026. In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us.

JUST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of the peoples in Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics in the mid to late 20th century, Israel's military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross-listed with HIST 2300.

MFJS 2220 Hip Hop as Medicine: CRES Intro to Media & Community Engagement (4 Credits)
This course brings together media studies, critical race/ethnic studies, and project-based learning to introduce students to the economics of the media industries and their historical role in U.S. cultural and racial hegemony. This course counts toward the Scientific Inquiry: Society and Culture requirement.

MFJS 2260 Music, Race, and Ethnicity in Latin America (4 Credits)
In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and “blackness” will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America.

MFJS 3207 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)
The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural conceptions of health and disease and how those conceptions are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered health care that takes intersectionality and identity into consideration.
PHIL 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with JUST 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
PHIL 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jewish discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jewish discourses/practices to a range of other anti-Other discourses/practices at play in the world around us. This course is cross-listed with JUST 2026 and RLGS 2026. This course counts for the AI/Society requirement.

PLSC 2235 Politicized "Ethnicity": Cross-Disciplinary Approaches to the Study of Identity Politics (4 Credits)
What are racial and ethnic identities? Are they more likely to influence political outcomes than other types of identity (e.g., gender, profession, class), and if so, why? This course introduces competing concepts of ethnic identity and connects them to the historical construction of race and national identities. By studying these issues in cases outside of the United States, you will gain unique comparative perspective about the idiosyncrasies of U.S. politics and history. Course materials include readings, podcasts, videos and documentary footage from political science, sociology, legal studies, and other disciplines. Why take this course? Gaining insight into the construction of ethnic, racial, and national identities will help you better understand yourself, your relationships, political campaigns, activist tactics, and episodes of political violence, among other things. The course satisfies the departmental sub-field requirement for majors in comparative/international politics. Recommended before taking this course: one introductory level course in political science.

PLSC 2360 Settler Colonialism and Indigenous Resistance in Three Continents (4 Credits)
This course explores historical and contemporary aspects of racialized power structures as they have specifically impacted indigenous peoples in Australia, the United States, and Latin America. How did the dynamics of imperialism, capitalism, liberal state-building, and racist (and racist ideology combine to devastate indigenous communities around the world? How did distinct perspectives on time, space, property, and community allow colonizing populations to conquer native populations even while advocating the most egalitarian political structures ever attempted? Satisfies department distribution requirement in comparative/international politics. Sophomore standing required.

PLSC 2450 Latinx Politics in the United States (4 Credits)
Examines the history and contemporary role of the Hispanic/Latinx population in the U.S. political system, exploring themes including identity, racialization, immigration, social movements, public opinion, political behavior, and public policy.

PLSC 2850 Politics of Criminal Justice in the US (4 Credits)
Problems and reforms in American criminal justice system; causes and extent of crime, excessive use of force by police, systemic racism, bail reform, probation and parole; prisons and police/community relations. Prerequisite: sophomore standing.

PSYC 2620 Psychology of Diversity (4 Credits)
This course provides a deep investigation into issues of diversity from a psychological perspective, including how we can understand both the value of and the threats to diversity in regards to gender, race, age, weight, and more. Prerequisite: PSYC 1001.

PSYC 3350 Cultural Psychology (4 Credits)
This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

RLGS 2004 Anthropology of Jews & Judaism (4 Credits)
This course is cross-listed with ANTH 2004 and JUST 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

RLGS 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)
Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group’s significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement. Cross-listed with JUST 2012.

RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)
The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces.

RLGS 2026 Race: Black, Jew, Other (4 Credits)
In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. Cross-listed with JUST-2026 and PHIL-2026.

RLGS 2108 Islam in the United States (4 Credits)
A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with “American” accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2110 Buddhism in the U.S.A. (4 Credits)
Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the “two-way traffic” between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2111 Islam and United States Politics (4 Credits)
This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans’ relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)
This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the the guru/śi#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with ASIA 2714.
emerged as a result of cultural contextualization. As it's foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians, this course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the "Great Plains Indians" (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, communities in the Rocky Mountains (Ute) as well as those commonly referred to as the "Great Plains Indians" (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians, peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues.

RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)
This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the defied "feminine" and the construction of gender within modern South Asia.

RLGS 2119 Caste, Race and Colonialism (4 Credits)
This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how "identity" and "privilege" are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/ accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast) in order for them to "see" how they both produce and are "produced" by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces?

RLGS 2250 Introduction to African American Religions (4 Credits)
This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America.

RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)
This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. Cross-listed with MUAC 2251.

RLGS 2301 American Indian Religion (4 Credits)
This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the "Great Plains Indians" (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians, peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues.

RLGS 2310 World Christianities (4 Credits)
This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as it's foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization.
This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed “contextualized” forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as “religion”, “nationalism”, and “secular” in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacque Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism. Cross listed with RLGS 3814.
RLGS 3890 Religion and Diaspora (4 Credits)
When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

RLGS 3893 Buddhism and Social Justice (4 Credits)
This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

SOCI 2160 Racism and Anti-Racism through Film (4 Credits)
This course is an examination of the socio-historical and political evolution of racism and anti-racism through documentary film. We will trace the origins and continued significance of race, racism, and anti-racism from the pre-colonial era to the present. While our primary focus will be on the United States, we will also pay attention to race, racism and anti-racism in a global context. Prerequisite: SOCI 1810 or permission of instructor.

SOCI 2230 Race and Ethnic Relations (4 Credits)
Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

SOCI 2370 Micropolitics of Race (4 Credits)
This class explores racialized experiences and controversies that affect daily life in the United States. We use insights from sociology to analyze racial identity and public behavior. For example, why do many people of color often "code-switch" as they move from interacting with family and friends and into their workplace? Why are some Black people accustomed to giving "the nod" to other Black people they encounter in majority-white spaces? Why are many native-born Asian-Americans told that they "speak really good English" (what sociologists would call a microaggression)? We also explore controversies, including interracial dating, gentrification, "transracial" individuals, and Elizabeth Warren's Native American identity claims. We will situate our analyses of the everyday politics of race within institutional and structural racism. Prerequisite: SOCI 1810.

SOCI 2622 Deportation Nation (4 Credits)
This service-learning course examines the nexus of the criminal justice and immigration—or, crimmigration—system. Through a scholarly analysis situated of the historical, social, and political processes that have informed contemporary immigration law and policy, the course focuses on the shift to enhanced enforcement, detention, and mass deportation. Prerequisite: SOCI 1810.

SOCI 2650 Sociology of Immigration (4 Credits)
This course applies a sociological approach to the study of international migration. Students examine early and contemporary waves of migration to the U.S.; theories of migration; processes of settlement and incorporation; the construction of immigration and citizenship; and institutional responses to immigration across and within immigrant groups. The course also examines variation in immigrant experiences along the lines of race/ethnicity, gender, and sexual and age identities. The course culminates in an examination of the impact of migration on the U.S. and on immigrants’ sending communities. Prerequisite: SOCI 1810 or permission of instructor.

SOCI 2655 Latina/os in American Society (4 Credits)
Latinas and Latinos constitute one of the largest and fastest growing ethnic groups in the United States. This course uses a sociological lens to understand Latina/os’ experiences in the U.S. Specifically, we address Latinas’ and Latinos’ historical experiences and migration trajectories; assimilation, incorporation and racial/ethnic identity formation; the family, schools and labor markets; and political participation. In so doing, we discuss and challenge stereotypes about Latina/os, present alternative perspectives about Latina/o experiences in the U.S. and most importantly, understand their contributions to their families, their communities, and to the nation as a whole. Prerequisite: SOCI 1810 or permission of instructor.

SOCI 2710 Crime and Inequality (4 Credits)
This course conducts a systematic investigation of the nature of inequality as it is related to crime and criminal justice in America. Racial, gender and class disparities are explored at critical stages of the criminal justice process, including crime commission, law-making, policing, court actions, and sentencing. This course considers the effects of inequality - particularly on system functions, employment opportunities, family stability and offenders’ communities. Prerequisite: SOCI 1810 or permission of instructor.
SOCI 2726 Hate Crimes and Hate Groups (4 Credits)
This course will examine how hate crimes and hate groups in the United States have been studied by social scientists and how their findings can inform the public good. Over the quarter this course will explore how hate crimes are defined relative to other forms of bias and crime, how the criminal justice system addresses hate crime and bias, how social movement mobilization influences hate crime trends, and how hate groups influence bias and hate incidents in the United States. The course will begin by asking how we all view hate in the United States, Colorado, and Denver as lay people. Then we will explore the political determinants and forces as play in how hate crime laws came to fruition and their argued effects. Next we will explore trends and patterns in hate crime victimization and offending. Next we will explore research on hate group ideologies, formation, and relations to hate crime offending. Finally, we will conclude with broader look at how hate relates to long term trends in violence and the state and what seems to be the next best steps for addressing hate in the United States. Prerequisite: SOCI 1810.

SOCI 2820 Drugs and Society (4 Credits)
Relationship between drug use, drug control and social contexts; various sociological themes relating to use and control of drugs in American society. Prerequisite: SOCI 1810 or permission of instructor.

SPAN 2400 Latino Cultures in the United States (4 Credits)
Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2350 or equivalent.

SPAN 2802 Afro-Latinos in the US (4 Credits)
Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish.

SPAN 2830 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)
This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megalcity. By taking this class in Mexico City, students will be able to visit some of the landmarks of Mexican History, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis. Prerequisite: SPAN 2350.

SPAN 3500 Interrogating ‘convivencia’: Muslims, Christians, and Jews in Iberia (4 Credits)
This course proposes to critically interrogate the complex relationship between the Muslim, Christian, and Jewish communities of the Iberian Peninsula, and the lasting impact of the historical relationship between these communities on the culture, literature, art, politics, and economy of Spain, with particular emphasis on the period 711-1700. Special attention is paid to problematizing the notion of ‘convivencia’ and to considering how diverse representations of the ‘three cultures’ are appropriated in the construction of national(ist) ideals that are overtly reflected in literature and art, both in Medieval and Early Modern Iberia and in contemporary Spain. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400, or equivalent.

SPAN 3510 Sex, Bodies, and Power in Imperial Spain (4 Credits)
This course considers the body a key locus of social and political struggle in the 16th and 17th Centuries in Spain and in the Indies. Contemplating the role of a variety of discourses from diverse fields (medicine, law, philosophy, theology, politics), we will ask such questions as: What is the body and how does it work in physical terms? How is the body used to perform or problematize legal, moral, and social identies? How is the body used as a mechanism to marginalize, control, or exclude individuals or groups, or to legitimize the authority and power of other individuals or groups? We will contemplate representations of the body in diverse media and genres (painting, sculpture, engravings, theater, novels, poetry, autobiography, medical treatises, moralizing tracts) in order to reconstruct the complex epistemology through which the body, and especially problems of race, gender, and sexuality, was conceptualized in the 16th and 17th Centuries. Particular attention will be paid to the representation of the materiality of the body (physiology as a key to moral and cultural difference), eroticism, homosexuality, cross-dressing, ‘monsters,’ sickness, and reproduction, considering the representation of such corporeal phenomena to be a privileged space for interrogating the ideologies and structures upon which Power is built. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400 or equivalent.

SPAN 3600 Caribbean Blackness: Confictive Identity (4 Credits)
Introduces the student to the Caribbean region, particularly examining cultural characteristics of the Spanish speaking Caribbean, with an emphasis on race relations and the contributions of peoples of African descent. The focus is interdisciplinary and includes readings on anthropology, religion, and history among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.
SPAN 3650 The Andean World: Artistic Representations of Power, Resistance and Social Change (4 Credits)
Survey of Andean literature and art created during the nineteenth, twentieth and twenty-first centuries; artists’ portrayals of strategies for resistance and the struggle for social justice in modern Andean society. Study of a wide variety of genres including short stories, novels, testimonials, poetry, essays, songs, visual art and film. Class discussions, theoretical texts and student analyses focus on the central theme of representations of power, resistance and social change in the Andes. Prerequisite: SPAN 2350 or equivalent.

SPAN 3670 Exploring the Amazon: A Literary, Filmic and Ethnographic Journey (4 Credits)
Introduces the student to the Amazonian region of South America and the ways in which this fascinating landscape and the diverse peoples who inhabit it have been portrayed and exploited by “outsider” novelists, filmmakers, explorers, anthropologists, businessmen, and scientists beginning in the sixteenth century. This course also includes a survey of texts selected from the oral traditions of indigenous Amazonian groups such as the Ashaninka, Machiguenga, Cashinahua and Ese’Eja. Assigned readings underscore the course’s interdisciplinary focus and encourage students to hone their course reading and analytical writing skills through the study of anthropological, historical, literary and filmic texts. Prerequisite: SPAN 2350 or equivalent.

SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)
Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

SS 3980 Critical Race and Ethnic Studi (1-4 Credits)

Economics
Office: Sturm Hall, Room 246
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2685
Email: Economics@du.edu
Web Site: http://www.du.edu/ahss/economics (http://www.du.edu/ahss/economics/)

Economics is the study of the production and distribution of material wealth. This study offers an understanding of the market and non-market institutions—and their historical evolution—that govern such production and distribution at the local, national and global levels. Students examine how individual markets for products, labor and finance work, and why they function well or poorly in part and in whole. They analyze economic structural changes and learn theories of business cycles, as well as investigate the choices and consequences of government policy alternatives. The Economics major can prepare students for a variety of careers in business, banking, government, and education. Economists hold positions in private industry and government as leaders, consultants, analysts, or advisors. Economics is also a good major for students who are interested in pursuing advanced degrees in Law, Business, International Studies, and, of course, Economics.

Economics
Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 82))

44 credits, including the following:

Total Credits 44

* Elective courses should be chosen in consultation with an advisor.

Secondary Major
44 credits. Same requirements as for the BA degree.

Minor Requirements
20 credits, including the following:
Requirements for Distinction in the Major in Economics

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Of the five electives, two must be at the 3000-level
- Completion of ECON 3997 Economics Honors Thesis (4 credits, not considered a 3000-level elective)
- Total of 48 credits

BA in Economics

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Total Credits: 98

1 INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.
ECON 1020 Economics: A Critical Introduction (4 Credits)
The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society, and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the "new economy"; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the "new economy", but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the "economic" one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

ECON 1030 Introduction to Micro and Macroeconomics (4 Credits)
The primary goal of this course is to introduce essential microeconomic and macroeconomic concepts to prepare economics majors and minors for their upper level economics courses. It achieves this goal (i) by separating and interrelating micro level (e.g., individual) and macro level (e.g., society) dynamics in the economy; (ii) by considering those dynamics within their historical context; and (iii) in the context to history of ideas in economics. The course also introduces analytical tools such as graphical and data analysis to demonstrate core ideas in micro and macroeconomic theories and policies. Prerequisite: ECON 1020.

ECON 1988 Study Abroad Resident Credit (0-18 Credits)

ECON 2020 Intermediate Microeconomics (4 Credits)
Microeconomic foundations to determine prices and production; consumer behavior, the behavior of firms in competitive and imperfectly competitive markets, and factor markets. Prerequisite: ECON 1030.

ECON 2030 Intermediate Macroeconomics (4 Credits)
Determinants of aggregate levels of production, employment and prices, focusing on the short-run dynamics of an economy consisting of a complex structure of interrelated markets; includes analysis of investment decisions, monetary structures and labor markets. Prerequisite: ECON 1030.

ECON 2050 History of Economic Thought (4 Credits)
Development of economic thought; leading writers and schools, their influence and theories. Prerequisite: ECON 1030.

ECON 2250 Money & Banking (4 Credits)
This course familiarizes you with the basic principles of money, banking, balance sheets, financial instruments, financial institutions, and monetary policy. We examine alternative perspectives on a variety of issues such as the nature and origins of money, how money enters the economy, the role of banks and nonbank financial institutions in the creation of money, the relationship between banks, nonbank financial firms and the central bank, and financial crises. Additionally, we study the relation between monetary and fiscal and financial stabilization policies, and whether they are complementary or contradict each other. How these policies affect private sector balance sheets will be another topic of our course. We also study the evolution of the financial system including financial practices, instruments, institutions and how they impact and are impacted by regulation. We then use the principles of money and banking we learn this quarter to understand the role of banks in the recent 2008 Global Financial Crisis, as well as its broader causes and potential cures. Prerequisite: ECON 1030.

ECON 2280 Gender in the Economy (4 Credits)
This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1030.

ECON 2300 Comparative Economic Systems (4 Credits)
The purpose of this course is to develop an understanding of the methods (both theoretical and empirical) used to compare economic systems around the world. As a learning objective, by the end of the course students should be able to explain the differences between economic, financial, and legal institutions, policies, and economic performance in alternative economic systems and to critically evaluate changes occurring in transition economies (particularly China, Russia, and Central and Eastern Europe) and their implications for economic growth. Prerequisite: ECON 1030.

ECON 2330 China and the Global Economy (4 Credits)
This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)
This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.
ECON 2400 Public Finance (4 Credits)
Public-sector economics, including public finance and expenditures; effects of different types of taxes and various government programs; government budgeting; cost benefit analysis. Prerequisite: ECON 1030.

ECON 2410 Industrial Organization Economics (4 Credits)
This course explores some applied topics in microeconomic theory such as innovation and technological change; cost of production and decision making by firms; market structures and competition; labor market; the changing role of the state; antitrust; regulation and deregulation; and international trade. Prerequisite: ECON 1030.

ECON 2450 Race in the Economy (4 Credits)
This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

ECON 2500 Economic Development (4 Credits)
This course introduces the student to several dimensions of, and forces pertaining to, development processes, including nature's inequalities, colonial legacies, the role and limitations of primary production, labor utilization, industrialization, trade, technology acquisition, foreign direct investment and other forms of capital flow, and the role of the state. If time permits, discussion include environmental concerns and cultural factors. Prerequisite: ECON 1030.

ECON 2510 The Asian Economies (4 Credits)
This course is based on a comparative approach, examining several Asian economies’ colonial background, their primary producing sectors, the developmental state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

ECON 2540 Law and Economics (4 Credits)
This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

ECON 2600 International Economics (4 Credits)
The student learns about balance of payments, accounting, international monetary arrangements, international trade, and international investment. Certain policies that have a direct impact on a country’s balance of payments, e.g. macroeconomic policies, exchange rate policy, and commercial policies, are examined. Some features of recent US trade policy stances is also be surveyed. Prerequisite: ECON 1030.

ECON 2670 Quantitative Methods (4 Credits)
This course offers an introduction to empirical work and statistics relevant to the study of economics. The course begins with a discussion of the use and creation of data, and various sources of data. It then presents the basic foundations of statistical methods for the description and analysis of data. Students learn how to calculate common descriptive statistics, test hypotheses related to the mean and differences between means, and how to perform and interpret bivariate linear regression analysis. In the process, students learn and use a popular software package commonly used for statistical analysis in economics. Prerequisite: ECON 1030.

ECON 2701 Topics in Economics (4 Credits)
Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

ECON 2710 Labor Economics (4 Credits)
Labor theory and institutions; theory of labor demand and supply including market models, demographics and education; the labor movement and legislation, industrial conciliation methods, and modern industrial relations. Prerequisite: ECON 1030.

ECON 2798 Study Abroad Resident Credit (0-18 Credits)

ECON 3040 Marxian Political Economy (4 Credits)
An exposition of Marx’s theory of value through a detailed reading of Capital, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

ECON 3075 Marxism (4 Credits)
This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.
ECON 3110 European Economic History (4 Credits)
The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

ECON 3460 Monetary Theory and Policy (4 Credits)
Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

ECON 3480 Money & Financial Markets (4 Credits)
Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

ECON 3500 Economic Development (4 Credits)
Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

ECON 3590 Urban Economics (4 Credits)
Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

ECON 3600 International Monetary Relations (4 Credits)
Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

ECON 3610 International Trade Theory & Policy (4 Credits)
Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

ECON 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)
This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

ECON 3670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)
This course develops the foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Prerequisites: ECON 2670 and either ECON 2020 or ECON 2030. Restriction: Junior standing.

ECON 3701 Topics in Economics (4 Credits)
Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

ECON 3740 Health Economics (4 Credits)
This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

ECON 3830 Topics in Macroeconomics (4 Credits)
Coverage varies but may include advanced topics in monetary theory, the study of business cycles, or the works of important monetary and macroeconomic theorists. Restriction: junior standing. Prerequisite: ECON 2030.

ECON 3850 Mathematics for Economists (4 Credits)
Restriction: junior standing. Prerequisite: ECON 2020 and 2670.
ECON 3900 Growth, Technology and Economic Policy (4 Credits)
This course will introduce students to the important issues related to technological change and how it relates to economic growth. The lectures seek to explain how technology and innovation determine growth and development with special emphasis on learning-by-doing, organizational capability, appropriation and spillover effects. The core topics that will be covered include: (1) origins of new technology and its market introduction, (2) the process of technological adoption and advancement, (3) the dissemination of technology and innovations within and across firms, industries and countries, (4) the impacts of technological change, including benefits and costs, on individual and society at large and (5) policy implications to promote innovation and to reduce its negative effects. The rest of the course will focus on the relationship of technological change to human development, social welfare, as well as prior experiences of industrialized economies and emerging economies. Prerequisites: ECON 2020 and junior standing.

ECON 3970 Environmental Economics (4 Credits)
This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

ECON 3988 Study Abroad Resident Credit (0-18 Credits)
ECON 3991 Independent Study (1-8 Credits)
Prerequisites: ECON 1030.

ECON 3995 Independent Research (1-4 Credits)
This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

ECON 3997 Economics Honors Thesis (4 Credits)
Students pursuing Departmental Distinction will write an Economics Honors Thesis of between 30 and 50 pages during their senior year. The subject of the Thesis must concern some important topic in Economics, the precise nature of which will be determined by the student and an advisor chosen from among the Economics faculty. A student wanting to try for this Distinction must first meet with the Department Chair to discuss which Professor he or she will request to supervise his or her Thesis. The Professor who agrees to supervise an Honors Thesis is responsible for certifying that the work is of sufficient quality for Departmental Distinction in Economics.

The mission of the Department of Electrical and Computer Engineering (ECE) at the undergraduate level is to offer programs that support and complement the University mission; to provide a general undergraduate education in computer, electrical, and mechanical engineering that prepares students for employment or graduate study; to include interdisciplinary engineering work in all programs; to encourage the professional status of the
faculty; and to foster the professional awareness of the students. This statement concisely sums up the goals and objectives of our programs. All Engineering degrees are accredited by the Engineering Accreditation Commission (EAC) of ABET.

- Course of Study
- PINs and Undergraduate Research Assistantships
- Study Abroad
- Fundamentals of Engineering (FE) Exam & Enrollment as an Engineer-Intern (EI)

PROGRAM EDUCATIONAL OBJECTIVES
The undergraduate program objectives of the Electrical and Computer and Mechanical and Materials Engineering Departments are to produce graduates who, within a few years of graduation:

a. Apply their engineering and problem solving skills towards engineering practice, engineering graduate school, or non-engineering fields such as medicine, science, business, law, or public policy, while continuing to engage in life-long learning.

b. Value and demonstrate character in their chosen vocation by acting responsibly, ethically, and professionally while contributing to a sustainable common good for society.

c. View their educational experience as valuable and instrumental to their professional success.

PROGRAM COMPONENTS
All of our engineering programs have several components:

a. The University of Denver's Common Curriculum, which includes First-year Seminar, Writing and Rhetoric, Ways of Knowing, and Advanced Seminar;

b. Basic sciences and mathematics, including chemistry, physics, and mathematics;

c. A common engineering background, with contributions from basic material in computer, electrical, and mechanical engineering;

d. A four-year integrated engineering sequence, stressing engineering design and project work, much of which is interdisciplinary and involves constructive teamwork;

e. An engineering discipline (computer engineering, electrical engineering, mechanical engineering);

f. A specialization giving the discipline more depth, or complementing it, according to the student’s individual interests.

ENGINEERING DESIGN
The feature of engineering programs that most differentiates them from programs in basic or applied science and mathematics is engineering design, which is both an art and a science. Our programs feature a four-year stem of course work required of all students, regardless of curriculum, which emphasizes design, project work, team-work, and the application of scientific and technical knowledge and design skills already acquired to the solution of interdisciplinary engineering problems. As the student progresses in the curriculum, more and more reliance is placed on previous work, and more realistic constraints and considerations are required for success. The sequence culminates in a three-quarter capstone design project carried out in the final year. Additional design work is contained in specialized courses.

COURSE OF STUDY
Engineering curricula are highly structured; acquisition of certain knowledge and skills must precede acquisition of more advanced ones. There is, thus, very little flexibility in the order in which courses must be completed, and there are few electives. Most engineering courses are offered only once a year, so an omission or deletion can add a year to the time required to complete the degree program. Although a high percentage of our students graduate in four years, it should be noted that, nationwide, nearly half of all engineering graduates take more than four years to complete their degrees, so students should not become discouraged if this is needed. The additional year may also be used to acquire additional expertise.
Engineering Common Curriculum: The curricula in all programs are the same for the first 5 quarters; a student can delay choosing an engineering major until the beginning of the spring quarter of their second year.

Advanced Curriculum (Four Year Program):

The curricula for the last two years have several components:

a. Advanced work in the engineering discipline chosen;
b. Integrated engineering project work and design;
c. Development of a specialized area (details of the areas of specialization for each degree program are given later in this booklet);
d. Completion of the University of Denver Common Curriculum

Advanced Curriculum (Five-Year Dual-Degree (BS/MS) Program):

The curricula for the last three years have several components:

a. Advanced work in the engineering discipline chosen;
b. Integrated engineering project work and design;
c. Completion of the University of Denver Common Curriculum;
d. Completion of the requirements for the MS in the engineering discipline.

For more information on any of these programs, please contact an advisor from either Electrical and Computer Engineering or Mechanical and Materials Engineering. Students interested in these options should discuss them with an advisor as early as possible in their undergraduate careers.

For further information regarding these programs, visit the ECE (http://ritchieschool.du.edu/departments/ECE) and MME (http://ritchieschool.du.edu/departments/MME) web sites.

PINS AND UNDERGRADUATE RESEARCH ASSISTANTSHIPS

Students wishing to participate in faculty research projects may be eligible for participation in PinS (Partners in Scholarship) or Undergraduate Research Assistantships (URA's). PINS is a University-wide program in which a student performs research in conjunction with a faculty member. More information on PINS is available at http://www.du.edu/urc/. URA's work directly with faculty, often for compensation, on current research efforts. Students can read about faculty research interests on the ECE (http://ritchieschool.du.edu/departments/ECE) and MME (http://ritchieschool.du.edu/departments/MME) web sites. Such work enhances the student's ability to compete for scholarships, internships, entrance to graduate study and permanent employment. A limited number of these are available and are typically restricted to upper-division students with good academic backgrounds. An agreement with a specific faculty member is required and the URA is requested by, and granted to, the faculty member.

STUDY ABROAD

The University of Denver strongly encourages students to participate in study abroad programs, particularly the Cherrington Global Scholars Program; more information about which can be found at: http://www.du.edu/intl/abroad/

The engineering curricula have been structured so that students may take advantage of this opportunity in the autumn quarter of the senior year, rather than in the autumn quarter of the junior year, as is more usual in other DU programs.

Engineering students must be especially careful in planning this experience because of the highly restrictive and sequential nature of engineering curricula. It should also be noted that the abroad sites at which the required courses can be found are limited, vary depending on degree, and may change from one year to the next. Drs. Matt Gordon and Ron DeLyser are the department contacts for students interested in the Cherrington Global Scholar Program.

COOPERATIVE EDUCATION PROGRAM

Recognizing the value of experiential learning, we have created a paid co-op program which is optional and competitive for all Ritchie School students, though ideally suited for current sophomores and juniors. Through this collaborative program between academia and industry, students work full time at participating companies earning valuable work experience. Typically, students will not take classes for one full academic year, resuming their studies upon their return exactly in sequence but one year removed. In some cases, DU courses can be taken while on co-op. Dr. Matt Gordon is the department contact for students interested in the co-op program.
FUNDAMENTALS OF ENGINEERING (FE) EXAMINATION AND ENROLLMENT AS AN ENGINEER-INTERN (EI)

As an essential part of our assessment program, all mechanical engineering students in our ABET/EAC accredited curricula must register for and take the FE exam before graduation. This is optional for all electrical and computer engineering students, but highly recommended. The FE Exam is the first of a two-step process in order to become registered as a Professional Engineer (PE).

The FE exam is a national 6-hour examination administered by NCEES (National Council of Examiners for Engineering and Surveying) in conjunction with the Colorado State Board for Professional Engineers and Land Surveyors. Students must have completed at least 135 credits to apply to take the FE exam, for which a fee is charged. For more information please contact the MME department chair.

After passing the FE exam, the student must send a final transcript recording the receipt of an engineering degree to the Colorado State Board for Professional Engineers and Land Surveyors. Typically, after passing the FE exam, the requirements for registration as a PE are 4 years of engineering experience under the supervision of a PE with increasing engineering responsibility and passing the PE examination.

Criteria for Entering Any of the Engineering Programs

In the first year, students should plan to take the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1951</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1952</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1953</td>
<td>Calculus III</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1211</td>
<td>University Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 1212</td>
<td>University Physics II</td>
<td>5</td>
</tr>
</tbody>
</table>

Students lacking the mathematics preparation to begin calculus in the first quarter may take MATH 1070 College Algebra and Trigonometry followed by the usual calculus sequence; these students should meet with an advisor from the engineering department before enrolling for courses. Failure to complete the courses listed above in the first year may lead to an additional year of study.

Minors in Engineering for Non-Engineering Students

Students desiring to minor in any of the engineering disciplines must take 20 hours of discipline specific engineering courses in addition to the equivalent of MATH 1951 Calculus I, MATH 1952 Calculus II, and MATH 1953 Calculus III. It is recommended that they have PHYS 1211 University Physics I, PHYS 1212 University Physics II, and PHYS 1213 University Physics III in their curriculum. Degree programs that “naturally flow” into an engineering minor are: chemistry, computer science, biology, mathematics and physics.

Computer Engineering

Bachelor of Science in Computer Engineering Requirements

(198 credits required for the degree (p. 90))

This degree requires a minimum of 198 credits. Students not in the BSCPE/MBA combined program select a specialty area from communications, digital signal processing and networking; robotics, embedded systems and instrumentation, and computer systems engineering; or, under special circumstances, an individualized specialization may also be approved. Faculty mainly associated with computer engineering pursue research in microprocessors, Microsystems, biomedical systems, computer architecture, complex VLSI systems design, digital systems modeling and simulation, networks, parallel and distributed control, and processing.

Requirements

198 credits are required for the degree including 48 credits of mathematics and basic science, 75 - 83 credits of engineering topics, and additional credit in computer science.

### Notes

Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.
### Areas of Specialization

All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization. For specific courses in the specialization areas, please see Degree Program Plan.

- **Communications, DSP, and Networking**
- **Computer Systems Engineering**
- **Robotics, Embedded Systems, and Instrumentation**
- **Individualized Option**

Nine credits of upper division technical courses selected with advisor's approval. A letter signed by the student's advisor giving the reason for the courses selected must be on file in the student's records.

### Minor in Computer Science Requirements

A minor in Computer Science requires a total of 21 credits. The goal of the minor is to provide students with a foundation in computer programming and a basic understanding of the discipline, while allowing some flexibility in elective courses to compliment their interests. Note that the Minor in Computer Science may also be used to satisfy the Computer Science course requirements of the Computational Physics Concentration (p. 507). The following courses are required for the Minor in Computer Science:

#### Required Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 1201</td>
<td>Introduction to Computer Science I</td>
<td>2</td>

<tr>
<td>COMP 1352</td>
<td>Introduction to Programming II</td>
<td>3</td>
</tr>
<tr>
<td>COMP 1353</td>
<td>Introduction to Data Structures &amp; Algorithms I</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Electives

8 credits of computer science courses

| Total Credits | 21 |

1 COMP 3904 Internship/Co-Op in Computing cannot be used to satisfy the elective requirements of the minor.

### Bachelor of Science in Electrical Engineering Requirements

(202 credits required for the degree (p. 91))

This program requires a minimum of 202 credits. Students not in the BSEE/MBA combined program select a specialization from communication systems and digital signal processing; robotics, electronics, photonics and microsystems; or power and energy; or, under special circumstances, an individualized specialization may also be approved. Faculty mainly associated with electrical engineering pursue research in the areas of communication systems and networks, digital signal processing, optical communication devices and systems, photonics, robotics and controls, and autonomous systems.
Requirements

202 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

### Notes

**Areas of Specialization**

All Bachelor of Science in Electrical Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the student’s choice of technical electives. For specific courses in the specialization areas, please see Degree Program Plan.

- Communications Systems and Digital Signal Processing
- Robotics
- Electronics, Photonics, and Microsystems
- Power and Energy
- Individualized Option

Nine credits of upper-division technical courses selected with advisor’s approval. A letter signed by the student’s advisor giving the reason for the courses selected must be on file in the student’s records.

### Electrical Engineering with a Concentration in Mechatronic Systems Engineering

This degree program requires a minimum of 200 credits. Students not in the BSEE with a concentration in mechatronic systems engineering/MBA combined program select a specialization from mechanical systems, computer control and systems; or, under special circumstances, an individualized specialization may also be approved. Faculty associated with mechatronic systems engineering pursue research in the areas of robotics and controls and unmanned aerial systems.

### Requirements for the Concentration

(200 credits required for the degree (p. 91))

200 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

- Spring: 15

**Total Credits:** 197

### Notes

**Common Curriculum** - These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society.

**ASEM 2XXX - Advanced Seminar Engineering** students are required to take a writing-intensive advanced seminar. Junior standing is also required.

**Technical Elective.** Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.

**Math/Sci.** One (1) math or science course from the approved list (11 credits). Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years.

Total credits may vary based on technical elective options

### Approved Math/Sci Courses (subject to participating department course offerings):

#### Biology

- BIOL 1010 Physiological Systems w/ BIOL 1020 Physiological Systems Lab
- BIOL 1011 Evolution, Heredity and Biodiversity w/ BIOL 1021 Evolution, Heredity and Biodiversity Lab
- BIOL 2090 Biostatistics
- BIOL 2120 Cell Structure and Function w/ BIOL 2121 Cell Structure & Function Lab
- BIOL 3250 Human Physiology

#### Chemistry

- CHEM 1250 General Chemistry II Laboratory
- CHEM 2131 Chemistry of the Elements
- CHEM 2240 Introduction to Environmental Chemistry
- CHEM 2270 Quantitative Chemical Analysis

#### Math

- MATH 2060 Elements of Linear Algebra
- MATH 3080 Introduction to Probability
- MATH 3090 Mathematical Probability
- MATH 3851 Functions Complex Variable

#### Physics

- PHYS 2251 Modern Physics I
- PHYS 2252 Modern Physics II w/ PHYS 2260 Modern Physics Lab
- PHYS 2259 Uncertainty and Error Analysis
- PHYS 2300 Physics of the Body
- PHYS 2340 Medical Imaging Physics
- PHYS 3510 Analytical Mechanics I
- PHYS 3711 Optics I

### AREAS OF SPECIALIZATION

All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization.

#### Communications, DSP, and Networking

Select three courses from the following: 3

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
ENEE 3141  Digital Communications 3
ENEE 3670  Introduction to Digital Signal Processing 4

**Computer Systems Engineering**
Select three courses from the following.1

- COMP 3501  Introduction to Artificial Intelligence 4
- COMP 3801  Introduction Computer Graphics 4
- ENCE 3321  Network Design 4
- ENCE 3620  Computer Vision 4
- ENMT 3220  Mechatronics II - Real-Time Systems 4
- COMP 2370  Introduction to Data Structures & Algorithms II 4
- ENCE 3631  Machine Learning 4

**Robotics, Embedded Systems, and Instrumentation**
Select three courses from the following.1

- COMP 3501  Introduction to Artificial Intelligence 4
- COMP 3801  Introduction Computer Graphics 4
- ENCE 3321  Network Design 4
- ENCE 3620  Computer Vision 4
- ENCE 3630  Pattern Recognition 4
- ENGR 3721  Controls 3,4
- ENGR 3730  Robotics 3
- ENMT 3220  Mechatronics II - Real-Time Systems 4

**Individualized Option**
Nine credits of upper division technical courses selected with advisor’s approval. A letter signed by the student’s advisor giving the reason for the courses selected must be on file in the student’s records.

1 Students may also take Special Topics or Independent Study as appropriate for this option

### AREAS OF SPECIALIZATION

All Bachelor of Science in Electrical Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives.

#### Communications Systems and Digital Signal Processing

**Required:**

- ENEE 3141 Digital Communications 3

**Two of the following:**

- ENCE 3321 Network Design 4
- ENEE 3620 Optical Fiber Communications 4
- ENEE 3670 Introduction to Digital Signal Processing 4

#### Robotics

Select three courses from the following:

- ENCE 3100 Advanced Digital System Design 4
- ENCE 3620 Computer Vision 4
- ENGR 3730 Robotics 3
- ENME 3545 Mechanisms 4
- ENMT 3220 Mechatronics II - Real-Time Systems 4

#### Electronics, Photonics, and Microsystems

Select three courses from the following:

- ENEE 3030 Optoelectronics 4
- ENEE 3035 Photonics 4
- ENEE 3620 Optical Fiber Communications 4
- ENGR 3520 Introduction to Power Electronics 4
- ENGR 3525 Power Electronics and Renewable Energy Laboratory 1

#### Power and Energy

**One of the following:**

- ENGR 3525 Power Electronics and Renewable Energy Laboratory 1
- ENGR 3535 Electric Power Engineering Laboratory 1

**Two of the following:**

- ENGR 3520 Introduction to Power Electronics 4

Total Credits: 202
ENGR 3540  Electric Power Systems  4
ENGR 3545  Electric Power Economy  3

Individualized Option
Nine credits of upper-division technical courses selected with advisor’s approval. A letter signed by the student’s advisor giving the reason for the courses selected must be on file in the student’s records.

1 Students may also take Special Topics or Independent Study as approved for this option.

<td>4</td>
</tr>
<tr>
<td>ENCE 3620</td>
<td>Computer Vision</td>
<td>4</td>
</tr>
</tbody>
</table>

Individualized Option

Nine quarter hours of upper division technical courses selected with advisor’s approval. A letter signed by the student’s advisor giving the reason for the courses selected must be on file in the student’s records.

1 Students may also take Special Topics or Independent Study as appropriate for this option.

REQUIREMENTS FOR DISTINCTION IN THE MAJOR IN COMPUTER ENGINEERING

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

REQUIREMENTS FOR DISTINCTION IN THE MAJOR IN ELECTRICAL ENGINEERING

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

ENCE 2101 Digital Design (3 Credits)

Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM’s, PLA’s and PAL’s; data selectors and multiplexers; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

ENCE 3100 Advanced Digital System Design (4 Credits)

Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

ENCE 3210 Microprocessor Systems I (4 Credits)

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

ENCE 3231 Embedded Systems Programming (4 Credits)

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

ENCE 3241 Computer Organization and Architecture (3 Credits)

Organization of digital computers; memory, register transfer and datapath; Arithmetic Logic Unit; computer architecture; control unit; I/O systems. Prerequisite: ENCE 2101.
ENCE 3250 HDL Modeling & Synthesis (3 Credits)
Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor's permission.

ENCE 3260 Python for Engineers (3 Credits)
This course introduces python programming to students and gives them programming and mathematical tools that will be useful in different areas of engineering. The course is divided into 2 main parts. Part 1 (Introduction to Python Programming), covers the fundamental concepts of python programming, covering topics from variables and data structures, functions, algorithm complexity, representation of numbers and basics of parallel computing. Part 2 (Introduction to Numerical Methods), gives an overview of a variety of numerical methods that are useful for engineers. The course reviews the basics of linear algebra, discusses the importance of eigenvalues and eigenvectors, regressions and concepts of "discrete Fourier transform" and "fast Fourier transform".

ENCE 3321 Network Design (4 Credits)
Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

ENCE 3501 VLSI Design (3 Credits)
Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

ENCE 3620 Computer Vision (4 Credits)
This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisite: ENEE 3111.

ENCE 3630 Pattern Recognition (4 Credits)
This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.

ENCE 3631 Machine Learning (4 Credits)
This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

ENCE 3830 Topics in Computer Engineering (1-5 Credits)
Special topics in computer engineering as announced. May be taken more than once. Prerequisite: varies with offering.

ENCE 3991 Independent Study (1-5 Credits)
Topics in computer engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENCE 3995 Independent Research (1-10 Credits)
ENCE 4110 Modern Digital Systems Design (4 Credits)
This course focuses on the design of digital systems using combinational, sequential, and programmable logic devices and Hardware Description Languages (HDL). Techniques for logic design including asynchronous logic, physical world interfaces to digital systems, and system performance analysis methods are studied. Students also learn HDL-Verilog to program CPLD devices and FPGA systems. Cross listed with ENCE 3100.

ENCE 4210 Microprocessor Systems I (4 Credits)
Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Cross listed with ENCE 3210.

ENCE 4231 Embedded Systems Programming (4 Credits)
Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems.
ENEE 4250 Advanced Hardware Description Language (HDL) Modeling and Synthesis (4 Credits)
This course covers advanced concepts in Hardware Description and Language (HDL) modeling and Synthesis. It covers topics including but not limited to digital system design, simulation, and synthesis using Verilog HDL and VHDL. The course also covers RTL design, behavioral description, system Verilog, and timing analysis using CAD tools.

ENEE 4501 Advanced VLSI Design (4 Credits)
Advanced techniques in the fabrication and design of VLSI circuits and systems. Modeling of parasitic components. Floor-planning, clock distribution, routing, and low power design. Cross listed with ENCE 3501. Prerequisite: ENEE 3501 or permission of instructor.

ENEE 4620 Advanced Computer Vision (4 Credits)
This course covers advanced concepts in image processing and computer vision including but not limited to image radiometry and geometric formation, edge detection, geometric based transformations (e.g., image warping and morphing), camera calibration, Epipolar geometry, and stereo feature matching. Other advanced topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice advanced topics in image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENEE 3620. Prerequisite: ENEE 3311.

ENEE 4630 Advanced Pattern Recognition (4 Credits)
This class covers advanced topics in pattern recognition including but not limited to Bayesian decision theory, parametric estimation and supervised learning, linear discriminant functions, nonparametric methods, feature extraction for representation and classification, manifold learning, bag of words, and Support Vector Machines. Cross listed with.

ENEE 4631 Advanced Machine Learning (4 Credits)
This class covers advanced topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep neural networks, deep learning, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENEE 3631.

ENEE 4800 Advanced Topics (CPE) (1-5 Credits)
Various topics in computer engineering as announced. May be taken more than once. Cross-listed with ENCE 3321, ENCE 3620.

ENEE 4991 Independent Study (1-10 Credits)

ENEE 4995 Independent Research (1-18 Credits)

ENCE 5995 Independent Research (1-18 Credits)

ENEE 2012 Circuits I and Laboratory (4 Credits)
An introduction to electrical circuit analysis, design and evaluation. Emphasis on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and circuit theorems are stressed. AC signals are introduced. Computer analysis software integrated throughout the course. Cross-listed with PHYS 2011. Prerequisites: PHYS 1213 or PHYS 1214, MATH 1953.

ENEE 2022 Circuits II (4 Credits)
AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is placed on the Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single pole cascade, Butterworth, Chebychev), and step response circuits. Phasor applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit analysis. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Prerequisites: ENEE 2012, MATH 2070.

ENEE 2211 Electronics (4 Credits)
Circuit behavior of semiconductor devices. Bipolar and field-effect transistors and their models; basic physical explanation of the functioning of these devices; large- and small-signal analysis of practical circuits; electronic design using both hand and computer methods of calculation and design; biasing methods for amplifier circuits; power supplies and current-source circuits. Design laboratory. Prerequisites: ENEE 2222.

ENEE 2223 Advanced Electronics (4 Credits)
High-frequency transistor models and determination of parameters; Laplace and Fourier analyses of common amplifier circuits; design and analysis of broadband amplifiers and multistage amplifiers. Basis feedback topologies: Nyquist, root-locus and Bode plot investigations of stability; introduction to amplifier noise; active filter design; sinusoidal oscillators. Prerequisite: ENEE 2211.

