This course studies the works of the three leading French playwrights of the seventeenth century: the tragedians Pierre Corneille and Jean Racine and the comic genius Molière. Each of these authors explores various forms of power play that played an important role in the society of their time. These include competitions for political dominance between the feudal aristocracy and an increasingly absolutist monarchy, between the same aristocracy and an emerging middle class, allied with the monarchy, between women and men in their conflicting assertions of rights and privileges, between traditional religion and modern secularism, between the established church and Protestants, between rival liberal and conservative factions within the established church, and between Christian Western Europe and the Muslim Ottoman Empire. Students will read and analyze two plays by each of the three dramatists. This course counts toward the fulfillment of the Analytical Inquiry- Society and Culture requirement.

**FREN 2400 Conversation et composition (4 Credits)**

Intensive practice in spoken and written French. All aspects of the course, including vocabulary acquisition, phonetics, structural review, compositions, readings, oral presentations and comprehension exercises are presented through a topical approach to everyday French and Francophone life, literature, and contemporary issues. Prerequisites: FREN 2003 or FREN 2100.

**FREN 2500 Qu'est-ce que la littérature? (4 Credits)**

Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or equivalent.

**FREN 2501 La Nature et les animaux (4 Credits)**

Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (*La Fontaine*) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course may be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

**FREN 2502 La France et ses autres mondes (4 Credits)**

In *Les Petits garçons naissent aussi des étoiles* (1988), a humoristic novel which retraces the history of an anonymous African country from colonization to its present days, Emmanuel Dongala's narrator relates: "[t]hey ruled over us, ran the country, exploited us, taught us their language, sent us to their schools, gave us new ancestors called Gauls. That's why we still speak French, love French food, and still like to spend our vacations in France, even if these days it is easier to get visa to the moon than to that country." This seminar reexamines these well captured relations in Dongala's novel between France and its "other" worlds. How and why has France built and maintained its empire in Africa, Asia and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers such as Aimé Césaire, Patrice Lumumba, Sékou Touré, Christiane Taubira, Tahar Ben Jelloun, Kim Lefèvre, Samin Nair, Jacques Kane, Isabelle Boni-Clavier and Raoul Peck will help us answer the aforementioned questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afropeanism and Afropolitanism. This course is conducted in French. It counts toward our Analytical Inquiring: Society and Culture. Prerequisite: FREN 2400.

**FREN 2503 La Satire (4 Credits)**

This course is an introduction to satire in French and Francophone literature. A classical literary technique of denunciation, satire has been recently adopted and adapted in popular televised shows (Les Guignols de l'Info in France, Kouthisa Show in Senegal, SNL in the US) to recapture important sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as Alioune Badara Bèye's *Les Larmes de la patrie*, Moussa Absa Sène's *Tableau Ferraille* and Dieudonné's *Le Président africain*, we will analyze why and how authors make use of satire to denounce the most prevailing problems faced by French and Francophone societies at given times of their historical trajectories. Prerequisite: FREN 2400 or equivalent.

**FREN 2504 La Culture au Cinema (4 Credits)**

We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

**FREN 2701 Sujets spéciaux (4 Credits)**

Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.

**FREN 2988 Study Abroad Resident Credit (0-18 Credits)****FREN 2988S Study Abroad Resident Credit (0-18 Credits)****FREN 3110 La Grammaire à l'oeuvre (4 Credits)**

Our most advanced language course, students perfect their knowledge of French grammar in all of its intricacies. Written and oral practice. Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.

**FREN 3150 L'Art de la traduction: français-anglais et vice versa (4 Credits)**

In this course you will study techniques of translation from French to English and from English to French. There will be lots of practice which will allow a thorough review of French grammar. In addition, by translating texts we become more aware of the complexities of both English and French, and attuned to the working of literary or other styles of language. The course includes some study of theories of translation or commentaries on its cultural implications or its history. There will be time for reflection on the broader implications of translation such as intercultural understanding, differences, the question of what is a "faithful" translation, or the experience of living bilingually or in cultural translation. Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.

**FREN 3501 L'Afrique aux Antilles (4 Credits)**

This seminar examines the literary and political enterprises undertaken by Francophone Caribbean novelists, essayists, filmmakers and artists in re-rooting/routing Africa in the Caribbean. We will particularly focus on how and why the Afro-Caribbean tradition is captured in the distinctive movements of Negritude, Antillanité and Créolité. We will use the latter as standpoints from which to examine the affective, historical, and political implications of Africa in the social lives of Caribbean people. We will also discuss the visions and stances of these writers and theorists on the Black Experience and the correlations that exist between the historical and the fictional in essays as well as novels and films. The seminar is conducted in French and emphasizes discussion, writing and critical thinking. Prerequisite: Two courses at the 25XX level.

**FREN 3504 Identité et Altérité (4 Credits)**

This course offers an examination of the complex notions of Self and Other in contemporary texts in French and Francophone Studies at a crucial time when the political debate on national identity reemerges in the West in general and in France in particular. Two fundamental questions have been at the center of the national debate in France: "Pour vous, qu'est-ce qu'être français aujourd'hui?" [For you, what does it mean to be French today?] and "Quel est l'apport de l'immigration à l'identité nationale?" [What is the contribution of immigration to national identity?]. These "controversial" questions subtly divide France into La France française [French France] and La France étrangère [foreign France]. Our textual and filmic selection features writers and filmmakers from France and the Francophone world who address these aforementioned issues by analyzing the power dynamics between the Self and the Other, the Français/es de souche [People of French descent] and the Immigré/es français/es [French Immigrants].

**FREN 3505 Masques du moi (4 Credits)**

Qui suis-je??? The question of self, identity, and discovering "who I am" has preoccupied many writers, filmmakers, or other artists. Identity, or one's sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the "true" facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of "writing the self" represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

**FREN 3507 Auteurs classiques (4 Credits)**

A comprehensive and analytical study of women authors of France from the Middle Ages to 2000. Prerequisite: two courses beyond 2400.

**FREN 3701 Séminaire (4 Credits)**

Selected authors, literary movements and genres in French-speaking world. May be repeated for credit. Prerequisite: FREN 2500.

**FREN 3980 Internship (1-4 Credits)****FREN 3988 Study Abroad Resident Credit (0-18 Credits)****FREN 3991 Independent Study (1-4 Credits)****FREN 3998 Undergraduate Honors Thesis (1-4 Credits)****GERM 1001 Elementary German (4 Credits)**

Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. First quarter of three quarter sequence.

**GERM 1002 Elementary German (4 Credits)**

Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Second quarter of three quarter sequence.

Prerequisite: GERM 1001 or equivalent.

**GERM 1003 Elementary German (4 Credits)**

Basic speech patterns, grammar and syntax; emphasis on oral skills; introduction to German culture. Third quarter of three quarter sequence.

Prerequisite: GERM 1002 or equivalent.

**GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)**

This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 1988 Study Abroad Resident Credit (0-18 Credits)****GERM 2001 Intermediate German (4 Credits)**

Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. First quarter of three quarter sequence.

Prerequisite: GERM 1003 or equivalent.

**GERM 2002 Intermediate German (4 Credits)**

Vocabulary expansion and grammar review, conversation, readings of cultural and literary materials. Second quarter of three quarter sequence.

Prerequisite: GERM 2001 or equivalent.

**GERM 2003 Intermediate German (4 Credits)**

This course challenges students to continue expanding their vocabulary in German and to increase their fluency in speaking, listening and reading.

Students are expected to demonstrate a growing awareness of - and sensitivity to - German culture and express their ideas in a manner consistent with advanced language work. Prerequisite: GERM 2002 or equivalent.

**GERM 2022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)**

This is an introduction to 20th- and 21st-century German culture, history, and politics through film analysis. Studying the most famous and influential films in the history of German cinema, students explore a wide range of topics (including political propaganda, national identity, multiculturalism, terrorism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 2100 Conversation and Composition (4 Credits)**

Intensive practice in oral skills, reading and writing. Prerequisite: GERM 2003 or equivalent.

**GERM 2350 German Film (4 Credits)**

Analysis of selected films centered on major themes in the humanities. Prerequisite: GERM 2100 or equivalent.

**GERM 2701 Topics in German Literature (4 Credits)**

Selected authors or movements in literature of the German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent.

**GERM 2800 Advanced German Grammar and Composition (4 Credits)**

This course offers an in-depth review of advanced grammar structures. Review of grammar in context, as well as practice in composition. Prerequisite: GERM 2100 or equivalent.

**GERM 2988 Study Abroad Resident Credit (0-18 Credits)****GERM 3325 Die Weimarer Republik: German Culture & Society 1918-1933 (4 Credits)**

This course analyzes how violence, economic and political volatility, technology, and changing moral codes affected German society and culture (literature, visual arts, film and music) from the onset of the First World War to the rise of Nazism. Germany's first experiment in democracy, the Weimar Republic, can be viewed both as a prelude to Fascism (and therefore a failure) and as a period of radical socio-cultural change, experimentation, and even progress. This course is taught primarily in German, but occasionally we discuss particular texts in English. Prerequisite: GERM 2003 or equivalent.

**GERM 3425 Nachkriegsdeutschland: German Culture & Society 1945-1990 (4 Credits)**

This course introduces the student to crucial aspects of the immediate postwar years: Germany's 'Stunde Null'; denazification & reeducation; occupation; 'Americanization' of Germany; 'Berliner Blockade'; the divided memory in East and West Germany; democracy in Germany; the Cold War and 'Berliner Mauer.' Via film, literature, and historical studies we explore how both Germanies (East and West) dealt with the legacy of World War II and the Holocaust. During the first third of the course we have a close look at the concerns of the immediate postwar years 1945-49. Most Germans considered these years of occupation, hunger, homelessness, and despair in a vastly destroyed homeland as much worse than the war that preceded them. Then we investigate critiques of the so-called 'normalization' of Germany's internal and external affairs between the founding of two separate German states and the ensuing 'economic miracle' in West Germany (1949-61). Finally, we trace the development of this 'divided nation' until collapse and reunification in 1989/90. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

**GERM 3701 Topics in German Literature (1-4 Credits)**

Selected authors, literary movements and genres in German-speaking world. May be repeated for credit. Prerequisite: GERM 2100 or equivalent, or another 2000-level GERM class beyond 2003.

**GERM 3988 Study Abroad Resident Credit (0-18 Credits)****GERM 3991 Independent Study (1-5 Credits)****GERM 3995 Independent Research (1-10 Credits)****GERM 3998 Honors Thesis in German (1-5 Credits)****GREK 1001 Elementary Greek (Classical) (4 Credits)**

Available only as tutorial with permission of instructor.

**GREK 1002 Elementary Greek (Classical) (4 Credits)**

Available only as tutorial with permission of instructor. Prerequisite: GREK 1001 or equivalent.

**GREK 1003 Elementary Greek (Classical) (4 Credits)**

Available only as tutorial with permission of instructor. Prerequisite: GREK 1002 or equivalent.

**GREK 1416 Myths of Greece & Rome (4 Credits)**

Introduction to the goddesses and gods, heroes and heroines, and not a few monstrosities from popular tradition, literature, and visual arts of the ancient Greeks and Romans. Activities include imaginative and creative assignments. No prerequisite. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GREK 1716 It's Really Epic! The Ancient Heroic Epics of Homer and Virgil in Contemporary Translation (4 Credits)**

Foundations of Western values and aspiration, good one and not so good ones, may be found at the beginning of Western/European literature in the "Homeric" epics Iliad and Odyssey. The very notions of "tragedy" and "romance" originate in them. For the past twenty six or seven centuries men and women have wrestled with problems, often moral dilemmas and contradictions, that are first dramatized there. Centuries later, though still two millennia before our time, the Roman poet Virgil confronts the triumphant individualism of the Greek epics in his Aeneid and answers them with compassion and a vision of a very different way to build a person and a community. A better one? We address that question by studying these three timeless texts in award-winning-winning 21st-century English versions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GREK 1816 Ancient Tragedy Ever Modern (4 Credits)**

Three great Athenian tragedians of the 400s BCE--Aeschylus, Sophocles, and certainly most modernist of all Euripides--offer us of the 2000s CE much to experience, much to ponder, much that still challenges or provokes us. We experience their democratic Athenian community and its political and social, its religious and philosophic innovations as actualized in tragedy. We read and analyze, enact (in parts) and even imitate both widely known "world classics" Antigone and Oedipus Tyrannus, Medea and Bacchae with fresh approaches proper to our turbulent times, but also less familiar, often distressing "problem" plays that include Euripides' Andromache, Hecuba, and Heracles. This course bears the Analytical Inquiry: Society and Culture attribute in Common Curriculum.

**GREK 1916 Comedy Old and New (4 Credits)**

Reading and discussion of and experiment with comedies from ancient Rome and even more ancient Greece. We begin, however, with modernizations in American-musical form, and end with our own product in 21st-century emulation. Students' participation, even broad clownish histrionics, required. Students must also be eager to laugh--knowingly and intelligently, of course.

**GREK 3991 Independent Study (1-5 Credits)****HEBR 1001 Elementary Hebrew (4 Credits)**

Hebrew 1001 is designed for students with little or no prior knowledge of Hebrew. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. First course in a three-quarter sequence.

**HEBR 1002 Elementary Hebrew (4 Credits)**

Hebrew 1002 is the second course in a three-quarter sequence. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1001 or equivalent.

**HEBR 1003 Elementary Hebrew (4 Credits)**

This is the third course in the elementary Hebrew sequence. It aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1002 or equivalent.

**HEBR 2001 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 1003 or equivalent.

**HEBR 2002 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2001 or equivalent.

**HEBR 2003 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2002 or equivalent.

**HEBR 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)**

The course goals are three-fold: a) to facilitate students' communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students' knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with JUST 2745. Prerequisite: HEBR 2003 or equivalent.

**HEBR 3010 Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion (4 Credits)**

This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with JUST 3010. Prerequisite: HEBR/JUST 2003.

**HEBR 3991 Independent Study (1-5 Credits)****ITAL 1001 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Italian 1001 is designed for students with no prior knowledge of Italian. Students with experience with the Italian language should complete the placement test to determine the appropriate course level for their background.

**ITAL 1002 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1001 or equivalent.

**ITAL 1003 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1002 or equivalent.

**ITAL 1988 Study Abroad Resident Credit (0-18 Credits)****ITAL 2001 Intermediate Italian (4 Credits)**

Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1003 or equivalent.

**ITAL 2002 Intermediate Italian (4 Credits)**

Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 2001 or equivalent.

**ITAL 2005 Reading and Conversation (4 Credits)**

In Reading and Conversation, students learn the ease of expression in Italian through the intermediate-level reading of cultural and literary materials and through the study of vocabulary. Readings and contemporary issues are discussed in class. Prerequisite: ITAL 2002 or equivalent.

**ITAL 2201 20th-Century History and Culture (4 Credits)**

This course provides a historical and cultural approach to 20th-century Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2355 Images of Rome in Literature & Film (4 Credits)**

The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2500 Introduction to Italian Literature (4 Credits)**

Introduction and overview of Italian literature from 13th century to present; works representing major authors, periods, themes and forms. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2988 Study Abroad Resident Credit (0-18 Credits)****ITAL 3010 Advanced Conversation and Composition (4 Credits)**

This course continues to refine students' oral and written skills while enhancing their cultural awareness. Concepts, such as contemporary Italian politics, economy, and gastronomy, are introduced through authentic texts. Specific emphasis is placed on written skills—providing students with the necessary writing skills for continued study in Italian. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3701 Topics in Italian Studies (4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3702 Topics in Italian Studies (1-4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3703 Topics in Italian Studies (1-4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3988 Study Abroad Resident Credit (0-18 Credits)****ITAL 3991 Independent Study (1-5 Credits)****ITAL 3995 Independent Research (1-10 Credits)****ITAL 3998 Undergraduate Honors Thesis (1-5 Credits)**

This course will guide students who are majoring in Italian in the selection of a topic for their honors thesis, research materials, and individual meetings with the professor(s) directing the thesis.

**JAPN 1001 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. First quarter of a three-quarter sequence. Japanese 1001 is designed for students with no prior knowledge of Japanese. Students who have experience with the Japanese language should complete the placement test to determine the appropriate course level for their background.

**JAPN 1002 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Second quarter of a three-quarter sequence. Prerequisite: JAPN 1001 or equivalent.

**JAPN 1003 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Third quarter of a three-quarter sequence. Prerequisite: JAPN 1002 or equivalent.

**JAPN 1005 Japanese for the Real World (4 Credits)**

This fun and challenging intermediate-level, task-based language course develops Japanese language & cultural competency for students preparing to study abroad in Japan or travel to Japan independently. In this course students synthesize and build on their reading, writing, speaking, listening and cultural skills prior to departure in order to maximize their study/travel abroad experience. The task-based curriculum will help students improve their communicative skills in the Japanese language through authentic materials and concrete, task-based language learning. Students also deepen their knowledge about Japanese culture and have online and face-to-face discussions when possible with Japanese native speakers to enhance their cultural competence. Prerequisite: JAPN 1003 or instructor permission.

**JAPN 1216 Popular Culture of Japan (4 Credits)**

In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)**

This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. Prerequisites: JAPN 1001.

**JAPN 1616 Samurai and Merchants: Cultures of Tokugawa Japan (4 Credits)**

Introduction to the cultures of Tokugawa, Japan, focusing on the tension between the samurai and merchant classes, the images they construct of self and other, and the morals and mores of their respective worlds. As well as examining Tokugawa fiction, drama, and other cultural artifacts, this course also considers later representation of the period and of its people in twenty- and twenty-first-century text, cinema, and television to understand the importance of contemporary influences on historical representation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1816 Classical Japanese Literature (4 Credits)**

The course covers one thousand years of Japanese writing, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, the classic *The Tale of Genji*, medieval tales of wars and hermits, the *nō* drama, and the haiku and travel diaries. It will focus on such key binaries as orality and literacy, poetry and prose, native and foreign, popular and high-brow, and masculine and feminine. The course will also stress principles of literary analysis and interpretation. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1988 Study Abroad Resident Credit (0-18 Credits)****JAPN 2001 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. First quarter of three quarter sequence. Prerequisite: JAPN 1003 or equivalent.

**JAPN 2002 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Second quarter of three quarter sequence. Prerequisite: JAPN 2001 or equivalent.

**JAPN 2003 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Third quarter of three quarter sequence. Prerequisite: JAPN 2002 or equivalent.

**JAPN 2101 Conversation and Composition I (4 Credits)**

Intensive practice in oral skills, grammar review, reading and writing. Prerequisite: JAPN 2003 and JAPN 1416.

**JAPN 2102 Conversation & Composition II (4 Credits)**

Intermediate training in speaking, reading and writing. Prerequisite: JAPN 2101 or equivalent and JAPN 1416.

**JAPN 2103 Conversation & Composition III (4 Credits)**

Advanced-intermediate training in speaking, reading and writing. Prerequisite: JAPN 2102 or equivalent and JAPN 1416.

**JAPN 2988 Study Abroad Resident Credit (0-18 Credits)****JAPN 3701 Topics in Japanese Culture (4 Credits)**

Selected topics in Japanese culture. Texts and films in both Japanese and English, with a focus on modern and contemporary Japanese culture. May be repeated for credit. Prerequisite: JAPN 3100 or equivalent.

**JAPN 3988 Study Abroad Resident Credit (0-18 Credits)****JAPN 3991 Independent Study (1-5 Credits)****JAPN 3995 Independent Research (1-10 Credits)****LATN 1001 Elementary Latin (4 Credits)**

Essentials of classical Latin grammar and vocabulary. Three quarter sequence.

**LATN 1002 Elementary Latin (4 Credits)**

Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1001 or equivalent.

**LATN 1003 Elementary Latin (4 Credits)**

Essentials of classical Latin grammar and vocabulary. Three quarter sequence. Prerequisite: LATN 1002 or equivalent.

**LATN 1991 Independent Study (1-10 Credits)****LATN 2001 Intermediate Latin (4 Credits)**

Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 1003 or equivalent.

**LATN 2002 Intermediate Latin (4 Credits)**

Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2001 or equivalent.

**LATN 2003 Intermediate Latin (4 Credits)**

Close reading and translation of a major classical Roman author or genre each term. Three quarter sequence. Prerequisite: LATN 2002 or equivalent.

**LATN 3991 Independent Study (1-5 Credits)**

Prerequisite: LATN 2003 or equivalent.

**RUSS 1001 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Russian 1001 is designed for students with no prior knowledge of Russian. Students who have experience with the Russian language should complete the placement test to determine the appropriate course level for their background.

**RUSS 1002 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1003 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1002 or permission of instructor.

**RUSS 1416 Introduction to Russian Culture: The Wondrous and the Supernatural (4 Credits)**

How do we explain the enchanting and mysterious world of Russian Culture? How have Russians imagined their world and themselves? To answer these questions, we will examine the various manifestations of the wondrous and the supernatural in Russian art. We will begin by reading Russian fairy tales to learn about the people's folk beliefs and their Eastern Orthodox faith. We will then trace the Russian fantastic tradition by studying the works of nineteenth- and twentieth-century writers who wrestled to explain the marvelous and the demonic myths at the foundation of Russian culture. We will focus our attention on Russia's cultural capitals St. Petersburg and Moscow and discuss how supernatural themes reflected social and historical realities. Authors may include Pushkin, Gogol, Dostoevsky, Bely, and Bulgakov. No knowledge of Russian is necessary; all class discussions, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)**

This course surveys Russia's cultural past and present—from the beginnings of the Russian state over a thousand years ago through the Soviet Union and, after its disintegration in 1991, to the Russian Federation. The course surveys the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, music, ballet, film) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. By working across disciplines, students will discover the fascinating cultural interconnectedness of Russian politics, art, faith, and national identity. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1860 The Russian Short Story (4 Credits)**

This course will introduce students to Russian literature through some of its shorter "masterpieces" of fiction. Students will explore the lives and ideas of some of Russia's greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 1922 The Soviet Experiment in Literature and Film (4 Credits)**

Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagandized by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovski, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevskaya, and watch ground-breaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2001 Second Stage Russian (4 Credits)**

Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 1003 or equivalent. First quarter of two quarter sequence.

**RUSS 2002 Second Stage Russian II (4 Credits)**

Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 2001 or equivalent. Second quarter of two quarter sequence.

**RUSS 2003 Second Stage Russian III (4 Credits)**

This course concludes the second-year Russian 2001/2002/2003 sequence designed to develop your proficiency in all language skills. You will continue to acquire conversation, reading, and writing skills at the intermediate level, with an emphasis on everyday situations and communicative contexts. A great deal of attention will be devoted to the learning of grammar in conjunction with the immediate activation of it in conversation. Contemporary texts will acquaint you with Russian culture and life. Literary texts, songs, films, and activities will supplement textbook materials. Prerequisite: RUSS 2002.

**RUSS 2110 Russian in a Cultural Context (4 Credits)**

Continued development of Russian language and cultural skills with focus on all aspects of Russian culture, particularly Russian literature. Prerequisite: RUSS 2002 or equivalent.

**RUSS 2111 Linguistic Politeness and Intercultural Communication (4 Credits)**

In this course, students will explore how American and Russian speakers perceive politeness, and how sociocultural values underlying both cultures affect the speakers' communicative styles, their performance and perception of speech acts, and expression of emotions. Although this course focuses on Russian, other cultures will also be analyzed, such as German and Polish, and those of students' heritage. This course will help students to improve their communicative competence and deepen their understanding of some European cultures. The course will be conducted in English. Highly recommended for students planning on studying in Russia, Germany, or Poland. The course format consists of lectures, presentations, as well as class and group discussions. Students who major in Russian may get credit by providing coursework in Russian. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)**

This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator's voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country's intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women's place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 2350 Russian Language and Culture through Film (4 Credits)**

Film has played a significant role in the Soviet culture and continues to be an important cultural expression today. Many Soviet comedies also enriched conversational Russian with unforgettable formulaic expressions and sayings. In this course we will work with some of the most famous films produced in the USSR and contemporary Russia. Our goals will be close viewing to understand cultural symbolism of the images, the stylistics of different genres of speech, and the work of the camera and actors. This will allow you to further advance your Russian language skills by expanding your vocabulary and by incorporating more idiomatic expressions and the so-called “precedented” text in your speech. In the area of grammar and syntax, we will continue working on the Russian pronominal case system, verb conjugation, but also develop new skills, such as: composing complex sentences and using correct punctuation. This course is taught in Russian. By the end of quarter, all students are expected to acquire a proficiency level of “Intermediate Mid” or better in listening, speaking, reading, and writing. Prerequisites: RUSS 2110 or instructor permission.

**RUSS 2461 Russian Science Fiction (4 Credits)**

This course studies the fascinating world of Russian science fiction in the twentieth and twenty-first centuries. Throughout the term, students will examine how Russian and Soviet writers and film-makers reimagined society, science, technology, and space. We will discuss Soviet futuristic utopias, interplanetary voyages, and post-apocalyptic visions. Students will further probe the figure of the alien as a dissident or cultural Other, as Soviet authors grappled with questions of cultural and ideological difference. We will examine how sci-fi writers glorify or critique Soviet society in their visions of space flight, technologically advanced societies, alien worlds, or post-nuclear disasters. Ultimately, we will reflect on the philosophical quandaries that Russian science fiction explores. Works include pre-revolutionary sci-fi texts by Bryusov and Kuprin; Soviet dystopias by Zamiatin and Bulgakov; sci-fi classics by the Strugatsky Brothers; Tarkovsky’s filmic masterpieces; and post-Soviet science fiction by Viktor Pelevin and Sergei Lukyanenko. All readings are in English translation. No prior knowledge of Russian is required. This course fulfills part of the Common Curriculum’s “Ways of Knowing: #Analytical Inquiry: #Society and Culture” requirement. In this class, students will 1) demonstrate the ability to create or interpret the texts, ideas, or artifacts of human culture; 2) identify and analyze the connections between the texts, ideas or cultural artifacts and the human experience and/or perception of the world.

**RUSS 2917 Russian Revolution in Literature and History (4 Credits)**

The course introduces students to the literature, history, and art of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of art and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 3101 Advanced Conversation & Composition (4 Credits)**

Continued improvement of Russian language skills in areas of style and syntax. First quarter of two quarter sequence. Prerequisite: RUSS 2110 or RUSS 2111 or equivalent.

**RUSS 3102 Advanced Conversation & Composition II (4 Credits)**

Advanced Composition and Conversation focuses on the continued improvement of Russian language skills in areas of style and syntax in all four modalities (speaking, writing, listening, and reading). At an advanced level, the class will focus on developing high-level oral and written communication skills that will enable students to study and critically evaluate authentic materials from the target culture. The textual, audio and video materials used in the course will serve to enrich your understanding and knowledge of Russian culture. Prerequisite: RUSS 2110.

**RUSS 3200 Seminar: Russian Short Story (4 Credits)**

Russia through the study of selected short stories. Prerequisite: RUSS 2110 or 2111 or equivalent.

**RUSS 3232 Russian Avant-Garde (4 Credits)**

This interdisciplinary course addresses various manifestations of Russian Modernism and the Russian avant-garde in art, literature, poetry, music, theatre, and film in the late 19th – early 20th century. Its objective is to provide an understanding of the time’s rapid, drastic, and often conflicting cultural and artistic transformations by examining in depth major Russian Modernist works. Students will explore such artistic and literary movements as Symbolism, Cubo-Futurism, Neo-Primitivism, Suprematism, Rayonism, and Constructivism in the context of Russian late Imperial, revolutionary, and early Soviet social, political, and philosophical developments. We will pay special attention to the cultural dialogues between Russia and the West and investigate the aesthetic, erotic, and social utopias of Russian Modernism. The course examines philosophical essays, films, plays, poems, short stories, music, and art created during the period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s.

**RUSS 3300 Short Russian Prose (4 Credits)**

An advanced conversation and composition course based on Russian prose. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3650 Soviet and Post Soviet Cinema (4 Credits)**

Film course concentrating on the works of Andrei Tarkovskii. Open to non-Russian speaking students. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3701 Topics in Russian Literature (4 Credits)**

Selected topics, authors and movements in medieval, Russian, Soviet and post-Soviet literature. May be repeated for credit. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3850 Working with Russian Media (4 Credits)**

Multimedia course emphasizing new media in Russian culture and society. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3991 Independent Study (1-5 Credits)**

**RUSS 3995 Independent Research (1-5 Credits)**

**RUSS 3998 Honors Thesis (1-4 Credits)**

## Faculty

**Angelo Castagnino**, Associate Professor, PhD, University of North Carolina at Chapel Hill

**Victor Castellani**, Professor, PhD, Princeton University

**Frédérique Chevillot**, Professor, PhD, University of Colorado Boulder

**Polina Dimova**, Assistant Professor, PhD, University of California, Berkeley

**James P. Gilroy**, Professor, PhD, Princeton University

**Gabi Kathöfer**, Associate Professor, PhD, University of Connecticut

**Michal Lev**, Teaching Assistant Professor of Hebrew, MA, Middlebury College

**Moustapha Ly**, Associate Professor, PhD, University of Michigan

**Jennifer Pap**, Professor, PhD, Princeton University

**Ping Qiu**, Teaching Associate Professor, PhD, Purdue University - West Lafayette

**Orna Shaughnessy**, Associate Professor, PhD, University of California-Berkeley

**Michael Toole**, Teaching Assistant Professor, PhD, University of Wisconsin - Madison

**Rachel A. Walsh**, Associate Professor and Department Chair, PhD, University of Chicago

**Roberta Waldbaum**, Teaching Professor, PhD, University of Denver

**Wilfried Wilms**, Professor, PhD, Indiana University

**Sieglinde Lug**, Associate Professor, Emerita, PhD, University of California, San Diego

**Helga Watt**, Professor, Emerita, PhD, University of Massachusetts Amherst

## Leadership Studies Program

Office: DFRV Level 1 East Wing

Mail Code: 2020 S High Street, Room P177, Denver, CO 80208

Phone: 303.871.2462

Email: [applylp@du.edu](mailto:applylp@du.edu)

Web Site: <http://www.du.edu/leadership> (<http://www.du.edu/leadership/>)

The Leadership Studies (LDRS) Program offers an academic 24 credit minor to select students who are committed to becoming inclusive leaders and community change makers that create a more equitable and just world. There are 3 programs through which DU undergraduates can obtain the minor: 1) the historic Pioneer Leadership Program (PLP) begun in 1995; the Colorado Women's College Leadership Scholars Program, which is a legacy program of the historic CWC; and the newest ROTC minor pathways for Army ROTC and Air Force ROTC undergraduates.

PLP students apply as incoming first year students, from which 88 are selected to live together in Dimond Family Residential Village and take a 2 cr. course each quarter leading to a minor in leadership studies. Students also serve in a non-profit, educational or government agency during their first year to test out and practice concepts learned in the classroom. In the second year, PLP students learn about leading community change and enact a year-long project that is undergirded by a course on collaborative and inclusive leadership each quarter. Students finish the minor in their junior or senior year with a leadership ethics course and 6 electives from across the DU curriculum and/or from studying abroad.

The Colorado Women's College Leadership Scholars Program selects 15-20 incoming first-year students who identify as first generation college students and/or come from underrepresented communities, and believe in advancing women's leadership at DU and beyond. Our cohort-based program offers a scholarship for students with financial need and develops diverse, thoughtful, inclusive leaders. Students complete 2 cr. courses each quarter in their first year and identify and develop a mentor relationship with peers and CWC alumnae. In the second year, students complete a year-long Partners in Community Service (PICS) project with a local community partner to address a significant social issue and need. Students finish the minor in their junior or senior year with a capstone course focused on leadership ethics and reflection on their learning, along with completion of 6 electives from across the DU curriculum and/or from studying abroad. The program harnesses the open and supportive environment that is the legacy of the Colorado Women's College.

ROTC Army and Air Force students experience broad leadership training and course work in their military training and service while studying at the University of Denver. Pre-approved ROTC leadership course credits are transferred into a student's transcript and can be applied with additional Leadership Studies coursework to complete the academic LDRS minor. These programs of study enlarge the military leadership training and experience ROTC students already receive, equipping leaders who will serve their country with empathy, inclusive leadership practices, ethical decision making and community mindedness.

