# GRADUATE BULLETIN

---

Select from more than 120 graduate degree and certificate programs that will challenge, inspire and prepare you to achieve your highest academic and professional goals. DU graduate programs combine rigorous study with critical thinking, collaboration and applied learning experiences that will enable you to expand your skills, deepen your expertise and apply your knowledge to benefit you and the world.

## About this Bulletin

The University of Denver Graduate Bulletin has been prepared by the faculty and administration to serve as the governing document for University's graduate academic programs, courses and policies. The Graduate Bulletin represents the University's best planning at the time of publication. Course and curriculum changes; modification to tuition, fees or other charges; and unforeseen changes in other aspects of the University of Denver sometimes occur after the bulletin has been published, but before the changes can be incorporated in a later edition and apply to all students as of the date they become effective, regardless of whether they were in effect at the time the student initially enrolled at the University of Denver. Students are responsible for knowing all academic and administrative policies and regulations affecting their program of study and for abiding by all such policies and regulations during their period of enrollment at the University. The Graduate Bulletin does not constitute a contract between the University of Denver and its students on either a collective or individual basis.

The Graduate Bulletin is published and distributed annually in both a web and a PDF version. Maintaining document fidelity, both versions remain static after publication. Corrections to published errors can be obtained on the errata page accessed through the table of contents and on the Registrar's Office website.

## About the University of Denver

### The University of Denver

Founded in 1864, the University of Denver is an independent coeducational institution located in a residential neighborhood eight miles southeast of downtown Denver. Colleges, schools and divisions of the University include the following:

- College of Arts, Humanities and Social Sciences
- College of Natural Sciences and Mathematics
- Daniel Felix Ritchie School of Engineering and Computer Science
- Daniels College of Business
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Morgridge College of Education
- Sturm College of Law
- University College

## Students

University of Denver students come from all 50 states, in addition to the District of Columbia and from several U.S. territories, and from 82 different countries. Enrollment is approximately 13,400: 6,400 undergraduates and 7,000 graduate students.

## Accreditation

### Institutional Accreditation

The University of Denver is accredited as a doctoral degree-granting institution by the Higher Learning Commission (HLC) and is authorized to offer post-secondary education in the state of Colorado by the Colorado Department of Higher Education.

Higher Learning Commission  
 230 South LaSalle Street, Suite 7-500  
 Chicago, IL 60604-1413  
 312-263-0456  
 800-621-7440  
<https://www.hlcommission.org/>

Colorado Department of Higher Education  
 1560 Broadway, Suite 1600  
 Denver, CO 80208  
 303-866-2723

<http://highered.colorado.gov>

## Specialized Accreditation

Individual academic programs undergo periodic review by accreditation or certification bodies in their field.

- Accreditation Association for Ambulatory Health Care
- Accrediting Board for Engineering and Technology
- American Bar Association
- American Chemical Society
- American Library Association
- American Psychological Association
- Association to Advance Collegiate Schools of Business International
- Colorado Department of Education
- Council for Accreditation of Educator Preparation
- Council on Social Work Education
- Master's in Psychology and Counseling Accreditation Council
- National Association for the Education of Young Children
- National Association of Schools of Arts and Design
- National Association of School Psychologists
- National Association of Schools of Music
- National Professional Science Master's Association
- National Security Agency - Center of Academic Excellence

**Office of Graduate Education**

The Office of Graduate Education (OGE) provides leadership and support for graduate education and advocates on behalf of graduate students and programs at the University of Denver. Under the direction of the Vice Provost for Research and Graduate Education, the OGE partners with deans, academic units and University governance to ensure excellence and integrity in educational programs and curricula. The OGE facilitates the development of new degree programs at the graduate level, oversees processes to ensure the quality of graduate and credential programs, acts as an advisory resource to programs initiating or transforming their academic programs, and ensures the University is in compliance with all federal, state, and university policies related to graduate education. On behalf of the Provost and working in consultation with the Graduate Council, the office is responsible for the authorship and oversight of graduate policy.

**Graduate Council**

The Vice Provost and the Graduate Council are charged with the responsibility of reviewing, formulating, and implementing policy concerning graduate education.

**Composition**

Council membership includes the Vice Provost for Research and Graduate Education, all of the academic deans from units with graduate programs, an elected faculty representative from each division, two elected representatives from the Faculty Senate and two representatives of the Graduate Student Government.

Administrators such as the Registrar, the Dean of the Library, the Vice Chancellor for University Technology Services, the Chair of the Undergraduate Council, the Vice Provost for Research and the Vice Provost for Internationalization serve *ex officio* and participate in the Committee's proceedings as voting members.

### Responsibilities

The Graduate Council shall oversee the configuration of graduate degree and certificate programs, monitor the degree to which these programs further the University's mission, avoid unwarranted program duplication, and establish, monitor and maintain academic standards across the graduate curricula. The Council shall recommend policies including, but not limited to, the structure and quality of the graduate curricula; procedures concerning graduate student appeals; and policies governing the initiation and termination of graduate degree programs.

### Academic Units

Graduate Studies at the University of Denver includes programs in the following academic units:

- College of Arts, Humanities and Social Sciences (p. 65)
- Daniel Felix Ritchie School of Engineering and Computer Science (p. 241)
- Daniels College of Business (p. 341)
- DU-Iliff Joint Doctoral Program in the Study of Religion (p. 446)
- Graduate School of Professional Psychology (p. 469)
- Graduate School of Social Work (p. 524)
- Josef Korbel School of International Studies (p. 585)
- Morgridge College of Education (p. 686)
- College of Natural Sciences and Mathematics (p. 813)
- Sturm College of Law (p. 892)
- University College (p. 988)

## Academic Calendar

Courses for programs other than the Sturm College of Law are offered on the quarter system; the Sturm College of Law operates on a semester calendar.

### Quarter System

The academic calendar is divided into fall, winter and spring quarters and a summer session. Each quarter is approximately ten weeks long and summer session is nine weeks. There are two interterm sessions. Students may complete degree requirements through continuous enrollment, including summers, or may arrange the normal work of a three-quarter academic year in any desirable sequence of quarters and summer session.

### Semester System

The academic calendar is divided into fall, spring and summer semesters.

### Interterms

Interterms are the periods preceding each academic quarter, during which short, innovative on-campus, online, and travel experiences for undergraduate and graduate students are offered. Hours completed in interterms are applied as credit toward graduation requirements and may be applied to the major or minor. Students can find more information about and register for interterm classes through the Academic Programs (<https://www.du.edu/interterm/>) office. Questions about interterms should be directed to Academic Programs, Mary Reed Building, Room 301, 2199 S. University Blvd., Denver, CO 80208-2360, or by emailing [uap@du.edu](mailto:uap@du.edu).

### Summer Session

Summer session (<http://www.du.edu/summer/>) is an avenue for continuing undergraduate and graduate students to accelerate their programs or complete necessary coursework. Elective, Common Curriculum and required courses for majors and minors are offered in a variety of time frames. Travel and other unique courses including short, intensive workshops are part of the summer program. Visiting students, professionals and individuals from the community interested in attending for the summer only are encouraged to attend and are admitted (<http://bulletin.du.edu/undergraduate/admission/traditionalbachelorsprogram/summer/>) under an open-enrollment policy.

Academic Calendar: Quarter System (p. 13)

Academic Calendar: Semester System (p. 13)

## 2024-2025 Academic Calendar: Quarter System

### Autumn Quarter 2024

September 9	Monday	Classes begin
November 16	Saturday	Last day of classes
November 18-21	Monday-Thursday	Final examination period

### Winter Interterm 2024

November 22	Friday	Classes begin
December 21	Saturday	Last day of classes

### Winter Quarter 2025

January 6	Monday	Classes begin
March 17	Monday	Last day of classes
March 18-21	Tuesday-Friday	Final examination period

### Spring Interterm 2025

March 22	Saturday	Classes begin
March 30	Sunday	Last day of classes

### Spring Quarter 2025

March 31	Monday	Classes begin
June 7	Monday	Last day of classes
June 9-12	Monday-Thursday	Final examination period
June 13	Friday	Graduate Commencement
June 14	Saturday	Undergraduate Commencement

### Summer Session 2025

June 14	Saturday	Classes begin
August 22	Friday	Last day of classes
August 23	Saturday	Commencement

### University Holidays

September 2, 2024	Monday	Labor Day
November 28-29 2024	Thursday-Friday	Thanksgiving
December 25-31, 2024	Wednesday-Tuesday	Winter Holiday
January 1 2025	Wednesday	New Year's Day
January 20, 2025	Monday	Martin Luther King Jr. Day
May 26, 2025	Monday	Memorial Day
June 19, 2025	Thursday	Juneteenth
July 4, 2025	Friday	Independence Day

## 2024-2025 Academic Calendar: Semester System

### Autumn Semester 2024

August 5-14	Monday-Wednesday	Orientation for first-year & JD transfer students
August 17	Saturday	Classes begin
November 25	Monday	Last day of classes
December 4-18	Wednesday-Wednesday	Final examination period

### Spring Semester 2025

January 4	Saturday	Classes begin
April 21	Monday	Last day of classes

April 30-May 15	Wednesday-Thursday	Final examination period
May 17	Saturday	Sturm College of Law Commencement

## Summer Semester 2025

May 16	Friday	Classes begin
July 16	Wednesday	Last day of classes
July 22-28	Tuesday-Monday	Final examination period

## University Holidays

September 2, 2024	Monday	Labor Day
November 28-29, 2024	Thursday-Friday	Thanksgiving
January 20, 2025	Monday	Martin Luther King Jr. Day
June 19, 2025	Thursday	Juneteenth
July 4, 2025	Friday	Independence Day

# University's Non Discrimination Statement

The information below is accurate as of the date of publication of the Bulletin. For the current version of the University's Non-Discrimination Statement and current contact information for the Office of Equal Opportunity & Title IX (EOIX), please visit the webpages for the Non-Discrimination Statement (<https://www.du.edu/equalopportunity/non-discrimination-statement/>) and EOIX Staff (<https://www.du.edu/equalopportunity/who-we-are/>)

### University's Non-Discrimination Statement

The University of Denver prohibits discrimination on the basis of race, color, national origin, ancestry, age, religion, creed, disability, sex, sexual orientation, gender identity, gender expression, marital status, pregnancy, genetic information, military enlistment, or veteran status, and any other class of individuals protected from discrimination under federal, state, or local law, regulation, or ordinance in any of the University's educational programs and activities, and in the employment (including application for employment) and admissions (including application for admission) context, as required by Title IX of the Education Amendments of 1972; the Americans with Disabilities Act; Section 504 of the Rehabilitation Act of 1973; Title VI and VII of the Civil Rights Act of 1964; the Age Discrimination Act of 1975; the Age Discrimination in Employment Act of 1967; the Equal Pay Act; the Colorado Equal Pay for Equal Work Act; the Colorado Protecting Opportunities and Workers' Rights ("POWR") Act; and any other federal, state, and local laws, regulations, or ordinances that prohibit discrimination, harassment, and/or retaliation.

The University prohibits unlawful harassment of students, employees, and third parties on the basis of any protected characteristic as identified above.

The University also prohibits retaliation against any individual for the purpose of interfering with any right or privilege secured by University policy or law, or because the individual makes a good faith report or formal complaint, testifies, assists, participates, or refuses to participate in any manner in an investigation, proceeding, or hearing under the University's Comprehensive Discrimination & Harassment Procedures or Title IX Sexual Harassment Procedures.

The University has designated the Associate Vice Chancellor for Equal Opportunity & Title IX (AVC for EOIX) to coordinate the University's compliance with federal and state civil rights laws regarding protected characteristics, including Title IX, the Age Discrimination Act of 1975, and those other laws and regulations referenced above:

Marti McCaleb, JD

Associate Vice Chancellor for Equal Opportunity & Title IX and Title IX Coordinator

Office of Equal Opportunity & Title IX

(303) 871-7016

<https://www.du.edu/equalopportunity/index.html> ([https://www.du.edu/equalopportunity%20/t%20%22\\_blank/](https://www.du.edu/equalopportunity%20/t%20%22_blank/))

[titleix@du.edu](mailto:titleix@du.edu) (%20titleix@du.edu) #or [Marti.McCaleb@du.edu](mailto:Marti.McCaleb@du.edu)

The University complies with all federal and state laws that protect individuals with disabilities from discrimination based on their disability or perceived disability status. As such, reasonable accommodations and auxiliary aids and services are available to individuals with disabilities when such modifications and services are necessary to access the University's programs and services. The University's ADA/504 Coordinator is

Joshua Kaufman

ADA Coordinator

## Unit of Credit

### Unit of Credit

Credit hours are the unit of measure of the amount of work represented by specified learning outcomes in an academic program. Academic programs at the University of Denver are scheduled on both quarter and semester (College of Law) calendars. Each academic program specifies the number of (quarter- or semester-hour) credits required. Courses award credit based on learning outcomes for the course. For lecture courses, one credit hour represents one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-classroom student work each week the quarter or semester. Credit for non-lecture courses such as laboratories, internships, practica, studios or music performance classes represent equivalent learning outcomes. The amount of scheduled times for these courses vary.

More information regarding the University of Denver's credit guidelines and instructional methodology definitions can be found on the Registrar website (<https://www.du.edu/registrar/course/credithourguidelines.html>).

## Dual Degree Programs

Dual Undergraduate-Graduate Degree Programs (p. 16)

Flexible Dual Degree Programs (p. 41)

Formal Dual Graduate Degrees (p. 42)

## Dual Undergraduate-Graduate Degree Programs

### Dual Undergraduate-Graduate Degree Programs

A Dual Undergraduate-Graduate Degree Program is an institutionally approved program in which a DU undergraduate student begins taking classes toward a graduate degree program prior to earning a baccalaureate degree. Both degrees must be earned within five years of matriculation into the undergraduate degree program. Students pursuing a dual degree with a Juris Doctorate must earn both degrees within six years.

The programs may reduce a limited number of both undergraduate and graduate credit hours toward both degrees.

The amount of the credit hour reduction is variable across programs. To be admitted, a student's academic progress must demonstrate that the requirements of the program can be completed within the set time-frame.

Undergraduates still need to meet all normal core, major, minor and total credit hour requirements of their respective majors and minors before receiving the undergraduate degree. Graduate coursework is usually taken during the undergraduate "senior" year. Students should be admitted to the dual undergraduate-graduate program *before* taking graduate courses since undergraduate students generally may not take graduate courses. Usually, no more than 30 hours of electives may be used in the senior year to begin the graduate/professional program. Only graduate credit may be counted for the graduate degree. The total number of credit hours required varies by department. All requirements of the graduate or professional program need to be completed before receiving the advanced degree.

- For students enrolled in a dual degree program, the University will award the undergraduate degree at the time it is earned.
- A student who chooses not to continue on for the graduate degree may count the graduate courses, if approved as relevant by the advisor, toward the undergraduate degree (Students should visit the appropriate college or school for opt-out options and requirements).
- Students enrolled in the dual undergraduate-graduate program who have been awarded the BA/BS degree, completed all required coursework and are working on a thesis may be eligible to enroll in graduate continuous enrollment.

### Dual Undergraduate-Graduate Financial Aid

Eligibility for financial aid differs for undergraduate and graduate students and it differs for institutional aid and federal aid. Students enrolled in dual degree programs are considered graduate students for federal financial aid purposes after attaining 198 credit hours even if the student has not met the undergraduate degree requirements. Federal regulations do not allow students in dual degree programs who have completed four academic years (defined as 198 credit hours) to continue to receive undergraduate aid. Students in the law school dual degree program are aided as graduate students after three undergraduate academic years (149 hours for federal aid purposes). While undergraduate merit or need-based institutional grant

aid are not available for fifth-year dual-degree students, each graduate department may offer graduate students grant or scholarship funds at their discretion. Students should contact their graduate program for details on available funding for the fifth year.

### **Institutional Aid Eligibility Differs From Federal Aid Eligibility**

#### *Institutional Aid*

The Financial Aid office expects first-time, first-year undergraduate students to be eligible for consideration for institutional merit or need-based undergraduate financial aid for a maximum of four academic years from the point of initial enrollment (excluding summer and interterm periods), or until the student earns the bachelor's degree, whichever comes first. For institutional aid eligibility for dual degree students the university defines four academic years as up to 12 quarters of fall, winter, spring enrollment. Students who receive any amount of credit in a quarter are considered to be enrolled. If a student is not receiving aid in one or more of those enrolled quarters, the timeline for 12 quarters of aid eligibility continues. For example, a student may not continue to receive undergraduate aid into a 13<sup>th</sup> quarter of enrollment due to not receiving aid or not accepting aid in one or more of the prior 12 quarters of enrollment. It is not the intent of this policy to cut off students from twelve quarters of fall, winter, spring institutional aid consideration, but it also is not the intent to allow students who are enrolled in dual degree programs to continue into their fifth year of enrollment as undergraduate students. Any student who has taken the undergraduate degree is no longer eligible for undergraduate institutional aid regardless of the number of quarters of aid already received.

#### *Federal Aid*

For federal aid purposes dual degree students automatically become graduate students in the next enrollment period after attaining 198 hours of earned or accepted credit. Any dual degree student who has completed their undergraduate degree requirements is considered a graduate student regardless of the number of quarters of prior enrollment. For example, a student who has accelerated their program with outside credits or additional credits during prior academic years (overload enrollment, interterms, summer, AP or IB) and completes their baccalaureate degree or reaches the credit threshold stated above is automatically treated as a graduate student for federal aid purposes regardless of the number of quarters of prior enrollment or prior aid consideration.

### **Dual Undergraduate-Graduate Admission and Records Procedures**

The following must be followed consistently and accurately:

- Students are admitted to dual undergraduate-graduate degree programs by the graduate admission unit. The graduate unit follows all normal admission procedures and the student must meet all admission criteria for the graduate program other than receipt of the baccalaureate degree. Students should be admitted to the dual undergraduate-graduate program as early as practical for financial aid and other reasons. They must be admitted to the dual undergraduate-graduate program by the start of the first term that the student reaches senior standing (135 earned credits).
- The effective term for admission should be the term in which the student is permitted to take graduate courses. For example, if the student's senior year begins in the fall and the student meets admission criteria and may begin taking graduate courses in the subsequent spring term, the admission term should be that spring.
- Graduate units are responsible for assuring that the student information is accurate.

**Note:** A student who receives a bachelor's degree and was not previously enrolled in a dual undergraduate-graduate program is **not** eligible to return and enroll in a graduate program and reduce the number of credit hours for the graduate degree.

## **College of Arts, Humanities and Social Sciences**

### **Master of Arts in Art History or Master of Arts in Art History with a Concentration in Museum Studies and Bachelor of Arts in Art History**

- Undergraduate-level credits required with the dual degree: 171
- Undergraduate credit reduction with dual degree: 12 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 56
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 227

All students pursuing the dual BA in Art History/MA in Art History, Concentration in Museum Studies are required to complete all degree requirements for both the BA and MA degrees.

### **Master of Arts in Art History, Master of Arts in Art History with a Concentration in Museum Studies**

Admission Requirements (p. 88)

Degree Requirements (p. 89)

## **Bachelor of Arts in Art History**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/schoolofartandarthistory/#programstext>)

## **Master of Arts in Psychology and Bachelor of Arts or Bachelor of Science in Psychology**

- Undergraduate-level credits required with the dual degree: 183
- Undergraduate credit reduction with dual degree: 0 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 45
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 228

All students pursuing the dual BA or BS in Psychology/MA in Psychology are required to complete all degree requirements for both the BA/BS and MA degrees.

## **Master of Arts in Psychology**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/arts-humanities-and-social-sciences/psychology/#admissionrequirementsstext>)

## **Daniels College of Business**

### **Master of Accountancy and Bachelor of Science in Accounting**

- Undergraduate-level credits required with dual degree: 186
- Undergraduate credit reduction with dual degree: 0 credits from the original 186 required for the undergraduate degree
- Graduate-level credits required with dual degree: 40
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 226

All students pursuing the dual Bachelor of Science in Accounting/Master's in Accountancy are required to complete all degree requirements for both the BS and Master's. Eight credits from the graduate program are cross-counted to meet the undergraduate degree requirements. Please contact the department for details.

### **Master of Accountancy**

Admission Requirements (p. 436)

Degree Requirements (p. 437)

### **Bachelor of Science in Accounting**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/accounting/#programofstudy>)

### **Master of Science in Business Analytics and Bachelor of Arts, Bachelor of Science, or Bachelor of Science in Chemistry**

- Undergraduate-level credits required with dual degree: 171
- Undergraduate credit reduction with dual degree: 12 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 58
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 229

All students pursuing the dual degree are required to complete all degree requirements for both the bachelor and master's degrees.

### **Master of Science in Business Analytics**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/informationtechnology/#admissionrequirements>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/informationtechnology/#programofstudy>)

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/accounting/#programofstudytext>)

### Bachelor of Science in Business Administration

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>)

## Master of Science in Real Estate and Bachelor of Arts, Bachelor of Science, or Bachelor of Science in Chemistry

- Undergraduate-level credits required with dual degree: 171
- Undergraduate credit reduction with dual degree: 12 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 219

All students pursuing the dual degree are required to complete all degree requirements for both the bachelor and master's degrees.

### Master of Science in Real Estate and the Built Environment

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#admissionrequirementstext>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#programofstudytext>)

## **Bachelor of Arts**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofarts/>)

## **Bachelor of Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>)

Degree Requirements - Chemistry (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinchemistry/>)

## **Master of Science in Real Estate and Bachelor of Fine Arts**

- Undergraduate-level credits required with dual degree: 177
- Undergraduate credit reduction with dual degree: 12 credits from the original 189 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 225

All students pursuing the dual degree are required to complete all degree requirements for both the bachelor and master's degrees.

## **Master of Science in Real Estate and the Built Environment**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#admissionrequirementstext>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#programofstudytext>)

## **Bachelor of Fine Arts**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bacheloroffinearts/>)

## **Master of Science in Real Estate and Bachelor of Music**

- Undergraduate-level credits required with dual degree: 182
- Undergraduate credit reduction with dual degree: 12 credits from the original 194 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 230

All students pursuing the dual degree are required to complete all degree requirements for both the bachelor and master's degrees.

## **Master of Science in Real Estate and the Built Environment**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#admissionrequirementstext>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestateandconstructionmanagement/#programofstudytext>)

## **Bachelor of Music**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofmusic/>)

## **Master of Science in Real Estate and Bachelor of Science in Business Administration or Bachelor of Science in Accounting**

- Undergraduate-level credits required with dual degree: 173 for BSBA or 174 for BSACC
- Undergraduate credit reduction with dual degree: 12 credits from the original 185 required for the BSBA degree or 186 for the BSACC degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 221 for MS and BSBA degrees or 222 for MS and BSACC degrees

All students pursuing the dual degree are required to complete all degree requirements for both the bachelor and master's degrees.

### **Master of Science in Real Estate and the Built Environment**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestatedandconstructionmanagement/#admissionrequirementstext>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielscollegeofbusiness/realestatedandconstructionmanagement/#programofstudytext>)

### **Bachelor of Science in Accounting**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/accounting/#programofstudytext>)

### **Bachelor of Science in Business Administration**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>)

## **Daniel Felix Ritchie School of Engineering and Computer Science**

Up to nine credit hours of qualifying coursework (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees. Other degree requirements and restrictions will be as described in the Graduate Bulletin for the appropriate M.S. program.

Students must satisfy the B.S. and M.S. degree requirements separately with the exception that a maximum of nine credit hours of qualifying coursework (3000- or 4000-level) taken to satisfy B.S. requirements can also be used to fulfill nine credit hours of M.S. degree requirements. Admission to the Dual Undergraduate-Graduate Degree Program does not require completion of the bachelor's degree; however, admission to the M.S. degree will require completion of the bachelor's degree.

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Game Development**

- Undergraduate-level credits: 183
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 219

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

### **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Engineering (p. 293)

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Engineering (p. 295)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

### **Bachelor of Science in Game Development**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>)

## **Master of Science in Computer Science and Bachelor of Science in Game Development**

- Undergraduate-level credits: 183
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.

- Graduate-level credits required with dual degree: 48
- Minimum number of total undergraduate and graduate credits required with dual degree: 222

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

### **Master of Science in Computer Science**

Admission Requirements - Computer Science (p. 243)

Degree Requirements - Computer Science (p. 245)

### **Bachelor of Science in Game Development**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>)

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Computer Science**

- Undergraduate-level credits: 183
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 219

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

### **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Engineering (p. 293)

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Engineering (p. 295)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

### **Bachelor of Science in Computer Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>)

## **Master of Science in Computer Science and Bachelor of Science in Computer Science**

- Undergraduate-level credits: 183
- Graduate-level credits required with dual degree: 36
- Minimum number of total undergraduate and graduate credits required with dual degree: 219

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

### **Master of Science in Computer Science**

Admission Requirements - Computer Science (p. 243)

Degree Requirements - Computer Science (p. 245)

### **Bachelor of Science in Computer Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>)

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Mechanical Engineering**

- Undergraduate-level credits: 192
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 228

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Engineering (p. 293)

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Engineering (p. 295)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

## **Bachelor of Science in Mechanical Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinmechanicalengineering/>)

## **Master of Science in Computer Science and Bachelor of Science in Mechanical Engineering**

- Undergraduate-level credits: 192
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 48
- Minimum number of total undergraduate and graduate credits required with dual degree: 231

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Computer Science**

Admission Requirements - Computer Science (p. 243)

Degree Requirements - Computer Science (p. 245)

## **Bachelor of Science in Mechanical Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinmechanicalengineering/>)

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Computer Engineering**

- Undergraduate-level credits: 192
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 228

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Engineering (p. 293)

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Engineering (p. 295)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

## **Bachelor of Science in Computer Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceincomputerengineering/>)

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Electrical Engineering**

- Undergraduate-level credits: 197
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 233

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Materials Science, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Engineering (p. 293)

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Engineering (p. 295)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

## **Bachelor of Science in Electrical Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinelectricalengineering/>)

## **Master of Science in Computer Science and Bachelor of Science in Computer Engineering**

- Undergraduate-level credits: 192
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 48
- Minimum number of total undergraduate and graduate credits required with dual degree: 231

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Computer Science**

Admission Requirements - Computer Science (p. 243)

Degree Requirements - Computer Science (p. 245)

## **Bachelor of Science in Computer Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceincomputerengineering/>)

## **Master of Science in Computer Science and Bachelor of Science in Electrical Engineering**

- Undergraduate-level credits: 197
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 48
- Minimum number of total undergraduate and graduate credits required with dual degree: 236

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Computer Science**

Admission Requirements - Computer Science (p. 243)

Degree Requirements - Computer Science (p. 245)

## **Bachelor of Science in Electrical Engineering**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinelectricalengineering/>)

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Engineering, Mechanical Engineering or Mechatronic Systems Engineering and Bachelor of Science in Biological Sciences, Biochemistry, Chemistry, Environmental Chemistry, Math, Molecular Biology or Physics**

- Undergraduate-level credits: 183
- 9 credit hours (3000- or 4000-level) may be used to satisfy degree requirements for both the B.S. and M.S. degrees.
- Graduate-level credits required with dual degree: 45
- Minimum number of total undergraduate and graduate credits required with dual degree: 219

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

## **Master of Science in Bioengineering, Computer Engineering, Electrical Engineering, Mechanical Engineering and Mechatronic Systems Engineering**

Admission Requirements - Mechanical and Materials Engineering (p. 317)

Admission Requirements - Electrical and Computer Engineering (p. 264)

Degree Requirements - Mechanical and Materials Engineering (p. 319)

Degree Requirements - Electrical and Computer Engineering (p. 267)

## **Bachelor of Science in Biological Sciences, Biochemistry, Chemistry, Environmental Chemistry, Math, Molecular Biology and Physics**

Degree Requirements - Biological Sciences (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/biology/#programofstudytext>)

Degree Requirements - Biochemistry (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/chemistryandbiochemistry/#programofstudytext>)

Degree Requirements - Chemistry (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/chemistryandbiochemistry/#programofstudytext>)

Degree Requirements - Environmental Chemistry (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/chemistryandbiochemistry/#programofstudytext>)

Degree Requirements - Math (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mathematics/#programofstudytext>)

Degree Requirements - Molecular Biology (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/biology/#programofstudytext>)

Degree Requirements - Physics (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/physicsandastronomy/#programofstudytext>)

## **Master of Science in Data Science and Bachelor of Science in Computer Science**

- Undergraduate-level credits required with the dual degree: 171
- The BS degree is reduced by 12 credits from the original 183 required for the undergraduate degree, waiving the following three data science courses: COMP 3006, 3007 and 3008
- Graduate-level credits required with dual degree: 48
- Minimum number of total undergraduate and graduate credits required with dual degree: 219

All students pursuing the dual degree program are required to complete all degree requirements for both the Bachelor's and Master's.

### **Master of Science in Data Science**

Admission Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielfelixritchieschoolofengineeringandcomputerscience/computerscience/#admissionrequirementstext>)

Degree Requirements (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielfelixritchieschoolofengineeringandcomputerscience/computerscience/#programofstudytext>)

### **Bachelor of Science in Computer Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>)

## **Division of Natural Sciences and Mathematics**

### **Master of Science in Geographic Information Science and Bachelor of Arts in Environmental Science**

- Undergraduate-level credits required with dual degree: 180
- Undergraduate credit reduction with dual degree: 3 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 228

All students pursuing the dual BA in Environmental Science and the MS in Geographic Information Science are required to complete all degree requirements for both the BA and the MS degrees.

### **Master of Science in Geographic Information Science**

Admission Requirements (p. 849)

Degree Requirements (p. 851)

### **Bachelor of Arts in Environmental Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/geographyandtheenvironment/#programofstudytext>)

### **Master of Science in Geographic Information Science and Bachelor of Science in Environmental Science**

- Undergraduate-level credits required with dual degree: 180
- Undergraduate credit reduction with dual degree: 3 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 228

All students pursuing the dual BS in Environmental Science and the MS in Geographic Information Science are required to complete all degree requirements for both the BS and the MS degrees.

## **Master of Science in Geographic Information Science**

Admission Requirements (p. 849)

Degree Requirements (p. 851)

## **Bachelor of Science in Environmental Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/geographyandtheenvironment/#programofstudytext>)

## **Master of Science in Geographic Information Science and Bachelor of Arts in Geography**

- Undergraduate-level credits required with dual degree: 180
- Undergraduate credit reduction with dual degree: 3 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 228

All students pursuing the dual BA in Geography and the MS in Geographic Information Science are required to complete all degree requirements for both the BA and the MS degrees.

## **Master of Science in Geographic Information Science**

Admission Requirements (p. 849)

Degree Requirements (p. 851)

## **Bachelor of Arts in Geography**

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/geographyandtheenvironment/#programofstudytext>)

## **Graduate School of Social Work**

### **Master of Social Work and Bachelor of Arts (Traditional Bachelor's Program), Bachelor of Science or Bachelor of Science in Chemistry**

- Undergraduate-level credits required with dual degree: 153
- Undergraduate credit reduction with dual degree: 30 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 81
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 234

All students pursuing the dual BA (Traditional Bachelor's Program), BS or BS in Chemistry and the MSW are required to complete all degree requirements for both the BA or BS and the MSW degrees.

## **Master of Social Work**

Admission Requirements (p. 527)

Degree Requirements (p. 529)

## **Bachelor of Arts (Traditional Bachelor's Program)**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofarts/>)

## **Bachelor of Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscience/>)

Degree Requirements - Bachelor of Science in Chemistry (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinchemistry/>)

## **Master of Social Work and Bachelor of Science in Accounting**

- Undergraduate-level credits required with dual degree: 156
- Undergraduate credit reduction with dual degree: 30 credits from the original 186 required for the undergraduate degree
- Graduate-level credits required with dual degree: 81
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 237

All students pursuing the dual BS in Accounting and the MSW are required to complete all degree requirements for both the BS and the MSW degrees.

### **Master of Social Work**

Admission Requirements (p. 527)

Degree Requirements (p. 529)

### **Bachelor of Science in Accounting**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinaccounting/>)

## **Master of Social Work and Bachelor of Science in Business Administration**

- Undergraduate-level credits required with dual degree: 155
- Undergraduate credit reduction with dual degree: 30 credits from the original 185 required for the undergraduate degree
- Graduate-level credits required with dual degree: 81
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 236

All students pursuing the dual BS in Business Administration and the MSW are required to complete all degree requirements for both the BS and the MSW degrees.

### **Master of Social Work**

Admission Requirements (p. 527)

Degree Requirements (p. 529)

### **Bachelor of Science in Business Administration**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>)

## **Morgridge College of Education**

## **Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program and Bachelor of Arts, Bachelor of Science or Bachelor of Science in Chemistry**

- Undergraduate-level credits required with dual degree: 174
- Undergraduate credit reduction with dual degree: 9 credits from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 52
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 226

All students pursuing the dual BA or BS degree/MA in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program are required to complete all degree requirements for both the BA or BS and MA degrees.

### **Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program**

Admission Requirements (p. 761)

Degree Requirements (p. 767)

### **Bachelor of Arts**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofarts/>)

## Bachelor of Science

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscience/>)

Degree Requirements- Chemistry (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorsandminors/chemistryandbiochemistry/#programofstudytext>)

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program and Bachelor of Fine Arts

- Undergraduate-level credits required with dual degree: 180
- Undergraduate credit reduction with dual degree: 9 credits from the original 189 required for the undergraduate degree
- Graduate-level credits required with dual degree: 52
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 232

All students pursuing the dual BA or BS degree/MA in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program are required to complete all degree requirements for both the BA or BS and MA degrees.

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program

Admission Requirements (p. 761)

Degree Requirements (p. 767)

## Bachelor of Fine Arts

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bacheloroffinearts/>)

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program and Bachelor of Music

- Undergraduate-level credits required with dual degree: 185
- Undergraduate credit reduction with dual degree: 9 credits from the original 194 required for the undergraduate degree
- Graduate-level credits required with dual degree: 52
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 237

All students pursuing the dual BA or BS degree/MA in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program are required to complete all degree requirements for both the BA or BS and MA degrees.

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program

Admission Requirements (p. 761)

Degree Requirements (p. 767)

## Bachelor of Music

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofmusic/>)

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program and Bachelor of Science in Accounting

- Undergraduate-level credits required with dual degree: 177
- Undergraduate credit reduction with dual degree: 9 credits from the original 186 required for the undergraduate degree
- Graduate-level credits required with dual degree: 52
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 229

All students pursuing the dual BA or BS degree/MA in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program are required to complete all degree requirements for both the BA or BS and MA degrees.

## Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program

Admission Requirements (p. 761)

Degree Requirements (p. 767)

### **Bachelor of Science in Accounting**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinaccounting/>)

## **Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program and Bachelor of Science in Business Administration**

- Undergraduate-level credits required with dual degree: 176
- Undergraduate credit reduction with dual degree: 9 credits from the original 185 required for the undergraduate degree
- Graduate-level credits required with dual degree: 52
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 228

All students pursuing the dual BA or BS degree/MA in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program are required to complete all degree requirements for both the BA or BS and MA degrees.

### **Master of Arts in Curriculum, Instruction and Teaching with a Concentration in Teacher Education Program**

Admission Requirements (p. 761)

Degree Requirements (p. 767)

### **Bachelor of Science Business Administration**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>)

## **Stur姆 College of Law**

### **Juris Doctor and Bachelor of Arts (Traditional Bachelor's Program), Bachelor of Science**

- Undergraduate-level credits required with dual degree: 138 quarter hours
- Undergraduate credit reduction with dual degree: 45 quarter hours from the original 183 required for the undergraduate degree
- Graduate-level credits required with dual degree: 135 quarter hours (90 semester hours)
- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 273 quarter hours

All students pursuing the dual BA or BS degree/Juris Doctor are required to complete all degree requirements for both the BA or BS and JD degrees.

### **Juris Doctor**

Admission Requirements (p. 893)

Degree Requirements (p. 896)

### **Bachelor of Arts**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofarts/>)

### **Bachelor of Science**

Degree Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscience/>)

## **University College**

### **Master of Arts in Communication Management and Bachelor of Arts in Communication Arts, Bachelor of Arts in Global Studies or Bachelor of Arts in Leadership and Organization Studies (Bachelor of Arts Completion Program)**

- Undergraduate-level credits required with the dual degree: 172
- Undergraduate credit reduction with dual degree: 8 credits from the original 180 required for the undergraduate degree
- Graduate-level credits required with dual degree: 48

- Graduate credit reduction: 0
- Minimum number of credits required with dual degree: 220

All students pursuing the dual BA in Global Studies, BA in Communication Arts or BA in Leadership and Organization Studies (BA Completion Program)/MA in Communication Management are required to complete all degree requirements for both the BA and MA degrees.

## **Master of Arts in Communication Management**

Admission Requirements (p. 1004)

Degree Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/universitycollege/globalcommerceandtransportation/#programofstudytext>)

## **Flexible Dual Degree Programs**

### **Flexible Dual Degree Programs**

Students may propose a flexible dual degree program that links two master's degrees or a master's degree and a JD degree.

Students must submit the proposal for the flexible dual degree no later than one term prior to matriculation into the second degree.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must be matriculated in both programs for one full academic year (three quarters or two semesters). Students in a one year program must matriculate into the second program no later than the first admission term following fifty percent (50%) coursework completion of the first program.

Students are required to complete both degree programs within five years of matriculation in to the first program. Students must apply for graduation for both programs and both degrees will be awarded at the same time.

Any significant changes to the approved program require the student to resubmit a revised proposal packet to the deans/chairs/directors and advisors of both programs and the Office of Graduate Education.

### **Proposing a Flexible Dual Degree**

To propose a flexible dual degree, the student must first apply to and be admitted by both programs, pay application fees and admissions deposits for both programs, and seek the counsel of an advisor in each program. Admission into each program does not take the place of filing a Flexible Dual Degree proposal (found on the Office of Graduate Education's website (<https://www.du.edu/graduate-education/current-student-resources/academic-resources/>)) nor guarantee approval of the proposal.

The dean, chair, or director of each degree program and both program advisors must carefully compare the requirements for each program and approve the proposed curriculum. The student must then submit a copy of the original requirements for each degree (printout from the unit website or copy from the student handbook is acceptable), a detailed course plan showing all proposed courses, the credit hours, and non-coursework requirements; a one to two- page statement of the educational/career objectives stating the reasons for the specific course selection and which courses most clearly serve the educational and career goals of the student; and current official/unofficial transcript(s) showing any work already completed towards the proposed program and degrees.

The student then submits the documents listed above to the Office of Graduate Education, which reviews and decides on the proposals. Proposals with errors or course/program inconsistencies will be returned for revision.

Once the proposal is approved, the student will be entered into the University computer system as a flexible dual degree student.

## Curriculum Structure

Students may propose any flexible dual degree program that seems reasonable to them and their advisors for academic and career objectives. Only elective courses may be counted among the hours used for reduction.

All the core requirements of each program must be preserved and cannot be overlapped or waived. Credit reduction of elective courses will be limited to the following for each program as determined by the original number of credit hours required for each degree.

Required credit hours for degrees and flexible dual degree reduction allowed:

- 45-60 quarter hour degree program: Reduce a maximum of 10 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 11-15 quarter hours. A reduction of 15 quarter hours from the original degree will be the maximum allowed when combining outside transfer hours and the reduction of degree hours.
- 61-75 quarter hour degree program: Reduce a maximum of 12 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 15-19 quarter hours. A reduction of 25 quarter hours from the original degree will be the maximum allowed when combining outside transfer hours and the reduction of degree hours.
- 76-90 quarter hour degree program: Reduce or cross-count a maximum of 15 quarter hours for the one degree without outside transfer credit. The traditional maximum outside transfer credit allowed in this case would be 19-22.5 quarter hours. A reduction of 35 quarter hours will be the maximum allowed from the original degree when combining outside transfer hours and the reduction of degree hours.

Note: Credits at the Sturm College of Law for a JD degree are calculated using semester hours: 1 semester hour equals 1.5 quarter hours. A 90 semester hour JD degree may only be reduced by a maximum of 10 semester hours for a total of 80 semester hours completed for the JD (10 semester hours equals 15 quarter hours).

## Non-Course Requirements

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Education in writing of their intention to nullify the flexible dual degree proposal. Students must complete all the original requirements for the remaining degree in order to graduate.

# Formal Dual Degree Programs

## Formal Dual Degree Programs

A formal dual degree program links two master's degrees or a master's program with a JD program and leads to two degrees. The Graduate Council and the Senior Vice Provost for Research and Graduate Education must approve all proposals for formal dual degree programs.

There are two types of formal dual degree programs. Type one incorporates two distinct disciplines where students complete two separate sets of core courses and reduce electives. Type two incorporates two areas of study within one discipline where students can cross-count a common set of core courses and take separate sets of electives.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must be matriculated in both programs for one full academic year (three quarters or two semesters). Students in a one year program must matriculate into the second program no later than the first admission term following fifty percent (50%) coursework completion of the first program.

Students are required to complete both degree programs within five years of matriculation in to the first program. Students must apply for graduation for both programs and both degrees will be awarded at the same time.

With fully developed and approved curricula, these programs are available to graduate students who are admitted to both schools and submit the Graduate Formal Dual Degree Verification Form (found on the Office of Graduate Education's website (<https://www.du.edu/graduate-education/current-student-resources/academic-resources/>)) during the program's first term. For program details, please contact the school, college or department.

## Non-Course Requirements

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Education in writing of their intention to nullify the formal dual degree. Students must complete all the original requirements for the remaining degree in order to graduate.

## **Formal Dual Degree Programs**

A formal dual degree program links two master's degrees or a master's program with a JD program and leads to two degrees. The Graduate Council and the Senior Vice Provost for Research and Graduate Education must approve all proposals for formal dual degree programs.

There are two types of formal dual degree programs. Type one incorporates two distinct disciplines where students complete two separate sets of core courses and reduce electives. Type two incorporates two areas of study within one discipline where students can cross-count a common set of core courses and take separate sets of electives.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must be matriculated in both programs for one full academic year (three quarters or two semesters). Students in a one year program must matriculate into the second program no later than the first admission term following fifty percent (50%) coursework completion of the first program.

Students are required to complete both degree programs within five years of matriculation in to the first program. Students must apply for graduation for both programs and both degrees will be awarded at the same time.

With fully developed and approved curricula, these programs are available to graduate students who are admitted to both schools and submit the Graduate Formal Dual Degree Verification Form (found on the Office of Graduate Education's website (<https://www.du.edu/graduate-education/current-student-resources/academic-resources/>)) during the program's first term. For program details, please contact the school, college or department.

## Non-Course Requirements

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Education in writing of their intention to nullify the formal dual degree. Students must complete all the original requirements for the remaining degree in order to graduate.

## Master of Arts in Geography and Juris Doctor

- JD credits required with dual degree: 80 semester credits
- JD credit reduction with dual degree: 10 semester credits from the original 90 required for the JD
- MA credits required with dual degree: 35 quarter credits
- MA credit reduction: 10 quarter credits from the original 45 required for the MA
- Minimum number of credits required with dual degree: 115 (80 semester credits and 35 quarter credits)

- MSW-Advanced Standing credit reduction with dual degree: 15 from the original 54 required for the MSW-Advanced Standing
- MAPSC (completed at Iliff School of Theology) credits required with dual degree: 68 quarter credits
- MAPSC (completed at Iliff School of Theology) credit reduction: 12 credits from the original 80 required for the MAPSC
- Minimum number of credits required with dual degree: 66 quarter credits for the MSW or 39 quarter credits for the MSW-Advanced Standing completed at the University of Denver, 68 quarter credits completed at Iliff School of Theology

A student must apply for the MSW and MAPSC separately and be accepted into each program. Additionally, verification of enrollment in the MAPSC degree program at the Iliff School of Theology is required in order to qualify for the dual degree.

### Master of Social Work

Admission Requirements (p. 527)

Degree Requirements (p. 529)

## Master of Social Work and Master in Social Justice and Ethics

- MSW credits required with dual degree: 66 quarter credits completed at the University of Denver
- MSW credit reduction with dual degree: 15 from the original 81 required for the MSW
- MSW-Advanced Standing credits required with dual degree: 39 quarter credits completed at the University of Denver
- MSW-Advanced Standing credit reduction with dual degree: 15 from the original 54 required for the MSW-Advanced Standing
- MSJE (completed at Iliff School of Theology) credits required with dual degree: 68 quarter credits
- MSJE (completed at Iliff School of Theology) credit reduction: 12 credits from the original 80 required for the MSJE
- Minimum number of credits required with dual degree: 66 quarter credits for the MSW or 39 quarter credits for the MSW-Advanced Standing completed at the University of Denver, 68 quarter credits completed at Iliff School of Theology

A student must apply for the MSW and MSJE separately and be accepted into each program. Additionally, verification of enrollment in the MSJE degree program at the Iliff School of Theology is required in order to qualify for the dual degree.

### Master of Social Work

Admission Requirements (p. 527)

Degree Requirements (p. 529)

## Master of Social Work and Master of Theological Studies

- MSW credits required with dual degree: 66 quarter credits completed at the University of Denver
- MSW credit reduction with dual degree: 15 from the original 81 required for the MSW
- MSW-Advanced Standing credits required with dual degree: 39 quarter credits completed at the University of Denver
- MSW-Advanced Standing credit reduction with dual degree: 15 from the original 54 required for the MSW-Advanced Standing
- MTS (completed at Iliff School of Theology) credits required with dual degree: 60 quarter credits
- MTS (completed at Iliff School of Theology) credit reduction: 12 credits from the original 72 required for the MTS
- Minimum number of credits required with dual degree: 66 quarter credits for the MSW or 39 quarter credits for the MSW-Advanced Standing completed at the University of Denver, 60 quarter credits completed at Iliff School of Theology

A student must apply for the MSW and MTS separately and be accepted into each program. Additionally, verification of enrollment in the MTS degree program at the Iliff School of Theology is required in order to qualify for the dual degree.

## Formal Dual Degree Programs

A formal dual degree program links two master's degrees or a master's program with a JD program and leads to two degrees. The Graduate Council and the Senior Vice Provost for Research and Graduate Education must approve all proposals for formal dual degree programs.

There are two types of formal dual degree programs. Type one incorporates two distinct disciplines where students complete two separate sets of core courses and reduce electives. Type two incorporates two areas of study within one discipline where students can cross-count a common set of core courses and take separate sets of electives.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must be matriculated in both programs for one full academic year (three quarters or two semesters). Students in a one year program must matriculate into the second program no later than the first admission term following fifty percent (50%) coursework completion of the first program.

Students are required to complete both degree programs within five years of matriculation in to the first program. Students must apply for graduation for both programs and both degrees will be awarded at the same time.

With fully developed and approved curricula, these programs are available to graduate students who are admitted to both schools and submit the Graduate Formal Dual Degree Verification Form (found on the Office of Graduate Education's website (<https://www.du.edu/graduate-education/current-student-resources/academic-resources/>)) during the program's first term. For program details, please contact the school, college or department.

## Non-Course Requirements

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Education in writing of their intention to nullify the formal dual degree. Students must complete all the original requirements for the remaining degree in order to graduate.

## Master of Arts in International Development and Master of Social Work

- MSW credits required with dual degree: 66
- MSW credit reduction with dual degree: 15 credits from the original 81 required for the MSW
- MSW-Advanced Standing credits required with dual degree: 39
- MSW-Advanced Standing credit reduction with dual degree: 15 credits from the original 54 required for the MSW-Advanced Standing
- MA credits required with dual degree: 44
- MA credit reduction: 16 credits from the original 60 required for the MA
- Minimum number of credits required with dual degree: 110 with the MSW or 83 with the MSW-Advanced Standing

### Formal Dual Degree Programs

A formal dual degree program links two master's degrees or a master's program with a JD program and leads to two degrees. The Graduate Council and the Senior Vice Provost for Research and Graduate Education must approve all proposals for formal dual degree programs.

There are two types of formal dual degree programs. Type one incorporates two distinct disciplines where students complete two separate sets of core courses and reduce electives. Type two incorporates two areas of study within one discipline where students can cross-count a common set of core courses and take separate sets of electives.

Dual degrees must be pursued concurrently, not consecutively. In order to meet this requirement, students interested in pursuing a dual degree must be matriculated in both programs for one full academic year (three quarters or two semesters). Students in a one year program must matriculate into the second program no later than the first admission term following fifty percent (50%) coursework completion of the first program.

Students are required to complete both degree programs within five years of matriculation in to the first program. Students must apply for graduation for both programs and both degrees will be awarded at the same time.

With fully developed and approved curricula, these programs are available to graduate students who are admitted to both schools and submit the Graduate Formal Dual Degree Verification Form (found on the Office of Graduate Education's website (<https://www.du.edu/graduate-education/current-student-resources/academic-resources/>)) during the program's first term. For program details, please contact the school, college or department.

### Non-Course Requirements

All non-course requirements must be fulfilled for both programs. If one of the non-course requirements of both intended programs is the writing and defense of a thesis, then (with prior approval from both departments) a combined thesis may be written as long as both departments are equally represented (from original proposal to completion) and so long as the most rigorous requirements are adhered to for completion and oral defense.

Students who decide to only complete one degree must inform the units, program advisors and the Office of Graduate Education in writing of their intention to nullify the formal dual degree. Students must complete all the original requirements for the remaining degree in order to graduate.

## Juris Doctor and Master of Laws in Environmental and Natural Resources Law and Policy

- JD credits required with dual degree: 80 semester credits
- JD credit reduction with dual degree: 10 semester credits from the original 90 required for the JD
- LLM credits required with dual degree: 24 semester credits

- LLM credit reduction: 0 semester credits from the original 24 required for the LLM
- Minimum number of credits required with dual degree: 104 semester credits

## Academic Units

Graduate Studies at the University of Denver includes programs in the following academic units:

- College of Arts, Humanities and Social Sciences (p. 65)
- Daniel Felix Ritchie School of Engineering and Computer Science (p. 241)
- Daniels College of Business (p. 341)
- DU-Iliff Joint Doctoral Program in the Study of Religion (p. 446)
- Graduate School of Professional Psychology (p. 469)
- Graduate School of Social Work (p. 524)
- Josef Korbel School of International Studies (p. 585)
- Morgridge College of Education (p. 686)
- College of Natural Sciences and Mathematics (p. 813)
- Sturm College of Law (p. 892)
- University College (p. 988)

# College of Arts, Humanities and Social Sciences

The College of Arts, Humanities, and Social Sciences (CAHSS) is the liberal arts hub of the University of Denver and represents a variety of schools, departments, and programs. Our graduate programs include two top-ranked doctoral programs in English and Literary Arts and in Psychology. Our masters of arts programs range from a MA in Economics to a MA in Music with a concentration in Musicology, and from a MA in Religious Studies to a MA in International and Intercultural Communication - all grounded in academic rigor and focused on launching students toward successful and meaningful post-graduation careers. With about 300 CAHSS graduate students, our student-centered graduate programs feature small class sizes, with supportive faculty who are nationally and internationally recognized for their research and creative endeavors. In our interdisciplinary, highly collaborative environment, we strive to foster meaningful partnerships among students and faculty, support student research opportunities, and provide both theoretical and "real-world" learning opportunities for our graduate students.

## Anthropology

Office: Sturm Hall, Room 146

Mail Code: 2000 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-2406

Email: [anthropology@du.edu](mailto:anthropology@du.edu)

Web Site: <http://www.du.edu/ahss/anthropology> (<http://www.du.edu/ahss/anthropology/>)

The department of anthropology has a research-active faculty that works closely with students in developing their academic and professional interests on a one-on-one basis, in classes, the field, archaeology and ethnographic labs, and the Museum of Anthropology.

Anthropology is the study of human cultural and biological diversity across time and space. It is an interdisciplinary field concerned with topics that cross-cut the natural sciences, social sciences, arts and humanities. In the words of the American cultural anthropologist Alfred Kroeber: "Anthropology is the most humanistic of the sciences and the most scientific of the humanities."

There are three basic options for construction of a master's degree in anthropology: archaeology, cultural anthropology, and museum and heritage studies. Each concentration has its own formal course work, independent study and requirements for graduation.

## Master or Arts in Anthropology with a Concentration in Archaeology

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

#### ANTH 3001 Race, Sex and Evolution (4 Credits)

The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

#### ANTH 3020 Native Religions (4 Credits)

A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channeling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

#### ANTH 3030 Digital Anthropology (4 Credits)

Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

#### ANTH 3040 Anthropologies of Place (4 Credits)

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3060 Cultural Narratives (4 Credits)**

Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non-anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity, both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

**ANTH 3070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Prerequisite: introductory social science course. Cross-listed with ANTH 4070.

**ANTH 3080 Memory and Memorialization (4 Credits)**

The course focuses on how social groups represent, experience and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past- and its materialization through monuments, ruins, and landscapes- are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as "authenticity," "tradition," and "modernity" in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

**ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**ANTH 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

**ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)**

Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

**ANTH 3155 Native American Resistance in the Digital Age (4 Credits)**

Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

**ANTH 3170 Applied Heritage Management (4 Credits)**

Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

**ANTH 3200 Human Origins and Evolution (4 Credits)**

Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

**ANTH 3225 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 3255 Ancient North America (4 Credits)**

This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.

**ANTH 3290 Art and Anthropology (4 Credits)**

Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

**ANTH 3310 Indigenous Environment (4 Credits)**

The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

**ANTH 3320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 3330 Human Rights of Indg Peoples (4 Credits)**

This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

**ANTH 3350 Latin American Archaeology (4 Credits)**

Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

**ANTH 3370 Social Inequalities and Social Justice in Latin America (4 Credits)**

This course uses an intersectional approach to the study of gender, class and ethnicity in Latin America. Intersectionality aims at understanding the interlocking relation between these and other variables, how they are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. The course aims at understanding history, culture and peoples with a special emphasis on examining their heterogeneity, and how such heterogeneity is also related to social inequality. It examines contemporary issues such as women and LGBTQ+ rights, Indigenous movements, human rights, migrations, and economics from the perspective of intersectionality.

**ANTH 3390 Geoarchaeology (4 Credits)**

Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

**ANTH 3470 Applied Anthropology (4 Credits)**

The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

**ANTH 3500 City and Society (4 Credits)**

Examines the recent past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of 'modern' cities in the 19th century and ends with contemporary urban landscapes. Analysis is focused on both the technologies (physical qualities) and aesthetics of urban form. Emphasis is on re-imagining urban design to meet the social equity, cultural diversity, and environmental sustainability challenges of 21st century city life.

**ANTH 3510 The Ancient City (4 Credits)**

The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

**ANTH 3540 The Nature of Language (4 Credits)**

Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

**ANTH 3620 Ethnoarchaeology (4 Credits)**

Ethnography has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

**ANTH 3630 Archaeological Method and Theory (4 Credits)**

This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

**ANTH 3640 Race and Human Evolution (4 Credits)**

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

**ANTH 3655 Indigenous Feminisms (4 Credits)**

This course examines a wide array of Indigenous feminisms. Rather than think of Indigenous feminisms as one static thing, we will inspect the field from multiple viewpoints and perspectives. We will draw from various thematic and transnational contexts across the Americas and Native Pacific in order to analyze the scope and significance of such knowledges, particularly as they relate to broader theories and practices of decolonization. We will begin by examining the foundational inquiries and methods of Indigenous feminist scholarship. Is gender a useful category of analysis? How have Indigenous women thought of gender? How have Indigenous women thought about, and responded to, feminism? With an emphasis on Indigenous scholars and feminists, we will cover a range of topics including (but not limited to) how Indigenous feminism fits into the feminist project, the connection between colonization and violence against Native women, the reclamation of women's initiations, gender and sovereignty, queer indigeneity, Indigenous feminist allies, and decolonial love. We will draw from readings across feminist movements, and as feminist Kanaka Maoli Professor Lani Teves says, we will attempt to "make links between Indigenous feminisms and Latinx feminisms, Black feminisms, and transnational feminisms. Rather than shy away from the tensions that emerge between multiple feminisms, instead we will attempt to cultivate nodes of alliance and solidarity to diversify our feminist tactics."

**ANTH 3660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographical research.

**ANTH 3661 Museums and their Visitors (4 Credits)**

This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors' experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences? Cross listed with ARTH 3661.

**ANTH 3680 Quantitative Methods-Anthropology (4 Credits)**

The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

**ANTH 3701 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

**ANTH 3702 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3703 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3742 Museum Exhibit Development (4 Credits)**

Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

**ANTH 3743 Managing Collections (4 Credits)**

Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

**ANTH 3750 Ethnographic Methods (4 Credits)**

In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association's Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

**ANTH 3790 Field Methods in Archaeology (4 Credits)**

The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field. Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

**ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)**

This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and event natural environment that was used and marked by human action.

**ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)**

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

**ANTH 3875 Research Methods in Anthropology (4 Credits)**

This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

**ANTH 3880 Culture, Ecology, Adaptation (4 Credits)**

This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

**ANTH 3890 Context of Material Culture (4 Credits)**

Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnology, archaeology, folklore, geography, history, art and architecture.

**ANTH 3981 Museum Internship (1-6 Credits)****ANTH 3990 Summer Field School-Archaeology (4-6 Credits)**

Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.

**ANTH 3991 Independent Study (1-15 Credits)****ANTH 3995 Independent Research (1-10 Credits)****ANTH 4000 Advanced Anthropology (4 Credits)****ANTH 4040 Historical Archaeology: Theory and Method (4 Credits)**

Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions, and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus, but address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 2040.

**ANTH 4070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Cross-listed with ANTH 3070.

**ANTH 4200 Native North America (4 Credits)**

Native American cultures north of Mexico. Cross-listed with ANTH 2200.

**ANTH 4220 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 4290 Art and Anthropology (4 Credits)**

This class introduces students to anthropological approaches to the study of art and visual culture. The first part of the course covers foundational work in the field, introducing key concepts as well as methods for viewing and understanding art from a cross-cultural/comparative and interdisciplinary perspective. We examine the relationships among art, technology and the environment, as well as the importance of form, function, style, meaning, and aesthetics in the study of art. The second part addresses issues of contemporary concern in art and anthropology, such as the influence of market forces and tourism on artistic traditions and cultural expressions; the intersection of art and identity; the politics of cultural representation. The course also explores the ethnographic turn in some forms of contemporary art as well as doing ethnography as art.

**ANTH 4320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 4360 Cross-Cultural Perspectives of Women (4 Credits)**

Cross-listed with ANTH 3360.

**ANTH 4370 Sex, Class and Race in Latin America (4 Credits)**

This course uses an intersectional approach to the study of sex, class and race in Latin America. Intersectionality aims at understanding the interlocking relation between sex, class, race and other aspects, and how these are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. In this course we will aim at understanding such history, culture and peoples with a special emphasis on examining their heterogeneity, and aiming at understanding how such heterogeneity is also related with social inequality. We will also examine some contemporary issues such as women's rights, indigenous movements, human rights, migrations, and economy with an emphasis on their manifestations at the intersections of sex, class, and race.

**ANTH 4660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographic research.

**ANTH 4700 Readings in Anthropology (1-5 Credits)**

Directed readings in anthropology under faculty supervision. May be repeated for credit.

**ANTH 4701 Special Topics in Anthropology (1-5 Credits)****ANTH 4702 Special Topics in Anthropology (1-5 Credits)****ANTH 4703 Special Topics in Anthropology (1-5 Credits)****ANTH 4704 Special Topics in Anthropology (1-5 Credits)****ANTH 4740 Perspectives-Museum Studies (4 Credits)****ANTH 4744 Museum Anthropology (4 Credits)**

This course introduces students to museum anthropology and the ethnography of museums as well as the theoretical and practical sides of museum studies. The course is based on the following premises: Museum anthropology is a form of applied anthropology in which museums are a venue for making anthropological insights and knowledge accessible and relevant to the public; Museums, as institutions of public culture, are a forum for exploring contemporary social issues and concerns; The role of museums in society and civic engagement is at the core of contemporary museum anthropology and Museology.

**ANTH 4745 Museum Practicum (2 Credits)**

Individually designed practicum in student's area of interest.

**ANTH 4981 Museum Internship (1-6 Credits)****ANTH 4991 Independent Study (1-17 Credits)****ANTH 4995 Independent Research (1-17 Credits)****Courses****ANTH 3001 Race, Sex and Evolution (4 Credits)**

The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

**ANTH 3020 Native Religions (4 Credits)**

A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channeling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

**ANTH 3030 Digital Anthropology (4 Credits)**

Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

**ANTH 3040 Anthropologies of Place (4 Credits)**

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3060 Cultural Narratives (4 Credits)**

Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non-anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity, both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

**ANTH 3070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Prerequisite: introductory social science course. Cross-listed with ANTH 4070.

**ANTH 3080 Memory and Memorialization (4 Credits)**

The course focuses on how social groups represent, experience and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past- and its materialization through monuments, ruins, and landscapes- are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as "authenticity," "tradition," and "modernity" in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

**ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**ANTH 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

**ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)**

Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

**ANTH 3155 Native American Resistance in the Digital Age (4 Credits)**

Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

**ANTH 3170 Applied Heritage Management (4 Credits)**

Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

**ANTH 3200 Human Origins and Evolution (4 Credits)**

Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

**ANTH 3225 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 3255 Ancient North America (4 Credits)**

This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.

**ANTH 3290 Art and Anthropology (4 Credits)**

Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

**ANTH 3310 Indigenous Environment (4 Credits)**

The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

**ANTH 3320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 3330 Human Rights of Indg Peoples (4 Credits)**

This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

**ANTH 3350 Latin American Archaeology (4 Credits)**

Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

**ANTH 3370 Social Inequalities and Social Justice in Latin America (4 Credits)**

This course uses an intersectional approach to the study of gender, class and ethnicity in Latin America. Intersectionality aims at understanding the interlocking relation between these and other variables, how they are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. The course aims at understanding history, culture and peoples with a special emphasis on examining their heterogeneity, and how such heterogeneity is also related to social inequality. It examines contemporary issues such as women and LGBTQ+ rights, Indigenous movements, human rights, migrations, and economics from the perspective of intersectionality.

**ANTH 3390 Geoarchaeology (4 Credits)**

Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

**ANTH 3470 Applied Anthropology (4 Credits)**

The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

**ANTH 3500 City and Society (4 Credits)**

Examines the recent past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of 'modern' cities in the 19th century and ends with contemporary urban landscapes. Analysis is focused on both the technologies (physical qualities) and aesthetics of urban form. Emphasis is on re-imagining urban design to meet the social equity, cultural diversity, and environmental sustainability challenges of 21st century city life.

**ANTH 3510 The Ancient City (4 Credits)**

The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

**ANTH 3540 The Nature of Language (4 Credits)**

Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

**ANTH 3620 Ethnoarchaeology (4 Credits)**

Ethnography has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

**ANTH 3630 Archaeological Method and Theory (4 Credits)**

This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

**ANTH 3640 Race and Human Evolution (4 Credits)**

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

**ANTH 3655 Indigenous Feminisms (4 Credits)**

This course examines a wide array of Indigenous feminisms. Rather than think of Indigenous feminisms as one static thing, we will inspect the field from multiple viewpoints and perspectives. We will draw from various thematic and transnational contexts across the Americas and Native Pacific in order to analyze the scope and significance of such knowledges, particularly as they relate to broader theories and practices of decolonization. We will begin by examining the foundational inquiries and methods of Indigenous feminist scholarship. Is gender a useful category of analysis? How have Indigenous women thought of gender? How have Indigenous women thought about, and responded to, feminism? With an emphasis on Indigenous scholars and feminists, we will cover a range of topics including (but not limited to) how Indigenous feminism fits into the feminist project, the connection between colonization and violence against Native women, the reclamation of women's initiations, gender and sovereignty, queer indigeneity, Indigenous feminist allies, and decolonial love. We will draw from readings across feminist movements, and as feminist Kanaka Maoli Professor Lani Teves says, we will attempt to "make links between Indigenous feminisms and Latinx feminisms, Black feminisms, and transnational feminisms. Rather than shy away from the tensions that emerge between multiple feminisms, instead we will attempt to cultivate nodes of alliance and solidarity to diversify our feminist tactics."

**ANTH 3660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographical research.

**ANTH 3661 Museums and their Visitors (4 Credits)**

This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors' experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences? Cross listed with ARTH 3661.

**ANTH 3680 Quantitative Methods-Anthropology (4 Credits)**

The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

**ANTH 3701 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

**ANTH 3702 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3703 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3742 Museum Exhibit Development (4 Credits)**

Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

**ANTH 3743 Managing Collections (4 Credits)**

Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

**ANTH 3750 Ethnographic Methods (4 Credits)**

In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association's Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

**ANTH 3790 Field Methods in Archaeology (4 Credits)**

The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field. Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

**ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)**

This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and event natural environment that was used and marked by human action.

**ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)**

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

**ANTH 3875 Research Methods in Anthropology (4 Credits)**

This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

**ANTH 3880 Culture, Ecology, Adaptation (4 Credits)**

This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

**ANTH 3890 Context of Material Culture (4 Credits)**

Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnology, archaeology, folklore, geography, history, art and architecture.

**ANTH 3981 Museum Internship (1-6 Credits)****ANTH 3990 Summer Field School-Archaeology (4-6 Credits)**

Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.

**ANTH 3991 Independent Study (1-15 Credits)****ANTH 3995 Independent Research (1-10 Credits)****ANTH 4000 Advanced Anthropology (4 Credits)****ANTH 4040 Historical Archaeology: Theory and Method (4 Credits)**

Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions, and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus, but address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 2040.

**ANTH 4070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Cross-listed with ANTH 3070.

**ANTH 4200 Native North America (4 Credits)**

Native American cultures north of Mexico. Cross-listed with ANTH 2200.

**ANTH 4220 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 4290 Art and Anthropology (4 Credits)**

This class introduces students to anthropological approaches to the study of art and visual culture. The first part of the course covers foundational work in the field, introducing key concepts as well as methods for viewing and understanding art from a cross-cultural/comparative and interdisciplinary perspective. We examine the relationships among art, technology and the environment, as well as the importance of form, function, style, meaning, and aesthetics in the study of art. The second part addresses issues of contemporary concern in art and anthropology, such as the influence of market forces and tourism on artistic traditions and cultural expressions; the intersection of art and identity; the politics of cultural representation. The course also explores the ethnographic turn in some forms of contemporary art as well as doing ethnography as art.

**ANTH 4320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 4360 Cross-Cultural Perspectives of Women (4 Credits)**

Cross-listed with ANTH 3360.

**ANTH 4370 Sex, Class and Race in Latin America (4 Credits)**

This course uses an intersectional approach to the study of sex, class and race in Latin America. Intersectionality aims at understanding the interlocking relation between sex, class, race and other aspects, and how these are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. In this course we will aim at understanding such history, culture and peoples with a special emphasis on examining their heterogeneity, and aiming at understanding how such heterogeneity is also related with social inequality. We will also examine some contemporary issues such as women's rights, indigenous movements, human rights, migrations, and economy with an emphasis on their manifestations at the intersections of sex, class, and race.

**ANTH 4660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographic research.

**ANTH 4700 Readings in Anthropology (1-5 Credits)**

Directed readings in anthropology under faculty supervision. May be repeated for credit.

**ANTH 4701 Special Topics in Anthropology (1-5 Credits)**

**ANTH 4702 Special Topics in Anthropology (1-5 Credits)**

**ANTH 4703 Special Topics in Anthropology (1-5 Credits)**

**ANTH 4704 Special Topics in Anthropology (1-5 Credits)**

**ANTH 4740 Perspectives-Museum Studies (4 Credits)**

**ANTH 4744 Museum Anthropology (4 Credits)**

This course introduces students to museum anthropology and the ethnography of museums as well as the theoretical and practical sides of museum studies. The course is based on the following premises: Museum anthropology is a form of applied anthropology in which museums are a venue for making anthropological insights and knowledge accessible and relevant to the public; Museums, as institutions of public culture, are a forum for exploring contemporary social issues and concerns; The role of museums in society and civic engagement is at the core of contemporary museum anthropology and Museology.

**ANTH 4745 Museum Practicum (2 Credits)**

Individually designed practicum in student's area of interest.

**ANTH 4981 Museum Internship (1-6 Credits)**

**ANTH 4991 Independent Study (1-17 Credits)**

**ANTH 4995 Independent Research (1-17 Credits)**

## School of Art and Art History

Office: Shwayder Art Building

Mail Code: 2121 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-2846 or 800-876-3323

Email: AboutArt@du.edu (saah-interest@du.edu)

Web Site: <http://du.edu/art> (<http://du.edu/art/>)

The School of Art and Art History offers two tracks in our Art History MA degree program: Art History and Art History with a Museum Studies concentration. Our program of about 20 students emphasizes a collegial student-faculty atmosphere. The Art History program offers courses in most areas of world art with special emphasis on the arts of Europe, the Americas, the Islamic tradition, and global contemporary art. In addition to our own Vicki Myhren Gallery, our partnerships with the Denver Art Museum and other cultural institutions in Denver provide opportunities for museum internships and exhibition-based courses.

Our graduates are competitive in sought-after positions. Some go on to doctoral studies in the United States or overseas; others hold respected jobs at distinguished art museums or take the road less traveled, entering careers with art-related nonprofit organizations.

At the School of Art and Art History, we offer many advantages:

- small classes and personal attention
- in-depth training in Art History and research methods
- an on-site art gallery
- practical museum training
- museum internships in local and national institutions
- a strong alumni network
- vibrant and diverse cultural activities in Denver

## Master of Arts in Art History

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

## English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Arts in Art History with a Concentration in Museum Studies

### Master of Arts in Art History

#### Degree requirements

#### Coursework requirements

Code	Title	Credits
<b>Core coursework requirements</b>		<b>12</b>
Complete all of the following courses:		
ARTH 4301	Seminar in Art History Methods	
ARTH 4302	Research Practicum	
ARTH 4995	Independent Research	
<b>Art History courses</b>		<b>28</b>
Complete an additional 28 credits in ARTH courses		
<b>Art History seminars</b>		<b>16</b>
Complete an additional 16 credits in ARTH seminars		
<b>Total Credits</b>		<b>56</b>

Minimum credits required for degree: 56 credits

#### Non-coursework requirements:

- Qualifying Examination
- Language Requirement
- Comprehensive Examination
- Master's Research Paper

**Qualifying Examination**

A qualifying examination is used by the faculty to determine the newly admitted student's strengths and weaknesses and to facilitate program planning. The exam is normally taken on the Friday before the first week of classes. Incoming graduate students who graduated from the University of Denver with an Art History major within two years of entering the MA program are exempted from taking the Qualifying Exam.

**Language Requirement**

Demonstration of reading proficiency in one modern foreign language is required for all MA candidates. An exam is offered each quarter by the Department of Languages and Literatures, or the student may take the fourth semester (or sixth quarter) of a college language course and receive a grade of B+ or better to demonstrate reading proficiency. A language should be chosen, in consultation with the graduate adviser, that supports the student's research interests and career plans, keeping in mind that some PhD programs still require French and German. This requirement must be met before the student advances to candidacy.

**Comprehensive Examination**

The comprehensive examination is designed to evaluate the student's retention and synthesis of Art History course work taken at the University of Denver. Students are encouraged to take the test as soon as possible after the final quarter in which they are enrolled in course work. Planning for this examination takes place under supervision of the graduate adviser.

**Master's Research Paper**

MA degree students are required to write a research paper of publishable quality. Although work on the master's research paper should not begin prior to completion of the language requirement, students often choose subjects on which they have already conducted some research during prior seminars or lecture classes. Guidelines should be obtained from the School of Art and Art History.

Guidelines should be obtained from the School of Art and Art History.

### **ARTH 3656 Curatorial Practicum (4 Credits)**

Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

### **ARTH 3661 Learning in Museums (4 Credits)**

Comprehensive introduction to museum education. Examines informal education, learning theories, interactive education, exhibits and programs. Cross-listed with ANTH 3661.

### **ARTH 3701 Topics in Art History (1-4 Credits)**

Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

### **ARTH 3702 Topics in Contemporary Art (4 Credits)**

This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

### **ARTH 3813 Arts of the American West (4 Credits)**

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

### **ARTH 3815 Puritan, Shaker, Hindu: Material Religion in North America (4 Credits)**

The diversity of religious experience and spirituality is emphasized in this historical examination of image and artifact in North America. Beginning with sacred indigenous arts and including Puritans, Shakers, Judaism, Mormons, Ghost Dance religion, Buddhists, Hindus, and others, this class considers the ways in which different spiritual worldviews are expressed through and shaped by the art and objects people create and the environments they build. It looks at the encounters between cultures in colonial and post-colonial contexts that result in ever changing material forms of religion. Students learn through slide-lecture-discussions, reading, small group discussions, research papers or presentations, and field trips.

### **ARTH 3817 Gothic Art (4 Credits)**

This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world—its beliefs, aspirations, social and political realities.

### **ARTH 3818 Art of Renaissance Europe (4 Credits)**

This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

### **ARTH 3822 Northern Renaissance Art (4 Credits)**

This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

### **ARTH 3823 17th-Century European Art (4 Credits)**

This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

**ARTH 3825 Abstract Expressionism (4 Credits)**

In the years immediately following World War II, American art flourished through a generation of artists whose work successfully moved beyond (and at its best, matched) the substantial innovations of modern artists working in Europe around the time of World War I. From richly varied backgrounds and equipped with a deep understanding of art history, these artists forged careers during the Depression and, though fiercely independent, united in the late 1940s with the goal of establishing a new American modern art. Their monumental, highly singular, expressive abstractions (and near-abstractions) gave rise to the movement called Abstract Expressionism, which dominated American painting in the 1950s and beyond.

**ARTH 3832 19th-Century Art (4 Credits)**

This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

**ARTH 3834 Global Contemporary Art (4 Credits)**

This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction and discussion of contemporary art.

**ARTH 3838 Connoisseurship (4 Credits)**

In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum's collection.

**ARTH 3839 Topics in Modern Art (4 Credits)**

Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

**ARTH 3840 Sacred Arts of Asia (4 Credits)**

This course explores the sacred art and architecture of Asia, including but not limited to India, China, and Japan. Major religious traditions, including Buddhism, Hinduism, and Islam, are viewed through the lens of artistic development; indigenous religious traditions and philosophical constructs, including Shintoism, Daoism, Confucianism, and Bon are also explored for their influence in art, architecture, and visual culture more broadly in and between Asian regions.

**ARTH 3862 Olmec to Aztec: Mesoamerica (4 Credits)**

This course is an introduction to the art and archaeology of the indigenous peoples of Mesoamerica from about 2000 BC to AD 1521. The course explores the early royal art of the Olmec, the colossal pyramids of Teotihuacan, the manuscripts of the Mixtec, and the imperial power of the Aztecs. This class presents a timeline of Mesoamerica and investigates how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, gender, and human sacrifice.

**ARTH 3863 Kings and Cosmology: Maya Art (4 Credits)**

This course is an introduction to the art and archaeology of the Maya from about 300 BCE to 1200 CE, although the beliefs and traditions of the living Maya will inform this study of the past. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos.

**ARTH 3864 Buddhism(s) and Arts (4 Credits)**

This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

**ARTH 3867 The Circle and the Four Corners: Native North American Art (4 Credits)**

This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures.

**ARTH 3868 Art of the Andes (4 Credits)**

This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

**ARTH 3871 Women in Art (4 Credits)**

This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

**ARTH 3872 Introduction to Conservation (4 Credits)**

This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

**ARTH 3875 History of Collections (4 Credits)**

This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

**ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)**

What is 'Islamic' in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists' response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.

**ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)**

Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists' acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

**ARTH 3910 Art History Travel (4 Credits)**

A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.

**ARTH 3991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 4301 Seminar in Art History Methods (4 Credits)**

This seminar considers the history of art history and the development of various methods that art historians use to interpret and understand art. Required of all MA candidates in art history.

**ARTH 4302 Research Practicum (4 Credits)**

The major goal of this course is to learn methods and resources for doing primary research in the history of art. In this practicum, students will gain practical research experience by carrying out original research on two projects: research on an object from the DU collection and research on a contemporary artist. Students will learn to track down biographical information, locate and examine works of art, and reconstruct historical context using archival, material, human, and electronic sources. Students will learn to develop research questions, create and follow through on a research strategy, organize research data, and document the research process. This course will help you prepare for many aspects of your graduate papers, including the Master's Research Paper. Required of all MA students in art history.

**ARTH 4312 Seminar: Indigenous American Art (4 Credits)**

Selected topics in Indigenous American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4313 Seminar in Islamic Art (4 Credits)**

Selected topics in Islamic Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4314 Seminar in Medieval Art (4 Credits)**

Selected topics in Medieval Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4321 Seminar in Renaissance Art (4 Credits)**

Selected topics in Renaissance Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4333 Seminar in 20th Century Art (4 Credits)**

Selected topics in 20th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4334 Selected Topics in Contemporary Art (4 Credits)**

Selected topics in contemporary art. Advanced research papers and presentations. Content changes. May be repeated for a maximum of 8 credits.

**ARTH 4336 Seminar in American Art (4 Credits)**

Selected topics in American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4651 Museum Methods and Principles (4 Credits)**

This class surveys the major activities, goals, and organization of the art museum within today's world. Students meet with a variety of museum professionals to discuss the changing dynamics within art museums, as well as ethical and practical issues of museum work. The class reads both classic and current literature on museum issues and practice, and participates in research, collection, and exhibition projects. Required of all M.A. art history students pursuing the Museum Studies option.

**ARTH 4652 Museum Internship (0-10 Credits)**

Arranged internship in student's area of specialization. Students should take ARTH 4651 Museum Methods and Principles first. Prerequisite: instructor's permission.

**ARTH 4801 World Art I for Graduates (0 Credits)**

Survey of World Art Prehistory-1000 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4802 World Art II for Graduates (0 Credits)**

Survey of World Art 1000-1700 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4803 World Art III for Graduates (0 Credits)**

Survey of World Art 1700-present for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 4995 Independent Research (4 Credits)**

Students should see their advisor for guidelines regarding the Master's Research Paper class.

## Courses

**ARTH 3656 Curatorial Practicum (4 Credits)**

Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

**ARTH 3661 Learning in Museums (4 Credits)**

Comprehensive introduction to museum education. Examines informal education, learning theories, interactive education, exhibits and programs. Cross-listed with ANTH 3661.

**ARTH 3701 Topics in Art History (1-4 Credits)**

Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

**ARTH 3702 Topics in Contemporary Art (4 Credits)**

This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

**ARTH 3813 Arts of the American West (4 Credits)**

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

**ARTH 3815 Puritan, Shaker, Hindu: Material Religion in North America (4 Credits)**

The diversity of religious experience and spirituality is emphasized in this historical examination of image and artifact in North America. Beginning with sacred indigenous arts and including Puritans, Shakers, Judaism, Mormons, Ghost Dance religion, Buddhists, Hindus, and others, this class considers the ways in which different spiritual worldviews are expressed through and shaped by the art and objects people create and the environments they build. It looks at the encounters between cultures in colonial and post-colonial contexts that result in ever changing material forms of religion. Students learn through slide-lecture-discussions, reading, small group discussions, research papers or presentations, and field trips.

**ARTH 3817 Gothic Art (4 Credits)**

This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world—its beliefs, aspirations, social and political realities.

**ARTH 3818 Art of Renaissance Europe (4 Credits)**

This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

**ARTH 3822 Northern Renaissance Art (4 Credits)**

This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

**ARTH 3823 17th-Century European Art (4 Credits)**

This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

**ARTH 3825 Abstract Expressionism (4 Credits)**

In the years immediately following World War II, American art flourished through a generation of artists whose work successfully moved beyond (and at its best, matched) the substantial innovations of modern artists working in Europe around the time of World War I. From richly varied backgrounds and equipped with a deep understanding of art history, these artists forged careers during the Depression and, though fiercely independent, united in the late 1940s with the goal of establishing a new American modern art. Their monumental, highly singular, expressive abstractions (and near-abstractions) gave rise to the movement called Abstract Expressionism, which dominated American painting in the 1950s and beyond.

**ARTH 3832 19th-Century Art (4 Credits)**

This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

**ARTH 3834 Global Contemporary Art (4 Credits)**

This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction and discussion of contemporary art.

**ARTH 3838 Connoisseurship (4 Credits)**

In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum's collection.

**ARTH 3839 Topics in Modern Art (4 Credits)**

Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

**ARTH 3840 Sacred Arts of Asia (4 Credits)**

This course explores the sacred art and architecture of Asia, including but not limited to India, China, and Japan. Major religious traditions, including Buddhism, Hinduism, and Islam, are viewed through the lens of artistic development; indigenous religious traditions and philosophical constructs, including Shintoism, Daoism, Confucianism, and Bon are also explored for their influence in art, architecture, and visual culture more broadly in and between Asian regions.

**ARTH 3862 Olmec to Aztec: Mesoamerica (4 Credits)**

This course is an introduction to the art and archaeology of the indigenous peoples of Mesoamerica from about 2000 BC to AD 1521. The course explores the early royal art of the Olmec, the colossal pyramids of Teotihuacan, the manuscripts of the Mixtec, and the imperial power of the Aztecs. This class presents a timeline of Mesoamerica and investigates how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, gender, and human sacrifice.

**ARTH 3863 Kings and Cosmology: Maya Art (4 Credits)**

This course is an introduction to the art and archaeology of the Maya from about 300 BCE to 1200 CE, although the beliefs and traditions of the living Maya will inform this study of the past. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos.

**ARTH 3864 Buddhism(s) and Arts (4 Credits)**

This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

**ARTH 3867 The Circle and the Four Corners: Native North American Art (4 Credits)**

This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures.

**ARTH 3868 Art of the Andes (4 Credits)**

This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

**ARTH 3871 Women in Art (4 Credits)**

This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

**ARTH 3872 Introduction to Conservation (4 Credits)**

This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

**ARTH 3875 History of Collections (4 Credits)**

This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

**ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)**

What is 'Islamic' in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists' response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.

**ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)**

Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists' acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

**ARTH 3910 Art History Travel (4 Credits)**

A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.

**ARTH 3991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 4301 Seminar in Art History Methods (4 Credits)**

This seminar considers the history of art history and the development of various methods that art historians use to interpret and understand art. Required of all MA candidates in art history.

**ARTH 4302 Research Practicum (4 Credits)**

The major goal of this course is to learn methods and resources for doing primary research in the history of art. In this practicum, students will gain practical research experience by carrying out original research on two projects: research on an object from the DU collection and research on a contemporary artist. Students will learn to track down biographical information, locate and examine works of art, and reconstruct historical context using archival, material, human, and electronic sources. Students will learn to develop research questions, create and follow through on a research strategy, organize research data, and document the research process. This course will help you prepare for many aspects of your graduate papers, including the Master's Research Paper. Required of all MA students in art history.

**ARTH 4312 Seminar: Indigenous American Art (4 Credits)**

Selected topics in Indigenous American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4313 Seminar in Islamic Art (4 Credits)**

Selected topics in Islamic Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4314 Seminar in Medieval Art (4 Credits)**

Selected topics in Medieval Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4321 Seminar in Renaissance Art (4 Credits)**

Selected topics in Renaissance Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4333 Seminar in 20th Century Art (4 Credits)**

Selected topics in 20th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4334 Selected Topics in Contemporary Art (4 Credits)**

Selected topics in contemporary art. Advanced research papers and presentations. Content changes. May be repeated for a maximum of 8 credits.

**ARTH 4336 Seminar in American Art (4 Credits)**

Selected topics in American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4651 Museum Methods and Principles (4 Credits)**

This class surveys the major activities, goals, and organization of the art museum within today's world. Students meet with a variety of museum professionals to discuss the changing dynamics within art museums, as well as ethical and practical issues of museum work. The class reads both classic and current literature on museum issues and practice, and participates in research, collection, and exhibition projects. Required of all M.A. art history students pursuing the Museum Studies option.

**ARTH 4652 Museum Internship (0-10 Credits)**

Arranged internship in student's area of specialization. Students should take ARTH 4651 Museum Methods and Principles first. Prerequisite: instructor's permission.

**ARTH 4801 World Art I for Graduates (0 Credits)**

Survey of World Art Prehistory-1000 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4802 World Art II for Graduates (0 Credits)**

Survey of World Art 1000-1700 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4803 World Art III for Graduates (0 Credits)**

Survey of World Art 1700-present for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 4995 Independent Research (4 Credits)**

Students should see their advisor for guidelines regarding the Master's Research Paper class.

## Economics

Office: Sturm Hall, Room 246, 2000 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-2685

Email: Economics@du.edu

### Graduate Education in Economics

If you're looking for a career as a business or government economist, the University of Denver's MA in Economics program offers excellent preparation.

Our MA program helps you build the solid skills and respected credentials that employers want. The degree also prepares students for doctoral studies, particularly if they want to explore alternative approaches and develop further insights about economics before entering doctoral programs.

We also offer a BA/MS dual-degree program ("4+1") for current undergraduate majors at DU. Students who meet the admissions requirements can start taking graduate-level ECON courses during their junior and senior years and will complete the MS in Economics and Social Policy during their fifth year at DU.

For individuals looking for a less committing entrance into graduate studies in Economics, we offer a Specialized Graduate Certificate.

Information for applicants to one of our graduate programs: <https://liberalarts.du.edu/economics/admission-aid/graduate-applicants> (<https://liberalarts.du.edu/economics/admission-aid/graduate-applicants/>)

### Our department's strengths

- Macroeconomics
- Economics of money, banking and finance
- Environmental economics

- Health economics
- International and development economics
- Alternative approaches to economics
- History of economic thought
- Econometrics
- Economics of gender / feminist economics
- Economics of technology and innovation
- Urban economics

## Master of Arts in Economics

- 45 credits of graduate coursework
- Thesis Required

## Masters of science in Economics and Social Policy

- Undergraduate-Graduate Dual-Degree Program for DU Economics Majors
- 45 credits of graduate coursework
- No Thesis Required

## Specialized Graduate Certificate in Economics

- 16 credits of graduate coursework
- No Thesis Required

### Master of Arts in Economics

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Specialized Graduate Certificate in Economics

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

## English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master's Degree Programs

### Master of Arts in Economics

#### Degree Requirements

#### Coursework Requirements

Code	Title	Credits
<b>Course requirements:</b>		
ECON 4670	Econometrics: Multivariate Regression Analysis for Economists	4
ECON 4020	Adv Macroeconomic Theory	4
ECON 4030	Advanced Microeconomic Theory	4
ECON 4050	Origins of Modern Economics	4
ECON 4993	Thesis Topic Development and Defense	4
ECON 4995	Independent Research	5
<b>Electives</b>		
Students choose 5 graduate-level elective courses (3000-level, if available at GR course, or 4000-level).		20
When considering a 3000-level ECON course, confirm with the instructor that the course can be taken for GR credit.		
<b>Total Credits</b>		<b>45</b>

Minimum number of credits required for the degree: 45

#### Non-coursework Requirements

- Thesis topic development and defense
- Independent research
- Oral defense -The student must defend a thesis in an oral exam and pass it, and then must complete whatever revisions the thesis committee suggests.

### Master of Science in Economics and Social Policy

#### Degree Requirements

Minimum number of credits required for the degree: 45

#### Coursework Requirements

Code	Title	Credits
<b>Course requirements:</b>		
ECON 3670/4670	Econometrics: Multivariate Regression Analysis for Economists <sup>1</sup>	4
ECON 3850/4850	Mathematics for Economists <sup>1</sup>	4
ECON 4020	Adv Macroeconomic Theory	4
ECON 4030	Advanced Microeconomic Theory	4
ECON 4050	Origins of Modern Economics	4
<b>Students take either a comprehensive exam or policy-oriented internship <sup>2</sup></b>		
ECON 4980 or ECON 4994	Internship Comprehensive Exam	1
<b>Electives</b>		
Students choose six graduate-level elective courses <sup>3</sup>		24
<b>Total Credits</b>		<b>45</b>

- <sup>1</sup> All 3000-level courses taken for credit towards the MS must be taken for GR credit: students must inform the instructor and the registrar that course is being taken for GR credit, and students must meet the graduate-level expectations set by the instructor. Student who take ECON 3670 or ECON 3850 for undergraduate (UG) credit meet the course requirement of the MS but need take an additional graduate-level (GR) course to meet the credit requirement.
- <sup>2</sup> The comprehensive exam / internship requirement will be graded P/F and will **not** affect the minimum GPA calculation.
- <sup>3</sup> Elective courses can be 3000-level ECON courses taken for graduate (GR) credit or or 4000-level ECON courses. When taking a 3000-level course, confirm with the instructor the course can be taken for GR credit.

### Non-coursework Requirements

- Demonstrated competency using the tools (including relevant quantitative approaches) and concepts of economics to analyze and assesses social policy options. This is assessed either via a comprehensive exam or a policy impact assessment that the student submits to the department after completion of a policy-oriented internship.

### Admissions Requirements

The MS in Economics and Social Policy is only available as a dual-degree program in combination with the BA in Economics.

- Current undergraduate student at the University of Denver pursuing the BA in Economics (declared first or second major must be economics).
- Completion of *at least* 20 credits worth of ECON courses with a GPA in the Economics major of 3.5 or greater.
- Application must be submitted before the end of first quarter as a senior (before the completion of 135 credits towards the BA degree).
- No GRE or other standardized test required.

## Specialized Graduate Certificate Program

### Specialized Graduate Certificate in Economics

This Specialized Graduate Certificate is earned by taking a combination of foundational theory courses and electives that allow some customization. It certifies that the recipient has graduate-level training in at least one core area of economics (microeconomics or macroeconomics), the historical context which lead to the development of contemporary economic theory and its alternatives, and up to two topical concentrations with current policy implications.

#### Required Coursework

Code	Title	Credits
<b>Required Courses</b>		<b>8</b>
ECON 4050	Origins of Modern Economics	
Choice of either:		
ECON 4020	Adv Macroeconomic Theory	
ECON 4030	Advanced Microeconomic Theory	
<b>Elective Courses</b>		<b>8</b>
Student chooses two (2) graduate-level elective courses. <sup>1</sup>		
<b>Total Credits</b>		<b>16</b>

- <sup>1</sup> 3000-level ECON courses taken for graduate-credit (GR) and 4000-level ECON courses can count as electives. When registering for a 3000-level course, confirm with the instructor that the course can be taken for GR credit.

### Non-Coursework Requirements

Must maintain a cumulative a GPA of 3.0 across ECON courses taken for graduate credit towards completion of the specialized graduate certificate.

### Degree Credits

- Undergraduate credit reduction with dual degree: 20 (163 total undergraduate credits required instead of 183)
- Graduate credits required: 45 (no reduction in graduate credits required for the MS)
- Minimum credits required with dual degree: 208 (total 79 ECON credits)

## Undergraduate Program (years 1-4)

### BA in Economics requirements

#### Course requirements:

ECON 1020	Economics: A Critical Introduction	4
ECON 1030	Introduction to Micro and Macroeconomics	4
ECON 2020	Intermediate Microeconomics	4
ECON 2030	Intermediate Macroeconomics	4

ECON 2050	History of Economic Thought	4
ECON 2670	Quantitative Methods	4
ECON 3990	Capstone: Research, Evaluate, and Report on Living in CO (Capstone: Research, Evaluate, and Report on Living in CO)	2

**Electives**

Two 2000-level (or above) ECON elective courses taken for undergraduate credit	8
--	---

**Graduate-level Electives**

Two graduate-level ECON electives taken for GR credit (may include ECON 3670/ECON 4670 and / or ECON 3850/ECON 4850) Students must notify both the instructor and the registrar when taking a 3000-level course for GR credit.	8
---	---

**Total Credits****42**

Course taken for graduate credit towards the MS requirements while completing the BA in Economics:

**Graduate-level Electives**

Three graduate-level ECON electives taken for GR credit (should include ECON 4670 and / or ECON 4850) Students must notify both the instructor and the registrar when taking a 3000-level course for GR credit.	12
--	----

**Total Credits****12****Plus 1 Year****Remaining MS in Economics and Social Policy requirements****Course requirements:**

ECON 4020	Adv Macroeconomic Theory	4
ECON 4030	Advanced Microeconomic Theory	4
ECON 4050	Origins of Modern Economics	4

Students take either ECON 4670 or ECON 4850 if they have not previously done so	4
---	---

Two graduate-level ECON electives	8
-----------------------------------	---

Students take either a comprehensive exam or policy-oriented internship

ECON 4994 or ECON 4980	Comprehensive Exam Internship	1
---------------------------	----------------------------------	---

**Total Credits****25****ECON 3040 Marxian Political Economy (4 Credits)**

An exposition of Marx's theory of value through a detailed reading of Capital, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.

**ECON 3110 European Economic History (4 Credits)**

The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3460 Monetary Theory and Policy (4 Credits)**

Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3480 Money & Financial Markets (4 Credits)**

Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3500 Economic Development (4 Credits)**

Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3600 International Monetary Relations (4 Credits)**

Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3610 International Trade Theory & Policy (4 Credits)**

Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

**ECON 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**ECON 3701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 3740 Health Economics (4 Credits)**

This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3830 Topics in Macroeconomics (4 Credits)**

Coverage varies but may include advanced topics in monetary theory, the study of business cycles, or the works of important monetary and macroeconomic theorists. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3900 Growth, Technology and Economic Policy (4 Credits)**

This course will introduce students to innovation dynamics – technological change as the foundation for the growth of and structural changes in economic activity - through the lenses of 1) economic theory, as evolutionary economics, in particular original institutional economics and neo-Schumpeterian economics, as well as Marxian themes around dynamics of change in economies and societies; 2) economic history, to further underline the nature of innovation as a social phenomenon that has impacted technological capability and economic activity, in scope, reach, and level, in societies as well as societies themselves; and 3) economic policy, to emphasize focus areas for the successful support of innovation, and desired innovation, with examples drawing from the economic development process as well as national innovation systems concepts and the role of the public sector as an active participant in economic activity in general. The focus for the course under all three perspectives will be on changes to technological capability, from a social perspective that emphasizes systemic components in the processes of innovating and change. Prerequisite: ECON 2050.

**ECON 3970 Environmental Economics (4 Credits)**

This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

**ECON 3991 Independent Study (1-8 Credits)**

Prerequisites: ECON 1030.

**ECON 3995 Independent Research (1-4 Credits)**

This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

**ECON 4020 Adv Macroeconomic Theory (4 Credits)**

Determinants of national income and its components and of the level of employment and the general price level; also examines business cycles and alternative macroeconomic theories.

**ECON 4030 Advanced Microeconomic Theory (4 Credits)**

The course covers a broad range of topics in mainstream microeconomic theory, which is based on individual maximizing behavior under constraints. Topics include Games and the role of institutions, General Equilibrium Theory, Externalities, and Incomplete Contracts, and more. The focus of the class is twofold: to understand the modeling foundations and underlying assumptions, and the limitation they imply; and to gain competence working through microeconomic models to evaluate their implications in terms of economic efficiency, social welfare, and distribution.

**ECON 4050 Origins of Modern Economics (4 Credits)**

This course covers the development of economic theory from the decline of the classical school through the emergence of the Keynesian theory and investigates in detail the structure of the neoclassical theory and the degree to which Keynesian economics provides an alternative. We examine why economists thought that certain theoretical frameworks were better than others and what problems still remain.

**ECON 4670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)**

This course develops the theoretical foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Cross-listed with ECON 3670.

**ECON 4701 Topics in Economics (4 Credits)**

Specialized topics in Economics.

**ECON 4850 Mathematics for Economists (4 Credits)**

Graduate level equivalent of ECON 3850.

**ECON 4980 Internship (0-1 Credits)**

Students doing an internship and writing an impact assessment report based on their work to demonstrate their understanding of economic theory relevant to the analysis and assessment of social policy to satisfy a MS in Economics and Social Policy degree requirement take this course. This course may also be taken for zero credit by students enrolled in the MA in Economics program who do a degree-related internship. Students must complete one 3000-level ECON course with a passing grade prior to enrollment in ECON 4980.

**ECON 4991 Independent Study (1-10 Credits)****ECON 4993 Thesis Topic Development and Defense (4 Credits)**

This resembles an independent-study where a student will work under the supervision of a professor. The aim is to encourage the student, as s/he completes a certain number of hours of course work, to actively formulate and develop her/his thesis topic, and to formally present and defend it in a thesis workshop scheduled by the Department. A minimum of 20 credit hours of graduate-level course work must be completed. Instructor's permission required.

**ECON 4994 Comprehensive Exam (1 Credit)**

Students taking the comprehensive exam scheduled by the department that tests their understanding of economic theory relevant to the analysis and assessment of social policy to satisfy a MS in Economics and Social Policy degree requirement take this course.

**ECON 4995 Independent Research (1-10 Credits)****Courses****ECON 3040 Marxian Political Economy (4 Credits)**

An exposition of Marx's theory of value through a detailed reading of Capital, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.

**ECON 3110 European Economic History (4 Credits)**

The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3460 Monetary Theory and Policy (4 Credits)**

Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3480 Money & Financial Markets (4 Credits)**

Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3500 Economic Development (4 Credits)**

Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3600 International Monetary Relations (4 Credits)**

Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3610 International Trade Theory & Policy (4 Credits)**

Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

**ECON 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

## Emergent Digital Practices

Office: Sturm Hall, Room 216

Mail Code: 2000 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-7716

Email: [edp@du.edu](mailto:edp@du.edu)

Web Site: [www.du.edu/ahss/edp](http://www.du.edu/ahss/edp) (<http://www.du.edu/ahss/edp/>)

The MA in Emergent Digital Practices combines the pursuit of advanced, investigatory technical media skill-sets with focused research agendas contextualized within a broad liberal arts and digital humanities framework. The MFA in Emergent Digital Practices emphasizes methods and production of creative scholarly research and works shaped by broader art historical and cultural contexts. Students in both of the graduate degree threads of the EDP program will share key critical, theoretical, and historical resources, will be expected to excel in areas of creative expression and hands-on media production, and will be asked to acquire specialized investigatory skills. Students will learn to work together by utilizing advanced technical platforms and facilities combined with opportunities for heightened critical reflection and dialog.

EDP graduate students should strive to develop critical awareness, to articulate deep media literacies, to sustain new creative practices, and to foster outlooks engaged with the world around us. While invested in participatory forms of creation, performance, and interactivity, EDP graduate students are expected to engage in technical experimentation outside the realm of industry standards and creative, as well as critical, undertakings that surpass the limits of single disciplines. Students are also expected to be able to articulate the critical underpinnings of the things they devise and create through writing, speaking, discussion, and critique.

Advanced study in EDP will add scholarly and professional depth to the multiple artistic and cultural practices—both mainstream and alternative—that have developed alongside the powerful, networked, and mobile computing technologies of the 21st century. Advanced research in EDP will provide students with an awareness of broad contexts as well as definitive, professional-level focus and in-depth knowledge of the strategies and collaborative processes for complex, interdisciplinary cultural engagement.

## Master of Arts in Emergent Digital Practices

The EDP MA degree at the University of Denver is unique in that it asks the student to balance the technical and the critical, the practical and the aesthetic. The MA degree is structured to build upon the body of knowledge each student already possesses from his/her undergraduate studies and expand and explore the consequence and possibilities that arise from the inclusion of technology into that field.

The MA student should be able to articulate and demonstrate advanced perspectives on emergent digital practices within interdisciplinary contexts. The MA student should also be able to synthesize knowledge of ideas and practices from across the spectrum of historical and contemporary contexts, focusing not just on making the new, but making the needed. And the MA student's work should demonstrate accomplished means and mechanisms for critically evaluating the cultural dynamics of emergent digital practices.

The MA degree is designed around a two-year coursework structure with two courses being taken during each of the three regular quarters per year and then students have up to three years to complete the non-coursework requirements. It is not unusual for students to be able to have a part-time job (up to 20 hours/week) and still be successful on the program.

## Master of Fine Arts in Emergent Digital Practices

Envisioning and actualizing artworks created with the latest technology – fueled by critical content – that's the EDP MFA program.

While also demonstrating an understanding of Emergent Digital Practices within interdisciplinary contexts, the MFA student should be able to articulate a deep understanding of the art historical and contemporary contexts of art making, especially as they are being shaped by technology and the sciences. The MFA student should be prepared for public engagement through knowledge of the significance of established cultural institutions and frameworks such as galleries, museums, festivals, and other public spaces.

The MFA degree is structured as three years of coursework with students taking an average of three courses during each of the three normal quarters per year and then having up to two years to complete the non-coursework requirements. It is recommended that students pursuing the MFA degree are able to focus full time on their studies without simultaneous employment. The MFA degree is considered a "terminal degree" providing the necessary credentials to teach at an institute of higher education.

## Master of Arts in Emergent Digital Practices

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Fine Arts in Emergent Digital Practices

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- The recommended undergraduate degree is a bachelor of fine arts degree (BFA) in design or studio arts practices with a strong foundation in both traditional and electronic practices. Students with a BA in art or design should have at least 24 credit hours of studio courses such as photography, electronic art, ceramics, painting, drawing, printmaking, sculpture, textiles, etc. as documented in their transcripts. Students with undergraduate degrees other than a BFA may be required to take prerequisite courses at the undergraduate level as a condition of admission.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

### Non-coursework Requirement

**Exhibition:** Additionally the MFA graduate student should be prepared for the development and organization of emerging venues for the exhibition of, and public engagement through, digital art works and new media. The final form of the MFA exhibition is the creation and public off-campus showcase of a significant body of work coupled with a written analysis of the past present and future of connected ideas, inspirations and critical theories.

### EDPX 4000 Digital Design Concepts (4 Credits)

An introductory course requiring conceptual, perceptual and manual skills to meet rigorous studio research into the history of mark-making, letter forms and layout designs as reflective of cultural, social, political and psychological contexts of interpretation. This class also emphasizes 2-D principles of design, including form, structure, conceptual understanding, visual aesthetics, semiotics, organizational systems, relationships of typography and imagery. Lab fee.

### EDPX 4010 Emergent Digital Tools (4 Credits)

This course serves as a primer on the tools essential to expression, sharing, and creation in digital mediums. This includes knowledge of web technologies, creative coding, video, audio, and the basic historical and theoretical contexts of each. Lab fee.

**EDPX 4020 Emergent Digital Cultures (4 Credits)**

This course familiarizes students with current crucial approaches to understanding digital media and the impacts these media have in personal, community, cultural, social, institutional and international life. The course pays particular attention to cultural constructions of emergent digital media and practices. This course introduces graduate students to a variety of disciplinary lenses and conceptual practices, with readings and research ranging from media theory and studies, philosophy of technology, media archaeology and history, to science fiction studies as approaches to digital media and cultures.

**EDPX 4100 Programming for Play (4 Credits)**

This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Cross listed with EDPX 3100. Prerequisites: EDPX 4000 and EDPX 4010, or permission of the instructor.

**EDPX 4112 Rapid Physical Game Design & Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 4000. Lab fee.

**EDPX 4200 Data Visualization (4 Credits)**

This course explores the creation of informational graphics for visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations is also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 3200. Prerequisites: EDPX 4000 and EDPX 4010 or permission of the instructor.

**EDPX 4210 Typographic Landscapes (4 Credits)**

This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 4000 or permission of the instructor.

**EDPX 4270 Making Networked Art (4 Credits)**

In Making Networked Art, students will develop technical skills for creating interactive works that live online. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will work with HTML, CSS, and JavaScript to develop experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 4010, or permission of the instructor. Lab fee. Crosslisted with EDPX 3270.

**EDPX 4310 Tangible Interactivity (4 Credits)**

Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4320 Interactive Art (4 Credits)**

This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta-data/multimedia asset acquisition and authoring environments. While utilizing students' skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 3320. Prerequisites EDPX 4310 or EDPX 4450.

**EDPX 4330 Advanced Coding (4 Credits)**

This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 4010.

**EDPX 4340 Designing Social Good (4 Credits)**

This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and to then make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross listed with EDPX 3340. Prerequisites: EDPX 4000 and EDPX 4010.

**EDPX 4350 Sustainable Design (4 Credits)**

This course reviews and implements advanced sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure, among others. Lab fee. Prerequisite: EDPX 4000 and EDPX 4010 or permission of the instructor.

**EDPX 4370 Biomedica in Emergent Digital Practices (4 Credits)**

The graduate section of Biomedica is an EDP advanced art-science course that will survey and investigate the interplay between new media, biological systems/ technologies and bioethics as they relate to creative inquiry at the juncture of life sciences, digital media and contemporary technoculture. The course will build upon the basic paradigms and platforms of biosemiotics and biomimetics to expand into a coverage of our framing of corporeality, biological/environmental sensibilities and our perceptions and interconnections with biomaterials and lifeforms that we exist thru and within. Course topics will adapt to significant developments in biological sciences, emergent media and bioethics. The course can be repeated for credit with offering of new course topics. EDPX 4370 Graduate students will lead collaborative group projects. Additional graduate assignments will undertake individual biomedica research projects for adding experimental depth to course topics i.e. development of creative tools for transcoding, modeling or bioethics critique. Tools will be demonstrated and made usable in group projects. Cross Listed with EDPX 3370.

**EDPX 4400 Video Art (4 Credits)**

This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor. Cross listed with EDPX 3400.

**EDPX 4410 Advanced Video Art (4 Credits)**

This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on "off-screen" time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into spaces, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 4400 or permission of instructor.

**EDPX 4440 Site-Specific Installation (4 Credits)**

This class produces projects investigating physical space, virtual space and site-specific public installations. Lab fee. Cross listed with EDPX 3440. Prerequisites: EDPX 4000 and EDPX 4010.