ENEE 2611 Engineering Electromagnetics (4 Credits)
The study of Maxwell's equations and their experimental and theoretical foundations. Topics include Static electromagnetic fields, time-varying electromagnetic fields, wave propagation, transmission lines, and antennas. Prerequisites: PHYS 1213 or PHYS 1214. Corequisite: ENGR 3611 or ENGR 3621.

ENEE 3011 Physical Electronics (4 Credits)
The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010 or CHEM 1610, PHYS 1213 or PHYS 1214 or permission of instructor.
ENEE 3030 Optoelectronics (4 Credits)
The active and passive optical elements. Includes principles of light, optical sources (LED, LASER, Fiber Laser), optical fibers, photodetectors (APD, PIN, MSM) and practical optical transmitter and receivers. Laboratory. Cross listed with ENEE 4030. Prerequisite: ENEE 3011 or ENEE 2211 or permission of instructor.

ENEE 3035 Photonics (4 Credits)
Theory and techniques for the application of the optical electromagnetic spectrum from infrared to ultraviolet to engineering problems in communications, instrumentation and measurement. May include lasers, optical signal processing, holography, nonlinear optics, optical fiber communications, optical behavior of semiconductors, and similar topics in modern optics, depending on the interests and requirements of the students. Cross-listed with ENEE 4800. Prerequisite: ENEE 2611 or instructor's permission.

ENEE 3111 Signals & Systems (4 Credits)
Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Prerequisites: MATH 2070.

ENEE 3130 Principles of Communication Systems (3 Credits)
Introduction to the theory and analysis of communication systems. Emphasis on analog systems; application of probability and statistics, modulations and demodulations; noise and signal-to-noise ratio analysis; the measure of information, channel capacity, coding and design factors. Prerequisites: ENEE 3111, ENEE 3661 or permission of instructor.

ENEE 3141 Digital Communications (3 Credits)
Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

ENEE 3620 Optical Fiber Communications (4 Credits)
A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users who have a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Advanced Project. Cross listed with ENEE 3620. Prerequisite: instructor permission.
ENEE 4630 Optical Networking (4 Credits)
This course provides a technical overview of optical networking. It gives students a solid understanding of optical networking field principles and practice. Underlying principles are reviewed along with common optical solutions and practices. It explains and provides practical tips on how to design and implement Networks. Examples are used to demonstrate key concepts of ATM, SONET/SDH and DWDM implementation. Prerequisite: ENEE 3011 or instructor approval.

ENEE 4640 Electromagnetic Compatibility (4 Credits)
The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include: Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Final Project. Cross listed with ENEE 3641.

ENEE 4800 Advanced Topics (EE) (1-5 Credits)
Various advanced topics in electrical engineering as announced. May be taken more than once. Cross-listed with ENEE 3035.

ENEE 4950 ECE Graduate Assessment (0 Credits)
This class does not meet. All graduate (MS and PhD) ECE students will enroll in this class during their last quarter. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. The purpose is to collect data for the assessment and continuous improvement of the graduate programs.

ENEE 4991 Independent Study (1-10 Credits)
ENEE 4995 Independent Research (1-16 Credits)
ENEE 6991 Ph.D Independent Study (1-10 Credits)
ENEE 6995 Independent Research (1-16 Credits)
ENGR 1010 Electronics for the Arts 1 - Analog (4 Credits)
Introduction to analog electronics, culminating in construction of an analog sound synthesizer. Students are required to complete simple projects with circuits while learning the basics of analog synthesizers. Introduction to circuit simulation software (e.g. Falstad or Multisim), learn how to use oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

ENGR 1011 Electronics for the Arts 2 - Digital (4 Credits)
Introduction to digital electronics and coding for Arduino style microprocessors, culminating in design and construction of a hybrid analog/digital sound synthesizer or other device. Students are required to complete simple projects with Arduino while learning the basics of digital synthesizers. Introduction to programming, reinforce the use of oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

ENGR 1012 Electronics for the Arts 3 - Digital (4 Credits)
Individual or team-based development of more complex devices or systems, potential for product development. Students are required to complete complex projects that involve combining analog and digital synthesizers with the external world (sensors and/or actuators). Introduction to python programming and incorporation of artificial intelligence (AI) into synthesizers are among other topics covered in this course.

ENGR 1511 Engineering Connections (1 Credit)
This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

ENGR 1572 Applied MATLAB Programming (3 Credits)
The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671 or COMP 1351, and MATH 1952.

ENGR 1611 Introduction to Mechanical Systems with CAD (4 Credits)
Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.
ENGR 1622 Introduction to Mechatronic Systems I with MultiSim and MathCAD (4 Credits)
Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multiscan circuit analysis software and Mathcad are among other topics covered in this course.

ENGR 1632 Introduction to Mechatronic Systems II (4 Credits)
Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

ENGR 1700 Machine Shop Practice (1 Credit)
Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

ENGR 1911 Introduction to CAD (2 Credits)
This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

ENGR 1921 Introduction in Engineering II (1 Credit)
This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

ENGR 1931 Introduction to Engineering III (1 Credit)
This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

ENGR 2610 Engineering Integration I (3 Credits)
Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: Junior standing in the appropriate engineering discipline and ENME 3511 for MME majors or ENCE 3210 and ENEE 2211 for ECE majors (the latter three can be taken concurrently).

ENGR 2620 Engineering Integration II (3 Credits)
Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisite: ENGR 2610.

ENGR 2905 Engineering Cooperative Education (0-12 Credits)
For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

ENGR 2910 Engineering Economics and Ethics (3 Credits)
This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

ENGR 2950 Engineering Assessment I (0 Credits)
Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2211 AND ENGR 1572.

ENGR 2951 Engineering Assessment II (0 Credits)
Undergraduate students in Mechanical Engineering must register for and take the Fundamentals of Engineering Examination (FE). All students must complete an engineering exit interview and other assessment related tasks. To be taken in the last quarter of attendance. Prerequisites: ENGR 3323.

ENGR 3100 Instrumentation and Data Acquisition (4 Credits)
This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.
ENGR 3200 Introduction to Nanotechnology (4 Credits)
In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2410.

ENGR 3220 Introduction to Micro-Electro-Mechanical-Systems and Microsystems (4 Credits)
This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology. MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 4220.

ENGR 3313 Engineering Design Project I (2 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENCE 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

ENGR 3323 Engineering Design Project II (3 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

ENGR 3333 Engineering Design Project III (3 Credits)
Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

ENGR 3340 Product Development and Market Feasibility (4 Credits)
In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)
This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

ENGR 3520 Introduction to Power Electronics (4 Credits)
This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)
In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

ENGR 3535 Electric Power Engineering Laboratory (1 Credit)
In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.
ENGR 3540 Electric Power Systems (4 Credits)
This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

ENGR 3545 Electric Power Economy (3 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

ENGR 3611 Engineering Mathematics (3 Credits)
Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

ENGR 3620 Advanced Engineering Mathematics (4 Credits)

ENGR 3621 Advanced Engineering Mathematics (4 Credits)
Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems. Prerequisites: ENME 2541 AND ENGR 1572.

ENGR 3630 Finite Element Methods (4 Credits)
Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 3611.

ENGR 3650 Probability and Statistics for Engineers (4 Credits)
This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

ENGR 3721 Controls (3,4 Credits)
Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

ENGR 3722 Control Systems Laboratory (1 Credit)
This laboratory course serves as supplement to ENGR 3721. It aims at providing “hands on” experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

ENGR 3730 Robotics (3 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinematics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

ENGR 3731 Robotics Lab (1 Credit)
Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinematics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

ENGR 3735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3611, ENGR 3721, and ENGR 3722, or permission of the instructor.

ENGR 3800 Topics (ENGR) (1-4 Credits)
Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.
ENGR 3900 Engineering Internship (0-4 Credits)
Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than once for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

ENGR 3991 Independent Study (1-5 Credits)
Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

ENGR 3995 Independent Research (1-10 Credits)
ENGR 4100 Instrumentation and Data Acquisition (4 Credits)
This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

ENGR 4200 Introduction to Nanotechnology (4 Credits)
The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanoparticles, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

ENGR 4300 Advanced Numerical Methods (4 Credits)
Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

ENGR 4350 Reliability (4 Credits)
An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 3350.

ENGR 4501 Graduate Capstone Design I (3 Credits)
This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the “shredding” of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the “true” problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

ENGR 4502 Graduate Capstone Design II (3 Credits)
This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPS document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

ENGR 4503 Graduate Capstone Design III (3 Credits)
This is a project-centered course. This is the third third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

ENGR 4504 Graduate Capstone Design IV (3 Credits)
This is a project-centered course. This is the fourth of a practical class that implements the entire engineering “vee” design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.
ENGR 4530 Intro to Power and Energy (4 Credits)
Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

ENGR 4545 Electric Power Economy (4 Credits)
This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

ENGR 4560 Power Generation Operation and Control (4 Credits)
This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

ENGR 4590 Power System Protection (4 Credits)
This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus. Prerequisite: ENGR 3530 or ENGR 4530.

ENGR 4620 Optimization (4 Credits)
The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

ENGR 4622 Advanced Optimization (4 Credits)
Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)
Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

ENGR 4730 Introduction to Robotics (4 Credits)
Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

ENGR 4735 Linear Systems (4 Credits)
This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizability, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

ENGR 4740 Adaptive Control Systems (4 Credits)
Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisites: ENEE 3111, ENGR 3611, and ENGR 3721, or permission of instructor. Familiarity with MATLAB/Simulink.
ENGR 4745 Adv Non-Linear Control System (4 Credits)

ENGR 4750 Networked Control Systems (4 Credits)
Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

ENGR 4755 Optimal Control (4 Credits)
Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Language multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

ENGR 4760 Multivariable Control (4 Credits)
Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

ENGR 4765 Robot Control (4 Credits)
The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots, force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

ENGR 4770 Systems Engineering Requirements (4 Credits)
The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENGR 3730 or permission by the Instructor.

ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)

ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)
The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

ENGR 4910 Conceptual Design (4 Credits)
Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure—the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize permission by the Instructor.

ENGR 4920 Aerospace Missions (4 Credits)
The Design “Problem” in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.
ENGR 4940 Mission Operation Controls (4 Credits)
Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

ENGR 4991 Independent Study (1-5 Credits)
ENGR 4995 Independent Research (1-16 Credits)
ENGR 5991 Independent Study (0-10 Credits)
ENGR 5995 Independent Research (1-16 Credits)

Emergent Digital Practices
Office: Sturm Hall, Room 216
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-7716
Email: edp@du.edu
Web Site: http://www.du.edu/ahss/edp

Emergent Digital Practices (EDP) provides undergraduate students with a broad understanding of the history, theory and emerging status of multiple cultural practices, both mainstream and alternative, which are evolving alongside digital technologies. The EDP major emphasizes the new forms of interaction, collaboration, engagement, and performance developing as technology converges with bodies of knowledge and practices from across the arts, humanities, and sciences. Shaped by an investment in participatory forms of creativity and critical engagement, EDP asks students to work together to develop strategies and processes for addressing complex interdisciplinary topics and problems beyond the realm of industry standards.
and proven application. Together, EDP faculty and students will strive to create new forms of art, experiences, media, and ways of knowing in the 21st century.

The Emergent Digital Practices program brings together art, design, media, culture, and technology studies in a hands-on, collaborative environment. Technology links academic disciplines with professional fields and joins shared communities with our personal lives in many new and exciting ways. To understand and explore this landscape, we infuse the digital practices of making and writing with contemporary critical approaches to cultural technologies, media philosophy, the critique and investigation of electronic and new media arts, and studies in science fiction, trans-global politics and science.

Emergent Digital Practices appeals to students who are more broadly defined creative types and critical thinkers because the lines between artists, designers, scholars, and inventors have largely dissolved. The EDP program prepares students who seek to work in spaces beyond what is already defined and familiar. To help students acquire a broad spectrum of media literacies and practical artistic skills, the EDP major combines cutting-edge classrooms with new learning spaces that are equal parts laboratory, studio, think-tank, and stage. Integrating powerful desktop computer stations and highly mobile technologies within a variety of interactive smart-spaces, the EDP program supports new kinds of student-to-peer and student-to-faculty interactions and collaborations.

**Emergent Digital Practices**

The Bachelor of Arts in Emergent Digital Practices at the University of Denver promotes critical knowledge and creation with digital tools. The BA student majoring in emergent digital practices should be able to demonstrate both understanding and skills within interdisciplinary contexts. The BA student should also be able to synthesize ideas and practices from across the spectrum of historical and contemporary contexts, focusing not just on making the new, but making the needed. The BA student's work should demonstrate synergy with the student's second major, minor or dual-degree program. The Emergent Digital Practices Minor brings the power of basic technical know-how and critical sensibility to your major. The BA minor will be able to leverage digital ideas to infuse 21st-century methodologies into their other areas of interest, better preparing the student for either the marketplace or future academic studies in any discipline. Through both exploration of new ideas and hands-on experiences, the minor will prepare students to shift with our rapidly changing future.

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

48 credits, including the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</table>

The BA major in Emergent Digital Practices must also have a minor, a second major, or be enrolled in a dual-degree program in another discipline. To facilitate this requirement, the BA major in Emergent Digital Practices is capped at a maximum of 60 credits toward the major.

**Secondary Major**

60 credits. Same requirements as for BA degree.

**Minor Requirements**

24 credits, including the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDP Foundations</td>
<td>Select 3 of the following:</td>
<td>12</td>
</tr>
</tbody>
</table>
**Minor Requirements (for All Computer Science MAJORS)**

24 credits, in emergent digital practices. These requirements apply to students pursuing a Computer Science Major. *

<table>

</table>

* Students with a Computer Science major with a minor in Emergent Digital Practices:
  - cannot receive credit toward the minor for either EDPX 2100 or EDPX 2300
  - may need to seek prerequisite waivers to enroll in EDPX 3100, 3200, 3450, 3110, 3250, 3310, 3340, 3350

Bachelor of Arts in Game Development students with a minor in Emergent Digital Practices:
  - may not count EDPX 3600 3D Modeling or ARTS 1250 Drawing toward satisfying the emergent digital practices minor as they are required cognates of the game development major

**Bachelor of Fine Arts Major Requirements**

(189-192 credits required (p. 83))

The Bachelor of Fine Arts in Emergent Digital Practices at the University of Denver builds on the same foundation as the BA and extends into a fine arts-focused practice. While demonstrating a foundational understanding of emergent digital practices within interdisciplinary contexts, the BFA student should be able to articulate a deeper understanding of the historical and contemporary contexts of art, technology and sciences. The BFA student should be prepared for public engagement through his or her knowledge of the significance of established cultural institutions and frameworks such as galleries, museums, festivals and other public spaces. Additionally the BFA student should be prepared for the development and organization of emerging venues for the exhibition and public engagement with experimental works of art and digital media. The BFA student does not need a second major or minor.

Minimum of 116 credits; maximum of 135 credits, including the following:

**Total Credits**: 116

The BFA major in Emergent Digital Practices is capped at a maximum of 135 credits.

**Requirements for Distinction in the Major in Emergent Digital Practices**

- Minimum of 3.5 major GPA
- Creative research project, paper, and presentation required

**BA in Emergent Digital Practices**

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

### First Year

**Total Credits**: 98

1. See Program of Study (p. 287) tab for explanation of EDP Foundations courses

2. INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**EDPX 2000 Imaging in Emergent Digital Practices (4 Credits)**

This course introduces digital imaging and digital illustration. Foundational technical methods and semiotics are introduced as ways to explore contemporary visual language. Students gain understanding in the digital creation and deciphering of images in 2D space. The essential language and concepts concerning representation and digital reproduction are developed through critical study and making. Lab fee. No prerequisites.

**EDPX 2100 Interactivity in Emergent Digital Practices (4 Credits)**

This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.
EDPX 2300 Systems in Emergent Digital Practices (4 Credits)
This course studies the fundamental concepts of systems, both analog and digital, analyzing how structure and operation combine to produce complex results and effect change in the world. Students will learn how the components of digital systems from simple electronics to complex software and distributed networks function systematically to solve problems and share information. Through study of the development of the computer, the internet and digital interfaces students will gain a critical understanding of how these systems have been historically shaped. Reading, writing, and making will synthesize practice and critical ideas. No prerequisites. Lab fee.

EDPX 2400 Time in Emergent Digital Practices (4 Credits)
This course introduces the fundamental concepts of time-based media, with an emphasis on audio and video production. Basic recording, capturing, editing and manipulation of time are covered. Students gain understanding on how to utilize, analyze, and manipulate time in digital media. Students learn the basic language and critical analysis techniques needed to understand when and how to take advantage of each time-based media for their practice. Lab fee. No prerequisites.

EDPX 2710 Critical Game Cultures (4 Credits)
This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practices of play. This course is taught with a teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We co-construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee.

EDPX 2730 Understanding Digital Art (4 Credits)
An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class.

EDPX 2740 Animated Satire (4 Credits)
This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy.

EDPX 2770 Exploring Digital Cultures (4 Credits)
This course introduces the fundamental concepts of speculation from a critical perspective and treats these as central to understanding contemporary digital culture. What will the future be and how can we imagine it to be a more advanced and better one? Students will explore the different cultural aspects of critical speculation through theory, literature, art, and making. Cyborgs, speculative/science fiction, and the posthuman will be used to discuss failure and iteration.

EDPX 3100 Programming for Play (4 Credits)
This course offers an introduction to the creation of games and playable interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Specific topics will vary each time the course is taught, and the course is repeatable up to two times. Lab fee. Cross listed with EDPX 4100. Prerequisite: EDPX 2100 or permissions of the instructor.

EDPX 3110 Rapid Game Design and Prototyping (4 Credits)
This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3112 Rapid Physical Game Design & Prototyping (4 Credits)
This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, “Big Games.” The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 2300. Lab fee.

EDPX 3120 Making Critical Games (4 Credits)
Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintain an essential ludic quality. Public good and civic engagement projects are welcomed. The course may be repeated with instructor permission when projects vary. Specific topics will vary each time the course is offered, and the course is repeatable up to 3 times. Lab fee. Prerequisites: EDPX 3100 or COMP 1671, and EDPX 3110, or permission of the instructor. Cross listed with EDPX 4120.

EDPX 3200 Data Visualization (4 Credits)
This course explores the creation of informational graphics for the visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations are also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 4200. Prerequisites: EDPX 2100, or permission of the instructor.
EDPX 3210 Typographic Landscapes (4 Credits)
This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 2000 or permission of the instructor.

EDPX 3270 Making Networked Art (4 Credits)
In this course networked art is understood in the broadest sense from art that natively exists on digital networks to art that critiques and engages with the concept of the network in contemporary society. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will engage with network architectures and platforms developing experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 2100. Lab fee. Crosslisted with EDPX 4270.

EDPX 3310 Tangible Interactivity (4 Credits)
Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3320 Interactive Art (4 Credits)
This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta data/multimedia asset acquisition and authoring environments. While utilizing student skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 4320. Prerequisite: EDPX 3310 or EDPX 3450, or permissions of the instructor.

EDPX 3330 Advanced Coding (4 Credits)
This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 2100 or COMP 1671.

EDPX 3340 Designing Social Good (4 Credits)
This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and then to make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross-listed with EDPX 4340. Prerequisite: EDPX 2300 or permission of the instructor.

EDPX 3350 Sustainable Design (4 Credits)
This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

EDPX 3400 Video Art (4 Credits)
This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4400.

EDPX 3410 Advanced Video Art (4 Credits)
This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on off-screen time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into space, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3440 Site-Specific Installation (4 Credits)
This class produces projects investigating physical space, virtual space and site-specific public installation. Lab fee. Cross listed with EDPX 4440. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3450 Visual Programming (4 Credits)
This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.
EDPX 3460 Visual Programming II (4 Credits)
This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 4460. Prerequisite: EDPX 3450 or permission of the instructor.

EDPX 3490 Expanded Cinema (4 Credits)
This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3500 Sonic Arts (4 Credits)
This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

EDPX 3600 3D Modeling (4 Credits)
This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of composting in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 4600, MFJS 3600. Prerequisite: EDPX 2000 or permission of the instructor.

EDPX 3610 3D Animation (4 Credits)
This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class processes. Lab fee. Cross listed with EDPX 4610. Prerequisite: EDPX 3600 or permission of the instructor.

EDPX 3620 3D Spaces (4 Credits)
An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisite: EDPX 3600 or permission of the instructor.

EDPX 3670 Topics in Emergent Digital Culture (4 Credits)
This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

EDPX 3671 Topics in Emergent Digital Making (1-4 Credits)
Topics in Emergent Digital Making.

EDPX 3730 21st Century Digital Art (4 Credits)
An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

EDPX 3740 Performance Cultures (4 Credits)
This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. For output, students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab fee. Prerequisites: EDPX 2200 and EDPX 2400, or permission of the instructor.

EDPX 3750 Sound Cultures (4 Credits)
This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 2400.
EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)
This course encompasses a variety of lenses through which to view, evaluate and critique ideas of ‘community’ and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including ‘identity and racial tourism’); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are ‘good’ for you and your communities. Cross listed with EDPX 4770.

EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)
This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists.

EDPX 3780 Science Fiction: Digital Culture (4 Credits)
This course explores the intersections of emergent digital practices and cultures with extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write, and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). For output, students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 4780.

EDPX 3800 Topics in Digital Making (4 Credits)
This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. This course may be repeated. Lab fee. Prerequisite: varies with topic.

EDPX 3960 BFA Capstone (4 Credits)
This course is required for all BFA students prior to taking the undergraduate capstone course. Students work independently with a faculty member to research and develop their capstone project in detail addressing ideas, making, venues, distribution, and other aspects of professional practice. Lab fee. Senior standing required. Must be a BFA student.

EDPX 3980 Internship (1-8 Credits)
Instructor approval required.

EDPX 3990 Capstone (4 Credits)
This course provides time and guidance for individual students to develop complex works that are a culmination of their studies. All projects must synthesize the principles of experience, emergence, and engagement taught throughout the program. All projects require both writing and making, the balance of these two to be determined by the nature of the work. Lab fee. Senior standing required.

EDPX 3991 Independent Study (1-8 Credits)
Independent Study form required.

Faculty
Trace E. Reddell, Professor and Director, PhD, University of Colorado-Boulder
Jeremy A. Billauer, Visiting Teaching Assistant Professor, MFA, University of Denver
Christopher Coleman, Professor, MFA, University at Buffalo - State University of New York
William H. Depper, Teaching Professor, MA, University of Denver
Rafael A. Fajardo, Associate Professor, MFA, Rhode Island School of Design
Kate Hollenbach, Assistant Professor, MFA, University of California Los Angeles
Laleh Mehran, Professor, MFA, Carnegie Mellon University
Timothy Weaver, Professor, MFA, Carnegie Mellon University
Jullian DeWitt Young, Visiting Teaching Assistant Professor, MFA, University of Denver

English and Literary Arts
Office: Sturm Hall, Room 495
The undergraduate mission of the Department of English and Literary Arts is to help fulfill the University's commitment to provide a liberal undergraduate education and to contribute to the University's general education program. For most of its 150-year history, the academic study of English has been the study of literatures written in this language. That is, the focus of English study includes the history, production and interpretation of literature in English with accompanying emphasis on critical reception of texts, on the diverse cultures that contextualize literary writing and on other kinds of "texts." No single perspective dominates the study of this discipline. Recently, it has also become apparent that even predominantly English-speaking cultures are highly diverse and comprise many different cultures in different languages. In broad terms, then, the discipline of English and Literary Arts at DU includes a) the study of the history of literature in English and in English translation; b) the production of literature as a creative act; and c) the interpretation of literature within the context of aesthetics, which has a complex relationship to social, economic, cultural and political conditions. Like most English departments, we accommodate several different approaches to and emphases on the study of literature and the teaching of creative writing. However, the Department of English and Literary Arts is united in its acceptance of these three broad activities of study as aspects of our mission.

**English and Literary Arts**

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

Minimum of 44 credits in English; maximum of 60 credits. No more than 12 credits of coursework at the 1000 level may be taken, and at least 12 credits must be taken at the 3000 level.

Students majoring in English declare one of three concentrations depending on their prospective career interests. The Department of English and Literary Arts offers the following concentrations:

**Literary Studies**

This concentration is for students who wish to pursue the traditional approach to the discipline of English literary criticism, scholarship, and theory. Students interested in a broad knowledge of the discipline and/or continued study in graduate or professional programs should choose this concentration.

Creative Writing

This concentration is for students who wish to create original works in poetry, fiction, nonfiction, or translation, and who seek training from practicing writers in these areas. The program emphasizes, more than many such programs, the study of literature and theory. It is appropriate for students who plan to seek the MFA or PhD in English.

12 hours from the following. These courses will also count towards major requirements.

- ENGL 2004 Magical Realism in Literature and Cinema
- ENGL 2070 Postcolonial Literature and Theory
- ENGL 2080
- ENGL 2104 The Bible as Literature
- ENGL 2130 World Literature
- ENGL 2544 Globalization and Cultural Texts
- ENGL 2613
- ENGL 2715 Native American Literature
- ENGL 2717 African American Writers
- ENGL 2718 Latina/o Literature
- ENGL 2741 American Jewish Literature: Immigrant Fiction
- ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds
- ENGL 2743 Jewish Humor: Origins and Meaning
- ENGL 3017 Travel Writing-Fiction & Fact
- ENGL 3320 Oral Literature and Orality in Literature
- ENGL 3405 Postmodern Visions of Israel
- ENGL 3743 Modern Jewish Literature
- ENGL 3744 African American Literature

**English Education**

This concentration is for students who wish to teach English language and literature at the secondary school level. Students explore a range of writings from medieval British to postcolonial literatures of the Americas, and in addition take courses in language and writing.

Please note: Students who want to receive teaching certification upon completion of the BA or to go on for the dual degree option in teacher education must complete all requirements for this concentration by the end of the junior year with a minimum grade point average of 3.0. In their senior year, these students must complete the 40-hour Teacher Education Program. Inasmuch as the student may take an additional 16 credits in the major beyond the 44 required credits (or a maximum of 60 credits), we highly recommend that students in English education confer with the Morgridge College of Education’s teacher education department for its recommendations on additional areas students might want or need to cover in their English major.

Course Requirements:

- 4 credits Introductory Topics in English (ENGL 1010)
- 4 credits Intro to CW or Art of Fiction/Poetry/Drama (e.g., ENGL 1000, ENGL 1006, ENGL 1007)
- 8 hrs. British literature (one course before and one after 1789)
- 8 hrs. American literature (one course before and one after 1900)
- 4 credits Shakespeare (e.g., ENGL 2221, ENGL 2220)
- 4 credits English Grammar or History and Structure of the English Language (e.g., ENGL 2026, ENGL 3813)
- 4 credits Intermediate CW or Literary Interpretation (e.g., ENGL 2001, ENGL 2010, ENGL 2825, ENGL 3823)
- 4 credits International literature
- 4 credits Senior Seminar (ENGL 3900)

(12 hours of coursework must meet department diversity requirement.)

All majors must complete the following core requirements in addition to specific concentration requirements (see below):

**Foundations (1000-level): 4 credits**

"Introductory Topics in English." This is a required course for all majors. It should be taken in the first or second year. It is a pre-requisite for all 3000-level advanced study courses.

**Core Studies (2000-level): 12 credits**
Core Studies courses are broad, entry-level courses that provide historical or synoptic overviews of a field or large subject area. Examples may include traditional literary/historical surveys; histories of genres, ideas, or other literary practices; introductions to regional, national, or international literatures, etc.

Advanced Studies (3000-level): 8 credits

Advanced Studies are courses conceived as further, more focused investigations of topics from within subject fields. Such courses offer narrower literary or genre histories, studies of authors or author groups, theoretical or methodological studies, cross-disciplinary topics, or other, more specific subjects not available in Core Studies classes.

Senior Sequence (3000-level): 8 credits

Senior Seminars are deep, investigative courses that take students into a specific, usually narrow topic within a subject field. These courses emphasize the further, more complex application of skills introduced in the department's “Introduction to the Major” course. Faculty should be encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors. Examples could include courses devoted to a single book or set of major works; courses designed to develop research/archival skills around a specific topic; courses that consciously prepare students for graduate work, etc.

Total credit hours: 32

Secondary Major
44 credits. Same requirements as for BA degree.

Minor Requirements
Students minoring in English and Literary Arts must take a minimum of 24 credits in English. No specific courses are required; students are encouraged to design a minor that reflects their interests. No more than 8 credits may be taken at the 1000 level. Minimum GPA in the minor is 2.0.

Requirements for Distinction in the Major in English and Literary Arts

• Minimum 3.5 GPA
• Thesis Requirement: Students seeking recognition for “Distinction in English” are required to complete a thesis during the fall and winter quarters of their senior year. Students who wish to write a critical thesis must write a 40-50 page analytic research paper; students who wish to write a creative thesis must write a fiction and/or poetry project of a length to be determined by the student and the faculty director.
• In addition to the completed honors thesis, students applying for distinction in critical literary studies or creative writing must also complete the following coursework:
  1. ENGL 3800: Bibliography & Research or, for students writing a creative thesis, an Advanced Creative Writing course in a different form/genre from what was taken for the concentration (offered in the Fall and Winter quarters)
  2. ENGL 3992: Faculty-Directed Study (2 hrs., Winter quarter; 2 hrs., Spring quarter)

BA in English and Literary Arts

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

---

1. INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**ENGL 1000 Introduction to Creative Writing (4 Credits)**
Basic techniques of fiction and poetry.

**ENGL 1006 Art of Fiction (4 Credits)**
An introduction to the appreciation of fiction as an art form through practice in interpretation and creation.

**ENGL 1007 Art of Poetry (4 Credits)**
An introduction to the appreciation of poetry as an art form through practice in interpretation and creation.

**ENGL 1008 Art of Drama (4 Credits)**
An introduction to the appreciation of drama as an art form through practice in interpretation and creation.

**ENGL 1009 Art of Creative Non-fiction (4 Credits)**
An introduction to the appreciation of creative non-fiction as an art form through practice in interpretation and creation.

**ENGL 1010 Introductory Topics in English (4 Credits)**
Various topics in literary studies approached at the introductory level.

**ENGL 1110 Literary Inquiry (4 Credits)**
Literary inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 1200 International Short Fiction (4 Credits)**
This class considers masterpieces of short fiction—stories and novellas—from around the world. Various linguistic communities, national traditions, and historical periods are represented through a wide-range of global texts. One goal of this course is synchronic: to identify significant themes, techniques, and conventions appearing in both western and non-western literary traditions. A second goal of this course is diachronic: to identify key developments in the forms of short fiction. Significant theoretical models are presented to provide a thorough overview of the concept of “world literature” and its associated problems.

**ENGL 1988 Study Abroad Resident Credit (0-18 Credits)**

**ENGL 1XX1 English Comp Transfer (1-10 Credits)**

**ENGL 1XX2 English Lit Transfer (1-10 Credits)**

**ENGL 2001 Creative Writing-Poetry (4 Credits)**
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2002 Creative Writing-Poetry (4 Credits)**
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2003 Creative Writing-Poetry (4 Credits)**
Techniques and forms of poetry. Prerequisite: an introductory creative writing course.
ENGL 2004 Magical Realism in Literature and Cinema (4 Credits)
This course examines the relationships between human groups and their sociocultural environments through the conjunction of history and alternative ways of seeing/being or magical realism. Our study is region-specific in sociocultural details as well as global in scope and involves the exploration of magical realism as a technique in literature and cinema.

ENGL 2010 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2011 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2012 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2013 Creative Writing-Fiction (4 Credits)
Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

ENGL 2020 Studies in Non-Fiction (4 Credits)

ENGL 2021 Business Technical Writing (3,4 Credits)
Course open to Colorado Women's College students only.

ENGL 2026 English Grammar (4 Credits)

ENGL 2031 Poetry Since 1945 (4 Credits)

ENGL 2035 History of Genre-Poetry (4 Credits)

ENGL 2036 History of Genre-Fiction (4 Credits)

ENGL 2040 Introduction to Publishing (4 Credits)
Through lectures and field trips, students will learn how books get published - with all the steps involved. Cross listed with ENGL 3040, MFJS 3140.

ENGL 2060 Modern and Postmodern Literature (4 Credits)
This course will introduce students to two key movements in 20th century literary culture: modernism and postmodernism. Dealing in distinct but related ways with pervasive crises of modernity, these movements continue to exert a tremendous influence over literary culture in the present. In the realms of media and technology, politics, gender and sexuality, among others, modernism and postmodernism both reflected and helped usher in an age of relentless change. While covering this broad terrain, the course will have a different thematic focus each year. Contact the instructor or the Department of English and Literary Arts for details.

ENGL 2070 Postcolonial Literature and Theory (4 Credits)
An examination of the phenomenon of postcolonialism, taking into account the ways in which it has been conceptualized. Key interests include the contexts of imperialism and decolonization as well as critical readings of pertinent literature.

ENGL 2100 English Literature I: Beowulf-Spenser (4 Credits)
A survey of English literature from the earliest extant texts through works written in the late 16th century, ending with Spenser. Its purpose is to give students a historical grasp of the development and continuity of English literature during the Middle Ages and the 16th century. Old English and most Middle English texts will be read in translation, but Chaucer and Middle English lyrics will be read in the original.

ENGL 2100 English Literature I: Beowulf-Spenser (4 Credits)
A survey of English literature from the earliest extant texts through works written in the late 16th century, ending with Spenser. Its purpose is to give students a historical grasp of the development and continuity of English literature during the Middle Ages and the 16th century. Old English and most Middle English texts will be read in translation, but Chaucer and Middle English lyrics will be read in the original.

ENGL 2104 The Bible as Literature (4 Credits)
The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.

ENGL 2110 The African Imagination (4 Credits)
Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective.

ENGL 2120 Chaucer-Selected Poetry (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2130 World Literature (4 Credits)
A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2200 English Literature II: Donne-Johnson (4 Credits)
This course explores the literatures of the 17th and 18th centuries. This 200-year period marks England's transition from a medieval, relatively static society bound by hierarchy, religion and shared cultural values into a restless early-modern society of cities, social mobility, civic unrest, colonies and cosmopolitanism. Students work on understanding genres and styles, the basics of scansion, and the terminologies, methods and ideologies of literary criticism. The course is divided into generic categories.

ENGL 2202 Renaissance Poetry & Prose (4 Credits)
ENGL 2221 Shakespeare Seminar (4 Credits)
ENGL 2230 Shakespeare and Film (4 Credits)
ENGL 2201 Renaissance Poetry & Prose (4 Credits)
ENGL 2202 Renaissance Poetry & Prose (4 Credits)
ENGL 2203 Shakespeare Seminar (4 Credits)
ENGL 2221 Shakespeare Seminar (4 Credits)
ENGL 2222 Shakespeare and Film (4 Credits)

ENGL 2230 Shakespeare and Film (4 Credits)
This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2230 Shakespeare and Film (4 Credits)
An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2300 English Literature III (4 Credits)
A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2311 English Novel to 1800 (4 Credits)
ENGL 2320 Early Globalisms (4 Credits)
A study of the commonalities and connections among cultures and texts across the world from the medieval and early modern periods.

ENGL 2401 Blake, Wadsworth and Contemporaries (4 Credits)
The first generation of British Romantic writers came of age during a time of revolution (American, French, Haitian). The inheritors of radical eighteenth-century ideas about natural rights, the first-generation Romantics found optimism in human feeling as well as human reason. They believed that the capacity for sympathy and lyrical transport would lead to a new, benevolent society, but their belief in social progress was checked by revolutionary violence and the rise of a hyper-rationalism that seemed more dangerous than the superstition it was meant to replace.

ENGL 2402 Later Romantics (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2402 Later Romantics (4 Credits)
The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)
Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonialization to the Civil War.

ENGL 2705 Literature of the American South (4 Credits)
An introductory course on the literature emanating from the American south. Texts may include fiction, poetry, drama, and non-fiction primarily spanning the 18th through the 21st century.

ENGL 2706 Writing the American West (4 Credits)
An introductory course on the literature emanating from the American west. Texts may include fiction, poetry, drama, and non-fiction spanning the 19th through the 21st century.

ENGL 2707 Contemporary Literature (4 Credits)
The course surveys contemporary books. The novel has never been a coherent genre, but especially since the 1960s its features, in some practitioners, have begun to resemble history, anthropology, poetry, science writing, or all of these. The course will include readings from Asia, South America, Europe and North America.

ENGL 2708 Topics in English (1-4 Credits)
ENGL 2709 Topics in English (1-10 Credits)
ENGL 2710 American Novel-19th & 20th Century (4 Credits)
This course counts toward the Analytical Inquiry: Society and Culture requirement.
ENGL 2711 20th Century American Fiction (4 Credits)
Students read, evaluate and discuss the genre of the American immigrant novel. Topics include how this is a uniquely American literary form and what it says about life in America; the similarities and differences in how ethnic groups understand their experiences; how language and narrative techniques are used to convey the life of a new immigrant; how the experiences of men and women differ; how the immigrant novel has evolved as a literary genre. The readings will be analyzed as a means to consider how the immigration novel in America became a genre that expressed a variety of topics related to the American experience. The class will consider how these works helped to shape and define what it meant to be an American, and how that definition has changed over the last 100 years.

ENGL 2712 American Short Story (4 Credits)
Wide range of American short stories, quintessential American genre, from the early 19th century to present.

ENGL 2715 Native American Literature (4 Credits)
Native American Literature explores the relationships between contemporary Native American narratives and Native American oral traditions. We will examine the intellectual underpinnings of Native American literary expressions, focusing on tribally specific Native American concepts of language, perception, and process in relation to Native cultural and political survival. This course aims to celebrate Native American cultural expression through lectures and discussion, group work and intellectual exercises.

ENGL 2716 American Poetry (4 Credits)
This course examines American poetry by way of historical, thematic, and/or formalist approaches. Possible topics could include: post-WWII poetry, the New York School, Self and Other in American Poetry, Language poetry, etc.

ENGL 2717 African American Writers (4 Credits)
Defines, describes and analyzes the African-American aesthetic.

ENGL 2718 Latina/o Literature (4 Credits)
This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)
This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it's for, and its forms and aesthetics.

ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.

ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in American from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with JUST 2743.

ENGL 2750 American Literature Survey I (4 Credits)
First part of American survey; introduction to major authors and genres.

ENGL 2751 American Literature Survey II (4 Credits)
Second part of American survey; further examination of major authors and genres.

ENGL 2752 American Literature Survey III (4 Credits)
A survey of American literature, including representative works of fiction, poetry and drama from the 1930s to the present.
ENGL 2815 Studies in Rhetoric (4 Credits)
ENGL 2816 Advanced Writing (4 Credits)
This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student's choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2820 Philosophy and Literature (4 Credits)
Hermeneutics, sometimes called "the art of interpretation," offers us the opportunity to explore strategies of engagement and exegesis that seeks to observe, question, and celebrate the ways in which we read and write the world. By bringing critical and creative inquiry to bear on the event of interpretation itself we can consider the ethical implications of how we deal with our individual identities as well as our collective, national, and global identities. In this course we pose big questions—What are we talking about when we talk about existence? What does it mean to have a body? How does desire and memory construct history and identity? Walking these questions through a variety of literary and philosophical texts and artistic lenses, we consider how "the creative" (writing, the literary) performs, becomes, and is "the critical" and vice-versa. Students should be prepared to write, read, and participate in discussion.

ENGL 2825 Cultural Criticism (4 Credits)
This course will introduce students to some of the major moments in the development of cultural studies and will show how the discipline "works" to make sense of culture at large. Cross listed with ENGL 3825.

ENGL 2830 Representations of Women (4 Credits)
Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with GWST 2830.

ENGL 2845 Politics and Literature (4 Credits)
ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)
This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by a range of diverse writers from Plato and Thomas More, to Charlotte Perkins Gilman, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Albert Camus, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, Claire G. Coleman, etc. *In some years this course may count for international literature under the diversity/distribution attribute in the English curriculum. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ENGL 2855 Speculative Fiction (4 Credits)
This course explores topics in speculative fiction. Speculative fiction encompasses a wide range of genres, contexts, and forms, from science fiction to alternative history to futurity. Topics might include apocalypse, cyberpunk, space-time, revolution, new communities, cyborgs and robotics, worldmaking, Afrofuturism, Chicanafuturism, or theories of possibility in different forms of fiction. All ask us to consider the role of imagination and speculation in fiction. Each iteration of this course will be designated with a specific topic, repeatable only under a new topic.

ENGL 2980 Internship in English (1-5 Credits)
This course provides academic credit for off-campus internships in fields related to the English major. One paper is required at the end, articulating how the internship complemented the student's studies in English. Requires approval by director of undergraduate studies in English.

ENGL 2988 Study Abroad Resident Credit (0-18 Credits)
ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.
ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.
ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.
ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)
Technique, writing practice and criticism.
ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.
ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.
ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)
Technique, writing practice and criticism.

<td>Life, culture, language and literary trends of Chaucer’s age as reflected in &quot;The Canterbury Tales&quot;.</td>
</tr>
<tr>
<td>ENGL 3320</td>
<td>Oral Literature and Orality in Literature (4 Credits)</td>
<td></td>
<td>The term &quot;oral literature&quot; generally refers to narratives and poems (including songs) performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational &quot;text&quot; of written literature. The questions that we explore in this course include: How did oral literature develop, and what are the characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature and also study the use of orality in written literature. Our studies involve the examination of material and texts from different parts of the world.</td>
</tr>
<tr>
<td>ENGL 3402</td>
<td>Early Romantics (4 Credits)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 3405</td>
<td>Postmodern Visions of Israel (4 Credits)</td>
<td></td>
<td>This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual &quot;multiverses.&quot; A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.</td>
</tr>
<tr>
<td>ENGL 3600</td>
<td>American Romantics and Radicals, 1820-1865 (4 Credits)</td>
<td></td>
<td>This course covers the period of religious, philosophical, social, and political reform that runs from 1820 to the beginning of the Civil War. Focus will be on romantic ideas about nature, self-reliance, etc., as well as the contexts that surround and nurture these ideas, such as utopian social reform, the women's rights movement, abolition, temperance, and various health movements. Authors include Ralph Waldo Emerson, Henry David Thoreau, Nathaniel Hawthorne, Margaret Fuller, Frederick Douglass, and others.</td>
</tr>
<tr>

<td>Historically based survey of literature related to the American Civil War. Includes works by such authors as Harriet Beecher Stowe, Frederick Douglass, Walt Whitman, Herman Melville, Emily Dickinson, Louisa May Alcott, and others.</td>
</tr>
<tr>
<td>ENGL 3602</td>
<td>American Realism and Naturalism, 1860-1920 (4 Credits)</td>
<td></td>
<td>This course addresses the period of post-Civil War American writing characterized by aesthetic theories that react against Romanticism and attempt to incorporate scientific (particularly Darwinian) thinking into artistic representation. It will present the development of these approaches in the historical contexts of Reconstruction, the Gilded Age, and the Progressive Era. Authors will include Mark Twain, Henry James, Frank Norris, Stephen Crane, William Dean Howells, Charles Chesnutt, Kate Chopin, Sarah Ormes Jewett, and others.</td>
</tr>
<tr>
<td>ENGL 3618</td>
<td>20th Century British Literature (4 Credits)</td>
<td></td>
<td>This course will explore the dramatic changes in culture and society that took place between the death of Queen Victoria and the start of the new millennium. The twentieth century transformed Britain from the center of a commercial and military Empire &quot;on which the sun never set&quot; to a multicultural island nation coming to terms with its colonialis past and seeking to redefine its place in the world. The same period also saw continual redefinitions of the concept of Britishness as the outcome of struggles over women's rights, anticolonial and antiracist movements, LGBTQ+ activism, and workers' demand for better conditions and the right to organize. These social changes emerged simultaneously with transformative effects of new media and transportation technologies.</td>

ENGL 3742 Jesus in Jewish Literature (4 Credits)
This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus’ life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

ENGL 3743 Modern Jewish Literature (4 Credits)
Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

ENGL 3744 African American Literature (4 Credits)
This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

ENGL 3800 Bibliography/Research Method (4 Credits)

ENGL 3803 Modernism/Postmodernism (4 Credits)

ENGL 3810 ISL Dharamsala: Tibet, Global Citizenship, & Community Literacies (4 Credits)
ISL Dharamsala presents DU students with the unique opportunity to study international community literacies as a practical component of global citizenship through service-learning placements and study in Dharamsala, India. Home of the Dalai Lama and the Tibetan government-in-exile, Dharamsala is a multi-generational community located in the northern Indian foothills of the Himalayas. During fall quarter, students will study community literacies in the practice of global citizenship and service while immersed in the geo-political, religious, and other contexts experienced by Tibetans in exile. During their time in Dharamsala, cultural immersion and a service-learning placement will give students insight into the complexities of social justice issues and cultural nuances they have been studying and provide opportunities to contribute to local and global society through informed and reflective practice. This course is cross-listed with WRIT 3810.