## Leadership Studies

### Minor Requirements - PLP

The minor requires 24 credits.

Code	Title	Credits
<b>First year</b>		
LDRS 2017	Inclusive Leadership	1,2
LDRS 2019	Teaming for Social Change	1,2
LDRS 2021	Leadership and Social Movements	1-2
<b>Second year</b>		
LDRS 2040	Leading Community Change	4
LDRS 2050	Collaborative Leadership: Local Perspectives	2
LDRS 2060	Collaborative Leadership: Global Perspectives	2
40 service hours		
<b>Third and/or fourth year</b>		
LDRS 3000	Capstone: Leadership Ethics	4
6 credits at the 2000 level or above <sup>1</sup>		6
<b>Total Credits</b>		<b>23-24</b>

<sup>1</sup> Additional credits can come from a combination of elective courses, internships and/or independent study. These credits must be approved by the program director.

### Minor Requirements - CWC Leadership Scholars

The minor requires 24 credits.

Code	Title	Credits
<b>First year</b>		
LDRS 2017	Inclusive Leadership	1,2

#### **COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

#### **COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

#### **COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

#### **COMN 2470 Gender and Communication (4 Credits)**

Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

#### **COMN 3020 Conflict Management (4 Credits)**

Substantive and relational types of conflict, various strategies for conflict resolution.

#### **COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

#### **COMN 3230 Principles of Leadership (4 Credits)**

Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

#### **COMN 3300 Principles of Persuasion (4 Credits)**

This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

#### **COMN 3315 Public Deliberation (4 Credits)**

During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?.

**COMN 3680 Gender and Communication (4 Credits)**

This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

**COMN 3770 Mediated Communication and Relationships (4 Credits)**

This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

**COMN 3850 Communication Ethics (4 Credits)**

This class is not just about how to be ethical communicators but it is also about how to discover ethics—the good life and care for others, answerability and responsibility—deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

**GEOG 3420 Urban and Regional Planning (4 Credits)**

Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

**HIST 2530 American History: 20th Century (4 Credits)**

This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

**INTS 3385 Migrants and Refugees: Humanity on the Move (4 Credits)**

This course begins with the pre-history and history of human migrations and moves to cover the era of European colonization and forced dispersal (and in some cases aggregation) of peoples in the Americas, Southeast Asia, and Africa. The "contemporary" (i.e., post-WWII) era then covers not only the movements of peoples from Central Africa, Southeast Asia, the Balkans, and elsewhere, but will highlight the achievements of immigrants and refugees in such areas as technology, the arts, and the field of human rights. Issues of ethnicity, nationalism, and political diasporas will bring the contemporary era to a close. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3952 Human Rights in the Global World (4 Credits)**

This course will examine the nature, utility and effectiveness of international efforts to define, promote and protect human rights. Particular attention will be given to activities of the United Nations and related programs and agencies. The roles of governments, regional intergovernmental organizations and nongovernmental organizations will also be explored. Prerequisites: INTS 1500 and INTS 1700.

**INTZ 2501 Exploring Global Citizenship (1-2 Credits)**

Examining questions of identity, globalization, and cross-cultural communication, this course is required of all students at DU intending to study abroad. The intent of the class is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken within the year prior to study abroad and is followed while abroad by the second course in the sequence, INTZ 2502, also required for students on unaffiliated programs. This is a 2 credit course. To take the course for 1 credit, students must provide documentation forwarded by academic and major advisor(s) directly to the course director that they have not been able to nor would be able to take the course for 2 credits prior to study abroad based on required (non-elective) course selection for the entire year prior. The department will then review the materials and determine whether the petition process is warranted.

**INTZ 2502 Global Citizenship in Practice: Maximizing Study Abroad (1 Credit)**

Examining questions of identity, globalization, and cross-cultural communication, this is a pilot course that may eventually be required of all students at DU to be taken while studying abroad. The intent of the course is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken during a student's study abroad experience and is preceded by INTZ 2501.

**LDRS 2000 Foundations of Leadership (4 Credits)**

LDRS 2000 focuses on developing an understanding of the foundations of leadership through an overview of leadership theories and definitions, an exploration of the present and future contextual demands on leaders, and in-depth self-assessment which includes identification of strengths, weaknesses, social identity, and leadership practices. The course will also explore the role of leadership and followership in teams. LDRS 2000 is designed to broaden your understanding of what constitutes leadership while challenging you to understand yourself better and begin to apply civically engaged leadership in new ways. This course is designed to broaden your understanding of "who" and "what" constitutes leadership.

**LDRS 2017 Inclusive Leadership (1,2 Credit)**

In this academic entree to the study of leadership, we explore the fundamental nature of leadership and how to develop as students of leadership in a diverse world. This course encourages students to discover their personal identities, values, preferences, risk-taking propensity and other characteristics as these relate to their leadership potential. Students integrate learning in a Personal Leadership Statement, declaring what they stand for as an inclusive leader. We explore the idea of "community" and our obligations to take on a leadership role in the community with whom we identify. Service as an act of leadership will be expected both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisite: membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

**LDRS 2018 Leadership: Theory to Innovation (1,2 Credit)**

This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to innovate and create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017 and membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

**LDRS 2019 Teaming for Social Change (1,2 Credit)**

Teams are the primary vehicle by which many, if not most, complex tasks are accomplished in our society. As a result, there is an increasing demand for leaders who can build, lead and participate in effective teams. With this course, you are completing your first-year sequence as a student of leadership. It will help lay the theoretical and conceptual foundations you need to prepare you to (a) reflect on teams of which you have been a part; (b) develop strategies for making your teams more effective, whether you are a leader or a team member; and (c) help you develop skills for your sophomore service project. Prerequisites: LDRS 2018 and membership in the Pioneer Leadership Program, or permission of PLP faculty.

**LDRS 2021 Leadership and Social Movements (1-2 Credits)**

This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to innovate and create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), membership in the Colorado Women's College or permission of PLP faculty.

**LDRS 2040 Leading Community Change (4 Credits)**

This course builds on the themes we began in the first-year PLP sequence. Specifically, we continue to expand your understanding of community, citizenship, and spheres of influence. Last year, you explored theories of leadership as well as your own assets and passions you carry into leadership. During the second-year course series we learn how to think strategically and act purposefully to make change happen in a larger context—the community. This course asks you to look at and practice leadership as a relational process that brings people together around common interests in order to effect positive change within institutions and/or communities. We will examine and practice key leadership concepts including self-interest, power, and collaboration. We will also practice specific leadership strategies, including 1-1 interviewing techniques, issue research, developing mission statements and action plans, and conducting community research. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), or permission of the PLP faculty.

**LDRS 2050 Collaborative Leadership: Local Perspectives (2 Credits)**

This course is a continuation of LDRS 2040 and the exploration of the topics of collaborative leadership and community change. In this course you will begin the implementation of the Community Change Initiatives you developed in LDRS 2040. To effectively enact community change, "change agents" must manage project logistics, continually develop as leaders, and be competent communicators. By the end of this course, you will further develop your abilities to effect community change through knowledge and awareness of strategies to effectively impact these areas. Prerequisites: LDRS 2017, LDRS 2021, LDRS 2019, LDRS 2040 and PLP membership or approval.

**LDRS 2060 Collaborative Leadership: Global Perspectives (2 Credits)**

This course is a continuation of LDRS 2040 and LDRS 2050. We will pursue the exploration of leadership and community change adding a focus on global cultural differences. In LDRS 2050, much of our class was devoted to communication, particularly "crucial conversations," where we applied new ideas and skills to leadership and followership in CCI teams. This quarter, we will focus on communication skills in diverse cultures and how leadership is enacted and perceived in different cultures around the globe. Students in this course will also finalize the implementation of their CCI developed in LDRS 2040 and LDRS 2050. Community change initiatives require students to understand the communities where they live and work, to be confident in the appropriateness of their community change efforts, and to fairly and conceptually assess their efforts and impacts. By the end of this course, you will develop a deeper understanding of the community change process. Prerequisites: LDRS 2050 and PLP membership or PLP approval.

**LDRS 2070 Envisioning & Enacting Anti-Racist, Feminist Leadership (2 Credits)**

This course explores the complex intersections of race, gender, and the complexities of setting life goals for leadership. Students will consider race and gender as a socially constructed concepts and discuss the biases and systemic barriers in which these constructs have developed and how this may influence their understanding and enactment of leadership. The course focuses on practical application of goal setting, career planning, and tools for navigating systemic barriers to leadership. To address these perspectives, the course reviews research from a variety of disciplines, including education, social psychology, sociology, economics, and management and organizational science.

**LDRS 2120 Mentorship: Theory to Practice (2 Credits)**

Whether being mentored, or mentoring another person, understanding how to make the most of the experience is important. This course will explore the theory and practice of mentoring. Students will explore mentoring philosophy, design, implementation and assessment, as well as the potential benefits and pitfalls of mentoring relationships. They will examine diversity and inclusion in mentoring and the impact of mentoring in different academic pursuits and professional capacities. Students will have the opportunity to hear from professionals who have utilized mentoring in their careers, research important elements of mentoring for their desired career paths, design their "ideal" mentoring experience from both the mentee and mentor experience, and learn how assessment can help evaluate the effectiveness of mentoring programs.

**LDRS 2310 Leadership in a Virtual World (4 Credits)**

Distributed organizations are commonplace in the high-tech world in which we now find ourselves living and working. Leading in private and public settings requires a developed set of skills to utilize the virtual environment to advance a shared goal. Technical skills and communication take on new importance for leading virtually. This course focuses on these new realities of today's work and community environments. Through readings of current research on virtual work and team leadership as well as online assignments to recognize, practice and develop needed skills, students gain a strong foundational understanding of what constitutes effectiveness in virtual work and community leadership.

**LDRS 2400 Leadership and Sustainability in Belize (4 Credits)**

Every day, decisions are made by leaders in business, government, and non-profit settings that impact sustainability in its many forms. This course explores multiple meanings and interpretations of sustainability. The course location of Belize provides a perfect learning laboratory to examine how one country is attempting to balance the sometimes competing demands of economic, cultural, and environmental sustainability. Course activities include staying at a low-environmental impact conference center in the rainforest, visiting a model environmentally sustainable island community, hearing guest lectures from various country experts, and exploring Mayan ruins. Through these activities students examine the role that leadership plays in contributing to small and large scale sustainability efforts. Students must apply and receive instructor permission to register for this course.

**LDRS 2430 Leadership, Peace, and Conflict in Northern Ireland (4 Credits)**

Much can be learned from the journey toward peace amidst the conflict in the Republic of Ireland and the United Kingdom of Great Britain and Northern Ireland. Through an intensive study of historical events and their resulting sociopolitical outcomes today, students will gain a deep understanding of the role of leadership, peace, and conflict studies in Irish history. Students will visit multiple sites, explore Irish historical resources, and learn about leaders and their legacies from multiple national experts. From these experiences, students will reflect upon and draw connections between historical movements and those of today. Ireland provides the ideal context for deep study of understanding leadership through conflict and efforts for peace. The history of Ireland is a history of seeking independence, and many would say that complete independence was never truly achieved. Indeed, when the Irish Free State was declared in 1921, only 4/5 of Ireland became independent, with six remaining counties becoming a part of the United Kingdom as Northern Ireland. A significant contingent of Irish Republicans disagreed with many provisions of the Anglo-Irish Treaty and started a Civil War lasting almost a year. Struggles for Irish independence continued in many ways, most specifically with "The Troubles", through most of the 20th Century until the Good Friday Agreement in 1998. Today, Ireland maintains an open border with Northern Ireland and although peace in Northern Ireland is present, it remains tenuous with wounds that are still raw, and divisions that exist between Catholics and Protestants to this day. This course will focus on the period of the Troubles and examine how conflicts from the past inform current contexts for the leadership needs of our time.

**LDRS 2440 Nature's Lessons for Leadership (4 Credits)**

What can we as human beings learn from nature? How do we lead in a way that is responsible to our vision and can echo out to our communities? Students will explore these questions together at the Kennedy Mountain Campus through an intensive hands-on approach. Grounded in theoretical perspectives such as nature's principles for living, process leadership, and relational cultural theory, students will deepen their leadership practice through interactive exercises related to mindfulness, presence, and embodiment. Various activities, like art creation, using senses to connect with nature, and strengthening empathy through listening, students will explore the interconnection of humanity while deepening awareness to self and others.

**LDRS 3000 Capstone: Leadership Ethics (4 Credits)**

This course completes the leadership studies minor as an undergraduate at DU. It is designed to help students think in a structured, reflective way about the philosophical and behavioral ethics as relates to inclusive leadership. Students will gain a greater understanding of their own and others' ethical perspectives and develop stronger ethical decision making skills to navigate ambiguous situations and conflicting interests associated with future roles in society. A final leadership statement and code of ethics paper will allow students to summarize their learning, values and hopes for future leadership development and impact. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019, LDRS 2040, LDRS 2050, and LDRS 2060.

**LDRS 3650 Co-Learning as Co-Leading: Critical Reflection on Development Praxis in South Africa (4 Credits)**

Co-Learning as Co-Leading: Critical Reflection on Development Praxis in South Africa is a virtual summer module offered over a period of four weeks. It is a 4-credit elective focused on Development, Leadership, and Gender in faith-based organizations in Southern Africa. The class is a collaboration between the University of Denver leadership studies department and the University of KwaZulu-Natal department of theology in Durban, South Africa. The course offers a space for reflection and deliberation to activists, community organizers, and students in leadership, theology, and community/non-profit development. It is designed as a productive learning space for students, researchers, and activists committed to harnessing feminist, queer, race-critical, and indigenous approaches to development in Southern Africa in general, and in faith-based NGOs in particular. The course uses a collaborative and decolonial learning approach that draws on the knowledge and methods of all the participants. The course will offer a mix of classroom learning, facilitation, community-based service-learning and application, and praxis reflection in collaboration with the Alan Paton Struggle Archives at UKZN. The course comprises of two sets of participants: (1) student-participant who will be doing the course as part of a university/college degree, and (2) activists-participants who will do the course as a way to reflect on their development praxis as it relates to the organization or social movement they are attached to. Course participants will be collaborators and co-teachers/learners within the learning environment.

**LDRS 3980 Internship (1-6 Credits)**

The PLP Internship program provides individualized opportunities to gain valuable professional experience and build leadership skills. This hands-on program complements a student's academic major or a specified interest area that supports the student's leadership development through careful placement in community based learning. All three sectors of government, not-for-profit and private enterprise are available for internship learning opportunities.

**MGMT 2040 Managing Human Resources (4 Credits)**

This course focuses on the administration of human resources, including the processes of personnel management and personnel systems in complex organizations, both public and private. Techniques for recruiting and staffing; orienting, training and development; motivation, performance management, employee relations, compensation systems, and reward and retention systems; and safety and health issues will be addressed. Prerequisite: C- in MGMT 2100 and admission to Daniels.

**MGMT 2420 Global Management (4 Credits)**

Introduction to multinational corporations and management of international profit and non-profit organizations; how management theory and practice are impacted by particular cultural contexts; analysis of current issues related to international trade and investments, and problems and opportunities of multinational operations. Prerequisites: C- in MGMT 2100 and admission to Daniels.

**MGMT 3100 Business Ethics and Social Responsibility (4 Credits)**

This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3280 Business Plan (4 Credits)**

For both startups and established companies, innovation is a critical capability, driving customer satisfaction, competitive advantage, and growth. This course provides rich, comparative exposure to alignment tools to research a customer opportunity. The course uses a combination of interactive class discussion, real-world case analysis and a team project to explore a critical thinking approach to innovation and product development, incorporating both quantitative and qualitative perspectives. As capstone this integrative course leverages accumulated coursework in application to create, design, evaluate, and analyze strategic opportunities. Also, presentations and idea challenges center on defining target customers, understanding customer needs, generating and evaluating concepts, forecasting demand, designing products and services, and confirming your hypothesis.

**MGMT 3700 Topics in Management (1-8 Credits)**

Exploration of various topics and issues related to management. Prerequisites: Minimum grade C- in MGMT 2100 and admission to Daniels.

**MGMT 3708 Topics in Management (4 Credits)**

Exploration of various topics and issues related to management. Course open to Colorado Women's College students only.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2785 Environmental Ethics (4 Credits)**

A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

**PLSC 2001 Law and Politics (4 Credits)**

Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored may include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2420 American Presidency (4 Credits)**

Historical development and current role and powers of the U.S. presidency. Prerequisite: sophomore standing.

**PLSC 2430 Political Parties & Interest Groups (4 Credits)**

Evolution and structure of political parties; how they mobilize voters and provide leadership of political issues. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**SOCI 2190 American Communities (4 Credits)**

Study of 'community' as a foundational concept in the discipline; consideration of the changing structural contexts of community, as well as the social-psychological aspects of community; emphasis on emerging forms of community in the contemporary U.S. Prerequisite: SOCI 1810.

**SOCI 2320 Race and Ethnic Relations (4 Credits)**

Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2420 Social Inequality (4 Credits)**

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2719 Social Movements (4 Credits)**

Studies in range of perspectives and research issues pertinent to understanding of social movements (groups operating without clear-cut direction from established social structure and culture). Prerequisite: SOCI 1810 or permission of instructor.

**THEA 2885 Directing I (4 Credits)**

Theory and practice of staging plays. Prerequisites: THEA 1861, THEA 1862, THEA 2870.

**THEA 3760 Stage Management (4 Credits)**

Survey, exploration, and application of the component parts of the stage manager's role, based upon current methods practiced by professional theatre companies in the United States. Stage managers facilitate the creation of a fully-realized work of theatrical art, born of the collaboration of numerous artists, craftspeople and technicians.

**Faculty**

**Effley Nathaniel Brooks**, Teaching Assistant Professor, MBA, University of Phoenix

**Paul Kosempel**, Teaching Professor, PhD, University of Denver

**Linda Grace Olson**, Teaching Professor and Executive Director, PhD, University of Denver

**Trisha Teig**, Teaching Assistant Professor, EdD, Florida State University

**Joe Thomas Walsh**, Teaching Assistant Professor, MA, Gonzaga University

**Management**

Office: Daniels College of Business, Suite 455

Mail Code: 2101 S. University Blvd. Denver, CO 80208

Phone: 303-871-2489

Web Site: <http://daniels.du.edu/academic-programs/undergraduate/majors-minors/management/>

Based on a strong sense of leadership, business ethics and accountability, you will learn skills in strategic decision-making and the ability to develop organizational talent and financial know-how. The tracks in this major can lead you to careers in either consulting or strategic leadership. Become a skilled manager who knows the importance of considering all stakeholders and the social, legal, environmental and economic ramifications of business decisions.

**International Business****Bachelor of Science in Business Administration Major Requirements**

(185 credits required for the degree (p. 91))

Minimum of 40 credits. Requirements include:

Code	Title	Credits
<b>International Business Core Cluster</b>		<b>16</b>
Four of the Five Following Courses		
MGMT 2420	Global Management	
MKTG 3630	International Marketing	
FIN 3410	Multinational Financial Management	
LGST 3700	International Business Law	
ECON 2610	International Economics	
<b>International Business Capstone</b>		
LGST 3600	Business and Global Values	4
<b>International Studies Cluster</b>		<b>20</b>
20 hours from below, or substitutions from the Custom Cluster <sup>1</sup>		
INTS 1500	Contemporary Issues in the Global Economy	
INTS 1700	Introduction to International Politics	
INTS 2975	Global Issues Research Practicum	
Any 2000-level or higher INTS elective		
Approved research in International Business		
<b>Total Credits</b>		<b>40</b>

## International Business Core Cluster

- <sup>1</sup> Custom Cluster. Students may choose any two courses relevant to their specific career goals. This choice is made in consultation with the major advisor. Students must consult with the International Business major advisor prior to making this choice.
- <sup>2</sup> Business students considering a secondary major in International Studies are strongly encouraged to consider a business major other than International Business, due to the significant overlap in INTS coursework between the International Business and International Studies majors.

## Management

### Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 91))

Minimum of 32 credits. Requirements include:

Code	Title	Credits
MGMT 2021	Managing Complex Organizations	4
MGMT 2420	Global Management	4
MGMT 2300	Leading for Collaboration	4
MGMT 3560	Resilient Leadership	4
<b>Choose any Four MGMT Electives; Internships are highly recommended</b>		<b>16</b>
<b>Total Credits</b>		<b>32</b>

## Minor Requirements

The Management minor is available only to students pursuing a major in the Daniels College of Business.

16 credits, including:

Code	Title	Credits
<b>Four MGMT elective courses outside of the Business Core; no independent study or internship credit allowed.</b>		<b>16</b>
Note: Students need to take MGMT 2100 as a prerequisite for the Management Minor. Students take this course as part of the Business Core.		

## Requirements for Distinction in the Major in International Business

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

## Requirements for Distinction in the Major in Management

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

## International Business

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

Total Credits: 189-190

- <sup>1</sup> Fulfills Analytical Inquiry: The Natural and Physical World
- <sup>2</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegreerequirements/>)
- <sup>3</sup> Fulfills Scientific Inquiry: Society and Culture
- <sup>4</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

Common Curriculum requirements in the First Year are generally satisfied through the sequential full-year foreign language (FOLA) requirement.

Common Curriculum requirements in the Second Year are generally satisfied through the sequential full-year Scientific Inquiry: Natural requirement.

#### **MGMT 1988 Study Abroad Resident Credit (0-18 Credits)**

#### **MGMT 2021 Managing Complex Organizations (4 Credits)**

The course will consider the dynamics of corporate governance, beginning with a brief history of management thought and its relevance to decision-making today. It will introduce strategic planning, problem solving and the criteria for competitive market choice. It will consider risk, ethics and CSR as components to decision making. It will introduce modern organizational design and culture (including global cultures) and their impact on effective governance. It will review the dynamics of agency theory, conflict, ADR and corporate politics on governance. Prerequisite: C- in MGMT 2100 and admission to Daniels.

#### **MGMT 2040 Managing Human Resources (4 Credits)**

This course focuses on the administration of human resources, including the processes of personnel management and personnel systems in complex organizations, both public and private. Techniques for recruiting and staffing; orienting, training and development; motivation, performance management, employee relations, compensation systems, and reward and retention systems; and safety and health issues will be addressed. Prerequisite: C- in MGMT 2100 and admission to Daniels.

#### **MGMT 2100 Leading High Performance Organizations (4 Credits)**

Have you ever wondered why some organizations thrive while competitors with the same technology and capital resources fail? Often the difference is the human factors: the many ways in which savvy organizations harness the commitment and creativity of their workers. In this course, you learn about the human factors that foster career success for you and high performance for your organization. Technical skills are important entry level requirements for leaders and managers. What sets the great ones apart is their ability to motivate and inspire colleagues and employees alike. In MGMT 2100 you learn the essentials of organizational behavior and acquire a toolkit of evidence-based people skills that complement the technical skills you gain in other DCB core courses. Prerequisite: BUS 1440.

#### **MGMT 2300 Leading for Collaboration (4 Credits)**

Leading for Collaboration is an advanced undergraduate course to prepare students for a working environment where they are required to collaborate with others to reach individual and organizational goals. Students learn about the fundamental design principles of high-performing teams and groups, as well as how and when it is best to use them. Students also learn how to sustain team performance through effective decision-making, group communication, conflict management, and reward and motivation systems. Students also cover current topics in teams such as virtual teams, self-managed teams, and team-based innovation. Students also learn about and improve their ability for formal and informal leadership in a group or team. Prerequisites: C- in MGMT 2100 and admission to Daniels.

#### **MGMT 2420 Global Management (4 Credits)**

Introduction to multinational corporations and management of international profit and non-profit organizations; how management theory and practice are impacted by particular cultural contexts; analysis of current issues related to international trade and investments, and problems and opportunities of multinational operations. Prerequisites: C- in MGMT 2100 and admission to Daniels.

#### **MGMT 2650 Introduction to Management Consulting (4 Credits)**

This course is designed to provide a broad overview of the management consulting profession, including its industry and competitive dynamics, major practice areas, approaches to implementation, management of consulting firms and the future of consulting. In addition, emphasis is given to the practice of consulting through the development of certain high impact skills in evaluation, proposal writing, data gathering and client presentations. The course is relevant to those who: 1) are specifically interested in consulting careers, 2) have job interests that involve staff positions in corporations, 3) want to become line managers who might one day use consultants, 4) wish to develop general consulting skills and familiarity with the consulting industry. The learning process in class will consist of lectures, cases, readings, exercises and guest speakers. This wide variety of learning methods is intended to convey both the necessary knowledge and practical skills necessary for building a sound foundation for becoming a professional consultant. It is essential that everyone comes well-prepared to class, as the learning process depends heavily upon participation. Prerequisite: MGMT 2100 and admission to Daniels.

#### **MGMT 2700 Topics in Management (1-4 Credits)**

Consideration and in-depth analysis of current issues in the field of management. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 2988 Study Abroad Resident Credit (0-18 Credits)****MGMT 3000 Business Policy and Strategy (4 Credits)**

Management 3000 focuses on the strategic management of an organization as a whole. This course will introduce students to key decisions that top executives have to make when developing and implementing strategies, methodologies for informing those decisions, and how to interpret information from those approaches to guide strategic decision-making. Overall, from the perspective of leading an organization, students will learn how strategic decisions impact upon a firm's performance and success. Enforced Prerequisites and Restrictions: Microsoft Excel, Word, & PowerPoint certifications; BUS 2099, MKTG 2800, LGST 2000, INFO 2020, ACTG 2300, FIN 2800, and BUS 3000.

**MGMT 3010 Developing a Business Plan (4 Credits)**

This is the culminating course for the business minor. It integrates the various functional areas (e.g., business law, management, accounting, marketing, and finance) with environmental scanning, competitive strategy, market feasibility, and innovation. Students study various business models through case studies, learning what leads to business success and failure. Students also learn about the business planning process, from start to finish, and develop an actual business plan for either a new, entrepreneurial venture or an established business.

Prerequisites: BUS 1000, LGST 2000, ACTG 2010, FIN 2010, and MKTG 2800. For Business minors only.

**MGMT 3100 Business Ethics and Social Responsibility (4 Credits)**

This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3150 Creativity, Innovation, and Design Thinking (4 Credits)**

Creativity is the #2 most important and in demand soft skill in business right now, yet very few people know how to truly leverage it. Design thinking is becoming a critical component to business relevance and competitive advantage. The primary purpose of this course is to equip you with the knowledge, tools, and processes so you can leverage your creative superpowers to problem solve and create innovative solutions based on design thinking, personally and professionally. When you leave this course, you will have sharpened a new skillset that will differentiate you and increase your value to a company, or as an entrepreneur, in today's business landscape. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3200 Employee Relations (4 Credits)**

This course provides a practical and orderly perspective on how to create an effective employer/employee relationship. Students learn the components and factors that promote and destroy effective employee relations. We learn the evolution of the labor movement in the United States and its influence on the business workplace. We learn techniques that can be used in fostering effective employee relations and learn about the challenges that face management. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3220 Leading a Not-For-Profit Organization (4 Credits)**

To educate students on management strategies to enable them to successfully lead and fund a not-for-profit (NFP) organization. Prerequisites: C- in MGMT 2100 and admission to Daniels.

**MGMT 3270 Negotiation and Dispute Resolution (4 Credits)**

The ability to negotiate effectively is critical for success in business and in everyday life. This class provides a comprehensive introduction to negotiation theory, strategies and styles within an employment context, with an emphasis on principled negotiation. Students will actively learn about negotiating by participating in a series of in-class exercises and outside readings. The exercises range from simple two-party negotiations to complex multiparty negotiations, including cross cultural negotiation and third party interventions. Prerequisites: C- in MGMT 2100 and admission to Daniels.

**MGMT 3280 Business Plan (4 Credits)**

For both startups and established companies, innovation is a critical capability, driving customer satisfaction, competitive advantage, and growth. This course provides rich, comparative exposure to alignment tools to research a customer opportunity. The course uses a combination of interactive class discussion, real-world case analysis and a team project to explore a critical thinking approach to innovation and product development, incorporating both quantitative and qualitative perspectives. As capstone this integrative course leverages accumulated coursework in application to create, design, evaluate, and analyze strategic opportunities. Also, presentations and idea challenges center on defining target customers, understanding customer needs, generating and evaluating concepts, forecasting demand, designing products and services, and confirming your hypothesis.

**MGMT 3300 Introduction to Project Management for Leaders (4 Credits)**

Project Management is a discipline which supports innovation by examining how to facilitate one time events such a constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline.

**MGMT 3400 Leading in the Digital Age (4 Credits)**

Even before the computer Hal took over the spaceship in the film 2001: A Space Odyssey (released in 1968), we have been aware that robots and other advanced technologies would be part of our future. It is now fifty years later, and they are here! Robots (and many other technologies such as artificial intelligence) are joining the workforce. Is this a good thing? Or a bad thing? Clearly, the advent of robots will impact all aspects of work and organizations as we now know them. This course will be taught in seminar style with robust discussion, virtual field trips, and guest speakers. Topics will include: How does society benefit from the widespread adoption of advanced technologies? What jobs will be eliminated? What's left for humans? What will leadership look like in this new world? Prerequisite: MGMT 2011.

**MGMT 3500 Growth Strategies: How to Grow the Organization (4 Credits)**

This course will introduce students to the decisions on selecting among alternatives for growing organizations, including internal development, licensing and alliances, mergers and acquisitions, and how the resulting business combinations can be governed most effectively to create value for the organization. Students will learn about the relative strengths and weaknesses of the major growth modes, when to use each, how to avoid traps and errors, how managers combine the alternatives as part of a larger growth campaign and how joint value can be shared to maximize partner contributions. Overall, students will learn that how leaders select, implement and manage growth alternatives can influence the trajectory of the firm and its success. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3560 Resilient Leadership (4 Credits)**

Now more than ever, organizations need people who can thrive in uncertain and ambiguous environments, can embrace change and can inspire others with their resiliency and sense of purpose. In this course you will integrate your learnings from your management courses and prepare to be a resilient and purposeful leader in your future career. We will use a variety of activities and assignments to explore change, resilience and purpose and what they mean for you and your future colleagues and organizations. Main topics include: 1) skills and resources for individual resilience; 2) building collective resilience in groups, organizations and communities; 3) crisis management; and 4) managing and leading change.

**MGMT 3700 Topics in Management (1-8 Credits)**

Exploration of various topics and issues related to management. Prerequisites: Minimum grade C- in MGMT 2100 and admission to Daniels.

**MGMT 3708 Topics in Management (4 Credits)**

Exploration of various topics and issues related to management. Course open to Colorado Women's College students only.

**MGMT 3710 Business Process Management (4 Credits)**

Change is one of the foremost, if not the most important business topic today. To address these rapidly changing critical organizational, management, and technology issues, Business Process Management, Modeling and Analysis has become the preeminent innovative business performance technique over the past five years. This course helps all individuals to understand better Business Process Management, Modeling and Analysis by gaining insights into business process management concepts and principles, the use of process change enablers, a structured business process management methodology, business process management tools and techniques, change management and why organizations fail or succeed in implementing Business Process Management, Modeling and Analysis, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3720 Knowledge Management (4 Credits)**

To become more innovative, responsive to customers and suppliers and adaptable to change, leading organizations are learning how to learn from high numbers of knowledgeable people. This course helps all individuals to understand Knowledge Management by gaining insights into knowledge managements concepts and principles, the use of knowledge management enablers, a structured methodology and framework for knowledge management, tools and techniques for knowledge management, effective change management programs for implementing knowledge management, and why organizations fail or succeed in implementing knowledge management, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3730 Nongovernmental Organizations and Business (4 Credits)**

Nongovernmental Organizations (NGOs), with increasing credibility and authority, have a measurable impact on the intersection of business, government and society. NGOs are defined broadly as nonstate, nonfirm actors. NGOs may include environmental and consumer groups, business associations, labor unions, human rights organizations, church and religious groups, academic institutions, think tanks, trade and industry associations, and grassroots not-for-profit organizations. NGOs have emerged as important stakeholders in discussions over the terms and conditions under which business, government, multilateral institutions and local communities manage the process of globalization, one of the most complex issues facing public policy makers, corporate executives, and broader society. These NGOs conduct business by undertaking research, organizing boycotts, and often publicizing the shortcomings of multinational corporations in terms of social, ethical, and environmental responsibility. Yet these impressions are only the most public, and often the most negative images of NGO activism. This course examines the intersections of NGOs, MNEs and respective business practices with a goal of developing informed perspectives. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3980 Internship in Management (1-6 Credits)**

Practical experience (field study); requires written report. Prerequisites: MGMT 2100 and instructor's permission.