**EDPX 4450 Visual Programming (4 Credits)**

This course introduces intuitive visual "programming" that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 3450. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4460 Visual Programming II (4 Credits)**

This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 3460. Prerequisite: EDPX 4450.

**EDPX 4490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performance and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 3490. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 3500. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4600 3D Modeling (4 Credits)**

This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of compositing in creating final pieces. Current trends in the field are address through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 3600, MFJS 3600. Prerequisite: EDPX 4000 or permission of the instructor.

**EDPX 4610 3D Animation (4 Credits)**

This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 3610. Prerequisite: EDPX 4600.

**EDPX 4620 3D Spaces (4 Credits)**

An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisites: EDPX 4010 and EDPX 4600, or permission of the instructor.

**EDPX 4700 Topics in Digital Cultures (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a particular culture and unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. Prerequisite: varies with topic.

**EDPX 4701 Topics in Emergent Digital Practices (1-4 Credits)**

Topics in Emergent Digital Practices.

**EDPX 4710 Critical Game Studies (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practice of play. This course is taught with a hybrid teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course partially satisfies a cultures requirement for emergent digital practices majors and minors. Lab fee.

**EDPX 4730 21st Century Digital Art (4 Credits)**

An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

**EDPX 4740 Performance Cultures (4 Credits)**

This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. Students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab Fee. Prerequisites: EDPX 4010 and EDPX 4020, or permission of the instructor.

**EDPX 4750 Sound Cultures (4 Credits)**

This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 4010 and 4020.

**EDPX 4770 Cybercultures (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyber culture). The course covers such issues as: identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. Cross listed with EDPX 3770. Prerequisite: EDPX 4020.

**EDPX 4780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). Students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 3780. Prerequisite: EDPX 4020 or permission of the instructor.

**EDPX 4800 Topics in Digital Making (4 Credits)**

This course provides an in-depth explorations of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. Lab Fee. Prerequisite: varies with topic.

**EDPX 4980 Internship (0-8 Credits)**

Instructor approval required.

**EDPX 4991 Independent Study (1-8 Credits)**

Independent Study form required.

**EDPX 5000 Graduate Seminar (4 Credits)**

Topics vary. Reading and discussion of critical theory. May include project(s) related to the topic. Course may be repeated up to six times.

**EDPX 5100 Graduate Critique (4 Credits)**

The course focuses on student's creative production. Critiques are moderated by a different faculty member each quarter. Conceptual, methodological and theoretical concerns are stressed. Critiques are designed to assist in the experimentation, preparation and construction of individual art projects. Time is also spent on preparing students for a professional practice in the Arts. Course may be repeated up to six times.

**EDPX 5700 Research & Theoretical Methods (4 Credits)**

This course provides graduate students with the strategies and techniques of research in the area of digital media studies.

**EDPX 5800 M.A. Thesis (4-8 Credits)**

Independent work toward completion of the MA Thesis. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

**EDPX 5850 M.A. Project (1-4 Credits)**

Independent work toward completion of the MA Project. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

**EDPX 5900 MFA Exhibition (1-12 Credits)**

Independent work toward completion of the MFA Thesis Exhibition. May only be taken with the permission of the Graduate Director. May be taken for up to 12 credit hours.

## Faculty

**Christopher Coleman**, Professor, MFA, University at Buffalo - State University of New York

**William H. Depper**, Teaching Professor, MA, University of Denver

**Rafael A. Fajardo**, Associate Professor, MFA, Rhode Island School of Design

**Kate Hollenbach**, Assistant Professor, MFA, University of California Los Angeles

**Laleh Mehran**, Professor, MFA, Carnegie Mellon University

**Trace E. Reddell**, Professor and Director, PhD, University of Colorado-Boulder

**Timothy Weaver**, Professor, MFA, University of Colorado-Boulder

## Courses

**EDPX 4000 Digital Design Concepts (4 Credits)**

An introductory course requiring conceptual, perceptual and manual skills to meet rigorous studio research into the history of mark-making, letter forms and layout designs as reflective of cultural, social, political and psychological contexts of interpretation. This class also emphasizes 2-D principles of design, including form, structure, conceptual understanding, visual aesthetics, semiotics, organizational systems, relationships of typography and imagery. Lab fee.

**EDPX 4010 Emergent Digital Tools (4 Credits)**

This course serves as a primer on the tools essential to expression, sharing, and creation in digital mediums. This includes knowledge of web technologies, creative coding, video, audio, and the basic historical and theoretical contexts of each. Lab fee.

**EDPX 4020 Emergent Digital Cultures (4 Credits)**

This course familiarizes students with current crucial approaches to understanding digital media and the impacts these media have in personal, community, cultural, social, institutional and international life. The course pays particular attention to cultural constructions of emergent digital media and practices. This course introduces graduate students to a variety of disciplinary lenses and conceptual practices, with readings and research ranging from media theory and studies, philosophy of technology, media archaeology and history, to science fiction studies as approaches to digital media and cultures.

**EDPX 4100 Programming for Play (4 Credits)**

This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Cross listed with EDPX 3100. Prerequisites: EDPX 4000 and EDPX 4010, or permission of the instructor.

**EDPX 4112 Rapid Physical Game Design & Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 4000. Lab fee.

**EDPX 4200 Data Visualization (4 Credits)**

This course explores the creation of informational graphics for visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations is also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 3200.

Prerequisites: EDPX 4000 and EDPX 4010 or permission of the instructor.

**EDPX 4210 Typographic Landscapes (4 Credits)**

This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media.

This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 4000 or permission of the instructor.

**EDPX 4270 Making Networked Art (4 Credits)**

In Making Networked Art, students will develop technical skills for creating interactive works that live online. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will work with HTML, CSS, and JavaScript to develop experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 4010, or permission of the instructor. Lab fee. Crosslisted with EDPX 3270.

**EDPX 4310 Tangible Interactivity (4 Credits)**

Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4320 Interactive Art (4 Credits)**

This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta-data/multimedia asset acquisition and authoring environments. While utilizing students' skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 3320. Prerequisites EDPX 4310 or EDPX 4450.

**EDPX 4330 Advanced Coding (4 Credits)**

This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 4010.

**EDPX 4340 Designing Social Good (4 Credits)**

This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and to then make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross listed with EDPX 3340. Prerequisites: EDPX 4000 and EDPX 4010.

**EDPX 4350 Sustainable Design (4 Credits)**

This course reviews and implements advanced sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure, among others. Lab fee. Prerequisite: EDPX 4000 and EDPX 4010 or permission of the instructor.

**EDPX 4370 Biomedial in Emergent Digital Practices (4 Credits)**

The graduate section of Biomedial is an EDP advanced art-science course that will survey and investigate the interplay between new media, biological systems/ technologies and bioethics as they relate to creative inquiry at the juncture of life sciences, digital media and contemporary technoculture. The course will build upon the basic paradigms and platforms of biosemiotics and biomimetics to expand into a coverage of our framing of corporeality, biological/environmental sensibilities and our perceptions and interconnections with biomaterials and lifeforms that we exist thru and within. Course topics will adapt to significant developments in biological sciences, emergent media and bioethics. The course can be repeated for credit with offering of new course topics. EDPX 4370 Graduate students will lead collaborative group projects. Additional graduate assignments will undertake individual biomedical research projects for adding experimental depth to course topics i.e. development of creative tools for transcoding, modeling or bioethics critique. Tools will be demonstrated and made usable in group projects. Cross Listed with EDPX 3370.

**EDPX 4400 Video Art (4 Credits)**

This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 4010 or permission of the instructor. Cross listed with EDPX 3400.

**EDPX 4410 Advanced Video Art (4 Credits)**

This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on "off-screen" time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into spaces, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 4400 or permission of instructor.

**EDPX 4440 Site-Specific Installation (4 Credits)**

This class produces projects investigating physical space, virtual space and site-specific public installations. Lab fee. Cross listed with EDPX 3440. Prerequisites: EDPX 4000 and EDPX 4010.

**EDPX 4450 Visual Programming (4 Credits)**

This course introduces intuitive visual "programming" that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 3450. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4460 Visual Programming II (4 Credits)**

This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 3460. Prerequisite: EDPX 4450.

**EDPX 4490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performance and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 3490. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 3500. Prerequisite: EDPX 4010 or permission of the instructor.

**EDPX 4600 3D Modeling (4 Credits)**

This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of compositing in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 3600, MFJS 3600. Prerequisite: EDPX 4000 or permission of the instructor.

**EDPX 4610 3D Animation (4 Credits)**

This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 3610. Prerequisite: EDPX 4600.

**EDPX 4620 3D Spaces (4 Credits)**

An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisites: EDPX 4010 and EDPX 4600, or permission of the instructor.

**EDPX 4700 Topics in Digital Cultures (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a particular culture and unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. Prerequisite: varies with topic.

**EDPX 4701 Topics in Emergent Digital Practices (1-4 Credits)**

Topics in Emergent Digital Practices.

**EDPX 4710 Critical Game Studies (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practice of play. This course is taught with a hybrid teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course partially satisfies a cultures requirement for emergent digital practices majors and minors. Lab fee.

**EDPX 4730 21st Century Digital Art (4 Credits)**

An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

**EDPX 4740 Performance Cultures (4 Credits)**

This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. Students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab Fee. Prerequisites: EDPX 4010 and EDPX 4020, or permission of the instructor.

**EDPX 4750 Sound Cultures (4 Credits)**

This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 4010 and 4020.

**EDPX 4770 Cybercultures (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyber culture). The course covers such issues as: identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. Cross listed with EDPX 3770. Prerequisite: EDPX 4020.

**EDPX 4780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). Students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 3780. Prerequisite: EDPX 4020 or permission of the instructor.

**EDPX 4800 Topics in Digital Making (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. Lab Fee. Prerequisite: varies with topic.

**EDPX 4980 Internship (0-8 Credits)**

Instructor approval required.

**EDPX 4991 Independent Study (1-8 Credits)**

Independent Study form required.

**EDPX 5000 Graduate Seminar (4 Credits)**

Topics vary. Reading and discussion of critical theory. May include project(s) related to the topic. Course may be repeated up to six times.

**EDPX 5100 Graduate Critique (4 Credits)**

The course focuses on student's creative production. Critiques are moderated by a different faculty member each quarter. Conceptual, methodological and theoretical concerns are stressed. Critiques are designed to assist in the experimentation, preparation and construction of individual art projects. Time is also spent on preparing students for a professional practice in the Arts. Course may be repeated up to six times.

**EDPX 5700 Research & Theoretical Methods (4 Credits)**

This course provides graduate students with the strategies and techniques of research in the area of digital media studies.

**EDPX 5800 M.A. Thesis (4-8 Credits)**

Independent work toward completion of the MA Thesis. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

**EDPX 5850 M.A. Project (1-4 Credits)**

Independent work toward completion of the MA Project. May only be taken with the permission of the Graduate Director. May be taken for up to 8 credit hours.

**EDPX 5900 MFA Exhibition (1-12 Credits)**

Independent work toward completion of the MFA Thesis Exhibition. May only be taken with the permission of the Graduate Director. May be taken for up to 12 credit hours.

# English and Literary Arts

Office: Sturm Hall

Mail Code: 2000 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-2266

Email: [noah.west@du.edu](mailto:noah.west@du.edu)

Web Site: <http://www.du.edu/english> (<http://www.du.edu/english/>)

The Department of English and Literary Arts offers a PhD in English and Literary Arts with concentrations in creative writing and literary studies, as well as an MA with a concentration in literary studies.

Our major areas for dissertation research include creative writing; modern and contemporary British literature; American literature; American multicultural literature and Anglophone literatures; genre studies; and literary theory and rhetoric. We also offer course work in traditional literary fields, cultural studies, ethnic literatures and gender studies.

The University of Denver's Department of English and Literary Arts is small and intimate, with 21 faculty members, all of whom publish widely and seek to translate their expertise into shared learning experiences in and out of the classroom.

Our distinctive curriculum allows students to tailor their degrees to their specific talents and interests. We offer not only typical graduate seminars but also writing workshops, individually designed tutorials and colloquia devoted to teaching and professional development. Such a curriculum encourages students to cross genre boundaries in their writing, to relate theory to practice and to work creatively with scholarly projects.

## Doctor of Philosophy in English and Literary Arts with a Concentration in Creative Writing

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Master's degree: This program requires a master's degree as well as the baccalaureate.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctor of Philosophy in English and Literary Arts with a Concentration in Creative Writing

### Degree Requirements

#### Course Requirements

At least 48 hours of foundational course work must be taken as formal ENGL classes, excluding Independent Research (ENGL 4995, ENGL 5995), Independent Study (ENGL 4991, ENGL 5991), and tutorials (ENGL 4100).

Five courses distributed over three literary periods. Students must take at least one course in one period and at least two courses in the other two periods. Students may only take two approved 3000 level courses (ENGL 3800 and 3982) in the Department of English. Registration for any other ENGL 3000 level class must be made by special petition to be approved by the full Graduate Committee.

Workshops. Students on the Creative Writing track must take three workshops.

Code	Title	Credits
------	-------	---------

#### Coursework Requirements

Courses listed below are representative examples. Students may consult the department for additional course options.

##### Before 1700

ENGL 4125	Old English	
ENGL 4150	Special Topics in Medieval Lit	
ENGL 4200	Special Topics-Early Mod Lit	
ENGL 4213	Advanced Studies in Early Modern Literature	
ENGL 4220	Seminar-Studies in Shakespeare	

##### 1700-1900

ENGL 4300	Advanced Studies in 18th Century Literature	
ENGL 4424	Topics in English: 19th Century Literature	
ENGL 4700	Antebellum American Literature	
ENGL 4730	American Romanticism	
ENGL 4732	Spc Tpc: Antebellum Amer Lit	

**After 1900**

ENGL 4600	Adv Studies -20th Cent Lit	
ENGL 4621	Adv Studies-20th C. Literature	
ENGL 4650	Special Topics: 20th Cent Lit	

**Graduate Tutorials (Students may take up to 5 tutorials, 10 credits total)**

ENGL 4100	Graduate Tutorial	
-----------	-------------------	--

**Three Graduate Professional Seminars (count towards the 48 hours of course work) 6**

ENGL 4050	The Critical Imagination	2
ENGL 4830	Seminar: Teaching and Writing Literature	
ENGL 4000	Colloquium	

**Three writing workshops 12**

ENGL 4001	Sem Creative Writing-Poetry	
ENGL 4011	Sem Creative Writing-Fiction (ENGL 4011 Sem Creative Writing-Prose)	
or ENGL 4011	Sem Creative Writing-Fiction	
ENGL 4017	Travel Writing	
ENGL 4650	Special Topics: 20th Cent Lit (Translation)	

**Total Credits 90****Minimum number of credits required for the degree: 90 graduate-level quarter hours beyond the master's degree****Non-Course Requirements:**

- Preliminary advancement to candidacy
- Advancement to candidacy
- A dissertation of publishable quality that makes a significant contribution to its field. This will take the form of an extended scholarly and critical work (usually between 150 and 250 pages) OR a creative work (fiction or poetry). The creative dissertation must include a critical preface that situates the dissertation in its literary context.
- Oral defense. When the dissertation is completed, it must be defended by the candidate. For spring quarter graduates, the defense should take place by April 30. Typically no dissertation defenses will be held during the summer quarter. The candidate is therefore advised to set the defense date as far in advance as possible. The defense takes the form of a discussion with the committee concerning the content, context and implications of the work.
- Tool proficiency may be established by completing any one of the following:
  - Successful completion of ENGL 3800 Bibliography and Research Methods class in the Department of English.
  - Successful completion of ENGL 3982 (Writers in the Schools).
  - Successful completion of a graduate translation class (students must secure approval of instructor).
  - Successful completion of Old English (4 credits).
  - Selection and successful completion of a cognate course in another department that will augment specific skills. This course must be approved by the Graduate Committee.

Students may also consult the department for additional Tool proficiency options. The Tool requirement must be completed one quarter before graduation.

- Proposal & Prospectus review. By the end of the Fall quarter of the third year, students must submit a Dissertation Area Proposal to the director of graduate studies. This proposal is a brief description (250-300 words) of the proposed area of the dissertation; it must be signed by at least two dissertation committee members. Before the end of the Winter quarter of the third year of study, all students should complete the prospectus review, which is an oral discussion based on the written dissertation prospectus. The prospectus review is conducted by a committee consisting of the first two readers of the dissertation. The prospectus should be approximately 2,500–3,000 words and should be presented to the faculty readers well in advance of the review. For students concentrating in Creative Writing, the prospectus should discuss the theoretical and generic origins of the project, its methodology and artistic goals.
- Written comprehensive exam. After completing 60 credit hours, including the 48 hours of foundational coursework, doctoral students will take written comprehensive examinations during the week prior to the start of Fall Quarter of their third year of study. Students will be examined in three (out of four) areas of study: (1) an author or major figure; (2) a genre; (3) a period; and (4) a second period or special topic. Students will prepare a reading list for each examination area in consultation with two faculty examiners; the scope of each exam must be approved by the faculty examiners and the graduate director. All lists must be signed by both examiners and submitted to the graduate director by the date published in the department's Graduate Handbook (typically during the first week of May) or the student will not be allowed to take the exam the following fall.

### Master of Arts in English and Literary arts with a Concentration in Literary Studies

#### Degree Requirements

##### Course Requirements

- 45 hours of course credit, up to 13 hours of which may be taken in graduate tutorials (ENGL 4100), independent research (ENGL 4995) and/or cognate courses outside the department.
- All course work for the MA should be taken at the University of Denver, but, in rare exceptions, a maximum of 10 credit hours may be transferred to count for the requirements if approved by the director of graduate studies and meet the University's transfer of credit policy.
- While students have no specific course requirements beyond the 32-hour minimum within the Department of English and the 13 hours of tutorials or cognate courses, they are advised to work closely with an adviser to determine a balance between coverage and focus. Students may only take two approved 3000 level courses (ENGL 3800 and 3982) in the Department of English. Registration for any other ENGL 3000 level class must be made by special petition to be approved by the full Graduate Committee. Courses must be completed within three years of enrollment (excluding ENGL 4995).

Code	Title	Credits
<b>Coursework Requirements</b>		
Minimum of 32 classroom hours (eight courses) is required.		
Up to 13 credits may be taken in graduate tutorials (ENGL 4100), independent research (ENGL 4995) and/or cognate courses outside the department.		
<b>Total Credits</b>		<b>45</b>

Minimum number of credits required for the degree: 45

#### Non-Course Requirements

- Advancement to candidacy
- A thesis of at least 18,000 words. The thesis for an MA in literary studies is either a single scholarly/critical essay or two 30-page scholarly/critical essays. The thesis adviser must approve a prospectus for the thesis.
- Oral Defense. The defense takes the form of a discussion on the content, context and implications of the work.

#### ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)

Technique, writing practice and criticism.

#### ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)

Technique, writing practice and criticism.

#### ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)

Technique, writing practice and criticism.

#### ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)

Technique, writing practice and criticism.

#### ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)

Technique, writing practice and criticism.

**ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3013 Adv Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)****ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)**

A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

**ENGL 3040 Introduction to Publishing (4 Credits)**

Cross listed with ENGL 2040, MFJS 3140.

**ENGL 3121 Chaucer: Canterbury Tales (4 Credits)**

Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

**ENGL 3320 Oral Literature and Orality in Literature (4 Credits)**

The term "oral literature" generally refers to narratives and poems (including songs) performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. The questions that we explore in this course include: How did oral literature develop, and what are the characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature and also study the use of orality in written literature. Our studies involve the examination of material and texts from different parts of the world.

**ENGL 3402 Early Romantics (4 Credits)****ENGL 3405 Postmodern Visions of Israel (4 Credits)**

This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

**ENGL 3706 Writing the American West (4 Credits)**

Explores historical and contemporary writing produced in and about the American West.

**ENGL 3711 20th-Century American Fiction (4 Credits)**

Fiction, poetry, drama, and non-fiction on selected themes by 20th and 21st century American writers. Topics for study may include issues related to regionalism, ethnicity and gender, as well as specific social and historical concerns.

**ENGL 3730 Literature and Medicine: Addiction and Modernity (4 Credits)**

This course introduces students to accounts of substance use and addiction from the nineteenth century through the present day. We will examine canonical and contemporary literary texts, medical writings, visual representations, smartphone applications, and films alongside topics such as liberalism, inequality, imperial expansion, consumerism, "digital drugs," and the pathologization of addiction. We will consider our readings in light of the following questions: What role do substance use and addiction play in constructing the modern self and society? What can representations of addiction teach us about our relationship with the external world? How does addiction act as a metaphor, a narrative device, or even a political sign? How do gender, class, and race affect narratives of addiction? How do accounts of addiction interact with philosophical texts, medical treatises, and imperial and colonial discourses? In addition to writing critical essays, students will evaluate smartphone addiction treatment apps and devise a creative project on a topic relevant to this course.

**ENGL 3731 Topics in English (1-4 Credits)****ENGL 3732 Topics in English (1-4 Credits)****ENGL 3733 Topics in English (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**ENGL 3742 Jesus in Jewish Literature (4 Credits)**

This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus' life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

**ENGL 3743 Modern Jewish Literature (4 Credits)**

Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

**ENGL 3744 African American Literature (4 Credits)**

This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

**ENGL 3800 Bibliography/Research Method (4 Credits)****ENGL 3803 Modernism/Postmodernism (4 Credits)****ENGL 3813 History and Structure of the English Language (4 Credits)**

A composite course studying both the structure of modern English and the history of the English language.

**ENGL 3815 Studies in Rhetoric (4 Credits)**

This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

**ENGL 3817 History of Rhetoric (4 Credits)****ENGL 3818 Composition Theory (4 Credits)****ENGL 3819 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

**ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)****ENGL 3822 Literary Criticism: 20th Century (4 Credits)**

Critical methods and philosophies of 20th-century critics; their relationship to traditions.

**ENGL 3823 Interpretation Theory (4 Credits)****ENGL 3825 Cultural Criticism (4 Credits)**

Cross listed with ENGL 2835.

**ENGL 3852 Topics in Poetics (4 Credits)****ENGL 3982 Writers in the Schools (2,4 Credits)**

This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

**ENGL 3991 Independent Study (1-17 Credits)****ENGL 3995 Independent Research (1-10 Credits)****ENGL 4000 Colloquium (2 Credits)****ENGL 4001 Sem Creative Writing-Poetry (4 Credits)****ENGL 4009 Seminar -- Creative Nonfiction (4 Credits)**

Advanced writing and study of creative nonfiction, including prose development and structure.

**ENGL 4011 Sem Creative Writing-Fiction (4 Credits)****ENGL 4012 History/Theory of Genre-Poetry (4 Credits)****ENGL 4017 Travel Writing (4 Credits)****ENGL 4050 The Critical Imagination (2 Credits)**

This graduate level course explores poetry, fiction, and criticism as different facets of the imagination. This is a large and a necessarily vaguely defined topic. But in the world of literary studies, creativity and criticism are clearly symbiotic. Reading and writing are connected activities. The poet or fiction writer is often a critic, and there are numerous treatments of interpretation in the critical canon suggesting that the act of reading and interpreting is itself an imaginative and creative act. The course explores genre signatures and possibilities, as well as provides an introduction to some of the analytics through which texts, literary and otherwise, are interpreted.

**ENGL 4100 Graduate Tutorial (2-4 Credits)****ENGL 4120 Beowulf (4 Credits)**

Reading and translation of the Old English Beowulf. Prerequisite: ENGL 4125.

**ENGL 4125 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 4120.

**ENGL 4150 Special Topics in Medieval Lit (4 Credits)****ENGL 4200 Special Topics-Early Mod Lit (4 Credits)****ENGL 4210 Holocaust Literature (4 Credits)**

This seminar presents a multidisciplinary and transnational approach to literature of the Holocaust. Students consider memoir, fiction, and poetry drawn from a variety of national literatures and linguistic traditions. Works written by victims, survivors and 'witnesses through the imagination' are all considered. These readings are supplemented by secondary texts, including historical and philosophical materials, as well as relevant works from the social sciences.

**ENGL 4213 Advanced Studies in Early Modern Literature (4 Credits)****ENGL 4220 Seminar-Studies in Shakespeare (4 Credits)****ENGL 4300 Advanced Studies in 18th Century Literature (4 Credits)****ENGL 4424 Topics in English: 19th Century Literature (4 Credits)**

Special Topics courses will explore specific topics within historical periods, single authors, or theoretical/critical/ scholarly issues.

**ENGL 4510 ISL Dharamsala: Tibet, Global Citizenship, & Community Literacies (4 Credits)**

ISL Dharamsala presents DU students with the unique opportunity to study international community literacies as a practical component of global citizenship through service-learning placements and study in Dharamsala, India. Home of the Dalai Lama and the Tibetan government-in-exile, Dharamsala is a multi-generational community located in the northern Indian foothills of the Himalayas. During fall quarter, students will study community literacies in the practice of global citizenship and service while immersed in the geo-political, religious, and other contexts experienced by Tibetans in exile. During their time in Dharamsala, cultural immersion and a service-learning placement will give students insight into the complexities of social justice issues and cultural nuances they have been studying and provide opportunities to contribute to local and global society through informed and reflective practice.

**ENGL 4511 Translingualism and Multilingualism (4 Credits)**

The course starts with an introduction to the field of Translation Studies and Practice but continues to focus on two particular aspects of the field: translingualism and multilingualism. We delve into the various phenomena of language porousness, such as linguistic elements existing in and moving across multiple languages as well as language users morphing multiple languages or navigating between several. We discuss theoretical debates about these phenomena and their impact on the praxis of translating and writing, in the context of language pedagogy and creative practices. We also study examples of creative work that embody translingualism and multilingualism to different extents using various methodologies. Students write critically in conversation with the theoretical material and create their own works implementing and exploring linguistic porousness offered by translingualism and multilingualism.

**ENGL 4600 Adv Studies -20th Cent Lit (4 Credits)****ENGL 4621 Adv Studies-20th C. Literature (2-4 Credits)**

This course will offer (and be required of) graduate students an advanced foundation in 20th century literature; the primary texts and their cultural/historical/ theoretical contexts.

**ENGL 4650 Special Topics: 20th Cent Lit (4 Credits)****ENGL 4660 The Black Imagination (4 Credits)**

Focusing mainly on Africa, Asia, Europe, and the Americas (especially the USA and the Caribbean/Latin America), this course explores and connects aspects of the black imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into black (African and African diasporic) aesthetics from an intercontinental and an interdisciplinary perspective.

**ENGL 4675 Theories of Narrative: Formalism, Narratology, Cybertext (4 Credits)**

This class traces developments in narrative theory from Russian Formalism through "classical" narratology and on to examine the border between traditional narrative texts and texts that require a higher degree of interactivity, sometimes called "cyber texts." The goal is to identify significant contributions to narrative theory and to suggest the possibilities for the future of the field. Seminal articles, key works, and critical introductions survey key advances in narrative theory to present an overview of the field from its inception to contemporary trends.

**ENGL 4700 Antebellum American Literature (4 Credits)****ENGL 4701 Topics in English (2-5 Credits)**

A topics class; topics may change.

**ENGL 4702 Topics in English (2-5 Credits)**

A topics class; topics may change.

**ENGL 4730 American Romanticism (4 Credits)****ENGL 4732 Spc Tpc: Antebellum Amer Lit (4 Credits)****ENGL 4743 Black Feminist Criticism (4 Credits)**

This course examines the discursive reach of black feminist criticism by journeying into the creative terrain of literature, visual art, music, and performance produced by black women in the United States and throughout the black diaspora, from the nineteenth century to the present.

**ENGL 4830 Seminar: Teaching and Writing Literature (2-4 Credits)****ENGL 4840 Topics in Composition Studies (2-4 Credits)**

Each offering of this course focuses on specific issues in theory, research, or pedagogy within the broad field of composition studies. Examples of topics include the development of writing abilities; genre theory and composing; multimodal texts and their intersections and disjunctions of rhetoric and composition; the history of composing theories and practices; realms of composing, including the academic, civic, vocational, aesthetic, and interpersonal; institutional formations and settings of composing; discourse theories; stylistics; race, gender, class and composing; and so on.

**ENGL 4851 Publishing Institute (6 Credits)****ENGL 4852 Dissertation Colloquium (2 Credits)**

This two-credit dissertation colloquium is offered in the winter and spring for third-year PhD students in English who are in the process of researching and writing their dissertations. In addition to having weekly presentations and discussions of work in progress, the group will peruse prefaces and introductions to former English Department dissertations, write and abstract for their own dissertation, and possibly revise and send out a piece from their dissertation. The class is open to both literary studies and creative writing students. Restricted to doctoral students in English.

**ENGL 4991 Independent Study (1-17 Credits)****ENGL 4995 Independent Research (1-17 Credits)****ENGL 5991 Independent Study (1-17 Credits)****ENGL 5995 Independent Research (1-17 Credits)****ENGL 5999 American Literary Marketplace (0-2 Credits)**

"American Literary Marketplace" bridges the culture of writing within the Department of English and Literary Arts with the culture of publishing in the United States. As an experiential learning course, it offers graduate students a formal, structured opportunity—as an internship, externship, or cooperative educational experience, depending on the student's need—to deepen their writing practice and enact curricular learning outside and beyond the literary classroom.

**Courses****ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3013 Adv Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)****ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)**

A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

**ENGL 3040 Introduction to Publishing (4 Credits)**

Cross listed with ENGL 2040, MFJS 3140.

**ENGL 3121 Chaucer: Canterbury Tales (4 Credits)**

Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

**ENGL 3320 Oral Literature and Orality in Literature (4 Credits)**

The term "oral literature" generally refers to narratives and poems (including songs) performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. The questions that we explore in this course include: How did oral literature develop, and what are the characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature and also study the use of orality in written literature. Our studies involve the examination of material and texts from different parts of the world.

**ENGL 3402 Early Romantics (4 Credits)****ENGL 3405 Postmodern Visions of Israel (4 Credits)**

This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

**ENGL 3706 Writing the American West (4 Credits)**

Explores historical and contemporary writing produced in and about the American West.

**ENGL 3711 20th-Century American Fiction (4 Credits)**

Fiction, poetry, drama, and non-fiction on selected themes by 20th and 21st century American writers. Topics for study may include issues related to regionalism, ethnicity and gender, as well as specific social and historical concerns.

**ENGL 3730 Literature and Medicine: Addiction and Modernity (4 Credits)**

This course introduces students to accounts of substance use and addiction from the nineteenth century through the present day. We will examine canonical and contemporary literary texts, medical writings, visual representations, smartphone applications, and films alongside topics such as liberalism, inequality, imperial expansion, consumerism, "digital drugs," and the pathologization of addiction. We will consider our readings in light of the following questions: What role do substance use and addiction play in constructing the modern self and society? What can representations of addiction teach us about our relationship with the external world? How does addiction act as a metaphor, a narrative device, or even a political sign? How do gender, class, and race affect narratives of addiction? How do accounts of addiction interact with philosophical texts, medical treatises, and imperial and colonial discourses? In addition to writing critical essays, students will evaluate smartphone addiction treatment apps and devise a creative project on a topic relevant to this course.

**ENGL 3731 Topics in English (1-4 Credits)****ENGL 3732 Topics in English (1-4 Credits)****ENGL 3733 Topics in English (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**ENGL 3742 Jesus in Jewish Literature (4 Credits)**

This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus' life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

**ENGL 3743 Modern Jewish Literature (4 Credits)**

Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

**ENGL 3744 African American Literature (4 Credits)**

This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

**ENGL 3800 Bibliography/Research Method (4 Credits)****ENGL 3803 Modernism/Postmodernism (4 Credits)****ENGL 3813 History and Structure of the English Language (4 Credits)**

A composite course studying both the structure of modern English and the history of the English language.

**ENGL 3815 Studies in Rhetoric (4 Credits)**

This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

**ENGL 3817 History of Rhetoric (4 Credits)****ENGL 3818 Composition Theory (4 Credits)****ENGL 3819 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

**ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)****ENGL 3822 Literary Criticism: 20th Century (4 Credits)**

Critical methods and philosophies of 20th-century critics; their relationship to traditions.

**ENGL 3823 Interpretation Theory (4 Credits)****ENGL 3825 Cultural Criticism (4 Credits)**

Cross listed with ENGL 2835.

**ENGL 3852 Topics in Poetics (4 Credits)****ENGL 3982 Writers in the Schools (2,4 Credits)**

This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

**ENGL 3991 Independent Study (1-17 Credits)****ENGL 3995 Independent Research (1-10 Credits)****ENGL 4000 Colloquium (2 Credits)****ENGL 4001 Sem Creative Writing-Poetry (4 Credits)****ENGL 4009 Seminar -- Creative Nonfiction (4 Credits)**

Advanced writing and study of creative nonfiction, including prose development and structure.

**ENGL 4011 Sem Creative Writing-Fiction (4 Credits)****ENGL 4012 History/Theory of Genre-Poetry (4 Credits)****ENGL 4017 Travel Writing (4 Credits)****ENGL 4050 The Critical Imagination (2 Credits)**

This graduate level course explores poetry, fiction, and criticism as different facets of the imagination. This is a large and a necessarily vaguely defined topic. But in the world of literary studies, creativity and criticism are clearly symbiotic. Reading and writing are connected activities. The poet or fiction writer is often a critic, and there are numerous treatments of interpretation in the critical canon suggesting that the act of reading and interpreting is itself an imaginative and creative act. The course explores genre signatures and possibilities, as well as provides an introduction to some of the analytics through which texts, literary and otherwise, are interpreted.

**ENGL 4100 Graduate Tutorial (2-4 Credits)****ENGL 4120 Beowulf (4 Credits)**

Reading and translation of the Old English Beowulf. Prerequisite: ENGL 4125.

**ENGL 4125 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 4120.

**ENGL 4150 Special Topics in Medieval Lit (4 Credits)****ENGL 4200 Special Topics-Early Mod Lit (4 Credits)****ENGL 4210 Holocaust Literature (4 Credits)**

This seminar presents a multidisciplinary and transnational approach to literature of the Holocaust. Students consider memoir, fiction, and poetry drawn from a variety of national literatures and linguistic traditions. Works written by victims, survivors and 'witnesses through the imagination' are all considered. These readings are supplemented by secondary texts, including historical and philosophical materials, as well as relevant works from the social sciences.

**ENGL 4213 Advanced Studies in Early Modern Literature (4 Credits)****ENGL 4220 Seminar-Studies in Shakespeare (4 Credits)****ENGL 4300 Advanced Studies in 18th Century Literature (4 Credits)****ENGL 4424 Topics in English: 19th Century Literature (4 Credits)**

Special Topics courses will explore specific topics within historical periods, single authors, or theoretical/critical/ scholarly issues.

**ENGL 4510 ISL Dharamsala: Tibet, Global Citizenship, & Community Literacies (4 Credits)**

ISL Dharamsala presents DU students with the unique opportunity to study international community literacies as a practical component of global citizenship through service-learning placements and study in Dharamsala, India. Home of the Dalai Lama and the Tibetan government-in-exile, Dharamsala is a multi-generational community located in the northern Indian foothills of the Himalayas. During fall quarter, students will study community literacies in the practice of global citizenship and service while immersed in the geo-political, religious, and other contexts experienced by Tibetans in exile. During their time in Dharamsala, cultural immersion and a service-learning placement will give students insight into the complexities of social justice issues and cultural nuances they have been studying and provide opportunities to contribute to local and global society through informed and reflective practice.

**ENGL 4511 Translingualism and Multilingualism (4 Credits)**

The course starts with an introduction to the field of Translation Studies and Practice but continues to focus on two particular aspects of the field: translingualism and multilingualism. We delve into the various phenomena of language porousness, such as linguistic elements existing in and moving across multiple languages as well as language users morphing multiple languages or navigating between several. # Lamont School of Music

Office: Robert & Judi Newman Center for the Performing Arts

Mail Code: 2344 E. Iliff Ave., Denver, CO 80208

Phone: 303-871-6400

Email: [musicadmissions@du.edu](mailto:musicadmissions@du.edu)

Web Site: <http://www.du.edu/lamont> (<http://www.du.edu/lamont/>)

With its wide array of degrees and certificates, outstanding faculty, and superior facilities, the Lamont School of Music is one of the most distinguished music programs in the United States.

If the words dedication, discipline, enthusiasm, and desire define your musical aspirations, then you'll find exciting opportunities at the University of Denver. The Lamont School of Music will lend resonance to your musical career, as well as surrounding you with other talented students and a rich cultural environment in Denver.

The Lamont School of Music offers MM programs with concentrations in composition, conducting, pedagogy, and performance, as well as MA programs in music theory and musicology. We offer certificates with concentrations in conducting, jazz studies, music entrepreneurship, music theory pedagogy, orchestral studies, performance, piano pedagogy, and Suzuki pedagogy. Online certificates include performance & recording and production, performance & composition, and performance & orchestral audition preparation. We also offer artist diploma programs with a concentrations in conducting and performance.

The faculty is composed of professors and instructors who actively perform, compose, publish, and lecture worldwide. The Lamont School of Music is located in the Robert and Judi Newman Center for the Performing Arts, a 186,000-square-foot state-of-the-art facility opened in 2002 and officially inaugurated in 2003. The Newman Center includes an academic building, a 225-seat recital hall, a 1,000-seat concert/opera hall, and a 250-seat flexible theater. The academic building is replete with teaching studios, practice rooms (some of which are digitally enhanced as "virtual" acoustic practice rooms), large rehearsal spaces, a music library, a digital keyboard laboratory, two recording studios, an electronic music lab, classrooms with smart-to-the-seat technology, and an 80-seat recital salon.

## Master of Arts in Music with a Concentration in Music Theory

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites:

- Applicants without an undergraduate degree in music must complete additional requirements. Please contact the Lamont Admission Office for details (email: [musicadmission@du.edu](mailto:musicadmission@du.edu), phone: 303.871.6973).

### Other Required Materials

- To be considered for a Theory GTA, please submit the syllabi from your undergraduate theory courses and ask your recommenders to comment on your teaching abilities, or potential. Please upload the syllabi to your application as a miscellaneous document. Note that we may ask candidates for GTA positions to take a keyboard and sight-reading test via Zoom.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

- All applicants must schedule and complete an audition. Audition information and requirements can be found on the Lamont School of Music website (<https://liberalarts.du.edu/lamont/content/string/>).

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Master of Music with a Concentration in Performance

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Applicants without an undergraduate degree in music must complete additional requirements. Please contact the Lamont Admission Office for details (email: [musicadmission@du.edu](mailto:musicadmission@du.edu), phone: 303.871.6973).

### Other Required Materials

- All applicants must complete an audition. Audition information and requirements can be found on the Lamont School of Music website (<https://liberalarts.du.edu/lamont/academics/studios/>).

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Certificate in Music (Artist Diploma Program) with a Concentration in Conducting

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Other Required Materials

- Orchestral conducting applicants must submit a pre-screening audition through the online application by December 15, 2023. Those who advance to the final round will complete a live audition. Audition information and requirements can be found on the Lamont School of Music website (<https://liberalarts.du.edu/lamont/academics/conducting-studio/>).

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Music with a Concentration in Conducting

The Master of Music with a concentration in Conducting degree has three emphases: Choral, Orchestral, or Wind.

### Degree requirements

#### Coursework requirements

Code	Title	Credits
<b>Concentration Area</b>		
Complete the following course each quarter until 12 credits are met.		
MUPR 4930 & 4930 & 4930 & 4930 & 4930 & 4930	Conducting and Conducting and Conducting and Conducting and Conducting and Conducting	12
<b>Emphasis</b>		
Students must select one of the three emphases (Choral, Orchestral or Wind):		
A. Choral Emphasis		

Complete all of the following courses:

MUAC 3960	Advanced Orchestral Conducting	2
MUAC 3962	Advanced Wind Conducting	2
MUAC 3684	Choral Literature I	2
MUAC 3689	Choral Literature II	2
MUEN 3712 & 3712 & 3712 & 3712 & 3712	Lamont Chorale and Lamont Chorale and Lamont Chorale and Lamont Chorale and Lamont Chorale	6

Select either the Choral Pedagogy sequence or the Vocal Pedagogy sequence: 4

MUAC 3686 & MUAC 3688	Choral Pedagogy I and Choral Pedagogy II	
MUAC 3240 & MUAC 3241	Vocal Pedagogy I and Vocal Pedagogy II (& 2 credits of upper-division area electives approved by faculty advisor)	

#### B. Orchestral Emphasis

Complete all of the following courses:

MUAC 3961	Advanced Choral Conducting	2
MUAC 3962	Advanced Wind Conducting	2
MUAC 3959	Movement and Expression for Conductors	4
MUAC 3XXX or 4XXX	Course in orchestral literature	4
MUEN 3760 & 3760 & 3760 & 3760 & 3760 & 3760	Lamont Symphony Orchestra and Lamont Symphony Orchestra and Lamont Symphony Orchestra and Lamont Symphony Orchestra and Lamont Symphony Orchestra and Lamont Symphony Orchestra	6

#### C. Wind Emphasis

Complete all of the following courses:

MUAC 3960	Advanced Orchestral Conducting	2
MUAC 3961	Advanced Choral Conducting	2
MUAC 3959	Movement and Expression for Conductors	4
MUAC 3973	Advanced Wind Literature I	2
MUAC 3974	Advanced Wind Literature II	2
MUEN 3752 & 3752 & 3752 & 3752 & 3752 & 3752	Lamont Wind Ensemble and Lamont Wind Ensemble and Lamont Wind Ensemble and Lamont Wind Ensemble and Lamont Wind Ensemble and Lamont Wind Ensemble	6

#### Other Studies in Music

All emphases complete all of the following courses:

MUAC 4000	Introduction to Graduate Study	2
MUAC 4000	Introduction to Graduate Study	2
Musicology/Ethnomusicology course		4
MUAC 3497	Studying Music in the Field: Theory and Method in Ethnomusicology	
MUAC 3502	Gender & Genre in World Music	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3847	Hip-Hop: Theory and Practice	
MUAC 3521	Topics in World Music	
MUAC 4160	Issues in Opera History and Adaptation

MUAC 4498	Music, Dance, and Everyday Life in South Asia
MUAC 4499	Topics in Musicology
MUAC 4511	Mahler and Musical Culture
MUAC 4512	Stories of Music History
MUAC 4513	Wagner and the Ideology of the Artwork
MUAC 4518	Musical Theft: Music Appropriation and Appreciation from Ariana Grande to Paul Simon
MUAC 4519	Social Justice and Community Music Making
MUAC 4520	Topics in Hindustani Music
MUAC 4521	Topics in Baroque Music
MUAC 4535	Baroque Opera on Stage
MUAC 4536	Musics of the African Diaspora
MUAC 4537	Psalms, Hymns, and Spiritual Songs: The Music of the African American Worship
MUAC 4538	Cultural and Psychological History of the African American Spiritual
MUAC 4539	Music, Politics, and Policy
MUAC 4540	Music and Activism
MUAC 4545	The Making of Romantic Music: Paris and Leipzig in the 1830s
Other courses as approved by the department	
Music Theory course	
MUAC 3023	Rhythm & Meter in Music
MUAC 3025	Topics in Analysis: Brahms
MUAC 3026	Sonata Form: Performance, Analysis, and History
MUAC 3027	Arranging for the Classical Musician
MUAC 4002	Form and Analysis
MUAC 4006	Post-Tonal Theory: Mode/Rhythm
MUAC 4007	Post-Tonal Theory and Analysis: Set-Theory and Serialism
MUAC 4008	Modal Counterpoint, Renaissance Vocal Style
MUAC 4009	Tonal Counterpoint
MUAC 4010	Pedagogy of Music Theory
MUAC 4014	Music-Theoretical Approaches to Popular Music
MUAC 4121	Seminar in Music Theory
MUAC 4801	Introduction to Schenkerian Analysis
Other courses as approved by department	
<b>Electives</b>	
All emphases complete all of the following courses:	
MUAC 3XXX or MUAC 4XXX	Musicology/Ethnomusicology/Music Theory/Composition course
MUAC 3023	Rhythm & Meter in Music
MUAC 3025	Topics in Analysis: Brahms
MUAC 3026	Sonata Form: Performance, Analysis, and History
MUAC 3027	Arranging for the Classical Musician
MUAC 3497	Studying Music in the Field: Theory and Method in Ethnomusicology
MUAC 3502	Gender & Genre in World Music
MUAC 3521	Topics in World Music
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music
MUAC 3578	Advanced Composition
MUAC 3847	Hip-Hop: Theory and Practice
MUAC 3910	Orchestration
MUAC 4002	Form and Analysis
MUAC 4006	Post-Tonal Theory: Mode/Rhythm
MUAC 4007	Post-Tonal Theory and Analysis: Set-Theory and Serialism

MUAC 4008	Modal Counterpoint, Renaissance Vocal Style	
MUAC 4009	Tonal Counterpoint	
MUAC 4010	Pedagogy of Music Theory	
MUAC 4014	Music-Theoretical Approaches to Popular Music	
MUAC 4090	Model Composition	
MUAC 4121	Seminar in Music Theory	
MUAC 4160	Issues in Opera History and Adaptation	
MUAC 4161	Topics in Modern Opera	
MUAC 4300	Topics in Jazz History	
MUAC 4492	History of Opera: From Monteverdi to Minimalism and Beyond	
MUAC 4493	Approaches to American Popular Music	
MUAC 4494	Music and Belief in World Cultures	
MUAC 4498	Music, Dance, and Everyday Life in South Asia	
MUAC 4499	Topics in Musicology	
MUAC 4511	Mahler and Musical Culture	
MUAC 4512	Stories of Music History	
MUAC 4513	Wagner and the Ideology of the Artwork	
MUAC 4518	Musical Theft: Music Appropriation and Appreciation from Ariana Grande to Paul Simon	
MUAC 4519	Social Justice and Community Music Making	
MUAC 4520	Topics in Hindustani Music	
MUAC 4521	Topics in Baroque Music

MUAC 4545	The Making of Romantic Music: Paris and Leipzig in the 1830s	
MUAC 4801	Introduction to Schenkerian Analysis	
3XXX or 4XXX	Course	4

Note: Students may complete a maximum of 4 credits in graduate departments outside of the Lamont School of Music.

**Total Credits** **50**

Minimum number of credits required for degree: 50 credits

**Non-coursework requirements (see below and the Lamont Student Handbook for more details)**

- Proficiency Exams:
  - Demonstration of graduate-level proficiency in Musicology by examination.
  - Demonstration of graduate-level proficiencies in Music Theory and Aural Skills by examination.
- Convocation: Attendance requirements as specified in the Lamont Student Handbook.
- Recital: One full-length conducting recital. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.
- Final Written Examination.
- Final Oral Comprehensive Examination.

---

## Master of Music with a Concentration in Pedagogy

The Master of Music in Music with a concentration in Pedagogy has two emphases: Suzuki Cello or Suzuki Violin.

**Degree requirements****Coursework requirements**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
<b>Emphasis</b>		
Select either the Suzuki Cello or Suzuki Violin emphasis.		
1. Suzuki Cello Pedagogy Emphasis		
Students will register for MUPR 4270 each quarter until 12 credits are met.		
MUPR 4270 & 4270 & 4270 & 4270 & 4270 & 4270	Violoncello and Violoncello and Violoncello and Violoncello and Violoncello and Violoncello	12
MUAC 3463 & MUAC 3464 & MUAC 3465	Suzuki Cello Seminar I and Suzuki Cello Seminar I and Suzuki Cello Seminar I	6
MUAC 3466 & MUAC 3467 & MUAC 3468	Suzuki Cello Seminar II and Suzuki Cello Seminar II and Suzuki Cello Seminar II	6
MUAC 3439	Teaching Note Reading	2
MUAC 3460 & 3460 & 3460	Suzuki Cello Practicum and Suzuki Cello Practicum and Suzuki Cello Practicum	3
MUEN 3XXX	Ensembles (Must register/participate in two ensembles per quarter as assigned. See Lamont Student Handbook for details.)	6
2. Suzuki Violin Pedagogy Emphasis		
Students will register for MUPR 4250 each quarter until 12 credits are met.		
MUPR 4250 & 4250 & 4250 & 4250 & 4250 & 4250	Violin and Violin and Violin and Violin and Violin and Violin	12
MUAC 3470 & MUAC 3471 & MUAC 3472	Suzuki Violin Seminar I and Suzuki Violin Seminar I and Suzuki Violin Seminar I	6
MUAC 3282 & MUAC 3283 & MUAC 3284	Suzuki Violin Seminar II and Suzuki Violin Seminar II and Suzuki Violin Seminar II	6
MUAC 3439	Teaching Note Reading	2
MUAC 3477 & 3477 & 3477	Suzuki Violin Practicum and Suzuki Violin Practicum and Suzuki Violin Practicum	3
MUEN 3XXX	Ensembles (Must register/participate in two ensembles per quarter as assigned. See Lamont Student Handbook for details.)	6
<b>Other Studies in Music</b>		
All emphases complete all of the following courses:		
MUAC 4000	Introduction to Graduate Study	2
MUAC 4000	Introduction to Graduate Study	2
Musicology/Ethnomusicology course		4
MUAC 3497	Studying Music in the Field: Theory and Method in Ethnomusicology	
MUAC 3502	Gender & Genre in World Music	
MUAC 3521	Topics in World Music	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3847	Hip-Hop: Theory and Practice	
MUAC 4160	Issues in Opera History and Adaptation	

MUAC 4161	Topics in Modern Opera
MUAC 4300	Topics in Jazz History

MUAC 4540	Music and Activism	
MUAC 4545	The Making of Romantic Music: Paris and Leipzig in the 1830s	
3XXX or 4XXX	Course	4
Note: Students may complete a maximum of 4 credits in graduate departments outside of the Lamont School of Music.		
<b>Total Credits</b>		<b>55</b>

Minimum number of credits required for the degree: 55 credits

**Non-coursework requirements (see below and the Lamont Student Handbook for more details)**

- Proficiency Exams:
  - Demonstration of graduate-level proficiency in Musicology by examination.
  - Demonstration of graduate-level proficiencies in Music Theory and Aural Skills by examination.
- Convocation: Attendance requirements as specified in the Lamont Student Handbook.
- Recital: One full-length performance recital. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.
- Final Teaching Demonstration.
- Final Oral Comprehensive Exam.

## Master of Music with a Concentration in Performance

The Master of Music in Music with a concentration in Performance has several emphases: Bassoon, Carillon, Cello, Clarinet, Double Bass, Flute, Guitar, Harp, Horn, Jazz (Double Bass, Drums, Guitar, Piano, Trombone, Trumpet, Voice, or Woodwinds), Oboe, Organ, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, or Voice.

### Degree requirements

#### Coursework requirements

Code	Title	Credits
<b>Concentration Area</b>		
All emphases must complete all of the following courses:		
MUPR 4XXX	Applied Lessons (students will register for applied lessons each quarter until 12 credits are met.)	12
MUEN 3XXX	Ensembles (Must register/participate in ensembles per quarter as assigned. See Lamont Student Handbook for details.)	6
Select one of the instrument emphases.		12
<b>A. Bassoon</b>		
MUAC 3761 & MUAC 3762	Pedagogy & Repertoire Bassoon and Pedagogy & Repertoire Bassoon	
3XXX or 4XXX: Area elective		
<b>B. Carillon</b>		
MUAC 3698	Carillon History and Mechanics	
MUAC 3700	Carillon Repertoire	
MUAC 3700	Carillon Repertoire	
<b>C. Cello</b>		
MUAC 3730 or MUAC 3463 & MUAC 3464	Pedagogy & Repertoire Cello Suzuki Cello Seminar I and Suzuki Cello Seminar I	
MUAC 3650 or MUAC 3465 & MUAC 3466	Orchestral Excerpts-Cello Suzuki Cello Seminar I and Suzuki Cello Seminar II	
3XXX or 4XXX: Area elective		
<b>D. Clarinet</b>		
MUAC 3751 & MUAC 3752	Pedagogy & Repertoire Clarinet and Pedagogy & Repertoire Clarinet	
3XXX or 4XXX: Area elective		
<b>E. Double Bass</b>		
MUAC 3655	Orchestral Excerpts-Bass	
MUAC 3733	Pedagogy & Rep Double Bass	
3XXX or 4XXX: Area elective		
<b>F. Flute</b>		
MUAC 3748 & MUAC 3749	Pedagogy & Repertoire Flute and Pedagogy & Repertoire Flute	
3XXX or 4XXX: Area elective		
<b>G. Guitar</b>		
Select one of the following options:		
MUAC 3724 & 3724	Pedagogy & Repertoire Guitar and Pedagogy & Repertoire Guitar	
3XXX or 4XXX: Area elective		
<b>OR</b>		
MUAC 4050 & MUAC 4051 & MUAC 4052	Major Adv Repertoire Guitar and Major Adv Repertoire Guitar and Major Adv Repertoire Guitar	
3XXX or 4XXX: Area elective		
<b>H. Harp</b>		
MUAC 3736 & MUAC 3737	Pedagogy & Repertoire Harp and Pedagogy & Repertoire Harp	

3XXX or 4XXX: Area elective

## I. Horn

MUAC 3662                      Orchestral Studies for Brass

MUAC 3708                      Pedagogy &amp; Repertoire Horn

MUAC 3765                      Professional Brass Techniques

3XXX or 4XXX: Area elective

## J. Jazz

Jazz emphasis in Double Bass, Drums, Guitar, Piano, Trombone, Trumpet, Voice, or Woodwinds

Courses from the Jazz Studies curriculum selected in consultation with student's faculty advisor.

## K. Oboe

MUAC 3757                      Pedagogy & Repertoire Oboe  
& MUAC 3758                      and Pedagogy & Repertoire Oboe

3XXX or 4XXX: Area elective

## L. Organ

MUPR 3350                      Organ Improvisation  
& 3350                              and Organ Improvisation  
& 3350                              and Organ ImprovisationMUAC 3738                      Pedagogy & Repertoire Organ  
& MUAC 3739                      and Pedagogy & Repertoire Organ  
& MUAC 3740                      and Pedagogy & Repertoire Organ

## M. Percussion

MUAC 3718                      Pedagogy & Repertoire Percussion  
& MUAC 3719                      and Pedagogy & Repertoire Percussion

3XXX or 4XXX: Area elective

## N. Piano

Select one of the following options:

MUAC 3822                      Piano Repertoire I  
& MUAC 3823                      and Piano Repertoire II  
& MUAC 3824                      and Piano Repertoire III

Sequence required if equivalent courses were not completed in the undergraduate degree.

MUAC 3XXX or 4XXX           Advanced Keyboard Repertoire course

## OR

MUAC 3XXX or MUAC 4XXX   Advanced Keyboard Repertoire courses

3XXX or 4XXX: Area elective

## O. Saxophone

MUAC 3754                      Pedagogy & Repertoire Saxophone  
& MUAC 3755                      and Pedagogy & Repertoire Saxophone

3XXX or 4XXX: Area elective

## P. Trombone

MUAC 3662                      Orchestral Studies for Brass

MUAC 3712                      Pedagogy &amp; Repertoire Trombone

MUAC 3765                      Professional Brass Techniques

3XXX or 4XXX: Area elective

## Q. Trumpet

MUAC 3662                      Orchestral Studies for Brass

MUAC 3742                      Pedagogy &amp; Repertoire Trumpet

MUAC 3765                      Professional Brass Techniques

3XXX or 4XXX: Area elective

## R. Tuba

MUAC 3662                      Orchestral Studies for Brass

MUAC 3706                      Pedagogy &amp; Repertoire Tuba

MUAC 3765                      Professional Brass Techniques

3XXX or 4XXX: Area elective

## S. Viola

MUAC 3661 & MUAC 3663	Orchestral Excerpts Viola and Orchestral Excerpts, Viola II	
3XXX or 4XXX: Area elective		
T. Violin		
MUAC 3470 & MUAC 3471	Suzuki Violin Seminar I and Suzuki Violin Seminar I	
MUAC 3660 or MUAC 3472 & MUAC 3282	Orchestral Excerpts-Violin Suzuki Violin Seminar I and Suzuki Violin Seminar II	
3XXX or 4XXX: Area elective		
U. Voice		
MUAC 3810 & MUAC 3811 & MUAC 3812	Voice Repertoire and Voice Repertoire and Voice Repertoire

3XXX or 4XXX		4
Note: Students may complete a maximum of 4 credits in graduate departments outside of the Lamont School of Music.		
Voice majors must take MUAC 3240 & MUAC 3241 Vocal Pedagogy I-II if equivalent was not completed during undergraduate study.		
MUEN 3XXX	Ensembles (Consult Lamont Student Handbook for specific requirements. Not necessary if credits are required in the Concentration Area.)	6

**Minimum Number of Credits Required** **75**

Minimum number of credits required for degree: At least 75 credits

### Non-coursework requirements

Students must complete all non-coursework requirements for both concentrations. See Lamont Student Handbook for details.

## Artist Diploma Programs

### Certificate in Music (Artist Diploma Program) with a Concentration in Conducting

The Artist Diploma with a Concentration in Conducting has three emphases: Choral, Orchestral or Wind

Certificate requirements

#### Coursework requirements

Code	Title	Credits
<b>Core coursework requirements</b>		
Complete all of the following courses:		
MUAC, MUPR, MUEN 3XXX or 4XXX	Upper-division Music electives	9
MUPR 4930	Conducting (2 credits each quarter)	12
Students will complete MUAC 4600 for 0-2 credits each quarter, earning a minimum of 6 credits prior to program completion.		
MUAC 4600 & 4600 & 4600 & 4600 & 4600	Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director	6
<b>Total Credits</b>		<b>27</b>

Minimum number of credits required for the certificate: 27 credits

**Non-coursework requirements:**

- Candidates will be enrolled in the Artist Diploma program for two years.
- Candidates will make four concert appearances with an appropriate major ensemble, which will be evaluated.
- Candidates will successfully perform one full-length conducting recital while enrolled in the program. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.

---

## Certificate in Music (Artist Diploma) with a Concentration in Performance

**Certificate requirements****Coursework requirements**

Code	Title	Credits
<b>Core coursework requirements</b>		
Complete all of the following courses:		
MUAC, MUPR, MUEN 3XXX or 4XXX	Upper-division Music electives	9
MUPR 4XXX	Applied Lessons (2 credits each quarter)	12
MUEN 3XXX	Ensembles/Chamber Music (Must audition for and participate in two ensembles per quarter, at least one of which must be an appropriate major ensemble, if so assigned. See Lamont Student Handbook for details.)	6

Note: These are minimum hours required. Candidates must enroll for at least one credit hour per quarter for each quarter of study and participate in at least two ensembles per quarter of study.

**Total Credits** **27**

Minimum number of credits required for the certificate: 27 credits

**Non-coursework requirements:**

- Candidates will be enrolled in the Artist Diploma program for two years.
- Candidates will successfully perform three (3) juried, full-length solo recitals while enrolled in the [program. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.](#)
- [Participate in the Lamont Honors Competitions \(concerto and chamber music\) at least once during enrollment in the program.](#)

## Graduate Certificate Programs

### Graduate Certificate in Music with a Concentration in Conducting

The Certificate in Music with a concentration in Conducting has three emphases: Choral, Orchestral, or Wind.

**Certificate requirements****Coursework requirements**

Code	Title	Credits
<b>Core coursework requirements</b>		
MUPR 4930	Conducting (2 credits each quarter)	12
Students will complete MUAC 4600 for 0-2 credits each quarter, earning a minimum of 6 credits prior to program completion.		
MUAC 4600 & 4600 & 4600 & 4600 & 4600 & 4600	Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director and Extra-Musical Roles of the Music Director	6
MUEN 3XXX	Ensembles	6

Candidates will enroll in the appropriate major ensemble for 1 credit hour per quarter for each quarter of study. They must audition for, and if so assigned, play/sing in said ensemble each quarter. Candidates who do not play an appropriate instrument or who are not accepted into the ensemble for any given quarter will fulfill the credit and requirement by attending all rehearsals and concerts, following along in their scores during rehearsals.

Select the two courses outside your emphasis from the following:

MUAC 3960	Advanced Orchestral Conducting	2
MUAC 3961	Advanced Choral Conducting	2

MUAC 3962	Advanced Wind Conducting	2
<b>Total Credits</b>		<b>28</b>

Minimum number of credits required for the certificate: 28 credits

**Non-coursework requirements:**

- Candidates will be enrolled in the Certificate program for two years.
- Candidates will successfully perform one full-length conducting recital while enrolled in the program. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.

## Graduate Certificate in Music with a Concentration in Orchestral Studies

### Coursework requirements

Code	Title	Credits
MUPR 4XXX	Applied Lessons on major instrument (2 credits each quarter)	6
MUPR 4XXX	Applied Lessons on orchestral repertoire (2 credits each quarter)	6
MUEN 3XXX	Chamber Ensembles	3
	Lamont Symphony Orchestra	3
MUEN 3760	Lamont Symphony Orchestra	
<b>Total Credits</b>		<b>18</b>

Minimum number of credits required for the certificate: 18

**Non-coursework requirements:**

- One solo recital consisting of orchestral audition solo repertoire. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.
- Two orchestral audition juries in audition format (winter and spring quarters).
- Candidates will normally be enrolled for one year. However, one may request to remain in school longer with the stipulation that the candidate must enroll in orchestra every quarter during which they are on campus.

## Graduate Certificate in Music with a Concentration in Piano Pedagogy

Code	Title	Credits
MUPR 4210 & 4210 & 4210	Piano and Piano and Piano	6
MUAC 4840	Piano Teaching Practicum (Students must enroll in MUAC 4840 Piano Teaching Practicum each quarter, for 0-2 credits per quarter.)	2
MUAC 4000	Introduction to Graduate Study (Fall quarter; applicants who have completed a similar requirement through a master's degree at DU or another institution may request to substitute these credits for 2 credits of 3000- or 4000-level Music electives.)	2
MUAC 4850	Elementary Piano Pedagogy I	2
MUAC 4852	Group Piano Teaching Techniques	2
MUAC 4831	Current Trends in Piano Pedagogy	2
MUAC 4853	Intermediate Piano Pedagogy I	2
MUAC 4020	Introduction to Research in Piano Pedagogy	2
MUAC 4547	Topics in Advanced Keyboard Repertoire	4
<b>Total Credits</b>		<b>24</b>

12-20 credits of the above coursework may overlap with the degree requirements for students currently pursuing the MM in Music with a concentration in Performance.

**Non-coursework requirements (see below and the Lamont Student Handbook for more details):**

- Pedagogy written comprehensive exam at the completion of the certificate.
- Juries, as required by the performance area, outlined in the Lamont Student Handbook.
- Candidates will normally be enrolled in the Pedagogy Certificate program for one year. A candidate may, however, request to remain in the program longer with the stipulation that they must enroll in MUAC 4840 Piano Teaching Practicum for the duration of their time in the program.

**Graduate Certificate in Suzuki Pedagogy**

The Certificate in Music with a concentration in Suzuki Pedagogy has two emphases: cello and violin.

Code	Title	Credits
<b>Cello</b>		
Suzuki Seminars: 2 credits each quarter		12
MUAC 3463	Suzuki Cello Seminar I	
MUAC 3464	Suzuki Cello Seminar I	
MUAC 3465	Suzuki Cello Seminar I	
MUAC 3466	Suzuki Cello Seminar II	
MUAC 3467	Suzuki Cello Seminar II	
MUAC 3468	Suzuki Cello Seminar II	
MUAC 3439	Teaching Note Reading	2
MUAC 3460 & 3460 & 3460	Suzuki Cello Practicum and Suzuki Cello Practicum and Suzuki Cello Practicum	3
MUAC 4450	Suzuki Group Lesson Practicum	1
<b>Violin</b>		
Suzuki Seminars: 2 credits each quarter		12
MUAC 3470	Suzuki Violin Seminar I	
MUAC 3471	Suzuki Violin Seminar I	
MUAC 3472	Suzuki Violin Seminar I	
MUAC 3282	Suzuki Violin Seminar II	
MUAC 3283	Suzuki Violin Seminar II	
MUAC 3284	Suzuki Violin Seminar II	
MUAC 3439	Teaching Note Reading	2
MUAC 3477 & 3477 & 3477	Suzuki Violin Practicum and Suzuki Violin Practicum and Suzuki Violin Practicum	3
MUAC 4450	Suzuki Group Lesson Practicum	1
<b>Total Credits</b>		<b>18</b>

---

**Specialized Graduate Certificate Programs****Specialized Certificate in Music with a Concentration in Jazz Studies****Coursework requirements**

Code	Title	Credits
MUPR 4XXX	Applied Lessons on major instrument (2 credits each quarter)	6
MUEN 3XXX	Ensembles, as assigned by department chair	3
3000- and 4000-level	elective courses, as advised by department chair. Students may fulfill this requirement with MUAC 4991 Independent Study.	3
<b>Total Credits</b>		<b>12</b>

---

**Specialized Certificate in Music with a Concentration in Music Entrepreneurship**

The Music Entrepreneurship Specialized Graduate Certificate offers students the opportunity to develop and manage their careers as working artists in the field of music. They will gain the background, practical skills, and critical perspectives necessary to develop an entrepreneurial career in their

chosen area of expertise. The certificate combines expertise in 21st-century approaches to marketing with specialized coursework in the Lamont School of Music. It provides a streamlined way for music professionals in the early-to-mid stages of their career to gain the expertise necessary to promote themselves and their work.

This is a 16-credit program that can be completed in one academic year. Students will earn 8 credits offered by the Daniels College of Business, combined with 8 credits in the Lamont School of Music.

### Coursework requirements

Code	Title	Credits
<b>Music courses</b>		<b>8</b>
MUAC 3092	The Business Side of Music	
MUAC 3844	The Artist Entrepreneur	
MUAC 3990	Internship in Music (Complete 2 credits.)	
<b>Business courses (Choose 8 credits from the following):</b>		<b>8</b>
MKTG 4100	Marketing Concepts	
MKTG 4805	Foundations of Digital Marketing	
MKTG 4815	Social Media Marketing	
MKTG 4835	Search Engine Marketing: Google Analytics & Google Ads	
MKTG 4845	Tech in Marketing: Design Tools and Digital Foundations	
Students may also choose four 1-credit "Business Sprints" below in lieu of one of the above courses.		
EVM 4407	The Perfect Pitch	
EVM 4409	Financial Statement for Entrepreneurs	
EVM 4413	Design Thinking	
EVM 4414	Market Discovery & Product Market Fit	
EVM 4417	Branding & Messaging	
EVM 4421	Intellectual Property Issues for Startup Businesses	
EVM 4432	Getting to Know Your Customer	
EVM 4440	How to Effectively Negotiate in Business	
EVM 4441	How To Create A Business Startup Budget & Forecast	
<b>Total Credits</b>		<b>16</b>

Students will also complete a final portfolio of course projects, resume, artist statement, biographical sketch, and business plan.

## Specialized Certificate in Music Theory Pedagogy

The Certificate in Music Theory Pedagogy allows a conductor, composer, musicologist, pedagogue, or performer to develop the skills and knowledge required to teach basic music theory at the high school or possibly college level. The program balances theoretic and analytic skills with practical applications for the classroom. It is designed to be concurrent with an MM degree or an MA in Musicology, but students may also apply to begin the program upon completion of a previous degree in music.

Complete a minimum of 16 credits as follows:

Code	Title	Credits
<b>MUAC 4000-level Music Theory Courses</b>		<b>8</b>
(Often includes MUAC 4006 or MUAC 4007 Post-Tonal Theory and MUAC 4801 Introduction to Schenkerian Analysis; students with other preferences should discuss them with the Chair of Music Theory.)		
MUAC 4010	Pedagogy of Music Theory	4
MUAC 4991	Independent Study (Complete 4 credits of Music Theory Pedagogy Portfolio independent study coursework. Students may choose from a variety of topics for inclusion in the Portfolio, including technology, curricular development, instructional design, inclusive excellence, history of theory pedagogy, or performance/analysis methods, etc. These credits may be taken during a single quarter or split across quarters.)	4
<b>Total Credits</b>		<b>16</b>

Many of these credits may be used to fulfill requirements for the MA in Musicology or MM programs.

Students also will complete a Final Oral Comprehensive Exam, including the defense of Music Theory Pedagogy Portfolio.

---

## Specialized Certificate in Music with a Concentration in Performance

### Coursework requirements

Code	Title	Credits
MUPR 4XXX	Applied lessons on major instrument (2 credits per quarter)	6
MUEN 3XXX	Ensembles, as assigned by department chair based on the guidelines in the Lamont Student Handbook	3
MUEN 3XXX	Chamber Ensembles or MUAC 4991 Independent Study for voice students	3
<b>Total Credits</b>		<b>12</b>

Minimum number of credits required for the certificate: 12

### Non-coursework requirements:

- One solo recital consisting of solo repertoire. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation.
- Juries, as required by the performance area.
- Candidates will normally be enrolled in the Performance Certificate program for one year. A candidate may, however, request to remain in school longer with the stipulation that they must enroll in applied lessons, assigned ensembles, and chamber music every quarter, even after the required number of credits have been met.
- Please refer to the Lamont Student Handbook for additional details regarding ensemble requirements.

---

## Online Specialized Certificate in Music with a Concentration in Performance and Composition

In this online certificate, performers develop their virtuosity on their major instrument while cultivating skills in original composition. Modules consist primarily of individual lessons in both performance and composition. Live remote meetings are enhanced with flexible tools such as video recordings, asynchronous discussions, online masterclasses, and more.

On their major instrument, students are expected to meet the same high standards as other graduate majors. In composition, faculty meet students where they are—beginning or professional—helping them to develop compelling and substantial projects.

In this online certificate, performers develop their virtuosity on their major instrument while cultivating skills in original composition. Modules consist primarily of individual lessons in both performance and composition. Live remote meetings are enhanced with flexible tools such as video recordings, asynchronous discussions, online masterclasses, and more.

On their major instrument, students are expected to meet the same high standards as other graduate majors. In composition, faculty meet students where they are—beginning or professional—helping them to develop compelling and substantial projects.

### Coursework Requirements

Code	Title	Credits
MUPR 4XXX	Applied lessons on major instrument (2 credits per quarter)	6
MUPR 4920 & 4920 & 4920	Composition and Composition and Composition	6
<b>Total Credits</b>		<b>12</b>

Minimum number of credits required for the certificate: 12

### Non-coursework requirements:

- Traditional solo recital or innovative performance project. If recital preparation continues beyond the completion of coursework, students must perform on or off campus during each additional quarter of recital preparation
- Juries, as required by the performance area.
- Culminating project in the secondary area (may be combined with solo recital).
- Candidates will normally be enrolled in the Online Certificate program for one year. A candidate may, however, request to remain in school longer with the stipulation that they must enroll in applied performance and composition lessons every quarter, even after the required number of credits have been met.

## online certificate in music with a concentration in performance and orchestral audition preparation

With two hours of one-on-one faculty instruction per week, students in the program refine their orchestral repertoire and gain a more thorough understanding of the challenges of performing orchestral music at the professional level. Students will take a weekly one-hour lesson focusing on solo repertoire as well as a second weekly lesson focusing on orchestral repertoire. Graduates leave with refined performance abilities that provide a foothold in the competitive world of orchestral auditions.

### Coursework Requirements

Code	Title	Credits
MUPR 4XXX	Applied Lessons on major instrument (2 credits per quarter)	6
MUPR 4XXX	Applied Lessons on orchestral repertoire (2 credits per quarter)	6
<b>Total Credits</b>		<b>12</b>

### Minimum number of credits required for the certificate: 12

#### Non-coursework requirements:

- Traditional solo recital or innovative performance project.
- Juries, as required by the performance area.
- Two Orchestral Audition Juries in Audition Format (Winter and Spring Quarters)
- Candidates will normally be enrolled in the Online Certificate program for one year. A candidate may, however, request to remain in school longer with the stipulation that they must enroll in applied performance and composition lessons every quarter, even after the required number of credits have been met.

## Online Specialized Certificate in Music with a Concentration in Performance and Recording and Production

In this online certificate, performers develop their virtuosity on their major instrument while cultivating skills in recording/production. Modules consist primarily of individual lessons in both performance and recording/production. The recording/production component can be closely customized to the needs of the individual student and may include topics such as classical/acoustic recording techniques, live concert recording, electro-acoustic production (popular crossover as well as classical tradition), and performance/improvisation with live electronics. Live remote meetings are enhanced with flexible tools such as video recordings, asynchronous discussions, online masterclasses, and more.

On their major instrument, students are expected to meet the same high standards as other graduate majors. In the recording and production modules, faculty meet students where they are—beginning or professional—helping them to develop exciting and substantial projects.

### Coursework Requirements

Code	Title	Credits
MUPR 4XXX	Applied Lessons on major instrument (2 credits per quarter)	6
MUPR 4040 & 4040 & 4040	Music Production and Music Production and Music Production	6
<b>Total Credits</b>		<b>12</b>

Minimum number of credits required for the certificate: 12

#### Non-coursework requirements:

- Traditional solo recital or innovative performance project.
- Juries, as required by the performance area.
- Culminating project in the secondary area (may be combined with solo recital).
- Candidates will normally be enrolled in the Online Certificate program for one year. A candidate may, however, request to remain in school longer with the stipulation that they must enroll in applied performance and composition lessons every quarter, even after the required number of credits have been met.

## Music: Academic Classes (MUAC)

### **MUAC 3002 Form and Analysis (4 Credits)**

Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2006.

### **MUAC 3006 Post-Tonal Theory: Mode/Rhythm (4 Credits)**

Works of Stravinsky, Bartok, Satie, Debussy, and others are studied, employing various transformational theories, diatonic set theory, and 20th-century metric theories. Prerequisite: completion of Music Theory I and Music Theory II sequences.

### **MUAC 3023 Rhythm & Meter in Music (4 Credits)**

Rhythm pertains to experienced or measured durations in music. Meter pertains to the cyclic organization of music's durations. A hegemonic view of meter emerged in music theory and related disciplines in the mid-20th century, one most appropriate to Western classical music and, to a lesser extent, Anglo-American popular music. This view holds that meter "in music" consists of (1) hierarchically arranged beats (2) whose durations are nominally equivalent and (3) whose onsets among coordinated musicians are nominally aligned. This course examines rhythm and meter by interrogating three components of the standard view of the topic. Looking at Western classical music, but also traditional and commercial music from Africa and the African diaspora, we will explore the nature of meter and rhythm in music where durations might not be arranged hierarchically, of equal length, or aligned.

### **MUAC 3024 Introduction to Tonal Analysis (4 Credits)**

This course introduces students to various types of musical analysis for tonal music that are more advanced than what is introduced in first- and second-year music theory. Prerequisites: MUAC 2006 and MUAC 2022.

### **MUAC 3025 Topics in Analysis: Brahms (4 Credits)**

This course explores a variety of analytical techniques used to understand the compositions of Brahms. We examine works by musicologists and theorists such as Allen Forte, Walter, Frisch, Arnold Schoenberg, Carl Schachter, and David Lewin. Issues discussed include developing variations, rhythm, form, and ambiguity in Brahms. We cover a wide range of repertoire, ranging from piano works to choral works to symphonies.

### **MUAC 3026 Sonata Form (4 Credits)**

This is a team-taught course on the topic of "sonata form," one of the central musical structures in classical Western art music, from Mozart to Brahms and beyond. The course will feature a dialogue between history, analysis, and performance, reflected in class activities at multiple levels.

### **MUAC 3027 Arranging for the Classical Musician (4 Credits)**

Music initially created for one context becomes music for a new context through the art of arranging. How much of your professional life will you spend performing or teaching arrangements? Have you ever thought about writing your own? Is an arrangement automatically less worthwhile, or can it ever surpass the quality of the original? Class sessions will be spent studying arrangements of music by Bach, Björk, Chopin, Michael Jackson, Mahler, et al. as arranged by Brahms, Jacob Collier, Gil Evans, The Piano Guys, Ravel, and others. Students will also receive individual guidance as they plan, write, and perform arrangements of pieces and songs of their choice.

### **MUAC 3030 Seminar-Performance Psychology (2 Credits)**

### **MUAC 3059 Audio Production II (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the first sequence in the audio production concentration.

### **MUAC 3060 Extra-Musical Roles of the Music Director (1 Credit)**

Under the supervision and guidance of the director of orchestral studies, students will gain hands-on, actual experience with many of the non-musical tasks that conductors face. These experiences will include managing orchestra personnel, librarian activities, running auditions, and recruiting. Open only to Artist Diploma in orchestral conducting students.

### **MUAC 3061 Audio Production I (4 Credits)**

An introduction to analog and digital synthesis, MIDI sequencing, and DAW software.

### **MUAC 3064 Audio Production IV (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the third sequence in the audio production concentration.

### **MUAC 3065 Audio Production V (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as onsite training at Lamont School of Music performances. This is the fourth sequence in the audio production concentration.

### **MUAC 3092 The Business Side of Music (4 Credits)**

A personal and clinical approach to developing music business skills and strategies.

**MUAC 3106 The Dynamic Body: Foundations in Movement Methods and Body Awareness Principles (2 Credits)**

An introduction to fundamental body awareness principles in relationship to physical performance skills for vocal performance majors. Methods for heightening kinesthetic awareness will be learned in the form of movement explorations, improvisations, structures, and learned phrases to gain somatic insight into the performer's sense of verticality in all places and dimensions of space. The concepts of the body in motion will be a primary context and focus for the progression of studies or 'études,' and for the reflective and analytical processes that include observation, journaling, discussion and peer commentary. Studio activities in solo, partnering, and group work will further the student's knowledge of how to become more responsive, expressive, and communicative when interacting with the surrounding environment and with others. Integrated with the body-mind practice and theoretical study, students will be encouraged to inquire, examine and articulate possible philosophies regarding why the mastery of the performer's physical body requires an essential sense of discipline that is cultivated in the performing arts, and how the somatic practices being investigated can serve his/her performance presence and support one's vocal training and health for the long-term.

**MUAC 3124 Composition Seminar (1 Credit)**

Composition Seminar focuses on the reading and performance of modern scores by Lamont and recognized composers. Any student composing music or wishing to perform new compositions at Lamont may register and participate. Requirements for composers include the completion, rehearsal and performance of a piece of music at the New Music Ensemble concert each quarter. Non-composers are required to rehearse and perform at the New Music Ensemble concert. Composers enrolled in the ensemble may be required to play compositions submitted as well.

**MUAC 3161 Topics in Modern Opera (4 Credits)**

This course involves the close study of selected twentieth- and twenty-first-century operas, their respective musical styles and their videotaped performances. This study will include such issues as opera and film, opera libretto criticism, and the personal and public politics of the opera.

**MUAC 3165 Music Theater Survey (2 Credits)**

A historical overview of the American Broadway musical, performance technique, audition preparation and repertoire. Must be prepared to sing and perform.

**MUAC 3166 Music Theater Survey II (2 Credits)**

Fundamentals of music theater performance will be addressed through readings of the text, "Acting in Music Theater" by Joe Dee and Rocco dal Vera. Application of these techniques through performance of musical theater literature will be incorporated during the last number of weeks. Additionally, we will highlight prominent composers and their works throughout the quarter.

**MUAC 3212 Digital Music Creation (4 Credits)**

In this course, students will create, produce, and present their own digital music. Using one of the industry's leading digital music creation platforms (such as Ableton Live), students will learn the history of electronic music creation, create their own digital music portfolios, become familiar with relevant copyright issues, and oversee public performances of their music.

**MUAC 3240 Vocal Pedagogy I (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3241 Vocal Pedagogy II (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3243 Recitative in Opera (2 Credits)**

Working as a professional singer your proficiency with recitative should be high. Though a major part of many operas recitative is still often overlooked as a skill set. Through this course we will explore several different approaches to recitative from various compositional styles and time periods.

**MUAC 3282 Suzuki Violin Seminar II (2 Credits)****MUAC 3283 Suzuki Violin Seminar II (2 Credits)****MUAC 3284 Suzuki Violin Seminar II (2 Credits)****MUAC 3439 Teaching Note Reading (2 Credits)****MUAC 3460 Suzuki Cello Practicum (1 Credit)**

The Suzuki Cello Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and philosophy covered in the seminar classes. The course will also include some lecture and discussion on developing teaching strategies for effective technical development and communication in lessons.

**MUAC 3463 Suzuki Cello Seminar I (2 Credits)****MUAC 3464 Suzuki Cello Seminar I (2 Credits)****MUAC 3465 Suzuki Cello Seminar I (2 Credits)****MUAC 3466 Suzuki Cello Seminar II (2 Credits)****MUAC 3467 Suzuki Cello Seminar II (2 Credits)****MUAC 3468 Suzuki Cello Seminar II (2 Credits)****MUAC 3470 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3471 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3472 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3477 Suzuki Violin Practicum (1 Credit)**

The Suzuki Violin Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and teaching philosophy covered in the seminar classes. The course will include some lecture focusing on teaching strategies for effective technical development and effective communication in the lessons. Prerequisite: MUAC 3470.

**MUAC 3492 History of Opera: From Monteverdi to Minimalism and Beyond (4 Credits)**

This seminar course surveys the history of opera from the invention of the genre c. 1600 to the present day. In addition to assigned excerpts, students view three complete operas during the quarter. Primary and secondary source readings supplement the required text and class lectures. Students write a research paper that may examine some aspect of a particular opera or that may compare a particular aspect found in several operas. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3493 Approaches to American Popular Music (4 Credits)**

We explore a number of topics involved in the study of popular music, including tensions between analytical and cultural approaches; issues of race, class, and gender; and constructions of authenticity and personae. Listening and reading are wide-ranging, encompassing diverse styles. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3494 Music and Belief in World Cultures (4 Credits)**

How does music affect religious experience and how does religion shape musical practice? Why is music vital in some religious rituals and expressly banned in others? If humans use music to create, reflect, and comment upon the worlds they experience and imagine, then the use of music in religious practice is among its most powerful and ephemeral. Students are introduced to a wide range of musical traditions and their relationship to many of the world's religions, including Islam, Judaism, Christianity, Buddhism, Hinduism, Native American belief and the religious practices of Africa and its diaspora. Readings, lectures and discussions are supplemented by guest lecture demonstrations, film/video screenings and hands-on workshops. Prerequisite: Junior or senior standing required; sophomores allowed with instructor approval.

**MUAC 3497 Studying Music in the Field: Theory and Method in Ethnomusicology (4 Credits)**

This course introduces issues that motivate ethnomusicological research and techniques for carrying out fieldwork, the ethnographic method which has largely come to define the discipline. Our primary texts include Bruno Nettl's classic text, *The Study of Ethnomusicology*, and *Shadows in the Field*, a seminal volume of essays discussing ethnomusicological fieldwork. This course also involves hands-on experience in some of the major fieldwork techniques, including field observation and writing fieldnotes, musical transcription and interviewing. This course culminates in a field research project in a Denver musical community determined in consultation with the professor. Note: this course is not open to freshman; sophomores with permission of instructor.

**MUAC 3498 Music, Dance, and Everyday Life in South Asia (4 Credits)**

This course serves as an introduction to a diverse array of performance traditions from the South Asian subcontinent. We examine the significance of music and dance in everyday life, the influence of media technology, and the relationship of performance to issues such as caste, gender, nationalism and globalization. Class discussions are supplemented by guest lectures, hands-on workshops and film screenings. Our study of music outweighs that of dance, and a music background is strongly encouraged. This course is not open to first-year students. Sophomores allowed with instructor approval.

**MUAC 3499 Topics in Musicology (4 Credits)**

This course focuses on particular musicology topics determined by the instructor. Course materials may include primary and secondary source readings, theoretical writings from other disciplines, a variety of listening assignments, film/video screenings, guest lecture demonstrations, and hands-on workshops. Students are expected to participate in class discussions and may be asked to write short response papers and/or to give short oral presentations. The course concludes with individual research projects, presented orally and in written form, on topics chosen and developed in consultation with the instructor. Expectations for graduate students enrolled in the course are commensurate with their training and background as compared to undergraduates enrolled in the course. In some cases, with the prior consent of the instructor, students may choose to combine performance with the final research project. Prerequisite: Junior standing.

**MUAC 3502 Gender & Genre in World Music (4 Credits)**

How are concepts of "maleness," "femaleness" and other gendered categories constructed, maintained, and contested through musical performance? This course examines the issues explored and debated in recent studies of gender relation to music of various cultures including Western art music, popular music, and other world genres. We focus on reading and discussion of ethno-musicological and anthropological ethnographies, musicological studies focusing on gender and theoretical writings from gender and women's studies. Lectures and discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores can register with instructor approval.

**MUAC 3511 Mahler and Musical Culture (4 Credits)**

We explore Gustav Mahler's life, historical context, and music, all in relation to one another. The focus is on recent and important scholarly approaches to this conductor and composer. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3512 Stories of Music History (4 Credits)****MUAC 3513 Wagner and the Ideology of the Artwork (4 Credits)**

We explore Richard Wagner's music dramas, particularly the Ring operas, as well as theories and ideologies surrounding them. The focus is on recent and important scholarly approaches. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3515 Introduction to Baroque Performance Practice (2 Credits)**

This class serves to familiarize musicians with the stylistic parameters, aesthetic principles, and performing techniques common in Western art music of the Baroque era (ca. 1600–1750), as well as the historical and cultural context of the period. Students will learn how to apply these performance guidelines to their own interpretation of Baroque music.

**MUAC 3520 Topics in Baroque Music (4 Credits)**

Through the study of selected Baroque instrumental, vocal and operatic works, this seminar course considers various approaches to performance practice issues such as "authenticity," the "historically informed" performance, period instruments, ornamentation, continuo realization, and editing. Facsimile editions and primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of Baroque music with an emphasis on performance practice. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3521 Topics in World Music (4 Credits)****MUAC 3536 Topics in Hindustani Music (4 Credits)**

This course explores the melodic system (raga) and rhythmic system (tala) of Hindustani music, the classical music of North India. These conceptual frameworks act both as sound structures to be realized in improvised performance and as aesthetic entities manifested in the related traditions of dance, iconography, and film. A major emphasis of this course is developing an understanding of raga and tala as musical structures through intensive listening as well as practical instruction. Accordingly, each class incorporates hands-on music-making through singing, rhythmic exercises, and/or dance. By the end of the term, students will become familiar with several ragas and talas and the stages by which they are developed in performance. A second, equally important objective is to learn to appreciate ragas as aesthetic entities. We analyze their musical characteristics as well as the "extra-musical" characteristics of sentiment (rasa), performance time and/or season and iconographic associations (ragamala painting). Must be at least junior standing or obtain instructor approval.

**MUAC 3537 Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music (4 Credits)**

Andraé Crouch, Walter Hawkins, and Richard Smallwood have each influenced the course of black gospel music for the last 50 years. Through listening to recordings, watching video performances, score analysis, readings, performance, and improvisation, this course will examine the music of these unique composer/performers and how their contributions have impacted black gospel music. Rather than simply read about and analyze the music, students will play the music of these composers and literally have hands-on experience with the colors and textures of the music that has shaped church music and the gospel music industry for the last five decades.

**MUAC 3545 The Making of Romantic Music: Paris and Leipzig in the 1830s (4 Credits)**

With a view to identifying the various interdisciplinary factors that led to the making of romantic music, this seminar course focuses on musical life in Paris and Leipzig in the 1830s. Specific attention is paid to the music of Chopin, Berlioz, Mendelssohn, and Robert and Clara Schumann and the personal and musical connections between these composers. Primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of music and/or musical life in the 1830s. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3578 Advanced Composition (4 Credits)**

Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression.

**MUAC 3590 Guitar History (4 Credits)****MUAC 3630 Basic Jazz Arranging (2 Credits)**

A study and practical analysis of the foundational techniques involved with composing and orchestrating for small group jazz ensembles. This course will cover the basics of form, notation, and orchestration in the small group jazz idiom, consisting of one to four horns and/or vocals, guitar, piano, bass, and drums.

**MUAC 3650 Orchestral Excerpts-Cello (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3655 Orchestral Excerpts-Bass (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock audition and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3660 Orchestral Excerpts-Violin (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3661 Orchestral Excerpts Viola (4 Credits)**

This course explores excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students are given a list of excerpts and coached on how to prepare them. They participate in mock auditions and receive feedback. This course also addresses the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3662 Orchestral Studies for Brass (2 Credits)**

Study of orchestral literature brass players are likely to be asked to play at auditions for professional orchestras. Undergraduate participants should have passed their Sophomore Proficiency jury with distinction.

**MUAC 3663 Orchestral Excerpts, Viola II (4 Credits)**

Companion course to Orchestral Excerpts Viola I, this section expands the repertoire list beyond the standard works used for auditions today. In addition to further honing basic requisite material from section I, students study and prepare less frequently required works and principle viola solo repertoire. There is more extensive discussion of the audition process and mock auditions as a part of the course. While it is advised and preferable that students complete the first section of this course it is possible to take the course with the approval of the instructor.

**MUAC 3677 Bow Art Ensemble (0-1 Credits)**

The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

**MUAC 3682 Topics-Orchestral Repertoire (4 Credits)**

We explore the history of the orchestra and orchestral literature from the baroque through modern eras, and examine a number of test cases in which conventional understanding has been challenged in recent years. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3684 Choral Literature I (2 Credits)**

This course is an analysis of the development of choral repertoire from the Middle Ages through the Baroque era.

**MUAC 3686 Choral Pedagogy I (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3688 Choral Pedagogy II (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3689 Choral Literature II (2 Credits)**

This course is an analysis of the development of choral repertoire from the Classical period until the present day. This course is meant to be taken in sequence after Choral Literature I.

**MUAC 3698 Carillon History and Mechanics (4 Credits)**

A survey of the evolution of signal bells into the musical instrument known as the carillon. This subject is often called "campanology." The history will be traced from the 16th century in the Low Countries through modern times in Europe, North America, Australia/New Zealand and Japan. Topics will include bell foundries, bell casting and tuning, bell chambers, playing actions, carillonneurs, carillon schools, carillon organizations, the use of the carillon in its various regions and basic carillon maintenance.

**MUAC 3700 Carillon Repertoire (4 Credits)**

A survey of the music expressly produced for carillon from the earliest times through the present. Categories include automatic music (e.g., De Sany, Wyckaert, Eggert), the earliest compositions for manual play (Van den Gheyn and the Louvain manuscripts of the 18th century), and the 20th-century categories: Flemish, Dutch, French and North American. Mainstream publishers as well as incidental publications will be covered. The labs will focus on analysis through recordings and live performances by participants.

**MUAC 3706 Pedagogy & Repertoire Tuba (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the tuba.

**MUAC 3708 Pedagogy & Repertoire Horn (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the horn.

**MUAC 3710 Carillon Pedagogy I (2 Credits)**

An exploration of the physical and psychological elements that can lead to effective carillon teaching: technique, handling/pedaling ("fingering" on the piano), and developing an attitude that fosters successful performance.

**MUAC 3712 Pedagogy & Repertoire Trombone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trombone.

**MUAC 3717 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3718 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3719 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3724 Pedagogy & Repertoire Guitar (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the guitar.

**MUAC 3726 Pedagogy & Repertoire Viola (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the viola.

**MUAC 3727 Pedagogy & Repertoire Viola (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the viola.

**MUAC 3730 Pedagogy & Repertoire Cello (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the cello.

**MUAC 3733 Pedagogy & Rep Double Bass (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the double bass.

**MUAC 3736 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3737 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3738 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3739 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3740 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3742 Pedagogy & Repertoire Trumpet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trumpet.

**MUAC 3747 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3748 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3749 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3751 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3752 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3753 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3754 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3755 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3757 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3758 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3761 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3762 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3765 Professional Brass Techniques (4 Credits)**

This 4-hour per week course will be divided into a lecture/seminar for two hours and performance practicum for two hours. Topics discussed and performed include orchestral playing, sight reading, practice, solo performance, jazz survival, ornamentation, transposition, and warm-up/maintenance routine.

**MUAC 3801 Introduction to Schenkerian Analysis (4 Credits)****MUAC 3804 Topics in Music (1-5 Credits)****MUAC 3810 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3811 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3812 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3822 Piano Repertoire I (2 Credits)**

Performance and analysis.

**MUAC 3823 Piano Repertoire II (3 Credits)**

Performance and analysis.

**MUAC 3824 Piano Repertoire III (3 Credits)**

Performance and analysis.

**MUAC 3828 Songwriting Exploration I: Pop, R&B, & Hip hop (2 Credits)**

Songwriting Exploration I is an intermediate to advanced level course for songwriting Pop, R&B, and Hip hop styles. This course focuses on developing the skills necessary for writing thought provoking, creative, and fun songs to compete in today's popular music market. Students will learn song forms and creative lyric writing techniques used by successful songwriters to create hit songs. Students will also learn instrumentation, chord progressions, and the importance of rhythms that are commonly heard in the Pop, R&B, and Hip hop genres. This course will involve video and listening examples of classic and modern songs, in-class discussions, online assignments, student collaboration projects, and in-class presentations/performances of original works. Students will also receive online resources on music technology (electronic instruments) and software that current songwriters/producers are using to create basic recordings at home using a computer and DAW (Digital Audio Workstation). During the final week of the course, students will have an opportunity to record their songs in the Lamont recording studio on a pre-scheduled date or record at home.

**MUAC 3829 Songwriting Exploration II (2 Credits)**

MUAC 3829 is an intermediate to advanced level course for songwriting in Contemporary Jazz/Fusion, World, Pop, Rock, and R&B styles. This course focuses on developing the skills necessary for writing thought-provoking and creative songs to compete in today's contemporary and jazz market. Students will analyze more complex song forms, harmony, and creative lyric writing techniques used by successful songwriters. Students will also learn instrumentation, advanced chord progressions, and the importance of rhythms that are commonly heard in the Jazz, World, Pop, Rock and R&B genres. This course will involve video and listening examples of classic and modern songs, in-class discussions, transcription assignments, student collaboration projects, and in-class presentations/performances of original works. Students will also receive online resources on music technology (electronic instruments) and software that current songwriters/producers are using to create basic recordings at home using a computer and DAW (Digital Audio Workstation). During the final week of the course, students will have an opportunity to record their songs in the Lamont recording studio on a pre-scheduled date or record at home. Course Objectives and Relationship to Total Departmental Offerings • Establish and build upon techniques to write creative and compelling lyrics to compete in the modern contemporary music industry • Traditional and modern approaches to songwriting • How to write compelling melodies for lyrics • How to apply advanced harmonic devices and chord progressions to accompany lyrics • Techniques used by successful songwriters past and present • Collaborating with other writers, composers, and producers for projects through interaction with classmates and discussions • Perform works for an audience through in-class performance and other potential performance opportunities • Basic recording techniques for a professional recording studio or home studio • Compose and perform/record 4 songs (undergrad) or 5 songs (graduate) This is a new course being offered by a new faculty member in their area of expertise. This faculty member already offers a 2000 level class in songwriting and recently added the first part of a Songwriting sequence for Winter quarter (covering different writing styles and serving as the prerequisite for this new course). This class is an upper-division class exploring more advanced songwriting techniques and additional styles compared to what was covered in Songwriting Exploration I.

**MUAC 3830 Advanced Jazz Arranging I (2 Credits)**

A study and practical analysis of small to medium jazz ensemble writing with extended instrumentation. Consisting of nonette-style orchestration including orchestral instruments such as horn, tuba, woodwinds, and voice along with extended electronic textures, this course will cover the basics of form, notation and orchestration in the 21st Century hybrid small to medium size jazz ensemble idiom.

**MUAC 3831 Advanced Jazz Arranging II (2 Credits)**

A study and practical analysis of large "studio orchestra" type jazz writing with extended instrumentation. Consisting of medium to full orchestral string section, woodwinds, harp, percussion, brass plus jazz rhythm section, voices, and soloists. Exemplified by such modern ensembles as Snarky Puppy with the Metropole Orchestra, this will be a full studio orchestra with modern 21st Century jazz, rock, and pop sensibilities. String bowings and aspects of dynamic ensemble balances in the studio orchestra will be studied, as well as writing for the harp.

**MUAC 3832 Arranging for Computer-Based Media (2 Credits)**

This course will be an introduction to techniques of composition and arranging music for media, with an emphasis on practical assignments that the student will encounter in the professional world of media composition. Students will learn how to work in collaboration with filmmakers, master techniques of timing and synchronization, use traditional techniques of composition/arranging/orchestration to serve dramatic needs, and work efficiently in the recording studio under time and budget restraints.

**MUAC 3844 The Artist Entrepreneur (2 Credits)**

The Artist Entrepreneur is a course of study that examines the full spectrum of attributes and skills necessary for a student to "survive and thrive" in the every-changing landscape of the 21st Century. With a two-fold approach of examining effective strategies for a "modern artistry mindset" along with extensive case studies of successful 21st Century professionals, this course will offer the student a wide array of important recourses to guide their career. The case study aspect of The Artist Entrepreneur will be based on multiple evaluations of successful artists in the 21st Century in partnership with local presenters. Prerequisite: MUAC 3092.

**MUAC 3845 Writing for The Modern Large Jazz Ensemble I (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Frank Foster, Sammy Nestico, Slide Hampton, Bob Brookmeyer and other modern practitioners. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3846 Writing for the Modern Large Jazz Ensemble II (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Bob Brookmeyer, Maria Schneider, Gil Evans, Darcy James Argue, and others. A special emphasis will be placed on creating full works for the large jazz ensemble that uses textures and modern extended form approaches indicative of these artists. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3847 Hip-Hop: Theory and Practice (4 Credits)**

Students in this class will examine the socio-cultural, economic, and political significance of hip-hop as a medium of expression for youth around the world. Through analysis of popular writing and media, as well as academic texts, we critically explore issues of race, social justice, masculinity, misogyny, censorship, technology, and intellectual property, as they relate to mainstream and underground hip-hop in America. Having discussed hip-hop's roots in the U.S., the remainder of the quarter will be devoted to tracing hip-hop's global routes.

**MUAC 3860 Basic Jazz Improvisation (4 Credits)**

The study of jazz improvisation techniques and forms. Open to music majors or by instructor permission.

**MUAC 3870 Jazz Improvisation & Composition (4 Credits)**

Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

**MUAC 3910 Orchestration (4 Credits)**

Techniques of instrumental scoring.

**MUAC 3933 Graduate Music History Review (0 Credits)****MUAC 3935 Graduate Music Theory Review (0 Credits)**

This course provides an accelerated review of materials from the undergraduate theory core, including analysis and written exercises in diatonic and chromatic harmony, counterpoint, tonal forms, and an introduction to 20th-Century theory.

**MUAC 3959 Movement and Expression for Conductors (4 Credits)**

Conductors use their whole body to communicate and elicit successful performances from their ensemble. If you have unnecessary tension or lack of ease in your body, this is communicated unconsciously to your ensemble, hindering quality of performance. Additionally, physical tension can prevent your ability to communicate and think clearly under pressure. This course is an exploration of freedom of movement and the physicality of musical expression. Classes will include group activities in free-movement, dance, acting, keeping your cool, poise, balance, tension release, as well as hands-on instruction applying Alexander technique to your conducting.

**MUAC 3960 Advanced Orchestral Conducting (2 Credits)**

Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Required of MM Conducting students with Choral or wind concentrations. Open to other students with permission of instructor. Prerequisite: Permission of instructor (not needed for MM Conducting students with Choral or Wind concentration). Fall quarter only.

**MUAC 3961 Advanced Choral Conducting (2 Credits)**

Conducting complex choral works, including those with instrumental accompaniment; phrasing, interpretation and score reading. Prerequisite: MUAC 2940. Fall quarter only.

**MUAC 3962 Advanced Wind Conducting (2 Credits)**

Conducting complex wind compositions; phrasing interpretation and score reading. Prerequisite: MUAC 2970. Spring quarter only.

**MUAC 3973 Advanced Wind Literature I (2 Credits)**

This course is an overview of wind literature appropriate for junior high school, high school, college and professional programs including strategies in effective programming and creation of appropriate program notes.

**MUAC 3974 Advanced Wind Literature II (2 Credits)**

An in-depth study of successful compositional techniques by prominent composers of wind literature. Prerequisite: MUAC 3973.

**MUAC 3980 Advanced Jazz Improvisation and Composition (4 Credits)**

A three term sequence continuing the in-depth study of the theory, performance practices, style, and history of jazz improvisation and composition. Prerequisite: satisfactory completion of the three terms of Jazz Improvisation and Composition or consent of the instructor.

**MUAC 3990 Internship in Music (0-8 Credits)**

Internship in Music will offer opportunities for music majors to experience actual music related careers within a sponsoring music organization chosen by the student and accepted by the supervising faculty of the School of Music.

**MUAC 3991 Independent Study (1-10 Credits)****MUAC 4000 Introduction to Graduate Study (2 Credits)**

Problems of research in various chronological epochs of Western musical culture; research techniques and sources used in research; formal writing style.

**MUAC 4002 Form and Analysis (4 Credits)**

Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2006.

**MUAC 4006 Post-Tonal Theory: Mode/Rhythm (4 Credits)**

Works of Stravinsky, Bartok, Satie, Debussy, and others are studied, employing various transformational theories, diatonic set theory, and 20th-century metric theories. Prerequisite: completion of Music Theory I and Music Theory II sequences.

**MUAC 4007 Post-Tonal Theory and Analysis: Set-Theory and Serialism (4 Credits)**

This course has two components: (1) A study of selected analytical techniques for post-tonal music, primarily pitch-class set theory and twelve-tone (serial) theory; (2) Analysis of representative works from the twentieth century, focusing on the music from the first half of the century (Schoenberg, Berg, Webern, Stravinsky, and Bartok). Six credits of Theory 2 or permission of instructor required.

**MUAC 4008 Modal Counterpoint, Renaissance Vocal Style (4 Credits)**

This course teaches students to compose vocal music in the Renaissance style. After surveying species counterpoint, students learn imitative techniques en route to composing three- and four-voice texted pieces.

**MUAC 4009 Tonal Counterpoint (4 Credits)**

Eighteenth-century counterpoint using J.S. Bach as a model, with two- and three-part fugue writing.

**MUAC 4010 Pedagogy of Music Theory (4 Credits)**

Materials, devices, techniques of teaching theory. Students must have successfully completed undergraduate music theory or passed graduate review theory.

**MUAC 4014 Music-Theoretical Approaches to Popular Music (4 Credits)**

This course is an environment for engaging with generating music-theory scholarship on popular music. "Popular music" in this context refers to commercially successful music (e.g., hip-hop, rock, pop, country, etc.) as well as the predecessors of those genres (e.g., bluegrass, funk, soul, etc.). The course surveys a scholarly ecosystem that includes both analytical methods designed for older repertoires as well as newer methods that engage popular music's current particularities. These methods explore form, rhythm and meter, timbre, modality, harmony, race & ethnicity, gender & sexuality, interaction & improvisation, music instrument studies, text expression, multimedia, music & technology, philosophical concerns of ontology and groove, and more. The structure of the course is not set by the instructor in advance. Rather, the instructor and individual students will devise a grading contract in the first week that guides the topics in which the students will complete their work. The aim of the work is the further students' scholarly agendas and improve their capacity to read and present secondary scholarship, write and present their own scholarship, transcribe music, and provide feedback to their peers. Cross Listed with MUAC 3014.

**MUAC 4020 Introduction to Research in Piano Pedagogy (2 Credits)**

This course is designed to support the research requirements for the lecture-recital and/or the independent graduate-level pedagogical project which meet the standard competencies of the piano pedagogy program.

**MUAC 4050 Major Adv Repertoire Guitar (2 Credits)**

Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.

**MUAC 4051 Major Adv Repertoire Guitar (2 Credits)**

Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.

**MUAC 4052 Major Adv Repertoire Guitar (2 Credits)**

Bibliographical survey of materials related to particular repertoire chosen by student for MA recital in preparation for major written project at end of year.

**MUAC 4090 Model Composition (4 Credits)**

Students in this course deepen their understanding of musical styles and techniques by composing works that imitate major composers before 1900. Music by each student is performed in a final recital. Prerequisite: Tonal Counterpoint, equivalent coursework from another institution, or permission of instructor.

**MUAC 4121 Seminar in Music Theory (4 Credits)**

Seminar in Music Theory focuses on special topics chosen by faculty members. Students should expect rigorous course work and a final project or paper.

**MUAC 4160 Issues in Opera History and Adaptation (4 Credits)**

This course addresses cultural, historical, analytical, aesthetic, and scholarly issues relevant to the history of opera. Students will consider the various ways in which composers, librettists, singers, patrons, conductors, listeners, and scholars have adapted to changes in social and cultural practices surrounding and subsuming opera as a social phenomenon, as well as to changes in the art form itself. We will study representative works and productions from the earliest music dramas of the Baroque period through to contemporary operas and reflect on the challenges posed in staging these works for today's audiences. Assignments may include weekly reflection papers, oral or virtual presentations, and a research project developed in consultation with the instructor.

**MUAC 4161 Topics in Modern Opera (4 Credits)**

This course involves the close study of selected twentieth- and twenty-first-century operas, their respective musical styles and their videotaped performances. This study will include such issues as opera and film, opera libretto criticism, and the personal and public politics of the opera.

**MUAC 4189 Jazz Performance Techniques (2 Credits)**

Individual study of jazz performance techniques in a directed study environment.

**MUAC 4196 Graduate Composition Tutorial (2 Credits)****MUAC 4200 Diction-Graduate Voice Majors (2 Credits)**

This course is designed to help refine the diction skills of graduate students in voice, with an emphasis on Italian, French and German. Native speakers will be presented, and the student will learn some basic vocabulary and syntactical aspects of the language.