ENGL 3813 History and Structure of the English Language (4 Credits)
A composite course studying both the structure of modern English and the history of the English language.

ENGL 3815 Studies in Rhetoric (4 Credits)
This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

ENGL 3817 History of Rhetoric (4 Credits)

ENGL 3818 Composition Theory (4 Credits)

ENGL 3819 Old English (4 Credits)
This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)

ENGL 3822 Literary Criticism: 20th Century (4 Credits)
Critical methods and philosophies of 20th-century critics; their relationship to traditions.

ENGL 3823 Interpretation Theory (4 Credits)

ENGL 3825 Cultural Criticism (4 Credits)
Cross listed with ENGL 2835.

ENGL 3826 Latinx Cultural Studies (4 Credits)
This course introduces students to cultural texts and theories by U.S. Latinx subjects and asks students to consider various forms of cultural and critical methodologies.

ENGL 3852 Topics in Poetics (4 Credits)

ENGL 3900 Senior Seminar (4 Credits)
The Senior Seminar is a deep, investigative course that takes students into a specific, usually narrow topic within a subject field. Such courses emphasize the further, more complex application of skills introduced in the department's "Introduction to the Major" course. Faculty are encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors. Students should have taken ENGL 1010 and be in their final year of study before taking this course.

ENGL 3982 Writers in the Schools (2,4 Credits)
This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.
ENGL 3988 Study Abroad Resident Credit (0-18 Credits)
ENGL 3991 Independent Study (1-17 Credits)
ENGL 3995 Independent Research (1-10 Credits)

**Total Credits: 189-190**

1. **Analytical Inquiry: The Natural and Physical World**
2. **Scientific Inquiry: Society and Culture**
3. **INTZ 2501 Exploring Global Citizenship** is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**FIN 2010 Survey in Finance (4 Credits)**

Introduces basic concepts, financial principles and analytical skills for non-business majors. Students gain an appreciation of how markets, investments and financial management are interrelated, and methods for basic financial decisions in both business and personal life. Prerequisites: sophomore standing, (ACTG 2010 or ACTG 2200 - minimum grade of C-) and LGST 2000 (minimum grade of C-).

**FIN 2800 Financial Decision Making (4 Credits)**

Basic financial principles and analytical skills including ratio analysis, breakeven analysis and leverage, net present value, internal rate of return, and standard forecasting techniques. Prerequisites: ACTG 2200.

**FIN 2805 Financial Decision Making (4 Credits)**

Basic financial principles and analytical skills including ratio analysis, breakeven analysis and leverage, net present value, internal rate of return, and standard forecasting techniques. Course open to Colorado Women’s College students only.

**FIN 3030 Personal Finance (4 Credits)**

This course provides an overview of topics that are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life and especially as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children. Open to all business undergraduate students. Prerequisite: FIN 2800 or permission of the instructor.

**FIN 3090 Wealth Management (4 Credits)**

Wealth Management offers students important skills to become a part of the growing wealth management industry. It includes such topics as the Financial Planning Process, Insurance Basics, Investment Basics and Strategies, Retirement Planning, and Estate Planning. We are pleased to work with the College for Financial Planning (CFFP), located in Denver, to provide instruction from their The Foundations in Financial PlanningSM program. This can lead to the Financial Paraplanner Qualified Professional™ or FPQP™ designation upon successful completion of an Examination. The Examination is administered through the CFFP. The FPQP™ will be a valuable addition to your resume.

**FIN 3110 Financial Institutions (4 Credits)**

Analysis of financial markets institutions and how they operate within the markets. Management of commercial banks and other financial institutions and relationship to money and capital markets. Prerequisites: C- in FIN 2800.

**FIN 3120 Commercial Bank Management (4 Credits)**

Comprehensive view of banking and changing environment banks operate in; developing solutions to current bank management problems. Prerequisite or Co-requisite: FIN 3110.
FIN 3150 Advanced Business Valuation (4 Credits)
Business valuation is no easy task, but doing so is at the heart of intelligent decision-making in many areas of finance and business – corporate finance, investment banking, private equity, venture capital, investment management, entrepreneurial finance, estate planning, and financial litigation. This course covers the advanced topics related to business valuation in both a conceptual and practical framework. An important aspect of this course is to bridge financial theory and practice with valuation in the context of real world implications. The theoretical section will include a discussion of various approaches to business valuation and more importantly, will consider how the valuation may change depending on the purpose for valuation. The application section of the course will provide students with an opportunity to apply business valuation principles and techniques to the valuation of companies in special situations, including leveraged buyout, private companies, companies in transition and international companies. Students will be exposed to sound practice and the latest developments in valuation at the core of the financial professions.

FIN 3200 Corporate Financial Problems (4 Credits)
Advanced application of financial decision making in areas of valuation, dividend policy, working capital, capital budgeting, cost of capital, leasing and special types of financing. Prerequisite: FIN 2800.

FIN 3210 Corporate Financial Theory (4 Credits)
Expansion of FIN 3200 to include mergers and acquisitions, risk analysis, valuation and capital structure, corporate financial planning, and financial applications of decision theory. Prerequisite: FIN 3200.

FIN 3230 Entrepreneurial Finance (4 Credits)
Financial planning for new and small businesses; emphasis on the new enterprise, funds acquisition and valuation. Prerequisite: FIN 3200.

FIN 3250 Raising Capital and Investment Banking (4 Credits)
This course is an advanced Corporate Finance course, focusing on the activities involved in investment banking and the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with many outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance, and going private. Prerequisite: FIN 3200.

FIN 3300 Investments (4 Credits)
Survey of marketable securities, markets, regulation, and risk and return measurement with introduction to fundamental and technical analysis. Prerequisite: FIN 2800.

FIN 3310 Equity Analysis (4 Credits)
Analysis, valuation and selection of equity securities. Prerequisite: FIN 3300.

FIN 3320 Financial Forecasting (4 Credits)
Methods of forecasting both economic and financial variables; emphasis on techniques used by business forecasters. Cross listed with STAT 3620, STAT 4783. Prerequisite: FIN 2800.

FIN 3330 Equity Portfolio Management (4 Credits)
This course is designed to give students an introductory understanding of the portfolio management process including concepts related to defining an investment philosophy and portfolio objectives, how to translate it into a suitable, realistic and disciplined investment strategy, understand the various methods used to construct portfolios and discuss implementation related issues, as well as measuring and analyzing portfolio performance and risk exposures. Practical implementation of this process will be done in the context of an equity portfolio but other asset classes will be discussed.

FIN 3340 Fixed Income Securities (4 Credits)
Analysis and valuation of various types of fixed income securities. Prerequisites: FIN 3300 and instructor permission.

FIN 3350 Analysis of Derivatives (4 Credits)
This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisites: FIN 3300.

FIN 3360 Analysis of Derivatives (4 Credits)
Advanced application of financial decision making in areas of valuation, dividend policy, working capital, capital budgeting, cost of capital, leasing and special types of financing. Prerequisite: FIN 2800.

FIN 3370 Topics in Finance (4 Credits)
Exploration of various topics and issues related to finance. Prerequisite: FIN 2800.

FIN 3380 Reiman Fund I (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the first in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 2800 and instructor’s permission.
FIN 3720 Reiman Fund II (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the second in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3710 (minimum grade of C-).

FIN 3730 Reiman Fund III (4 Credits)
This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the third in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3720 (minimum grade of C-).

FIN 3800 Organized Walk Down Wall Street (4 Credits)
First part of course requires foundational readings in investment exchanges, commodities markets, investment banking, mergers, restructuring, asset management, and commercial banking. This is followed by five days in New York visiting the exchanges, brokerage firms, investment bankers, asset managers, and commercial banks. A related research paper is also required. Prerequisites: FIN 2800 and instructor's permission.

FIN 3885 Investment Banking and External Financing (4 Credits)
This course is an advanced Corporate Finance course, focusing on the activities involved in investment banking and the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with many outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance, and going private.

FIN 3980 Finance Internship (0-10 Credits)
Practical experience (field study); requires written report. Prerequisites: FIN 2800 and instructor's permission.

FIN 3991 Independent Study (1-4 Credits)
Independent research/study; requires written report. Prerequisites: FIN 2800 and instructor’s permission.

Faculty
Conrad S. Ciccotello, Professor and Director, PhD, Penn State University
Shahram Amini Moghadam, Assistant Professor, PhD, Virginia Polytechnic Institute and State University
Doina C. Chichernea, Associate Professor, PhD, University of Cincinnati
Maclyn L. Clouse, Professor, PhD, University of Washington
Thomas Cook, Professor, Emeritus, PhD, University of Washington

Kenneth Leung, Teaching Associate Professor, PhD, Johns Hopkins University
Peter Lung, Associate Professor, PhD, Texas Tech University
Alex Petkevich, Associate Professor, PhD, Texas A&M University
Ronald Rizzuto, Professor, PhD, New York University
Andy J. Sherbo, Teaching Professor, PhD, Saint Louis University
Jack Strauss, Professor, PhD, Duke University
First-Year Seminar

The First-Year Seminar (FSEM) Program offers students an introduction to the intellectual life of the University. Offered in the Fall quarter, the small class size provides an in-depth academic experience that is rigorous and engaging. In addition to developing self-motivated academic passion, students can expect to hone the academic skills essential for successful college work.

Each seminar focuses on one or more of the following academic skills: writing, critical reading and thinking, discussion, argumentation and debate, and information literacy. This program enables students to engage with faculty in the exploration of novel and challenging topics, and lays the groundwork for extraordinary academic and personal growth.

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 80–85 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars also serve as students’ academic advisors and faculty mentors for the entire first year. Students meet individually with their mentors during winter and spring quarters for advising and registration help.

This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet the requirement through an additional Advanced Seminar course. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

FSEM 1110 First Year Seminar: Enhancing Speaking Skills for International Students (4 Credits)

This course introduces undergraduate first-year international students to academic culture. In addition, the course introduces some aspects of American cultural ideals and values as they pertain to academic life. Many first-year undergraduate students face challenges with course work, balancing academic and campus life. The demands can be much more intense for first-year undergraduate international students, who navigate all the same issues while in a foreign culture. The instructors in these courses are sensitive to the demands placed on international students, and serve as formal advisors to the students in this course. In this class, students are challenged to participate as members of an intellectual community. The course work is designed to improve critical thinking skills and logical reasoning through impromptu and prepared discussion as well as classroom presentations. Students are expected to read articles and watch video outside class, refer to assigned texts during class discussion, synthesize ideas from course materials, and state and support their personal ideas regarding course topics. Must be a first-year international student to enroll in this course.

FSEM 1111 First Year Seminar (4 Credits)

First Year Seminar topics reflect the intellectual passions of the faculty who lead them. Seminars introduce students to the rigorous academic expectations of university-level work; as small, highly interactive courses, they help students improve skills in one or more of the following areas: writing, quantitative reasoning, critical thinking, presentation and argument, and/or information literacy. The instructor of the seminar serves as the student’s academic advisor and mentor for the student’s entire first year. This course is required for all first-year students.

Gender and Women's Studies Program

The Gender and Women's Studies Program offers a cross-disciplinary undergraduate major and minor composed of courses taught throughout the University by a diverse faculty. Reflecting the vitality of recent feminist, ethnic and queer scholarship, these courses examine the roles of gender, race, sexuality and other categories of identity in the lives of all people. The mission of the Gender and Women's Studies program is to explore gender as a primary category of analysis for the understanding of individuals and human societies in historical and cultural contexts.

The baccalaureate degree in gender and women's studies is a cross-disciplinary major with a minimum of 44 credits. All students must take GWST 1112 Introduction to Gender and Women's Studies .

Seniors are also required to fulfill a four credit GWST capstone course. The remaining number of credits to get a student to 44 credit hours are taken from a combination of Gender and Women's studies courses and cross-listed courses in other departments.

A minor in gender and women's studies requires 24 credits, beginning with GWST 1112 Introduction to Gender and Women's Studies. The remaining 20 credit hours may be selected from other Gender and Women's studies courses, including the colloquia, and courses in other departments also listed with the Gender and Women's Studies Program.
Gender and Women's Studies
Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 82))

A minimum of 44 credits of Gender and Women's Studies including GWST 1112 Introduction to Gender and Women's Studies. Required courses* include, but are not limited to, the following:

<table>

Select one course from each of the four following areas: 16

- History
- Identity and Rhetoric
- Institutions and Power
- Intersectionality

Capstone Requirement

- GWST 3975 Capstone Seminar 1

Electives

- Any Gender and Women's Studies listed or also-listed course

Total Credits 44

* Please consult with your GWST advisor and the schedule of classes for additional courses which may meet these requirements.

1 Must be a senior.

Secondary Major Requirements

40 credits. Same requirements as for BA degree.

Minor Requirements

24 credits in Gender and Women's Studies. Required: GWST 1112 Introduction to Gender and Women's Studies.

Requirements for Distinction in the Major in Gender and Women's Studies

- Minimum 3.25 major GPA, 3.0 overall GPA
- Honors thesis (minimum 40 pages)
  - The thesis research, analysis, and writing will be done over the course of the student's senior year, and will include the student's own original research/creative work that draws upon or contributes to gender theory. This project is done in close consultation with a faculty mentor, and must be evaluated by a committee of at least three faculty members (including the major thesis adviser).

BA in Gender and Women's Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 82) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common
Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 78) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 41) and Scientific Inquiry: Society and Culture (p. 73) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

GWST 1015 Voice and Gender (4 Credits)
In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. The course also discusses gender issues prevalent in today’s society and significant moments in rhetorical history that have impacted these issues. Cross listed with COMN 1015.

GWST 1112 Introduction to Gender and Women’s Studies (4 Credits)
This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women’s studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women’s studies is about studying, but it is also about meaningful engagement with the world.

GWST 1988 Study Abroad Resident Credit (0-18 Credits)

GWST 2212 Gender, Communication, Culture (4 Credits)
This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.
GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)
This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.

GWST 2280 Gender in the Economy (4 Credits)
This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with ECON 2280. Prerequisite: ECON 1020.

GWST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women's education, political activism, and labor.

GWST 2420 Social Inequality (4 Credits)
Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with SOCI 2420.

GWST 2650 Feminist Qualitative Research Methods and Design (4 Credits)
This course will introduce the fundamental elements of feminist qualitative research methods and design. We will begin by examining various research methods, including ethnography, interviews, oral history, media studies/discourse analysis, and community-based research and analyze the ways in which they aid (and help counter) ways of knowing and understanding the social world. In addition to gaining awareness of the more commonly used qualitative and ethnographic methodologies, you will be challenged to think critically about the mechanics, ethics, and politics of such research, including the role of researcher within it. Enrollment restricted to GWST majors only.

GWST 2700 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2701 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2702 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2703 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2704 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 2710 Introduction to Queer Studies (4 Credits)
This course provides an introduction to the discipline of Gender and Women's Studies by focusing on mostly queer theory. Queer theory is a comparatively new approach to understanding gender, sexuality, and the world around us, and it has created controversy and disagreement regarding its aims and approaches. What does it mean to queer something? Why is language — the words that we use and that are used on us — so important to queer theory, and what does it mean for how we approach ourselves and those around us? The world in general? How is queer theory different from, and complementary to, women's and gender studies broadly speaking?.

GWST 2730 Gender in Society (4 Credits)
How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with SOCI 2730. Prerequisite: SOCI 1810.

GWST 2785 Family and the Law (4 Credits)
The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with SOCI 2785. Prerequisite: SOCI 1810.

GWST 2830 Representations of Women (4 Credits)
Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with ENGL 2830.
GWST 2981 Colloquium in GWST (2 Credits)
Theme changes each year. May be repeated for credit as long as course titles are different. Instructor approval required for non-GWST majors or minors.

GWST 2988 Study Abroad Resident Credit (0-18 Credits)

GWST 2991 Independent Study (1-10 Credits)

GWST 2995 Independent Research (1-10 Credits)

GWST 3130 The Archaeology of Gender (4 Credits)
This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data, and specific case studies of engendered lives in the past. Cross listed with ANTH 3130.

GWST 3652 Culture, Gender and Global Communication (4 Credits)
This course explores the ways in which culture, gender, and communication intersect and shape a variety of issues from an international and intercultural perspective. Using a global feminist perspective, it also focuses on paradigms and paradigm shifts in creating social change. Also explored are alternative paradigms of thought, action and media communications by women and indigenous peoples, which have often been ignored, discounted or buried in history. Cross listed with MFJS 3652.

GWST 3700 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3701 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3702 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3703 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3704 Topics in GWST (1-4 Credits)
Current issues or gender and women's studies faculty research interests.

GWST 3710 Putting Feminism to Work (4 Credits)
In this class students will explore the various ways people are putting feminism “to work” outside the classroom. The first part of the quarter we will examine how liberal arts degrees are translating into “work” for students (and feminists!) after college. Next, we will examine some contemporary issues and trends facing women and other minorities in the workplace (e.g., paid leave; equal pay; sexual harassment and racial discrimination; trends in 21st century jobs). Finally, we will explore organizations and careers where people have translated their feminist knowledge into action, including: local and global NGOs dedicated to gender equity and women's well-being; organizations that aim to advance public policy and political participation; initiatives that focus on racial justice, women's education and leadership; and possible career paths in science, technology, healthcare, and more. By the end of the quarter, GWST students should have a better understanding of current trends that feminists in the workplace face, as well as have some insight about how to harness the exciting opportunities and challenges that await them after college.

GWST 3871 Women in Art (4 Credits)
This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with ARTH 3871.

GWST 3950 Feminist, Gender, and Queer Theory (4 Credits)
This course examines the major theoretical approaches (feminist, womanist, queer, etc.) to understanding gender and other intersecting systems of oppression and privilege. It explores the historical evolution of the theoretical traditions that have informed feminism, queer theory, and gender and women's studies, as well as examining more recent developments within these fields of inquiry. Students apply these theories to a range of texts, empirical data and/or the experiential world. This course may be repeated for credit as long as course subtitiles are different. Prerequisite: GWST 1112; minimum of junior standing.

GWST 3975 Capstone Seminar (4 Credits)
This course provides students the opportunity to complete a substantial final project for their degree in gender and women's studies, which may take the form of preparation for a thesis, community-based research or service project, or a substantial creative or research project. Students work closely with the director of the program or a faculty member affiliated with the program to devise these projects after spending the first part of the course exploring recent research within the field of gender and women's studies. Prerequisites: GWST major or minor, GWST 1112, GWST 3950, senior standing, or permission of instructor.
GWST 3985 GWST Internship (2-5 Credits)
GWST 3988 Study Abroad Resident Credit (0-18 Credits)
GWST 3991 Independent Study (1-10 Credits)
GWST 3995 Independent Research (1-10 Credits)
GWST 3998 Honors Thesis (1-5 Credits)

Faculty
Lindsey Feitz, Teaching Professor and Director, PhD, University of Kansas

Kara Taczak, Teaching Professor, PhD, Florida State University

Geography and the Environment

Office: Boettcher West, Room 120
Mail Code: 2050 E. Iliff Ave. Denver, CO 80208
Phone: 303-871-2513
Email: geog-info@du.edu
Web Site: https://www.geography.du.edu/

Geography is an academic discipline that focuses on the spatial distribution of human and physical features around the Earth and changes over time of those phenomena. Because geography bridges the boundary between the natural world and human societies, geographers often collaborate with colleagues in related disciplines in the natural and social sciences. Geographers are taught to think in spatial and chronological terms and to analyze landscapes for indications of physical and cultural features. Geographers also create maps to illustrate spatial relationships and use geographically based data sets to answer spatial questions and analyze spatial data. The field is often subdivided into physical geography, human geography, human-environment interaction and geographic information science (GISc). Our undergraduate majors are required to take introductory coursework in each of these subdisciplines, followed by more advanced courses in each of the main fields.

The central goal of the undergraduate curriculum in geography is to produce students with a solid foundation in geographic principles and perspectives, and the professional skills to put them into practice. More specifically, the program aims to provide students with skills and techniques that will allow them to apply what they learn in the classroom, laboratory and field. Students are provided with skills in problem identification and solution; training in geotechnical tools, including geographic information systems, cartography, remote sensing, geographic statistics and spatial analysis; and experience in field and laboratory techniques. The discipline of geography is, by nature, integrative and broadly based, so interdisciplinary approaches to problem solving are also emphasized. Our ultimate goal is to provide graduates with training and preparation for employment as professional geographers in government, private industry, education and nongovernmental agencies, and to prepare students for graduate school.

The environmental science program is an interdisciplinary program with the mission of preparing students with the knowledge and skills to identify, analyze and resolve environmental issues. Atmospheric pollution, water supply and quality, global climate change, waste management, species extinction—these are just a few of the better-known issues encompassed by environmental science, a field that addresses the totality of relationships between humans and the natural environment. Through a combination of small lecture, lab and field-oriented courses, students are given hands-on experience with environmental questions and problem solving. Extended field experiences, including alpine ecology at our field station at Mount Evans, are integrated into courses. Students also have the opportunity to participate in the field quarter, spending 10 weeks traveling throughout the western United States, Baja Mexico and other international destinations to study environmental problems and issues.

Geography

Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 82))

Students majoring in geography may not also major in environmental science.

Courses taken as part of the Field Quarter program are exempt from the 60 hour rule.

Students majoring in geography and minoring in sustainability may take up to 72 hours of departmental courses.

45 credits of geography. Requirements include the following:

Upper-division credits (2000- or 3000-level courses); at least one physical geography, one human geography and one GIScience course 17

Total Credits 45

1 Must be completed during senior year.

2 GEOG 1264, 1265, 1266 are for Honors Program students only.

3 A list of acceptable courses is available from the Department of Geography and the Environment.

The student may choose one of the following tracks of emphasis:

- natural resource management
- atmosphere and climate
- cultural and regional geography
- earth processes
- geographic analyses
- land use or urban planning

Students preparing for entrance to graduate school or intending to use geography professionally should consult regularly with their departmental advisors.

**Minor Requirements**

20 credits of geography at the 2000- or 3000-level.

**Geographic Information Science**

**A. Program description**

Geographic information science (GIS) and technology provide fundamental knowledge and technological tools to solve geospatial challenges in a wide variety of fields, including urban planning, business and retail, human health and safety, environmental and resource management, and scientific research. The U.S. Department of Labor has recently identified GIS as one of the top three careers poised for explosive growth in the future.

The Department of Geography and the Environment proposes a bachelor of science in geographic information science. This program will prepare students to collect and manage geospatial data, to analyze and quantify spatial relationships, to evaluate and design maps, and to develop geospatial applications. As students progress through the program, they will maintain an ePortfolio to showcase their work and to reflect critically on their educational achievements and career goals. Students will have opportunities for hands-on, professional experiences through the department’s vibrant internship program, supported by a dedicated faculty coordinator.

The objective of this program is to provide rigorous technical training through problem-based and experiential learning, while grounding students in knowledge of fundamental principles of geography and geographic information. Students completing this degree program will be prepared to solve a diverse set of challenging geospatial problems and adapt to a constantly changing industry.

The BS (GIS) degree program will focus on the following five areas: (1) geographic information science - the study of the nature of geographic information, (2) geographic information systems - the management and analysis of digital geographic information, (3) remote sensing - the observation and analysis of human and physical geography from the air or space, (4) cartography - the visual communication of geographic information via maps, and (5) application development - writing computer programs to automate geospatial tasks.

**Bachelor of Science Major Requirements**

(183 credits required for the degree (p. 84))
Minimum of 56 credits of geography/GIS coursework. Requirements include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 1410</td>
<td>People, Places &amp; Landscapes ¹</td>

<td>Independent Study</td>
<td>1-4</td>
</tr>
<tr>
<td>GEOG 3999</td>
<td>Geographic Internship</td>
<td>0-4</td>
</tr>
</tbody>
</table>

Geography Electives

A minimum of 12-quarter hours of 2000- or 3000-level elective courses in geography must be completed, include one physical (P) and one human (H) course.

Total Credits

56

¹ Counts towards Common Curriculum requirement for Scientific Inquiry: Society and Culture
² Fulfills Common Curriculum requirement for Scientific Inquiry: The Natural and Physical World

Required Minors

In addition to major course work, two minors are required for the BS degree. The first minor must be in either computer science or mathematics. Please refer to the Department of Computer Science (http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#text) or the Department of Mathematics (http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mathematics/) for details.

Minor Requirements

20 credits of coursework. Requirements include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 2100</td>
<td>Introduction to Geographic Information Systems (GIS)</td>
<td></td>
</tr>
<tr>
<td>GEOG 3200</td>
<td>Remote Sensing</td>
<td></td>
</tr>
</tbody>
</table>

A list of acceptable elective courses is available from the geography department.

Note: As geography majors may emphasize GISc as part of their degree program, they are not eligible to complete the minor in GISc.
Prerequisites: Students are expected to have completed the Analytical Inquiry-Natural Science requirement or equivalent prior to enrolling in GEOG 2000 Geographic Statistics. Completion of an introductory course in geography such as GEOG 1410 People, Places & Landscapes; GEOG 1201 Environmental Systems: Weather; or GEOG 1216 Our Dynamic Earth I is encouraged but not required.

Geology

A minor in geology may be arranged by consultation with the faculty of the Department of Geography and the Environment.

Minor Requirements

Minimum of 20 credits of geology.

Environmental Science

Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 82))

Students majoring in environmental science may not also major in geography.

75 credits. Requirements include:

**Total Credits**

8

No more than five credits taken as independent study, internship or independent research may be counted toward the minimum hours required in the major.

## Minor Requirements

26 credits. Requirements include:
Students having completed the required courses as part of other degree program requirements complete the 26-credit requirement by taking courses from the approved list of courses available from the Department of Geography and the Environment.

Requirements for Distinction in the Major in Geography

• Minimum 3.4 cumulative GPA
• Minimum 3.6 major GPA
• Completion of a thesis

Requirements for Distinction in the Major in Environmental Science

• Minimum 3.4 cumulative GPA
• Minimum 3.6 major GPA
• Completion of a thesis

Bachelor of Arts in Geography

This course sequence is recommended, but not required.
1. GEOG 1410 is offered Fall, Winter, and Spring quarters and only needs to be taken once. It is recommended that you complete GEOG 1410 by the end of your first year.

2. MATH 1200 or MATH 1951

### Bachelor of Arts in Environmental Science

| Total Credits: 183 |

1. Recommended as one of the Scientific Inquiry: Society and Culture Common Curriculum courses.
2. Or GEOG 2500 Sustainability and Human Society.

**ENVI 2660 Environmental History of Sonora & Baja Mexico (5 Credits)**

Geography and ecology of desert southwest emphasizing Mexican states of Sonora, Baja California del Sur and Baja California. Traveling by van and lodging in tents, trip covers 3,500 miles, offers hands-on experience with principles and problems of physical geography and ecology in desert environments. Offered only during Interterm.

**ENVI 2950 Topics in Env. Science (1-4 Credits)**

An in-depth coverage of a specific environmental issue, topic, or problem. Topics vary with instructor.

**ENVI 3000 Environmental Law (4 Credits)**

Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

**ENVI 3991 Independent Study (1-5 Credits)**

Study of a topic not covered in existing course offerings. May be used for work completed in off-campus internships that focus primarily on the mastery of existing knowledge.

**ENVI 3995 Independent Research (1-5 Credits)**

Original research in environmental science topic under sponsorship of a faculty member; applicable to studies that focus primarily on discovery of new knowledge through application of scientific method.

**ENVI 3999 Environmental Science Internship (1-5 Credits)**

Supervised internship in a state, local, or federal office or in the private sector. Prerequisites: 15 quarter hours in the environmental science major and approval of supervising faculty. Maximum of 5 quarter hours total.

**GEOG 1201 Environmental Systems: Weather (4 Credits)**

First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1202 Environmental Systems: Hydrology (4 Credits)**

Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

**GEOG 1203 Environmental Systems: Landforms (4 Credits)**

Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.
GEOG 1216 Our Dynamic Earth I (4 Credits)
This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornadoes, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1217 Our Dynamic Earth II (4 Credits)
This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

GEOG 1218 Our Dynamic Earth III (4 Credits)
This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

GEOG 1264 Global Environmental Change I (4 Credits)
First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

GEOG 1265 Global Environmental Change II (4 Credits)
Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

GEOG 1266 Global Environmental Change III (4 Credits)
Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

GEOG 1410 People, Places & Landscapes (4 Credits)
In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 1988 Study Abroad Resident Credit (0-18 Credits)

GEOG 2000 Geographic Statistics (0-4 Credits)
An introduction to statistics primarily for geography and environmental science students focusing on the scientific method, the nature of data, descriptive statistics, and analytical or inferential statistics. Enrollment restricted to Juniors and Seniors.

GEOG 2020 Computer Cartography (4 Credits)
Basic map design and execution using existing maps. Topics include map projections, symbolizing quantitative data, use of space, layout, compilation, verbal content, and the use of computer technology in design and production of maps.

GEOG 2030 Field Methods (4 Credits)
Part I, outdoor instruction in use of Brunton compass, level, plane table, and alidade; Part 2, data-gathering techniques and preparation for field work in urban problems.

GEOG 2100 Introduction to Geographic Information Systems (GIS) (4 Credits)
Overview of GIS, including background, development, trends, and prospects in this technological field; software package and hands-on exercises used to examine basic geographic concepts and spatial data characteristics associated with automated mapping, projections, scales, geocoding, coordinate referencing, and data structures for computerized land-based data bases. Cross listed with GEOG 3100.

GEOG 2320 Andean Landscapes (4 Credits)
This class introduces students to intensive field activities pertinent to the study of Andean individuals and societies. Students study the characteristics of people, activities, as well as landscapes across the locations of Lima, Cusco and Puno in Peru. This course focuses on geography, history, archaeology, anthropology, biology, ecology and sustainability issues surrounding the above mentioned destinations. This course involves moderate physical activity (Inca Trail hike).

GEOG 2401 The Human Population (4 Credits)
This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems This course counts toward the Scientific Inquiry: Society and Culture requirement.

GEOG 2410 Economic Geography (4 Credits)
Economic elements as spatially arranged, distribution of economic activities on the Earth's surface; market, resource and transportation factors in location theory.
GEOG 2430 World Cities (4 Credits)
The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities.

GEOG 2500 Sustainability & Human Society (4 Credits)
Sustainability has become a catch phrase in discussions concerning the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students are introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, and social justice, and various metrics used to assess sustainable behavior and practices. Students study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings.

GEOG 2511 Principles of Sustainability - Honors (4 Credits)
Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

GEOG 2550 Issues in Sustainabilities (4 Credits)
The capstone seminar focuses on a particular problem related to sustainability. Seminar topics vary by instructor, but include a combination of readings, discussion, guest speakers, a group project (either service learning or research), and individual research presentations. Prerequisite: GEOG 2500 and completion of all other requirements for the sustainability minor.

GEOG 2608 Human Dimensions of Global Change (4 Credits)
This course documents and explores the transformations of the global environment that have occurred in the last 300 years and relates them to cotemporaneous changes in population and society. Students examine the complexity of human-induced environmental changes by looking at the various social, economic, political, institutional, and behavioral components of these forces at work. By using various case studies, students examine the processes and spatial distributions of anthropological changes to the world's lands, freshwater, biota, oceans and atmosphere.

GEOG 2700 Contemporary Environmental Issues (4 Credits)
Principles, practices, issues, and status of care of environment; lectures, readings, and discussions focus on causes, effects, and mitigation of a selection of topical regional, national, and international environmental problems including Denver's air pollution, acid deposition, hazardous waste management, global warming, and tropical deforestation.

GEOG 2701 Special Topics in Geography & Environmental Science (4 Credits)
Special topics in geography and environmental science.

GEOG 2750 Paleoenvironmental Field Methods (3 Credits)
Paleoenvironmental Field Methods is a short course that focuses on the use of Quaternary paleoenvironmental research techniques, including extracting and interpreting sediment cores from wetlands and lakes to reconstruct and understand paleoclimatic events.

GEOG 2810 Geography of Latin America (4 Credits)
This course studies the countries and islands of Middle America; the interrelationships of peoples, resources and physical features. Cross listed with GEOG 4810.

GEOG 2815 Geographies of Conquest: Christian, Jewish, and Islamic Societies in Andalusia (4 Credits)
This course introduces students to the cultural landscapes, former and current, of the different societies that converged in Iberia. The class will focus on medieval Al-Andaluz, the Islamic kingdoms that flourished there. During medieval times, Christian, Islamic, and Jewish societies lived side by side in an environment that oscillated between tolerance and open persecution. Science, art, scholarship, and political strategy motivated tolerance while religious fundamentalism and geopolitical considerations motivated persecution. This class will cover the human-environment interactions in the landscapes of Andalusia through an immersive field study and travel experience. This field class equals 4 academic credits. Over a period of 8 days we will visit the cities and surroundings of Madrid, Cordoba, Seville, and Granada in Spain where we will examine and compare cultural geography (past and present), history, and anthropological issues surrounding the communities that interacted in Al-Andalu.
GEOG 2825 Biogeographies of Conservation (4 Credits)
This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem, Ngorongoro Crater, Olduvai Gorge, and the island of Zanzibar in Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements.

GEOG 2830 Geography of Europe (4 Credits)
A field course that examines relationships between humans and the environment in Europe. We study both urban and rural environments to understand the following questions: What are the elements (climate, vegetation, landforms) that characterize European natural landscapes? How have humans modified these natural landscapes? How have environmental conditions influenced human activities (e.g. agriculture, architecture, economic development)? How are these human activities manifested at the landscape scale, and how are they organized in geographic space? How have humans attempted to preserve natural landscapes? Prerequisites: GEOG 1201, GEOG 1202, GEOG 1203 and field quarter application process through the geography department.

GEOG 2880 Geographies of South Africa (4 Credits)
This travel course is designed to give students a first-hand look at the physical and cultural landscapes of South Africa. We will study the varied natural landscapes that produce the commodities (e.g., gold, diamonds, wine, and agriculture) that have attracted the interest of outsiders for centuries and that have influenced the cultural landscapes particular to South Africa. A systematic presentation of the geology of South Africa, and its human history, will unfold throughout our travels.

GEOG 2988 Study Abroad Resident Credit (0-18 Credits)

GEOG 2990 Professional Development for Geography & Environmental Science (0 Credits)
This course is designed to prepare graduating seniors for the transition to the working world or graduate study. Lectures and workshops focus on the use of LinkedIn and social media as a means of career networking, employment opportunities, professional development, and resume writing and related career services.

GEOG 3000 Advanced Geographic Statistics (4 Credits)
The second in a sequence of two courses that address general statistical applications particular to geography, environmental science and other disciplines dealing with a spatial dimension in the data they work with. The focus of this second course is on the more advanced multivariate statistical techniques. The course has a strong applied orientation as particular attention is given to which technique is the most appropriate to use for a given type of problem and how to interpret and apply the resulting statistics. Extensive use is made of computer statistics packages. Homework exercises involving such statistical techniques as multiple correlation and regression analysis, principle components analysis, discriminate analysis and canonical correlation. Prerequisite: GEOG 2000.

GEOG 3010 Geographic Information Analysis (4 Credits)
Reviews many basic statistical methods and applies them to various spatial datasets. In addition, several spatial statistical methods are applied to spatial datasets. This course is an in-depth study of the interface between GIS, spatial data, and statistical analysis. Preferred prerequisite: GEOG 2000. Prerequisite: GEOG 2100.

GEOG 3030 Advanced Field Methods (4 Credits)
Various field methods used by researchers in physical geography; techniques include field mapping, laboratory analyses, geologic field methods. Prerequisite: GEOG 1201 or equivalent.

GEOG 3040 GPS for Resource Mapping (4 Credits)
This course is an introduction to GPS (Global Positioning Systems) concepts, techniques, and applications as they relate to GIS data collection. Lectures focus on satellite surveying, GPS technology, error sources, program planning, data collection design, and Quality Control and Quality Assurance issues for data collection programs. Hands-on lab exercises include navigation, mission planning for a GPS survey, designing a field data collection plan and associated data dictionary, field data collection, differential correction, and data integration into a GIS and map production.

GEOG 3100 Geospatial Data (4 Credits)
This graduate-level course is designed to provide graduate students from a broad range of disciplines with the skills to carry out applied research tasks and projects requiring the integration of geographic information system technologies and geospatial data. Students are introduced to a collection of techniques and data sources with a focus on acquiring and integrating data. Legal, ethical, and institutional problems related to data acquisition for geospatial information systems are also discussed. Cross listed with GEOG 2100.

GEOG 3110 GIS Modeling (4 Credits)
This course focuses on the concepts and procedures used in discovering and applying relationships within and among maps. It extends the mapping and geo-query capabilities of GIS to map analysis and construction of spatial models. The course establishes a comprehensive framework that addresses a wide range of applications from natural resources to retail marketing. Topics include the nature of spatial data introduction to spatial statistics and surface modeling in the first five weeks followed by spatial analysis operations and modeling techniques in the second five weeks. The lectures, discussions and independent exercises provide a foundation for creative application of GIS technology in spatial reasoning and decision making.
GEOG 3120 Environmental/GIS Modeling (4 Credits)
Facing challenges brought by the dramatically changing global environment, environmental modeling is increasingly used to support geographical and environmental decision making (e.g., spatial conservation prioritization). Environmental modeling is concerned with the characterization, modeling and simulation of environmental phenomena and processes using conceptual and mathematical models. Environmental phenomena and processes taking place in the geographic space are regulated by spatial principles. They also interact with other phenomena or processes in the attribute space. For example, species distribution is not only constrained by spatial factors such as proximity to other species, but also influenced by environmental factors such as terrain and climatic conditions. Due to its superior capabilities of handling spatial data and modeling spatial and attribute relationships, geographic information system (GIS) provides the ideal tools for environmental modeling. This upper-level undergraduate/graduate-level course surveys the concepts and techniques of GIS supported environmental modeling in three general categories: 1) Modeling in the spatial domain where the focus is on modeling spatial principles (e.g., spatial autocorrelation); 2) Modeling in the attribute domain where the emphasis is on environmental correlations (e.g., environmental niche modeling); 3) Modeling in the combined spatial and attribute domain where both spatial principles and environmental correlations are exploited (e.g., geographically weighted regression). Throughout this course, several real-world applications are used to demonstrate the ideas, concepts, and techniques of GIS supported environmental modeling, including crime spatial pattern modeling, species distribution modeling, and soil-landscape modeling and mapping. Prerequisites: GEOG 2000 and GEOG 2100.

GEOG 3130 GIS Programming with Python (4 Credits)
This advanced course explores the more technical aspects of GIS functions and data structures. Students have hands-on access to both raster (grid-cell) and vector-based software packages in the form of lab exercises that culminate in a small student-designed GIS project. Prerequisite: GEOG 2100.

GEOG 3140 GIS Database Design (4 Credits)
Designing databases to provide a foundation for GIS functions and applications, including investigating techniques used for designing databases in non-spatial environments and learning the applicability to GIS problems. Building on concepts and techniques introduced in the first half to extend traditional techniques and methodologies to model the requirements of spatial problems. Students learn to translate the conceptual spatial model into a physical implementation specific to GIS products. Prerequisite: GEOG 2100 or GEOG 3110.

GEOG 3150 GIS Project Management (4 Credits)
This course provides graduate students seeking a career in GIS, or anyone managing a GIS project, with the knowledge, skill and abilities to take a GIS project or program past the design and implementation phase and into day-to-day operation. Students evaluate and analyze the role of GIS in an organization’s overall information system strategy and communicate the importance of geography in an information system. Data sharing in the organization is examined to determine the benefits and costs of distributing data creation and maintenance activities throughout an organization. Finally, the role of GIS professionals and the skill sets required to manage GIS effectively are examined. Students review case studies of successful and not-so-successful GIS projects in North America. GIS management issues are addressed by a series of case studies focusing on various management aspects. Students are also expected to visit operational GIS programs in the metropolitan area and interview GIS managers. Students prepare case study evaluations for review in the classroom. Required for all MSGIS students because of the critical importance of GIS project management.

GEOG 3160 Web GIS (4 Credits)
With the development of internet technologies, the architecture of Geographic Information System (GIS) has evolved from the centralized desktop architecture to the distributed web architecture. Numerous web GIS applications are available (e.g., Google Map, Earth Explorer, and National Map). A web GIS application allows GIS analysts to access, manipulate, and visualize geospatial data from the web without the installation of GIS software. To facilitate the development of web GIS applications, geospatial technology vendors have provided application programming interfaces (APIs) through which GIS professionals can build customized web applications. This course focuses on the concepts and the development of web based GIS applications using industry-relevant geospatial APIs and core web technologies of HTML, CSS, and JavaScript. This is an upper-level undergraduate, to graduate-level course in GIS that introduces fundamental Web GIS concepts, applications and development kits. Concepts and techniques to be covered in this course include: • Web GIS concepts: system architecture, components, and workflow • Web programming languages: Hypertext Transfer Markup Language (HTML), Cascading Style Sheet (CSS) and JavaScript • Web mapping tools: ArcGIS online, Leaflet and their APIs. Prerequisites: GEOG 2100 and GEOG 3130.

GEOG 3170 Geospatial Analysis Project (4 Credits)
This course provides an opportunity for students to apply geospatial data analysis to real-world applications. Students will work as a team to develop a project that requires GIS analysis and/or application development, design a project work flow and management plan, and implement a solution. Students will demonstrate competence in GIS techniques, geospatial data analysis, and project management at a professional level. Prerequisites: GEOG 2020, GEOG 2100 and one of the following: GEOG 3010, GEOG 3130, GEOG 3140 or GEOG 3200.

GEOG 3190 Lidar: Theory and Applications (4 Credits)
Overview: Lidar (Light Detection and Ranging) is an active remote sensing system that uses laser pulses to measure the distance between the sensor and a surface or objects. Lidar as become an established method for collecting very dense and accurate elevation values, as well as for characterizing the three-dimensional structure of vegetation and urban land cover. In this course, we will build an understanding of the physical principles behind lidar, develop experience working with Lidar datasets, and survey a wide array of lidar applications for mapping and natural resource management. The course will culminate with a student-directed final projects.

GEOG 3200 Remote Sensing (4 Credits)
This course acquaints students with the basic techniques of the collection, processing and interpretation of information about the character of the earth’s surface from remote locations. Students become familiar with the use of the visible, infrared, thermal and microwave portions of the electromagnetic spectrum as a means of determining land cover and/or land use. Both manual and computer-assisted techniques are discussed and include hands-on applications.
GEOG 3230 Advanced Remote Sensing (4 Credits)
This course will build on the basic remote sensing concepts presented in GEOG 3200. Students will explore more in-depth concepts relevant to satellite and airborne remote sensing, including radiative transfer and information extraction. In addition, students will be introduced to two cutting-edge sources of data about the Earth’s surface: hyperspectral and lidar (Light Detection and Ranging) sensors. Students will study specific applications of advanced digital image processing techniques for environmental monitoring, natural resource management, and land-use planning. Finally, students will integrate remote sensing and other spatial datasets in the context of Geographic Information System (GIS) analysis. Prerequisite: GEOG 3200.

GEOG 3300 Cultural Geography (4 Credits)
Themes and methods of cultural geography including cultural area, landscape, history and ecology.

GEOG 3310 Culture/Nature/Economics-Human Ecology (4 Credits)
Cultural adaptation, livelihood strategies and environmental modification among subsistence and peasant societies: responses of such groups to technological change and economic integration.

GEOG 3330 Political Geography (4 Credits)

GEOG 3340 Geographies of Migration (4 Credits)
This course explores contemporary movement of people across international borders and the social, cultural, political, economic, and environmental repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.