**MGMT 3988 Study Abroad Resident Credit (0-18 Credits)****MGMT 3991 Independent Study (1-10 Credits)**

Independent research/study; requires written report. Prerequisites: MGMT 2100 and instructor's permission.

**Douglas B. Allen**, Associate Professor, PhD, University of Michigan

**Donald D. Bergh**, Professor, PhD, University of Colorado Boulder

**Bud Bilanich**, Teaching Assistant Professor, EdD, Harvard University

**Charles Dhanaraj**, Professor and Department Chair, PhD, Western University, Canada

**Cindi V. Fukami**, Professor, PhD, Northwestern University

**Aimee Hamilton**, Associate Professor, PhD, Pennsylvania State University

**Sung Soo Kim**, Associate Professor, PhD, McGill University

**Jung H. Kwon**, Assistant Professor, PhD, University of Texas at Dallas

**Kerry T. Mitchell**, Teaching Assistant Professor, PhD, Fielding Graduate University

**Michael Seth Nalick**, Assistant Professor, PhD, Texas A&M University

**Kathleen Marie Novak**, Teaching Associate Professor, MS, University of Colorado at Denver

**Paul M. Olk**, Professor, PhD, University of Pennsylvania

**Andrew Karl Schnackenberg**, Assistant Professor, PhD, Case Western Reserve University

**Andrew Schnackenberg**, Associate Professor, PhD, Case Western Reserve University

**Lowell G. Valencia-Miller**, Teaching Associate Professor, MBA, University of Denver

**Dennis P. Wittmer**, Professor, PhD, Syracuse University

**Vijaya Zinnoury**, Associate Professor, PhD, University of Illinois at Urbana-Champaign

**Bahman P. Ebrahimi**, Professor, Emeritus, PhD, Georgia State University

**Jim Griesemer**, Dean, Emeritus, DPA, University of Colorado Boulder

**R. Van Johnston**, Professor, Emeritus, PhD, University of Southern California

**Karen Newman**, Professor, Emerita, PhD, University of Chicago

**Nancy Sampson**, Professor, Emerita, DBA, University of Oklahoma

**Thomas Watkins**, Professor, Emeritus, PhD, University of Cincinnati

**Joan Winn**, Professor, Emerita, PhD, University of Georgia

## Marketing

Office:-

~~Daniels College of Business, Suite 480 Mail Code: 2101 S. University Blvd. Denver, CO 80208~~

~~Phone: 303-871-3317~~

~~Web Site: <https://daniels.du.edu/marketing/>~~

While advertising is part of marketing, it is not ALL of marketing. Peter Drucker, a very famous businessperson, describes the role of marketing in business this way: *"Because the purpose of business is to create a customer, the business enterprise has two—and only two—basic functions: marketing and innovation. Marketing and innovation produce results; all the rest are costs. Marketing is the distinguishing, unique function of the business."*

In our program, we will help you learn to solve marketing problems, to innovate, to think strategically, critically and creatively about the information with which you are presented, as well as to communicate your thoughts effectively. You will work in teams, you will think globally about marketing, you will be able to recognize the ethical and legal issues with which you may be confronted. You will also consider the digital opportunities available as you practice using your marketing knowledge to create value for customers, shareholders, employees, and other stakeholders of the business.

We will expect you to take responsibility for your learning by attending every class, contributing to your teams and to your class discussions, keeping your word, and reaching your goals.

Marketing is an exciting area that addresses many of the changes taking place in business-to-consumer and business-to-business environments. Our field includes digital and other media promotions including working for either clients or ad agencies, planning social and mobile campaigns, and analyzing the results of your work. We prepare you to go into business-to-business sales or to be part of a global marketing organization, to work in supply chain management or in services marketing. Our internship program is one of the best in the college. You will have many opportunities available to secure at least one internship over the course of your studies. Students have found that the experience gained through the internship process has helped them better understand classroom discussion topics.

Along with the required major courses of consumer behavior, marketing research, professional selling, digital marketing, international marketing and integrated marketing strategy, you will take three electives chosen from a very broad selection of courses.

# Marketing

## Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 91))

Minimum of 36 credits. Requirements include:

Code	Title	Credits
MKTG 2910	Consumer Behavior	4
MKTG 2930	Methods of Marketing Research	4
MKTG 3110	The Power of Professional Selling	4

Common Curriculum requirements in the Second Year are generally satisfied through the sequential full-year Scientific Inquiry: Natural requirement.

**MKTG 1988 Study Abroad Resident Credit (0-18 Credits)****MKTG 2800 Introduction to Marketing (4 Credits)**

Marketing is, at its core, the interface a company has with its customers, and what could be more important in business? This introductory course is a must for any business professional, and anyone seeking to be a savvy consumer or to learn about promoting oneself. It is a challenging, hands-on course with an integrated approach to learning the basic fundamentals of the subject. It develops a student's ability to make sound planning decisions using real information from the external environment to determine market feasibility for a real product. The course has a segmented approach, allowing students to practice application of important concepts in the classroom and engage in teamwork. The segments build upon one another to allow students to create a complete and logically reasoned marketing plan for their chosen product. In teams, students prepare a written report and deliver an oral presentation about their product. Prerequisites: (MGMT 2100 and INFO 1020) or Marketing Minor Non-Business 1. Students must earn a minimum grade of C- in MKTG 2800 in order to progress further in MKTG major/minor courses.

**MKTG 2910 Consumer Behavior (4 Credits)**

What's the real reason some consumers want a big SUV? Maybe it's not for off-roading after all! This course is a fascinating look at why consumers buy what they do, and there is often more than meets the eye. CB uses frameworks from psychology and other disciplines to describe how consumers learn and how they make decisions about their purchases. The course also delves deeper into consumer demographic and psychographic characteristics and all of these concepts are then integrated and applied to designing appropriate marketing strategies for different segments. Students have an excellent opportunity to learn more about the human mind and practical applications for marketing efforts. Prerequisite: C- in MKTG 2800.

**MKTG 2920 Business-to-Business Marketing (4 Credits)**

Have you ever considered how a Fortune 500 company provides new computers for its 5,000-plus employees? Organizations are customers too, and the B2B market is the largest of all the markets, far surpassing the consumer market in dollar value. While the lines between B2B and B2C marketing are often blurred, B2B marketing strategies are often unique and more specialized. While consumers choose products based not only on price but on popularity, status, and other emotional triggers, B2B buyers make decisions focused more on valuable relationships, price and profit potential. Fostering relationships through compelling and relevant content is key. This calls for unique marketing techniques in approaching and building relationships with organizational customers, the dynamics of which will be explored and discussed in this class. Prerequisite: MKTG 2800.

**MKTG 2930 Methods of Marketing Research (4 Credits)**

The modern marketing department is held just as responsible for the dollars it spends as any other business function. To be efficient, marketing professionals must learn to gather the information they need to make evidence-based decisions, understand current and potential target markets, and even generate new ideas. This course covers methods of collecting and analyzing market-related data. In addition to learning basic research concepts, students design their own surveys, collect data, conduct data analysis in Excel, and present results. Class activities in recent quarters have included a live focus group with the clothing retailer, Sport Couture and as a guest speaker, VP of research from Media News Group. The useful aspects of handling data in this course add essential elements to a student's toolkit for professional practice. Prerequisites: MKTG 2800 and INFO 1020.

**MKTG 2945 Global Product Innovation (4 Credits)**

In this course, students learn how products are introduced and managed including developing an understanding of the product innovation process. Companies exist, thrive and prosper by delivering products and services to their customers. As customer needs and desires change and competitive offerings make product selection more difficult, companies must develop products and services that most closely match customer requirements at a maximized speed to market. This course provides students with principles, philosophies, concepts, techniques, processes and models of new product management, and also with the practical aspects of how to analyze and manage new product development issues and situations in the turbulent environments facing business organizations. Prerequisite: MKTG 2800.

**MKTG 2988 Study Abroad Resident Credit (0-18 Credits)****MKTG 3110 The Power of Professional Selling (4 Credits)**

Do you want to have multiple job offers when you graduate? Studies suggest that students who embrace sales as a professional career are in greater demand than any other type of job. This course explores personal selling as an integral part of the promotional mix and an extension of the marketing concept. Students will learn how to create value for customers by producing and presenting a strategic sales plan. The course work includes opportunities to put theory into action through a series of team challenges that will enable students to hone individual selling and presentation skills. PREREQ: MKTG 2800.

**MKTG 3130 Selling in a Digital World (4 Credits)**

Selling is no longer about knocking on doors and cold-calling strangers. Business has been disrupted by the integration of digital processes and communication. As power continues to shift to customers, sales professionals must be equipped to build relationships and create value in a digital world. In this course, students will learn how to leverage the power of digital selling in the way salespeople manage interactions with customers, solve problems, and measure their impact. Through lecture, activities, and weekly interactions with sales professionals, students will build on their foundation of sales concepts to learn how to create value for their future stakeholders. Prerequisites: MKTG 2800.

**MKTG 3140 Sales Management and Leadership (4 Credits)**

Salespeople are the primary channel of communication between enterprise and customers and therefore, managing them is of paramount importance to sales organizations. Studies suggest that students who undertake sales curriculum are more likely to land a sales job upon graduation and have a higher success rate in their first position. This course uses lectures, case studies, and role-plays to cover critical topics in salesforce management and sales leadership including recruiting, training, deployment, compensation, and evaluation. Prerequisites: Minimum grade of C- in MKTG 2800.

**MKTG 3380 Supply Chain Management (4 Credits)**

Today's economy of globally sourced manufacturing, developing markets, synchronized e-commerce, international trade lanes, and intertwined economies demand supply chains of global reach to bring goods and services from around the world to local stores or even the consumer's front door. This course addresses the challenges and illustrates the tools required to build, maintain, and expand global supply chains. The course develops the ability to make sound strategic, tactical, and operational supply chain decisions via an on-line simulation tool, and superior supply chain design and performance is taught through in-depth case studies from the world's top 25 supply chains. Students will be able to connect improvements in supply chain design and performance to the financial performance of a firm. Cross listed with MKTG 4380. Prerequisite: MKTG 2800.

**MKTG 3400 Introduction to Advertising (4 Credits)**

Tap into your creativity and get some practical experience with this popular and omnipresent form of promotion! This exciting and dynamic course is intended to give the student a firm understanding of the principles and practice of advertising. It includes an introduction to advertising agency operations, and the many department functions. With "agency" team members, the student will create an advertising campaign, from strategy brief to execution, and present the work to an actual client. The real-life aspect of this course creates a memorable and very useful experience for undergraduate students. Recent clients for student projects have included McDonald's and Eldora Mountain Resort. Prerequisite: MKTG 2800.

**MKTG 3435 SXSWi: Marketing, Technology & Innovation (4 Credits)**

This class is focused on documenting/sharing lessons learned from the SXSWi conference in Austin Texas, the premier innovation conference in the US. The course is divided into two distinct halves. First, we will research the SXSWi sessions around subject matter and speaker background as well as planning the final deliverable that summarizes the entire SXSWi event. The second half includes participation in the conference to learn the most up-to-date digital marketing techniques in social, mobile, data and usability. Prerequisite: MKTG 2800.

**MKTG 3450 Advertising Media Strategy (4 Credits)**

This is not your grandparents' media landscape, or even your parents' for that matter! And it is no simple task to reach today's consumer with advertising. The world of media is ever changing; with the digital revolution, media planners and buyers face more challenges than ever. In this course, students learn the process of advertising media planning and the role it plays in campaign development. The course provides students an opportunity to create a media plan and creative materials and present them to a "real world" client. Recent clients for student projects have included General Motors (Cadillac) and Altitude Sports. Prerequisite: MKTG 2800 & MKTG 3400.

**MKTG 3460 Advertising Creative Strategy (4 Credits)**

This popular course provides an opportunity to go even further with advertising concepts and strategy. This course is designed to let the student experience the life of an ad agency team member. Students learn what it takes to collaborate with a team in creating brand-building, power ideas, and are given a campaign assignment by a "real world" client. Students work from strategy brief to execution, and present the ideas to the group, at times individually, and at times as a team. The course includes evaluation of one's own work and that of others, application of theories about the presentation of information and images, and strengthening of presentation skills. The student's work in developing a creative campaign should be based on past learning about advertising as well as class lectures and handouts. Creativity is emphasized in all tasks, from ad design through media selection to presentations. Recent clients for student projects include Nestle, Purina, and Leo Burnett USA. Prerequisite: MKTG 2800.

**MKTG 3465 Data Science for Marketers (4 Credits)**

Data is an essential part of (digital) marketing. In fact, data enables the promise of digital marketing: real-time feedback enabling businesses, marketing campaigns to pivot and become predictive. We'll cover what it takes to become a data-driven organization and how to tell stories through data.

**MKTG 3475 Mobile Marketing (4 Credits)**

Smartphones are the device for today's consumer. Mobile usage easily eclipses all other digital venues and you will be learning how to harness this ever-evolving field. Knowledge of mobile search, mobile applications, mobile advertising and location-based services are essential for today's business leaders. This course will enable students to build creative mobile marketing campaigns that complement digital and traditional marketing strategies. This fast-paced course is a must for people interested in marketing. Prerequisite: MKTG 2800.

**MKTG 3480 Foundations of Digital Marketing (4 Credits)**

Knowing how to use digital marketing tools as part of an integrated marketing strategy is critical in today's marketplace. This course provides the knowledge and skills to plan and implement a digital marketing strategy using three powerful digital marketing elements • UX/UI - User eXperience design is one of the most difficult aspects for businesses to define and yet it's essential to map out when creating a holistic strategy. User Interface design is one part of the user experience and we will work together to show you best-in-class examples. • Facebook Advertising – Facebook is quickly becoming the hyper-targeted advertising platform for businesses of any size. You will walk through Facebook's Blueprint training to help you understand what types of digital advertising are possible. • Email Marketing – Email has long been a staple in digital marketing. We will show you the ins and outs of this digital medium and teach you how to take control of this evolving channel. Prerequisite: MKTG 2800.

**MKTG 3485 Search Engine Marketing: Google Analytics & Google Ads (4 Credits)**

An understanding of consumers' search behavior provides deep insight into how people make purchasing decisions and form brand affinities. Search marketing is also the cornerstone of many digital marketing campaigns. This course provides a comprehensive foundation in search marketing and digital analytics as tools for any marketer, as well as hands-on experience with Google Ads and Google Analytics. You will be working with real-world clients, helping them to drive marketing ROI! Prerequisite: MKTG 2800.

**MKTG 3490 Social Media Marketing (4 Credits)**

The digital marketing landscape has thousands of tools that marketers can utilize to increase revenue, execute on strategies and develop deep brands. This course will review the most essential of those tools: Google Analytics and Google AdWords. Our goal is to enable students to attain individual certification in Google Analytics and begin the process of getting Google AdWords Fundamentals certified. You will be working with real-world clients, helping them increase revenue! Cross listed with MKTG 4815. Prerequisite: MKTG 2800.

**MKTG 3495 Tech in Marketing: Design Tools and Digital Foundations (4 Credits)**

"Software is eating the world." That was the quote from Marc Andreessen way back in 2011. His point was now that software had disrupted the tech industry, it was now evolving into every other industry. Agriculture. Mass transit. Construction. Everything. This prediction has become true with companies like Google and Uber. We're at a point where coding/technology are now a matter of literacy. We are going to work together as a class to make you more literate. We are going to learn how to utilize digital design tools such as Adobe Photoshop and Illustrator to create brand imagery. We'll then move on to learn HTML/CSS and APIs: the building blocks of the Internet. We'll also spend some time prototyping software such as Axure and tap into memes and Gifs. This will be a tactical, hands-on, and fun class. Cross-listed with MKTG 4845. Prerequisite: MKTG 2800.

**MKTG 3630 International Marketing (4 Credits)**

The shrinking planet and constant pressure to maintain a firm's growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these international environmental factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international context. It is designed based on a combination of lectures and discussions of relevant concepts, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisite: MKTG 2800.

**MKTG 3635 International Consumer Behavior (4 Credits)**

The focus of this course is to introduce the complex role that consumer behavior and consumption plays within an international context. Knowledge of customers is one of the cornerstones for developing sound business strategies, and there is a need to better understand the diverse aspects of consumer behavior that marketers must cater to in the global marketplace. As the study of consumer behavior draws upon marketing, psychology, economics, anthropology, and other disciplines, the added complexity of understanding it beyond ones' home market results in additional challenges and opportunities. Consumer behavior attempts to understand the consumption activities of individuals as opposed to markets, and as this course will demonstrate, consumption activities are not universal. The course will focus on both consumer behavior theory, as well as the integration of regional, global, and cultural variables that marketers must account for in developing marketing programs in strategies. Topics such as global consumer culture, values and consumption, international consumer attributes, international social and mental processes, will be used to help comprehend and explain the convergence and divergence of consumer behavior in the global marketplace. The goal of this course is to provide a more concrete understanding of how marketers account for similarities and differences in the development and implementation of marketing practices, in the field of advertising, product and service development and usage, retailing, and communications. Cross-listed with MKTG 4635.

**MKTG 3640 Services Marketing (4 Credits)**

The unique challenges of selling the "invisible" characteristics inherent to services marketing are identified and addressed in this course. You will investigate customer requirements, alignment of service design and standards, service failure and recovery strategies, and the complexity of long-term customer relationships relevant to service organizations. Because of the difficulty in describing and depicting service development, you will design a service blueprint that serves as an innovative tool in the strategic process. In addition to relevant industry speakers, experiential learning through field trips contributes significantly to your overall understanding of the service environment. Prerequisite: MKTG 2800.

**MKTG 3650 Innovation Strategies (4 Credits)**

This course is a fresh and dynamic course, which both challenges and leverages traditional marketing thinking in new and creative ways. Students read a variety of pieces from contemporary thought-leaders in the world of business, marketing, philosophy, and education to give context and perspective to innovative thinking and ideation techniques which are relevant and necessary for today's marketing leaders. Hands-on activities, reality-based projects, and interactive debates are the hallmarks of this course. Recent guest speakers have included William Espey (CMO, Chipotle), Justin Breseler (VP Marketing, Visit Denver) and recent alumni. One past Innovation Strategies student recently said, "After going through this intellectually stimulating class marketing no longer feels like consumer manipulation but rather it feels like strategy, design, and solutions that can come together and make culture and business better – it is really important." Prerequisite: MKTG 2800.

**MKTG 3660 Sports & Entertainment Marketing (4 Credits)**

There are few products about which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorship or driving event ticket sales. Cross listed with MKTG 4660. Prerequisite: MKTG 2800.

**MKTG 3704 Topics in Marketing (1-4 Credits)**

Topics in Marketing.

**MKTG 3705 Topics in Marketing (4 Credits)****MKTG 3950 Integrative Marketing Strategy (4 Credits)**

You may have heard the saying that “The journey is as important as the destination.” In organizations the corollary is that strategic planning is as important as the plan. As a result, the planning process has become increasingly important for all business functions (e.g., production, accounting, R & D, marketing). The objective of this course is to enable students to utilize a rigorous planning process to develop marketing programs. This activity involves integrated problem solving using concepts, theories, and primary and secondary information, and is characterized by logical use of facts leading to alternatives, which in turn lead to solutions. By the end of the course students should be able to develop effective marketing programs, and to understand the applications and limitations of the principal planning tools a marketing manager has at his/her disposal. This course needs to be taken within 2 quarters of graduation. Prerequisites: MKTG 2800, MKTG 2910, and MKTG 2930.

**MKTG 3980 Marketing Internship (1-8 Credits)**

We learn by doing. That’s what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein’s, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will you earn school credit, you may very well land a paid internship, and eventually a full-time job. Course requirements include an internship report that covers your experience on the job, a study of the industry, and what you learned from your company. It’s a win-win course where you put into practice the marketing concepts you’ve learned at DU, and discover new marketing tactics from your company co-workers. “Thanks to the University of Denver for fostering this partnership and providing such great students.” (NCM Media Networks). Prerequisites: marketing major and instructor’s permission.

**MKTG 3988 Study Abroad Resident Credit (0-18 Credits)****MKTG 3991 Independent Study (1-10 Credits)**

Independent study provides opportunities for the capable student to do special work under individual supervision in areas not covered by class offerings. Undergraduate students should demonstrate qualities necessary for interested and intensive inquiry. The topic and outline must be agreed upon by the student with the approval of the instructor and department concerned. Restricted to marketing majors. Prerequisites: Marketing major and instructor’s permission.

**Faculty**

**Melissa Archpru Akaka**, Professor, PhD, University of Hawaii at Manoa

**Yashar Atefi**, Associate Professor, PhD, University of Houston

**Daniel Wayne Baack**, Professor, PhD, Saint Louis University

**Ana Babic Rosario**, Associate Professor, PhD, HEC Paris

**Ali Besharat**, Professor, PhD, University of South Florida

**Jack Raymond Buffington**, Assistant Professor of the Practice of Marketing, PhD, Lulea Technological University, Sweden

**Theresa Meier Conley**, Associate Professor of the Practice of Marketing, PhD, University of Denver

**Michele L. Cunningham**, Teaching Professor, MBA, University of Denver

**Jenny Dobmeier**, Teaching Assistant Professor, MBA, University of Denver

**Aaron Scott Duncan**, Teaching Assistant Professor, PhD, Fielding University

**Steven W. Hartley**, Professor and Department Co-Chair, PhD, University of Minnesota

**Michael Myers**, Teaching Associate Professor, IMBA, University of Denver

**Pallab Paul**, Professor and Department Co-Chair, PhD, University of Arizona

**Tia Marie Quinlan-Wilder**, Teaching Associate Professor, MBA, University of Denver

**Cristin Cornell Tarr Teaching Assistant Professor**, MBA, University of Denver

**Charles Patti**, Professor, Emeritus, PhD, University of Illinois

The Department of Mathematics offers a bachelor of arts in mathematics, bachelor of arts in mathematics with concentration in finance and bachelor of science in mathematics. These programs provide a strong foundation in theoretical and applied mathematics with particular emphasis on the development of logical and analytical problem-solving skills. This major is often combined with a major or minor in natural sciences, computer science, business and related fields. It is an excellent preparation for graduate school in quantitative subjects. Math majors find jobs in academia, high-tech industry, financial industry and government agencies, with positions including research mathematician, applied mathematician, engineer, computer programmer, financial analyst, economist, actuary and teacher.

## Mathematics

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

This degree requires completion of 48 credits of MATH courses numbered 1951 or higher, including at least 20 credits at the 3000-level or higher. The following courses are required:

Code	Title	Credits
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
MATH 2060	Elements of Linear Algebra	4
MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4
MATH 2200	Mathematical Reasoning & Proof	4
MATH 3161	Introduction to Real Analysis	4
MATH 3170	Introduction to Abstract Algebra	4
Additional Courses		12
<b>Total Credits</b>		<b>48</b>

#### Note

- In addition, students must complete the ETS Major Field Test in Mathematics as instructed by the department, and satisfy all requirements for the Bachelor of Arts degree as outlined in the University of Denver Undergraduate Bulletin.
- It is recommended that students take MATH 3151 Advanced Linear Algebra after MATH 2200 Mathematical Reasoning & Proof but before MATH 3161 Introduction to Real Analysis and MATH 3170 Introduction to Abstract Algebra.

### Bachelor of Science Major Requirements

(183 credits required for the degree (p. 87))

This degree requires completion of 52 credits of MATH courses numbered 1951 or higher, including at least 24 credits at the 3000-level or higher. The following courses are required:

Code	Title	Credits
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
MATH 2060	Elements of Linear Algebra	4
MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4
MATH 2200	Mathematical Reasoning & Proof	4
MATH 3161	Introduction to Real Analysis	4

MATH 3170	Introduction to Abstract Algebra	4
A MATH course at the 3000-level or higher that (a) is different from MATH 3161 and MATH 3170 and (b) has either MATH 2200 or another 3000-level MATH course as a prerequisite.		4
Additional courses		12
<b>Total Credits</b>		<b>52</b>

**Notes**

- In addition, students must complete the ETS Major Field Test in Mathematics as instructed by the department, and satisfy all requirements for the Bachelor of Science degree as outlined in the University of Denver Undergraduate Bulletin.
- It is recommended that students take MATH 3151 Advanced Linear Algebra after MATH 2200 Mathematical Reasoning & Proof but before MATH 3161 Introduction to Real Analysis and MATH 3170 Introduction to Abstract Algebra.
- Students are encouraged to complete the analysis sequence MATH 3161 Introduction to Real Analysis, MATH 3162 Introduction to Real Analysis II, MATH 3110 Topology, or the algebra sequence MATH 3170 Introduction to Abstract Algebra, MATH 3166 Group Theory, MATH 3176 Rings and Fields.

## Bachelor of Arts with a Concentration in Finance Major Requirements

(183 credits required for the degree (p. 85))

This degree requires completion of 48 credits of MATH courses numbered 1951 or higher, including at least 20 credits at the 3000-level or higher. In addition, ACTG 2200, FIN 2800 and at least 12 credits in FIN courses at the 3000-level or higher are required. Students should work with Daniels advisors in order to make appropriate choices. The following courses are required:

Code	Title	Credits
<b>Mathematics</b> <sup>1</sup>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
MATH 2060	Elements of Linear Algebra	4
MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4
MATH 2200	Mathematical Reasoning & Proof	4
MATH 3080	Introduction to Probability	4
MATH 3161	Introduction to Real Analysis	4
Select one of the following:		4
MATH 3170	Introduction to Abstract Algebra	
MATH 3151	Advanced Linear Algebra	
Math Electives		8
<b>Business</b> <sup>2</sup>		
ACTG 2200	Introduction to Financial Reporting	4
FIN 2800	Financial Decision Making	4
FIN Electives		12
<b>Total Credits</b>		<b>68</b>

**Notes**

- In addition, students must complete the ETS Major Field Test in Mathematics as instructed by the department, and satisfy all requirements for the Bachelor of Arts degree with concentration in Finance as outlined in the University of Denver Undergraduate Bulletin.
- Students may enroll in ACTG 2200 Introduction to Financial Reporting only if they are formally enrolled in this degree, have completed MATH 2200 Mathematical Reasoning & Proof and have Microsoft Excel certification.
- Students in this program should work with Daniels advisors in order to make appropriate choices for 3000-level FIN electives, and ensure that prerequisites are followed.
- Students in this degree are not eligible for a Finance minor. Good choices for complementary minors include economics, statistics, or computer science.

## Secondary Major

48 credits. Same requirements as for BA degree.

## Minor Requirements

This minor requires completion of at least 20 credits in MATH courses numbered 1951 or higher. COMP 2300 Discrete Structures in Computer Science may be counted toward the math minor. Courses not covered by these requirements must be approved in writing by a mathematics faculty advisor.

## Requirements for Distinction in the Major in Mathematics

- Complete at least one of the following tracks with a GPA of 3.5 or more:
  - Analysis Track: MATH 3161 Introduction to Real Analysis, MATH 3162 Introduction to Real Analysis II, MATH 3110 Topology.
  - Algebra Track: MATH 3170 Introduction to Abstract Algebra, MATH 3166 Group Theory, MATH 3176 Rings and Fields.
- Complete an honor thesis.

The course plans below are intended to give students an example of how they might complete their degree requirements in four years. All of the required courses are included, but the quarters in which certain courses are taken can vary significantly from student to student.

For the first quarter of the first year, math majors are typically advised to take an FSEM, at least one math course (MATH 1951, or something else depending on credit earned through examinations (<http://bulletin.du.edu/undergraduate/undergraduateprograms/examinations/>)) and enough other credits so that the student is enrolled in 16 or more credits total. Those additional other credits may include common curriculum courses, courses in a second major or minor, or electives.

<sup>1</sup> INTZ 2501 (<http://bulletin.du.edu/search/?P=INTZ%202501>) is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

<sup>2</sup> Besides MATH 3080, MATH 3161 and MATH 3151 (or MATH 3170), an additional 8 MATH credits at the 3000-level are required

#### **MATH 1010 Elements of College Algebra (2,4 Credits)**

This course is designed to review the required algebra skills to be successful in Business Calculus. The following topics are covered: review of basic algebra, solving equations and inequalities, rectangular coordinate systems and graphing, polynomial and rational functions, exponential and logarithmic functions, and solving exponential and logarithmic equations. Students who completed a MATH course numbered 1200 or higher may not take this course.

#### **MATH 1070 College Algebra and Trigonometry (4 Credits)**

Selected topics in algebra and analytic trigonometry intended to prepare students for the calculus sequence. Cannot be used to satisfy the Analytical Inquiry. The Natural and Physical World requirement. Students who completed a MATH course numbered 1951 or higher may not take this course.

#### **MATH 1150 Foundations Seminar (4 Credits)**

The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

#### **MATH 1200 Calculus for Business and Social Sciences (4 Credits)**

This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models. Students are required to attend weekly labs. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

#### **MATH 1941 Calculus I Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1951 Calculus I. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The workshop cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1951 Calculus I.

#### **MATH 1942 Calculus II Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1952 Calculus II. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The course cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1952 Calculus II.

**MATH 1943 Calculus III Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1953 Calculus III. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The course cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1953 Calculus III.

**MATH 1951 Calculus I (4 Credits)**

Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

**MATH 1952 Calculus II (4 Credits)**

Differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisite: MATH 1951.

**MATH 1953 Calculus III (4 Credits)**

Integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisite: MATH 1952 OR math 1962.

**MATH 1962 Honors Calculus II (4 Credits)**

Same topics as MATH 1952 treated rigorously and conceptually. Topics include differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisites: MATH 1951 and permission of instructor.

**MATH 1963 Honors Calculus III (4 Credits)**

Same topics as MATH 1953 treated rigorously and conceptually. Topics include integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisites: MATH 1952 or MATH 1962 and permission of instructor.

**MATH 1988 Study Abroad Resident Credit (0-18 Credits)****MATH 2050 Symbolic Logic (4 Credits)**

Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

**MATH 2060 Elements of Linear Algebra (4 Credits)**

Matrices, systems of linear equations, vectors, eigenvalues and eigenvectors; idea of a vector space; applications in the physical, social, engineering and life sciences. Prerequisite: MATH 1200 or MATH 1951.

**MATH 2070 Introduction to Differential Equations (0-4 Credits)**

Solution of linear differential equations; special techniques for nonlinear problems; mathematical modeling of problems from physical and biological sciences. Prerequisite: MATH 1953 or MATH 1963.

**MATH 2080 Calculus of Several Variables (4 Credits)**

Multivariable processes encountered in all sciences; multiple integration, partial differentiation and applications; algebra of vectors in Euclidean three-space; differentiation of scalar and vector functions. Prerequisite: MATH 1953 or MATH 1963.

**MATH 2200 Mathematical Reasoning & Proof (4 Credits)**

Introduction to theory of sets; relations and functions; logic, truth tables and propositional calculus; proof techniques; introduction to combinatorial techniques.

**MATH 2988 Study Abroad Resident Credit (0-18 Credits)****MATH 3000 The Real World Seminar (1 Credit)**

Lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with COMP 3000.

**MATH 3010 History of Mathematics (4 Credits)**

This course surveys major mathematical developments beginning with ancient Egyptians and Greeks and tracing the development through Hindu-Indian mathematics, Arabic mathematics, and European mathematics up to the 18th century. Prerequisite: MATH 1953 or MATH 1963.

**MATH 3040 Lattices and Order (4 Credits)**

Ordered sets, lattices as relational and as algebraic structures, ideals and filters, complete lattices, distributive and modular lattices, Boolean algebras, duality for finite distributive lattices. Prerequisite: MATH 2200.

**MATH 3050 Set Theory (4 Credits)**

Zermelo-Fraenkel axioms, axiom of choice, Zorn's Lemma, ordinals, cardinals, cardinal arithmetic. Prerequisite: MATH 2200.