**MUAC 4300 Topics in Jazz History (4 Credits)**

A seminar focusing on a major figure of jazz history. Detailed examination of a single artist, their life, music and influences.

**MUAC 4305 Advanced Bebop Concepts (2 Credits)**

An in-depth study of the language of bebop jazz improvisation. The course will combine listening, composing and performing skills with theoretical knowledge of the great improvisers of the 1940s and 50s.

**MUAC 4350 Talam: Rhythmic Form and Process in South Indian Music (4 Credits)**

This course explores the rhythmic system (talam) of Carnatic music, the classical music of Southern India. We begin the quarter with a general introduction to Carnatic music performance, examining its relationship to religious identity, histories of colonialism and nationalism, and social practices of class, caste, and gender. Having contextualized South Indian classical music socio-historically, the remainder of the quarter will focus on theoretical and practical issues in Carnatic talam. Readings and discussions will examine Indian conceptions of time (musical, cosmological, and cultural), the setting of song-texts, the art of improvisation and accompaniment, as well as the relationship between music, dance, and the body. We will also discuss and analyze cross-cultural applications of Carnatic rhythm in the compositions and pedagogies of several rock, jazz, and classical musicians. Weekly modules in solkattu, a system of spoken syllables and patterned hand gestures, will help students build and sharpen rhythmic skills and develop an analytical understanding for the intricacies of Carnatic meter and rhythmic design. Over the quarter, students will learn increasingly challenging exercises and rhythmic compositions in a variety of tala cycles (3, 5, 7, 8, and 9 beats in length). Some class time will be devoted to hands-on instruction in Carnatic percussion, including the mrdangam, the principle drum of South Indian classical music, as well as other hand drums including the khanjira frame drum.

**MUAC 4450 Suzuki Group Lesson Practicum (1 Credit)**

The Suzuki Group Lesson Teaching Practicum provides an opportunity for Suzuki Pedagogy master's students and Suzuki Teaching Certificate students to receive feedback on their own group lesson teaching skills from the professor. Prerequisites: MUAC 3477 or MUAC 3461.

**MUAC 4492 History of Opera: From Monteverdi to Minimalism and Beyond (4 Credits)**

This seminar course surveys the history of opera from the invention of the genre c. 1600 to the present day. In addition to assigned excerpts, students view three complete operas during the quarter. Primary and secondary source readings supplement the required text and class lectures. Students write a research paper that may examine some aspect of a particular opera or that may compare a particular aspect found in several operas. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 4493 Approaches to American Popular Music (4 Credits)**

We explore a number of topics involved in the study of popular music, including tensions between analytical and cultural approaches; issues of race, class, and gender; and constructions of authenticity and personae. Listening and reading are wide-ranging, encompassing diverse styles. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 4494 Music and Belief in World Cultures (4 Credits)**

How does music affect religious experience and how does religion shape musical practice? Why is music vital in some religious rituals and expressly banned in others? If humans use music to create, reflect, and comment upon the worlds they experience and imagine, then the use of music in religious practice is among its most powerful and ephemeral. Students are introduced to a wide range of musical traditions and their relationship to many of the world's religions, including Islam, Judaism, Christianity, Buddhism, Hinduism, Native American belief and the religious practices of Africa and its diaspora. Readings, lectures and discussions are supplemented by guest lecture demonstrations, film/video screenings and hands-on workshops.

**MUAC 4498 Music, Dance, and Everyday Life in South Asia (4 Credits)**

This course serves as an introduction to a diverse array of performance traditions from the South Asian subcontinent. We examine the significance of music and dance in everyday life, the influence of media technology, and the relationship of performance to issues such as caste, gender, nationalism and globalization. Class discussions are supplemented by guest lectures, hands-on workshops and film screenings. Our study of music outweighs that of dance, and a music background is strongly encouraged.

**MUAC 4499 Topics in Musicology (4 Credits)**

This course focuses on particular musicology topics determined by the instructor. Course materials may include primary and secondary source readings, theoretical writings from other disciplines, a variety of listening assignments, film/video screenings, guest lecture demonstrations, and hands-on workshops. Students are expected to participate in class discussions and may be asked to write short response papers and/or to give short oral presentations. The course concludes with individual research projects, presented orally and in written form, on topics chosen and developed in consultation with the instructor. Expectations for graduate students enrolled in the course are commensurate with their training and background as compared to undergraduates enrolled in the course. In some cases, with the prior consent of the instructor, students may choose to combine performance with the final research project.

**MUAC 4511 Mahler and Musical Culture (4 Credits)**

We explore Gustav Mahler's life, historical context, and music, all in relation to one another. The focus is on recent and important scholarly approaches to this conductor and composer. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 4512 Stories of Music History (4 Credits)**

We explore a number of case studies in which "conventional wisdom" about a composer, repertory, or a period of time turns out to be not universally "true," but instead contingent on cultural context and changing ideologies about music. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 4513 Wagner and the Ideology of the Artwork (4 Credits)**

We explore Richard Wagner's music dramas, particularly the Ring operas, as well as theories and ideologies surrounding them. The focus is on recent and important scholarly approaches. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 4518 Musical Theft: Music Appropriation and Appreciation from Ariana Grande to Paul Simon (4 Credits)**

This course asks, what happens when people engage with music that is not their own? How do we determine who owns music? A piece? A tradition? What is the difference between theft, appropriation, and appreciation? We will explore these questions through diverse case studies examining popular, classical, and traditional musics from around the world. We will examine Paul Simon's engagement with South African musicians during apartheid, rap's overwhelming popularity among young white men in the United States, and Central African musicians' embrace of Cuban music in the 1960s and '70s. We will parse out what kinds of cross-cultural musical engagements occur, their impacts, and the responsibilities of individuals, governments, and international organizations in different contexts.

**MUAC 4519 Social Justice and Community Music Making (4 Credits)**

What is community music? How do community arts programs function? How do they integrate social justice and music? This interdisciplinary community engaged learning course examines these questions both inside and outside of the classroom. Students will analyze how music programs are built and run by applying ideas from in-class readings and discussions to collaborative projects with local social justice arts-based organizations (e.g., a social justice songwriting project with local teens, a storytelling performance project with a community choir). By working with local community arts and social justice program professionals, students will critically analyze best practices as they learn how organizations are constructed, get funding, demonstrate impact, and pursue their social justice and educational missions. Drawing on scholarship from community arts, social work, ethnomusicology, cultural policy, and music education, this course provides an interdisciplinary foundation for students to engage with (and even create) impactful arts- and social justice-focused programs in their communities.

**MUAC 4520 Topics in Hindustani Music (4 Credits)**

This course explores the melodic system (raga) and rhythmic system (tala) of Hindustani music, the classical music of North India. These conceptual frameworks act both as sound structures to be realized in improvised performance and as aesthetic entities manifested in the related traditions of dance, iconography, and film. A major emphasis of this course will be developing an understanding of raga and tala as musical structures through intensive listening as well as practical instruction. Accordingly, one class each week is designed to incorporate hands-on music-making through singing, rhythmic exercises, and dance. By the end of the quarter, students will become familiar with several ragas and talas and the stages by which they are developed in performance. A second, equally important objective is to learn to appreciate ragas as aesthetic entities. We will analyze their musical characteristics as well as the "extra-musical" characteristics of sentiment (rasa), performance time and/or season and iconographic associations (ragamala painting).

**MUAC 4521 Topics in Baroque Music (4 Credits)**

Through the study of selected Baroque instrumental, vocal and operatic works, this seminar course considers various approaches to performance practice issues such as "authenticity," the "historically informed" performance, period instruments, ornamentation, continuo realization, and editing. Facsimile editions and primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of Baroque music with an emphasis on performance practice. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 4535 Baroque Opera on Stage (4 Credits)**

This course will explore aspects of Baroque opera not immediately conveyed by a score - including staging, gesture, scenic design, machinery, theater space, performers response - as they inform our understanding of specific Baroque operas and the cultural context within which they were performed. We will focus on operas by Monteverdi, Cavalli, Purcell, Handel, Lully, Campra and Rameau, among others. Students should expect to participate in class discussions, to write short response papers, to give short oral presentations, and to write a 12 to 15 page paper that examines a Baroque opera or operas in the light of one or more performance considerations. With the prior consent of the instructor, students may submit an alternative final project, one which combines performance with some form of written work.

**MUAC 4536 Musics of the African Diaspora (4 Credits)**

How have African music-cultures changed in their transitions to new lands? What performative Africanisms have been retained, reconstructed and/or highlighted in the aftermath of legal slavery? And within newer Afro-diasporic communities? What role does musical transmission play in cultural retention and survival? This course will explore the connections and differences in musical practice and worldview throughout the African diaspora. We focus primarily on music-cultures of North, South, and Central America, and the Caribbean, examining traditional forms of music and dance associated with religion and ritual such as Afro-Cuban bata drumming, practices which fuse music and movement such as Afro-Brazilian capoeira, jazz, and popular music such as rap. Lectures and class discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops.

**MUAC 4537 Psalms, Hymns, and Spiritual Songs: The Music of the African American Worship (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities.

**MUAC 4538 Cultural and Psychological History of the African American Spiritual (4 Credits)**

In this graduate academic music course, we trace the cultural and psychological history of African American spirituals, which are the sacred folk songs that were created and first sung in the 18th and 19th centuries by African women and men enslaved in North America. We explore the cultural and psychological functions of the music during slavery and the different functions of choral and art song spirituals that evolved after slavery, peaking in their cultural impact during the Harlem Renaissance of the 1920s and 30s. We also examine the cultural relationship of the spirituals to gospel music, and the influence of the spirituals tradition on the emergence of the freedom songs of the Civil Rights Movement of the 1950s and 60s. Throughout the course, we reflect on the relationship of the spirituals to larger issues of racial identity and social justice. Finally, we examine the cultural and psychological meanings of the spirituals tradition in contemporary twenty-first century America.

**MUAC 4539 Music, Politics, and Policy (4 Credits)**

This course examines the ways in which policies and politics engage with popular, jazz, folk, and classical musics around the world. Students will explore contemporary and historical cases in which governments and NGOs foster, transform, reject, and otherwise use musics to promote their own ideas about local economies, national cultures, diplomacy, democracy, innovation, cultural diversity, and even criminal law. We ask, can music promote peace? Democracy? How? How do governments create local and national music scenes? Which local and national cultures do they promote and protect? To what end? We look at how the Cuban government has embraced rap music as emblematic of the nation's revolutionary ethos; how the United States government used jazz as a diplomatic tool during the Cold War; how NGOs in Israel and Palestine used popular and classical musics to promote peace and understanding; how American courts have used rap music as evidence in criminal cases; and how funding and intellectual property laws impact musical ownership, tradition, innovation, and creativity.

**MUAC 4540 Music and Activism (4 Credits)**

In many times and places, people around the world sing, chant, and drum in the streets. Their lived experiences don't line up with the equality and opportunity their governments claim to champion. Music is an integral part of their advocacy work. They play and sing as they draw attention to injustices, foster cohesion and community, communicate messages (both covertly and forcefully), express pain, joy and pride, energize and sustain themselves, as well as (de)humanize themselves and others. This course explores the special place music has in activism around the world. We examine protest movements such as the South African anti-apartheid movement, the American Abolitionist and Civil Rights movements, American/European White Nationalist movements, the Arab Spring, and the worldwide Black Lives Matter movements. We will explore community music projects with social justice agendas such as Youth on Record, The Spirituals Project, and the West-Eastern Divan Orchestra. We ask, why is music a particularly important part of activist work? What special place does it have? How is it used for both good and bad? For community mobilization, peace, and violence? Drawing on the fields of ethnomusicology, musicology, and cultural policy, we explore music, not just as a means to achieve certain ends, but as integral to the way humans position themselves in the world and advocate for themselves and others.

**MUAC 4545 The Making of Romantic Music: Paris and Leipzig in the 1830s (4 Credits)**

With a view to identifying the various interdisciplinary factors that led to the making of romantic music, this seminar course focuses on musical life in Paris and Leipzig in the 1830s. Specific attention is paid to the music of Chopin, Berlioz, Mendelssohn, and Robert and Clara Schumann and the personal and musical connections between these composers. Primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of music and/or musical life in the 1830s. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 4547 Topics in Advanced Keyboard Repertoire (4 Credits)**

Topics in Advanced Keyboard Repertoire focuses on special topics chosen by faculty members. Students should expect rigorous course work and a final project or paper.

**MUAC 4600 Extra-Musical Roles of the Music Director (0-2 Credits)**

Under the supervision and guidance of conducting faculty, students will gain hands-on, actual experience with many of the non-musical tasks that conductors face. Students will learn about and gain hands-on, actual experience with many of the non-musical tasks with which conductors are faced. These experiences will include managing ensemble personnel, librarian activities, running auditions, and recruiting.

**MUAC 4601 Soundpainting: The Study of the Live Composing Sign Language for the Performing and Visual Arts (2 Credits)**

In this course, students will study the soundpainting gestural language, a universal live composing sign language for the performing and visual arts.

**MUAC 4602 Free Improvisation Techniques (2 Credits)**

Free Improvisation Techniques will explore exercises in Tom Hall's book *Free Improvisation: A Practical Guide*. We will also explore how those exercises relate to the broader concepts of improvising as discussed in Stephen Nachmanovich's landmark book *Free Play*. This class is best suited for all musicians, especially those who are seeking to expand the way they relate to performing and how performing relates to other aspects of their life.

**MUAC 4801 Introduction to Schenkerian Analysis (4 Credits)****MUAC 4831 Current Trends in Piano Pedagogy (2 Credits)**

This course will explore current trends including some of the following topics: technology, professionalism, the history of piano pedagogy, employment opportunities and creative projects.

**MUAC 4837 Pedagogy and Repertoire Organ (2 Credits)**

Study of teaching techniques, survey of literature and teaching materials from the 20th and 21st centuries. Prerequisite: MUAC 3740.

**MUAC 4840 Piano Teaching Practicum (0-2 Credits)**

MUAC 4840 is a course designed to provide guided observations, lesson planning, and practice teaching students of various developmental age groups using foundations and principles developed in Piano Pedagogy.

**MUAC 4850 Elementary Piano Pedagogy I (2 Credits)**

An in-depth study of methods and curriculum for teaching piano at the beginner and elementary level. Focus on philosophical, psychological, and physiological bases of piano study. Study and evaluation of current educational materials.

**MUAC 4851 Elementary Piano Pedagogy II (2 Credits)**

This course is designed in a sequence with Elementary Piano Pedagogy I. An in-depth study of methods and curriculum for teaching piano at the late elementary to early intermediate levels. Focus on philosophical, psychological, and physiological bases of piano study. Study and evaluation of current educational materials. Prerequisite: MUAC 4850.

**MUAC 4852 Group Piano Teaching Techniques (2 Credits)**

An in-depth study of methods and curriculum for group study and the teaching of adults and children. Focus on philosophical, psychological, and physiological bases for teaching the piano in groups of all ages. Study and evaluation of current resources.

**MUAC 4853 Intermediate Piano Pedagogy I (2 Credits)**

Course content will emphasize teaching methods, materials, and curriculum content at the intermediate level of piano study. Reading and discussions will explore practical issues encountered by the contemporary piano teacher.

**MUAC 4854 Intermediate Piano Pedagogy II (2 Credits)**

This course is designed in a sequence with Intermediate Piano Pedagogy I. Course content will emphasize teaching methods, materials, and curriculum content at the intermediate to early advanced levels of piano study. Reading and discussions will explore practical issues encountered by the contemporary piano teacher.

**MUAC 4991 Independent Study (1-10 Credits)****MUAC 4993 Independent Study (1-10 Credits)****MUAC 4995 Independent Research (1-10 Credits)****MUAC 5991 Graduate Thesis (1-10 Credits)**

## Music: Studio Lessons (MUPR)

**MUPR 3120 Alexander Technique (2 Credits)**

The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion.

**MUPR 3190 Jazz Piano (2 Credits)****MUPR 3210 Piano (2 Credits)**

For non-majors only. If you are interested in Piano for Non-Majors, please email [lamontpiano@du.edu](mailto:lamontpiano@du.edu).

**MUPR 3230 Voice (2 Credits)**

For non-majors only.

**MUPR 3250 Violin (2 Credits)**

For non-majors only.

**MUPR 3270 Violoncello (2 Credits)**

For non-majors only.

**MUPR 3290 Viola (2 Credits)**

For non-majors only.

**MUPR 3310 Bass Violin (2 Credits)****MUPR 3312 Jazz Bass (2 Credits)****MUPR 3330 Harp (2 Credits)****MUPR 3350 Organ Improvisation (2 Credits)**

This course is designed for organ students to introduce them to the art of organ improvisation, hymn and ensemble playing, as well as all possible forms of accompaniment. It is meant for undergraduate students (upper division), graduate students, and artist diploma graduates. Prerequisites: knowledge of music history, figured bass, and counterpoint. Permission of instructor required.

**MUPR 3351 Organ (2 Credits)****MUPR 3370 Clarinet (2 Credits)**

For non-majors only.

**MUPR 3390 Flute (2 Credits)**

For non-majors only.

**MUPR 3460 Bassoon (2 Credits)****MUPR 3480 Trombone (2 Credits)**

For non-majors only.

**MUPR 3481 Jazz Trombone (2 Credits)****MUPR 3500 Trumpet (2 Credits)**

For non-majors only.

**MUPR 3520 Horn (2 Credits)**

For non-majors only.

**MUPR 3540 Euphonium (2 Credits)****MUPR 3560 Tuba (2 Credits)**

For non-majors only.

**MUPR 3621 Jazz Guitar (2 Credits)****MUPR 3660 Percussion (2 Credits)**

For non-majors only.

**MUPR 3661 Percussion Set (2 Credits)****MUPR 3680 Oboe (2 Credits)****MUPR 3780 Saxophone (2 Credits)****MUPR 3900 Carillon (2 Credits)****MUPR 3920 Composition (2 Credits)****MUPR 3930 Conducting (2 Credits)****MUPR 4040 Music Production (2 Credits)**

This course is designed to meet you where you currently are in your production and theory experience and then progress from there. As such, the first 1 or 2 meetings may be to assess your current status and construct a plan for the academic quarter. Possible directions include, but are not limited to, audio theory, microphone technique, post-production (mixing/mastering), editing, songwriting and production, sound synthesis, and electronic music production, etc.

**MUPR 4191 Jazz Piano (2 Credits)**

**MUPR 4210 Piano (2 Credits)**

**MUPR 4230 Voice (2 Credits)**

**MUPR 4250 Violin (2 Credits)**

**MUPR 4270 Violoncello (2 Credits)**

**MUPR 4290 Viola (2 Credits)**

**MUPR 4310 Bass Violin (2 Credits)**

**MUPR 4312 Jazz Bass (2 Credits)**

**MUPR 4330 Harp (2 Credits)**

**MUPR 4350 Organ (2 Credits)**

**MUPR 4370 Clarinet (2 Credits)**

**MUPR 4390 Flute (2 Credits)**

**MUPR 4460 Bassoon (2 Credits)**

**MUPR 4480 Trombone (2 Credits)**

**MUPR 4481 Jazz Trombone (2 Credits)**

**MUPR 4500 Trumpet (2 Credits)**

**MUPR 4520 Horn (2 Credits)**

**MUPR 4540 Euphonium (2 Credits)**

**MUPR 4560 Tuba (2 Credits)**

**MUPR 4600 Classical Guitar (0-2 Credits)**

**MUPR 4610 Classical Guitar (4 Credits)**

**MUPR 4621 Jazz Guitar (2 Credits)**

**MUPR 4660 Percussion (2 Credits)**

**MUPR 4661 Percussion Set (2 Credits)**

**MUPR 4680 Oboe (2 Credits)**

**MUPR 4780 Saxophone (2 Credits)**

**MUPR 4900 Carillon (2 Credits)**

**MUPR 4920 Composition (2 Credits)**

One-on-one instruction for composition majors.

**MUPR 4930 Conducting (2 Credits)**

This course provides individualized instruction in conducting for graduate students majoring in conducting. Repertoire selection, analysis, rehearsal procedures, and gestures will all be studied. Students will prepare assigned repertoire for class each week. Significant time will be spent developing gestures that reflect the artistic and pedagogical intentions of each student. The individual lesson is also a mentoring time to develop strategies for career development and recital preparation. Analysis projects may be assigned to provide an opportunity for in-depth scholarly research and presentation of significant literature relating to the theme of the quarter.

**MUPR 4991 Independent Study (2-4 Credits)**

### Master of Arts in International and Intercultural Communication

The Master of Arts program in International and Intercultural Communication is a joint master's degree from the Josef Korbel School of International Studies (JKSIS) and the Department of Media, Film & Journalism Studies (MFJS). This highly flexible program allows students to choose from the breadth of coursework available in JKSIS and MFJS, while developing their own specific areas of concentration. Students complete internships to

gain professional experience, and may further hone expertise by completing a Graduate Certificate as part of the degree. Certificate Programs include: Global Business & Corporate Social Responsibility; Global Health Affairs; and Public Diplomacy.

International and Intercultural Communication graduates pursue globally-oriented careers in a variety of fields, including: Global health communication; Public diplomacy & Public affairs; International PR and marketing; Nonprofit management; Cross-cultural and diversity training; International education; Human rights and Conflict resolution; International administration, and more.

Effective global communication requires that people understand both international and intercultural dynamics and differences. Success is based on communicating goals and bridging differences. Students pursuing the MA in International and Intercultural Communication establish a strong theoretical and applied foundation, while learning the nuances of the global environment. They then have an opportunity to extend this interdisciplinary base through courses in business, anthropology, education and other areas.

## Master of Arts in Media and Public Communication

The Master of Arts in Media and Public Communication is a 48-credit, two-year degree program, which equips students with a combination of essential theoretical and practical skills that prepare them for a variety of professional and research careers in media and communication. The program emphasizes the role of media and communication in bridge building and social justice across diverse audiences. Students can choose one of two areas of concentration: Strategic Communication or Media and Globalization. Depending on students' goals and interests, they can opt to complete a master's thesis, a substantial research paper, or a professional internship as their capstone requirement.

**Concentration in Strategic Communication:** Strategic communication encompasses skills and activities associated with public relations, advertising, brand management, and marketing communication. This concentration focuses on the nonprofit and government sectors, as well as on international and intercultural issues within strategic communication. Classes emphasize ethical communication and incorporate experiential learning projects in which students work with nonprofit organizations to develop creative and strategically sound communication campaigns. Students benefit from faculty expertise in nonprofit, international, intercultural, health, corporate, and political communication. The coursework integrates theoretical concepts in media and communication with applied research, strategic planning, and messaging skills essential for professional success in the nonprofit, government, and for-profit sectors. Students also gain a solid foundation for pursuing advanced degrees and conducting academic research.

**Concentration in Media and Globalization:** This concentration is designed for students who are interested in pursuing careers as researchers and media educators. Courses focus on the role of media and communication in social and cultural change in both global and local settings. Students gain in-depth theoretical knowledge of media, culture, and communication and acquire methodological skills needed to conduct independent research projects based on their interests. This concentration emphasizes critical and conceptual thinking, cultural awareness, and social responsibility. Students benefit from faculty's research and community engaged projects in international locations, including Latin America, Africa, Europe, and Asia, as well as from faculty work with immigrant and multicultural communities in the US. Graduates develop a solid foundation for pursuing advanced degrees and careers in higher education and research.

## Public Diplomacy Certificate of Specialization

The Public Diplomacy Graduate Certificate is an interdisciplinary, 24-credit certificate, which examines the history, theory, methods and uses of strategic communication for the purposes of informing, influencing, and establishing dialogue with international publics and stakeholders. The certificate is designed to help students acquire a sophisticated understanding of global media and communication processes and the ways in which they are employed by individuals, groups, organizations, and governments to advance their strategic interests. The certificate combines expertise from the Department of Media, Film, and Journalism Studies and the Josef Korbel School of International Studies, providing students with an interdisciplinary learning experience. Graduates of the Public Diplomacy Certificate are equipped with conceptual and practical skills that prepare them for careers in the fields of cultural diplomacy, nation branding, public affairs and information, foreign aid, global health and development communication, international strategic communication, and international education. The certificate is open to students enrolled in one of the master's programs offered by the Department of Media, Film, and Journalism Studies or the Josef Korbel School of International Studies, and can be integrated into the degree program. This certificate program does not require additional credits.

## Master of Arts in International & Intercultural Communication

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Standardized Test Scores

- GRE scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials. If you choose to submit test scores, you may upload

your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admissions to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Arts in Media and Public Communication with a Concentration in Strategic Communication

## Master's Degree Programs

### Master of Arts in International and Intercultural Communication

#### IIC/Peace Corps' Paul D. Coverdell Fellows Program

In cooperation with the Peace Corps, the Paul D. Coverdell Fellows Program permits students who have completed their service in the Peace Corps to complete the MA in International & Intercultural Communication degree following their service. They receive 3 credits for their Peace Corps service toward the 48 credits required for the degree, leaving 45 credits for the program. In addition, the foreign language proficiency requirement is waived. Students are required to complete an internship with a high needs community in the U.S.

#### Coursework requirements

Students should plan ahead to ensure they are able to complete their required courses as some are offered every other year. Students are allowed to take one graduate 3000-level course to count towards the 56 hours required, but not if a separate 4000-level of the course exists for graduate students. Students must consult with the instructor and the IIC director before enrolling in any 3000-level course. Grinds courses may not be applied to this degree. Students are welcome to take Grinds courses as desired, but they will not count towards any of the requirements for this degree, including electives.

Code	Title	Credits
<b>Core coursework requirements</b>		
<b>I. Department of Media, Film and Journalism Studies requirements (6 courses)</b>		<b>24</b>
Required foundational courses:		
MFJS 4650	Global Media and Communication	
MFJS 4654	Intercultural Communication	
Complete an additional 4 courses in MFJS		
<b>II. Joseph Korbel School of International Studies requirements (4 courses)</b>		<b>16</b>
Students must complete 4 courses in JKIS. These courses may be International Studies (INTS), Conflict Resolution (CRES), or Public Policy (PPOL).		
<b>III. Research Methods</b>		<b>4</b>
Students must take one research methods course; if taken in MFJS or INTS, it counts as one of the 4 courses required in either unit and opens up the possibility to take one elective course. Students who take methods in another department will not have any courses left over for electives. Students who wish to take a methods course from another department must receive approval from the IIC director. Approved research methods courses include:		
MFJS 4560	Audience and Communication Research	
INTS 4010	Epistemology	
INTS 4050	Statistical Methods I	
INTS 4051	Statistical Methods II	
INTS 4052	Statistical Methods III	
INTS 4057	Statistics *	
INTS 4058	Applied Time-Series Analysis	
INTS 4303	Econometrics for Decision Making I	
INTS 4333	International Project Design and Monitoring	
INTS 4342	Project Management	
INTS 4522	Philosophy of Social Science	
INTS 4575	Systems Thinking for Social Scientists	
INTS 4579	International Futures	

INTS 4632	Qualitative Research Methods
INTS 4633	Int'l Project Evaluation
INTS 4644	Human Rights Research Methods
INTS 4711	Topics in International Studies
INTS 4735	Defense and Security Methods
INTS 4966	Applied Field Methods: Africa
INTS 4999	Research Design: Ph.D. Prospectus, Substantial Research Paper, and MA Thesis
RMS 4941	Introduction to Qualitative Research

**IV. Internship (must serve a high needs community in the U.S.)** **4**

MFJS 4980	Internship
-----------	------------

**V. Electives** **0-4**

Electives serve as additional coursework needed to reach the minimum number of credits required for the degree and to help development a specialization. These may be taken in MFJS, JKJIS, or another department.

**Total Credits** **48**

Note: The maximum number of credits that will be accepted in transfer toward the degree is 20 credits

\* Check prerequisites for these courses

Minimum number of credits required for degree: 48 credits

**Internship**

Internships require 40 hours of work per credit (40 x 4 = 160 hours). IIC Peace Corps Fellows are required to complete five credits of internship with a high-needs community in the United States. An internship is registered as a course (MFJS 4980: Internship), and may be taken for 1 to 5 credits during any one term. (Note: For internships at the end of a student's program, they must be secured or in the process of being secured in the quarter before graduation.) Students in the Paul D. Coverdell Fellows Program must complete their internship in a high-need community within the U.S. Students are encouraged to do the internship after they have completed at least half of the 48 credits required for the MA degree. All internships will be administered and supervised by the Director of Internships for the IIC Program in the Dept. of Media, Film and Journalism Studies. Students must meet with the internship director in order to obtain approval for an internship.

---

## Master of Arts in Media and Public Communication with a Concentration in Media and Globalization

### Degree Requirements

The MA in Media and Public Communication with a Concentration in Media and Globalization requires 48 hours of credit, including completing a thesis, a substantial research paper (SRP), or an internship.

### Course Requirements

Students should plan ahead to ensure they are able to complete their required courses as some are offered every other year.

Code	Title	Credits
Required Courses		12
MFJS 4160	Media Theories	
MFJS 4300	Media Law <sup>1</sup>	
MFJS 4560	Audience and Communication Research <sup>1</sup>	
Choose One of the Following Courses:		4
MFJS 4650	Global Media and Communication	
MFJS 4654	Intercultural Communication	
Concentration Courses		
Choose 4 of the following courses:		16
MFJS 4001	Producing Video for Social Media and Advocacy <sup>2</sup>	
MFJS 4065	Public Diplomacy and Nation Branding	
MFJS 4080	Global/Multicultural Campaigns	
MFJS 4165	Global Health and Development Communication	
MFJS 4175	Justice Equity Diversity and Inclusion in Health Communication <sup>1</sup>

MFJS 4652	Feminist Media Studies <sup>1</sup>	

MFJS 4653	Language, Power, and Globalization <sup>2</sup>	
MFJS 4655	JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling <sup>1,2</sup>	
MFJS 4660	Global Edutainment & Narrative Persuasion	
MFJS 4912	Seminar in Media Film & Journalism Studies <sup>3</sup>	
Elective Courses Inside or Outside the Department		8-12
Internship OR Substantial Research Paper (SRP) OR Thesis <sup>4</sup>		4
MFJS 4980	Internship	
or MFJS 4995	Thesis/Substantial Research Paper	
Total Credits		48

1. This course may be cross-listed with an undergraduate course.

2. This course is offered infrequently. Please talk to your advisor with questions.

3. Advisor approval is required when taking this course as a concentration course. Students may take 4912 more than once if the course topic is different.

4. Students may take up to 8 Thesis credits, but only 4 Internship or SRP credits.

Minimum number of credits required for the degree: 48

### Internship

Internships require 40 hours of work per credit (40 x 4 = 160 hours). An internship is registered as a course (MFJS 4980: Internship), and may be taken for a maximum of 4 credits during any one term. (Note: For internships at the end of a student's program, they must be secured or in the process of being secured in the quarter before graduation.) Students may elect to do an internship with media/communications agencies, non-profit organizations, corporations, or government, located in the Denver area, or elsewhere in the U.S. or abroad. Students are encouraged to do the internship after they have completed at least half of the 48 credits required for the MA degree. All internships will be administered and supervised by the director of internships in the Dept. of Media, Film and Journalism Studies. Students must meet with the internship director in order to obtain approval for an internship.

### Thesis

Students may opt to do a thesis instead of an internship, for a maximum of 4 credits. To begin work on the thesis, the student must first choose an area of interest and develop a research question that will guide the thesis project. At that time, the student should also identify a faculty member with expertise in their area of interest who is available and willing to work with them as a thesis advisor. The advisor will help the student to focus the research question and may suggest additional readings or coursework that will help the student develop the thesis project. Students should review the process and policies for the master's thesis in the Graduate Policy Manual. Students can find "Thesis and Dissertation Formatting Guidelines," "Thesis Oral Defense Information," and "Thesis/Dissertation Submission Instructions via ETD" under the "Graduation and Oral Defense Information on this website. The student should meet with the thesis advisor to finalize a research question and outline the entire project. The student should then begin work on a preliminary proposal which may need to be reviewed by the MFJS Graduate Committee (as determined by the thesis advisor and MA director), and should include the following:

- research problem or question
- theoretical framework
- preliminary literature review
- methods
- The committee will review the proposal and the student's course record (including grades), consult with the student's advisor and instructors of courses related to the thesis, and make a recommendation to the student on doing a thesis. If the committee recommends against the student doing a thesis, the student is required to do an internship. A student has the option to revise and resubmit the preliminary thesis proposal one time. Once the preliminary proposal has been approved by the graduate committee, the student and advisor will need to select a thesis committee, which includes the advisor and a minimum of two other committee members who will read the formal research proposal and the final report. These additional members should be contacted and asked if they would be willing to serve on the thesis committee. Once the thesis committee is formed, the student should begin work on a formal thesis proposal. The exact form of this proposal will be outlined by the thesis advisor and will vary according to the thesis topic, the specific problem being studied and the methodology proposed to explore that problem. All proposals should include the following (the order may vary):
- a general introduction to the thesis topic
- an explication of the problem(s) the research will address (i.e., the purpose of the study)
- a review of the literature related to the stated problem
- a clear and succinct statement of the research questions or hypotheses the thesis will address
- a discussion of the research methods that will be used to explore the questions or hypotheses
- a description of the material or data that will be examined in order to suggest answers to the research questions or to test the hypotheses
- if appropriate, a discussion of the contributions the study will make to the existing discourse on the thesis topic.

- The student will need to convene the thesis committee for a proposal meeting following completion of the proposal. The committee members should be presented with a draft of the research proposal two weeks prior to this meeting. At the meeting the committee members will question the student on the project's theory, design, and research methods to ensure that the project is rigorous and of appropriate scope. Revisions to the proposal may be required following this meeting. An approved proposal outlines the specific procedures the student must follow to complete the thesis requirement. Following approval of the research proposal, the student may then proceed to conduct the research described in the proposal, then report and discuss the results in the final written thesis report, which must be approved in an oral defense by the thesis committee. The format of the thesis should follow the guidelines developed by the Office of Graduate Studies exactly.

### Substantial Research Paper (SRP)

A Substantial Research Paper (SRP) is a problem-focused paper designed to engage students in an independent research project that is longer and more in-depth than a class research paper, but less than a thesis project. Unlike a thesis, an SRP does not require a review committee or an oral defense; rather, it will be supervised and graded by a single appointed faculty member. Also, unlike a thesis, the SRP does not require the collection of primary data, but may use secondary data only.

To begin work on the SRP, the student must first choose an area of research interest and develop a research question that will guide the research. It may be based on a class research paper that will then be expanded for the SRP. The student should choose an SRP faculty advisor with expertise in the student's area of interest. The faculty advisor will help the student to focus the research question and may suggest additional readings or coursework that will help the student develop the SRP. It is important that the student and faculty advisor establish a reasonable and mutually agreeable timeline for exchanging drafts and comments on the student's work. The final copy of the SRP should be formatted according to an academic style, such as APA or MLA, and follow any other guidelines agreed upon with the faculty advisor.

Students opting to complete an SRP should register for MFJS 4995 for a maximum of 4 credits, allocated in the quarters in which they are actually working on the SRP. It is not permissible to register for credit before work has commenced or after the work has been completed.

---

## Master of Arts in Media and Public Communication with a Concentration in Strategic Communication

### Degree Requirements

The MA in Media and Public Communication with a Concentration in Strategic Communication requires 48 hours of credit, including completing a thesis, a substantial research paper (SRP), or an internship.

- The committee will review the proposal and the student's course record (including grades), consult with the student's advisor and instructors of courses related to the thesis, and make a recommendation to the student on doing a thesis. If the committee recommends against the student doing a thesis, the student is required to do an internship. A student has the option to revise and resubmit the preliminary thesis proposal one time. Once the preliminary proposal has been approved by the graduate committee, the student and advisor will need to select a thesis committee, which includes the advisor, a committee chair who is a tenured or tenure-track faculty member outside of MFJS, and a minimum of one other committee member who will read the formal research proposal and the final report. These additional members should be contacted and asked if they would be willing to serve on the thesis committee. Once the thesis committee is formed, the student should begin work on a formal thesis proposal. The exact form of this proposal will be outlined by the thesis advisor and will vary according to the thesis topic, the specific problem being studied and the methodology proposed to explore that problem. All proposals should include the following (the order may vary):
- a general introduction to the thesis topic
- an explication of the problem(s) the research will address (i.e., the purpose of the study)
- a review of the literature related to the stated problem
- a clear and succinct statement of the research questions or hypotheses the thesis will address
- a discussion of the research methods that will be used to explore the questions or hypotheses
- a description of the material or data that will be examined in order to suggest answers to the research questions or to test the hypotheses
- if appropriate, a discussion of the contributions the study will make to the existing discourse on the thesis topic.
- The student will need to convene the thesis committee for a proposal meeting following completion of the proposal. The committee members should be presented with a draft of the research proposal two weeks prior to this meeting. At the meeting the committee members will question the student on the project's theory, design, and research methods to ensure that the project is rigorous and of appropriate scope. Revisions to the proposal may be required following this meeting. An approved proposal outlines the specific procedures the student must follow to complete the thesis requirement. Following approval of the research proposal, the student may then proceed to conduct the research described in the proposal, then report and discuss the results in the final written thesis report, which must be approved in an oral defense by the thesis committee. The format of the thesis should follow the guidelines developed by the Office of Graduate Studies exactly.

**Substantial Research Paper (SRP)**

A Substantial Research Paper (SRP) is a problem-focused paper designed to engage students in an independent research project that is longer and more in-depth than a class research paper, but less than a thesis project. Unlike a thesis, an SRP does not require a review committee or an oral defense; rather, it will be supervised and graded by a single appointed faculty member. Also, unlike a thesis, the SRP does not require the collection of primary data, but may use secondary data only.

To begin work on the SRP, the student must first choose an area of research interest and develop a research question that will guide the research. It may be based on a class research paper that will then be expanded for the SRP. The student should choose an SRP faculty advisor with expertise in the student's area of interest. The faculty advisor will help the student to focus the research question and may suggest additional readings or coursework that will help the student develop the SRP. It is important that the student and faculty advisor establish a reasonable and mutually agreeable timeline for exchanging drafts and comments on the student's work. The final copy of the SRP should be formatted according to an academic style, such as APA or MLA, and follow any other guidelines agreed upon with the faculty advisor.

Students opting to complete an SRP should register for MFJS 4995 for a maximum of 4 credits, allocated in the quarters in which they are actually working on the SRP. It is not permissible to register for credit before work has commenced or after the work has been completed.

## Certificate of Specialization Program

### Certificate of Specialization in Media and Public Communication with Concentration in Public Diplomacy

**Program Requirements**

Minimum Credits Required for Certificate: 24

**Coursework Requirements**

Students will take classes in three categories as follows:

Code	Title	Credits
<b>Foundational Courses</b>		<b>8</b>
MFJS 4065	Public Diplomacy and Nation Branding	
MFJS 4160	Media Theories	
or MFJS 4650	Global Media and Communication	
or MFJS 4080	Global/Multicultural Campaigns	
<b>Applied Course</b>		<b>4</b>
MFJS 4050	Foundations of Strategic Communication	
MFJS 4060	Strategic Messaging	
MFJS 4165	Global Health and Development Communication	
MFJS 4504	Social Media Strategies	
<b>Context Specialization Courses</b>		<b>12</b>
Students should select courses that directly focus on the society, politics, economics, or culture of particular countries or regions or challenges related to a specific theme or issue. Context Specialization courses must be arranged into a logical three-course set (by region and/or theme) that matches student interests and is approved by the Certificate Director(s). Only full-credit, graduate level courses in JKSI and MFJS, which are approved by the Certificate Director(s) in advance and are not used to meet another Certificate requirement are eligible for this category. At least two of the specialization courses must be from the Josef Korbel School of International Studies (JKSI). The third course may be from either JKSI or MFJS.		
<b>Total Credits</b>		<b>24</b>

\* Course may be counted as either Foundation, Applied, or Context Specialization, but cannot be counted in more than one of those categories

**Non-Coursework Requirements**

Applicants must be enrolled master's students in good standing in either MFJS or JKSI. Applicants from either unit must apply for the Certificate no later than February 1 in the first year of their master's program in order to be able to complete all of the necessary coursework for the Certificate by the end of their second year.

**MFJS 4001 Producing Video for Social Media and Advocacy (4 Credits)**

This course covers the basics in video production and video storytelling for social media and is open to all graduate students at the University of Denver who are interested in YouTube and other social media video content creation for advocacy, education, and support of social movements. Students will maximize their video storytelling abilities, producing storytelling content that can be shared across multiple social media platforms using mobile phones or equivalent basic consumer equipment. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills elective requirements within MEPC and IIC graduate programs and serves as a university graduate level elective.

**MFJS 4050 Foundations of Strategic Communication (4 Credits)**

Focuses on understanding and implementing public communication campaigns. Central to the course is the exploration of the theoretical social science framework underlying communication campaigns and examination of the ways theories are used to define and explain communication problems and to plan and evaluate campaigns.

**MFJS 4055 Media and Cultural Studies (4 Credits)**

This class surveys key ideas and authors in the interdisciplinary field of cultural studies with a focus on their contributions to the study of media and communication. Some theoretical concepts to be discussed include: representation, identity, cultural production, ideology, hegemony, intersectionality, and power as these relate to the analysis of media institutions, technologies, cultures, audiences/users, texts, and artifacts. Students will develop an understanding of cultural studies as a theoretical, methodological, and political project, devoted to social critique and transformative praxis.

**MFJS 4060 Strategic Messaging (4 Credits)**

Continues the focus on learning and applying public relations techniques, emphasizing media relations and media writing. Students develop the ability to formulate and evaluate appropriate communication objectives, strategies, and tactics in response to real-world public relations problems, paying attention to ethical considerations. Students produce a portfolio of written public relations materials. Prerequisite MFJS 4050 or instructor permission.

**MFJS 4065 Public Diplomacy and Nation Branding (4 Credits)**

Drawing on research from strategic communication, cultural studies, international relations, and marketing, this interdisciplinary course examines how nation-states strive to manage their reputations and increase their influence in the context of globalization and mediatization. Students will learn about the evolution of public diplomacy and nation branding from the Cold War to present day and will discuss current developments and challenges. The course will introduce several theoretical approaches and will use a variety of case studies to help students gain insights into public diplomacy and nation branding as fields of research and of practice. Instructor approval required for all non-MEPC and IIC students.

**MFJS 4070 Seminar in Strategic Communication (4 Credits)**

Through a combination of course readings, case study analyses and guest speakers, students will observe and learn about the practice of public relations in the health and nonprofit sectors. Students will also learn about the goals, challenges and opportunities specific to these sectors. Prerequisite: MCOM/MFJS 4060 or permission of instructor.

**MFJS 4080 Global/Multicultural Campaigns (4 Credits)**

Explores aspects of international and intercultural public relations, including intercultural communications issues, international media issues, international corporate PR, cross-cultural and diversity training, international media relations, and international public relations of governments. The class focuses on relevant theories and issues, rather than on techniques.

**MFJS 4160 Media Theories (4 Credits)**

Surveys a number of theoretical approaches to the study of media and mass communication, paying attention to the historical context in which they arise. Students explore the relationships among media technologies, institutions, content, and audiences as well as their impacts on culture and society. The class prepares students to formulate theoretically grounded research questions within the field of media and mass communication.

**MFJS 4165 Global Health and Development Communication (4 Credits)**

This course will begin with an overview of health communication (which includes but is not limited to health promotion and behavior change). We will discuss individual, social, cultural & technological factors, and relevant theories and concepts in relation to international health communication and development. Students will then learn about the role of communication in international health and development and the way it is practiced in the field. We will also discuss and apply the social and cultural factors that influence the design, delivery, reception, and effectiveness of international health communication programs, the role of international health's important players big and small (e.g. WHO, UNAID, PEPFAR, Doctors without Borders, pharmaceutical companies, local village leaders, local ministries of health, husbands, mothers, etc.), and the ways in which the use of both upstream and downstream communication is imperative. We will examine case studies and the latest research for international health communication and its effectiveness while we also apply health communication theories from a variety of perspectives.

**MFJS 4175 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)**

The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural concepts of health and disease and how those are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered, culturally sensitive health care.

**MFJS 4200 Topics in Mass Communications (4 Credits)****MFJS 4222 Experimental Theory and Production (4 Credits)**

This course is an historical, critical overview of experimental film/video movements; training in experimental projection techniques; production of own experimental projects. Lab fee required. Cross listed with MFJS 3222. Prerequisite: MFJS 4470 or permission of instructor.

**MFJS 4227 Producing the Environmental Documentary (4 Credits)**

This course is designed to provide you with a basic understanding of cinematography: cameras, lenses, grip equipment, lighting, and composition. When you complete this course, the goal is for you to have an intermediate understanding of cinematography and that which motivates lighting and composition choices. Because people are the most important part of any production, emphasis will be placed on your ability to work effectively with class members. Learning to collaborate is crucial to your success in this class.

**MFJS 4229 Video Editing is for Everybody (4 Credits)**

Video has become ubiquitous. Whether on YouTube, Hulu, television or a friend's Facebook page, people are exposed to thousands of edited videos every year. From business to anthropology, chemistry to journalism, students in every discipline want to create videos to enhance class projects, aide business plans, promote good works, accompany science processes and create lasting memories. This course is designed to provide students with a basic understanding of television and film editing. When completing this course, the goal is for students to have a basic working knowledge of editing using various media elements (video, audio, photos, music, graphics), editing software and applying a mixture of editing theories and techniques (continuity and montage style editing). There are no prerequisites for this course.

**MFJS 4242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives across the world.

**MFJS 4300 Media Law (4 Credits)**

Introduction to freedom of expression and media law. Students learn how the American legal system works and gain an understanding and appreciation of the philosophical foundations of free expression. In addition, students confront many of the issues facing professional communicators today. Topics include incitement, hate speech, student speech, copyright, defamation, and other issues crucial to mass media professionals. The course examines also explores challenges to free expression brought by new(er) communication technologies. The purpose of this class is to give students the knowledge and critical thinking skills needed to be successful in today's rapidly changing communication environment. Cross-listed with MFJS 3040.

**MFJS 4310 New Media Law & Regulation (4 Credits)**

Examination of current conflicts in mass communications law. Particular emphasis is given the legal problems of communications technologies. Topics may include libel, privacy, obscenity, news gathering, copyright, media ownership and comparative approaches to media law. The course provides insight into how the legal process works and an understanding of the principles and philosophies that underlie the restraints on new communication technologies.

**MFJS 4320 Brands and Identities (4 Credits)**

Reviews theories and cases of the role and meaning of brands in a consumer society, with a particular emphasis on understanding how brands are implicated in the construction and presentation of personal and group identities. The course combines insights from marketing, social psychology, and cultural studies to explore the importance of brands for both consumers and practitioners. Students master core branding concepts and use them to critically analyze salient social and cultural issues.

**MFJS 4504 Social Media Strategies (4 Credits)**

In this class, students get familiar with the principles of social media strategy and learn how to design messaging strategies and tactics for social media. In addition, students work with a real client on a strategic communication campaign for social media.

**MFJS 4506 Audio Documentaries (4 Credits)**

In the past decade, an explosion in the production and accessibility of audio documentary work has created an unprecedented interest and expansion of the documentary form in nearly all sectors of public life. Building on this trend, this course teaches the skills of ethnographically informed audio documentary work that can record and interpret culture and lived experience. We focus on learning the techniques of non-fiction storytelling used in established public radio programs like This American Life, Radio Lab, or Snap Judgement, as well as newer podcasts like Reply All, Invisibilia, or Embedded. The course will prepare students to tell complex stories using strong character-driven narrative. Sound documentation and representation will not be done along journalistic principles, but instead through rigorous ethnography that relies on participant-observation and immersion. Through practical application and the exploration of ethnography and documentary approaches to communication, the course explores questions that surround the interpretation and representation of socio-cultural experience via a sonic medium. To understand the basic mechanics of sound and its narrative form, participants will learn to digitally record and edit audio. Storytelling will then become more complex as students learn to conduct ethnography, interviews, and develop a script for radio. Students will ultimately analyze and create audio documentaries in an effort to understand a significant form of digital storytelling. There are three central learning objectives that will guide us through the course: (1) we will practice ethnographic and documentary methodology, (2) learn to write for radio, and (3) learn the workflow of audio editing to produce an audio documentary.

**MFJS 4560 Audience and Communication Research (4 Credits)**

This class offers an introduction to social science methods applied to communication and audience research. By the end of the course, students will be familiar with: the role and functions of communication and audience research in contemporary society; the processes and practices involved in developing and executing a research project; the basic different forms of research, both qualitative, such as interviews and focus groups and quantitative, such as surveys and experiments; how to use research skills for different career paths. Cross-listed with MFJS 3110/4560.

**MFJS 4567 Activist Media (4 Credits)**

In the mediated digital era, communication is changing fast and shifting the dynamics of real-world power, expanding spaces for journalism and activist communication aimed at working for social change and social justice. This dynamic space has enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for activism and social change. Media has played a key role in social and political movements of the past and more recent online movements. Social media platforms have provided new tools to resist the domination and limitations of mainstream corporate media and create new media strategies and messages to promote social change. But these platforms have also created new risks and challenges for activists. In this course, we will address these issues of communication power dynamics and also media strategies and tools of social and political movements working towards social change.

**MFJS 4650 Global Media and Communication (4 Credits)**

Major theories concerning international communication flows, the impact of globalization and global media, issues of new communication technologies, the rhetoric and media framing of global politics and culture; international marketing and public relations; and national and cultural sovereignty issues related to communication.

**MFJS 4652 Feminist Media Studies (4 Credits)**

MFJS 4652 (Feminist Media Studies) explores the gendered intersections between media and society through the analytical lens of Feminist Media Studies (FMS). While aligned with the discipline Media Studies, FMS centers questions related to power and patriarchy, and aims to create space for praxis. Paying close attention to issues of intersectionality, this course surveys the historical emergence, and contributions, of feminist methodology and inquiry related to issues such as sexism within gaming, the politics of visibility in television production, the celluloid ceiling, and networked bodies. During the quarter, you will engage in multiple points of active and reflective learning that provide the space to strengthen both your understanding and application of FMS. Assignments include discussion questions, self-reflective analysis, and a final project that highlights application, creativity, and subversion. Cross listed with MFJS 3652.

**MFJS 4653 Language, Power, and Globalization (4 Credits)**

This course focuses on scholarly and political debates surrounding the social nature of language, language and (inter)national and individual identity, language policy, multilingualism and linguistic diversity, language and globalization, language and media and communication technologies, and, finally, the future of the global language landscape.

**MFJS 4654 Intercultural Communication (4 Credits)**

This course focuses on the intersections between culture & communication, including intercultural communication in interpersonal and mediated contexts at the local, national and global levels as shaped by processes of globalization. It covers major theoretical perspectives and methods, the role of power and privilege in the construction and articulation of culture and cultural identity, and intersections with race, ethnicity, gender, sexuality and class, intercultural training and the role of communication and culture in conflict and conflict resolution.

**MFJS 4655 JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling (4 Credits)**

This course focuses on multicultural approaches to journalism and media, including representations and news coverage related to gender, race/ethnicity, class, and sexuality, disabilities, religion, and nationality, etc.. The class explores culture and intercultural communication and ways to apply these to journalistic writing as a creative process and craft. Prerequisite: Prior journalistic coursework or its equivalent (including writing experience). Cross-listed with MFJS 3655.

**MFJS 4656 Cross-Cultural Travel Seminar: Immigration, Communication, and Border Cultures (4 Credits)**

This is a one-week intensive travel course that takes place in Tucson, Arizona and south to the US-Mexican border region. The focus of this experiential learning class is to study immigration issues, border cultures, and the role of communication and media through testimonies of immigrants, and visits to key sites such as the migrant trail, immigration detention center and courts. Also included are talks by activists and officials involved in the immigration debate. Class meets for two pre-class sessions in spring quarter. Cross-listed with MFJS 3656.

**MFJS 4660 Global Edutainment & Narrative Persuasion (4 Credits)**

MFJS 4660 Global Edutainment & Narrative Persuasion serves as a gateway to explore the potential of entertainment as an educational tool that can spread awareness, change attitudes, and/or influence behaviors. In this course, students will trace the history of narrative persuasion strategy, pinpoint the modalities it has embraced (e.g., films, TV shows, music, books, and TikTok videos, etc.), highlight topical areas it has addressed, and assess its effectiveness cross-culturally. MFJS 4660 will culminate in the production of student Edutainment projects that tackle global issues of concern.

**MFJS 4912 Seminar in Media Film & Journalism Studies (1-5 Credits)****MFJS 4980 Internship (1-8 Credits)**

Arrange with internship director to complete internship with Denver-area media organization. Prerequisite: varies; consult internship director.

**MFJS 4991 Independent Study (1-10 Credits)****MFJS 4995 Thesis/Substantial Research Paper (1-8 Credits)****Courses****MFJS 4001 Producing Video for Social Media and Advocacy (4 Credits)**

This course covers the basics in video production and video storytelling for social media and is open to all graduate students at the University of Denver who are interested in YouTube and other social media video content creation for advocacy, education, and support of social movements. Students will maximize their video storytelling abilities, producing storytelling content that can be shared across multiple social media platforms using mobile phones or equivalent basic consumer equipment. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills elective requirements within MEPC and IIC graduate programs and serves as a university graduate level elective.

**MFJS 4050 Foundations of Strategic Communication (4 Credits)**

Focuses on understanding and implementing public communication campaigns. Central to the course is the exploration of the theoretical social science framework underlying communication campaigns and examination of the ways theories are used to define and explain communication problems and to plan and evaluate campaigns.

**MFJS 4055 Media and Cultural Studies (4 Credits)**

This class surveys key ideas and authors in the interdisciplinary field of cultural studies with a focus on their contributions to the study of media and communication. Some theoretical concepts to be discussed include: representation, identity, cultural production, ideology, hegemony, intersectionality, and power as these relate to the analysis of media institutions, technologies, cultures, audiences/users, texts, and artifacts. Students will develop an understanding of cultural studies as a theoretical, methodological, and political project, devoted to social critique and transformative praxis.

**MFJS 4060 Strategic Messaging (4 Credits)**

Continues the focus on learning and applying public relations techniques, emphasizing media relations and media writing. Students develop the ability to formulate and evaluate appropriate communication objectives, strategies, and tactics in response to real-world public relations problems, paying attention to ethical considerations. Students produce a portfolio of written public relations materials. Prerequisite MFJS 4050 or instructor permission.

**MFJS 4065 Public Diplomacy and Nation Branding (4 Credits)**

Drawing on research from strategic communication, cultural studies, international relations, and marketing, this interdisciplinary course examines how nation-states strive to manage their reputations and increase their influence in the context of globalization and mediatization. Students will learn about the evolution of public diplomacy and nation branding from the Cold War to present day and will discuss current developments and challenges. The course will introduce several theoretical approaches and will use a variety of case studies to help students gain insights into public diplomacy and nation branding as fields of research and of practice. Instructor approval required for all non-MEPC and IIC students.

**MFJS 4070 Seminar in Strategic Communication (4 Credits)**

Through a combination of course readings, case study analyses and guest speakers, students will observe and learn about the practice of public relations in the health and nonprofit sectors. Students will also learn about the goals, challenges and opportunities specific to these sectors. Prerequisite: MCOM/MFJS 4060 or permission of instructor.

**MFJS 4080 Global/Multicultural Campaigns (4 Credits)**

Explores aspects of international and intercultural public relations, including intercultural communications issues, international media issues, international corporate PR, cross-cultural and diversity training, international media relations, and international public relations of governments. The class focuses on relevant theories and issues, rather than on techniques.

**MFJS 4160 Media Theories (4 Credits)**

Surveys a number of theoretical approaches to the study of media and mass communication, paying attention to the historical context in which they arise. Students explore the relationships among media technologies, institutions, content, and audiences as well as their impacts on culture and society. The class prepares students to formulate theoretically grounded research questions within the field of media and mass communication.

**MFJS 4165 Global Health and Development Communication (4 Credits)**

This course will begin with an overview of health communication (which includes but is not limited to health promotion and behavior change). We will discuss individual, social, cultural & technological factors, and relevant theories and concepts in relation to international health communication and development. Students will then learn about the role of communication in international health and development and the way it is practiced in the field. We will also discuss and apply the social and cultural factors that influence the design, delivery, reception, and effectiveness of international health communication programs, the role of international health's important players big and small (e.g. WHO, UNAID, PEPFAR, Doctors without Borders, pharmaceutical companies, local village leaders, local ministries of health, husbands, mothers, etc.), and the ways in which the use of both upstream and downstream communication is imperative. We will examine case studies and the latest research for international health communication and its effectiveness while we also apply health communication theories from a variety of perspectives.

**MFJS 4175 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)**

The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. There are three central learning objectives that will guide us through the course: (1) we will practice ethnographic and documentary methodology, (2) learn to write for radio, and (3) learn the workflow of audio editing to produce an audio documentary.

**MFJS 4560 Audience and Communication Research (4 Credits)**

This class offers an introduction to social science methods applied to communication and audience research. By the end of the course, students will be familiar with: the role and functions of communication and audience research in contemporary society; the processes and practices involved in developing and executing a research project; the basic different forms of research, both qualitative, such as interviews and focus groups and quantitative, such as surveys and experiments; how to use research skills for different career paths. Cross-listed with MFJS 3110/4560.

**MFJS 4567 Activist Media (4 Credits)**

In the mediated digital era, communication is changing fast and shifting the dynamics of real-world power, expanding spaces for journalism and activist communication aimed at working for social change and social justice. This dynamic space has enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for activism and social change. Media has played a key role in social and political movements of the past and more recent online movements. Social media platforms have provided new tools to resist the domination and limitations of mainstream corporate media and create new media strategies and messages to promote social change. But these platforms have also created new risks and challenges for activists. In this course, we will address these issues of communication power dynamics and also media strategies and tools of social and political movements working towards social change.

**MFJS 4650 Global Media and Communication (4 Credits)**

Major theories concerning international communication flows, the impact of globalization and global media, issues of new communication technologies, the rhetoric and media framing of global politics and culture; international marketing and public relations; and national and cultural sovereignty issues related to communication.

**MFJS 4652 Feminist Media Studies (4 Credits)**

MFJS 4652 (Feminist Media Studies) explores the gendered intersections between media and society through the analytical lens of Feminist Media Studies (FMS). While aligned with the discipline Media Studies, FMS centers questions related to power and patriarchy, and aims to create space for praxis. Paying close attention to issues of intersectionality, this course surveys the historical emergence, and contributions, of feminist methodology and inquiry related to issues such as sexism within gaming, the politics of visibility in television production, the celluloid ceiling, and networked bodies. During the quarter, you will engage in multiple points of active and reflective learning that provide the space to strengthen both your understanding and application of FMS. Assignments include discussion questions, self-reflective analysis, and a final project that highlights application, creativity, and subversion. Cross listed with MFJS 3652.

**MFJS 4653 Language, Power, and Globalization (4 Credits)**

This course focuses on scholarly and political debates surrounding the social nature of language, language and (inter)national and individual identity, language policy, multilingualism and linguistic diversity, language and globalization, language and media and communication technologies, and, finally, the future of the global language landscape.

**MFJS 4654 Intercultural Communication (4 Credits)**

This course focuses on the intersections between culture & communication, including intercultural communication in interpersonal and mediated contexts at the local, national and global levels as shaped by processes of globalization. It covers major theoretical perspectives and methods, the role of power and privilege in the construction and articulation of culture and cultural identity, and intersections with race, ethnicity, gender, sexuality and class, intercultural training and the role of communication and culture in conflict and conflict resolution.

**MFJS 4655 JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling (4 Credits)**

This course focuses on multicultural approaches to journalism and media, including representations and news coverage related to gender, race/ethnicity, class, and sexuality, disabilities, religion, and nationality, etc.. The class explores culture and intercultural communication and ways to apply these to journalistic writing as a creative process and craft. Prerequisite: Prior journalistic coursework or its equivalent (including writing experience). Cross-listed with MFJS 3655.

**MFJS 4656 Cross-Cultural Travel Seminar: Immigration, Communication, and Border Cultures (4 Credits)**

This is a one-week intensive travel course that takes place in Tucson, Arizona and south to the US-Mexican border region. The focus of this experiential learning class is to study immigration issues, border cultures, and the role of communication and media through testimonies of immigrants, and visits to key sites such as the migrant trail, immigration detention center and courts. Also included are talks by activists and officials involved in the immigration debate. Class meets for two pre-class sessions in spring quarter. Cross-listed with MFJS 3656.

**MFJS 4660 Global Edutainment & Narrative Persuasion (4 Credits)**

MFJS 4660 Global Edutainment & Narrative Persuasion serves as a gateway to explore the potential of entertainment as an educational tool that can spread awareness, change attitudes, and/or influence behaviors. In this course, students will trace the history of narrative persuasion strategy, pinpoint the modalities it has embraced (e.g., films, TV shows, music, books, and TikTok videos, etc.), highlight topical areas it has addressed, and assess its effectiveness cross-culturally. MFJS 4660 will culminate in the production of student Edutainment projects that tackle global issues of concern.

**MFJS 4912 Seminar in Media Film & Journalism Studies (1-5 Credits)****MFJS 4980 Internship (1-8 Credits)**

Arrange with internship director to complete internship with Denver-area media organization. Prerequisite: varies; consult internship director.

**MFJS 4991 Independent Study (1-10 Credits)****MFJS 4995 Thesis/Substantial Research Paper (1-8 Credits)**

## Philosophy

Office: Sturm Hall, Room 257

Mail Code: Sturm Hall, Room 257, 2000 E. Asbury, Denver, CO 80208

Phone: 303-871-2063

Email: [philosophy@du.edu](mailto:philosophy@du.edu)

Web Site: <https://liberalarts.du.edu/philosophy> (<https://liberalarts.du.edu/philosophy/>)

### Master of Arts in Philosophy

The department of philosophy at the University of Denver offers an MA in philosophy, but only when done through the university's flexible dual-degree program in conjunction with an MA in another approved discipline. The philosophy faculty places a strong emphasis on research and personal interaction with students. Our program is designed to meet the needs of two kinds of students — those wishing to prepare for doctoral work in philosophy and those seeking an individualized course of study with a more interdisciplinary focus.

#### Flexible Dual-Degree Program in Philosophy

Students must already have been both admitted and deposited for the master's degree program in another approved DU master's program \*before\* applying to the MA in Philosophy.

#### Proposal Process for Flexible Dual-Degree Program

After formal admission into both programs, the dean, chair, or director of each degree program and both program advisors, must carefully compare the requirements for each program and approve the proposal. The student must then submit a copy of the original requirements for each degree (printout from the unit Web site or copy from the student handbook is acceptable), and the flexible dual-degree proposal to the Office of Graduate Education. The philosophy department will provide a coursework template for the student to include with his or her proposal. The student then submits the documents listed above to the Office of Graduate Education, which reviews and decides on the proposals.

### Master of Arts in Philosophy

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### Prerequisites

- Students must already have been admitted and deposited for the master's degree program in another approved DU master's program before applying to the MA in Philosophy. An undergraduate degree in philosophy is desirable, but talented students from other areas will be considered for admission.

#### Standardized Test Scores

- GRE scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials. If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

### Other Required Materials

- Students are not eligible to apply for the MA in Philosophy until they have been admitted and deposited for their first MA program at DU. To propose a flexible dual-degree, the student must seek the counsel of an adviser in the philosophy department.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Arts in Philosophy

### Degree Requirements

#### Coursework Requirements

45 credit hours in philosophy (students may propose to have this amount reduced by a maximum of 10 credit hours under appropriate circumstances as specified by the flexible dual-degree guidelines). Because philosophy is part of a flexible dual degree program, these hours are required in addition to the required hours in another approved discipline. Courses graded below a C– cannot be counted for a flexible dual degree.

Code	Title	Credits
PHIL 3XXX, 4XXX, or 5XXX courses		45
<b>Total Credits</b>		<b>45</b>

#### Non-Coursework Requirements

- A comprehensive exam
- A portfolio paper approved by a committee of department faculty
- An oral defense covering both the comprehensive exam and the portfolio paper

#### PHIL 3000 Plato's Metaphysics (4 Credits)

A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

#### PHIL 3003 Plato's Theory of Knowledge (4 Credits)

A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

#### PHIL 3005 Cosmopolitics (4 Credits)

This class will be a close reading of Plato's dialogue Timaeus, with a special focus on the cosmological, theological, and political dimensions of the text.

#### PHIL 3010 Great Thinkers: Aristotle (4 Credits)

A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

#### PHIL 3011 Great Thinkers: Virginia Woolf (4 Credits)

In this course we will read Virginia Woolf as a philosopher. We will discuss her philosophy of nature, knowledge, art, politics, science, sensation, gender, and materialism throughout her fiction and non-fiction writings.

#### PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**PHIL 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and RLGS 3024. Prerequisite: Junior standing or instructor's permission.

**PHIL 3026 Levinas and the Political (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting insight of "ethics as first philosophy," is a key figure in the histories of phenomenology, metaphysics, and theology. In this class, we examine the implications of Levinas' thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as "Reflections on the Philosophy of Hitlerism" (1934), *Totality and Infinity* (1961), *Otherwise Than Being or Beyond Essence* (1974), and "Peace and Proximity" (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other "Jewish theologies" of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hospitalities and strangers, friends and enemies; liberalism, socialisms, fascisms; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporalities of covenant and justice; fraternity; forgiveness and its limits; "the 3rd"; rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

**PHIL 3050 Great Thinkers: Hume (4 Credits)**

A detailed study of Hume's "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3061 Kant's Ethics/Aesthetics/Politics (4 Credits)**

A study of Kant's "value theory" and its historical significance. Prerequisite: junior standing or instructor's permission.

**PHIL 3062 Kant's Epistemology and Logic (4 Credits)**

A study of Kant's theory of knowledge, logic and related issues. Prerequisite: junior standing or instructor's permission.

**PHIL 3063 Kant on Religion (4 Credits)**

A study of Immanuel Kant's major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor's permission. Cross-listed with RLGS 3456.

**PHIL 3070 Great Thinkers: Hegel (4 Credits)**

Hegel's "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Cross listed with ECON 3075.

**PHIL 3090 Great Thinkers: Heidegger (4 Credits)**

Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor's permission.

**PHIL 3092 Great Thinkers: The Later Heidegger (4 Credits)**

Study of the works of Heidegger after 1930. Prerequisite: junior standing or instructor's permission.

**PHIL 3100 Great Thinkers: Wittgenstein (4 Credits)**

The course introduces students to Ludwig Wittgenstein's two masterworks, the *Tractatus* (1922) and *Philosophical Investigations* (1953), both of which provide fresh, often counterintuitive and conflicting, insights into topics ranging from logic and language to ethics, religion, art and culture. The course explores how the end of the Austro-Hungarian Empire and the pressures of an incipient modernity impacted the style, direction and substance of Wittgenstein's thought, developments that had profound existential and spiritual import for him as he wrestled with the many contradictions of his life and thought. The course concludes with a consideration of the relationship between Wittgenstein's later philosophy and the existential-phenomenology of Martin Heidegger, both of whom insist upon humanity's radical finitude and the pre-ontological understanding (forms of life) that always already conditions and guides our questions about reason, truth, beauty and meaning.

**PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)**

Each year, the philosophy department offers at least two courses in great thinkers. Specific figures may vary from year to year. Cross-listed with RLGS 3102. Prerequisite: 10 hours of Philosophy at the 2000 level or permission of instructor.

**PHIL 3120 Metaphysics (4 Credits)**

In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

**PHIL 3130 Knowledge Problems (4 Credits)**

Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

**PHIL 3146 Great Thinkers: Levinas (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, *Ethics and Infinity* and *Otherwise Than Being or Beyond Essence*, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with JUST 3146.

**PHIL 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)**

Neoplatonism is a unique genre—somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we will investigate a host of philosophical writings, including the *Theology of Aristotle* and the *Liber de Causis*, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Acemenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection and the call to virtue. Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3152.

**PHIL 3175 Morality and the Law (4 Credits)**

A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

**PHIL 3178 Metaethics (4 Credits)**

This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency, or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn't the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

**PHIL 3179 Virtue Ethics (4 Credits)**

Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

**PHIL 3185 Philosophy of Action and Agency (4 Credits)**

Wittgenstein once asked, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Understanding the difference between mere happening and an intentional action became central to the philosophical investigation of action and agency in the 20th century. In this course we examine this distinction and why it should matter to us. Our topics include intentional action, the causal theory of action, the metaphysics of action, agent causation, basic action, acting and trying to act, intentions, weakness of will, strength of will, and mental action. Requires junior standing or permission of instructor.

**PHIL 3201 Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge (4 Credits)**

A study of Wittgenstein, Quine, and Kripke on the nature of necessity, a priori knowledge and their relation to understanding philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3210 Philosophy of Movement (4 Credits)**

Everything is in motion. Yet, philosophers have consistently considered motion to be a derivative or secondary form of being. Why? What are the political and metaphysical consequences of marginalizing motion in the history of philosophy? The aim of this class is to read the history of philosophy with a unique focus on the status of movement and motion from the ancient to contemporary period.

**PHIL 3211 Contemporary Pol Philosophy (4 Credits)**

This class focuses primarily on the philosophical problems generated by thinking about political authority and justice. We discuss the nature of political authority, justice, rights, equality and the role of property in a modern state.

**PHIL 3215 Modern Jewish Philosophy (4 Credits)**

Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3215.

**PHIL 3333 Logic, Language, and Metaphysics (4 Credits)**

This course provides a systematic exploration of the foundations of contemporary philosophy—namely, logic and language—and their metaphysical implications. The class can be divided in three broad modules. Our starting point is the collapse of Kant's system due to staggering discoveries in physics and geometry. Next, we shall discuss the subsequent development of mathematical logic and the philosophy of language in the work of Frege, Russell, Tarski, and Gödel. The last portion is devoted to philosophical applications of these logical results in the field of metaphysics. Specifically, we shall explore the work of Carnap, Quine, and Kripke. Junior or senior standing required (or instructor permission).

**PHIL 3445 Cultural Theory and Critique (4 Credits)**

This course will provide an overview of the major theories of culture and cultural critique, as well as a consideration of some of the major controversies and recent developments in this field. It will proceed roughly chronologically, beginning with liberal humanist critique and continuing with hermeneutics, materialist and Marxist critique, psychoanalysis, the Frankfurt School, structuralism, post-structuralism, and contemporary British cultural studies. It will also consider more recent developments, such as feminist critique, GLBT critique, and postcolonialism. While the approach will be mainly philosophical, implications for other areas such as literature, art, emergent media, religion, and politics will also figure in the discussions, so it is appropriate for students in many fields, not just philosophy. Prerequisite: Junior standing or permission of the instructor. Note that this course will serve as a foundational offering for students interested in participating in the Critical Theory specialization.

**PHIL 3446 Philosophy in the American Tradition (4 Credits)**

The course introduces students to the thought of the three premier American Transcendentalist writers: Ralph Waldo Emerson, Margaret Fuller, and Henry David Thoreau. These three writers—by turns friends, rivals, neighbors, and even housemates in nearby Concord, Massachusetts—created what Emerson called “a poetry and philosophy of insight and not of tradition” and laid the foundations for American philosophy and literature as we know it today. They also led the first countercultural movement in American history, advocating causes as varied as environmentalism, abolitionism, women’s rights, and the “higher law” of the individual conscience in an age of unbridled capitalism and populism. We will consider the Transcendentalists as both writers and reformers, examining their calls for a uniquely American literature and their romantic sacralization of nature as well as their deep commitment to reform and their engagement with the turbulent politics of their time. In the final weeks of the course, we will explore the Transcendentalists’ profound influence on American cultural history, ranging from their contemporaries (Frederick Douglass, Walt Whitman, Emily Dickinson, and Nathaniel Hawthorne) to ours (Marilynne Robinson, Terrence Malick, and W. S. Merwin).

**PHIL 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault’s thesis with reference to different theoretical models of subjectivity and “subjectification” (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault’s 1981-82 lectures entitled *The Hermeneutics of the Subject*. This course is cross-listed with RLGS 3448.

**PHIL 3450 Phenomenology and Theology (4 Credits)**

Cross listed with RLGS 3455. Prerequisite: junior standing or instructor’s permission.

**PHIL 3460 Nietzsche & the Death of God (4 Credits)**

This course involves an intensive reading and discussion of Friedrich Nietzsche’s ‘Thus Spake Zarathustra,’ together with relevant associated materials, especially ‘The Gay Science.’ Prerequisite: junior standing or instructor’s permission. Cross listed with RLGS 3460.

**PHIL 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with RLGS 3465. Prerequisite: junior standing or instructor’s permission.

**PHIL 3466 Contemporary Continental Philosophy (4 Credits)**

A critical study of current trends in European philosophy, focusing on such thinkers as Deleuze, Badiou, Žižek, Meillassoux, or Laruelle. Prerequisite: junior standing or instructor’s permission.

**PHIL 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PSYC 3610. Prerequisites: PSYC 1001 and junior standing (or instructor approval).

**PHIL 3611 The Boundaries of Scientific Knowledge: A Philosophical Exploration (4 Credits)**

Despite its staggering successes, public trust in science is disquietingly low. What has gone wrong? Why is a substantive portion of the population unwilling to trust the advice of specialists? A central problem lies in the tendency of scientists, philosophers, and various pundits to hype, bloat, and overemphasize the promises and results of scientific research. This leads to scientism, broadly conceived as the imperialist tendency to reduce all knowledge to scientific knowledge. But what exactly is scientism? Despite the pejorative connotation of the term, is it an intellectual sin or a virtue? The aim of this course is to map the terrain, exploring various dimensions of scientism, and how it affects the public dimensions of scientific research and its relation to the humanities, religion, and other domains of knowledge, culture, and society.

**PHIL 3612 AI and Robotics (4 Credits)**

In this interdisciplinary seminar we will discuss foundational issues regarding artificially intelligent systems. We will seek to understand how recent advances in AI research bear on our understanding of the nature of the mind, intelligence, agency, rationality, and consciousness. We will also discuss how philosophical advances can advance empirical progress. Additionally, we will discuss some barriers to progress that these technologies might pose. In particular, we will be focused on three groups of questions: 1. What special opportunities and challenges are presented by deep neural net and deep learning technology regarding building and understanding artificially minded intelligent agents? 2. What is the role of the body and environment in producing intelligence? 3. Deep neural net algorithms are already commonly used to predict recidivism rates, diagnose illnesses, and make advertising more effective. In what ways might such algorithms be approaching human or animal intelligence, or shed light on such intelligence? In what ways might human and animal intelligence be importantly different? In what ways might contemporary intelligence research perpetuate injustice and oppression? This seminar is designed to be interdisciplinary, and I welcome students working in philosophy, robotics/AI, and cognitive science who want to work hard and dig deeper. There are no strict prerequisites, but some background knowledge in relevant disciplines will be highly useful.

**PHIL 3618 Philosophy of Biology (4 Credits)**

A survey of conceptual issues that lie at the intersection of biology and philosophy: the central concepts of evolutionary theory (such as natural selection, fitness, adaptation and function), the relation of biology to other "lower" sciences (can it be reduced to physics and chemistry?), whether there are genuine scientific laws in biology, and the relation between biology and other fields like cognitive science and ethics. At least Junior standing required.

**PHIL 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**PHIL 3699 Proseminar in Philosophy (4 Credits)**

Philosophy is a diverse discipline with various subfields, most of which are becoming increasingly specialized and methodologically autonomous. Specialization is often (rightly) perceived as an indicator of disciplinary progress and intellectual development. However, it is important that students of philosophy pursue breadth as well as depth. The goal of this course is to provide an overview of a series of seminal texts in philosophy, from a variety of subfields, epochs, and traditions. Each weekly meeting is devoted to the presentation, analysis, and discussion of a text that any student of philosophy should read at some point in her or his career. Requires junior standing or instructor's permission.

**PHIL 3700 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3701 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3702 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3703 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3704 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3991 Independent Study (1-8 Credits)****PHIL 4991 Independent Study (1-10 Credits)****PHIL 4995 Independent Research (1-10 Credits)****PHIL 5300 Philosophy Colloquium (4 Credits)****PHIL 5400 Cultural Theory Colloquium (1-5 Credits)****Courses****PHIL 3000 Plato's Metaphysics (4 Credits)**

A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

**PHIL 3003 Plato's Theory of Knowledge (4 Credits)**

A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

**PHIL 3005 Cosmopolitics (4 Credits)**

This class will be a close reading of Plato's dialogue Timaeus, with a special focus on the cosmological, theological, and political dimensions of the text.

**PHIL 3010 Great Thinkers: Aristotle (4 Credits)**

A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

**PHIL 3011 Great Thinkers: Virginia Woolf (4 Credits)**

In this course we will read Virginia Woolf as a philosopher. We will discuss her philosophy of nature, knowledge, art, politics, science, sensation, gender, and materialism throughout her fiction and non-fiction writings.

**PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**PHIL 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and RLGS 3024. Prerequisite: Junior standing or instructor's permission.

**PHIL 3026 Levinas and the Political (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting insight of "ethics as first philosophy," is a key figure in the histories of phenomenology, metaphysics, and theology. In this class, we examine the implications of Levinas' thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as "Reflections on the Philosophy of Hitlerism" (1934), Totality and Infinity (1961), Otherwise Than Being or Beyond Essence (1974), and "Peace and Proximity" (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other "Jewish theologies" of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hospitalities and strangers, friends and enemies; liberalism, socialisms, fascisms; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporalities of covenant and justice; fraternity; forgiveness and its limits; "the 3rd"; rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

**PHIL 3050 Great Thinkers: Hume (4 Credits)**

A detailed study of Hume's "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3061 Kant's Ethics/Aesthetics/Politics (4 Credits)**

A study of Kant's "value theory" and its historical significance. Prerequisite: junior standing or instructor's permission.

**PHIL 3062 Kant's Epistemology and Logic (4 Credits)**

A study of Kant's theory of knowledge, logic and related issues. Prerequisite: junior standing or instructor's permission.

**PHIL 3063 Kant on Religion (4 Credits)**

A study of Immanuel Kant's major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor's permission. Cross-listed with RLGS 3456.

**PHIL 3070 Great Thinkers: Hegel (4 Credits)**

Hegel's "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Cross listed with ECON 3075.

**PHIL 3090 Great Thinkers: Heidegger (4 Credits)**

Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor's permission.

**PHIL 3092 Great Thinkers: The Later Heidegger (4 Credits)**

Study of the works of Heidegger after 1930. Prerequisite: junior standing or instructor's permission.

**PHIL 3100 Great Thinkers: Wittgenstein (4 Credits)**

The course introduces students to Ludwig Wittgenstein's two masterworks, the Tractatus (1922) and Philosophical Investigations (1953), both of which provide fresh, often counterintuitive and conflicting, insights into topics ranging from logic and language to ethics, religion, art and culture. The course explores how the end of the Austro-Hungarian Empire and the pressures of an incipient modernity impacted the style, direction and substance of Wittgenstein's thought, developments that had profound existential and spiritual import for him as he wrestled with the many contradictions of his life and thought. The course concludes with a consideration of the relationship between Wittgenstein's later philosophy and the existential-phenomenology of Martin Heidegger, both of whom insist upon humanity's radical finitude and the pre-ontological understanding (forms of life) that always already conditions and guides our questions about reason, truth, beauty and meaning.

**PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)**

Each year, the philosophy department offers at least two courses in great thinkers. Specific figures may vary from year to year. Cross-listed with RLGS 3102. Prerequisite: 10 hours of Philosophy at the 2000 level or permission of instructor.

**PHIL 3120 Metaphysics (4 Credits)**

In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

**PHIL 3130 Knowledge Problems (4 Credits)**

Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

**PHIL 3146 Great Thinkers: Levinas (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, *Ethics and Infinity* and *Otherwise Than Being or Beyond Essence*, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with JUST 3146.

**PHIL 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)**

Neoplatonism is a unique genre—somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we will investigate a host of philosophical writings, including the *Theology of Aristotle* and the *Liber de Causis*, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Acemenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection and the call to virtue. Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3152.

**PHIL 3175 Morality and the Law (4 Credits)**

A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

**PHIL 3178 Metaethics (4 Credits)**

This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency, or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn't the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

**PHIL 3179 Virtue Ethics (4 Credits)**

Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

**PHIL 3185 Philosophy of Action and Agency (4 Credits)**

Wittgenstein once asked, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Understanding the difference between mere happening and an intentional action became central to the philosophical investigation of action and agency in the 20th century. In this course we examine this distinction and why it should matter to us. Our topics include intentional action, the causal theory of action, the metaphysics of action, agent causation, basic action, acting and trying to act, intentions, weakness of will, strength of will, and mental action. Requires junior standing or permission of instructor.

**PHIL 3201 Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge (4 Credits)**

A study of Wittgenstein, Quine, and Kripke on the nature of necessity, a priori knowledge and their relation to understanding philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3210 Philosophy of Movement (4 Credits)**

Everything is in motion. Yet, philosophers have consistently considered motion to be a derivative or secondary form of being. Why? What are the political and metaphysical consequences of marginalizing motion in the history of philosophy? The aim of this class is to read the history of philosophy with a unique focus on the status of movement and motion from the ancient to contemporary period.

**PHIL 3211 Contemporary Pol Philosophy (4 Credits)**

This class focuses primarily on the philosophical problems generated by thinking about political authority and justice. We discuss the nature of political authority, justice, rights, equality and the role of property in a modern state.

**PHIL 3215 Modern Jewish Philosophy (4 Credits)**

Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3215.

**PHIL 3333 Logic, Language, and Metaphysics (4 Credits)**

This course provides a systematic exploration of the foundations of contemporary philosophy—namely, logic and language—and their metaphysical implications. The class can be divided in three broad modules. Our starting point is the collapse of Kant's system due to staggering discoveries in physics and geometry. Next, we shall discuss the subsequent development of mathematical logic and the philosophy of language in the work of Frege, Russell, Tarski, and Gödel. The last portion is devoted to philosophical applications of these logical results in the field of metaphysics. Specifically, we shall explore the work of Carnap, Quine, and Kripke. Junior or senior standing required (or instructor permission).

**PHIL 3445 Cultural Theory and Critique (4 Credits)**

This course will provide an overview of the major theories of culture and cultural critique, as well as a consideration of some of the major controversies and recent developments in this field. It will proceed roughly chronologically, beginning with liberal humanist critique and continuing with hermeneutics, materialist and Marxist critique, psychoanalysis, the Frankfurt School, structuralism, post-structuralism, and contemporary British cultural studies. It will also consider more recent developments, such as feminist critique, GLBT critique, and postcolonialism. While the approach will be mainly philosophical, implications for other areas such as literature, art, emergent media, religion, and politics will also figure in the discussions, so it is appropriate for students in many fields, not just philosophy. Prerequisite: Junior standing or permission of the instructor. Note that this course will serve as a foundational offering for students interested in participating in the Critical Theory specialization.

**PHIL 3446 Philosophy in the American Tradition (4 Credits)**

The course introduces students to the thought of the three premier American Transcendentalist writers: Ralph Waldo Emerson, Margaret Fuller, and Henry David Thoreau. These three writers—by turns friends, rivals, neighbors, and even housemates in nearby Concord, Massachusetts—created what Emerson called “a poetry and philosophy of insight and not of tradition” and laid the foundations for American philosophy and literature as we know it today. They also led the first countercultural movement in American history, advocating causes as varied as environmentalism, abolitionism, women's rights, and the “higher law” of the individual conscience in an age of unbridled capitalism and populism. We will consider the Transcendentalists as both writers and reformers, examining their calls for a uniquely American literature and their romantic sacralization of nature as well as their deep commitment to reform and their engagement with the turbulent politics of their time. In the final weeks of the course, we will explore the Transcendentalists' profound influence on American cultural history, ranging from their contemporaries (Frederick Douglass, Walt Whitman, Emily Dickinson, and Nathaniel Hawthorne) to ours (Marilynne Robinson, Terrence Malick, and W. S. Merwin).

**PHIL 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and “subjectification” (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled *The Hermeneutics of the Subject*. This course is cross-listed with RLGS 3448.

**PHIL 3450 Phenomenology and Theology (4 Credits)**

Cross listed with RLGS 3455. Prerequisite: junior standing or instructor's permission.

**PHIL 3460 Nietzsche & the Death of God (4 Credits)**

This course involves an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Prerequisite: junior standing or instructor's permission. Cross listed with RLGS 3460.

**PHIL 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with RLGS 3465. Prerequisite: junior standing or instructor's permission.

**PHIL 3466 Contemporary Continental Philosophy (4 Credits)**

A critical study of current trends in European philosophy, focusing on such thinkers as Deleuze, Badiou, Žižek, Meillassoux, or Laruelle. Prerequisite: junior standing or instructor's permission.

**PHIL 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PSYC 3610. Prerequisites: PSYC 1001 and junior standing (or instructor approval).

**PHIL 3611 The Boundaries of Scientific Knowledge: A Philosophical Exploration (4 Credits)**

Despite its staggering successes, public trust in science is disquietingly low. What has gone wrong? Why is a substantive portion of the population unwilling to trust the advice of specialists? A central problem lies in the tendency of scientists, philosophers, and various pundits to hype, bloat, and overemphasize the promises and results of scientific research. This leads to scientism, broadly conceived as the imperialist tendency to reduce all knowledge to scientific knowledge. But what exactly is scientism? Despite the pejorative connotation of the term, is it an intellectual sin or a virtue? The aim of this course is to map the terrain, exploring various dimensions of scientism, and how it affects the public dimensions of scientific research and its relation to the humanities, religion, and other domains of knowledge, culture, and society.

**PHIL 3612 AI and Robotics (4 Credits)**

In this interdisciplinary seminar we will discuss foundational issues regarding artificially intelligent systems. We will seek to understand how recent advances in AI research bear on our understanding of the nature of the mind, intelligence, agency, rationality, and consciousness. We will also discuss how philosophical advances can advance empirical progress. Additionally, we will discuss some barriers to progress that these technologies might pose. In particular, we will be focused on three groups of questions: 1. What special opportunities and challenges are presented by deep neural net and deep learning technology regarding building and understanding artificially minded intelligent agents? 2. What is the role of the body and environment in producing intelligence? 3. Deep neural net algorithms are already commonly used to predict recidivism rates, diagnose illnesses, and make advertising more effective. In what ways might such algorithms be approaching human or animal intelligence, or shed light on such intelligence? In what ways might human and animal intelligence be importantly different? In what ways might contemporary intelligence research perpetuate injustice and oppression? This seminar is designed to be interdisciplinary, and I welcome students working in philosophy, robotics/AI, and cognitive science who want to work hard and dig deeper. There are no strict prerequisites, but some background knowledge in relevant disciplines will be highly useful.

**PHIL 3618 Philosophy of Biology (4 Credits)**

A survey of conceptual issues that lie at the intersection of biology and philosophy: the central concepts of evolutionary theory (such as natural selection, fitness, adaptation and function), the relation of biology to other "lower" sciences (can it be reduced to physics and chemistry?), whether there are genuine scientific laws in biology, and the relation between biology and other fields like cognitive science and ethics. At least Junior standing required.

**PHIL 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**PHIL 3699 Proseminar in Philosophy (4 Credits)**

Philosophy is a diverse discipline with various subfields, most of which are becoming increasingly specialized and methodologically autonomous. Specialization is often (rightly) perceived as an indicator of disciplinary progress and intellectual development. However, it is important that students of philosophy pursue breadth as well as depth. The goal of this course is to provide an overview of a series of seminal texts in philosophy, from a variety of subfields, epochs, and traditions. Each weekly meeting is devoted to the presentation, analysis, and discussion of a text that any student of philosophy should read at some point in her or his career. Requires junior standing or instructor's permission.

**PHIL 3700 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3701 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3702 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3703 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3704 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3991 Independent Study (1-8 Credits)****PHIL 4991 Independent Study (1-10 Credits)****PHIL 4995 Independent Research (1-10 Credits)****PHIL 5300 Philosophy Colloquium (4 Credits)****PHIL 5400 Cultural Theory Colloquium (1-5 Credits)**

# Psychology

Office: Frontier Hall

Mail Code: 2155 S. Race St., Denver, CO 80208

Phone: 303-871-2478

Email:

Web Site: [www.du.edu/psychology](http://www.du.edu/psychology) (<http://www.du.edu/psychology/>)

The Psychology PhD programs in the department of psychology are oriented toward training qualified students to pursue careers in research, teaching, and professional practice. PhD programs include: Experimental Psychology with a concentration in Affect, Social and Cognitive Psychology, Clinical Psychology with a child emphasis, and Developmental and Child Psychology. We also offer a specialization in Developmental Cognitive Neuroscience (DCN).

### **Doctor of Philosophy in Experimental Psychology with a Concentration in Affect, Social and Cognitive Psychology**

The ASC PhD program will prepare you for research and teaching careers in affective science, social or cognitive psychology. You will work closely with faculty and fellow students in labs using psychophysiological measurement, social cognition paradigms, behavioral measures and neuroscience tools such as fMRI. As a student in the ASC program, you will choose an emphasis: Affect, Social, or Cognitive Psychology. Depending on your emphasis area, there are slight variations in how requirements are completed.

### **Doctor of Philosophy in Clinical (Child emphasis) Psychology**

The graduate program in Clinical Psychology focuses on the etiology, treatment and prevention psychopathology with an emphasis on the childhood and adolescent developmental periods.

### **Doctor of Philosophy in Developmental and Child Psychology**

The graduate program in Developmental Psychology focuses on human developmental processes—including biological, cultural, social and psychophysiological factors.

#### **Developmental Cognitive Neuroscience**

The specialization in Developmental Cognitive Neuroscience is open to students in any of the graduate programs in Psychology. It is designed to equip students with advanced knowledge and training in an interdisciplinary approach to neuroscience and psychology. The coursework covers diverse fields and research methods including neuroimaging, computational modeling, eye-tracking, psychophysiology, neuropsychology, neuroendocrinology, and behavioral genetics. The program prepares students to be leaders in collaborative science approaches.

### **Doctor of Philosophy in Psychology with a Concentration in Affective, Social & Cognitive Psychology**

#### **Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### **Standardized Test Scores**

- GRE scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials. If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admissions to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

#### **English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80 (including a minimum of 26 on the speaking section)
- Minimum IELTS Score: 6.5 (including a minimum of 8 on the speaking section)
- Minimum C1 Advanced Score: 176 (including a minimum of 200 on the speaking section)
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctoral Programs Starting 2024

### Doctor of Philosophy in Clinical Psychology (Child Emphasis)

#### Coursework Requirements

Students earn a master's degree on their way toward obtaining the PhD; however, students are not required to obtain an official master's degree. All students are required to fulfill the requirements for the master's degree, regardless of whether or not they apply for graduation for an official master's degree. Completion of master's degree requirements is required in order to be advanced to preliminary doctoral candidacy.

## Degree requirements

Minimum number of credits required for the degree: 120

### Course requirements

Code	Title	Credits
<b>I. Master's degree requirements</b>		
The Department requires completion of the master's degree requirements as part of the Ph.D. program. To earn an official master's degree, complete at least 28 credits of the 45 minimum number of credits in content coursework which excludes Independent Study and Independent Research credits.		
Total credits for master's degree - 45		
<b>II. PhD requirements</b>		
<b>Statistics requirement</b>		<b>8</b>
PSYC 4295	Research Design & Inference

PSYC 4571	Multicult Issues & Ment Health	
Clinical Assessment		<b>8</b>
PSYC 4411	Assessment-Cognition	
PSYC 4413	Assessment-Psychopathology (Social, Emotional, and Behavioral)	
Advanced Clinical		<b>8</b>
Advanced clinical requirement: Two advanced clinical courses from the options below (one course must be an intervention course). Choose from the following options:		
PSYC 4085	Stress & Health	
PSYC 4688	Clinical Psychopharmacology	

PSYC 4566	Systems of Psychotherapy II	
PSYC 4620	Advan in Couples Intervention	
PSYC 4625	Marital/Couples Thrpy-Div Popl	
PSYC 4518	Readings in Family Therapy	
Tool Requirement		8
Electives		44
Additional courses at DU, no more than 8 credits outside PSYC department, minimum 56 credit hours total must be content courses, to minimum of 120 credit hours		
<b>Total Credits</b>		<b>120</b>

#### Non-coursework Requirements

- Master's research paper or thesis and oral defense
- Dissertation Prospectus and Prospectus Meeting
- Dissertation and Oral Defense
- Profession Wide Competencies
- Technical Standards
- Clinical Training
  - Clinical Practicum
  - Successful Completion of an Externship
  - Successful Completion of an APA approved internship

### Specialization: Developmental Cognitive Neuroscience Requirements

The following requirements for the DCN specialization are in addition to the student's area requirements. The DCN specializations affects how students meet core and tool requirements. DCN students in each of the three majors/areas of the department have additional core requirements. DCN also affects advanced clinical requirements for clinical DCN students and elective requirements for non-clinical DCN students (see below). The neuroscience methods courses listed below which fulfill the DCN tool requirement are also sufficient to fulfill their area's tool requirement.

Any entering student who wishes to specialize in DCN must demonstrate competency in basic neurobiology (e.g., have taken an undergraduate class in biological psychology, neuroanatomy, psychophysiology, etc.). If not, they must take Introduction to Neurobiology offered by the department of Biological Sciences.

Students must take four of the following required core courses (any four):

PSYC 4002	Prosem in Memory and Cognition	
PSYC 4033	Devel Proseminar: Biological	
PSYC 4045	Proseminar in Human Brain Development	
PSYC 4262	Affective Neuroscience	
PSYC 4526	Prosem in Cog Neuroscience	
PSYC 4660	Perception: A Cognitive Neuroscience Approach	

DCN students must also take two of the following tool/methods courses, or have an equivalent approved by the DCN area head:

PSYC 4085	Stress & Health	4
PSYC 4255	Imaging the Mind	4
PSYC 4360	Programming Psychology: Experiment Building with Python	4
PSYC 4365	Programming Psychology: Model-Fitting and Analysis	4
PSYC 4525	Prosem in Develop Neuropsych	4
PSYC 4665	Executive Functioning	4
PSYC 4688	Clinical Psychopharmacology	4

## Doctor of Philosophy in Developmental and Child Psychology

### Coursework Requirements

Students earn a master's degree on their way toward obtaining the PhD; however, students are not required to obtain an official master's degree. All students are required to fulfill the requirements for the master's degree, regardless of whether or not they apply for graduation for an official master's degree. Completion of master's degree requirements is required in order to be advanced to preliminary doctoral candidacy.

#### I. Master's degree requirements

The Department requires completion of the Master's degree requirements as part of the Ph.D. program. To earn an official master's degree, complete at least 28 credits of the 45 minimum number of credits in content coursework which excludes Independent Study and Independent Research credits.

Total credits for master's degree 45

Code	Title	Credits
<b>I. Master's degree requirements</b>		
The Department requires completion of the master's degree requirements as part of the Ph.D. program. To earn an official master's degree, complete at least 28 credits of the 45 minimum number of credits in content coursework which excludes Independent Study and Independent Research credits.

- Dissertation and Oral Defense

## Specialization: Developmental Cognitive Neuroscience Requirements

The following requirements for the DCN program are in addition to the student's area requirements. The DCN specialization affects how students meet Core and Tool requirements. DCN students in each of the three Areas of the Department have additional Core requirements listed below. It also affects Advanced Clinical requirements for Clinical DCN students and elective requirements for non-clinical DCN Students (see below). The Neuroscience methods courses listed fulfill the student's Tool Requirement; students are not required to fulfill their area's Tool requirements.

Any entering student in DCN must demonstrate competency in basic neurobiology (i.e. have taken an undergraduate class in physiological psychology, basic neurobiology, etc.). Otherwise, they need to take Introduction to Neurobiology in the Biology Department.

### Coursework requirements

Code	Title	Credits
Four required Core Courses (any 4)		
PSYC 4002	Prosem in Memory and Cognition	4
PSYC 4033	Devel Proseminar: Biological	4
PSYC 4045	Proseminar in Human Brain Development	4
PSYC 4262	Affective Neuroscience	4
PSYC 4526	Prosem in Cog Neuroscience	4
PSYC 4660	Perception: A Cognitive Neuroscience Approach	4
Two of the following tool/method courses:		
PSYC 4085	Stress & Health	4
PSYC 4255	Imaging the Mind	4
PSYC 4254	Intro to Neural Network Models	4
PSYC 4360	Programming Psychology: Experiment Building with Python	4
PSYC 4365	Programming Psychology: Model-Fitting and Analysis	4
PSYC 4525	Prosem in Develop Neuropsych	4
PSYC 3665	Executive Functioning	4
PSYC 4688	Clinical Psychopharmacology	4
Genetics (available at IBG at CU Boulder; check with Developmental Cognitive Neuroscience Area Head about how to enroll.)		
Build your own tool (Please see DCN Area Head for details)		

## Dual Undergraduate/Graduate Master's Program

### Master of Arts in Psychology Dual Degree with BA or BS in Psychology

Minimum of 45 credits required for the MA. 28 credits must be content courses.

Code	Title	Credits
<b>Foundations In Research Methods and Statistics</b>		
PSYC 4295	Research Design & Inference	4
PSYC 4300	Correlation and Regression	4
In addition to PSYC 4295 and PSYC 4300 you must choose one of the following Advanced Statistics Course:		
PSYC 4330	Analysis of Variance	4
PSYC 4350	Structural Equation Modeling for the Social Sciences	4
PSYC 4355	Multilevel Modeling for the Psychological Sciences: Theory and Applications	4
<b>Ethics</b>		
PSYC 4920	Ethics-Psych & Rsrch Practice	2
<b>Proseminar Courses</b>		
Choose two of the following:		
PSYC 4002	Prosem in Memory and Cognition	4
PSYC 4011	Proseminar in Emotion	4

PSYC 4021	Prosem in Social Psychology	
PSYC 4032	Developmental Proseminar: Social-Emotional	
PSYC 4033	Devel Proseminar: Biological	

**Electives**

A minimum of two elective courses in PSYC must be taken 8

**Master's Thesis**

PSYC 5995	Independent Research	1-10
-----------	----------------------	------

**Additional Credit Hours**

Additional elective courses or independent research to reach 45 credit minimum

All courses for the MA must be taken at the 4000#level or above. No course can count for undergraduate and graduate level credit hours. Cross# listed courses taken at one level may not be retroactively applied to another, as requirements and grading criteria may differ.

**Programs non#course requirements.**

Successful completion of master's research paper or thesis and oral defense.

**Grade Requirement:**

A grade lower than "C-" renders the credit unacceptable for meeting University degree requirements. Grades of "C-" or better qualify for graduate credit but may not count towards the degree. Students should consult with their program to understand unit-specific minimum grade requirements.

**Admission requirements:**

- Current undergraduate student at DU
- Minimum of 120 credit hours completed when applications are due
- Signed certification from psychology major advisor that undergraduate degree requirements can be fit in alongside MA program
- Completion of Intro Stats (PSYC 2300) or equivalent and Research Methods (PSYC 3050) with a B or higher before Autumn Quarter of the year they begin the program (4<sup>th</sup> year or equivalent)
- Letter of support from faculty member willing to oversee research thesis, stating research potential as well as capability to contribute to graduate classes
- Completion of personal statement outlining research interests, career goals, and briefly outlining how a research-based MA program will help them achieve those goals

**PSYC 3020 Adolescence (4 Credits)**

This course examines development during the adolescent years exploring biological, cognitive, and social transitions central to this developmental stage. It considers key contexts in which adolescents develop: families, peer groups, schools, work, leisure, and the mass media. Special attention is given to the importance of diverse social and cultural experiences and its impact on adolescent behavior and cognition. Prerequisites: PSYC2070 and PSYC3050, must be major or minor in psychology, must have junior or senior standing.

**PSYC 3029 Imaging the Mind (4 Credits)**

Imaging the Mind is an introductory course to the basic theory and data analysis techniques used in functional magnetic resonance imaging (fMRI). It will cover basic brain anatomy, the basic physics of MRI, experimental design, data processing and the issues associated with data processing, and interpretation of fMRI data. Students in this course will receive hands-on experience in processing a data set from start to finish. They will apply different image preprocessing techniques, statistical design parameters, and statistical models to determine how these factors influence the outcome of the data and how these factors influence the interpretation of that data. In this manner, each student will be exposed individually to the decision issues and interpretation pitfalls involved in fMRI data analysis. Cross listed with PSYC 4255. Prerequisites: PSYC 2031 and PSYC 3050, must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3032 Introduction to Neural Networks (4 Credits)**

Introduction to basic principles and computational methods in artificial neural network modeling; neural models of cognitive and psychological processes examined and evaluated. Cross listed with PSYC 4254. Prerequisite: PSYC 1001 and PSYC 3050. Must be major or minor in psychology. Must have junior standing. Permission of instructor required.

**PSYC 3035 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is for students in the cognitive neuroscience specialization, a joint program with Biological Sciences. The goal of the seminar is to provide an opportunity for senior-level cognitive neuroscience majors to apply the knowledge and skills they have acquired in other courses to current cutting-edge topics in the field. Prerequisites: PSYC 2031 and PSYC 3050, must have cognitive neuroscience concentration, must have senior standing.

**PSYC 3151 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2750, PSYC 2751 and PSYC 2752.

**PSYC 3152 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2751 and PSYC 2752.

**PSYC 3350 Cultural Psychology (4 Credits)**

This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3666 Brain Development & Cognition (4 Credits)**

Examines what the brain tells us about development and what development tells us about the brain. Topics include subcortical and cortical developments to the acquisition of language and drawing. Prerequisites: PSYC 2070 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3701 Topics in Psychology (1-4 Credits)**

Prerequisites: PSYC 1001 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3991 Independent Study (1-10 Credits)**

Maximum of 5 hours per quarter not to exceed a total of 10 quarter hours.

**PSYC 3999 Psychology Senior Assessment (0 Credits)**

This course involves a required assessment of graduating psychology majors' knowledge of the discipline based on coursework taken one quarter prior to graduation. Prerequisites: at least any four of the following courses required for the major: PSYC 1001 or equivalent, PSYC 2300, 3050, PSYC 2500, PSYC 2070, PSYC 2031, PSYC 2740, and at least 163 total credit hours or at least 30 credits of psychology hours.

**PSYC 4002 Prosem in Memory and Cognition (4 Credits)**

Theory/research on thinking, problem solving, language, creative thought, other aspects of knowing process.

**PSYC 4011 Proseminar in Emotion (4 Credits)**

Social/physiological aspects of emotions, including motivation, physiological processes, basic emotions, cognitive appraisal, cross-cultural issues, empathy, effects of emotions.

**PSYC 4015 Nonverbal Behavior (4 Credits)**

This course will be cross-listed with Psyc 3015 (undergraduate students in 3015 and graduate students in 4015 will be seated in the same classroom but will have different requirements). Most humans speak for a very small portion of their day (by most estimates, an hour or less) but during every waking moment of your life, you display nonverbal behaviors. These behaviors include facial expressions, eye gaze, posture, head movements, movement toward and away from things, gestures, distance from other people, vocal intonation, and many other subtle bodily actions. In this class, we will survey an enormous scientific literature regarding the causes and consequences of nonverbal behaviors. Our focus will be on nonverbal behavior in humans, but we will also review the role of nonverbal behavior in the social life of human and non-human animals alike. Topics include, but are not limited to questions such as: What methods should scientists use to examine the causes and consequences of nonverbal behavior? Do nonverbal behaviors reveal emotions and other psychological states or do nonverbal behaviors instead function for the purpose of social influence? What is the role of nonverbal behavior in deception and the detection of deception? Do people non-consciously process the social meaning of others' nonverbal behaviors?.

**PSYC 4020 Proseminar in Personality (4 Credits)**

Personality structure/dynamics, theory and findings, interrelationships between personality and socio-cultural determinants of behavior.

**PSYC 4021 Prosem in Social Psychology (4 Credits)**

Major theoretical issues and empirical research in social psychology; topics include cultural, social structure, cognitive consistency, social neuroscience, social cognition, person perception, the self, social influence, attitudes, relationships, emotion, coping.

**PSYC 4025 Intergroup Relations (4 Credits)**

This course is intended to provide a foundation in understanding how individuals and groups relate to each other within a social structure. Social groups can take many forms, ranging from classic social groups (e.g., race, gender, ethnicity, religion, sexual orientation) to minimal groups where membership is arbitrary. This course will explore foundational principles in classic and contemporary research on intergroup relations.

**PSYC 4028 Social Cognition (4 Credits)**

Social cognition describes how people make sense of themselves and others. The emphasis on "how" is important—social cognition research focuses on perceptual, cognitive, and affective processes that help people think about themselves and others. You will learn about the theories, findings, and methods in a specific area of study.

**PSYC 4032 Developmental Proseminar: Social-Emotional (4 Credits)**

Problems/theories in developmental psychology including Piagetian theory, language, emotional, perceptual, personality development, learning, biological bases of behavior, genetic influences.

**PSYC 4033 Devel Proseminar: Biological (4 Credits)**

This course provides an overview of major biological processes during development and their effects on physical, cognitive, and social development. Specific topics will include: history, concepts, and central themes of developmental psychology; theoretical and biological models of human development (e.g., developmental psychobiological systems view); brain development and plasticity; behavioral genetics; sleep and circadian rhythms; sexual differentiation and hormonal influences on behavior; stress and the HPA axis; effects of nutrition and toxic substances.