GEOG 3350 Qualitative Methods in Geography (4 Credits)
This course focuses upon qualitative methods in the production of geographic knowledge. Qualitative methods are widely employed by geographers to understand patterns and underlying processes of human and human-environment issues in society. The course is designed to expose participants to the theories, purpose, scope, and procedures of qualitative research. Specific topics include: epistemological theories (ways of knowing); ethics and power in research; research design; data collection techniques in interviewing, participant observation and landscape interpretation, discourse and archive analysis, and case studies; data analysis; and writing and disseminating qualitative findings.

GEOG 3400 Urban Landscapes (4 Credits)
Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

GEOG 3410 Urban Applications in GIS (4 Credits)
This course uses the tools of geographic information systems (GIS) to explore concepts of traditional urban geography, including defining cities/metropolis, internal urban structures, urban systems, industrial location, social and residential patterns, urban form, environmental problems, and urban planning. The course allows students to practice fundamental skills in GIS (e.g., working with attribute tables, spatial analysis, spatial queries) and cartography (map design, color theory, display of information). Depending on the quarter, students pursue individual projects of interest or client-based projects. Prerequisite: GEOG 2100 or GEOG 3100 or equivalent.

GEOG 3420 Urban and Regional Planning (4 Credits)
Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

GEOG 3425 Urban Sustainability (4 Credits)
The 21st century is being called the ‘century of the city.’ Now more than ever, humans across the globe call the city their home. Many of the world’s most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As ‘sustainability’ becomes part of mainstream discourse, this course explores what sustainability means for urban contexts across the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

GEOG 3440 Urban Transportation Planning (4 Credits)
A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

GEOG 3445 Sustainability and Transportation (4 Credits)
Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.
GEOG 3450 Transportation and Mobilities (4 Credits)
The geographical study of transport has grown considerably and become more diverse, encompassing new areas of inquiry generated from economic, urban, environmental, political, social, and cultural geography, as well as from transport geography itself. The most notable expansion has been in the area of ‘mobilities’ research, which is focused on the social aspects of mobility, including both the large-scale movements of people, objects, capital, and information across the world, as well as the more local processes of daily transportation, movement through public space and the travel of material things within everyday life.

GEOG 3460 Air Transportation, High-Speed Rail and Tourism (4 Credits)
This course delves into the world of commercial air passenger transportation, studying the foundations of the industry, its role in the travel and tourism, and strategies for the future. Foundational topics include the history and geography of air transportation, air travel and tourism, the geography of tourism, airline corporate cultures, the role of government, aviation law, regulation, deregulation, and globalization. Study of the principal elements of airline economics, finance, planning, management, operations, pricing, promotion, cost containment, marketing, and policy provide the opportunity for consideration of strategic options within the contemporary airline industry. Further discussion focuses on the planning and management of airport and airway system infrastructure, the issue of sustainable air transportation, and the role of the airline industry within the context of intermodalism. Cross listed with GEOG 4460.

GEOG 3470 GIS & Environmental Health Geography (4 Credits)
This course is designed to acquaint students with the spatial distributions of populations and their relationships to environmental pollution sources and health outcomes. It utilizes real-life scenarios using population data from the U.S. census, EPA pollution data and various types of vital statistics data. The goal is to implement novel geographic techniques such as spatial analytical techniques and atmospheric modeling of pollutants to assess possible health risks and outcomes. This class requires basic GIS knowledge.

GEOG 3500 Reconstructing Quaternary Environments (4 Credits)
Nature, magnitude, sequence and causes of Pleistocene and Holocene climatic changes; effects of climatic change on plant/animal distributions and human populations; paleoclimatic research methods. Laboratory and field trips. Prerequisites: GEOG core, ENVI 3000.

GEOG 3510 Biogeography (4 Credits)
Biogeography focuses on present and past distributions of plants and animals. In this course we consider a number of themes central to biogeography, including plate tectonics and biogeography, the effects of climate change of plant and animal distributions, biogeographic realms, island biogeography, biodiversity, human impacts on plants and animals, and the origins of agriculture.

GEOG 3520 Geography of Soils (4 Credits)
Spatial variation in soil characteristics; soil processes, soil morphology, their application in soil studies. Prerequisite: GEOG 1201-1203 Environmental Systems or instructor's permission.

GEOG 3550 Topics in Physical Geography (1-5 Credits)
Investigations into various aspects of physical environment.

GEOG 3560 Fluvial Geomorphology (4 Credits)
Examines how water and sediment interact at Earth's surface to create a variety of landforms ranging from small rills to continental-scale river systems. Introduces fundamental fluvial processes or channel hydraulics and sediment transport. Examines common fluvial landforms including alluvial streams, bedrock streams, floodplains and alluvial fans. Combines traditional lectures and in-class discussions with numerous field excursions to rivers in the Rocky Mountains and Great Plains. Prerequisite: GEOG 1203, GEOG 1218, or GEOG 1266.

GEOG 3560 Meteorology (4 Credits)
The basic theory and skills of weather forecasting. Topics include thorough coverage of atmosphere dynamics and thermodynamics, the evolution of various weather types, the mechanics of storm systems (cyclones, severe storms, hurricanes), creation and interpretation of weather maps, and forecasting techniques.

GEOG 3560 Climatology (4 Credits)
Climatology is the study of the processes that result in spatial and temporal variation of weather. This course introduces the student to the processes responsible for the transfer of matter and energy between the Earth's surface and the atmosphere and the average weather conditions that result. In addition, topics of global concern, such as greenhouse effect, El Nino, urban heat islands and acid rain, are discussed. Laboratory exercises provide an opportunity to investigate climate variation and climatic change through the use of a variety of computer simulations.

GEOG 3620 Applied Climatology (4 Credits)
Climatic impact on environmental systems and human behavior; techniques to investigate climatic characteristics of environmental extremes (floods, blizzards), urban climatology and socioeconomic impacts of climate. Prerequisite: GEOG 1201. Recommended Prerequisite: GEOG 3600 or GEOG 3610.

GEOG 3630 Dendroclimatology (2-4 Credits)
Systematic variations in tree ring width and/or density can be used to reconstruct changes in precipitation or temperature well before humans were around to record the variability. This class utilizes hands on methods to introduce the fundamental principles of dendroclimatology. Through readings and lectures, students will learn how tree ring growth can be correlated to climate change. Students will then undertake several research projects to reconstruct past climate variability in the Denver metro area using tree rings. Prerequisite: permission of instructor.
GEOG 3640 Climate Change and Society (4 Credits)
The science of anthropogenic climate change will be presented with an emphasis on critical evaluation of the evidence of climate change and future scenarios and migration strategies. Students will be introduced to the latest climate change research, including the Intergovernmental Panel on Climate Change report, and the most recent literature from the field. The societal and cultural implications of climate change will also be discussed. Prerequisites: GEOG 1201, GEOG 1216, or GEOG 1264.

GEOG 3701 Topics in Geographic Information Science (1-4 Credits)
Topics vary by instructor.

GEOG 3720 Mountain Environments and Sustainability (4 Credits)
Mountain Environments and Sustainability explores the unique physical and cultural aspects of high relief and/or high altitude environments. Covering one quarter of the Earth's land surface, mountains directly or indirectly impact the lives of millions of people. We examine the significance of mountains to climate, water resources, and human activities, and discuss the sustainability of these environments and communities in light of rapid changes in many mountain regions resulting from anthropogenic factors and global change. GEOG 1201, 1202, and 1203 or instructor approval.

GEOG 3750 Topics in Human-Environment Interactions (1-4 Credits)
This course investigates various aspects of the relationships between human societies and the natural environment.

GEOG 3755 Geography of Health (4 Credits)
The geography of health is a thriving area of study that considers the impact of natural, built, and social environments on human health. This course introduces students to three geographical contributions to health studies. First, it emphasizes the importance of ecological approaches to health, which consider interactions between humans and their environments, including topics such as how climate change might influence disease distributions, and how the built environment can influence patterns of physical activity. A second focus is social theory, exploring how aspects such as race, socioeconomic status, and identity play a critical role in influencing human health. A third section of the course considers how spatial methods (cartography, GIS, and spacial statistics) can help answer health-related questions.

GEOG 3760 Health & Environment, England (4 Credits)
This field course meets in England, visiting several sites in the Midlands. It focuses on ecological approaches to health, which emphasize the relationship between humans and their environment as a critical influence on the health status of populations. This environmental influence may come from the natural, built, or social environment. The course will use a case study approach to emphasize i) the importance of the natural, built, and social environment to human health, and ii) how the relationship between humans and their environments and its sustainability has changed over time. We will explore eight different time periods, asking in each case how people's relationships with their natural, built, and social environments have influenced health at the population scale, and how these influences can inform sustainable health and environment in the future.

GEOG 3800 Geography of Colorado (4 Credits)
This course focuses on the physical and human geography of Colorado, a state that includes the western Great Plains, the southern Rocky Mountains, and the eastern Colorado Plateau. Colorado's varied natural landscapes provide equally varied settings for human settlement and resource use. Recommended Prerequisites: GEOG 1201, GEOG 1202, and GEOG 1203.

GEOG 3820 Kiwis and Kauris: Sustainability in New Zealand (4 Credits)
With its tourist tagline of "100% Pure New Zealand," New Zealand prides itself as a world leader in sustainability, with great efforts made towards sustainable use of resources and renewable energy, conservation of indigenous species, and integration of indigenous Maori understandings of the land into sustainability approaches. At the same time, New Zealand faces significant sustainability challenges, particularly related to climate change, invasive species, continued reliance on extractive industries, and histories of oppression/exploitation of native peoples. This class uses a field-based case study approach to unpick some of these complex issues, as we visit local sites and explore topics such as preserving native species, sustainable resource use, ecotourism, and indigeneity.

GEOG 3825 Geographies of International Development in Africa (4 Credits)
What are the historical roots of (under)development in sub-Saharan Africa? How is sub-Saharan Africa typically depicted in the media? How can we explain the fact that the Niger Delta provides the bulk of Nigeria's revenue, and yet, it remains the poorest part of the country? Is climate change the major cause of persistent food insecurity in the drylands of Ethiopia and Burkina Faso? How can we make sense of the uneven geography of poverty in Ghana? What explains urban food insecurity in Cape Town, or land struggles in rural South Africa? What are the social processes underlying the spatial disparity in health status in Malawi, or gender differences in HIV rates in Nyanza province, Kenya? And why do land users often resist state conservation efforts in Tanzania? These are some of the critical questions explored in this course. The primary aim is to provide a critical introduction to the geography of sub-Saharan Africa. We will begin by exploring how "the Africa story" is told by the media, scholars and policymakers. Attention will then shift to understanding the key historical processes that shape (under)development in the region. We will cover a broad range of topics, including governance, colonial history, debt and structural adjustment, foreign aid, food and agriculture, gender, climate change, land grabbing, health, population growth, migration, remittances, and resource extraction. We cannot possibly cover all these topics in greater detail; indeed, some are too vast and complex. We will however use specific case studies to illustrate and discuss each of the topics.

GEOG 3840 Water Resource Analysis (4 Credits)
The focus of this course is on complex policy, economic and local, national and international, and political issues surrounding resource use in the western U.S. Issues include exploitation of nonrenewable and renewable energy and mineral resources; and flexible responses to changing public policy.
GEOL 3100 Environmental Geology (4 Credits)
This course examines geologic hazards, both natural and those attributable to human impacts on the environment from urban and regional development. Specific topics may include disposal of municipal solid waste and radioactive waste; flood, earthquake, volcanic hazards; groundwater pollution and withdrawal; mass-wasting phenomena; and energy-related issues. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission.

GEOL 3870 Water Resources & Sustainability (4 Credits)
In this course, we look at water as both a local and global resource and examine what sustainability means for human and ecological realms. After an overview of the physical processes that drive the hydrologic cycle, surface and groundwater hydrology, we examine how we humans have harnessed water for our use and how we both alter and treat its quality. We examine the legal aspects of water allocation in the U.S. and the groups and agencies that are most involved in managing and overseeing water issues. Finally, we examine the most pressing water “issues” related to wildlife, development, scarcity and conflict. We look forward to imagining the power of both the individual and the collective in meeting our future, global water needs.

GEOL 3890 Ecological Economics (4 Credits)
Ecological Economics is an emerging transdisciplinary endeavor that reintegrates the natural and social sciences toward the goal of developing a united understanding of natural and human-dominated ecosystems and designing a sustainable and desirable future for humans on a materially finite planet. In this course we start with a basic overview and summary of the neo-classical economic perspective with a particular focus on the recognized market failures of public goods, common property, and externalities. We begin with a reconceptualization of economic theory by imposing scientific constraints (e.g. conservation of mass and energy, the laws of thermodynamics, evolutionary theory, etc.). Using the ideas developed in this reconceptualization of economic theory we explore the implications for international trade and myriad public policies associated with the ethical, environmental, and economic aspects of sustainability.

GEOG 3910 Geomorphology (4 Credits)
An advanced course that examines how Earth's landforms are created by a range of physical processes. Most landforms can be viewed as a result of some combination of erosion, transport and deposition of rock, soil and sediment. The most common agents causing these geomorphic processes are water, wind, ice and waves. This course examines the processes responsible for eroding, transporting and depositing earth materials and compares these processes with the resulting landforms. Prerequisites: GEOL 1202 or GEOL 1217 or instructor’s permission.

GEOG 3920 Remote Sensing Seminar (4 Credits)
Special topics in advanced remote sensing.

GEOG 3930 Cultural Geography Seminar (4 Credits)
Topics, methods and current research in cultural geography.

GEOG 3940 Urban Geography Seminar (4 Credits)
International comparison of economic and social, positive and negative aspects of urban systems.

GEOG 3950 Physical Geography Seminar (2-4 Credits)

GEOG 3955 Pollen Analysis Seminar (3 Credits)
Pollen grains preserved in sediment provide long-term records of vegetation conditions. Changing proportions of pollen types may reflect climatic fluctuation or human impacts. We review important recent research in pollen analysis (palynology), pollen sampling, laboratory techniques and pollen identification. Students are responsible for counting a number of samples and contributing data for a pollen diagram.

GEOG 3990 Undergraduate Research Seminar (1 Credit)
This course is designed to prepare students who will participate in faculty-supervised summer research projects. Students are introduced to research design, use of the scientific method, research expectations and reporting of results. Preparation of formal research proposal with adviser.

GEOG 3991 Independent Study (1-5 Credits)

GEOG 3995 Independent Research (1-5 Credits)

GEOG 3999 Geographic Internship (0-5 Credits)
Supervised internship in a government office at local, state or federal level or within private sector. Prerequisite: permission of instructor.

GEOL 2020 Historical Geology (4 Credits)
Historical geology is the study of the evolution of Earth through geologic time. Geologic features such as rock types and fossils are used to interpret and date past events. This course specifically introduces the basic geologic principles underlying historical geology, the geologic evolution of North America, and the evolution of life on Earth.

GEOL 2400 Geology and Ecology of the Southwest (5 Credits)
This field class emphasizes firsthand observations of the interactions among environmental properties (including substrate geology, soils, and climate) and natural vegetation in the Colorado Front Range, Rio Grande Rift, and Chihuahuan desert regions of New Mexico and southeastern Arizona. The course also examines Pliocene and Quaternary volcanism in southern Colorado and New Mexico in addition to Paleozoic and Mesozoic geology along the uplands of the Rio Grande Rift. Prerequisite: permission of instructor.

GEOL 3100 Environmental Geology (4 Credits)
Environmental geology examines geologic hazards, both natural and those attributable to human impacts on the environment from urban and regional development. Specific topics may include disposal of municipal solid waste and radioactive waste; flood, earthquake, volcanic hazards; groundwater pollution and withdrawal; mass-wasting phenomena; and energy-related issues. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission.
GEOL 3540 Hydrology (4 Credits)
This course provides an overview of the hydrologic cycle with emphasis placed on the study of applied hydrology. Discussions include the fundamental characteristics of precipitation, runoff processes, calculation of flood hazards, aquifers (porosity and permeability), the geologic settings of groundwater, the basic physics of groundwater flow, and water supply and use. Prerequisite: GEOL 1010, GEOG 1203 or instructor’s permission. Recommended prerequisite: one introductory statistics course.

GEOL 3900 Geomorphology Seminar (1-5 Credits)
Hill slopes comprise the vast majority of the Earth’s land surface. It is upon these surfaces that nearly all of the human population must exist and, hopefully, flourish. Hill slopes assume various forms, and their shape influences their utility for various human endeavors. Numerous geomorphic processes operate upon hill slopes to determine their form, and human activities strongly influence the frequency and magnitude of these geomorphic processes. Consequently, hill slopes are an interface between the Earth and the human population. Prerequisite: GEOL 3010 or permission of instructor.

GEOL 3991 Independent Study (1-5 Credits)

Faculty
Michael J. Keables, Associate Professor and Department Chair, PhD, University of Wisconsin - Madison
Eric Boschmann, Associate Professor, PhD, The Ohio State University
J. Michael Daniels, Professor, PhD, University of Wisconsin - Madison
Andrew Goetz, Professor, PhD, The Ohio State University
Hillary B. Hamann, Teaching Professor, PhD, University of Colorado Boulder
Helen Hazen, Teaching Professor, PhD, University of Minnesota

History analyzes the social, economic, political and intellectual changes that occur over the whole of recorded time. It prepares students to confront and manage change. The Department of History requires that students have an exposure to the broad sweep of human history, experience in comparisons across cultures, and a research seminar. The analytical and writing skills involved in a history major are valuable preparation for a
History graduates often pursue graduate work in a variety of fields, or enter careers in journalism, government, foreign service, international business, historic preservation, teaching or museum work.

In order to fulfill our distribution requirements, students must take courses in at least four of the following seven subfields: United States, Europe, Premodern, Latin America, Asia, Middle East, Africa

Total Credits 44

Students may be given elective credit for high school Advanced Placement (AP) or International Baccalaureate (IB) examination scores, at the discretion of the chair of the department. Ordinarily, no more than 4 credits of AP or IB work may go toward the history major.

Secondary Major Requirements
44 credits. Same requirements as for BA degree.

Minor Requirements
20 credits in history, of which at least 8 must be at the 2000 or 3000 level.

Requirements for Distinction in the Major in History
Students may want to consider and plan for achieving Departmental Distinction in the major. This designation is given to students who maintain a high GPA in the major and are willing to do additional coursework. In the Spring of 2020, the History Department faculty voted to adopt new requirements for Departmental Distinction. These requirements are:

1. Students must take a total of four 3000-level classes instead of the required two 3000-level classes. Given that two or three 3000-level classes are offered every quarter, history majors should plan for this when fulfilling their major requirements and be mindful of the 60-credit limit within the major.

2. Students should maintain at least a A- (3.7) average in the major with a minimum grade of B+ in Senior Seminar I OR maintain at least a B+ (3.3) average in the major with a minimum grade of A- in Senior Seminar I.

3. At the end of Senior Seminar II, students must successfully defend their thesis in front of a faculty committee. The committee shall consist of at least three history department faculty members and will include the student's thesis adviser. Thesis defenses will be scheduled toward the end of winter quarter.

1. Fulfills one Analytical Inquiry: Society and Culture requirement.
2. Course only offered in Winter. May be repeated for credit at the discretion of the chair as the topic is different each year.
3. Course only offered in Spring. Must be taken prior to HIST 3989.
4. Must be taken fall of senior year.
5. Must be taken winter of senior year.

HIST 1110 Ancient Rome (4 Credits)
This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1240 Comparative History of Medicine (4 Credits)
This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1250 Food in East Asian History (4 Credits)
This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1320 European Culture in the World Wars (4 Credits)
This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments’ attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1330 History of Ireland (4 Credits)
We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of ‘Irishness’, competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland’s evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1340 The British Monarchy (4 Credits)
This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1350 History of the British Empire (4 Credits)
This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political, the important role that women, gender, and racial ideologies placed in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1360 World War One (4 Credits)
Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens’ lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.

HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)
When we think of the Middle Ages we tend to think of a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered.

HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)
From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1510 War and the Presidency (4 Credits)
This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 1520 Immigrant Voices in Modern America (4 Credits)
This United States has aptly been called “a nation of immigrants.” In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony—autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1530 History of the United States since 1865 (4 Credits)
From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans’ everyday lives, and what legacies did these events leave for our own day? How have Americans defined and divided themselves—by race, gender, class, or otherwise—and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about “big business,” “big government,” “American exceptionalism,” or the “American dream”? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1550 America in the Sixties (4 Credits)
The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography’s 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1550 Seeing Red: Native Americans and Photography (4 Credits)
The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography’s 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)
This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)
This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 1705 Modern African History (4 Credits)
This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question.

HIST 1988 Study Abroad Resident Credit (0-18 Credits)

HIST 2015 Ancient Greece (4 Credits)

HIST 2022 The Roman Empire (4 Credits)
This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.
HIST 2105 The Dark Ages: Survey in Early Medieval History (4 Credits)
This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning with the late Roman Empire and stretching to the year 1000, a period often referred to as the "Dark Ages." Throughout the semester we will read primary texts representative of ideas and historical developments that shaped the Early Middle Ages. Central to this course will be three major themes: the development of western Christianity, the ongoing struggle between centralizing governments and local powers, and the effects of cross-cultural contact on western society. As we examine topics such as the fall of Rome, the rise of the three great cultures of the early medieval period (Christendom, Byzantium, and the Islamic world), and the formation of kingdoms and states our readings and lectures will focus on one or more of these major themes as a way of approaching the complex and often unfamiliar pre-modern world. By analyzing and evaluating these texts and their authors we will gain a better understanding of the past and a clearer idea of how the institutions and ideas of the pre-modern world changed over time and how they continue to impact and influence modern societies.

HIST 2106 The High Middle Ages: From Dark Age to Rebirth (4 Credits)
This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning in the year 1000 and culminating in the end of the medieval period in 1453. The "High Middle Ages" was a period of tremendous development and innovation. The first universities appeared, men and women argued about belief and practice, traders and warriors forged new connections with the wider world, and the very structures of modern Europe appeared for the first time. As we examine topics such as the Crusades, heresy, popular revolt, and cross-cultural trade our readings, lectures, and discussions will examine how we can understand the development of "Western" civilization and the ways in which the medieval past continues to inform our modern lives.

HIST 2120 Europe in the Renaissance/Reformation (4 Credits)
Social, political, and intellectual history.

HIST 2125 Cold War Europe (4 Credits)
Examines key issues in the history of Europe from the end of the Second World War to the disintegration of the Soviet Union. The clash of twentieth-century ideologies provides a framework for understanding European relations with the United States and the Soviet Union, along with broader political and cultural trends, decolonization, economic and social change, and class, gender, and race relations.

HIST 2131 Early Modern Europe: 1600-1789 (4 Credits)
Social, political and intellectual history of Europe during period of the Old Regime and Enlightenment.

HIST 2132 19th-Century Europe (4 Credits)
Social, political and intellectual patterns from French Revolution to outbreak of World War I.

HIST 2210 The French Revolution and Napoleon (4 Credits)
This course examines the many ways in which the French Revolution and Napoleonic period (1789-1815) marked a significant break with the past—politically, socially, and culturally. Yet these changes could not occur with some continuity in social and political institutions. We will work to answer a central question: as Napoleon dominated most of the European continent militarily and established a dictatorship at home, to what degree was he promoting ideals of the Revolution?

HIST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of the peoples in Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics in the mid to late 20th century, Israel's military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross listed with JUST 2300.

HIST 2310 The Modern Middle East: 1798-1991 (4 Credits)
This course traces the history and development of the modern Middle East from Napoleon's invasion of Egypt in 1798 through the First Gulf War in 1991. We pay special attention to the impact of colonialism and Great Power diplomacy on the region. Cross listed with JUST 2310.

HIST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women's education, political activism, and labor.

HIST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.
HIST 2330 Islamic Empires (4 Credits)
This course offers students a historical introduction to the major empires of the Muslim world. Starting with an overview of the major empires of the late antique Mediterranean (Roman and Sasanid Persian), it provides students with a primer on the rise and major principles of Islam, turning to the Umayyad and Abbasid empires and their roles in supporting the institutionalization and sectarian developments of classical and early-medieval era Islam. Students then examine the emergence of the great Andalusi and North American empires, noting their long-lasting influence on Spain. The course culminates in a multi-week study of the three major early modern sources from each empire and considers the political, social, religious, and economic aspects of each. The course concludes with a look at contemporary attempts to remember or revive the notion of "Islamic empire," connecting past to present. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2113.

HIST 2450 History of the Italian Mafia (4 Credits)
For two centuries, an entity called "Costa Nostra" has dominated the histories of Sicily and Italy. Costa Nostra has long been a shadowy and poorly-understood organization, yet it has changed the world in dramatic and unexpected ways. In this class, students learn what the Italian Mafia is and explore its history in Italy, particularly the Mafia's developing relationship to the law, the Italian government, and Sicilian culture. Students examine the nineteenth-century origins of the Mafia as well as the more recent "Mafia Wars" (1962-69 and 1970-82) that rocked Italy and resulted in the first widespread prosecution of Mafiosi. The recent trials of notorious Mafiosi have led to political scandal and charges of conspiracy, collaboration, and cover-up at the highest levels of Italian government. Lastly, students learn about the efforts of the Anti-Mafia movement to reform and redirect Italian and Sicilian culture and society.

HIST 2510 American History to 1789 (4 Credits)
Encounters between Native Americans, Europeans, and Africans in the American colonies; the Revolution, the confederation period; the framing and adoption of the Constitution.

HIST 2520 American History: 19th Century (4 Credits)
Establishment and development of new nation; emphasis on political history; experience in analysis of source materials.

HIST 2525 Great Depression in America (4 Credits)
This course will investigate the social, political, economic, and cultural dimensions of the Great Depression in America. Students will be exposed to a variety of sources, including photographs, posters, film, fiction, and documentaries, as well as more traditional historical sources, both primary and secondary.

HIST 2530 American History: 20th Century (4 Credits)
This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

HIST 2531 Twentieth Century Native American History (4 Credits)
This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures – such as federal and state governments, or the US legal system – and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

HIST 2541 The Roots of Modern America (4 Credits)
This course surveys one of the most tumultuous periods in U.S. history, one that encompassed industrialization, massive immigration, urbanization, settlement in the American west, and the confrontation between Victorian and Modern culture. Special attention is paid to asking how political, cultural, and social dissent has been defined through time. Topics include Darwinism and social Darwinism, capitalism and its dislocations, agrarian and labor radicalism, cultural and political radicalism, the progressive movement, feminism, the home front during World War I, and the aftermath of the war.

HIST 2551 The American West Since 1860 (4 Credits)
Everyone knows the romantic and violent mythology of the Old West: cowboys and Indians, lawmen and gunslingers, trappers, miners, railroaders, homesteaders. This course explores the history behind the myths. Sweeping from the Civil War era to the resorts and suburb of today's West, we follow such themes as the history of western land and resource use; the migration of peoples and the communities they created; the story of racial, religious, cultural, and political conflict; and the significance of those famous western myths to the nation as a whole.

HIST 2555 United States Since 1945 (4 Credits)
This course surveys one of the most tumultuous periods in U.S. history, one that encompassed industrialization, massive immigration, urbanization, settlement in the American west, and the confrontation between Victorian and Modern culture. Special attention is paid to asking how political, cultural, and social dissent has been defined through time. Topics include Darwinism and social Darwinism, capitalism and its dislocations, agrarian and labor radicalism, cultural and political radicalism, the progressive movement, feminism, the home front during World War I, and the aftermath of the war.

HIST 2556 The Church in American History: Challenges and Changes in the Protestant Tradition (4 Credits)
For most of its history, a Protestant majority dominated religion in America. At times, Protestants seized new opportunities to shape and reshape the course of the nation. At other times, influence waned and tensions mounted. This course surveys the history of religion in the U.S. with a primary focus on the challenges and changes within the Protestant church as it has navigated a shifting and increasingly pluralistic culture. We explore how the faithful—from John Winthrop to the modern day evangelicals—have attempted to create a “city upon a hill” through their beliefs, practices, movements, and institutions. Special attention is given to Puritanism, disestablishment, Revivalism, Mormonism, the Civil War, the Social Gospel, fundamentalism, civil rights, modern evangelicalism, and pluralism. Cross listed with RLGS 2565.
HIST 2570 Civil War & Reconstruction (4 Credits)
This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states’ rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.

HIST 2575 Disease in Early America (4 Credits)
Scholars have recently focused their attention on the way that diseases - Yellow Fever, Smallpox, Measles, Malaria - shaped the social and political landscapes of early America. In this course, we take up this investigation by examining both the diversity and pervasiveness of disease and the ways that non-human agents such as pathogens and insects had a destructive impact on African, European, and Indian peoples and influenced the course of events in early America. Our study therefore ranges from the virgin soil epidemics that decimated indigenous peoples to how smallpox outbreaks affected the Revolutionary conflict. In addition to examining the medical discourse of causes, symptoms, and treatments, we consider how disease influenced perceptions of personal and familial interactions, race and class relations, community and public health, and national culture and literature. For our investigation, we pay particular attention to the 1793 Yellow Fever outbreak in Philadelphia.

HIST 2630 American Women's History (4 Credits)
This course is a survey of U.S. women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women's experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with GWST 2630.

HIST 2645 Immigration in Twentieth Century America (4 Credits)
Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

HIST 2680 Historical Memory (4 Credits)
Why do successive generations rewrite the stories that teach Americans their history? Why do various social groups endorse alternate versions of past occurrences? This course explores the idea of historical memory by examining the narratives (stories) that have been composed about our country's past and how these stories have been revised over the years. We will focus on several major symbols of the American past and the narratives that have developed surrounding them. Our goals are to understand how and why these sites of memory have been interpreted and reinterpreted over the years.

HIST 2701 Topics in History (2-4 Credits)
HIST 2702 Topics in History (2-4 Credits)
HIST 2703 Topics in History (2-4 Credits)
HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)
In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2720 Paved Paradise? Nature and History in Modern America (4 Credits)
Oil drilling and outdoor recreation, "medical miracles" and natural disasters, the making of national parks and suburban landscapes, and political battles over pollution, property rights, energy, wilderness, endangered species, and toxic waste all belong to the environmental history of the recent U.S. In this class we explore that history, weighing how Americans from the late nineteenth century to the present day have thought about nature, modified and made use of it, and competed for control of resources and land.
In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term. Cross-listed with ASIA 2850.

HIST 2870 Modern China (4 Credits)
In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years. Cross-listed with ASIA 2870.

HIST 2885 Migration, Mobility, and Movement in Africa (4 Credits)
This course will span the precolonial, colonial, and postcolonial eras of African history to consider narratives of historical migration within and beyond the continent. Central to these narratives are ideas of indigeneity and foreignness, firstcomer and newcomer status, articulated in the colonial and postcolonial period as differences of race and ethnicity. Through this course, students will be introduced to the historiography of migration in Africa, as well as theories and methodologies based on linguistics, oral traditions, and archaeology. We will begin with the Bantu expansion patterns of second millennium BCE up to 1500 CE, considering the linguistic trajectory that this migration took in considering the origins of modern language groups on the continent. We will then move on to Indian and Atlantic Oceanic networks of trade and migration, including the slave trades that led to the dispersion of peoples both within and outside of the continent, and the creation and recreation of kinship groups and polities. We will consider the history of the mfecane in southern Africa, or the period of dispersal and warfare that led to wide-scale migration throughout the region in the nineteenth century. We will also explore the histories of migration to the continent by European colonizers as well as the settlement of communities from the Middle East and South Asia as part of systems of indentured labor as well as free migration. Finally, this course will take a look at contemporary issues of citizenship and xenophobia in postcolonial nations. All required readings for the course will be posted online.

HIST 2910 Colonial Latin America (4 Credits)
This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2920 The Making of Modern Latin America (4 Credits)
This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)
This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

HIST 2940 Sports and Empire (4 Credits)
This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

HIST 2945 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)
This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.
HIST 2950 U.S. and Latin American Relations: The Historical Struggle for Autonomy (4 Credits)
This course examines how Latin American nations have tried to maneuver in the world sphere under the dominant role played by the United States in the hemisphere. Latin American countries and the United States have had a complex and, at times, difficult relationship that dates back to the early nineteenth century. In response to the challenges of this complicated relationship, Latin American nations have adopted a range of strategies to deal with the United States, most of which are examined in this course.

HIST 2955 Latin America at the Movies (4 Credits)
This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry. Society and Culture requirement.

HIST 2988 Study Abroad Resident Credit (0-18 Credits)

HIST 2990 What is History? (4 Credits)
Introduction to historical concepts, methodologies and historiography. Intended for history majors who will take Senior Seminar the following fall.

HIST 2998 Issues in Comparative History (4 Credits)
This is a team-taught course in comparative (either geographical or temporal) history. Each time it is taught, it addresses a particular theme or topic from a comparative approach. Students are exposed to different approaches to the study of history, as embodied in the work of the individual faculty members.

HIST 3100 Cities and Society in Latin America (4 Credits)
This course approaches the history of Latin America through the prism of its cities, paying particular attention to the ways in which the urban environment defined and was affected by the regional path of socio-economic and cultural development. In addition to examining how cities evolved, and how people have therein lived (worked, engaged in political activities, etc.), we seek to understand how cities were historically conceived as a primary focus of public policies and projects to the goal of modernization in the region.

HIST 3275 The Past and Afterlives of Apartheid (4 Credits)
In 1948, after a close election, a government founded on the platform of apartheid, or a radical form of racial segregation, came into power in South Africa. Apartheid as a system remained in place until 1994. This seminar delves into the roots and trajectory of apartheid, and considers its effects on the lives of South Africans. As a 3000-level topics course, the readings for this course will be interdisciplinary, but will be founded in historical methodology and process, while also considering representations of apartheid and the history of South Africa through mediums such as literature, film, music, and sports. While the origins and institutions of apartheid will be studied, as well as the history of South African nationalist and resistance movements, one of the goals of this course will be to look at the lives of ordinary South Africans, and how they resisted the apartheid state in more quotidian ways. This course will also focus on the moment of 1994 and the legacy of apartheid in South Africa's postcolonial future, one in which the ideal of a rainbow nation was disrupted by the persistence of structural inequality and the memories of violence brought up by the Truth and Reconciliation Commission. We will also explore the comparative literature between apartheid South Africa and Jim Crow in the United States, considering the transnational implications of institutions of white supremacy and the legacy of British colonialism and white nationalism across the globe, as well as the fight against apartheid led by the independent nations of the global south in the United Nations.

HIST 3335 The Viking World (4 Credits)
In the late eighth century Europe was rocked by the first of the Viking attacks. Over the next two centuries they left an legacy that has been immortalized in books, TV shows, and movies. But what drove these renowned seafarers to set sail from Scandinavia to shores as far as North America and the Black Sea? In this course we will examine the world of the Vikings, looking at the social, cultural, and political changes that the Viking Age ushered in not just in Scandinavia but across Europe. We will discuss how raiding and trade went hand in hand, how new ideas of kingship and worship crossed cultural boundaries, and the ways in which history and legend overlap, coloring our ideas of the medieval past.

HIST 3340 Popular Culture in Early Modern Europe (4 Credits)
Early modern European popular culture including witchcraft, magic, fertility cults, popular religion, gender roles, carnivals and festivals, riots, and folktales.

HIST 3345 Women and Gender in Early Modern Europe, 1500-1800 (4 Credits)
It is easy to assume that today's ideas about gender roles have always existed, but beliefs about women's and men's "natural" behavior have changed dramatically over time. In 1500, for instance, it was a well-known fact that women are sexually voracious creatures who needed strict control to keep their appetites in check; by 1800, it was an equally well-known fact that women are inherently chaste and modest. The ideal male in 1500 was someone who used violence to maintain his authority; in 1800, masculinity was about self-discipline and politeness. In this course, we explore changing ideas about femininity and masculinity in the early modern period and consider how those changes related to broader shifts in culture and society.

HIST 3350 Social History-Modern Britain (4 Credits)
This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissent as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with MUAC 3350.
HIST 3355 Latin America's Cold War (4 Credits)
The Cold War is usually thought of as a conflict between superpowers in a bipolar world. Often, this interpretation omits the important histories of non-industrial or developing countries. This course will explore the experiences of Latin America during the most important and impacting socio-political, economic, ideological, cultural, and diplomatic contests ever faced by human societies. The course will explore the motives and consequences of the U.S. government's actions to counter the perceived Communist threat, as successive administrations expanded intelligence gathering, increased military and economic aid, backed anti-communist government in Latin America, and used US troops in direct military interventions. Students will engage with materials and learn about the interaction between historical experiences taking place in a global, regional, national, and local realities. In so doing, the history of the Cold War will be examined as a complex web or interrelated conflicts, projects and events. Students will get an overview of the events and major interpretations of the Cold War in Latin America. By engaging with class materials and assignments, students will refine their analytical skills, research abilities, historiographical knowledge and narrative expressions.

HIST 3370 Comparative Fascism in Europe (4 Credits)
A comparative survey of fascist Italy and Nazi Germany, from the origins of fascist movements in the 19th century to the establishment of political regimes, World War II and the Holocaust.

HIST 3372 Nations and Nationalism (4 Credits)
This seminar will focus on the twin processes of nation-building and nationalism in Europe. We will look at how the idea of an organized nation-state took root and how people came to think of themselves as belonging to a particular nation. We will examine these processes by using different national examples and by taking a variety of approaches--cultural, social, political--to understanding what a nation is.

HIST 3375 Empire: Revolt and Repression (4 Credits)
This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

HIST 3380 WWII History and Memory in France (4 Credits)
This seminar examines the history and memory of World War II in France. We discuss French collaboration with the Nazis and resistance, investigating myths and reality, as documented in historical research. Students analyze a variety of sources, such as diaries, memoirs, poetry, monuments, films, and media broadcasts.

HIST 3510 American Revolution and Its Background (4 Credits)
Causes, progress, consequences and significance of movement for independence in light of American colonial experience and problems of imperial authority.

HIST 3570 American Thought and Culture (4 Credits)
This course exposes students to writers, artists, philosophers, and reformers who have addressed some of the major intellectual and cultural transformations related to modernity: the problems of knowledge and communication, the struggle to achieve a democratic and equal community, and the endeavor to build a national culture.

HIST 3650 Native Crude: Indigenous Oil Politics and Activism (4 Credits)
The extraction and development of oil resources is one of the central issues driving U.S. geopolitical policy in the late 20th and early 21st centuries. As the U.S. government engages in covert and overt overseas incursions in order to secure oil supply, we have also reevaluated our domestic supply priorities. Both these dynamics--as well as the work by multinational oil companies to continually explore and develop/exploit new oil resources--have led to fraught negotiations between states, multinational corporations, and indigenous populations across the globe. This course explores the history of such past and present negotiations using books, articles, and documentary films.

HIST 3670 The U.S. Home Front in World War II (4 Credits)
This course examines the social changes taking place on the U.S. home front between the late 1930s and 1940s, including an investigation of the effects of war on American government, society, culture, and economy. Particular attention is paid to the war's impact on gender, ethnicity, race, and everyday people's lives.

HIST 3680 The Strange History of American Suburbia (4 Credits)
Everyone knows the emblems of American suburbia: single-family houses with attached garages, grassy lawns, curving streets and cul-de-sacs, office parks and shopping malls. But there's a history behind these settings that's poorly understood - that is key to understanding much about the U.S. Suburbia sheds light on American popular attitudes toward nature, technology, health, politics, and patriotism, and on the complicated dynamics of race, gender, family, class, and religion in American society. In this course, we explore how the U.S. became a "suburban nation," from the Romantic retreats of the nineteenth century, through suburbia's triumphant yet troubled "golden age" in the 1950s, to the stereotype-shattering suburbs of our own time. We consider the surprisingly powerful ways suburbia history has shaped U.S. history more broadly.
HIST 3703 Topics in History (4 Credits)
HIST 3704 Topics in History (4 Credits)
HIST 3705 Topics in History (1-4 Credits)
HIST 3875 Chinese Science and Global History (4 Credits)
This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected. Crosslisted with ASIA 3875.
HIST 3980 Internship (1-8 Credits)
HIST 3988 Study Abroad Resident Credit (0-18 Credits)
HIST 3989 Senior Seminar I (4 Credits)
Development of research skills and historiographical understanding; preparation for senior research seminar.
HIST 3990 Senior Seminar II (4 Credits)
Completion of a substantial research project, based on original sources. Students should consult their departmental mentor no later than beginning of spring quarter of their junior year to begin the formulation of the research project.
HIST 3991 Independent Study (1-10 Credits)
HIST 3993 History Honors Thesis (4 Credits)
Independent study specifically for graduating seniors wishing honors. Prerequisites: HIST 3989 and HIST 3990.
HIST 3995 Independent Research (1-10 Credits)

The Fritz Knoebel School of Hospitality Management (Fritz Knoebel) has been preparing industry leaders since 1946. As part of the Daniels College of Business, Fritz Knoebel has been recognized nationally and internationally for its tradition of quality instruction, including the 2013 award for Best Educational Innovation at the Worldwide Hospitality Awards. The hospitality management program has as its foundation the core business discipline classes in the Daniels College. Within the major students select a concentration from among Lodging Real Estate, Restaurant/Food & Beverage Management, and Event Sales and Management.
Hospitality Management
Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 82))

Minimum of 45 credits. Requirements include:

Requirements for Distinction in the Major in Hospitality Management

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.
Hospitality Management

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

Total Credits: 192-193

1. Fulfills Analytical Inquiry: The Natural and Physical World
2. Common Curriculum Requirements (http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegerequirements/)
3. Fulfills Scientific Inquiry: Society and Culture
4. May be taken any quarter within the first year.
5. INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Common Curriculum requirements in the First Year are generally satisfied through the sequential full-year foreign language (FOLA) requirement.

Common Curriculum requirements in the Second Year are generally satisfied through the sequential full-year Scientific Inquiry: Natural requirement.

HOSP 1100 Exploring Hospitality Mgmt (2 Credits)
This is an introductory course designed to provide students with a broad overview of the hospitality industry and the various segments that comprise the industry. The course focuses particularly on the industry areas captured by the concentrations available to Knoebel students, the elements that make hotels and resorts what they are—food and beverage/restaurants; lodging; sales, marketing, and revenue management; lodging real estate; conference services; and on other facets of hospitality.
HOSP 1101 Hip Hotels: Delivering Amazing Guest Experiences (2 Credits)
Through an immersive, behind-the-scenes experience in Denver's hotels, students learn about: The challenges hotel executives face; the interplay between hotel design and service delivery; how to positively influence the guest experience; and the career paths available in the industry.

HOSP 1200 Industry Work Experience (0 Credits)
Faculty supervised work experience. Prerequisites: HOSP 1100 and completion of 500 hours of approved work experience. Advisor will register students for course as needed.

HOSP 2201 International Experience (0 Credits)
Students spend one quarter in an international setting taking courses while touring and observing overseas hospitality operations. Advisor will register students for course as needed.

HOSP 2202 Management Intern Program (0 Credits)
Preferably, this internship is full-time, continuous employment for ten-weeks with a minimum of 400 hours and is designed to allow students to increase their exposure to the hospitality industry and continue to reconcile their classroom learning with industry practice. Advisor will register students for course as needed. Prerequisites: HOSP 1200.

HOSP 2360 Managing a Restaurant Business (4 Credits)
In HOSP 1100, Exploring Hospitality Management, students are introduced to various aspects of restaurant/food and beverage management and basics about them. From here, we advance to a more thorough overview of the management of various food and beverage operations, specifically focusing on restaurants. Topics include safe food and beverage service, product specification and procurement, labor scheduling, revenue control and collection, and other management functions required for success in food and beverage operations. Prerequisite: HOSP 1100.

HOSP 2361 Contemporary Cuisine (4 Credits)
Judging by their high failure rate, restaurants can be one of the most difficult and complex businesses to manage. This course builds on previous food and beverage courses by providing hands-on experience running and managing a restaurant environment. Through the opening and running of two live restaurant operations for a night each, the course enables students to put into practice the managerial aspects of full-service restaurant operation, from menu planning and implementation to financial analysis, including systems, tools and reporting. Prerequisites: HOSP 2360 and HOSP 2401.