**MATH 3060 Mathematical Logic (4 Credits)**

Classical propositional calculus (deductive systems and truth-table semantics), first-order logic (axiomatization and completeness), elements of recursion theory, introduction to nonclassical logics. Prerequisite: MATH 2200.

**MATH 3080 Introduction to Probability (4 Credits)**

Basic probability models, combinatorial methods, random variables, independence, conditional probability, probability laws, applications to classical problems. Prerequisite: MATH 1953 or MATH 1963.

**MATH 3090 Mathematical Probability (4 Credits)**

Limit theorems for independent random variables, multivariate distributions, generating functions. Prerequisites: MATH 2080 and MATH 3080.

**MATH 3110 Topology (4 Credits)**

Point set topology including topological spaces, connectedness, compactness and separate axioms; preparation for advanced courses in analysis. Prerequisite: MATH 3161. Cross listed with MATH 4110.

**MATH 3151 Advanced Linear Algebra (4 Credits)**

Vector spaces, linear mappings, matrices, inner product spaces, eigenvalues and eigenvectors. Prerequisite: MATH 2060 and MATH 2200.

**MATH 3161 Introduction to Real Analysis (4 Credits)**

A theoretical introduction to the structure of real numbers, to convergence of sequences and series, and to the topology of the real line, including limits and continuity. Prerequisites: MATH 2080 and MATH 2200.

**MATH 3162 Introduction to Real Analysis II (4 Credits)**

A rigorous introduction to the analysis of functions of a real variable, including differentiation, Riemann integration, and the notions of pointwise and uniform convergence for sequences of functions. Prerequisite: MATH 3161.

**MATH 3166 Group Theory (4 Credits)**

Groups and homomorphisms, isomorphism theorems, symmetric groups and G-sets, the Sylow theorems, normal series, fundamental theorem of finitely generated abelian groups. Cross listed with MATH 4166. Prerequisite: MATH 3170.

**MATH 3170 Introduction to Abstract Algebra (4 Credits)**

Examples of groups, permutations, subgroups, cosets, Lagrange theorem, normal subgroups, factor groups, homomorphisms, isomorphisms, rings, integral domains, quaternions, rings of polynomials, Euclid algorithm, ideals, factor rings, maximal ideals, principal ideals, fields, construction of finite fields. Prerequisite: MATH 2060 and MATH 2200.

**MATH 3176 Rings and Fields (4 Credits)**

Rings, domains, fields; ideals, quotient rings, polynomials; PIDs, UFDs, Euclidean domains; maximal and prime ideals, chain conditions; extensions of fields, splitting fields, algebraic and transcendental extensions; brief introduction to Galois theory. Cross listed with MATH 4176. Prerequisite: MATH 3170 or equivalent.

**MATH 3260 Metric Spaces (4 Credits)**

Metric spaces and continuous functions; completeness and compactness; examples including norm spaces; pointwise and uniform convergence; Baire Category Theorem. Cross listed with MATH 4260. Prerequisite: MATH 3161 or equivalent.

**MATH 3311 Linear Programming (4 Credits)**

Linear optimization models, simplex algorithm, sensitivity analysis and duality, network models, dynamic programming, applications to physical, social and management sciences. Prerequisite: MATH 2060.

**MATH 3312 Markov Chains (4 Credits)**

Discrete-time and continuous Markov Chains, ergodic theorems, random processes, elementary queueing theory, applications. Prerequisite: MATH 2060 and MATH 3080.

**MATH 3351 Introduction to Dynamical Systems (4 Credits)**

Dynamical systems (one-parameter families such as circle rotations/tent maps, shift spaces); global properties (transitivity/mixing/sensitivity); behavior of trajectories (chaos, long-term averages, periodicity). Prerequisite: MATH 3161.

**MATH 3400 Introduction to Geometry (4 Credits)**

Specific geometrical systems including finite, Euclidean, non-Euclidean and projective geometries. Prerequisite: MATH 2200.

**MATH 3451 Chaos, Dynamics & Fractals (4 Credits)**

Introduction to one-dimensional dynamical systems, fractals; fixed and periodic points; sources and sinks; period doubling and tangent node bifurcations; chaotic dynamical systems; Sarkovskii's Theorem. Prerequisite: MATH 3161.

**MATH 3550 Introduction to Theory of Numbers (4 Credits)**

Concepts of nonanalytic number theory and its history; prime numbers, divisibility, continued fractions, modular arithmetic, Diophantine equations and unsolved conjectures. Prerequisites: MATH 2200.

**MATH 3600 Numerical Analysis (4 Credits)**

An introduction to numerical methods. Topics include: iterative methods, Banach fixed point method, Runge-Kutta and finite element methods for partial differential equations, numerical optimization and gradient descent algorithm, and back propagation in neural networks. Prerequisites: MATH 2200.

**MATH 3605 Mathematics of Complex Networks (4 Credits)**

An introduction to the study of complex networks, focusing on the modeling, classification and geometrical properties of complex systems. Topics include stochastic and non-stochastic models of complex networks, measures of centrality and clustering, influence propagation and geometric data (expansion, the small world phenomena and PageRank). Prerequisite: MATH 2200.

**MATH 3610 Machine Learning: Linear Models and Regression (4 Credits)**

An introduction to modern regression techniques, with an emphasis in theoretical foundations and applications in artificial intelligence and machine learning. Topics include multilinear regression, polynomial regression, logistic regression, and support vector machines, including kernels methods. Prerequisite: MATH 3151 & MATH 3080.

**MATH 3615 Statistics and Stochastic Methods (4 Credits)**

Statistical decision theory, estimation, testing, confidence intervals. Bayesian statistics, introduction to Markov chains, and hidden Markov chains with applications to artificial intelligence. Prerequisite: MATH 2200 & MATH 3080.

**MATH 3651 Ordinary Differential Equations (4 Credits)**

Modeling of phenomena by ordinary differential equations; techniques of analysis and solution of such equations; oscillation theory and boundary value problems, power series methods, special functions, Laplace transforms and difference equations. Prerequisites: MATH 2060 and MATH 2070.

**MATH 3661 Partial Differential Equations (4 Credits)**

First and second order linear equations, Fourier series, the wave equation, the Cauchy problem, the heat equation, maximum principles, Laplace's equation, Green's functions. Prerequisites: MATH 2070 and MATH 2080.

**MATH 3701 Combinatorics (4 Credits)**

The principle of inclusion and exclusion, elementary counting techniques, systems of distinct representatives, partitions, recursion and generating functions, Latin squares, designs and projective planes. Prerequisite: MATH 2200.

**MATH 3705 Topics in Mathematics (4 Credits)**

Varying selected advanced topics in mathematics, depending on student demand and instructor interest.

**MATH 3710 Graph Theory (4 Credits)**

Paths, cycles, trees, Euler tours and Hamilton cycles, bipartite graphs, matchings, basic connectivity theorems, planar graphs, Kuratowski's theorem, chromatic number, n-color theorems, introduction to Ramsey theory. Prerequisite: MATH 2200.

**MATH 3720 Coding Theory (4 Credits)**

Goals of coding theory and information theory, instantaneous and Huffman codes, Shannon theorems, block and linear codes, generating and parity-check matrices, Hamming codes, perfect codes, binary Golay code, Reed-Muller codes, cyclic codes, BCH codes, Reed-Solomon codes, ideas of convolutional and turbo codes. Prerequisite: MATH 3170.

**MATH 3851 Functions Complex Variable (4 Credits)**

Complex numbers, analytic functions, complex integration, series expansions, residue theory, conformal maps, advanced topics and applications. Prerequisites: MATH 2060 and MATH 2080 and MATH 2200.

**MATH 3988 Study Abroad Resident Credit (0-18 Credits)****MATH 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in regular course schedule for that particular year.

**MATH 3995 Independent Research (1-10 Credits)****Faculty**

**Alvaro Arias**, Professor and Department Chair, PhD, Texas A&M University

**Charlotte A. Aten**, Visiting Assistant Professor, PhD, University of Rochester

**Sara Botelho-Andrade**, Teaching Assistant Professor, PhD, University of Missouri

**Ellie Dannenberg**, Teaching Assistant Professor, PhD, University of Illinois at Chicago

**Kelly A. Flaherty**, Teaching Associate Professor, PhD, University of Kansas

**Nick Galatos**, Professor, PhD, Vanderbilt University

**Jeremy Haefner**, Professor and University Chancellor, PhD, University of Wisconsin-Madison

**Paul Horn**, Associate Professor, PhD, University of California, San Diego

**Shashank Kanade**, Associate Professor, PhD, Rutgers University

**Michael Kinyon**, Professor, PhD, University of Utah

**Sabine Jessica Lang**, Teaching Assistant Professor, PhD, University of Utah

**Frederic Latremoliere**, Professor, PhD, University of California, Berkeley

**Andrew R. Linshaw**, Professor, PhD, Brandeis University

**Sujoy Mukherjee**, Visiting Assistant Professor, PhD, George Washington University

**Nicholas S. Ormes**, Associate Professor and Associate Dean, PhD, University of Maryland

**Ronnie Pavlov Jr.**, Professor, PhD, The Ohio State University

**Fei Qi**, Visiting Assistant Professor, PhD, Rutgers University

**Rodrigo B. Ribeiro**, Visiting Assistant Professor, PhD, Universidade Federal de Minas Gerais

**Franklin E. Schroeck**, Research Professor, PhD, University of Rochester

**Petr Vojtechovsky**, Professor, PhD, Iowa State University

**Mei Yin**, Associate Professor, PhD, University of Arizona

**Richard Ball**, Professor, Emeritus, PhD, University of Wisconsin

**Joel Cohen**, Associate Professor, Emeritus, PhD, University of Maryland

**Bill S. Dorn**, Professor, Emeritus, PhD, Carnegie Institute of Technology

**Stanley Gudder**, Professor, Emeritus, PhD, University of Illinois

**James Hagler**, Professor, Emeritus, PhD, University of California, Berkeley

**L. Alayne Parson**, Professor, Emerita, PhD, University of Illinois at Chicago

## Mechanical and Materials Engineering

Mechanical and Materials Engineering

Office: Ritchie School of Engineering and Computer Science

Mail Code: 2155 E. Wesley Ave, Room 277. Denver, CO 80208

Phone: 303.871.3041

Email: [mmeinfo@du.edu](mailto:mmeinfo@du.edu)

Web Site: <http://ritchieschool.du.edu/departments/MME> (<http://ritchieschool.du.edu/departments/mme/>)

The mission of the Department of Mechanical and Materials Engineering (MME) at the undergraduate level is to offer programs that support and complement the University mission; to provide a general undergraduate education in mechanical engineering that prepares students for employment or graduate study; to include interdisciplinary engineering work; to encourage the professional development of the faculty; and to foster the professional awareness of the students. The BS in Mechanical Engineering degree is accredited by the Engineering Accreditation Commission (EAC) of Accreditation Board of Engineering and Technology (ABET (<https://www.abet.org/>), 415 N. Charles St., Baltimore, MD 21201, 410-347-7700, [eac@abet.org](mailto:eac@abet.org)).

### PROGRAM EDUCATIONAL OBJECTIVES

The program educational objectives of the BS in Mechanical Engineering program are to produce graduates who, within a few years of graduation:

- a. Apply their engineering and problem-solving skills towards engineering practice, engineering graduate school, or other fields such as medicine, science, business, or law.
- b. Value and demonstrate character by acting responsibly, ethically, and professionally.
- c. Work synergistically in diverse and global environments to positively impact society.
- d. Embrace life-long learning to support professional development and personal wellness.

### Student Outcomes

Student outcomes describe what students are expected to know and be able to do by the time of graduation. These relate to the knowledge, skills, and behaviors that students acquire as they progress through the program.

The students outcomes for the BS in Mechanical Engineering program are:

- a. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- b. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

- c. an ability to communicate effectively with a range of audiences
- d. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- e. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- f. an ability to develop and conduct appropriate experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions
- g. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

## PROGRAM COMPONENTS

The Departments of Mechanical and Materials Engineering (MME) and Electrical and Computer Engineering (ECE) work closely together to deliver an exceptional educational experience for our students and to advance the state of the art through research and industry collaborations.

All of our engineering programs have several components:

- a. The University of Denver's Common Curriculum, which includes first-year seminar, writing courses, analytical inquiry and scientific inquiry courses, and advanced seminar
- b. Basic sciences and mathematics, including chemistry, physics, and mathematics
- c. An engineering common curriculum, with fundamental material from computer, electrical, and mechanical engineering
- d. An engineering discipline (computer engineering, electrical engineering, mechanical engineering)
- e. Multiple integrated design experiences, which are interdisciplinary and involve teams working on impactful real-world problems
- f. Depth and/or breadth in the discipline through engineering, math, and science electives personalized to the student's individual interests.

## ENGINEERING DESIGN

The feature of engineering programs that most differentiates them from programs in basic or applied science and mathematics is engineering design, which is both an art and a science. Our programs feature a 4-year thread of coursework required of all students, regardless of curriculum, which emphasizes design, project work, team-work, and the application of scientific and technical knowledge and design skills already acquired to the solution of interdisciplinary engineering problems. As the student progresses in the curriculum, more and more reliance is placed on previous work, and more realistic constraints and considerations are required for success. The sequence culminates in a three-quarter capstone design project carried out in the final year. Additional design work is contained in specialized courses, including junior year Integration.

## COURSE OF STUDY

Engineering curricula are highly structured; acquisition of certain knowledge and skills must precede acquisition of more advanced ones. The course plan provides a detailed road map of the curriculum.

We offer an **Engineering Common Curriculum** for the first 5 quarters. As in, the curricula for all engineering programs (computer, electrical and mechanical) are the same for the first 5 quarters. A student can delay choosing an engineering major until the beginning of the spring quarter of their second year. By learning about the various engineering disciplines, students are better able to select the program that is right for them.

The curricula in the last two years includes advanced work in the engineering discipline, integrated engineering design experiences, depth and/or breadth through engineering, math, and science electives, and completion of the University Common Curriculum.

The MME department also offers several 4+1 dual BS-MS degree programs. Students can earn MS degrees in Bioengineering, Mechanical Engineering or Material Science. For details and timing of the application process, visit the Ritchie's School's 4+1 programs (<https://ritchieschool.du.edu/academics-education/41-programs-dual-degrees/>) website. Students interested in these programs should discuss them with an advisor as early as possible in their undergraduate careers.

## UnDergraduate Research Experiences

Students wishing to participate in undergraduate research projects may be eligible for participation in Partners in Scholarship (PinS) or the Ritchie School's Grand Challenge Scholar Program (GCSP (<https://ritchieschool.du.edu/academics-education/grand-challenges-scholar-program/>)).

PinS is a University-wide program in which a student can receive support to collaborate on a project with a faculty member. More information on PINS, including funding opportunities and the Undergraduate Showcase, is available at the Undergraduate Research Center (<http://www.du.edu/urc/>) website.

The Ritchie School's GCSP provides opportunities for student to work closely with faculty mentor on projects related to the National Academy of Engineering's 14 Grand Challenges. Students can apply for project, stipend or travel support for their projects.

## STUDY ABROAD

The University of Denver and the MME department strongly encourage students to participate in study abroad programs, particularly through the Cherrington Global Scholars Program. More information can be found at the Office of International Education (<http://www.du.edu/intl/abroad/>) website.

Many engineering students participate in study abroad experiences. The engineering curricula have been structured so that students may take advantage of this opportunity in the autumn quarter of the senior year, rather than in the autumn quarter of the junior year, as is more usual in other DU programs. If you are interested, it is important to plan ahead with your advisor to make sure the selected courses at your study abroad site integrate into your course plan.

## COOPERATIVE EDUCATION PROGRAM

Recognizing the value of experiential learning, we have created a paid co-op program which is optional and competitive for all Ritchie School students, though ideally suited for current sophomores and juniors. Through this collaborative program between academia and industry, students work full time at participating companies earning valuable work experience. Typically, students will not take classes for one full academic year, resuming their studies upon their return exactly in sequence but one year removed. In some cases, DU courses can be taken while on co-op. Dr. Matt Gordon is the department contact for students interested in the co-op program.

## FUNDAMENTALS OF ENGINEERING (FE) EXAMINATION

The FE Exam is the first of a two-step process in order to become registered as a Professional Engineer (PE). The FE exam is a national 6-hour examination administered by NCEES (National Council of Examiners for Engineering and Surveying) in conjunction with the Colorado State Board for Professional Engineers and Land Surveyors.

The MME department encourages, but does not require, mechanical engineering students to complete the FE exam. To register, a student must have completed at least 135 credits to apply to take the FE exam. The NCEES charges a fee to take the exam. For more information, please contact the MME department chair.

After passing the FE exam, the student must send a final transcript recording the receipt of an engineering degree to the Colorado State Board for Professional Engineers and Land Surveyors. Typically, after passing the FE exam, the requirements for registration as a PE are 4 years of engineering experience under the supervision of a PE with increasing engineering responsibility and passing the PE examination.

## Criteria for Entering Any of the Engineering Programs

In the first year, students should plan to take the following:

MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
MATH 1953	Calculus III	4
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5

Students lacking the mathematics preparation to begin calculus in the first quarter may take MATH 1070 College Algebra and Trigonometry followed by the usual calculus sequence; these students should meet with an advisor from the engineering department before enrolling for courses. Failure to complete the courses listed above in the first year may lead to an additional year of study.

## Minors in Engineering for Non-Engineering Students

Students desiring to minor in any of the engineering disciplines must take 20 hours of discipline specific engineering courses in addition to the equivalent of MATH 1951 Calculus I, MATH 1952 Calculus II, and MATH 1953 Calculus III. It is recommended that they have PHYS 1211 University Physics I, PHYS 1212 University Physics II, and PHYS 1213 University Physics III in their curriculum. Degree programs that “naturally flow” into an engineering minor are: chemistry, computer science, biology, mathematics and physics.

Mechanical Engineering

### Bachelor of Science in Mechanical Engineering (BSME)

(192 credits required for the degree (p. 96))

#### Requirements

192 credits are required for the degree, including degree including, at least 48 credits of mathematics and basic science and at least 91 credits of engineering topics.

Code	Title	Credits
ENCE 2101	Digital Design	3
ENEE 2012	Circuits I and Laboratory	4
ENGR 1511	Engineering Connections	1
ENGR 1572	Applied MATLAB Programming	3
ENGR 1611	Introduction to Engineering Design	4
ENGR 1622	Introduction to Mechatronic Systems I	4
ENGR 1632	Introduction to Mechatronic Systems II	4
ENGR 2610	Engineering Integration I	3
ENGR 2620	Engineering Integration II	3
ENGR 2910	Engineering Economics and Ethics	3
ENGR 2950	Engineering Assessment I	0
ENGR 2951	Engineering Assessment II	0
ENGR 3313	Engineering Design Project I	2
ENGR 3323	Engineering Design Project II	3
ENGR 3333	Engineering Design Project III	3
ENME 2410	Materials Science I	3
ENME 2421	Materials Science II	3
ENME 2510	Statics with Lab	4
ENME 2520	Dynamics I with Lab	4
ENME 2530	Dynamics II	3
ENME 2540	System Dynamics	3
ENME 2541	Mechanics of Materials	3
ENME 2651	Fluid Dynamics I	3
ENME 2661	Fluid Dynamics II/Heat Transfer I	3
ENME 2671	Heat Transfer II with Lab	4
ENME 2710	Engineering Thermodynamics I	3
ENME 2720	Engineering Thermodynamics II	3
ENME 2810	Mechanical Engineering Lab I	3
ENME 3511	Machine Design	3
ENME 3810	Mechanical Engineering Capstone Laboratory	3
Engineering Electives		12
Math-Sci Electives		10
Technical Elective		3-4

## Additional Requirements

### Chemistry

Code	Title	Credits
CHEM 1010	General Chemistry I	3
CHEM 1240	General Chemistry I Laboratory	1

### Computer Science

Code	Title	Credits
COMP 1351	Introduction to Programming I	3

### Mathematics

Code	Title	Credits
MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
MATH 1953	Calculus III	4

MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4

## Physics

Code	Title	Credits
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1214	University Physics III for Engineers	4

## Notes

Engineering Electives (12 credit hours) - Take 3 - 3000 or higher engineering courses (ENGR, ENME, ENEE, ENCE, ENBI, ENMT, or MTSC), which are not required for the major.

Math-Sci Electives (10 credit hours) - Take 2-4 math or science courses from the approved list. Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years. See Degree Program Plan for Approved courses.

Technical Elective (3 or 4 credit hours) – Take 1 additional approved technical elective course from engineering, math, science or computer science

## Minor Requirements for Mechanical Engineering

20 credits, including:

Code	Title	Credits
Select three of the following four courses:		9
ENME 2510	Statics with Lab	
ENME 2410	Materials Science I	
ENME 2651	Fluid Dynamics I	
ENME 2710	Engineering Thermodynamics I	

**Electives** **11**

ENME courses at the 2000-level or above

				Open Elective	4-3
	14		14		13

Total Credits: 192

**Notes**

**Common Curriculum** These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society (16 credits).

**ASEM 2XXX - Advanced Seminar** Required writing-intensive advanced seminar. Junior or senior standing is required (4 credits)

**Open Elective** May be any course at the 1000 level or above (3 or 4 credits as needed to reach 192 total QH).

**Eng Electives** (12 credit hours) - Take 3 - 3000 or higher engineering courses (ENGR, ENME, ENEE, ENCE, ENBI, ENMT, or MTSC), which are not required for the major.

**Math-Sci Electives** (10 credit hours) - Take 2-4 math or science courses from the approved list. Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years.

**Tech Elective** (3 or 4 credit hours) – Take 1 additional approved technical elective course from engineering, math, science or computer science.

**Approved Math/Sci Courses (subject to participating department course offerings):**

**Biology**

BIOL 1010 (<http://bulletin.du.edu/search/?P=BIOL%201010>) Physiological Systems w/BIOL 1020 (<http://bulletin.du.edu/search/?P=BIOL%201020>) Physiological Systems Lab; BIOL 1011 (<http://bulletin.du.edu/search/?P=BIOL%201011>) Evolution, Heredity and Biodiversity w/BIOL 1021 (<http://bulletin.du.edu/search/?P=BIOL%201021>) Evolution, Heredity and Biodiversity Lab; BIOL 2450 (<http://bulletin.du.edu/search/?P=BIOL%202450>) Human Anatomy; BIOL 2090 (<http://bulletin.du.edu/search/?P=BIOL%202090>) Biostatistics; BIOL 2120 (<http://bulletin.du.edu/search/?P=BIOL%202120>) Cell Structure and Function w/BIOL 2121 (<http://bulletin.du.edu/search/?P=BIOL%202121>) Cell Structure & Function Lab; BIOL 3250 (<http://bulletin.du.edu/search/?P=BIOL%203250>) Human Physiology

**Chemistry**

CHEM 1020 (<http://bulletin.du.edu/search/?P=CHEM%201020>) General Chemistry II w/ CHEM 1250 (<http://bulletin.du.edu/search/?P=CHEM%201250>) General Chemistry II Laboratory; CHEM 2131 (<http://bulletin.du.edu/search/?P=CHEM%202131>) Chemistry of the Elements w/ CHEM 2141 (<http://bulletin.du.edu/search/?P=CHEM%202141>) Chemistry of the Elements Lab; CHEM 2240 (<http://bulletin.du.edu/search/?P=CHEM%202240>) Introduction to Environmental Chemistry; CHEM 2270 (<http://bulletin.du.edu/search/?P=CHEM%202270>) Quantitative Chemical Analysis

**Math**

MATH 2060 (<http://bulletin.du.edu/search/?P=MATH%202060>) Elements of Linear Algebra; MATH 3080 (<http://bulletin.du.edu/search/?P=MATH%203080>) Introduction to Probability; MATH 3090 (<http://bulletin.du.edu/search/?P=MATH%203090>) Mathematical Probability; MATH 3851 (<http://bulletin.du.edu/search/?P=MATH%203851>) Functions Complex Variable

**Physics**

PHYS 2251 (<http://bulletin.du.edu/search/?P=PHYS%202251>) Modern Physics I; PHYS 2252 (<http://bulletin.du.edu/search/?P=PHYS%202252>) Modern Physics II w/ PHYS 2260 (<http://bulletin.du.edu/search/?P=PHYS%202260>) Modern Physics Lab; PHYS 2259 (<http://bulletin.du.edu/search/?P=PHYS%202259>) Uncertainty and Error Analysis; PHYS 2300 (<http://bulletin.du.edu/search/?P=PHYS%202300>) Physics of the Body; PHYS 2340 (<http://bulletin.du.edu/search/?P=PHYS%202340>) Medical Imaging Physics; PHYS 3510 (<http://bulletin.du.edu/search/?P=PHYS%203510>) Analytical Mechanics I; PHYS 3711 (<http://bulletin.du.edu/search/?P=PHYS%203711>) Optics I

**REQUIREMENTS FOR DISTINCTION IN THE MAJOR IN MECHANICAL ENGINEERING**

- Minimum 3.3 cumulative GPA
- Complete an undergraduate research project, including research paper and presentation

**ENBI 3500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 4500. Prerequisites: ENME 2661.

**ENBI 3510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include analysis of the human musculoskeletal system as sensors, levers, and actuators; joint articulations and their mechanical equivalents; kinematic and kinetic analysis of human motion; introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; mechanical properties of hard and soft tissues; mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; orthopedic implants. Cross listed with ENBI 4510. Prerequisites: ENME 2410, ENME 2520, and ENME 2541.

**ENBI 3800 Topics in Bioengineering (1-4 Credits)**

Special topics in bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4200 Medical Device Development (4 Credits)**

Working in a fast-paced competitive biomedical R&D firm is a dramatic change of pace from most college classes. This course will create a realistic industry environment where students take on the role of development engineers to design and manufacture real-world medical devices. This course is intended to provide a working knowledge of the design and development process specifically for medical device applications.

**ENBI 4500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 3500.

**ENBI 4510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include: Analysis of the human musculoskeletal system as sensors, levers, and actuators; Joint articulations and their mechanical equivalents; Kinematic and kinetic analysis of human motion; Introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; Mechanical properties of hard and soft tissues; Mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; Orthopedic implants. Cross listed with ENBI 3510.

**ENBI 4520 Introduction to Cardiovascular Engineering (4 Credits)**

An introduction to cardiovascular mechanics with a focus on the quantitative understanding of the mechanical phenomena that governs the cardiovascular system. Specific topics covered include: basic principles of circulation including macro and micro circulation, soft tissue mechanics, applications to cardiovascular diseases, modelling techniques, clinical and experimental methods, and design of cardiovascular devices. Recommended prerequisites: ENME 2541 and ENME 2661.

**ENBI 4530 Biomechanics of Human Movement (4 Credits)**

An introduction to engineering-based analysis of human movement. Topics include: musculoskeletal anatomy, neuromuscular physiology, muscle mechanics, electromyography, sensorimotor integration, anthropometry, kinematics and kinetics. Recommended pre-requisite material: knowledge of MATLAB, ENGR 1572.

**ENBI 4800 Adv Topics (Bioengineering) (1-5 Credits)**

Various topics in Bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENBI 4991 Independent Study (1-5 Credits)****ENBI 4995 Independent Research (1-18 Credits)****ENGR 1010 Electronics for the Arts 1 - Analog (4 Credits)**

Introduction to analog electronics, culminating in construction of an analog sound synthesizer. Students are required to complete simple projects with circuits while learning the basics of analog synthesizers. Introduction to circuit simulation software (e.g. Falstad or Multisim), learn how to use oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

**ENGR 1011 Electronics for the Arts 2 - Digital (4 Credits)**

Introduction to digital electronics and coding for Arduino style microprocessors, culminating in design and construction of a hybrid analog/digital sound synthesizer or other device. Students are required to complete simple projects with Arduino while learning the basics of digital synthesizers. Introduction to programming, reinforce the use of oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

**ENGR 1012 Electronics for the Arts 3 - Digital (4 Credits)**

Individual or team-based development of more complex devices or systems, potential for product development. Students are required to complete complex projects that involve combining analog and digital synthesizers with the external world (sensors and/or actuators). Introduction to python programming and incorporation of artificial intelligence (AI) into synthesizers are among other topics covered in this course.

**ENGR 1511 Engineering Connections (1 Credit)**

This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

**ENGR 1572 Applied MATLAB Programming (3 Credits)**

The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671 or COMP 1351, and MATH 1952.

**ENGR 1611 Introduction to Engineering Design (4 Credits)**

Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.

**ENGR 1622 Introduction to Mechatronic Systems I with MultiSim and MathCAD (4 Credits)**

Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multisim circuit analysis software and Mathcad are among other topics covered in this course.

**ENGR 1632 Introduction to Mechatronic Systems II (4 Credits)**

Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

**ENGR 1700 Machine Shop Practice (1 Credit)**

Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

**ENGR 1911 Introduction to CAD (2 Credits)**

This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

**ENGR 1921 Introduction in Engineering II (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

**ENGR 1931 Introduction to Engineering III (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

**ENGR 2610 Engineering Integration I (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: Junior standing in the appropriate engineering discipline and ENME 3511 for MME majors or ENCE 3210 and ENEE 2211 for ECE majors (the latter three can be taken concurrently).

**ENGR 2620 Engineering Integration II (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisite: ENGR 2610.

**ENGR 2905 Engineering Cooperative Education (0-12 Credits)**

For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

**ENGR 2910 Engineering Economics and Ethics (3 Credits)**

This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

**ENGR 2950 Engineering Assessment I (0 Credits)**

Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2012 AND ENGR 1572.

**ENGR 2951 Engineering Assessment II (0 Credits)**

Students perform a lifelong learning experience and assessment-related tasks, e.g. a survey and exit interview. The course also includes career and professional development, as well as information on the Fundamentals of Engineering (FE) exam. Engineering students are encouraged, but not required to complete the FE exam. This course should be taken in the last year of attendance. Prerequisites: ENGR 3323.

**ENGR 3100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.

**ENGR 3200 Introduction to Nanotechnology (4 Credits)**

In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2410.

**ENGR 3220 Introduction to Micro-Electro-Mechanical-Systems and Microsystems (4 Credits)**

This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology. MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 4220.

**ENGR 3313 Engineering Design Project I (2 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENME 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

**ENGR 3323 Engineering Design Project II (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

**ENGR 3333 Engineering Design Project III (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include: 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3323.

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

**ENGR 3535 Electric Power Engineering Laboratory (1 Credit)**

In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3545 Electric Power Economy (3 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

**ENGR 3590 Power System Protection (3 Credits)**

This course covers methods of calculation of fault currents under different types of faults; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENEE 2022, ENGR 3530 or equivalent. 3.0 hours. Cross listed with ENGR 4590.

**ENGR 3611 Engineering Mathematics (3 Credits)**

Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

**ENGR 3620 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Systems and series solutions of ordinary differential equations, Fourier analysis, partial differential equations, linear algebra, vector calculus, special functions, unconstrained and combinatorial optimization, and applied probability and statistics. Prerequisites: MATH 2070 and MATH 2080 or instructor permission.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 4723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3611, ENGR 3721, and ENGR 3722, or permission of the instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 3991 Independent Study (1-5 Credits)**

Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENGR 3995 Independent Research (1-10 Credits)****ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design. Cross listed with ENGR 3350.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the “shredding” of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the “true” problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering “vee” design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine "cause and effect". In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisites: ENEE 3111, ENGR 3611, and ENGR 3721, or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4865 Design, Innovation, and Entrepreneurship (4 Credits)**

The course focuses on design and innovation of engineering systems and products. It deals with entrepreneurship, critical and innovative thinking, creativity and lateral thinking, research and technology challenges that lead to innovation, entrepreneurship and new product development, problem solving and decision making. It discusses factors that affect innovation (e.g. tech insertion), as well as a wide range of case studies in diverse application domains. Course Requirements: Projects.

**ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure— the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)****ENME 2410 Materials Science I (3 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Prerequisites: PHYS 1212, CHEM 1010, MATH 1952, and ENME 2710.

**ENME 2421 Materials Science II (3 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Laboratory projects/demonstrations. Prerequisites: ENME 2410.