**PSYC 4045 Proseminar in Human Brain Development (4 Credits)**

This course offers an overview of current research and methodologies in the field of developmental cognitive, affective, and social neuroscience. It explores the insights that the brain provides about development and, conversely, what development reveals about the brain. Topics covered include sensitive periods for neuroplasticity, pediatric neuroimaging techniques, and the development of cognitive, affective, and social processes, as well as the impact of environmental factors. Emphasis is placed on discussing current research, evaluating findings, and proposing new research ideas in the field. Prerequisite: Instructor permission.

**PSYC 4055 The Neuroscience and Psychology of Parenthood and Parent-Child Relationships (4 Credits)**

This course explores the theory, research and issues relevant to parenthood and parent-child relationships. The course overviews the evolutionary, neurobiological, and psychological perspective of parent-child relationships with a focus on the understanding of recent advances in neuroscience research. Topics include neuroplasticity of parental brain, maternal vs. paternal biology for parenting, and social and biological determinants of parent-child relationships. Emphasis is placed on discussion of current research, evaluation of the findings, and proposals and ideas of new research in the field. The goal is not to memorize facts but rather to learn to think like a developmental cognitive/social neuroscientist. Cross-listed with course PSYC 3055. Prerequisite: Instructor permission.

**PSYC 4085 Stress & Health (4 Credits)**

This course will serve as an introduction to the field of psychoneuroimmunology, with a focus on stress and development. The first section of the course will review basic immunology including immune system components and functions, and relations between the immune system and other systems. The later portion of the course will focus on effects of stress for different disease mechanisms (infection, allergy, cancer etc). Instructor approval required.

**PSYC 4235 Teaching Psychology (1-5 Credits)**

Experiential approach to learning techniques for teaching psychology.

**PSYC 4241 Seminar-Discourse Processes (4 Credits)****PSYC 4254 Intro to Neural Network Models (4 Credits)**

Cross listed with PSYC 3032.

**PSYC 4255 Imaging the Mind (4 Credits)**

Imaging Cognition is an introductory course to the basic theory and data analysis techniques used in functional magnetic resonance imaging (fMRI). It will cover basic brain anatomy, the basic physics of MRI, experimental design, data processing and the issues associated with data processing, and interpretation of fMRI data. Students in this course will receive hands-on experience in processing a data set from start to finish. They will apply different image preprocessing techniques, statistical design parameters, and statistical models to determine how these factors influence the outcome of the data and how these factors influence the interpretation of that data. In this manner, each student will be exposed individually to the decision issues and interpretation pitfalls involved in fMRI data analysis. Cross listed with PSYC 3029.

**PSYC 4256 Seminar:Cognitive Neuroscience (4 Credits)**

Neural systems underlying human perception, memory, language, pathological syndromes that result from damage to these systems.

**PSYC 4257 Psychophys & Neuroscience Lab (4 Credits)****PSYC 4258 Social Neuroscience (4 Credits)****PSYC 4262 Affective Neuroscience (4 Credits)**

Affective neuroscience is the study of emotions in the brain. In this course, we explore how new frontiers in emotion research, from brain scans to psychoactive drugs to monkey colonies, have changed the way we think about emotions and moods. We aim to learn how scientists ask these new questions: how and what can we learn about emotion from animal models, patient studies, genetic studies, brain scans, and drugs? We learn and debate different theories about what emotions are: when are emotions helpful and harmful? Why do we have them? How many are there? Can we control how we feel? Finally, we learn how to think about emotions scientifically: What kind of evidence matters? How do emotion scholars talk about their work? What kind of questions can we ask, and what kind can we hope to answer?.

**PSYC 4295 Research Design & Inference (4 Credits)****PSYC 4300 Correlation and Regression (4 Credits)**

The course reviews the logic of statistical inference before introducing the procedures of correlation and regression. We begin with simple bivariate relationships before moving on to multivariate relationships for both categorical and continuous independent variables. Topics in regression include multicollinearity, variable selection, and curvilinear relationships. The course emphasizes the (stringent) requirements needed to be able to interpret correlational data in terms of cause and effect. The course also emphasizes the assessment of interactions in regression analysis for both categorical and continuous independent variables. Also included is basic coverage of logistic regression and regression assumptions. Prerequisite: PSYC 4295.

**PSYC 4330 Analysis of Variance (4 Credits)**

Complex analysis of variance, other quantitative methodologies. Prerequisite: PSYC 4300 or instructor's permission.

**PSYC 4350 Structural Equation Modeling for the Social Sciences (4 Credits)**

This advanced course covers the basics of structural equation modeling and how this flexible approach to statistical analysis can be applied in the social sciences. Specific techniques that will be covered will include testing for mediation, path analysis, confirmatory factor analysis, and the analysis of longitudinal data, as well as other related topics. There will be an emphasis on applying these techniques to students' own research through hands-on demonstrations and homework assignments and an emphasis on interpreting and critiquing structural equation models in published research. A course on correlational methods and regression is a pre/co-requisite.

**PSYC 4355 Multilevel Modeling for the Psychological Sciences: Theory and Applications (4 Credits)**

This advanced course covers the basics of multilevel (hierarchical) linear modeling and how this flexible approach to statistical analysis can be applied to theory and data in the psychological sciences. Specific techniques that will be covered include the analysis of nested data, family and dyadic data, and longitudinal data as well as mediation and moderation. There will be an emphasis on applying these techniques to students' own research through hands-on demonstrations and homework assignments. There will also be an emphasis on interpreting and critiquing multilevel modeling analyses in published research. Courses on analysis of variance as well as correlational methods and regression are pre/corequisites.

**PSYC 4360 Programming Psychology: Experiment Building with Python (4 Credits)**

This graduate-level course provides an introduction to computer programming. The goal of the course is to help psychology students develop practical coding skills in Python that will allow them to design and create complex, computer-based experiments. Students will also learn to analyze and plot data. No previous experience with programming is required (or expected). The course begins with an introduction to basic principles of programming with Python. From there, students learn to code by solving challenges specific to the design/construction of a psychological/vision-based experiment. The class is highly interactive— each class includes a mixture of lecture, group-based problem solving, and coding in teams or individually. This class is highly recommended for students who wish to improve their programming proficiency before enrolling in PSYC 4365, although it is not a prerequisite.

**PSYC 4365 Programming Psychology: Model-Fitting and Analysis (4 Credits)**

An introduction to creating, fitting, and performing statistical inference using computational models with an emphasis on binary choice data. The aims of this course include familiarizing students with the mathematical basis of model-fitting, learning the value of taking a variety of approaches to fitting trial-by-trial data, and giving students practical hands-on experience with maximum likelihood fitting methods. This course will use both MATLAB and R. Though not a prerequisite, this course is intended to follow Programming Psychology: Experiment Building in MATLAB (PSYC 4360), and so will assume students already have a basic knowledge of coding in MATLAB (including debugging, scripts, functions, loops, and plotting). This course is open to graduate students outside of the Department of Psychology.

**PSYC 4411 Assessment-Cognition (4 Credits)**

This course will provide students with a graduate level overview of theory, research, and practice in the measurement of cognitive functioning. Students will gain practical skills in administering standardized measures of cognitive and academic functioning. They will also develop skills in interpreting cognitive test results and recognizing patterns in cognitive profiles related to specific learning and developmental disorders.

**PSYC 4413 Assessment-Psychopathology (Social, Emotional, and Behavioral) (4 Credits)**

Overview of evidence-based psychological assessment (emotional, behavioral, and social) with a focus on integrating theory, research, and clinical practice.

**PSYC 4512 Prosem in Psychopathology (4 Credits)****PSYC 4518 Readings in Family Therapy (4 Credits)**

This course will survey major historical and contemporary theories from the field of family therapy. Basic family therapy techniques will be covered, and integrated with other modes of therapy (e.g. individual, marital). In the second half of the course, students will work with families and receive group supervision.

**PSYC 4525 Prosem in Develop Neuropsych (4 Credits)**

We will cover the theory and measurement of brain-behavior relations across the lifespan in several major neuropsychological domains, including executive functions, language, memory, and visual-spatial function. As is characteristic of the developmental neuropsychological field, students will learn to integrate information across multiple levels of analysis (genetic, brain, cognitive, behavioral) and draw on principles of neural and cognitive development in their application of neuropsychological theory to research and clinical issues. We will discuss current controversies in the field and continued areas for growth.

**PSYC 4526 Prosem in Cog Neuroscience (4 Credits)**

This is a graduate-level introduction to cognitive neuroscience. It covers basic theories of cognition and their neurological support.

**PSYC 4565 Systems of Psychotherapy (4 Credits)**

The course provides an introduction to evidence-based treatment for children and adolescents. Conceptual and empirical underpinnings of youth therapies are examined. Treatments for three prominent child and adolescent disorders - disruptive behavior problems, depression, and anxiety disorders - are highlighted. Demonstration and practice of specific treatment components is included.

**PSYC 4566 Systems of Psychotherapy II (4 Credits)**

Conceptual/empirical foundations of interventions for clinical problems, including (but not limited to) parasuicidal behavior, Borderline Personality Disorder, and substance abuse.

**PSYC 4571 Multicult Issues & Ment Health (4 Credits)**

Theory, research, and practice issues related to the mental health of racial/ethnic minority and other diverse groups.

**PSYC 4587 Workshop in Marital Therapy (4 Credits)****PSYC 4612 Marital Conflict (1-10 Credits)****PSYC 4620 Advan in Couples Intervention (4 Credits)****PSYC 4625 Marital/Couples Thrpy-Div Popl (4 Credits)**

This course will cover the complexities in couples research and intervention that are the focus of current investigations in labs around the world. The major issues revolve around the role that marital problems play in the development, maintenance and treatment of a variety of child and adult problems and vice versa. These will include, adult sexual problems, alcohol and drug use and abuse, anxiety disorders, depression, medical problems, and that marital discord and destructive conflict are generic risk factors for a wide range of child and adult mental health problems and that marital health is a protective factor.

**PSYC 4660 Perception: A Cognitive Neuroscience Approach (4 Credits)**

An introduction to human perception with a strong emphasis on visual perception. This course evaluates the current understanding of how neural activity in the brain allows people to perceive basic sensory features (e.g., brightness, color, size, position, depth, movement, loudness and pitch) as well as recognize and discriminate complex perceptual patterns (e.g., 2D-shapes, 3D-objects, faces, and scenes). The underlying mechanisms are discussed on the basis of behavioral, neurophysiological, and computational evidence.

**PSYC 4665 Executive Functioning (4 Credits)**

This course provides an overview of current research, theories, and methods in the study of executive function and cognitive control. We will explore executive function from an interdisciplinary perspective, drawing on work from cognitive psychology and neuroscience, clinical neuropsychology, and developmental and educational psychology. Topics include the brain basis of executive function and cognitive control, the unity and diversity of executive functions, the development of executive functions, emotion and motivation as modulating influences on executive control, executive function in psychopathology, the role of individual differences, and links between executive function performance and higher-order behavioral outcomes. Enrollment restricted to Ph.D. program or with instructor approval.

**PSYC 4688 Clinical Psychopharmacology (4 Credits)**

This course offers an in-depth examination of medications used to treat mental disorders, including the neurobiology of these medications. Different options available for each disorder will be discussed, along with issues related to the effective use of psychiatric medications. Prerequisites: Instructor approval required.

**PSYC 4920 Ethics-Psych & Rsrch Practice (2 Credits)**

Ethical issues on psychological research. Teaching, practice.

**PSYC 4925 Clinical Ethics and Professional Issues in Psychology (3 Credits)**

Ethical topics related to clinical psychology; professional topics in clinical psychology such as supervision and consultation. Instructor permission required.

**PSYC 4928 Initial Clinical Practicum (0 Credits)**

Applied clinical training in psychology focused on assessment and therapy, primarily during trainee's first year of training at the Center for Child and Family Psychology. May be repeated up to 5 times. Prerequisite: Admission to doctoral program.

**PSYC 4929 Advanced Clinical Practicum (0 Credits)**

Applied clinical training in psychology focused on assessment and therapy, primarily during trainee's second year of training at the Center for Child and Family Psychology. May be repeated up to 5 times. Prerequisite: Admission to doctoral program.

**PSYC 4930 Psychology Practicum-Clinical (1-5 Credits)**

On-the-job training in clinical psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4931 Psychology Practicum-Teaching (0-5 Credits)**

On-the-job training in teaching psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4932 Psychology Practicum-Research (1-5 Credits)**

On-the-job training in research psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4933 Psychology Practicum - Advanced Clinical (0 Credits)**

Advanced on-the-job training in clinical psychology. May be repeated up to 6 times. Prerequisite: Admission to doctoral program.

**PSYC 4934 Practicum: DCN Neuropsychology (1-10 Credits)****PSYC 5991 Masters Independent Study (1-10 Credits)****PSYC 5995 Independent Research (1-10 Credits)****PSYC 6981 APA Internship (8 Credits)**

1 Year APA approved Internship in clinical psychology - the course is not graded.

**PSYC 6991 Ph.D Independent Study (1-10 Credits)****PSYC 6995 Independent Research (1-10 Credits)****Courses****PSYC 3020 Adolescence (4 Credits)**

This course examines development during the adolescent years exploring biological, cognitive, and social transitions central to this developmental stage. It considers key contexts in which adolescents develop: families, peer groups, schools, work, leisure, and the mass media. Special attention is given to the importance of diverse social and cultural experiences and its impact on adolescent behavior and cognition. Prerequisites: PSYC2070 and PSYC3050, must be major or minor in psychology, must have junior or senior standing.

**PSYC 3029 Imaging the Mind (4 Credits)**

Imaging the Mind is an introductory course to the basic theory and data analysis techniques used in functional magnetic resonance imaging (fMRI). It will cover basic brain anatomy, the basic physics of MRI, experimental design, data processing and the issues associated with data processing, and interpretation of fMRI data. Students in this course will receive hands-on experience in processing a data set from start to finish. They will apply different image preprocessing techniques, statistical design parameters, and statistical models to determine how these factors influence the outcome of the data and how these factors influence the interpretation of that data. In this manner, each student will be exposed individually to the decision issues and interpretation pitfalls involved in fMRI data analysis. Cross listed with PSYC 4255. Prerequisites: PSYC 2031 and PSYC 3050, must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3032 Introduction to Neural Networks (4 Credits)**

Introduction to basic principles and computational methods in artificial neural network modeling; neural models of cognitive and psychological processes examined and evaluated. Cross listed with PSYC 4254. Prerequisite: PSYC 1001 and PSYC 3050. Must be major or minor in psychology. Must have junior standing. Permission of instructor required.

**PSYC 3035 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is for students in the cognitive neuroscience specialization, a joint program with Biological Sciences. The goal of the seminar is to provide an opportunity for senior-level cognitive neuroscience majors to apply the knowledge and skills they have acquired in other courses to current cutting-edge topics in the field. Prerequisites: PSYC 2031 and PSYC 3050, must have cognitive neuroscience concentration, must have senior standing.

**PSYC 3151 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2750, PSYC 2751 and PSYC 2752.

**PSYC 3152 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2751 and PSYC 2752.

**PSYC 3350 Cultural Psychology (4 Credits)**

This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3666 Brain Development & Cognition (4 Credits)**

Examines what the brain tells us about development and what development tells us about the brain. Topics include subcortical and cortical developments to the acquisition of language and drawing. Prerequisites: PSYC 2070 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3701 Topics in Psychology (1-4 Credits)**

Prerequisites: PSYC 1001 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3991 Independent Study (1-10 Credits)**

Maximum of 5 hours per quarter not to exceed a total of 10 quarter hours.

**PSYC 3999 Psychology Senior Assessment (0 Credits)**

This course involves a required assessment of graduating psychology majors' knowledge of the discipline based on coursework taken one quarter prior to graduation. Prerequisites: at least any four of the following courses required for the major: PSYC 1001 or equivalent, PSYC 2300, 3050, PSYC 2500, PSYC 2070, PSYC 2031, PSYC 2740, and at least 163 total credit hours or at least 30 credits of psychology hours.

**PSYC 4002 Prosem in Memory and Cognition (4 Credits)**

Theory/research on thinking, problem solving, language, creative thought, other aspects of knowing process.

**PSYC 4011 Proseminar in Emotion (4 Credits)**

Social/physiological aspects of emotions, including motivation, physiological processes, basic emotions, cognitive appraisal, cross-cultural issues, empathy, effects of emotions.

**PSYC 4015 Nonverbal Behavior (4 Credits)**

This course will be cross-listed with Psyc 3015 (undergraduate students in 3015 and graduate students in 4015 will be seated in the same classroom but will have different requirements). Most humans speak for a very small portion of their day (by most estimates, an hour or less) but during every waking moment of your life, you display nonverbal behaviors. These behaviors include facial expressions, eye gaze, posture, head movements, movement toward and away from things, gestures, distance from other people, vocal intonation, and many other subtle bodily actions. In this class, we will survey an enormous scientific literature regarding the causes and consequences of nonverbal behaviors. Our focus will be on nonverbal behavior in humans, but we will also review the role of nonverbal behavior in the social life of human and non-human animals alike. Topics include, but are not limited to questions such as: What methods should scientists use to examine the causes and consequences of nonverbal behavior? Do nonverbal behaviors reveal emotions and other psychological states or do nonverbal behaviors instead function for the purpose of social influence? What is the role of nonverbal behavior in deception and the detection of deception? Do people non-consciously process the social meaning of others' nonverbal behaviors?.

**PSYC 4020 Proseminar in Personality (4 Credits)**

Personality structure/dynamics, theory and findings, interrelationships between personality and socio-cultural determinants of behavior.

**PSYC 4021 Prosem in Social Psychology (4 Credits)**

Major theoretical issues and empirical research in social psychology; topics include cultural, social structure, cognitive consistency, social neuroscience, social cognition, person perception, the self, social influence, attitudes, relationships, emotion, coping.

**PSYC 4025 Intergroup Relations (4 Credits)**

This course is intended to provide a foundation in understanding how individuals and groups relate to each other within a social structure. Social groups can take many forms, ranging from classic social groups (e.g., race, gender, ethnicity, religion, sexual orientation) to minimal groups where membership is arbitrary. This course will explore foundational principles in classic and contemporary research on intergroup relations.

**PSYC 4028 Social Cognition (4 Credits)**

Social cognition describes how people make sense of themselves and others. The emphasis on "how" is important—social cognition research focuses on perceptual, cognitive, and affective processes that help people think about themselves and others. You will learn about the theories, findings, and methods in a specific area of study.

**PSYC 4032 Developmental Proseminar: Social-Emotional (4 Credits)**

Problems/theories in developmental psychology including Piagetian theory, language, emotional, perceptual, personality development, learning, biological bases of behavior, genetic influences.

**PSYC 4033 Devel Proseminar: Biological (4 Credits)**

This course provides an overview of major biological processes during development and their effects on physical, cognitive, and social development. Specific topics will include: history, concepts, and central themes of developmental psychology; theoretical and biological models of human development (e.g., developmental psychobiological systems view); brain development and plasticity; behavioral genetics; sleep and circadian rhythms; sexual differentiation and hormonal influences on behavior; stress and the HPA axis; effects of nutrition and toxic substances.

**PSYC 4045 Proseminar in Human Brain Development (4 Credits)**

This course offers an overview of current research and methodologies in the field of developmental cognitive, affective, and social neuroscience. It explores the insights that the brain provides about development and, conversely, what development reveals about the brain. Topics covered include sensitive periods for neuroplasticity, pediatric neuroimaging techniques, and the development of cognitive, affective, and social processes, as well as the impact of environmental factors. Emphasis is placed on discussing current research, evaluating findings, and proposing new research ideas in the field. Prerequisite: Instructor permission.

**PSYC 4055 The Neuroscience and Psychology of Parenthood and Parent-Child Relationships (4 Credits)**

This course explores the theory, research and issues relevant to parenthood and parent-child relationships. The course overviews the evolutionary, neurobiological, and psychological perspective of parent-child relationships with a focus on the understanding of recent advances in neuroscience research. Topics include neuroplasticity of parental brain, maternal vs. paternal biology for parenting, and social and biological determinants of parent-child relationships. Emphasis is placed on discussion of current research, evaluation of the findings, and proposals and ideas of new research in the field. The goal is not to memorize facts but rather to learn to think like a developmental cognitive/social neuroscientist. Cross-listed with course PSYC 3055. Prerequisite: Instructor permission.

**PSYC 4085 Stress & Health (4 Credits)**

**PSYC 4360 Programming Psychology: Experiment Building with Python (4 Credits)**

This graduate-level course provides an introduction to computer programming. The goal of the course is to help psychology students develop practical coding skills in Python that will allow them to design and create complex, computer-based experiments. Students will also learn to analyze and plot data. No previous experience with programming is required (or expected). The course begins with an introduction to basic principles of programming with Python. From there, students learn to code by solving challenges specific to the design/construction of a psychological/vision-based experiment. The class is highly interactive—each class includes a mixture of lecture, group-based problem solving, and coding in teams or individually. This class is highly recommended for students who wish to improve their programming proficiency before enrolling in PSYC 4365, although it is not a prerequisite.

**PSYC 4365 Programming Psychology: Model-Fitting and Analysis (4 Credits)**

An introduction to creating, fitting, and performing statistical inference using computational models with an emphasis on binary choice data. The aims of this course include familiarizing students with the mathematical basis of model-fitting, learning the value of taking a variety of approaches to fitting trial-by-trial data, and giving students practical hands-on experience with maximum likelihood fitting methods. This course will use both MATLAB and R. Though not a prerequisite, this course is intended to follow Programming Psychology: Experiment Building in MATLAB (PSYC 4360), and so will assume students already have a basic knowledge of coding in MATLAB (including debugging, scripts, functions, loops, and plotting). This course is open to graduate students outside of the Department of Psychology.

**PSYC 4411 Assessment-Cognition (4 Credits)**

This course will provide students with a graduate level overview of theory, research, and practice in the measurement of cognitive functioning. Students will gain practical skills in administering standardized measures of cognitive and academic functioning. They will also develop skills in interpreting cognitive test results and recognizing patterns in cognitive profiles related to specific learning and developmental disorders.

**PSYC 4413 Assessment-Psychopathology (Social, Emotional, and Behavioral) (4 Credits)**

Overview of evidence-based psychological assessment (emotional, behavioral, and social) with a focus on integrating theory, research, and clinical practice.

**PSYC 4512 Prosem in Psychopathology (4 Credits)****PSYC 4518 Readings in Family Therapy (4 Credits)**

This course will survey major historical and contemporary theories from the field of family therapy. Basic family therapy techniques will be covered, and integrated with other modes of therapy (e.g. individual, marital). In the second half of the course, students will work with families and receive group supervision.

**PSYC 4525 Prosem in Develop Neuropsych (4 Credits)**

We will cover the theory and measurement of brain-behavior relations across the lifespan in several major neuropsychological domains, including executive functions, language, memory, and visual-spatial function. As is characteristic of the developmental neuropsychological field, students will learn to integrate information across multiple levels of analysis (genetic, brain, cognitive, behavioral) and draw on principles of neural and cognitive development in their application of neuropsychological theory to research and clinical issues. We will discuss current controversies in the field and continued areas for growth.

**PSYC 4526 Prosem in Cog Neuroscience (4 Credits)**

This is a graduate-level introduction to cognitive neuroscience. It covers basic theories of cognition and their neurological support.

**PSYC 4565 Systems of Psychotherapy (4 Credits)**

The course provides an introduction to evidence-based treatment for children and adolescents. Conceptual and empirical underpinnings of youth therapies are examined. Treatments for three prominent child and adolescent disorders - disruptive behavior problems, depression, and anxiety disorders - are highlighted. Demonstration and practice of specific treatment components is included.

**PSYC 4566 Systems of Psychotherapy II (4 Credits)**

Conceptual/empirical foundations of interventions for clinical problems, including (but not limited to) parasuicidal, Borderline Personality Disorder, and substance abuse.

**PSYC 4571 Multicult Issues & Ment Health (4 Credits)**

Theory, research, and practice issues related to the mental health of racial/ethnic minority and other diverse groups.

**PSYC 4587 Workshop in Marital Therapy (4 Credits)****PSYC 4612 Marital Conflict (1-10 Credits)****PSYC 4620 Advan in Couples Intervention (4 Credits)****PSYC 4625 Marital/Couples Thrpy-Div Popl (4 Credits)**

This course will cover the complexities in couples research and intervention that are the focus of current investigations in labs around the world. The major issues revolve around the role that marital problems play in the development, maintenance and treatment of a variety of child and adult problems and vice versa. These will include, adult sexual problems, alcohol and drug use and abuse, anxiety disorders, depression, medical problems, and that marital discord and destructive conflict are generic risk factors for a wide range of child and adult mental health problems and that marital health is a protective factor.

**PSYC 4660 Perception: A Cognitive Neuroscience Approach (4 Credits)**

An introduction to human perception with a strong emphasis on visual perception. This course evaluates the current understanding of how neural activity in the brain allows people to perceive basic sensory features (e.g., brightness, color, size, position, depth, movement, loudness and pitch) as well as recognize and discriminate complex perceptual patterns (e.g., 2D-shapes, 3D-objects, faces, and scenes). The underlying mechanisms are discussed on the basis of behavioral, neurophysiological, and computational evidence.

**PSYC 4665 Executive Functioning (4 Credits)**

This course provides an overview of current research, theories, and methods in the study of executive function and cognitive control. We will explore executive function from an interdisciplinary perspective, drawing on work from cognitive psychology and neuroscience, clinical neuropsychology, and developmental and educational psychology. Topics include the brain basis of executive function and cognitive control, the unity and diversity of executive functions, the development of executive functions, emotion and motivation as modulating influences on executive control, executive function in psychopathology, the role of individual differences, and links between executive function performance and higher-order behavioral outcomes. Enrollment restricted to Ph.D. program or with instructor approval.

**PSYC 4688 Clinical Psychopharmacology (4 Credits)**

This course offers an in-depth examination of medications used to treat mental disorders, including the neurobiology of these medications. Different options available for each disorder will be discussed, along with issues related to the effective use of psychiatric medications. Prerequisites: Instructor approval required.

**PSYC 4920 Ethics-Psych & Rsrch Practice (2 Credits)**

Ethical issues on psychological research. Teaching, practice.

**PSYC 4925 Clinical Ethics and Professional Issues in Psychology (3 Credits)**

Ethical topics related to clinical psychology; professional topics in clinical psychology such as supervision and consultation. Instructor permission required.

**PSYC 4928 Initial Clinical Practicum (0 Credits)**

Applied clinical training in psychology focused on assessment and therapy, primarily during trainee's first year of training at the Center for Child and Family Psychology. May be repeated up to 5 times. Prerequisite: Admission to doctoral program.

**PSYC 4929 Advanced Clinical Practicum (0 Credits)**

Applied clinical training in psychology focused on assessment and therapy, primarily during trainee's second year of training at the Center for Child and Family Psychology. May be repeated up to 5 times. Prerequisite: Admission to doctoral program.

**PSYC 4930 Psychology Practicum-Clinical (1-5 Credits)**

On-the-job training in clinical psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4931 Psychology Practicum-Teaching (0-5 Credits)**

On-the-job training in teaching psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4932 Psychology Practicum-Research (1-5 Credits)**

On-the-job training in research psychology. May be repeated for a maximum of 24 quarter hours. Prerequisite: Admission to doctoral program.

**PSYC 4933 Psychology Practicum - Advanced Clinical (0 Credits)**

Advanced on-the-job training in clinical psychology. May be repeated up to 6 times. Prerequisite: Admission to doctoral program.

**PSYC 4934 Practicum: DCN Neuropsychology (1-10 Credits)****PSYC 5991 Masters Independent Study (1-10 Credits)****PSYC 5995 Independent Research (1-10 Credits)****PSYC 6981 APA Internship (8 Credits)**

1 Year APA approved Internship in clinical psychology - the course is not graded.

**PSYC 6991 Ph.D Independent Study (1-10 Credits)****PSYC 6995 Independent Research (1-10 Credits)**

## Religious Studies

Office: Department of Religious Studies, Room 266

Mail Code: 2000 E. Asbury Ave., Denver, CO 80208

Phone: 303-871-2749

Email: rlg@du.edu

Web Site: [du.edu/ahss/religiousstudies/](http://www.du.edu/ahss/religiousstudies/) (<http://www.du.edu/ahss/religiousstudies/>)

The Department of Religious Studies offers a master of arts (MA) degree in Religious Studies, as well as a graduate certificate in Religious Studies, a graduate certificate in Religion and International Affairs, and a specialized graduate certificate in World Religions. We are major contributors, together with the Iliff School of Theology and other schools and departments at DU, to a doctor of philosophy (PhD) degree in the Study of Religion.

### Why pursue an MA in Religious Studies at the University of Denver?

The Department of Religious Studies offers graduate students the opportunity to study with its distinguished faculty in a program that emphasizes breadth and depth. Religious Studies faculty members are well published and have won several distinguished teaching awards. They have served in leadership roles in national learned societies and have received grants from the National Endowment for the Humanities, the American Council of Learned Societies, and the Guggenheim Foundation.

The program provides students with a substantive grounding in the major religious traditions of the world, as well as training in the field of religious studies. Through the areas of specialization, it provides students with the opportunity to develop a specific and scholarly expertise in one of the following particular fields of interest: Sacred Texts, Critical Theory and Religion, Religion and International Studies, Philosophy of Religion, and Lived Religions. Students can use these areas of specializations to deepen their own expertise in a particular area while preparing for thesis work, completing a journal article, undertaking comprehensive exams, or developing a project in applied religious studies.

A remote synchronous online option for students is available nested in the MA in Religious Studies for students following the program's Critical Theory track. In addition to studying religion through the lens of the modern European approach to critical theory, this area of specialization focuses on critical topics including race, class, gender, ethnicity, and globalization. Students in the nested online option will take two live lecture courses offered on Zoom each quarter. These courses, also taken by on-campus students, are planned to meet both the core requirements for the MA in Religious Studies and the requirements for the critical theory specialization. Each of the two courses offered on Zoom are set to meet once per week in the late afternoon to early evening, in order to provide flexibility to students with full-time day jobs or other daytime responsibilities. Students pursuing the online option may switch to attend courses on campus at any point during their program. These students are also eligible for the same funding opportunities as their on-campus colleagues.

As part of broader University aims to support interdisciplinary work and internationalization (study and research abroad), the Department of Religious Studies expects students to embrace multiple disciplinary perspectives. It encourages students to enrich their graduate studies by taking courses in other departments and to work with faculty outside Religious Studies. For example, students in the MA program routinely take graduate-level courses in Anthropology, International Studies, Philosophy and Art History. Similarly, students in the MA program are encouraged to pursue advanced language training in the language(s) of their sub-field as well as modern research languages. Finally, the Department encourages students to study or conduct research abroad, as appropriate, and to seek external support in ways that will enhance their curriculum vitae as well as their scholarly and professional training.

Program advantages include the following:

- The opportunity to develop broad competencies in major religious traditions and the discipline of Religious Studies, while cultivating scholarly expertise in a particular area of specialization.
- Small classes that facilitate professor-student interaction, encouraging faculty mentoring while fostering community and collegiality with other graduate students.
- The opportunity to pursue interdisciplinary training and related interests by taking courses or working one-on-one with faculty in other University of Denver departments.
- Preparation either for doctoral work or for a professional career, with strong support from faculty and the University of Denver's career counselors.
- Opportunities to engage with and conduct research within metropolitan Denver, a culturally and religiously diverse city with a high quality of life.
- Substantial scholarship packages, including tuition credits and opportunities to serve as a research assistant.

### **What do applicants need in order to qualify for the Religious Studies MA program?**

Applicants must have an undergraduate degree from an accredited college, with a minimum grade point average (GPA) of 3.0. Applicants, as necessary, must meet the minimum performance standard set by the Office of Graduate Education for the Test of English as a Foreign Language (TOEFL). Applicants must have an appropriate background in the study of the humanities. Undergraduate courses in Religious Studies are highly desirable, but all work in related areas will be taken into consideration.

In addition, successful applicants will have the following qualifications:

- Academic qualification for graduate-level study;
- Preparation to do coursework and conduct research that emphasizes engagement with local and global communities;
- Motivation to work collegially with faculty and other students in a community of learning.

### **What can graduates do with a MA in Religious Studies?**

The MA degree in religious studies prepares students for PhD work or for teaching and careers in journalism, government, education, and nonprofit organizations in which cross-cultural analytical skills are important. The program provides broad competencies in several religious traditions, while offering students the opportunity to specialize in an area of particular interest.

### **Why pursue a Graduate Certificate in Religious Studies at the University of Denver?**

The graduate certificate in Religious Studies provides students with an opportunity to acquire graduate-level exposure to the academic study of religion and to several of the world's major religious traditions. This certificate program provides students with the opportunity to do the following:

- Develop an introductory, graduate-level understanding of two major world religious traditions;
- Gain a grasp of pertinent theoretical approaches to the study of religion; and
- Engage major issues in a particular religious tradition or aspect of religion.

For students currently enrolled in graduate programs in fields other than religious studies or the study of religion - such as business, international studies, law or other CAHSS disciplines - this certificate will augment the competencies gained in their primary program. For students currently pursuing a career, particularly those in consulting, journalism, the law, the non-profit sector, public policy, education, human resources, faith-based institutions/organizations or other professions where a knowledge of religious beliefs, practices and values can be important, this certificate will enhance their professional credentials or expand their expertise into a new arena.

### **What do applicants need in order to qualify for the Religious Studies graduate certificate program?**

Successful applicants will have the following qualifications:

- Academic qualification for graduate level study;
- Preparation to do coursework and conduct research that emphasizes engagement with local and global communities;
- Motivation to work with faculty and other students in a community of learning.

## Why Pursue a Graduate Certificate in Religion and International Affairs at the University of Denver?

The Graduate Certificate in Religion and International Affairs provides students pursuing a master's degree in the Department of Religious Studies (CAHSS) or the Josef Korbel School of International Studies the opportunity to enhance their home program of study with specific expertise in the scholarly and professional field of religion and international affairs. This certificate program emphasizes scholarly and practitioner approaches to understanding the intersections between religion and international affairs in the modern world, providing students with an interdisciplinary approach to contemporary case studies as well as theoretical issues.

## Why pursue a Specialized Graduate Certificate in World Religions at the University of Denver?

The World Religions Specialized Graduate Certificate offers students the opportunity to acquire graduate-level understanding of three of the world's major religious traditions, grounded in conceptual frameworks of how religion works in today's globalizing world. It aims to augment students' professional and scholarly knowledge with an understanding of the many ways that religion, politics, economics, culture, and society intersect - in the United States and around the world.

## What do applicants need in order to qualify for a Specialized Graduate Certificate in World Religions?

Applicants must have an undergraduate degree from an accredited college, with a minimum grade point average (GPA) of 3.0. Applicants, as necessary, must meet the minimum performance standard set by the Office of Graduate Education for the Test of English as a Foreign Language (TOEFL). Undergraduate courses taken in Religious Studies are highly desirable, but all work in related areas will be taken into consideration. Background in the study of the humanities will be especially useful in Religious Studies courses.

In addition, successful applicants will have the following qualifications:

- Academic qualification for graduate level study;
- Preparation to do coursework and conduct research that emphasizes engagement with local and global communities;
- Motivation to work collegially with faculty and other students in a community of learning.

## Joint PhD Program in the Study of Religion

A number of graduates of the Department of Religious Studies' MA program choose to continue their doctoral studies in the Joint PhD program.

The Joint PhD Program, which the University offers in partnership with the Iliff School of Theology, is taught by distinguished faculty from the University of Denver and Iliff. The faculty of the Department of Religious Studies anchor the Joint PhD program on the DU side. The program enrolls students from across the nation and around the world. The facilities and libraries of both institutions are open to all Joint PhD students, offering considerable research and academic resources. Please note that admission to the Joint Doctoral Program is a separate process, distinct from admission to the Department's MA program. For more details, please visit the joint PhD website at [www.du.edu/duiliffjoint/](http://www.du.edu/duiliffjoint/) (<http://www.du.edu/duiliffjoint/>).

## Master of Arts in Religious Studies

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Appropriate undergraduate background in relevant arts, humanities or social science disciplines. Generally, some prior coursework in the academic study of religion is expected.

### Standardized Test Scores

- GRE scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials. If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admissions to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5

- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Certificate in Religious Studies

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites:

- Generally, some prior coursework in the academic study of religion is expected.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Certificate of Specialization in Religion and International Affairs

Interested applicants enrolled and in good standing in the Religious Studies MA program or the Korbel School of International Studies MA programs must submit an application form in order to officially add the certificate to their student record.

---

## Certificate in World Religions

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176

- Minimum Duolingo English Test Score: 115

### English Conditional Admission:

No, this program does not offer English Conditional Admission.

## Master's Degree Program Master of Arts in Religious Studies

### Degree Requirements Coursework Requirements

Code	Title	Credits
<b>Course requirements:</b>		
RLGS 3760	Globalization and Religion: Theory and Methods	4
Select three of the following (Two from the Abrahamic Traditions and one from the Asian Traditions)		12
RLGS 3814	Modern Hinduism	
RLGS 3820	Buddhism	
RLGS 3001 or RLGS 3102	Judaism Early Judaism	
RLGS 3203 or RLGS 3192	Christianity Christian Literature	
RLGS 3500 or RLGS 3503	Islam Quran and Hadith	

### Areas of specialization

Select at least 16 hours in one of the following five areas of specialization: 16

Critical Theory

Critical Theory and Religion brings together a range of disciplines in social sciences and humanities, based on both the original discourses of "critical theory" as developed after WWII by the Frankfurt School, and the "new critical theory" in its interdisciplinary scope. This approach to religion will address topics such as class, race, gender, ethnicity, politics, globalization, and decolonialization. Students pursuing this specialization will choose their courses from a prescribed list of courses both inside and outside of the Religious Studies department. At least 8 of the 16 required credit hours for the specialization must have a RLGS prefix, though a cross-listed course may count. The following is a non-exhaustive sample of courses that meet the Critical Theory specialization criteria. Students will consult with the department's graduate advising team prior to each registration period to confirm whether their courses meet the Critical Theory criteria.

ANTH 3020	Native Religions	
ANTH 3060	Cultural Narratives	
ECON 3040	Marxian Political Economy	
PHIL 3005	Cosmopolitics	
PHIL 3075	Marxism	
PHIL 3210	Philosophy of Movement	
PHIL 3466	Contemporary Continental Philosophy	
RLGS 3302	Islamic Fundamentalism	
RLGS 3370	Freud, Psychology, & Religion	
RLGS 3452	Political Theology	
RLGS 3453	Is God a Racist Sexist?: Black Liberation and Womanist Theology	
RLGS 3454	Capitalism, Religion, Democracy	
RLGS 3460	Nietzsche & the Death of God	
RLGS 3465	Derrida and Postmodernism	
RLGS 3475	Deleuze and Semiotics	
RLGS 3570	Religion and Morality in the American Public Square	
RLGS 3645	Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism	
RLGS 3694	Religion in the Virtual Space: A Critical Theory Approach	
RLGS 3707	Religion and Film	
RLGS 3740	Bodies and Souls	

Sacred Texts

The Sacred Texts specialization focuses on biblical texts/religious traditions such as the Hebrew Bible, Christian Testament, the Qur'an, etc. Within this specialization, students will choose either to direct their study to one religious text, requiring appropriate competency in the relevant language (s), or take a comparative approach. The language requirement for this specialization must be completed either prior to matriculation, or during the student's first year of study, and is equivalent to one full-year of language instruction. The University of Denver does not offer introductory, graduate-level instruction in biblical Hebrew, koine Greek, Qur'anic Arabic, Sanskrit, classical Chinese, or Tibetan. The student may not use language instruction credit to satisfy degree requirements. Any student looking to pursue this specialization must consult the department's graduate advising team to discuss options such as outside language programs. The following is a sample of coursework used to fulfill the required 16 credit hours for the Sacred Texts specialization.

RLGS 3150	The Bible & Dead Sea Scrolls
RLGS 3151	Dead Sea Scrolls
RLGS 3192	Christian Literature
RLGS 3503	Quran and Hadith
RLGS 3740	Bodies and Souls

#### Religion and International Studies

The specialization in religion and international studies focuses on the role of religion in the interplay of different religions and cultures within a global context. Particular attention may be given to certain regions such as the Americas, Asia, or the Middle East, depending on the interest or availability of faculty. Students must take at least one course in a specific religious tradition beyond the core requirements as well as one course in the theory of religion that pertains to international and multicultural studies. The remaining courses can be chosen from the department's approved list of courses for the area of specialization. Finally, students must take at least 4 hours of course work (including independent study, service learning, or field work) at a location outside the United States and Canada that meet the student's curricular and long-term professional goals. Depending on the student's program of study, the department may in certain instances require the passing of a competency exam in a language relevant to that program of study (e.g., if the focus is on the Middle East, the language would be Arabic; if on Latin America, Spanish).

RLGS 3302	Islamic Fundamentalism
RLGS 3350	Culture, Psyche, and Religion
RLGS 3452	Political Theology
RLGS 3454	Capitalism, Religion, Democracy
RLGS 3500	Islam
RLGS 3502	Contemporary Islam
RLGS 3503	Quran and Hadith
RLGS 3504	Islam and Gender
RLGS 3645	Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism
RLGS 3707	Religion and Film
RLGS 3760	Globalization and Religion: Theory and Methods
RLGS 3814	Modern Hinduism
RLGS 3832	Religious Lives: The Dalai Lamas
RLGS 3890	Religion and Diaspora
RLGS 3893	Buddhism and Social Justice
ANTH 3020	Native Religions
INTS 4011	Comparative Genocide
INTS 4525	Religion-State Relations in Comparative Perspectives
INTS 4517	Politics of Deeply Divided Societies
INTS 4526	Modern Islamic Political Thought
INTS 4649	Human Rights and the Middle East

#### Lived Religions

The Lived Religions area of specialization allows students to attend closely to the practice of religions, as well as to activities and ways of life that may have had their origins in religions but may now be detached from specific traditions (e.g., meditation, dietary practices). In addition to the core requirements, students must take at least four courses (within or outside the department) in the historical, social, and cultural forms and practices of the world's various religions, which can include new, indigenous, Latino/a, or African and African diasporic religions. Students pursuing a specialization in Lived Religions will meet with the department's advising team prior to registration to verify that their courses meet the Lived Religions criteria.

RLGS 3001	Judaism
RLGS 3102	Early Judaism
RLGS 3203	Christianity
RLGS 3205	Native Americans and Christianity in USA

RLGS 3300	Psychology of Religion
RLGS 3302	Islamic Fundamentalism
RLGS 3350	Culture, Psyche, and Religion
RLGS 3500	Islam
RLGS 3502	Contemporary Islam
RLGS 3570	Religion and Morality in the American Public Square
RLGS 3832	Religious Lives: The Dalai Lamas
RLGS 3814	Modern Hinduism
RLGS 3820	Buddhism
RLGS 3890	Religion and Diaspora

#### Philosophy of Religion

Students pursuing a specialization in Philosophy of Religion may take courses in both the Religious Studies and Philosophy departments. Students are required to select at least 8 credit hours of coursework in the theory of religion, and 4 credit hours from each of two major philosophical periods (8 credit hours total), which can focus on one specific philosopher or philosophers. The philosophical periods are Ancient to Modern (Plato to Kant) and Late Modern to Postmodern (Hegel to present). Students pursuing this specialization will meet with the department's graduate advising team to discuss course selection prior to the start of their first term. The following is a non-exhaustive sample of coursework taken to satisfy the requirements of the Philosophy of Religion specialization.

RLGS 3023	Great Thinkers: Maimonides
RLGS 3192	Christian Literature
RLGS 3370	Freud, Psychology, & Religion
RLGS 3452	Political Theology
RLGS 3460	Nietzsche & the Death of God
RLGS 3465	Derrida and Postmodernism
RLGS 3475	Deleuze and Semiotics

<b>Elective Credits</b>	<b>13</b>
-------------------------	-----------

<b>Total Credits</b>	<b>45</b>
----------------------	-----------

Minimum number of credits required for the degree: 45

Students must declare an Area of Specialization by the time they reach 32 hours of coursework.

#### Non-Coursework Requirements

In order to complete the MA degree, students must choose one of the following completion options:

- Journal Article Track:** The journal article option requires students to take a research paper they submitted as part of a Religious Studies course and expand it into a publishable journal article. Only a course with the prefix RLGS is eligible, unless the student has a compelling case for why a paper without that prefix should be used. Students selecting this option will research Religious Studies academic journals and will select an appropriate target journal with the approval of their advisor. They will shape their article in accordance with the aims and mission of the selected journal, and will format it in accordance with the journal's submission guidelines. The student will submit the final paper to their committee, and present the research as part of an oral presentation. Please note that the department does not require the student to publish the article, or to have it accepted for publication, in that journal. However, it must be the decision of the examining committee that the article meets the standards of the chosen journal.
- Thesis Track:** The thesis option requires students to take a religious studies course paper including original research, on which the student received a minimum grade of A-, and revise and expand it into a graduate thesis of approximately 50-60 pages. The thesis may be expanded based on the number of bibliographic materials used as well as the scope of the topic itself. Students should not try to alter the general topic of the original paper in any major way. The thesis involves a substantive undertaking that allows the student to make an original contribution to the field of scholarly religious studies, as well as to demonstrate a mastery of the relevant theories and background literature. It should involve serious engagement with primary sources, as well as sources in the student's research language, if appropriate. In order to be eligible to write a thesis, a student must agree on a topic as well as a tentative thesis title with the project's first reader *no later than* the end of the quarter in which the student will have completed 24 hours of credit toward the degree. Normally, that means the end of the spring quarter during the academic year when the student entered the program. In addition, students must have completed all their core requirements for the degree by that time.
- Comprehensive Exam Track:** The comprehensive exam option is recommended for students for whom the MA is a terminal degree. It is also recommended for those who plan to teach at the secondary school or community college level, or who might otherwise benefit from the certification of competency in the general field of Religious Studies. Students choosing this option will take ONE exam in the Theory of Religion; ONE in Judaism, Christianity, OR Islam; and ONE in Buddhism OR Hinduism. The department will provide the set reading lists for each exam – approximately 10-12 texts each. The department expects the students

to read, analyze, and reflect upon each text and its contribution to each field, as part of their preparation to demonstrate competency in the three fields.

Students planning to take comprehensive exams should meet for a final check-in with their advisor and examiners during the fourth week of the quarter before the one in which they intend to graduate. Students will normally take their exams during the fourth or fifth week of the quarter in which they intend to graduate. The student must opt no later than the last week of the quarter before taking exams whether they want to take three, 3-hour examinations in a proctored setting or three 72-hour take home-exams over a period of two weeks. In both exam formats, students may consult texts and/or notes. Take-home exams will require substantially more writing than proctored exams.

- **Project Track:** Students pursuing the project option will develop a project that will allow them to make an original contribution to the field of applied religious studies. It may take several forms but should include a substantive written component and a formal presentation.

Please note that all completion option defenses and presentations may only be scheduled during the regular academic year: Fall, winter or spring quarters.

The Department of Religious Studies allows graduate students to transfer up to 10 hours of previous graduate course work from another institution or another department at the University during the first quarter of the student's admission to the program. The transfer must be approved by the department as well as by the Office of Graduate Education. Similarly, the Department allows students to earn waivers for the traditions requirements by submitting syllabi from similar courses taken at the undergraduate level.

Students may also take up to 15 hours in independent study, including independent studies with course numbers outside of the department.

## Graduate Certificate Program

### Certificate in Religious Studies

The Graduate Certificate program allows students structured flexibility, providing exposure to religious traditions through the traditions requirement, training in the discipline of religious studies with the theory requirement, and the opportunity to pursue particular interests through elective courses. The certificate requires a minimum of 24 credit hours.

#### Program Requirements

##### Coursework Requirements

Students choose three courses from RLGS 3000-level courses		12
<b>Total Credits</b>		<b>24</b>

Minimum number of credits required for the degree: 24

## Certificate of Specialization Program

### Certificate of Specialization in Religion and International Affairs

This certificate program provides students pursuing an MA degree in the Department of Religious Studies (CAHSS) or the Joseph Korbel School of International Studies the opportunity to enhance their "home program" with coursework that emphasizes scholarly and practitioner approaches to understanding the intersections between religion and international affairs in the modern world.

This certificate requires a minimum of 24 credit hours.

<b>Total Credits</b>		<b>16</b>

#### RLGS 3001 Judaism (4 Credits)

A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with JUST 3001.

#### RLGS 3002 Creation & Humanity (4 Credits)

Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity's role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity's relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

**RLGS 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)**

The "Abrahamic Traditions" (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions – Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with JUST 3003.

**RLGS 3023 Great Thinkers: Maimonides (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**RLGS 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and PHIL 3024. Prerequisite: Junior standing or instructor's permission.

**RLGS 3086 The Emergence of Monotheism (4 Credits)**

This course is cross-listed with JUST 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

**RLGS 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and ANTH 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**RLGS 3102 Early Judaism (4 Credits)**

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with JUST 3102.

**RLGS 3150 The Bible & Dead Sea Scrolls (4 Credits)**

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with JUST 3150. Prerequisites: None. The Scrolls will be read in English translation, but those with Hebrew reading skills will have an opportunity to read/translate portions of the Scrolls in community.

**RLGS 3151 Dead Sea Scrolls (4 Credits)**

The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with JUST 3151.

**RLGS 3192 Christian Literature (4 Credits)**

Reading and discussion of influential historic books pertaining to Christianity. This course will focus on a selection of primary texts either from a specific period of Christianity (such as early Christianity or medieval Christianity) or on a specific topic within the study of Christianity (such as monasticism or mysticism).

**RLGS 3203 Christianity (4 Credits)**

This is an introductory course about the Christian religion, with a substantial component devoted to experiential learning. The primary goal of the course is to acquaint students with the richness, dynamism and diversity of one of the world's largest and most influential religious traditions. Even those students who have some general knowledge of Christianity benefit from the disciplined approach of the academic study of religion.

**RLGS 3205 Native Americans and Christianity in USA (4 Credits)**

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed "contextualized" forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

**RLGS 3300 Psychology of Religion (4 Credits)**

Beliefs, feelings and actions representing human religious response of experience; function of religion in individual life.

**RLGS 3302 Islamic Fundamentalism (4 Credits)**

This writing-intensive course introduces students to the history and scope of fundamentalist movements in the Muslim world, focusing on the Middle East. Beginning with a look at the internal traditions of renewal and reform built around the idea of a return to the fundament or origins of Islam, the course examines the rise of major movements from the 1700s to the present. Students will engage with key questions, including the following: What distinguishes fundamentalism from radicalism? How do Sunni and Shii fundamentalisms differ? What roles have these movements played in politics and society, and how might these evolve in the future? How might policy makers and others best approach fundamentalist groups? A basic knowledge of Islam is assumed; students wishing to enroll without this background knowledge will be provided supplementary readings.

**RLGS 3315 Religion & Moral Psychology (4 Credits)**

Philosophical foundations and research strategies of psychological studies of moral thought; Aristotelian, Kantian and utilitarian thought included, as well as religious dimensions of morality.

**RLGS 3350 Culture, Psyche, and Religion (4 Credits)****RLGS 3370 Freud, Psychology, & Religion (4 Credits)**

Readings, discussion, and papers help students learn about the life, intellectual and social environment, and clinical and theoretical work of Sigmund Freud. Attention is given to the influence of Freud's work on the understanding of religion at the beginning of the 21st century.

**RLGS 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and "subjectification" (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled The Hermeneutics of the Subject. This course is cross-listed with PHIL 3448.

**RLGS 3452 Political Theology (4 Credits)**

A general inquiry, focusing on the modern and postmodern eras, into various forms of philosophical reflection on the relationship between religion and political theory. Survey of the seminal ideas of such major thinkers as Kant, Hegel, Schmidt, Strauss, Derrida, Agamben, Asad, and Žižek.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3454 Capitalism, Religion, Democracy (4 Credits)**

The course explores the historical and contemporary relationship between capitalism, religion, and democracy at a theoretical level. Focus will be on the question of what exactly is capitalism as understood by key political philosophers and social theorists in relationship to the religious world views and values that authorize it. At the same time, the course will examine in what measure these world views and values also promote liberal democracy, or work against it, while offering a genealogical account of such phenomena as slavery, colonialism, gender and class domination, along with present day iterations of ethno-nationalism and neoliberal hegemony.

**RLGS 3456 Kant on Religion (4 Credits)**

A study of the philosopher Immanuel Kant's major writings on religion and their subsequent influence on critical theory and the philosophy of religion.

**RLGS 3460 Nietzsche & the Death of God (4 Credits)**

This course will involve an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Cross listed with PHIL 3460.

**RLGS 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with PHIL 3465.

**RLGS 3470 Mysticism & Psychedelics (4 Credits)**

The course will examine various texts, traditions, and practice from indigenous to New Age religions that fall under the general category of what has been historically labelled "mysticism." Special emphasis will be placed on chemical or plant-induced forms of altered consciousness, commonly known as "psychedelics" or "entheogens". that both simulate, and are frequently employed by different peoples in different times and places in tandem with, mystical experiences. The course will also examine the transcultural as well as the syncretic nature of mystical practices, spiritual disciplines, and the use of mind-altering substances, in particular with reference to the misuse of these forms by secular enthusiasts who are responsible for what is known as "cultural appropriation" or "neocolonial" misrepresentation.

**RLGS 3475 Deleuze and Semiotics (4 Credits)**

Examines the development of the thought of the famous French postmodern thinker Gilles Deleuze with special attention to his cultural and semiotic theory to the degree that it is relevant to the philosophy of religion. The course also investigates how Deleuze's work has shaped, and is beginning to push in new directions, contemporary postmodern philosophy. Prerequisites: must be at least junior standing and have completed at least two undergraduate courses in philosophy.

**RLGS 3500 Islam (4 Credits)**

Introduction to the history, faith, practice, culture(s), and politics of Islam, starting with the Judeo-Christian Near Eastern context in which it emerged and tracing its theological development and geographic spread around the world. Proceeding thematically along a broad historical frame, the course ends with an examination of the numerous, often competing, trends in contemporary Muslim communities.

**RLGS 3502 Contemporary Islam (4 Credits)**

This course introduces students to contemporary Islam. After a historical overview, the course looks thematically at different spheres of Muslim life. It considers changes that relate to political systems and forms of governance, styles of education, labor and professional work, changes in daily life habits such as timing and organization, changes in gender relations, and changes in religious authority. It also pays attention to the ways in which faith and practice are articulated through cultural practices like pop music and film.

**RLGS 3503 Quran and Hadith (4 Credits)**

This writing-intensive course introduces students to the key texts of Islam--the Qur'an and hadith--including their origins and meaning as well as how they have been interpreted by Muslims over time, and focusing as well on case studies that highlight issues of crucial relevance for today and the future.

**RLGS 3504 Islam and Gender (4 Credits)**

This upper-level course introduces students to key debates, historical developments, and thematic issues in the study of Islam and gender. It grounds this study in theoretical texts but takes a lived religions approach, focusing primarily on the production of "modern" gender norms in the colonial and post-colonial era. It proceeds thematically, with class sessions on sexualities, dress, reproduction, family roles, masculinities, pious self-construction, and the gendering of pilgrimage, and concludes with a look at contemporary and likely future debates.

**RLGS 3505 Gender and Politics in Muslim Pop Cultures (4 Credits)**

This undergraduate/graduate course introduces students to contemporary Muslim popular cultures, in the United States and around the world. It uses gender and politics as thematic lenses, taking a lived religions approach to phenomena that range from pious television programming to online efforts to spread Islamophobia.

**RLGS 3570 Religion and Morality in the American Public Square (4 Credits)**

Close focus on one or two moral issues in which religion is drawn into public debate in the contemporary U.S. Observation of the debate first hand at demonstrations, town meetings, and discussion groups, etc. Analysis of these observations is facilitated by readings on the subject and class discussion.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**RLGS 3645 Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism (4 Credits)**

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as "religion", "nationalism", and "secular" in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

**RLGS 3693 Religion and the Media (4 Credits)**

Interactions between religion and all forms of communications media in American life.

**RLGS 3694 Religion in the Virtual Space: A Critical Theory Approach (4 Credits)**

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netnography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacques Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

**RLGS 3695 Digital Religion (4 Credits)**

This course introduces students to the study of digital religion from a lived religions perspective. It begins with an examination of the history, concepts and methods of the field, and continues with thematic explorations of digital religion scholarship across varied religious traditions. Students develop an understanding of how scholars study religion and spiritual identities, beliefs, and practices online, and how the religious and digital arenas influence and shape one another.

**RLGS 3701 Topics in Religious Studies (1-4 Credits)**

An exploration of various topics and issues related to the academic study of religion. The subject matter of the course varies and may be taught by the regular faculty of the department or a visiting scholar. Some offerings may include a travel component.

**RLGS 3707 Religion and Film (4 Credits)**

Understanding religion requires us to take culture seriously. In doing so, we must consider products of culture, including popular culture. This course engages both classic and more recent films as "texts" to be analyzed, not as mere entertainments or diversions. We focus not only on those films that identify themselves explicitly as "religious" or reflect a particular religious tradition, but also moved that render the subject more obliquely, which reveal – via image and sound – religion as a complex human activity.

**RLGS 3708 First Americans in Film: Religion, Land, and Identity (4 Credits)**

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

**RLGS 3732 Feminist and Queer Theory in Religion (4 Credits)**

This course explores the intersection of feminist and queer theories with religious studies. Beginning with feminist theory, we will trace the beginning of the feminist movement and consider the ways in which religion participated in and also resisted feminism. Moving into queer theory, we will critically examine gender and sexuality and center these topics in the field of religious studies. During the course, students will reinterpret religious texts through the use of feminist and queer theory, providing a challenging critique, an imaginative reframing, or even a queering of a sacred text.

**RLGS 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.

**RLGS 3760 Globalization and Religion: Theory and Methods (4 Credits)**

This course explores how religious movements around the world both affect, and are affected by, the process of globalization. A major segment of the course is devoted to various theories of globalization and how they account for the increasingly important role of religion. Focus is largely on the relationship between Christianity, Judaism, and Islam.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism.

**RLGS 3820 Buddhism (4 Credits)**

Buddhist life and thought from origins to present in India, Tibet, Japan and China.

**RLGS 3832 Religious Lives: The Dalai Lamas (4 Credits)**

This course explores the many lives of the Dalai Lamas and the transformation of a reincarnated religious teacher into the political leader of Tibet and, eventually, a worldwide religious personality. In order to understand that transformation, the course investigates the institution of the Dalai Lamas from historical, doctrinal, and ritual perspectives. We will look at the role of the Dalai Lama as an embodiment of the bodhisattva of compassion at the center of a tapestry of religious ceremony and ritual performances. The course will also consider the religious, ethical, and political thought of several of the most prominent Dalai Lamas, with significant attention given to the writings and work of the current, fourteenth, Dalai Lama.

**RLGS 3885 Islamic Mysticism (4 Credits)**

The origins and development of Islamic mysticism, including asceticism and the Sufi orders.

**RLGS 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

**RLGS 3891 Justice: A Biblical Perspective (4 Credits)**

This is a service learning course designed for religious studies undergraduate majors, though non-majors are welcome to enroll. Cross listed with JUST 3891.

**RLGS 3892 Grant Writing for Community Engagement and Research (4 Credits)**

This community engagement course introduces student to non-profit work and to scholarship on non-profit activities. It connects students with community partners, continuing the department's commitment to experiential learning and to engagement with living faith communities. Students spend course time discussing scholarship on grant writing and non-profit grant support and discussing logistical and other issues related to their community engagement partners. This course is intended to help provide advanced undergraduate and graduate students with arenas for future research, including possible thesis topics, while also offering a practical opportunity for professional development. Understanding 501(c)3 corporations and experience in writing grant proposals will be an asset for students planning to work in non-profits as well as for those continuing on to doctoral work.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**

This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**RLGS 3898 Dharamsala: Myth, Land, and Traditions (4 Credits)**

This course explores the myths and stories that root cultural, religious, social and political traditions in the material landscape of India. It will explore the sacred spaces, images, rituals, and belief-traditions of the Himalayan region surrounding Dharamsala, India. As a study-abroad course, the materials, site visits, and community-engaged learning projects interrogate how myths operate as both cultural "glue" and demarcations of difference. Students participate in community-engaged learning placements to learn how myth creates and fosters cultural communities. Through site visits and readings we will learn how the "lived experience" of cultural belief-traditions, social and political practices, and sacred images and spaces are products of a unique marriage of land, story, and community. We will also have lectures and a Canvas site with pre-travel readings that will prepare you for the cultural and social belief-traditions we will encounter within Dharamsala. While in India, we will continue to read about ritual, devotion, stories of the land, social and political identities rooted in the land, and more. This course will be cross-listed with INTS for undergraduate and graduate elective credit.

**RLGS 3991 Independent Study (1-10 Credits)****RLGS 3995 Independent Research (1-10 Credits)****RLGS 4050 History of Islam (4 Credits)****RLGS 4100 Hebrew Bible Backgrounds: Seminar in Ancient Israelite Religion (4 Credits)**

This course is designed to train the student in the method and means of engaging in archeo-historical study of the Hebrew Bible. The content of this course focuses on ancient Israelite religion in Iron Age Palestine, particularly on emergent ideas about God ('El) and the development and evolution of the priesthood. Cross listed with JUST 4100.

**RLGS 4150 Biblical Aramaic (4 Credits)**

Reading seminar in Biblical Aramaic. This course focuses on the vocabulary, syntax and expression of Aramaic in the Bible as well as in some related post-biblical texts (Targums, Dead Sea Scrolls, etc.).

**RLGS 4980 Internship (1-4 Credits)**

Designed to provide masters students with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. For MA students only.

**RLGS 4981 Internship in Religious Community (1-4 Credits)****RLGS 4991 Independent Study (1-10 Credits)****RLGS 4995 Independent Research (1-10 Credits)****Courses****RLGS 3001 Judaism (4 Credits)**

A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with JUST 3001.

**RLGS 3002 Creation & Humanity (4 Credits)**

Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity's role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity's relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

**RLGS 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)**

The "Abrahamic Traditions" (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions — Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with JUST 3003.

**RLGS 3023 Great Thinkers: Maimonides (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**RLGS 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and PHIL 3024. Prerequisite: Junior standing or instructor's permission.

**RLGS 3086 The Emergence of Monotheism (4 Credits)**

This course is cross-listed with JUST 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

**RLGS 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and ANTH 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**RLGS 3102 Early Judaism (4 Credits)**

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with JUST 3102.

**RLGS 3150 The Bible & Dead Sea Scrolls (4 Credits)**

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with JUST 3150. Prerequisites: None. The Scrolls will be read in English translation, but those with Hebrew reading skills will have an opportunity to read/translate portions of the Scrolls in community.

**RLGS 3151 Dead Sea Scrolls (4 Credits)**

The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with JUST 3151.

**RLGS 3192 Christian Literature (4 Credits)**

Reading and discussion of influential historic books pertaining to Christianity. This course will focus on a selection of primary texts either from a specific period of Christianity (such as early Christianity or medieval Christianity) or on a specific topic within the study of Christianity (such as monasticism or mysticism).

**RLGS 3203 Christianity (4 Credits)**

This is an introductory course about the Christian religion, with a substantial component devoted to experiential learning. The primary goal of the course is to acquaint students with the richness, dynamism and diversity of one of the world's largest and most influential religious traditions. Even those students who have some general knowledge of Christianity benefit from the disciplined approach of the academic study of religion.

**RLGS 3205 Native Americans and Christianity in USA (4 Credits)**

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed "contextualized" forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

**RLGS 3300 Psychology of Religion (4 Credits)**

Beliefs, feelings and actions representing human religious response of experience; function of religion in individual life.

**RLGS 3302 Islamic Fundamentalism (4 Credits)**

This writing-intensive course introduces students to the history and scope of fundamentalist movements in the Muslim world, focusing on the Middle East. Beginning with a look at the internal traditions of renewal and reform built around the idea of a return to the fundament or origins of Islam, the course examines the rise of major movements from the 1700s to the present. Students will engage with key questions, including the following: What distinguishes fundamentalism from radicalism? How do Sunni and Shii fundamentalisms differ? What roles have these movements played in politics and society, and how might these evolve in the future? How might policy makers and others best approach fundamentalist groups? A basic knowledge of Islam is assumed; students wishing to enroll without this background knowledge will be provided supplementary readings.

**RLGS 3315 Religion & Moral Psychology (4 Credits)**

Philosophical foundations and research strategies of psychological studies of moral thought; Aristotelian, Kantian and utilitarian thought included, as well as religious dimensions of morality.

**RLGS 3350 Culture, Psyche, and Religion (4 Credits)****RLGS 3370 Freud, Psychology, & Religion (4 Credits)**

Readings, discussion, and papers help students learn about the life, intellectual and social environment, and clinical and theoretical work of Sigmund Freud. Attention is given to the influence of Freud's work on the understanding of religion at the beginning of the 21st century.

**RLGS 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and "subjectification" (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled *The Hermeneutics of the Subject*. This course is cross-listed with PHIL 3448.

**RLGS 3452 Political Theology (4 Credits)**

A general inquiry, focusing on the modern and postmodern eras, into various forms of philosophical reflection on the relationship between religion and political theory. Survey of the seminal ideas of such major thinkers as Kant, Hegel, Schmidt, Strauss, Derrida, Agamben, Asad, and Žižek.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3454 Capitalism, Religion, Democracy (4 Credits)**

The course explores the historical and contemporary relationship between capitalism, religion, and democracy at a theoretical level. Focus will be on the question of what exactly is capitalism as understood by key political philosophers and social theorists in relationship to the religious world views and values that authorize it. At the same time, the course will examine in what measure these world views and values also promote liberal democracy, or work against it, while offering a genealogical account of such phenomena as slavery, colonialism, gender and class domination, along with present day iterations of ethno-nationalism and neoliberal hegemony.

**RLGS 3456 Kant on Religion (4 Credits)**

A study of the philosopher Immanuel Kant's major writings on religion and their subsequent influence on critical theory and the philosophy of religion.

**RLGS 3460 Nietzsche & the Death of God (4 Credits)**

This course will involve an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Cross listed with PHIL 3460.

**RLGS 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with PHIL 3465.

**RLGS 3470 Mysticism & Psychedelics (4 Credits)**

The course will examine various texts, traditions, and practice from indigenous to New Age religions that fall under the general category of what has been historically labelled "mysticism." Special emphasis will be placed on chemical or plant-induced forms of altered consciousness, commonly known as "psychedelics" or "entheogens". that both simulate, and are frequently employed by different peoples in different times and places in tandem with, mystical experiences. The course will also examine the transcultural as well as the syncretic nature of mystical practices, spiritual disciplines, and the use of mind-altering substances, in particular with reference to the misuse of these forms by secular enthusiasts who are responsible for what is known as "cultural appropriation" or "neocolonial" misrepresentation.

**RLGS 3475 Deleuze and Semiotics (4 Credits)**

Examines the development of the thought of the famous French postmodern thinker Gilles Deleuze with special attention to his cultural and semiotic theory to the degree that it is relevant to the philosophy of religion. The course also investigates how Deleuze's work has shaped, and is beginning to push in new directions, contemporary postmodern philosophy. Prerequisites: must be at least junior standing and have completed at least two undergraduate courses in philosophy.

**RLGS 3500 Islam (4 Credits)**

Introduction to the history, faith, practice, culture(s), and politics of Islam, starting with the Judeo-Christian Near Eastern context in which it emerged and tracing its theological development and geographic spread around the world. Proceeding thematically along a broad historical frame, the course ends with an examination of the numerous, often competing, trends in contemporary Muslim communities.

**RLGS 3502 Contemporary Islam (4 Credits)**

This course introduces students to contemporary Islam. After a historical overview, the course looks thematically at different spheres of Muslim life. It considers changes that relate to political systems and forms of governance, styles of education, labor and professional work, changes in daily life habits such as timing and organization, changes in gender relations, and changes in religious authority. It also pays attention to the ways in which faith and practice are articulated through cultural practices like pop music and film.

**RLGS 3503 Quran and Hadith (4 Credits)**

This writing-intensive course introduces students to the key texts of Islam--the Qur'an and hadith--including their origins and meaning as well as how they have been interpreted by Muslims over time, and focusing as well on case studies that highlight issues of crucial relevance for today and the future.

**RLGS 3504 Islam and Gender (4 Credits)**

This upper-level course introduces students to key debates, historical developments, and thematic issues in the study of Islam and gender. It grounds this study in theoretical texts but takes a lived religions approach, focusing primarily on the production of "modern" gender norms in the colonial and post-colonial era. It proceeds thematically, with class sessions on sexualities, dress, reproduction, family roles, masculinities, pious self-construction, and the gendering of pilgrimage, and concludes with a look at contemporary and likely future debates.

**RLGS 3505 Gender and Politics in Muslim Pop Cultures (4 Credits)**

This undergraduate/graduate course introduces students to contemporary Muslim popular cultures, in the United States and around the world. It uses gender and politics as thematic lenses, taking a lived religions approach to phenomena that range from pious television programming to online efforts to spread Islamophobia.

**RLGS 3570 Religion and Morality in the American Public Square (4 Credits)**

Close focus on one or two moral issues in which religion is drawn into public debate in the contemporary U.S. Observation of the debate first hand at demonstrations, town meetings, and discussion groups, etc. Analysis of these observations is facilitated by readings on the subject and class discussion.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**RLGS 3645 Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism (4 Credits)**

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as "religion", "nationalism", and "secular" in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

**RLGS 3693 Religion and the Media (4 Credits)**

Interactions between religion and all forms of communications media in American life.

**RLGS 3694 Religion in the Virtual Space: A Critical Theory Approach (4 Credits)**

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netnography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacques Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

**RLGS 3695 Digital Religion (4 Credits)**

This course introduces students to the study of digital religion from a lived religions perspective. It begins with an examination of the history, concepts and methods of the field, and continues with thematic explorations of digital religion scholarship across varied religious traditions. Students develop an understanding of how scholars study religion and spiritual identities, beliefs, and practices online, and how the religious and digital arenas influence and shape one another.

**RLGS 3701 Topics in Religious Studies (1-4 Credits)**

An exploration of various topics and issues related to the academic study of religion. The subject matter of the course varies and may be taught by the regular faculty of the department or a visiting scholar. Some offerings may include a travel component.

**RLGS 3707 Religion and Film (4 Credits)**

Understanding religion requires us to take culture seriously. In doing so, we must consider products of culture, including popular culture. This course engages both classic and more recent films as “texts” to be analyzed, not as mere entertainments or diversions. We focus not only on those films that identify themselves explicitly as “religious” or reflect a particular religious tradition, but also moved that render the subject more obliquely, which reveal – via image and sound – religion as a complex human activity.

**RLGS 3708 First Americans in Film: Religion, Land, and Identity (4 Credits)**

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

**RLGS 3732 Feminist and Queer Theory in Religion (4 Credits)**

This course explores the intersection of feminist and queer theories with religious studies. Beginning with feminist theory, we will trace the beginning of the feminist movement and consider the ways in which religion participated in and also resisted feminism. Moving into queer theory, we will critically examine gender and sexuality and center these topics in the field of religious studies. During the course, students will reinterpret religious texts through the use of feminist and queer theory, providing a challenging critique, an imaginative reframing, or even a queering of a sacred text.

**RLGS 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a “human” does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand “out-of-body” experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.

**RLGS 3760 Globalization and Religion: Theory and Methods (4 Credits)**

This course explores how religious movements around the world both affect, and are affected by, the process of globalization. A major segment of the course is devoted to various theories of globalization and how they account for the increasingly important role of religion. Focus is largely on the relationship between Christianity, Judaism, and Islam.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism.

**RLGS 3820 Buddhism (4 Credits)**

Buddhist life and thought from origins to present in India, Tibet, Japan and China.

**RLGS 3832 Religious Lives: The Dalai Lamas (4 Credits)**

This course explores the many lives of the Dalai Lamas and the transformation of a reincarnated religious teacher into the political leader of Tibet and, eventually, a worldwide religious personality. In order to understand that transformation, the course investigates the institution of the Dalai Lamas from historical, doctrinal, and ritual perspectives. We will look at the role of the Dalai Lama as an embodiment of the bodhisattva of compassion at the center of a tapestry of religious ceremony and ritual performances. The course will also consider the religious, ethical, and political thought of several of the most prominent Dalai Lamas, with significant attention given to the writings and work of the current, fourteenth, Dalai Lama.

**RLGS 3885 Islamic Mysticism (4 Credits)**

The origins and development of Islamic mysticism, including asceticism and the Sufi orders.

**RLGS 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

**RLGS 3891 Justice: A Biblical Perspective (4 Credits)**

This is a service learning course designed for religious studies undergraduate majors, though non-majors are welcome to enroll. Cross listed with JUST 3891.

**RLGS 3892 Grant Writing for Community Engagement and Research (4 Credits)**

This community engagement course introduces student to non-profit work and to scholarship on non-profit activities. It connects students with community partners, continuing the department's commitment to experiential learning and to engagement with living faith communities. Students spend course time discussing scholarship on grant writing and non-profit grant support and discussing logistical and other issues related to their community engagement partners. This course is intended to help provide advanced undergraduate and graduate students with arenas for future research, including possible thesis topics, while also offering a practical opportunity for professional development. Understanding 501(c)3 corporations and experience in writing grant proposals will be an asset for students planning to work in non-profits as well as for those continuing on to doctoral work.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**

This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**RLGS 3898 Dharamsala: Myth, Land, and Traditions (4 Credits)**

This course explores the myths and stories that root cultural, religious, social and political traditions in the material landscape of India. It will explore the sacred spaces, images, rituals, and belief-traditions of the Himalayan region surrounding Dharamsala, India. As a study-abroad course, the materials, site visits, and community-engaged learning projects interrogate how myths operate as both cultural "glue" and demarcations of difference. Students participate in community-engaged learning placements to learn how myth creates and fosters cultural communities. Through site visits and readings we will learn how the "lived experience" of cultural belief-traditions, social and political practices, and sacred images and spaces are products of a unique marriage of land, story, and community. We will also have lectures and a Canvas site with pre-travel readings that will prepare you for the cultural and social belief-traditions we will encounter within Dharamsala. While in India, we will continue to read about ritual, devotion, stories of the land, social and political identities rooted in the land, and more. This course will be cross-listed with INTS for undergraduate and graduate elective credit.

**RLGS 3991 Independent Study (1-10 Credits)****RLGS 3995 Independent Research (1-10 Credits)****RLGS 4050 History of Islam (4 Credits)****RLGS 4100 Hebrew Bible Backgrounds: Seminar in Ancient Israelite Religion (4 Credits)**

This course is designed to train the student in the method and means of engaging in archeo-historical study of the Hebrew Bible. The content of this course focuses on ancient Israelite religion in Iron Age Palestine, particularly on emergent ideas about God ('El) and the development and evolution of the priesthood. Cross listed with JUST 4100.

**RLGS 4150 Biblical Aramaic (4 Credits)**

Reading seminar in Biblical Aramaic. This course focuses on the vocabulary, syntax and expression of Aramaic in the Bible as well as in some related post-biblical texts (Targums, Dead Sea Scrolls, etc.).

**RLGS 4980 Internship (1-4 Credits)**

Designed to provide masters students with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. For MA students only.

**RLGS 4981 Internship in Religious Community (1-4 Credits)****RLGS 4991 Independent Study (1-10 Credits)****RLGS 4995 Independent Research (1-10 Credits)**

## Daniel Felix Ritchie School of Engineering and Computer Science

The Daniel Felix Ritchie School of Computer Science and Engineering is dedicated to preparing the next generation of innovators to build solutions for some of the world's most challenging problems. We not only ask "can we do this?" but also "should we do this?" and "how can we make a difference for the public good?". Research forms the backbone of graduate education in the Ritchie School. Our researchers work to design new artificial joints, create educational games and develop renewable energy systems. We impact fields ranging from cardiac health to cybersecurity to robotics. In addition to our traditional thesis-based graduate programs, we offer professional graduate programs in Cybersecurity, Data Science, and Systems Engineering to help you build the skills employers need and want. Throughout all our programs we prioritize social responsibility, inclusive excellence, ethical applications of technology.

## Master's and Doctoral degrees

### Why study Computer Science at the University of Denver?

DU's Department of Computer Science (CS) is creating the future of technology by providing a graduate education that emphasizes both multi-disciplinary and cross-disciplinary knowledge. The distinguished faculty are creating multi-disciplinary education programs that cover both depth and breadth, and research programs that incorporate and account for technological trends in research and development, along with industry. Graduate students join the faculty in conducting cutting-edge basic and applied research in emerging disciplines developing novel and unique solutions to old and new problems and opportunities. Additionally, students are not required to have a computer science background as we offer foundational courses to prepare students for the road ahead.

All laboratories in the Department contain state-of-the-art equipment and software to support research in algorithms, artificial intelligence, computational geometry, humane games, networks, programming languages, robotics, human-robot interaction, security and privacy, and software engineering, among other research areas. Small classes support our multi-disciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students' individual career goals.

Denver is a first-rate location for business, government and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and DU is located just minutes from the Denver Technological Center, the site of many top technology companies. The Department of Computer Science is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector that is second to none!

### Degree Programs

We offer the following graduate computer science degrees:

- MS in Computer Science
- MS in Cybersecurity
- MS in Data Science
- PhD in Computer Science

## Doctor of Philosophy in Computer Science

The PhD in Computer Science is, above all, a research degree. When the faculty award a PhD, they certify that the student has a broad foundation and awareness of core concepts in computer science, has advanced the field by performing significant original research and has reported that work in a scholarly fashion. Through this degree, students will be qualified to hold academic positions at universities across the world, to lead research groups in government or industry research laboratories, to be creators of new ideas and approaches in computer science through research, and to be leaders in technology. Our faculty are strong in research and particularly noted in software engineering, robotics, cybersecurity and privacy, and humane games.

## Master of Science in Computer Science

The MS in Computer Science prepares students for advancement in academic or industrial careers. The program is designed to provide students with a breadth of advanced knowledge in computer science, while permitting them to achieve depth in areas of current interest within the computing field through electives, as well as the emerging technologies that will have great importance in the future. Students of this degree will be eminently qualified for more advanced careers using computer science given the ubiquitous nature of computing today in every single discipline. Students may also pursue a thesis option, enabling them to begin to perform research and be prepared for a PhD in Computer Science or related discipline.

## Master of Science in Cybersecurity

The MS in Cybersecurity prepares students for a change of careers into the cybersecurity field, or for advancement of a current career. Malicious actors, from small-time hackers to nation states, are an ever present threat to users on the internet today. Cybersecurity expertise is invaluable in any field, as nearly all important personal information is stored online and business is increasingly done online. The cybersecurity MS program is designed to provide students with a strong technical foundation in computer science, along with advanced domain knowledge in the field of cybersecurity.

## Master of Science in Data Science

The MS in Data Science prepares students for advancement in professional careers. Data Scientists enable knowledge discovery in almost all of the subfields of science, social science, business, and policy. As businesses and government continue to turn to data-informed decision making,

data scientists will become more necessary and influential within society as a whole. This program is designed to provide students with a breadth of knowledge in computer science, probability and statistics, data management and exploration, and machine learning, as well as the emerging technologies that will be gaining importance in the future.

## Doctor of Philosophy in Computer Science

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- **Program GPA requirement:** The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites:

- Prerequisite courses for the PhD include: COMP 1671 Introduction to Computer Science I, COMP 1672 Introduction to Computer Science II, COMP 2673 Introduction to Computer Science III, COMP 2300 Discrete Structures in Computer Science, COMP 2370 Introduction to Algorithms & Data Structures, and COMP 2691 Introduction to Computer Organization (or equivalent).

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Science in Computer Science

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. ## Master of Science in Cybersecurity

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Applicants must have the prerequisite knowledge equivalent to an undergraduate minor or greater in computer science and are required to pass a computer science placement exam prior to matriculation into the graduate program. Students with deficiencies will be eligible to complete the foundational courses or pass the computer science placement exam prior to matriculation. The foundational courses are COMP 3003: Foundations in Computer Systems, COMP 3004: Foundational in Discrete Structures & Algorithms, and COMP 3005: Foundations in Python Programming.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Science in Data Science

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.

- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

# Doctoral Program

## Doctor of Philosophy in Computer Science

### Degree Requirements

#### Coursework Requirements

Code	Title	Credits
	Three quarters minimum of COMP 4600 : Seminar in Computer Science	
	At least 36 credits must be at the 4000-level courses	
	Up to 24 credits may be taken in other relevant disciplines, as approved by the Computer Science Department Graduate Committee.	
	Courses should be chosen in consultation with, and are subject to the approval of, the student's advisor.	
<b>Total Credits</b>		<b>90</b>

Minimum credit hours required: 90 beyond BA or BS degree

#### Additional degree requirements applicable to PhD students without a master's degree in Computer Science

- Must complete the requirements of the Master of Science in Computer Science with a thesis at a reasonable pace to remain on pace to complete the PhD in Computer Science on the expected timeline established by the advisor.

#### Additional Degree Requirements applicable to PhD Students with a 2-year master's degree in Computer Science or related field

- May take a proficiency test in the four required courses for master's degree (COMP 3351 Programming Languages, COMP 3361 Operating Systems I, COMP 3371 Data Structures & Algorithms and COMP 3200 Discrete Structures). The test may be offered at a time other than the official final exam time of the term. A grade of B+ (B plus) or better must be obtained in the test.
- If the student chooses not to take the proficiency test, the student must register and attend classes for the four required courses (COMP 3351 Programming Languages, COMP 3361 Operating Systems I, COMP 3371 Data Structures & Algorithms and COMP 3200 Discrete Structures). A grade of B+ (B plus) or better must be obtained in the courses.

#### Non-coursework Requirements:

- Written dissertation and oral defense that makes a significant contribution to the research literature in computer sciences
- Tool requirement
- Qualifying examination
- Preliminary examination

#### Qualifying & Dissertation Examinations

##### Qualifying Examination

Every PhD student must pass the qualifying exam. It consists of two parts, the breadth requirement and the written and oral exam.

1. Breadth Requirement: To fulfill the breadth requirement the student must take 5 graded courses (20 quarter credits) at the 3000- and 4000-level (not including independent study, internship, or independent research). At most, two may be at the 3000-level. At least three must be at the 4000-level. The course work should cover at least three distinct areas. Five areas should include a sequence of 3000- and 4000-level courses. The GPA in these courses must be at least 3.7/4.0. No course with a grade below a B may be used to fulfill this requirement. Graduate Computer Science courses taken at another university and transferred for credit at DU may be applied to the breadth requirement up to a maximum of 2 courses (8 quarter credits).
2. Written and Oral Exam: Before being admitted to this exam, the student must have fulfilled the breadth requirement.

The student selects an area of examination from the list of areas in Table 1. The written part of the exam is a take-home exam. It is handed out on a Friday and is due the following Tuesday. The oral exam is held the following Friday. The take-home exam consists of a set of research questions, a set of related papers and instructions. The student should prepare a written report of at least 10 but no more than 20 pages with answers to the questions. Study guides or other relevant material to prepare for the exam can be obtained from the chair of the examination committee. The oral portion of the exam is based on a student presentation in which the student explains and defends his/her answers. During the oral exam, questions in other areas of computer science may also be asked.

A failed exam may be retaken once (in the same or another area). Sufficiently prior to the exam date, the department chair will appoint an examination committee of three tenure-track faculty. One of the committee members must be in the area in which the examination will be held. The student's advisor is allowed to be on the committee. The committee creates the take home exam and grades it. After the oral exam, the committee makes a recommendation to the Computer Science faculty on whether the student passes or fails. If the faculty agrees, the committee recommendation stands. If there is a disagreement, the faculty as a whole decides.

### Preliminary Examination

Following successful completion of the Qualifying Examination, each student will prepare a dissertation proposal and take the preliminary examination. Passing this examination admits the student to Ph.D. candidacy. The dissertation proposal should be prepared in close consultation with the student's advisor and should be available to all committee members at least two weeks prior to the examination. It should reflect an extensive critical literature survey, and contain an accurate assessment of the state-of-the-art in the area of research, a precise statement of the problem to be solved, motivation for pursuing the research, and evidence to the effect that there is a good likelihood the problem is solvable with reasonable effort.

For full-time students, the preliminary examination must be taken within 5 quarters of passing the qualifying examination. Successful completion of the preliminary examination results in agreement between the student and the committee as to what will constitute successful completion of the dissertation research. The committee may choose to reconvene the examination to allow the student to further research the problem, complete additional course work, or revise the dissertation proposal document.

The examining committee consists of at least three Computer Science faculty members, including the advisor. The preliminary exam is a one hour oral closed exam. If a student passed the preliminary exam, but subsequently switches advisor and hence topic, the preliminary exam must be repeated within one year to ensure capability of the student and feasibility of the project.

### Dissertation Defense

After the dissertation has been completed, the student must defend it in a final examination, as specified by the Office of Graduate Studies.

### Tool Requirement

It is strongly recommended that students satisfy their tool requirement by demonstrating proficiency in a modern computer typesetting system suitable for writing technical papers that include mathematical equations and graphics. The faculty advisor must approve the specific system used to satisfy this requirement. Other options include reading competency in two languages selected from French, German, and Russian; a series of outside courses in another discipline; or significant laboratory experience involving computer science.

## Master's Degree Programs

### Master of Science in Computer Science

#### Degree Requirements

##### Coursework Requirements

The Master of Science in Computer Science offers great flexibility in studying computer science beyond an undergraduate degree. Students without a background in computer science will typically begin with foundational courses that prepare them for more advanced work in computer science. An assessment is taken through the department that helps them determine where to begin.

Students are required to take 16 credits of required courses and 32 credits of electives. Of these 32 credits of elective computer science courses, 12 must be at the 4000-level, including 4 credits designated as "Theory". In addition, 8 of the 32 credits must be designated as advanced programming (and may also be 4000-level credits). Students wishing to pursue a thesis may apply up to 12 credits of Independent Research (COMP 4995) towards their 32 elective credits. Finally, students must take 3 quarters of Seminar in Computer Science (COMP 4600).

Code	Title	Credits
<b>Foundational Courses <sup>1</sup></b>		<b>16</b>
COMP 3003	Foundations in Computer Systems	4
COMP 3004	Foundations in Discrete Structures & Algorithms	4
COMP 3005	Foundations in Python Programming	4
<b>Required Courses</b>		<b>16</b>
COMP 3200	Discrete Structures	4
COMP 3351	Programming Languages	4
COMP 3361	Operating Systems I	4
COMP 3371	Data Structures & Algorithms	4
<b>Electives</b>		<b>32</b>
Students must complete graduate-level electives to satisfy the following requirements.		
<b>4000-level requirement</b>		<b>12</b>
12 computer science elective credits at the 4000-level (excluding COMP 499X) are required, of which one must be designated as "Theory" (see below).		
<b>Theory Requirement</b>		<b>4</b>
4 credits of COMP at the 4000-level designated as "Theory". The current pre-approved list of theory courses includes, but is not limited to:		
COMP 4705	Advanced Topics-Programming (Advanced Programming Languages, Performance Modeling & Analysis)	
COMP 4591	Computational Geometry	
COMP 4372	Advanced Algorithms	
<b>Advanced Programming Requirement</b>		<b>8</b>

8 credits of COMP electives must include an advanced programming component. These courses must be approved by an advisor. The current pre-approved list includes but is not limited to:

COMP 3352	Elements of Compiler Design
COMP 3353	Compiler Construction
COMP 3411	Web Programming II
COMP 3432	Machine Learning
COMP 3621	Computer Networking
COMP 3801	Introduction Computer Graphics
COMP 4510	Software for AI Robotics
COMP 4621	Computer Networking

#### Seminar Attendance Requirement

COMP 4600	Seminar in Computer Science <sup>2</sup>
-----------	--

#### Non-Thesis Option

A maximum of 12 quarter hours may be earned in Independent Study (COMP 4991), provided the student can find an advisor for such independent study. No thesis is required. Not eligible for support (GTA, GRA).

#### Thesis Option

A maximum of 12 credits may be earned for thesis credits (COMP 4995 - Independent Research). A thesis of publishable quality and oral defense are required. A student receiving any support from the department (GTA, GRA) must complete the degree requirements as per the Thesis Option.

#### Total Credits

**48-60**

<sup>1</sup> Foundation Courses serve to provide a mathematical and programming background for students without a computer science undergraduate degree. Foundation course needs are determined by pre-assessments. Students may test out of one or more Foundation courses.

<sup>2</sup> Thesis-track students must complete **three** quarters of COMP 4600 - Seminar (0 credits).  
GTA's/GRA's are required to attend all seminars.

#### Outside Coursework

A maximum of 8 quarter hours may be earned in approved courses outside the COMP designation, including transfer credits from another university. Such credit must be approved in writing by an advisor from the computer science faculty.

Students should follow the rules and regulations stated in the departmental Graduate Student Manual.

#### Non-Coursework Requirements

##### Thesis Option

- Thesis and Oral Defense

##### Non-Thesis Option

- None

---

## Master of Science in Cybersecurity

### Degree Requirements

### Coursework Requirements

Minimum credits required for degree: 48-60

Code	Title	Credits
<b>Foundational Courses <sup>1</sup></b>		<b>0-12</b>
COMP 3003	Foundations in Computer Systems	4
COMP 3004	Foundations in Discrete Structures & Algorithms	4
COMP 3005	Foundations in Python Programming	4
<b>Required Courses</b>		<b>48</b>
COMP 3006	Python Software Development	4
COMP 3356	Introductory C/C++ Programming	4
COMP 3361	Operating Systems I	4
COMP 3731	Computer Forensics	4
COMP 4455	Shell Scripting and System Tools	4

COMP 4384	Secure Software Engineering	4
COMP 4621	Computer Networking	4
COMP 4721	Computer Security	4
COMP 4722	Network Security	4
COMP 4723	Ethical Hacking	4
COMP 4799	Capstone Project in Cybersecurity <sup>2</sup>	4
<b>Cybersecurity Electives</b>		<b>4</b>
Elective credits must be either a pre-approved cybersecurity course at DU, or with advisor approval. Pre-approved courses include COMP 4732, COMP 3421 and COMP 3424. Other courses with cyber security content at the discretion of the advisor or program director.		
Total Credits		48-60

<sup>1</sup> Foundational Courses serve to provide a computer science foundation for students without a computer science background. Foundational Course needs are determined by pre-assessment by the department. Students may test out of one or more Foundational Courses.

<sup>2</sup> Capstone Project in Cybersecurity (COMP 4799) is required; however, with advisor approval, 0 credit Internship/Co-Op in Computing (COMP 3904) may be used as the basis for the capstone course. If using the Internship/Co-Op option, students will register for 4799 normally, and apply through pioneercareers (PCO) for their internship.

No thesis is required.

Students should follow the rules and regulations stated in the departmental Graduate Student Manual.

#### GTA/GRA Support

Due to the intensive nature of this program, Cybersecurity students are not eligible for graduate teaching or research support.

Consult with Financial Aid at [finaid@du.edu](mailto:finaid@du.edu) or at 303-871-4020 to discuss financial aid options.

## Master of Science in Data Science

### Degree Requirements

The MS in Data Science requires 48 credits. Students without prerequisite knowledge may take Foundations in Python Programming (COMP 3005) at DU prior to fully matriculating into the program.

Code	Title	Credits
<b>Required Courses</b>		<b>40</b>
COMP 3007	Foundations in Data Science Mathematics I	4
COMP 3008	Foundations in Data Science Mathematics II	4
COMP 3006	Python Software Development	4
COMP 3421	Database Organization & Management I	4
COMP 4432	Machine Learning	4
COMP 4433	Data Visualization	4
COMP 4441	Introduction to Probability and Statistics for Data Science	4
COMP 4442	Advanced Probability and Statistics for Data Science	4
COMP 4531	Deep Learning: Model Design and Application	4
COMP 4581	Algorithms for Data Science	4
<b>Elective Courses</b>		<b>8</b>
COMP 4334	Parallel and Distributed Computing for Data Science	4
COMP 4447	Data Science Tools 1	4
COMP 4448	Data Science Tools 2	4
COMP 4449	Data Science Capstone	4
COMP 3904	Internship/Co-Op in Computing <sup>1</sup>	4
Total Credits		48

<sup>1</sup> Only one for-credit Internship/Co-Op in Computing (COMP 3904) can be applied towards the graduation requirements.

---

## Master of Science in Data Science (Online)

### Degree Requirements

The MS in Data Science (Online) requirements are identical to those listed in the Master of Science in Data Science listed above.

## Dual Undergraduate-Graduate Degree Programs

### 4+1 Dual degree BS in Computer Science and MS in Computer Science

The Department of Computer Science at the University of Denver offers a Dual Degree Bachelor of Science in Computer Science (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>) and Master of Science in Computer Science (p. ). The BS/MS combines the strong foundation of a BS in Computer Science and further depth and breadth in more advanced computer science topics through the MS in Computer Science.

Total Credit Hours: 183 at the undergraduate level (UG) for the Bachelor degree + 36 at the graduate level (GR) for the Master of Science degree = 219 credits

#### Undergraduate Requirements

Students who intend to obtain a BS/MS in Computer Science must satisfy all the requirements of the Bachelor of Science degree as outlined in the University of Denver Undergraduate Bulletin (<http://bulletin.du.edu/undergraduate/>), which includes completing two minors and all of the requirements for the Bachelor of Science in Computer Science (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/#programofstudytext>) degree, including the Mathematics cognate requirements. In addition, 12 credits of the Breadth requirements for the BS in Computer Science are taken from the following list of **required** courses by the MS in Computer Science, but may be substituted for cross-listed COMP 3000-level undergraduate/graduate courses if these courses were taken prior to entry into the 4+1 program:

#### 12 credits of the required MS in Computer Science courses that may be used for the Breadth requirement of the BS in Computer Science:

COMP 3200	Discrete Structures	4
COMP 3351	Programming Languages	4
COMP 3361	Operating Systems I	4
COMP 3371	Data Structures & Algorithms	4

#### Graduate Requirements

The student must complete 36 credit hours at the graduate level of required coursework for the MS. These 36 hours include the **required** courses for the MS in Computer Science (the 4 classes listed above), unless they were taken as part of the Breadth requirement for the BS in Computer Science. In this case, other graduate-level courses will be substituted for them to meet the 36 credit hour requirement of the degree. Internship/Co-Op in Computing (COMP 3904) may not be used to substitute for these requirements.

#### Advanced Programming, Theory, and 4000-level Elective Requirements

As with the MS in Computer Science, students are also required to satisfy the Advanced Programming, Theory, and 4000-level elective requirements of the MS in Computer Science (p. ) in their 36 credit hours of graduate coursework.

All electives, especially the MATH and COMP electives, should be selected in close consultation with an academic advisor from the Computer Science Department.

---

## 4:1 Dual Degree: BS in Computer Science and MS Data Science

The 4:1 dual degree enables DU students to earn a BS in Computer Science (CS) and an MS in Data Science (DS) in 5 years. A key benefit to the 4:1 student is the combination of disciplinary depth afforded by undergraduate work in CS, coupled with an applied, professional, focus provided by the DS program. Upon earning their BS degree, a 4:1 student will matriculate into the online track of the data science graduate program, enabling them to combine full-time employment with evening classes.

The MS in Data Science is a 48-credit program comprising 10 required courses and 2 electives and two admission tracks, online and on-campus. The online track provides maximum flexibility in course choice and timing. Students can matriculate into the program at the start of any term, with the full set of courses available to them. In contrast, the on-campus track is cohort-based; students start in the fall term and take a preset sequence of courses during their first year and part of the second. Due to these limitations, the 4:1 option will be limited to matriculation into the online MS in Data Science program track.

## Sample schedule

The following is a sample schedule for the BS in Computer Science + MS in Computer Science. Note that other MS requirements would replace the Theory and Adv. Programming requirements, instead coming from the requirements of those degrees.

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
First-year Seminar		4 WRIT 1122		4 WRIT 1133	4
COMP 1201	2	COMP 1202	2	COMP 1203	2

Total Credits: 219

### COMP 3001 C and C++ Programming Foundations for New Graduate Students (4 Credits)

This accelerated course covers the basics of discrete mathematics including functions, relations, counting, logic, proofs etc that is necessary to attend CS graduate school. In addition, it includes an introduction to programming and algorithm analysis. Enrollment restricted to graduate students.

### COMP 3002 C and C++ Foundations II for New Graduate Students (4 Credits)

This accelerated course continues to build on the basics of discrete mathematics by covering material including advanced counting, recurrences, graphs, trees, traversals, automata etc. that is necessary to attend Computer Science graduate school. In addition, it includes an introduction to additional algorithms and data structures. Prerequisite: COMP 3001.

### COMP 3003 Foundations in Computer Systems (4 Credits)

This course introduces computer systems, including instruction set architectures; memory hierarchies including registers, caching, virtual memory, paging, and segmentation; number representations; binary arithmetic and operations; assembly language instructions; and pipelining in the CPU.

### COMP 3004 Foundations in Discrete Structures & Algorithms (4 Credits)

Both discrete mathematics and an understanding of algorithms along with their analysis form principle foundations in computer science. In this course, the fundamentals of discrete mathematics including functions, relations, counting, logic, proofs, counting, recurrences, and probability are covered. In addition, beginning data structures and algorithms are covered including linked-lists, graphs, hash-tables, sorting, and binary search. An analysis of these data structures and algorithms is also covered through big-O notation and proof methods.

**COMP 3005 Foundations in Python Programming (4 Credits)**

This accelerated course covers the basics of Python programming. By the end of the course students will be able to develop, design and implement Python programs, explain the differences between data types, learn to read from and write to files, understand and use data structures, understand and use recursion, and use Python packages.

**COMP 3006 Python Software Development (4 Credits)**

This accelerated course covers advanced Python programming for data scientists and cybersecurity professionals. Course Objectives: name and demonstrate proficiency using advanced Python programming techniques; analyze a programming task and create a development plan and high-level software design that accomplishes the task; relate common portions of the Python standard library to specific programming tasks; understand and apply aspects of the Python scientific programming ecosystem to achieve an analysis goal. Prerequisite: COMP 3005.

**COMP 3007 Foundations in Data Science Mathematics I (4 Credits)**

This course presents the elements of calculus essential for work in data science. Students will study differentiation and integration in the context of probability density and of optimization.

**COMP 3008 Foundations in Data Science Mathematics II (4 Credits)**

This course presents the elements of linear algebra and discrete math essential for subsequent coursework in data science.

**COMP 3200 Discrete Structures (4 Credits)**

Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: (COMP 2300 or MATH 2200) and (COMP 2673 or COMP 1353).

**COMP 3351 Programming Languages (4 Credits)**

Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Prerequisites: COMP 2370 and ((COMP 2355, COMP 2691) or COMP 2362).

**COMP 3352 Elements of Compiler Design (4 Credits)**

Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

**COMP 3353 Compiler Construction (4 Credits)**

Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

**COMP 3356 Introductory C/C++ Programming (4 Credits)**

This course introduces unmanaged programming language concepts to students whose primary programming experience is in a managed language (Java/Python, etc.). Concepts like type safety, manual memory management and "unsafe" library functions are covered. Common pitfalls in these languages from which most security issues arise are explained and students gain experience in understanding such code and evaluating it for program errors. Students will also be introduced to important compiled language concepts of static/dynamic linking, compilation and debugging. Prerequisites: COMP 3006.

**COMP 3361 Operating Systems I (4 Credits)**

Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: for undergraduates: (COMP 2355 and COMP 2691) or COMP 2361; COMP 2370; for graduate students: COMP 3003, 3004, and 3005.

**COMP 3371 Data Structures & Algorithms (4 Credits)**

Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms. Prerequisites: COMP 2370 or equivalent and COMP 3200.

**COMP 3372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks.

**COMP 3381 Software Engineering I (4 Credits)**

An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351; COMP 3361 or COMP 2362; or instructor permission.

**COMP 3382 Software Engineering II (4 Credits)**

Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

**COMP 3400 Advanced Unix Tools (4 Credits)**

Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool-building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

**COMP 3411 Web Programming II (4 Credits)**

In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain webapplications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

**COMP 3412 Web Projects: Web Development III (4 Credits)**

In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

**COMP 3421 Database Organization & Management I (4 Credits)**

An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included. Graduate students will read one or two relevant technical papers and write a summary report. Prerequisites: for undergraduates: COMP 1353 or COMP 2673; for graduates: COMP 3005.

**COMP 3424 NoSQL Databases (4 Credits)**

In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: for undergraduates, COMP 2355 or COMP 2361; for graduates: COMP 3005.

**COMP 3431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

**COMP 3501 Introduction to Artificial Intelligence (4 Credits)**

Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2370.

**COMP 3621 Computer Networking (4 Credits)**

An introduction to computer networks with an emphasis on Internet protocols. Topics include: internet design, application layer protocols such as SMTP and HTTP, session layer protocols including TCP and UDP, the internet protocol (IP), link layer technology such as Ethernet, and security issues related to networking. Programming experience of client/server architectures using sockets and TCP/UDP through projects is emphasized. Prerequisites: for undergraduates: (COMP 2355 or COMP 2361) and COMP 2370; for graduates COMP 3004 and COMP 3006. Cross listed with COMP 4621.

**COMP 3681 Networking for Games (4 Credits)**

Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

**COMP 3701 Topics in Computer Graphics (4 Credits)****COMP 3702 Topics in Database (4 Credits)****COMP 3703 Topics-Artificial Intelligence (4 Credits)****COMP 3704 Advanced Topics: Systems (4 Credits)****COMP 3705 Topics in Computer Science (1-4 Credits)****COMP 3731 Computer Forensics (4 Credits)**

Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 3361; COMP 2355 or 2361 for undergraduates; COMP 3006 for graduates.

**COMP 3801 Introduction Computer Graphics (4 Credits)**

Fundamentals of 3D rendering including the mathematics behind coordinate systems, projections, clipping, hidden surface removal, shadows, lighting models, shading models, and mapping techniques. Significant use of 3D APIs through shader programming is covered along with the basics of 3D model representation and animations. Satisfies "Advanced Programming" requirements for graduate students. Prerequisites: COMP 2370, MATH 1952 or 1962.

**COMP 3821 Game Programming I (4 Credits)**

Introduces the fundamentals of digital game programming that are essential as future game programmers or game designers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites and animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 2821.

**COMP 3822 Game Programming II (4 Credits)**

In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3821. Suggested corequisite or prerequisite: COMP 3801.

**COMP 3904 Internship/Co-Op in Computing (0-10 Credits)**

Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).

**COMP 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in the regular course schedule for that particular year.

**COMP 4100 Human-Computer Interaction (4 Credits)**

Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. No prerequisites are required to take the course and students from all disciplines are welcome. Cross listed with COMP 3100.

**COMP 4333 Parallel and Distributed Computing (4 Credits)**

Current techniques for effective use of parallel processing and large scale distributed systems. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course qualifies for the Computer Science "Advanced Programming" requirement. Prerequisites: COMP2370 and COMP2355, or equivalent.

**COMP 4334 Parallel and Distributed Computing for Data Science (4 Credits)**

Current techniques for effective use of parallel processing and large-scale distributed systems for data science. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course is not to be used for the MS Computer Science. Prerequisite: COMP 4581.

**COMP 4355 Advanced System Programming (4 Credits)**

This course covers programming in a UNIX environment, including use of common command line utilities, scripting, source control via Git, and integration of POSIX system calls into C/C++ code. These features will be leveraged to solve practical problems cleanly and efficiently. More emphasis will be placed on using these features than on how those features work. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4362 Operating Systems II (4 Credits)**

Continuation of COMP 3361. Case studies of existing operating systems programing. Prerequisite: COMP 3621.

**COMP 4370 Algorithmic Problem Solving (4 Credits)**

The course is intended for students who are familiar with programming syntax but have not had much experience writing computer programs to solve a problem stated as a high-level description. The course will run through multiple such problem descriptions, discuss the design of programs to solve those problems using popular data structures, and have students implement those designs using a programming language. This course does not count for MS Computer Science requirements. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks. Prerequisite: COMP 3371. Cross listed with COMP 3372.

**COMP 4384 Secure Software Engineering (4 Credits)**

This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software. There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 3006, COMP 3361, COMP 3356.

**COMP 4401 Introduction to Python for Data Science (2 Credits)**

This eight-week course enables aspiring graduate students in data science to meet their Python programming proficiency prior to matriculation. Students who complete this course will be able to write and modularize code, design efficient control structures, perform basic data operations, debug errors, distinguish data types and basic structures, and work within an integrated development environment.

**COMP 4431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 4441 and COMP 4581.

**COMP 4432 Machine Learning (4 Credits)**

This course will give an overview of traditional machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised/unsupervised and reinforcement learning as well as associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After course completion, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 4442 and COMP 3006.

**COMP 4433 Data Visualization (4 Credits)**

This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 3006.

**COMP 4441 Introduction to Probability and Statistics for Data Science (4 Credits)**

The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisites: COMP 3007 and 3008; or permission of Data Science Faculty Director.