HOSP 2401 Hotel and Resort Management (4 Credits)
This course presents an overview of the management of a various lodging properties, specifically focusing on rooms division operations. The perspective taken is strategic, identifying and considering issues of concern to general managers of all types of lodging properties, with a particular focus on profit maximization (yield/revenue management) and distribution channel management. The broader political, economic, social, and technological environments and trends and their impact on lodging operations are considered. The perspective is global and includes considering how lodging operations differ in various parts of the world. Prerequisite: HOSP 1100.

HOSP 2402 Revenue Management (4 Credits)
This course provides an introduction to the basic principles and practices of revenue management in the hotel and restaurant industry. Students acquire the fundamental analytical skills needed to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels and restaurants. The course includes certification in STR tools. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2200.

HOSP 2501 Managing Human Capital in Hospitality (4 Credits)
People are the heart of any organization and can be a source of competitive advantage, particularly in a hospitality environment. This course prepares students to develop and manage successfully the processes and systems that help hospitality firms develop a competitive advantage through people and build a service culture, including recruiting, selecting, onboarding, and developing employees in order to retain them in both union and non-union environments. Prerequisites: HOSP 2360 and HOSP 2401.

HOSP 2502 Hospitality Cost Management (4 Credits)
The use of industry statistics and a uniform system of accounts for hotels and restaurants to determine an operation's position in the marketplace. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2300.

HOSP 2504 Hospitality Technology and Analytics (4 Credits)
Hospitality Technology and Analytics serve as an introduction to hospitality technologies and technology-enabled data analytics. This course surveys diverse aspects of consumer-facing hospitality technologies (social media, mobile, distribution channel, sharing economy, etc.) and in-house systems of hospitality operation (event-planning system, property management system, and point-of-sale system, etc.) In addition, this course provides an introduction to the field of business intelligence and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and fact-based management to drive decisions and actions in the hospitality industry. Specifically, the course looks at the managerial aspects associated with the application of hospitality technologies and technology-enabled data analytics to achieve strategic business goals. Prerequisites: HOSP 2360, HOSP 2401.

HOSP 2506 Hospitality Sales & Marketing (4 Credits)
This course addresses all that is involved in hotel and resort sales, including lodging/room group sales and catering sales. Also addressed are negotiation, the production of catered events, trade shows, and meetings, from the perspective of planners, venue salespeople, and event managers. Students learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other sales and planning functions. Prerequisites: HOSP 2360, HOSP 2401 and MKTG 2800.
HOSP 3000 Wines of the World (4 Credits)
A survey course of the wines of the world, including old and new world wines; still, sparkling, dessert and fortified wines; viticulture and viniculture. Prerequisite: must be at least 21 years of age. Non-HPM majors only.

HOSP 3120 Distinguished Lecture Series (1 Credit)
This course is the springboard for seniors to transition from a student mindset to that of a professional. It enables personal exploration, values clarification, and the narrowing in on an initial career focus. Hearing from and networking with senior executives from various segments of the hospitality industry who provide students with their insights about competition and challenges within the industry motivate the introspection described above.

HOSP 3301 Beverage Management (4 Credits)
Organization and management of the beverage operation of resorts, restaurants, hotels, clubs and other licensed premises. Emphasis on product knowledge, responsible beverage service, facility design and operational practices. Prerequisites: senior standing in the HPM major.

HOSP 3302 Advanced Beverage Management I: Spirits, Sake & Beer (3 Credits)
A deep dive into the production, buying and service of spirits, sake and beer. Students enrolled in this course will sit for the Wine and Spirit Education Trust Level 2 Spirit Certification exam. Enrollment is by invitation of the instructor(s).

HOSP 3303 Advanced Beverage Management II: Wine (3 Credits)
A deep dive into grape varietals, growing regions, production styles, viticulture and viniculture. Students in this course sit for the Wine & Spirit Education Trust Level 2 Wine Certification exam. The course also includes an immersion in Napa or Sonoma to deepen and reinforce the knowledge acquired in the classroom. Enrollment is by invitation of the instructor(s).

HOSP 3360 Rest/F&B Concept Devel (4 Credits)
In previous food and beverage courses you obtained the knowledge and skills to perform the basic management functions required for a successful career in F&B operations, put these skills into practice and opened two “restaurants for a night.” In this course you will acquire the skills required to develop and brand a new restaurant. Prerequisites: Senior standing in the HPM major, HOSP 2361 and HOSP 3301 and restricted to students pursuing the Restaurant/Food & Beverage Management Concentration.

HOSP 3400 Advanced Revenue Management (4 Credits)
This course provides students with the advanced knowledge, skills, and abilities to make sound business decisions and implement revenue management strategies and solutions to influence consumer behavior and maximize revenue and profits for hotels. Students will acquire the analytical skills to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels. Prerequisites: HOSP 2402, ACTG 2300.

HOSP 3402 Hospitality Investments (4 Credits)
This course exposes students in the lodging real estate concentration to hotel investing and the types of hotel achieve ownership and hotel investment strategies that exist today. Students acquire knowledge in critical lodging investment topics including hotel investment metrics/returns, underwriting a hotel, capital markets (debt/equity), negotiating a hotel management agreement, hotel brands v independent hotels, franchise license agreements, construction and development challenges, asset management, hybrid lodging, and more.

HOSP 3506 Special Event Management (4 Credits)
This course addresses all that is involved in the sales and production of catered events, trade shows, and meetings, from the perspectives of planners, venue salespeople, and event managers. Students will learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other event and meeting sales and planning functions. Prerequisite: HOSP 2506.

HOSP 3600 Lodging Valuation Principles (4 Credits)
This course introduces students to the basic fundamental analysis of methods and techniques of real estate investment, finance, and valuation as they apply to the lodging industry. The course covers time value of money, basic discounted cash flow techniques, financing instruments, appraisal methods, and valuation techniques for income producing lodging properties. Students utilize computer software and spreadsheets for solving real estate problems. Practical applications provide students with the analytical tools and techniques to make effective real estate investment and financing decisions. Prerequisites: HOSP 2502, HOSP 2504.

HOSP 3601 Hotel Development & Feasibility (4 Credits)
This advanced capstone experiential learning course integrates lodging real estate financial analysis and valuation techniques to emphasize the fundamental concepts and techniques involved in the hotel development process and the various steps involved in performing a market feasibility study of a proposed hotel. Students will propose, establish and refine a concept from inception to completion, perform a market and site analysis, plan the development and construction, estimate the cost, and determine the financial viability of a full-service or limited-service hotel. Additional discussion topics include the regulatory process, financing, and risk management. Guest speakers, site visits, cases, text, practical examples and extensive use of spreadsheet software will provide students with specialized real-world knowledge and enhance their understanding of the complexities and challenges faced in lodging real estate development projects. Prerequisite: HOSP 3600.
HOSP 3602 Facility Layout and Design (4 Credits)
The course is focused on students who are going to become hospitality managers and will inevitably be involved with the design and planning of facilities. They will develop confidence in understanding the design process, reading and understanding plans, how to effectively critique designers to obtain the best results, what it takes to create functional spaces, and the importance of economic balance in creating designs that promise the best potential for financial success. Students will emerge with a heightened vision that will allow them to assess every hospitality experience that they encounter. They will plan a restaurant and a hotel to develop planning skills and to demonstrate creativity.

HOSP 3650 Leadership in Hospitality (3 Credits)
This course provides students with the knowledge, skills, and attitudes necessary to undertake leadership responsibilities in complex organizations. This course applies concepts and methodologies from the social and behavioral sciences in the analysis of leadership behavior in diverse organizational and community settings. Must have senior standing in the HPM major.

HOSP 3700 Topics in Hospitality Management (1-4 Credits)
Exploration of various topics and issues related to the hospitality industry. Prerequisite: HOSP 1100.

HOSP 3800 Hospitality Experience Management (4 Credits)
The evaluation, design, and management of service delivery systems through operations management topics from a service perspective. Included are other related topics such as customer satisfaction and managing organizational change. Must have senior standing in the HPM major.

HOSP 3991 Independent Study (0-10 Credits)
Independent research/study; requires written report. Prerequisite: instructor's permission.

Cheri Young, Associate Professor, PhD, Cornell University

Innovation and Entrepreneurship
The university-wide entrepreneurship minor at Daniels focuses on action, decision-making, experimentation, and hypothesis testing in the face of an uncertain future within a business context. Students who complete the entrepreneurship minor will understand how to shape the business, economic, political, and social context along with the creation of their products or services. To help students understand how to start successful businesses or to innovate within existing businesses, the entrepreneurship minor offers courses from several different perspectives such as financial, legal, marketing, and leadership.

Entrepreneurship Minor
The minor in Entrepreneurship is available to all University of Denver undergraduate students. BUS 1440 The Fourth Industrial Revolution is prerequisite for all Entrepreneurship minor courses. Business students take this course as part of the Business Core, and only require an additional 20 hours in order to complete the minor.

**Total Credits**: 24

---

1: This course will not show up in the minor area for business students. Business students take this course as part of the Business Core, and only require 20 additional hours in order to complete the minor.

**EVM 1100 Introduction to Entrepreneurship (4 Credits)**

Entrepreneurs play a critical role in driving innovation, promoting social change, creating jobs, and changing the way we live, work, and communicate. Entrepreneurs come from different backgrounds, professions and possess a wide range of skills and experiences. What entrepreneurs have in common, the desire to solve problems, make change and create value through innovation. This introductory entrepreneurship course is for students that are interested in learning about entrepreneurship or first-time entrepreneurs with an idea. Students will explore entrepreneurship and apply tools, mindsets, and frameworks for starting a for-profit business, a non-profit business, or a business within a business.
EVM 2100 Social Entrepreneurship "do well by doing good (4 Credits)
Interested in making a positive impact through business while also making money? Social entrepreneurship will teach you how you can ‘do well by doing good.’ This course examines how all types of organizations can be used to positively impact our global society. Students will explore their own passions and see how purpose and profit can combine to create rewarding and inspiring careers and companies. Human-centered design, alternative funding, business models, and impact measurement will all be integrated to prepare students to lead impactful careers. Through class discussions, case studies, guest speakers, and hands-on application, this course will prepare students to join the growing group of innovators using business to address society’s greatest challenges.

EVM 2200 Global Entrepreneurship "Innovating and Creating Value Across Borders (4 Credits)
Entrepreneurship is about solving problems, identifying unmet needs and opportunities. Where some see roadblocks, entrepreneurs see opportunity. As people, cultures and business become interconnected it is important for entrepreneurs to have a global mindset and approach to business. The Global Entrepreneurship course provides you with the skills and knowledge to start a business in another country, develop a market in another country, and identify opportunities across borders. Students will develop an intercultural understanding as they learn about history, religion, culture, economy, and government in other countries. Students will identify commonalities, shared interests, and differences between cultures and apply business frameworks to develop products and services for international markets.

EVM 2250 Entrepreneurship Interterm (2 Credits)
This course provides you with the opportunity to explore and discover what makes for an effective entrepreneurial ecosystem. You will travel to a foreign country and meet with key actors throughout the entrepreneurial ecosystem. Additionally, you will learn about and engage with the local culture, learning how religion, customs, and culture all influence global entrepreneurship.

EVM 3350 From Idea to First Dollar Sale (4 Credits)
Designed to serve as the capstone course for the Entrepreneurship Minor, From Idea to First Dollar Sale takes students through the process of starting a company, launching a product, creating a market, and learning how to embrace "failure" and manage uncertainty. Student will use and apply the knowledge, skills, and tools they have developed in previous Entrepreneurship Minor courses to spin up a business in ten weeks. Most types of businesses are welcome: retail, services, technology, hospitality, etc. Students may build on an existing idea, iterate, and take it to the next level or develop an entirely new idea. Through class discussions, activities, presentations, and guest speakers, students will explore the principles of planning, testing, measuring, analyzing, and rapidly iterating a product or service. Startups require significant effort, commitment, creativity, and passion. This class is no different and whether you have started a business in the past, you will know what it takes to be an entrepreneur by the time this class is finished.

EVM 3370 Metrics & Financial Tools for an Emerging Business: Accounting and Finance for the Emerging Business (4 Credits)
Students are taught to link physical activity occurring in the business venture to the movement of numbers on financial statements. They draft 3 years of flexible profit and loss, cash flow, and balance sheet statements; Year 1 is monthly, Year 2 is quarterly, and Year 3 is one annual period. Students learn how to visualize the activity, metrics, and assumptions needed to support the customer experience they intend to build and how these numbers flow through their financial statements including: Generating revenue leads; Convert leads to sales; Producing the product/service; Delivering the product/service; Converting customers into repeat business; Set-up and maintain Quick Books. Cash impact of corporate governance costs (indirect) are included, such as risk management (insurance), employee benefits and compensation, facilities, technology, legal and capital expenditures, etc., understanding the tax implication of setting up different governance devices and understanding recapitalization and its implications. Students learn to identify activity metrics to drive cash basis break-even for daily, monthly, and annual periods. They will also learn how to create a Use of Funds Statement linked to their proforma'd financial statements. Students will learn different types of financing and under which circumstances these types are used-credit cards, factor loans on inventory, bank loans- including small business administration loans, angel funding, and venture capital funding. Exit strategies like M&A and IPO will also be covered. Prerequisites: BUS 1000.

EVM 3380 Leadership, Management, and Execution (4 Credits)
Every entrepreneur is a leader. Having the ability to lead is an essential skill for everyone who wants to either run their own business or have a leadership role in an existing business. This course is designed to help you identify and develop competencies necessary to be an effective leader, no matter what your starting point is. This class helps you grow awareness around your strengths and interests, as well as the challenges and opportunities in current business landscapes to help you develop a leadership style that is relevant to both. We'll begin by developing your WHY statement, which helps you determine what you believe, what matters to you, what problems you want to solve and for whom you want to solve them for. This is essential no matter what business opportunity you create. We'll then use design theory and our text, “Designing your Life,” to help you build a well-lived, joyful, entrepreneurial life. One that has the traits that fit you and entail mastery, autonomy and purpose (the essentials of good work). You'll learn through others by having a mentor meeting, presentations by local entrepreneurs and peer presentations. You will share your knowledge with others by presenting your own mini “TED Talk” at the end of class.

EVM 3400 The Innovation Amphitheater (1 Credit)
Want to start your own business and invent your own future but haven’t landed on a great product/service idea? Already have a business and want to expand into new spaces and offerings? This course is for people who answered yes to either of those questions. The Innovation Amphitheater takes you through 16 proven strategies and techniques to help you innovate into new spaces and find opportunities. You’ll explore such strategies as crossovers, combos, slivercasting, inside-out, old school and retro, and many more.

EVM 3401 Project Management (1 Credit)
Learn the basic fundamentals of project management, focused specifically on high-performing teams while starting and running an early-stage business. Explore how to implement proven project management concepts and techniques using popular tools like Trello and Asana. 1 credit hour. Prerequisite: EVM 3350.
**EVM 3402 Creating Your Digital Presence (1 Credit)**
Creating awareness of your new business venture is one of the most important tasks in the early stages of building your business. Creating awareness by driving traffic through and to your digital presence is essential. To help you as you embark on an entrepreneurial effort, this course focuses on building an integrated digital presence with a website, Facebook Business Page, Twitter account, Pinterest account, and an Instagram account.

**EVM 3403 Ethics in Entrepreneurship (1 Credit)**
Creating a business for the sake of generating profit is not enough. Businesses must contribute to the betterment of society through social, environmental, and financial gains. This course will help you build the right vision for your business by 1) engaging you in ongoing reflection and dialogue about your ethical responsibilities in product and service innovation, and 2) helping you understand cognitive, behavioral, and principled approaches to ethical issues in product and service innovation.

**EVM 3404 Primary Research (1 Credit)**
To be successful in your business venture, you need to make data-driven decisions. Much of that data can come from internal operations or perhaps secondary sources. But, to truly be successful, you need to gather, analyze, and make decisions based on primary research data from your external market. In this course, you'll learn the basic tenets of performing primary research activities including defining your market segment, building a primary research instrument, gathering data using a primary research instrument, analyzing the data, and making recommendations.

**EVM 3407 The Perfect Pitch (1 Credit)**
Essential to most new business ventures is the ability to raise capital, most notably from angel investors and venture capitalists (VCs). Raising capital starts with the "pitch," a presentation that is exciting, informative, realistic, and addresses what funds are needed, how they will be used, and how the investor will financially benefit from providing the funds. This course will help you learn how to create the perfect pitch for your new business venture. We will review both successful and unsuccessful pitch presentations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3408 Accounting For Entrepreneurs (1 Credit)**
Accounting is an activity in any business that measures, processes, and communicates financial information and transactions. This vitally important activity will help you track your expenses, recognize your revenue, and in general keep an accurate and detailed view of the financial strength of your business. In this class, you'll learn how to process operating expense transactions (e.g., advertising and payroll expenses) and revenue transactions (both actual sales and sales on credit). You'll also learn how to appropriately handle the depreciation of long-term assets like vehicles and buildings. Finally, you'll learn how all of these transactions enable you to build a balance sheet for your new business venture.

**EVM 3409 Financial Statements For Entrepreneurs (1 Credit)**
Of the four major financial statements, the most important to a new business venture are the balance sheet, the income statement, and the statement of cash flows. Knowing how to build and interpret these are critical to your success during not only the early stages of spinning up your business but throughout the lifetime of your business. In this class, based on a wide variety of financial transactions, you will learn how to build and interpret an income statement and a statement of cash flows. (It is assumed that you already know how to build and interpret a balance sheet.) You'll also learn how to build a proforma income statement and statement of cash flows, based on the financial projections of your new business venture. Prerequisite: EVM 3408 (minimum grade of C-).

**EVM 3413 Design Thinking (1 Credit)**
Design Thinking is a creative problem solving process that builds your ability to first see and then solve human-centered opportunities. It starts with empathically looking at frustrations inside and around your organization, then moves through a variety of brainstorming sessions to build customer centric solutions. Design Thinking is a wonderful tool to help you monetize the human capital in your organization. Once we know the process, we will ask students to bring real challenges into the classroom where we will use Design Thinking to build potential new products, services and solutions.

**EVM 3414 Market Discovery and Product-Market Fit (1 Credit)**
Market discovery is about identifying demand for ideas and innovations. Students will discover that some markets have already been established and others have yet to be created. Product market fit takes time. At first new ideas and innovations may not fit an existing market, requiring a new market to be developed. We'll study example companies in a wide variety of industries that over time found the correct product market fit. Students in this Sprint will learn methodologies to find and assess product market fit for new ideas and innovations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3417 Branding and Messaging (1 Credit)**
Branding is an essential element for any startup. Your brand is created by you and grows as your business grows. It’s more than a logo, colors, and fonts contained in a style guide. It’s the experience that you create for your customers. It’s something your business should aspire to. Something memorable. And as you work through this course, you will get an understanding of what it takes to build the brand for your business. Prerequisite: EVM 3350.
EVM 3420 Cloud Technologies (1 Credit)
Welcome to the Cloud! What is the cloud, is it a thing, a concept, a nifty term? If you are starting a new business, thinking about starting a new business or improving the efficiencies in an existing business, you need to understand the available technologies and tools in the Cloud. Where do I host my website, how do I handle accounting, where is the email server, how do I track customers, how do I share information, what tools are available for customer support? These are just a few questions the Cloud will solve efficiently and cost effectively. The Cloud has dramatically changed the competitive landscape for startups by reducing the cost of starting a new business. The Cloud removes costly equipment, software and support expenditures; with the Cloud, you pay for what you use. This course will focus on identifying, analyzing, and implementing Cloud technologies to help run your business. Here are some of the topics we will explore and discuss: flexible costs, how and when to implement these tools, is your data safe, comparing similar services, improving collaboration.

EVM 3421 Intellectual Property Issues for Startup Businesses (1 Credit)
All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and — equally as important — your responsibilities for not infringing on the IP assets of other organizations.

EVM 3422 Startup Legal Issues (1 Credit)
Starting a business involves a host of activities, from product/service development, to marketing, to sales and service. At the foundation of all of these activities are legal considerations. Legal considerations for startup businesses range from establishing a form of business operation, to registering with the government and obtaining the appropriate licenses, to filing sales taxes, to the management of employees (hiring, contracts, etc.), and a host of other essential activities. To get your business off "on the right foot," this course introduces you to the legal considerations that are vitally important to your success.

EVM 3423 Intellectual Property Issues for Startup Businesses (1 Credit)
All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and — equally as important — your responsibilities for not infringing on the IP assets of other organizations.

EVM 3424 Visualizing & Presenting Data (1 Credit)
Being able to tell a compelling story, in particular with data, is a skill that is rarely taught. Today, most people either adopt reports that have existed in an organization for as long as time, or they create flashy reports using the latest tools. In most cases, neither of these reports give the end users what they want. This course will focus on giving you the tools to create purposeful reports by helping you answer the age old question around any design... Form, Fit and Function.

EVM 3425 Rapid Prototyping - 3D Printing and Laser Engraving (1 Credit)
The purpose of this course is to empower students to more effectively develop their creative and entrepreneurial capacities utilizing the tools of rapid prototyping. Students will identify appropriate rapid prototyping technologies to apply to unique situations. Curriculum over the course of the day progressively builds by presenting more challenging problems. At the conclusion of the course, students will be able to turn ideas into solutions that add value to a product, process, or service.

EVM 3426 Developing a WordPress Website (1 Credit)
What is WordPress? What is a CMS? Is it a concept or a nifty term? If you are starting a new business or thinking about starting a new business you need to understand the available technologies and tools to build and manage a website. Where do I host the website? How do I create and update the website? What tools are available? These are just a few questions we will answer in the WordPress Grind. The WordPress Grind has been designed from a beginner’s perspective. The goal is to provide a step-by-step tutorial for creating and publishing a WordPress website. The class will cover the conceptual framework of Open Source and Content Management Systems (CMS) and lead into the fundamentals and tools required to build and manage a WordPress website. At the conclusion of this grind, you will be able to develop, publish, and manage your own WordPress website.

EVM 3427 Retail, Distribution, and SCM (1 Credit)
If you have ever walked into a retail store or shopped online and wondered what it would take to create this for yourself, including setting up the store, purchasing inventory, setting prices and deciding the layout, or just wondered how this all came together to create a viable business then this Sprint is for you. If you are in the process of manufacturing a product or would like to know what goes into the supply chain to create and price your product then this Sprint is for you. If you want to learn what to consider when choosing a distribution method(s) and to get your product(s) to market then this Sprint is for you. The RSDM Sprint has been designed from a new entrepreneur’s perspective. The goal of this sprint is to understand the steps and process for marketing, pricing, and selling. It is for students that want to create a product or students developing a retail store that sells products manufactured by a third party or developed in-house. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.
EVM 3431 Emotionally Effective Leader (1 Credit)
Did you know emotional and social skills are four times more important than IQ when considering success and prestige in professional settings? Emotional Intelligence (EI) can be confusing. What does it mean? Is it fluffy stuff or something really tangible? Now more than ever, employers and clients are seeking leaders who display emotionally intelligent thinking, decision making and actions. How do you know if you meet those requirements? Up until recently, EI was a “gut assessment” of someone’s ability to control their emotions or care about someone or something. Now, we have a valid and reliable way of understanding our emotional intelligence and that of others. We can even measure the EI of teams! It turns out EI is quite complex. Research has distinguished 12 components of EI including: self regard, self actualization, self awareness, emotional expression, assertiveness, independence, interpersonal relationships, empathy, social responsibility, problem solving, reality testing, impulse control, flexibility, stress tolerance and optimism. Want to know how you score in these areas? EI is a “talent” that, unlike IQ, can be learned and improved throughout one’s life. In the Emotionally Effective Leader Grind, you will have the opportunity to assess your own EI through a valid and reliable EI talent assessment. Revealing your strengths and weaknesses, you will learn how to build your own EI and maximize the magnitude of your impact within the organizations or teams you lead.

EVM 3432 Getting to Know Your Customer (1 Credit)
Developing lasting relationships with customers requires time and energy up front. You need to get to know who your customers are and what they value before they will develop lasting relationships with your brand. This course on Getting to Know Your Customer will introduce students to tools and data sources that can help with segmenting and targeting, developing personas that represent different customer groups.

EVM 3433 The Sales Process for Entrepreneurs (1 Credit)
Sales is all about getting a person to make a purchase. Each business needs a unique step-by-step sales process that aligns with the buyer’s journey. We will discuss the key aspects of the top, middle and bottom of a sales process: We will learn the key metrics and activities, both human and digital for sales teams in today’s modern world. We will learn about lead generation, prospecting, lead nurturing, deal qualification, designing a sales process, sales pipeline, and forecasting, managing customer relationships, negotiating, converting leads to clients. As a self-employed entrepreneur or as an employee who works for someone else, an innovative outlook and entrepreneurial mindset is key to solving the problems our companies and society face now, and in the future. Innovators are everywhere and can add value from any role or department within their company, for example: c-suite leaders, facilities staff, IT administrators, and human resource trainers. Innovators share common traits: they see emerging opportunities where others see hopeless problems, they solve problems with creative ideas, and they evaluate ideas for their merits and shortcomings. This course is designed to teach the tools, strategies, and mindset of an innovator to help students ideate, evaluate, and innovate quickly. Students will collaborate using proven strategies and techniques to solve problems in new and unique ways. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

EVM 3435 How To Realistically Fund Your Business (1 Credit)
Essential to most new ventures is the ability to raise capital (“funding”), initially from angel investors and then from venture capitalists (VCs). The capital raising process usually starts with the “pitch”, a presentation that is compelling, exciting, informative, and addresses what funds are required by the venture, how they will be used, and how the investor will financially benefit from their investment. But not all new companies are the same and the ways to fund starting a new business, business idea or a good old-fashioned startup are many. In this class we will discuss the different funding sources from a check from a friend or family member to loans, credit cards, equity investment, crowd funding and more. This course will help you learn how to identify and determine the best source capital for your business. You will also learn how to present and speak about basic and intermediate funding sources. We will define & review the basic elements of business funding while also listening to the perspectives of several entrepreneurs (small & big) and even a Venture Capitalist. You will ultimately work in groups around a hypothetical business idea. Please feel free to use an existing idea (particularly if you were in my pitch class) or feel free to choose one from the list I have posted in Canvas. Throughout class you and your group members will have several working session moments to create and draft your capital plan for your business.

EVM 3436 High Performing Teams (1 Credit)
Success in any business venture is often predicated on the strength of collaboration in and between high performing teams. But teams also come with their own unique set of challenges that can often hinder group productivity and cause friction, such as interpersonal issues, ambiguous goals and objectives, and competing agendas. There are techniques that team and group leaders can use to alleviate those challenges in the current era of volatility, uncertainty, complexity, and ambiguity. The High Performing Teams class is for students who are eager to build their capacity to connect as leaders more effectively and learn to leverage psychological safety to create cultures of connection where risk-taking leads to team success. Together we’ll explore how you can implement the latest trends in remote and hybrid team management in a post-COVID era as well as how to incorporate the principles of diversity, equity and inclusion (DEI) to improve team performance and cohesion. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

EVM 3437 Design For The Digital Economy (1 Credit)
Essential to a successful business venture is the ability to design and create a a brand that resonates with customers. In this course, students will learn the brand design process, review the elements of both successful and unsuccessful brand campaigns, and will critique brand concepts to improve their aesthetic sensibilities. This course will help students learn to use the latest digital technologies to create a brand style guide, and for their final project, students will use the tools to develop a style guide for a new or existing business.
EVM 3438 How to Identify, Evaluate & Beat Your Competition (1 Credit)
Every business has competitors, from large corporations, "main street" businesses, start-ups... they all compete for customers and market-share. Even The University of Denver competes for students. Leave The Competition Behind is for people who like to win and don't like to lose. In this class, you will study strategic frameworks and tools that you can use to identify, understand, and dissect your competitors, the levers that you can pull to beat them (like price, quality, service). We will identify and discuss front-line tactics you can use to outwork your competition. We will explore and discuss real life cases and personal stories from various industries to illustrate the key concepts used by professionals in competitive analysis and strategy. You will apply these concepts during the breakout sessions where we will take on the Media & Entertainment industry.

EVM 3439 Social Entrepreneurship (1 Credit)
Social entrepreneurship is simply applying entrepreneurship principles to societal challenges. This can be for-profit, non-profit, social business, or even not an official organization at all. The consistency across all these is the desire to make society better. Finding a problem that gives you purpose is a challenge in itself, as you cannot simply think about it. You need to create a life that allows you the freedom to find this purpose, and then successfully devote yourself to this purpose. In addition, if your goal is to make society better, you want to avoid the trap of working on one problem while actively contributing to others. So the ideal social entrepreneur creates an organization and life that offers a net improvement to society. This involves learning to "socially" manage others, environmental impact, finances, etc. The Social Entrepreneurship course is for people that are eager to improve the world. We will incorporate concepts from finance, management, psychology, and even neurobiology. You will learn how to find the problem you wish to work on, and how to be more successful in addressing that problem.

EVM 3440 How to Effectively Negotiate in Business (1 Credit)
Every day, and sometimes multiple times a day, we persuade and negotiate with people such as funders, classmates, friends, family members, potential employers, merchants, and coworkers. However, most of us know little about what it takes to be effective negotiators. This class teaches you proven methods to support your desire to reach principle agreements by broadening your basic negotiation skills. We will learn theory-driven negotiation skills, engage in simulated negotiations, and make concrete plans to conduct a future negotiation. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

EVM 3441 How To Create A Business Startup Budget & Forecast (1 Credit)
For many people creating and evaluating business budgets and forecasts is intimidating. This applied course is designed to demystify the subject as students study, create, and evaluate budgets and forecasts. This course will provide students tools as they create an entrepreneurial budget and forecast. In addition, you will learn about metrics that entrepreneurs, investors, and banks use to evaluate these financial materials. Along the way we will consider budgets for different types of businesses, including B2B, B2C, products, subscriptions, and services. We will cover budget topics such as unit economics, breakeven, margin analysis, customer acquisition cost, and marketing efficiency plus forecast topics like burn rates, scaling, margin creep, and north star metrics. Plus, we will touch on the basics of valuation and how budget materials relate to valuation.

EVM 3442 How to effectively sell products on the Amazon Marketplace (1 Credit)
Amazon has become the de facto tool for selling Consumer Packaged Goods (CPG) online. If you’re not selling your product on Amazon, chances are that someone else is already doing it for you. Unlike real estate, Amazon squatters may have (and, retain) first-mover advantages in selling products and securing organic listing authority. Anyone planning to sell products for themselves or for an employer needs to understand the Amazon landscape. Amazon has become a ubiquitous metaverse for commerce. Everything known tangibly in bricks-and-mortar retail has a virtual analogue expected to move faster and cheaper, all while subject to the scrutiny of customer reviews. The Amazon eco-system includes an army of gig workers and service providers such as lawyers and marketing professionals, subject to the same constraints. Whether you wish to become a third-party seller on Amazon or plan to work for a CPG company, understanding the power of Amazon (and, related tools) has universal application. We plan to cover the risks of entering Amazon, the criteria to evaluate successful products, protecting your brand, organic and pay-per click strategies, third-party tools, and the broad market for trading in Amazon businesses. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

EVM 3443 The Marketing Mix "Converting Prospects Across the B2B and B2C Buyer’s Journey (1 Credit)
How do people who have never heard of a product or company become loyal customers? Marketing leaders use a variety of tactics—from social media, digital advertising, content, customer service, reviews, emails, events, and more—to convert prospective customers to loyal ones. Converting prospects across the buyer’s journey from awareness to consideration to purchase in a cost-effective manner is core to every B2B and B2C marketing campaign. During this Sprint we will learn the key elements of the marketing mix and the stages of the buyer’s journey they apply to. We’ll showcase common tactics and metrics used at each stage, and focus on the importance of using attribution data to improve the effectiveness of each conversion. We will also evaluate how marketing and sales leaders effectively partner across the buyer’s journey, learn how the marketing mix can vary across B2B and B2C organizations, and showcase organizations that have developed highly effective marketing mixes. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.
EVM 3444 Using Sustainability to Drive Innovation (1 Credit)
Want to learn how to make a difference in the world using Sustainability? This course is designed to give you the entrepreneurial skills to incorporate sustainability into a company’s products, services, and day to day operations. If you want to learn how to innovate and develop sustainability initiatives that make massive societal and environmental impacts while tackling current challenges like climate change, water scarcity, equity & inclusion, this course is for you. This course provides an essential overview of the challenges that our planet and society are facing and provides you the tools you’ll need to ignite your sustainable business vision and bring it to reality. If you have a passion for making a positive impact in the world and an entrepreneurial idea for a new business or a product or business solution within an existing company, come join us! Students will walk away with a working knowledge of sustainability issues and the tools to build sustainable programs into new and existing business ventures that address both a societal and market need. At the end of this sprint course, students should feel empowered with the ability to incorporate sustainable thinking into whatever their future careers hold – whether that be an entrepreneurial venture, the development of a new product, or helping businesses drive business value through sustainability. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross Listed with EVM 4444.

EVM 3700 Real Business Cases in Entrepreneurship (4 Credits)
The Real Business course is designed to provide students with an opportunity to examine entrepreneurial business challenges through case studies, guest speaker, discussions and field experience. In addition to standard entrepreneurial start-ups, the course will cover international start-ups, gender issues relating to start-ups as well as fostering an entrepreneurial spirit in large organizations. Throughout the course, entrepreneurship will be examined from the perspective of business challenge as well as career choice. Prerequisites: EVM 3351 and degree checkpoint 2.

EVM 3704 Topics in Innovation and Entrepreneurship (1-4 Credits)
This course is custom designed to address topics that are currently in demand, such as social entrepreneurship, financing the startup after the Wall Street greed bust, finding angel investors and venture capitalists in Colorado, preparing for a pitch to investors, moving beyond startup stage, and others. Prerequisites: EVM 3350 (minimum grade of C-).

EVM 3710 Innovation/Creativity-Business (4 Credits)
This course is about identifying and creating customer needs, looking for innovative ways to address these needs, and pursuing those approaches that appear to have real profit potential. There are exercises to address and stimulate creativity, discussion of organizations that are considered to be creative businesses, and critical evaluation of the hurdles they face and the techniques they use. The course also includes innovative approaches to organizational effectiveness. Cross listed with EVM 4710. Prerequisites: LGST 2000 and degree checkpoint 2.

EVM 3980 Entrepreneur Internship (0-4 Credits)
Initial for-credit entrepreneur internship experience for students pursuing a business major and/or entrepreneurship minor, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

EVM 3991 Independent Study (1-10 Credits)
Student devises and completes a special learning project under faculty supervision. Topic and outline must be approved by supervising instructor and department. Prerequisite: EVM 3351.

Faculty
Neil J. Pollard, Teaching Assistant Professor, MBA, Griffith University
John Sebesta, Professor of the Practice of Entrepreneurship, PhD, Southern Methodist University

Integrated Sciences

Integrated sciences is an interdisciplinary major designed for the student who desires general preparation for a career in an allied-health or science-related field, including physical therapy, occupational therapy, physician-assistant programs and nursing. In addition, students interested in teaching science at the primary, middle school or secondary level can benefit from the broad spectrum of courses available through the major.

Advising
The curriculum for the bachelor of arts in integrated sciences is tailored to the student in accordance with the requirements for the major listed below. Students usually work with a faculty advisor from the Department of Biological Sciences to design a curriculum that fits each student’s career aspirations. See the chair of biological sciences (p. 163) for advising.

Integrated Sciences

Bachelor of Arts Major Requirements
(183 credits required for the degree (p. 82))

A total of 60 credits in approved science disciplines is required; hence majors are not required to pursue a minor. Courses may be selected from the following departments: biological sciences, chemistry and biochemistry, computer science, engineering, geography and the environment, mathematics, and physics and astronomy. The 60 credits must be distributed in the following way: a minimum concentration of 20 credits each from two different departments (NOTE: departments with multiple subject codes are grouped together - for example: ENVI & GEOG or HLTH & BIOL) with a
minimum of 30 upper-division credits (2000 level or above). MATH 1951 is required. Integrated sciences majors are required to complete the general education requirements stipulated for science majors pursuing a BA.

Requirements for Distinction in the Major in Integrated Sciences

- Minimum 3.5 cumulative GPA
- At least three quarters of research (Undergraduate Research or Independent Study)
- Completion of a thesis

International Studies

We interact with the global community in a thousand different ways every day. We connect with friends near and far via computer and phone. We view updates on elections and currency crises, we track the spread of diseases and civil unrest, and we even follow the latest in music and dance from blogs and videos posted by people around the world. We do this using devices designed by international teams and built with materials and components from dozens of countries. We are part of a truly globalized planet.

The sheer volume and the speed of trans-border movement of people, products and data mean that no country or individual exists as an island isolated from international forces. Our interdependence is a fact of life. The challenges of the 21st century are great: from controlling weapons of mass destruction to minimizing the impacts of climate change, from managing borderless trade and investment to tackling entrenched poverty and food insecurity, modern issues require international cooperation and collective solutions.

The BA program in international studies offers undergraduate students at the University of Denver critical knowledge and skills for succeeding in a world that has gone global. Understanding how global institutions and exchanges work, and bringing an international perspective to one’s professional development is a necessity for modern life. DU’s International Studies curriculum gives students this foundation. Join us to learn about international events that directly affect your life.

Students are required to complete a minimum of 44 credits in international studies to fulfill the major requirements. Students must also choose a specialization within the broad field of international studies. Specialization areas include global political economy and international politics; international development and health; and international organizations, security, and human rights. In addition, students are required to complete an approved study abroad program, as well as attain intermediate proficiency in at least one foreign language. Students should verify detailed requirements with the department.

Graduate Degree Options for Undergraduate International Studies majors

Whether you are following a traditional four-year plan or are moving through your undergraduate degree at an accelerated pace, we offer two pathways for qualified international studies majors to earn a master of arts degree at the Josef Korbel School of International Studies (via the Dual Degree BA/MA Program in INTS (http://www.du.edu/korbel/programs/dual.html) or the Priority MA Admission (http://www.du.edu/korbel/admission/priority.html) option). Prospective students must be in touch with their advisor early on for planning purposes and must meet normal standards of graduate admission at the time of application. For specific requirements, please contact the BA program in international studies.

Additional Requirements

Foreign Language Proficiency Requirement

International Studies majors are required to demonstrate intermediate level proficiency in at least one foreign language. This is not necessarily a credit-bearing requirement. Any coursework taken to satisfy the international studies foreign language proficiency requirement will be in addition to the 44 minimum credit hours required for the major.

Study Abroad Requirement

Students are required to complete an approved study abroad program. Coursework must be pre-approved by the department prior to the start of the study abroad program.

Secondary Major

44 credits. Same requirements as for BA degree.

Minor Requirements

20 minimum credits:

Requirements for Distinction in the Major in International Studies

- Minimum 3.5 cumulative GPA (at the time of application and graduation);
- Minimum 3.7 major GPA (at the time of application and graduation);
- Prerequisites: successful completion of all INTS core courses (i.e. INTS 1500, INTS 1700, and INTS 2975), and at least two, 3000 level INTS courses;
- Submission of Departmental Distinction application, by November 01 of junior year. Applications will be reviewed by the BA Program Committee in INTS and, if accepted, students will be notified prior to the registration period for Spring Quarter of their junior year. The application form is available on our BA Program Portfolio Community site (https://portfolio.du.edu/baints/), under the "Distinction Program" tab. Failure to apply on time will invalidate a student's eligibility to participate in the program. (Note: If a student plans to study abroad during spring quarter of junior year, they must submit their application by November 1st of sophomore year to remain eligible for Departmental Distinction.)

Students accepted to the Departmental Distinction Program must successfully complete the following curriculum in a satisfactory manner in order to achieve distinction in INTS:

- INTS 3000 Research Methods & Design (4 credit hours) - Spring Quarter of junior year. (Spring quarter of sophomore year if student is planning to study abroad spring quarter of junior year)
- INTS 3990 Thesis (4 credit hours) - Fall or Winter Quarter of senior year.

International Studies

INTS 1500 and INTS 1700 are approved as SI-Society courses. Students majoring or minoring in INTS are allowed to count one of these courses toward the SI-Society requirements in addition to it being counted toward the major.
This course seeks to answer an overarching question that plagues development studies: why are some countries poor while other countries are rich? Furthermore, we ask why poverty is persistent around the world, and how the economic, political, and social structures of a society can improve conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development became the focus in the decade following the end of the Cold War. The course covers the major documents promoting theories of development, as conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development in the 20th century.

INTS 1500 Contemporary Issues in the Global Economy (4 Credits)
Introduction to a range of pressing problems and debates in today’s global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy.

INTS 1700 Introduction to International Politics (4 Credits)
This course critically examines the nature of contemporary global society. It is designed to familiarize students with the broad parameters of international politics and takes into account numerous methodological and theoretical perspectives. The course explores both the historical development of international politics and how the business of international politics is “done.” The course examines issues such as war and peace, human security, the politics of climate change, and international human rights. The overall goal of this course is to introduce students to the field of International Politics and to make them conversant about the major issues facing the global system in the 21st century.

INTS 1988 Study Abroad Resident Credit (0-18 Credits)
INTS 2160 Labor in the Global Political Economy (4 Credits)
This course explores and examines the role of labor in different parts of the global economy. According to world systems theory (Wallerstein et al.), there is a global division of labor into three zones: (1) core (essentially the wealthier, high-tech, highly industrialized economies), (2) periphery (generally, but not always those that provide basic food stuffs and unprocessed raw materials to the richer countries), and (3) what is referred to the ‘semi-periphery’ (countries that have elements of both the core and the periphery, which tend to be ‘in the middle’ economically, so to speak). In each of these three zones of the global economy, labor tends to function in quite different ways in terms of wages and working conditions, technical pre-conditions (education of the work force), etc. In a similar light, many manufactured products today are not made in one place, but are the products of this global division of labor. Often one part of the manufacturing process begins in one zone, but the refining and final manufacture takes place somewhere else - making the process truly global. The global division of labor is made possible by increasingly cheap transportation costs and cheap sources of energy. Consequently, the course examines the processes of the global division of labor, how it seems to influence global production and its fundamental dynamism (but also instability), as production moves from one part of the world to another.

INTS 2180 Politics of Development (4 Credits)
This course seeks to answer an overarching question that plagues development studies: why are some countries poor while other countries are rich? Furthermore, we ask why poverty is persistent around the world, and how the economic, political, and social structures of a society can improve conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development became the focus in the decade following the end of the Cold War. The course covers the major documents promoting theories of development, as well as looks at the historical record of the implementation of development policies (noting the divergence between theory and practice). We consider specific case studies in the process of asking why some countries are poor and others are rich. Furthermore, we are concerned with the role of country policies and implementation practices, with the impact of international organizations (multilateral development organizations), and the influence of bilateral foreign aid, on development progress or decline within countries.
INTS 2181 Culture and Identity in World Politics (4 Credits)
How can a cartoon represent both humor and disdain? How can it become a symbol for freedom of speech and a trigger for violence? As events in recent years in Paris, Ukraine, Guinea and the US show, the symbolic importance attached to actions and artifacts vary and trigger different responses. This course will examine how culture and identity influence the perception of world issues and reactions to them. We will look at the construction of meaning and its impact on priorities and political action. We will also explore power dynamics and political voice.

INTS 2235 Gender and International Relations (4 Credits)
The study of gender and international relations (IR) is multi-faceted and complex. Both in theory and in practice, gender inheres in all aspects of IR – from globalization, to development, to security and human rights. Conversely, the ideas and processes that comprise the international political realm directly impact the everyday lives of women and men all over the world. What is it like to be a woman in post-Taliban Afghanistan? Why is homosexuality taboo in Iran, but not in many other parts of the world? Did Soviet communism really promote gender equality? These are only a few of the questions that are addressed over the ten weeks of the course. After an introductory discussion of the broad implications of gender for international political issues and vice-versa, we embark upon a quest to unravel the ways in which gender identities and sexualities come to be defined and practiced in different times and places, while simultaneously considering how these same identities constitute the contexts in which they are situated. At each stop along the way, we will endeavor to discover the mechanisms through which gender and sexuality are constructed, and reflect critically upon what these diverse constructions mean for the lived realities of men and women in different parts of the world.