**ENME 2510 Statics with Lab (4 Credits)**

Study of static force systems. Topics include resolution and composition of forces and moments, equilibrium of two-dimensional and three-dimensional force systems, shear and moments in beams, friction, and moments of inertia. Includes a laboratory component where students will engage in hands-on projects that apply loading equilibrium, design of structures, and stress/strain. Prerequisites: MATH 1951 AND PHYS 1211.

**ENME 2520 Dynamics I with Lab (4 Credits)**

Particles Kinematics, Reference Frames, Coordinate Systems, Newton's Laws, Energy and Momentum, Multiparticle Systems, Collisions, Variable Mass Systems. These topics are addressed through analytical analysis, numerical simulation using Matlab, and experimental data collection. Cross listed with PHYS 2520. Corequisite: MATH 2080; Prerequisite: ENME 2510 AND MATH 2070.

**ENME 2530 Dynamics II (3 Credits)**

Rotating reference frames, rigid body kinematics, rigid body kinetics, Euler's Laws, inertia, energy and momentum, and three-dimensional motion. Cross listed with PHYS 2530. Prerequisites: ENME 2520.

**ENME 2540 System Dynamics (3 Credits)**

This course covers modeling, analysis, and control of single and multiple degree-of freedom dynamical systems, including mechanical, electrical, thermal, fluid systems and their combinations (mixed systems). Basic concepts in system theory, such as state variables and stability concepts, will be introduced as well as bond graph notation and approach. Prerequisites: ENME 2530, ENME 2661, ENGR 1572, and ENEE 2012.

**ENME 2541 Mechanics of Materials (3 Credits)**

Normal and shear stress and strain; elasticity, mechanical properties of materials, principal stresses; torsion, beams, deflection of beams under loads, methods of superposition, failure theory, columns. Prerequisite: ENME 2510.

**ENME 2651 Fluid Dynamics I (3 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2510 and MATH 2070.

**ENME 2661 Fluid Dynamics II/Heat Transfer I (3 Credits)**

Course series provides students with the basic skills levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2651.

**ENME 2671 Heat Transfer II with Lab (4 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2661.

**ENME 2710 Engineering Thermodynamics I (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: PHYS 1212.

**ENME 2720 Engineering Thermodynamics II (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: ENME 2710.

**ENME 2810 Mechanical Engineering Lab I (3 Credits)**

Engineering experiments illustrating selected topics in heat transfer, fluid mechanics, solid mechanics, thermodynamics, measurement and control. Use of microcomputers in experimentation and control. This course encourages the development of laboratory experimentation skills, design skills and technical writing skills. Prerequisites: ENME 2540 AND ENME 2671.

**ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue, and reliability. Cross listed with ENME 4400.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretizations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides an introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 3820 Topics Mechanical Engineering (0-5 Credits)**

Mechanical engineering topics as announced. May be taken more than once. Prerequisite: vary with offering.

**ENME 3991 Independent Study (1-5 Credits)**

Topics in mechanical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENME 3995 Independent Research (1-10 Credits)****ENME 4020 Adv Finite Element Analysis (4 Credits)****ENME 4310 Computational Methods for Mechanics and Materials (4 Credits)**

An introductory course for the general-purpose computational methods in advanced multiscale materials and mechanics. Students learn the fundamentals on the numerical methods used in mechanical and materials engineering. Cross listed with ENME 3310.

**ENME 4360 Elasticity (4 Credits)**

Students will be able to apply the fundamental principles of elasticity to solve two- and three-dimensional mechanical engineering problems involved in modern applications of elastic structures, composite materials, tribology and contact mechanics. Dependence on previous knowledge of solid mechanics, continuum mechanics or mathematics is minimized. The emphasis is placed on the engineering applications of elasticity. Suggested prerequisite: ENME 2541.

**ENME 4400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue and reliability. Cross listed with ENME 3400.

**ENME 4520 Intermediate Dynamics (4 Credits)**

Development and analysis of dynamic systems through classical approaches. Topics will include: Vector algebraic/differential geometry for 3D translational and rotational kinematic analyses with motion constraints. Formulation of equations of motion for 3D multibody systems using: Newton/Euler equations; Angular momentum principle; and D'Alembert principle (aka road-maps). Some exposure to Euler-Lagrange and Kane's Methods calculations. Symbolic and numerical computational solutions to linear/nonlinear algebraic and differential equations governing the configuration, forces, and motion of systems with multiple degrees of freedom. Recommended prerequisites: MATH 2070.

**ENME 4530 Advanced Dynamics (4 Credits)**

Formulation of equations of motion for constrained 3D multibody systems with: D'Alembert principle (MG road-maps); power, work, and energy; Lagrange's equations; and Kane's method. Euler parameters/quaternions, specified motion, constraint force/torque calculations, feed-forward control, inequality constraints and/or intermittent contact. Tensors and mass property calculations. Symbolic and numerical computer skills for geometry/kinematic analysis, mass/inertia calculations, forces and motion, and simulation of multi-body dynamic systems. Training for advanced research and professional work. Recommended pre-requisite: ENME 4520.

**ENME 4541 Advanced Mechanics of Materials (4 Credits)**

This is a second-level course in mechanics of materials with an emphasis on techniques that are useful for mechanical design. Topics may include energy methods, non-symmetrical and nonlinear bending, shear and torsion of closed and open sections, beams in elastic foundations, membrane stress in axisymmetric shells, axisymmetric bending of cylindrical shells, thick-walled cylinders and disks, curved beams, and elastic stability.

Recommended prerequisite: ENME 2541.

**ENME 4630 Viscous Flow (4 Credits)**

Course covers the fundamentals of fluid mechanics from an advanced point of view with emphasis on the mathematical treatment of viscous-flow phenomena. Topics cover the Navier-Stokes equations and its exact and similarity solutions, laminar boundary layer theory, free-shear flows, and the phenomena of instability and transition to turbulence. Recommended prerequisite: ENME 2661.

**ENME 4670 Advanced Computational Fluid Dynamics (4 Credits)**

Building on the principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer and two phase flow. Specifically, Monte Carlo and volume of fluid techniques are discussed at length. Additionally, students learn how to set up automated design optimization using the latest software packages. Time permitting, students also are introduced to fluid-solid interaction modeling. Prerequisite: ENME 3651.

**ENME 4671 Convective Heat Transfer (4 Credits)**

The objective of this course is to examine the physical phenomena associated with heat transfer in the presence of fluid flow. We will develop a mathematical description of the processes (fluid flow and heat transfer) for laminar and turbulent flows for both internal and external situations. Exposure to the fundamentals of fluid mechanics and heat transfer is expected before taking this course.

**ENME 4800 Advanced Topics (ME) (0-5 Credits)**

Determined by interest and demand. May be taken more than once for credit.

**ENME 4900 Grad Professional Development (1 Credit)**

This course is required for all MME MS graduate students and all MME PhD graduate students who enter with a BS or enter with an MS but fail their first qualifying exam. One of our objectives is for all graduating students to have good written and verbal communication skills. This course is set up to meet those objectives. During this course, students write a mini-proposal and/or literature review. Students follow guidelines for a funding agency (e.g. NSF or NIH) for the mini-proposal. If students have a research advisor, students can coordinate with their advisor. If students do not have a research advisor, students may pick a topic that most interests them. Both a written proposal and an oral presentation are required of all students. Graduate standing is required.

**ENME 4950 Graduate Assessment (0 Credits)**

This graduate assessment course is required for all MME graduate students to be taken in their last quarter. All required assessment materials are uploaded to DU Assessment to meet the course requirements. Students will receive emails through the DU Assessment system notifying you of what is required to be uploaded.

**ENME 4991 Independent Study (1-10 Credits)****ENME 4995 Independent Research (1-16 Credits)****ENME 5991 Independent Study (1-10 Credits)****ENME 5995 Independent Research (1-16 Credits)****ENMT 3220 Mechatronics II - Real-Time Systems (4 Credits)**

Real-time systems require timely response by a computer to external stimuli. This course examines the issues associated with deterministic performance including basic computer architecture, scheduling algorithms, and software design techniques including data flow diagrams, real-time data flow diagrams, state transition diagrams, and petri nets. In the lab portion of this class, students program a microcontroller to interact with mechatronic devices. Prerequisite: ENCE 3210.

**ENMT 3800 Topics (Mechatronics) (1-4 Credits)**

Various topics in mechatronics system engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENMT 3991 Independent study (1-5 Credits)**

Topics in mechatronics engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENMT 4000 Space Systems Design I (4 Credits)**

The application of advanced theory and concepts as they relate to the development of spacecraft and missile subsystems, and how those subsystems are related under the umbrella of systems engineering. The course emphasizes practical aspects of space systems design and integration, and is team-taught by faculty and functional experts in the various fields. Lecture topics include aerospace materials, mechanics, thermal control, embedded systems, distributed sensor networks and aerospace probability and statistics.

**ENMT 4010 Space Systems Design II (4 Credits)**

The continuation of Space Systems Design I. Lecture topics include payload communications, guidance and control, spacecraft electric power, propulsion systems, radiation and avionics and sensor subsystems. Prerequisite: Space Systems Design I.

**ENMT 4100 Systems Engineering (4 Credits)**

Systems engineering is an interdisciplinary field of engineering and engineering management that focuses on how to design and manage complex systems over their life cycles. At its core, systems engineering utilizes systems thinking principles to organize this body of knowledge. Systems follow systems theory by having the design interface with its environment. System design typically follow the “V-diagram”, a serial process with structured verification occurring at each level of abstraction (system-subsystem-component hierarchy levels). The V-diagram traces the basic design process, starting with a problem, developing requirements, definitized with a concept of operations, and accomplishing a functional analysis and decomposition. Systems engineering takes a holistic approach to design, taking an idea to a concept and detail design. This includes a functional architecture and physical architecture, with particular attention paid to interfaces. Having built or procured components and developing software, the system is assembled and integrated. Verification and Validation is accomplished at each level of decomposition, starting at the lowest level and moving up to a system level that can be validated with the customer or shareholders. There are a series of milestones that are used to monitor the progress of the design. Instructor permission required.

**ENMT 4220 Mechatronics II (4 Credits)**

This course combines systems design and integration with a real world project involving the design and fabrication of an integrated system.

Prerequisite: Mechatronics I or equivalent.

**ENMT 4225 System Models, Simulation & Tools (4 Credits)**

A physical model is a smaller or larger physical copy of an object. Physical models allow visualization, from examining the model, of information about the thing the model represents. A model can be a physical object such as a spacecraft or spacecraft subsystem. Modeling and simulation are a key enabler for systems engineering activities as the system representation in a computer readable (and possibly executable) model enables engineers to reproduce the system (or Systems of System) behavior. Modeling is a tool for diagramming and understanding complex processes; Model-Based Systems Engineering (MBSE) is a powerful engine for design growth. It's endlessly adaptable to human needs and technological trends, unlocking incredible potential for analysis, and helping solve tomorrow's grand engineering challenges such as in aerospace. Physics-based models can be combine for use with equations of mathematical physics, coupled with real-time sensor measurements, and their numerical solution in an effort to understand complex design and operations.

**ENMT 4270 Fundamentals of System Electrical, Mechanical and Software Design (4 Credits)**

Design of individual electrical and mechanical components comprising a system. Comprehensive integrated approach making the transition from design of individual electrical/mechanical components into a complete electrical-mechanical system design. Topics include systems engineering of complex electronics (FPGAs, ASICs, Hybrids), electromagnetic compatibility, electromagnetic interference, electrical compatibility analysis, system power modeling and energy efficiency, electrical systems integration and test methodologies, mechanical system modeling, system thermal/stress analysis methods and tools, mass management, mechanical systems integration and test methodologies. Prerequisites: ENMT 4000, ENMT 4010, or permission by the Instructor. Course Requirements: Assignments and projects.

**ENMT 4275 Applied System Electrical, Mechanical, and Software Design (4 Credits)**

This is a practice-centered course. Assess case studies of design, implementation and testing, validation and verification of complete complex (e.g. spacecraft) systems to meet mission requirements with performance guarantees. Prerequisites: It is recommended that the elective course ENMT 4270 is taken first, or permission by the Instructor.

**ENMT 4280 Design for Feasibility and Resilience (4 Credits)**

A feasible design is an activity based on selected testing and engineering analysis, which presents enough information to determine whether or not the project should be advanced to the final design and production fabrication stage. In the fields of engineering, resilience is the ability to absorb or avoid damage without suffering complete failure and is an objective of the design. Resilience is described as the ability to return to the steady-state condition following a perturbation of the control behavior. When thinking about resilience, system engineering typically refer to this as an alternative (or as a complement) to the conventional view of safety. But resilience (or more accurately, the ability to perform in a resilient manner) is not about avoiding failures and breakdowns, i.e., it is not just the opposite of a lack of safety. This has led to early discussions about resilience versus robustness, resilience versus brittleness, etc. The focus of resilience engineering is thus resilient performance, rather resilience as a property (or quality) or resilience in a 'X versus Y' dichotomy. Students enrolling in this course should have knowledge of probability and statistics, familiarity with MATLAB/Simulink, or permission of the instructor.

**ENMT 4285 Complex System Architectures, Models, and Tools (4 Credits)**

The course focuses on mission requirements and how an overall mission should function by examining different architecture configurations and tools for modeling purposes. Example architecture models include: executable, networked, distributed, real-time, information assurance, framework, and reference. Students learn about development and allocation of functional and non-functional requirements and how to analyze architecture issues. Emphasis is on development of Service Oriented Architecture (SOA) solutions and ability to modeling and analysis using Systems Modeling Language (SysML). Prerequisites: ENMT 4100, or permission by the instructor. Course Requirements: Assignments and projects.

**ENMT 4730 Advanced Ground Robotics (4 Credits)**

Introduction to path planning and sensing and estimation for robotic manipulations and mobile robots. Review of the mathematical preliminaries required to support robot theory. Topics include advanced sensors, mobile robot mechanisms, advanced manipulator mechanisms, path planning in 2-D and 3-D, and simultaneous localization and mapping. Applications include task and motion planning for idealized and real robots.

**ENMT 4800 Adv Topics (Mechatronics) (1-5 Credits)**

Various topics in Mechatronics System Engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENMT 4801 Adv Topics (Mechatronics) (1-5 Credits)**

Various topics in Mechatronics System Engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENMT 4991 Independent Study (1-5 Credits)****ENMT 4995 Independent Research (1-18 Credits)****MTSC 3010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of materials (metals, polymers, ceramics and composites); emphasis on recent developments in materials science, modulus, fracture (fracture toughness and brittle strength), fatigue, creep, wear, friction, stress rupture and deformation. Cross listed with MTSC 4010. Prerequisites: ENME 2421.

**MTSC 3020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 4020. Prerequisites: ENME 2410 and ENME 2541.

**MTSC 3450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 4450. Prerequisites: ENME 2421 and ENME 2541.

**MTSC 3800 Topics in Materials Science (1-5 Credits)**

Various topics in materials science as announced. May be taken more than once. Prerequisite: varies with each topic.

**MTSC 4010 Mechanical Behavior of Materials (4 Credits)**

Effects of microstructure on mechanical behavior of material; emphasis on recent developments in materials science, fracture, fatigue, creep, wear, corrosion, stress rupture, deformation and residual stress. Cross listed with MTSC 3010.

**MTSC 4020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 3020.

**MTSC 4215 Composite Materials II (4 Credits)**

A continuation of MTSC 4210: Strength and toughness of composites, thermal behavior, fabrication methods, examples of applications. Prerequisite: MTSC 4210.

**MTSC 4450 Fracture Mechanics (4 Credits)**

Topics include stress field at a crack tip, linear elastic fracture mechanics, energy release rate, stress intensity factors, plastic zones, plane stress, plane strain, fracture toughness, Airy stress functions, elastic-plastic fracture mechanics, J integral, crack tip opening displacements, experimental testing, fatigue, life prediction, crack closure, weight functions, failure analysis. Cross listed with MTSC 3450.

**MTSC 4800 Advanced Topics (MTSC) (1-5 Credits)**

Selected topics (depending on student and faculty interest): fracture mechanics, fatigue, nonlinear constitutive models, dynamic behavior of materials, corrosion resistant design, thermodynamics of solids II.

**MTSC 4991 Independent Study (1-10 Credits)****MTSC 4995 Independent Research (1-16 Credits)****MTSC 5995 Independent Research (1-16 Credits)****Faculty**

**Daniel Auger**, Visiting Professor of the Practice, PhD, University of Leeds

**Ali Azadani**, Associate Professor, PhD, Rensselaer Polytechnic Institute

**Michael Ian Caston**, Professor of the Practice, MS, North Carolina State

**Eric Steven Chess**, Clinical Professor, JD, New York Law School

**Chadd W. Clary**, Associate Professor, PhD, University of Kansas

**Bradley Davidson**, Associate Professor, PhD, Virginia Polytechnic Institute and State University

**Matthew Howard Gordon**, Professor, PhD, Stanford University

**Joe D. Hoffman**, Research Assistant Professor, PhD, University of Denver

**Rachel E. Horenstein**, Teaching Assistant Professor, PhD, Northeastern University

**Maciej Kumosa**, Professor, PhD, Wroclaw Univ Technology

**Corinne Lengsfeld**, Professor and Senior Vice Provost, PhD, University of California, Irvine

**Peter Laz**, Professor and Department Chair, PhD, Purdue University

**Breigh N. Roszelle**, Teaching Professor and Associate Dean, PhD, Pennsylvania State University

**Siavash Rezazadeh**, Assistant Professor, PhD, University of Alberta

**Jason A. Roney**, Teaching Professor, PhD, University of California, Davis

**Paul J. Rullkoetter**, Professor, PhD, Purdue University

**Michelle Sabick**, Professor and Dean, PhD, University of Iowa

**Yun-Bo Yi**, Professor, PhD, University of Michigan

**Marvin Hamstad**, Professor, Emeritus, PhD, University of California, Berkeley

**Paul Predecki**, Professor, Emeritus, PhD, Massachusetts Institute of Technology

**Albert Rosa**, Professor, Emeritus, PhD, University of Illinois at Urbana-Champaign

**Elizabeth Tuttle**, Professor, Emerita, PhD, University of Colorado Boulder

**James Wilson**, Professor, Emeritus, PhD, University of Minnesota

## Media, Film and Journalism Studies

Office: Media, Film and Journalism Studies Building, Room 127

Mail Code: 2490 S. Gaylord St. Denver, CO 80208

Phone: 303-871-2166

Email: mfjs@du.edu

Web Site: <http://www.du.edu/ahss/mfjs> (<http://www.du.edu/ahss/mfjs/>)

The Department of Media, Film and Journalism Studies is devoted to exploring the ways in which television, film, radio, print, web and social media connect individuals with the world and how these mediated relationships help shape the societies in which people live. The department has an innovative and creative faculty with many areas of specialization. Faculty expertise is centered in these areas of study:

- Film studies and production: narrative and documentary filmmaking; screenwriting; film and media history and criticism; social media storytelling
- Journalism studies: online journalism, politics and media, activist and community media, newswriting, design and layout, media law, policy and ethics
- Media studies: media and society; interactive and digital media; media influence; globalization and media; history and future of the media industries; social, political, economic and cultural implications of media practices and processes; reading and analysis of media texts
- Strategic communication: public relations, communication campaigns, health communication, global and multicultural communication, branding, media law, policy and ethics, advertising and audience research

The four majors all provide the theoretical grounding and leading-edge experiential learning necessary to address the complex challenges of mediated communication. We also offer a minor in Media, Film & Journalism Studies.

The department also offers internship experiences with local, regional, national and international placements. Career opportunities for graduates in media studies, film and television, journalism and strategic communication include a wide range of positions in business, nonprofit organizations, media, government and education.

## Film Studies and Production

The film studies and production major facilitates a strong grounding in the history, theory, production and criticism of film and television. Students acquire critical skills in the reading and analysis of media texts together with skills involved in various modes of motion-picture/television production. Students are encouraged to consider the consequences and ethical implications of the approaches to style and content they choose, and are asked to situate their work within the many historical contexts presented in the various production, history and criticism classes. The major teaches narrative, documentary and social media storytelling by taking students through all phases of media production including pre-production, production, post-production and distribution; establishes technical proficiency in camera use, lighting, digital editing software and sound design; and develops the ability to write script treatments, project pitches, and various media scripts as well as critical arguments about media representations and constructions.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

40 credits, including the following:

Code	Title	Credits
<b>Film Studies &amp; Production Foundational Courses</b>		<b>12</b>
12 credit hours required		
MFJS 2000	Introduction to Film Criticism	
MFJS 2150	Scriptwriting	
MFJS 3215	Introduction to Filmmaking	
Justice, Equity, Diversity, Inclusion and Internationalization - JEDII		4
Choose ONE of the following; 4 credit hours required		
MFJS 2160	Sexualities and Screens	
MFJS 2170	Globalization and Film	
MFJS 2220	Popular Music and Social Justice	
MFJS 2270	Activist Media	
MFJS 3202	Horror Films	
MFJS 3242	Reel Women	
MFJS 3652	Feminist Media Studies	
MFJS 3655	JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling	
<b>Film History Courses</b>		
Choose ONE of the following; 4 credit hours required; can take additional history courses for Specialized Courses		
MFJS 3212	History of Cinema 1930-1960	
MFJS 3214	Representational Issues in U.S. Film	
MFJS 3216	History of Contemporary Cinema 1960-Present	
<b>Capstone Experience</b>		<b>8</b>
8 credit hours required		
Majors must complete one of the following two-quarter sequences but may complete both sequences with the second sequence counting as electives.		
Narrative Film Sequence		
MFJS 3218 & MFJS 3220	Narrative Film Production I and Narrative Film Production II	
Documentary Film Sequence		
MFJS 3219 & MFJS 3221	Documentary Film Production I and Documentary Film Production II	
<b>Internship</b>		<b>4</b>
4 credit hours required		
MFJS 3980	Internship in Mass Communication <sup>2</sup>	
<b>Electives</b>		<b>12</b>
Choose THREE of the following; 12 credit hours required		
MFJS 2001	Producing Video for Social Media	
MFJS 2170	Globalization and Film	
MFJS 3202	Horror Films	
MFJS 3212	History of Cinema 1930-1960	
MFJS 3213	Producing the Music Video	
MFJS 3214	Representational Issues in U.S. Film	
MFJS 3216	History of Contemporary Cinema 1960-Present	
MFJS 3223	Advanced Editing	
MFJS 3224	Cinematography	
MFJS 3226	Directing for Film and Television	
MFJS 3227	Producing the Environmental Documentary	
MFJS 3242	Reel Women	
MFJS 3245	Producing Client Video	
MFJS 3325	Advanced Screenwriting	
MFJS 3506	Audio Documentaries	
MFJS 3900	Topics in Media Film & Journalism <sup>1</sup>	

MFJS 3991

Independent Study

**Total Credits****40**<sup>1</sup> With approval of instructor<sup>2</sup> Must have completed 12 credits in the major, including MFJS 2000 Introduction to Film Criticism and MFJS 3215 Introduction to Filmmaking; must have a 3.0 GPA.

## Journalism Studies

In this major, students immerse themselves in storytelling and multimedia production techniques that prepare them for careers in the changing media environment. Across the curriculum, students debate issues related to the challenges of representation, objectivity, bias, visual expression, monetization, surveillance, and privacy as they consider the theories, histories, and legal and ethical frameworks of media and communication. All students complete a journalism capstone as part of their major and are given many opportunities to interact and collaborate with professional journalists as they hone their skills across the spectrum of media industries.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

40 credits, including the following:

Code	Title	Credits
<b>Journalism Studies Foundational Courses</b>		<b>4</b>
Choose ONE of the following; 4 credit hours required		
MFJS 2210	Introduction to Media and Culture	
MFJS 2280	Politics and Media	
<b>Justice Equity Diversity Inclusion and Internationalization (JEDII) Courses</b>		<b>4</b>
Choose ONE of the following; 4 credit hours required		
MFJS 2160	Sexualities and Screens	
MFJS 2170	Globalization and Film	
MFJS 2205	International & Development Communication	
MFJS 2220	Popular Music and Social Justice	
MFJS 2270	Activist Media	
MFJS 3120	Media Ethics, Race & Technology	
MFJS 3652	Feminist Media Studies	
MFJS 3440	Global & Multicultural Campaigns	
MFJS 3655	JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling	
<b>Specialized Courses for the Major</b>		<b>16</b>
16 credit hours required		
MFJS 2140	Storytelling & Reporting	
MFJS 2240	Multimedia Journalism	
MFJS 3040	Media Law	
MFJS 3980	Internship in Mass Communication <sup>1</sup>	
<b>Journalism Capstone Course</b>		<b>4</b>
Choose ONE of the following; 4 credit hours required		
Majors must complete one of the following courses but may complete both with the second counting as an elective.		
MFJS 3504	Advanced Multimedia Web Storytelling & Publishing	
MFJS 3505	Advanced Multimedia Journalism with PBS Partnership	
<b>Electives</b>		<b>12</b>
Choose THREE of the following; 12 credit hours required		
MFJS 2001	Producing Video for Social Media	
MFJS 2290	Innovations in Media, Artificial Intelligence, & Communication	
MFJS 2420	#CannabisMedia: Studying the Culture of America's New Normal	
MFJS 2421	Studying Star Wars: Lessons From a Galaxy Far, Far Away	
MFJS 3170	Infographic Storytelling	

MFJS 3180	Media Studies Research
MFJS 3201	Publication & Graphic Design
MFJS 3227	Producing the Environmental Documentary
MFJS 3245	Producing Client Video
MFJS 3310	Advanced Storytelling & Reporting
MFJS 3501	Web Design & Content Development
MFJS 3504	Advanced Multimedia Web Storytelling & Publishing
MFJS 3505	Advanced Multimedia Journalism with PBS Partnership
MFJS 3506	Audio Documentaries
MFJS 3655	JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling
MFJS 3700	New Media Law & Regulation
MFJS 3900	Topics in Media Film & Journalism <sup>2</sup>
MFJS 3991	Independent Study

**Total Credits****40**

<sup>1</sup> Must have completed 12 credits in the major, including MFJS 2140 Storytelling and Reporting, and MFJS 2240 Multimedia Journalism; and must have a 3.0 GPA.

<sup>2</sup> Approved by the student's advisor.

## Media Studies

This major is designed for students who want to gain a broad knowledge of media industries and of media studies grounded in history, foundations, globalization and media theory. It is also intended to take advantage of the particular skills and resources of the faculty in the Department of Media, Film and Journalism Studies. Contemporary communications media—including traditional mass media as well as interactive and digital media—are integral to political, economic and cultural life today. The major emphasizes course work that examines the role and influence of media in society from various perspectives.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

40 credits, including the following:

MFJS 3655	JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling	
MFJS 3700	New Media Law & Regulation	
MFJS 3900	Topics in Media Film & Journalism	
MFJS 3980	Internship in Mass Communication <sup>1</sup>	
MFJS 3991	Independent Study	
<b>Total Credits</b>		<b>40</b>

<sup>1</sup> Prereq: Students must complete 12 credits in the major, including two of the Foundational courses (MFJS 2000, 2200, 2210, 2280); must also have a 3.0 GPA.

## Strategic Communication

The strategic communication major emphasizes communication theory and practice, grounded in history and strategic planning. This major introduces students to the concepts, skills and issues associated with different types of public information campaigns and other forms of strategic messaging. Students benefit from the varied expertise of our faculty in nonprofit, international, intercultural, health, corporate, crisis and political messaging as they learn what it means to be a strategic, ethical and culturally sensitive communicator in the fields of public relations, advertising and health communication.

Total Credits: 94

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**MFJS 2000 Introduction to Film Criticism (4 Credits)**

Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2001 Producing Video for Social Media (4 Credits)**

This course covers the basics in video production and video storytelling for all undergraduate students at the University of Denver who are interested in YouTube and other social media video content creation. Students will maximize their video storytelling abilities, producing storytelling content that can be shared across multiple social media platforms using mobile phones or equivalent basic consumer equipment. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills requirements within several MFJS majors and the MFJS minor and serves as a university elective.

**MFJS 2140 Storytelling & Reporting (4 Credits)**

Fundamentals of newswriting and reporting for print and broadcast journalism. Laboratory fee required.

**MFJS 2150 Scriptwriting (4 Credits)**

Examines the creative process for writing the motion picture screenplay. Topics include format and structure; character and dialogue; rising conflict and confrontation; visualization and imagery; and understanding the conventions of the medium and its limitations. Students will complete a short screenplay by the conclusion of the course. Prerequisite: MFJS 2000. Cross listed with MFJS 4450. 4 qtr. Hrs.

**MFJS 2160 Sexualities and Screens (4 Credits)**

This course offers a critical introduction to the ways that sexual identities and practices are rendered (in)visible within screen-based, digital media culture: television, film, online spaces and platforms, and video games. As a socially contested, disruptive, and liberatory element of social life, sexuality's mediation offers a lens for us to think about cultural norms, ideologies, and politics, as well as issues related to the commodification of bodies. Throughout the quarter, you will immerse yourself in diverse perspectives, reflective writing exercises, textual analysis, small group discussions, and other active learning measures that will deepen your critical thinking around the intersection of media culture and sexuality. Issues such as sexualization, intimacy coordinators, the mediation of consent, queer digital activism, and the politics of casting will be explored through the lens of Media Studies, Cultural Studies and Intersectional Feminism.

**MFJS 2170 Globalization and Film (4 Credits)**

MFJS 2170 (Globalization and Film) explores the varying ways that globalization impacts cinema on a national and transnational level. This course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what "globalization" means and how it influences films, both behind-the-scenes and onscreen. In addition to several in-class screenings, you will be required to view a few films on your own. Finally, you will have the opportunity to research and write original scholarship on one of two angles to engage further and apply course material: 1) the impact of globalization on the film industry of your choice, or 2) the impact of globalization on representational issues in the film of your choice.

**MFJS 2200 Emergent Digital Practices and Cultures (4 Credits)**

This course introduces students to the historical, economic, legal and social contexts of emergent digital practices and explores the various ways technology shapes and is shaped by culture. The rapid growth of participatory culture online through, for example, social networking sites, interactive news sites, gaming, mobile apps, and blogging has significant social implications and brings up issues of privacy, intellectual property, and the nature of community and public engagement. This class will explore these issues through various theoretical lens and concrete cases including politics, youth culture, activism, news and art. Particular emphasis will be placed on the question of how new media differs from mass media across various fields of cultural production (music, news, advertising, for example) and on what influence new digital products and practices might have on these industries and on cultures and societies more generally. This course counts towards the Analytical Inquiry: Society and Culture requirement. Cross-listed with EDPX 2200.

**MFJS 2205 International & Development Communication (4 Credits)**

Virtually everywhere we look, whether we are watching a speech by President Donald Trump, or responding to one of his Tweets on Twitter, whether we are streaming music on Spotify, an international music distribution service started in Sweden, or trying to find a toy for someone made anywhere but China, there is much evidence that we are living in an increasingly inter-connected and "globalizing" world. What does this mean for us as individuals? As Coloradans? As Americans? What does an increasingly inter-connected and globalized world mean for "them" – meaning other individuals, in, and outside of the U.S.? For Bavarians (in Germany)? For Germans, or for the Japanese, or for Australians, etc.? More broadly, what does this mean for global humanity? Are we moving toward forming a so-called "transnational" social order and a "global" culture? And, if so, what and/or who is (and is not) driving this process? Why? How? And what are the potential implications of intensifying processes of global interaction, interconnection, and cultural production, distribution and consumption? These are some of the broader questions we will be addressing in this class, with a special eye toward the ways in which media, culture, and communication might be understood as fitting into the larger network of questions that swirl around "globalization." Overall, the primary aim of this course will be a simple but important one: To inspire all of us to knowledgeably and critically reflect on how we are both affecting, and being affected by, processes of globalization, especially as these relate to media, communication and culture.

**MFJS 2210 Introduction to Media and Culture (4 Credits)**

Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2220 Popular Music and Social Justice (4 Credits)**

What makes popular music a powerful medium for us to “fight the power” and motivate social change, and what hinders it from achieving its full potential? This course examines a range of 20th and 21st century popular music (blues, folk, rock, hip-hop, musicals, etc.) to better understand the complex relationships between music and social (in)justices. You will also research to understand the great mind of a musician you admire and apply your learning by picking up the powerful tool of “sampling” for a final creative project of your choosing – a song, a cover, lyrics, or spoken word – to put out a message that exemplifies the powerful potential of popular music as a tool for advancing social justice.