**COMP 4442 Advanced Probability and Statistics for Data Science (4 Credits)**

This course builds on material in Probability and Statistics 1. Students will carry out model fitting and diagnostics for multiple regression, ANOVA, ANCOVA, and generalized linear models. Dimension reductions techniques such as PCA and Lasso are introduced, as are techniques for handling dependent data. The course introduces the principles of resampling and Bayesian Analysis. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Enforced Prerequisites: COMP 4441.

**COMP 4447 Data Science Tools 1 (4 Credits)**

Organizations are using data science to extract actionable insight from data. To highlight the hidden patterns in the data, this course equips students with essential skills for data collection, cleanup, transformation, feature engineering, summarization, visualization, and collaboration. Students will do assignments and a final project. This is a hands-on course. Students will use Python libraries, Linux commands, API requests, web-scraping, GitHub and various data sets to perform these activities. Prerequisites: COMP 3006.

**COMP 4448 Data Science Tools 2 (4 Credits)**

Building a successful predictive model is a multi-faceted process. This course focuses on hypothesis testing and the development of predictive models. Students will learn the data science process for model development while learning to program a variety of predictive algorithms. Students will do assignments and a final project. This is a hands-on course. Students will use Python libraries, Linux commands, and various data sets to perform these activities. Prerequisite: COMP 4447.

**COMP 4449 Data Science Capstone (4 Credits)**

Data Science Capstone provides students an opportunity to demonstrate their expertise as data scientists. Students are expected to integrate prior knowledge and skills to design, develop, test, and present 'full-cycle' data science products, and apply them in real-world contexts. This includes assessing and communicating their value to decision-making. Two sets of challenges of increasing complexity are presented as mid-term and term projects. These two projects are implemented, documented, tested, and presented by the students or students' two-person teams. Prerequisites: COMP 4442.

**COMP 4455 Shell Scripting and System Tools (4 Credits)**

This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Prerequisite: COMP 3006.

**COMP 4510 Software for AI Robotics (4 Credits)**

This course provides an introduction to the key artificial intelligence issues involved in the development of intelligent robotics. We will examine a variety of algorithms for autonomous mobile robot behavior, exploring issues that include software control architectures, localization, navigation, sensing, planning, and uncertainty. We also introduce the Robot Operating System (ROS) middleware, which is popular in academic, industry, and government research. This course does not assume any prior knowledge of artificial intelligence or robotics. The course will be project focused. In the project assignments you will learn ROS and learn to implement algorithms essential for conducting AI robotics research. Prerequisites: COMP 3005 and proficiency in Python and Unix command-line tools.

**COMP 4531 Deep Learning: Model Design and Application (4 Credits)**

This course addresses the foundational concepts and components of Artificial Neural Networks (ANN), highlighting their capabilities, strengths, and weaknesses as a machine learning algorithm. Students taking this course will develop ANN models from scratch in Python as a basis for understanding their design as well as the underlying mechanics and calculations that shape their behavior. Key topics such as forward-backward propagation, loss function characteristics and optimization will be considered in relation to model design and computational efficiency as well as to problems such as exploding and vanishing gradients. Training strategies (e.g., dropout, initialization, batch normalization) will further enable students to assess trade-offs in model bias & variance. Coupled with hands-on assignments, these building blocks provide the knowledge and skills required to effectively design and implement ANN models that are ethically and technically sound. As well as foreground important architectures such as Convolutional ANNs, Recurrent ANNs, LSTMs, and Transformers as well as their applicability to modern problems. Student learning and proficiency will be assessed based on a combination of quizzes, coding assignments, exams, and a culminating project. Prerequisite: COMP 4432.

**COMP 4581 Algorithms for Data Science (4 Credits)**

This course introduces the design and analysis of algorithms within the context of data science. Topics include; asymptotic complexity and algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, and advanced sorting techniques. Examples to illustrate techniques are drawn from multi-dimensional clustering (k-means and probabilistic), regression, decision trees, order statistics, data mining using apriori algorithms, and algorithms for generating combinatorial objects. Prerequisites: COMP 3006.

**COMP 4591 Computational Geometry (4 Credits)**

This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 3200 and COMP 3371. This course satisfies the Theory requirement for graduate students.

**COMP 4600 Seminar in Computer Science (0-4 Credits)**

Preparation and presentation of lectures on some aspect of current research in computer science; topics not generally encountered in formal courses, may include robotics, pattern recognition, parallel processing, computer applications. 10- to 15- page paper with bibliography required.

**COMP 4621 Computer Networking (4 Credits)**

The Internet is arguably the most transformative invention in recent history and is at its core a massive global computer network (of networks). Students in this course learn how the Internet works, from the highest-level application layer to the lowest-level hardware layer. Topics covered include the OSI and TCP/IP reference models, physical transmission methods, error detection and correction, addressing, routing algorithms, congestion control and more. Prerequisites: COMP 3006, COMP 3361 (or instructor approval). Cross listed with COMP 3621.

**COMP 4701 Special Tpcs-Computer Graphics (1-4 Credits)****COMP 4702 Advanced Topics-Database (3 Credits)****COMP 4703 Adv Topics-Artificial Intell (1-4 Credits)****COMP 4704 Advanced Topics-Systems (3-4 Credits)****COMP 4705 Advanced Topics-Programming (1-4 Credits)****COMP 4709 Special Tpcs-Computer Security (3 Credits)****COMP 4721 Computer Security (4 Credits)**

This course gives students an overview of computer and system security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisites: COMP 3006, COMP 3361 (or advisor/instructor approval).

**COMP 4722 Network Security (4 Credits)**

Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. In addition, students will perform an extensive analysis, or development of a security related product independently. Prerequisites: COMP 4721.

**COMP 4723 Ethical Hacking (4 Credits)**

Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, foot printing targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP 3361, or COMP 3001, 3002, 3003, and 3004.

**COMP 4724 Systems Security Management (4 Credits)**

This course covers basic system administration tasks on a Unix environment, with a special focus on command line navigation, file/process access control, setting up network configurations, and managing services related to networks and their security. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4732 Human-Centered Data Security and Privacy (4 Credits)**

With an increasing digital presence, it is critical to understand users' needs and requirements in using technological equipment to secure interactions and adhere to privacy perceptions. Thus, it is essential to analyze the cognitive, social, organizational, commercial, and cultural factors in mind. This course will provide a socio-technical approach for analyzing critical user interaction with devices encountered in everyday life, including web, mobiles, and wearables. This course will help students develop an understanding of technological interactions from the perspectives of multiple stakeholders such as users, developers, system administrators, and others and build tools to protect user data.

**COMP 4799 Capstone Project in Cybersecurity (1-8 Credits)**

The purpose of the cybersecurity capstone project is to provide an integrative experience that ties together the learning outcomes from academic coursework undertakings and industry skills necessary to be productive in delivering an end product. Students will engage in one of many options available, such as involvement in a research project, a case study, a product development project, or an extensive survey paper. Capstone projects are presented at the end of the quarter in front of a representative group. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4991 Independent Study (1-12 Credits)**

Independent study on a particular topic supervised by a faculty member. Student must find a faculty member who will supervise work on the topic. Cannot be arranged for any course that appears in regular course schedule for that particular year.

**COMP 4995 Independent Research (1-17 Credits)**

Research projects undertaken in conjunction with a faculty member.

**COMP 5991 Independent Study (1-17 Credits)****COMP 5995 Independent Research (1-17 Credits)****Courses****COMP 3001 C and C++ Programming Foundations for New Graduate Students (4 Credits)**

This accelerated course covers the basics of discrete mathematics including functions, relations, counting, logic, proofs etc that is necessary to attend CS graduate school. In addition, it includes an introduction to programming and algorithm analysis. Enrollment restricted to graduate students.

**COMP 3002 C and C++ Foundations II for New Graduate Students (4 Credits)**

This accelerated course continues to build on the basics of discrete mathematics by covering material including advanced counting, recurrences, graphs, trees, traversals, automata etc. that is necessary to attend Computer Science graduate school. In addition, it includes an introduction to additional algorithms and data structures. Prerequisite: COMP 3001.

**COMP 3003 Foundations in Computer Systems (4 Credits)**

This course introduces computer systems, including instruction set architectures; memory hierarchies including registers, caching, virtual memory, paging, and segmentation; number representations; binary arithmetic and operations; assembly language instructions; and pipelining in the CPU.

**COMP 3004 Foundations in Discrete Structures & Algorithms (4 Credits)**

Both discrete mathematics and an understanding of algorithms along with their analysis form principle foundations in computer science. In this course, the fundamentals of discrete mathematics including functions, relations, counting, logic, proofs, counting, recurrences, and probability are covered. In addition, beginning data structures and algorithms are covered including linked-lists, graphs, hash-tables, sorting, and binary search. An analysis of these data structures and algorithms is also covered through big-O notation and proof methods.

**COMP 3005 Foundations in Python Programming (4 Credits)**

This accelerated course covers the basics of Python programming. By the end of the course students will be able to develop, design and implement Python programs, explain the differences between data types, learn to read from and write to files, understand and use data structures, understand and use recursion, and use Python packages.

**COMP 3006 Python Software Development (4 Credits)**

This accelerated course covers advanced Python programming for data scientists and cybersecurity professionals. Course Objectives: name and demonstrate proficiency using advanced Python programming techniques; analyze a programming task and create a development plan and high-level software design that accomplishes the task; relate common portions of the Python standard library to specific programming tasks; understand and apply aspects of the Python scientific programming ecosystem to achieve an analysis goal. Prerequisite: COMP 3005.

**COMP 3007 Foundations in Data Science Mathematics I (4 Credits)**

This course presents the elements of calculus essential for work in data science. Students will study differentiation and integration in the context of probability density and of optimization.

**COMP 3008 Foundations in Data Science Mathematics II (4 Credits)**

This course presents the elements of linear algebra and discrete math essential for subsequent coursework in data science.

**COMP 3200 Discrete Structures (4 Credits)**

Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: (COMP 2300 or MATH 2200) and (COMP 2673 or COMP 1353).

**COMP 3351 Programming Languages (4 Credits)**

Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Prerequisites: COMP 2370 and ((COMP 2355, COMP 2691) or COMP 2362).

**COMP 3352 Elements of Compiler Design (4 Credits)**

Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

**COMP 3353 Compiler Construction (4 Credits)**

Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

**COMP 3356 Introductory C/C++ Programming (4 Credits)**

This course introduces unmanaged programming language concepts to students whose primary programming experience is in a managed language (Java/Python, etc.). Concepts like type safety, manual memory management and "unsafe" library functions are covered. Common pitfalls in these languages from which most security issues arise are explained and students gain experience in understanding such code and evaluating it for program errors. Students will also be introduced to important compiled language concepts of static/dynamic linking, compilation and debugging. Prerequisites: COMP 3006.

**COMP 3361 Operating Systems I (4 Credits)**

Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: for undergraduates: (COMP 2355 and COMP 2691) or COMP 2361; COMP 2370; for graduate students: COMP 3003, 3004, and 3005.

**COMP 3371 Data Structures & Algorithms (4 Credits)**

Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms. Prerequisites: COMP 2370 or equivalent and COMP 3200.

**COMP 3372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks.

**COMP 3381 Software Engineering I (4 Credits)**

An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351; COMP 3361 or COMP 2362; or instructor permission.

**COMP 3382 Software Engineering II (4 Credits)**

Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

**COMP 3400 Advanced Unix Tools (4 Credits)**

Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool-building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

**COMP 3411 Web Programming II (4 Credits)**

In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain webapplications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

**COMP 3412 Web Projects: Web Development III (4 Credits)**

In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

**COMP 3421 Database Organization & Management I (4 Credits)**

An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included. Graduate students will read one or two relevant technical papers and write a summary report. Prerequisites: for undergraduates: COMP 1353 or COMP 2673; for graduates: COMP 3005.

**COMP 3424 NoSQL Databases (4 Credits)**

In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: for undergraduates, COMP 2355 or COMP 2361; for graduates: COMP 3005.

**COMP 3431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

**COMP 3501 Introduction to Artificial Intelligence (4 Credits)**

Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2370.

**COMP 3621 Computer Networking (4 Credits)**

An introduction to computer networks with an emphasis on Internet protocols. Topics include: internet design, application layer protocols such as SMTP and HTTP, session layer protocols including TCP and UDP, the internet protocol (IP), link layer technology such as Ethernet, and security issues related to networking. Programming experience of client/server architectures using sockets and TCP/UDP through projects is emphasized. Prerequisites: for undergraduates: (COMP 2355 or COMP 2361) and COMP 2370; for graduates COMP 3004 and COMP 3006. Cross listed with COMP 4621.

**COMP 3681 Networking for Games (4 Credits)**

Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

**COMP 3701 Topics in Computer Graphics (4 Credits)****COMP 3702 Topics in Database (4 Credits)****COMP 3703 Topics-Artificial Intelligence (4 Credits)****COMP 3704 Advanced Topics: Systems (4 Credits)****COMP 3705 Topics in Computer Science (1-4 Credits)****COMP 3731 Computer Forensics (4 Credits)**

Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 3361; COMP 2355 or 2361 for undergraduates; COMP 3006 for graduates.

**COMP 3801 Introduction Computer Graphics (4 Credits)**

Fundamentals of 3D rendering including the mathematics behind coordinate systems, projections, clipping, hidden surface removal, shadows, lighting models, shading models, and mapping techniques. Significant use of 3D APIs through shader programming is covered along with the basics of 3D model representation and animations. Satisfies "Advanced Programming" requirements for graduate students. Prerequisites: COMP 2370, MATH 1952 or 1962.

**COMP 3821 Game Programming I (4 Credits)**

Introduces the fundamentals of digital game programming that are essential as future game programmers or game designers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites and animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 2821.

**COMP 3822 Game Programming II (4 Credits)**

In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3821. Suggested corequisite or prerequisite: COMP 3801.

**COMP 3904 Internship/Co-Op in Computing (0-10 Credits)**

Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).

**COMP 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in the regular course schedule for that particular year.

**COMP 4100 Human-Computer Interaction (4 Credits)**

Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. No prerequisites are required to take the course and students from all disciplines are welcome. Cross listed with COMP 3100.

**COMP 4333 Parallel and Distributed Computing (4 Credits)**

Current techniques for effective use of parallel processing and large scale distributed systems. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course qualifies for the Computer Science "Advanced Programming" requirement. Prerequisites: COMP2370 and COMP2355, or equivalent.

**COMP 4334 Parallel and Distributed Computing for Data Science (4 Credits)**

Current techniques for effective use of parallel processing and large-scale distributed systems for data science. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course is not to be used for the MS Computer Science. Prerequisite: COMP 4581.

**COMP 4355 Advanced System Programming (4 Credits)**

This course covers programming in a UNIX environment, including use of common command line utilities, scripting, source control via Git, and integration of POSIX system calls into C/C++ code. These features will be leveraged to solve practical problems cleanly and efficiently. More emphasis will be placed on using these features than on how those features work. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4362 Operating Systems II (4 Credits)**

Continuation of COMP 3361. Case studies of existing operating systems programing. Prerequisite: COMP 3621.

**COMP 4370 Algorithmic Problem Solving (4 Credits)**

The course is intended for students who are familiar with programming syntax but have not had much experience writing computer programs to solve a problem stated as a high-level description. The course will run through multiple such problem descriptions, discuss the design of programs to solve those problems using popular data structures, and have students implement those designs using a programming language. This course does not count for MS Computer Science requirements. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks. Prerequisite: COMP 3371. Cross listed with COMP 3372.

**COMP 4384 Secure Software Engineering (4 Credits)**

This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software. There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 3006, COMP 3361, COMP 3356.

**COMP 4401 Introduction to Python for Data Science (2 Credits)**

This eight-week course enables aspiring graduate students in data science to meet their Python programming proficiency prior to matriculation. Students who complete this course will be able to write and modularize code, design efficient control structures, perform basic data operations, debug errors, distinguish data types and basic structures, and work within an integrated development environment.

**COMP 4431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 4441 and COMP 4581.

**COMP 4432 Machine Learning (4 Credits)**

This course will give an overview of traditional machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised/unsupervised and reinforcement learning as well as associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After course completion, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 4442 and COMP 3006.

**COMP 4433 Data Visualization (4 Credits)**

This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 3006.

**COMP 4441 Introduction to Probability and Statistics for Data Science (4 Credits)**

The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisites: COMP 3007 and 3008; or permission of Data Science Faculty Director.

**COMP 4442 Advanced Probability and Statistics for Data Science (4 Credits)**

This course builds on material in Probability and Statistics 1. Students will carry out model fitting and diagnostics for multiple regression, ANOVA, ANCOVA, and generalized linear models. Dimension reductions techniques such as PCA and Lasso are introduced, as are techniques for handling dependent data. The course introduces the principles of resampling and Bayesian Analysis. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Enforced Prerequisites: COMP 4441.

**COMP 4447 Data Science Tools 1 (4 Credits)**

Organizations are using data science to extract actionable insight from data. To highlight the hidden patterns in the data, this course equips students with essential skills for data collection, cleanup, transformation, feature engineering, summarization, visualization, and collaboration. Students will do assignments and a final project. This is a hands-on course. Students will use Python libraries, Linux commands, API requests, web-scraping, GitHub and various data sets to perform these activities. Prerequisites: COMP 3006.

**COMP 4448 Data Science Tools 2 (4 Credits)**

Building a successful predictive model is a multi-faceted process. This course focuses on hypothesis testing and the development of predictive models. Students will learn the data science process for model development while learning to program a variety of predictive algorithms. Students will do assignments and a final project. This is a hands-on course. Students will use Python libraries, Linux commands, and various data sets to perform these activities. Prerequisite: COMP 4447.

**COMP 4449 Data Science Capstone (4 Credits)**

Data Science Capstone provides students an opportunity to demonstrate their expertise as data scientists. Students are expected to integrate prior knowledge and skills to design, develop, test, and present 'full-cycle' data science products, and apply them in real-world contexts. This includes assessing and communicating their value to decision-making. Two sets of challenges of increasing complexity are presented as mid-term and term projects. These two projects are implemented, documented, tested, and presented by the students or students' two-person teams. Prerequisites: COMP 4442.

**COMP 4455 Shell Scripting and System Tools (4 Credits)**

This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Prerequisite: COMP 3006.

**COMP 4510 Software for AI Robotics (4 Credits)**

This course provides an introduction to the key artificial intelligence issues involved in the development of intelligent robotics. We will examine a variety of algorithms for autonomous mobile robot behavior, exploring issues that include software control architectures, localization, navigation, sensing, planning, and uncertainty. We also introduce the Robot Operating System (ROS) middleware, which is popular in academic, industry, and government research. This course does not assume any prior knowledge of artificial intelligence or robotics. The course will be project focused. In the project assignments you will learn ROS and learn to implement algorithms essential for conducting AI robotics research. Prerequisites: COMP 3005 and proficiency in Python and Unix command-line tools.

**COMP 4531 Deep Learning: Model Design and Application (4 Credits)**

This course addresses the foundational concepts and components of Artificial Neural Networks (ANN), highlighting their capabilities, strengths, and weaknesses as a machine learning algorithm. Students taking this course will develop ANN models from scratch in Python as a basis for understanding their design as well as the underlying mechanics and calculations that shape their behavior. Key topics such as forward-backward propagation, loss function characteristics and optimization will be considered in relation to model design and computational efficiency as well as to problems such as exploding and vanishing gradients. Training strategies (e.g., dropout, initialization, batch normalization) will further enable students to assess trade-offs in model bias & variance. Coupled with hands-on assignments, these building blocks provide the knowledge and skills required to effectively design and implement ANN models that are ethically and technically sound. As well as foreground important architectures such as Convolutional ANNs, Recurrent ANNs, LSTMS, and Transformers as well as their applicability to modern problems. Student learning and proficiency will be assessed based on a combination of quizzes, coding assignments, exams, and a culminating project. Prerequisite: COMP 4432.

**COMP 4581 Algorithms for Data Science (4 Credits)**

This course introduces the design and analysis of algorithms within the context of data science. Topics include; asymptotic complexity and algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, and advanced sorting techniques. Examples to illustrate techniques are drawn from multi-dimensional clustering (k-means and probabilistic), regression, decision trees, order statistics, data mining using apriori algorithms, and algorithms for generating combinatorial objects. Prerequisites: COMP 3006.

**COMP 4591 Computational Geometry (4 Credits)**

This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 3200 and COMP 3371. This course satisfies the Theory requirement for graduate students.

**COMP 4600 Seminar in Computer Science (0-4 Credits)**

Preparation and presentation of lectures on some aspect of current research in computer science; topics not generally encountered in formal courses, may include robotics, pattern recognition, parallel processing, computer applications. 10- to 15- page paper with bibliography required.

**COMP 4621 Computer Networking (4 Credits)**

The Internet is arguably the most transformative invention in recent history and is at its core a massive global computer network (of networks). Students in this course learn how the Internet works, from the highest-level application layer to the lowest-level hardware layer. Topics covered include the OSI and TCP/IP reference models, physical transmission methods, error detection and correction, addressing, routing algorithms, congestion control and more. Prerequisites: COMP 3006, COMP 3361 (or instructor approval). Cross listed with COMP 3621.

**COMP 4701 Special Tpcs-Computer Graphics (1-4 Credits)****COMP 4702 Advanced Topics-Database (3 Credits)****COMP 4703 Adv Topics-Artificial Intell (1-4 Credits)****COMP 4704 Advanced Topics-Systems (3-4 Credits)****COMP 4705 Advanced Topics-Programming (1-4 Credits)****COMP 4709 Special Tpcs-Computer Security (3 Credits)****COMP 4721 Computer Security (4 Credits)**

This course gives students an overview of computer and system security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisites: COMP 3006, COMP 3361 (or advisor/instructor approval).

**COMP 4722 Network Security (4 Credits)**

Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. In addition, students will perform an extensive analysis, or development of a security related product independently. Prerequisites: COMP 4721.

**COMP 4723 Ethical Hacking (4 Credits)**

Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, foot printing targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP 3361, or COMP 3001, 3002, 3003, and 3004.

**COMP 4724 Systems Security Management (4 Credits)**

This course covers basic system administration tasks on a Unix environment, with a special focus on command line navigation, file/process access control, setting up network configurations, and managing services related to networks and their security. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4732 Human-Centered Data Security and Privacy (4 Credits)**

With an increasing digital presence, it is critical to understand users' needs and requirements in using technological equipment to secure interactions and adhere to privacy perceptions. Thus, it is essential to analyze the cognitive, social, organizational, commercial, and cultural factors in mind. This course will provide a socio-technical approach for analyzing critical user interaction with devices encountered in everyday life, including web, mobiles, and wearables. This course will help students develop an understanding of technological interactions from the perspectives of multiple stakeholders such as users, developers, system administrators, and others and build tools to protect user data.

**COMP 4799 Capstone Project in Cybersecurity (1-8 Credits)**

The purpose of the cybersecurity capstone project is to provide an integrative experience that ties together the learning outcomes from academic coursework undertakings and industry skills necessary to be productive in delivering an end product. Students will engage in one of many options available, such as involvement in a research project, a case study, a product development project, or an extensive survey paper. Capstone projects are presented at the end of the quarter in front of a representative group. Prerequisites: COMP 3001, 3002, 3003, and 3004.

**COMP 4991 Independent Study (1-12 Credits)**

Independent study on a particular topic supervised by a faculty member. Student must find a faculty member who will supervise work on the topic. Cannot be arranged for any course that appears in regular course schedule for that particular year.

**COMP 4995 Independent Research (1-17 Credits)**

Research projects undertaken in conjunction with a faculty member.

**COMP 5991 Independent Study (1-17 Credits)**

**COMP 5995 Independent Research (1-17 Credits)**

## Electrical and Computer Engineering

Office: Ritchie School of Engineering and Computer Science

Mail Code: 2155 E Wesley Ave, Room 283, Denver, CO 80208

Phone: 303.871.6618

Email: [eceinfo@du.edu](mailto:eceinfo@du.edu)

Web Site: [ritchieschool.du.edu/departments/ECE](http://ritchieschool.du.edu/departments/ECE) (<http://ritchieschool.du.edu/departments/ECE/>)

### Master's and Doctoral Degrees

#### Why study engineering at the University of Denver?

DU's Department of Electrical and Computer Engineering (ECE) is creating the future of technology by providing a graduate education that emphasizes both multi-disciplinary and cross-disciplinary knowledge. The distinguished faculty is creating multi-disciplinary education programs that cover both depth and breadth, and research programs that incorporate and account for technological trends in research and development, along with industry. Graduate students join the faculty in conducting cutting-edge basic and applied research in emerging disciplines developing novel and unique solutions to old and new problems and opportunities.

All laboratories in the Department contain state-of-the-art equipment and software to support basic and applied research in hardware and software design, hardware/software interfacing, communications and signal processing, image processing, computer vision and pattern recognition, optoelectronics, power and energy systems, robotics, mechatronic systems, intelligent systems, unmanned systems, among other research areas. Small classes support our multi-disciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students' individual career goals.

Denver is a first-rate location for business, government and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and DU is located just minutes from the Denver Technological Center, the site of many top technology companies. The Department of Electrical and Computer Engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector that is second to none!

The ECE Department offers, among other degrees, a master's and a PhD degree in Mechatronic Systems Engineering (MSE). DU/ECE is the only University in the United States that offers BS, MS and PhD degrees in MSE.

### Doctor of Philosophy in Electrical and Computer Engineering

The objective of the PhD in Electrical and Computer Engineering degree program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of science, engineering and technology, through independent research. The PhD students of the 21<sup>st</sup> century may pursue academic, research, entrepreneurial, and/or industrial careers. We offer opportunities to develop individualized plans of study based on the students' previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in ECE degree requirements.

Research requires an in-depth study of engineering problems with a broad knowledge base in science and engineering. Therefore, advanced courses are offered to strengthen the fundamentals and to broaden the engineering and science perspective. The minimum credit requirements are different for individuals entering a program with a closely related master's degree and for those entering with a bachelor's only. All requirements for the degree must be completed within seven years (eight years without a master's degree) from admission to candidacy. A grade of C or better must be obtained in each course in order for that course to count toward the credit hour requirements. An overall minimum GPA of 3.0 is also required for graduation.

The PhD in ECE is appealing to students because it offers the much needed specialization component and the 'degree identity' required to be competitive in the job market. Graduates from this program will be well equipped to follow academic careers, or be hired in federal laboratories, industry and the private sector.

### Doctor of Philosophy in Mechatronics Systems Engineering

The objective of the PhD in Mechatronics Systems Engineering (MSE) degree program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of science, engineering and technology, through independent research. The PhD students of the 21<sup>st</sup> century may pursue academic, research, entrepreneurial, and/or industrial careers. We offer opportunities to develop individualized plans of study based on the students' previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in MSE degree requirements.

Research requires an in-depth study of engineering problems with a broad knowledge base in science and engineering. Therefore, advanced courses are offered to strengthen the fundamentals and to broaden the engineering and science perspective. The minimum credit requirements are different

for individuals entering a program with a closely related master's degree and for those entering with a bachelor's only. All requirements for the degree must be completed within seven years (eight years without a master's degree) from admission to candidacy. A grade of C or better must be obtained in each course in order for that course to count toward the credit hour requirements. An overall minimum GPA of 3.0 is also required for graduation.

The PhD in MSE is at the forefront and intersection of the coupled disciplines of Electrical, Mechanical, Computer Engineering, and Computer Science. This unique degree is appealing to students because they will acquire the knowledge and ability to deal with and solve highly complex problems where integration is a key component. This degree provides a holistic approach to graduate education focusing on the ability to cover both breadth and depth of knowledge. Graduates of this program will lay the foundation for the modern engineering departments of the future, where 'integration' will be the key ingredient of studies.

## **Master of Science in Computer Engineering**

The Master of Science in Computer Engineering (MSCpE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this program is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MSCpE program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.

## **Master of Science in Electrical Engineering**

The Master of Science in Electrical Engineering (MSEE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this programs is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MS degree program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.

## **Master of Science in Mechatronic Systems Engineering**

The Master of Science in Mechatronic Systems Engineering (MSMSE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses, has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this programs is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. The MS degree program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are

working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.

## Master of Science in Systems Engineering (Online)

This Master of Science degree in Systems Engineering ([MSSY](#)) along with the three Specialized Graduate Certificates will cover the depth and breadth in systems design, analysis, synthesis, integration, testing, validation, and verification. We will train our students with expertise in fundamentals of the discipline of systems engineering. Our program will have emphasis on support for proposals after contract award, through critical design reviews, as well as system design and integration and associated validation and verification activities, which are necessarily traceable to system requirements. We will also provide practical exposure to the analytical and digital tools which are paramount to the evolving practice of systems engineering. This practical exposure is designed to enable the student to participate in rigorous post-test data analysis, to participate in model based design and model based systems engineering, as well as statistically relevant process improvement projects. Learned skills, knowledges and case studies will be applicable to engineering professionals in many industries, particularly regulated industries such as aerospace, biomedical, and autonomous vehicles.

The program is built for graduate students and industry professionals. The MSSY program is comprised of three Stackable Certificates that lead to the MS degree in Systems Engineering degree: (1) Fundamentals of Systems Engineering; (2) Systems Design & Architecture; (3) Systems Analytics and Practice. The program is delivered primarily online.

The MS degree program can generally be completed in about three years if two courses are taken each quarter, with each certificate being completed in a year.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 9 QH earned as a special status student may be applied toward a MS degree.

## Doctor of Philosophy in Electrical & Computer Engineering

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Students with a MS in CpE, MS in MSE, MS in EE, MS in ME, or closely related areas may apply for admission to the PhD in ECE or PhD in MSE programs. Admission with only a BS in this field is also possible, but students with only a BS degree are strongly encouraged to enroll first in the MS (CpE, EE, MSE) programs. All graduate engineering courses presuppose mastery of the subject matter of a modern ABET-accredited curriculum in engineering. Students with a BS in other engineering or related science fields and students with a BSCpE, BSEE, or BSME who have not taken graduate academic work for some time may be required to complete preparatory courses that are prerequisites for the core courses of the engineering concentrations on which the qualifying exams are based. These courses carry no credit toward the graduate degree.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Doctor of Philosophy in Mechatronic Systems Engineering

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.

- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Students with a MS in CpE, MS in MSE, MS in EE, MS in ME, or closely related areas may apply for admission to the PhD in ECE or PhD in MSE programs. Admission with only a BS in this field is also possible, but students with only a BS degree are strongly encouraged to enroll first in the MS (CpE, EE, MSE) programs. All graduate engineering courses presuppose mastery of the subject matter of a modern ABET-accredited curriculum in engineering. Students with a BS in other engineering or related science fields and students with a BSCpE, BSEE, or BSME who have not taken graduate academic work for some time may be required to complete preparatory courses that are prerequisites for the core courses of the engineering concentrations on which the qualifying exams are based. These courses carry no credit toward the graduate degree.

### Other Required Materials

- We recommend PhD applicants contact faculty to find a research advisor BEFORE submitting the application. If we receive an application and there is no research advisor commitment, we will consider the applicant for the master's program only.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Master of Science in Electrical Engineering, Computer Engineering or Mechatronic Systems Engineering

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- A Bachelor of Science (BS) degree in computer engineering (BSCpE), electrical engineering (BSEE), or closely related field from a regionally accredited college or university is required for admission to the programs. Those students whose backgrounds differ significantly from EAC/ABET-accredited BS computer, electrical programs may be required to complete prerequisite undergraduate courses. Such courses are not considered part of the 45 quarter hour requirements for the degree. A competency examination may be required of candidates who do not possess a 3.0 GPA or a BS in electrical, electronic, or computer from an EAC/ABET accredited program. Students with BS degrees in physics, mathematics, computer science, engineering science, electrical engineering technology, engineering physics, or similar BS degrees from a regionally accredited college or university may also be admitted. However, these students should be able to demonstrate competency in the following basic subjects by passing an appropriate competency examination: MSCpE: Circuits and Electronics, Digital Systems, Computer Organization, a high- or low-level computer language; MSEE: Digital Design Methods, Physical Electronics, Introductory Electromagnetics, Signals and Systems, Principles of Communications, Circuits and Electronics; MSE: Controls, Robotics, Signals and Systems, Circuits and Electronics, Digital Design Methods, Mechanics, Electromagnetics.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5

- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## **Masters of Science in Systems Engineering (Online)**

### **Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.

- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctoral Degree Programs

### Doctor of Philosophy in Electrical and Computer Engineering

#### Program requirements

All PhD students who have been admitted to the PhD in ECE program must successfully complete three milestones before the PhD degree can be conferred. These milestones refer to:

- Demonstrating that the student is qualified to begin PhD studies
- Demonstrating that the student may identify and formulate a research problem
- Demonstrating that the student can defend her/his dissertation

These three milestones are referred to as the "PhD Qualifying Exam", the "Comprehensive Exam" (also known as the "PhD Proposal"), and the "Dissertation Defense", respectively.

#### Coursework requirements

The PhD in ECE does not have specific course requirements. The coursework plan needs to be approved by the student's advisor and the department chair.

#### Graduate Assessment Requirement

##### ECE Graduate Assessment (ENEE 4950)

This graduate assessment course is required for all ECE graduate students to be taken in their last quarter (the term they have applied as the graduation term). All required assessment materials are uploaded to the course Assignments online to meet the course requirements. Students will receive Canvas course announcements and/or emails from the instructor notifying the students of what are required to be uploaded. As part of the graduate assessment effort, students' advisors and members of Master's thesis Committee / PhD Committee will be asked to provide related information online.

Specifically, (1) Master's degree thesis-option students are required to complete a written self-reflection essay on entire MS program including thesis research and upload the final OGE approved thesis, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (2) Master's degree non-thesis-option students are required to complete a written self-reflection essay on entire MS program and upload an assembled portfolio that includes reports from at least two course projects or homework from the core or depth courses, presentation slides from any course projects, along with the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (3) PhD students are required to complete a written self-reflection essay on entire PhD program including dissertation research and upload the final OGE approved dissertation, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation.

#### Minimum credit requirements

##### Students with a Bachelor of Science in Engineering/Science

For students admitted to the PhD program with a bachelor's degree, 90 QH are required, 75 of which must be completed at the University of Denver. A minimum of 48 QH must be at the 4000-level or higher and may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor and department chair. The student with his/her advisor will develop an appropriate plan of study with core requirements, an area of specialization (depth requirement), breadth requirement and advanced mathematics. The core will consist of 8 QH of coursework. The area of specialization will consist of 16 QH of coursework. An additional 6 QH of coursework (excluding independent research) is required as related breadth requirement. The student must complete a minimum of 16 QH at the 4000-level courses, excluding independent research. Prior to completion of the comprehensive exam, the plan of study must be approved by the student's PhD committee and the chair.

If a student is entering the PhD program without a relevant master's degree, the student should work with his/her advisor in order to meet the degree requirements for a master's degree. All requirements for the given master's degree must be met.

Code	Title	Credits
ENEE 4950	ECE Graduate Assessment	0
A minimum of 48 QH must be at the 4000-level or higher, may include Independent Research or Independent Study as considered appropriate by advisor and assuming a minimum of 16 QH are earned excluding independent research		48
Core Requirement		8
Depth Requirement - Specialization Area		16
Breadth Requirement <sup>1</sup>		6
<b>Total Credits</b>		<b>90</b>

<sup>1</sup> The breadth requirement must be pre-approved by the student's advisor.

### Students with a Master of Science in Engineering/Science

If a student is admitted with a closely related master's degree, up to 45 hours may be transferred and applied to the doctorate degree. The student with his or her advisor will develop an appropriate program consisting of a minimum of 28 quarter hours at the 4000-level, which may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor and the department chair. The student with his or her advisor will develop an appropriate plan of study with an area of specialization, breadth requirements and advanced mathematics. Prior to completion of the comprehensive exam, the student's plan of study must be approved by the student's PhD committee and the department chair.

Code	Title	Credits
ENEE 4950	ECE Graduate Assessment	0
A minimum of 36QH must be at the 4000-level or higher, may include Independent Research or Independent Study as considered appropriate by advisor		36
Student with his or her advisor will develop an appropriate plan of study with an area of specialization, breadth requirements and advanced mathematics		
<b>Total Credits</b>		<b>90</b>

### Non-coursework Requirements

#### Qualifying Examination

Each student must demonstrate sufficient breadth and depth of basic engineering knowledge relevant to electrical and computer engineering and be able to demonstrate ability to organize and present her/his thoughts in a convincing manner. To achieve this, each admitted student is required to demonstrate proficiency in five chosen courses by receiving a final grade of B or better. Students may either enroll or test out these courses. These criteria do not necessarily have to be met within a single quarter; however, a maximum of two attempts is allowed for each course or test.

The five courses will be one from the list of Core Courses, two from two Subject Area Courses, and two courses approved by the advisor. The list of courses is subject to modification with the approval of the department.

#### Core Courses - Choose one course

Code	Title	Credits
<b>Core Courses</b>		<b>12</b>

ENCE 4620	Advanced Computer Vision
ENGR 4730	Introduction to Robotics
<b>Power and Energy Systems</b>	
ENGR 3510	Renewable and Efficient Power and Energy Systems
ENGR 4530	Intro to Power and Energy

### Qualifier Transfer Policy

#### Policy Statement

The Electrical and Computer Engineering (ECE) Department at Denver University (DU) acknowledges the Qualifying Exam achievements of PhD students transferring from other institutions. Subject to the student having successfully passed the Qualifying Exam at their original institution and upon receiving endorsement from their advisor, the departmental faculty will consider and vote on granting an exemption from the DU ECE Qualifying Exam on a case-by-case basis. A majority decision will be required for approval.

This policy applies exclusively to PhD students transferring to DU ECE under the guidance of their advisor. This scenario primarily arises when the department seeks to attract top talent, with advisors bringing only those students who have already demonstrated their qualifications. In alignment with our strategy to recruit outstanding individuals, it is appropriate for the ECE Department to recognize and accept the results of Qualifying Exams from other reputable institutions. This approach allows both faculty and newly admitted students to devote their efforts towards achieving significant research contributions for the department.

#### Timeline

Each admitted graduate student must complete/satisfy all Qualifying Exam requirements within at most 5 quarters from initial admittance. Failure to pass any component of the PhD Qualifying Exam within the given time constraints will prevent the student from continuing in the PhD program.

#### Comprehensive Examination

The purpose of the Comprehensive Examination is to ascertain the potential of the student for PhD quality research. At least two quarters prior to the final defense, the student shall schedule and take the Comprehensive Examination. This oral and written examination will be attended by a minimum of three faculty members, the same faculty who will attend the student's final dissertation defense. The Comprehensive Exam may be open to other students based on the requirements of the student's advisor. The student is expected to make a 30 to 40 minute concise presentation on her/his dissertation topic. The oral and written presentation will highlight previous work in this area, demonstrate a need for the given research, and explain how the given research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. In addition, the student will be expected to answer general fundamental questions in the area of her/his concentration and detailed questions in the area of the student's graduate course work.

The PhD Qualifying Examination must be taken and passed prior to the student taking the Comprehensive Examination. The Comprehensive Examination can be taken at most 2 times. If the student does not pass the Comprehensive Exam on the second try, the student will be terminated from the program. The comprehensive exam will be graded on a pass/fail system.

#### Dissertation

The student is required to complete and defend a dissertation of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University's Graduate School guidelines. A summary of the dissertation must be presented in a public seminar and subsequently defended by the student in the final oral defense. The defense committee will consist of the student's entire PhD committee.

#### Residence Requirement

Enrollment in at least six quarters (four semesters), including at least two consecutive quarters (one semester) of full-time attendance is required for graduation.

**PhD Committee**

The PhD committee should consist of at least four faculty members. Three faculty members must be from within the student's specialty area; these can include the student's advisor, other faculty in that degree program and, if necessary, off-campus experts. Finally, for the final oral defense of the dissertation, an oral defense chair, who must be a tenured faculty member outside the Department of Electrical and Computer Engineering and Mechanical and Materials Engineering, needs to be identified in consultation with the DU Graduate Studies Office. The PhD committee needs to be identified with the dissertation advisor and approved by the chair of the department and the Office of Graduate Studies.

---

**Doctor of Philosophy in Mechatronics Systems Engineering****Program requirements**

All PhD students who have been admitted to the PhD in ECE or PhD in MSE programs must successfully complete three milestones before the PhD degree can be conferred. These milestones refer to:

- Demonstrating that the student is qualified to begin PhD studies
- Demonstrating that the student may identify and formulate a research problem
- Demonstrating that the student can defend her/his dissertation

These three milestones are referred to as the "PhD Qualifying Exam", the "Comprehensive Exam" (also known as the "PhD Proposal"), and the "Dissertation Defense", respectively.

**Coursework requirements**

The PhD in MSE does not have specific course requirements. The coursework plan needs to be approved by the student's advisor and the department chair.

**Graduate Assessment Requirement**

ECE Graduate Assessment (ENEE 4950)

This graduate assessment course is required for all ECE graduate students to be taken in their last quarter (the term they have applied as the graduation term). All required assessment materials are uploaded to the course Assignments online to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. As part of the graduate assessment effort, students' advisors and members of Master's thesis Committee / PhD Committee will be asked to provide related information online.

Specifically, (1) Master's degree thesis-option students are required to complete a written self-reflection essay on entire MS program including thesis research and upload the final OGE approved thesis, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (2) Master's degree non-thesis-option students are required to complete a written self-reflection essay on entire MS program and upload an assembled portfolio that includes reports from at least two course projects or homework from the core or depth courses, presentation slides from any course projects, along with the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (3) PhD students are required to complete a written self-reflection essay on entire PhD program including dissertation research and upload the final OGE approved dissertation, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation.

**Minimum credit requirements****Students with a Bachelor of Science in Engineering/Science**

For students admitted to the PhD program with a bachelor's degree, 90 QH are required, 75 of which must be completed at the University of Denver. A minimum of 48 QH must be at the 4000-level or higher and may include as many dissertation research hours (Independent Research and Independent Study) as considered appropriate by the advisor and department chair. The student with his/her advisor will develop an appropriate plan of study with core requirements, an area of specialization (depth requirement), breadth requirement and advanced mathematics. The core will consist of 8 QH of coursework. The area of specialization will consist of 16 QH of coursework. An additional 6 QH of coursework (excluding independent research) is required as related breadth requirement. The student must complete a minimum of 16 QH at the 4000-level courses, excluding independent research. Prior to completion of the comprehensive exam, the plan of study must be approved by the student's PhD committee and the department chair.

If a student is entering the PhD program without a relevant master's degree, the student should work with their advisor in order to meet the degree requirements for a master's degree. All requirements for the given master's degree must be met.

Code	Title	Credits

**Qualifier Transfer Policy****Policy Statement**

The Electrical and Computer Engineering (ECE) Department at Denver University (DU) acknowledges the Qualifying Exam achievements of PhD students transferring from other institutions. Subject to the student having successfully passed the Qualifying Exam at their original institution and upon receiving endorsement from their advisor, the departmental faculty will consider and vote on granting an exemption from the DU ECE Qualifying Exam on a case-by-case basis. A majority decision will be required for approval.

This policy applies exclusively to PhD students transferring to DU ECE under the guidance of their advisor. This scenario primarily arises when the department seeks to attract top talent, with advisors bringing only those students who have already demonstrated their qualifications. In alignment with our strategy to recruit outstanding individuals, it is appropriate for the ECE Department to recognize and accept the results of Qualifying Exams from other reputable institutions. This approach allows both faculty and newly admitted students to devote their efforts towards achieving significant research contributions for the department.

**Timeline**

Each admitted graduate student must complete/satisfy all Qualifying Exam requirements within at most 5 quarters from initial admittance. Failure to pass any component of the PhD Qualifying Exam within the given time constraints will prevent the student from continuing in the PhD program.

**Comprehensive Examination**

The purpose of the Comprehensive Examination is to ascertain the potential of the student for PhD quality research. At least two quarters prior to the final defense, the student shall schedule and take the Comprehensive Examination. This oral and written examination will be attended by a minimum of three faculty members, the same faculty who will attend the student's final dissertation defense. The Comprehensive Exam may be open to other students based on the requirements of the student's advisor. The student is expected to make a 30 to 40 minute concise presentation on her/his dissertation topic. The oral and written presentation will highlight previous work in this area, demonstrate a need for the given research, and explain how the given research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. In addition, the student will be expected to answer general fundamental questions in the area of her/his concentration and detailed questions in the area of the student's graduate course work.

The PhD Qualifying Examination must be taken and passed prior to the student taking the Comprehensive Examination. The Comprehensive Examination can be taken at most 2 times. If the student does not pass the Comprehensive Exam on the second try, the student will be terminated from the program. The comprehensive exam will be graded on a pass/fail system.

**Dissertation**

The student is required to complete and defend a dissertation of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University's Graduate School guidelines. A summary of the dissertation must be presented in a public seminar and subsequently defended by the student in the final oral defense. The defense committee will consist of the student's entire PhD committee.

**Residence Requirement**

Enrollment in at least six quarters (four semesters), including at least two consecutive quarters (one semester) of full-time attendance is required for graduation.

**PhD Committee**

The PhD committee should consist of at least four faculty members. Three faculty members must be from within the student's specialty area; these can include the student's advisor, other faculty in that degree program and, if necessary, off-campus experts. Finally, for the final oral defense of the thesis, an oral defense chair, who must be a tenured faculty member outside the Department of Electrical and Computer Engineering and Mechanical and Materials Engineering, needs to be identified in consultation with the DU Graduate Studies Office. The PhD committee needs to be identified with the dissertation advisor and approved by the chair of the department and the Office of Graduate Studies.

## Master's Degree Programs

### Master of Science in Computer Engineering

#### Minimum Credit Requirements

Every candidate for the MS degree must complete 45 QH of credit, at least 36 of which must be completed at the University of Denver.

#### Program Structure

Candidates may elect either the thesis or non-thesis option. This choice may be made at any time, although a delay in declaration may impact the completion date. Students who are GTAs or who receive financial support from a University research grant, such as GRAs, are required to elect the thesis option. The program is designed to be completed in about six quarters if two courses (usually 8 QH) are taken each quarter.

#### Graduate Assessment Requirement

ECE Graduate Assessment (ENEE 4950)

This graduate assessment course is required for all ECE graduate students to be taken in their last quarter (the term they have applied as the graduation term). All required assessment materials are uploaded to the course Assignments online to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. As part of the graduate assessment effort, students' advisors and members of Master's thesis Committee / PhD Committee will be asked to provide related information online.

Specifically, (1) Master's degree thesis-option students are required to complete a written self-reflection essay on entire MS program including thesis research and upload the final OGE approved thesis, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (2) Master's degree non-thesis-option students are required to complete a written self-reflection essay on entire MS program and upload an assembled portfolio that includes reports from at least two course projects or homework from the core or depth courses, presentation slides from any course projects, along with the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (3) PhD students are required to complete a written self-reflection essay on entire PhD program including dissertation research and upload the final OGE approved dissertation, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation.

#### Non-Thesis Option

The non-thesis option is the more flexible of the two options. This program is designed with the working professional in mind. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the requirement of 45 QH. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree, after approval by their advisor and the Chair. Each student must take a minimum of 24 quarter hours at the 4000-level.

#### One Year (four quarters) – Non-thesis Option

The Department of Electrical and Computer Engineering (ECE) offers a one-year, non-thesis option. Students who select the one-year program will be able to graduate within 12 months, four academic quarters, as there are enough courses offered in each specialization to meet the 20 QH depth requirement. The breadth requirement (14 QH) is fulfilled by taking courses offered in other specializations. In addition, every year courses that satisfy the mathematics requirement (3 QH) are offered. The MS non-thesis structure is shown below. QH in each category denote minimum requirements that must be satisfied. Any changes in the student's plan of study must be approved a-prior by the student's advisor.

The basic structure of the minimum 45 QH for the non-thesis option is as follows:

#### Requirements for Non-Thesis Option (minimum QH)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	20
	Mathematics Requirement (requires one approved course at the 3000-level or higher) <sup>1</sup>	3
	Breadth Requirement	14
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> This indicates minimum number of quarter hours. Any credits over the 3 QH from the mathematics courses will count toward the breadth requirement.

#### Thesis Option

A thesis permits a candidate to obtain depth in an area of study and it is especially useful for individuals who seek to pursue a subsequent degree, for example, a PhD degree. Thesis candidates work closely with a thesis advisor. The thesis option is required for all GRAs and GTAs. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the 45 QH hour requirements. An overall minimum GPA of

3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree. Each student must take a minimum of 16 quarter hours at the 4000-level. The basic structure of the minimum 45 QH for the thesis option is as follows:

#### Requirements for Thesis Option (minimum QH)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	16
	Breadth Requirement <sup>1</sup>	6
	Thesis	15
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> The breadth requirement must be pre-approved by the student's advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

#### Breadth Requirement (Non-Thesis and Thesis Option)

Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering, Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student's advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement.

The MSCpE program offers one area of specialization:

- Computer Systems Engineering

The student's degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

Core courses for all Computer Engineering Students

#### The following courses are required for all computer engineering students:

Code	Title	Credits
ENEE 4950	ECE Graduate Assessment	0
ENCE 4110	Modern Digital Systems Design	4
ENGR 3621	Advanced Engineering Mathematics	4

#### Specialization in Computer Systems Engineering

This area of specialization prepares students with fundamental and working knowledge of methods for analysis, design, and implementation of intelligent systems (IS). Particular attention is given to signal and information processing in IS, design of IS, and implementation of IS using state-of-the-art technology. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

Code	Title	Credits
ENCE 3321	Network Design	4
ENCE 4231	Embedded Systems Programming	4
ENCE 4250	Advanced Hardware Description Language (HDL) Modeling and Synthesis	4
ENCE 4620	Advanced Computer Vision	4
ENCE 4630	Advanced Pattern Recognition	4
ENEE 3670	Introduction to Digital Signal Processing	4
ENGR 4622	Advanced Optimization	4
ENCE 4631	Advanced Machine Learning	4

## Master of Science in Electrical Engineering

The Master of Science in Electrical Engineering (MSEE) is designed to advance the student's knowledge in several areas of engineering. This degree provides breadth while permitting the student to achieve depth in a specialization area. This specialization area, with thematic sequences of courses,

has been selected to coincide with those of high current interest as well as those emerging technologies that hold promise of increasing importance for the future. The purpose of this programs is to serve the profession of engineering and the Colorado community through advanced study in computer engineering, electrical engineering, and other related fields. This program prepares the student for academic and industrial advancement. The program offer a thesis and a non-thesis option.

The Department of ECE offers both part-time and full-time programs. The Department recognizes that a student may be employed full-time while studying for a degree. Therefore, most courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours.. The MS degree program can generally be completed in about four years if one course is taken each quarter, but it is usually possible to take two courses per quarter, bringing completion time closer to the more common duration of two years. Also, students who select the one-year non-thesis will be able to graduate within 12 months, four academic quarters. For part-time students who are working in industry positions and who have chosen the thesis option, a topic related to the job function may be acceptable as the thesis research topic. Furthermore, a qualified staff member at the place of employment may be approved to serve as an adjunct faculty on the thesis committee.

Students not interested in pursuing a degree but interested in taking an occasional course may register as special status students by following an abbreviated admissions process. However, only 15 QH earned as a special status student may be applied toward a MS degree.

### Minimum Credit Requirements

Every candidate for the MS degree must complete 45 QH of credit, at least 36 of which must be completed at the University of Denver.

### Program Structure

Candidates may elect either the thesis or non-thesis option. This choice may be made at any time, although a delay in declaration may impact the completion date. Students who are GTAs or who receive financial support from a University research grant, such as GRAs, are required to elect the thesis option. The program is designed to be completed in about six quarters if two courses (usually 8 QH) are taken each quarter.

### Required Graduate Assessment Course

#### ECE Graduate Assessment (ENEE 4950)

This graduate assessment course is required for all ECE graduate students to be taken in their last quarter (the term they have applied as the graduation term). All required assessment materials are uploaded to the course Assignments online to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. As part of the graduate assessment effort, students' advisors and members of Master's thesis Committee / PhD Committee will be asked to provide related information online.

Specifically, (1) Master's degree thesis-option students are required to complete a written self-reflection essay on entire MS program including thesis research and upload the final OGE approved thesis, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (2) Master's degree non-thesis-option students are required to complete a written self-reflection essay on entire MS program and upload an assembled portfolio that includes reports from at least two course projects or homework from the core or depth courses, presentation slides from any course projects, along with the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (3) PhD students are required to complete a written self-reflection essay on entire PhD program including dissertation research and upload the final OGE approved dissertation, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation.

### Non-Thesis Option

The non-thesis option is the more flexible of the two options. This program is designed with the working professional in mind. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the requirement of 45 QH. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree, after approval by their advisor and the Chair. Each student must take a minimum of 24 quarter hours at the 4000-level.

### One Year (four quarters) – Non-thesis Option

The Department of Electrical and Computer Engineering (ECE) offers a one-year, non-thesis option. Students who select the one-year program will be able to graduate within 12 months, four academic quarters, as there are enough courses offered in each specialization to meet the 20 QH depth requirement. The breadth requirement (14 QH) is fulfilled by taking courses offered in other specializations. In addition, every year courses that satisfy the mathematics requirement (3 QH) are offered. The MS non-thesis structure is shown below. QH in each category denote minimum requirements that must be satisfied. Any changes in the student's plan of study must be approved a-prior by the student's advisor.

The basic structure of the minimum 45 QH for the non-thesis option is as follows:

### Requirements for Non-Thesis Option (minimum QH)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	20
	Mathematics Requirement (requires one approved course at the 3000-level or higher) <sup>1</sup>	3

Breadth Requirement	14
<b>Total Credits</b>	<b>45</b>

<sup>1</sup> This indicates minimum number of quarter hours. Any credits over the required 3 QH from the mathematics courses will count toward the breadth requirement.

### Thesis Option

A thesis permits a candidate to obtain depth in an area of study and it is especially useful for individuals who seek to pursue a subsequent degree, for example, a PhD degree. Thesis candidates work closely with a thesis advisor. The thesis option is required for all GRAs and GTAs. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the 45 QH hour requirements. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree. Each student must take a minimum of 16 quarter hours at the 4000-level. The basic structure of the minimum 45 QH for the thesis option is as follows:

#### Requirements for Thesis Option (minimum QH)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	16
	Breadth Requirement <sup>1</sup>	6
	Thesis	15
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> The breadth requirement must be pre-approved by the student's advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

### Breadth Requirement (Non-Thesis and Thesis Option)

Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering, Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student's advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement.

The MSEE program offers three areas of specialization:

- Control & Communication Systems
- Electric Power & Energy Systems
- Optics/Optoelectronics/Photonics

Each student must choose an area of specialization. The student's degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

Core courses for all Electrical Engineering Students

#### The following courses are required for all electrical engineering students, regardless of area of specialization:

Code	Title	Credits
ENEE 4950	ECE Graduate Assessment	0
ENEE 4640	Electromagnetic Compatibility	4
ENGR 3621	Advanced Engineering Mathematics	4

### Specialization in Control & Communication Systems

This area of specialization prepares students for basic and applied research and development of complex systems, including, electrical, mechanical, bio-inspired, mechatronic systems, robotic systems, and unmanned systems. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

Code	Title	Credits
ENCE 4231	Embedded Systems Programming	4
ENEE 3670	Introduction to Digital Signal Processing	4
ENGR 3721 & ENGR 3722	Controls and Control Systems Laboratory	4
ENEE 4141	Digital Communications	4
ENGR 4350	Reliability <sup>1</sup>	4
ENGR 4620	Optimization <sup>1</sup>	3,4
ENGR 4622	Advanced Optimization	4
ENGR 4730	Introduction to Robotics	4
ENGR 4735	Linear Systems	4
ENGR 4740	Adaptive Control Systems	4
ENGR 4745	Adv Non-Linear Control System	4
ENGR 4750	Networked Control Systems	4
ENGR 4755	Optimal Control	4
ENGR 4760	Multivariable Control	4

<sup>1</sup> This course may count toward the specialization with advisors pre-approval. This course may not be offered on a regular basis.

### Specialization in Electric Power and Energy Systems

This area of specialization prepares students with the basic foundation and advanced knowledge, required for the research and development in the area of power systems, renewable energy systems, and power electronic devices. This is accomplished through several theoretical courses and applied courses. Students must choose from the following courses:

Code	Title	Credits
ENGR 3510	Renewable and Efficient Power and Energy Systems	4
ENGR 3540	Electric Power Systems	4
ENGR 3721 & ENGR 3722	Controls and Control Systems Laboratory	4
ENGR 4530	Intro to Power and Energy	4
ENGR 4545	Electric Power Economy	4
ENGR 4560	Power Generation Operation and Control	4
ENGR 4590	Power System Protection	4
ENGR 4735	Linear Systems	4
ENGR 4740	Adaptive Control Systems	4

### Specialization in Optics/Optoelectronics/Photonics

This area of specialization prepares students for research, development, and design of devices and systems operating based on wave theory; focusing on laser, optics, light wave devices, and systems.

Code	Title	Credits
ENEE 4030	Optoelectronics	4
ENEE 4141	Digital Communications	4
ENGR 4200	Introduction to Nanotechnology	4
ENCE 4250	Advanced Hardware Description Language (HDL) Modeling and Synthesis	4
ENGR 4735	Linear Systems	4
ENGR 4740	Adaptive Control Systems	4

## Master of Science in Mechatronic Systems Engineering

### Minimum Credit Requirements

Every candidate for the MS degree must complete 45 QH of credit, at least 36 of which must be completed at the University of Denver.

### Program Structure

Candidates may elect either the thesis or non-thesis option. This choice may be made at any time, although a delay in declaration may impact the completion date. Students who are GTAs or who receive financial support from a University research grant, such as GRAs, are required to elect the thesis option. The program is designed to be completed in about six quarters if two courses (usually 8 QH) are taken each quarter.

### Required Graduate Assessment Course

ECE Graduate Assessment (ENEE 4950)

This graduate assessment course is required for all ECE graduate students to be taken in their last quarter (the term they have applied as the graduation term). All required assessment materials are uploaded to the course Assignments online to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. As part of the graduate assessment effort, students' advisors and members of Master's thesis Committee / PhD Committee will be asked to provide related information online.

Specifically, (1) Master's degree thesis-option students are required to complete a written self-reflection essay on entire MS program including thesis research and upload the final OGE approved thesis, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (2) Master's degree non-thesis-option students are required to complete a written self-reflection essay on entire MS program and upload an assembled portfolio that includes reports from at least two course projects or homework from the core or depth courses, presentation slides from any course projects, along with the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation. (3) PhD students are required to complete a written self-reflection essay on entire PhD program including dissertation research and upload the final OGE approved dissertation, defense presentation slides, and the completed and signed degree program plan, by the published OGE "Deadline for thesis/dissertation formatting approval" of the students' last quarter before graduation.

### Non-Thesis Option

The non-thesis option is the more flexible of the two options. This program is designed with the working professional in mind. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the requirement of 45 QH. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree, after approval by their advisor and the Chair. Each student must take a minimum of 24 quarter hours at the 4000-level.

### One Year (four quarters) – Non-thesis Option

The Department of Electrical and Computer Engineering (ECE) offers a one-year, non-thesis option. Students who select the one-year program will be able to graduate within 12 months, four academic quarters, as there are enough courses offered in each specialization to meet the 20 QH depth requirement. The breadth requirement (14 QH) is fulfilled by taking courses offered in other specializations. In addition, every year courses that satisfy the mathematics requirement (3 QH) are offered. The MS non-thesis structure is shown below. QH in each category denote minimum requirements that must be satisfied. Any changes in the student's plan of study must be approved a-prior by the student's advisor.

The basic structure of the minimum 45 QH for the non-thesis option is as follows:

#### Requirements for Non-Thesis Option (minimum quarter hours)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	20
	Mathematics Requirement (requires one approved course at the 3000-level or higher) <sup>1</sup>	3
	Breadth Requirement	14
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> This indicates minimum number of quarter hours. Any credits over the required 3 QH from the mathematics courses will count toward the breadth requirement.

### Thesis Option

A thesis permits a candidate to obtain depth in an area of study and it is especially useful for individuals who seek to pursue a subsequent degree, for example, a PhD degree. Thesis candidates work closely with a thesis advisor. The thesis option is required for all GRAs and GTAs. For this option, a grade of C or better must be obtained in each course in order for that course to count toward the 45 QH hour requirements. An overall minimum GPA of 3.0 is also required for graduation. Students may only take up to 8 quarter hours of independent study to be counted toward the degree. Each student must take a minimum of 16 quarter hours at the 4000-level. The basic structure of the minimum 45 QH for the thesis option is as follows:

#### Requirements for Thesis Option (minimum quarter hours)

Code	Title	Credits
	Graduate Assessment Requirement	0
	Core Requirement	8
	Depth Requirement - Specialization Area	16
	Breadth Requirement <sup>1</sup>	6

Thesis	15
<b>Total Credits</b>	<b>45</b>

<sup>1</sup> The breadth requirement must be pre-approved by the student's advisor.

If a student who has elected to pursue a thesis option, then at any time thereafter elects to change to a non-thesis option, all requirements for the non-thesis must be met. Any independent research taken may be forfeited and students must adhere to the grade requirements of the non-thesis option.

### Breadth Requirement (Non-Thesis and Thesis Option)

Breadth Requirement courses (each with not less than 3 QH of credit) may be chosen from courses offered in other specialization areas. A course that appears in more than one specialization area may only be counted toward either the specialization requirement or the breadth requirement. The remaining courses are chosen from appropriate courses numbered 3000 or higher, offered by the Department Mechanical & Materials Engineering, Department of Computer Science or NSM (Natural Sciences and Mathematics). Prior approval by the student's advisor is required. It is strongly recommended that students choose math related courses to satisfy the breadth requirement

The MSE program offers one area of specialization:

- Robotic Systems

The student's degree program will be a combination of the core courses, specialization areas (depth requirement) and the breadth requirement. Each student is required to complete the 2 core courses. Students may choose from any of the courses from their area of specialization but should keep in mind the 4000-level requirement of the degree.

Core courses for all Mechatronic Systems Engineering Students

The following courses are required for all mechatronic systems engineering students regardless of area of specialization:

Code	Title	Credits
ENEE 4950	ECE Graduate Assessment	0
ENEE 4640 or ENCE 4110	Electromagnetic Compatibility Modern Digital Systems Design	4
ENGR 3621	Advanced Engineering Mathematics	4

### Specialization in Robotics Systems

This area of specialization is designed to meet the needs of industry and federal research laboratories for engineers with multidisciplinary experience and ability to design and integrate complex systems requiring knowledge from diverse engineering disciplines. Said differently, mechatronic systems involves integration of mechanical, electrical, and computer engineering to design complex systems that perform real-world tasks. This program includes a broad set of common course requirements along with a selection of appropriate technical electives providing both breadth and depth of knowledge in a student's area of interest.

Code	Title	Credits
ENCE 4231	Embedded Systems Programming	4
ENCE 4250	Advanced Hardware Description Language (HDL) Modeling and Synthesis	4
ENCE 4620	Advanced Computer Vision	4
ENGR 3630	Finite Element Methods <sup>1</sup>	4
ENGR 4620	Optimization <sup>1</sup>	4
ENGR 4730	Introduction to Robotics	4
ENGR 4735	Linear Systems	4
ENME 4020	Adv Finite Element Analysis <sup>1</sup>	4
ENMT 4220	Mechatronics II	4
ENGR 4740	Adaptive Control Systems	4
ENGR 4745	Adv Non-Linear Control System	4

<sup>1</sup> This course may count toward the specialization with advisors preapproval. This course may not or may not be offered on a regular basis.

---

## Master of Science in Systems Engineering (Online)

Minimum of 45 credit hours are required for the degree.

Code	Title	Credits
<b>Specialized Graduate Certificate in The Fundamentals of Systems Engineering</b>		
Required Courses		
ENSY 4010	Systems Engineering Fundamentals	
ENSY 4050	Digital Transformation for Advanced Integration	
ENSY 4090	Project Management in Relation to Systems Engineering	
Required Elective Courses (Choose at least two courses totaling 6 credit hours)		6
ENMT 4000	Space Systems Design I <sup>2</sup>	
ENMT 4010	Space Systems Design II <sup>2</sup>	
ENSY 4021	Design of Space Systems Part 1	
ENSY 4022	Design of Space Systems Part 2	
ENSY 4040	Systems Optimization	
ENSY 4060	Practical Model Based Systems Engineering	
ENGR 4501	Graduate Capstone Design I <sup>1</sup>	
ENGR 4502	Graduate Capstone Design II <sup>1</sup>	
ENGR 4503	Graduate Capstone Design III <sup>1</sup>	
ENGR 4504	Graduate Capstone Design IV <sup>1</sup>	
ENGR 4991	Independent Study	
<b>Specialized Graduate Certificate in The Systems Design and Architecture</b>		
Required Courses		
ENSY 4012	Systems Engineering Requirements Development	
ENSY 4014	Complex System Architectures	
ENSY 4016	Conceptual Design of Systems	
Required Elective Courses (Choose at least two courses totaling 6 credit hours)		6
ENSY 4024	Applied Electrical, Mechanical and Software Systems	
ENSY 4030	Introduction to Aerospace Missions	
ENSY 4040	Systems Optimization	
ENSY 4060	Practical Model Based Systems Engineering	
ENSY 4112	Practical Validation and Verification Test Planning	
ENGR 4501	Graduate Capstone Design I <sup>1</sup>	
ENGR 4502	Graduate Capstone Design II <sup>1</sup>	
ENGR 4503	Graduate Capstone Design III <sup>1</sup>	
ENGR 4504	Graduate Capstone Design IV <sup>1</sup>	
ENGR 4991	Independent Study	
<b>Specialized Graduate Certificate in The Systems Analytics &amp; Practice</b>		
Required Courses		
ENSY 4180	Applied Mathematics for Systems Engineering	
ENSY 4181	Introductory Probability and Statistics for Systems Engineering	
ENSY 4182	Data Analytics for Systems Engineering	
Required Elective Courses (Choose two courses totaling at least 6 credit hours)		6
ENSY 4042	Optimization for Advanced Systems	
ENSY 4112	Practical Validation and Verification Test Planning	
ENSY 4170	Practical Approaches to Continuous Improvement	
ENSY 4200	Applied Machine Learning for Advanced Systems Modeling	
ENGR 4501	Graduate Capstone Design I <sup>1</sup>	
ENGR 4502	Graduate Capstone Design II <sup>1</sup>	
ENGR 4503	Graduate Capstone Design III <sup>1</sup>	
ENGR 4504	Graduate Capstone Design IV <sup>1</sup>	
ENGR 4991	Independent Study	

<sup>1</sup> A maximum of 9 credit hours of the Graduate Capstone Design series will be applied as Required Elective Credit. Only Lockheed Martin employees in the Engineering Leadership Development Program (ELDP) may take the Graduate Capstone Design series courses.

<sup>2</sup> These courses are only available to Lockheed Martin Employees at this time.

## Specialized Graduate Certificate Programs

### Specialized Graduate Certificate in the Fundamentals of Systems Engineering

This Specialized Graduate Certificate provides expertise in fundamentals of the discipline of systems engineering, applicable to engineering professionals in many industries, particularly regulated industries such as aerospace, biomedical, and autonomous vehicles.

Please note that this is the first of the three stackable certificates leading to the MS in Systems Engineering (Online) and is available as a singular Specialized Graduate Certificate.

#### Minimum Credit Requirements

Every candidate for the Specialized Graduate Certificate must complete 15 credit hours.

Code	Title	Credits
Required Courses		
ENSY 4010	Systems Engineering Fundamentals	3
ENSY 4050	Digital Transformation for Advanced Integration	3
ENSY 4090	Project Management in Relation to Systems Engineering	3
Required Elective Courses (Choose at least two courses totaling 6 credit hours)		
ENSY 4021	Design of Space Systems Part 1	3
ENSY 4022	Design of Space Systems Part 2	3
ENSY 4040	Systems Optimization	3
ENSY 4060	Practical Model Based Systems Engineering	3
ENGR 4501	Graduate Capstone Design I <sup>1</sup>	3
ENGR 4502	Graduate Capstone Design II <sup>1</sup>	3
ENGR 4503	Graduate Capstone Design III <sup>1</sup>	3
ENGR 4504	Graduate Capstone Design IV <sup>1</sup>	3
ENGR 4991	Independent Study	1-5
Total Credits		15

<sup>1</sup> A maximum of 9 credit hours of Graduate Capstone Design courses will be applied as Required Elective Credit. Only Lockheed Martin employees in the current ELDP cohort may take the Graduate Capstone Design series courses.

### Specialized Graduate Certificate in Systems Analytics & Practice

This Specialized Graduate Certificate provides systems engineering expertise with practical exposure to the analytical and digital tools which are paramount to the evolving practice of systems engineering. This practical exposure is designed to enable the student to participate in rigorous post-test data analysis, to participate in model based design and model based systems engineering, as well as statistically relevant process improvement projects. Case studies are applicable to engineering professionals in many industries, particularly regulated industries such as aerospace, biomedical, and autonomous vehicles.

Please note that this is the third of the three stackable certificates leading to the MS in Systems Engineering (Online) and is available as a singular Specialized Graduate Certificate.

#### Minimum Credit Requirements

Every candidate for the Specialized Graduate Certificate must complete 15 credit hours.

Code	Title	Credits

ENGR 4502	Graduate Capstone Design II <sup>1</sup>	
ENGR 4503	Graduate Capstone Design III <sup>1</sup>	
ENGR 4504	Graduate Capstone Design IV <sup>1</sup>	
ENGR 4991	Independent Study	
Total Credits		15

<sup>1</sup> A maximum of 9 credit hours of Graduate Capstone Design courses will be applied as Required Elective Credit. Only Lockheed Martin employees in the current ELDP cohort may take the Graduate Capstone Design series courses.

## Specialized Graduate Certificate in Systems Design and Architecture

This Specialized Graduate Certificate provides systems engineering expertise with emphasis on support for proposals after contract award, through critical design reviews, as well as system design and integration and associated validation and verification activities, which are necessarily traceable to system requirements. Case studies are applicable to engineering professionals in many industries, particularly regulated industries such as aerospace, biomedical, and autonomous vehicles.

Please note that this is the second of the three stackable certificates leading to the MS in Systems Engineering (Online) and is available as a singular Specialized Graduate Certificate.

### Minimum Credit Requirements

Every candidate for the Specialized Graduate Certificate must complete 15 credit hours.

<sup>1</sup> A maximum of 9 credit hours of Graduate Capstone Design courses will be applied as Required Elective Credit. Only Lockheed Martin employees in the current ELDP cohort may take the Graduate Capstone Design series courses.

## Engineering, Computer (ENCE)

### ENCE 2101 Digital Design (3 Credits)

Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM's, PLA's and PAL's; data selectors and multiplexors; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

**ENCE 3100 Advanced Digital System Design (4 Credits)**

Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

**ENCE 3210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

**ENCE 3231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

**ENCE 3241 Computer Organization and Architecture (3 Credits)**

Organization of digital computers; memory, register transfer and datapath; Arithmetic Logic Unit; computer architecture; control unit; I/O systems. Prerequisite: ENCE 2101.

**ENCE 3250 HDL Modeling & Synthesis (3 Credits)**

Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor's permission.

**ENCE 3260 Python for Engineers (3 Credits)**

This course introduces python programming to students and gives them programming and mathematical tools that will be useful in different areas of engineering. The course is divided into 2 main parts. Part 1 (Introduction to Python Programming), covers the fundamental concepts of python programming, covering topics from variables and data structures, functions, algorithm complexity, representation of numbers and basics of parallel computing. Part 2 (Introduction to Numerical Methods), gives an overview of a variety of numerical methods that are useful for engineers. The course reviews the basics of linear algebra, discusses the importance of eigenvalues and eigenvectors, regressions and concepts of "discrete Fourier transform" and "fast Fourier transform".

**ENCE 3321 Network Design (4 Credits)**

Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**

Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

**ENCE 3620 Computer Vision (4 Credits)**

This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisite: ENEE 3111.

**ENCE 3630 Pattern Recognition (4 Credits)**

This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.

**ENCE 3631 Machine Learning (4 Credits)**

This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

**ENCE 3830 Topics in Computer Engineering (1-5 Credits)**

Special topics in computer engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENCE 3991 Independent Study (1-5 Credits)**

Topics in computer engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENCE 3995 Independent Research (1-10 Credits)****ENCE 4110 Modern Digital Systems Design (4 Credits)**

This course focuses on the design of digital systems using combinational, sequential, and programmable logic devices and Hardware Description Languages (HDL). Techniques for logic design including asynchronous logic, physical world interfaces to digital systems, and system performance analysis methods are studied. Students also learn HDL-Verilog to program CPLD devices and FPGA systems. Cross listed with ENCE 3100.

**ENCE 4210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Cross listed with ENCE 3210.

**ENCE 4231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems.

**ENCE 4250 Advanced Hardware Description Language (HDL) Modeling and Synthesis (4 Credits)**

This course covers advanced concepts in Hardware Description and Language (HDL) modeling and Synthesis. It covers topics including but not limited to digital system design, simulation, and synthesis using Verilog HDL and VHDL. The course also covers RTL design, behavioral description, system Verilog, and timing analysis using CAD tools.

**ENCE 4501 Advanced VLSI Design (4 Credits)**

Advanced techniques in the fabrication and design of VLSI circuits and systems. Modeling of parasitic components. Floor-planning, clock distribution, routing, and low power design. Cross listed with ENCE 3501. Prerequisite: ENCE 3501 or permission of instructor.

**ENCE 4620 Advanced Computer Vision (4 Credits)**

This course covers advanced concepts in image processing and computer vision including but not limited to image radiometry and geometric formation, edge detection, geometric based transformations (e.g., image warping and morphing), camera calibration, Epipolar geometry, and stereo feature matching. Other advanced topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice advanced topics in image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 3620. Prerequisite: ENEE 3311.

**ENCE 4630 Advanced Pattern Recognition (4 Credits)**

This class covers advanced topics in pattern recognition including but not limited to Bayesian decision theory, parametric estimation and supervised learning, linear discriminant functions, nonparametric methods, feature extraction for representation and classification, manifold learning, bag of words, and Support Vector Machines. Cross listed with.

**ENCE 4631 Advanced Machine Learning (4 Credits)**

This class covers advanced topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep neural networks, deep learning, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE 3631.

**ENCE 4800 Advanced Topics (CPE) (1-5 Credits)**

Various topics in computer engineering as announced. May be taken more than once. Cross-listed with ENCE 3321, ENCE 3620.

**ENCE 4991 Independent Study (1-10 Credits)****ENCE 4995 Independent Research (1-18 Credits)****ENCE 5995 Independent Research (1-18 Credits)**

## Engineering, Electrical (ENEE)

**ENEE 3011 Physical Electronics (4 Credits)**

The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010 or CHEM 1610, PHYS 1213 or PHYS 1214 or permission of instructor.

**ENEE 3111 Signals & Systems (4 Credits)**

Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Prerequisites: ENEE 2012, MATH 2070.

**ENEE 3141 Digital Communications (3 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3620 Optical Fiber Communications (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

**ENEE 3641 Introduction to Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Cross listed with ENEE 4640. Prerequisites: ENEE 3111, ENEE 2611 and ENEE 2223.

**ENEE 3670 Introduction to Digital Signal Processing (4 Credits)**

Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

**ENEE 4030 Optoelectronics (4 Credits)**

Optical fibers: structures, waveguiding, and fabrication; attenuation and dispersion; optical sources (LED, LASER, Fiber laser); power launching and coupling; photodetectors (APD, PIN, MSM); and practical optical transmitter and receivers. Cross listed with ENEE 3030.

**ENEE 4141 Digital Communications (4 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels.

**ENEE 4620 Adv Optical Fiber Comm (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users who have a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA), and ultra-fast optical time division multiplexing (OTDM). Advanced Project. Cross listed with ENEE 3620. Prerequisite: instructor permission.

**ENEE 4630 Optical Networking (4 Credits)**

This course provides a technical overview of optical networking. It gives students a solid understanding of optical networking field principles and practice. Underlying principles are reviewed along with common optical solutions and practices. It explains and provides practical tips on how to design and implement Networks. Examples are used to demonstrate key concepts of ATM, SONET/SDH and DWDM implementation. Prerequisite: ENEE 3011 or instructor approval.

**ENEE 4640 Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include: Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Final Project. Cross listed with ENEE 3641.

**ENEE 4800 Advanced Topics (EE) (1-5 Credits)**

Various advanced topics in electrical engineering as announced. May be taken more than once. Cross-listed with ENEE 3035.

**ENEE 4950 ECE Graduate Assessment (0 Credits)**

This class does not meet. All graduate (MS and PhD) ECE students will enroll in this class during their last quarter. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. The purpose is to collect data for the assessment and continuous improvement of the graduate programs.

**ENEE 4991 Independent Study (1-10 Credits)****ENEE 4995 Independent Research (1-16 Credits)****ENEE 5995 PhD Independent Research (1-10 Credits)****ENEE 6991 Ph.D Independent Study (1-10 Credits)****ENEE 6995 Independent Research (1-16 Credits)**

## Engineering, Systems (ENSY)

**ENSY 4010 Systems Engineering Fundamentals (3 Credits)**

An overview of systems engineering, including V-diagrams, functional architecture, physical architecture, system assembly and integration, verification and validation, and milestones to monitor the progress of the design.

**ENSY 4012 Systems Engineering Requirements Development (3 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. Spanning the requirements engineering phase, topics include: decomposition, derivation, allocation, verification and validation planning. Prerequisite: ENSY 4010, or permission of instructor.

**ENSY 4014 Complex System Architectures (3 Credits)**

The course focuses on mission requirements and how an overall mission should function by examining different architecture configurations and tools for modeling purposes. Topics include: allocation of functional and non-functional requirements, Service Oriented Architecture (SOA) and architectural modeling using the System Modeling Language (SysML). Prerequisite: ENSY 4010.

**ENSY 4016 Conceptual Design of Systems (3 Credits)**

Conceptual design is the part of the design process that yields a basic solution path, which leads to the principle solution. The focus of the course is on two important decision making principles: understanding a problem and devising a plan. Topics include: intellectual property and the development of engineering drawings, schematics and 3D models.

**ENSY 4021 Design of Space Systems Part 1 (3 Credits)**

This course is part one of a two-part series on spacecraft design by integrated systems and subsystems. Topics include: spacecraft overview, subsystem interfaces, concepts of operation (CONOPS) and the systems engineer's role as a generalist as opposed to specialists.

**ENSY 4022 Design of Space Systems Part 2 (3 Credits)**

This course is part two of a two-part series on spacecraft design by integrated systems and subsystems. Topics correspond to decomposition of the spacecraft into classical spacecraft subsystems. Practical applications and core functionality of these subsystems are presented, including required testing and integration at the subsystem and spacecraft levels. Prerequisite: ENSY 4021.

**ENSY 4024 Applied Electrical, Mechanical and Software Systems (3 Credits)**

This is a practice-centered course. Assess case studies of design, implementation and testing, validation and verification of complete complex (e.g. spacecraft) systems to meet mission requirements with performance guarantees. Prerequisites: ENSY 4012, ENSY 4014, and ENSY 4016, or permission by the Instructor.

**ENSY 4030 Introduction to Aerospace Missions (3 Credits)**

This class is for individuals working in aerospace engineering and related fields. Topics include: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic).

**ENSY 4040 Systems Optimization (3 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Assignments are in context of Systems Engineering case studies.

**ENSY 4042 Optimization for Advanced Systems (3 Credits)**

Advanced optimization algorithms are presented, as a pillar of data science and machine learning. Topics include: linear, nonlinear and integer programming models. Students will learn to understand tractability of models, particularly complex models as are central to the discipline of Systems Engineering. Prerequisite: ENSY 4040.

**ENSY 4050 Digital Transformation for Advanced Integration (3 Credits)**

Digital engineering technologies address the difficulties of managing complex and evolving technologies over their lifecycles of (i) development and (ii) operations & maintenance. This course will focus on digital technologies to integrate data across the enterprise, break organizational silos, and drive culture to realize risk reduction. Topics include: elements of the digital thread, such as digital twins and simulation, as well as machine learning and data analytics to inform decision-making throughout the lifecycle.

**ENSY 4060 Practical Model Based Systems Engineering (3 Credits)**

MBSE is part of a long-term trend toward model-centric approaches adopted by other engineering disciplines, including mechanical, electrical and software. In this course, students will be given hands-on access to MBSE tools in order to learn the UML/SysML language of MBSE and to practice systems engineering methods using the digital thread that is enabled by MBSE. Students will also gain an understanding of MBSE being a subset of Model Based Design (MBD). Prerequisite: ENSY 4050, or permission of instructor.

**ENSY 4090 Project Management in Relation to Systems Engineering (3 Credits)**

An overview of the skills and strategies for managing people, risks, schedules, and information to meet goals and objectives in large, complicated engineering projects. Includes managing project constraints, and best practices for working with project managers. Emphasis is on People, Process and the Business Environment.

**ENSY 4112 Practical Validation and Verification Test Planning (3 Credits)**

In this course, students gain a practical understanding of V-diagrams, and the path that must be traveled to fully validate and verify any system. Topics include: traceability between requirements and validation and verification test plans, including practical development of detailed test procedures at any level of integration. Prerequisite ENSY 4012, or permission by the instructor.

**ENSY 4170 Practical Approaches to Continuous Improvement (3 Credits)**

In this course, students learn practical differences between Continuous Improvement (CI) methods, such as Kaizen, Lean, Six Sigma, and Total Quality Management (TQM). Current events will be used as case studies to apply practical understanding of these CI methods. Practical application of the methods will leverage principles taught in ENSY 4010, ENSY 4071 and ENSY 4072. Case studies and assignments are based on illustrations of value added CI engineering in the Systems Engineering discipline. Prerequisites: ENSY 4010, ENSY 4071 and ENSY 4072; or instructor approval.

**ENSY 4180 Applied Mathematics for Systems Engineering (3 Credits)**

The course reviews topics in continuous and discrete mathematics (integral and differential calculus, matrices, vector calculus, discrete math: matrices, graphs, sets) and introductory probability, as they apply to engineering, and introduces students to more advanced concepts aiding the understanding and design of complex engineering systems. Examples are drawn from engineering systems applications. Students apply the techniques using engineering computing platform.

**ENSY 4181 Introductory Probability and Statistics for Systems Engineering (3 Credits)**

This course introduces fundamentals of probability for Systems Engineers. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. Techniques include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will apply methods to real-world engineering data, primarily using R.

**ENSY 4182 Data Analytics for Systems Engineering (3 Credits)**

This course is designed for students to develop skills in data analytics specifically tailored for systems engineering applications. It combines theoretical understanding with practical applications, covering various models for data inference, statistical methodologies, and the use of data analytics tools and software.

**ENSY 4200 Applied Machine Learning for Advanced Systems Modeling (3 Credits)**

This course covers topics in Machine Learning including Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, linear classification techniques such as Support Vector Machines, as well as Artificial Neural Networks and Deep Learning methods.

**ENSY 4950 Graduate Assessment for Master of Science degree in Systems Engineering (0 Credits)**

This class does not meet. All MS in Systems Engineering (MSSY) graduate students will enroll in this class during their last quarter. The purpose is to collect data for the assessment and continuous improvement of the graduate programs. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded.

## Engineering, Computer Courses

**ENCE 3231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

**ENCE 3250 HDL Modeling & Synthesis (3 Credits)**

Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor's permission.

**ENCE 3321 Network Design (4 Credits)**

Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**

Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

**ENCE 3620 Computer Vision (4 Credits)**

This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisite: ENEE 3111.

**ENCE 3630 Pattern Recognition (4 Credits)**

This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.

**ENCE 3631 Machine Learning (4 Credits)**

This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

**ENCE 4110 Modern Digital Systems Design (4 Credits)**

This course focuses on the design of digital systems using combinational, sequential, and programmable logic devices and Hardware Description Languages (HDL). Techniques for logic design including asynchronous logic, physical world interfaces to digital systems, and system performance analysis methods are studied. Students also learn HDL-Verilog to program CPLD devices and FPGA systems. Cross listed with ENCE 3100.

**ENCE 4210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Cross listed with ENCE 3210.

**ENCE 4231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems.

**ENCE 4250 Advanced Hardware Description Language (HDL) Modeling and Synthesis (4 Credits)**

This course covers advanced concepts in Hardware Description and Language (HDL) modeling and Synthesis. It covers topics including but not limited to digital system design, simulation, and synthesis using Verilog HDL and VHDL. The course also covers RTL design, behavioral description, system Verilog, and timing analysis using CAD tools.

**ENCE 4501 Advanced VLSI Design (4 Credits)**

Advanced techniques in the fabrication and design of VLSI circuits and systems. Modeling of parasitic components. Floor-planning, clock distribution, routing, and low power design. Cross listed with ENCE 3501. Prerequisite: ENCE 3501 or permission of instructor.

**ENCE 4620 Advanced Computer Vision (4 Credits)**

This course covers advanced concepts in image processing and computer vision including but not limited to image radiometry and geometric formation, edge detection, geometric based transformations (e.g., image warping and morphing), camera calibration, Epipolar geometry, and stereo feature matching. Other advanced topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice advanced topics in image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 3620. Prerequisite: ENEE 3311.

**ENCE 4630 Advanced Pattern Recognition (4 Credits)**

This class covers advanced topics in pattern recognition including but not limited to Bayesian decision theory, parametric estimation and supervised learning, linear discriminant functions, nonparametric methods, feature extraction for representation and classification, manifold learning, bag of words, and Support Vector Machines. Cross listed with.

**ENCE 4631 Advanced Machine Learning (4 Credits)**

This class covers advanced topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep neural networks, deep learning, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE 3631.

**ENCE 4800 Advanced Topics (CPE) (1-5 Credits)**

Various topics in computer engineering as announced. May be taken more than once. Cross-listed with ENCE 3321, ENCE 3620.

**ENCE 4991 Independent Study (1-10 Credits)****ENCE 4995 Independent Research (1-18 Credits)****ENCE 5995 Independent Research (1-18 Credits)****Engineering, Electrical Courses****ENEE 3011 Physical Electronics (4 Credits)**

The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010 or CHEM 1610, PHYS 1213 or PHYS 1214 or permission of instructor.

**ENEE 3111 Signals & Systems (4 Credits)**

Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Prerequisites: ENEE 2012, MATH 2070.

**ENEE 3141 Digital Communications (3 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3620 Optical Fiber Communications (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

**ENEE 3641 Introduction to Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Cross listed with ENEE 4640. Prerequisites: ENEE 3111, ENEE 2611 and ENEE 2223.

**ENEE 3670 Introduction to Digital Signal Processing (4 Credits)**

Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

**ENEE 4030 Optoelectronics (4 Credits)**

Optical fibers: structures, waveguiding, and fabrication; attenuation and dispersion; optical sources (LED, LASER, Fiber laser); power launching and coupling; photodetectors (APD, PIN, MSM); and practical optical transmitter and receivers. Cross listed with ENEE 3030.

**ENEE 4141 Digital Communications (4 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels.

**ENEE 4620 Adv Optical Fiber Comm (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users who have a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA), and ultra-fast optical time division multiplexing (OTDM). Advanced Project. Cross listed with ENEE 3620. Prerequisite: instructor permission.

**ENEE 4630 Optical Networking (4 Credits)**

This course provides a technical overview of optical networking. It gives students a solid understanding of optical networking field principles and practice. Underlying principles are reviewed along with common optical solutions and practices. It explains and provides practical tips on how to design and implement Networks. Examples are used to demonstrate key concepts of ATM, SONET/SDH and DWDM implementation. Prerequisite: ENEE 3011 or instructor approval.

**ENEE 4640 Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include: Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Final Project. Cross listed with ENEE 3641.

**ENEE 4800 Advanced Topics (EE) (1-5 Credits)**

Various advanced topics in electrical engineering as announced. May be taken more than once. Cross-listed with ENEE 3035.

**ENEE 4950 ECE Graduate Assessment (0 Credits)**

This class does not meet. All graduate (MS and PhD) ECE students will enroll in this class during their last quarter. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. The purpose is to collect data for the assessment and continuous improvement of the graduate programs.

**ENEE 4991 Independent Study (1-10 Credits)****ENEE 4995 Independent Research (1-16 Credits)****ENEE 5995 PhD Independent Research (1-10 Credits)****ENEE 6991 Ph.D Independent Study (1-10 Credits)****ENEE 6995 Independent Research (1-16 Credits)****Engineering, Systems Courses****ENSY 4010 Systems Engineering Fundamentals (3 Credits)**

An overview of systems engineering, including V-diagrams, functional architecture, physical architecture, system assembly and integration, verification and validation, and milestones to monitor the progress of the design.

**ENSY 4012 Systems Engineering Requirements Development (3 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. Spanning the requirements engineering phase, topics include: decomposition, derivation, allocation, verification and validation planning. Prerequisite: ENSY 4010, or permission of instructor.

**ENSY 4014 Complex System Architectures (3 Credits)**

The course focuses on mission requirements and how an overall mission should function by examining different architecture configurations and tools for modeling purposes. Topics include: allocation of functional and non-functional requirements, Service Oriented Architecture (SOA) and architectural modeling using the System Modeling Language (SysML). Prerequisite: ENSY 4010.

**ENSY 4016 Conceptual Design of Systems (3 Credits)**

Conceptual design is the part of the design process that yields a basic solution path, which leads to the principle solution. The focus of the course is on two important decision making principles: understanding a problem and devising a plan. Topics include: intellectual property and the development of engineering drawings, schematics and 3D models.

**ENSY 4021 Design of Space Systems Part 1 (3 Credits)**

This course is part one of a two-part series on spacecraft design by integrated systems and subsystems. Topics include: spacecraft overview, subsystem interfaces, concepts of operation (CONOPS) and the systems engineer's role as a generalist as opposed to specialists.

**ENSY 4022 Design of Space Systems Part 2 (3 Credits)**

This course is part two of a two-part series on spacecraft design by integrated systems and subsystems. Topics correspond to decomposition of the spacecraft into classical spacecraft subsystems. Practical applications and core functionality of these subsystems are presented, including required testing and integration at the subsystem and spacecraft levels. Prerequisite: ENSY 4021.

**ENSY 4024 Applied Electrical, Mechanical and Software Systems (3 Credits)**

This is a practice-centered course. Assess case studies of design, implementation and testing, validation and verification of complete complex (e.g. spacecraft) systems to meet mission requirements with performance guarantees. Prerequisites: ENSY 4012, ENSY 4014, and ENSY 4016, or permission by the Instructor.

**ENSY 4030 Introduction to Aerospace Missions (3 Credits)**

This class is for individuals working in aerospace engineering and related fields. Topics include: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic).

**ENSY 4040 Systems Optimization (3 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Assignments are in context of Systems Engineering case studies.

**ENSY 4042 Optimization for Advanced Systems (3 Credits)**

Advanced optimization algorithms are presented, as a pillar of data science and machine learning. Topics include: linear, nonlinear and integer programming models. Students will learn to understand tractability of models, particularly complex models as are central to the discipline of Systems Engineering. Prerequisite: ENSY 4040.

**ENSY 4050 Digital Transformation for Advanced Integration (3 Credits)**

Digital engineering technologies address the difficulties of managing complex and evolving technologies over their lifecycles of (i) development and (ii) operations & maintenance. This course will focus on digital technologies to integrate data across the enterprise, break organizational silos, and drive culture to realize risk reduction. Topics include: elements of the digital thread, such as digital twins and simulation, as well as machine learning and data analytics to inform decision-making throughout the lifecycle.

**ENSY 4060 Practical Model Based Systems Engineering (3 Credits)**

MBSE is part of a long-term trend toward model-centric approaches adopted by other engineering disciplines, including mechanical, electrical and software. In this course, students will be given hands-on access to MBSE tools in order to learn the UML/SysML language of MBSE and to practice systems engineering methods using the digital thread that is enabled by MBSE. Students will also gain an understanding of MBSE being a subset of Model Based Design (MBD). Prerequisite: ENSY 4050, or permission of instructor.

**ENSY 4090 Project Management in Relation to Systems Engineering (3 Credits)**

An overview of the skills and strategies for managing people, risks, schedules, and information to meet goals and objectives in large, complicated engineering projects. Includes managing project constraints, and best practices for working with project managers. Emphasis is on People, Process and the Business Environment.

**ENSY 4112 Practical Validation and Verification Test Planning (3 Credits)**

In this course, students gain a practical understanding of V-diagrams, and the path that must be traveled to fully validate and verify any system. Topics include: traceability between requirements and validation and verification test plans, including practical development of detailed test procedures at any level of integration. Prerequisite ENSY 4012, or permission by the instructor.

**ENSY 4170 Practical Approaches to Continuous Improvement (3 Credits)**

In this course, students learn practical differences between Continuous Improvement (CI) methods, such as Kaizen, Lean, Six Sigma, and Total Quality Management (TQM). Current events will be used as case studies to apply practical understanding of these CI methods. Practical application of the methods will leverage principles taught in ENSY 4010, ENSY 4071 and ENSY 4072. Case studies and assignments are based on illustrations of value added CI engineering in the Systems Engineering discipline. Prerequisites: ENSY 4010, ENSY 4071 and ENSY 4072; or instructor approval.

**ENSY 4180 Applied Mathematics for Systems Engineering (3 Credits)**

The course reviews topics in continuous and discrete mathematics (integral and differential calculus, matrices, vector calculus, discrete math: matrices, graphs, sets) and introductory probability, as they apply to engineering, and introduces students to more advanced concepts aiding the understanding and design of complex engineering systems. Examples are drawn from engineering systems applications. Students apply the techniques using engineering computing platform.

**ENSY 4181 Introductory Probability and Statistics for Systems Engineering (3 Credits)**

This course introduces fundamentals of probability for Systems Engineers. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. Techniques include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will apply methods to real-world engineering data, primarily using R.

**ENSY 4182 Data Analytics for Systems Engineering (3 Credits)**

This course is designed for students to develop skills in data analytics specifically tailored for systems engineering applications. It combines theoretical understanding with practical applications, covering various models for data inference, statistical methodologies, and the use of data analytics tools and software.

**ENSY 4200 Applied Machine Learning for Advanced Systems Modeling (3 Credits)**

This course covers topics in Machine Learning including Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, linear classification techniques such as Support Vector Machines, as well as Artificial Neural Networks and Deep Learning methods.

**ENSY 4950 Graduate Assessment for Master of Science degree in Systems Engineering (0 Credits)**

This class does not meet. All MS in Systems Engineering (MSSY) graduate students will enroll in this class during their last quarter. The purpose is to collect data for the assessment and continuous improvement of the graduate programs. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded.

## Master's and Doctoral Degrees

### Why study engineering at the University of Denver?

The University of Denver's Daniel Felix Ritchie School of Engineering and Computer Science is creating the future of technology by providing a graduate education emphasizing cross-disciplinary knowledge. Engineering graduate students join the faculty in conducting cutting-edge research in emerging disciplines to develop unique solutions to old and new problems and opportunities.

The well-equipped laboratories contain state-of-the-art equipment and software to support research in biomedical engineering, advanced materials, robotics, mechanical design, and AI/machine learning, among others. Small classes support our multidisciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students' individual career goals.

The general engineering graduate student can choose courses from mechanical engineering, electrical engineering, computer engineering, computer science, materials science, and bioengineering.

Denver is a first-rate location for business, governmental and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and the University of Denver is located just minutes from the Denver Tech Center, site of many top technology companies. The Department of Mechanical and Materials Engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector.

### Time Commitment

Our department recognizes that a student may be employed full-time while studying for a degree. Therefore, many courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. Many employers will permit additional flexibility by releasing employees early to attend classes. We also can provide hybrid and Zoom-based course options.

The master's program offers thesis and non-thesis options and can be completed in one (non-thesis track only) to four years depending on the number of courses taken per quarter. The choice of thesis or non-thesis can be made at any time, although a delay in declaration may impact the completion date.

The doctoral program is generally completed in three to seven years, depending on the number of courses taken per quarter and whether the student enters with a BS or MS.

A student not interested in pursuing a degree, but interested in taking an occasional course, may register as a special status student (<http://www.du.edu/learn/graduates/degreeprograms/>) by following an abbreviated admissions process. If at a later time the student chooses to enter a graduate degree program at DU, you may apply up to 15 special status credits to your degree, with departmental approval. Just follow the regular graduate application requirements, including submitting the application fee, to get started.

## Degree Programs

The following are our general engineering degrees. Please see the Mechanical and Materials Engineering Programs for our other graduate engineering degrees.

- Master of Science in Engineering (MS ENGE)
- Master of Science in Engineering with a Concentration in Engineering Management (MS ENGE (CM))
- Doctor of Philosophy in Engineering (PhD ENME)
- Doctor of Philosophy in Biomedical Engineering

### Doctor of Philosophy in Engineering

The Doctor of Philosophy in Engineering (PhD ENGE) program prepares students to contribute to the advancement of science, engineering, and technology through independent research. The PhD students of the 21st century may pursue academic, research, or industry careers. Individualized plans of study are based on students' previous experience and desired research areas. The plan of study allows students to work on interdisciplinary research, while also satisfying the PhD in engineering degree requirements.

The interdisciplinary Engineering PhD program offers opportunities for a student to develop a plan of study combining engineering and a complementary discipline (e.g. natural sciences). In the plan of study, coursework in the complementary discipline can be included up to the maximum number of technical elective credits. The student's plan of study must be approved by the PhD committee and the department chair. When the student is completing research and coursework in a complementary discipline, the student's PhD committee must include a faculty member from the related department or division/school.

For a part-time student who is working in an industry position, a topic related to the job function may be acceptable as the dissertation research topic. Furthermore, a student may request for a qualified staff member at the place of employment to serve as a special committee member on the dissertation committee.

### **Doctor of Philosophy in Biomedical Engineering**

The Doctor of Philosophy in Biomedical Engineering (PhD BME) program combines cross-disciplinary course work in engineering and life sciences. It trains students to carry out independent research in fields related to human health and well-being. The training combines engineering principles with sciences to further our understanding of health-related problems and to design and create novel methods, devices, and software to bring innovative solutions to these problems.

### **Master of Science in Engineering**

The Master of Science in Engineering (MS ENGE) is designed to advance the knowledge of students in areas differing from those in which they received their bachelor's degree. The program is particularly intended for students with bachelor's degrees in the natural sciences, mathematics, computer science or engineering who are making a change of discipline or wanting to develop expertise in an engineering area, often one that is of emerging importance or interdisciplinary in nature. The program combines a solid background in an area of engineering with a distinctly personal specialization. It enables the student to focus on a particular area of engineering, while providing breadth through its technical elective requirement addressing the student's specific interests.

A Master of Science in Engineering with a concentration in Management (CM) is also offered (see below). These engineering and management courses are focused on developing core knowledge and competencies in innovation and entrepreneurship, and providing concrete tools to successfully translate ideas and initiative into marketplace success.

### **Master of Science in Engineering with a Concentration in Engineering Management**

The degree of Master of Science in Engineering allows students to pursue a concentration in engineering management (MS ENGE(CM)). This is an engineering degree with both engineering and management focuses. The concentration in engineering management is designed to meet the increasing needs of students to enhance their career opportunities as managers or as entrepreneurs by supplementing advanced engineering knowledge with a fundamental understanding of business principles within the context of technology enterprises. Drawing upon the strengths of both RSECS and the Daniels College of Business, the program provides the relevant content for graduates to lead technology enterprises. Candidates for the degree of master of science with a concentration in management will be on the non-thesis track only.

## **Doctor of Philosophy in Biomedical Engineering**

### **Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### **Prerequisites**

- A bachelor's degree in engineering or related field from a regionally accredited college or university is required for admission to the program.

### **Standardized Test Scores**

- GRE scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.

If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

### **Other Required Materials**

PhD applicants should contact faculty to find a research advisor BEFORE submitting the application. Applications without a research advisor commitment may be considered for a master's program only.

### **English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctor of Philosophy in Engineering

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Students with a master's degree in Engineering or closely related areas may apply for the PhD program in Engineering (ENGR). Admission with only a Bachelor of Science degree in this field is also possible, but such students are encouraged to enroll first in the MS ENGR program. Note that although not an admission requirement, students who are not adequately prepared to succeed in our graduate level courses may choose to complete prerequisite undergraduate courses.

### Other Required Materials

- We recommend PhD applicants contact faculty to find a research advisor BEFORE submitting the application. If we receive an application and there is no research advisor commitment, we will consider the applicant for the master's program only.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Master of Science in Engineering

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Students with a bachelor's degree in Engineering, Mathematics, Chemistry, Biology or Physics is normally required for admission to the MS Engineering with or without the concentration in Management (ENGR/ENGR CM) programs. Note that although not an admission requirement, students who are not adequately prepared to succeed in our graduate level courses may choose to complete prerequisite undergraduate courses.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctoral Programs

### Doctor of Philosophy in Biomedical Engineering

#### Degree requirements

Minimum number of credits required for the degree: 90 (45 for those who enter with a Master of Science degree)

#### PhD Students with a Bachelor of Science Degree Program Structure

**For students entering with a bachelor's degree, 90 credits are required, at least 75 of which must be completed at the University of Denver.**

1. A minimum of 48 credits must be at the 4000- or 5000-level and may include as many dissertation research credits as considered appropriate by the advisor.
2. No courses at the 1000- or 2000-level are acceptable.
3. An overall GPA of 3.0 is required for the degree.
4. Any individual grade lower than C- renders the credit unacceptable.
5. Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University.
6. Students must complete all requirements for the doctoral degree no later than eight years after doctoral studies begin.

#### Ph.D. Residence Requirement:

Enrollment in at least six quarters, including two consecutive quarters of full-time attendance is required for graduation.

#### Program Requirement Exam Structure

1. Each student must pass the **qualifying exam** to continue in the PhD program. A "mock research proposal" in an area related to the student's research. The student is expected to schedule this exam after 4 quarters. The qualifying exam can be retaken only once.
2. After completion of the qualifying exam and coursework, the student should schedule and take the **dissertation proposal exam**. The student will develop a research proposal (NSF or NIH format) for their proposed doctoral research project and orally defend their proposal. The dissertation proposal needs to be completed at least one year before the dissertation defense. The dissertation proposal exam can be retaken only once.
3. After successful completion of the qualifying exam and the dissertation proposal exam, the student is required to complete and **defend a dissertation** of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University's guidelines and must be defended by the student in the final oral defense. The defense committee members will consist of the student's entire PhD committee. The dissertation defense can be retaken only once.

Code	Title	Credits
<b>Required Courses:</b>		
ENBI 4600	Biomedical Engineering: Technology, Research, and Design	4
ENBI 4610	Experimental Design in Biomedical Sciences	4
ENGR 4300	Advanced Numerical Methods	4
ENME 4900	Grad Professional Development	1
<b>Elective Core:</b>		<b>8</b>
<ul style="list-style-type: none"> <li>• Candidates with an engineering undergraduate degree and/or a master's degree in engineering must take graduate-level coursework in biological sciences or chemistry and biochemistry with the approval of their advisor. Biological sciences, chemistry, and biochemistry courses listed under technical electives below are acceptable but they can count only once, either as elective core course or technical core course but not both simultaneously.</li> <li>• Candidates without an engineering degree must take courses in engineering with the following prefixes ENCE, ENEE, ENME numbered 3000 or higher and must be approved by the advisor.</li> </ul>		
<b>Technical Electives</b>		<b>4</b>
Technical Electives for those with an engineering degree:		
BIOL 3241	Anatomy and Physiology of the Skeletal, Nervous and Muscular systems	
BIOL 3242	Human Anatomy and Physiology - Systems of homeostasis	
BIOL 3640	Introductory Neurobiology	
BIOL 3647	Neuroscience of Movement	
CHEM 3811	Biochemistry-Proteins	
ENBI 4500	Biofluids	
ENBI 4510	Biomechanics	
ENBI 4520	Introduction to Cardiovascular Engineering	
ENBI 4530	Biomechanics of Human Movement	

ENBI 4630	Biomaterials
ENBI 4800	Adv Topics (Bioengineering)
ENGR 3630	Finite Element Methods
ENGR 3450	Biosensing Technology
ENGR 3455/4455	Fluorescence and Its Applications in Biomedical Sensors
ENGR 4350	Reliability
ENGR 4620	Optimization

Technical Electives for those with a non-engineering degree:

ENBI 4500	Biofluids
ENBI 4510	Biomechanics
ENBI 4520	Introduction to Cardiovascular Engineering
ENBI 4530	Biomechanics of Human Movement
ENBI 4620	Bioelectronics
ENBI 4630	Biomaterials
ENBI 4800	Adv Topics (Bioengineering)
ENGR 3450	Biosensing Technology
ENGR 3455/4455	Fluorescence and Its Applications in Biomedical Sensors
ENGR 3620	Advanced Engineering Mathematics - Corporate
ENGR 3630	Finite Element Methods
ENGR 4100	Instrumentation and Data Acquisition
ENGR 4350	Reliability
ENGR 4620	Optimization

#### Research Coursework

ENGR 5995	Independent Research	20
-----------	----------------------	----

**Total Credits**

**45**

## Doctor of Philosophy in Engineering

### Program Requirements

#### Exam Structure:

1. Each student must pass the **qualifying exam** to continue in the PhD program. In consultation with the advisor, students should expect to take the qualifying exam about one year (24 credits) into their academic study. Students must take exams in three subject areas. The Design exam is required for all participants, and is an open-book exam, where the student will have one week to prepare a written and oral response to an open-ended design problem. The other two exams are closed-book, written exams and should be related to the student's research area. The exam is offered twice a year: once in the summer interterm (usually in June) and once in the winter interterm (usually in December or early January). The qualifying exam can be retaken only once, and must be completed within one year after prior to the first qualifying comprehensive exam was attempted.
2. After completion of the qualifying exam and coursework, the student should schedule and take the **comprehensive exam** attended by the student's PhD committee. The student will be expected to make a concise presentation on his/her dissertation topic. The presentation will highlight previous work in this area, demonstrate a need for the research, and explain how the research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. The comprehensive exam can be retaken only once.
3. After successful completion of the qualifying exam and the comprehensive exam, the student is required to complete and **defend a dissertation** of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University's guidelines, and must be defended by the student in the final oral defense. The defense committee members will consist of the student's entire PhD committee. The dissertation defense can be retaken only once.