INTS 2370 Globalization and the Knowledge Economy (4 Credits)
Much has been made of a new “knowledge economy” in which human capital has ascended to prominence over the traditional components of capital and labor. Further, the concept of “economic globalization” captures the realities of increasing interactions but exaggerates the notion of a single world economy connecting all producers, distributors, and consumers. In this class we examine the meaningful yet variable processes of increased knowledge diffusion and economic interaction to identify clusters of innovation, indicative of the knowledge economy. We then assess the applicability of globalization on a sector/industry basis to identify ongoing transformations and future implications for knowledge development.

INTS 2380 Comparative Development Strategies (4 Credits)
Why do people in some countries have so much, while people in other countries lack basic necessities? This course explores the field of development economics, exploring the challenges improving quality of life in poor countries. We look at national-level indicators and explore theories of aggregate economic growth. But we also zoom in on particularly pernicious challenges, including health, education, the environment, agricultural transitions, demographic shifts, and human mobility. Students are invited to act as development practitioners themselves, developing skills in data analysis as well as grant writing.

INTS 2430 History of the Middle East (4 Credits)
This course treats the emergence of the modern Middle East in the modern period, roughly from the late 18th century to the present and examines the following topics: reformist attempts to meet the European challenge; the age of colonialism; the rise of nationalism; development strategies of socialism and capitalism; the impact of Israeli and Palestinian nationalism; the petroleum factor; the Islamic revolution in Iran; Saddam Hussein's Iraq; the Gulf War and the war on terror.

INTS 2468 Resolving Conflict by Negotiation (4 Credits)
Social conflict is a national and global issue often expressed in violent ways culminating in shootings, civil war, and international terrorism. It is easier to escalate conflict than diffuse it, and easier to fight rather than negotiate, situations that often lead to frustration and insecurity for disputants. This course examines approaches and mechanisms of conflict resolution within the context of personal, cultural, and political barriers to understand why parties continue to fight or manage to solve their differences through settlement and reconciliation, and teaches techniques of conflict resolution, essential skills for progress and prosperity in the modern world.

INTS 2470 Crime & International Politics (4 Credits)
What constitutes a crime in one location may constitute a personal right, a survival strategy or legitimate business opportunity in another. So how then does one address criminality in a global society? This course explores the roots of transnational crime and both domestic and international response to criminal networks. Topics include corruption, the drug trade, and human trafficking.

INTS 2490 Introduction to Global Health (4 Credits)
This class is an introduction to the field of global health and explores relationships between social, political, cultural, and economic conditions of mostly low and middle-income countries and their impact on health and health services. We will spend some time covering health issues in high-income countries as well. A major focus of the course is the evolution of primary health care and alternative strategies in global health. Topics addressed include: maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies, and funding sources. The course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to global health challenges.

INTS 2605 Nuclear Weapons in International Security (4 Credits)
What role do nuclear weapons play in international politics? Why do states develop nuclear weapons? How are these weapons used in different crises? This course is an introduction to different themes in nuclear politics. The course will introduce students to the history of nuclear weapons, theories of nuclear deterrence, crises, non-proliferation, and disarmament. We will examine the nuclear weapons choices of different states, including those who have developed nuclear weapons, and those which have chosen to give them up. We will also assess if the international nuclear non-proliferation regime has been successful in attempting to spread nuclear weapons. The course will train students to pay attention to theoretical debates on nuclear weapons and how they speak to policy considerations and assess these arguments using historical empirical evidence. The course will also use these tools to assess current nuclear challenges with regard to U.S.-China competition, and the different crises involving North Korea, Iran, Russia, India, and Pakistan.
INTS 2700 Topics in Int'l Studies (4 Credits)
INTS 2701 Topics in Int'l Studies (4 Credits)
INTS 2702 Topics in Int'l Studies (4 Credits)
INTS 2703 Topics in Int'l Studies (4 Credits)
INTS 2704 Topics in Int'l Studies (4 Credits)
INTS 2708 Contemporary US Foreign Policy (4 Credits)
When the United States first won its independence, its leaders sought to avoid at all costs the countless problems awaiting any country engaging in foreign affairs. Indeed, John Quincy Adams, in 1821, warned the United States of the dangers of "going abroad in search of monsters to destroy." In September of 2002, however, as American forces occupied one country and prepared to invade another, the Bush Administration released its National Security Strategy of the United States, which states: "To contend with uncertainty and to meet the many challenges we face, the United States will require bases and stations within and beyond Western Europe and Northeast Asia, as well as temporary access arrangements for long-distance deployment of U.S. forces." How did we go from isolation to empire? In this course, we will attempt to answer this question by exploring the progression of American foreign policy from its emergence out of isolation to its current stage of interventionist superpower. We will also identify and discuss key issues that are driving America's conduct abroad as well as evaluate the strengths and weaknesses of the given policies addressing these important issues. By the end of the class, students should have a solid knowledge of the major themes and developments in the history of American foreign policy as well as the ability to reflect critically upon on-going foreign policy debates.

INTS 2715 Introduction to Comparative Politics (4 Credits)
This course offers an introduction to the comparative study of political systems throughout the world. In the years following World War II, social scientists traveled extensively to newly decolonized regions of the world to examine societies there. Many found conditions so distinct from those of the western world that they warranted new models of political development. The distinguishing of development patterns in remote regions from those of western nations became the origin of modern comparative politics. The course considers both the impact of internal and external variables on political development. Internal or "domestic" variables include ideology, geography, economics and culture, while external variables include "globalization" and international conflict. Class includes understanding and critique of models of political development including classical liberal, authoritarian, communist, post-communist, "late" development, and social democratic models. It also includes discussion of possible new models in light of globalization and other factors.

INTS 2760 Epidemics, Pandemics, and Panic (4 Credits)
Sickness has terrorized humankind for centuries. Be it the Black Death, HIV/AIDS, Ebola, or the flu, diseases sweep through society leaving death and destruction in their wake. At times, it is the the microbes that cause the greatest amount of suffering. Smallpox, for example, is believed to have killed 200-300 million people in the 20th century alone. But at other times, it is the people, who respond with ignorance and fear, that exacerbated the situation and inflicted untold pain. Public policies which punished the poor for their poverty resulted in a million plus deaths during the Irish Potato Famine is one such example. Likewise, community responses couched in fear and victim blaming left tens of thousands to die from HIV/AIDS before serious public efforts to attack the disease began. Although illness brings out the worst in humanity, it also brings out its best. It was the pain and suffering from smallpox that led to the creation of the vaccine, a tool that saved millions of lives. It was belief in the benefits of a smallpox-free world that led mortal enemies to work together during the Cold War to eradicate this threat. This course will examine threats to the health of people around the world, it will look at the scientific tools available to protect our health, and will explore how both biological and social factors contribute to successes and failures of such efforts. This course is designed for those who do not have any background in public health, biology, or in public policy but are fascinated by how global society shapes and is shaped by the most humble or living things—microscopic organisms. Throughout the class, you will learn the basics about biological factors that influence the spread of disease, and learn about medical and social tools we have to control the same. We will examine public and policy response to ancient and modern plagues. Case studies include Black Death, Smallpox, influenza, HIV/AIDS, famine, and emerging biological threats.

INTS 2780 Global Corporate Responsibility and Accountability (4 Credits)
The course explores the role of corporate responsibility and accountability in a global context. Neoliberal globalization characterized by free trade has greatly expanded the role of global corporations in most countries. The practices and behavior of corporations are determining the quality of life for people throughout the globe. Yet there are few rules and laws that govern corporations on a global scale. While a corporation may exhibit social and environmental responsibility and respect human rights in one country, it may be a different matter altogether in the Global South where there are fewer restrictions on corporate behavior. Transnational corporations increasingly recognize that engaging in good practices to improve lives and communities extends beyond ethical and moral considerations. In many cases, corporations have been forced to change practices due to actions by civil society and governments. These actions have meant that corporations must consider monetary and reputational risks when considering the effects of their operations. These risks are increasingly built into business models to reduce expected and unexpected costs of community resistance and civil unrest. This has resulted in the "business case for global corporate responsibility." Against this backdrop are charges by NGOs and labor unions of corporations engaging in "greenwashing" and "blue-washing." The course seeks to expose students to various forms of corporate responsibility and accountability together with several global governance systems. The course will be useful to those students who are concerned about the ethics of global corporate investment and may want to work inside a transnational company. The course will also appeal to those who want to affect change through government or civil society organizations. It will also be advantageous to those interested in pursuing further study in this area. Finally, third party social auditing of transnational corporations is expanding, and the course provides some insights on work in this area.
INTS 2790 Ethics and International Affairs (4 Credits)
This course examines the following: social science and ethics, power-rivalry and capitalism versus human rights and democracy, the dimensions of poverty, what role the World Bank plays, the laws of the people, the two classes of human rights, national interest, and tolerance. At the end of this course, 1) students will have listened to the voices of indigenous, Black, and Latin women describing the oppression their communities have faced, 2) thought deeply about the “solidarity-dividend” (Heather McGhee) available to all including white folks in college education, health care, and every aspect of economic and social wellbeing, 3) have an understanding of the role of settler colonialism and colonialism in the initial emergence and reemergence of fascism, and 4) understood the characteristic features, from Nazism to Putin to today in America, of the anti-democratic and inhuman Right.

INTS 2975 Global Issues Research Practicum (4 Credits)
This is the third and final required course for all international studies majors. In the first two introductory classes, you acquired knowledge about international politics and the global economy. In this class, we investigate where that knowledge came from. How do researchers learn things about the political world? And how can you do this kind of research yourself? Students will learn about different types of international studies research, and will practice collecting and evaluating evidence from interviews, surveys, the written record, and quantitative sources. You will learn to ask a compelling research question, critically evaluate existing research on your subject, and find evidence that will help you answer your question. Your final project will be to design a research project that you could feasibly conduct in a future quarter. Prerequisites: INTS 1500 and INTS 1700.

INTS 2988 Study Abroad Resident Credit (0-18 Credits)

INTS 3000 Research Methods & Design (4 Credits)
This course is designed for advanced International Studies majors, including Department Distinction, that intend to write a thesis in INTS. It introduces students to the fundamental elements of social science research and will serve as a workshop to complete a literature review and write a research proposal. The basis of any scientific investigation is the research proposal in which you formulate a question and design a process by which you will explore that question through a systematic collection and analysis of evidence. The design process is the same whether you are writing a short class research paper, or are conducting a major research project, such as a thesis. The manner in which evidence is gathered and analyzed, however, will vary based upon the research question, research goals, and resources. We will therefore go through the process of research design. Because international studies provides multiple methods of inquiry, we will also explore quantitative and qualitative methods that may be used to gather and analyze evidence. Prerequisites: INTS 1500 and INTS 1700. Must be an INTS major and receive departmental permission.

INTS 3002 International Trade and Development (4 Credits)
This course introduces students to the politics and economics of international trade. Special attention is paid to the relationship between international trade and economic development and to the experiences of developing countries in the international trading system. Alternative perspectives are introduced and applied, both historically and to a selection of contemporary issues that affect developing countries.

INTS 3003 Politics of Germany (4 Credits)
Through this course we begin to engage and understand Germany’s past, present, and future developments in defining identity and how identity influences internal and external politics. We conduct the course in the politically-charged eastern German regions of Berlin and Saxony where both historic and current events carry additional relevance, including the rise and fall of fascism, post-Cold War divisions, the hope and realities of reunification, and ongoing debates concerning national identity.

INTS 3009 Culture and Politics in Japan (4 Credits)
The main aim of this course is to understand how the political culture of Japan has impacted both its domestic and foreign policy. The course analyses the Japanese political culture within its historical context, highlighting the question of how the culture of Japan interacted with other dynamics (such as history, economy, social and political forces) to shape modern Japanese politics both at home and abroad. Social and political actors such as conservative political parties, the bureaucracy, and the business community are closely analyzed. Special attention is given to study how Japan was caught between different geostrategic-cultural orientations such as “Westernism” and “Asianism” and the impact of these factors on Japan’s postwar foreign relations. In this context, the course is looking to see how the defeat in WWII has impacted both the political culture and foreign policy in Japan. Through this summer visit to Japan (Tokyo and Hiroshima), students will meet scholars of Japanese political science and public administration, diplomats, members of political parties, NGOs, and the business community. Moreover, visits to historical sites, Hiroshima Peace Memorial Museum (Hiroshima), the Diet (the Japanese parliament), and both modern and historical cities in greater Tokyo area are also planned to get primary data for better understanding Japanese politics and culture.

INTS 3013 Corruption – A Global Epidemic (4 Credits)
Corruption is a ubiquitous phenomenon in all political systems, whether democratic or authoritarian - from illegal campaign contributions and lobbying tactics in America, to vote buying and hijacking elections in Africa, from rigging official government-issued macroeconomic reports in Europe, to securing safe havens for drug, arms, and human trafficking in Latin America and Asia. This class explores corruption from a comparative and international perspective and raises questions such as: What is corruption and how is it measured? What are its causes and effects? Do they vary across countries or regions in the world? When and how does it impede economic opportunity and can it actually lead to efficiency gains? Through what mechanisms does it erode political legitimacy and democratic institutions? What are the “human” costs of corruption? In asking these questions, the course features a number of documentaries and tries to evaluate how conditions for and outcomes of corrupt behavior are similar and different across Europe, North America, Africa, Asia, and Latin America. In addition to the issues related to corruption, the class will also offer a critical review of the contemporary recommendations for “fixing” the problem. Prerequisites: INTS 1500 and INTS 1700.
INTS 3014 Illicit Markets (4 Credits)
This course explores the relation between illicit networks, security and the state in the global economy. We study the links between what is considered formal and informal, and legal and illegal, in order to examine what official views obscure in everyday relations of transnational activities. The material largely examines illegal practices from the ground up from the perspectives of everyday civilians, communities, and those involved in extra-legal activities. We begin with a critical examination of the categories of "illegal," "illicit," "the state," and "corruption." We reveal these categories as cultural and political constructs rather than as pre-existing neutral categories of analysis. Some questions we ask are: Who applies these definitions? How have they changed and what interests do they serve? Are distinctions between "illegal" and "illicit" useful, or do they obscure the power of the state to determine legitimacy? Are some activities inherently illegal? Moreover, we explore the impacts of state security and militarization efforts on extra-legal networks and experiences of insecurity. Prerequisites: INTS 1500 and INTS 1700.

INTS 3016 Global Governance (4 Credits)
The term "global governance" is often associated with the deepening of globalization. Many parts of what we see as global governance, though, from international law to international organizations to international regimes to international norms have longer histories. The architecture of global governance has often been assumed to be nation states organized into international organizations but in the last 30 years we have witnessed an increasing range of different actors and forms. In this course, we will examine these various actors and forms and how they interact in the governance of three issues areas: climate change, business/security/human rights, and cyber. Prerequisites: INTS 1500 and INTS 1700.

INTS 3017 The Revolutions of Black, Brown, and Indigenous Peoples: Violence and Nonviolence (4 Credits)
This course focuses on revolutions of black, brown and indigenous people in the Americas, ones historically forgotten in academia, as well as the issue of violence and nonviolence in the Chinese, Indian, Tibetan and South African revolutionary movements. It will set this glaring omission and rich discussion in the context of the eugenics which marked the study of international relations and sociology, including of revolutions, in the United States in the 1920 and 1930s and whose influence continues until now. We will begin from Robert Vitalis' surprising White World Order, Black Power which underlines the central role of W.E.B. Dubois in challenging these racist disciplines. We will also read Aldon Morris' The Scholar Denied on Dubois' founding of an anti-racist American sociology and how, for political reasons, this came to be denied by the famous, egregiously racist "Chicago" school of Robert Park. We will begin from the great struggles -- black soldiers on both sides in the American Revolution and how black Patriots played the decisive role on the American side, benefiting all revolutionaries (Gilbert, Black Patriots and Loyalists), the great insurrection of people who were enslaved which made Haiti (CLR James, Black Jacobins and Elizabeth Fick, The Making of Haiti), #and the role of pardo (blacks) and indigenous people in Venezuela (Robin Blackburn, The Overthrow of Colonial Slavery) -- in the New World. We will trace the role of those who were enslaved in forging many great revolutions -- each of which is vital to creating a free society for all - which have been hidden academically and historically, by a kind of amnesia. We will then explore the debates about violence and nonviolence central in mass uprisings against colonial racism and domination in China, Tibet, India, and South Africa. We will consider explanations of why such major revolutionary movements have been long "forgotten" in academic study and ask what new light these revolutions cast on the standard trajectory of European revolutions. At the end of the 19th century, W.E.B. Dubois, for example, refers to the "color line" in projecting twentieth century movements. In academia, the past is often interpreted in a "too European" and, unselfconsciously, "White" (often "forgetting" colonialist and racist crimes...; hostile to ordinary white folks) idiom. In addition, we will discuss the revolution from below in China - rarely considered with dispassion or even sympathetically, though Theda Skocpol and William Hinton do - as well as the oppression/ethnic cleansing of minorities in China, particularly in Tibet. We will thus contrast some strengths and weaknesses of regimes emerging from violent revolutions in the Americas, Haiti, and China, and look at attempts to forge mass nonviolent revolutions and learn from/modify Gandhi in India, Tibet and South Africa. We will also compare movements of indigenous people in the Americas, Palestinians, and Tibetans against settler colonialism. Finally, we will ask to what extent the nonviolent transition to a new regime actually limits future oppression and violence in India and South Africa. Prerequisites: INTS 1500 and INTS 1700.

INTS 3020 Introduction to Middle East and Islamic Politics (4 Credits)
The contemporary politics of the Middle East cannot be understood without some debate of the West's relationship with the region and the associated view of the Orient that grew out of this relationship. In light of this reality, the state system that has emerged in the region since the demise of colonialism forms a suitable framework in which to understand the major themes of this course. The first major theme to be discussed is the impact of colonialism on the region, particularly in the latter half of the nineteenth century and first half of the twentieth century. In this section of the course we explore the nature of political rule and government and the prevailing economic motive behind this imperial and colonial relationship. The second theme of this course explores political ideologies, both secular and religious. A historical overview of this development will be explored in the context of current theories of nationalism posited by authors such as Benedict Anderson, Eric Hobsbawm and Ernest Gellner. The final section of this course briefly explores the theme of democratization and its discontents in the Middle East. The focus is on recent debates about democratization that have been promoted from outside the region as a means of combating tyranny within the region, particularly the perceived anti-democratic nature of political Islam. Prerequisites: INTS 1500 and INTS 1700.

INTS 3021 Introduction to Islam and Politics (4 Credits)
Since the eruption of the 'Islamic Revolution' in Iran in 1979, 'political Islam' has influenced both public and academic debates. Though often accused of being 'anti-democratic' forces, Islamic political actors have dominated electoral politics in the Middle East and have spread politically elsewhere in world politics. The Islamic Salvation Front "ISF" in Algeria, the Justice and Development Party "AKP" in Turkey, the Islamist Hamas in Palestine, Nahda in Tunisia, and Muslim Brothers in Egypt have all defeated their secular opponents in democratic elections in the last three decades and many of them were ousted by military interventions. What is political Islam about? Is it harmonious with democracy? What are its intellectual, social, and historical roots? How do Muslims behave when in power and opposition and why? These are some of the pivotal questions to be addressed in this course. Prerequisites: INTS 1500 and INTS 1700.
INTS 3025 Current Issues in Human Security (4 Credits)
This course surveys the various debates, concepts, and issues clustered around human security. Human security is a relatively new concept that challenges the traditional, state-centric approach of "national" security. A more inclusive term, human security includes economic, environmental, and social concerns such as poverty, climate change, crime, and disease in addition to the traditional focus on conflict and political violence. This course will explore the development of human security as a term, focusing particularly on the emergence of human security as a category of global governance. It will also investigate a range of issues that challenge human security. Students will engage with these issues through assigned readings, class discussion, policy assessment, and in-depth case studies. Prerequisites: INTS 1500 and INTS 1700.

INTS 3030 Sports and International Politics (4 Credits)
This advanced undergraduate course in international studies explores the complex connections between sports and international politics in the past and present and sport’s relationships to international peace, both historically and in contemporary times. At the heart of this contribution is the need to examine sport as an international issue, to explore its relationship to the protection and advancement of human rights (to include gender equality and the rights of those with disabilities), and to critically examine the role of sport in fostering community-level social cohesion and inclusive national unity. Participants in the course will gain a critical knowledge of the origins, background, and issues in global sport, especially the Olympic Games, and a critical awareness of the potential opportunities and obstacles for sport in social development. Learning outcomes are attained through faculty presentations, guided discussions, and student-led research. The course is designed as a research colloquium in which participants develop and share a research dossier on course topics with a capstone seminar to integrate learning and share findings on historical and contemporary issues at the intersection of sport, power, profit, and peace.

INTS 3040 Technology and Development (4 Credits)
From the classic works of Adam Smith and Karl Marx to contemporary analyses by noted development economists Jeffrey Sachs and William Easterly, the role of technology in fostering economic growth and wider well being is firmly established. As the application of embodied knowledge, technology enables increased productivity, as well as new capabilities, goods, and services. While the role of technology in promoting human advancement is well established, the specific processes required for the effective development and use of technologies is less understood. Further, technological development varies considerably between developed and developing contexts with persistent inequalities hindering basic needs for billions.

INTS 3111 Migration and Development (4 Credits)
This course will discuss the multifaceted relationships between human migration and development. We will explore both the ways that development influences migration and the ways that migration, in turn, shapes development. While the course will be global in scope, we will pay particular attention to the way that these global processes impact communities locally, applying our classroom learning to economic and social development challenges faced by immigrants and refugees in the Denver area. The course will focus on how human mobility (and immobility) affects prospects for economic and social development on three levels: the development of (a) the communities and countries people leave, (b) migrants themselves, and (c) the communities and countries that people enter. We will also consider modern barriers to mobility and the economic and ethical implications of modern migration management regimes. Students will be actively involved in their learning through group projects, debates, and reflective writing. Prerequisites: INTS 1500 and INTS 1700.

INTS 3121 Women, War, and Peace (4 Credits)
Conflict is gendered: it both shapes and is shaped by the gendered roles people play in society. Traditionally, men fight while women play supportive roles, men are perpetrators of violence while women are victims of this violence. However, this simple story is not only inaccurate, it limits our capacity to identify and analyze the full range of activities that men and women pursue during conflict. This story encourages us to valorize the warrior man and condemn men as cowards who will not take up arms. This story encourages us to expect women to be the victim and to ignore or treat as aberrant women who are perpetrators of violence themselves. This story also ignores the reality that the male/female dichotomy does not represent the full continuum of gender expression. The processes of peace-building are similarly gendered as it is elites who sit down to discuss the cessation of violence and design peace agreements and these are nearly always men who fight. Post-conflict environments are structured by peace agreements. When agreements are written by particular men, institutions and social structures tend to maintain the same kinds of gender bias that existed during conflict. This class will explore a range of issues guided by the question: how are conflict and post-conflict processes gendered? The focus will be primarily on women but in understanding the constraints of social structure on women, we also better understand the constraints on men and the implications for people who challenge these categories. This class focuses on the gender elements of these processes through a range of mostly recent cases.

INTS 3127 The Rise and Fall of Great Powers (4 Credits)
This course provides the student with a fundamental understanding of the great powers that have shaped our world. The course delves into historical events and personalities and serves as a basis for the student to recognize and analyze analogous factors and personalities in our modern world. Class time consists of a series of lectures and discussions about assigned books, articles and film, designed to help students understand events and figures that continue influenced our lives. It also will provide the student with valuable tools to more accurately assess prospects for the future of major global powers.

INTS 3130 International Relations Theory (4 Credits)
This course examines the important classical, behavioral, and post-behavioral theories of international relations, and the nature of theory in international relations. Topics include the role normative theory; levels of analysis, structure-agent relationships, and concepts of foreign policy behavior and decision making; utopian/neoliberal and realist/neorealism theory, and democratic peace theory; theories of power and its management; theories of integration, cooperation, conflict, war, and geopolitical and ecological/environmental relationships; constructivism; systems theory; regime analysis; the relationship between theory and the international system in the early 21st century; traditional and contemporary paradigms of the international system. Prerequisites: INTS 1500 and INTS 1700.
INTS 3205 Comparative Politics of the Middle East (4 Credits)
In this course, we will study the political systems of the contemporary Middle East, with particular attention to dynamics of stability and change. The course introduces students to contemporary Middle Eastern politics. The goal is to provide students with historical background and theoretical tools to answer the following core questions: (i) why there are no Arab Democracies? (ii) What accounts for the rise and fall of popular uprisings in the Arab world since 2010? (iii) What accounts for the region’s current economic hardships? (vi) Would the adoption of Western-style political institutions improve governance and stability in the region? We will evaluate possible answers to these questions by scrutinizing the logic of theories, identifying their implications, and assessing them with available data. All of these questions will be examined in the context of the ongoing Arab uprisings.

INTS 3210 Political Violence and its End (4 Credits)
This course centers on the nature, character, strategies and termination of the range of forms political violence – violence used to achieve political ends be it by states, the international community, or non-state actors – takes in the early 21st century. After a general discussion of the lexicon of security, force, war, and war termination, each of the five forms of political violence are explored beginning with a discussion of the fundamentals, an exploration of the current context and character of the form centering on a leading book on the subject, and then a discussion of counter-strategies and broader political/societal considerations. The course ends with a similar three part discussion of the political/military realities and necessities of violence termination. Prerequisites: INTS 1500 and INTS 1700.

INTS 3212 Civilian Protection in Armed Conflicts (4 Credits)
There are many courses on security topics. Civil wars, terrorism, violence, genocide, peacekeeping and peacebuilding, humanitarian intervention, human security...the list goes on. This course is different. This course is about the protection of civilians in wartime. Civilian protection is one of the great challenges of our time. The means of violence have been distributed and small groups of people are able to inflict harm as never before in human history. Yet there are also emerging and cutting-edge procedures and technologies available to the “protectors.” Civilian protection is a new perspective on security that differs from existing treatments of this topic. We will begin the course with an overview of theories of violence and legal and ethical frameworks governing the use of force. We will consider issues such as what it means to be a civilian, and what normative and strategic considerations motivate decision-makers to take protective actions. The rest of the course is organized by the different actors that might provide protection. We will consider (theoretically and empirically) how various actors through society, from state actors, to international organizations, to illegal armed actors, to NGOs, to civilians and their communities—the would-be victims of violence—can either promote or restrain the use of violence. We will also consider the conditions under which the protection of civilians is most feasible as well as research methods for analyzing populations and their protection strategies. In their final projects, students will analyze the threats of violence faced by a particular population and design appropriate protection strategies and policies to deal with them. Prerequisites: INTS 1500 and INTS 1700.

INTS 3215 Major Issues in International Security (4 Credits)
This course begins (in Part I) by considering the threat that created the field of “security studies” following the second World War: the origins and evolution of the nuclear danger. Part I ends with an assessment of the most dangerous manifestation of that threat in several decades: North Korea’s acquisition of nuclear weapons and long-range missiles. We turn next to addressing (in Part II) a question that seemed answered since the dawn of the nuclear age, when the United States moved from its defeat of Fascism in World War II to the containment of communism in the Cold War, to expanding the zone of free market democracies during the post-Cold War era: What does the United States seek to secure? Even if all could agree on the nature of particular security threats and the fundamental goals of security policy (as occurred for the United States after the attack on Pearl Harbor), enormous challenges confront the formation and implementation of national security strategy and policy. Part III of the course will identify and evaluate those challenges, using the 2003 decision to invade Iraq as a case study of the enduring problems that confront national security policy-making. We finally turn (in Part IV) to analyzing a series of current issues, including the threat posed by violent Islamist organizations, the consequences of U.S. disengagement in the Middle East, the impact of changing technology on the international security environment, (drones, surveillance, cyberwar, hybrid warfare), and the risk of conflict between the United States and two other major powers: Russia, and China. Prerequisites: INTS 1500 and INTS 1700.

INTS 3218 Intelligence Analysis and the U.S. Policymaking Process (4 Credits)
This course will provide an overview of the intelligence collection and analysis cycles, as well as the national security policymaking process. It will examine case studies in which both the perceptions and biases of analysts or policymakers resulted in intelligence failures, and discuss ways to avoid those misperceptions and counter biases. The course will conclude with a short simulation in which students will each play a member of the National Security Council, debating over the pros and cons of an important foreign policy decision.
INTS 3220 Trafficking in Persons/Smuggling of Migrants (4 Credits)
Through the Education for Justice (E4J) initiative, the United Nations Office on Drugs and Crime (UNODC) has developed a series of university modules with a focus on the subject areas of crime prevention and criminal justice, anti-corruption, organized crime, trafficking in persons and smuggling of migrants, firearms, cybercrime, wildlife, forest and fisheries crime, counter-terrorism as well as integrity and ethics. In recent years there have been few topics garnering as much widespread interest as trafficking in persons (TIP) and smuggling of migrants (SOM). These issues have attracted the attention of Governments, NGOs, International Organizations, the media as well as academia. While this attention tends to provoke vivid discussions in political circles, social networks and other media platforms, there is little solid understanding of TIP and SOM, the difference between them and their implications. Last Spring, I joined 12 other academics with expertise in human trafficking and human smuggling from around the world for a week in Doha, Qatar to create a syllabus primarily for the teaching of TIP and SOM at universities and colleges. The 14 Modules on TIP and SOM will provide students with a practically oriented, though still theoretically grounded, tool to understand these issues. Thanks to the inputs received from an addition 100+ academics from all around the world, the Modules’ contents are substantively robust. This strength is reinforced with a series of illustrative examples and exercises aimed at generating debates and consolidating knowledge among students. Given the considerable safety risks posed by TIP and SOM and the related need to ensure that perpetrators are made accountable, the course relies heavily on a legal approach, acknowledging the importance of clarifying concepts and employing rigorous terminology. This notwithstanding, the course is also grounded in a multidisciplinary methodology, recognizing that the complexity of the trafficking in persons and migrant smuggling phenomena extends beyond the legal realm. Consequently, a comprehensive understanding of TIP and SOM is not possible without the convergence of various disciplines, expertise and perspectives, including the historical, economic, social, political, and gender prisms, that are all considered in developing the course. Prerequisites: INTS 1500 and INTS 1700.

INTS 3222 International Law and Human Rights (4 Credits)
An introductory course examining the concept of human rights, including political, economic, social, and cultural rights. International, regional and national institutions, norms and procedures to protect individual and group rights are discussed. Prerequisites: INTS 1500 and INTS 1700.

INTS 3225 Terrorism (4 Credits)
Over the last century, the term terrorism has been applied most often to the illegal use of violence aimed at governments—directly or indirectly—in an attempt to influence policy or to topple an existing regime. Terrorist acts are designed to create widespread fear across an audience far beyond their immediate victims in order to weaken the general sense of security in society, and to mobilize publics and pressure leaders to change. Historically, terrorism has been practiced by political organizations on the right and on the left, used by nationalist and religious groups, by revolutionaries, and by state institutions including military forces and intelligence services. Numerous definitions of terrorism have been proposed. Many are confusing and controversial owing to the value-laden basis of the concept and its intense stigma. Who seeks to be called a ‘terrorist’? This derogatory term is designated by its victims and ideological opponents. But it is not applied to all episodes of politically-based violence.

INTS 3365 African Development: Patterns, Issues and Prospects for the SDGs (4 Credits)
This is an undergraduate course on Development in sub-Saharan Africa (SSA). It introduces the student to the main issues and themes confronting contemporary African development. It draws on literature from development economics, history, comparative politics, sociology, anthropology, geography and international relations, as well as a broad range of country case studies. The course reviews patterns of development in the SSA region. It then engages with the main theories of economic growth and development and evaluates their application to Sub-Saharan Africa. The main issues include the impact of Africa’s geography, natural resources endowments and climate; the legacy of slavery and colonialism; independence, state formation and failure; patrimonialism, clientelism and corruption; Africa’s economic crisis and reform efforts; foreign aid and debt; democratization and; reflections on Africa and the sustainable development goals. The course will equip the student with knowledge and skills to be a positive and effective player in the area of African development. Prerequisites: INTS 1500 and INTS 1700.

INTS 3385 Migrants and Refugees: Humanity on the Move (4 Credits)
This course begins with the pre-history and history of human migrations and moves to cover the era of European colonization and forced dispersal (and in some cases aggregation) of peoples in the Americas, Southeast Asia, and Africa. The "contemporary" (i.e., post-WWII) era then covers not only the movements of peoples from Central Africa, Southeast Asia, the Balkans, and elsewhere, but will highlight the achievements of immigrants and refugees in such areas as technology, the arts, and the field of human rights. Issues of ethnicity, nationalism, and political diasporas will bring the contemporary era to a close. Prerequisites: INTS 1500 and INTS 1700.

INTS 3415 State Department Tradecraft (4 Credits)
This is a foreign policy skills-based course designed to foster an ability to more effectively engage internal leadership, the press, and foreign audiences while working in a government context. Students will draft a range of communication products including policy memos, diplomatic cables, and talking points and practice essential oral communications skills ranging from negotiation, speaking to the media, and delivering briefings to officials. The State Department’s communications model will be used as a template for engagement, but the skills will be broadly useful to any individual planning to formulate, implement, and educate on policy in executive and legislative settings. Prerequisites: INTS 1500 and INTS 1700.
INTS 3420 Climate Security (4 Credits)
Since the dawn of agriculture (~7000 BCE), but rapidly accelerating in the industrial age (1750 CE to the present), humanity has conducted an uncontrolled experiment in bending the natural environment to fit human needs and desires. Despite the perceived distance that technology has placed between our physical environments and our daily lives, human interactions with our natural environment are still fundamental – and set to be disrupted by climate change, one of the most vexing issues of our time. It poses a wicked problem: a socio-cultural problem that is seemingly impossible to solve due to incomplete knowledge, the number of people and opinions involved, the large changes required, and the linked nature of the problem with other major social issues and problems. Since the end of the Cold War, much attention has been paid to the role of natural resources and environmental scarcity as a source of conflict, ranging from “water wars” between states sharing a common river basin to communal conflict between pastoralists and farmers in the Sahel and even the Syrian Civil War. This course will survey the impacts of climate change on livelihoods and human security, evaluate the expanding literature on environmental impacts on conflict, and address the emerging role of environmental stressors and climate change as US national security issues. Prerequisite: INTS 1500 and INTS 1700.

INTS 3421 Environmental Justice Policy and Practice (4 Credits)
Environmental justice (EJ) asks how we can ensure a fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the design, implementation, and enforcement of environmental laws, regulations, and policies. In short, how can we facilitate an environment where people live, work, and play exempt from unacceptable allocations of environmental benefits (such as natural resource distributions) and harms (such as environmental health hazards). The course will present a historical overview of the EJ movement in the United States and its intersections with global EJ. It will cover the theoretical and practical methods used in environmental policy to assist government agencies, from the local to the global, in addressing immediate and long-term environmental justice challenges. Particular attention will be placed on the Colorado State legislature and how different environmental justice bills are designed and negotiated through the legislative session. Students will examine proposed bills and their relationships to social theories on EJ, diverse actors’ interests and needs, and the appropriateness of the solutions presented to address specific environmental inequities. This will require group collaboration to examine specific EJ bills and produce in-class presentations and a policy brief that engages students critically with the course material and a real-world EJ issue. In short, with this course you will:
• Learn about the EJ movement history • Create and share your own EJ story • Explore issues in water access & air quality, food insecurity, access to nature and open spaces, and more • Understand EJ policy in Colorado and beyond • Analyze EJ policies in the Colorado State legislature Prerequisites: INTS 1500 and INTS 1700.

INTS 3425 Political Psychology (4 Credits)
Political psychology provides an important lens for studying and understanding political phenomena and global patterns. It maintains that the study of individuals and groups is essential for understanding political behavior, and such study must go beyond rational actor assumptions to an understanding of how individuals and groups behave in political contexts and what influences this behavior. Political decisions and actions are ultimately taken by individual actors, whether they be leaders, elites, or average citizens. This course will explore this important area of theory and research lying at the intersection of several fields – psychology and political science of course, but also sociology, anthropology, organizational studies, and even neuroscience. Why do we see a rise in populism across many countries? How do atrocities and genocides occur? Why is developing peaceful and multicultural societies so difficult? How is voter choice influenced? Why do leaders do what they do? What does security actually mean to people? How is reconciliation achieved? The course will use a combination of readings, case studies, and discussions to enhance class members’ understanding and appreciation of the central concepts, theories, research methods, and applications of political psychology.

INTS 3431 International Futures (4 Credits)
Countries vary in relative levels of income, wellbeing, and stability for a variety of reasons, often involving complex interactions that limit our ability to divine a single, general explanation. That said, social science theory, data collection, and quantitative methods have improved significantly over the past several decades providing novel insights into complex, systemic, interactions. These relationships not only help to understand past outcomes but also indicate potential future trajectories under variable scenarios. Using the International Futures (IFs) system, we can begin to understand “where we’ve been”, “where we’re headed”, and “where might we want to be”.

INTS 3434 Political Economy of Globalization (4 Credits)
This course aims to provide an in-depth understanding of globalization and its differential impact on advanced and developing countries, using a wide range of literature from political science and political economy. The term ‘globalization’ connotes many different developments and processes and has become a leitmotiv of contemporary debate. It is an ‘essentially contested’ concept, which means that there are multiple meanings attached to it and that it has been heavily invested with normative claims. It can be used to capture the increasing speed and volume of communications, the spread of mass media, the growth of the internet, and the expansion in cross-border and transnational flows of goods, services, jobs, and capital. All of these things are important. But precisely because of the range of phenomena it is used to refer to, and because of its frequent deployment for ideological ends, the notion of globalization must be handled with care. Though it conveys a reality that needs to be understood, it is often used laxly by the media, as a means of avoiding blame by politicians and for personal aggrandizement by certain public intellectuals. All play on the fear of what lies beyond our control. As employed in this course, globalization lies primarily in the domain of economics—and in the social and political implications of economic change. Globalization in this sense can be reduced to: • trade (the movement of goods and services across national borders); • direct investment (the purchase of factories or equipment abroad); • and capital flows (the movement of money across national borders).

INTS 3445 The Role of Religion in International Affairs (4 Credits)
The role of religion in international affairs was largely unexplored by scholars prior to September 11, 2001 when religiously based acts of terrorism shook the world. Since that time there has been an increased interest in examining religion in terms of its’ impact on the international system. Is religion a force for good or evil within the international system? How influential is religion in international politics? Does religion matter or is it merely background noise in our study of the international system? In short, this course examines the role of religion in international affairs with an eye toward understanding political violence, political economy and conflict resolution in terms of religion and religious actors. Prerequisites: INTS 1500 and INTS 1700.
INTS 3505 International Health and Development (4 Credits)
Investment in health and investment in development work symbiotically in the production of economic and human well-being. However, what constitutes health and development varies across context, institutions, and geographies. This course will focus on the meaning, measurement, financing and delivery of inputs to human well-being and other aspects of development. This course will explore dominant models of health and development, what assumptions inform these models, and who is left unaccounted for within each. We will examine how macro-level decisions, decisions made by global or national institutions, impact both options and outcomes at the community and individual level. The exchange between development policies and health interventions will be explored. We will examine and critique the instruments and methods that are used to measure health and development and the assumptions that inform mainstream development and health paradigms.

INTS 3530 Feeding the World: The Politics and Economics of World Food and Agriculture (4 Credits)
This course asks students to critically explore contemporary debates about the global food and farming system with an eye to understanding its structure, operation, ideological basis, and impacts on people around the world. Of special interest in the course is the manner in which the global food and farming system both creates and aggravates global inequalities. Students focus partly on theories of and ideas about the role of agriculture in the economy, society and development process, the appropriate structure and orientation of agricultural production and distribution, the role of the state in directing food production and distribution, and the nature of justice for farmers and eaters. Students further engage a spectrum policy debates and case studies that particularly illustrate the workings of the global food and farming system and the harsh contradictions that underpin it. Among other topics, students are exposed to debates about food prices, hunger and famine, obesity, commercial production and agribusiness, the peasantry and subsistence farming, biotechnology, free agricultural trade, fair trade, agricultural pollution and agriculturally-induced climate change. Prerequisites: INTS 1500 and INTS 1700.

INTS 3560 Globalization and International Security (4 Credits)
Globalization moved a long time ago from social science to omnipresent buzz word, but with increased usage has not always come increased understanding. Globalization is the increased participation, and consciousness of that participation, by individuals in global, that is to say trans-regional or transnational, networks. Today’s globalization is made possible in large part by dramatic and continuing changes in technology, but its impacts are social, economic, political, and potentially military changes in perception, in scale, in magnitude, and in threat. This course specifically concentrates at the intersection of global networks, the technology that makes them possible today and tomorrow, and current political and military security challenges to include national and internal state security, global terrorism, global insurgency, and cyber warfare. Prerequisites: INTS 1500 and INTS 1700.

INTS 3562 Civilian Protection Practicum (4 Credits)
The harm to civilians in contexts of armed conflicts presents an ongoing challenge for humanitarian and defense practitioners. These challenges are only expected to increase as the second- and third-order effects of the Coronavirus reverberate through the international system and spark new armed conflicts. While there are no prerequisites for this course, it is designed as a follow-on to the introductory course on “Civilian Protection in Armed Conflict.” The course will enable students to put their insights on the protection of civilians into practice. Students will undertake collaborative research projects with a variety of U.S. and international humanitarian and defense organizations. Faculty and practitioner mentorship will help students learn how to advocate for ethical and evidenced-based protection policymaking. At the end of the course, students will brief their final research products to the practitioner clients. Prerequisites: INTS 1500 and INTS 1700.

INTS 3590 Politics in Africa: A Theoretical Approach with a Comparative Perspective (4 Credits)
This course introduces students to basic concepts and arguments in the study of contemporary African politics. The focus is on the politics in Africa post-independence. The course emphasizes theory in a comparative perspective as a way to understand politics in Africa. The basic question is whether politics differ so much in Africa as to be in a category by itself or is it simply a variation on patterns, habits, and institutions found in other regions and countries in the world? The course goal is to provide students with important concepts so as to gain a better understanding of processes in Africa and the problems that in some fashion or other account for the continent's current marginality in the world and persistent underdevelopment. In addition, the course exposes students to the application and usefulness of general theories of development in comparative politics. Prerequisites: INTS 1500 and INTS 1700.

INTS 3591 Contemporary African Security (4 Credits)
The end of apartheid in 1993 signaled a critical juncture for African liberation and security. The fall of South Africa's repressive regime marked a new era in African statehood and security apparatus. Apartheid posed the most threat to sovereignty especially for Southern Africa countries and undermined independence on the continent. With the new African National Congress government led by the Nelson Mandela, African countries were poised to focus on development and regional integration to cement cooperation, economic growth and improve the wellbeing of the African people. However, the new epoch coincided with novel challenges to statehood and security as the continent was quickly ravaged by civil wars. Today the continent continues to face numerous security challenges that are interwoven in contemporary global problems like climate change and the rise non-states actors. Using an interdisciplinary approach, this course assesses contemporary security challenges in Africa such as terrorism, insurgency and piracy by examining the causes and institutional frameworks put in place to address them. Prerequisites: INTS 1500 & INTS 1700.

INTS 3600 International Monetary Relations (4 Credits)
We investigate the operation and evolution of today’s international monetary system; the course will investigate both the politics and economics of international monetary negotiations, and will examine several key public policy debates that concern governments and investors around the world. The course will be an introduction to these timely and important issues, and will be organized around lecture, class debates, and discussion. Prerequisites: ECON 1020, INTS 1500 and INTS 1700.
INTS 3621 The Politics of Contemporary Western Europe: Democracies under Strain (4 Credits)
This course is a comparative study of democratic governments in Western Europe, how these systems are structured and function, and more particularly the new challenges and problems that are emerging in the region: Euroscepticism, populism, support for right-wing parties, and political polarization. Democracy is the institutionalization of conflict, but democratic regimes vary in regard to the ways that they structure the arenas within which conflict is expressed. We will explore some of these institutional distinctions that vary across Western Europe such as Presidential vs. parliamentary systems, fragmented multi-party systems vs. majoritarian two-party systems, as well as the nature of political parties and the dynamics of party systems. The study of Western European democratic politics however requires some retrospective historical analysis of the nature of the conflicts emerging since the creation of the Modern State and the establishment of democracy. Because many of the present conflicts and problems in today's democratic regimes are legacies with roots in conflicts from the emergence of contemporary states, we will also spend some time in analyzing some of these historical conflicts.