**MFJS 2240 Multimedia Journalism (4 Credits)**

With the abundance of competing voices online, seeking accurate information has become a major challenge in today’s world. Information now comes in different shades, including incorrect statements, fakes news, rumors, doctored audio, and deepfake videos. They float together in traditional media outlets as well as on social media and they can play a destructive role in creating fear, tarnishing reputations, undermining social cohesion, influencing elections, and, at times, fueling killings. To overcome those challenges, the world needs credible, balanced, and technology savvy journalists as well as critical media consumers more than ever before. MFJS 2240 is a project-based, collaborative, hands-on class that engages with the new media challenges to the field of journalism. The readings, multimedia projects, and class activities aim to empower students to grasp the basic principles, key terms, media production skills, and the organizing structures of digital journalism. Prerequisite: MFJS 2140.

**MFJS 2260 Music, Race, and Ethnicity in Latin America (4 Credits)**

In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and “blackness” will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America.

**MFJS 2270 Activist Media (4 Credits)**

In the mediated digital era, communication is changing fast and shifting the dynamics of real-world power, expanding spaces for journalism and activist communication aimed at working for social change and social justice. This dynamic space has enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for activism and social change. Media has played a key role in social and political movements of the past and more recent online movements ranging from climate change, the #MeToo and women’s/feminist movement, the March for our Lives following the Stoneman Douglas High School Shooting in Parkland, Black Lives Matter, immigrant rights and others. Social media platforms such as Twitter, Facebook, Instagram and Snapchat have provided new tools to resist the domination and limitations of mainstream corporate media and create new media strategies and messages to promote social change. But these platforms have also created new risks and challenges for activists. In this course, we will address these issues of communication power dynamics and also media strategies and tools of social and political movements working towards social change.

**MFJS 2280 Politics and Media (4 Credits)**

We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2290 Innovations in Media, Artificial Intelligence, & Communication (4 Credits)**

This course considers information and communication technologies in relation to “the new,” exploring the ways that technological, historical, legal, economic, and social contexts combine to enable the changes that we think of as innovations in media and communication. Taking a critical/cultural historical perspective, we explore questions such as where technologies come from, who controls them, who profits from them, how they are used, and with what potential implications? We also consider how today’s artificial intelligence technologies are similar to and different from the new technologies of previous ages, how bias and misinformation are (re)produced, and countermovements such as “slow” technology, with an eye toward imagining what the future might hold. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2400 Strategic Communication Planning (4 Credits)**

This course introduces students to various career paths and foundational principles in strategic communication, including public relations and advertising. Students learn and apply the elements of a comprehensive strategic communication plan, including conducting research, setting communication goals, designing messaging strategies and tactics, and evaluating the plan’s effectiveness. An emphasis on ethical communication practices is central to the course. Prerequisite: sophomore standing.

**MFJS 2420 #CannabisMedia: Studying the Culture of America's New Normal (4 Credits)**

This course will examine the legalization of marijuana – both medical and recreational – as it is being covered in Colorado and in states across the country. Ever since the 2012 legalization of recreational marijuana, Colorado has been a leader in considering the medical, political, social and legal issues emergent with legalization. In this course, which is the first of its kind in the U.S., not only will we be investigating the scope of the marijuana legalization movement and its many political and practical intricacies, we also will be conducting a research project with original data and multimedia elements conceived and designed to push and promote enterprising storytelling. Students will visit dispensaries, interview industry professionals and produce a portfolio piece of narrative journalism using the modes and methods of their choice, with direction of the instructor.

**MFJS 2421 Studying Star Wars: Lessons From a Galaxy Far, Far Away (4 Credits)**

We are at a time that seems to be "peak Star Wars," some 40 years after the movie was first released to the moviegoing public. After a period of dormancy, resurgence and now primacy, the three-part trilogy of the Star Wars saga enters into its fifth decade with new films, new popularity and deeper integration into popular culture with the acquisition by Disney. In the class we'll analyze the historical foundations of the original film and its storytelling devices, and along the way discuss marketing, mythology and the critical takes on the movie's role in the canon of filmmaking. Expect to learn about sound design, movie scoring, special effects and the many twists and turns of the universe set in a galaxy far, far away. You will pick one aspect of the Star Wars universe to dissect in WordPress.com thinkpiece, and you will be required to participate in daily class discussions, in person and on Twitter.

**MFJS 3040 Media Law (4 Credits)**

Introduction to freedom of expression and media law. Students learn how the American legal system works and gain an understanding and appreciation of the philosophical foundations of free expression. In addition, students confront many of the issues facing professional communicators today. Topics include incitement, hate speech, student speech, copyright, defamation, and other issues crucial to mass media professionals. The course examines also explores challenges to free expression brought by new(er) communication technologies. The purpose of this class is to give students the knowledge and critical thinking skills needed to be successful in today's rapidly changing communication environment. Cross-listed with MFJS 4300.

**MFJS 3110 Audience and Communication Research (4 Credits)**

This class offers an introduction to social science methods applied to communication and audience research. By the end of the course, students will be familiar with: the role and functions of communication and audience research in contemporary society; the processes and practices involved in developing and executing a research project; the basic different forms of research, both qualitative, such as interviews and focus groups and quantitative, such as surveys and experiments; how to use research skills for different career paths. Cross-listed with MFJS 3110/4560.

**MFJS 3120 Media Ethics, Race & Technology (4 Credits)**

What are your ethical obligations as a professional communicator? In this course, you will become acquainted with the ethical codes of the Society of Professional Journalists, the Public Relations Society of America, the Radio, TV, and Digital News Association, and more. As you meet with and hear from media professionals from a range of industries, you will discuss different case studies of ethical dilemmas that take place at the individual, organizational, corporate, and technological levels. You will consider issues of privacy and harm, diversity and inclusion, deception, mis- and disinformation, photograph and image construction and editing, accountability, and more. Senior standing or instructor's permission required.

**MFJS 3170 Infographic Storytelling (4 Credits)**

We swim in a world of data - from election results, budgets and census reports, to Facebook updates and image uploads. Journalists need to know how to find stories in data and shape them in compelling ways. This hands-on course teaches reporters and editors to gather, analyze, and visualize interactive data-driven stories. This emerging discipline touches on information and interactivity design, mapping, graphing, animation tools, and data analysis. You are expected to think like a journalist by evaluating data critically and applying what you learn to news stories, information graphics or web applications. Familiarity with HTML/CSS is helpful, but not required. This is not a course in coding, but programmers of all skill levels are welcome.

**MFJS 3180 Media Studies Research (4 Credits)**

This capstone course offers an introduction to research methods within the interdisciplinary tradition of Media Studies. Your data collection and written contributions during the quarter will serve as the informational foundation for our department's additional capstones in Journalism, Strategic Communication and Film Studies & Production, so think of our work this quarter as a community and departmental effort. While this course begins with an exploration of the field/Media Studies and review of the importance of knowledge production, this course focuses mainly on the practice of research; during the quarter, you will have the opportunity to experiment with interviewing, textual analysis, ethnography, and historical research. For your final project, you will work in teams to generate original research, will engage in peer reviews, and will present your findings to your classmates in a conference-style panel session. Junior standing required.

**MFJS 3201 Publication & Graphic Design (4 Credits)**

This course explores publication design and techniques for creating effective layouts. We employ the scope of the Adobe Creative Suite, primarily InDesign, to incorporate and manipulate text, photographs and illustrations. The course serves as a visual elective for all MFJS students. Laboratory fee required. Prerequisites: MFJS 2140 or MFJS 2400 or instructor approval.

**MFJS 3202 Horror Films (4 Credits)**

Horror films serve as tales of morality and, as such, their themes tend to fluctuate in accordance with cultural zeitgeists. They offer commentary on socio-cultural, political aspects, and they also have an ongoing market. Since they are inexpensive to make but have the potential to bring in profit, horror films are popular among producers. Due to their construction of fear aspect, they tend to create a lot of intrigue and dedicated fan bases. From their production to their ideological messaging to their reception, horror films offer spaces rich for cultural understanding and critical dialogue. In fact, it is these aspects that make horror films a wonderful jumping off point for discussion—students tend to love them and they are usually very accessible. With this in mind, this course will use the platform of horror films to discuss cultural differences, including anxieties and fears, the impact of globalization on horror films, the implication of franchises on horror cinema, and the representation of intersecting identity markers (both on and off-screen). Prerequisite: MFJS 2000.

**MFJS 3207 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)**

The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural conceptions of health and disease and how those conceptions are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered health care that takes intersectionality and identity into consideration.

**MFJS 3208 Narrative and Longform Journalism (4 Credits)**

Students spend time learning the nature and functions of in-depth news reporting for online and print, with a focus on magazine-style feature article writing and editing. Laboratory fee required. Prerequisite: MFJS 2140.

**MFJS 3212 History of Cinema 1930-1960 (4 Credits)**

This course surveys international film history starting with the "talkies" through innovations in widescreen formats and post-war filmmaking. We will study cinema between the 1930s-1960s from a variety of perspectives: as a technological apparatus, an economic institution, an aesthetic form, and a social force. Lab fee required. Prerequisite: MFJS 2000 Introduction to Film Criticism.

**MFJS 3213 Producing the Music Video (4 Credits)**

This course is designed to provide you with a basic understanding of the music video production process. We will work with partners in the Lamont School of Music and Theater to deliver 3 high quality music videos to local DU bands by the end of the quarter. These videos will be conceived, shot, and edited in class. Guest speakers from the industry will offer guidance and critique. Your knowledge of cinematography, editing, and set design will expand in this class. The 3 bands will be our clients; we will deliver them videos of the highest quality.

**MFJS 3214 Representational Issues in U.S. Film (4 Credits)**

This course explores the varying ways that race and ethnicity, gender, sexual orientation, gender identity, socioeconomic status, physical and mental (dis)ability, and age are represented in and by film—both historically and culturally. In addition to class discussions regarding mainstream and independent film production, students will employ close readings of filmic texts to better understand how off-screen factors greatly impact what is seen onscreen. This course will encourage students to think critically about the filmic images that they are consuming on a regular basis, as means to interrogate what is at stake when it comes to representational issues such as dominant ideologies, visual style, and assigned character roles. Finally, students will engage the texts critically as a way to understand how these onscreen identities impact the way that individuals treat others but also how they are treated themselves. Prerequisite: MFJS 2000.

**MFJS 3215 Introduction to Filmmaking (4 Credits)**

This course is designed to provide students with a basic understanding of television and film production with a focus on the complete production process: pre-production (planning), production (lighting, shooting and sound gathering) and post-production (editing). At the completion of this course, students will have a basic understanding of the process involved in producing a field-based production, the skills necessary to complete it and, most importantly, the critical understanding behind all decisions. Because people are the most important part of any production, emphasis will be placed on students' ability to work effectively with production team members. Laboratory fee required. Prerequisite: MFJS 2000. Restricted to FILM and MDST majors.

**MFJS 3218 Narrative Film Production I (4 Credits)**

This is the first of a two-quarter capstone class that fulfills a two-quarter capstone requirement for Film Studies and Production majors and can be taken by others who have completed the pre-requisites and are juniors or seniors. Majors can take both two-sequence Narrative and Documentary capstones, counting one set for the major and one as electives if they so choose. The narrative course is both process and product oriented with a goal for students to work collaboratively to develop a 7-10 minute original narrative film script or web series (2-3 episodes that run approximately 10 minutes total) and complete all of the pre-production tasks necessary to take it into production spring quarter. Depending on class size we will make 3-5 films. We will examine the scriptwriting revision and pre-production processes, and students will finish the quarter with a completed pre-production notebook that will include, among other things, a shooting script, overheads, a script breakdown, production schedules, casting decisions, location scouting reports, a look book, a pitch deck and a shooting schedule. Likewise, through readings, discussions and screenings, the course is designed to expose students to the larger world of narrative filmmaking. During the second quarter students will film, edit and present finished work. Prerequisites: MFJS 2000 and MFJS 3215 and Junior/Senior standing.

**MFJS 3219 Documentary Film Production I (4 Credits)**

This course is the first half of a two-course capstone sequence. It presents an integrated (theory and practice) approach to film and video documentary. The theoretical component presents a historical overview of the various styles and modes of documentary with a discussion of the way each has developed in response to perceived limitations of the mode then dominant and the ethical decisions that filmmakers continue to face. The production component focuses on selecting and researching a topic for documentary production during the second quarter of the capstone. Prerequisites: MFJS 2000 and MFJS 3215 and Junior/Senior standing.

**MFJS 3220 Narrative Film Production II (4 Credits)**

This is the second of a two-quarter capstone class that fulfills a two-quarter capstone requirement for Film Studies and Production majors and can be taken by others who have completed the pre-requisites and have junior or senior standing. Students must have taken MFJS 3218 in the previous quarter to register for this class. Majors can take both Narrative and Documentary capstones, counting one for the major and one as electives if they so choose. Students will collaborate with their teams in the production and post-production phases of a short narrative project. This includes filming, editing, sound design, scoring, color correction and mastering. In-class critique sessions and guest speakers bolster this experiential quarter. Prerequisites: MFJS 3218 and Junior/Senior standing.

**MFJS 3221 Documentary Film Production II (4 Credits)**

This is the second of a two-quarter capstone class that fulfills a two-quarter capstone requirement for Film Studies and Production majors and can be taken by students who have completed the pre-requisites and have junior or senior standing. Students must have taken MFJS 3219 in the previous quarter to register for this class. Majors can take both Documentary and Narrative capstones, counting one for the major and one as electives if they so choose. Students will collaborate with their teams in the production and post-production phases of a documentary project. This includes filming, editing, sound design, scoring, color correction and mastering. In-class critique sessions and guest speakers bolster this experiential quarter. Prerequisites: MFJS 2000, MFJS 3215 and MFJS 3219 and Junior/Senior Standing.

**MFJS 3222 Experimental Film/Video Theory & Production (4 Credits)**

This class includes a historical and critical overview of experimental film and video movements as well as technical and aesthetic training in experimental production. Students integrate theory and criticism into the production of several experimental projects. Laboratory fee required. Cross listed with MFJS 4222. Prerequisite: MFJS 3215.

**MFJS 3223 Advanced Editing (4 Credits)**

Building on the basic non-linear editing skills gained in Introduction to Filmmaking, this course focuses on advanced techniques of image and color manipulation, movement and graphic effects, advanced sound sweetening and manipulation and advanced text/credit effects. Prerequisite: MFJS 2000: Introduction to Film Criticism and MFJS 3215: Introduction to Filmmaking.

**MFJS 3224 Cinematography (4 Credits)**

This course focuses on the visual aspects of telling a cinematic story. Students develop an understanding of advanced lighting concepts, lenses, grip equipment, and color science. The class emphasizes visual storytelling, using lighting, art design and camera movement to develop character and theme. Lab fee required. Prerequisite: MFJS 2000 and MFJS 3215.

**MFJS 3226 Directing for Film and Television (4 Credits)**

This course will focus on the art and craft of film/television directing, emphasizing the relationship the director cultivates with actors, developing an understanding of movement and creating a vision for a scene. Students will apply theory to actual scene work with actors. Prerequisites: MFJS 2000 and MFJS 3215.

**MFJS 3227 Producing the Environmental Documentary (4 Credits)**

This course is designed to provide you with a basic understanding of cinematography: cameras, lenses, grip equipment, lighting, and composition. When you complete this course, the goal is for you to have an intermediate understanding of cinematography and that which motivates lighting and composition choices. Because people are the most important part of any production, emphasis will be placed on your ability to work effectively with class members. Learning to collaborate is crucial to your success in this class.

**MFJS 3229 Video Editing is for Everybody (4 Credits)**

The goal for this course is for students to have a basic working knowledge of editing using various media elements (video, audio, photos, music, graphics), developing proficiencies using different editing software, and applying a mixture of editing theories and techniques. This is a summer course only.

**MFJS 3242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives across the world.

**MFJS 3245 Producing Client Video (4 Credits)**

This course provides students with an experiential learning opportunity in film and video production as part of the MFJS Keystone Experience series. Students work with a community or not-for-profit organization, learning how to work with clients and fulfill client video/film needs as part of a broader communication plan. Students in this course utilize research and communication strategy work that has been developed by students working with the same client in previous quarters. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills requirements within several MFJS majors and the MFJS minor. Prerequisites: MFJS 2000 AND MFJS 3215. 4 credit hours.

**MFJS 3310 Advanced Storytelling & Reporting (4 Credits)**

This is a writing-intensive course designed to strengthen your abilities in the gathering and analysis of public documents and big data, the conduct of interviews with a range of stakeholders, and the use of observational techniques that provide a basis for in-depth investigative reporting. Laboratory fee required. Prerequisite: MFJS 2140 or MFJS 3410.

**MFJS 3325 Advanced Screenwriting (4 Credits)**

Advanced Screenwriting takes writers through the process to create creative fiction content for film and television. This may include writing television pilots, web series and other fiction media material. The course will include live table reads, peer-to-peer feedback and industry speakers. In addition to creating original content, students will be taught how to create their writer's portfolio, market themselves to industry decision makers and land writing jobs. Prerequisites: MFJS 2000 and MFJS 2150.

**MFJS 3410 Strategic Messaging (4 Credits)**

This course focuses on learning and applying strategic communication principles to the creation of strategic messages for a client. Students also evaluate strategic communication techniques as they learn how to target a specific audience and learn how strategic messages fit within an overall strategic communication plan. Prerequisite: MFJS 2400.

**MFJS 3420 Strategic Communication Seminar (4 Credits)**

This is the capstone course in the strategic communication sequence. In this course, students examine special topics in strategic communication and apply what they have learned to group projects in which they take on a client and work together as a team on a strategic communication campaign. Cross listed with MFJS 4070. Prerequisites: MFJS 2400 and MFJS 3410.

**MFJS 3440 Global & Multicultural Campaigns (4 Credits)**

Globalization is having a major impact on the communications field, including strategic communication and public relations. As a growing number of organizations, businesses and governments seek to communicate and interact with organizations and individuals from diverse cultures and countries, they depend upon public relations professionals with international and cross-cultural expertise to help them achieve their goals and objectives. Likewise, more organizations and businesses are recognizing the importance and value of cultural diversity and inclusion within their organizations as well as among their clientele and need assistance from public relations professionals to communicate effectively and build healthy relationships around this diversity. This course will explore several aspects of global and cross-cultural public relations campaigns, using a combination of readings, lectures, discussions, and presentations from guest speakers with experience in this rapidly expanding field. Prerequisite: MFJS 2400 or Permission of Instructor.

**MFJS 3501 Web Design & Content Development (4 Credits)**

This course covers the building and management of web pages and the creation of sites using open source content management systems. You will develop the ability to plan, create and integrate social media and third-party content into web sites, and utilize analytical tools that measure audience engagement. Laboratory fee required. Prerequisite: MFJS 2140 or MFJS 2400.

**MFJS 3503 Social Media Strategies (4 Credits)**

In this class, students get familiar with the principles of social media strategy and learn how to design messaging strategies and tactics for social media. In addition, students work with a real client on a strategic communication campaign for social media. Prerequisite: MFJS 2400 or MFJS 2140.

**MFJS 3504 Advanced Multimedia Web Storytelling & Publishing (4 Credits)**

This course is one of two possible capstone classes for journalism students. In this course, students tap the reporting, writing, editing, and multimedia production and editing skills and knowledge learned and practiced in previous journalism studies classes and apply them to building from scratch, an open content management based multimedia web site. Laboratory fee required. Prerequisites: MFJS 2140 and MFJS 2240, or instructor approval.

**MFJS 3505 Advanced Multimedia Journalism with PBS Partnership (4 Credits)**

This capstone course for journalism majors provides students with opportunities in experiential learning as together they bolster the coverage and amplify the voices of underserved communities in Colorado. Rural, BIPOC, LGBTQ+, people with disabilities, and religious minority communities, among others, will be the subject of our attention and the focus of the class media projects. Students produce several mini-documentaries and written pieces that will be submitted for consideration to, and may air on, the RMPBS program, Colorado Voices, and on the PBS Video app. Prerequisite: MFJS 2140 and MFJS 2240.

**MFJS 3506 Audio Documentaries (4 Credits)**

In the past decade, an explosion in the production and accessibility of audio documentary work has created an unprecedented interest and expansion of the documentary form in nearly all sectors of public life. Building on this trend, this course teaches the skills of ethnographically informed audio documentary work that can record and interpret culture and lived experience. We focus on learning the techniques of non-fiction storytelling used in established public radio programs like This American Life, Radio Lab, or Snap Judgement, as well as newer podcasts like Reply All, Invisibilia, or Embedded. The course will prepare students to tell complex stories using strong character-driven narrative. Sound documentation and representation will not be done along journalistic principles, but instead through rigorous ethnography that relies on participant-observation and immersion. Through practical application and the exploration of ethnography and documentary approaches to communication, the course explores questions that surround the interpretation and representation of socio-cultural experience via a sonic medium. To understand the basic mechanics of sound and its narrative form, participants will learn to digitally record and edit audio. Storytelling will then become more complex as students learn to conduct ethnography, interviews, and develop a script for radio. Students will ultimately analyze and create audio documentaries in an effort to understand a significant form of digital storytelling. There are three central learning objectives that will guide us through the course: (1) we will practice ethnographic and documentary methodology, (2) learn to write for radio, and (3) learn the workflow of audio editing to produce an audio documentary.

**MFJS 3652 Feminist Media Studies (4 Credits)**

MFJS 3652 (Feminist Media Studies) explores the gendered intersections between media and society through the analytical lens of Feminist Media Studies (FMS). While aligned with the discipline Media Studies, FMS centers questions related to power and patriarchy, and aims to create space for praxis. Paying close attention to issues of intersectionality, this course surveys the historical emergence, and contributions, of feminist methodology and inquiry related to issues such as sexism within gaming, the politics of visibility in television production, the celluloid ceiling, and networked bodies. During the quarter, you will engage in multiple points of active and reflective learning that provide the space to strengthen both your understanding and application of FMS. Assignments include discussion questions, self-reflective analysis, and a final project that highlights application, creativity, and subversion.

**MFJS 3655 JEDI (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling (4 Credits)**

This course focuses on multicultural approaches to journalism and media, including representations and news coverage related to gender, race/ethnicity, class, and sexuality, disabilities, religion, and nationality, etc.. The class explores culture and intercultural communication and ways to apply these to journalistic writing as a creative process and craft. Prerequisite: MFJS 2140: News Writing & Reporting or MFJS 3410: Strategic Messaging. Cross-listed with MFJS 4655.

**MFJS 3656 Cross-cultural Travel Seminar: Immigration, Communication & Border Cultures (4 Credits)**

This is a one-week intensive travel course that takes place in Tucson, Arizona and south to the US-Mexican border region. The focus of this experiential learning class is to study immigration issues, border cultures, and the role of communication and media through testimonies of immigrants, and visits to key sites such as the migrant trail, immigration detention center and courts. Also included are talks by activists and officials involved in the immigration debate. Class meets for two pre-class sessions in spring quarter. Requires junior standing. Cross-listed with MFJS 4656.

**MFJS 3700 New Media Law & Regulation (4 Credits)**

An examination of recent developments in internet and social media law and regulation.

**MFJS 3852 Advanced Design, Layout, and Editing (4 Credits)**

This course teaches students advanced layout and design for media publications using contemporary software applications for journalists and public relations professionals. Prerequisite: MFJS 3201.

**MFJS 3900 Topics in Media Film & Journalism (1-4 Credits)****MFJS 3980 Internship in Mass Communication (1-4 Credits)****MFJS 3991 Independent Study (1-10 Credits)****MFJS 3995 Independent Research (1-10 Credits)****Faculty**

## Middle East Studies Program

Office: Sturm Hall, Room 186A

Mail Code: 2000 East Asbury Avenue Denver, CO 80210

Phone: 303-871-7464

Email: Maha.Foster@du.edu

Web Site: <https://liberalarts.du.edu/academics-admissions/programs-ug/minor-middle-east-studies> (<https://liberalarts.du.edu/academics-admissions/programs-ug/minor-middle-east-studies/>)

This interdisciplinary minor offers students in any major the opportunity to demonstrate competency in the study of the Middle East.

The Middle East Studies minor provides students with an in-depth and substantive exposure to the politics, society, and religions of the Middle East through a variety of humanities and social sciences approaches, and through study of at least one major regional language. The minor helps DU undergraduates pursuing any major to develop deeper and more nuanced understandings of the Middle East, which they can use for careers in government, non-governmental organizations, business, and education.

This minor offers: 1) a range of courses taught by recognized experts in their fields 2) an inter-disciplinary approach which gives students a three-dimensional view of the region 3) language training and proficiency that prepares students for a global future.

This interdisciplinary undergraduate minor provides students with an in-depth and substantive exposure to the politics, society, and religions of the Middle East through a variety of humanities and social sciences approaches, and through study of at least one major regional language. The minor aims to strengthen DU undergraduates' knowledge of the Middle East, whatever their major, and to enhance their career opportunities.

## Minor Requirements

20 credits including the following:

Code	Title	Credits
<b>Language Sequence <sup>1</sup></b>		<b>8</b>
ARAB 2002 & ARAB 2100	Intermediate Arabic and Conversation & Composition	
or		
HEBR 2002 & HEBR 2003	Intermediate Hebrew and Intermediate Hebrew <sup>2</sup>	
<b>Three content courses: <sup>3</sup></b>		<b>12</b>
Content course listing (may change depending on instructor availability; not all courses offered every year; please check with major advisor if you find a course not listed here that should count toward the minor)		
ARTH 3300	Seminar in Art History (Content course listing (exact courses may change depending on instructor interest/availability; not all courses offered every year))	
ARTH 3880	Mosques and Aniconism: Islamic Art and Architecture 650-1250	
ARTH 3881	Dragons and Sultans: Islamic Art and Architecture 1250-1600	
ENGL 2742	Modern Hebrew Literature in Translation: Against All Odds	
ENGL 3405	Postmodern Visions of Israel	
HEBR 2745	Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life	
HEBR 3010	Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion	
HIST 1600	Jews in the Islamic World, 632 C.E. - 1948 C.E.	
HIST 3620	United States Involvement in the Persian Gulf, 1933-Present	
HIST 2030	Ancient Near East	
RLGS 2111	Islam and United States Politics	
RLGS 3505	Gender and Politics in Muslim Pop Cultures	
JUST 2370	Multicultural Israel: Food, Film and Beyond	
JUST 2380	Multicultural Israel through Popular Music	
JUST 2745	Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life	
INTS 2430	History of the Middle East	
INTS 3020	Introduction to Middle East and Islamic Politics	
JUST 2350	Israeli Culture Through Film: Society, Ethnicity, and Inter-Cultural Discourse	
JUST 2360	Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life	

RLGS 3086

The Emergence of Monotheism

**Total Credits****20**

- <sup>1</sup> Students who demonstrate proficiency in Arabic or Hebrew to the 2100/2003 level will have the language course requirements waived, and instead will take five content courses.
- <sup>2</sup> Students pursuing this minor and the Judaic Studies minor *must* choose the JUST minor *without* the Hebrew emphasis, if they are using Hebrew for both minors. The second-year Hebrew requirement cannot be double-counted for the Middle Eastern Studies minor and the Judaic Studies minor with Hebrew emphasis
- <sup>3</sup> Students must take content courses in at least two departments/schools. (e.g., they cannot take all three courses from HIST.) Students can transfer up to 10 credit hours from appropriate study abroad courses into the minor. No more than 4 credit hours may be taken at the 1000 level.

## Music

Office: Newman Performing Arts Center

Mail Code: 2344 E. Iliff Ave. Denver, CO 80208

Phone: 303-871-6400

Web Site: <http://www.du.edu/lamont> (<http://www.du.edu/lamont/>)

With its wide array of degrees and certificates, outstanding faculty, and superior facilities, the Lamont School of Music is one of the most distinguished music programs in the United States.

The Lamont School of Music offers bachelor of music programs with majors in composition, jazz studies and commercial music, performance, and recording and production; a bachelor of arts in music; undergraduate minors in ethnomusicology and music; and a certificate in Suzuki cello or violin pedagogy.

The faculty is composed of professors and instructors who actively perform, compose, publish, and lecture worldwide. The Lamont School of Music is located in the Robert and Judi Newman Center for the Performing Arts, a 186,000-square-foot state-of-the-art facility opened in 2002 and officially inaugurated in 2003. The Newman Center includes an academic building, a 225-seat recital hall, a 1,000-seat concert/opera hall, and a 250-seat flexible theater. The academic building is replete with teaching studios, practice rooms (some of which are digitally enhanced as “virtual” acoustic practice rooms), large rehearsal spaces, a music library, a digital keyboard laboratory, two recording studios, an electronic music lab, classrooms with smart-to-the-seat technology, and an 80-seat recital salon.

## Music

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

70 credits, including the following:

Code	Title	Credits
MUAC 1001 & MUAC 1002 & MUAC 1003	Music Theory I and Music Theory I and Music Theory I	6
MUAC 1020 & MUAC 1021 & MUAC 1022	Aural Skills I and Aural Skills I and Aural Skills I	6
MUAC 2004 & MUAC 2005	Music Theory II and Music Theory II	4
MUAC 2020 & MUAC 2021	Aural Skills II and Aural Skills II	4
Following the completion of MUAC 2005 Music Theory II and MUAC 2021 Aural Skills II, students will complete 4 credits of music theory or aural skills electives (listed below). A list of course offerings also will be posted on My.DU > Lamont School of Music > Undergraduate Advising Resources each year.		4
MUAC 3002	Form and Analysis	
MUAC 3006	Post-Tonal Theory: Mode/Rhythm	
MUAC 3007	Post Tonal Theory and Analysis: Set Theory and Serialism	
MUAC 3008	Modal Counterpoint, Renaissance Vocal Style	
MUAC 3009	Pedagogy of Music Theory	
MUAC 3014	Music-Theoretical Approaches to Popular Music	

MUAC 3023	Rhythm & Meter in Music	
MUAC 3024	Introduction to Tonal Analysis	
MUAC 3025	Topics in Analysis: Brahms	
MUAC 3026	Sonata Form: Performance, Analysis, and History	
MUAC 3027	Arranging for the Classical Musician	
MUAC 3089	Model Composition	
MUAC 3121	Seminar in Music Theory (requires instructor approval)	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3578	Advanced Composition	
MUAC 3801	Introduction to Schenkerian Analysis (requires instructor approval)	
MUAC 3860	Basic Jazz Improvisation	
MUAC 3910	Orchestration	
OR		
MUAC 1013 & MUAC 1014 & MUAC 1015	Jazz Theory and Aural Skills and Jazz Theory and Aural Skills and Jazz Theory and Aural Skills	
MUAC 3870 & 3870 & 3870	Jazz Improvisation & Composition and Jazz Improvisation & Composition and Jazz Improvisation & Composition	
MUAC 1211 or MUAC 3212	Music Technology Digital Music Creation	4
MUAC 2051	Musicology: Foundations of Musicology	3
Select five additional 2000-level Musicology courses from the following:		15
MUAC 2052	Musicology: Medieval And Renaissance Music	
MUAC 2053	Musicology: Baroque Music	
MUAC 2054	Musicology: Classical Music	
MUAC 2055	Musicology: Romantic Music	
MUAC 2056	Musicology: Modern Music	
MUAC 2057	Musicology: Introduction to World Musics	
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	
MUAC 2059	Jazz and Commercial Music History and Repertoire II (1955-Present)	
MUPR (2000-level)	Applied lessons on major instrument with assigned instructor (Two credits per quarter)	12
MUEN (3000-level)	Ensembles as assigned (Must audition for and participate in one ensemble per quarter as assigned, six quarters of which must be an appropriate major ensemble. See Lamont Student Handbook for details.)	12
<b>Total Credits</b>		<b>70</b>

In addition, students must fulfill requirements for piano proficiency, music beyond the primary culture of specialization, convocation attendance, and culminating project. Piano proficiency must be completed by the end of sophomore year. Please see the Lamont Student Handbook for details regarding all non-course requirements.

## Secondary Major Requirements

70 credits. Same requirements as for BA degree.