#### PhD Residence Requirement

Enrollment in at least six quarters, including two consecutive quarters of full-time attendance is required for graduation.

### PhD Students with a Bachelor of Science Degree

#### Program Structure

1. For students entering with a bachelor's degree, 90 credits are required, at least 75 of which must be completed at the University of Denver.
2. A minimum of 48 credits must be at the 4000- or 5000-level and may include as many dissertation research credits as considered appropriate by the advisor.
3. No courses at the 1000- or 2000-level are acceptable.

4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University.
7. Students must complete all requirements for the doctoral degree no later than eight years after doctoral studies begin.

#### Course Requirements:

1. Candidates who hold only a bachelor's degree on entering the doctoral program are expected to **meet all degree requirements of the corresponding master's degree** program (as part of the doctoral requirements).
2. Students are required to take ENME 4950 **Graduate Assessment** in the last quarter of study. NOTE: Students are required to complete a written self-reflection on their dissertation and provide their dissertation, defense presentation slides, and the completed and signed degree program plan before graduation.
3. PhD students who enter the program with a bachelor's are required to take ENME 4900 **Graduate Professional Development** in the first year (this is offered once a year; usually in winter quarter).

## PhD Students with a Master of Science

1. A minimum of 36 credits must be completed at the 4000- or 5000-level, which may include as many research credits as considered appropriate by the advisor.
2. For students entering with a master's degree, up to 45 credits may be transferred and applied to the doctorate degree. In addition, a minimum of 45 credits must be completed at DU. The total number of credits required for the degree is 90.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. A student who holds a master's degree on entering the doctoral program is expected to complete all requirements for the degree no later than seven years after beginning the program.

### Course Requirements:

1. Students are required to take ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students are required to complete a written self-reflection on their dissertation and provide their dissertation, defense presentation slides, and the completed and signed degree program plan before graduation.
2. If a PhD student fails the qualifying exam on the first try, they will be required to take ENME 4900 **Graduate Professional Development** as well. ENME 4900 will be offered once a year, usually in winter quarter.

## Master's Degree Program

### Master of Science in Engineering

#### Program Structure (non-management option)

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University.
7. Master's degree candidates are expected to complete degree requirements no later than five years after beginning their programs. These programs are designed to be completed in about six quarters if two courses (eight credits) are taken each quarter.

### Course Requirements

1. **Core Courses:** a minimum of nine credits (two courses from ENME, MTSC, ENBI or ECE Core Course List; no more than one course from a single discipline) plus the required courses.
2. **Required Courses:** All master's students are required to take ENME 4900 **Graduate Professional Development** in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students on the **thesis track** are required to complete a written self-reflection on their thesis and provide their thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the **non-thesis track** are required to provide an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4950 along with the completed and signed degree program plan.
3. **Technical Electives:** a minimum of 16 credits for thesis track and 28 credits for non-thesis track. These do not include independent research credits.
  - a. Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor's discretion. 50% or more of the technical elective credits must be in engineering.
  - b. A student may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor **PRIOR TO REGISTRATION** if more than one business/management course is taken.
4. **Advanced Math Requirement:** a minimum of three credits for thesis track and six credits for non-thesis track from the Core Course List or advisor approval.
5. **Thesis Hours:** not allowed for non-thesis track.
6. **Tool Requirement:** As employers of graduates of this degree will inherently expect a basic competency in foundational engineering skills, students must demonstrate these before advancing to candidacy. Candidates with BS degrees from accredited engineering schools, or students completing a thesis, will be exempt from the tool requirement. Candidates with undergraduate degrees from non-engineering majors and completing a non-thesis MS will be required to pass a tool requirement. This will consist of an exam based on the topics in the Fundamentals of Engineering General Exam.

## Engineering, Bio (ENBI)

### ENBI 4200 Medical Device Development (4 Credits)

Working in a fast-paced competitive biomedical R&D firm is a dramatic change of pace from most college classes. This course will create a realistic industry environment where students take on the role of development engineers to design and manufacture real-world medical devices. This course is intended to provide a working knowledge of the design and development process specifically for medical device applications.

**ENBI 4500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.

**ENBI 4510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

**ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)**

An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

**ENBI 4530 Biomechanics of Human Movement (4 Credits)**

An introduction to engineering-based analysis of human movement. Topics include: musculoskeletal anatomy, neuromuscular physiology, muscle mechanics, electromyography, sensorimotor integration, anthropometry, kinematics and kinetics. Recommended pre-requisite material: knowledge of MATLAB, ENGR 1572.

**ENBI 4600 Biomedical Engineering: Technology, Research, and Design (4 Credits)**

Introduction to Biomedical Engineering is an interdisciplinary course that combines engineering principles with biological and medical sciences to advance healthcare in areas such as diagnosis, monitoring, and therapy. The course provides a foundational understanding of biomedical engineering and prepares students for further study or careers in the field.

**ENBI 4610 Experimental Design in Biomedical Sciences (4 Credits)**

This course offers an in-depth exploration of experimental design principles within the biomedical sciences, emphasizing statistical analysis, measurement techniques, and ethical considerations. It aims to provide students with practical skills necessary for designing, conducting, and analyzing biomedical research.

**ENBI 4620 Bioelectronics (4 Credits)**

This course introduces the principles and applications of bioelectronics, focusing on the interface between biological systems and electronic devices. It covers the fundamentals of electronic circuits, signal processing, and sensor technology, and their applications in areas like biometric monitoring, neuroprosthetics, and biosensing.

**ENBI 4630 Biomaterials (4 Credits)**

This course provides an introduction to the field of biomaterials science, focusing on the fundamental principles, properties, and applications of materials used in biomedical engineering and healthcare. Topics covered include the classification of biomaterials, biocompatibility, interactions with biological systems, surface modifications, fabrication techniques, characterization techniques and current applications in tissue engineering, regenerative medicine, drug delivery, and medical devices.

**ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)**

Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4991 Independent Study (1-5 Credits)****ENBI 4995 Independent Research (1-18 Credits)**

## Engineering, Mechanical (ENME)

**ENME 2410 Materials Science I (3 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Prerequisites: PHYS 1212, CHEM 1010, MATH 1952, and ENME 2710.

**ENME 2421 Materials Science II (3 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Laboratory projects/demonstrations. Prerequisites: ENME 2410.

**ENME 2510 Statics (4 Credits)**

Study of static force systems. Topics include resolution and composition of forces and moments, equilibrium of two-dimensional and three-dimensional force systems, shear and moments in beams, friction, and moments of inertia. Includes a laboratory component where students will engage in hands-on projects that apply loading equilibrium, design of structures, and stress/strain. Prerequisites: MATH 1951 AND PHYS 1211.

**ENME 2520 Dynamics I with Lab (4 Credits)**

Particles Kinematics, Reference Frames, Coordinate Systems, Newton's Laws, Energy and Momentum, Multiparticle Systems, Collisions, Variable Mass Systems. These topics are addressed through analytical analysis, numerical simulation using Matlab, and experimental data collection. Cross listed with PHYS 2520. Corequisite: MATH 2080; Prerequisite: ENME 2510 AND MATH 2070.

**ENME 2530 Dynamics II (3 Credits)**

Rotating reference frames, rigid body kinematics, rigid body kinetics, Euler's Laws, inertia, energy and momentum, and three-dimensional motion. Cross listed with PHYS 2530. Prerequisites: ENME 2520.

**ENME 2540 System Dynamics (3 Credits)**

This course covers modeling, analysis, and control of single and multiple degree-of freedom dynamical systems, including mechanical, electrical, thermal, fluid systems and their combinations (mixed systems). Basic concepts in system theory, such as state variables and stability concepts, will be introduced as well as bond graph notation and approach. Prerequisites: ENME 2530, ENME 2661, ENGR 1572, and ENEE 2012.

**ENME 2541 Mechanics of Materials (3 Credits)**

Normal and shear stress and strain; elasticity, mechanical properties of materials, principal stresses; torsion, beams, deflection of beams under loads, methods of superposition, failure theory, columns. Prerequisite: ENME 2510.

**ENME 2651 Fluid Dynamics I (3 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2510 and MATH 2070.

**ENME 2661 Fluid Dynamics II/Heat Transfer I (3 Credits)**

Course series provides students with the basic skills levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2651.

**ENME 2671 Heat Transfer II with Lab (4 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2661.

**ENME 2710 Engineering Thermodynamics I (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: PHYS 1212.

**ENME 2720 Engineering Thermodynamics II (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: ENME 2710.

**ENME 2810 Mechanical Engineering Lab I (3 Credits)**

Engineering experiments illustrating selected topics in heat transfer, fluid mechanics, solid mechanics, thermodynamics, measurement and control. Use of microcomputers in experimentation and control. This course encourages the development of laboratory experimentation skills, design skills and technical writing skills. Prerequisites: ENME 2540 AND ENME 2671.

**ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue, and reliability. Cross listed with ENME 4400.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides an introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 3820 Topics Mechanical Engineering (0-5 Credits)**

Mechanical engineering topics as announced. May be taken more than once. Prerequisite: vary with offering.

**ENME 3991 Independent Study (1-5 Credits)**

Topics in mechanical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENME 3995 Independent Research (1-10 Credits)****ENME 4020 Adv Finite Element Analysis (4 Credits)****ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)**

An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

**ENME 4360 Elasticity (4 Credits)**

Students will be able to apply the fundamental principles of elasticity to solve two- and three-dimensional mechanical engineering problems involved in modern applications of elastic structures, composite materials, tribology and contact mechanics. Dependence on previous knowledge of solid mechanics, continuum mechanics or mathematics is minimized. The emphasis is placed on the engineering applications of elasticity. Suggested prerequisite: ENME 2541.

**ENME 4400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

**ENME 4520 Intermediate Dynamics (4 Credits)**

Development and analysis of dynamic systems through classical approaches. Topics will include: Vector algebraic/differential geometry for 3D translational and rotational kinematic analyses with motion constraints. Formulation of equations of motion for 3D multibody systems using: Newton/Euler equations; Angular momentum principle; and D'Alembert principle (aka road-maps). Some exposure to Euler-Lagrange and Kane's Methods calculations. Symbolic and numerical computational solutions to linear/nonlinear algebraic and differential equations governing the configuration, forces, and motion of systems with multiple degrees of freedom. Recommended prerequisites: MATH 2070.

**ENME 4530 Advanced Dynamics (4 Credits)**

Formulation of equations of motion for constrained 3D multibody systems with: D'Alembert principle (MG road-maps); power, work, and energy; Lagrange's equations; and Kane's method. Euler parameters/quaternions, specified motion, constraint force/torque calculations, feed-forward control, inequality constraints and/or intermittent contact. Tensors and mass property calculations. Symbolic and numerical computer skills for geometry/kinematic analysis, mass/inertia calculations, forces and motion, and simulation of multi-body dynamic systems. Training for advanced research and professional work. Recommended pre-requisite: ENME 4520.

**ENME 4541 Advanced Mechanics of Materials (4 Credits)**

This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, axisymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability. Recommended prerequisite: ENME 2541.

**ENME 4630 Viscous Flow (4 Credits)**

Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

**ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)**

Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

**ENME 4671 Convective Heat Transfer (4 Credits)**

The objective of this course is to examine the physical phenomena associated with heat transfer in the presence of fluid flow. We will develop a mathematical description of the processes (fluid flow and heat transfer) for laminar and turbulent flows for both internal and external situations. Exposure to the fundamentals of fluid mechanics and heat transfer is expected before taking this course.

**ENME 4800 Advanced Topics (ME) (0-5 Credits)**

Determined by interest and demand. May be taken more than once for credit.

**ENME 4900 Grad Professional Development (1 Credit)**

This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

**ENME 4950 Graduate Assessment (0 Credits)**

This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to DU Assessment to meet the course requirements. Students will receive emails through the DU Assessment system notifying you of what is required to be uploaded.

**ENME 4991 Independent Study (1-10 Credits)****ENME 4995 Independent Research (1-16 Credits)****ENME 5991 Independent Study (1-10 Credits)****ENME 5995 Independent Research (1-16 Credits)**

## Engineering (ENGR)

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3620 Advanced Engineering Mathematics - Corporate (4 Credits)**

Applied mathematics for engineers. Systems and series solutions of ordinary differential equations, Fourier analysis, partial differential equations, linear algebra, vector calculus, special functions, unconstrained and combinatorial optimization, and applied probability and statistics. Prerequisites: MATH 2070 and MATH 2080 or instructor permission.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design.

**ENGR 4455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 3455.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the "shredding" of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the "true" problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering "vee" design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisite: ENGR 3721 or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)**

The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

**ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure—the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)**

## Materials Science (MTSC)

**MTSC 3010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of materials (metals, polymers, ceramics and composites); emphasis on recent developments in materials science, modulus, fracture (fracture toughness and brittle strength), fatigue, creep, wear, friction, stress rupture and deformation. Cross listed with MTSC 4010. Prerequisites: ENME 2421.

**MTSC 3020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 4020. Prerequisites: ENME 2410 and ENME 2541.

**MTSC 3450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 4450. Prerequisites: ENME 2421 and ENME 2541.

**MTSC 3800 Topics in Materials Science (1-5 Credits)**

Various topics in materials science as announced. May be taken more than once. Prerequisite: varies with each topic.

**MTSC 4010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of material; emphasis on recent developments in materials science, fracture, fatigue, creep, wear, corrosion, stress rupture, deformation and residual stress. Cross listed with MTSC 3010.

**MTSC 4020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 3020.

**MTSC 4215 Composite Materials II (4 Credits)**

A continuation of MTSC 4210: Strength and toughness of composites, thermal behavior, fabrication methods, examples of applications. Prerequisite: MTSC 4210.

**MTSC 4450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear elastic fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, Airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 3450.

**MTSC 4800 Advanced Topics (MTSC) (1-5 Credits)**

Selected topics (depending on student and faculty interest): fracture mechanics, fatigue, nonlinear constitutive models, dynamic behavior of materials, corrosion resistant design, thermodynamics of solids II.

**MTSC 4991 Independent Study (1-10 Credits)****MTSC 4995 Independent Research (1-16 Credits)****MTSC 5995 Independent Research (1-16 Credits)**

## Engineering Courses

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3620 Advanced Engineering Mathematics - Corporate (4 Credits)**

Applied mathematics for engineers. Systems and series solutions of ordinary differential equations, Fourier analysis, partial differential equations, linear algebra, vector calculus, special functions, unconstrained and combinatorial optimization, and applied probability and statistics. Prerequisites: MATH 2070 and MATH 2080 or instructor permission.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design.

**ENGR 4455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 3455.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the "shredding" of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the "true" problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering "vee" design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisite: ENGR 3721 or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and  $\mu$  synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)**

The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

**ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure— the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)****Engineering, Bio Courses****ENBI 4200 Medical Device Development (4 Credits)**

Working in a fast-paced competitive biomedical R&D firm is a dramatic change of pace from most college classes. This course will create a realistic industry environment where students take on the role of development engineers to design and manufacture real-world medical devices. This course is intended to provide a working knowledge of the design and development process specifically for medical device applications.

**ENBI 4500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.

**ENBI 4510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

**ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)**

An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

**ENBI 4530 Biomechanics of Human Movement (4 Credits)**

An introduction to engineering-based analysis of human movement. Topics include: musculoskeletal anatomy, neuromuscular physiology, muscle mechanics, electromyography, sensorimotor integration, anthropometry, kinematics and kinetics. Recommended pre-requisite material: knowledge of MATLAB, ENGR 1572.

**ENBI 4600 Biomedical Engineering: Technology, Research, and Design (4 Credits)**

Introduction to Biomedical Engineering is an interdisciplinary course that combines engineering principles with biological and medical sciences to advance healthcare in areas such as diagnosis, monitoring, and therapy. The course provides a foundational understanding of biomedical engineering and prepares students for further study or careers in the field.

**ENBI 4610 Experimental Design in Biomedical Sciences (4 Credits)**

This course offers an in-depth exploration of experimental design principles within the biomedical sciences, emphasizing statistical analysis, measurement techniques, and ethical considerations. It aims to provide students with practical skills necessary for designing, conducting, and analyzing biomedical research.

**ENBI 4620 Bioelectronics (4 Credits)**

This course introduces the principles and applications of bioelectronics, focusing on the interface between biological systems and electronic devices. It covers the fundamentals of electronic circuits, signal processing, and sensor technology, and their applications in areas like biometric monitoring, neuroprosthetics, and biosensing.

**ENBI 4630 Biomaterials (4 Credits)**

This course provides an introduction to the field of biomaterials science, focusing on the fundamental principles, properties, and applications of materials used in biomedical engineering and healthcare. Topics covered include the classification of biomaterials, biocompatibility, interactions with biological systems, surface modifications, fabrication techniques, characterization techniques and current applications in tissue engineering, regenerative medicine, drug delivery, and medical devices.

**ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)**

Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4991 Independent Study (1-5 Credits)****ENBI 4995 Independent Research (1-18 Credits)****Engineering, Mechanical Courses****ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretizations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides an introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 4020 Adv Finite Element Analysis (4 Credits)****ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)**

An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

**ENME 4360 Elasticity (4 Credits)**

Students will be able to apply the fundamental principles of elasticity to solve two- and three-dimensional mechanical engineering problems involved in modern applications of elastic structures, composite materials, tribology and contact mechanics. Dependence on previous knowledge of solid mechanics, continuum mechanics or mathematics is minimized. The emphasis is placed on the engineering applications of elasticity. Suggested prerequisite: ENME 2541.

**ENME 4400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

**ENME 4520 Intermediate Dynamics (4 Credits)**

Development and analysis of dynamic systems through classical approaches. Topics will include: Vector algebraic/differential geometry for 3D translational and rotational kinematic analyses with motion constraints. Formulation of equations of motion for 3D multibody systems using: Newton/Euler equations; Angular momentum principle; and D'Alembert principle (aka road-maps). Some exposure to Euler-Lagrange and Kane's Methods calculations. Symbolic and numerical computational solutions to linear/nonlinear algebraic and differential equations governing the configuration, forces, and motion of systems with multiple degrees of freedom. Recommended prerequisites: MATH 2070.

**ENME 4530 Advanced Dynamics (4 Credits)**

Formulation of equations of motion for constrained 3D multibody systems with: D'Alembert principle (MG road-maps); power, work, and energy; Lagrange's equations; and Kane's method. Euler parameters/quaternions, specified motion, constraint force/torque calculations, feed-forward control, inequality constraints and/or intermittent contact. Tensors and mass property calculations. Symbolic and numerical computer skills for geometry/kinematic analysis, mass/inertia calculations, forces and motion, and simulation of multi-body dynamic systems. Training for advanced research and professional work. Recommended pre-requisite: ENME 4520.

**ENME 4541 Advanced Mechanics of Materials (4 Credits)**

This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, axisymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability.

Recommended prerequisite: ENME 2541.

**ENME 4630 Viscous Flow (4 Credits)**

Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

**ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)**

Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

**ENME 4671 Convective Heat Transfer (4 Credits)**

The objective of this course is to examine the physical phenomena associated with heat transfer in the presence of fluid flow. We will develop a mathematical description of the processes (fluid flow and heat transfer) for laminar and turbulent flows for both internal and external situations. Exposure to the fundamentals of fluid mechanics and heat transfer is expected before taking this course.

**ENME 4800 Advanced Topics (ME) (0-5 Credits)**

Determined by interest and demand. May be taken more than once for credit.

**ENME 4900 Grad Professional Development (1 Credit)**

This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

**ENME 4950 Graduate Assessment (0 Credits)**

This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to DU Assessment to meet the course requirements. Students will receive emails through the DU Assessment system notifying you of what is required to be uploaded.

**ENME 4991 Independent Study (1-10 Credits)****ENME 4995 Independent Research (1-16 Credits)****ENME 5991 Independent Study (1-10 Credits)****ENME 5995 Independent Research (1-16 Credits)****Materials Science Courses****MTSC 4010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of material; emphasis on recent developments in materials science, fracture, fatigue, creep, wear, corrosion, stress rupture, deformation and residual stress. Cross listed with MTSC 3010.

**MTSC 4020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 3020.

**MTSC 4215 Composite Materials II (4 Credits)**

A continuation of MTSC 4210: Strength and toughness of composites, thermal behavior, fabrication methods, examples of applications. Prerequisite: MTSC 4210.

**MTSC 4450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear elastic fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, Airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 3450.

**MTSC 4800 Advanced Topics (MTSC) (1-5 Credits)**

Selected topics (depending on student and faculty interest): fracture mechanics, fatigue, nonlinear constitutive models, dynamic behavior of materials, corrosion resistant design, thermodynamics of solids II.

**MTSC 4991 Independent Study (1-10 Credits)**

**MTSC 4995 Independent Research (1-16 Credits)**

**MTSC 5995 Independent Research (1-16 Credits)**

### Master's and Doctoral Degrees Offered

#### Why study engineering at the University of Denver?

The University of Denver's Department of Mechanical and Materials Engineering is creating the future of technology by providing a graduate education emphasizing cross-disciplinary knowledge. A distinguished faculty is creating multidisciplinary education and research programs that anticipate technological trends in research and industry. Engineering graduate students join the faculty in conducting cutting-edge research in emerging disciplines to develop unique solutions to old and new problems and opportunities.

The well-equipped laboratories in the department contain state-of-the-art equipment and software to support research in biomedical engineering, advanced materials, robotics, mechanical design, and AI/machine learning, among others. Small classes support our multidisciplinary and real-time focus by providing close contact between students and faculty, which allows us to meet students' individual career goals.

Recognizing the different aims and goals of students, we offer several degree programs for students who wish to add to their technical skills in various areas: MS in Bioengineering; MS and PhD in Materials Science; and MS and PhD in Mechanical Engineering.

Denver is a first-rate location for business, governmental and laboratory partnerships, and technology employment. The Colorado Front Range is consistently rated as one of the top high-tech areas in the country, and the University of Denver is located just minutes from the Denver Tech Center, site of many top technology companies. The Department of Mechanical and Materials Engineering is committed to active collaboration with these industry leaders. As a result, our students graduate with relevant research experience and a network of employment contacts in the technology sector.

#### Time Commitment

Our department recognizes that a student may be employed full-time while studying for a degree. Therefore, many courses are offered at times and on days that will permit a student to complete the program by taking courses either late in the day or outside normal business hours. Many employers will permit additional flexibility by releasing employees early to attend classes. We also can provide hybrid and Zoom-based course options.

The master's program offer thesis and non-thesis options and can be completed in one (non-thesis track only) to four years depending on the number of courses taken per quarter. The choice of thesis or non-thesis can be made at any time, although a delay in declaration may impact the completion date.

The doctoral program is generally completed in three to seven years, depending on the number of courses taken per quarter and whether the student enters with a BS or MS.

A student not interested in pursuing a degree, but interested in taking an occasional course, may register as special status students (<http://www.du.edu/learn/graduates/degreeprograms/>) by following an abbreviated admissions process. If at a later time the student chooses to enter a graduate degree program at DU, you may apply up to 15 special status credits to your degree, with departmental approval. Just follow the regular graduate application requirements, including submitting the application fee, to get started.

### Degree Programs

Below are our graduate engineering degrees:

- Master of Science in Bioengineering
- Master of Science in Engineering (p. 295)(See Engineering program listing)
- Master of Science in Engineering with a Concentration in Management (p. 295)(See Engineering program listing)
- Master of Science in Materials Science
- Master of Science in Mechanical Engineering
- Doctor of Philosophy in Engineering (p. 295)(See Engineering program listing)
- Doctor of Philosophy in Materials Science
- Doctor of Philosophy in Mechanical Engineering

## Doctor of Philosophy in Materials Science

The Doctor of Philosophy in Materials Science program is designed to prepare the student for research or faculty position in the materials field. The program is multidisciplinary and involves the Departments of Physics and Astronomy, Chemistry and Biochemistry, Electrical and Computer Engineering, with the Mechanical and Materials Engineering Department administering the degree. The programs reflect the multidisciplinary nature by providing a thorough grounding in each of the basic disciplines of the field. Depth in specialized areas is achieved through the research interests of faculty in each of the participating departments. With an increasing number of technological fields becoming materials-limited in various ways, the program seeks to prepare students to meet the challenges of property improvement and new materials development, with a broad-based curriculum that stresses fundamentals.

## Doctor of Philosophy in Mechanical Engineering

The objective of the Doctor of Philosophy in Mechanical Engineering program is to provide an educational environment that encourages students to develop the ability to contribute to the advancement of mechanical engineering through independent research.

## Master of Science in Bioengineering

The Master of Science in Bioengineering program integrates engineering sciences with biomedical sciences and clinical practice to provide the skill set needed by bioscience companies. The Department of Mechanical and Materials Engineering—in collaboration with the Departments of Electrical and Computer Engineering, Chemistry & Biochemistry, Biological Sciences, and Physics & Astronomy—has designed a cross-disciplinary master of science program to address industrial requirements and the desired qualifications of a 21st century workforce in bioengineering businesses. Students with bachelor's degrees in chemistry, biological sciences or physics, as well as those with accredited engineering degrees, acquire a specialized expertise in bioengineering through programs which leverage the individual students' undergraduate experience and expertise resident at DU.

## Master of Science in Materials Science

The Master of Science in Materials Science program is designed to prepare the student for research and development work in the materials field. The program is multidisciplinary and involves the Departments of Physics, Chemistry and Engineering, with the Mechanical and Materials Engineering Department administering the degree. The programs reflect the multidisciplinary nature by providing a thorough grounding in each of the basic disciplines of the field. Depth in specialized areas is achieved through the research interests of faculty in each of the participating departments. With an increasing number of technological fields becoming materials-limited in various ways, the program seeks to prepare students to meet the challenges of property improvement and new materials development, with a broad-based curriculum that stresses fundamentals.

## Master of Science in Mechanical Engineering

The Master of Science in Mechanical Engineering program is intended for students with undergraduate degrees in mechanical engineering or a closely related field. It is designed to advance a student's knowledge in mechanical engineering topics related to their specific area of interest. The degree provides breadth through its flexible technical elective requirement, while permitting the students to achieve depth in one of several core areas: solid mechanics, fluid mechanics, heat transfer, biomechanics and robotics. These areas are grounded in the fundamentals of the field with connections to emerging technologies and applications with promise for the future. The purpose of the program is to prepare students to tackle a wide range of engineering challenges and to serve the profession of engineering through advanced study in mechanical engineering and related multidisciplinary areas.

## Doctor of Philosophy in Mechanical Engineering or Materials Science

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Mechanical Engineering: Students with a master's degree in Mechanical Engineering or closely related areas may apply for the PhD program in Mechanical Engineering (ENME). Admission with only a Bachelor of Science degree in this field is also possible, but such students are encouraged to enroll first in the MS ENME program.
- Materials Science: A bachelor's degree or master's degree in materials science or closely related field (physics, metallurgy, engineering or chemistry) is usually required for admission to Materials Science. If the student did not receive adequate preparation for studying materials, they are encouraged to apply for the master's degree.

### Other Required Materials

- We recommend PhD applicants contact faculty to find a research advisor BEFORE submitting the application. If we receive an application and there is no research advisor commitment, we will consider the applicant for the master's program only.

**English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

**Master of Science in Bioengineering****Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

**Prerequisites**

- Students with a bachelor's degree in Engineering, Chemistry, Biology or Physics is normally required for admission to the MS Bioengineering (ENBI) program. Note that although not an admission requirement, students who are not adequately prepared to succeed in our graduate level courses may choose to complete prerequisite undergraduate courses.

**English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

**Master of Science in Mechanical Engineering****Degree and GPA Requirements**

The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Prerequisites

- Students with a bachelor's degree in Materials Science, Engineering, Physics, Metallurgy, or Chemistry is normally required for admission to the MS Materials Science (MTSC) program. Note that although not an admission requirement, students who are not adequately prepared to succeed in our graduate level courses may choose to complete prerequisite undergraduate courses.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Doctoral Programs

### Doctor of Philosophy in Materials Science

#### Program Requirements

##### PhD Residence Requirement

Enrollment in at least six quarters, including at least two consecutive quarters of full-time attendance is required for graduation.

#### Exam Structure

1. Each student must pass the **qualifying exam** to obtain official entrance into the PhD program. In consultation with the advisor, students should expect to take the qualifying exam about one year (24 credits) into their academic study. Students must take exams in three subject areas. The design exam is required for all participants, and is an open book exam, where the student will have one week to prepare a written and oral response to an open ended design problem. The other two exams are closed-book written exams and should be related to the student's research area. The exam is offered twice a year: once in the summer interterm (usually in June) and once in the winter interterm (usually in December or early January). The qualifying exam can be retaken only once, and must be completed within one year after the first qualifying exam was attempted.
2. After completion of the qualifying exam and coursework, the student should schedule and take the **comprehensive exam** attended by the student's PhD committee. The student will be expected to make concise presentation on his/her dissertation topic. The presentation will highlight previous work in this area, demonstrate a need for the research, and explain how the research will contribute to the advancement of the area. The student will also present completed work and results, anticipated work and results, and a detailed plan for project completion. The comprehensive exam can be retaken only once.
3. After successful completion of the qualifying exam and the comprehensive exam, the student is required to complete and **defend a dissertation** of publishable quality based on the student's original research. The dissertation must be completed in written form in accordance with the University's Graduate School guidelines, and must be defended by the student in the final oral defense. The defense committee members will consist of the student's entire PhD committee. The dissertation defense can be retaken only once.

### PhD Students with a Bachelor of Science

#### Program Structure:

1. For students entering with a bachelor's degree, 90 credits are required, at least 75 of which must be completed at the University of Denver.
2. A minimum of 48 credits must be at the 4000 or 5000 level and may include as many dissertation research credits as considered appropriate by the advisor.

- No courses at the 1000 or 2000 level are acceptable.
- An overall GPA of 3.0 is required for the degree.
- Any individual grade lower than C- renders the credit unacceptable.
- Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
- Students must complete all requirements for the doctoral degree no later than eight years after doctoral studies begin.

#### Course Requirements:

- Candidates who hold only a bachelor's degree on entering the doctoral program are expected to **meet all degree requirements of the corresponding master's degree program** (as part of the doctoral requirements).
- Students are required to take ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.
- PhD students who enter the program with a bachelor's are required to take ENME 4900 **Graduate Professional Development** in the first year (this will be offered once a year; usually in winter quarter).

Code	Title	Credits
<b>Required Core Courses</b>		
ENME 4900	Grad Professional Development	1
ENME 4950	Graduate Assessment	0
<b>Materials Science Core Courses</b>		
ENGR 4200	Introduction to Nanotechnology	4

ENGR 4765	Robot Control	4

#### PhD Students with a Master of Science

##### Program Structure

- A minimum of 36 credits must be completed at the 4000- or 5000-level, which may include as many research credits as considered appropriate by the advisor.
- For students entering with a master's degree, up to 45 credits may be transferred and applied to the doctorate degree. In addition, a minimum of 45 credits must be completed at DU. The total number of credits required for the degree is 90.
- No courses at the 1000- or 2000-level are acceptable.
- An overall GPA of 3.0 is required for the degree.
- Any individual grade lower than C- renders the credit unacceptable.
- Students who have completed the required 90 credits and are still working on the dissertation are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
- A student who holds a master's degree on entering the doctoral program is expected to complete all requirements for the degree no later than seven years after beginning the program.

##### Course Requirements

- Students are required to take ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation.
- If a PhD student fails his/her qualifying exam on the first try, he/she will be required to take ENME 4900 **Graduate Professional Development** as well. ENME 4900 will be offered once a year, usually in winter quarter.

2. If a PhD student fails the qualifying exam on the first try, they will be required to take ENME 4900 **Graduate Professional Development** as well. ENME 4900 will be offered once a year, usually in winter quarter.

## Master's Degree Programs

### Master of Science in Bioengineering

#### Program Structure

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master's degree candidates are expected to complete degree requirements no later than five years after beginning their programs.

#### Course Requirements

1. **Core Courses:** a minimum of nine credits (two courses from the Bioengineering Core Course List plus required courses) for both thesis and non-thesis tracks.
2. **Required Courses:** All master's students are required to take ENME 4900 **Graduate Professional Development** in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students on the **thesis track** are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the **non-thesis track** are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900, along with the completed and signed degree program plan.
3. **Minor Elective Courses:** minimum of eight credits for thesis track; eight credits for non-thesis track. A minor is required by each student and is intended to provide bioengineering students with additional knowledge in an area unassociated with their undergraduate degree. Candidates with non-engineering undergraduate degrees must take courses in engineering chosen from regular engineering course offerings numbered 3000 or higher and must be approved by the advisor. Candidates with engineering undergraduate degrees must take graduate-level coursework in biological sciences, chemistry and biochemistry, or physics and biophysics.

4. **Technical Electives:** a minimum of eight credits for thesis track and 20 credits for non-thesis track. These do not include independent research credits.
  - a. Technical elective courses are intended to provide bioengineering students an opportunity to take additional course work that will expand their knowledge of advanced engineering topics. 50% or more of the technical elective credits must be chosen from engineering course offerings numbered 3000 or higher and approved by the student's advisor.
  - b. Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor **PRIOR TO REGISTRATION** if more than one business/management course is taken.
5. **Advanced Math Requirement:** a minimum of three credits for both thesis track and non-thesis track from Core Course List or advisor approval.
6. **Thesis Hours:** not allowed for non-thesis track.
7. **Tool Requirement:** As employers of graduates of this degree will inherently expect a basic competency in foundational engineering skills, students must demonstrate these before advancing to candidacy. Candidates with BS degrees from accredited engineering schools, or students completing a thesis, will be exempt from the tool requirement. Candidates with undergraduate degrees from non-engineering majors and completing a non-thesis MS will be required to pass a tool requirement. This will consist of an exam based on the topics in the Fundamentals of Engineering General Exam.

## Master of Science in Materials Science

### MS Program Structure

1. Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
2. A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
3. No courses at the 1000- or 2000-level are acceptable.
4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master's degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
8. **International students** must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the

program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

### Course Requirements

- Core Courses:** a minimum of nine credits (two courses from the Materials Science Core Course List plus required courses) for both thesis and non-thesis tracks.
- Required Courses:** All master's students are required to take ENME 4900 **Graduate Professional Development** in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students on the **thesis track** are required to complete a written self-reflection on their thesis and upload the report to Assess-It along with thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the **non-thesis track** are required to upload to Assess-It an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900, along with the completed and signed degree program plan.
- Technical Electives:** a minimum of 16 credits for thesis track and 28 credits non-thesis track. These do not include independent research credits.
  - Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor's discretion. 50% or more of the technical elective credits must be in engineering.
  - Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor **PRIOR TO REGISTRATION** if more than one business/management course is taken.
- Advanced Math Requirement:** a minimum of three credits for thesis track and six credits for non-thesis track from Core Course List or advisor approval.
- Thesis Hours:** not allowed for non-thesis track.

## Master of Science in Mechanical Engineering

### Program Structure

- Every candidate for this degree must complete 45 credits, at least 36 of which must be completed at the University of Denver.
- A minimum of six 4000-level courses of at least three credits each are required for non-thesis track; four 4000-level courses of at least three credits each are required for thesis track.
- No courses at the 1000- or 2000-level are acceptable.

4. An overall GPA of 3.0 is required for the degree.
5. Any individual grade lower than C- renders the credit unacceptable.
6. Students who have completed the required 45 credits and are still working on a thesis or project are eligible for Continuous Enrollment to maintain active student status at the University. Students working on internships are not eligible for Continuous Enrollment.
7. Master's degree candidates are expected to complete degree requirements no later than five years after beginning their programs.
8. **International students** must enroll in at least eight credits each quarter to maintain full-time status, except during the annual vacation term (usually the summer quarter) or the final quarter of study that requires fewer credits than the minimum full-time enrollment to complete the program. Failure to maintain full-time enrollment is a violation of student status and may result in the termination from the program. Based on the recommendation of the academic advisor, an international student advisor may authorize the student to drop below full-time status for academic reasons specifically permitted under immigration regulations. However, academic authorizations may only be given once per degree level and are usually issued during the first term of study.

### Course Requirements

1. **Core Courses:** a minimum of nine credits (two courses from the Mechanical Engineering Core Course List plus required courses) for both thesis and non-thesis tracks.
2. **Required Courses:** All master's students are required to take ENME 4900 **Graduate Professional Development** in the first year (this will be offered once a year; usually in winter quarter) and ENME 4950 **Graduate Assessment** in the last quarter of study. **NOTE:** Students on the **thesis track** are required to complete a written self-reflection on their thesis and provide their thesis, defense presentation slides, and the completed and signed degree program plan before graduation. Students on the **non-thesis track** are required to provide an assembled portfolio that includes reports from at least two course projects or homework from the core courses, a mini-proposal and presentation slides from ENME 4900 along with the completed and signed degree program plan.
3. **Technical Electives:** a minimum of 16 credits for thesis track and 28 credits non-thesis track. These do not include independent research credits.
  - a. Technical electives must be in engineering (bioengineering, mechanical engineering, materials science, etc.) or related areas (mathematics, computer science, physics, chemistry, etc.) and are at the advisor's discretion. 50% or more of the technical elective credits must be in engineering.
  - b. Students may take one business/management course as a technical elective. Special permission should be obtained in writing from the advisor **PRIOR TO REGISTRATION** if more than one business/management course is taken.
4. **Advanced Math Requirement:** a minimum of three credits for thesis track and six credits for non-thesis track from Core Course List or advisor approval.
5. **Thesis Hours:** not allowed for non-thesis track.
6. **Tool Requirement:** As employers of graduates of this degree will inherently expect a basic competency in foundational engineering skills, students must demonstrate these before advancing to candidacy. Candidates with BS degrees from accredited engineering schools, or students completing a thesis, will be exempt from the tool requirement. Candidates with undergraduate degrees from non-engineering majors and completing a non-thesis MS will be required to pass a tool requirement. This will consist of an exam based on the topics in the Fundamentals of Engineering General Exam.

## Engineering, Bio (ENBI)

### ENBI 4200 Medical Device Development (4 Credits)

Working in a fast-paced competitive biomedical R&D firm is a dramatic change of pace from most college classes. This course will create a realistic industry environment where students take on the role of development engineers to design and manufacture real-world medical devices. This course is intended to provide a working knowledge of the design and development process specifically for medical device applications.

### ENBI 4500 Biofluids (4 Credits)

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.

### ENBI 4510 Biomechanics (4 Credits)

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

### ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)

An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

### ENBI 4530 Biomechanics of Human Movement (4 Credits)

An introduction to engineering-based analysis of human movement. Topics include: musculoskeletal anatomy, neuromuscular physiology, muscle mechanics, electromyography, sensorimotor integration, anthropometry, kinematics and kinetics. Recommended pre-requisite material: knowledge of MATLAB, ENGR 1572.

### ENBI 4600 Biomedical Engineering: Technology, Research, and Design (4 Credits)

Introduction to Biomedical Engineering is an interdisciplinary course that combines engineering principles with biological and medical sciences to advance healthcare in areas such as diagnosis, monitoring, and therapy. The course provides a foundational understanding of biomedical engineering and prepares students for further study or careers in the field.

### ENBI 4610 Experimental Design in Biomedical Sciences (4 Credits)

This course offers an in-depth exploration of experimental design principles within the biomedical sciences, emphasizing statistical analysis, measurement techniques, and ethical considerations. It aims to provide students with practical skills necessary for designing, conducting, and analyzing biomedical research.

### ENBI 4620 Bioelectronics (4 Credits)

This course introduces the principles and applications of bioelectronics, focusing on the interface between biological systems and electronic devices. It covers the fundamentals of electronic circuits, signal processing, and sensor technology, and their applications in areas like biometric monitoring, neuroprosthetics, and biosensing.

### ENBI 4630 Biomaterials (4 Credits)

This course provides an introduction to the field of biomaterials science, focusing on the fundamental principles, properties, and applications of materials used in biomedical engineering and healthcare. Topics covered include the classification of biomaterials, biocompatibility, interactions with biological systems, surface modifications, fabrication techniques, characterization techniques and current applications in tissue engineering, regenerative medicine, drug delivery, and medical devices.

### ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)

Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4991 Independent Study (1-5 Credits)****ENBI 4995 Independent Research (1-18 Credits)**

## Engineering, Mechanical (ENME)

**ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides and introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 4020 Adv Finite Element Analysis (4 Credits)****ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)**

An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

**ENME 4360 Elasticity (4 Credits)**

Students will be able to apply the fundamental principles of elasticity to solve two- and three-dimensional mechanical engineering problems involved in modern applications of elastic structures, composite materials, tribology and contact mechanics. Dependence on previous knowledge of solid mechanics, continuum mechanics or mathematics is minimized. The emphasis is placed on the engineering applications of elasticity. Suggested prerequisite: ENME 2541.

**ENME 4400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

**ENME 4520 Intermediate Dynamics (4 Credits)**

Development and analysis of dynamic systems through classical approaches. Topics will include: Vector algebraic/differential geometry for 3D translational and rotational kinematic analyses with motion constraints. Formulation of equations of motion for 3D multibody systems using: Newton/Euler equations; Angular momentum principle; and D'Alembert principle (aka road-maps). Some exposure to Euler-Lagrange and Kane's Methods calculations. Symbolic and numerical computational solutions to linear/nonlinear algebraic and differential equations governing the configuration, forces, and motion of systems with multiple degrees of freedom. Recommended prerequisites: MATH 2070.

**ENME 4530 Advanced Dynamics (4 Credits)**

Formulation of equations of motion for constrained 3D multibody systems with: D'Alembert principle (MG road-maps); power, work, and energy; Lagrange's equations; and Kane's method. Euler parameters/quaternions, specified motion, constraint force/torque calculations, feed-forward control, inequality constraints and/or intermittent contact. Tensors and mass property calculations. Symbolic and numerical computer skills for geometry/kinematic analysis, mass/inertia calculations, forces and motion, and simulation of multi-body dynamic systems. Training for advanced research and professional work. Recommended pre-requisite: ENME 4520.

**ENME 4541 Advanced Mechanics of Materials (4 Credits)**

This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, axisymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability. Recommended prerequisite: ENME 2541.

**ENME 4630 Viscous Flow (4 Credits)**

Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

**ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)**

Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

**ENME 4671 Convective Heat Transfer (4 Credits)**

The objective of this course is to examine the physical phenomena associated with heat transfer in the presence of fluid flow. We will develop a mathematical description of the processes (fluid flow and heat transfer) for laminar and turbulent flows for both internal and external situations. Exposure to the fundamentals of fluid mechanics and heat transfer is expected before taking this course.

**ENME 4800 Advanced Topics (ME) (0-5 Credits)**

Determined by interest and demand. May be taken more than once for credit.

**ENME 4900 Grad Professional Development (1 Credit)**

This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

**ENME 4950 Graduate Assessment (0 Credits)**

This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to DU Assessment to meet the course requirements. Students will receive emails through the DU Assessment system notifying you of what is required to be uploaded.

**ENME 4991 Independent Study (1-10 Credits)****ENME 4995 Independent Research (1-16 Credits)****ENME 5991 Independent Study (1-10 Credits)****ENME 5995 Independent Research (1-16 Credits)**

## Engineering (ENGR)

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3620 Advanced Engineering Mathematics - Corporate (4 Credits)**

Applied mathematics for engineers. Systems and series solutions of ordinary differential equations, Fourier analysis, partial differential equations, linear algebra, vector calculus, special functions, unconstrained and combinatorial optimization, and applied probability and statistics. Prerequisites: MATH 2070 and MATH 2080 or instructor permission.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design.

**ENGR 4455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 3455.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the "shredding" of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the "true" problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering "vee" design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisite: ENGR 3721 or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)**

The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

**ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure— the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)**

## Materials Science (MTSC)

**MTSC 4010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of material; emphasis on recent developments in materials science, fracture, fatigue, creep, wear, corrosion, stress rupture, deformation and residual stress. Cross listed with MTSC 3010.

**MTSC 4020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 3020.

**MTSC 4215 Composite Materials II (4 Credits)**

A continuation of MTSC 4210: Strength and toughness of composites, thermal behavior, fabrication methods, examples of applications. Prerequisite: MTSC 4210.

**MTSC 4450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear elastic fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, Airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 3450.

**MTSC 4800 Advanced Topics (MTSC) (1-5 Credits)**

Selected topics (depending on student and faculty interest): fracture mechanics, fatigue, nonlinear constitutive models, dynamic behavior of materials, corrosion resistant design, thermodynamics of solids II.

**MTSC 4991 Independent Study (1-10 Credits)****MTSC 4995 Independent Research (1-16 Credits)****MTSC 5995 Independent Research (1-16 Credits)**

## Engineering Courses

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3620 Advanced Engineering Mathematics - Corporate (4 Credits)**

Applied mathematics for engineers. Systems and series solutions of ordinary differential equations, Fourier analysis, partial differential equations, linear algebra, vector calculus, special functions, unconstrained and combinatorial optimization, and applied probability and statistics. Prerequisites: MATH 2070 and MATH 2080 or instructor permission.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design.

**ENGR 4455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 3455.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the "shredding" of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the "true" problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering "vee" design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisite: ENGR 3721 or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)**

The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

**ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure— the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)****Engineering, Bio Courses****ENBI 4200 Medical Device Development (4 Credits)**

Working in a fast-paced competitive biomedical R&D firm is a dramatic change of pace from most college classes. This course will create a realistic industry environment where students take on the role of development engineers to design and manufacture real-world medical devices. This course is intended to provide a working knowledge of the design and development process specifically for medical device applications.

**ENBI 4500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.

**ENBI 4510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

**ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)**

An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

**ENBI 4530 Biomechanics of Human Movement (4 Credits)**

An introduction to engineering-based analysis of human movement. Topics include: musculoskeletal anatomy, neuromuscular physiology, muscle mechanics, electromyography, sensorimotor integration, anthropometry, kinematics and kinetics. Recommended pre-requisite material: knowledge of MATLAB, ENGR 1572.

**ENBI 4600 Biomedical Engineering: Technology, Research, and Design (4 Credits)**

Introduction to Biomedical Engineering is an interdisciplinary course that combines engineering principles with biological and medical sciences to advance healthcare in areas such as diagnosis, monitoring, and therapy. The course provides a foundational understanding of biomedical engineering and prepares students for further study or careers in the field.

**ENBI 4610 Experimental Design in Biomedical Sciences (4 Credits)**

This course offers an in-depth exploration of experimental design principles within the biomedical sciences, emphasizing statistical analysis, measurement techniques, and ethical considerations. It aims to provide students with practical skills necessary for designing, conducting, and analyzing biomedical research.

**ENBI 4620 Bioelectronics (4 Credits)**

This course introduces the principles and applications of bioelectronics, focusing on the interface between biological systems and electronic devices. It covers the fundamentals of electronic circuits, signal processing, and sensor technology, and their applications in areas like biometric monitoring, neuroprosthetics, and biosensing.

**ENBI 4630 Biomaterials (4 Credits)**

This course provides an introduction to the field of biomaterials science, focusing on the fundamental principles, properties, and applications of materials used in biomedical engineering and healthcare. Topics covered include the classification of biomaterials, biocompatibility, interactions with biological systems, surface modifications, fabrication techniques, characterization techniques and current applications in tissue engineering, regenerative medicine, drug delivery, and medical devices.

**ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)**

Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4991 Independent Study (1-5 Credits)****ENBI 4995 Independent Research (1-18 Credits)****Engineering, Mechanical Courses****ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretizations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides an introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 4020 Adv Finite Element Analysis (4 Credits)****ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)**

An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

**ENME 4360 Elasticity (4 Credits)**

Students will be able to apply the fundamental principles of elasticity to solve two- and three-dimensional mechanical engineering problems involved in modern applications of elastic structures, composite materials, tribology and contact mechanics. Dependence on previous knowledge of solid mechanics, continuum mechanics or mathematics is minimized. The emphasis is placed on the engineering applications of elasticity. Suggested prerequisite: ENME 2541.

**ENME 4400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

**ENME 4520 Intermediate Dynamics (4 Credits)**

Development and analysis of dynamic systems through classical approaches. Topics will include: Vector algebraic/differential geometry for 3D translational and rotational kinematic analyses with motion constraints. Formulation of equations of motion for 3D multibody systems using: Newton/Euler equations; Angular momentum principle; and D'Alembert principle (aka road-maps). Some exposure to Euler-Lagrange and Kane's Methods calculations. Symbolic and numerical computational solutions to linear/nonlinear algebraic and differential equations governing the configuration, forces, and motion of systems with multiple degrees of freedom. Recommended prerequisites: MATH 2070.

**ENME 4530 Advanced Dynamics (4 Credits)**

Formulation of equations of motion for constrained 3D multibody systems with: D'Alembert principle (MG road-maps); power, work, and energy; Lagrange's equations; and Kane's method. Euler parameters/quaternions, specified motion, constraint force/torque calculations, feed-forward control, inequality constraints and/or intermittent contact. Tensors and mass property calculations. Symbolic and numerical computer skills for geometry/kinematic analysis, mass/inertia calculations, forces and motion, and simulation of multi-body dynamic systems. Training for advanced research and professional work. Recommended pre-requisite: ENME 4520.

**ENME 4541 Advanced Mechanics of Materials (4 Credits)**

This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, axisymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability. Recommended prerequisite: ENME 2541.

**ENME 4630 Viscous Flow (4 Credits)**

Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

**ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)**

Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

**ENME 4671 Convective Heat Transfer (4 Credits)**

The objective of this course is to examine the physical phenomena associated with heat transfer in the presence of fluid flow. We will develop a mathematical description of the processes (fluid flow and heat transfer) for laminar and turbulent flows for both internal and external situations. Exposure to the fundamentals of fluid mechanics and heat transfer is expected before taking this course.

**ENME 4800 Advanced Topics (ME) (0-5 Credits)**

Determined by interest and demand. May be taken more than once for credit.

**ENME 4900 Grad Professional Development (1 Credit)**

This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

**ENME 4950 Graduate Assessment (0 Credits)**

This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to DU Assessment to meet the course requirements. Students will receive emails through the DU Assessment system notifying you of what is required to be uploaded.

**ENME 4991 Independent Study (1-10 Credits)****ENME 4995 Independent Research (1-16 Credits)****ENME 5991 Independent Study (1-10 Credits)****ENME 5995 Independent Research (1-16 Credits)****Materials Science Courses****MTSC 4010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of material; emphasis on recent developments in materials science, fracture, fatigue, creep, wear, corrosion, stress rupture, deformation and residual stress. Cross listed with MTSC 3010.

**MTSC 4020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 3020.

**MTSC 4215 Composite Materials II (4 Credits)**

A continuation of MTSC 4210: Strength and toughness of composites, thermal behavior, fabrication methods, examples of applications. Prerequisite: MTSC 4210.

**MTSC 4450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear elastic fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, Airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 3450.

**MTSC 4800 Advanced Topics (MTSC) (1-5 Credits)**

Selected topics (depending on student and faculty interest): fracture mechanics, fatigue, nonlinear constitutive models, dynamic behavior of materials, corrosion resistant design, thermodynamics of solids II.

MTSC 4991 Independent Study (1-10 Credits)

MTSC 4995 Independent Research (1-16 Credits)

MTSC 5995 Independent Research (1-16 Credits)

## Daniels College of Business

The Daniels College of Business is dedicated to educating ethical business leaders, advancing the theory and practice of business, and making a positive global impact. As the eighth-oldest business college in the country, we have helped graduates achieve their career aspirations for more than a century. The College is ranked among the best of the world's top business schools. We are proud to be one of the 655 business schools accredited by the Association to Advance Collegiate Schools of Business (AACSB). Daniels is the only business school in Colorado to receive high rankings and recognition from *Businessweek*, the *Financial Times*, *U.S. News & World Report*, and *Forbes*. Daniels is internationally recognized for integrating social, environmental and ethical issues into our traditional curricula. Committed to diversity, we welcome all who want to hone their skills, improve their knowledge, and gain a lasting foundation.

## Business Ethics and Legal Studies

Office: Daniels College of Business, 687

Mail Code: Daniels College of Business, 2101 S. University Blvd., Denver, CO 80208

Phone: 303-871-3213

Web Site: <https://daniels.du.edu/business-ethics-legal-studies/>

### Certificate in Global Business and Corporate Social Responsibility

As a joint offering between the Daniels College of Business and the Korbel School of International Studies, this certificate focuses specifically on the challenges and opportunities businesses confront in a globalized and developing world.

A certificate in Global Business and Corporate Social Responsibility (CSR) will enable students to leverage the unique course offerings at Daniels and Korbel to learn about theory and practice related to economic development, business ethics, CSR strategy, social entrepreneurship, business and human rights, sustainability, impact investing, as well as considerations with regards to hard and soft law mechanisms that govern transnational space. These courses will give students the practical content they need to embrace and navigate the complexity of business and governance issues.

### Certificate in Global Business and Corporate Social Responsibility

This certificate program is reserved for students who are enrolled in a master's level degree within the Daniels College of Business or the Josef Korbel School of International Studies. Those who have been accepted to a master's level degree are eligible to pursue this certificate program. Interested students should contact the Student Services department in the Daniels College of Business at [GradBus.Advising@du.edu](mailto:GradBus.Advising@du.edu). Students should complete a certificate form no later than six months prior to their graduation so the certificate may be formally declared and added to the student's record.

---

## Graduate Certificate Programs

### Certificate of Specialization in Global Business and Corporate Social Responsibility

#### Program Requirements

##### Coursework Requirements

Code	Title	Credits
<b>Required Courses</b>		<b>12</b>
BUS 4445	International Business: Strategy and Practice	4
or INTS 4029	International Business: Strategy and Practice	
BUS 4444	Global Bus, Governance & CSR	4
or INTS 4459	Global Business, Governance & Corporate Social Responsibility	
INTS 4324	International Political Economy	4
<b>Elective Courses</b>		<b>12</b>
Choose a minimum of 12 credits from the following list. Students must complete one elective outside of their primary college:		
ACTG 4610	Financial Accounting and Reporting <sup>1</sup>	4
CMGT 4155	Sustainable Development	4
FIN 4110	Ethics in Finance	4
FIN 4180	Global Finance	2
FIN 4630	Managerial Finance <sup>1</sup>	4
LGST 4701	Topics in Ethics & Legal Study	1-5

MBA 4610	Business Law and Public Policy	4
MBA 4446	Advanced Sustainability	4
INTS 4210	Global Value Chains, Multinational Corporations, and Investment Sustainability	4
INTS 4220	Political Economy of Energy & Sustainable Development	4
INTS 4394	The Organizational Psychology of Non-Profits	4
INTS 4370	The Global Economy: Conflict, Crisis and Cooperation	4
INTS 4226	Social Entrepreneurship & Sustainable Development	4
INTS 4330	International Business Transactions	4
INTS 4339	Microfinance Lessons: Inclusive Markets and Development	4
INTS 4549	Managing Microfinance: Balancing Business with Development	4
INTS 4656	Power, Institutions, and Justice in Environmental Sustainability	4
INTS 4622	Global Governance	4
INTS 4972	Global Environmental Governance	4
MFJS 4050	Foundations of Strategic Communication	4
MFJS 4080	Global/Multicultural Campaigns	4
TRAN 4100	Fundamentals of Supply Chain Management	4
TRAN 4180	Sustainability and Supply Chain Management	4
<b>Total credits required:</b>		<b>24</b>

Minimum number of credits required: 24

## Certificate in Governance, Risk, and Compliance

Code	Title	Credits
<b>Required Courses</b>		
MBA 4610	Business Law and Public Policy	4
LGST 4701	Topics in Ethics & Legal Study	4
ACTG 4620	Accounting Ethics	4
LGST 4760	CEOs and Corporate Governance	4
or ACTG 4760	CEOs and Corporate Governance	
<b>Select two of the following courses</b>		<b>8</b>
MBA 4250	Business and Global Values	
LGST 4700	International Law	
BUS 4444	Global Bus, Governance & CSR	
<b>Total Credits</b>		<b>24</b>

## Specialized Graduate Certificate Program

### Specialized Certificate in Governance, Risk, and Compliance

Code	Title	Credits
<b>Required Courses</b>		
MBA 4610	Business Law and Public Policy	4
LGST 4701	Topics in Ethics & Legal Study (White Collar and Corporate Crime)	4
ACTG 4620	Accounting Ethics	4
LGST/ACTG 4760	CEOs and Corporate Governance	4
<b>Total Credits</b>		<b>16</b>

**LGST 3030 The Supreme Court & Your Life (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3330 Advanced Constitutional Law (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution applies to each case and how the case makes its way to the Court, (2) each case is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion resonate in the business world. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3540 Impact of Driverless Mobility (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 4198 E-Commerce Law and Ethics (4 Credits)**

The changes in technology and business over the past 20 years have been dramatic and far-reaching. Navigating the even more astonishing changes in the future requires some perspective on the developments of the recent past. How did we get to where we are? What technological, economic and political forces have generated the current state of e-commerce? How are these forces likely to change into the future? What are the basic features of e-commerce as it exists today?.

**LGST 4400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 4550 Business Law for Accountants (4 Credits)**

This course provides students with a detailed review of the legal considerations in forming, operating, and dissolving the most common forms of business entities: partnerships, limited liability companies, and corporations. The rights, duties and liabilities of the managers, owners and accountants (internal and external) of these entities are extensively examined. The course also provides an overview of federal securities laws impacting these organizations. Prerequisite: ACTG 4620 or BUS 4620 or LGST 2000 (concurrent registration OK).

**LGST 4700 International Law (4 Credits)**

Offers both an introduction to public international law (the rights and duties of states and intergovernmental organizations [IGOs]) and to private international law (the rights and duties of individuals, businesses, and non-governmental organizations [NGOs] in their international affairs). Majority of course devoted to key international issues of business law and public policy such as alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of legal issues related to business.

**LGST 4701 Topics in Ethics & Legal Study (1-5 Credits)**

This course examines complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. At the heart of Great Leadership one finds a values base. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants gain a deep understanding of - and practical experience with - Values Based Leadership in today's world.

**LGST 4730 Values Based Leadership in Practice (4 Credits)**

The course examines the complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants will gain a deep understanding of - and practical experience with - Values-Based Leadership in today's world.

**LGST 4740 Science & Mgmt. of Org. Ethics (4 Credits)**

This course examines our knowledge regarding ethical decision making and behavior in organizational contexts. The course also explores the implications of such knowledge for effectively creating and managing ethical organizations. The course will be conducted as a graduate seminar with students playing a central role in identifying topics, researching content areas, and deciding on course outcomes. We will examine conceptual and theoretical models of ethical behavior in organizations, research empirical studies, and develop managerial implications. The overarching goal is to increase knowledge and understanding so as to strengthen capacities to be ethical leaders and managers. Prerequisite: BUS 4100. Non-business students may take the course with permission.

**LGST 4760 CEOs and Corporate Governance (4 Credits)**

In the wake of the Sarbanes-Oxley and Dodd-Frank laws, corporate governance has become a compelling issue for business students and executives. Corporate board members and leaders of institutional investors share their insights concerning corporate governance from strategic, financial and legal perspectives. CEO/board dynamics are explored, along with leadership development and executive succession policies. The roles of major board committees, such as the audit, compensation, nominating, and legal compliance committees are given special emphasis. Board responsibilities in corporate crises and re-structuring are examined, along with the legal liabilities of executives, board members, and the corporation. Public policy pressures on corporate governance, including the roles played by the Securities and Exchange Commission and other regulatory bodies are discussed, along with the responses by business organizations, political interest groups, and self-regulatory bodies. Shareholder activism and litigation, along with pressures from other corporate stakeholders are also emphasized in the course. Examples of topics include corporate scandals, executive compensation, global corporate governance systems, and governance reforms. Students engage in a number of case analyses over the course of the quarter, produce a four-part case study, and discuss actual real world solutions with business leaders who have been involved in the issues. Cross-listed with ACTG 4760.

**LGST 4780 Leadership, Teams & Values (4 Credits)**

This course is designed for Daniel Scholars (who have completed the first quarter of their MBA program including Value Based Leadership) to provide both challenging intellectual discussion and physical engagement around the fundamental ethical dilemma of competition and/or cooperation. The venue for the course is Harbor Island, San Diego, California, and the adjacent waters of San Diego Bay and the Pacific Ocean. Both traditional classrooms and the untraditional learning environment of the off-shore sail boat provide the context of dynamic learning about values, teams and self. Prerequisite: BUS 4100.

**LGST 4790 Entrepreneur & Family Business-Organization, Governance Ethics & Leadership (4 Credits)**

This course covers the most current legal and ethical issues involving the creation of value, strengthening and growing family businesses through the process of best practices in business governance, coupled with ethical conduct and values based leadership, and legal compliance. Cross listed with LGST 3790. Prerequisite: BUS 4100.

**LGST 4960 Employment Law & Ethics (4 Credits)**

This course will introduce students to the key laws, rules and regulations governing employment in the United States. The course will explore workplace issues that arise because of the intersection of the hierarchical nature of organizations and the diversity of employees. As such, we will discuss workplace policies, practices and operations and their interactions with employment laws. This is an interactive course that will address issues such as: What is work? How do we value it? Who is an employee? What are the rights of employers? What are the rights of individuals in the workplace? What are some of the ethical issues faced by employers and employees, and how can both groups successfully navigate them? Graduate students will be assigned an independent study project focused on issues(s) faced by the Chief Human Resources Officer of an organization - a leader and strategic business partner in the organization.

**LGST 4980 Internship (1-5 Credits)****LGST 4991 Independent Study (1-10 Credits)****LGST 4995 Independent Research (1-10 Credits)****Courses****LGST 2960 Employment Law & Ethics (4 Credits)**

This course will introduce students to the key laws, rules and regulations governing employment in the United States. The course will explore workplace issues that arise because of the intersection of the hierarchical nature of organizations and the diversity of employees. As such, we will discuss workplace policies, practices and operations and their interactions with employment laws. This is an interactive course that will address issues such as: What is work? How do we value it? Who is an employee? What are the rights of employers? What are the rights of individuals in the workplace? What are some of the ethical issues faced by employers and employees, and how can both groups successfully navigate them? Graduate students will be assigned an independent study project focused on issues(s) faced by the Chief Human Resources Officer of an organization - a leader and strategic business partner in the organization. Prerequisites: LGST 2000 for undergraduate students; no prerequisite for graduate students.

**LGST 3030 The Supreme Court & Your Life (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3330 Advanced Constitutional Law (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution applies to each case and how the case makes its way to the Court, (2) each case is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion resonate in the business world. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3540 Impact of Driverless Mobility (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 4198 E-Commerce Law and Ethics (4 Credits)**

The changes in technology and business over the past 20 years have been dramatic and far-reaching. Navigating the even more astonishing changes in the future requires some perspective on the developments of the recent past. How did we get to where we are? What technological, economic and political forces have generated the current state of e-commerce? How are these forces likely to change into the future? What are the basic features of e-commerce as it exists today?

**LGST 4400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 4550 Business Law for Accountants (4 Credits)**

This course provides students with a detailed review of the legal considerations in forming, operating, and dissolving the most common forms of business entities: partnerships, limited liability companies, and corporations. The rights, duties and liabilities of the managers, owners and accountants (internal and external) of these entities are extensively examined. The course also provides an overview of federal securities laws impacting these organizations. Prerequisite: ACTG 4620 or BUS 4620 or LGST 2000 (concurrent registration OK).

**LGST 4700 International Law (4 Credits)**

Offers both an introduction to public international law (the rights and duties of states and intergovernmental organizations [IGOs]) and to private international law (the rights and duties of individuals, businesses, and non-governmental organizations [NGOs] in their international affairs). Majority of course devoted to key international issues of business law and public policy such as alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of legal issues related to business.

**LGST 4701 Topics in Ethics & Legal Study (1-5 Credits)**

This course examines complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. At the heart of Great Leadership one finds a values base. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants gain a deep understanding of - and practical experience with - Values Based Leadership in today's world.

**LGST 4730 Values Based Leadership in Practice (4 Credits)**

The course examines the complexities, paradoxes, and dangers of leadership. The platform for the course is a Core Leadership Model (and logical deviations from it) which can result in Great Leadership. Through in-depth analysis of the key dimensions of the Core Model and its accompanying deviations, participants will gain a deep understanding of - and practical experience with - Values-Based Leadership in today's world.

**LGST 4740 Science & Mgmt. of Org. Ethics (4 Credits)**

This course examines our knowledge regarding ethical decision making and behavior in organizational contexts. The course also explores the implications of such knowledge for effectively creating and managing ethical organizations. The course will be conducted as a graduate seminar with students playing a central role in identifying topics, researching content areas, and deciding on course outcomes. We will examine conceptual and theoretical models of ethical behavior in organizations, research empirical studies, and develop managerial implications. The overarching goal is to increase knowledge and understanding so as to strengthen capacities to be ethical leaders and managers. Prerequisite: BUS 4100. Non-business students may take the course with permission.

**LGST 4760 CEOs and Corporate Governance (4 Credits)**

In the wake of the Sarbanes-Oxley and Dodd-Frank laws, corporate governance has become a compelling issue for business students and executives. Corporate board members and leaders of institutional investors share their insights concerning corporate governance from strategic, financial and legal perspectives. CEO/board dynamics are explored, along with leadership development and executive succession policies. The roles of major board committees, such as the audit, compensation, nominating, and legal compliance committees are given special emphasis. Board responsibilities in corporate crises and re-structuring are examined, along with the legal liabilities of executives, board members, and the corporation. Public policy pressures on corporate governance, including the roles played by the Securities and Exchange Commission and other regulatory bodies are discussed, along with the responses by business organizations, political interest groups, and self-regulatory bodies. Shareholder activism and litigation, along with pressures from other corporate stakeholders are also emphasized in the course. Examples of topics include corporate scandals, executive compensation, global corporate governance systems, and governance reforms. Students engage in a number of case analyses over the course of the quarter, produce a four-part case study, and discuss actual real world solutions with business leaders who have been involved in the issues. Cross-listed with ACTG 4760.

**LGST 4780 Leadership, Teams & Values (4 Credits)**

This course is designed for Daniel Scholars (who have completed the first quarter of their MBA program including Value Based Leadership) to provide both challenging intellectual discussion and physical engagement around the fundamental ethical dilemma of competition and/or cooperation. The venue for the course is Harbor Island, San Diego, California, and the adjacent waters of San Diego Bay and the Pacific Ocean. Both traditional classrooms and the untraditional learning environment of the off-shore sail boat provide the context of dynamic learning about values, teams and self. Prerequisite: BUS 4100.

**LGST 4790 Entrepreneur & Family Business-Organization, Governance Ethics & Leadership (4 Credits)**

This course covers the most current legal and ethical issues involving the creation of value, strengthening and growing family businesses through the process of best practices in business governance, coupled with ethical conduct and values based leadership, and legal compliance. Cross listed with LGST 3790. Prerequisite: BUS 4100.

**LGST 4960 Employment Law & Ethics (4 Credits)**

This course will introduce students to the key laws, rules and regulations governing employment in the United States. The course will explore workplace issues that arise because of the intersection of the hierarchical nature of organizations and the diversity of employees. As such, we will discuss workplace policies, practices and operations and their interactions with employment laws. This is an interactive course that will address issues such as: What is work? How do we value it? Who is an employee? What are the rights of employers? What are the rights of individuals in the workplace? What are some of the ethical issues faced by employers and employees, and how can both groups successfully navigate them? Graduate students will be assigned an independent study project focused on issues(s) faced by the Chief Human Resources Officer of an organization - a leader and strategic business partner in the organization.

**LGST 4980 Internship (1-5 Credits)****LGST 4991 Independent Study (1-10 Credits)****LGST 4995 Independent Research (1-10 Credits)**

## Business Information and Analytics

Office: Daniels College of Business, Room 580

Mail Code: Daniels College of Business, Room 580, 2101 S. University Blvd., Denver, CO 80210

Phone: 303-871-3695

Web Site: <https://daniels.du.edu/business-information-analytics/>

### Master of Science in Business Analytics

The University of Denver's Daniels College of Business Master of Science in Business Analytics program focuses on the three pillars of business analytics: data management, analytic modeling, and business decision-making. Graduates will be able to bring value to their organizations by informing data-driven decisions. As part of the program, students consult for our partner organizations (corporate, government, and non-profit) to help them with their data-driven challenges. Through partnerships with IBM/SPSS, Tableau, Microsoft, and other leading technology vendors, Daniels is able to provide the most relevant analytic tools in our classrooms. This gives students an edge in solving complex problems and keeps them on the leading edge of business analytics. This is a STEM designated degree and is a 12–36-month, full or part-time. This degree is 54-58 credits. Students with an undergraduate business degree can waive INFO 4000 and complete the degree in 54 credits.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Master of Science in Business Analytics

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### Standardized Test Scores

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.
- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The GMAT code for the Business Analytics program is MZR-GT-47. The GRE code for the University of Denver is 4842.

**Other Requirements**

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

**English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

**Certificate or Specialized Certificate in Business Analytics****Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

**English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

**Other Requirements**

Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

#### INFO 4000 Foundations of Business (4 Credits)

The Introduction to Business course is an introduction to provides an overview of the business arena, how a business operates, and the supporting functions that are needed in any business enterprise. Students will identify forms of ownership and the processes used in operations, marketing, accounting, finance, personnel, information technology and general management. Moreover, students will learn about social responsibility and business ethics in concurrence with the Daniels College legacy.

#### INFO 4100 Survey of Business Analytics (4 Credits)

This course provides an overview of business analytics: how business data are collected, processed, and analyzed to support decision making. It will address both how to assess and use data that is readily available as well as how to start with corporate strategy and determine what data is needed, how to generate and process it. The course will also explore how corporate culture, ethics, and globalization can affect data management and analytic decision-making.

#### INFO 4120 Python Programming (4 Credits)

Python is a popular general purpose programming language which is well suited to a wide range of problems. With the right set of add-ons, it is comparable to domain-specific languages such as R and MATLAB. Python is a scripting language. The following topics will be covered: Importing data, Reading and writing files, Cleaning and Managing Data, Merging and joining DataFrame objects, Plotting and Visualization, Statistical Analysis, Fitting data to probability distributions and Linear models. Packages: Pandas, NumPy, matplotlib, statsmodels, Scikit-learn, and IPython. Principal Content Elements: 1. Introduction to Programming Logic and Design Using Python 2. Data Management 3. Statistical Analysis 4. Advanced Data Management and Statistical Analysis Prerequisites: STAT 4610.

**INFO 4140 Business Databases (4 Credits)**

This is an introductory database course which covers enterprise database design, modeling and implementation.

**INFO 4200 Business Analytics Capstone Planning (2 Credits)**

This course prepares the student for the Capstone course by identifying a faculty advisor, company, data, and a business issue to be addressed in the Capstone course in the final quarter. (Must be taken two quarters prior to INFO4400, with the exception of off-cycle students, who will take it the quarter prior to INFO4400.) This course may be taken by MSBA students only.

**INFO 4240 Data Warehousing (4 Credits)**

This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisites: INFO 4100, INFO 4140.

**INFO 4250 Business Data and Analytics (4 Credits)**

Businesses make decisions and improve processes using their own and external data with a variety of data-driven and analytic techniques. This course introduces students to the business data landscape, data management in commercial organizations, and the data-driven decision-making process. Students explore the fundamental concepts behind how data and analytics can improve business performance, using their individual roles and companies as subject matter. Principal Content Elements: 1. Data-driven decision making and performance improvement. 2. Data management in organizations. 3. Hands-on experience creating visualizations for data-driven insights. INFO 4250 requires a Windows Operating System. MAC users will have to virtualize their machines, or have access to a PC for async, live session and graded assignments. The software used in this course is Power BI and Visio Pro, which are Windows-only applications. Power BI is free, and the Department of Business Information and Analytics will provide a license for Visio Pro.

**INFO 4260 Data Management Platforms (4 Credits)**

This course introduces students to the variety of data management platforms being used across the business landscape, and develops skills in using those platforms to manage data and perform analytics. These include Hadoop distributed file systems, Amazon Web Services, Microsoft Azure, and/or other locally-hosted and cloud-based services. Other topics, such as Apache Spark and High-Performance Computing may be introduced using University and College resources. Learning Outcomes: 1. Students will create portals to data management systems and will run instances of these systems from their local environments. 2. Students will create file systems and load data onto local and cloud-based systems, and will query and manage data within these systems. 3. Students will leverage existing software packages (system-sourced and user-installed) in order to perform analytic modeling on the data in these environments. 4. Students will articulate the advantages and disadvantages of the various data management systems, and assess their utility for a variety of business applications.

**INFO 4281 Project Management (2 Credits)**

“Cheaper, better, faster” is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Prerequisite: INFO 4100. Co-requisite: INFO 4200.

**INFO 4300 Predictive Analytics (4 Credits)**

This course is designed to prepare students for managerial data analysis and data mining, predictive modeling, model assessment and implementation using large data sets. The course addresses the how, when, why and where of data mining. The emphasis is on understanding the application of a wide range of modern techniques to specific decision-making situations, rather than on mastering the theoretical underpinnings of the techniques. The course covers methods that are aimed at prediction, forecasting, classification, clustering and association. Students gain hands-on experience in using computer software to mine business data sets. Prerequisite: STAT 4610.

**INFO 4340 Data Mining and Visualization (4 Credits)**

In this course, students create business intelligence tools such as balanced scorecards, data visualization and dashboards to inform business decisions. The course will focus on the identification of metrics, measures, and key performance indicators for a variety of business operations, and will introduce numerous analytic methodologies to support the decisions made with regard to these metrics. The focus will be on the advantages and disadvantages of various modeling methodologies and implementations moving towards performance improvement and business understanding. Prerequisite: STAT 4610.

**INFO 4360 Complex Data Analytics (4 Credits)**

This course addresses the rapidly-growing demands on businesses created by the prevalence of big and unstructured data. These include management of big data, big-data analytics, analysis of unstructured data (to include text mining), and management and analysis of real-time (streaming) data. The focus will be on enhancing business decision-making in the presence of big data, and on how to create the greatest ROI with large data sets.

**INFO 4381 Decision Processes (2 Credits)**

The competency we want to begin to develop in this course is the ability to make sound business decisions. A quick Google search can reassure you that there is no lack of information about how to make good decisions. And much of that information is confusing, if not downright contradictory. Since you will be making the decisions which impact your business and your career, you will need to decide what constitutes a good decision as well as a good decision process. In this course, we will explore some of the voluminous material available, use it to make decisions, practice with useful tools, identify traps and pitfalls, assess results, and extract guidelines for a decision process. Then we will iterate to update and refine the process.

**INFO 4390 Advanced Predictive Modeling with R (4 Credits)**

This course serves as an introduction to advanced predictive modeling and statistical learning using the R statistical software. Specific topics include linear, non-linear, and logistic regression, classification, resampling methods, and non-linear regression, tree-based methods, and support vector machines. The students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools. Enforced Prerequisites and Restrictions: INFO 4100 and INFO 4300.

**INFO 4400 Business Analytics Capstone (4 Credits)**

This course gives students an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from model construction and data collection through an analysis and presentation of results to recommendations for specific business decisions. Prerequisite: INFO 4200.

**INFO 4401 Business Analytics Fundamentals (4 Credits)**

Business Analytics is a broad term that describes the process of using data to make business decisions. Data driven business decisions are both critical in modern business and hard to produce with reliable outcomes. This course introduces students to decision-making using probability and other statistical techniques to support and validate the chosen decision. Students will practice hands on business analytics skills for making data driven business decisions.

**INFO 4590 Optimization (4 Credits)**

This course introduces students to the basic optimization modeling techniques and tools as practiced by business analysts to help their enterprises make better-informed decisions. Applications will include mix, selection, assignment, distribution, transportation, financial management, planning, scheduling, and management implementations in a variety of business settings. The course will focus on problem definitions, problem configuration, spreadsheet solutions, LP Software (LINGO) solutions, and interpreting and implementing results.

**INFO 4610 Business Statistics and Analytics (4 Credits)**

Making high quality business decisions is hard. Using data to make business decisions makes the process better. This course introduces students to a variety of techniques in analytics and statistics that facilitate data driven business decisions. Time will be spent identifying appropriate techniques to apply in various scenarios, applying in detail some of the quantitative techniques, and using analytic outputs to inform business decisions. Both technical skills and clear communication of results and decisions will be covered. Choosing proper techniques, technical work using Microsoft Excel, proper interpretation of results, and decision making are skills practiced in this course.

**INFO 4700 Topics in Business Analytics (0-10 Credits)**

Exploration of current trends and topics in business analytics. Prerequisite: INFO 4100.

**INFO 4830 Executive Education – Data Analytics for Decision Making (2 Credits)**

In this Executive Education workshop, students will explore how companies organize around data and analytics and how leaders use data to make decisions. Every organization has data, but not every organization knows how to leverage it. This course focuses on the process of analyzing data so that you can discover what problems data can solve and what successes data can make possible. The course will also provide a focus on analytic modeling, using regression analysis and optimization to develop familiarity and skills in the analytic process, and will culminate with an opportunity to explore the challenges that participants' organizations are facing around their data-driven decision processes. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4855 Executive Education – Data Visualization Using Power BI (2 Credits)**

A picture is worth a thousand words—or a thousand spreadsheets. In today's complex business world, where the amount of data is overwhelming, being able to create and communicate through compelling data visualizations is a must-have skill for all business professionals. For too long data has been trapped behind scripts, wizards and code. That can change! This Executive Education workshop is a deep dive into the world of data and data visualization. You will learn how to create, analyze and evaluate large data sets that will enable you to turn mountains of raw data into meaningful stories that inform decisions and drive change. This is a software-heavy class where you will have the opportunity to practice technical skills in Microsoft Power BI, a free software application that lets users visualize data. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4875 Executive Education – Strategic Advantage Using Data Analytics (2 Credits)**

In today's business world, labor, capital, raw materials, and data are all essential to an organization's strategy. Many leaders have well-developed strategies for the first three, but they lack the understanding and direction to tackle the fourth: data. This Executive Education workshop focuses on how to build and implement a data strategy to improve organizational performance. Data and analytics programs offer great potential value, and to be effective they must align strategically across the business to deliver a positive return on investment. By understanding and integrating the five main components of a data strategy – Program, People, Process, Platform and Data – you will be able to grow your business and accelerate progress toward your organization's goals. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4991 Independent Study (1-10 Credits)**

## Courses

**INFO 4000 Foundations of Business (4 Credits)**

The Introduction to Business course is an introduction to provides an overview of the business arena, how a business operates, and the supporting functions that are needed in any business enterprise. Students will identify forms of ownership and the processes used in operations, marketing, accounting, finance, personnel, information technology and general management. Moreover, students will learn about social responsibility and business ethics in concurrence with the Daniels College legacy.

**INFO 4100 Survey of Business Analytics (4 Credits)**

This course provides an overview of business analytics: how business data are collected, processed, and analyzed to support decision making. It will address both how to assess and use data that is readily available as well as how to start with corporate strategy and determine what data is needed, how to generate and process it. The course will also explore how corporate culture, ethics, and globalization can affect data management and analytic decision-making.

**INFO 4120 Python Programming (4 Credits)**

Python is a popular general purpose programming language which is well suited to a wide range of problems. With the right set of add-ons, it is comparable to domain-specific languages such as R and MATLAB. Python is a scripting language. The following topics will be covered: Importing data, Reading and writing files, Cleaning and Managing Data, Merging and joining DataFrame objects, Plotting and Visualization, Statistical Analysis, Fitting data to probability distributions and Linear models. Packages: Pandas, NumPy, matplotlib, statsmodels, Scikit-learn, and IPython. Principal Content Elements: 1. Introduction to Programming Logic and Design Using Python 2. Data Management 3. Statistical Analysis 4. Advanced Data Management and Statistical Analysis Prerequisites: STAT 4610.

**INFO 4140 Business Databases (4 Credits)**

This is an introductory database course which covers enterprise database design, modeling and implementation.

**INFO 4200 Business Analytics Capstone Planning (2 Credits)**

This course prepares the student for the Capstone course by identifying a faculty advisor, company, data, and a business issue to be addressed in the Capstone course in the final quarter. (Must be taken two quarters prior to INFO4400, with the exception of off-cycle students, who will take it the quarter prior to INFO4400.) This course may be taken by MSBA students only.

**INFO 4240 Data Warehousing (4 Credits)**

This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisites: INFO 4100, INFO 4140.

**INFO 4250 Business Data and Analytics (4 Credits)**

Businesses make decisions and improve processes using their own and external data with a variety of data-driven and analytic techniques. This course introduces students to the business data landscape, data management in commercial organizations, and the data-driven decision-making process. Students explore the fundamental concepts behind how data and analytics can improve business performance, using their individual roles and companies as subject matter. Principal Content Elements: 1. Data-driven decision making and performance improvement. 2. Data management in organizations. 3. Hands-on experience creating visualizations for data-driven insights. INFO 4250 requires a Windows Operating System. MAC users will have to virtualize their machines, or have access to a PC for async, live session and graded assignments. The software used in this course is Power BI and Visio Pro, which are Windows-only applications. Power BI is free, and the Department of Business Information and Analytics will provide a license for Visio Pro.

**INFO 4260 Data Management Platforms (4 Credits)**

This course introduces students to the variety of data management platforms being used across the business landscape, and develops skills in using those platforms to manage data and perform analytics. These include Hadoop distributed file systems, Amazon Web Services, Microsoft Azure, and/or other locally-hosted and cloud-based services. Other topics, such as Apache Spark and High-Performance Computing may be introduced using University and College resources. Learning Outcomes: 1. Students will create portals to data management systems and will run instances of these systems from their local environments. 2. Students will create file systems and load data onto local and cloud-based systems, and will query and manage data within these systems. 3. Students will leverage existing software packages (system-sourced and user-installed) in order to perform analytic modeling on the data in these environments. 4. Students will articulate the advantages and disadvantages of the various data management systems, and assess their utility for a variety of business applications.

**INFO 4281 Project Management (2 Credits)**

"Cheaper, better, faster" is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Prerequisite: INFO 4100. Co-requisite: INFO 4200.

**INFO 4300 Predictive Analytics (4 Credits)**

This course is designed to prepare students for managerial data analysis and data mining, predictive modeling, model assessment and implementation using large data sets. The course addresses the how, when, why and where of data mining. The emphasis is on understanding the application of a wide range of modern techniques to specific decision-making situations, rather than on mastering the theoretical underpinnings of the techniques. The course covers methods that are aimed at prediction, forecasting, classification, clustering and association. Students gain hands-on experience in using computer software to mine business data sets. Prerequisite: STAT 4610.

**INFO 4340 Data Mining and Visualization (4 Credits)**

In this course, students create business intelligence tools such as balanced scorecards, data visualization and dashboards to inform business decisions. The course will focus on the identification of metrics, measures, and key performance indicators for a variety of business operations, and will introduce numerous analytic methodologies to support the decisions made with regard to these metrics. The focus will be on the advantages and disadvantages of various modeling methodologies and implementations moving towards performance improvement and business understanding. Prerequisite: STAT 4610.

**INFO 4360 Complex Data Analytics (4 Credits)**

This course addresses the rapidly-growing demands on businesses created by the prevalence of big and unstructured data. These include management of big data, big-data analytics, analysis of unstructured data (to include text mining), and management and analysis of real-time (streaming) data. The focus will be on enhancing business decision-making in the presence of big data, and on how to create the greatest ROI with large data sets.

**INFO 4381 Decision Processes (2 Credits)**

The competency we want to begin to develop in this course is the ability to make sound business decisions. A quick Google search can reassure you that there is no lack of information about how to make good decisions. And much of that information is confusing, if not downright contradictory. Since you will be making the decisions which impact your business and your career, you will need to decide what constitutes a good decision as well as a good decision process. In this course, we will explore some of the voluminous material available, use it to make decisions, practice with useful tools, identify traps and pitfalls, assess results, and extract guidelines for a decision process. Then we will iterate to update and refine the process.

**INFO 4390 Advanced Predictive Modeling with R (4 Credits)**

This course serves as an introduction to advanced predictive modeling and statistical learning using the R statistical software. Specific topics include linear, non-linear, and logistic regression, classification, resampling methods, and non-linear regression, tree-based methods, and support vector machines. The students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools. Enforced Prerequisites and Restrictions: INFO 4100 and INFO 4300.

**INFO 4400 Business Analytics Capstone (4 Credits)**

This course gives students an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from model construction and data collection through an analysis and presentation of results to recommendations for specific business decisions. Prerequisite: INFO 4200.

**INFO 4401 Business Analytics Fundamentals (4 Credits)**

Business Analytics is a broad term that describes the process of using data to make business decisions. Data driven business decisions are both critical in modern business and hard to produce with reliable outcomes. This course introduces students to decision-making using probability and other statistical techniques to support and validate the chosen decision. Students will practice hands on business analytics skills for making data driven business decisions.

**INFO 4590 Optimization (4 Credits)**

This course introduces students to the basic optimization modeling techniques and tools as practiced by business analysts to help their enterprises make better-informed decisions. Applications will include mix, selection, assignment, distribution, transportation, financial management, planning, scheduling, and management implementations in a variety of business settings. The course will focus on problem definitions, problem configuration, spreadsheet solutions, LP Software (LINGO) solutions, and interpreting and implementing results.

**INFO 4610 Business Statistics and Analytics (4 Credits)**

Making high quality business decisions is hard. Using data to make business decisions makes the process better. This course introduces students to a variety of techniques in analytics and statistics that facilitate data driven business decisions. Time will be spent identifying appropriate techniques to apply in various scenarios, applying in detail some of the quantitative techniques, and using analytic outputs to inform business decisions. Both technical skills and clear communication of results and decisions will be covered. Choosing proper techniques, technical work using Microsoft Excel, proper interpretation of results, and decision making are skills practiced in this course.

**INFO 4700 Topics in Business Analytics (0-10 Credits)**

Exploration of current trends and topics in business analytics. Prerequisite: INFO 4100.

**INFO 4830 Executive Education – Data Analytics for Decision Making (2 Credits)**

In this Executive Education workshop, students will explore how companies organize around data and analytics and how leaders use data to make decisions. Every organization has data, but not every organization knows how to leverage it. This course focuses on the process of analyzing data so that you can discover what problems data can solve and what successes data can make possible. The course will also provide a focus on analytic modeling, using regression analysis and optimization to develop familiarity and skills in the analytic process, and will culminate with an opportunity to explore the challenges that participants' organizations are facing around their data-driven decision processes. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4855 Executive Education – Data Visualization Using Power BI (2 Credits)**

A picture is worth a thousand words—or a thousand spreadsheets. In today's complex business world, where the amount of data is overwhelming, being able to create and communicate through compelling data visualizations is a must-have skill for all business professionals. For too long data has been trapped behind scripts, wizards and code. That can change! This Executive Education workshop is a deep dive into the world of data and data visualization. You will learn how to create, analyze and evaluate large data sets that will enable you to turn mountains of raw data into meaningful stories that inform decisions and drive change. This is a software-heavy class where you will have the opportunity to practice technical skills in Microsoft Power BI, a free software application that lets users visualize data. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](http://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4875 Executive Education – Strategic Advantage Using Data Analytics (2 Credits)**

In today's business world, labor, capital, raw materials, and data are all essential to an organization's strategy. Many leaders have well-developed strategies for the first three, but they lack the understanding and direction to tackle the fourth: data. This Executive Education workshop focuses on how to build and implement a data strategy to improve organizational performance. Data and analytics programs offer great potential value, and to be effective they must align strategically across the business to deliver a positive return on investment. By understanding and integrating the five main components of a data strategy – Program, People, Process, Platform and Data – you will be able to grow your business and accelerate progress toward your organization's goals. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](http://daniels.du.edu/executive-education) for class dates and formats.

**INFO 4991 Independent Study (1-10 Credits)**

## Digital Leadership

The Daniels College of Business Master's in Digital Leadership is a 45-credit hour program for working professionals who understand that developing a digital mindset and gaining fluency in emerging technologies will prepare them to lead their businesses in the era of digital disruption. Students will gain critical leadership skills such as how to manage change, lead digital teams, and create new business models that will be needed by businesses to stay competitive in today's dynamic business environment. You will also learn to leverage 4<sup>th</sup> industrial technologies like artificial intelligence, blockchain, and cloud technology to digitally transform your organization and position it for future success. Graduates will be future-focused leaders who are technology ready to drive the digital transformation of their businesses and industries. This is a STEM-designated degree and is a 12–36-month, full or part-time program.

**Class Structure/Schedules**

Most of the courses are one to two-credit "sprint" courses that run for a total of five weeks each within the quarter system. The four, four-credit courses, run the entire ten-week quarter. Courses contain both online (asynchronous) and live online instruction (synchronous).

*Live 90-Minute Online Classes*

- Hosted via Zoom at 6:30 p.m. or 8:30 p.m. one night a week
- Lively peer-to-peer discussions
- Class recordings you can review later

**Electives**

A total of five electives are offered for the Master's in Digital Leadership Program.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

## Master of Science in Digital Leadership

**Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

**Standardized Test Scores**

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.

- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

### Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

## Certificate or Specialized Certificate in Digital Transformation

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

### Other Requirements

Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

The Master of Science in Digital Leadership develops leaders who want to drive digital transformation in their organizations, using data and fourth industrial revolution technologies to create new value(s) in business. Program goals include: (1) equipping innovators with foundational knowledge to lead digitally driven transformation that creates new business value; (2) integrating theory and practice; (3) building bridges between the University of Denver and transformational organizations and practitioners; and (4) implementing an incremental and accessible degree program to help working professionals take their careers to the next level.

## Master of Science in Digital Leadership

Minimum number of credits required for degree: 45

### BUS 4105 Masters in Digital Leadership Capstone Course (4 Credits)

What makes a good Digital Leader. It's the ability to lead organizations using emerging technologies and possessing a data-driven mindset in efforts to digitally transform organizations and industries. This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem that affect them and their organizations. Students take a business problem from problem definition to digital transformation. This isn't a course where students write about a problem, but rather work with mentor to create value for themselves and their organization. Prerequisites: All other Digital Leadership courses.

### BUS 4132 Mobile Technology (1 Credit)

You've probably heard about the 5th Generation of mobile technology (5G), but have you heard about the 6th (6G)? Consumers are increasingly becoming more mobile and are demanding more data be delivered to them more quickly. It seems now that the value of mobile technology is centered around increasing demand. This puts an enormous strain on organizations as they begin to digitally transform their organizations. Conversely, for the informed digital leader, this pattern of rapid mobile technology is an opportunity to provide newer and better value for their stakeholders. This class will explore these challenges and opportunities and will provide learners with an insight into the emerging ethical challenges that are related to the use of mobile technology.

### BUS 4133 Analytics (4 Credits)

Businesses make decisions and improve processes using their own and external data with a variety of data-driven and analytic techniques. This course introduces students to the business data landscape, data management in commercial organizations, and the data-driven decision-making process. Students explore the fundamental concepts behind how data and analytics can improve business performance, using their individual roles and companies as subject matter. Principal Content Elements: 1. Data-driven decision-making and performance improvement. 2. Data management in organizations. 3. Organizational transformation based on data-driven insights.

### BUS 4134 Customer Experience (2 Credits)

As the rate of technology increases and more products and services transition to the virtual realm, organizations need to ensure that both their internal and external customers are included. This course helps digital leaders understand, use, and apply the customer experience construct. It will help them create an experience for customers that goes beyond customer service for external customers and actively involves internal customers in the co-creation of value that supports their business's digital transformation.

**BUS 4135 Agile Development (2 Credits)**

It is estimated that 70% of all projects fail. This course will help project owners and team members increase their chances of success by introducing and reinforcing the agile development process method. Students will learn what it means to lead these types of projects and how they might be used for the benefit of their organizations.

**BUS 4136 Robotic Process Automation (1 Credit)**

Robotic Process Automation (RPA) is an emerging technology that is changing the way businesses process data. RPA allows many business processes to be automated and remove the human from performing repetitive tasks. This course will teach the basics of the technology using one of the most popular RPA software programs.

**BUS 4137 Intrapreneurship and Leading Change (4 Credits)**

As businesses begin to transition from the physical to the digital realm, their ability to strategically manage this change is directly tied to their future success. The challenges facing leaders of these organizations include how to empower employees to be innovative how to gain stakeholder buy-in, and ultimately how to manage the process of change. This course will help leaders become better change agents within their organizations by helping them understand the sources of change, designing a plan for it, and ultimately, leading the change process. Change is constant in a business and the better-prepared organizations are to deal with it, the more likely they will be able to continuously create value for their company's stakeholders.

**BUS 4138 Artificial Intelligence (2 Credits)**

Hollywood has taught us that artificial intelligence (AI) involves robots that want to take over the world in some fashion. While this notion is both terrifying and fascinating to watch, it fails to portray how AI is being used successfully by businesses to create value for stakeholders. This course will help inform your perspective on how AI is helping businesses by giving you insight into how its currently being used by businesses. Included in this is developing your understanding of how organizations develop their AI capabilities, a look at various AI techniques including machine learning, and a discussion on the ethical challenges raised by using AI in business. The ability to understand and use AI in business could transform the way business is done by equipping organizations with the ability to reimagine what is possible and simultaneously deliver it.

**BUS 4139 Augmented/Virtual Reality (1 Credit)**

What is reality? Is it what we experience through our five senses and then process through our understanding, or is it putting on a virtual reality headset and interacting with others in another world? With the growing popularity and applications around augmented and virtual reality, the line between real and virtual reality is becoming blurred. This course operates from the blurred space and starts by helping students understand what extended reality is how its application can be used in business. Students will explore the emerging capabilities of organizations that are using virtual reality and will be empowered to make recommendations of their own as to how this technology may further transform other organizations. As this course operates in the space between realities, numerous ethical issues have arisen surrounding extended reality and students will be given insights into what they are and how to navigate them.

**BUS 4141 Cybersecurity (1 Credit)**

You are under attack! Cyberattacks are on the rise and they can be catastrophic to a business resulting in downtime, lost profits, and growing distrust from stakeholders. While there isn't a perfect solution to stopping cyberattacks, this course is designed to help leaders become better equipped to mitigate these threats by improving their understanding of the current state of cybersecurity, how it's being used by businesses, and what they can do to better protect themselves from cyberattacks. In addition to learning the application and outcomes of cybersecurity, learners will be exposed to the growing ethical debates surrounding cybersecurity in efforts to be better prepared to make security recommendations for their organizations.

**BUS 4142 Business Model Innovation (2 Credits)**

If companies don't innovate, they evaporate. This is especially true as an organization begins the digital transformation process. In this class, students will be taught how to evaluate an organization's business model to facilitate its transition to the digital realm. The idea is to transition a business model into something that creates value by way of leveraging emerging technologies, analytics, and digital leadership for all stakeholders.

**BUS 4143 Digital Ethics & Privacy (2 Credits)**

Do individuals have a right to digital privacy and what are the ethical ramifications that support our virtual existence? In this class, you will explore the idea of digital privacy and how businesses are balancing the need to make a profit while simultaneously safeguarding their stakeholder's data. In addition to digital privacy, students will develop the ability to evaluate emerging technologies through varying ethical lenses and begin to explore the future directions of digital ethics.

**BUS 4144 Blockchain (2 Credits)**

In this course, students will understand how blockchains operate as decentralized ledgers and how businesses can begin to leverage the opportunities these types of technologies afford to them. With an understanding of blockchain, the course will transition to cryptocurrency and discuss the emerging values proposition these new types of currencies provide to businesses. From digital currencies, the course will instruct students on the emerging concept of non-fungible tokens (think digital art) and will conclude with an investigation into the ethical challenges related to blockchain technology.

**BUS 4145 Cloud/Edge Computing (2 Credits)**

Is it more accurate to say the digital cloud is above us, or all around us? In this class, students will learn to distinguish between cloud and edge computing and will be able to articulate the value of each to their organization. Students will also become familiar with the major cloud providers (e.g., Google, AWS, and Azure). Equipped with knowledge students will be able to create a cloud transformation plan that highlights their organization's cloud journey and transformational process to the cloud.

**BUS 4146 Internet of Things (1 Credit)**

Can you see the value of a drone being connected via the internet to a warehouse, or your car connected to your refrigerator? The Internet of Things (or IoT) is the emerging technology of connection. It's the ability to connect virtually everything via the internet. In this course, students will be given the opportunity to explore the value this type of technology provides to their organization. It will also enable them to create strategic recommendations using IoT for their business and ways it can ethically be used to satisfy its stakeholder's needs and wants.

**BUS 4147 The Foundations of Digital Transformation (1 Credit)**

What does it mean for a business to digitally transform? Even as more businesses say they are "digitally transforming", it is still largely unclear what this process means, and perhaps more importantly, how it can be successfully achieved. This course is designed to provide students with clarity around these topics by first examining the foundations of digital transformation (emerging technology, leadership, and data) and analyzing their impact on the business. After developing this foundation, students will then work to diagnose a firm's ability to transform by evaluating its digital capabilities to produce stakeholder value. Once students have gained insights into the context and capabilities of digital transformation, they will explore the potential ethical challenges and issues raised by moving their organization to the digital realm.

**BUS 4310 Business Communication for Accounting Professionals (4 Credits)**

This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and teambuilding.

**BUS 4350 Overview of Outdoor Recreation Industry (1 Credit)**

This course is a survey of the outdoor recreation industry, providing an overview of the size, growth, sectors and economic impacts of the industry. This course will lay the foundation for the LORI Program, as the remaining courses will dive deeper into the topics. This course will also begin to examine external drivers for the industry, including the connection between policy and outcomes, the inherent tension between access and conservation, as well as economic trends driving the industry. Students will also set up an exploration of the industry's role and relationship with challenges such as climate change, globalization, and technology as well as the critical role of Environmental, Social and Governance (ESG) issues within the industry. We will also spend time discussing the role of diversity, equity and inclusion in the outdoor recreation industry and examine what our role can be to change.

**BUS 4353 Business Models in the Outdoor Industry (1 Credit)**

This course introduces students to the concept of a business model canvas, what goes into the revenue and cost streams, and the necessary factors that need to be controlled in order to sustain a business. Students will be introduced to emerging models in the retail and hospitality sectors, and will learn how to differentiate between business models in the product based vs. services based industries. They will also get an appreciation of capital structure needed to keep a business going, and the implications of capital intensity for business models.

**BUS 4355 Sustainability and Markets in the Outdoor Recreation Industry (1 Credit)**

This course provides an overview of sustainability issues through a business lens, and shares insights on corporate sustainability risks, strategies, and market-based drivers of change. This sprint will review sustainability business risks and opportunities, ESG reporting frameworks, and how integrating sustainability into strategy can create enterprise value. As part of the Outdoor Industry Leadership program, students will gain an overview of the theory, practice, and challenges of corporate sustainability, learn strategies and tools to lead organizational change. The course will deepen student understanding of sustainability trends, perceived ESG risks, approaches to carbon management, and how ESG reporting frameworks can improve sustainability management, collaboration, and communication. Corporations will increasingly focus on creating sustainable and inclusive growth that adapts to climate-related risks, competes effectively for limited resources, and addresses community and social challenges in a sustainable way.

**BUS 4360 Leading Self: Leadership in Outdoor Recreation Industry (1 Credit)**

The purpose of this course is to provide insight into why and how sustainable desired change occurs at the level of individual/social interaction. This course will provide students the critical skills to "lead the self" towards personal/professional goals in the outdoor industry. The premise of the course is that leading others first requires a keen sense of self leadership. Students will revisit assumptions about themselves as they develop intentional approaches to identify learning and career opportunities in their selected fields and lead themselves towards the accomplishment of professional objectives. As part of this process, students will learn necessary skills for leading others and working effectively in teams.

**BUS 4365 Leading Teams in the Outdoor Industry (1 Credit)**

"Leading teams" is a graduate course to prepare you for formal and informal leadership of a team. You will learn about the fundamental design principles of high-performing teams as well as common pitfalls that teams face. You will also learn about how to sustain team performance through effective information-sharing, decision-making, and conflict management. In addition, we will cover current topics, including virtual teams, team creativity and team-based innovation.

**BUS 4367 Leading Organizations in the Outdoor Industry (1 Credit)**

How do companies develop a sustained competitive advantage? In highly competitive industries like the Outdoor Industry, creating an "edge" is not a due to luck or single solutions. In this course, we will examine the components of developing a successful strategy. We will examine: 1. Do we have a strategy? 2. What business are we in? 3. What are we as a company good at? 4. How do we "win"?

**BUS 4370 Principles of Management in the Outdoor Industry (1 Credit)**

This course will help students understand the major functions of management (planning, organizing, leading, and controlling) and the significance of each function in relationship to the existence of the company. This course describes how companies use management to set and accomplish goals through individuals, groups, and other types of resources. It also analyzes communication and ethics in the organization. Major topics include decision making, change, employee development, organizational structures, management control, and leadership.

**BUS 4375 Taking a DEI centric approach to Talent Management in the Outdoor Industry (1 Credit)**

This course will guide students through the foundations of Talent Management with a DEI lens. Talent Management is top of mind for many Outdoor companies. In order to ensure there is the right talent at the right time in the place with the right skills, leaders prioritize talent management frameworks to unlock the potential of their teams. DEI is fundamental to strengthening the talent pool and ensuring business growth, relevance and longevity. Over the course of a few weeks, we will first establish an understanding of what Talent Management is and how to build programs that resonate with the businesses and the culture. During that time, we will also examine how DEI perspectives can become effective strategies in creating an environment where everyone can thrive.

**BUS 4380 Regulatory Environment in the Outdoor Industry (1 Credit)**

This course provides an overview of the regulatory environment surrounding liability in the outdoor recreation industry, with a particular focus on ski resorts. The course introduces students to state-level "ski safety acts," to the interplay between legislatures and courts, and to emerging developments in the law.

**BUS 4383 Public Policy Challenges in the Outdoor Industry (1 Credit)**

This course explores the myriad public policies that affect the outdoor industry, one of the nation's largest industry sectors. The class will evaluate federal, state and local legislative and regulatory actions that affect the ability of the economic considerations of the outdoor industry, and how the industry has engaged in the public policy process to ensure its ability to grow.

**BUS 4385 Environmental and Social Governance in Outdoor Industry (1 Credit)**

Industry today is responding to calls for more accountability to its numerous stakeholders. ESG is becoming an important measurement tool for assessing the performance of companies in addressing stakeholder concerns of Environmental, Social (internal and external), and Governance issues. This course will be an overview of the current practice of ESG reporting and ratings by numerous third-party organizations, the ways ESG factors are measured, the steps companies are taking to meet ESG standards, and the success of companies that have adopted ESG programs. Further, some companies have elected to become B-Corps to demonstrate their commitment to being a sustainable business and devoting part of their profits to social causes.

**BUS 4387 Supply Chains in the Outdoor Industry (1 Credit)**

In this course, students will learn about the supply chain system through the University of Denver's Six Pillars of Supply Chain model. It is essential for business leaders to first understand the supply chain system as a holistic end-to-end model that will be introduced at the beginning of the course. By understanding a comprehensive supply chain from product design to retail to post-use, the student can better understand a product lifecycle from a tactical to a strategic perspective. The student can gain a more in-depth understanding of important topics within the supply chain and how they are emerging in the 21st century. Students will leave this course with a starting point understanding of the role of the supply chain in the outdoor industry, its role in sustainability initiatives, economic policy, and business strategy. The course also pays special attention to globalization, which is not only a critical factor in supply chain management but will have far-ranging impacts on the future of the outdoor industry in the US.

**BUS 4389 Enterprise Risk in the Outdoor Industry (1 Credit)**

As in any business, risks unfortunately exist and must be identified, managed, and mitigated to the extent possible. Businesses in the Outdoor Industry are not immune to these risks – and have additional industry-specific risks that are unique to them. A sound risk management program is paramount to success in the Outdoor Industry. This course introduces students to the concepts of risk identification, risk management and risk mitigation measures. It will cover what goes into the enterprise risk management process, and the key legal and business factors that need to be identified, managed and controlled in order to sustain a business. Specific topics to be covered include liability waivers/releases, signage, preventative measures (avalanche mitigation and patrolling, e.g.), insurance, compliance, workers compensation and internal auditing. Students should leave this course with a greater appreciation for the outdoor industry and the many methods involved in the management of risk to ultimately help drive the success of a business.

**BUS 4390 Land Use in Outdoor Industry (1 Credit)**

By its nature, the outdoor recreation industry depends on reliable access to land and water. Using a selection of case studies, this course examines access to national forest lands, private landholdings, and bodies of water.