INTS 3625 Introduction to Contemporary Latin American Politics (4 Credits)
This course provides an introduction to the study of Latin American politics. It is designed to provide students the opportunity to better understand how Latin American societies and political systems are organized and the major issues facing these governments and their citizens. In particular, this course will explore the establishment of democracy and the prospects for the consolidation of democratic regimes in the countries of the region. Throughout the twentieth century, economic, social and international factors contributed to political instability in the region and the establishment of non-democratic forms of rule. Although a wave of democratic transitions in the 1980s and 1990s transformed most Latin American countries into electoral democracies, the extent to which countries can be said to have fully democratic regimes varies widely today. Prerequisites: INTS 1500 and INTS 1700.

INTS 3630 Global Environment (4 Credits)
The linkages between social change, economic change and alterations to ecosystems have been apparent, if not overtly acknowledged, throughout history. It was not until 1987, however, with the publication of Our Common Future, that such linkages were couched in terms of development and explicitly placed on the international development agenda. The idea appears simple–environmental change, patterns of social change and economic development, social and political factors operate together and impact local, national, regional and global ecosystems. But impacts of the change in any one sector are seldom confined within national boundaries. How then does one address environmental issues across different regulatory, political, institutional and geographic scales? This course examines the connectivity between diverse elements of our planet's ecosystem, explores how a change in one element can have immediate and long-term impacts across local and global territory, and looks at strategies to create greater harmony across environmental, social, political and economic interests. Prerequisites: INTS 1500 and INTS 1700.

INTS 3660 States in Transition and European Integration (4 Credits)
This course examines states in transition in Europe and on its periphery. The central question the course asks is why, looking across the post-communist world, many states have joined the European Union and also the North Atlantic Treaty Organizations, while many others have held on to authoritarian means of rule or have been party to armed conflict. While Poland, the Czech Republic, Slovakia and the Baltic States have acclimated themselves to many European Union rules relatively smoothly, Hungary has become the least democratic state in the Union. At the same time, Georgia, Ukraine and Russia are embroiled in protracted and in some ways interrelated conflicts, with democratic consolidation either seriously compromised or not even on the agenda. This course examines these diverging trends, drawing on a range of international relations and comparative politics approaches to explain highly variable outcomes across the region. Prerequisites: INTS 1500 and INTS 1700.

INTS 3670 Sustainable Development and Tourism (4 Credits)
In 2006, a record 846 million tourists travelled internationally spending US $733 billion in their travels. This course explores the motivation behind the tourism industry, especially in low and middle income regions, and examines the diverse outcomes of the same. The central question we address is whether or not tourism is a viable means of creating and sustaining improvements in the quality of life for host communities. Case studies include eco-tourism, island tourism, medical tourism, and sex tourism. Prerequisites: INTS 1500 and INTS 1700.

INTS 3701 Topics in Int'l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3702 Topics in Int'l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3703 Topics in Int'l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3705 Topics in Int'l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.

INTS 3708 Topics in Int'l Studies (1-4 Credits)
Prerequisites: INTS 1500 and INTS 1700.
INTS 3715 The Politics and Policy of Sustainable Energy (4 Credits)
Energy is much in the news, with highly visible controversies over everything from hydraulic fracturing here in Colorado to oil pipelines to mountaintop removal for coal mining to raptor mortality at wind farms. These controversies range from local city ordinances to global treaties and involve everyone from environmental groups to governments to businesses of all sizes. It can be difficult to make sense of this cacophony of events. Where is the global energy system now, where is it going, and what will impede progress toward an energy system that will both serve human needs and protect the environment? Understanding these questions requires background knowledge that puts them into context and creates the opportunity to understand them more deeply. This course will introduce you to the politics and policies involved in sustainable energy, from the local to the global level. In order to make sense of those policies and politics, it will also introduce students to the basics of the energy system, including both conventional and alternative sources.

INTS 3761 Diplomacy in the 21st Century (4 Credits)
The course examines questions and dilemmas in the practice of contemporary statecraft and diplomacy. It will focus particularly on the changing nature of the tools available to states, the context in which they are used, and the players (including non-state actors) that are involved. The instructor will draw from recent experience to round out the topics discussed in class, and focus on the challenges of modern statecraft and diplomacy. Prerequisites: INTS 1500 and INTS 1700.

INTS 3780 The Ethical Foundations of the Global Economy (4 Credits)
This course explores the ethics that underlie the most pressing debates today in global economic policymaking. Most people know that economists typically endorse the policy of "free trade," or the outcome of "economic growth." Indeed, economists advocate these so often that it seems self-evident that these are obviously desirable. But why is this so? What is the ethical grounding for the economist's stance on these matters? Unfortunately, economists themselves don't often explore the ethical foundations that underlie their policy perspectives. They typically write as if these foundations are obviously correct and beyond doubt. But in fact, the ethical foundations of economics are hotly contested—both within economics and in philosophy and other disciplines. This course is intended to help students make ethical sense of contemporary global economic policy debates. To that end, we move back and forth between abstract theoretical debates (in economics and philosophy) and concrete, applied policy matters. For instance, we examine the current debate over "free trade" versus "fair trade." We see why most advocates for labor, women's and human rights and most environmentalists demand fair trade, and why most neoclassical economists reject these claims and instead advocate free trade. Prerequisites: INTS 1500 and INTS 1700.

INTS 3820 United Nations (4 Credits)
This course provides an introduction to the United Nations and related agencies and programs. It examines the background and institutional arrangements of the UN System but gives special attention to the activities of the UN designed to advance peace and security. Case studies of UN responses to recent crises in Asia, Africa, Europe and the Western Hemisphere will be included. Prerequisites: INTS 1500 and INTS 1700.

INTS 3850 Foreign Aid, Debt and Development (4 Credits)
This course analyzes third world debt relief including the role of major powers, the World Bank and IMF in creating debt and the relationship between debt relief and poverty alleviation. The effects of debt relief upon globalization issues are also covered. Prerequisites: INTS 1500 and INTS 1700.

INTS 3952 Human Rights in the Global World (4 Credits)
This course will examine the nature, utility and effectiveness of international efforts to define, promote and protect human rights. Particular attention will be given to activities of the United Nations and related programs and agencies. The roles of governments, regional intergovernmental organizations and nongovernmental organizations will also be explored. Prerequisites: INTS 1500 and INTS 1700.

INTS 3975 Data Science in International Relations (4 Credits)
Students will use research methods and data science tools to describe, analyze, and evaluate contemporary topics in international security. We will use the R statistical programming language to generate descriptive statistics, visualizations, and basic inferential statistics while using data on international conflict, human security, trade, development, and many other topics relevant to INTS. The course will culminate in a group presentation and report on a specific topic related to international studies. These tools will help equip students for additional coursework, research, and careers that use data science and quantitative analysis. There are no prerequisite in terms of statistics or computer science, but students should be willing to engage with new and challenging content.

INTS 3980 Internships in International Studies (0-4 Credits)
Experience is an important asset when applying for any job. As you will find after graduation, the job market is incredibly competitive, and becoming more so. Gaining real world experience during college will make you a much stronger candidate when seeking that first position after graduation. Through INTS 3980, you have the opportunity to earn between 0 and 5 quarter credit hours for internships of 100 hours or more. The internship portfolio facilitates a student's academic, professional, and personal growth by providing documentation and representation of the internship experience. Elements of the portfolio will help bridge academic experience with career possibilities, and provides an opportunity for self-reflection through your experience. Analysis of your internship will help identify areas of success and points where you could improve overall. The objective of all aspects is to enable you to be more competitive in a global job market. Internships require departmental approval and must be undertaken during the quarter in which you register for credit. The BA program in INTS will not award credit retroactively for internships completed prior to the quarter in which students are registered. Prerequisites: Must be an INTS major and receive departmental permission.
INTS 3988 Study Abroad Resident Credit (0-18 Credits)

INTS 3990 Thesis (4 Credits)
The thesis project is an original contribution to the understanding of issues relevant to international studies and to at least one of the concentration areas in international studies. The thesis must feature original research; that is, it must critically investigate a theoretically informed hypothesis, using sources to support an evaluation of the research question. The thesis must show clearly the following elements: excellent critical thinking and writing quality, coherent presentation, and adherence to the general guidelines set forth by the faculty advisor. Prerequisites: Must be an INTS major and receive departmental permission.

INTS 3991 Independent Study (1-8 Credits)
In-depth study of a particular issue under the guidance of a professor. Prerequisite: prior agreement with department and permission from registrar.

Faculty
Frederick Mayer, Professor and Dean, PhD, Harvard University
Lewis K. Griffith, Teaching Professor and Associate Dean, PhD, University of Denver
Kevin David Archer, Teaching Professor and Assistant Dean, PhD, University of Denver
Ahmed Mohamed Abdrabou, Teaching Assistant Professor, PhD, Hokkaido University
Deborah Avant, Professor, PhD, University of California, San Diego
Marie Elizabeth Berry, Associate Professor, PhD, University of California, Los Angeles
Alvin A. Camba, Assistant Professor, PhD, Johns Hopkins University
Lilian Linialy Chimuma, Visiting Teaching Assistant Professor, PhD, University of Denver
Tamra d’Estree, Professor, PhD, Harvard University
Claude d’Estree, Teaching Professor, JD, Northeastern University
Debak Das, Assistant Professor, PhD, Cornell University
George DeMartino, Professor, PhD, University of Massachusetts Amherst
Sachin Chintamani Desai, Teaching Assistant Professor, MBA, University of Denver
Jack Donnelly, Professor, PhD, University of California, Berkeley
Rachel Epstein, Professor, PhD, Cornell University
Tom J. Farer, Professor, JD, Harvard University
Karen A. Feste, Professor, PhD, University of Minnesota
Rebecca Galemba, Associate Professor, PhD, Brown University
Keith M. Gehring, Teaching Associate Professor, PhD, University of Denver
Alan Gilbert, Professor, PhD, Harvard University
David Goldfischer, Associate Professor, PhD, University at Buffalo - State University of New York
Ilene J. Grabel, Professor, PhD, University of Massachusetts Amherst
Sarah Lee Hamilton, Associate Professor, PhD, University of Kentucky
Nader Hashemi, Associate Professor, PhD, University of Toronto
Cullen Hendrix, Professor, PhD, University of California, San Diego
Lynn Holland, Teaching Professor, PhD, University of California, Los Angeles
Barry Hughes, Professor, Emeritus, PhD, University of Minnesota
Micheline Ishay, Professor, PhD, Rutgers University
Sandy Johnson, Teaching Professor, PhD, Tulane University
The University of Denver’s emphasis on internationalization reflects a cosmopolitan engagement with a complex and connected world that is grounded in our local intercultural diversity. The Office of Internationalization provides leadership and support for the University of Denver community by mobilizing international and intercultural resources locally and abroad, in cooperation with academic and administrative units. The offices and programs in Internationalization provide the knowledge and tools to shape responsible members of a community whose perspectives are local, regional, and international. Courses available for undergraduate credit through the Office of Internationalization and the Center for World Languages & Courses build competencies that connect the local to the global, cultivating critical thinking, learning, and intercultural understanding from the multiple perspectives that serious international engagement offers. Courses intersecting with study abroad focus on identity, globalization, and cross-cultural communication to contextualize international experiential learning. Directed independent, hybrid and strategic partner online language study offers students the opportunity to study less commonly taught languages and cultures.

**INTZ 1101 Swedish as a Foreign Language: Level 1 (Lund SFSA11) (4 Credits)**
This course is an introduction to the Swedish Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Sweden and Swedish society aim to facilitate students’ transition into study abroad. This course is delivered synchronously via an online meeting software platform, such as Zoom, by a Swedish as a Foreign Language instructor at Lund University in Sweden. Students engage as a class remotely through both audio and video connection; students receive login instructions prior to week 1. Remote attendance and participation during class sessions is mandatory. NOTE: This course is offered for elective credit only. Successful completion of this course prepares students to register for Swedish as a Foreign Language: Level 2 (SFSA12) at Lund University.
INTZ 1201 Korean: Beginning Level 1 (4 Credits)
This course is an introduction to the Korean Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Korean society aim to facilitate students' transition into study abroad. This is a hybrid course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Korean Instructor at the University of Western Australia and face-to-face classes with a Korean Teaching Assistant on campus at DU. Attendance in both remote and in-person class sessions is mandatory.

INTZ 1234 Directed Independent Language Study: Yoruba (4 Credits)
Directed Independent Language Study (DILS): Yoruba provides students the opportunity to study Yoruba language and culture. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students with cultural, academic and professional interests in Nigeria, Benin and/or the Yoruba language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1255 Directed Independent Language Study: Swahili (4 Credits)
Directed Independent Language Study (DILS): Swahili provides students the opportunity to study Swahili (Kiswahili) language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in the African Great Lakes region and the Swahili Coast, as well as those with cultural, academic and professional interests in the Swahili language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1301 Portuguese: Beginning Level 1 (4 Credits)
This course is an introduction to the Portuguese Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Portuguese and Brazilian society aim to facilitate students' transition into study abroad. This is an online course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Portuguese Instructor at the Universidade Catolica Portuguesa. Attendance at remote class sessions is mandatory.

INTZ 1810 Directed Independent Language Study: Arabic (4 Credits)
Directed Independent Language Study (DILS): Arabic provides students the opportunity to study Arabic language and Arabic-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various Middle-Eastern countries, as well as those with cultural, academic and professional interests in the Arabic language and Middle East Studies. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA) or approval.

INTZ 1891 Directed Independent Language Study: Hindi (4 Credits)
Directed Independent Language Study (DILS): Hindi provides students the opportunity to study Hindi language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the Hindi language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1910 Directed Independent Language Study: Quechua (4 Credits)
Directed Independent Language Study (DILS): Quechua provides students the opportunity to study Quechua language and Quechua-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the Quechua language from another institution. This course is recommended for students planning to or returning from study abroad in various South American countries, as well as those with cultural, academic and professional interests in the Quechua language, Andean Studies, Indigenous languages and cultures. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).
INTZ 1946 Directed Independent Language Study: Swedish (4 Credits)
Directed Independent Language Study (DILS): Swedish provides students the opportunity to study Swedish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Sweden, as well as those with cultural, academic and professional interests in the Swedish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1955 Directed Independent Language Study: Portuguese (4 Credits)
Directed Independent Language Study (DILS): Portuguese provides students the opportunity to study Portuguese language and Portuguese-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Brazil or Portugal, as well as those with cultural, academic and professional interests in the Portuguese language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1982 Directed Independent Language Study: Korean (4 Credits)
Directed Independent Language Study (DILS): Korean provides students the opportunity to study Korean language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in South Korea, as well as those with cultural, academic and professional interests in the Korean language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 1990 Directed Independent Language Study: Turkish (4 Credits)
Directed Independent Language Study (DILS): Turkish provides students the opportunity to study Turkish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Turkey, as well as those with cultural, academic and professional interests in the Turkish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

INTZ 2501 Exploring Global Citizenship (1-2 Credits)
Examining questions of identity, globalization, and cross-cultural communication, this course is required of all students at DU intending to study abroad. The intent of the class is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken within the year prior to study abroad and is followed while abroad by the second course in the sequence, INTZ 2502, also required for students on unaffiliated programs. This is a 2 credit course. To take the course for 1 credit, students must provide documentation forwarded by academic and major advisor(s) directly to the course director that they have not been able to nor would be able to take the course for 2 credits prior to study abroad based on required (non-elective) course selection for the entire year prior. The department will then review the materials and determine whether the petition process is warranted.

INTZ 2502 Global Citizenship in Practice: Maximizing Study Abroad (1 Credit)
Examining questions of identity, globalization, and cross-cultural communication, this is a pilot course that may eventually be required of all students at DU to be taken while studying abroad. The intent of the course is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken during a student’s study abroad experience and is preceded by INTZ 2501.

INTZ 2503 Learning to Return: Moving Toward an Impact for Public Good (2 Credits)
This course focuses on life back from an experiential learning opportunity whether abroad or within the U.S. and seeks to generate understanding(s) about integration back into DU and various related cultural contexts. The aim of the course is to actively continue application and engagement beyond this formal course. With an intentional focus on reflection, students will be expected to read, write, reflect, and share their abroad experiences to help foster meaningful connections across their cultural learning experiences. A central activity will focus on analyzing and reflecting on an artifact students “collected” while abroad – a blog they created, a series of images they took, a video they made, etc. Students will be expected to read, write, reflect, and share their experiences abroad as a way to better understand who they currently are from having those experiences. This will be leveraged to connect their experiences with future goals or purposes around intercultural and global learning.
INTZ 2700 Topics in Cultures and Languages Across the Curriculum (1-2 Credits)

Cultures and Languages Across the Curriculum (CLAC) provides students the opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major course, students will discuss the content in the target language extending their intercultural and international perspectives on the course content, as well as maintaining and enriching their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

INTZ 3700 Topics in Culture and Language Across the Curriculum (1-2 Credits)

Cultures and Languages Across the Curriculum (CLAC) provides students an opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major "parent" course, students discuss course content in the target language. Students extend their intercultural and international perspectives on the course content, as well as maintain and enrich their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

INTZ 3980 Virtual International Internship (0-10 Credits)

This course facilitates your learning and professional development while you participate in a Virtual International Internship. It provides a framework for you to reflect on and analyze the specific skills gained throughout your virtual internship. This course also supports your self-awareness and personal growth in a cross-cultural context.

INTZ 3991 Independent Study (1-4 Credits)

Judaic Studies

Office: Sturm Hall, Suite 157
Mail Code: 2000 E. Asbury Avenue, Denver CO 80208
Phone: 303-871-3020
Email: cjs@du.edu
Web Site: http://www.du.edu/ahss/cjs

The Center for Judaic Studies (http://www.du.edu/ahss/cjs) (CJS) is a vibrant source of in-depth Jewish learning on campus and across Colorado.

Our faculty are research and teaching experts in a wide range of interdisciplinary areas of Judaic Studies. Their work is internationally recognized, and they offer an impressive annual lineup of undergraduate and graduate courses in fields of Jewish history, religion, language, literature, philosophy, film, and culture.

In addition to being home to our own faculty experts (http://www.du.edu/ahss/cjs/facultystaff/), CJS hosts annual visiting scholars, performing artists, authors, poets and filmmakers from around the world.

We offer a minor in Judaic studies, and a number of joint MA and PhD degrees with programs across campus. We are home to the Holocaust Awareness Institute, the Holocaust Memorial Social Action Site and The Rocky Mountain Jewish Historical Society. We also serve the broader community through many annual events and co-sponsored activities across Colorado.

The Judaic Studies program combines courses in Judaic studies (JUST), English (ENGL), Hebrew (HEBR), History (HIST), Philosophy (PHIL) and Religious Studies (RLGS) to give students a well-rounded perspective on Jewish culture, thought and history.

Judaic Studies

Minor Requirements

There are two core requirements to complete the Judaic studies minor:

a. Students must demonstrate proficiency in the Hebrew language equivalent to one year (HEBR 1001, HEBR 1002, HEBR 1003).

b. Students must complete at least 20 credits of approved Judaic studies courses. Sixteen of those credits must be at the 2000 level or above.

The Judaic studies program combines courses from several disciplines and departments. We encourage you to combine courses that reflect the interdisciplinary nature of our program, choosing from the various departments represented by our faculty.

Students may also choose a minor in Judaic studies with an emphasis in Hebrew. For this option, students complete the minor requirements listed above by taking HEBR 2001, HEBR 2002, and HEBR 2003 toward their additional 20 credits of approved Judaic Studies courses. (*Note: While HEBR 2001, HEBR 2002 and HEBR 2003 are not JUST cross-listed, they count as approved Judaic Studies courses).

Since the Judaic Studies minor includes Hebrew study, CJS works in partnership with the Department of Languages & Literatures at DU where the Hebrew program is housed. For more information about the Hebrew program, please see the Languages and Literatures Department (p. 381).
JUST 2008 Stereotyping and Violence in America Today (4 Credits)
This course is cross-listed with PHIL 2008, COMN 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.
JUST 2104 The Bible as Literature (4 Credits)

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with ENGL 2104 and RLGS 2104.

JUST 2201 Introduction to the Hebrew Bible (4 Credits)

The legacy of the Hebrew Bible has been great for both Western and world culture. In this course, we read the books of the Hebrew Bible critically as literature, as religious text and as a source of sociological knowledge. The students gain a general overview of the narrative and historical development of the text while simultaneously being introduced to the various modes of biblical interpretation. Emphasis is placed on situating the literature and religious expression of the Bible within its ancient Near Eastern milieu. Cross-listed with RLGS 2201.
JUST 2202 New Testament (4 Credits)
This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2202.

JUST 2300 A History of Israel-Palestine, 1800-Present (4 Credits)
This course surveys the histories of the peoples in Israel/Palestine from the early 19th century to the present. Key topics that will be covered include, but will not be limited to, the rise of Zionism and Palestinian nationalism in the late 19th and early 20th centuries, the impact of the British Mandate, the impact of the 1948 War, the experiences of Palestinian citizens and residents of Israel, Palestinians in Gaza and the West Bank under Egyptian and Jordanian rule, shifts in Israeli and Palestinian politics and the state’s military occupation and settlement project, and economic and social developments in the late 20th and early 21st centuries. While this course does not ignore the central role of conflict in Israeli and Palestinian histories, it seeks to move beyond the conflict paradigm and instead focus more on political, social, and economic developments in Israel/Palestine. Cross-listed with HIST 2300.

JUST 2310 The Modern Middle East: 1798-1991 (4 Credits)
This course traces the history and development of the modern Middle East from Napoleon’s invasion of Egypt in 1798 through the First Gulf War in 1991. We pay special attention to the impact of colonialism and Great Power diplomacy on the region. Cross-listed with HIST 2310.

JUST 2315 Women in the Middle East, 1800-Present (4 Credits)
This course looks at the histories of women in certain parts of the Middle East and North Africa in the 19th, 20th, and early 21st centuries. Geographically this course will focus on the histories of women in lands now associated with modern day Turkey, Iran, Israel/Palestine, Syria, Lebanon, Jordan, Egypt, and Saudi Arabia. We will pay close attention to women’s education, political activism, and labor.

JUST 2320 US Foreign Policy in the Middle East (4 Credits)
This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America’s Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2320.

JUST 2350 Israeli Culture Through Film: Society, Ethnicity, and Inter-Cultural Discourse (4 Credits)
This course presents Israeli society and culture development as reflected in Israeli films from the 1950s to present day Israel. Topics include history and collective memory, ethnicities and the experiences of immigration, Israelis in their spatial Mediterranean/Middle-Eastern context and Judaism in its old and new representations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)
This course analyzes fundamental aspects of Israeli Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

JUST 2700 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2701 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2702 Topics in Judaic Studies (1-5 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2704 Topics in Judaic Studies (4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 2741 American Jewish Literature (4 Credits)
This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.
JUST 2742 Modern Hebrew Literature (4 Credits)
This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the soil political, and historically changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)
Writers, scholars, and comedians all claim to locate an identifiable strain of “Jewish humor” running from the Bible through to today’s literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of “Jewish humor” in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course is cross-listed with ENGL 2743.

JUST 2744 U.S. Jewish Literature and Culture (4 Credits)
This course provides a survey of some of the most significant works of modern U.S. Jewish literature and culture available in translation. Students consider how the development of U.S. Jewish literature and culture has contributed to the formation of contemporary Jewish identity, and how the conflicts that define the turbulent history of American Jewry are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the soil political, and historically changes wrought by the rise of modern day America. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2744.

JUST 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)
The course goals are three-fold: a) to facilitate students’ communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students’ knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with HEBR 2745. Prerequisite: HEBR 2003 or equivalent.

JUST 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JUST 2991 Independent Study (1-5 Credits)

JUST 3001 Judaism (4 Credits)
A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with RLGS 3001.

JUST 3002 Creation & Humanity (4 Credits)
Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity’s role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity’s relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

JUST 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)
The “Abrahamic Traditions” (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions — Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with RLGS 3003.

JUST 3010 Aspects of Modern Hebrew (4 Credits)
This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with HEBR 3010. Prerequisite: HEBR 2003 or equivalent.

JUST 3023 Great Thinkers: Maimonides-Politics, Prophecy and Providence (4 Credits)
Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on: principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and RLGS 3023. Prerequisite: junior standing or instructor’s permission.
JUST 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics"?; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with PHIL 3024 and RLGS 3024. Prerequisite: Junior standing or instructor's permission.

JUST 3026 Levinas and the Political (4 Credits)

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is a key figure in the histories of phenomenology, metaphysics, and theology. In this class, we examine the implications of Levinas' thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as "Reflections on the Philosophy of Hitlerism" (1934), Totality and Infinity (1961), Otherwise Than Being or Beyond Essence (1974), and "Peace and Proximity" (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other "Jewish theologues" of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hospitality and strangers, friends and enemies; liberalisms, socialisms, fascisms; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporarities of covenant and justice; fraternity; forgiveness and its limits; "the 3rd": rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

JUST 3086 The Emergence of Monotheism (4 Credits)

This course is cross-listed with RLGS 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

JUST 3090 God and Giving? Religion and Philanthropy in America (4 Credits)

This course is cross-listed with ANTH 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

JUST 3102 Early Judaism (4 Credits)

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with RLGS 3102.

JUST 3146 Great Thinkers: Levinas (4 Credits)

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, Ethics and Infinity and Otherwise Than Being or Beyond Essence, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with PHIL 3146.

JUST 3150 The Bible and the Dead Sea Scrolls (4 Credits)

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with RLGS 3150. Prerequisites: One year of Hebrew language or equivalent or by special permission of the instructor.
JUST 3151 Dead Sea Scrolls (4 Credits)
The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with RLGS 3151.

JUST 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)
Neoplatonism is a unique genre - somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we investigate a host of philosophical writings, including the Theology of Aristotle and the Liber de Causis, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Avicenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection, and the call to virtue. Cross listed with PHIL 3152. Prerequisite: junior standing or instructor's permission.

JUST 3215 Modern Jewish Philosophy (4 Credits)
Covering a range of modern thinkers from the seventeenth to the late-twentieth century, topics include reason and revelation, human autonomy and responsibility, aesthetics, post-Holocaust theology, responses to Kant, responses to Heidegger, ethics, and the quest for authenticity. Cross listed with PHIL 3215. Prerequisite: junior standing or instructor permission.

JUST 3405 Postmodern Visions of Israel (4 Credits)
This course investigates how representations of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism helps us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. This course is cross-listed with ENGL 3405.

JUST 3700 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3703 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3704 Topics in Judaic Studies (1-4 Credits)
Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

JUST 3740 Bodies and Souls (4 Credits)
This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, RLGS 3740.

JUST 3742 Jesus in Jewish Literature (4 Credits)
This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus' life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as ENGL 3742.

JUST 3890 Religion and Diaspora (4 Credits)
When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with RLGS 3890.

JUST 3891 Justice: A Biblical Perspective (4 Credits)
This course explores the ways in which the Bible has been applied to questions of social justice in contemporary society. In addition to studying major theological and philosophical theories of justice, students read a variety of biblical texts related to major issues of social and economic justice such as world hunger, the poor, revolution, just war theory and pacifism, environmentalism, and the role of government. This course includes a service-learning component. Cross listed with RLGS 3891.
JUST 3991 Independent Study (1-5 Credits)
Prerequisites: HEBR 1003 or JUST 1003 or equivalent and instructor’s permission.

Faculty
Adam L. Rovner, Associate Professor and Director, PhD, Indiana University
Jeannine Abrams, Professor, PhD, University of Colorado
Michal Lev, Teaching Assistant Professor, MA, Middlebury College
Sarah Pessin, Professor, PhD, The Ohio State University
Alison Schofield, Associate Professor, PhD, University of Notre Dame

Kinesiology and Sport Studies
Office: Ammi Hyde Office 108
Mail Code: 2450 South Vine St. Denver CO 80210
Phone: 303-871-2908
Web Site: https://psychology.du.edu/academics/kinesiology (https://psychology.du.edu/academics/kinesiology/)

The innovative and multidisciplinary Kinesiology and Sport Studies (KINE) minor introduces students to a variety of knowledge and skills, professional organizations, graduate school opportunities, and careers spanning kinesiology, sport, exercise, fitness, wellness, and more. By design, the minor is flexible to meet a student’s interests across the diverse landscapes of KINE.

The KINE minor is an excellent fit for students with majors in biology or pre-health, business, or tourism and hospitality management who are considering careers in sport and related fields. The KINE minor is also an excellent choice for students who major in the College of Arts, Humanities & Social Sciences (e.g., psychology, sociology) or School of Engineering & Computer Science seeking greater sport-specific knowledge, context, and culture or who are completing applied research, projects, internships, or community-service in kinesiology or sport settings.

Kinesiology and sport careers vary greatly. Therefore, so do corresponding job requirements and preferences, and traditional career development pathways into these varied fields. Designed with this in mind, the KINE minor is flexible and prepares students for a wide range of careers, such as: collegiate, professional, or national-team sport coaches, scouts, managers, and administrators; certified mental skills consultants; strength and conditioning coaches, personal trainers, health and wellness coaches, group fitness instructors, exercise or sport scientists; and coaches in k-12 settings, for-profit businesses, or non-profit and government settings including community recreation centers and military (e.g., tactical strength and conditioning facilitator).

The minor is open to all University of Denver students. Students will earn the minor by completing 20 credits, including the required 4-credit hours Foundations in Kinesiology and Sport Studies and 16 credits in KINE or approved electives (e.g., CPSY 2010 Sport Psychology). Most students will complete the minor by taking five, 4-credit hours courses in KINE.

KINE 1015 Foundations of Olympic Weightlifting and Powerlifting (4 Credits)
Powerlifting and weightlifting (Olympic lifts and their derivations) are two widely popular strength- and power-based sports and these movements offer numerous physiological, psychological, and social benefits. The primary movements, including the deadlift, bench press, squat, clean and jerk, and snatch are also nearly universally applied to sports performance training. From recreational to world champion athletes, understanding the rules, equipment, and training practices of powerlifting and weightlifting is essential to developing mastery as a lifter and instructor. Students in this course will learn by doing and acquiring foundational content knowledge in these lifts and the organization of the sports. Students will also learn about powerlifting and weightlifting national governing bodies and how the sport is administered.
KINE 2000 Foundations of Kinesiology and Sport Studies (4 Credits)
This course explores the historical development of kinesiology, sport, and physical cultural studies from ancient societies to the present. By exploring the historical, political, social, cultural, economic, and religious underpinnings of kinesiology, students will understand how they, the field, and various stakeholders have been shaped to their present form. Students will use this understanding to identify and make critical judgments about the common issues, problems, and limitations in kinesiology today. This course will also examine varying national governing bodies, career opportunities, graduate and professional school options in the field, and prepare students to navigate advanced courses and topics.

KINE 2010 Motor Learning for Skill Acquisition (4 Credits)
This course will provide students with an understanding of how individuals (e.g., athletes, performers, recreationalists) learn, perform, and retain motor skills. The course will explore how individual psychology, dynamic environments, and varying group and cultural practices affect skill acquisition. Students will develop foundational skills to develop and implement instructional strategies (e.g., practice plans, activities, feedback, affordances) to facilitate skill learning and performance enhancement, skill modifications for injury prevention, and rehabilitation of injury. This course will cover a variety of theoretical and scientific concepts pertaining to skill acquisition and learning across a variety of settings.

KINE 2020 Sociology of Kinesiology and Sport Performance (4 Credits)
An applied approach to the sociology of kinesiology and sport performance integrates theory and practice, also called praxis, to help students become critical thinkers and problem solvers. Students will be exposed to traditional sociological frameworks such as functionalism, interpretivism, and critical theory; themes such as gender, race, class, and ability; and topics such as identity, deviance, coaching, performance, health, exercise, and sport. The applied focus will prepare students to see sociologically in everyday kinesiology and sport contexts in order to enhance performance and other outcomes, inclusive of ethical considerations.

KINE 2030 Administration of Sport, Fitness, and Wellness (4 Credits)
Organization and administration of sport, fitness, and wellness prepares students to manage and lead in diverse contexts. Course topics introduce students to relevant theoretical and practical aspects of administration, such as managerial functions, human resource management, marketing, budgeting, risk management, and finance. The breadth of the course will set a foundation for students to expand and specialize their skills, while pursuing specific career opportunities.

KINE 2701 Special Topics in Kinesiology and Sport Studies (4 Credits)
Kinesiology and sport studies topics of special interest to faculty and students as needed to complement and expand existing curriculum and test innovative subject matter or teaching and learning practices. May be taken more than once. Prerequisite may vary based on specific special topic.

KINE 3991 Independent Study (1-10 Credits)
Independent research/study.

Languages, Literatures, and Cultures
Office: Sturm Hall, Room 391
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208
Phone: 303-871-2662
Email: LLandC@du.edu

Programs in the Department of Languages, Literatures, and Cultures are designed to immerse students in the speech and thought of other nations and in their cultural and literary heritages. Our students build relationships with people all over the world, discover unique histories and traditions, and experience international films, music, and literature in the original language. Our B.A. in Languages, Literatures & Cultures allows students to concentrate in Chinese, French and Francophone Studies, German, Italian, Japanese or Russian. In addition to offering minors in these six languages, we also have a minor in Hebrew, as well by tutorial arrangements in Latin. Undergraduate offerings also include course work in Arabic and (tutorial) classical Greek.

The Center for World Languages and Cultures (http://bulletin.du.edu/undergraduate/cwlc/) administers the first-year language sequence, which most undergraduate students use to complete FOLA requirements, as well as proficiency testing, which is required by several graduate programs. The department of Spanish Language, Literary, and Cultural Studies (p. 579) administers the Spanish major and minor.

Expand your understanding of the world! Our small, interactive classes and faculty experts integrate language learning with in-depth inquiry into multicultural understanding. Not only in classes taught by experienced, dedicated teacher-scholars who use innovative teaching techniques, but also outside the classroom, our undergraduates experience a strong sense of enthusiasm and community both among themselves and with their instructors. Senior faculty are involved at every level of instruction as well as in student advising and mentoring. Together, our faculty and students collaborate on opportunities that advance scholarly inquiry, cultivate critical and creative thought, and generate knowledge.

Language skills meet cultural knowledge across our nine programs. Whether you’re studying Italian art in Florence, celebrating Japanese Culture Day on campus or diving into cultural roots through French literature, our programs prepare you to be an informed international citizen. The overwhelming majority of our students take advantage of DU’s unique Cherrington Global Scholars program to study abroad at universities around the world.

Across our programs, you’ll develop communication and problem-solving skills to tackle today’s global challenges. Linguistic and cultural knowledge can be applied to a wide range of majors and careers, while offering opportunities for immersive understanding of human experience across the globe. Alumni of the department have pursued diverse international careers immediately upon graduation or have undertaken post-graduate studies,
often with fellowships (e.g., Fulbright, Guggenheim), in a variety of academic and professional fields. Opportunities for public sector, private sector and NGO careers on five continents are limitless.

The Center for World Languages and Cultures (CWLC) provides all language courses at the first-year level.

**Languages, Literatures & Cultures Major**

BA in Languages, Literatures & Cultures prepares and engages students to become informed international citizens, who develop effective multi-lingual and cultural communication expertise and problem-solving skills. Our students apply their linguistic and cultural competencies to a wide variety of majors, careers, and future global challenges, while deepening their empathy for and curiosity about the diversity of human experiences.

The curriculum consists of 44 credit hours at the 2001 level or higher in one of the following language concentrations: Chinese, French & Francophone Studies, German, Italian, Japanese and Russian. Students are required to take 8 of those credit hours from CLTR 2100 and CLTR 2200.

**Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 82))

44 credits including the following:

**Chinese**

36 credits of approved courses beyond CHIN 1003. Additional required courses: CHIN 2001, 2002, 2003, 2100, 2301, and no fewer than 8 credits from 3000-level Chinese topics courses. Students may count CHIN 1516 toward the concentration in Chinese.

**French & Francophone Studies**

36 credits of approved courses beyond FREN 1003. Four of these 36 credits must be from FREN 2400. No fewer than 8 credits from FREN 25XX and 2701. Four credits must be from FREN 3110 or FREN 3150. No fewer than 8 credits from FREN 35XX-3991.

**German**

36 credits of approved courses beyond GERM 1003. Four of these 36 credits must be from GERM 1416. No fewer than eight of these 36 credits must be from 3000-level German courses. Students may count one additional course in English on German culture, history or literature toward the concentration.

**Italian**

36 credits of approved courses beyond ITAL 1003. Four of these 36 credits must be from ITAL 2500 or ITAL 3010. No fewer than eight of these 36 credits must be from 3000-level Italian topics courses. Students may count one course taught in English on Italian culture, history or literature toward the concentration.

**Japanese**

36 credits of approved courses beyond JAPN 1003. Four of these 36 credits must be from JAPN 1416 and four credits must be from JAPN 2103. No fewer than eight credits must be from 3000-level Japanese topics courses.

**Russian**

36 credits of approved courses beyond RUSS 1003. Four of these 36 credits must be from RUSS 3101. No fewer than eight credits must be from 3000-level Russian courses. Students are encouraged to take either RUSS 1416 or RUSS 1613 and they may count up to 5 courses taught in English on Russian culture, history or literature toward the concentration (with advisor approval).

Total Credits 44

1 Students are encouraged to pursue study abroad in a country where the language in their concentration is spoken as a native language. Credits earned from classes abroad that have been approved by the faculty are counted as DU credits toward the concentration.

**Secondary Major Requirements**

44 credits. Same requirements as for BA degree.

**Chinese**

**Minor Requirements**

A minimum of 24 credits of approved courses above CHIN 2001. Four credits must be CHIN 3300 or above, or equivalent from study in China. CHIN 1516 Contemporary China in Literature and Films, which partially fulfills the Analytical Inquiry: Society and Culture requirement, can be used for
credit toward the minor. Students who study abroad in China are strongly encouraged to enroll in a Chinese course (CHIN 3300 or above) upon their return.

**French and Francophone Studies**

**Minor Requirements**
A minimum of 24 credits of approved courses beyond FREN 1003.

**Total Credits**

24

\(^1\): Advanced Seminars in the French department are courses FREN 3500 - FREN 3900. These are not ASEM courses.

**German**

**Minor Requirements**
A minimum of 24 credits of approved courses beyond GERM 1003. Four of these 24 credits must be from GERM 1416. Students who minor in German are encouraged to study abroad in Germany. Minors who choose to study abroad in Germany are strongly encouraged to enroll in a German course upon their return.

**Hebrew**

**Minor Requirements**
A minimum of 20 credits of study beyond HEBR 1003.

**Italian**

**Minor Requirements**
A minimum of 24 credits of approved courses beyond ITAL 1003. No fewer than four of these 24 credits must be from a course in Italian at the 3000 level. Students may count one course taught in English on Italian culture, history or literature toward the minor. Students who minor in Italian are encouraged to study abroad in Italy. Credits earned from classes in Italy that have been approved by the faculty are counted as DU credits toward the Italian minor. Minors who choose to study abroad in Italy are strongly encouraged to enroll in an Italian course upon their return.

**Japanese**

**Minor Requirements**
A minimum of 24 credits of approved courses. 20 credits must be language classes beyond JAPN 2001. Required courses include JAPN 1416 and JAPN 2103.

**Latin**

**Minor Requirements**
A minimum of 20 credits of study beyond LATN 1003.
Russian

Minor Requirements
A minimum of 24 credits of approved courses beyond RUSS 1003, including one 3000-level course; students are encouraged to take either RUSS 1416 or RUSS 1613 for credit in the minor. Study abroad in Russia through the Cherrington Global Scholars Program and a service learning/internship in Denver’s Russian-speaking community, though not required, are strongly encouraged. The number of credits earned through these experiences is established by agreement with faculty and is subject to institutional requirements.

REQUIREMENTS FOR DISTINCTION IN THE MAJOR WITH A CONCENTRATION IN CHINESE
- Minimum 3.3 cumulative GPA
- Minimum 3.5 major GPA
- Completion of a thesis

Requirements for Distinction in the Major with a concentration in French and FrancoPhone Studies
- Minimum 3.2 cumulative GPA
- Minimum 3.6 major GPA
- Completion of a thesis written in French

Requirements for Distinction in the Major with a concentration in German
- Minimum 3.5 cumulative GPA
- Minimum 3.6 major GPA
- Completion of a thesis

Requirements for Distinction in the Major with a concentration in Italian
- Minimum 3.5 cumulative GPA
- Minimum 3.5 major GPA
- Completion of a thesis

REQUIREMENTS FOR DISTINCTION IN THE MAJOR WITH A CONCENTRATION IN JAPANESE
- Minimum 3.2 cumulative GPA
- Minimum 3.6 major GPA
- Completion of a distinction project

Requirements for Distinction in the Major with a concentration in Russian
- Minimum 3.3 cumulative GPA
- Minimum 3.7 major GPA
- Completion of a thesis written in Russian

ARAB 1001 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Arabic 1001 is designed for students with no prior knowledge of Arabic. Students with experience with the Arabic language should complete the placement test to determine the appropriate course level for their background.
ARAB 1002 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretative communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1001 or equivalent.

ARAB 1003 Elementary Arabic (4 Credits)
The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretative communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1002 or equivalent.

ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)
This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested.

ARAB 2001 Intermediate Arabic (4 Credits)
Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 1003 or equivalent.

ARAB 2002 Intermediate Arabic (4 Credits)
Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 2001 or equivalent.

ARAB 2100 Conversation & Composition (4 Credits)
This is the third quarter of the second year. Intensive practice in oral skills and grammar review. Writing, discussion and reading based on a topic or topics in Arabic language and culture. Increased attention paid to writing skills. Prerequisite: ARAB 2002, equivalent, or permission of instructor.

ARAB 3700 Topics in Arabic (1-4 Credits)
ARAB 3701 Topics in Arabic (1-4 Credits)
ARAB 3702 Topics in Arabic (1-4 Credits)
ARAB 3703 Topics in Arabic (1-4 Credits)
ARAB 3704 Topics in Arabic (1-4 Credits)
ARAB 3991 Independent Study (1-5 Credits)

CHIN 1001 Elementary Chinese (4 Credits)
Part one of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters.

CHIN 1002 Elementary Chinese (4 Credits)
Part two of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1001, equivalent, or permission of instructor.

CHIN 1003 Elementary Chinese (4 Credits)
Part three of an introductory three-quarter sequence of courses in standard (Mandarin) modern Chinese, aimed at building a solid foundation in all aspects: pronunciation (especially tones), basic grammar, syntax, vocabulary and writing in characters. Prerequisite: CHIN 1002, equivalent, or permission of instructor.

CHIN 1516 Contemporary China in Literature and Films (4 Credits)
This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with ASIA 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.
**CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)**
Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecocinema and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 2001 Intermediate Chinese (4 Credits)**
A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 1003, equivalent, or permission of instructor.

**CHIN 2002 Intermediate Chinese (4 Credits)**
A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2001, equivalent, or permission of instructor.

**CHIN 2003 Intermediate Chinese (4 Credits)**
A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2002, equivalent, or permission of instructor.

**CHIN 2100 Advanced Intermediate Chinese (4 Credits)**
This single-quarter course is one of the transitional courses from intermediate Chinese to advanced Chinese. The course materials, while continuing from the CHIN 2001-2002-2003 sequence, give students more opportunities to synthesize vocabulary and grammatical patterns they have learned from previous courses. The introduction of major grammatical patterns is completed by the end of this course. Prerequisite: CHIN 2003, equivalent, or permission of instructor.

**CHIN 2301 Chinese Conversation and Composition I (4 Credits)**
This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2100, equivalent, or permission of instructor.

**CHIN 2302 Chinese Conversation and Composition II (4 Credits)**
This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2301, equivalent, or permission of instructor.

**CHIN 3300 Chinese Society in Transition (4 Credits)**
Through studying selected texts and focusing on topics about various aspects of Chinese society in transition, this class aims at strengthening and further developing students' overall skills, in particular, skills of reading comprehension, presenting information and one's opinions, and debating with other people. Prerequisite: CHIN 2003 plus study in China OR CHIN 2302; or permission of instructor.