## Composition

### Bachelor of Music Major Requirements

(194 credits required for the degree (p. 86))

132 credits, including the following:

Code	Title	Credits
MUAC 1001 & MUAC 1002 & MUAC 1003	Music Theory I and Music Theory I and Music Theory I	6

MUAC 1020 & MUAC 1021 & MUAC 1022	Aural Skills I and Aural Skills I and Aural Skills I	6
MUAC 2004 & MUAC 2005	Music Theory II and Music Theory II	4
MUAC 2020 & MUAC 2021	Aural Skills II and Aural Skills II	4
Following the completion of MUAC 2005 Music Theory II and MUAC 2021 Aural Skills II, students will complete 4 credits of music theory or aural skills electives (listed below). A list of course offerings also will be posted on My.DU > Lamont School of Music > Undergraduate Advising Resources each year.		4
MUAC 3002	Form and Analysis	
MUAC 3006	Post-Tonal Theory: Mode/Rhythm	
MUAC 3007	Post Tonal Theory and Analysis: Set Theory and Serialism	
MUAC 3008	Modal Counterpoint, Renaissance Vocal Style	
MUAC 3009	Pedagogy of Music Theory	
MUAC 3014	Music-Theoretical Approaches to Popular Music	
MUAC 3023	Rhythm & Meter in Music	
MUAC 3024	Introduction to Tonal Analysis	
MUAC 3025	Topics in Analysis: Brahms	
MUAC 3026	Sonata Form: Performance, Analysis, and History	
MUAC 3027	Arranging for the Classical Musician	
MUAC 3089	Model Composition	
MUAC 3121	Seminar in Music Theory (requires instructor approval)	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3578	Advanced Composition	
MUAC 3801	Introduction to Schenkerian Analysis (requires instructor approval)	
MUAC 3860	Basic Jazz Improvisation	
MUAC 3910	Orchestration	
MUAC 1920	Basic Conducting	2
MUAC 1211 or MUAC 3212	Music Technology Digital Music Creation	4
MUAC 2051	Musicology: Foundations of Musicology	3
Select five additional 2000-level Musicology courses from the following:		15
MUAC 2052	Musicology: Medieval And Renaissance Music	
MUAC 2053	Musicology: Baroque Music	
MUAC 2054	Musicology: Classical Music	
MUAC 2055	Musicology: Romantic Music	
MUAC 2056	Musicology: Modern Music	
MUAC 2057	Musicology: Introduction to World Musics	
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	
MUAC 2059	Jazz and Commercial Music History and Repertoire II (1955-Present)	
MUPR (2000-level)	Applied lessons with assigned instructor (Four credits per quarter)	48
MUEN (3000-level)	Ensembles as assigned (Must audition for and participate in one ensemble per quarter as assigned. See Lamont Student Handbook for details.)	12

MUAC 3124	Composition Seminar	12
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	
& 3124	and Composition Seminar	

**Area Requirements** **12**

MUAC 3006	Post-Tonal Theory: Mode/Rhythm	4
or MUAC 3007	Post Tonal Theory and Analysis: Set Theory and Serialism	

Select two additional courses from the following:

MUAC 3002	Form and Analysis
MUAC 3008	Modal Counterpoint, Renaissance Vocal Style
MUAC 3014	Music-Theoretical Approaches to Popular Music
MUAC 3023	Rhythm & Meter in Music
MUAC 3121	Seminar in Music Theory
MUAC 3578	Advanced Composition
MUAC 3801	Introduction to Schenkerian Analysis
MUAC 3910	Orchestration
MUAC 4009	Tonal Counterpoint (Instructor permission required.)

Other courses as approved by department

**Total Credits** **136**

In addition, students must fulfill requirements for piano proficiency, sophomore composition proficiency, music beyond the primary culture of specialization, and convocation attendance. Piano proficiency must be completed by the end of sophomore year. After the first quarter, students must have a new work performed on the Lamont Composer's Series Concert each quarter. Please see the Lamont Student Handbook for details regarding all non-course requirements.

## Jazz Studies and Commercial Music

### Bachelor of Music Major Requirements

(194 credits required for the degree (p. 86))

132 credits, including the following:

Code	Title	Credits
MUAC 1013	Jazz Theory and Aural Skills	12
& MUAC 1014	and Jazz Theory and Aural Skills	
& MUAC 1015	and Jazz Theory and Aural Skills	
MUAC 3870	Jazz Improvisation & Composition	12
& 3870	and Jazz Improvisation & Composition	
& 3870	and Jazz Improvisation & Composition (Four credits per quarter for three quarters)	
MUAC 1920	Basic Conducting	2
MUAC 1211	Music Technology	4
or MUAC 3212	Digital Music Creation	
MUAC 2051	Musicology: Foundations of Musicology	3
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	6
& MUAC 2059	and Jazz and Commercial Music History and Repertoire II (1955-Present)	

Select three additional 2000-level Musicology courses from the following: 9

MUAC 2052	Musicology: Medieval And Renaissance Music
MUAC 2053	Musicology: Baroque Music
MUAC 2054	Musicology: Classical Music

MUAC 2055	Musicology: Romantic Music	
MUAC 2056	Musicology: Modern Music	
MUAC 2057	Musicology: Introduction to World Musics	
MUPR (2000-level)	Applied lessons on major instrument with assigned instructor (Four credits per quarter)	48
MUEN (3000-level)	Ensembles as assigned (Must audition for and participate in two ensembles per quarter, at least one of which must be an appropriate major ensemble, if so assigned. See Lamont Student Handbook for details.)	24
<b>Area Requirements</b>		<b>12</b>
MUAC 3630	Basic Jazz Arranging	
MUAC 3845	Writing for The Modern Large Jazz Ensemble I	
MUAC 3980 & 3980	Advanced Jazz Improvisation and Composition and Advanced Jazz Improvisation and Composition	
<b>Total Credits</b>		<b>132</b>

In addition, students must fulfill requirements for piano proficiency, sophomore performance proficiency, music beyond the primary culture of specialization, convocation attendance, junior recital, and senior recital. Piano proficiency must be completed by the end of sophomore year. Please see the Lamont Student Handbook for details regarding all non-course requirements.

## Performance

### Bachelor of Music Major Requirements

(194 credits required for the degree (p. 86))

132 credits, including the following:

Code	Title	Credits
MUAC 1001 & MUAC 1002 & MUAC 1003	Music Theory I and Music Theory I and Music Theory I	6
MUAC 1020 & MUAC 1021 & MUAC 1022	Aural Skills I and Aural Skills I and Aural Skills I	6
MUAC 2004 & MUAC 2005	Music Theory II and Music Theory II	4
MUAC 2020 & MUAC 2021	Aural Skills II and Aural Skills II	4

Following the completion of MUAC 2005 Music Theory II and MUAC 2021 Aural Skills II, students will complete 4 credits of music theory or aural skills electives (listed below). A list of course offerings also will be posted on My.DU > Lamont School of Music > Undergraduate Advising Resources each year.

MUAC 3002	Form and Analysis	
MUAC 3006	Post-Tonal Theory: Mode/Rhythm	
MUAC 3007	Post Tonal Theory and Analysis: Set Theory and Serialism	
MUAC 3008	Modal Counterpoint, Renaissance Vocal Style	
MUAC 3009	Pedagogy of Music Theory	
MUAC 3014	Music-Theoretical Approaches to Popular Music	
MUAC 3023	Rhythm & Meter in Music	
MUAC 3024	Introduction to Tonal Analysis	
MUAC 3025	Topics in Analysis: Brahms	
MUAC 3026	Sonata Form: Performance, Analysis, and History	
MUAC 3027	Arranging for the Classical Musician	
MUAC 3089	Model Composition	
MUAC 3121	Seminar in Music Theory (requires instructor approval)	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3578	Advanced Composition	
MUAC 3801	Introduction to Schenkerian Analysis (requires instructor approval)	
MUAC 3860	Basic Jazz Improvisation	

MUAC 3910	Orchestration	
MUAC 1920	Basic Conducting	2
MUAC 1211	Music Technology	4
or MUAC 3212	Digital Music Creation	
MUAC 2051	Musicology: Foundations of Musicology	3
Select five additional 2000-level Musicology courses from the following:		15
MUAC 2052	Musicology: Medieval And Renaissance Music	
MUAC 2053	Musicology: Baroque Music	
MUAC 2054	Musicology: Classical Music	
MUAC 2055	Musicology: Romantic Music

MUAC 2057	Musicology: Introduction to World Musics	
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	
MUAC 2059	Jazz and Commercial Music History and Repertoire II (1955-Present)	
MUPR (2000-level)	Applied lessons with assigned instructor (Four credits per quarter)	48
MUEN (3000-level)	Ensembles as assigned (Must audition for and participate in two ensembles per quarter as assigned. See Lamont Student Handbook for details.)	24

**Area requirements listed below by department 12**

**Brass**

**Horn**

MUAC 3662	Orchestral Studies for Brass
MUAC 3708	Pedagogy & Repertoire Horn
MUAC 3765	Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
Music elective to be approved by studio professor	

**Trombone/Euphonium**

MUAC 3662	Orchestral Studies for Brass
MUAC 3712	Pedagogy & Repertoire Trombone
MUAC 3765	Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
Music elective to be approved by studio professor	

**Trumpet**

MUAC 3662	Orchestral Studies for Brass
MUAC 3742	Pedagogy & Repertoire Trumpet
MUAC 3765	Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
Music elective to be approved by studio professor	

**Tuba**

MUAC 3662	Orchestral Studies for Brass
MUAC 3706	Pedagogy & Repertoire Tuba
MUAC 3765	Professional Brass Techniques (To be taken senior year, unless otherwise approved by department)
Music elective to be approved by studio professor	

**Carillon**

MUAC 3698 & 3698	Carillon History and Mechanics and Carillon History and Mechanics
MUAC 3710 & 3710	Carillon Pedagogy I and Carillon Pedagogy I

**Guitar**

MUAC 3590	Guitar History
MUAC 3724 & 3724	Pedagogy & Repertoire Guitar and Pedagogy & Repertoire Guitar

**Harp**

MUAC 3736 & MUAC 3737	Pedagogy & Repertoire Harp and Pedagogy & Repertoire Harp
Music elective to be approved by studio professor	

**Musical Theater**

Choose from the following to complete twelve credits:

THEA 2870	Acting I
THEA 2871	Acting I
THEA 1010	Stage Movement & Dance
THEA 1011	Stage Movement & Dance
THEA 1012	Stage Movement & Dance
MUAC 3165	Music Theater Survey
MUAC 3166	Music Theater Survey II
MUAC 3240 & MUAC 3241	Vocal Pedagogy I and Vocal Pedagogy II
MUAC 3686 & MUAC 3688	Choral Pedagogy I and Choral Pedagogy II
MUAC 3684 & MUAC 3689	Choral Literature I and Choral Literature II
MUAC 3492	History of Opera: From Monteverdi to Minimalism and Beyond

#### Organ

MUAC 3738 & MUAC 3739 & MUAC 3740	Pedagogy & Repertoire Organ and Pedagogy & Repertoire Organ and Pedagogy & Repertoire Organ
MUPR 3350 & 3350 & 3350	Organ Improvisation and Organ Improvisation and Organ Improvisation

#### Percussion

MUAC 3718 & MUAC 3719	Pedagogy & Repertoire Percussion and Pedagogy & Repertoire Percussion
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUPR 2661 or MUPR 2671	Percussion Set Percussion Set
MUPR 2660 or MUPR 2670	Percussion (Hand Drum Lessons) Percussion

#### Piano

MUAC 2820 & MUAC 2821	Introduction to Piano Pedagogy I and Introduction to Piano Pedagogy II
MUAC 3822 & MUAC 3823 & MUAC 3824	Piano Repertoire I and Piano Repertoire II and Piano Repertoire III

#### Strings

##### Bass

Choose from the following to complete twelve credits:

MUAC 3030	Seminar-Performance Psychology
MUAC 3061	Audio Production I (Instructor permission required.)
MUAC 3092	The Business Side of Music
MUAC 3655	Orchestral Excerpts-Bass
MUAC 3733	Pedagogy & Rep Double Bass
MUAC 3860	Basic Jazz Improvisation
MUPR 3120	Alexander Technique
MUEN 3677	Bow Art Ensemble
MUAC (3000-level or 4000-level)	Composition, Ethnomusicology, Musicology, or Theory course (Instructor permission may be required.)

##### Cello

Choose from the following to complete twelve credits:

MUAC 3030	Seminar-Performance Psychology
MUAC 3092	The Business Side of Music
MUAC 3463	Suzuki Cello Seminar I

MUAC 3464	Suzuki Cello Seminar I
MUAC 3465	Suzuki Cello Seminar I
MUAC 3466	Suzuki Cello Seminar II
MUAC 3467	Suzuki Cello Seminar II
MUAC 3468	Suzuki Cello Seminar II
MUAC 3650	Orchestral Excerpts-Cello
MUAC 3730	Pedagogy & Repertoire Cello
MUAC 3860	Basic Jazz Improvisation
MUPR 3120	Alexander Technique
MUEN 3677	Bow Art Ensemble
MUAC 3061	Audio Production I (Instructor permission required.)
MUAC (3000-level or 4000-level)	Composition, Ethnomusicology, Musicology, or Theory course (Instructor permission may be required.)

**Viola**

Choose from the following to complete twelve credits:

MUAC 3030	Seminar-Performance Psychology
MUAC 3061	Audio Production I (Instructor permission required.)
MUAC 3092	The Business Side of Music
MUAC 3661	Orchestral Excerpts Viola
MUAC 3663	Orchestral Excerpts, Viola II
MUAC 3860	Basic Jazz Improvisation
MUPR 3120	Alexander Technique
MUEN 3677	Bow Art Ensemble
MUAC (3000-level or 4000-level)	Composition, Ethnomusicology, Musicology, or Theory course (Instructor permission may be required.)

**Violin**

Choose from the following to complete twelve credits:

MUAC 3030	Seminar-Performance Psychology
MUAC 3061	Audio Production I (Instructor permission required.)
MUAC 3092	The Business Side of Music
MUAC 3470	Suzuki Violin Seminar I
MUAC 3471	Suzuki Violin Seminar I
MUAC 3472	Suzuki Violin Seminar I
MUAC 3660	Orchestral Excerpts-Violin
MUAC 3860	Basic Jazz Improvisation
MUPR 3120	Alexander Technique
MUEN 3677	Bow Art Ensemble
MUAC (3000-level or 4000-level)	Composition, Ethnomusicology, Musicology, or Theory course (Instructor permission may be required.)

**Voice**

MUEN 1701	IPA & Lyric Italian Diction
MUEN 1702	Lyric French Diction
MUEN 1703	Lyric German Diction
MUAC 2413	Vocal Literature Survey I: Italian and English Composers
MUAC 2414	Vocal Literature Survey II: German and French Composers
MUAC 2415	Acting and Movement for the Stage I
MUAC 2416	Acting and Movement for the Stage II
MUAC 3240	Vocal Pedagogy I
MUAC 3241	Vocal Pedagogy II

Choose from the following to complete two credits:

MUAC 3243	Recitative in Opera
MUAC 3686	Choral Pedagogy I
MUAC 3684	Choral Literature I
MUPR 3120	Alexander Technique

**Woodwinds**

**Bassoon**

MUAC 3761 & MUAC 3762	Pedagogy & Repertoire Bassoon and Pedagogy & Repertoire Bassoon
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUAC 3030 & MUPR 3120	Seminar-Performance Psychology and Alexander Technique

**Clarinet**

MUAC 3751 & MUAC 3752	Pedagogy & Repertoire Clarinet and Pedagogy & Repertoire Clarinet
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUAC 3030 & MUPR 3120	Seminar-Performance Psychology and Alexander Technique

**Flute**

MUAC 3748 & MUAC 3749	Pedagogy & Repertoire Flute and Pedagogy & Repertoire Flute
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUAC 3030 & MUPR 3120	Seminar-Performance Psychology and Alexander Technique

**Oboe**

MUAC 3757 & MUAC 3758	Pedagogy & Repertoire Oboe and Pedagogy & Repertoire Oboe
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUAC 3030 & MUPR 3120	Seminar-Performance Psychology and Alexander Technique

**Saxophone**

MUAC 3754 & MUAC 3755	Pedagogy & Repertoire Saxophone and Pedagogy & Repertoire Saxophone
--------------------------	--

Choose from the following to complete four credits:

MUAC 3860	Basic Jazz Improvisation
MUAC 3030 & MUPR 3120	Seminar-Performance Psychology and Alexander Technique

**Total Credits****132**

In addition, students must fulfill requirements for piano proficiency, sophomore performance proficiency, music beyond the primary culture of specialization, convocation attendance, junior recital, and senior recital. Piano proficiency must be completed by the end of sophomore year. Please see the Lamont Student Handbook for details regarding all non-course requirements.

Concentrations are available for this major in the following areas: bass, bassoon, carillon, cello, clarinet, flute, guitar, harp, horn, oboe, organ, percussion, piano, saxophone, trombone/euphonium, trumpet, tuba, viola, violin, and voice.

## Recording and Production

### Bachelor of Music Major Requirements

(194 credits required for the degree (p. 86))

128 credits, including the following:

Code	Title	Credits
MUAC 1001 & MUAC 1002 & MUAC 1003	Music Theory I and Music Theory I and Music Theory I	6

MUAC 1020 & MUAC 1021 & MUAC 1022	Aural Skills I and Aural Skills I and Aural Skills I	6
MUAC 2004 & MUAC 2005	Music Theory II and Music Theory II	4
MUAC 2020 & MUAC 2021	Aural Skills II and Aural Skills II	4
Following the completion of MUAC 2005 Music Theory II and MUAC 2021 Aural Skills II, students will complete 4 credits of music theory or aural skills electives (listed below). A list of course offerings also will be posted on My.DU > Lamont School of Music > Undergraduate Advising Resources each year.		4
MUAC 3002	Form and Analysis	
MUAC 3006	Post-Tonal Theory: Mode/Rhythm	
MUAC 3007	Post Tonal Theory and Analysis: Set Theory and Serialism	
MUAC 3008	Modal Counterpoint, Renaissance Vocal Style	
MUAC 3009	Pedagogy of Music Theory	
MUAC 3014	Music-Theoretical Approaches to Popular Music	
MUAC 3023	Rhythm & Meter in Music	
MUAC 3024	Introduction to Tonal Analysis	
MUAC 3025	Topics in Analysis: Brahms	
MUAC 3026	Sonata Form: Performance, Analysis, and History	
MUAC 3027	Arranging for the Classical Musician	
MUAC 3121	Seminar in Music Theory (requires instructor approval)	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
MUAC 3801	Introduction to Schenkerian Analysis (requires instructor approval)	
MUAC 3578	Advanced Composition	
MUAC 3860	Basic Jazz Improvisation	
MUAC 3910	Orchestration	
OR:		
MUAC 1013 & MUAC 1014 & MUAC 1015	Jazz Theory and Aural Skills and Jazz Theory and Aural Skills and Jazz Theory and Aural Skills	
MUAC 3870 & 3870 & 3870	Jazz Improvisation & Composition and Jazz Improvisation & Composition and Jazz Improvisation & Composition	
MUAC 2051	Musicology: Foundations of Musicology	3
Select five additional 2000-level Musicology courses from the following:		15
MUAC 2052	Musicology: Medieval And Renaissance Music	
MUAC 2053	Musicology: Baroque Music	
MUAC 2054	Musicology: Classical Music	
MUAC 2055	Musicology: Romantic Music	
MUAC 2056	Musicology: Modern Music	
MUAC 2057	Musicology: Introduction to World Musics	
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	
MUAC 2059	Jazz and Commercial Music History and Repertoire II (1955-Present)	
MUAC 1920	Basic Conducting	2
MUAC 3061 & MUAC 3059 & MUAC 3058	Audio Production I and Audio Production II and Audio Production III	12
MUAC 3064 & MUAC 3065 & MUAC 3066	Audio Production IV and Audio Production V and Audio Production VI	12
MUPR (2000-level)	Applied lessons with assigned instructor (Four credits per quarter)	36
MUAC 2067	Audio Practicum (One credit per quarter in the first year, then three credits per quarter in the fourth year)	12

MUEN (3000-level)	Ensembles as assigned (Must audition for and participate in one major ensemble per quarter, if so assigned. See Lamont Student Handbook for details.)	12
<b>Total Credits</b>		<b>128</b>

In addition, students must fulfill requirements for piano proficiency, sophomore music recording proficiency, music beyond the primary culture of specialization, convocation attendance, internship, and senior production project. Piano proficiency must be completed by the end of sophomore year. Students must complete an internship approved by the department chair; students must complete the audio production course sequence before beginning the internship. Students must complete a senior production project approved by the department chair. Please see the Lamont Student Handbook for details regarding all non-course requirements.

## Minors

### Minor in Ethnomusicology Requirements

24 credits, including the following:

Code	Title	Credits
<b>Required Courses</b>		
MUAC 1012	Music, Society, and Culture	4
MUAC 2057	Musicology: Introduction to World Musics	3
<b>Elective Courses</b>		<b>12</b>
Choose three from the following list:		
(Please note: only one Anthropology elective may be applied to the minor)		
MUAC 1024	Black Sacred Music: A Survey	
MUAC 2251	Contemporary Gospel Music: Religion, Culture, and the Black Church	
MUAC 3497	Studying Music in the Field: Theory and Method in Ethnomusicology	
MUAC 3502	Gender & Genre in World Music	
MUAC 3537	Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music	
Other ethnomusicology courses, with department approval		
ANTH 2010	Cultural Anthropology	
ANTH 3070	Folklore and Cultural Heritage	
ANTH 3750	Ethnographic Methods	
ANTH 3875	Research Methods in Anthropology	
Other relevant courses, with department approval		
<b>At least two different 3000-level ensembles, as chosen from this list</b>		<b>5</b>
(Each ensemble may be taken for multiple quarters.)		
MUEN 3029	Steel Drum Ensemble	
MUEN 3041	North Indian Classical Ensemble	
MUEN 3048	Bluegrass Ensemble	
MUEN 3731	The Spirituals Project Choir	
Other ensembles, with department approval		
<b>Total Credits</b>		<b>24</b>

Interested students are encouraged to schedule an introductory advising meeting with the Chair of Musicology and Ethnomusicology.

Please note that only 4 of the Ethnomusicology minor credits can fulfill Analytical Inquiry: Society and Culture requirements in the Common Curriculum.

No courses for the Ethnomusicology minor can "double dip" for any Music major requirements.

Note: Unlike the minor in Music or a major in Music, an audition for admission is not required for the Ethnomusicology minor.

### Minor in Music Requirements

23 credits, including the following:

Code	Title	Credits
MUAC 1001 & MUAC 1002	Music Theory I and Music Theory I <sup>1</sup>	4

MUAC 1020 & MUAC 1021	Aural Skills I and Aural Skills I <sup>1</sup>	4
OR		
MUAC 1013 & MUAC 1014	Jazz Theory and Aural Skills and Jazz Theory and Aural Skills	
Select two of the following: <sup>2</sup>		6
MUAC 2051	Musicology: Foundations of Musicology	
MUAC 2052	Musicology: Medieval And Renaissance Music	
MUAC 2053	Musicology: Baroque Music	
MUAC 2054	Musicology: Classical Music	
MUAC 2055	Musicology: Romantic Music	
MUAC 2056	Musicology: Modern Music	
MUAC 2057	Musicology: Introduction to World Musics	
MUAC 2058	Jazz and Commercial Music History and Repertoire I (1900-1955)	
MUAC 2059	Jazz and Commercial Music History and Repertoire II (1955-Present)	
MUPR (3000-level)	Applied lessons on major instrument with assigned instructor (Two credits per quarter)	6
MUEN (3000-level)	Ensembles	3
<b>Total Credits</b>		<b>23</b>

<sup>1</sup> The required Music Theory and Aural Skills courses are offered in fall and winter quarters. Students must be declared as a minor in music and must complete the Pitch Identification Test prior to enrolling in Music Theory and Aural Skills courses. See Lamont School of Music advisor for details.

<sup>2</sup> It is recommended that students complete Music Theory and Aural Skills prior to taking Musicology.

Note: Prior to beginning a minor in music, students must complete an audition and Pitch Identification Test with the appropriate Music faculty.

## Artist Diploma and Certificate Programs

### Artist Diploma (Certificate in Music) with a Concentration in Performance

#### Certificate requirements

##### Coursework requirements

Code	Title	Credits
<b>Core coursework requirements</b>		
Complete all of the following courses:		
MUAC, MUPR, MUEN (3000-level or 4000-level)	Upper-division Music electives	9
MUPR (2000-level)	Applied Lessons (2 credits per quarter)	12
MUEN (3000-level)	Ensembles/Chamber Music (Must audition for and participate in two ensembles per quarter, at least one of which must be an appropriate major ensemble, if so assigned. See Lamont Student Handbook for details.)	6

Note: These are minimum hours required. Candidates must enroll for at least one credit hour per quarter for each quarter of study and participate in at least two ensembles per quarter of study.

**Total Credits** **27**

#### Minimum number of credits required for the certificate: 27 credits

##### Non-coursework requirements:

- Candidates will perform three juried, full-length solo recitals.
- Candidates will participate in the Lamont Honors Competition and the Lamont Chamber Music Competition at least once during enrollment in the program.

18 credits, including the following:

## Certificate in Suzuki Pedagogy Requirements

Code	Title	Credits
<b>CELLO</b>		
<b>LEVEL 1</b>		
MUAC 3463	Suzuki Cello Seminar I	2
MUAC 3464	Suzuki Cello Seminar I	2
MUAC 3465	Suzuki Cello Seminar I	2
MUAC 3460	Suzuki Cello Practicum	1
MUAC 3460	Suzuki Cello Practicum	1
<b>LEVEL 2</b>		
MUAC 3466	Suzuki Cello Seminar II	2
MUAC 3467	Suzuki Cello Seminar II	2
MUAC 3468	Suzuki Cello Seminar II	2
MUAC 3439	Teaching Note Reading	2
MUAC 3460	Suzuki Cello Practicum	1
MUAC 4450	Suzuki Group Lesson Practicum	1
<b>Total Credits</b>		<b>18</b>

Code	Title	Credits
<b>VIOLIN</b>		
<b>LEVEL 1</b>		
MUAC 3470	Suzuki Violin Seminar I	2
MUAC 3471	Suzuki Violin Seminar I	2
MUAC 3472	Suzuki Violin Seminar I	2
MUAC 3477	Suzuki Violin Practicum	1
MUAC 3477	Suzuki Violin Practicum	1
<b>LEVEL 2</b>		
MUAC 3282	Suzuki Violin Seminar II	2
MUAC 3283	Suzuki Violin Seminar II	2
MUAC 3284	Suzuki Violin Seminar II	2
MUAC 3477	Suzuki Violin Practicum	1
MUAC 3439	Teaching Note Reading	2
MUAC 4450	Suzuki Group Lesson Practicum	1
<b>Total Credits</b>		<b>18</b>

## Admission and Audition Requirements

In addition to being accepted for study by the University, students desiring admission to the Lamont School of Music must audition with the appropriate music faculty and complete a Lamont application. Audition requirements differ by area. Requirements can be reviewed at [www.du.edu/lamont](http://www.du.edu/lamont). An in-person audition is preferable; however, students may submit a high quality video recording for review.

## Requirements for Distinction in the Major in Music

BA students majoring in Music who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete a project, as approved by the student's faculty advisor and an appropriate supervising Lamont faculty member (as per agreement between the student and the student's chosen faculty member), to make their BA in Music degree truly distinctive. Note that the faculty advisor and supervising Lamont faculty member may be one and the same person. Possible projects include, but are not limited to:
  - A. A lecture-recital co-supervised by the student's applied teacher and a Musicology/Ethnomusicology/Theory faculty member.
  - B. An innovative recital or other artistic endeavor that involves the participation of several other people.
  - C. An expanded version of an exemplary paper written in an upper division class suitable, for example, for presentation at a Lamont Colloquium and/or submission for the undergraduate journal *WRITlarge* for possible publication.
  - D. An exemplary PINS project.

- Earn a 3.75 GPA in the major, 3.50 GPA overall.

## Requirements for Distinction in the Major in Composition

BM students in Composition who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete, as approved by the student's studio professor and Composition department chair, and in addition to the required quarterly performances of the student's compositions, one of the following:

A. Independent study in a theoretical, musicological, or ethnomusicological topic.

B. An in-depth exploration of a topic outside music, followed by the composition of a new work that reflects this exploration, with the premiere performance supplemented by an explanatory essay or lecture.

C. An interdisciplinary collaboration, culminating either in the performance of an opera scene or in the composition of incidental or background music for film, dance, theater, video, or an electronic game.

D. Modification of existing music that is in public domain – e.g., editing early music, reducing music from orchestral scores to piano for two or four hands, or simplifying difficult instrumental music to expand the repertoire for beginning players.

E. Performance art or other work that is outside traditional boundaries of musical composition and performance. The topic and format of a project must be pre-approved by the Composition faculty.

F. An alternative project that is not listed here.

- Earn a 3.75 GPA in the major, 3.50 GPA overall.

## Requirements for Distinction in the Major in Jazz Studies and Commercial Music

BM students in Jazz Studies and Commercial Music who wish to receive Distinction in the Major upon graduating must achieve the following:

- Propose and complete, as approved by the student's studio professor and Lamont department chair, an additional element for the junior or senior recital to make it truly distinctive;
- Receive the Outstanding Recital Award for either junior or senior recital, or demonstrate significant performance activity as recognized by the student's department at Lamont;
- Earn a 3.75 GPA in the major, 3.50 GPA overall.

## Requirements for Distinction in the Major in Performance

BM students in Performance who wish to receive Distinction in the Major upon graduating must achieve the following:

- Propose and complete, as approved by the student's studio professor and Lamont department chair, an additional element for the junior or senior recital to make it truly distinctive;
- Receive the Outstanding Recital award for either junior or senior recital, or demonstrate significant performance activity as recognized by the student's department at Lamont;
- Earn a 3.75 GPA in the major, 3.50 GPA overall.

## Requirements for Distinction in the Major in Recording and Audio Production

BM students in Recording and Production who wish to receive Distinction in the Major upon graduation must achieve the following:

- Propose and complete, as approved by the director of the Recording and Production program, additional elements for the senior project to make it truly distinctive;
- Demonstrate consistent excellence, professionalism, and leadership as a student audio engineer, including the completion of an exemplary senior project;
- Earn a 3.75 GPA in the major, 3.50 GPA overall.

The following course plans represent the minimum courses students should plan to take each quarter for each degree. Students should select additional Music and Common Curriculum courses to complete their course loads each quarter in consultation with the Lamont advisor.

	Music Theory/Aural Skills Electives (Classical-emphasis students only)	4

<sup>1</sup> **Theory/Aural Skills sequence:** Jazz-emphasis students may substitute MUAC 1013 Jazz Theory and Aural Skills, MUAC 1014 Jazz Theory and Aural Skills, and MUAC 1015 Jazz Theory and Aural Skills for the first-year theory sequence (MUAC 1001-1003 Music Theory I and MUAC 1020-1022 Aural Skills I) and three terms of MUAC 3870 Jazz Improvisation & Composition for the sophomore theory sequence (MUAC 2004-2005 Music Theory II, MUAC 2020-2022 Aural Skills II, and 4 credits of Music Theory/Aural Skills Electives).

<sup>2</sup> All students complete MUAC 2051 Foundations of Musicology plus five other MUAC 2000-level Musicology Survey courses.

**MUAC 1000 Fundamentals of Music Theory (4 Credits)**

Meant for students with little to no experience with music notation, Fundamentals of Music Theory introduces pitch, rhythm, scales, chords, and other elements of Western notation. Students will develop facility in reading and hearing music, as well as an understanding of the syntax of tonal music, ranging from the music of Mozart to film music to Miles Davis.

**MUAC 1001 Music Theory I (2 Credits)**

The Fall quarter of Theory I covers fundamentals (key signatures, triads, seventh chords rhythm and meter, etc.) and first-species counterpoint, in both creative and analytic contexts. Although some entering students may be familiar with these concepts, the course emphasizes speed and mastery.