**BUS 4395 Service Excellence & Guest Experience in Outdoor Industry (1 Credit)**

In this course you will gain the exclusive Forbes Five Star Certification that will provide the tools to luxury service excellence and the delivery execution of outstanding guest experiences. This course will explore service experience in the context of the service delivery systems and will provide students with the tools to troubleshoot, produce continuous improvement, and create outstanding guest experiences.

**BUS 4397 Access in the Outdoor Industry (1 Credit)**

"Access in the Outdoor Industry" is a transformative course designed for leaders and aspiring change-makers within the dynamic realm of outdoor recreation. This course is meticulously crafted to equip industry professionals with the knowledge, skills, and strategic acumen necessary to dismantle barriers and champion inclusivity, ensuring equitable access for all individuals, irrespective of their backgrounds, abilities, or socio-economic status.

**BUS 4400 MBA@Denver Capstone (4 Credits)**

The MBA@Denver Capstone Course enables the practical application of key management and leadership competencies, skills and knowledge and is designed to integrate core course learning outcomes. You will integrate what you have learned in the MBA@Denver program to analyze a client problem and provide appropriate recommendations and conclusions prepared for and presented to the client. You are strongly encouraged to work with a small business or not-for-profit organization, completing a social capital project with that enterprise. You will gain an in-depth exposure, perspective and understanding of strategic business processes, opportunities and challenges within an organization. You will work in teams and will select an organization of your choice to work with as the client. The project will end with an oral presentation and written proposal that is delivered to the client organization and the instructor on an assigned date. Project assignments will emphasize the integration of knowledge from multiple academic disciplines and functional business activities. You are required to identify linkages between an organization's external and internal organization environments in the context of its organizational strengths, weaknesses, opportunities and threats (SWOT). Projects may include new product or technology development, restructuring, relocation, expansion, downsizing, acquisitions, mergers and acquisitions or joint ventures, and/or other relevant operational performance issues. The goal is to increase the organization's ability to sustain and thrive. The final plan/proposal should include an implementation timeline for the proposed solutions as appropriate. Enforced Prerequisites and Restrictions: MBA@Denver student must be within one quarter of graduation or have the Director's permission to take the class. This course is open only to MBA@Denver students (MBA-DEN).

**BUS 4435 Digital Transformation: Design and Execution (4 Credits)**

As a business, it is better to be the disruptor than to do be disrupted. Since 2020, this fact is easy to see as businesses have rapidly accelerated their plans to digitally transform. The success of these transitions has been largely underwhelming as organizations have failed to leverage the right technologies to create better processes that support customer's current and future needs. This course is designed to help students increase their ability to drive digital transformation by focusing on both the design and execution of digital transformation. After taking this course, students will be able to assess current digital transformation design practices that will strategically fit their business and create a plan to increase success in executing it.

**BUS 4444 Global Bus, Governance & CSR (4 Credits)**

In an increasingly globalized world, civil society, states and businesses are trying to discern how to govern business conduct across the borders of nation-states. Many of the issues our society faces today—global financial crises, environmental degradation, and corruption, to name a few—are impossible to tackle within a given country. Instead, these issues require collaboration and coordination across a variety of actors spread around the globe. Within this framework, businesses are aware of increased pressure to behave responsibly and adopt a corporate social responsibility (CSR) approach to their conduct. Yet, businesses are unsure how to integrate these goals into their business strategy and engage meaningfully with stakeholders. Likewise, governments recognize the importance of having business at the table, but do not have a clear understanding of how to best engage with the private sector. The response to this conundrum is a focus on global governance, which refers broadly to the way in which global affairs are managed. After a brief overview of economic trends and trajectories around the globe, the course will focus on global governance as a mechanism for change. The class will first explore the opportunities and shortcomings of global governance efforts. The class will build on this scholarship by discussing the role business plays in global governance mechanisms. As society has become aware of, and is acutely concerned with, business conduct, the role of the manager and business strategy in these realms has also changed. Students will analyze these trends and study their implications for government, business, or civil society strategy and practice. The final portion of the course will focus on specific issue areas, including: human rights, labor standards, the natural environment, corruption, and microfinance.

**BUS 4445 International Business: Strategy and Practice (4 Credits)**

This course focuses on applied issues in international business. Students will learn to think strategically about international business issues, and will in turn be able to apply that thinking to best practices. The following subject areas will be covered: country selection, entry mode theory, exporting, born-global businesses, organizational structures internationally, negotiation, consumption, culture and demand. Other potential topics include global supply chain management/sourcing, country of origin effects, etc. This course focuses on applied issues in international business. Students will learn to think strategically about international business issues, and will in turn be able to apply that thinking to best practices. The following subject areas will be covered: country selection, entry mode theory, exporting, born-global businesses, organizational structures internationally, negotiation, consumption, culture and demand. Other potential topics include global supply chain management/sourcing, country of origin effects, etc.

**BUS 4450 Developing an Entrepreneurial Mindset (4 Credits)**

Have you ever heard the quote, "Find a job you enjoy doing, and you will never have to work a day in your life?" This course is designed to help you align your purpose in life with your organization's purpose (your own organization or an organization for which you work). There are multiple parts to bringing this alignment about, which will comprise the foundation for this course: (1) (re)evaluating your purpose in life, building on what you have learned about your leadership style, ethical orientation, values and beliefs, and so forth from your earlier courses; (2) developing an entrepreneurial mindset, useful for starting your own organization or a new venture within the organization in which you already work; (3) exploring the Triple Bottom Line perspective of business in society; and (4) applying the core concepts of systems thinking to identify potential business ideas that align with your purpose. The course will culminate with the creation of a business idea and business model canvas that aligns your purpose in life with a compelling business purpose. The business idea may involve creating your own business/organization or proposing the idea within your current organization.

**BUS 4530 Data Visualization in the Outdoor Recreation Industry (1 Credit)**

Data visualization can bring data to life, making the user the master storyteller of the insights hidden within the numbers. Through live data dashboards, interactive reports, charts, graphs, and other visual representations, data visualization helps users develop powerful business insight quickly and effectively. This course introduces students to the disciplines related to data visualization as it relates to the Outdoor Industry.

**BUS 4535 Data Analytics in the Outdoor Recreation Industry (1 Credit)**

Data can help businesses better understand their customers, improve their advertising campaigns, personalize their content, and improve their bottom lines. The advantages of data are many, but you can't access these benefits without understanding the value of data analytics. Data's value as a strategic asset is often lost as companies are unsure how to analyze the data, use insights for decision making and measure the impact of data-driven outcomes. This course is not a "stats" class. Rather it introduces students to the foundations of data analytics, the scientific process of transforming data into insights for making better decisions as it relates to the Outdoor Industry.

**BUS 4540 Data Management in the Outdoor Recreation Industry (1 Credit)**

Data management has been a critical and common practice employed across industries for many years. At its core, data management encompasses all disciplines related to managing data as a strategic and valuable resource, including collecting, processing, governing, sharing, and analyzing data — and doing it all in a cost-efficient, effective, and reliable manner. Given the changing work environment, with more remote workers and new channels, we are seeing greater importance placed on data management. This course introduces students to the disciplines related to managing data as a strategic and valuable resource as it relates to the Outdoor Industry.

**BUS 4575 Accounting I in Outdoor Industry (1 Credit)**

Accounting is a core skill that helps ensure success in all business environments, including the outdoor industry. During this course, students will be introduced to accounting and its relevance to the business world. Students will learn how to analyze transactions, determine how they would appear on financial statements, and understand related management disclosures.

**BUS 4580 Accounting II in Outdoor Industry (1 Credit)**

During this course, students will learn how to analyze financial statements for competitive analysis and predict a business' cash flow. The focus of this course will be on key performance indicators and sources/uses of cash.

**BUS 4600 Professional MBA Capstone Project (4 Credits)**

The Capstone Project enables the practical application of key management and leadership competencies, skills and knowledge designed to integrate core course learning outcomes. You will integrate what you have learned in the PMBA program to analyze a client problem and provide appropriate recommendations and conclusions prepared for and presented to the client. The course integrates Daniels' multi-disciplined learning outcomes and experiences to achieve this goal. The course is a combination of site-based practicum, field project and classroom experiential learning. Through these activities, you will gain an in-depth exposure, perspective and understanding of strategic business processes, opportunities and challenges within a non-profit organization. You will work in teams (4-5 individuals) and will select a non-profit organization of your choice to work with as your client. The project will end with an oral presentation and written proposal delivered to the client and to the instructor on an assigned date. Project assignments will emphasize the integration of knowledge from multiple academic disciplines and functional business activities. Students are required to identify linkages between an organization's external and internal organization environments in the context of its organizational strengths, weaknesses, opportunities and threats (SWOT). Projects may include new product or technology development, restructuring, relocation, expansion, downsizing, acquisitions, mergers and acquisitions or joint ventures, and/or other relevant operational performance issues. The goal is to increase the organization's ability to sustain and thrive. The final plan/proposal should include an implementation timeline for the proposed solutions as appropriate.

**BUS 4610 Business Ethics for the Public Good (2 Credits)**

A fundamental purpose is to engage students in ongoing reflection and dialogue about their responsibilities as managers and leaders. Of particular emphasis are the ethical, professional, social and legal responsibilities of managers and leaders, especially as it relates to numerous stakeholders and communities. This course focuses on the idea of "community" and the ethical and social relationships of business leaders and business organizations in their communities. A particular focus will be the role of the business manager and executive as a professional with unique and special responsibilities. These roles will be examined by analyzing a variety of issues and situations that students will likely face during their careers. The goal is to provide students with perspectives, intellectual frameworks, and skills that will be useful in their business careers. The Daniels PMBA "core" not only strengthens foundational business and management skills, but also provides a broader orientation, purpose and direction for exercising and executing foundational skills to achieve enterprise and personal success. Personal and organizational success is a function of technical "know-how," leadership intelligence, and competence in execution. The assumption of this course is that all of these competencies must be grounded in a solid ethical and social commitment to community values and principles. This course will explore these values and principles in various business contexts, using the shared personal experiences of business professionals who will present their own stories for us to examine.

**BUS 4611 Leading Self & People (2 Credits)**

The purpose of this course is to provide insight into why and how sustainable desired change occurs at the level of individual/social interaction. This course will orient the student towards gaining the most out of their education by focusing on learning as the cornerstone of development. It will provide students the critical skills to “lead the self” towards personal/professional goals as the context for studying intentional change. The premise of the course is that leading others first requires a keen sense of self leadership. Students will revisit assumptions about themselves as they develop intentional approaches to identify learning and career opportunities in their selected fields and lead themselves towards the accomplishment of professional objectives. As part of this process, students will learn necessary skills for leading others and working effectively in teams. Lecture / Off-site will include a required intensive three-day exercise in self-awareness, outdoor leadership, team-building, problem solving, and critical thinking. This outdoor experiential includes an intellectually rigorous component, which is designed to enhance the classwork in which you engage, and is intended to enhance the experience students have in their life outside of the academic environment. The outdoor experiential will be leverage in the on-campus course which provides insight into why and how sustainable desired change occurs at the level of individual human/social interaction. This course will focus on providing students the critical skills to “lead the self” towards personal/professional goals as the context for studying intentional change. The premise of the course is that leading others first requires a keen sense of self leadership. Students will revisit assumptions about themselves as they develop intentional approaches to identify learning and career opportunities in their selected fields and lead themselves towards the accomplishment of professional objectives. Online/Distance and Combined/Hybrid Methodologies will include an optional outdoor immersion that involves an intensive three-day exercise in self-awareness, outdoor leadership, team-building, problem solving, and critical thinking as outlined above.

**BUS 4612 Business Domestic Immersion (0 Credits)**

MBA@Denver students are required to take two immersion experiences. BUS 4620-X includes domestic experiences, held in a U.S. city, generally including visits with business leaders on various topics, experiential experiences, and/or specific topic discussions led by qualified faculty. Students may not take the immersion course at the same destination more than once.

**BUS 4614 Business International Immersion (0 Credits)**

MBA@Denver online students are required to take two immersion experiences. BUS 4614-X includes international experiences, held in a non-U.S. city, generally including visits with business leaders on various topics, experiential experiences, and/or specific topic discussions led by qualified faculty. Students may not take the same section number (X) more than once, though they may take the course more than once.

**BUS 4620 Ethics for the 21st Century Professional (4 Credits)**

A fundamental purpose is to engage students in ongoing reflection and dialogue about their responsibilities as managers and leaders. Of particular emphasis are the ethical, professional and social responsibilities of managers and leaders, especially as it relates to numerous stakeholders and communities. This course focuses on the idea of “community” and the social relationships of managers and business organizations in their communities. Roles and responsibilities of managers and business firms are examined by analyzing a variety of issues that managers will face during their careers. These specific issues will be examined in terms of their legal, public policy, and ethical dimensions. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that may emerge in their business careers. Cross-listed with ACTG 4620.

**BUS 4675 Talent Management (2 Credits)**

In 2020, the concept of talent management changed dramatically. Since that time, employees have begun transitioning away from the office, the great resignation has occurred, and managers are now dealing with the emerging phenomenon of quiet quitting. This course will prepare students for this new era of talent management that focuses on the employee and works to empower them in the emerging digital age. Students will learn how to reinforce the company’s culture by working with employees to create change, invest in culture, and work in becoming future leaders of the organization.

**BUS 4690 Leading Digital Teams (2 Credits)**

Nearly 90% of businesses have reported that they are pursuing some sort of digital transformation project that will partially or fully change their business. With this much emphasis being placed on organizational change, leaders of organization will need to be acutely aware of how to manage the process and especially the employees who are at its core. In this course students will understand what effective leadership is and what it means for the strategy of the firm. They will examine the importance of leading digital teams through a top-down and bottom-up approach that applies a global and culturally sensitive paradigm to each. Students will leave with the skills able to lead a diverse digital team as they work to transform and create new value for their organizations.

**BUS 4700 Special Topics in Business (0-8 Credits)****BUS 4701 Special Topics in Business (1-6 Credits)****BUS 4704 Topics in Business (1-6 Credits)****BUS 4705 Topics in Business (1-6 Credits)****BUS 4810 The Head and Heart of Leadership: Neuroscience and Emotion Regulation (4 Credits)**

Neuroscience may be the next great frontier of leadership learning. Admired and respected leaders understand both the “heart” of leadership, the harnessing and leveraging of emotions to inspire others, as well as the “head” of leadership, how the workings of our brains impact our ability to lead. This course incorporates content from the latest research in the fast-moving fields of neuroscience, emotional intelligence and mindfulness. Students will develop highly-relevant leadership skills, strategies and tactics that will make an immediate impact on your ability to successfully lead others.

**BUS 4820 Leading and Developing Others for Success (4 Credits)**

Successful leadership does not occur without successful followers. This exciting course explores the elements of how great leaders enable the success of others. We begin by exploring several well-known theories of leadership, including servant, authentic, and values-based leadership, as a means for students to formulate their own personalized framework of what great leadership looks like to you. We will learn how to hire, understand, inspire, coach, mentor and sponsor a diverse and inclusive team. We will also explore storytelling, one of the hottest topics in leadership. Students will create a personal development plan that ensures the ability to incorporate the elements of this course into successful leadership.

**BUS 4830 Leading Change and Building an Agile Culture (4 Credits)**

The capacity to lead highly change-capable, agile organizations is critical in today's VUCA world – volatile, uncertain, complex and ambiguous. Foundational to leadership success at every level within an organization is the capacity to build a change-ready, agile culture and successfully execute sustainable change. By exploring and evaluating the latest thinking on leadership and change, this course arms leaders with the strategies and tactics necessary to: 1) create teams and organizations with high levels of change-capability and agility; 2) motivate followers and overcome resistance to change; and 3) successfully achieve both incremental and transformative change.

**BUS 4840 The CEO Toolbox (4 Credits)**

Strategy is integral to a successful organization. But without strong execution, even a well-defined strategy can fall apart. Executive teams/leaders that combine actionable strategy with operational depth are the ones most likely to stay the course and deliver long-standing results. They understand the need to align strategy and operations to deliver on their objectives. After taking courses on Strategic Management, Leadership, Leading Change, Culture, etc., you too understand the need for aligning strategy and operations, yet, in practice it's often more difficult to do. Through this course, students will hone their skills by developing and using practical tools to deal with shifts and changes along their strategic journeys. This course will allow you to put theory into action.

**BUS 4980 Internship (0-10 Credits)**

Faculty supervised Internship.

**BUS 4991 Independent Study (1-10 Credits)****BUS 4995 Independent Research (6 Credits)****BUS 6000 Research Methods in Business (4 Credits)**

Business Research Methods introduces students to the nature, scope, and significance of research and research methodologies. Additionally, the course studies primary and secondary research methods with applications to specific problems, using qualitative and quantitative designs for individual investigation on current problems within a student's area of interest. Topics covered include research design, sampling strategy, data types and collections, measurement approach, testing procedures, ethics in data collection and interpreting findings, and the Institutional Review Board (IRB) process.

**BUS 6001 Qualitative Research Methods (4 Credits)**

Qualitative methods are important for exploring complex social phenomena and developing theories for understanding dynamic relationships and change. This course is designed to help students develop an understanding of the methods and process for conducting qualitative research in general, and case study research in particular. Students will learn to use qualitative methods to develop theories and managerial solutions for current and future business problems.

**BUS 6002 Quantitative Methods I- Making Discoveries with Data (4 Credits)**

As a PhD student you will do original research ... making discoveries that nobody else has made before. Data analysis is a key tool that facilitates that. Data analysis tools help you unlock the hidden treasures within your data set. These treasures are knowledge and information that is waiting to be discovered and utilized for your benefit. Specifically, you will become familiar with several of the internationally utilized statistical software packages and with the array of statistical analysis techniques. You will understand which statistical analysis technique to use in which situation, and how to interpret the output from your statistical software packages. These skills support managers for better decision making. Managers in business and industry have the resources to accumulate data, and this course develops the techniques to discover the information that your data provides. You will also gain skills in understanding how data collection and analysis will benefit your research.

**BUS 6003 Quantitative Methods II - Making Discoveries with Data (4 Credits)**

As a PhD student you will do original research ... making discoveries that nobody else has made before. Data analysis is a key tool that facilitates that. Data analysis tools help you unlock the hidden treasures within your data set. These treasures are knowledge and information that is waiting to be discovered and utilized for your benefit. These skills support managers for better decision making. Managers in business and industry have the resources to accumulate data, and this course develops the techniques to discover the information that your data provides. In this course you will learn how these data analysis tools are used for research, and you will plan how you will use your data analysis skills to perform your own research for your doctoral degree.

**BUS 6004 Data Analytics (4 Credits)**

The main objective of this course is to provide students with a well-grounded understanding and appreciation of the contemporary methods, tools and techniques used to make evidence-based managerial decisions. As managers and practitioners in business, industry and government, you have made substantial investments in putting in place the means to collect and store data, but may not have the basic technical or analytical understanding necessary to chart a road map to discover the full potential of your data. This course intends to provide you with such an understanding and hence help you become a better manager/decision maker.

**BUS 6005 Behavioral Research Design and Execution (4 Credits)**

The first purpose of this course is to prepare doctoral students with the ability to design, implement, and test the results from an experiment or survey. This includes operationalizing independent and dependent variables, rooted in definitions of terms and theory, in a manner that allows for quality statistical testing. Students will also learn manipulation of independent variables, including manipulation checks, and the basics of survey design. Lastly, analysis of existing data sets will round out the learning. This course builds on the previous research and statistics coursework in the program with a focus on practice and application. Multiple actual studies will be replicated as part of the course with the final project being a replication of a study of the student's choosing.

**BUS 6300 Seminar in Cross Disciplinary Decision Making Research (4 Credits)**

Leaders are often faced with difficult decisions and the result of these decisions determines their future success. It is important for leaders to understand the cognitive processes which underlie the decision-making process. For example, what factors cause a leader to choose the wrong investment, hire the wrong employee, or select the unethical alternative? This course will provide students with a foundation of seminal theories rooted in Economics, Psychology and Sociology and a comprehensive perspective of organizational decision-making.

**BUS 6301 Research Seminar in Innovation and Creativity (4 Credits)**

This course is intended to be a multi-disciplinary doctoral seminar investigating the broad questions of innovation and creativity and its application to entrepreneurship. The course will start with an industry-level view of innovation and how technologies evolve and then move from the micro-individual level of creativity to the organizational level while considering the individual, dyadic and group levels.

**BUS 6302 Seminar in Verbal and Non-Verbal Research (4 Credits)**

This course is designed to provide you with knowledge on how to leverage verbal and nonverbal behavior to identify psychological states and traits, to predict social evaluations and organizational outcomes. Together we will review theory, methods, and findings pertaining to verbal and nonverbal behavior in the psychological literature. We will learn how to develop research questions and hypotheses, design research to test those predictions, develop behavioral coding schemes, and identify appropriate statistical analyses. We will also discuss the strengths and weaknesses of extant research to determine what can and cannot be concluded from the results. Overall, this course will provide you will techniques to quantify human behavior, identify ways to leverage these techniques to answer novel questions of organizational importance, and to appreciate the limits of behavioral analysis.

**BUS 6303 Launch your Doctoral Journey: Be Impactful (4 Credits)**

The seminar aims at providing Executive PhD students in Business a capstone experience, to build on the research knowledge and experience they have gained over the first two years of coursework, and to formulate and sharpen their vision for their chosen careers in academia, business or consulting. Specifically, the course attempts to provide an integrative framework to help them to emerge as an impactful scholar. Students systematically walk through different research designs, theoretical, qualitative, and quantitative frameworks. They learn to critically evaluate the designs, and apply the learning to their own research. The seminar culminates with a presentation of their vision statement for their scholarly journey ahead. Prerequisite: MGMT 6301.

**BUS 6400 Academic Skills for Doctoral Students in Business (2 Credits)**

The first purpose of this course is to prepare doctoral students with skills and knowledge that are not commonly part of the course requirements but are imperative for a successful navigation of the job market and a successful publication career. This includes managing the peer review process, navigating a conference to extract the most value, and managing co-author relationships. The second purpose of the course is to provide students with just-in-time data-analysis skills based on their identified path of research interest. Archival research in business requires a significantly different skill-set than behavioral research. Students will complete one of two tracks, archival or behavioral, in the form of an intensive two-day workshop where they utilize actual data to replicate a published research study.

**BUS 6500 Applied Research Practicum Series: I (4 Credits)**

ARP I will introduce students to their ARP Instructor's research area. As such students will work closely with their ARP instructor to begin to understand his/her research area and focus. This serves as the introduction for the three-part sequence of ARPs resulting in a completed research project. By the end of ARP I, students will complete a systematic review paper of a research area and a set of research questions of interest.

**BUS 6501 Applied Research Practicum Series: II (4 Credits)**

Students will work closely with their instructor to create a theoretically supported and actionable research proposal that uniquely contributes to our understanding of the larger business field. Proposals can be focused on qualitative and quantitative (or mixed) methods. This part of the ARP series will help students develop research questions into carefully crafted predictions grounded in theory while considering execution of the study.

**BUS 6502 Applied Research Practicum Series: III (4 Credits)**

Students will design an appropriate scientific method (e.g., survey, experiment or interview) including a data collection and analysis plan per the final proposal submitted in ARP II. Once appropriately designed, under the direction of their ARP professor, students will collect data appropriate to test the study's hypotheses. Institutional Review Board (IRB) approval must be received prior to data collection which should be of publishable quality (broadly defined).

**BUS 6503 Applied Research Practicum IV (4 Credits)**

Students, along with oversight and assistance from their respective ARP professor, will analyze data consistent with his/her research proposal (ARP II) and analysis strategy (ARP III). The students will then complete an entire research paper that is ready for presentation and/or publication at appropriate outlets.

**BUS 6900 Dissertation Research in Business (2-28 Credits)**

Dissertation Proposal Defense Following successful completion of the comprehensive exam, each student will prepare a dissertation proposal and defend the proposal to the dissertation committee. A successful dissertation defense qualifies the student to Ph.D. candidacy. The dissertation proposal should be prepared in close consultation with the student's advisor and should be available to all committee members at least two weeks prior to the exam. It should reflect an extensive critical literature survey, and contain an accurate assessment of the state-of-the-art in the area of research, a precise statement of the research question, motivation for pursuing the research, and the research method design that will be used to answer the research question. The dissertation proposal must be successfully defended within four quarters of passing the comprehensive exam. Successful defense of the dissertation results in agreement between the student and the committee as to what will constitute successful completion of the dissertation research. The composition of the dissertation proposal committee must comply with the standards specified by the University of Denver Doctoral Degree Requirements and Standards. The dissertation proposal defense is an oral closed exam. If a student successfully defends the dissertation proposal but subsequently switches advisor and hence topic, the dissertation defense must be repeated within one year to ensure capability of the student and feasibility of the project. Dissertation Defense After the dissertation has been completed, the student must defend it in a final oral exam, as specified by the University of Denver Doctoral Degree Requirements and Standards.

## Executive PhD in Business Administration

The Daniels College of Business Executive PhD is a 90-credit hour comprehensive three-year blended program that immerses students in conducting applied business research. Students will gain rigorous research skills to address the complex programs facing business today. The program will integrate your career experience with a thorough education in quantitative analysis, qualitative analysis and mixed methods, teaching you to find powerful, data-driven business insights.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Cohort**

The Daniels Executive PhD is a cohort-based program with lock-step curriculum which enables students to maximize cross-learning, collaboration and networking.

**Class Schedules**

This is a hybrid program delivered online and in-person. During the first two years of the program, students will attend nine on-campus immersions which are held from 8am – 5pm Friday and Saturday. In the third year of the program, students are required to come to campus at least one time to meet with their dissertation chair and committee.

**Concentrations/Electives**

There are no concentrations or electives offered for the Executive PhD Program. The dissertation stage of the program will enable students to conduct research in their area of interest.

## Doctor of Philosophy in General Business

**Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Master's degree: This program requires a master's degree as well as the baccalaureate.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

**Other Requirements**

- Applicants may be contacted by a Daniels representative to schedule an admissions interview, which will be conducted on campus or via webcam. The admissions interview is an opportunity for both you and Daniels staff to evaluate whether or not the program is a good fit. Interviews are by invitation only, sent after all other application requirements have been completed.

**English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 94 (No less than a 20 on any section)
- Minimum IELTS Score: 7.0 (No less than a 6.0 on any section)
- Minimum C1 Advanced Score: 185 (No less than a 170 on any section)
- Minimum Duolingo English Test Score: 125

English Conditional Admission: No, this program does not offer English Conditional Admission.

<b>Total Credits</b>		<b>94</b>

### Non-Coursework Requirements

#### Comprehensive Exam

Every PhD student must pass the comprehensive exam. To qualify for the comprehensive exam, the student must complete the required coursework consisting of research methodology/statistics, research seminars and the Applied Research Practicum (ARP) series with a minimum GPA of a 3.0. A grade lower than "C" renders the credit unacceptable for meeting eligibility to sit for the comprehensive exam and university degree requirements. Coursework taken at another university may not be applied to the coursework requirement.

The program chair will appoint a committee of scholarly qualified faculty to write the comprehensive exam. This exam will cover topics in the research methodology/statistics and research seminar courses. The exam will be take-home, and students will be given several days to complete it. The committee will grade the exam, and make a recommendation to the program chair on whether a student passes or fails. A failed exam may lead to dismissal from the program.

Sufficiently prior to the exam date, the program chair will appoint an examination committee of scholarly qualified faculty. The committee creates the exam and grades it. After the exam, the committee makes a recommendation on whether the student passes or fails. If requested, students may need to revise their answers.

#### Dissertation Proposal Defense

Following successful completion of the comprehensive exam, each student will prepare a dissertation proposal and defend the proposal to the dissertation committee. A successful dissertation defense qualifies the student to Ph.D. candidacy. The dissertation proposal should be prepared in close consultation with the student's advisor and should be available to all committee members at least two weeks prior to the exam. It should reflect an extensive critical literature survey, and contain an accurate assessment of the state-of-the-art in the area of research, a precise statement of the research question, motivation for pursuing the research, and the research method design that will be used to answer the research question.

Successful defense of the dissertation proposal results in agreement between the student and the committee as to what will constitute successful completion of the dissertation research.

The composition of the dissertation proposal committee must comply with the standards specified by the University of Denver Doctoral Degree Requirements and Standards. The dissertation proposal defense is an oral closed exam. If a student successfully defends the dissertation proposal but subsequently switches advisor and hence topic, the dissertation defense must be repeated within one year to ensure capability of the student and feasibility of the project.

**Dissertation Defense**

After the dissertation has been completed, the student must defend it in a final oral exam, as specified by the University of Denver Doctoral Degree Requirements and Standards.

**University of Denver Doctoral Degree Requirements and Standards**

<http://bulletin.du.edu/graduate/academic-requirements-policies-and-procedures/doctoral-degree-requirements/>

**Master of Science in Applied Business Research**

This degree can be awarded to students who leave the PhD program before completing the dissertation. The student must have minimum 3.0 GPA with no more than 25% of coursework with a grade of C.

**Degree Requirements****Coursework Requirements**

A minimum of 52 credits as follows:

- 20 credits of Methods and Statistics
- 16 credits in Research Seminars
- 16 credits (the full sequence) of the Applied Research Practicum Series

**Finance**

Office: Daniels College of Business, Room 555

Mail Code: Daniels College of Business, Room 555, 2101 S. University Blvd., Denver, CO 80208

Phone Number: 303-871-3322

Web Site: <https://daniels.du.edu/finance/>

**Master of Science in Applied Quantitative Finance**

In the Master's in Applied Quantitative Finance program, you'll study leading-edge theories, models and applications across the major areas of finance. Take advantage of our quarter system to tailor your coursework as well as your internships. Develop your finance leadership and communication skills by participating in a variety of case studies and competitions, as well as hands-on money management. When you graduate, you'll be both a creator of finance knowledge and a disseminator who can grow to lead a finance enterprise.

The Master of Science in Applied Quantitative Finance is a STEM (Science, Technology, Engineering and Math) degree according to the Department of Homeland Security (DHS). The DHS expanded list includes designated degrees that qualify for up to 17 months Optional Practical Training (OPT) Extension for F-1 Nonimmigrant Students.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

**Master of Science in Applied Quantitative Finance****Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

**Standardized Test Scores**

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.

If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842. The code to submit GMAT scores for this program is MZR-GT-04.

### Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

#### FIN 4000 Financial Modeling and Databases Bootcamp (1 Credit)

This bootcamp is designed to introduce students to financial databases and to familiarize them with basic financial data analysis using Excel. The goal is for students to become comfortable with platforms such as Capital IQ and WRDS, which they will be using throughout their academic and/or professional careers. In addition, students will acquire a basic command of Excel functionality and efficiency in data analysis, together with modeling best practices and practical finance applications.

#### FIN 4030 Personal Finance (4 Credits)

This course provides an overview of topics which are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life and especially as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children.

#### FIN 4060 Life Cycle/Financial Planning (4 Credits)

This course is designed for students who are interested in Financial Planning, possibly as a profession. We will cover six of the areas of financial planning: cash flows, protection (insurance), investments, goals (education and retirement), income taxation, and estate planning. This course is part of University of Denver CFP® Certification Financial Planning Education Program.

**FIN 4090 Wealth Management (4 Credits)**

Wealth Management offers students important skills to become a part of the growing wealth management industry. It includes such topics as the Financial Planning Process, Insurance Basics, Investment Basics and Strategies, Retirement Planning, and Estate Planning. We are pleased to work with the College for Financial Planning (CFFP), located in Denver, to provide instruction from their The Foundations in Financial PlanningSM program. This can lead to the Financial Paraplanner Qualified Professional™ or FPQP™ designation upon successful completion of an Examination. The Examination is administered through the CFFP. The FPQP™ will be a valuable addition to your resume.

**FIN 4110 Ethics in Finance (4 Credits)**

The objective of this course is to discuss the ethical issues facing financial institutions and professionals and apply ethical principles to the analysis of these issues.

**FIN 4150 Advanced Business Valuation (4 Credits)**

In this course, students will learn theoretical development, analytical tools and practical approaches to analyze and tackle business valuation issues at the core of the financial professions. The theoretical section of the course provides indepth coverage of the financial theories and models essential to value businesses. The application section provides students with opportunities to apply the valuation principles and techniques to assess business value and develop strategies to create value in a real-world context.

**FIN 4160 Treasury Management (4 Credits)**

The objective of the course is to provide students with a comprehensive understanding of how various treasury functions are managed in a corporation and build students' capabilities to assume the role of a proficient treasury manager. This course will cover techniques used by major corporations to manage cash, the capital structure, financial risk and working capital. Prerequisite: FIN 4630.

**FIN 4180 Global Finance (2 Credits)**

This course explores financial management in the international arena. Principal content elements include: The market for foreign exchange, interest rate parity, hedging currency risk, international portfolio management. Prerequisites: FIN 4630.

**FIN 4200 Financial Investments and Markets (4 Credits)**

Students will learn how households, institutions, firms, and governments interact in financial markets to channel funds from savers to productive uses of capital and provide firms with opportunities to hedge certain risks. This comprehensive understanding of how markets function is essential for anyone with a finance or high-level management role. We will begin by identifying the key institutions in financial markets and how securities come into existence and subsequently trade. We will then learn to measure the risk and return of financial assets while identifying techniques to improve and assess the performance of investment portfolios. Finally, we will introduce derivatives and techniques to wisely hedge firm risks. Prerequisite: FIN 4630.

**FIN 4201 MS Management Managerial Finance (2 Credits)**

FIN 4201 introduces concepts and analytical techniques to identify and solve financial management problems. The focus on Performance Metrics (Ratios and Du Pont Analysis), Time Value of Money and Opportunity Costs, and Project Analysis prepares managers to operate in an environment that can at times be driven by the financial performance of the company.

**FIN 4320 Equity Analysis (4 Credits)**

This course is an advanced finance course that focuses on the analysis of equity securities. The curriculum is primarily derived from the Candidate Body of Knowledge (CBOK) from the Chartered Financial Analyst® (CFA®) Program. The goal is to teach students how to implement objective, unbiased valuations through an understanding of the valuation process in theory and practice. Prerequisite: FIN 4200.

**FIN 4330 Portfolio Management and Risk Analytics (4 Credits)**

Case and project approach to foundation of investment portfolio management. This course emphasizes the application of modern portfolio management concepts and risk management principles. Prerequisite: FIN 4200.

**FIN 4410 Financial Planning & Analysis (4 Credits)**

Advanced course in financial planning and decision-making focusing on capital structure, working capital management, long-range and short-term financial planning, and other corporate events such as mergers and IPOs. Prerequisite: FIN 4630.

**FIN 4420 Capital Expenditure Analysis (4 Credits)**

Advanced course in capital budgeting examining capital allocation processes and procedures and the theory and applied techniques of capital spending and divestment under conditions of certainty and uncertainty. Related issues of cost of capital and leasing also included. Prerequisite: FIN 4630.

**FIN 4500 Financial Modeling (4 Credits)**

Use of various financial software applications to construct models from corporate finance, investments, and financial markets. In particular, the course will cover the application of Excel spreadsheet functions and R programming to various topics including the time value of money, investment projects analysis, financial statements analysis, capital budgeting, portfolio analysis, and data & pivot tables. Prerequisites: FIN 4630.

**FIN 4610 Multinational Financial Management (4 Credits)**

Financial analysis of multinational corporation operating in international markets, including exchange rates, international instruments, markets, institutions and futures. Prerequisite: MBA 4112.

**FIN 4620 Financial Forecasting (4 Credits)****FIN 4630 Managerial Finance (4 Credits)**

This course covers analytical skills and tools of finance managers; theoretical concepts and practical applications are included. Topics include ratio analysis, breakeven analysis and leverage, securities valuation, capital budgeting, financial forecasting, and working capital management. Corequisite: ACTG 4610.

**FIN 4700 Topics in Finance (0-4 Credits)**

Topics vary each quarter. Course may be taken more than once if topics are different.

**FIN 4701 Topics in Finance (1-10 Credits)**

Topics vary. For new/experimental courses taught within the Reiman School of Finance.

**FIN 4710 Marsico Investment Fund I (4 Credits)**

A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4630 (or MBA 4285).

**FIN 4720 Marsico Investment Fund II (4 Credits)**

A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4710.

**FIN 4730 Marsico Investment Fund III (4 Credits)**

This course is an elective course that is the third in the series of classes involving the Graduate investment fund class: Marsico Investment Fund I & II. This course allows students to apply the investment, security analysis, and portfolio management tools and techniques that they have learned in their Finance classes. The students manage an actual portfolio, a portion of the University's endowment originally gifted by Tom and Cydney Marsico. The selection of students for this class is competitive. Students must agree to participate for 2 consecutive quarters, and they must be willing to address portfolio issues during the between-quarter periods if necessary. Because the course involves the application of tools and concepts learned in other classes, the best time to take the course is in the last year of a student's program. Prerequisites: FIN 4710 and FIN 4720.

**FIN 4740 Managerial Microeconomics (2 Credits)**

This course combines the standard tools of microeconomic analysis with a well-rounded appreciation of the important perspectives that form the business environment in the contemporary world. The goal is to provide students with the tools from microeconomics, game theory, and industrial organization that they need to make sound managerial decisions. The course uses case studies to develop practical insights into managing the firm's resources to achieve competitive advantage. The course is divided into two principle modules based on market structure: perfect competition and imperfect competition. Both modules cover optimal behavior and strategies.

**FIN 4750 Managerial Macroeconomics (2 Credits)**

This course covers the theory and practice of modern macroeconomics. It teaches students how private market forces and government policy decisions drive fluctuations in the global economy and affect the business environment. It explores issues related to inflation, interest rates, foreign exchange rate, business cycles, and monetary and fiscal policies. The course uses case studies to analyze real-life macroeconomic issues, and students are encouraged to investigate the potential and limitations of macroeconomic theory with real-world problems. The course is divided into two principle modules: the economy in the long run, and the economy in the short run. Both modules cover impacts of government policies on the business environment in a closed economy and an open economy.

**FIN 4760 Managerial Economics (4 Credits)**

This course presents the fundamental concepts of microeconomics and macroeconomics and approaches them from a managerial decision-making perspective. The first half of the course emphasizes applying microeconomic theory to decision-making to help achieve a firm's objective – increasing profit, market share, or growth. In contrast to traditional economics course, this course emphasizes practical implementation AND how economics affects business decision making. The second half of the course discusses macroeconomics and factors that affect the economy. The goal is to develop an understanding of macro-economic concepts such as GDP, inflation, and government policy such as Federal Reserve actions and government spending, to obtain a framework to model a firm's behavior according to an informed understanding of what the economy is doing. Armed with an understanding of the cycle of economic activity, one can formulate a firm understanding of policy alternatives by both the Federal Reserve and Congress.

**FIN 4800 An Organized Walk Down Wall Street (4 Credits)**

After four class sessions in Denver, participants will spend five days in New York visiting exchanges, brokerage firms, investment bankers, commercial banks, asset managers, and other institutions.

**FIN 4830 Econometrics for Finance (4 Credits)**

Econometrics for Finance is designed to teach applied statistical tools relevant to understanding financial and economic data. It is designed to cover essential tools for working with financial data, including return forecasting, volatility and econometrics of asset pricing, such as testing market models. The emphasis is on empirical techniques which are used in the analysis of financial markets and how they are applied to actual data. It teaches how to use and apply techniques using R, a free software that is used by many finance professionals. The course is intended to prepare students to possess the quantitative tools to evaluate and implement in the finance arena. Prerequisite: STAT 4610 and FIN 4500 (If no experience in R).

**FIN 4835 Executive Education - Finance for Non-Financial Managers (2 Credits)**

This Executive Education workshop introduces you to the essential finance skills any business professional needs to know. You will learn the language, tools and techniques to become a more intelligent user of financial reports. Through hands-on learning exercises, you will learn how to simplify, understand and apply data from financial reports and budgets. You will gain the confidence to ask better questions and make more informed financial decisions. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**FIN 4860 Derivatives (4 Credits)**

This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisite: FIN 4200.

**FIN 4870 Strategic Finance (4 Credits)**

Addresses theory, concepts, and techniques associated with asset management and creation of value from a strategic orientation. Links financial theory and practice to strategic and operational objectives of the firm, prepares student to incorporate risk and uncertainty into analytical decision-making process and to analyze divestiture, restructuring, and liquidation decisions. Prerequisite: FIN 4410.

**FIN 4875 Executive Education – Strategic Finance (2 Credits)**

Today's leading organizations require executives to use rigorous financial analysis in order to make strategic decisions that affect growth, profitability and competitive market advantage. Strategic Finance is a multidimensional Executive Education workshop that uses real simulations and an acquisition case study to map the connections between business strategy, finance and enterprise value creation. The goal of the course is to make you a more intelligent user of finance and strategy. It will enable you to ask better questions and to make better decisions. You will become a more sophisticated manager, particularly when focusing on the interplay and interdependence of strategy, finance & management. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**FIN 4885 Investment Banking and External Financing (4 Credits)**

This course is an advanced Corporate Finance course, focusing on the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance and going private. Prerequisite: FIN 4410.

**FIN 4890 Fixed Income Analysis (4 Credits)**

Emphasizes valuation and management of fixed income securities in prevailing environment of complex and innovative financial arrangements. Study of the nature of evolving markets, both domestically and internationally. Prerequisite: FIN 4200.

**FIN 4980 Finance Internship (0-10 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are encouraged to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities. Permission of instructor required. Hours and times arranged by student.

**FIN 4991 Independent Study (1-10 Credits)**

Individual study and report. Hours and times arranged by student.

**FIN 6305 Applied Quantitative Methods in Finance (4 Credits)**

"Applied Quantitative Methods in Finance" is a PhD-level seminar designed to immerse students in the techniques essential for quantitative research in Finance and other disciplines. This course offers a journey through the application of empirical methods and analytical frameworks using the Python programming language and key analytical packages. The examples and assignments cover topics including corporate governance, executive compensation, risk/return analysis, and the exploration of decentralized finance. Students will gain hands-on experience working with real-world data sets and get an introduction to the Finance literature. Structured around hands-on student research assignments, presentations and immersive sessions, the course covers a broad spectrum of quantitative methods including cross-sectional linear regression, two-stage least squares, forecasting and machine learning techniques such as variable selection. Each module is crafted to further the understanding of financial theories through empirical research and data analysis.

## Courses

**FIN 4000 Financial Modeling and Databases Bootcamp (1 Credit)**

This bootcamp is designed to introduce students to financial databases and to familiarize them with basic financial data analysis using Excel. The goal is for students to become comfortable with platforms such as Capital IQ and WRDS, which they will be using throughout their academic and/or professional careers. In addition, students will acquire a basic command of Excel functionality and efficiency in data analysis, together with modeling best practices and practical finance applications.

**FIN 4030 Personal Finance (4 Credits)**

This course provides an overview of topics which are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life and especially as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children.

**FIN 4060 Life Cycle/Financial Planning (4 Credits)**

This course is designed for students who are interested in Financial Planning, possibly as a profession. We will cover six of the areas of financial planning: cash flows, protection (insurance), investments, goals (education and retirement), income taxation, and estate planning. This course is part of University of Denver CFP® Certification Financial Planning Education Program.

**FIN 4090 Wealth Management (4 Credits)**

Wealth Management offers students important skills to become a part of the growing wealth management industry. It includes such topics as the Financial Planning Process, Insurance Basics, Investment Basics and Strategies, Retirement Planning, and Estate Planning. We are pleased to work with the College for Financial Planning (CFFP), located in Denver, to provide instruction from their The Foundations in Financial PlanningSM program. This can lead to the Financial Paraplanner Qualified Professional™ or FPQP™ designation upon successful completion of an Examination. The Examination is administered through the CFFP. The FPQP™ will be a valuable addition to your resume.

**FIN 4110 Ethics in Finance (4 Credits)**

The objective of this course is to discuss the ethical issues facing financial institutions and professionals and apply ethical principles to the analysis of these issues.

**FIN 4150 Advanced Business Valuation (4 Credits)**

In this course, students will learn theoretical development, analytical tools and practical approaches to analyze and tackle business valuation issues at the core of the financial professions. The theoretical section of the course provides indepth coverage of the financial theories and models essential to value businesses. The application section provides students with opportunities to apply the valuation principles and techniques to assess business value and develop strategies to create value in a real-world context.

**FIN 4160 Treasury Management (4 Credits)**

The objective of the course is to provide students with a comprehensive understanding of how various treasury functions are managed in a corporation and build students' capabilities to assume the role of a proficient treasury manager. This course will cover techniques used by major corporations to manage cash, the capital structure, financial risk and working capital. Prerequisite: FIN 4630.

**FIN 4180 Global Finance (2 Credits)**

This course explores financial management in the international arena. Principal content elements include: The market for foreign exchange, interest rate parity, hedging currency risk, international portfolio management. Prerequisites: FIN 4630.

**FIN 4200 Financial Investments and Markets (4 Credits)**

Students will learn how households, institutions, firms, and governments interact in financial markets to channel funds from savers to productive uses of capital and provide firms with opportunities to hedge certain risks. This comprehensive understanding of how markets function is essential for anyone with a finance or high-level management role. We will begin by identifying the key institutions in financial markets and how securities come into existence and subsequently trade. We will then learn to measure the risk and return of financial assets while identifying techniques to improve and assess the performance of investment portfolios. Finally, we will introduce derivatives and techniques to wisely hedge firm risks. Prerequisite: FIN 4630.

**FIN 4201 MS Management Managerial Finance (2 Credits)**

FIN 4201 introduces concepts and analytical techniques to identify and solve financial management problems. The focus on Performance Metrics (Ratios and Du Pont Analysis), Time Value of Money and Opportunity Costs, and Project Analysis prepares managers to operate in an environment that can at times be driven by the financial performance of the company.

**FIN 4320 Equity Analysis (4 Credits)**

This course is an advanced finance course that focuses on the analysis of equity securities. The curriculum is primarily derived from the Candidate Body of Knowledge (CBOK) from the Chartered Financial Analyst® (CFA®) Program. The goal is to teach students how to implement objective, unbiased valuations through an understanding of the valuation process in theory and practice. Prerequisite: FIN 4200.

**FIN 4330 Portfolio Management and Risk Analytics (4 Credits)**

Case and project approach to foundation of investment portfolio management. This course emphasizes the application of modern portfolio management concepts and risk management principles. Prerequisite: FIN 4200.

**FIN 4410 Financial Planning & Analysis (4 Credits)**

Advanced course in financial planning and decision-making focusing on capital structure, working capital management, long-range and short-term financial planning, and other corporate events such as mergers and IPOs. Prerequisite: FIN 4630.

**FIN 4420 Capital Expenditure Analysis (4 Credits)**

Advanced course in capital budgeting examining capital allocation processes and procedures and the theory and applied techniques of capital spending and divestment under conditions of certainty and uncertainty. Related issues of cost of capital and leasing also included. Prerequisite: FIN 4630.

**FIN 4500 Financial Modeling (4 Credits)**

Use of various financial software applications to construct models from corporate finance, investments, and financial markets. In particular, the course will cover the application of Excel spreadsheet functions and R programming to various topics including the time value of money, investment projects analysis, financial statements analysis, capital budgeting, portfolio analysis, and data & pivot tables. Prerequisites: FIN 4630.

**FIN 4610 Multinational Financial Management (4 Credits)**

Financial analysis of multinational corporation operating in international markets, including exchange rates, international instruments, markets, institutions and futures. Prerequisite: MBA 4112.

**FIN 4620 Financial Forecasting (4 Credits)****FIN 4630 Managerial Finance (4 Credits)**

This course covers analytical skills and tools of finance managers; theoretical concepts and practical applications are included. Topics include ratio analysis, breakeven analysis and leverage, securities valuation, capital budgeting, financial forecasting, and working capital management. Corequisite: ACTG 4610.

**FIN 4700 Topics in Finance (0-4 Credits)**

Topics vary each quarter. Course may be taken more than once if topics are different.

**FIN 4701 Topics in Finance (1-10 Credits)**

Topics vary. For new/experimental courses taught within the Reiman School of Finance.

**FIN 4710 Marsico Investment Fund I (4 Credits)**

A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4630 (or MBA 4285).

**FIN 4720 Marsico Investment Fund II (4 Credits)**

A securities analysis and portfolio management practicum in which students manage a University endowment gift donated by Tom and Cydney Marsico. Prerequisite: FIN 4710.

**FIN 4730 Marsico Investment Fund III (4 Credits)**

This course is an elective course that is the third in the series of classes involving the Graduate investment fund class: Marsico Investment Fund I & II. This course allows students to apply the investment, security analysis, and portfolio management tools and techniques that they have learned in their Finance classes. The students manage an actual portfolio, a portion of the University's endowment originally gifted by Tom and Cydney Marsico. The selection of students for this class is competitive. Students must agree to participate for 2 consecutive quarters, and they must be willing to address portfolio issues during the between-quarter periods if necessary. Because the course involves the application of tools and concepts learned in other classes, the best time to take the course is in the last year of a student's program. Prerequisites: FIN 4710 and FIN 4720.

**FIN 4740 Managerial Microeconomics (2 Credits)**

This course combines the standard tools of microeconomic analysis with a well-rounded appreciation of the important perspectives that form the business environment in the contemporary world. The goal is to provide students with the tools from microeconomics, game theory, and industrial organization that they need to make sound managerial decisions. The course uses case studies to develop practical insights into managing the firm's resources to achieve competitive advantage. The course is divided into two principle modules based on market structure: perfect competition and imperfect competition. Both modules cover optimal behavior and strategies.

**FIN 4750 Managerial Macroeconomics (2 Credits)**

This course covers the theory and practice of modern macroeconomics. It teaches students how private market forces and government policy decisions drive fluctuations in the global economy and affect the business environment. It explores issues related to inflation, interest rates, foreign exchange rate, business cycles, and monetary and fiscal policies. The course uses case studies to analyze real-life macroeconomic issues, and students are encouraged to investigate the potential and limitations of macroeconomic theory with real-world problems. The course is divided into two principle modules: the economy in the long run, and the economy in the short run. Both modules cover impacts of government policies on the business environment in a closed economy and an open economy.

**FIN 4760 Managerial Economics (4 Credits)**

This course presents the fundamental concepts of microeconomics and macroeconomics and approaches them from a managerial decision-making perspective. The first half of the course emphasizes applying microeconomic theory to decision-making to help achieve a firm's objective – increasing profit, market share, or growth. In contrast to traditional economics course, this course emphasizes practical implementation AND how economics affects business decision making. The second half of the course discusses macroeconomics and factors that affect the economy. The goal is to develop an understanding of macro-economic concepts such as GDP, inflation, and government policy such as Federal Reserve actions and government spending, to obtain a framework to model a firm's behavior according to an informed understanding of what the economy is doing. Armed with an understanding of the cycle of economic activity, one can formulate a firm understanding of policy alternatives by both the Federal Reserve and Congress.

**FIN 4800 An Organized Walk Down Wall Street (4 Credits)**

After four class sessions in Denver, participants will spend five days in New York visiting exchanges, brokerage firms, investment bankers, commercial banks, asset managers, and other institutions.

**FIN 4830 Econometrics for Finance (4 Credits)**

Econometrics for Finance is designed to teach applied statistical tools relevant to understanding financial and economic data. It is designed to cover essential tools for working with financial data, including return forecasting, volatility and econometrics of asset pricing, such as testing market models. The emphasis is on empirical techniques which are used in the analysis of financial markets and how they are applied to actual data. It teaches how to use and apply techniques using R, a free software that is used by many finance professionals. The course is intended to prepare students to possess the quantitative tools to evaluate and implement in the finance arena. Prerequisite: STAT 4610 and FIN 4500 (If no experience in R).

**FIN 4835 Executive Education - Finance for Non-Financial Managers (2 Credits)**

This Executive Education workshop introduces you to the essential finance skills any business professional needs to know. You will learn the language, tools and techniques to become a more intelligent user of financial reports. Through hands-on learning exercises, you will learn how to simplify, understand and apply data from financial reports and budgets. You will gain the confidence to ask better questions and make more informed financial decisions. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**FIN 4860 Derivatives (4 Credits)**

This course provides a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It discusses more advanced material in financial derivatives and is intended for students who have a quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers option pricing models, hedging techniques, and trading strategies. It also includes portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisite: FIN 4200.

**FIN 4870 Strategic Finance (4 Credits)**

Addresses theory, concepts, and techniques associated with asset management and creation of value from a strategic orientation. Links financial theory and practice to strategic and operational objectives of the firm, prepares student to incorporate risk and uncertainty into analytical decision-making process and to analyze divestiture, restructuring, and liquidation decisions. Prerequisite: FIN 4410.

**FIN 4875 Executive Education – Strategic Finance (2 Credits)**

Today's leading organizations require executives to use rigorous financial analysis in order to make strategic decisions that affect growth, profitability and competitive market advantage. Strategic Finance is a multidimensional Executive Education workshop that uses real simulations and an acquisition case study to map the connections between business strategy, finance and enterprise value creation. The goal of the course is to make you a more intelligent user of finance and strategy. It will enable you to ask better questions and to make better decisions. You will become a more sophisticated manager, particularly when focusing on the interplay and interdependence of strategy, finance & management. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**FIN 4885 Investment Banking and External Financing (4 Credits)**

This course is an advanced Corporate Finance course, focusing on the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance and going private. Prerequisite: FIN 4410.

**FIN 4890 Fixed Income Analysis (4 Credits)**

Emphasizes valuation and management of fixed income securities in prevailing environment of complex and innovative financial arrangements. Study of the nature of evolving markets, both domestically and internationally. Prerequisite: FIN 4200.

**FIN 4980 Finance Internship (0-10 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are encouraged to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities. Permission of instructor required. Hours and times arranged by student.

**FIN 4991 Independent Study (1-10 Credits)**

Individual study and report. Hours and times arranged by student.

**FIN 6305 Applied Quantitative Methods in Finance (4 Credits)**

Applied Quantitative Methods in Finance" is a PhD-level seminar designed to immerse students in the techniques essential for quantitative research in Finance and other disciplines. ## Master of Science in Management

The Master of Science in Management (MSM) is a 45-credit hour, 10-month program designed for people without a business background or degree. You will join a cohort of classmates from various careers, backgrounds and fields of study to learn management skills, ethical leadership, effective communications, and of course, business fundamentals. Wherever your passion lies, the Daniels MSM program can help prepare you for success.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

## Master of Science in Management

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### Standardized Test Scores

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.
- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842. The code to submit GMAT scores for this program is MZR-GT-31.

### Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

---

## Certificate or Specialized Certificate in Leadership

#### MGMT 4201 Fundamentals of Managing and Leading (4 Credits)

Fundamentals of Managing and Leading is a graduate course that provides students with an introduction to essential management and leadership concepts and also their application. The course is organized around the classic managerial functions of planning, organizing, leading and controlling. In addition, the course surveys entrepreneurship, corporate strategy, and emerging topics in management and leadership.

#### MGMT 4202 Leading Self (4 Credits)

The purpose of this course is to provide insight into why and how sustainable desired change occurs at the level of individual human/social interaction. This course will focus on providing students the critical skills to "lead the self" towards personal/professional goals as the context for studying intentional change. Students will revisit assumptions held about themselves as they develop intentional strategic approaches to identify career opportunities in their selected fields and lead the self towards the accomplishment of professional objectives.

#### MGMT 4203 Leading Teams (4 Credits)

"Leading teams" is a graduate course to prepare students to provide formal and informal leadership to a team. Students will learn about the fundamental design principles of high-performing teams as well as common pitfalls that teams are subject to. Students will also learn about how to sustain team performance through effective information-sharing, decision-making, and conflict management. Students will also cover current topics in teams including virtual teams, team creativity and team-based innovation. This course is designed to stimulate student learning by letting students integrate abstract knowledge through concrete firsthand experiences.

**MGMT 4204 Leading Organizations (4 Credits)**

In this experiential challenge-driven course, students will leverage their skills and further build upon their experience by analyzing a company, including the firm's mission, vision, and values, business model and financial health of the organization via the Spring Challenge. After finalizing the scope of the spring project, students will assess the firm's strengths and weaknesses using a series of tools and frameworks as well as identifying opportunities and threats in their respective industry. Synthesis in the course takes place when the student is able to provide strategic recommendations that generate added value and competitive advantage for the firm. Learning is facilitated through a work-shop atmosphere that uses case studies of industry leaders currently in the news that can then be applied to the project subject company.

**MGMT 4240 Global Business (2-4 Credits)**

The Global Business course and ensuing international experience are designed to expose students to the challenges, opportunities and risks of doing business globally. How do you make well-informed decisions in a global environment, taking into consideration the economic, political, environmental, cultural and historical context of a country or region? Conducting business outside the United States involves a unique set of challenges. Diverse cultures, laws, languages, and currencies add to the complexity of putting together and managing international business ventures. As a part of the international trip, students will meet with business executives and organizational leaders across a variety of industries to gain a broad understanding of the business environment of the countries being visited. In addition to completing secondary research beforehand, students will also be responsible for conducting primary research by setting up small team meetings in-country to develop a hands-on understanding of the business environment on the ground. The core end deliverable is a feasibility study. Before registering for MGMT 4240 - Global Business, students must have a degree review with Academic Advisor or Program Director.

**MGMT 4280 Business Design (4 Credits)**

Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovations(s) to the business model. That innovation(s) is discovered through an investigation of the existing business models and the competitive landscape including: suppliers, customers, competitors, substitutes and barriers of entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of strategies in: marketing, sales, operations, human capital, social responsibility, financing, corporate governance and technology. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of business planning. The result is a written business plan and presentation to funding sources reflecting a sustainable competitive advantage and creation of a defensible market.

**MGMT 4301 Organizational Behavior (4 Credits)**

This course focuses on psychosocial and behavioral issues in management and leadership to better understand how to drive performance and well-being. The course is founded upon an interdisciplinary approach, with major inputs coming from social psychology, administrative science, engineering, medicine, sociology, and philosophy. The course will center around behavioral analysis and organizational concepts. Students will gain a solid understanding of the latest in organizational psychology from a declarative knowledge standpoint, then put this knowledge into use for procedural knowledge.

**MGMT 4302 Leading Talent (2 Credits)**

A management course for graduate students grounded in a strong foundation of real experiences managing and leading Human Resource organizations. This course is designed to unify strategy, human resource strategy and principles of management in a highly interactive format employing multiple learning methods.

**MGMT 4303 Negotiating with Power (4 Credits)**

This course presents conceptual models, tactical approaches, and self-assessment tools to help you understand political dynamics as they unfold around you, and to develop your own influence style and negotiation skill. By focusing on specific expressions of power and influence, this course gives you the opportunity to observe its effective—and ineffective—use in different contexts and stages of a person's career. This course will challenge you to define for yourself what will constitute the effective exercise of power and influence in your life. Once we have a basic understanding of power and political behavior, we will explore the relationship between power and effective negotiation. Yet, most of us know very little about why we are sometimes successful and other times not, and even fewer of us know what it takes to be consistently effective in negotiations. This course will broaden your understanding of how to effectively negotiate in a variety of contexts by engaging in simulated negotiations during class.

**MGMT 4304 Project Management for Leaders (4 Credits)**

This course will introduce the student to the key elements of a successful project delivery system. The project delivery system consists of five components: training, tools, core skills, company support, and a project delivery process. The process is the means by which projects are consistently and efficiently planned, executed, and completed to the satisfaction of clients. The system is aligned with the principles of a total quality improvement program, namely client focus, project manager commitment, evaluation and measurement, corporate support, and continuous improvement.

**MGMT 4305 Business Model Design and Innovation (2 Credits)**

Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovations(s) to the business model. Innovation(s) is discovered through an investigation of the existing business models and the industry landscape including: customers, competitors, substitutes, suppliers, and barriers to entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of financial, marketing, sales, operation, talent, technology, and social responsibility strategies. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of a Business Model and a Business Plan. The result is a written business plan and presentation to a potential funding panel.

**MGMT 4306 Virtual Business Management Simulation (2 Credits)**

The focus of this course is on gaining new venture experience. Through an online/virtual computer simulation, students will be placed into a very realistic international business setting, where they will start up and run a company through multiple rounds of decision-making. The online simulation allows students to build entrepreneurial firms, experiment with strategies, and compete with other student teams in a virtual business world. Designed to mimic the competitive, ever changing marketplace, the simulation lets students gain experience in market analysis, strategy formulation, and the management of a new venture.

**MGMT 4330 Financials for Leaders (4 Credits)**

This course is intended to help students develop a financial decision-making framework that can be used to assess and understand how financial decisions positively and negatively affect their company's short-and long-term well-being. Its emphasis is to introduce students to various tools and techniques used in financial management and to demonstrate how they are applied to the managerial decision-making process. This will be accomplished through a combination of class discussions and case study analyses. Topics include decision making, financial statements, ratio analysis, and return-on-investment.

**MGMT 4340 Strategic Human Resource Mgmt (4 Credits)**

This course focuses on the effective management of human resources in order to create sustained competitive advantage. The course covers the major policy areas of employee influence mechanisms, staffing, training and development, performance appraisal, reward systems, and work design so that students are better prepared to provide direction to the creation and implementation of effective management systems. Prerequisite: MGMT 3900 or permission of instructor.

**MGMT 4345 Performance & Rewards System (4 Credits)**

Measuring and improving human performance, techniques of individual objective settings including MBO, appraisal and feedback systems, creating and managing compensation programs, job design, analysis and redesign of reward systems in various organizational contexts. Prerequisite: MBA 4121 or equivalent.

**MGMT 4350 Business Summit Series: Current Business Issues and Topics (4 Credits)**

The Business Summit Series is an elective course that provides students with insights into a variety of contemporary business issues and topics with a practical approach to developing business leadership skills and competencies. Before the course commences, students are invited to provide input and help faculty select the topics that are covered in the series. The faculty will develop modules, with each module covering a discrete business topic a workshop format. The workshops are taught in four-hour segments, with some workshops covering more than four hours, depending on content and learning outcomes. Workshops span practical topics that are not covered in-depth during the core PMBA curriculum, and they also include emerging business subjects. Topics include: Go-To-Market Strategy, Business Development Strategies, Mastering Sales Techniques, Business Consulting Skills, Becoming a Manager, Organizational Change Leadership, Franchise Business Model, and Colorado's Marijuana Industry. Other emerging business topics may include the Colorado small business market and new industry segments. Industry leaders may present to the class as subject matter experts.

**MGMT 4400 Ethical Leadership (4 Credits)**

Consideration of ethics in business and organizations is relevant for being an effective and successful manager and leader. The course is designed to strengthen capacities in terms of ethical awareness, analysis, and application. An important learning outcome of the course is to facilitate the growth of students in terms of making practically wise and ethically sound decisions in their future careers. Decisions include fulfilling responsibilities to create and sustain ethical climates and cultures for teams, business units, and organizations. This course introduces students to fundamental ethical concepts and ethical decision making frameworks. Students will apply these frameworks to cases and issues relevant to one's role as a future manager and leader. Students will also be introduced current research in moral psychology and behavioral ethics, and students will apply this knowledge in assessing a current case related to business and management ethics. The course will cover current issues such as sexual harassment, privacy in the workplace, and whistleblowing. Students will develop a personalized values-based leadership plan.

**MGMT 4401 Global Leadership I (2 Credits)**

This course is the first of two in the global leadership sequence. As a part of the sequence, there is a mandatory international travel component that will occur over the break between the winter and spring quarters. The operation of a far-flung global enterprise (large or small) imposes special demands upon its leaders. This course explores, through a variety of leadership perspectives, actions and strategies that can be employed to succeed in a global firm. These perspectives include: (1) the headquarters and chief executive officer; (2) global functional disciplines (with special emphasis on global human resource management); (3) the country manager; (4) the global product/service manager; and (5) the host country. Throughout the course, students will systematically examine the cross-cultural, operational and ethical complexities of leading and managing a truly "global" company.

**MGMT 4402 Global Leadership II (1 Credit)**

The centerpiece of the Global Leadership course series is the Global Leadership Experience (GLX) taking place in between Winter and Spring quarters. GLX involves travel to an overseas location where students have the opportunity to interact with business, government, academic and/or NGO players while exploring global leadership challenges and engaging in research to support their field project. Although locations may differ, each GLX is designed to offer students a deep cross-cultural experience and an opportunity to examine first-hand, global business activity in field locations. Global Leadership II offers students space to process and reflect on what they have learned during their Global Leadership Experience. Students will engage in collective debriefings on their experience using insights gained to develop a personal viewpoint on the future of globalization and implications of their experience for their careers. Students will also be challenged to apply learnings from Global Leadership I as they complete work on their team projects and present findings to their colleagues and an expert panel.

**MGMT 4403 Business and Society (2 Credits)**

This course examines the role of business in society and explores important issues in the relationships between business, government, and society. These issues are approached from a stakeholder perspective, integrating business strategy with law, ethics, and social responsibility. The obligations of business to its multiple stakeholders are established and applied through analysis of companies, cases, and current events.

**MGMT 4405 Strategic Execution and Summit Team Competition and Assessment (3 Credits)**

Strategic Execution is a Challenge Driven Educational (CDE) course that builds off several previous MS Management courses. Students will leverage the contents from accounting, finance, management, marketing, strategy, and business analytics to engage with corporate partners to examine real-world problems. This course provides you with the opportunity to apply what you have learned so far in the MSM program with a live client. You will work on a project focused on business and management. Scoping the project will be a key learning outcome.

**MGMT 4410 Qualitative Research Methods (2 Credits)**

This course provides students with an overview of and experience with qualitative methods. You are introduced to a wide variety of qualitative methods, including ethnography, observation, interviewing, grounded theory, discourse analysis, deconstruction, historical methods, and action research. The course is roughly divided into two major sections. The first half of the course introduces you to the epistemological foundations of qualitative research and emphasizes design and data collection. The second half of the course introduces a variety of techniques for coding and analyzing qualitative data and provides exposure to many exemplars of qualitative reports/studies. We will examine conventions for ensuring that qualitative work is rigorous and appropriate for action. Throughout the course you will be given opportunities to try on various methods and gain some hands-on experience in several areas.

**MGMT 4425 Leading People and Organizations (2 Credits)**

We live in a VUCA (Volatile, Uncertain, Complex and Ambiguous) world. Effective leaders are skilled in navigating the challenges presented by our VUCA world – especially when it comes to leading and managing people and organizations. This course focuses on the effective leadership and management of people, every organization's most critical resource. Employees' knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. People are an organization's resources who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. Effective and ethical leaders build and sustain employees' knowledge, skills, commitment, and creativity to build collaborative cultures that foster high performance, reap the benefits of a diverse workforce, and create sustained competitive advantage. In this course, we approach business from a general management perspective, integrating concepts from organizational behavior, organization theory, human resource management, strategy, political science, and cultural anthropology. Course topics include: • Organizational structure and systems. • Selection and hiring, onboarding, motivation, feedback and coaching, and employee engagement. • Organizational politics, power dynamics, and conflict. • Organizational culture.

**MGMT 4450 Power and Influence (4 Credits)**

This course presents conceptual models, tactical approaches, and self-assessment tools to help you understand political dynamics as they unfold around you, and to develop your own influence style and negotiation skill. By focusing on specific expressions of power and influence, this course gives you the opportunity to observe its effective—and ineffective—use in different contexts and stages of a person's career. This course will challenge you to define for yourself what will constitute the effective exercise of power and influence in your life.

**MGMT 4501 Springboard Tools I (1 Credit)**

PowerPoint, Microsoft Word, Adobe, Excel, Outlook... we could hardly imagine doing business in today's world without them. CRM software will soon be regarded in the same essential way. As technology fundamentally shifts the focus of business to a completely customer-centered environment, the pervasiveness of CRM tools will only grow. Though many of these tools exist, Salesforce is one of, if not the most, prevalent CRM tools available in today's market. Used by companies of all sizes and industries, Salesforce provides a suite of products that allow organizations to place their customers at the heart of their businesses, leveraging customer data to gain valuable insights, and provide the customer with a wholistic and seamless experience and interaction with the company's brand. Salesforce's CRM software provides products for the full spectrum of customer interactions, from sales to marketing, commerce to customer service. There are several paths to developing Salesforce proficiency, ranging from a business (end) user of the product, to an administrator (someone who customizes the tool to meet business requirements), to a consultant (someone who implements Salesforce rollouts at organizations), to a marketer (an expert in Salesforce's marketing tools), and beyond.

**MGMT 4502 Springboard Tools II (1 Credit)**

Your journey to securing a career upon graduation starts with the first day of classes and continues throughout your program. The Springboard Tools courses are designed to prepare students to be career-ready upon graduation. Students will learn various tools used in business today, such as Salesforce, Python, and more as determined by the business community. In addition to understanding the tool and its application, students will be required to incorporate problem-solving techniques when using a particular tool.

**MGMT 4525 Facility Management (4 Credits)**

What is a Public Assembly Facility? Public assembly facilities such as arenas, stadiums, convention centers, and theatres evolved out of the need by social communities to build permanent structures for public assembly, for political and commercial activities, religion, sports, spectacles, artistic expression and for commercial and educational assemblies. This course examines the specific areas of responsibility that one must acknowledge and understand to operate a successful venue of this type. We discuss the core competencies required and the unique areas of concentration that separate a public assembly facility from other venue types. Students realize the significant impact and benefit that facilities like these have on the social, educational and economic environment of communities.

**MGMT 4530 Technologies for Sport & Entertainment Management (2 Credits)**

This is a specialized course for the MBA student interested in expanding their knowledge of the sports industry as a business and as a world economic force. It provides students with a framework for understanding the scope of the sports business across various venues, as it relates to information technology. Management Sport Technology focuses on understanding the practical uses of computer applications as a tool in sport management activities. Emphasis is placed on demonstrated proficiency in project management, spreadsheet management, database management, and Web page development.

**MGMT 4535 Managing Sponsorships for Sport & Entertainment Events (2 Credits)**

The purpose of this course is to give students an understanding of sports sponsorship from the perspective of the corporate sponsor and the sports entity. The course identifies and describes the several media distribution channels that are used in corporate sports sponsorship. In addition, students learn how to use sports media distribution properties to create an effective sports marketing plan for corporate sponsors. Students put together a corporate sports marketing plan with a sample sports team.

**MGMT 4540 Advanced Seminar in Sports and Entertainment Management (4 Credits)**

The purpose of this seminar is to consider current topics in sport and entertainment management. Topics vary by quarter depending on timeliness of topics and interest of students. Potential topics may include public policy questions; ethical issues; current economic impacts and analysis; sport and entertainment management factors and how the various segments (professional, amateur, collegiate, high school, recreational and others) relate; environmental impacts; global issues and other issues that impact the current and future fields of sport and entertainment management.

**MGMT 4545 Leadership, Team, and Career Development (2 Credits)**

Daniels MBA students are preparing for leadership roles-as entrepreneurs, in corporations, and in not-for-profit organizations. In this course we will look at leadership from a variety of perspectives. Once we have reviewed what the experts have to say about leadership, we will turn our focus to helping you develop your personal theory of leadership. You will answer on important questions: How will I lead? Armed with this knowledge, you will be better equipped to handle leadership challenges as you go forward in life.

**MGMT 4555 Interdisciplinary Projects for National Park Service (4 Credits)**

A practical application of key business and managerial knowledge, skills, and competencies designed to integrate graduate program elements and provide students with a unique opportunity to work on value-add projects with key managers from the National Park Service. This is an experiential course for integrating and applying multi-disciplined learning outcomes and experiences to real-world challenges, problems, and dilemmas, resulting in solutions for the National Parks Service.

**MGMT 4560 Leadership of the Future (4 Credits)**

In nearly every aspect of life - science, business, pop culture, environment, technology, global politics - we are inundated with data about how much and how fast the world is changing. How will these major shifts impact what we think of as leadership, and how can one develop to be prepared to lead in a fast-moving, volatile, and complex world? Leadership of the Future is a course that takes a deep look at how we've thought about what "leadership" is in the past from a business perspective, and considers what the future will require of leaders as they seek to effectively lead and make a difference in a complex world. The course is founded upon an interdisciplinary approach, drawing from a variety of disciplines including psychology, administrative science, literature, medicine, and philosophy. The course will center around behavioral analysis and active reflective practice: together we will think deeply about leadership as a behavior within a particular context, and as a practice to cultivate. Students will articulate a set of leadership development goals for themselves and engage experientially in service of self-observation, personal growth, and learning. Cross-listed with MGMT 3560.

**MGMT 4620 Organizational Dynamics (4 Credits)**

In this course, you will: (1) understand and develop a set of management and leadership skills critical for effectiveness in high performance work environments; (2) develop the ability to analyze organizations and environments from multiple perspectives; (3) explore policies and practices for facilitating organizational change; (4) become a valued and effective member of a work team; and (5) learn how to incorporate effective communication, critical thinking, creative problem solving, and technology, into organizational behaviors and processes.

**MGMT 4625 Leading People & Organizations (4 Credits)**

This course focuses on the effective management of people, every organization's most critical resource. Employees' knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. It is people who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. In this course, we approach the people side of business from a general management perspective, integrating concepts from organizational behavior, human resource management, strategy, and organizational design. Course topics include motivation, reward systems, engagement; feedback; processes by which work is done and decisions are made, including attention to teams, power dynamics, conflict, and negotiations; the structure of the organization and its systems, including job and organizational design and systems and policies affecting human capital; the organization's culture and history; and the external environment within which the organization operates, including legal, regulatory, demographic, economic and national cultural factors.

**MGMT 4630 Strategic Human Resources Management (4 Credits)**

This course advances the argument that effective human resource policies will create sustained competitive advantage. To that end, this course will address the effective management of human resources in various policy areas: staffing, diversity, training and development, voice and influence, performance appraisal, and reward systems. Rather than taking a traditional, staff personnel perspective, we will discuss human resource management from the strategic perspective of a general manager. Prerequisite: MGMT 4620.

**MGMT 4650 Introduction to Management Consulting (4 Credits)**

This course is designed to provide a broad overview of the management consulting profession, including its industry and competitive dynamics, major practice areas, approaches to implementation, management of consulting firms and the future of consulting. In addition, emphasis is given to the practice of consulting through the development of certain high impact skills in evaluation, proposal writing, data gathering and client presentations. The course is relevant to those who: 1) are specifically interested in consulting careers, 2) have job interests that involve staff positions in corporations, 3) want to become line managers who might one day use consultants, 4) wish to develop general consulting skills and familiarity with the consulting industry. The learning process in class will consist of lectures, cases, readings, exercises and guest speakers. This wide variety of learning methods is intended to convey both the necessary knowledge and practical skills necessary for building a sound foundation for becoming a professional consultant. It is essential that everyone comes well-prepared to class, as the learning process depends heavily upon participation.

**MGMT 4690 Strategic Management (4 Credits)**

Management 4690 focuses on the strategic management of an organization as a whole. This course will introduce students to key decisions that top executives have to make when developing and implementing strategies, methodologies for informing those decisions, and how to interpret information from those approaches to guide strategic decision-making. Overall, from the perspective of leading an organization, students will learn how strategic decisions impact a firm's competitive advantage and success.

**MGMT 4700 Topics in Management (1-4 Credits)****MGMT 4710 Sustaining Family Enterprises (4 Credits)**

Family enterprises have a tremendous impact on our local, national and global economies. Today, the definition of the family enterprise extends beyond just the business entity. It includes family offices, family "banks," family councils, trusts, and family foundations, just to name a few. Further, what happens in, and how decisions are made by, family enterprise affects not only the active family members but other key stakeholders such as inactive family members, in-laws, non-family managers and employees, professional advisors, customers, suppliers and competitors. This course gives students insight into the universe of possibilities that families, enterprises and their advisors face when engaged in systemic transition planning. This highly interdisciplinary course is appropriate for anyone who intends to work in or with family enterprises. This includes family members, accountants, attorneys, estate planners, financial or wealth managers, family office professionals, insurance consultants, business advisors, management consultants, organizational and leadership development experts, international business professionals, psychologists, social workers, and family therapists.

**MGMT 4720 Sustaining Family Enterprise (4 Credits)**

This course is intended to provide students with greater insight into the world of family enterprise. It will cover definitions, concepts, frameworks, and models to help students develop the system perspective of family, business, ownership, governance, and wealth issues. This course is applicable to those working in or governing their family enterprise (family businesses, family offices, real estate management firms, investment entities, boards, family councils, etc.), those students in or seeking careers as professional service advisors to family enterprise (accountants, estate planners, lawyers, wealth planners, psychologists, family therapists, board members, etc.), and those students with a global interest in how family enterprise affects, and is affected by, the global economy.

**MGMT 4740 Global Business I (2 Credits)**

Almost all business is impacted by global trends. This course will help students develop a global mindset and understand challenges and opportunities arising from doing business across national boundaries and cultures. Addressing such issues as diverse cultures, laws, languages, currencies and economic contexts, the course will help students make well-informed decisions giving due consideration to the local and global context in which a given business operates. This course must be taken prior to MGMT 4745 and both courses are to be taken as a sequential series.

**MGMT 4745 Global Business II (2 Credits)**

Working across national boundaries and cultures demands a new approach to business management. This course will help students assess the local environment of the country in which they intend to do business; introduces students to global aspects of marketing, finance, and management; and examines examples of opportunities associated with doing business in so-called "base of the pyramid" markets. This course must be taken after MGMT 4740 and is the second in the series.

**MGMT 4790 Managing Strategic Alliances (4 Credits)**

The purpose of this course is to examine and expand upon the current understanding of the challenges of developing and managing strategic alliances. Reflecting the breadth of the novel features of the structure, the course draws from both strategic management and organizational behavioral disciplines. To order the discussion, we take a process view in addressing why and then how to use a strategic alliance. We initially focus on when to use an alliance. We then turn to the formation of an alliance - examining how to select a partner, which structure to choose and how to negotiate. Following, we discuss post-formation issues of partner relationships, management of the alliance, performance evaluation and alliance termination. We conclude the course with sessions devoted towards managing a portfolio of alliances and network management in general.

**MGMT 4855 Executive Education – Accelerated Leadership Experience (4 Credits)**

Delivering best practices and highly applicable team building skills, the Accelerated Leadership Experience (ALX) from Daniels Executive Education is designed for managers to act as a catalyst for transformation. The result? Successful and fulfilled leaders. ALX includes both classroom and experiential activities and covers topics such as emotional intelligence, communication, coaching, feedback, wellness, stress management, energy management, team effectiveness, people development, diversity and inclusion. The support of ALX's innovative leadership curriculum, experienced faculty, and a cohort of professionals who are at similar points in their careers will help you develop the tools and skills needed to succeed in our increasingly complex world. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](http://daniels.du.edu/executive-education) for class dates and formats.

**MGMT 4875 Executive Education – Denver Leadership Experience (4 Credits)**

The Denver Leadership Experience (DLX) from Daniels' Executive Education is a transformational workshop designed to challenge you to think and perform differently in order to reach your leadership potential. This award-winning program delivers timely, relevant, and innovative leadership development essentials for our ever-changing, increasingly complex business world. Employee well-being and mental health are more important than ever, therefore this program has deepened the focus on wellness, mindfulness, and stress management; habits which great leaders implement but tend to deprioritize. In addition to our robust leadership content and faculty expertise, you'll be surrounded by a group of professionals who will bring their own experiences and input which adds value to the conversation and deepens the impact of DLX. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](https://daniels.du.edu/executive-education) for class dates and formats.

**MGMT 4980 Graduate Internship in Mgmt (0-10 Credits)**

Hours and times arranged by student.

**MGMT 4991 Independent Study (1-10 Credits)**

Individual research and report. Hours and times arranged by student.

**MGMT 4995 Independent Research (1-10 Credits)****MGMT 6300 Seminar in Leadership Strategy Research (4 Credits)**

The field of strategy is broad and covers a diverse set of 'macro' organizational theories and topics. In this course, you will have a solid overview of research in the field of strategy. This course will enable you to develop a conceptual view of the field and its theoretical roots, topics, and branches and begin to apply strategic management theories to address original research questions and to solve problems within your own organizations. This will require you to critique extant knowledge and to identify what is missing and what is needed to advance understanding. Finally, this course will provide a beginning point for your knowledge of strategy theories that can guide future pursuits. That is, it is not possible to cover the immense strategy literature in one semester but this course should provide you with the knowledge needed to explore the field of strategy on your own as you move forward.

**MGMT 6301 Research Seminar in Organizational Ethics (4 Credits)**

The seminar focuses an exploration of the role of ethics from the lens of a leader. In this area, the course examines a range of ethical and social performance issues and challenges that leaders must confront. Our goal is to broaden student understanding of the different theoretical arguments and tensions in this area, with a focus on issues faced by modern day organizations.

**MGMT 6302 Research Seminar in Leadership: An Organizational Perspective (4 Credits)**

This seminar will focus on understanding the major theoretical streams in the leadership literature with a focus on leadership within organizations. Emphasis will be placed on comparing historical trends such as trait, behavioral, contingency, and transformational/charismatic theories of leadership and exploring contemporary approaches such as servant leadership, authentic leadership, positive leadership, and shared leadership.

## Courses

**MGMT 4201 Fundamentals of Managing and Leading (4 Credits)**

Fundamentals of Managing and Leading is a graduate course that provides students with an introduction to essential management and leadership concepts and also their application. The course is organized around the classic managerial functions of planning, organizing, leading and controlling. In addition, the course surveys entrepreneurship, corporate strategy, and emerging topics in management and leadership.

**MGMT 4202 Leading Self (4 Credits)**

The purpose of this course is to provide insight into why and how sustainable desired change occurs at the level of individual human/social interaction. This course will focus on providing students the critical skills to "lead the self" towards personal/professional goals as the context for studying intentional change. Students will revisit assumptions held about themselves as they develop intentional strategic approaches to identify career opportunities in their selected fields and lead the self towards the accomplishment of professional objectives.

**MGMT 4203 Leading Teams (4 Credits)**

"Leading teams" is a graduate course to prepare students to provide formal and informal leadership to a team. Students will learn about the fundamental design principles of high-performing teams as well as common pitfalls that teams are subject to. Students will also learn about how to sustain team performance through effective information-sharing, decision-making, and conflict management. Students will also cover current topics in teams including virtual teams, team creativity and team-based innovation. This course is designed to stimulate student learning by letting students integrate abstract knowledge through concrete firsthand experiences.

**MGMT 4204 Leading Organizations (4 Credits)**

In this experiential challenge-driven course, students will leverage their skills and further build upon their experience by analyzing a company, including the firm's mission, vision, and values, business model and financial health of the organization via the Spring Challenge. After finalizing the scope of the spring project, students will assess the firm's strengths and weaknesses using a series of tools and frameworks as well as identifying opportunities and threats in their respective industry. Synthesis in the course takes place when the student is able to provide strategic recommendations that generate added value and competitive advantage for the firm. Learning is facilitated through a work-shop atmosphere that uses case studies of industry leaders currently in the news that can then be applied to the project subject company.

**MGMT 4240 Global Business (2-4 Credits)**

The Global Business course and ensuing international experience are designed to expose students to the challenges, opportunities and risks of doing business globally. How do you make well-informed decisions in a global environment, taking into consideration the economic, political, environmental, cultural and historical context of a country or region? Conducting business outside the United States involves a unique set of challenges. Diverse cultures, laws, languages, and currencies add to the complexity of putting together and managing international business ventures. As a part of the international trip, students will meet with business executives and organizational leaders across a variety of industries to gain a broad understanding of the business environment of the countries being visited. In addition to completing secondary research beforehand, students will also be responsible for conducting primary research by setting up small team meetings in-country to develop a hands-on understanding of the business environment on the ground. The core end deliverable is a feasibility study. Before registering for MGMT 4240 - Global Business, students must have a degree review with Academic Advisor or Program Director.

**MGMT 4280 Business Design (4 Credits)**

Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovations(s) to the business model. That innovation(s) is discovered through an investigation of the existing business models and the competitive landscape including: suppliers, customers, competitors, substitutes and barriers of entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of strategies in: marketing, sales, operations, human capital, social responsibility, financing, corporate governance and technology. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of business planning. The result is a written business plan and presentation to funding sources reflecting a sustainable competitive advantage and creation of a defensible market.

**MGMT 4301 Organizational Behavior (4 Credits)**

This course focuses on psychosocial and behavioral issues in management and leadership to better understand how to drive performance and well-being. The course is founded upon an interdisciplinary approach, with major inputs coming from social psychology, administrative science, engineering, medicine, sociology, and philosophy. The course will center around behavioral analysis and organizational concepts. Students will gain a solid understanding of the latest in organizational psychology from a declarative knowledge standpoint, then put this knowledge into use for procedural knowledge.

**MGMT 4302 Leading Talent (2 Credits)**

A management course for graduate students grounded in a strong foundation of real experiences managing and leading Human Resource organizations. This course is designed to unify strategy, human resource strategy and principles of management in a highly interactive format employing multiple learning methods.

**MGMT 4303 Negotiating with Power (4 Credits)**

This course presents conceptual models, tactical approaches, and self-assessment tools to help you understand political dynamics as they unfold around you, and to develop your own influence style and negotiation skill. By focusing on specific expressions of power and influence, this course gives you the opportunity to observe its effective—and ineffective—use in different contexts and stages of a person's career. This course will challenge you to define for yourself what will constitute the effective exercise of power and influence in your life. Once we have a basic understanding of power and political behavior, we will explore the relationship between power and effective negotiation. Yet, most of us know very little about why we are sometimes successful and other times not, and even fewer of us know what it takes to be consistently effective in negotiations. This course will broaden your understanding of how to effectively negotiate in a variety of contexts by engaging in simulated negotiations during class.

**MGMT 4304 Project Management for Leaders (4 Credits)**

This course will introduce the student to the key elements of a successful project delivery system. The project delivery system consists of five components: training, tools, core skills, company support, and a project delivery process. The process is the means by which projects are consistently and efficiently planned, executed, and completed to the satisfaction of clients. The system is aligned with the principles of a total quality improvement program, namely client focus, project manager commitment, evaluation and measurement, corporate support, and continuous improvement.

**MGMT 4305 Business Model Design and Innovation (2 Credits)**

Each student learns an organized approach to rapid design of a business with a sustainable competitive advantage based upon innovations(s) to the business model. Innovation(s) is discovered through an investigation of the existing business models and the industry landscape including: customers, competitors, substitutes, suppliers, and barriers to entry. Specific opportunities are identified through investigation of the following: industry, market, and competition. Opportunities to create competitive advantages are investigated through the design of financial, marketing, sales, operation, talent, technology, and social responsibility strategies. The course offers a workshop atmosphere in which students are expected to apply and discuss the various aspects of a Business Model and a Business Plan. The result is a written business plan and presentation to a potential funding panel.

**MGMT 4306 Virtual Business Management Simulation (2 Credits)**

The focus of this course is on gaining new venture experience. Through an online/virtual computer simulation, students will be placed into a very realistic international business setting, where they will start up and run a company through multiple rounds of decision-making. The online simulation allows students to build entrepreneurial firms, experiment with strategies, and compete with other student teams in a virtual business world. Designed to mimic the competitive, ever changing marketplace, the simulation lets students gain experience in market analysis, strategy formulation, and the management of a new venture.

**MGMT 4330 Financials for Leaders (4 Credits)**

This course is intended to help students develop a financial decision-making framework that can be used to assess and understand how financial decisions positively and negatively affect their company's short-and long-term well-being. Its emphasis is to introduce students to various tools and techniques used in financial management and to demonstrate how they are applied to the managerial decision-making process. This will be accomplished through a combination of class discussions and case study analyses. Topics include decision making, financial statements, ratio analysis, and return-on-investment.

**MGMT 4340 Strategic Human Resource Mgmt (4 Credits)**

This course focuses on the effective management of human resources in order to create sustained competitive advantage. The course covers the major policy areas of employee influence mechanisms, staffing, training and development, performance appraisal, reward systems, and work design so that students are better prepared to provide direction to the creation and implementation of effective management systems. Prerequisite: MGMT 3900 or permission of instructor.

**MGMT 4345 Performance & Rewards System (4 Credits)**

Measuring and improving human performance, techniques of individual objective settings including MBO, appraisal and feedback systems, creating and managing compensation programs, job design, analysis and redesign of reward systems in various organizational contexts. Prerequisite: MBA 4121 or equivalent.

**MGMT 4350 Business Summit Series: Current Business Issues and Topics (4 Credits)**

The Business Summit Series is an elective course that provides students with insights into a variety of contemporary business issues and topics with a practical approach to developing business leadership skills and competencies. Before the course commences, students are invited to provide input and help faculty select the topics that are covered in the series. The faculty will develop modules, with each module covering a discrete business topic a workshop format. The workshops are taught in four-hour segments, with some workshops covering more than four hours, depending on content and learning outcomes. Workshops span practical topics that are not covered in-depth during the core PMBA curriculum, and they also include emerging business subjects. Topics include: Go-To-Market Strategy, Business Development Strategies, Mastering Sales Techniques, Business Consulting Skills, Becoming a Manager, Organizational Change Leadership, Franchise Business Model, and Colorado's Marijuana Industry. Other emerging business topics may include the Colorado small business market and new industry segments. Industry leaders may present to the class as subject matter experts.

**MGMT 4400 Ethical Leadership (4 Credits)**

Consideration of ethics in business and organizations is relevant for being an effective and successful manager and leader. The course is designed to strengthen capacities in terms of ethical awareness, analysis, and application. An important learning outcome of the course is to facilitate the growth of students in terms of making practically wise and ethically sound decisions in their future careers. Decisions include fulfilling responsibilities to create and sustain ethical climates and cultures for teams, business units, and organizations. This course introduces students to fundamental ethical concepts and ethical decision making frameworks. Students will apply these frameworks to cases and issues relevant to one's role as a future manager and leader. Students will also be introduced current research in moral psychology and behavioral ethics, and students will apply this knowledge in assessing a current case related to business and management ethics. The course will cover current issues such as sexual harassment, privacy in the workplace, and whistleblowing. Students will develop a personalized values-based leadership plan.

**MGMT 4401 Global Leadership I (2 Credits)**

This course is the first of two in the global leadership sequence. As a part of the sequence, there is a mandatory international travel component that will occur over the break between the winter and spring quarters. The operation of a far-flung global enterprise (large or small) imposes special demands upon its leaders. This course explores, through a variety of leadership perspectives, actions and strategies that can be employed to succeed in a global firm. These perspectives include: (1) the headquarters and chief executive officer; (2) global functional disciplines (with special emphasis on global human resource management); (3) the country manager; (4) the global product/service manager; and (5) the host country. Throughout the course, students will systematically examine the cross-cultural, operational and ethical complexities of leading and managing a truly "global" company.

**MGMT 4402 Global Leadership II (1 Credit)**

The centerpiece of the Global Leadership course series is the Global Leadership Experience (GLX) taking place in between Winter and Spring quarters. GLX involves travel to an overseas location where students have the opportunity to interact with business, government, academic and/or NGO players while exploring global leadership challenges and engaging in research to support their field project. Although locations may differ, each GLX is designed to offer students a deep cross-cultural experience and an opportunity to examine first-hand, global business activity in field locations. Global Leadership II offers students space to process and reflect on what they have learned during their Global Leadership Experience. Students will engage in collective debriefings on their experience using insights gained to develop a personal viewpoint on the future of globalization and implications of their experience for their careers. Students will also be challenged to apply learnings from Global Leadership I as they complete work on their team projects and present findings to their colleagues and an expert panel.

**MGMT 4403 Business and Society (2 Credits)**

This course examines the role of business in society and explores important issues in the relationships between business, government, and society. These issues are approached from a stakeholder perspective, integrating business strategy with law, ethics, and social responsibility. The obligations of business to its multiple stakeholders are established and applied through analysis of companies, cases, and current events.

**MGMT 4405 Strategic Execution and Summit Team Competition and Assessment (3 Credits)**

Strategic Execution is a Challenge Driven Educational (CDE) course that builds off several previous MS Management courses. Students will leverage the contents from accounting, finance, management, marketing, strategy, and business analytics to engage with corporate partners to examine real-world problems. This course provides you with the opportunity to apply what you have learned so far in the MSM program with a live client. You will work on a project focused on business and management. Scoping the project will be a key learning outcome.

**MGMT 4410 Qualitative Research Methods (2 Credits)**

This course provides students with an overview of and experience with qualitative methods. You are introduced to a wide variety of qualitative methods, including ethnography, observation, interviewing, grounded theory, discourse analysis, deconstruction, historical methods, and action research. The course is roughly divided into two major sections. The first half of the course introduces you to the epistemological foundations of qualitative research and emphasizes design and data collection. The second half of the course introduces a variety of techniques for coding and analyzing qualitative data and provides exposure to many exemplars of qualitative reports/studies. We will examine conventions for ensuring that qualitative work is rigorous and appropriate for action. Throughout the course you will be given opportunities to try on various methods and gain some hands-on experience in several areas.

**MGMT 4425 Leading People and Organizations (2 Credits)**

We live in a VUCA (Volatile, Uncertain, Complex and Ambiguous) world. Effective leaders are skilled in navigating the challenges presented by our VUCA world – especially when it comes to leading and managing people and organizations. This course focuses on the effective leadership and management of people, every organization's most critical resource. Employees' knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. People are an organization's resources who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. Effective and ethical leaders build and sustain employees' knowledge, skills, commitment, and creativity to build collaborative cultures that foster high performance, reap the benefits of a diverse workforce, and create sustained competitive advantage. In this course, we approach business from a general management perspective, integrating concepts from organizational behavior, organization theory, human resource management, strategy, political science, and cultural anthropology. Course topics include: • Organizational structure and systems. • Selection and hiring, onboarding, motivation, feedback and coaching, and employee engagement. • Organizational politics, power dynamics, and conflict. • Organizational culture.

**MGMT 4450 Power and Influence (4 Credits)**

This course presents conceptual models, tactical approaches, and self-assessment tools to help you understand political dynamics as they unfold around you, and to develop your own influence style and negotiation skill. By focusing on specific expressions of power and influence, this course gives you the opportunity to observe its effective—and ineffective—use in different contexts and stages of a person's career. This course will challenge you to define for yourself what will constitute the effective exercise of power and influence in your life.

**MGMT 4501 Springboard Tools I (1 Credit)**

PowerPoint, Microsoft Word, Adobe, Excel, Outlook... we could hardly imagine doing business in today's world without them. CRM software will soon be regarded in the same essential way. As technology fundamentally shifts the focus of business to a completely customer-centered environment, the pervasiveness of CRM tools will only grow. Though many of these tools exist, Salesforce is one of, if not the most, prevalent CRM tools available in today's market. Used by companies of all sizes and industries, Salesforce provides a suite of products that allow organizations to place their customers at the heart of their businesses, leveraging customer data to gain valuable insights, and provide the customer with a wholistic and seamless experience and interaction with the company's brand. Salesforce's CRM software provides products for the full spectrum of customer interactions, from sales to marketing, commerce to customer service. There are several paths to developing Salesforce proficiency, ranging from a business (end) user of the product, to an administrator (someone who customizes the tool to meet business requirements), to a consultant (someone who implements Salesforce rollouts at organizations), to a marketer (an expert in Salesforce's marketing tools), and beyond.

**MGMT 4502 Springboard Tools II (1 Credit)**

Your journey to securing a career upon graduation starts with the first day of classes and continues throughout your program. The Springboard Tools courses are designed to prepare students to be career-ready upon graduation. Students will learn various tools used in business today, such as Salesforce, Python, and more as determined by the business community. In addition to understanding the tool and its application, students will be required to incorporate problem-solving techniques when using a particular tool.

**MGMT 4525 Facility Management (4 Credits)**

What is a Public Assembly Facility? Public assembly facilities such as arenas, stadiums, convention centers, and theatres evolved out of the need by social communities to build permanent structures for public assembly, for political and commercial activities, religion, sports, spectacles, artistic expression and for commercial and educational assemblies. This course examines the specific areas of responsibility that one must acknowledge and understand to operate a successful venue of this type. We discuss the core competencies required and the unique areas of concentration that separate a public assembly facility from other venue types. Students realize the significant impact and benefit that facilities like these have on the social, educational and economic environment of communities.

**MGMT 4530 Technologies for Sport & Entertainment Management (2 Credits)**

This is a specialized course for the MBA student interested in expanding their knowledge of the sports industry as a business and as a world economic force. It provides students with a framework for understanding the scope of the sports business across various venues, as it relates to information technology. Management Sport Technology focuses on understanding the practical uses of computer applications as a tool in sport management activities. Emphasis is placed on demonstrated proficiency in project management, spreadsheet management, database management, and Web page development.

**MGMT 4535 Managing Sponsorships for Sport & Entertainment Events (2 Credits)**

The purpose of this course is to give students an understanding of sports sponsorship from the perspective of the corporate sponsor and the sports entity. The course identifies and describes the several media distribution channels that are used in corporate sports sponsorship. In addition, students learn how to use sports media distribution properties to create an effective sports marketing plan for corporate sponsors. Students put together a corporate sports marketing plan with a sample sports team.

**MGMT 4540 Advanced Seminar in Sports and Entertainment Management (4 Credits)**

The purpose of this seminar is to consider current topics in sport and entertainment management. Topics vary by quarter depending on timeliness of topics and interest of students. Potential topics may include public policy questions; ethical issues; current economic impacts and analysis; sport and entertainment management factors and how the various segments (professional, amateur, collegiate, high school, recreational and others) relate; environmental impacts; global issues and other issues that impact the current and future fields of sport and entertainment management.

**MGMT 4545 Leadership, Team, and Career Development (2 Credits)**

Daniels MBA students are preparing for leadership roles-as entrepreneurs, in corporations, and in not-for-profit organizations. In this course we will look at leadership from a variety of perspectives. Once we have reviewed what the experts have to say about leadership, we will turn our focus to helping you develop your personal theory of leadership. You will answer on important questions: How will I lead? Armed with this knowledge, you will be better equipped to handle leadership challenges as you go forward in life.

**MGMT 4555 Interdisciplinary Projects for National Park Service (4 Credits)**

A practical application of key business and managerial knowledge, skills, and competencies designed to integrate graduate program elements and provide students with a unique opportunity to work on value-add projects with key managers from the National Park Service. This is an experiential course for integrating and applying multi-disciplined learning outcomes and experiences to real-world challenges, problems, and dilemmas, resulting in solutions for the National Parks Service.

**MGMT 4560 Leadership of the Future (4 Credits)**

In nearly every aspect of life - science, business, pop culture, environment, technology, global politics - we are inundated with data about how much and how fast the world is changing. How will these major shifts impact what we think of as leadership, and how can one develop to be prepared to lead in a fast-moving, volatile, and complex world? Leadership of the Future is a course that takes a deep look at how we've thought about what "leadership" is in the past from a business perspective, and considers what the future will require of leaders as they seek to effectively lead and make a difference in a complex world. The course is founded upon an interdisciplinary approach, drawing from a variety of disciplines including psychology, administrative science, literature, medicine, and philosophy. The course will center around behavioral analysis and active reflective practice: together we will think deeply about leadership as a behavior within a particular context, and as a practice to cultivate. Students will articulate a set of leadership development goals for themselves and engage experientially in service of self-observation, personal growth, and learning. Cross-listed with MGMT 3560.

**MGMT 4620 Organizational Dynamics (4 Credits)**

In this course, you will: (1) understand and develop a set of management and leadership skills critical for effectiveness in high performance work environments; (2) develop the ability to analyze organizations and environments from multiple perspectives; (3) explore policies and practices for facilitating organizational change; (4) become a valued and effective member of a work team; and (5) learn how to incorporate effective communication, critical thinking, creative problem solving, and technology, into organizational behaviors and processes.

**MGMT 4625 Leading People & Organizations (4 Credits)**

This course focuses on the effective management of people, every organization's most critical resource. Employees' knowledge, skills, commitment, creativity, and effort are the basis for sustained competitive advantage. It is people who deal directly with customers, have creative ideas for new products or for process improvements, who devise marketing strategy or take technologies to the next level. In this course, we approach the people side of business from a general management perspective, integrating concepts from organizational behavior, human resource management, strategy, and organizational design. Course topics include motivation, reward systems, engagement; feedback; processes by which work is done and decisions are made, including attention to teams, power dynamics, conflict, and negotiations; the structure of the organization and its systems, including job and organizational design and systems and policies affecting human capital; the organization's culture and history; and the external environment within which the organization operates, including legal, regulatory, demographic, economic and national cultural factors.

**MGMT 4630 Strategic Human Resources Management (4 Credits)**

This course advances the argument that effective human resource policies will create sustained competitive advantage. To that end, this course will address the effective management of human resources in various policy areas: staffing, diversity, training and development, voice and influence, performance appraisal, and reward systems. Rather than taking a traditional, staff personnel perspective, we will discuss human resource management from the strategic perspective of a general manager. Prerequisite: MGMT 4620.

**MGMT 4650 Introduction to Management Consulting (4 Credits)**

This course is designed to provide a broad overview of the management consulting profession, including its industry and competitive dynamics, major practice areas, approaches to implementation, management of consulting firms and the future of consulting. In addition, emphasis is given to the practice of consulting through the development of certain high impact skills in evaluation, proposal writing, data gathering and client presentations. The course is relevant to those who: 1) are specifically interested in consulting careers, 2) have job interests that involve staff positions in corporations, 3) want to become line managers who might one day use consultants, 4) wish to develop general consulting skills and familiarity with the consulting industry. The learning process in class will consist of lectures, cases, readings, exercises and guest speakers. This wide variety of learning methods is intended to convey both the necessary knowledge and practical skills necessary for building a sound foundation for becoming a professional consultant. It is essential that everyone comes well-prepared to class, as the learning process depends heavily upon participation.

**MGMT 4690 Strategic Management (4 Credits)**

Management 4690 focuses on the strategic management of an organization as a whole. This course will introduce students to key decisions that top executives have to make when developing and implementing strategies, methodologies for informing those decisions, and how to interpret information from those approaches to guide strategic decision-making. Overall, from the perspective of leading an organization, students will learn how strategic decisions impact a firm's competitive advantage and success.

**MGMT 4700 Topics in Management (1-4 Credits)****MGMT 4710 Sustaining Family Enterprises (4 Credits)**

Family enterprises have a tremendous impact on our local, national and global economies. Today, the definition of the family enterprise extends beyond just the business entity. It includes family offices, family "banks," family councils, trusts, and family foundations, just to name a few. Further, what happens in, and how decisions are made by, family enterprise affects not only the active family members but other key stakeholders such as inactive family members, in-laws, non-family managers and employees, professional advisors, customers, suppliers and competitors. This course gives students insight into the universe of possibilities that families, enterprises and their advisors face when engaged in systemic transition planning. This highly interdisciplinary course is appropriate for anyone who intends to work in or with family enterprises. This includes family members, accountants, attorneys, estate planners, financial or wealth managers, family office professionals, insurance consultants, business advisors, management consultants, organizational and leadership development experts, international business professionals, psychologists, social workers, and family therapists.

**MGMT 4720 Sustaining Family Enterprise (4 Credits)**

This course is intended to provide students with greater insight into the world of family enterprise. It will cover definitions, concepts, frameworks, and models to help students develop the system perspective of family, business, ownership, governance, and wealth issues. This course is applicable to those working in or governing their family enterprise (family businesses, family offices, real estate management firms, investment entities, boards, family councils, etc.), those students in or seeking careers as professional service advisors to family enterprise (accountants, estate planners, lawyers, wealth planners, psychologists, family therapists, board members, etc.), and those students with a global interest in how family enterprise affects, and is affected by, the global economy.

**MGMT 4740 Global Business I (2 Credits)**

Almost all business is impacted by global trends. This course will help students develop a global mindset and understand challenges and opportunities arising from doing business across national boundaries and cultures. Addressing such issues as diverse cultures, laws, languages, currencies and economic contexts, the course will help students make well-informed decisions giving due consideration to the local and global context in which a given business operates. This course must be taken prior to MGMT 4745 and both courses are to be taken as a sequential series.

**MGMT 4745 Global Business II (2 Credits)**

Working across national boundaries and cultures demands a new approach to business management. This course will help students assess the local environment of the country in which they intend to do business; introduces students to global aspects of marketing, finance, and management; and examines examples of opportunities associated with doing business in so-called "base of the pyramid" markets. This course must be taken after MGMT 4740 and is the second in the series.

**MGMT 4790 Managing Strategic Alliances (4 Credits)**

The purpose of this course is to examine and expand upon the current understanding of the challenges of developing and managing strategic alliances. Reflecting the breadth of the novel features of the structure, the course draws from both strategic management and organizational behavioral disciplines. To order the discussion, we take a process view in addressing why and then how to use a strategic alliance. We initially focus on when to use an alliance. We then turn to the formation of an alliance - examining how to select a partner, which structure to choose and how to negotiate. Following, we discuss post-formation issues of partner relationships, management of the alliance, performance evaluation and alliance termination. We conclude the course with sessions devoted towards managing a portfolio of alliances and network management in general.

**MGMT 4855 Executive Education – Accelerated Leadership Experience (4 Credits)**

Delivering best practices and highly applicable team building skills, the Accelerated Leadership Experience (ALX) from Daniels Executive Education is designed for managers to act as a catalyst for transformation. The result? Successful and fulfilled leaders. ALX includes both classroom and experiential activities and covers topics such as emotional intelligence, communication, coaching, feedback, wellness, stress management, energy management, team effectiveness, people development, diversity and inclusion. The support of ALX's innovative leadership curriculum, experienced faculty, and a cohort of professionals who are at similar points in their careers will help you develop the tools and skills needed to succeed in our increasingly complex world. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](http://daniels.du.edu/executive-education) for class dates and formats.