**CHIN 3400 Chinese Cinema and Chinese Society (4 Credits)**
This advanced class is designed to strengthen and to develop further students' overall Chinese proficiency and in-depth understanding of the contemporary societies of greater China, including mainland China, Hong Kong and Taiwan, by means of studying the representative Chinese language films produced in these three areas. Prerequisite: CHIN 2302 or above, equivalent, or permission of instructor.

**CHIN 3650 Chinese-English Translation I (4 Credits)**
This seminar is designed for students with advanced-level proficiency in Chinese and English to learn basic translation theories and to develop fundamental skills in translating, from Chinese to English and vice versa, texts which primarily deal with general social needs and everyday communications. Prerequisite: CHIN 3300 or above, equivalent, or permission of instructor.

**CHIN 3991 Independent Study (1-5 Credits)**
CLTR 2100 Introduction to Literary and Cultural Studies (4 Credits)
This course is an introduction to the comparative study of literature and culture across the boundaries of language, genre, nation, artistic medium, historical period, and socio-political context. It focuses both on the methods of literary theory and on the practical applications of critical tools to literary and cultural analysis. Texts and topics reflect LL&C's curricular strengths and include critical theory, film, literature & the other arts, World Literature, European languages and literatures, and translation. Prerequisite is the completion of 1003 or higher in any language taught at DU. Readings in English with a reflective module conducted in the target language. This course provides a critical foundation that supports students' continued language-specific curricula in the Department of Languages, Literatures & Cultures. Students will work on developing reflective, interpretive and analytical competencies, in order to apply these competencies in future courses.
CLTR 2200 Journeys in World Literature (4 Credits)
How does literature take readers on voyages around the world and how does it lead us on quests to self-discovery and self-cultivation? Structured around the theme of “journeys,” this course explores the literature and culture of multiple geographic and linguistic regions. Students will become acquainted with important contexts and critical tools to understand a variety of journeys across cultures and time. We will examine journeys both literally and figuratively and may focus on a selection of the following: epic quests, travel literature, immigration narratives, as well as the Bildungsroman, auto-biography, self-writing, and others. Students will also be introduced to the field of digital humanities. This course provides hands-on training for utilizing Stanford University’s web-based platform, Palladio (https://hdlab.stanford.edu/palladio/). Palladio is an innovative, free research tool used to visualize complex multi-dimensional data. Students will discover and gather data while researching journeys and acquire the skills necessary to create visualizations of this research, further preparing them for DH research in the 21st century. This course provides a critical foundation that supports students’ continued language-specific curricula in the Department of Languages, Literatures & Cultures. Students will work on developing reflective, interpretive and analytical competencies, in order to apply these competencies in future courses.

FREN 1001 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. Each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. First quarter in a three-quarter sequence. FREN 1001 is designed for students with no previous French experience. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course.

FREN 1002 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. Each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. Second quarter in a three-quarter sequence. Prerequisite: FREN 1001 or equivalent.

FREN 1003 Français élémentaire (4 Credits)
Connect with the diverse population around the world that uses French by developing practical communication skills and by learning about other cultural perspectives than your own to develop global insight and the foundations of intercultural awareness. Acquire the necessary competencies to interact in French with people from other countries, and from your own. Each unit, students will assume the role of a job applicant related to the material studied and will use their French communication skills in fun, practical, hands-on ways both in and out of class. Second quarter in a three-quarter sequence. Prerequisite: FREN 1002 or equivalent.

FREN 1988 Study Abroad Resident Credit (0-18 Credits)

FREN 2001 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. First quarter of a three quarter sequence. Prerequisite: FREN 1003 or equivalent.

FREN 2002 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. Second quarter of a three quarter sequence. Prerequisite: FREN 2001 or equivalent.

FREN 2003 Français du deuxième degré (4 Credits)
Grammatical structures, conversation and reading of cultural and literary materials. Third quarter in a three quarter sequence. Prerequisite: FREN 2002 or equivalent.

FREN 2100 Ecrire, lire et parler (4 Credits)
Writing, discussion and reading based on a topic or topics in French and Francophone cultures. Close attention paid to paper-writing skills. Prerequisite: FREN 2003 or equivalent.

FREN 2301 Capitalism vs. Socialism: Emile Zola (4 Credits)
This course analyzes the complex interrelationship between the economic ideologies and practices of capitalism and socialism in the works of the nineteenth-century French novelist Emile Zola. Three novels in which these themes are a major driving force of the action will be studied. In the first, Germinal, the capitalist system is viewed from the outside by poor, oppressed workers who feel victimized by it. In the second novel, Money, the author delves into capitalism at its very heart, the Stock Exchange of Paris. He explores all its machinations but also shows the growing cracks in the system as socialist protestations make inroads at the top. The third work, The Ladies Paradise, proposes a possible reconciliation of capitalism and socialism, inspired in part by the writings of French socialist thinkers earlier in the century. In a new era department store, workers’ rights and commercial profit are seen to be mutually beneficial.
FREN 2302 The French Shakespeares: From Feudalism to Absolutism in 17th-Century France (4 Credits)
This course studies the works of the three leading French playwrights of the seventeenth century: the tragedians Pierre Corneille and Jean Racine and the comic genius Molière. Each of these authors explores various forms of power play that played an important role in the society of their time. These include competitions for political dominance between the feudal aristocracy and an increasingly absolutist monarchy, between the same aristocracy and an emerging middle class, allied with the monarchy, between women and men in their conflicting assertions of rights and privileges, between traditional religion and modern secularism, between the established church and Protestants, between rival liberal and conservative factions within the established church, and between Christian Western Europe and the Muslim Ottoman Empire. Students will read and analyze two plays by each of the three dramatists. This course counts toward the fulfillment of the Analytical Inquiry: Society and Culture requirement.

FREN 2400 Conversation et composition (4 Credits)
Intensive practice in spoken and written French. All aspects of the course, including vocabulary acquisition, phonetics, structural review, compositions, readings, oral presentations and comprehension exercises are presented through a topical approach to everyday French and Francophone life, literature, and contemporary issues. Prerequisites: FREN 2003 or FREN 2100.

FREN 2500 Qu’est-ce que la littérature? (4 Credits)
Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or equivalent.

FREN 2501 La Nature et les animaux (4 Credits)
Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (La Fontaine) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course may be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture. Prerequisite: FREN 2400 or its equivalent.

FREN 2502 La France et ses autres mondes (4 Credits)
In Les Petits garçons naissent aussi des étoiles (1988), a humoristic novel which retraces the history of an anonymous African country from colonization to its present days, Emmanuel Dongala's narrator relates: "[t]hey ruled over us, ran the country, exploited us, taught us their language, sent us to their schools, gave us new ancestors called Gauls. That's why we still speak French, love French food, and still like to spend our vacations in France, even if these days it is easier to get visa to the moon than to that country." This seminar reexamines these well captured relations in Dongala's novel between France and its "other" worlds. How and why has France built and maintained its empire in Africa, Asia and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers such as Aimé Césaire, Patrice Lumumba, Sékou Touré, Christiane Taubira, Tahar Ben Jelloun, Kim Lefèvre, Samin Nair, Jacques Kane, Isabelle Boni-Claverie and Raoul Peck will help us answer the aforementioned questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afroepeanism and Afropolitanism. This course is conducted in French. It counts toward our Analytical Inquiring: Society and Culture. Prerequisite: FREN 2400 or equivalent.

FREN 2503 La Satire (4 Credits)
This course is an introduction to satire in French and Francophone literature. A classical literary technique of denunciation, satire has been recently adopted and adapted in popular televised shows (Les Guignols de l'info in France, Kouthia Show in Senegal, SNL in the US) to recapture important sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as Alloune Badara Bèye's Les Larmes de la patrie, Moussa Absa Sène's Tableau Ferraille and Dieudonné's Le Président africain, we will analyze why and how authors make use of satire to denounce the most prevailing problems faced by French and Francophone societies at given times of their historical trajectories. Prerequisite: FREN 2400 or equivalent.

FREN 2504 La Culture au Cinema (4 Credits)
We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

FREN 2701 Sujets spéciaux (4 Credits)
Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.

FREN 2988 Study Abroad Resident Credit (0-18 Credits)
FREN 2988S Study Abroad Resident Credit (0-18 Credits)
FREN 3110 La Grammaire à l'oeuvre (4 Credits)
Our most advanced language course, students perfect their knowledge of French grammar in all of its intricacies. Written and oral practice. Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.
GERM 1001 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. First quarter of three quarter sequence.

GERM 1002 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Second quarter of three quarter sequence. Prerequisite: GERM 1001 or equivalent.

GERM 1003 Elementary German (4 Credits)
Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Third quarter of three quarter sequence. Prerequisite: GERM 1002 or equivalent.

GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)
This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GERM 1988 Study Abroad Resident Credit (0-18 Credits)

GERM 2001 Intermediate German (4 Credits)
Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. First quarter of three quarter sequence. Prerequisite: GERM 1003 or equivalent.
GERM 2002 Intermediate German (4 Credits)
Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. Second quarter of three quarter sequence. Prerequisite: GERM 2001 or equivalent.

GERM 2003 Intermediate German (4 Credits)
This course challenges students to continue expanding their vocabulary in German and to increase their fluency in speaking, listening and reading. Students are expected to demonstrate a growing awareness of - and sensitivity to - German culture and express their ideas in a manner consistent with advanced language work. Prerequisite: GERM 2002 or equivalent.

GERM 2022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)
This is an introduction to 20th- and 21st-century German culture, history, and politics through film analysis. Studying the most famous and influential films in the history of German cinema, students explore a wide range of topics (including political propaganda, national identity, multiculturalism, terrorism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GERM 2100 Conversation and Composition (4 Credits)
Intensive practice in oral skills, reading and writing. Prerequisite: GERM 2003 or equivalent.

GERM 2350 German Film (4 Credits)
Analysis of selected films centered on major themes in the humanities. Prerequisite: GERM 2100 or equivalent.

GERM 2701 Topics in German Literature (4 Credits)
Selected authors or movements in literature of the German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent.

GERM 2800 Advanced German Grammar and Composition (4 Credits)
This course offers an in-depth review of advanced grammar structures. Review of grammar in context, as well as practice in composition. Prerequisite: GERM 2100 or equivalent.

GERM 2988 Study Abroad Resident Credit (0-18 Credits)

GERM 3325 Die Weimarer Republik: German Culture & Society 1918-1933 (4 Credits)
This course analyzes how violence, economic and political volatility, technology, and changing moral codes affected German society and culture (literature, visual arts, film and music) from the onset of the First World War to the rise of Nazism. Germany's first experiment in democracy, the Weimar Republic, can be viewed both as a prelude to Fascism (and therefore a failure) and as a period of radical socio-cultural change, experimentation, and even progress. This course is taught primarily in German, but occasionally we discuss particular texts in English. Prerequisite: GERM 2003 or equivalent.

GERM 3425 Nachkriegsdeutschland: German Culture & Society 1945-1990 (4 Credits)
This course introduces the student to crucial aspects of the immediate postwar years: Germany's 'Stunde Null'; denazification & reeducation; occupation; 'Americanization' of Germany; 'Berliner Blockade'; the divided memory in East and West Germany; democracy in Germany; the Cold War and 'Berliner Mauer.' Via film, literature, and historical studies we explore how both Germanies (East and West) dealt with the legacy of World War II and the Holocaust. During the first third of the course we have a close look at the concerns of the immediate postwar years 1945-49. Most Germans considered these years of occupation, hunger, homelessness, and despair in a vastly destroyed homeland as much worse than the war that preceded them. Then we investigate critiques of the so-called 'normalization' of Germany's internal and external affairs between the founding of two separate German states and the ensuing 'economic miracle' in West Germany (1949-61). Finally, we trace the development of this 'divided nation' until collapse and reunification in 1989/90. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3701 Topics in German Literature (1-4 Credits)
Selected authors, literary movements and genres in German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

GERM 3988 Study Abroad Resident Credit (0-18 Credits)

GERM 3991 Independent Study (1-5 Credits)

GERM 3995 Independent Research (1-10 Credits)

GERM 3998 Honors Thesis in German (1-5 Credits)

GREK 1001 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor.

GREK 1002 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1001 or equivalent.

GREK 1003 Elementary Greek (Classical) (4 Credits)
Available only as tutorial with permission of instructor. Prerequisite: GREK 1002 or equivalent.

GREK 1416 Myths of Greece & Rome (4 Credits)
Introduction to the goddesses and gods, heroes and heroines, and not a few monstrosities from popular tradition, literature, and visual arts of the ancient Greeks and Romans. Activities include imaginative and creative assignments. No prerequisite. This course counts toward the Analytical Inquiry: Society and Culture requirement.
GREK 1716 It's Really Epic! The Ancient Heroic Epics of Homer and Virgil in Contemporary Translation (4 Credits)
Foundations of Western values and aspiration, good one and not so good ones, may be found at the beginning of Western/European literature in the "Homeric" epics Iliad and Odyssey. The very notions of "tragedy" and "romance" originate in them. For the past twenty six or seven centuries men and women have wrestled with problems, often moral dilemmas and contradictions, that are first dramatized there. Centuries later, though still two millennia before our time, the Roman poet Virgil confronts the triumphant individualism of the Greek epics in his Aeneid and answers them with compassion and a vision of a very different way to build a person and a community. A better one? We address that question by studying these three timeless texts in award-winning-winning 21st-century English versions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

GREK 1816 Ancient Tragedy Ever Modern (4 Credits)
Three great Athenian tragedians of the 400s BCE–Aeschylus, Sophocles, and certainly most modernist of all Euripides–offer us of the 2000s CE much to experience, much to ponder, much that still challenges or provokes us. We experience their democratic Athenian community and its political and social, its religious and philosophic innovations as actualized in tragedy. We read and analyze, enact (in parts) and even imitate both widely known "world classics" Antigone and Oedipus Tyrannus, Medea and Bacchae with fresh approaches proper to our turbulent times, but also less familiar, often distressing "problem" plays that include Euripides' Andromache, Hecuba, and Heracles. This course bears the Analytical Inquiry: Society and Culture attribute in Common Curriculum.

GREK 1916 Comedy Old and New (4 Credits)
Reading and discussion of and experiment with comedies from ancient Rome and even more ancient Greece. We begin, however, with modernizations in American-musical form, and end with our own product in 21st-century emulation. Students' participation, even broad clownish histrionics, required. Students must also be eager to laugh-knowingly and intelligently, of course.

HEBR 1001 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence.

HEBR 1002 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1001 or equivalent.

HEBR 1003 Elementary Hebrew (4 Credits)
Introduction to classical grammar, syntax and modern speech patterns. Three quarter sequence. Prerequisite: HEBR 1002 or equivalent.

HEBR 2001 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 1003 or equivalent.

HEBR 2002 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2001 or equivalent.

HEBR 2003 Intermediate Hebrew (4 Credits)
Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2002 or equivalent.

HEBR 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)
The course goals are three-fold: a) to facilitate students' communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew; b) to expand students' knowledge and understanding of Israeli society and culture while interacting solely in Hebrew; and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with JUST 2745. Prerequisite: HEBR 2003 or equivalent.

HEBR 3010 Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion (4 Credits)
This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with JUST 3010. Prerequisite: HEBR/JUST 2003.

HEBR 3991 Independent Study (1-5 Credits)

ITAL 1001 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Italian 1001 is designed for students with no prior knowledge of Italian. Students with experience with the Italian language should complete the placement test to determine the appropriate course level for their background.
ITAL 1002 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1001 or equivalent.

ITAL 1003 Elementary Italian (4 Credits)
Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1002 or equivalent.

ITAL 1988 Study Abroad Resident Credit (0-18 Credits)

ITAL 2001 Intermediate Italian (4 Credits)
Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1003 or equivalent.

ITAL 2002 Intermediate Italian (4 Credits)
Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 2001 or equivalent.

ITAL 2005 Reading and Conversation (4 Credits)
In Reading and Conversation, students learn the ease of expression in Italian through the intermediate-level reading of cultural and literary materials and through the study of vocabulary. Readings and contemporary issues are discussed in class. Prerequisite: ITAL 2002 or equivalent.

ITAL 2201 20th-Century History and Culture (4 Credits)
This course provides a historical and cultural approach to 20th-century Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2355 Images of Rome in Literature & Film (4 Credits)
The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2500 Introduction to Italian Literature (4 Credits)
Introduction and overview of Italian literature from 13th century to present; works representing major authors, periods, themes and forms. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)
This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

ITAL 2988 Study Abroad Resident Credit (0-18 Credits)

ITAL 3010 Advanced Conversation and Composition (4 Credits)
This course continues to refine students' oral and written skills while enhancing their cultural awareness. Concepts, such as contemporary Italian politics, economy, and gastronomy, are introduced through authentic texts. Specific emphasis is placed on written skills--providing students with the necessary writing skills for continued study in Italian. Prerequisite: ITAL 2005, equivalent, or instructor's permission.
ITAL 3701 Topics in Italian Studies (4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del ’700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor’s permission.

ITAL 3702 Topics in Italian Studies (1-4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del ’700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor’s permission.

ITAL 3703 Topics in Italian Studies (1-4 Credits)
Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del ’700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor’s permission.

ITAL 3988 Study Abroad Resident Credit (0-18 Credits)
ITAL 3991 Independent Study (1-5 Credits)
ITAL 3995 Independent Research (1-10 Credits)
ITAL 3998 Undergraduate Honors Thesis (1-5 Credits)
This course will guide students who are majoring in Italian in the selection of a topic for their honors thesis, research materials, and individual meetings with the professor(s) directing the thesis.

JAPN 1001 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. First quarter of a three-quarter sequence. Japanese 1001 is designed for students with no prior knowledge of Japanese. Students who have experience with the Japanese language should complete the placement test to determine the appropriate course level for their background.

JAPN 1002 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Second quarter of a three-quarter sequence. Prerequisite: JAPN 1001 or equivalent.

JAPN 1003 Elementary Japanese (4 Credits)
The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Third quarter of a three-quarter sequence. Prerequisite: JAPN 1002 or equivalent.

JAPN 1005 Japanese for the Real World (4 Credits)
This fun and challenging intermediate-level, task-based language course develops Japanese language & cultural competency for students preparing to study abroad in Japan or travel to Japan independently. In this course students synthesize and build on their reading, writing, speaking, listening and cultural skills prior to departure in order to maximize their study/travel abroad experience. The task-based curriculum will help students improve their communicative skills in the Japanese language through authentic materials and concrete, task-based language learning. Students also deepen their knowledge about Japanese culture and have online and face-to-face discussions when possible with Japanese native speakers to enhance their cultural competence. Prerequisite: JAPN 1003 or instructor permission.

JAPN 1216 Popular Culture of Japan (4 Credits)
This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world.
JAPN 1616 Samurai and Merchants: Cultures of Tokugawa Japan (4 Credits)
Introduction to the cultures of Tokugawa, Japan, focusing on the tension between the samurai and merchant classes, the images they construct of self and other, and the morals and mores of their respective worlds. As well as examining Tokugawa fiction, drama, and other cultural artifacts, this course also considers later representation of the period and of its people in twenty- and twenty-first-century text, cinema, and television to understand the importance of contemporary influences on historical representation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1816 Classical Japanese Literature (4 Credits)
The course covers one thousand years of Japanese writing, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, the classic The Tale of Genji, medieval tales of wars and hermits, the nō drama, and the haiku and travel diaries. It will focus on such key binaries as orality and literacy, poetry and prose, native and foreign, popular and high-brow, and masculine and feminine. The course will also stress principles of literary analysis and interpretation. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

JAPN 1988 Study Abroad Resident Credit (0-18 Credits)

JAPN 2001 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. First quarter of three quarter sequence. Prerequisite: JAPN 1003 or equivalent.

JAPN 2002 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Second quarter of three quarter sequence. Prerequisite: JAPN 2001 or equivalent.

JAPN 2003 Intermediate Japanese (4 Credits)
Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Third quarter of three quarter sequence. Prerequisite: JAPN 2002 or equivalent.

JAPN 2101 Conversation and Composition I (4 Credits)
Intensive practice in oral skills, grammar review, reading and writing. Prerequisite: JAPN 2003 and JAPN 1416.

JAPN 2102 Conversation & Composition II (4 Credits)
Intermediate training in speaking, reading and writing. Prerequisite: JAPN 2101 or equivalent and JAPN 1416.

JAPN 2103 Conversation & Composition III (4 Credits)
Advanced-intermediate training in speaking, reading and writing. Prerequisite: JAPN 2102 or equivalent.

JAPN 2988 Study Abroad Resident Credit (0-18 Credits)

JAPN 3701 Topics in Japanese Culture (4 Credits)
Selected topics in Japanese culture. Texts and films in both Japanese and English, with a focus on modern and contemporary Japanese culture. May be repeated for credit. Prerequisite: JAPN 3100 or equivalent.

JAPN 3988 Study Abroad Resident Credit (0-18 Credits)

JAPN 3991 Independent Study (1-5 Credits)

LATN 1001 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence.

LATN 1002 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1001 or equivalent.

LATN 1003 Elementary Latin (4 Credits)
Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1002 or equivalent.

LATN 1991 Independent Study (1-5 Credits)

LATN 2001 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 1003 or equivalent.

LATN 2002 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2001 or equivalent.

LATN 2003 Intermediate Latin (4 Credits)
Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2002 or equivalent.

LATN 3991 Independent Study (1-5 Credits)
Prerequisite: LATN 2003 or equivalent.
**RUSS 1001 Elementary Russian (4 Credits)**
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1002 Elementary Russian (4 Credits)**
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1003 Elementary Russian (4 Credits)**
The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1416 Introduction to Russian Culture: The Wondrous and the Supernatural (4 Credits)**
How do we explain the enchanting and mysterious world of Russian Culture? How have Russians imagined their world and themselves? To answer these questions, we will examine the various manifestations of the wondrous and the supernatural in Russian art. We will begin by reading Russian fairy tales to learn about the people's folk beliefs and their Eastern Orthodox faith. We will then trace the Russian fantastic tradition by studying the works of nineteenth- and twentieth-century writers who wrestled to explain the marvelous and the demonic myths at the foundation of Russian culture. We will focus our attention on Russia's cultural capitals St. Petersburg and Moscow and discuss how supernatural themes reflected social and historical realities. Authors may include Pushkin, Gogol, Dostoevsky, Bely, and Bulgakov. No knowledge of Russian is necessary; all class discussions, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)**
This course surveys Russia's cultural past and present—from the beginnings of the Russian state over a thousand years ago through the Soviet Union and, after its disintegration in 1991, to the Russian Federation. The course surveys the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, music, ballet, film) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. By working across disciplines, students will discover the fascinating cultural interconnectedness of Russian politics, art, faith, and national identity. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1860 The Russian Short Story (4 Credits)**
This course will introduce students to Russian literature through some of its shorter "masterpieces" of fiction. Students will explore the lives and ideas of some of Russia's greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 1922 The Soviet Experiment in Literature and Film (4 Credits)**
Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagated by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovsky, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevskaya, and watch ground-breaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2001 Second Stage Russian (4 Credits)**
Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 1003 or equivalent. First quarter of two quarter sequence.

**RUSS 2002 Second Stage Russian II (4 Credits)**
Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 2001 or equivalent. Second quarter of two quarter sequence.

**RUSS 2110 Russian in a Cultural Context (4 Credits)**
Continued development of Russian language and cultural skills with focus on all aspects of Russian culture, particularly Russian literature. Prerequisite: RUSS 2002 or equivalent.
RUSS 2111 Linguistic Politeness and Intercultural Communication (4 Credits)
In this course, students will explore how American and Russian speakers perceive politeness, and how sociocultural values underlying both cultures affect the speakers’ communicative styles, their performance and perception of speech acts, and expression of emotions. Although this course focuses on Russian, other cultures will also be analyzed, such as German and Polish, and those of students’ heritage. This course will help students to improve their communicative competence and deepen their understanding of some European cultures. The course will be conducted in English. Highly recommended for students planning on studying in Russia, Germany, or Poland. The course format consists of lectures, presentations, as well as class and group discussions. Students who major in Russian may get credit by providing coursework in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement.

RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)
This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator’s voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country’s intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women’s place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 2461 Russian Science Fiction (4 Credits)
This course studies the fascinating world of Russian science fiction in the twentieth and twenty-first centuries. Throughout the term, students will examine how Russian and Soviet writers and film-makers reimagined society, science, technology, and space. We will discuss Soviet futuristic utopias, interplanetary voyages, and post-apocalyptic visions. Students will further probe the figure of the alien as a dissident or cultural Other, as Soviet authors grappled with questions of cultural and ideological difference. We will examine how sci-fi writers glorify or critique Soviet society in their visions of space flight, technologically advanced societies, alien worlds, or post-nuclear disasters. Ultimately, we will reflect on the philosophical quandaries that Russian science fiction explores. Works include pre-revolutionary sci-fi texts by Bryusov and Kuprin; Soviet dystopias by Zamiatin and Bulgakov; sci-fi classics by the Strugatsky Brothers; Tarkovsky’s filmic masterpieces; and post-Soviet science fiction by Viktor Pelevin and Sergei Lukyanenko. All readings are in English translation. No prior knowledge of Russian is required. This course fulfills part of the Common Curriculum’s "Ways of Knowing: #Analytical Inquiry. #Society and Culture" requirement. In this class, students will 1) demonstrate the ability to create or interpret the texts, ideas, or artifacts of human culture; 2) identify and analyze the connections between the texts, ideas or cultural artifacts and the human experience and/or perception of the world.

RUSS 2917 Russian Revolution in Literature and History (4 Credits)
The course introduces students to the literature, history, and art of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of art and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

RUSS 3101 Advanced Conversation & Composition (4 Credits)
Continued improvement of Russian language skills in areas of style and syntax. First quarter of two quarter sequence. Prerequisite: RUSS 2110 or RUSS 2111 or equivalent.

RUSS 3200 Seminar: Russian Short Story (4 Credits)
Russia through the study of selected short stories. Prerequisite: RUSS 2110 or RUSS 2111 or equivalent.

RUSS 3232 Russian Avant-Garde (4 Credits)
This interdisciplinary course addresses various manifestations of Russian Modernism and the Russian avant-garde in art, literature, poetry, music, theatre, and film in the late 19th – early 20th century. Its objective is to provide an understanding of the time’s rapid, drastic, and often conflicting cultural and artistic transformations by examining in depth major Russian Modernist works. Students will explore such artistic and literary movements as Symbolism, Cubo-Futurism, Neo-Primitivism, Suprematism, Rayonism, and Constructivism in the context of Russian late Imperial, revolutionary, and early Soviet social, political, and philosophical developments. We will pay special attention to the cultural dialogues between Russia and the West and investigate the aesthetic, erotic, and social utopias of Russian Modernism. The course examines philosophical essays, films, plays, poems, short stories, music, and art created during the period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s.

RUSS 3300 Short Russian Prose (4 Credits)
An advanced conversation and composition course based on Russian prose. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.
RUSS 3650 Soviet and Post Soviet Cinema (4 Credits)
RUSS 3701 Topics in Russian Literature (4 Credits)
Selected topics, authors and movements in medieval, Russian, Soviet and post-Soviet literature. May be repeated for credit. Prerequisite: RUSS 3500 or equivalent, or permission of instructor.

RUSS 3850 Working with Russian Media (4 Credits)
Multimedia course emphasizing new media in Russian culture and society. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

RUSS 3991 Independent Study (1-5 Credits)
RUSS 3995 Independent Research (1-5 Credits)
RUSS 3998 Honors Thesis (1-4 Credits)

The Pioneer Leadership Program (PLP) has been developing the leadership skills of some of the University of Denver’s most talented undergraduate students since 1995. PLP is a unique academic minor and Living and Learning Community at the University of Denver that emphasizes leadership ignited by community, curiosity, courage, and action.

Each year the Pioneer Leadership Program (PLP) selects 88 incoming students who are ready to embrace the ever-increasing challenges of our world.

PLP is a transformational learning experience that combines course work, a residential community, civic engagement, and professional networks to equip 21st century citizen leaders. Through the study and practice of leadership, you will acquire the knowledge, skills and experience necessary to become an effective, collaborative leader in whatever field you choose.
The vision of the Pioneer Leadership Program is "Building inclusive leadership for a just world".

**COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multidisciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals.

**COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2470 Gender and Communication (4 Credits)**

Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

**COMN 3020 Conflict Management (4 Credits)**

Substantive and relational types of conflict, various strategies for conflict resolution.

**COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

**COMN 3230 Principles of Leadership (4 Credits)**

Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

**COMN 3300 Principles of Persuasion (4 Credits)**

This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.
COMN 3315 Public Deliberation (4 Credits)
During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically, we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?

COMN 3680 Gender and Communication (4 Credits)
This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

COMN 3770 Mediated Communication and Relationships (4 Credits)
This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

COMN 3850 Communication Ethics (4 Credits)
This class is not just about how to be ethical communicators but it is also about how to discover ethics--the good life and care for others, answerability and responsibility--deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

GEOG 3420 Urban and Regional Planning (4 Credits)
Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

HIST 2530 American History: 20th Century (4 Credits)
This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

INTS 3385 Migrants and Refugees: Humanity on the Move (4 Credits)
This course begins with the pre-history and history of human migrations and moves to cover the era of European colonization and forced dispersal (and in some cases aggregation) of peoples in the Americas, Southeast Asia, and Africa. The "contemporary" (i.e., post-WWII) era then covers not only the movements of peoples from Central Africa, Southeast Asia, the Balkans, and elsewhere, but will highlight the achievements of immigrants and refugees in such areas as technology, the arts, and the field of human rights. Issues of ethnicity, nationalism, and political diasporas will bring the contemporary era to a close. Prerequisites: INTS 1500 and INTS 1700.

INTS 3952 Human Rights in the Global World (4 Credits)
This course will examine the nature, utility and effectiveness of international efforts to define, promote and protect human rights. Particular attention will be given to activities of the United Nations and related programs and agencies. The roles of governments, regional intergovernmental organizations and nongovernmental organizations will also be explored. Prerequisites: INTS 1500 and INTS 1700.

INTZ 2501 Exploring Global Citizenship (1-2 Credits)
Examining questions or identity, globalization, and cross-cultural communication, this course is required of all students at DU intending to study abroad. The intent of the class is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken within a student's study abroad experience and is preceded by INTZ 2501.
LDRS 2000 Foundations of Leadership (4 Credits)
LDRS 2000 focuses on developing an understanding of the foundations of leadership through an overview of leadership theories and definitions, an exploration of the present and future contextual demands on leaders, and in-depth self-assessment which includes identification of strengths, weaknesses, social identity, and leadership practices. The course will also explore the role of leadership and followership in teams. LDRS 2000 is designed to broaden your understanding of what constitutes leadership while challenging you to understand yourself better and begin to apply civically engaged leadership in new ways. This course is designed to broaden your understanding of “who” and “what” constitutes leadership.

LDRS 2017 Inclusive Leadership (1,2 Credit)
In this academic entree to the study of leadership, we explore the fundamental nature of leadership and how to develop as students of leadership in a diverse world. This course encourages students to discover their personal identities, values, preferences, risk-taking propensity and other characteristics as these relate to their leadership potential. Students integrate learning in a Personal Leadership Statement, declaring what they stand for as an inclusive leader. We explore the idea of "community" and our obligations to take on a leadership role in the community with whom we identify. Service as an act of leadership will be expected both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisite: membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

LDRS 2018 Leadership: Theory to Innovation (1,2 Credit)
This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to innovate and create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017 and membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

LDRS 2019 Teaming for Social Change (1,2 Credit)
Teams are the primary vehicle by which many, if not most, complex tasks are accomplished in our society. As a result, there is an increasing demand for leaders who can build, lead and participate in effective teams. With this course, you are completing your first-year sequence as a student of leadership. It will help lay the theoretical and conceptual foundations you need to prepare you to (a) reflect on teams of which you have been a part; (b) develop strategies for making your teams more effective, whether you are a leader or a team member; and (c) help you develop skills for your sophomore service project. Prerequisites: LDRS 2018 and membership in the Pioneer Leadership Program, or permission of PLP faculty.

LDRS 2020 Leading Community Change (4 Credits)
This course builds on the themes we began in the first-year PLP sequence. Specifically, we continue to expand your understanding of community, citizenship, and spheres of influence. Last year, you explored theories of leadership as well as your own assets and passions you carry into leadership. During the second-year course series we learn how to think strategically and act purposefully to make change happen in a larger context—the community. This course asks you to look at and practice leadership as a relational process that brings people together around common interests in order to effect positive change within institutions and/or communities. We will examine and practice key leadership concepts including self-interest, power, and collaboration. We will also practice specific leadership strategies, including 1-1 interviewing techniques, issue research, developing mission statements and action plans, and conducting community research. Prerequisites: LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), membership in the Colorado Women’s College or permission of PLP faculty.

LDRS 2020 Collaborative Leadership: Local Perspectives (2 Credits)
This course is a continuation of LDRS 2040 and the exploration of the topics of collaborative leadership and community change. In this course you will begin the implementation of the Community Change Initiatives you developed in LDRS 2040. To effectively enact community change, “change agents” must manage project logistics, continually develop as leaders, and be competent communicators. By the end of this course, you will further develop your abilities to effect community change through knowledge and awareness of strategies to effectively impact these areas. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), or permission of the PLP faculty.

LDRS 2021 Collaborative Leadership: Global Perspectives (2 Credits)
This course is a continuation of LDRS 2040 and LDRS 2050. We will pursue the exploration of leadership and community change adding a focus on global cultural differences. In LDRS 2050, much of our class was devoted to communication, particularly “crucial conversations,” where we applied new ideas and skills to leadership and followership in CCI teams. This quarter, we will focus on communication skills in diverse cultures and how leadership is enacted and perceived in different cultures around the globe. Students in this course will also finalize the implementation of their CCI developed in LDRS 2040 and LDRS 2050. Community change initiatives require students to understand the communities where they live and work, to be confident in the appropriateness of their community change efforts, and to fairly and conceptually assess their efforts and impacts. By the end of this course, you will develop a deeper understanding of the community change process. Prerequisites: LDRS 2050 and PLP membership or PLP approval.
LDRS 2070 Envisioning & Enacting Anti-Racist, Feminist Leadership (2 Credits)
This course explores the complex intersections of race, gender, and the complexities of setting life goals for leadership. Students will consider race and gender as socially constructed concepts and discuss the biases and systemic barriers in which these constructs have developed and how this may influence their understanding and enactment of leadership. The course focuses on practical application of goal setting, career planning, and tools for navigating systemic barriers to leadership. To address these perspectives, the course reviews research from a variety of disciplines, including education, social psychology, sociology, economics, and management and organizational science.

LDRS 2120 Mentorship: Theory to Practice (2 Credits)
Whether being mentored, or mentoring another person, understanding how to make the most of the experience is important. This course will explore the theory and practice of mentoring. Students will explore mentoring philosophy, design, implementation and assessment, as well as the potential benefits and pitfalls of mentoring relationships. They will examine diversity and inclusion in mentoring and the impact of mentoring in different academic pursuits and professional capacities. Students will have the opportunity to hear from professionals who have utilized mentoring in their careers, research important elements of mentoring for their desired career paths, design their "ideal" mentoring experience from both the mentee and mentor experience, and learn how assessment can help evaluate the effectiveness of mentoring programs.

LDRS 2310 Leadership in a Virtual World (4 Credits)
Distributed organizations are commonplace in the high-tech world in which we now find ourselves living and working. Leading in private and public settings requires a developed set of skills to utilize the virtual environment to advance a shared goal. Technical skills and communication take on new importance for leading virtually. This course focuses on these new realities of today's work and community environments. Through readings of current research on virtual work and team leadership as well as online assignments to recognize, practice and develop needed skills, students gain a strong foundational understanding of what constitutes effectiveness in virtual work and community leadership.

LDRS 2340 Natures Lessons for Leadership (4 Credits)
What can we as human beings learn from nature? How do we lead in a way that is responsible to our vision and can echo out to our communities? Students will explore these questions together at the Kennedy Mountain Campus through an intensive hands-on approach. Grounded in theoretical perspectives such as nature's principles for living, process leadership, and relational cultural theory, students will deepen their leadership practice through interactive exercises related to mindfulness, presence, and embodiment. Various activities, like art creation, using senses to connect with nature, and strengthening empathy through listening, students will explore the interconnection of humanity while deepening awareness to self and others.

LDRS 2400 Leadership and Sustainability in Belize (4 Credits)
Every day, decisions are made by leaders in business, government, and non-profit settings that impact sustainability in its many forms. This course explores multiple meanings and interpretations of sustainability. The course location of Belize provides a perfect learning laboratory to examine how one country is attempting to balance the sometimes competing demands of economic, cultural, and environmental sustainability. Course activities include staying at a low-environmental impact conference center in the rainforest, visiting a model environmentally sustainable island community, hearing guest lectures from various country experts, and exploring Mayan ruins. Through these activities students examine the role that leadership plays in contributing to small and large scale sustainability efforts. Students must apply and receive instructor permission to register for this course.

LDRS 2430 Leadership, Peace, and Conflict in Northern Ireland (4 Credits)
Much can be learned from the journey toward peace amidst the conflict in the Republic of Ireland and the United Kingdom of Great Britain and Northern Ireland. Through an intensive study of historical events and their resulting sociopolitical outcomes today, students will gain a deep understanding of the role of leadership, peace, and conflict studies in Irish history. Students will visit multiple sites, explore Irish historical resources, and learn about leaders and their legacies from multiple national experts. From these experiences, students will reflect upon and draw connections between historical movements and those of today. Ireland provides the ideal context for deep study of understanding leadership through conflict and efforts for peace. The history of Ireland is a history of seeking independence, and many would say that complete independence was never truly achieved. Indeed, when the Irish Free State was declared in 1921, only 4/5 of Ireland became independent, with six remaining counties becoming a part of the United Kingdom as Northern Ireland. A significant contingent of Irish Republicans disagreed with many provisions of the Anglo-Irish Treaty and started a Civil War lasting almost a year. Struggles for Irish independence continued in many ways, most specifically with "The Troubles", through most of the 20th Century until the Good Friday Agreement in 1998. Today, Ireland maintains an open border with Northern Ireland and although peace in Northern Ireland is present, it remains tenuous with wounds that are still raw, and divisions that exist between Catholics and Protestants to this day. This course will focus on the period of the Troubles and examine how conflicts from the past inform current contexts for the leadership needs of our time.

LDRS 2440 Natures Lessons for Leadership (4 Credits)
This course completes the leadership studies minor as an undergraduate at DU. It is designed to help students think in a structured, reflective way about the philosophical and behavioral ethics as relates to inclusive leadership. Students will gain a greater understanding of their own and others' ethical perspectives and develop stronger ethical decision making skills to navigate ambiguous situations and conflicting interests associated with future roles in society. A final leadership statement and code of ethics paper will allow students to summarize their learning, values and hopes for future leadership development and impact. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019, LDRS 2040, LDRS 2050, and LDRS 2060.
Co-Learning as Co-Leading: Critical Reflection on Development Praxis in South Africa is a virtual summer module offered over a period of four weeks. It is a 4-credit elective focused on Development, Leadership, and Gender in faith-based organizations in Southern Africa. The class is a collaboration between the University of Denver leadership studies department and the University of KwaZulu-Natal department of theology in Durban, South Africa. The course offers a space for reflection and deliberation to activists, community organizers, and students in leadership, theology, and community/non-profit development. It is designed as a productive learning space for students, researchers, and activists committed to harnessing feminist, queer, race-critical, and indigenous approaches to development in Southern Africa in general, and in faith-based NGOs in particular. The course uses a collaborative and decolonial learning approach that draws on the knowledge and methods of all the participants. The course will offer a mix of classroom learning, facilitation, community-based service-learning and application, and praxis reflection in collaboration with the Alan Paton Struggle Archives at UKZN. The course comprises of two sets of participants: (1) student-participant who will be doing the course as part of a university/college degree, and (2) activists-participants who will do the course as a way to reflect on their development praxis as it relates to the organization or social movement they are attached to. Course participants will be collaborators and co-teachers/learners within the learning environment.

The PLP Internship program provides individualized opportunities to gain valuable professional experience and build leadership skills. This hands-on program complements a student's academic major or a specified interest area that supports the student's leadership development through careful placement in community based learning. All three sectors of government, not-for-profit and private enterprise are available for internship learning opportunities.

This course focuses on the administration of human resources, including the processes of personnel management and personnel systems in complex organizations, both public and private. Techniques for recruiting and staffing; orienting, training and development; motivation, performance management, employee relations, compensation systems, and reward and retention systems; and safety and health issues will be addressed. Prerequisite: C- in MGMT 2100 and admission to Daniels.

MGMT 2420 Global Management (4 Credits)
Introduction to multinational corporations and management of international profit and non-profit organizations; how management theory and practice are impacted by particular cultural contexts; analysis of current issues related to international trade and investments, and problems and opportunities of multinational operations. Prerequisites: C- in MGMT 2100 and admission to Daniels.

MGMT 3100 Business Ethics and Social Responsibility (4 Credits)
This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

MGMT 3280 Business Plan (4 Credits)
For both startups and established companies, innovation is a critical capability, driving customer satisfaction, competitive advantage, and growth. This course provides rich, comparative exposure to alignment tools to research a customer opportunity. The course uses a combination of interactive class discussion, real-world case analysis and a team project to explore a critical thinking approach to innovation and product development, incorporating both quantitative and qualitative perspectives. As capstone this integrative course leverages accumulated coursework in application to create, design, evaluate, and analyze strategic opportunities. Also, presentations and idea challenges center on defining target customers, understanding customer needs, generating and evaluating concepts, forecasting demand, designing products and services, and confirming your hypothesis.

MGMT 3700 Topics in Management (1-8 Credits)
Exploration of various topics and issues related to management. Prerequisites: Minimum grade C- in MGMT 2100 and admission to Daniels.

MGMT 3708 Topics in Management (4 Credits)
Exploration of various topics and issues related to management. Course open to Colorado Women's College students only.

PHIL 2180 Ethics (4 Credits)
Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

PHIL 2785 Environmental Ethics (4 Credits)
A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

PLSC 2001 Law and Politics (4 Credits)
Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing.

PLSC 2420 American Presidency (4 Credits)
Historical development and current role and powers of the U.S. presidency. Prerequisite: sophomore standing.
PLSC 2430 Political Parties & Interest Groups (4 Credits)
Evolution and structure of political parties; how they mobilize voters and provide leadership of political issues. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

SOCI 2190 American Communities (4 Credits)
Study of 'community' as a foundational concept in the discipline; consideration of the changing structural contexts of community, as well as the social-psychological aspects of community; emphasis on emerging forms of community in the contemporary U.S. Prerequisite: SOCI 1810.

SOCI 2320 Race and Ethnic Relations (4 Credits)
Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

SOCI 2420 Social Inequality (4 Credits)
Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

SOCI 2719 Social Movements (4 Credits)
Studies in range of perspectives and research issues pertinent to understanding of social movements (groups operating without clear-cut direction from established social structure and culture). Prerequisite: SOCI 1810 or permission of instructor.

THEA 2885 Directing I (4 Credits)
Theory and practice of staging plays. Prerequisites: THEA 1861, THEA 1862, THEA 2870.

THEA 3760 Stage Management (4 Credits)
Survey, exploration, and application of the component parts of the stage manager's role, based upon current methods practiced by professional theatre companies in the United States. Stage managers facilitate the creation of a fully-realized work of theatrical art, born of the collaboration of numerous artists, craftspeople and technicians.

Faculty
Linda Olson, Teaching Professor and Executive Director, PhD, University of Denver
Effley Nathaniel Brooks, Teaching Assistant Professor, MBA, University of Phoenix
Paul Kosempel, Teaching Professor, PhD, University of Denver
Trisha Teig, Visiting Teaching Assistant Professor, EdD, Florida State University

Management
Office: Daniels College of Business, Suite 455

Total Credits 40

International Business Core Cluster

Custom Cluster: Students may choose any two courses relevant to their specific career goals. This choice is made in consultation with the major advisor. Students must consult with the International Business major advisor prior to making this choice.

Business students considering a secondary major in International Studies are strongly encouraged to consider a business major other than International Business, due to the significant overlap in INTS coursework between the International Business and International Studies majors.

Management