**MGMT 4875 Executive Education – Denver Leadership Experience (4 Credits)**

The Denver Leadership Experience (DLX) from Daniels' Executive Education is a transformational workshop designed to challenge you to think and perform differently in order to reach your leadership potential. This award-winning program delivers timely, relevant, and innovative leadership development essentials for our ever-changing, increasingly complex business world. Employee well-being and mental health are more important than ever, therefore this program has deepened the focus on wellness, mindfulness, and stress management; habits which great leaders implement but tend to deprioritize. In addition to our robust leadership content and faculty expertise, you'll be surrounded by a group of professionals who will bring their own experiences and input which adds value to the conversation and deepens the impact of DLX. \*This short-form workshop does not follow the traditional quarter schedule. Please check [daniels.du.edu/executive-education](http://daniels.du.edu/executive-education) for class dates and formats.

**MGMT 4980 Graduate Internship in Mgmt (0-10 Credits)**

Hours and times arranged by student.

**MGMT 4991 Independent Study (1-10 Credits)**

Individual research and report. Hours and times arranged by student.

**MGMT 4995 Independent Research (1-10 Credits)****MGMT 6300 Seminar in Leadership Strategy Research (4 Credits)**

The field of strategy is broad and covers a diverse set of 'macro' organizational theories and topics. In this course, you will have a solid overview of research in the field of strategy. This course will enable you to develop a conceptual view of the field and its theoretical roots, topics, and branches and begin to apply strategic management theories to address original research questions and to solve problems within your own organizations. This will require you to critique extant knowledge and to identify what is missing and what is needed to advance understanding. Finally, this course will provide a beginning point for your knowledge of strategy theories that can guide future pursuits. That is, it is not possible to cover the immense strategy literature in one semester but this course should provide you with the knowledge needed to explore the field of strategy on your own as you move forward.

**MGMT 6301 Research Seminar in Organizational Ethics (4 Credits)**

The seminar focuses an exploration of the role of ethics from the lens of a leader. In this area, the course examines a range of ethical and social performance issues and challenges that leaders must confront. Our goal is to broaden student understanding of the different theoretical arguments and tensions in this area, with a focus on issues faced by modern day organizations.

**MGMT 6302 Research Seminar in Leadership: An Organizational Perspective (4 Credits)**

This seminar will focus on understanding the major theoretical streams in the leadership literature with a focus on leadership within organizations. Emphasis will be placed on comparing historical trends such as trait, behavioral, contingency, and transformational/charismatic theories of leadership and exploring contemporary approaches such as servant leadership, authentic leadership, positive leadership, and shared leadership.

### Master of Science in Marketing

The Daniels Master of Science in Marketing program is a 45-credit degree that combines the in-depth study of marketing practices and principles with values-based leadership and ethical decision making. Your studies span the theoretical to the real world—from an independent study research project of your choosing to client projects that will test your marketing mettle. You'll be immersed in real-time scenarios that let you dive deep into what interests you most to stay ahead of the curve in this rapidly changing industry. We have a strong marketing community, and you will be expected to join us in exhibiting your passion for marketing and engagement with the marketing professional community, your peers and your professors.

You will engage with the Denver marketing professional community in a number of ways. Participation in the required Marketing Leadership and Professionalism series will provide interaction with professionals over the course of your program, while allowing you to sharpen your professional skills. Guest speakers will contribute in many of our classes, sharing case studies directly from their experience. You may choose to engage with Denver professionals through participating in one of the many internships offered to you. Additionally, you will also be invited to take part in several case competitions, sponsored by the professional community, as part of your degree experience.

You will engage with your peers both inside and outside of the classroom through participation in client work, in the DU Marketing Association, in study groups, and in our Marketing@Daniels community. You will engage with your professors by contributing to class discussions both in class and online, by becoming an active part of our community, by participating in our online community presence. In all, this program requires your active and thoughtful participation, applying the principles you learn to solve important client and community problems.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Master of Science in Marketing

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### Standardized Test Scores

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.

- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842. The code to submit GMAT scores for this program is MZR-GT-65.

### Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Specialized Certificate in Strategic Marketing and Innovation

The Strategic Marketing and Innovation certificate focuses on marketing and innovation to create a positive social impact. It conveys the intention to equip students with the necessary knowledge and skills to excel in integrated marketing communications and brand management while fostering innovation and driving meaningful change. It is targeted for individuals wishing to learn the various functions of marketing (innovation, corporate social responsibility, integrative marketing, and brand management or supply chain management) in order to be better equipped for a new or emerging role.

### MKTG 4000 Foundations of Marketing (0 Credits)

The Master of Science of Marketing program is a deep dive into marketing knowledge and skills. This course onboards students into the program by outlining the program structure, professional leadership and development series, and the faculty and courses that provide a core foundation of marketing. It also provides an overview of six marketing pathways for students to consider as they plan for and navigate their careers as well as the resources and people to support their transformative educational journeys.

### MKTG 4100 Marketing Concepts (4 Credits)

This course focuses on formulating and implementing marketing management strategies and tactics for providing customer value. The focus of this course is on marketing strategy – constructing an environmental scan, segmenting the market properly and targeting the appropriate markets. Once strategy has been set, brand management is considered along with using marketing tactics as levers to bring value to the customer. The course provides you with a lens through which you may view the world as a marketer, relating marketing principles to consumer and business actions. There is no degree restriction for this course for the graduate students.

### MKTG 4150 Marketing and Product Strategy (includes Entrepreneurship Challenge) (4 Credits)

You'll be creating a business plan for the Entrepreneurship Challenge and one of the most essential pieces of that plan is the go-to-market strategy, which will be your final deliverable. For the Entrepreneurship Challenge we will be using design thinking to solve a problem that we can create a business around. Design thinking is an amazing, intuitive way to develop opportunities. We will be covering marketing essentials that enable you to create a compelling go-to-market strategy for your startup. We'll cover research, promotions, product, pricing and more!.

**MKTG 4220 Customer Experience Management (4 Credits)**

Customer Experience (CX) is a customer's brand perception throughout all aspects of the buying journey. As companies integrate with digital platforms, customers are now demanding to connect with brands before purchasing and beyond the features and benefits of a product or service. Marketers are utilizing customer insights, digital preferences, Open AI, and analytics to execute and deliver an outstanding end-to-end customer experience and build brand loyalty. This is a client-project-based course that explores the 5-component framework of customer experience (CX) strategy and includes digital user experience (UX), brand experience (BX), and stakeholder experience (SX) to understand how marketing efforts can drive brand loyalty. Through industry-relevant concepts such as customer journey mapping, CX ecosystem, ESG standards, voice of the customer (VoC), and other stakeholders' experiences, students will gain a tactical understanding and execution of customer experience management plans. This is an eight-week course and includes two-day experiential learning opportunity at our Kennedy Mountain Campus (KMC). There will be a course fee for use of KMC, which is \$75.00 per student. Student must attend the weekend retreat.

**MKTG 4380 Supply Chain Management (4 Credits)**

Supply chains are everywhere, from the local store to a large multinational electronics manufacturer operating halfway across the world. From cradle to grave, it is the supply chain management system that links all of the numerous stakeholders into one strategic plan for us as customers in markets. These systems link processes such as product design, sourcing, supply chain planning, manufacturing, fulfillment, and reuse. In today's fast paced markets driven by globalization and technology, knowledgeable professionals in supply chain management are increasingly important for companies to achieve their business objectives. Some of the most successful manufacturers (e.g., Apple and Samsung) and retailers (e.g., Wal-Mart and Amazon) are winning as a result of their supply chain strategies. Especially as markets change rapidly, supply chain management professionals will be integral to a company's success. The purpose of this course is to provide a student with a baseline of knowledge, skills, and abilities to succeed in the various functions of supply chain management at a managerial level of an organization. Prerequisites: MKTG 4360 and MKTG 4370, or instructor permission. Cross-list with TRAN 4100.

**MKTG 4400 Social Awareness and Ethics (2 Credits)**

Social awareness & ethics uses a fresh integrated approach to applying the basic fundamentals of marketing to complex and evolving scenarios involving social change and insight, cultural trends and topics, and tricky, often emotional, ethical situations. This course also helps students learn skills in a safe environment and leverage their experience and knowledge to investigate business situations and opportunities in a thoughtful and sophisticated manner. This course develops a student's ability to make sound business planning decisions using real information from the external environment. This course will combine business ethics' overarching intent to protect employees, the environment, and their customers with marketing ethics' principles of honesty, fairness, responsibility, and respect. As part of this, students will learn about and apply Daniels Fund Initiate Principles: [http://www.danielsfund.org/\\_Assets/files/Ethics%20Initiative%20Principles.pdf](http://www.danielsfund.org/_Assets/files/Ethics%20Initiative%20Principles.pdf) Prerequisites: MKTG 4000.

**MKTG 4501 Client Lab I (1 Credit)**

MKTG 4501 is a requirement to be taken concurrently with a distinct marketing class over the duration of your program. In this course, you will be working with a business client to identify and solve a client problem in the area of focus for the companion course. By taking this course and solving three different types of client problems, over the duration of your program, you will have the chance to sharpen your problem identification abilities and to work with marketing professionals, demonstrating your marketing ability.

**MKTG 4510 Consumer Behavior (4 Credits)**

What makes consumers tick? This course draws on a variety of sources, including concepts and models from psychology, sociology, anthropology, and economics, to offer helpful frameworks for understanding the underlying drivers of consumer behavior. This course places a special emphasis on the cultural contexts that influence consumers. Students will learn and apply qualitative and experimental research methods used to study consumers to derive key insights for making marketing decisions. Prerequisite: MKTG 4000, MKTG 4100, or instructor permission.

**MKTG 4515 International Consumer Behavior (4 Credits)**

The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond ones' home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Prerequisites: MKTG 4510.

**MKTG 4520 Marketing Analytics (4 Credits)**

There's no escape; even marketing managers need to understand financials. This course is designed to introduce MS Marketing students to the principles of financial decision-making and the use of marketing metrics, including customer lifetime value (CLV) and media mix modeling. Students learn how to compute marketing ROI and how to make marketing decisions that enhance the bottom line. Prerequisites: MKTG 4510 or instructor permission.

**MKTG 4530 Marketing Research (4 Credits)**

Understanding consumers requires careful observation and thoughtful questions. Marketing research represents a methodology for getting the answers needed to be successful in business. This course introduces students to a broad array of marketing research tools relying on primary and secondary data, including interviews, focus groups, ethnographic studies, survey research, and experiments. Students will learn how and when to apply these tools, as well as how to interpret the results to make sound marketing decisions. Prerequisite: MKTG 4000, MKTG 4100, or instructor permission.

**MKTG 4540 Product and Service Innovation (4 Credits)**

Developing and introducing new products and services are the lifeblood for companies and a primary responsibility of product management. This course is focused on the most current innovations in materials, hardware, CPG, and software. This is a travel course and students will be required to travel to the Consumer Electronics Show in addition to attending class on campus. We'll be using Google Ventures rapid sprint framework to develop/test new product ideas. At least eight hours of graduate level MKTG courses or with instructor permission.

**MKTG 4550 Marketing Planning (4 Credits)**

It has been said that "planning without action is futile, and action without planning is fatal." The objective of this course is to enable students to utilize a rigorous planning process to develop action-oriented marketing programs. This activity involves an integrated application of concepts and theories characterized by the logical use of facts -- leading to alternatives -- leading to actions. By the end of the course students should be able to develop effective marketing programs, and to understand the strength and limitations of the principal planning tools a marketing manager has at his/her disposal. The skills developed in this class are particularly important because many organizations now use the marketing plan as the basis for developing the business plan. In fact, marketing-developed plans often must precede the subsequent decisions in planning production, finance, and other corporate activities. Each student will apply the planning process, develop an action plan, and identify specific marketing outcomes for an existing or prospective enterprise. The course utilizes current practices, contemporary exemplars, and rigorous communication/presentation platforms.

**MKTG 4560 Pricing Strategy (4 Credits)**

This course provides an overview of all aspects of Pricing, a key driver of growth and profitability. As one of the 4 "Ps" of Marketing, attention and interest in Pricing is growing. This is not surprising, given that Price is the one "P" that drives the topline, with a direct impact on revenue growth, customer growth, market share, and profitability. This Pricing survey course examines established and emerging pricing strategies and principles. In addition, students learn some basic analytical tools that can be applied to pricing strategy decisions and explore approaches to optimize the impact of pricing strategies and tactics, including segmentation, addressing the competition, and communicating value. Prerequisites: MKTG 4510, MKTG 4520, and MKTG 4530 or instructor permission.

**MKTG 4570 Digital Strategies (4 Credits)**

We're 20 years into the digital marketing revolution and the ecosystem continues to evolve. From the birth of the Internet and email to the recent addition of messaging apps and the Internet of Things: It's a fantastic time to be a marketer. In this class, we will take what you learned in consumer behavior and extend it in the social/mobile/search realm. We'll utilize lessons learned from cognitive neuroscience combined with qualitative/quantitative data to create one-to-one marketing experiences for B2B/B2C consumers. Prerequisites: MKTG 4510 or instructor permission.

**MKTG 4580 Insights to Innovation (4 Credits)**

Consumer insights are a driving force behind innovation for industries, organizations, and products. To remain relevant in the marketplace, companies must innovate. Creating new products, services, or processes requires the contributions of multiple stakeholders, including the voice of the customer. Students will gather secondary and primary data and apply it to design processes and models to optimize value creation and drive innovation. Students will learn how consumer insights can enable the development and enhancement of compelling value propositions. Through a thoughtful design process, students will develop a new product, brand the product, and determine a go-to-market strategy. The learning outcomes include how to apply the design-thinking framework, identify human-centered insights, and collaborate to innovate and create delightful customer experiences. Prerequisite: MKTG 4100.

**MKTG 4605 Current Marketing Perspectives (4 Credits)**

Like most disciplines, marketing is evolving constantly. One can learn about marketing and its classic terms and notions by reading a textbook. But to familiarize oneself with the current pressing issues, emerging ideas, and innovative applications, one must consult both industry practitioners and academic gurus. In this course, students and faculty will meet and interview several top business executives in the Denver area as well as visit their facilities. Such interaction with the managers and faculty will help the students understand the interface of theory and application. In addition, by identifying the current issues in marketing and learning how to develop strategies to handle them, students add to their preparation for the job market.

**MKTG 4612 Customer Experience Management (1 Credit)**

Sprint Course at the Kennedy Mountain Campus Navigating Excellence: The Power of Customer Experience Join our transformative Customer Experience Management (CX) short program (Sprint/Immersion) and expand your student 4D experience! This course is led by seasoned CX consulting professionals to bring real-world applications to an "outdoor" classroom. This dynamic program equips you with essential skills to begin to build a CX management program. Dive into CX competency framework, design thinking, data insights, and strategy. Immerse yourself at the University of Denver's Kennedy Mountain Campus, surrounded by breathtaking vistas and while discussing pressing business challenges. Through industry relevant concepts such as customer journey mapping, CX ecosystem, stakeholder engagement, voice of the customer (VoC) students will gain tactical understanding and execution of customer experience management planning. Elevate your student journey through the power of customer experience.

**MKTG 4630 International Marketing (4 Credits)**

The shrinking planet and constant pressure to maintain a firm's growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international contexts. It includes a combination of lectures and discussions, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisites: MKTG 4100.

**MKTG 4635 International Consumer Behavior (4 Credits)**

The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond ones' home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Cross-listed with MKTG 3635. Prerequisite: MKTG 4510 or instructor permission.

**MKTG 4655 Leading the Sales Organization: Structure, Strategy, and Management (4 Credits)**

Sales force design, strategy, and management provides both a strategic as well as a tactical perspective on the sales function. The course is suitable for anyone who will at some point in their career have a managerial position in an organization where salespeople are an integral part of the marketing mix. Topics discussed in class cover various elements of sales force design, strategy, and management including the role of salespeople in company's go-to-market strategy, design of sales organization structure, different sales role structures (inside vs. field etc.), territory management and quota (goal) setting, incentive and compensation design, and hiring and training strategies.

**MKTG 4660 Sports & Entertainment Marketing (4 Credits)**

There are few products for which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorships or driving event ticket sales. Participation in a current sports marketing project provides context for graduate students to apply theory to practice. Cross listed with MKTG 3660. Prerequisites: MKTG 4100.

**MKTG 4670 Competitive Strategies (4 Credits)**

This course will examine what is happening in the world of corporate marketing today. Which companies' marketing strategies are working and why? Which are not working and why? Who is winning in the competitive marketplace and who is losing? How do you know? What is the connection between a company's marketing strategy and its financial strategy? Prerequisites: MKTG 4100.

**MKTG 4675 Marketing for Social Impact (4 Credits)**

The integration of Impact + Profit is one of the biggest trends in the startup world—influencing socially-responsible products and driving cause-related branding, customer choice, and loyalty. Marketing for social impact is multifaceted and requires an understanding of how Impact + Profit is essential to social enterprises, B Corps, and nonprofits. Through this course students will develop themselves as purpose-driven professionals knowledgeable in the latest trends of story-driven marketing, conscious capitalism, and social psychology. This course builds upon students' understanding of Design Thinking to think strategically about value creation as it relates to Impact + Profit. Upon completion of the course, students will understand the relationship between business and social good, as well as acquire the necessary knowledge and skills to design a marketing campaign specific to a social enterprise, B Corp or nonprofit. Applicable to all facets of the business and nonprofit world, this advanced elective is open to all MBA students and provides skills and knowledge to help you be indispensable to your company or organization. Prerequisites: MKTG 4100 and any additional 4000-level MKTG course.

**MKTG 4705 Topics in Marketing (1-4 Credits)**

TOPIC CHANGES EACH TERM.

**MKTG 4800 Global Integrated Marketing Communication (4 Credits)**

The Global IMC class is for graduates who have worked in marketing communications or have taken marketing communications classes and want to gain an understanding of how use this knowledge in the global marketplace. It helps students to understand similarities and differences between markets and how to most effectively approach them. What are the IMC tools that work best and how do you use them with cultural sensitivity? The class features a number of guest speakers and at least one off-site agency visit. The finale to this high-intensity class will have competing teams creating a global campaign. Prerequisites: MKTG 4810 or instructor permission.

**MKTG 4805 Foundations of Digital Marketing (4 Credits)**

According to LinkedIn, the "Digital Marketing Specialist" role is among the top 10 most in-demand jobs in the USA. Knowing how to utilize digital marketing tools as part of a business strategy is critical in today's marketplace. This course provides the knowledge and skills necessary to plan and implement a digital marketing strategy, create and manage digital marketing campaigns, and select and utilize the most effective tools and technologies to achieve the business's objectives. This is a hands-on course where students will learn how to successfully integrate online tools, including user experience (UX), search engine optimization, pay-per-click advertising, email marketing, content marketing, reputation management, social media, and AI (e.g., ChatGPT.com / WriteSonic.com), within the overall marketing mix. Through simulations, certifications, and in-class assignments, students will acquire the fundamental digital experience that is a "must-have" for a marketing career in today's workplace. Cross listed with MKTG 3480.

**MKTG 4810 Integrated Marketing Communication (4 Credits)**

Integrated Marketing Communication (IMC), sometimes referred to as marketing campaigns, is a critical component of a marketing strategy and is vital for the success of any business. Organizational, technological, and societal trends over the past few years have presented marketers with a challenge: determining which marketing channels are needed to gain traction, engage customers, and drive economic growth. It's essential to integrate all marketing activities into one master short-term campaign plan. This client-project-based course is designed with the notion that marketing communications encompass much more than traditional advertising or social media, focusing on a multi-channel and integrated approach. Some of the concepts covered include consumer insights, branding, market segmentation, targeting, and positioning. The course provides a foundation in the development and execution of campaign strategies using digital tools, including AI, and promotional strategies through data-driven decision-making. Prerequisites: MKTG 4100 & MKTG 4510 or instructor permission.

**MKTG 4815 Social Media Marketing (4 Credits)**

(4 credit hours) Social Media Marketing is used by marketers to increase brand awareness, identify key audiences, generate leads, and build meaningful relationships with customers. Social media allows businesses to gain a competitive advantage through the creation and distribution of valuable, relevant, and consistent content to attract and retain clearly defined audiences. Marketing professionals entering the workforce today need to be equipped with how to utilize new and constantly updated social media marketing strategies for businesses. By the end of the course, students will know how to implement a successful content strategy for multiple platforms including but not limited to Facebook, Instagram, Twitter, Snapchat, Pinterest, LinkedIn, and YouTube. We will be working with real-world clients and scenarios to help them drive marketing ROI! Cross-listed with MKTG 3490. Prerequisites: MKTG 4100.

**MKTG 4820 Brand Management (4 Credits)**

Designing a compelling brand is the foundation of marketing. Explore the intricacies of developing a brand strategy to drive growth and ensure consistent brand messaging across the company and product/service lifecycle. Through this client-based course, explore how organizations create a compelling corporate image that inspires trust, builds a sense of community, differentiates, and fosters loyalty to generate brand value. As the digital landscape propels and empowers consumers, discover how brands are co-creating with customers to increase inclusiveness while reducing risk. Learn the concepts and models from brand authorities, then apply this knowledge to real-world business challenges. The learning outcomes are to create a goal-driven brand plan, harness tactics to cultivate brand loyalty, foster brand experiences, and ultimately build sustainable brand equity while measuring success. Prerequisite: MKTG 4100. Concurrent enrollment with MKTG 4100 allowed.

**MKTG 4825 Mobile Marketing (4 Credits)**

(4 credit hours) Smartphones are the device for today's consumer. Mobile usage easily eclipses all other digital venues, and you will be learning how to harness this ever-evolving field. Knowledge of mobile search, mobile applications, mobile advertising, and location-based services are essential for today's business leaders. This course covers how mobile marketing is defining business today, including strategy, tracking ROI, advertising, mobile websites, mobile apps, text messaging, QR codes, and the laws and ethics of mobile marketing. Students will use the design thinking process to design a mobile app and create a prototype of the app to solve their target market's problem. At the end of the course, students will deliver a prototype of the mobile app and a mobile marketing plan to promote their mobile tactics. Cross-listed with MKTG3475. Prerequisite: MKTG 4100.

**MKTG 4835 Search Engine Marketing: Google Analytics & Google Ads (4 Credits)**

(4 credit hours) Search marketing is the cornerstone of many digital marketing campaigns. An understanding of consumers' search behavior provides deep insight into how people make purchasing decisions and form brand affinities. This course examines the strategic use of search engine optimization in marketing to build profitable customer relationships. Topics in the course will include consumer search behavior, search engines and algorithms, website user-experience, on- and off-page SEO, and strategies for conducting SEO campaigns for traditional and niche search engines. The course is designed to teach the fundamentals of SEO through experience with Google Ads and Google Analytics. By the end of this course, students obtain relevant and applicable certifications in search engine marketing. Cross listed with MKTG 3485.

**MKTG 4845 Tech in Marketing: Design Tools and Digital Foundations (4 Credits)**

"Software is eating the world." That was the quote from Marc Andreessen way back in 2011. His point was now that software had disrupted the tech industry, it was now evolving into every other industry. Agriculture. Mass transit. Construction. Everything. This prediction has become true with companies like Google and Uber. We're at a point where coding/technology are now a matter of literacy. We are going to work together as a class to make you more literate. We are going to learn how to utilize digital design tools such as Adobe Photoshop and Illustrator to create brand imagery. We'll then move on to learn HTML/CSS and APIs: the building blocks of the Internet. We'll also spend some time prototyping software such as Axure and tap into memes and Gifs. This is a tactical, hands-on class. Cross-listed with MKTG 3495.

**MKTG 4850 Integrated Marketing Communication Campaign (4 Credits)**

This course builds on all of the courses in the IMC program/concentration as well as other courses offered through the Department of Marketing. In this sense, it is a capstone course, integrating the knowledge and experience acquired through these other courses. Integration is the primary objective of this course—that is, to develop skills in integrating content from other courses into a complete IMC campaign for a brand of the student's choice. IMC Campaign is a major project course with a single significant outcome, the IMC Campaign. The project is conducted in a team environment with the guidance of the instructor. Prerequisites: MKTG 4810 or instructor permission.

**MKTG 4860 Data Science for Marketers (4 Credits)**

Data is an essential part of (digital) marketing. In fact, data enables the promise of digital marketing: real-time feedback enabling businesses, marketing campaigns to pivot and become predictive. We'll cover what it takes to become a data-driven organization and how to tell stories through data.

**MKTG 4865 SXSWi: Marketing, Technology & Innovation (4 Credits)**

This class is focused on documenting/sharing lessons learned from the SXSWi conference in Austin Texas, the premier innovation conference in the US. The course is divided into two distinct halves. First, we will research the SXSWi sessions around subject matter and speaker background as well as planning the final deliverable that summarizes the entire SXSWi event. The second half includes participation in the conference to learn the most up-to-date digital marketing techniques in social, mobile, data and usability.

**MKTG 4900 Advanced Marketing Strategy (4 Credits)**

Making sound strategic marketing decisions in the real world is complex and challenging, even for seasoned executives. Determining sound strategies is critical. Implementing them effectively and profitably is essential. How can managers increase their chances for making better strategic marketing decisions leading to more successful outcomes more often? This course applies concepts, constructs and learning acquired in prior marketing courses to complex strategic decisions. Live cases are at the heart of the course, challenging teams and individuals to make specific marketing decisions in the context of larger strategic marketing and company contexts, including accounting for top- and bottom-line impact. Prerequisites: At least eight hours of graduate level MKTG courses or with instructor permission.

**MKTG 4980 Marketing Internship (0-10 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are required to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities. We learn by doing. That's what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein's, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will students earn school credit, they may very well land a paid internship, and eventually a full-time job.

**MKTG 4981 Marketing Leadership and Professional Development I (1 Credit)**

This course involves several executive coaching experiences. In the Fall Quarter, you will participate in a weekend leadership experience, where you develop self-awareness of your style as a member and leader of a team. This experience will help build relationships with others in the program and with program faculty, setting you up for successful team experiences in the year ahead. Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4982 Marketing Leadership and Professional Development II (1 Credit)**

Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4983 Marketing Leadership and Professional Development III (1 Credit)**

Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4991 Independent Study (1-10 Credits)**

Hours and times arranged by student.

**MKTG 4999 Marketing Assessment (0 Credits)**

This course, taken at the end of the MS Marketing program, is designed to assess what students know and can do as a result of being in the program, as well as to capture student feedback about the overall program. The assessments provide input to the Marketing faculty to enable continuous improvement in the program.

**MKTG 6300 Seminar in Marketing (4 Credits)**

This doctoral seminar focuses on research in marketing. This course will expose students to cutting-edge research in marketing in order to help them define and advance their research interests. This course will also offer in-depth discussions on some important topics in marketing and tools and methodologies required for conducting research in those areas.

## Courses

### **MKTG 4000 Foundations of Marketing (0 Credits)**

The Master of Science of Marketing program is a deep dive into marketing knowledge and skills. This course onboards students into the program by outlining the program structure, professional leadership and development series, and the faculty and courses that provide a core foundation of marketing. It also provides an overview of six marketing pathways for students to consider as they plan for and navigate their careers as well as the resources and people to support their transformative educational journeys.

### **MKTG 4100 Marketing Concepts (4 Credits)**

This course focuses on formulating and implementing marketing management strategies and tactics for providing customer value. The focus of this course is on marketing strategy – constructing an environmental scan, segmenting the market properly and targeting the appropriate markets. Once strategy has been set, brand management is considered along with using marketing tactics as levers to bring value to the customer. The course provides you with a lens through which you may view the world as a marketer, relating marketing principles to consumer and business actions. There is no degree restriction for this course for the graduate students.

### **MKTG 4150 Marketing and Product Strategy (includes Entrepreneurship Challenge) (4 Credits)**

You'll be creating a business plan for the Entrepreneurship Challenge and one of the most essential pieces of that plan is the go-to-market strategy, which will be your final deliverable. For the Entrepreneurship Challenge we will be using design thinking to solve a problem that we can create a business around. Design thinking is an amazing, intuitive way to develop opportunities. We will be covering marketing essentials that enable you to create a compelling go-to-market strategy for your startup. We'll cover research, promotions, product, pricing and more!

### **MKTG 4220 Customer Experience Management (4 Credits)**

Customer Experience (CX) is a customer's brand perception throughout all aspects of the buying journey. As companies integrate with digital platforms, customers are now demanding to connect with brands before purchasing and beyond the features and benefits of a product or service. Marketers are utilizing customer insights, digital preferences, Open AI, and analytics to execute and deliver an outstanding end-to-end customer experience and build brand loyalty. This is a client-project-based course that explores the 5-component framework of customer experience (CX) strategy and includes digital user experience (UX), brand experience (BX), and stakeholder experience (SX) to understand how marketing efforts can drive brand loyalty. Through industry-relevant concepts such as customer journey mapping, CX ecosystem, ESG standards, voice of the customer (VoC), and other stakeholders' experiences, students will gain a tactical understanding and execution of customer experience management plans. This is an eight-week course and includes two-day experiential learning opportunity at our Kennedy Mountain Campus (KMC). There will be a course fee for use of KMC, which is \$75.00 per student. Student must attend the weekend retreat.

### **MKTG 4380 Supply Chain Management (4 Credits)**

Supply chains are everywhere, from the local store to a large multinational electronics manufacturer operating halfway across the world. From cradle to grave, it is the supply chain management system that links all of the numerous stakeholders into one strategic plan for us as customers in markets. These systems link processes such as product design, sourcing, supply chain planning, manufacturing, fulfillment, and reuse. In today's fast paced markets driven by globalization and technology, knowledgeable professionals in supply chain management are increasingly important for companies to achieve their business objectives. Some of the most successful manufacturers (e.g., Apple and Samsung) and retailers (e.g., Wal-Mart and Amazon) are winning as a result of their supply chain strategies. Especially as markets change rapidly, supply chain management professionals will be integral to a company's success. The purpose of this course is to provide a student with a baseline of knowledge, skills, and abilities to succeed in the various functions of supply chain management at a managerial level of an organization. Prerequisites: MKTG 4360 and MKTG 4370, or instructor permission. Cross-list with TRAN 4100.

### **MKTG 4400 Social Awareness and Ethics (2 Credits)**

Social awareness & ethics uses a fresh integrated approach to applying the basic fundamentals of marketing to complex and evolving scenarios involving social change and insight, cultural trends and topics, and tricky, often emotional, ethical situations. This course also helps students learn skills in a safe environment and leverage their experience and knowledge to investigate business situations and opportunities in a thoughtful and sophisticated manner. This course develops a student's ability to make sound business planning decisions using real information from the external environment. This course will combine business ethics' overarching intent to protect employees, the environment, and their customers with marketing ethics' principles of honesty, fairness, responsibility, and respect. As part of this, students will learn about and apply Daniels Fund Initiate Principles: [http://www.danielsfund.org/\\_Assets/files/Ethics%20Initiative%20Principles.pdf](http://www.danielsfund.org/_Assets/files/Ethics%20Initiative%20Principles.pdf) Prerequisites: MKTG 4000.

### **MKTG 4501 Client Lab I (1 Credit)**

MKTG 4501 is a requirement to be taken concurrently with a distinct marketing class over the duration of your program. In this course, you will be working with a business client to identify and solve a client problem in the area of focus for the companion course. By taking this course and solving three different types of client problems, over the duration of your program, you will have the chance to sharpen your problem identification abilities and to work with marketing professionals, demonstrating your marketing ability.

### **MKTG 4510 Consumer Behavior (4 Credits)**

What makes consumers tick? This course draws on a variety of sources, including concepts and models from psychology, sociology, anthropology, and economics, to offer helpful frameworks for understanding the underlying drivers of consumer behavior. This course places a special emphasis on the cultural contexts that influence consumers. Students will learn and apply qualitative and experimental research methods used to study consumers to derive key insights for making marketing decisions. Prerequisite: MKTG 4000, MKTG 4100, or instructor permission.

**MKTG 4515 International Consumer Behavior (4 Credits)**

The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond ones' home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Prerequisites: MKTG 4510.

**MKTG 4520 Marketing Analytics (4 Credits)**

There's no escape; even marketing managers need to understand financials. This course is designed to introduce MS Marketing students to the principles of financial decision-making and the use of marketing metrics, including customer lifetime value (CLV) and media mix modeling. Students learn how to compute marketing ROI and how to make marketing decisions that enhance the bottom line. Prerequisites: MKTG 4510 or instructor permission.

**MKTG 4530 Marketing Research (4 Credits)**

Understanding consumers requires careful observation and thoughtful questions. Marketing research represents a methodology for getting the answers needed to be successful in business. This course introduces students to a broad array of marketing research tools relying on primary and secondary data, including interviews, focus groups, ethnographic studies, survey research, and experiments. Students will learn how and when to apply these tools, as well as how to interpret the results to make sound marketing decisions. Prerequisite: MKTG 4000, MKTG 4100, or instructor permission.

**MKTG 4540 Product and Service Innovation (4 Credits)**

Developing and introducing new products and services are the lifeblood for companies and a primary responsibility of product management. This course is focused on the most current innovations in materials, hardware, CPG, and software. This is a travel course and students will be required to travel to the Consumer Electronics Show in addition to attending class on campus. We'll be using Google Ventures rapid sprint framework to develop/test new product ideas. At least eight hours of graduate level MKTG courses or with instructor permission.

**MKTG 4550 Marketing Planning (4 Credits)**

It has been said that "planning without action is futile, and action without planning is fatal." The objective of this course is to enable students to utilize a rigorous planning process to develop action-oriented marketing programs. This activity involves an integrated application of concepts and theories characterized by the logical use of facts -- leading to alternatives -- leading to actions. By the end of the course students should be able to develop effective marketing programs, and to understand the strength and limitations of the principal planning tools a marketing manager has at his/her disposal. The skills developed in this class are particularly important because many organizations now use the marketing plan as the basis for developing the business plan. In fact, marketing-developed plans often must precede the subsequent decisions in planning production, finance, and other corporate activities. Each student will apply the planning process, develop an action plan, and identify specific marketing outcomes for an existing or prospective enterprise. The course utilizes current practices, contemporary exemplars, and rigorous communication/presentation platforms.

**MKTG 4560 Pricing Strategy (4 Credits)**

This course provides an overview of all aspects of Pricing, a key driver of growth and profitability. As one of the 4 "Ps" of Marketing, attention and interest in Pricing is growing. This is not surprising, given that Price is the one "P" that drives the topline, with a direct impact on revenue growth, customer growth, market share, and profitability. This Pricing survey course examines established and emerging pricing strategies and principles. In addition, students learn some basic analytical tools that can be applied to pricing strategy decisions and explore approaches to optimize the impact of pricing strategies and tactics, including segmentation, addressing the competition, and communicating value. Prerequisites: MKTG 4510, MKTG 4520, and MKTG 4530 or instructor permission.

**MKTG 4570 Digital Strategies (4 Credits)**

We're 20 years into the digital marketing revolution and the ecosystem continues to evolve. From the birth of the Internet and email to the recent addition of messaging apps and the Internet of Things: It's a fantastic time to be a marketer. In this class, we will take what you learned in consumer behavior and extend it in the social/mobile/search realm. We'll utilize lessons learned from cognitive neuroscience combined with qualitative/quantitative data to create one-to-one marketing experiences for B2B/B2C consumers. Prerequisites: MKTG 4510 or instructor permission.

**MKTG 4580 Insights to Innovation (4 Credits)**

Consumer insights are a driving force behind innovation for industries, organizations, and products. To remain relevant in the marketplace, companies must innovate. Creating new products, services, or processes requires the contributions of multiple stakeholders, including the voice of the customer. Students will gather secondary and primary data and apply it to design processes and models to optimize value creation and drive innovation. Students will learn how consumer insights can enable the development and enhancement of compelling value propositions. Through a thoughtful design process, students will develop a new product, brand the product, and determine a go-to-market strategy. The learning outcomes include how to apply the design-thinking framework, identify human-centered insights, and collaborate to innovate and create delightful customer experiences. Prerequisite: MKTG 4100.

**MKTG 4605 Current Marketing Perspectives (4 Credits)**

Like most disciplines, marketing is evolving constantly. One can learn about marketing and its classic terms and notions by reading a textbook. But to familiarize oneself with the current pressing issues, emerging ideas, and innovative applications, one must consult both industry practitioners and academic gurus. In this course, students and faculty will meet and interview several top business executives in the Denver area as well as visit their facilities. Such interaction with the managers and faculty will help the students understand the interface of theory and application. In addition, by identifying the current issues in marketing and learning how to develop strategies to handle them, students add to their preparation for the job market.

**MKTG 4612 Customer Experience Management (1 Credit)**

Sprint Course at the Kennedy Mountain Campus Navigating Excellence: The Power of Customer Experience Join our transformative Customer Experience Management (CX) short program (Sprint/Immersion) and expand your student 4D experience! This course is led by seasoned CX consulting professionals to bring real-world applications to an "outdoor" classroom. This dynamic program equips you with essential skills to begin to build a CX management program. Dive into CX competency framework, design thinking, data insights, and strategy. Immerse yourself at the University of Denver's Kennedy Mountain Campus, surrounded by breathtaking vistas and while discussing pressing business challenges. Through industry relevant concepts such as customer journey mapping, CX ecosystem, stakeholder engagement, voice of the customer (VoC) students will gain tactical understanding and execution of customer experience management planning. Elevate your student journey through the power of customer experience.

**MKTG 4630 International Marketing (4 Credits)**

The shrinking planet and constant pressure to maintain a firm's growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international contexts. It includes a combination of lectures and discussions, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisites: MKTG 4100.

**MKTG 4635 International Consumer Behavior (4 Credits)**

The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond ones' home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Cross-listed with MKTG 3635. Prerequisite: MKTG 4510 or instructor permission.

**MKTG 4655 Leading the Sales Organization: Structure, Strategy, and Management (4 Credits)**

Sales force design, strategy, and management provides both a strategic as well as a tactical perspective on the sales function. The course is suitable for anyone who will at some point in their career have a managerial position in an organization where salespeople are an integral part of the marketing mix. Topics discussed in class cover various elements of sales force design, strategy, and management including the role of salespeople in company's go-to-market strategy, design of sales organization structure, different sales role structures (inside vs. field etc.), territory management and quota (goal) setting, incentive and compensation design, and hiring and training strategies.

**MKTG 4660 Sports & Entertainment Marketing (4 Credits)**

There are few products for which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorships or driving event ticket sales. Participation in a current sports marketing project provides context for graduate students to apply theory to practice. Cross listed with MKTG 3660. Prerequisites: MKTG 4100.

**MKTG 4670 Competitive Strategies (4 Credits)**

This course will examine what is happening in the world of corporate marketing today. Which companies' marketing strategies are working and why? Which are not working and why? Who is winning in the competitive marketplace and who is losing? How do you know? What is the connection between a company's marketing strategy and its financial strategy? Prerequisites: MKTG 4100.

**MKTG 4675 Marketing for Social Impact (4 Credits)**

The integration of Impact + Profit is one of the biggest trends in the startup world—influencing socially-responsible products and driving cause-related branding, customer choice, and loyalty. Marketing for social impact is multifaceted and requires an understanding of how Impact + Profit is essential to social enterprises, B Corps, and nonprofits. Through this course students will develop themselves as purpose-driven professionals knowledgeable in the latest trends of story-driven marketing, conscious capitalism, and social psychology. This course builds upon students' understanding of Design Thinking to think strategically about value creation as it relates to Impact + Profit. Upon completion of the course, students will understand the relationship between business and social good, as well as acquire the necessary knowledge and skills to design a marketing campaign specific to a social enterprise, B Corp or nonprofit. Applicable to all facets of the business and nonprofit world, this advanced elective is open to all MBA students and provides skills and knowledge to help you be indispensable to your company or organization. Prerequisites: MKTG 4100 and any additional 4000-level MKTG course.

**MKTG 4705 Topics in Marketing (1-4 Credits)**

TOPIC CHANGES EACH TERM.

**MKTG 4800 Global Integrated Marketing Communication (4 Credits)**

The Global IMC class is for graduates who have worked in marketing communications or have taken marketing communications classes and want to gain an understanding of how use this knowledge in the global marketplace. It helps students to understand similarities and differences between markets and how to most effectively approach them. What are the IMC tools that work best and how do you use them with cultural sensitivity? The class features a number of guest speakers and at least one off-site agency visit. The finale to this high-intensity class will have competing teams creating a global campaign. Prerequisites: MKTG 4810 or instructor permission.

**MKTG 4805 Foundations of Digital Marketing (4 Credits)**

According to LinkedIn, the "Digital Marketing Specialist" role is among the top 10 most in-demand jobs in the USA. Knowing how to utilize digital marketing tools as part of a business strategy is critical in today's marketplace. This course provides the knowledge and skills necessary to plan and implement a digital marketing strategy, create and manage digital marketing campaigns, and select and utilize the most effective tools and technologies to achieve the business's objectives. This is a hands-on course where students will learn how to successfully integrate online tools, including user experience (UX), search engine optimization, pay-per-click advertising, email marketing, content marketing, reputation management, social media, and AI (e.g., ChatGPT.com / WriteSonic.com), within the overall marketing mix. Through simulations, certifications, and in-class assignments, students will acquire the fundamental digital experience that is a "must-have" for a marketing career in today's workplace. Cross listed with MKTG 3480.

**MKTG 4810 Integrated Marketing Communication (4 Credits)**

Integrated Marketing Communication (IMC), sometimes referred to as marketing campaigns, is a critical component of a marketing strategy and is vital for the success of any business. Organizational, technological, and societal trends over the past few years have presented marketers with a challenge: determining which marketing channels are needed to gain traction, engage customers, and drive economic growth. It's essential to integrate all marketing activities into one master short-term campaign plan. This client-project-based course is designed with the notion that marketing communications encompass much more than traditional advertising or social media, focusing on a multi-channel and integrated approach. Some of the concepts covered include consumer insights, branding, market segmentation, targeting, and positioning. The course provides a foundation in the development and execution of campaign strategies using digital tools, including AI, and promotional strategies through data-driven decision-making. Prerequisites: MKTG 4100 & MKTG 4510 or instructor permission.

**MKTG 4815 Social Media Marketing (4 Credits)**

(4 credit hours) Social Media Marketing is used by marketers to increase brand awareness, identify key audiences, generate leads, and build meaningful relationships with customers. Social media allows businesses to gain a competitive advantage through the creation and distribution of valuable, relevant, and consistent content to attract and retain clearly defined audiences. Marketing professionals entering the workforce today need to be equipped with how to utilize new and constantly updated social media marketing strategies for businesses. By the end of the course, students will know how to implement a successful content strategy for multiple platforms including but not limited to Facebook, Instagram, Twitter, Snapchat, Pinterest, LinkedIn, and YouTube. We will be working with real-world clients and scenarios to help them drive marketing ROI! Cross-listed with MKTG 3490. Prerequisites: MKTG 4100.

**MKTG 4820 Brand Management (4 Credits)**

Designing a compelling brand is the foundation of marketing. Explore the intricacies of developing a brand strategy to drive growth and ensure consistent brand messaging across the company and product/service lifecycle. Through this client-based course, explore how organizations create a compelling corporate image that inspires trust, builds a sense of community, differentiates, and fosters loyalty to generate brand value. As the digital landscape propels and empowers consumers, discover how brands are co-creating with customers to increase inclusiveness while reducing risk. Learn the concepts and models from brand authorities, then apply this knowledge to real-world business challenges. The learning outcomes are to create a goal-driven brand plan, harness tactics to cultivate brand loyalty, foster brand experiences, and ultimately build sustainable brand equity while measuring success. Prerequisite: MKTG 4100. Concurrent enrollment with MKTG 4100 allowed.

**MKTG 4825 Mobile Marketing (4 Credits)**

(4 credit hours) Smartphones are the device for today's consumer. Mobile usage easily eclipses all other digital venues, and you will be learning how to harness this ever-evolving field. Knowledge of mobile search, mobile applications, mobile advertising, and location-based services are essential for today's business leaders. This course covers how mobile marketing is defining business today, including strategy, tracking ROI, advertising, mobile websites, mobile apps, text messaging, QR codes, and the laws and ethics of mobile marketing. Students will use the design thinking process to design a mobile app and create a prototype of the app to solve their target market's problem. At the end of the course, students will deliver a prototype of the mobile app and a mobile marketing plan to promote their mobile tactics. Cross-listed with MKTG3475. Prerequisite: MKTG 4100.

**MKTG 4835 Search Engine Marketing: Google Analytics & Google Ads (4 Credits)**

(4 credit hours) Search marketing is the cornerstone of many digital marketing campaigns. An understanding of consumers' search behavior provides deep insight into how people make purchasing decisions and form brand affinities. This course examines the strategic use of search engine optimization in marketing to build profitable customer relationships. Topics in the course will include consumer search behavior, search engines and algorithms, website user-experience, on- and off-page SEO, and strategies for conducting SEO campaigns for traditional and niche search engines. The course is designed to teach the fundamentals of SEO through experience with Google Ads and Google Analytics. By the end of this course, students obtain relevant and applicable certifications in search engine marketing. Cross listed with MKTG 3485.

**MKTG 4845 Tech in Marketing: Design Tools and Digital Foundations (4 Credits)**

"Software is eating the world." That was the quote from Marc Andreessen way back in 2011. His point was now that software had disrupted the tech industry, it was now evolving into every other industry. Agriculture. Mass transit. Construction. Everything. This prediction has become true with companies like Google and Uber. We're at a point where coding/technology are now a matter of literacy. We are going to work together as a class to make you more literate. We are going to learn how to utilize digital design tools such as Adobe Photoshop and Illustrator to create brand imagery. We'll then move on to learn HTML/CSS and APIs: the building blocks of the Internet. We'll also spend some time prototyping software such as Axure and tap into memes and Gifs. This is a tactical, hands-on class. Cross-listed with MKTG 3495.

**MKTG 4850 Integrated Marketing Communication Campaign (4 Credits)**

This course builds on all of the courses in the IMC program/concentration as well as other courses offered through the Department of Marketing. In this sense, it is a capstone course, integrating the knowledge and experience acquired through these other courses. Integration is the primary objective of this course—that is, to develop skills in integrating content from other courses into a complete IMC campaign for a brand of the student's choice. IMC Campaign is a major project course with a single significant outcome, the IMC Campaign. The project is conducted in a team environment with the guidance of the instructor. Prerequisites: MKTG 4810 or instructor permission.

**MKTG 4860 Data Science for Marketers (4 Credits)**

Data is an essential part of (digital) marketing. In fact, data enables the promise of digital marketing: real-time feedback enabling businesses, marketing campaigns to pivot and become predictive. We'll cover what it takes to become a data-driven organization and how to tell stories through data.

**MKTG 4865 SXSWi: Marketing, Technology & Innovation (4 Credits)**

This class is focused on documenting/sharing lessons learned from the SXSWi conference in Austin Texas, the premier innovation conference in the US. The course is divided into two distinct halves. First, we will research the SXSWi sessions around subject matter and speaker background as well as planning the final deliverable that summarizes the entire SXSWi event. The second half includes participation in the conference to learn the most up-to-date digital marketing techniques in social, mobile, data and usability.

**MKTG 4900 Advanced Marketing Strategy (4 Credits)**

Making sound strategic marketing decisions in the real world is complex and challenging, even for seasoned executives. Determining sound strategies is critical. Implementing them effectively and profitably is essential. How can managers increase their chances for making better strategic marketing decisions leading to more successful outcomes more often? This course applies concepts, constructs and learning acquired in prior marketing courses to complex strategic decisions. Live cases are at the heart of the course, challenging teams and individuals to make specific marketing decisions in the context of larger strategic marketing and company contexts, including accounting for top- and bottom-line impact. Prerequisites: At least eight hours of graduate level MKTG courses or with instructor permission.

**MKTG 4980 Marketing Internship (0-10 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are required to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities. We learn by doing. That's what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein's, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will students earn school credit, they may very well land a paid internship, and eventually a full-time job.

**MKTG 4981 Marketing Leadership and Professional Development I (1 Credit)**

This course involves several executive coaching experiences. In the Fall Quarter, you will participate in a weekend leadership experience, where you develop self-awareness of your style as a member and leader of a team. This experience will help build relationships with others in the program and with program faculty, setting you up for successful team experiences in the year ahead. Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4982 Marketing Leadership and Professional Development II (1 Credit)**

Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4983 Marketing Leadership and Professional Development III (1 Credit)**

Throughout the quarter, you will participate in other professional development experiences designed to improve your self-presentation skills, networking skills, and awareness of emerging marketing technologies. The exact content of the course will vary by quarter.

**MKTG 4991 Independent Study (1-10 Credits)**

Hours and times arranged by student.

**MKTG 4999 Marketing Assessment (0 Credits)**

This course, taken at the end of the MS Marketing program, is designed to assess what students know and can do as a result of being in the program, as well as to capture student feedback about the overall program. The assessments provide input to the Marketing faculty to enable continuous improvement in the program.

**MKTG 6300 Seminar in Marketing (4 Credits)**

This doctoral seminar focuses on research in marketing. This course will expose students to cutting-edge research in marketing in order to help them define and advance their research interests. This course will also offer in-depth discussions on some important topics in marketing and tools and methodologies required for conducting research in those areas.

## Master of Business Administration Programs

### Master of Business Administration in General Business: The Denver MBA

The Daniels College of Business full-time Denver MBA is a comprehensive program that immerses students in the study and practice of business. Students will gain the technical expertise and leadership skills required to navigate complex business situations with confidence and integrity.

The Daniels College of Business has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

#### Program Highlights

*A Dynamic Collaborative In-Person Environment.* The Denver MBA is a cohort program where students experience the MBA core courses with the same set of peers to maximize cross-learning, collaboration, and networking.

*Just-in-Time Learning.* Class discussions are informed by current business issues and class assignments. The faculty are committed to bringing the most relevant issues and challenges into class discussions. Whether it is Generative AI such as ChatGPT or the Future of Work through machine learning, these contemporary issues will become part of the course regardless of subject.

*Connection to Faculty.* Faculty teaching in the full-time MBA program are esteemed researchers, practicing professionals, and experienced teachers who bring their boardroom experience into the classroom. The faculty care deeply about the students. With small class sizes (30:1), students will have the opportunity to engage and get to know the faculty, in and out of the classroom.

*A Challenge Driven Education.* Students take on four real-world challenges, each increasing in rigor and complexity. Students begin by working through an Entrepreneurial Challenge using tools such as Design Thinking. The Social Good Challenge enables students to partner with a non-profit to apply business practices for the public good. As students work collaboratively on applying critical problem-solving skills throughout each challenge, faculty experienced in consulting will advise them throughout the process.

*Global Mindset.* The Corporate Challenge partners the students with businesses looking to solve real problems around the world. The Global Challenge adds the complexity of traveling abroad. Program tuition includes the trip to work with an international organization on one of its business problems.

*Leadership Development.* In-classroom curricular work is complemented by immersive programming on professional development, career advancement, networking, and other topics aimed at enhancing the holistic Denver MBA student experience. Every student has the opportunity to receive customized, ongoing one-on-one coaching throughout the program.

#### Cohort

The Denver MBA is a 21-month, 80-credit cohort program.

#### Class Schedule

Varies based upon course Monday through Thursday. Most courses are available in-person and online providing students with flexibility, if needed. Additional required activities include the Outdoor and International (trip) Experientials that may include weekends and holidays. Each class session is recorded should an unexpected absence occur.

#### Concentrations/Electives

Students pursuing the Denver MBA will have 28 credits of electives of which 16 credits are required to qualify as a specific concentration. These concentrations include: Accounting, Business Analytics, Customized, Finance, Marketing, Real Estate and the Built Environment, and Supply Chain Management.

## Master of Business Administration in Management Sciences and Quantitative Methods: The Denver Quantitative MBA

The Daniels College of Business full-time Denver Quantitative MBA is a comprehensive program that immerses students in the study and practice of business. Students will develop a deep understanding of management sciences and quantitative methods required to solve complex business problems with confidence and integrity.

The Daniels College of Business has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Program Highlights

*A Dynamic Collaborative In-Person Environment.* The Denver Quantitative MBA is a cohort program where students experience the MBA core courses with the same set of peers to maximize cross-learning, collaboration, and networking.

*Just-in-Time Learning.* Class discussions are informed by current business issues and class assignments. The faculty are committed to bringing the most relevant issues and challenges into class discussions. Whether it is Generative AI such as ChatGPT or the Future of Work through machine learning, these contemporary issues will become part of the course regardless of subject.

*Connection to Faculty.* Faculty teaching in the Denver Quantitative MBA are esteemed researchers, practicing professionals, and experienced teachers who bring their boardroom experience into the classroom. The faculty care deeply about the students. With small class sizes (30:1), students will have the opportunity to engage and get to know the faculty, in and out of the classroom.

*A Challenge Driven Education.* Students take on four real-world challenges, each increasing in rigor and complexity. Students begin by working through an Entrepreneurial Challenge using tools such as Design Thinking. The Social Good Challenge enables students to partner with a non-profit to apply business practices for the public good. As students work collaboratively on applying critical problem-solving skills throughout each challenge, faculty experienced in consulting will advise them throughout the process.

*Global Mindset.* The Corporate Challenge partners the students with businesses looking to solve real problems around the world. The Global Challenge adds the complexity of traveling abroad. Program tuition includes the trip to work with an international organization on one of its business problems.

*Leadership Development.* In-classroom curricular work is complemented by immersive programming on professional development, career advancement, networking, and other topics aimed at enhancing the holistic Denver Quantitative MBA student experience. Every student has the opportunity to receive customized, ongoing one-on-one coaching throughout the program.

### Cohort

The Denver Quantitative MBA is a 21-month, 80-credit cohort program.

### Class Schedule

Varies based upon course Monday through Thursday. Most courses are available in-person and online providing students with flexibility, if needed. Additional required activities include the Outdoor and International (trip) Experientials that may include weekends and holidays. Each class session is recorded should an unexpected absence occur.

### Concentrations/Electives

Students pursuing the Denver Quantitative MBA must complete 28 credit hours of electives in a specific management science or quantitative methods concentration. These specific concentrations include: Accounting, Technology and Analytics, Applied Quantitative Finance, or Business Analytics.

## Master of Business Administration in General Business: The Executive MBA Program

The Daniels Executive MBA (EMBA) at the University of Denver is a highly selective academic program designed for the mid-to-senior level professional with ten or more years of professional work experience. Strategically focused and integrated in approach, the EMBA classroom is a dynamic environment of leaders from a wide array of backgrounds and industries. Although the pace of the EMBA experience is accelerated and academically rigorous, it is offered in an efficient once-a-week format which allows for balance between career, school and personal life.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Cohort

This is a cohort MBA program with an integrated, lockstep curriculum of 24 courses (60 credit hours).

### Class Schedule

Alternating Fridays and Saturdays once a week, from 8 a.m. to 5 p.m. 18 calendar months. Additional required opportunities include the Sailing Experience and the two-week global business travel seminar.

## Master of Business Administration in General Business: The Professional MBA Program

The Daniels Professional MBA (PMBA) is an ideal fit for early-to-mid career professionals. It holds the same quality and rigor as our Full-time MBA with a curriculum suited for those with at least two years of professional work experience. Students in the cohort-based PMBA program are fully employed and enjoy a network of peers with comparable experience in diverse industries. Gaining exposure to one another's industries and challenges is a key benefit of this MBA option, as is the global business travel seminar.

The Daniels College of Business has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Program Highlights

*A Dynamic Collaborative In-Person Environment.* The Professional MBA is a cohort program where students experience the MBA core courses with the same set of peers to maximize cross-learning, collaboration and networking.

*Just-in-Time Learning.* Class discussions are informed by current business issues and class assignments. Faculty are committed to bringing the most relevant issues and challenges into class discussions. Whether it is Generative AI such as ChatGPT or the Future of Work through machine learning, these contemporary issues will become part of the course regardless of subject.

*Connection to Faculty.* Faculty teaching in the Professional MBA program are esteemed researchers, practicing professionals, and experienced teachers who bring their boardroom experience into the classroom. Faculty care deeply about the students, and with small class sizes, students will have the opportunity to engage and get to know the faculty, in and out of the classroom.

*Learning by Doing.* During the program, students will participate in a mountain leadership retreat and travel abroad to work with international organizations. This experiential learning will culminate with a social good challenge, where students will serve as consultants to a real Non-Profit organization with a genuine business problem.

### Cohort

The Professional MBA is a 21-month, 60-credit cohort program.

### Class Schedule

PMBA core courses meet in-person on Monday and Wednesday evenings between 6 p.m. and 10 p.m., with the exception of Global Business which meets on several Saturdays in the sixth quarter. To provide students with flexibility, core courses are available online, if needed. Each PMBA core class session is also recorded should an unexpected absence occur. Elective courses may meet on other days of the week. Additional required activities include the Outdoor and International (trip) Experientials that may include weekends and holidays.

### Concentration / Electives

Students pursuing the Professional MBA will have 20 credits of electives. If students choose a concentration path, 16 elective credits in a specialized area are required to qualify as a concentration. These concentrations include: Accounting, Business Analytics, Customized, Executive Leadership, Finance, Marketing, and Real Estate and the Built Environment.

## Master of Business Administration in General Business: MBA@Denver (Online)

The Daniels online MBA program—MBA@Denver—allows students to earn an MBA while maintaining a balanced life. Our blended format of online classes and in-person immersions offers convenience and connection. As students sharpen their skills and knowledge-base, they will also grow their network via our outstanding faculty and distinguished Daniels alumni.

### Program Highlights

*A Collaborative Online Environment.* Students meet face-to-face and on-screen to work on group projects and connect with classmates. Students apply theory to solve current business problems together with the class and professor. Using a mobile app, students can work on a tablet or other mobile device from anywhere around the world, even offline.

*Just-in-Time Learning.* Class discussions are informed by current business issues and class assignments. The faculty are committed to bringing the most relevant issues and challenges into class discussions. Whether it is Generative AI such as ChatGPT or the Future of Work through machine learning, these contemporary issues will become part of the course regardless of subject.

*Connection to Faculty.* MBA@Denver faculty are experienced not only in the graduate classroom, but also in business. The faculty includes esteemed researchers, practicing professionals, and experienced teachers who bring their boardroom experience into the classroom. Many of the faculty teach both online and in-person at Daniels, and care deeply about connecting with their students.

*Face-to-Face Experiences.* To increase a professional network beyond the live sessions, students will attend two required in-person learning experiences, called immersions. Immersions are offered throughout the year and are held in a variety of locations including the DU campus, locations outside of Denver but within the continental U.S., and also international locations. These multi-day, weekend events give students the chance to push their leadership skills further and meet classmates, faculty and alumni in person.

*An Extension Of The Campus Community.* As an MBA@Denver student, each will be as much a part of the DU and Daniels communities as on-campus students. Students will have access to career coaching, case competitions, academic resources, mentorship programs, and student gatherings and networking events. All students—whether on campus or online—are invited to participate in graduation celebrations and University Commencement to celebrate the hard work that goes into earning a graduate degree.

#### *Live 90-Minute Online Classes*

- Hosted via webcam at 6:30 p.m. or 8:30 p.m. during the week
- Approximate 20:1 student-to-professor ratio
- Lively peer-to-peer discussions
- Synchronous session recordings

#### *Flexible Scheduling*

- Students usually take two courses per quarter, though many choose to take only one course per quarter. The degree is 60 credit hours in length, so students have the flexibility to complete their coursework within 21 months. Alternatively, students may take as long as five years to complete their degree.
- All courses are available online and in-person, except for Global Business. MBA@Denver students complete Global Business in two parts and does not include an international trip.
- Students may choose to complete the general MBA or to concentrate in one of the following areas:
  - Executive Leadership (online only)
  - Finance (online or in-person)
  - Marketing (online or in-person)
  - Customized (online or in-person)
  - Accounting (in-person only)
  - Business Analytics (in-person only)
  - Real Estate and the Built Environment (in-person only)
- In-person courses are available on the University of Denver campus in Denver, Colorado.

## **Master of Business Administration in General Business: The Denver MBA Degree and GPA Requirements**

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

### **Standardized Test Scores**

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.
- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The GMAT code for the Denver MBA (full-time) program is MZR-GT-43. The GRE code for the University of Denver is 4842.

### **English Language Proficiency Test Score Requirements**

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

### **Other Requirements**

Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

---

## Real Estate and Construction Management

Office: Daniels College of Business, Room 380

Mail Code: Daniels College of Business, Room 380, 2101 S. University Blvd. Denver CO 80208

Phone: 303-871-3432

Web Site: <https://daniels.du.edu/burns-school/>

### Master of Science in Real Estate and the Built Environment

The Franklin L. Burns School of Real Estate and Construction Management at the Daniels College of Business allows you to combine the core competencies across the full spectrum of the built environment. Our core curriculum in real estate includes courses in Real Estate Finance, Investment, Appraisal, Real Estate Feasibility and Development. On the construction Management side, core course includes Project Feasibility, Construction Estimating, Procurement, Project Delivery, Scheduling, and Contract Administration. Outside of the core courses, students can take highly specialized courses like real estate capital markets, city craft, real estate fund management and host of others. This holistic, integrated approach adds value in a way that no other program in the country adds and establishes a firm basis upon which to build a selected area of expertise. Outside the classroom, students participate in real and applied case study competitions, and get networking and other industry opportunities due to a very rich legacy, strong alumni base and excellent industry support. All our students get career and professional support through Burns and Daniels professional staffs. The program can be completed in one-year full time or 18 months part time. Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923.

### Master of Science in Real Estate and the Built Environment

#### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

#### Standardized Test Scores

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.
- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842. The code to submit GMAT scores for this program is MZR-GT-58.

#### Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

#### English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Construction Management (CMGT)

### CMGT 4120 Construction Planning & Scheduling (4 Credits)

Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Prerequisite or Corequisite: CMGT 4420.

### CMGT 4155 Sustainable Development (4 Credits)

The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis is placed on how LEED project certification influences the overall construction project. Topics include LEED certification techniques for sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and design. The following topics are covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student studies and analyzes how management and LEED techniques are applied to current construction projects.

**CMGT 4177 Environmental Systems and MEP Coordination (4 Credits)**

A study of electrical and mechanical systems used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating or systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings.

**CMGT 4230 Design Management and Schedule Control (4 Credits)**

This course examines the various strategies and techniques associated with managing the design delivery process to align with the construction budget and schedule needs in an integrated fashion. Design planning, scheduling, and resource allocation are considered along with design value determination and management of the design-construct interfaces.

**CMGT 4250 Construction Job Site Management (4 Credits)**

This course addresses how a successful construction project is managed and administered from design through construction to closeout. Emphasis will focus on how to unite the key stakeholders (contractors, architects, engineers, etc.) to provide them with a workable system for operating as an effective project team. The latest technology, laws and regulations associated with contract administration will be presented. Topics pertinent to each stage of a project are introduced and discussed as they occur throughout the life of the project. Numerous real-world examples will be utilized throughout the course. Various electronic project administration tools and techniques will be demonstrated including Building Information Modeling.

**CMGT 4320 Introduction to Architecture and Design Management (4 Credits)**

This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students will be introduced to principles, protocols and the planning process related to the design function and the link between the architect's vision and the finished physical structure. Students will be introduced to design, thinking, theory and application. Student will learn to read and interpret the various graphical and written construction documents as well as know how they are developed and what information they contain. Architectural, structural, mechanical, electrical, plumbing and civil drawings and specifications are covered. The business model for design services will be explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction.

**CMGT 4410 Construction Building Systems (4 Credits)**

A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced. This class will also have an off campus, experiential learning lab associated with it.

**CMGT 4420 Construction Estimating (4 Credits)**

This course is designed to provide the student with the theory, principles and techniques of quantity analysis (take-off), labor determinations, overhead and profit analysis. It offers insight into the construction estimating process. The role of the estimator, types of estimating, CSI divisions, bid/contract documents, change order pricing, design/build projects and estimation compilation will be introduced. Discussions regarding the cost/benefit of sustainable materials and typical construction materials will enhance the requisite knowledge of construction estimating. Experiential learning lab is associated with this course. Prerequisite: CMGT 4320 and CMGT 4410. This course is a co/prerequisite for CMGT 4120.

**CMGT 4480 Const Project Management (4 Credits)**

Principles and techniques of construction project management, use of systems analysis, internal and external procedures, planning, programming, budgeting and staffing, controlling major projects, emphasis on construction scheduling techniques with case application.

**CMGT 4490 Residential Development (4 Credits)**

A course sequence designed to emphasize the practical application of the theories and concepts of residential development. The course provides a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property in a case format. Students will apply accounting, finance, marketing, real estate and construction management techniques in the planning for a residential development. The application of green building materials and methods is emphasized.

**CMGT 4700 Topics in Construction Mgmt (0-4 Credits)****CMGT 4980 Construction Mgmt Internship (0-4 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are encouraged to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities.

**CMGT 4991 Independent Study (1-10 Credits)****Real Estate (REAL)****REAL 4000 Fundamentals of Real Estate and the Built Environment (4 Credits)**

An exploration of the importance of real estate and the built environment through triple bottom line analysis of its social, environmental, and economic impacts. The course considers a "cradle to cradle" sustainability model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value-generating solutions for society. Professional practices/skill sets associated with the many career options that engage the built environment are demonstrated. Principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan finance, appraisal investment and tax benefits will also be covered. Partially satisfies Colorado real estate broker licensing requirements.

**REAL 4002 The Business of Real Estate (2 Credits)**

This is an introduction to home ownership, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title, concepts, deeds, and purchase contracts. Listing contracts, law of agency, types of mortgages, basics of home loan finance, appraisal, investment and tax benefits are also covered in this class. Partially satisfies Colorado Real Estate sales licensing requirements.

**REAL 4007 Real Estate Financial Analysis (4 Credits)**

Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisite: REAL 4407.

**REAL 4010 Real Estate Capital Markets (4 Credits)**

This course exposes students to the commercial real estate capital markets; including real estate investment trusts (REITs) and commercial mortgage-backed securities (CMBS), plus institutional investors. The complexities of capital market products are discussed, students receive a greater understanding of the alternatives that are available. The class includes lectures, guest speakers, readings, class discussions, a major REIT analysis project, and case studies. Prerequisite: REAL 4007.

**REAL 4140 International Immersion in Real Estate and the Built Environment (4 Credits)**

Inbound U.S. and outbound U.S. real estate issues, with a mix of cultural issues that impact real estate transactions. Application of sustainability concepts is important in this course dealing with international real estate issues. This course will require on campus preparation for projects followed by 1-2 weeks of travel which will include working with host universities, students and industry partners.

**REAL 4210 Planning, Entitlements, and Public Finance (4 Credits)**

Real estate development, place making, and community building require the combined efforts of the public, for-profit, and non-profit sectors. Participants in the real estate development process need to understand and appreciate the sometimes competing and sometimes collaborative interests of governments, agencies, and the private developer. This course is designed to familiarize students with the overall context of urban planning and land use. Students discover the variety of participants in the development process and also become familiar with the project entitlement process, zoning, and land use regulation. Students also examine public/private financing structures such as public-private-partnerships (P3s) and become familiar with detailed calculations relating to Tax Incremental Financing (TIF) and Metropolitan Districts.

**REAL 4337 RE Securities/Syn/Entrep (4 Credits)**

Introduction to real estate securities; emphasis on private offerings; determining whether a contemplated transaction involves a security, and what happens if it does; exemptions from registration (Reg D); registration requirements; investor suitability, how to syndicate, acquisition of property, marketing of the property, tax structure and formation of syndication, compensation to syndicators, real estate tax considerations.

**REAL 4347 Property and Asset Management (4 Credits)**

Explore the complexities of managing apartments, condominiums, office buildings, industrial property and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting, and owner relations.

**REAL 4357 Corporate Real Estate & Management (4 Credits)**

This course provides a snapshot view of the corporate real estate life cycle and how to strategically plan and manage it. Over the ten week period we will address the diverse but critical components that together account for Facility Management. These shall include: Building Life Cycles and sustainability, facility management as part of the enterprise model within a corporate structure, regulatory agencies, professional relationships and the impact of the built environment on the bottom line, contracting and budget management, move-add-change (MAC) / operations, and general administrative services.

**REAL 4369 Real Estate Taxation (4 Credits)**

Tax factors affecting investments and operations in real estate; special attention is given to legal forms of ownership, depreciation, tax basis, tax impacts of exchanges, syndications, real estate securities, and other federal tax laws affecting real estate.

**REAL 4407 Income Property Finance (4 Credits)**

This course explores conventional and alternative financing, mortgage banking, law and markets, loan underwriting analysis and the impact of monetary and fiscal policies on the real estate and mortgage markets, with emphasis on decision making from the equity investors point of view. Specific topics include an overview and history of real estate finance, the taxation and legal aspects of real estate finance, compounding and discounting, functions of interest and real estate capital markets and securities. Specific areas of focus are residential property finance, income property finance, and construction and development financing.

**REAL 4417 Income Property Valuation and Appraisal (4 Credits)**

Residential/Commercial appraising, including market cost and income approaches to value, gross rent multiplier analysis, neighborhood and site analysis, valuation of income properties including market cost and income approaches to value, capitalization theory and techniques, mortgage-equity analysis, and investment value concepts. Prerequisite: REAL 4407.

**REAL 4438 Legal Aspects of Real Estate and the Built Environment (4 Credits)**

To gain an understanding of certain legal issues that are repeatedly encountered by real estate and construction professionals.

**REAL 4467 Property Development and Feasibility (4 Credits)**

Commercial real estate development analysis and feasibility includes economic base analysis, tenant demand analysis, development and construction cost analysis, lease-up analysis, financial feasibility, leasing and property management practices. Five major property types (office, industrial, retail, apartment and hotel) are covered. Prerequisite: REAL 4407.

**REAL 4477 Income Property Investment (4 Credits)**

Comprehensive analytical framework for real estate investment decision-making, equity investment decisions via discounted cash flow, and risk analysis models and strategic planning concepts, structuring parameters to maximize rates of return while controlling downside risks; emphasis on theory, concept building, and practical application to various types of investment properties. Prerequisite: REAL 4407.

**REAL 4701 Topics in Real Estate (0-4 Credits)****REAL 4800 NAIOP Challenge (2-4 Credits)**

A unique non-traditional course, where the students will work on a complex real estate problem culminating in an internal competition and external competition which includes a written report and an oral presentation. Cross listed with CMGT 3800, CMGT 4800, REAL 3800.

**REAL 4890 Internship (0-4 Credits)****REAL 4980 Adv Valuation/Report Writing (1-10 Credits)**

Advanced cutting-edge techniques not yet institutionalized nor commonly practiced in the field. Includes writing skills workshops appropriate to specialized nature of appraisal reports, and composition of a complex field problem report to prepare student for writing "demonstration" report required for MAI professional designation. Prerequisite: REAL 4417.

**REAL 4991 Independent Study (1-10 Credits)****Construction Management Courses****CMGT 4120 Construction Planning & Scheduling (4 Credits)**

Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Prerequisite or Corequisite: CMGT 4420.

**CMGT 4155 Sustainable Development (4 Credits)**

The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis is placed on how LEED project certification influences the overall construction project. Topics include LEED certification techniques for sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and design. The following topics are covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student studies and analyzes how management and LEED techniques are applied to current construction projects.

**CMGT 4177 Environmental Systems and MEP Coordination (4 Credits)**

A study of electrical and mechanical systems used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating or systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings.

**CMGT 4230 Design Management and Schedule Control (4 Credits)**

This course examines the various strategies and techniques associated with managing the design delivery process to align with the construction budget and schedule needs in an integrated fashion. Design planning, scheduling, and resource allocation are considered along with design value determination and management of the design-construct interfaces.

**CMGT 4250 Construction Job Site Management (4 Credits)**

This course addresses how a successful construction project is managed and administered from design through construction to closeout. Emphasis will focus on how to unite the key stakeholders (contractors, architects, engineers, etc.) to provide them with a workable system for operating as an effective project team. The latest technology, laws and regulations associated with contract administration will be presented. Topics pertinent to each stage of a project are introduced and discussed as they occur throughout the life of the project. Numerous real-world examples will be utilized throughout the course. Various electronic project administration tools and techniques will be demonstrated including Building Information Modeling.

**CMGT 4320 Introduction to Architecture and Design Management (4 Credits)**

This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students will be introduced to principles, protocols and the planning process related to the design function and the link between the architect's vision and the finished physical structure. Students will be introduced to design, thinking, theory and application. Student will learn to read and interpret the various graphical and written construction documents as well as know how they are developed and what information they contain. Architectural, structural, mechanical, electrical, plumbing and civil drawings and specifications are covered. The business model for design services will be explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction.

**CMGT 4410 Construction Building Systems (4 Credits)**

A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced. This class will also have an off campus, experiential learning lab associated with it.

**CMGT 4420 Construction Estimating (4 Credits)**

This course is designed to provide the student with the theory, principles and techniques of quantity analysis (take-off), labor determinations, overhead and profit analysis. It offers insight into the construction estimating process. The role of the estimator, types of estimating, CSI divisions, bid/contract documents, change order pricing, design/build projects and estimation compilation will be introduced. Discussions regarding the cost/benefit of sustainable materials and typical construction materials will enhance the requisite knowledge of construction estimating. Experiential learning lab is associated with this course. Prerequisite: CMGT 4320 and CMGT 4410. This course is a co/prerequisite for CMGT 4120.

**CMGT 4480 Const Project Management (4 Credits)**

Principles and techniques of construction project management, use of systems analysis, internal and external procedures, planning, programming, budgeting and staffing, controlling major projects, emphasis on construction scheduling techniques with case application.

**CMGT 4490 Residential Development (4 Credits)**

A course sequence designed to emphasize the practical application of the theories and concepts of residential development. The course provides a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property in a case format. Students will apply accounting, finance, marketing, real estate and construction management techniques in the planning for a residential development. The application of green building materials and methods is emphasized.

**CMGT 4700 Topics in Construction Mgmt (0-4 Credits)****CMGT 4980 Construction Mgmt Internship (0-4 Credits)**

Daniels College of Business's graduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are encouraged to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities.

**CMGT 4991 Independent Study (1-10 Credits)****Real Estate Courses****REAL 4000 Fundamentals of Real Estate and the Built Environment (4 Credits)**

An exploration of the importance of real estate and the built environment through triple bottom line analysis of its social, environmental, and economic impacts. The course considers a "cradle to cradle" sustainability model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value-generating solutions for society. Professional practices/skill sets associated with the many career options that engage the built environment are demonstrated. Principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan finance, appraisal investment and tax benefits will also be covered. Partially satisfies Colorado real estate broker licensing requirements.

**REAL 4002 The Business of Real Estate (2 Credits)**

This is an introduction to home ownership, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title, concepts, deeds, and purchase contracts. Listing contracts, law of agency, types of mortgages, basics of home loan finance, appraisal, investment and tax benefits are also covered in this class. Partially satisfies Colorado Real Estate sales licensing requirements.

**REAL 4007 Real Estate Financial Analysis (4 Credits)**

Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisite: REAL 4407.

**REAL 4010 Real Estate Capital Markets (4 Credits)**

This course exposes students to the commercial real estate capital markets; including real estate investment trusts (REITs) and commercial mortgage-backed securities (CMBS), plus institutional investors. The complexities of capital market products are discussed, students receive a greater understanding of the alternatives that are available. The class includes lectures, guest speakers, readings, class discussions, a major REIT analysis project, and case studies. Prerequisite: REAL 4007.

**REAL 4140 International Immersion in Real Estate and the Built Environment (4 Credits)**

Inbound U.S. and outbound U.S. real estate issues, with a mix of cultural issues that impact real estate transactions. Application of sustainability concepts is important in this course dealing with international real estate issues. This course will require on campus preparation for projects followed by 1-2 weeks of travel which will include working with host universities, students and industry partners.

**REAL 4210 Planning, Entitlements, and Public Finance (4 Credits)**

## School of Accountancy

Office: Daniels College of Business, Rooms 355-379

Mail Code: 2101 S. University Blvd., Suite 355, Denver, CO 80208

Phone: 303-871-2032

Web Site: <http://daniels.du.edu/accountancy/> (<http://daniels.du.edu/faculty-research/accountancy/>)

## Master of Accountancy

The Master of Accountancy (MAcc) program at the Daniels College of Business School of Accountancy provides rigorous training in accounting fundamentals, financial reporting, and assurance, preparing you for a rewarding career. The best indicator of the program's strength is the success of our graduates: nearly all of our domestic MAcc graduates accept positions before graduation.

Through demonstrated prerequisite knowledge, formal coursework, and elective internship opportunities students will develop technical knowledge in accounting and assurance. Students will gain critical thinking, communication, interpersonal and technology skills to be effective business advisors and establish the ethical grounding to act with integrity.

An undergraduate accounting or business major is not necessary and work experience is not a requirement for admission to the MAcc. Students may work toward meeting foundation requirements during their course of study. Foundation requirements are demonstrated competency in introductory and intermediate financial accounting and introductory managerial accounting. Students meet the competency requirement by having passed these foundation courses in an AACSB-accredited program. Students who believe they have competency in these areas through other means should consult with the program director.

Our mission as a School of Accountancy in a great private university dedicated to the public good is to foster Enlightened Practice, Professional Achievement, Knowledge Creation, and a Commitment to Community among our graduates, faculty, and others engaged in the accounting profession and related disciplines.

- Enlightened Practice means ensuring that our graduates understand the theory and practice of accounting and its ramifications on society, the profession, and organizations.
- Professional Achievement includes accomplishment at each level of one's career and commitment to life-long learning, competence, and integrity.
- Knowledge Creation means scholarship which improves our understanding of accounting, the practice of accounting and the process of educating future accountants.
- Commitment to Community is the process of giving of oneself both to the community that supports one's efforts and achievements and to the community at large. Commitment to Community is a vital aspect of the accounting profession and is critical to the School's ongoing success.

Daniels has been continuously accredited by the Association to Advance Collegiate Schools of Business International (AACSB) since 1923. The School of Accountancy has held supplemental, specialized AACSB accreditation since 1980 and is one of the first five universities to receive this distinction.

## Master of Accountancy

### Degree and GPA Requirements

- Bachelor's degree: All graduate applicants must hold an earned baccalaureate from a regionally accredited college or university or the recognized equivalent from an international institution.
- Grade point average: The minimum undergraduate GPA for admission consideration for graduate study at the University of Denver is a cumulative 2.5 on a 4.0 scale or a 2.5 on a 4.0 scale for the last 60 semester credits or 90 quarter credits (approximately two years of work) for the baccalaureate degree. An earned master's degree or higher from a regionally accredited institution supersedes the minimum standards for the baccalaureate. For applicants with graduate coursework but who have not earned a master's degree or higher, the GPA from the graduate work may be used to meet the requirement. The minimum GPA is a cumulative 3.0 on a 4.0 scale for all graduate coursework undertaken.
- Program GPA requirement: The minimum undergraduate GPA for admission consideration for this program is a cumulative 2.5 on a 4.0 scale.

## Standardized Test Scores

- GRE or GMAT scores are optional for admission to this program. Applications submitted without scores will receive full consideration. Every application undergoes a comprehensive evaluation, including a careful review of all application materials.
- If you choose to submit test scores, you may upload your Test Taker Score Report PDF, which is considered unofficial. Official scores must be received directly from the appropriate testing agency upon admission to the University of Denver. The ETS institution code to submit GRE scores to the University of Denver is 4842. The code to submit GMAT scores for this program is MZR-GT-82.

## English Language Proficiency Test Score Requirements

The minimum TOEFL/IELTS/C1 Advanced/Duolingo English Test score requirements for this degree program are:

- Minimum TOEFL Score (Internet-based test): 80
- Minimum IELTS Score: 6.5
- Minimum C1 Advanced Score: 176
- Minimum Duolingo English Test Score: 115

English Conditional Admission: No, this program does not offer English Conditional Admission.

## Other Requirements

- Applicants may be contacted by a Daniels representative to schedule the admissions interview, which will be conducted on campus or via webcam.

## Master of Science in Accounting, Technology and Analytics

Master of Science in Accounting, Technology and Analytics (MSATA) at the Daniels College of Business School of Accountancy is a STEM-designated program designed for students who plan to specialize in technology and data analytics as accounting professionals. An undergraduate

accounting or business major is not necessary and work experience is not a requirement for admission to the MSATA. Students may work toward meeting foundation requirements during their course of study. Foundation requirements are demonstrated competency in introductory and intermediate financial accounting and introductory managerial accounting. Students who have met all foundation requirements complete the degree with 40 credit hours of study as specified. Foundation requirements can add up to an additional 16 credit hours of study for those who do not meet the prerequisite foundational requirements.

#### **ACTG 4130 Accounting Process Technologies (4 Credits)**

Accounting Process Technologies are a continually evolving discipline within the profession of accounting. Students are introduced to current and developing technologies used for process mining, automation, and analysis. Students will gain hands-on experience with various technologies as well as learn the accounting theories behind them.

#### **ACTG 4155 Accounting Data Skills and Concepts (4 Credits)**

This course is designed to give students an understanding of the technology underlying accounting information systems and help students develop more advanced data analysis skills. We will use the programming language Python to develop an understanding of the digital business logic that supports the operations of modern firms. We will learn to use Business Process Modeling Notation (BPMN) to graphically document operations and their underlying business logic. We will discuss and analyze a set of studies that use survey data from a global sample of executives and analysts to develop an understanding of the levels of technological sophistication in modern firms. We will also discuss and analyze distributed databases, information security, and eXtensible Business Reporting Language. Prerequisites: none.

#### **ACTG 4176 Accounting Data Analytics (4 Credits)**

In this course, students explore overarching trends in big data and the impact to accounting and auditing fields while also gaining hands on experience working with business data sets. In today's information world, accountants must be well equipped to understand and utilize the vast and varying data systems that feed a company's decision making process. This course allows students to develop big data skills by learning the SQL language to query data from mock clients. Students execute Computer Assisted Auditing Techniques (CAATs) using both the SQL language as well as the audit data mining tool, IDEA. Students simulate the process to request client data files, load complex data sets, design and execute query procedures and summarize results for management. Prerequisite: ACTG 4610.

#### **ACTG 4220 Financial Actg & Analysis (4 Credits)**

Cross-listed with ACTG 3230.

#### **ACTG 4222 Understanding Financial Statements (4 Credits)**

At the conclusion of this course the student should understand: (1) management decisions that impact published financial statements, (2) the fundamentals of interpretation and analysis of financial statements, (3) economic and ethical issues relating to financial reporting, and (4) management attempts to enhance reported operating results. The course addresses the needs of managers and analysts, hence does not cover promulgated financial reporting rules in depth. The financial reporting topics expand on material presented in introductory Accounting and Finance courses. The focus is on the substance of the reported information. This course is not an approved elective for the MACC degree. Cross listed with ACTG 3220.

**ACTG 4240 Topics & Cases in Financial Accounting (4 Credits)**

This course develops a greater awareness of contemporary accounting issues, focusing on financial reporting. The course is designed to enhance each student's ability to identify, discuss, and resolve open-ended problems (i.e., those having no single "correct" answer) faced by accounting professionals. Each student must commit to being an active participant in the class discussions. Through the use of numerous cases involving all aspects of financial reporting, students identify issues, conduct authoritative research, then present and defend their conclusions using both oral and written presentation formats. Students also write an original research paper on a topic of their choice.

**ACTG 4281 Intermediate Financial Accounting I (4 Credits)**

The focus of this course is the foundation and content of published financial statements. Specifically it covers the following broad topics: (1) Conceptual Framework of Financial Reporting; (2) Financial Statements and Related Disclosures; (3) Assets: Recognition and Measurement; and (4) Liabilities: Recognition and Measurement. Common to each of the topics is an emphasis on reading GAAP and applying GAAP guidance to fact patterns. At the conclusion of the course, students should be aware of the proper accounting treatment for many common situations; moreover, students should be fully comfortable interpreting GAAP literature to address scenarios involving assets, liabilities, and income that were not specifically covered in the class.

**ACTG 4282 Intermediate Financial Accounting II (4 Credits)**

This course is a continuation of Intermediate Financial Accounting. The focus of this course is the application of Generally Accepted Accounting Principles to complex business transactions. In this final course of the sequence, we finish our examination of the balance sheet by exploring the issues involved with stockholders' equity, followed by in-depth study of some of the most complex accounting issues, including revenue recognition, accounting for income taxes, pensions and post-employment benefits, leases, and accounting changes and errors.

**ACTG 4284 Consolidated Financial Statements (2 Credits)**

This course introduces the student to the preparation of financial statements in compliance with GAAP when the reporting entity has investments in other entities that are other than passive investments. This module explores the financial reporting issues relating to partial or full ownership of one business entity by another. It includes use of the equity method as well as issues involved in reporting the financial results of consolidated entities, both at and subsequent to acquisition or formation.

**ACTG 4285 Accounting for Foreign Operations (2 Credits)**

Topics covered in this course include the financial statement impact of doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

**ACTG 4290 Financial Accounting Theory (4 Credits)**

This course introduces financial accounting theory with a focus on the application of accounting information as a tool for decision makers for firm valuation, contracting, executive compensation, enhancing corporate governance, and assessing earnings quality. The course draws from basic theories in economics, finance, and psychology to understand and predict accounting choices of firm managers and reactions of investors, lenders, auditors, and regulators to accounting information. The main objective is to foster conceptual, critical, and creative thinking about implications of accounting in the marketplace. Prerequisite: ACTG 4281.

**ACTG 4340 Topics & Cases in Managerial Accounting (4 Credits)**

Topics & Cases in Managerial Accounting focuses upon contemporary methodologies used by managerial accountants. Such methodologies are examined through classroom discussions of case studies and related articles. The course is designed to develop and enhance skills that are essential for the long-term success of career in accounting and finance.

**ACTG 4354 Cost Accounting (4 Credits)**

Accounting information in manufacturing enterprises, standard costs, and budgets. Open to students not having ACTG 3354 or equivalent. Prerequisite: MBA 4110, MBA 4111, or equivalent.

**ACTG 4400 Taxation for Business and Investment Planning (4 Credits)**

This is an introductory tax course that emphasizes a conceptual approach to learning the income tax framework applicable to common business and investment transactions. It is designed to sensitize students to the tax implications of business decisions and to cultivate the student's ability to ask good tax questions. This course will illustrate that effective business planning depends on an accurate assessment of relevant tax factors.

**ACTG 4410 Federal Income Taxation (4 Credits)**

The course is designed for graduate accounting students that wish to study federal income taxation. This is the first course in taxation, which introduces the federal taxation system, the importance of tax authorities, the concepts of gross income and tax deductions and the tax implications of common property transactions. The course generally focuses on property transactions, but the taxation of individuals is emphasized with an objective of students being able to properly prepare complex individual tax returns.

**ACTG 4462 Corporate and Partnership Taxation (4 Credits)**

The course is designed for graduate accounting, finance or other business students in their study of advanced topics in federal income taxation. This is the second course in taxation which concentrates on taxation of corporations, limited liability corporations, S corporations and partnerships. Prerequisites: ACTG 3440 or ACTG 3036 or ACTG 4400 or ACTG 4410 or ACTG 3461.

**ACTG 4520 Forensic Accounting and Auditing (4 Credits)**

Students will have an opportunity to learn, study, and discuss practical aspects of accounting as it is used to detect and prosecute fraud. Students will be exposed to improprieties, common fraud schemes, illegalities, and harassments. Prerequisites: ACTG 3551 or ACTG 4551 (Concurrent enrollment allowed).

**ACTG 4530 Business Advisory and Internal Audit (4 Credits)**

In today's business environment, a given company's "internal audit" function is asked to not only help keep the business out of trouble (control risks), but also help make the business better (leverage risk management to make better business decisions). In this course, we will "reimagine" internal audit with a heavy focus on the business advisory aspects of audit. Topics specifically covered in this course include risk appetite and tolerance, risk culture and an array of cutting-edge audit and advisory topics (cybersecurity, data privacy, social media, to name a few). Students experience "real life" examples and case studies to truly experience the role of an auditor as business advisor. Prerequisite: ACTG 3551 or ACTG 4551.

**ACTG 4551 Auditing (4 Credits)**

This course is designed to provide you with a thorough understanding of auditing and related attest services. This includes gaining requisite knowledge about AICPA (U.S. GAAS) and PCAOB auditing standards and how they are applied in conducting a financial statement audit. Application of these standards applies to planning an audit, the risk assessment process including gaining an understanding of internal control, gathering and evaluating evidence, sampling, and issuing an audit report.

**ACTG 4552 Advanced Auditing (4 Credits)**

This course is designed to build on the foundation of auditing knowledge developed in ACTG 4551 and apply that knowledge to specific accounts and assertions in a financial statement audit. Students also examine selected SEC enforcement actions and discuss what audit procedures may have been beneficial to prevent the misstatement. Prerequisite: ACTG 4551 or ACTG 3551.

**ACTG 4575 Accounting Information System Risk, Control and Audit (4 Credits)**

An auditor cannot just "audit the numbers" without strong consideration to the IT systems that generate those numbers. Today's accounting professionals must possess a strong understanding of accounting information system risks and controls. Topics specifically covered in this course include IT security controls, datacenter controls, data backup and disaster recovery planning, SDLC and change control processes. Students perform hands on simulated audit exercises and case studies to truly experience the role of an IT auditor. Prerequisites: ACTG 3551 or ACTG 4551 or test score AC51=1.

**ACTG 4610 Financial Accounting and Reporting (4 Credits)**

In this course, students will gain a strong understanding of corporate financial statements that are consumed by parties such as managers, shareholders, creditors and financial analysts. The course covers the fundamentals of accounting from recording individual business transactions through the preparation of a company's summarized financial statements. The course closely examines how economic events and business decisions impact the three main financial statements – Income Statement, Balance Sheet and Statement of Cash Flows. Students gain significant experience analyzing Form 10-K annual reports of publicly traded companies.

**ACTG 4620 Accounting Ethics (4 Credits)**

This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed. Prerequisites: None.

**ACTG 4660 Strategic Cost Management (4 Credits)**

Course description: Strategic Cost Management (SCM) will teach students how to use accounting information to make correct decisions within their firms. These decisions will include costing, pricing, strategy, and performance management. SCM articulates how to use accounting information in order to properly price goods and/or services, how to decide between alternative strategies, and how perform relative performance evaluation among employees and/or departments within the firm. The focus is on interpreting accounting information and making business decisions. Topics in the course include cost behavior, activity-based costing, cost-volume-profit analysis, short-term decision-making, balanced scorecard, and management control. The course will enable students to apply strategic thinking to management planning, decision-making, and management reporting. Prerequisite: ACTG 4610.

**ACTG 4661 Strategic Accounting for Managers (4 Credits)**

Management accounting is in transition, moving from a quantitative procedural focus to include a qualitative strategic focus that uses accounting to facilitate the organization's success. Changes include a renewed focus on the customer, aggressive cost reduction, and increased use of information technologies, among others. Motivation for the changes in management accounting are driven by evolving business processes in response to increased competition, both global and domestic. The management accountant is no longer a reporter and analyzer of financial facts only, but a business partner – developing the financial and non-financial information the organization needs to be successful. The concepts of management accounting are used in manufacturing and service organizations and are increasingly applied to government and not-for-profit organizations to help them succeed in their service missions and to be responsible to the citizens and funding agencies. In this course, students will learn how the management accountant plays a strategic role in the organization, developing and presenting the information that is critical for the organization's success. Students will use higher order thinking to apply accounting information to the types of strategic decisions organizations make for long-term sustainability. Prerequisites: ACTG 4610.

**ACTG 4700 Graduate Seminar in Accounting (1-17 Credits)****ACTG 4701 Special Topics in Accounting (1-5 Credits)****ACTG 4702 Special Topics in Accounting (1-5 Credits)****ACTG 4703 Special Topics in Accounting (1-5 Credits)****ACTG 4704 Special Topics in Accounting (1-5 Credits)****ACTG 4705 Topics in Accounting (1-4 Credits)****ACTG 4710 Managing the Family Business (4 Credits)**

Family enterprises have a tremendous impact on our local, national and global economies. Today, the definition of the family enterprise extends beyond just the business entity. It includes family offices, family "banks," family councils, trusts, and family foundations, just to name a few. Further, what happens in, and how decisions are made by, family enterprise affects not only the active family members but other key stakeholders such as inactive family members, in-laws, non-family managers and employees, professional advisors, customers, suppliers and competitors. This course gives students insight into the universe of possibilities that families, enterprises and their advisors face when engaged in systemic transition planning. This highly interdisciplinary course is appropriate for anyone who intends to work in or with family enterprises. This includes family members, accountants, attorneys, estate planners, financial or wealth managers, family office professionals, insurance consultants, business advisors, management consultants, organizational and leadership development experts, international business professionals, psychologists, social workers, and family therapists.

**ACTG 4730 International Accounting - London (4 Credits)**

This course is designed for students to study international accounting from both academic and practical perspectives. The main objective of this course is to develop a greater awareness of contemporary accounting issues faced in the international marketplace. This course will consist of two components: pre-departure classes designed to provide the student with knowledge of issues experienced in a global economy; a ten-day international travel experience which includes experiential learning exercises, group discussions and presentations, and seven visits to international companies and CPA firms. Prerequisite: Instructor Permission.

**ACTG 4735 Accounting for ESG -- Eastern Europe (4 Credits)**

This course is designed to give students an introduction to ESG accounting measurement and reporting issues from the perspective of multiple players in this arena (companies, accounting firms, standard setters, regulators etc.). This course juxtaposes US ESG accounting standard setting, measurement issues and best practices with Eastern European viewpoints on the same issues. With that in mind, this course will provide participants with the ability to be able to research, obtain and interpret current information on ESG accounting rules and standard setting.

**ACTG 4740 Valuation and Modeling (4 Credits)**

The ultimate purpose of the course is to improve professional decision-making skills. Professional decisions are made using a combination of judgment and analysis. Even skilled professionals (in any field) will make incorrect decisions when working with incorrect or insufficient information. Thus, one key to improving decision-making is improving analytical insights and skills. This course emphasizes the definition, construction, uses and limitations of popular financial models and instruments. Further, the class focuses on how the instruments are used, why they are used and how decisions to use such instruments and tools/techniques to value them are made. Prerequisite ACTG 4610 or test code AC10 >=1.

**ACTG 4750 Valuing a Business (4 Credits)**

This course explores all major aspects of business valuation. Students not only study valuation theory, they appraise an actual business and draft a valuation report in compliance with the American Institute of Certified Public Accountants Statement on Standards for Valuation Services (SSVS) and Reporting Standards of the National Association of Certified Valuation Analysts (NACVA). Prerequisite: ACTG 4740.

**ACTG 4760 CEOs and Corporate Governance (4 Credits)**

This course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Cross-listed with LGST 4760.

**ACTG 4795 Graduate Research Sem-Actg (1-17 Credits)****ACTG 4880 Internship - Graduate (0-4 Credits)**

Hours and times arranged by student.

**ACTG 4991 Independent Study (1-10 Credits)**

Hours and times arranged by student.

**ACTG 6300 Behavioral Research in Accounting Seminar (4 Credits)**

This seminar will provide students with the tools needed for educated consumption of behavioral research in accounting. We will focus on the theoretical and methodological issues faced by those who conduct this research, as well as the practical implications of the research for business leaders. Students should leave the course with a basic knowledge of behavioral research in accounting and be better able to create, analyze and critique such research.

## Courses

### **ACTG 4130 Accounting Process Technologies (4 Credits)**

Accounting Process Technologies are a continually evolving discipline within the profession of accounting. Students are introduced to current and developing technologies used for process mining, automation, and analysis. Students will gain hands-on experience with various technologies as well as learn the accounting theories behind them.

### **ACTG 4155 Accounting Data Skills and Concepts (4 Credits)**

This course is designed to give students an understanding of the technology underlying accounting information systems and help students develop more advanced data analysis skills. We will use the programming language Python to develop an understanding of the digital business logic that supports the operations of modern firms. We will learn to use Business Process Modeling Notation (BPMN) to graphically document operations and their underlying business logic. We will discuss and analyze a set of studies that use survey data from a global sample of executives and analysts to develop an understanding of the levels of technological sophistication in modern firms. We will also discuss and analyze distributed databases, information security, and eXtensible Business Reporting Language. Prerequisites: none.

### **ACTG 4176 Accounting Data Analytics (4 Credits)**

In this course, students explore overarching trends in big data and the impact to accounting and auditing fields while also gaining hands on experience working with business data sets. In today's information world, accountants must be well equipped to understand and utilize the vast and varying data systems that feed a company's decision making process. This course allows students to develop big data skills by learning the SQL language to query data from mock clients. Students execute Computer Assisted Auditing Techniques (CAATs) using both the SQL language as well as the audit data mining tool, IDEA. Students simulate the process to request client data files, load complex data sets, design and execute query procedures and summarize results for management. Prerequisite: ACTG 4610.

### **ACTG 4220 Financial Actg & Analysis (4 Credits)**

Cross-listed with ACTG 3230.

### **ACTG 4222 Understanding Financial Statements (4 Credits)**

At the conclusion of this course the student should understand: (1) management decisions that impact published financial statements, (2) the fundamentals of interpretation and analysis of financial statements, (3) economic and ethical issues relating to financial reporting, and (4) management attempts to enhance reported operating results. The course addresses the needs of managers and analysts, hence does not cover promulgated financial reporting rules in depth. The financial reporting topics expand on material presented in introductory Accounting and Finance courses. The focus is on the substance of the reported information. This course is not an approved elective for the MACC degree. Cross listed with ACTG 3220.

### **ACTG 4240 Topics & Cases in Financial Accounting (4 Credits)**

This course develops a greater awareness of contemporary accounting issues, focusing on financial reporting. The course is designed to enhance each student's ability to identify, discuss, and resolve open-ended problems (i.e., those having no single "correct" answer) faced by accounting professionals. Each student must commit to being an active participant in the class discussions. Through the use of numerous cases involving all aspects of financial reporting, students identify issues, conduct authoritative research, then present and defend their conclusions using both oral and written presentation formats. Students also write an original research paper on a topic of their choice.

### **ACTG 4281 Intermediate Financial Accounting I (4 Credits)**

The focus of this course is the foundation and content of published financial statements. Specifically it covers the following broad topics: (1) Conceptual Framework of Financial Reporting; (2) Financial Statements and Related Disclosures; (3) Assets: Recognition and Measurement; and (4) Liabilities: Recognition and Measurement. Common to each of the topics is an emphasis on reading GAAP and applying GAAP guidance to fact patterns. At the conclusion of the course, students should be aware of the proper accounting treatment for many common situations; moreover, students should be fully comfortable interpreting GAAP literature to address scenarios involving assets, liabilities, and income that were not specifically covered in the class.

### **ACTG 4282 Intermediate Financial Accounting II (4 Credits)**

This course is a continuation of Intermediate Financial Accounting. The focus of this course is the application of Generally Accepted Accounting Principles to complex business transactions. In this final course of the sequence, we finish our examination of the balance sheet by exploring the issues involved with stockholders' equity, followed by in-depth study of some of the most complex accounting issues, including revenue recognition, accounting for income taxes, pensions and post-employment benefits, leases, and accounting changes and errors.

### **ACTG 4284 Consolidated Financial Statements (2 Credits)**

This course introduces the student to the preparation of financial statements in compliance with GAAP when the reporting entity has investments in other entities that are other than passive investments. This module explores the financial reporting issues relating to partial or full ownership of one business entity by another. It includes use of the equity method as well as issues involved in reporting the financial results of consolidated entities, both at and subsequent to acquisition or formation.

### **ACTG 4285 Accounting for Foreign Operations (2 Credits)**

Topics covered in this course include the financial statement impact of doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

**ACTG 4290 Financial Accounting Theory (4 Credits)**

This course introduces financial accounting theory with a focus on the application of accounting information as a tool for decision makers for firm valuation, contracting, executive compensation, enhancing corporate governance, and assessing earnings quality. The course draws from basic theories in economics, finance, and psychology to understand and predict accounting choices of firm managers and reactions of investors, lenders, auditors, and regulators to accounting information. The main objective is to foster conceptual, critical, and creative thinking about implications of accounting in the marketplace. Prerequisite: ACTG 4281.

**ACTG 4340 Topics & Cases in Managerial Accounting (4 Credits)**

Topics & Cases in Managerial Accounting focuses upon contemporary methodologies used by managerial accountants. Such methodologies are examined through classroom discussions of case studies and related articles. The course is designed to develop and enhance skills that are essential for the long-term success of career in accounting and finance.

**ACTG 4354 Cost Accounting (4 Credits)**

Accounting information in manufacturing enterprises, standard costs, and budgets. Open to students not having ACTG 3354 or equivalent. Prerequisite: MBA 4110, MBA 4111, or equivalent.

**ACTG 4400 Taxation for Business and Investment Planning (4 Credits)**

This is an introductory tax course that emphasizes a conceptual approach to learning the income tax framework applicable to common business and investment transactions. It is designed to sensitize students to the tax implications of business decisions and to cultivate the student's ability to ask good tax questions. This course will illustrate that effective business planning depends on an accurate assessment of relevant tax factors.

**ACTG 4410 Federal Income Taxation (4 Credits)**

The course is designed for graduate accounting students that wish to study federal income taxation. This is the first course in taxation, which introduces the federal taxation system, the importance of tax authorities, the concepts of gross income and tax deductions and the tax implications of common property transactions. The course generally focuses on property transactions, but the taxation of individuals is emphasized with an objective of students being able to properly prepare complex individual tax returns.

**ACTG 4462 Corporate and Partnership Taxation (4 Credits)**

The course is designed for graduate accounting, finance or other business students in their study of advanced topics in federal income taxation. This is the second course in taxation which concentrates on taxation of corporations, limited liability corporations, S corporations and partnerships. Prerequisites: ACTG 3440 or ACTG 3036 or ACTG 4400 or ACTG 4410 or ACTG 3461.

**ACTG 4520 Forensic Accounting and Auditing (4 Credits)**

Students will have an opportunity to learn, study, and discuss practical aspects of accounting as it is used to detect and prosecute fraud. Students will be exposed to improprieties, common fraud schemes, illegalities, and harassments. Prerequisites: ACTG 3551 or ACTG 4551 (Concurrent enrollment allowed).

**ACTG 4530 Business Advisory and Internal Audit (4 Credits)**

In today's business environment, a given company's "internal audit" function is asked to not only help keep the business out of trouble (control risks), but also help make the business better (leverage risk management to make better business decisions). In this course, we will "reimagine" internal audit with a heavy focus on the business advisory aspects of audit. Topics specifically covered in this course include risk appetite and tolerance, risk culture and an array of cutting-edge audit and advisory topics (cybersecurity, data privacy, social media, to name a few). Students experience "real life" examples and case studies to truly experience the role of an auditor as business advisor. Prerequisite: ACTG 3551 or ACTG 4551.

**ACTG 4551 Auditing (4 Credits)**

This course is designed to provide you with a thorough understanding of auditing and related attest services. This includes gaining requisite knowledge about AICPA (U.S. GAAS) and PCAOB auditing standards and how they are applied in conducting a financial statement audit. Application of these standards applies to planning an audit, the risk assessment process including gaining an understanding of internal control, gathering and evaluating evidence, sampling, and issuing an audit report.

**ACTG 4552 Advanced Auditing (4 Credits)**

This course is designed to build on the foundation of auditing knowledge developed in ACTG 4551 and apply that knowledge to specific accounts and assertions in a financial statement audit. Students also examine selected SEC enforcement actions and discuss what audit procedures may have been beneficial to prevent the misstatement. Prerequisite: ACTG 4551 or ACTG 3551.

**ACTG 4575 Accounting Information System Risk, Control and Audit (4 Credits)**

An auditor cannot just "audit the numbers" without strong consideration to the IT systems that generate those numbers. Today's accounting professionals must possess a strong understanding of accounting information system risks and controls. Topics specifically covered in this course include IT security controls, datacenter controls, data backup and disaster recovery planning, SDLC and change control processes. Students perform hands on simulated audit exercises and case studies to truly experience the role of an IT auditor. Prerequisites: ACTG 3551 or ACTG 4551 or test score AC51=1.

**ACTG 4610 Financial Accounting and Reporting (4 Credits)**

In this course, students will gain a strong understanding of corporate financial statements that are consumed by parties such as managers, shareholders, creditors and financial analysts. The course covers the fundamentals of accounting from recording individual business transactions through the preparation of a company's summarized financial statements. The course closely examines how economic events and business decisions impact the three main financial statements – Income Statement, Balance Sheet and Statement of Cash Flows. Students gain significant experience analyzing Form 10-K annual reports of publicly traded companies.

**ACTG 4620 Accounting Ethics (4 Credits)**

This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed. Prerequisites: None.

**ACTG 4660 Strategic Cost Management (4 Credits)**

Course description: Strategic Cost Management (SCM) will teach students how to use accounting information to make correct decisions within their firms. These decisions will include costing, pricing, strategy, and performance management. SCM articulates how to use accounting information in order to properly price goods and/or services, how to decide between alternative strategies, and how perform relative performance evaluation among employees and/or departments within the firm. The focus is on interpreting accounting information and making business decisions. Topics in the course include cost behavior, activity-based costing, cost-volume-profit analysis, short-term decision-making, balanced scorecard, and management control. The course will enable students to apply strategic thinking to management planning, decision-making, and management reporting. Prerequisite: ACTG 4610.