**MUAC 1002 Music Theory I (2 Credits)**

The Winter quarter of Theory I introduces basic voice-leading and analytic techniques, emphasizing syntax and grammar of music so that students can begin to write their own music. Second species counterpoint is also covered.

**MUAC 1003 Music Theory I (2 Credits)**

The Spring quarter continues the study of voice-leading and musical progression, building part-writing skill and analytic accuracy. The final project in this course is the composition and performance of a theme and variations set.

**MUAC 1012 Music, Society, and Culture (4 Credits)**

This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music's relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1013 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills. Must be a BM student with a major in Jazz Studies or Commercial Music.

**MUAC 1014 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills.

**MUAC 1015 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills.

**MUAC 1016 History of Jazz (4 Credits)**

This course examines the short history of jazz and all its sub-styles (swing, bop, cool, etc.) from its roots to the early eighties. Students have access to the entire course online, including all the fantastic listening. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1017 History of Rock and Roll (4 Credits)**

The "birth of rock" occurred in the mid 1950's as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1018 Understanding Music (4 Credits)**

In this course, students acquire a greater appreciation of musical history, context, composers, and genres. Through listening activities, texts, movies, and live concerts, students become educated listeners, able to describe intelligently musical experiences using appropriate vocabulary. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1019 American Popular Music (4 Credits)**

American Popular Music combines the study of social and cultural history on the one hand with the analytical study of music styles on the other. Basically, it serves as an introduction to the wealth of American popular music from minstrelsy to hip hop. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class is not available to music or performance majors.

**MUAC 1020 Aural Skills I (2 Credits)**

Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1021 Aural Skills I (2 Credits)**

Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1022 Aural Skills I (2 Credits)**

Development of aural analysis in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1023 Mathematics in Music after 1970 (4 Credits)**

This course examines the interaction of mathematics and music composition since 1970, an interaction that has grown more vibrant with the advent of electronic music and modern computation. In this course, we will use mathematical concepts and methods to address basic questions about music, mathematics, and musical works. The questions include, (a) how do pieces by contemporary composers reflect an affinity for mathematical concepts?, (b) are the intervals preferred by cultures as diverse as ancient Greece and the contemporary Levant inherently beautiful?, (c) what is the relationship between complexity and chance on the listening experience?, and several others. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1024 Black Sacred Music: A Survey (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

**MUAC 1025 Hip-Hop and Rap Music (4 Credits)**

From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics.

**MUAC 1026 American Musical Mavericks (4 Credits)**

This course examines music history in the United States through the figure of the "maverick," a rugged individualist who operates outside the mainstream of society. Using Michael Broyles's *Mavericks and Other Traditions in American Music* as a primary textbook, this course surveys American music from the 18th to the 21st centuries, introducing students to a variety of musical traditions, pieces, composers, performers, and artistic strategies. Central themes include: the impact of Puritanism on U.S. arts and culture, the dilemma of art music in a democratic society, and the struggle to develop a uniquely American musical voice in a nation of immigrants. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity (performance, composition, etc.). Analyze the relationship between texts, ideas, or creative works and a broader context (intellectual, political, artistic, etc.) in ways appropriate to disciplines in the arts or humanities. No prior musical experience is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1027 Global Pop (4 Credits)**

This survey of global pop explores musical thought and processes through an examination of the development of "world music" and "world beat," including its meaning and importance to contemporary culture as well as its history and impact. Intended to provide students with a basic understanding of the international popular music scene from its explosion at the close of the 20th century through the present day, this course questions the meaning and importance of this trend in contemporary culture. It explores the complex relationships of music and mass media while addressing themes of nationalism, popular resistance and subversion, censorship, transnational identity, gender representation, and cultural hegemony. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1028 Hearing the Movies (4 Credits)**

Although we usually say that we watch movies, we might more accurately say that we "see-hear" or "audioview" them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required.

**MUAC 1029 Methods of Mastery (4 Credits)**

Musicians, athletes, artists, software engineers, actors, financial managers, dancers, writers, mathematicians, scientists, game designers, and even social media influencers spend their days in radically different ways, but top performers share habits and approaches that contribute to success. "Methods for Mastery" offers students an opportunity to explore the habits and mindsets of great achievers in different disciplines, ranging from classical music to creative writing to sports, finance, and more. What do writer Isabel Allende, dancer Twyla Tharp, soccer star Cristiano Ronaldo, Apple inventor Steve Jobs, cellist Yo-Yo Ma, and the artist formerly known as Prince have in common? What is required to do life-changing work? Inspiration or Perspiration? The Seven Habits of Highly Effective People? Can everyone be a virtuoso, genius, or prodigy? Through shared assignments, the class will discuss performances and research in four different areas: "Practice and Work Habits"; "Mindfulness Techniques"; "Performance Anxiety, Stage Fright, and other Mental Blocks"; and "Flow". Videos, podcasts, live performances, trade paperbacks, websites, and academic research will inform our understanding of these topics. In addition, each student will develop two personal projects—one on cultural attitudes towards mastery, and one on a specific technique for creating better work routines, overcoming stage fright, or maintaining focus. Students from different disciplines will share their ideas with peers. Throughout, each class member will keep a daily journal, culminating in a final reflection that charts progress over the quarter. By the end of the quarter, students will integrate their research with new skills and greater awareness of their own path towards achievement.

**MUAC 1031 Study Abroad Perf. Attendance (0 Credits)**

Fulfills concert attendance requirement for music majors in the Study Abroad program.

**MUAC 1161 Theory at the Keyboard I (4 Credits)**

This course is the first of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1162 Theory at the Keyboard II (4 Credits)**

This course is the second of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1163 Theory at the Keyboard III (4 Credits)**

This course is the third of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1189 Jazz Performance Techniques (2 Credits)**

Individual study of Jazz performance techniques in a directed study environment.

**MUAC 1190 Jazz at the Keyboard (4 Credits)****MUAC 1211 Music Technology (4 Credits)**

This course is a one quarter survey exploring inventive ways today's musician/creative can incorporate technology as competitive advantage in their future careers. Musicians must be aware that emerging and disruptive technologies are moving faster than they can be assimilated. This course accelerates student functionality by providing a practical and hands-on approach to web-based professional resources, notation software, MIDI sequencing and electronic instruments, digital audio and video applications, and the laptop as a performance instrument. The course spends significant time on professional development including the design of web based promotional materials. Although tailored for music majors, this course is open to, and often taken by, non-majors.

**MUAC 1920 Basic Conducting (2 Credits)**

Introduction to techniques of conducting; a basis and prerequisite for specialized courses in choral, orchestral, and wind conducting. Prerequisites: MUAC 1001, MUAC 1002, MUAC 1003, MUAC 1020, MUAC 1021, and MUAC 1022.

**MUAC 1988 Study Abroad Resident Credit (0-18 Credits)****MUAC 2004 Music Theory II (2 Credits)**

The Fall quarter of Theory II reviews common musical progressions and places them in the context of phrase structures such as the period and the sentence.

**MUAC 2005 Music Theory II (2 Credits)**

The Winter quarter of Theory II introduces tonicization, modulation, and other chromatic techniques and applies these topics to binary forms and art song.

**MUAC 2006 Music Theory II (2 Credits)**

The Spring quarter of Theory II adds additional chromatic harmonies (e.g., Neapolitan triad) and examines complete movement forms, including ternary, rondo, and sonata forms.

**MUAC 2020 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2021 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2022 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2051 Musicology: Foundations of Musicology (3 Credits)**

This course introduces students to "doing musicology." The theme is "beyond the boundaries": music is rarely neat and tidy; it defies the stereotypes, and it spills over its borders. To highlight this perspective, we focus on pieces that bring to the surface contemporary American society's code words for going beyond the boundaries: sex, drugs, and rock 'n' roll. Students develop two skills: articulating what they are hearing and connecting different approaches to understanding music (including musical style, musical structure, history, context, reception, historiography, performance practice, and music in and as culture). The course provides a rigorous background for all the following quarters of musicology coursework, which may include Western art music from the medieval period through the present, jazz and commercial music, and music from other cultures around the world. Prerequisite for music majors: MUAC 1002 or MUAC 1014.

**MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2053 Musicology: Baroque Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2054 Musicology: Classical Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2055 Musicology: Romantic Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1830 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2056 Musicology: Modern Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2057 Musicology: Introduction to World Musics (3 Credits)**

This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music's connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2060 Introduction to Electronic Music/Synthesizer Programming (4 Credits)**

In this class students will learn how to create musical sounds using music synthesizers. Most modern synthesizers, whether hardware or software, are designed after paradigms established by designers of the modular analog synthesizer systems of the late 1960's (Moog, Buchla, et al.). A basic foundation of the physics of sound and electricity will comprise the first module of the course. After that follows an in depth program of training in the creation of sound using a modern modular analog synthesizer (ModCan) as well as free, open source modular synth emulation software (VCV Rack). Students will learn synthesis techniques from a historical perspective including but not limited to subtractive, additive, FM, wavetable, sample based, and granular. Modularity will be emphasized as mastery of this approach makes it possible to quickly learn any existing hardware or software synthesizer. After this class the successful student will be proficient on a wide variety of devices real and virtual, on the DAW of their choice. This proficiency will empower students who record and produce their own music in electro-acoustic, rock, or EDM genres. Class format will be lecture/lab. Students will be expected to conduct independent research and learning and contribute to class discussions. Grading will be based on the quality of your work and the quality contribution to class discussions as evidence of diligence in your independent study.

**MUAC 2061 Sound Synthesis and Electronic Music Production (4 Credits)**

In this course students will learn to create original musical and non-musical sound using virtual as well as analog and digital modular and stand-alone synthesizers. Topics include timbre creation, extensive control of parameters via MIDI plus analog patching, multi-device synchronization, MIDI and analog sequencing as well as recording, mixing, and mastering in stereo and surround in an electronic music production context. The course covers studio production as well as live performance and improvisation techniques. A software platform such as Ableton Live will be used in the class.

**MUAC 2062 Audio Engineering and Production I (4 Credits)**

In this course students will learn the foundational skills necessary to begin producing professional-quality music and sound recordings using industry-standard digital audio workstation (DAW) software. Specific attention will be given to monophonic, stereophonic, and multi-track recording and production techniques for spoken word, sound design, and classical, jazz, and popular music genres. Course content includes in-depth coverage of recording, processing, mixing, and mastering techniques, plus use of microphones, equalization, dynamics processing, effects, and mix automation. Additional topics include an introduction to MIDI (Musical Instrument Digital Interface) and use of virtual instruments and synthesis plugin software for music production. Students will use their own laptop computers but will also have access to on-campus audio production studios.

**MUAC 2063 Computer Music: Programming, Performance, and Production (4 Credits)**

In this course we will explore ways of using the Max/MSP programming environment for music- and multimedia-oriented interactive performance, composition, and improvisation including synthesis and live processing of music, sound, and video. Through learning various programming tools and techniques, students will acquire skills and direction necessary to complete an original final composition or interactive performance project. Generative techniques involving machine learning and AI will be introduced.

**MUAC 2067 Audio Practicum (1-4 Credits)**

Clinical training in audio recording and sound reinforcement for bachelor of music audio production concentration majors.

**MUAC 2068 Songwriting Workshop (2 Credits)**

Songwriting can connect our deepest sense of self to others through the art of emotive expression and the craft of creative communication and collaboration. This course focuses on growth, engagement, and connection through real-life experience, practice, and performance. Included are creative assignments, in-class performances, community performances, and recording and producing an original song in the Lamont School of Music recording studio.

**MUAC 2189 Jazz Performance Techniques (2 Credits)**

Individual study of jazz performance techniques in a directed study environment.

**MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. Cross listed with RLGS 2251.

**MUAC 2260 Music, Race, and Ethnicity in Latin America (4 Credits)**

In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and "blackness" will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America.

**MUAC 2413 Vocal Literature Survey I: Italian and English Composers (1 Credit)**

This course is a Vocal Literature Survey of Art Songs in English, Italian, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

**MUAC 2414 Vocal Literature Survey II: German and French Composers (1 Credit)**

This course is a Vocal Literature Survey of Art Songs in German and French, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

**MUAC 2415 Acting and Movement for the Stage I (2 Credits)**

In this beginning course, students develop a basic understanding of stagecraft, and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work.

**MUAC 2416 Acting and Movement for the Stage II (1 Credit)**

In this continuing course, students develop a more advanced understanding of stagecraft and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work. Prerequisites: Acting and Movement I (MUAC 2415).

**MUAC 2820 Introduction to Piano Pedagogy I (2 Credits)**

Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

**MUAC 2821 Introduction to Piano Pedagogy II (2 Credits)**

Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

**MUAC 2940 Choral Conducting (2 Credits)**

Beginning course in choral conducting. Fall quarter only.

**MUAC 2950 Orchestral Conducting (2 Credits)**

Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Prerequisite: MUAC 1920 Basic Conducting. Spring quarter only.

**MUAC 2970 Wind Conducting (2 Credits)**

Beginning course in wind conducting. Winter quarter only.

**MUAC 2988 Study Abroad Resident Credit (0-18 Credits)****MUAC 3002 Form and Analysis (4 Credits)**

Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2006.

**MUAC 3006 Post-Tonal Theory: Mode/Rhythm (4 Credits)**

Works of Stravinsky, Bartok, Satie, Debussy, and others are studied, employing various transformational theories, diatonic set theory, and 20th-century metric theories. Prerequisite: completion of Music Theory I and Music Theory II sequences.

**MUAC 3007 Post Tonal Theory and Analysis: Set Theory and Serialism (4 Credits)**

This course has two components: (1) A study of selected analytical techniques for post-tonal music, primarily pitch-class set theory and twelve-tone (serial) theory; (2) Analysis of representative works from the twentieth century, focusing on the music from the first half of the century (Schoenberg, Berg, Webern, Stravinsky, and Bartok). Six credits of Theory 2 or permission of instructor required. Cross listed with MUAC 4007.

**MUAC 3008 Modal Counterpoint, Renaissance Vocal Style (4 Credits)**

This course teaches students to compose vocal music in the Renaissance style. After surveying species counterpoint, students learn imitative techniques en route to composing three- and four-voice textured pieces. Cross Listed with MUAC 4008.

**MUAC 3009 Pedagogy of Music Theory (4 Credits)**

Materials, devices, techniques of teaching theory. Students must have successfully completed undergraduate music theory or passed graduate review theory. Cross listed with MUAC 4010.

**MUAC 3014 Music-Theoretical Approaches to Popular Music (4 Credits)**

This course is an environment for engaging with generating music-theory scholarship on popular music. "Popular music" in this context refers to commercially successful music (e.g., hip-hop, rock, pop, country, etc.) as well as the predecessors of those genres (e.g., bluegrass, funk, soul, etc.). The course surveys a scholarly ecosystem that includes both analytical methods designed for older repertoires as well as newer methods that engage popular music's current particularities. These methods explore form, rhythm and meter, timbre, modality, harmony, race & ethnicity, gender & sexuality, interaction & improvisation, music instrument studies, text expression, multimedia, music & technology, philosophical concerns of ontology and groove, and more. The structure of the course is not set by the instructor in advance. Rather, the instructor and individual students will devise a grading contract in the first week that guides the topics in which the students will complete their work. The aim of the work is the further students' scholarly agendas and improve their capacity to read and present secondary scholarship, write and present their own scholarship, transcribe music, and provide feedback to their peers. Cross Listed with MUAC 4014.

**MUAC 3023 Rhythm & Meter in Music (4 Credits)**

Rhythm pertains to experienced or measured durations in music. Meter pertains to the cyclic organization of music's durations. A hegemonic view of meter emerged in music theory and related disciplines in the mid-20th century, one most appropriate to Western classical music and, to a lesser extent, Anglo-American popular music. This view holds that meter "in music" consists of (1) hierarchically arranged beats (2) whose durations are nominally equivalent and (3) whose onsets among coordinated musicians are nominally aligned. This course examines rhythm and meter by interrogating three components of the standard view of the topic. Looking at Western classical music, but also traditional and commercial music from Africa and the African diaspora, we will explore the nature of meter and rhythm in music where durations might not be arranged hierarchically, of equal length, or aligned.

**MUAC 3024 Introduction to Tonal Analysis (4 Credits)**

This course introduces students to various types of musical analysis for tonal music that are more advanced than what is introduced in first- and second-year music theory. Prerequisites: MUAC 2006 and MUAC 2022.

**MUAC 3025 Topics in Analysis: Brahms (4 Credits)**

This course explores a variety of analytical techniques used to understand the compositions of Brahms. We examine works by musicologists and theorists such as Allen Forte, Walter Frisch, Arnold Schoenberg, Carl Schachter, and David Lewin. Issues discussed include developing variations, rhythm, form, and ambiguity in Brahms. We cover a wide range of repertoire, ranging from piano works to choral works to symphonies.

**MUAC 3026 Sonata Form (4 Credits)**

This is a team-taught course on the topic of "sonata form," one of the central musical structures in classical Western art music, from Mozart to Brahms and beyond. The course will feature a dialogue between history, analysis, and performance, reflected in class activities at multiple levels.

**MUAC 3027 Arranging for the Classical Musician (4 Credits)**

Music initially created for one context becomes music for a new context through the art of arranging. How much of your professional life will you spend performing or teaching arrangements? Have you ever thought about writing your own? Is an arrangement automatically less worthwhile, or can it ever surpass the quality of the original? Class sessions will be spent studying arrangements of music by Bach, Björk, Chopin, Michael Jackson, Mahler, et al. as arranged by Brahms, Jacob Collier, Gil Evans, The Piano Guys, Ravel, and others. Students will also receive individual guidance as they plan, write, and perform arrangements of pieces and songs of their choice.

**MUAC 3030 Seminar-Performance Psychology (2 Credits)****MUAC 3058 Audio Production III (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the second sequence in the audio production concentration.

**MUAC 3059 Audio Production II (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the first sequence in the audio production concentration.

**MUAC 3060 Extra-Musical Roles of the Music Director (1 Credit)**

Under the supervision and guidance of the director of orchestral studies, students will gain hands-on, actual experience with many of the non-musical tasks that conductors face. These experiences will include managing orchestra personnel, librarian activities, running auditions, and recruiting. Open only to Artist Diploma in orchestral conducting students.

**MUAC 3061 Audio Production I (4 Credits)**

An introduction to analog and digital synthesis, MIDI sequencing, and DAW software.

**MUAC 3064 Audio Production IV (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the third sequence in the audio production concentration.

**MUAC 3065 Audio Production V (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as onsite training at Lamont School of Music performances. This is the fourth sequence in the audio production concentration.

**MUAC 3066 Audio Production VI (4 Credits)**

This course is an advanced seminar wherein students propose and execute complex, professional level audio production projects toward the goal of establishing a professional audio production portfolio. Students may also incorporate pre-production work in preparation for the audio production concentration senior project. Students serve as engineers and producers at Lamont School of Music recording sessions and live performances.

**MUAC 3089 Model Composition (4 Credits)**

Students in this course deepen their understanding of musical styles and techniques by composing works that imitate major composers before 1900. Music by each student is performed in a final recital. Prerequisite: Tonal Counterpoint, equivalent coursework from another institution, or permission of instructor. Cross listed with MUAC 4090.

**MUAC 3092 The Business Side of Music (4 Credits)**

A personal and clinical approach to developing music business skills and strategies.

**MUAC 3106 The Dynamic Body: Foundations in Movement Methods and Body Awareness Principles (2 Credits)**

An introduction to fundamental body awareness principles in relationship to physical performance skills for vocal performance majors. Methods for heightening kinesthetic awareness will be learned in the form of movement explorations, improvisations, structures, and learned phrases to gain somatic insight into the performer's sense of verticality in all places and dimensions of space. The concepts of the body in motion will be a primary context and focus for the progression of studies or 'études', and for the reflective and analytical processes that include observation, journaling, discussion and peer commentary. Studio activities in solo, partnering, and group work will further the student's knowledge of how to become more responsive, expressive, and communicative when interacting with the surrounding environment and with others. Integrated with the body-mind practice and theoretical study, students will be encouraged to inquire, examine and articulate possible philosophies regarding why the mastery of the performer's physical body requires an essential sense of discipline that is cultivated in the performing arts, and how the somatic practices being investigated can serve his/her performance presence and support one's vocal training and health for the long-term.

**MUAC 3121 Seminar in Music Theory (4 Credits)**

Seminar in Music Theory focuses on special topics chosen by faculty members. Students should expect rigorous course work and a final project or paper. Cross listed with MUAC 4121.

**MUAC 3124 Composition Seminar (1 Credit)**

Composition Seminar focuses on the reading and performance of modern scores by Lamont and recognized composers. Any student composing music or wishing to perform new compositions at Lamont may register and participate. Requirements for composers include the completion, rehearsal and performance of a piece of music at the New Music Ensemble concert each quarter. Non-composers are required to rehearse and perform at the New Music Ensemble concert. Composers enrolled in the ensemble may be required to play compositions submitted as well.

**MUAC 3161 Topics in Modern Opera (4 Credits)**

This course involves the close study of selected twentieth- and twenty-first-century operas, their respective musical styles and their videotaped performances. This study will include such issues as opera and film, opera libretto criticism, and the personal and public politics of the opera.

**MUAC 3165 Music Theater Survey (2 Credits)**

A historical overview of the American Broadway musical, performance technique, audition preparation and repertoire. Must be prepared to sing and perform.

**MUAC 3166 Music Theater Survey II (2 Credits)**

Fundamentals of music theater performance will be addressed through readings of the text, "Acting in Music Theater" by Joe Dee and Rocco dal Vera. Application of these techniques through performance of musical theater literature will be incorporated during the last number of weeks. Additionally, we will highlight prominent composers and their works throughout the quarter.

**MUAC 3212 Digital Music Creation (4 Credits)**

In this course, students will create, produce, and present their own digital music. Using one of the industry's leading digital music creation platforms (such as Ableton Live), students will learn the history of electronic music creation, create their own digital music portfolios, become familiar with relevant copyright issues, and oversee public performances of their music.

**MUAC 3240 Vocal Pedagogy I (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3241 Vocal Pedagogy II (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3243 Recitative in Opera (2 Credits)**

Working as a professional singer your proficiency with recitative should be high. Though a major part of many operas recitative is still often overlooked as a skill set. Through this course we will explore several different approaches to recitative from various compositional styles and time periods.

**MUAC 3282 Suzuki Violin Seminar II (2 Credits)****MUAC 3283 Suzuki Violin Seminar II (2 Credits)****MUAC 3284 Suzuki Violin Seminar II (2 Credits)****MUAC 3439 Teaching Note Reading (2 Credits)****MUAC 3460 Suzuki Cello Practicum (1 Credit)**

The Suzuki Cello Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and philosophy covered in the seminar classes. The course will also include some lecture and discussion on developing teaching strategies for effective technical development and communication in lessons.

**MUAC 3463 Suzuki Cello Seminar I (2 Credits)****MUAC 3464 Suzuki Cello Seminar I (2 Credits)****MUAC 3465 Suzuki Cello Seminar I (2 Credits)****MUAC 3466 Suzuki Cello Seminar II (2 Credits)****MUAC 3467 Suzuki Cello Seminar II (2 Credits)****MUAC 3468 Suzuki Cello Seminar II (2 Credits)****MUAC 3470 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3471 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3472 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3477 Suzuki Violin Practicum (1 Credit)**

The Suzuki Violin Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and teaching philosophy covered in the seminar classes. The course will include some lecture focusing on teaching strategies for effective technical development and effective communication in the lessons. Prerequisite: MUAC 3470.

**MUAC 3492 History of Opera: From Monteverdi to Minimalism and Beyond (4 Credits)**

This seminar course surveys the history of opera from the invention of the genre c. 1600 to the present day. In addition to assigned excerpts, students view three complete operas during the quarter. Primary and secondary source readings supplement the required text and class lectures. Students write a research paper that may examine some aspect of a particular opera or that may compare a particular aspect found in several operas. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3493 Approaches to American Popular Music (4 Credits)**

We explore a number of topics involved in the study of popular music, including tensions between analytical and cultural approaches; issues of race, class, and gender; and constructions of authenticity and personae. Listening and reading are wide-ranging, encompassing diverse styles. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3494 Music and Belief in World Cultures (4 Credits)**

How does music affect religious experience and how does religion shape musical practice? Why is music vital in some religious rituals and expressly banned in others? If humans use music to create, reflect, and comment upon the worlds they experience and imagine, then the use of music in religious practice is among its most powerful and ephemeral. Students are introduced to a wide range of musical traditions and their relationship to many of the world's religions, including Islam, Judaism, Christianity, Buddhism, Hinduism, Native American belief and the religious practices of Africa and its diaspora. Readings, lectures and discussions are supplemented by guest lecture demonstrations, film/video screenings and hands-on workshops. Prerequisite: Junior or senior standing required; sophomores allowed with instructor approval.

**MUAC 3497 Studying Music in the Field: Theory and Method in Ethnomusicology (4 Credits)**

This course introduces issues that motivate ethnomusicological research and techniques for carrying out fieldwork, the ethnographic method which has largely come to define the discipline. Our primary texts include Bruno Nettl's classic text, *The Study of Ethnomusicology*, and *Shadows in the Field*, a seminal volume of essays discussing ethnomusicological fieldwork. This course also involves hands-on experience in some of the major fieldwork techniques, including field observation and writing fieldnotes, musical transcription and interviewing. This course culminates in a field research project in a Denver musical community determined in consultation with the professor. Note: this course is not open to freshman; sophomores with permission of instructor.

**MUAC 3498 Music, Dance, and Everyday Life in South Asia (4 Credits)**

This course serves as an introduction to a diverse array of performance traditions from the South Asian subcontinent. We examine the significance of music and dance in everyday life, the influence of media technology, and the relationship of performance to issues such as caste, gender, nationalism and globalization. Class discussions are supplemented by guest lectures, hands-on workshops and film screenings. Our study of music outweighs that of dance, and a music background is strongly encouraged. This course is not open to first-year students. Sophomores allowed with instructor approval.

**MUAC 3499 Topics in Musicology (4 Credits)**

This course focuses on particular musicology topics determined by the instructor. Course materials may include primary and secondary source readings, theoretical writings from other disciplines, a variety of listening assignments, film/video screenings, guest lecture demonstrations, and hands-on workshops. Students are expected to participate in class discussions and may be asked to write short response papers and/or to give short oral presentations. The course concludes with individual research projects, presented orally and in written form, on topics chosen and developed in consultation with the instructor. Expectations for graduate students enrolled in the course are commensurate with their training and background as compared to undergraduates enrolled in the course. In some cases, with the prior consent of the instructor, students may choose to combine performance with the final research project. Prerequisite: Junior standing.

**MUAC 3502 Gender & Genre in World Music (4 Credits)**

How are concepts of "maleness," "femaleness" and other gendered categories constructed, maintained, and contested through musical performance? This course examines the issues explored and debated in recent studies of gender relation to music of various cultures including Western art music, popular music, and other world genres. We focus on reading and discussion of ethno-musicological and anthropological ethnographies, musicological studies focusing on gender and theoretical writings from gender and women's studies. Lectures and discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores can register with instructor approval.

**MUAC 3511 Mahler and Musical Culture (4 Credits)**

We explore Gustav Mahler's life, historical context, and music, all in relation to one another. The focus is on recent and important scholarly approaches to this conductor and composer. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3512 Stories of Music History (4 Credits)****MUAC 3513 Wagner and the Ideology of the Artwork (4 Credits)**

We explore Richard Wagner's music dramas, particularly the Ring operas, as well as theories and ideologies surrounding them. The focus is on recent and important scholarly approaches. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3515 Introduction to Baroque Performance Practice (2 Credits)**

This class serves to familiarize musicians with the stylistic parameters, aesthetic principles, and performing techniques common in Western art music of the Baroque era (ca. 1600–1750), as well as the historical and cultural context of the period. Students will learn how to apply these performance guidelines to their own interpretation of Baroque music.

**MUAC 3520 Topics in Baroque Music (4 Credits)**

Through the study of selected Baroque instrumental, vocal and operatic works, this seminar course considers various approaches to performance practice issues such as "authenticity," the "historically informed" performance, period instruments, ornamentation, continuo realization, and editing. Facsimile editions and primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of Baroque music with an emphasis on performance practice. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3521 Topics in World Music (4 Credits)****MUAC 3536 Topics in Hindustani Music (4 Credits)**

This course explores the melodic system (raga) and rhythmic system (tala) of Hindustani music, the classical music of North India. These conceptual frameworks act both as sound structures to be realized in improvised performance and as aesthetic entities manifested in the related traditions of dance, iconography, and film. A major emphasis of this course is developing an understanding of raga and tala as musical structures through intensive listening as well as practical instruction. Accordingly, each class incorporates hands-on music-making through singing, rhythmic exercises, and/or dance. By the end of the term, students will become familiar with several ragas and talas and the stages by which they are developed in performance. A second, equally important objective is to learn to appreciate ragas as aesthetic entities. We analyze their musical characteristics as well as the "extra-musical" characteristics of sentiment (rasa), performance time and/or season and iconographic associations (ragamala painting). Must be at least junior standing or obtain instructor approval.

**MUAC 3537 Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music (4 Credits)**

Andraé Crouch, Walter Hawkins, and Richard Smallwood have each influenced the course of black gospel music for the last 50 years. Through listening to recordings, watching video performances, score analysis, readings, performance, and improvisation, this course will examine the music of these unique composer/performers and how their contributions have impacted black gospel music. Rather than simply read about and analyze the music, students will play the music of these composers and literally have hands-on experience with the colors and textures of the music that has shaped church music and the gospel music industry for the last five decades.

**MUAC 3538 Psalms, Hymns, and Spiritual Songs: The Music of the African American Worship (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. Cross listed with MUAC 4537.

**MUAC 3539 Music, Politics, and Policy (4 Credits)**

This course examines the ways in which policies and politics engage with popular, jazz, folk, and classical musics around the world. Students will explore contemporary and historical cases in which governments and NGOs foster, transform, reject, and otherwise use musics to promote their own ideas about local economies, national cultures, diplomacy, democracy, innovation, cultural diversity, and even criminal law. We ask, can music promote peace? Democracy? How? How do governments create local and national music scenes? Which local and national cultures do they promote and protect? To what end? We look at how the Cuban government has embraced rap music as emblematic of the nation's revolutionary ethos; how the United States government used jazz as a diplomatic tool during the Cold War; how NGOs in Israel and Palestine used popular and classical musics to promote peace and understanding; how American courts have used rap music as evidence in criminal cases; and how funding and intellectual property laws impact musical ownership, tradition, innovation, and creativity. Cross listed with MUAC 4539.

**MUAC 3544 Music and Activism (4 Credits)**

In many times and places, people around the world sing, chant, and drum in the streets. Their lived experiences don't line up with the equality and opportunity their governments claim to champion. Music is an integral part of their advocacy work. They play and sing as they draw attention to injustices, foster cohesion and community, communicate messages (both covertly and forcefully), express pain, joy and pride, energize and sustain themselves, as well as (de)humanize themselves and others. This course explores the special place music has in activism around the world. We examine protest movements such as the South African anti-apartheid movement, the American Abolitionist and Civil Rights movements, American/European White Nationalist movements, the Arab Spring, and the worldwide Black Lives Matter movements. We will explore community music projects with social justice agendas such as Youth on Record, The Spirituals Project, and the West-Eastern Divan Orchestra. We ask, why is music a particularly important part of activist work? What special place does it have? How is it used for both good and bad? For community mobilization, peace, and violence? Drawing on the fields of ethnomusicology, musicology, and cultural policy, we explore music, not just as a means to achieve certain ends, but as integral to the way humans position themselves in the world and advocate for themselves and others. Cross listed with MUAC 4540.

**MUAC 3545 The Making of Romantic Music: Paris and Leipzig in the 1830s (4 Credits)**

With a view to identifying the various interdisciplinary factors that led to the making of romantic music, this seminar course focuses on musical life in Paris and Leipzig in the 1830s. Specific attention is paid to the music of Chopin, Berlioz, Mendelssohn, and Robert and Clara Schumann and the personal and musical connections between these composers. Primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of music and/or musical life in the 1830s. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3578 Advanced Composition (4 Credits)**

Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression.

**MUAC 3590 Guitar History (4 Credits)****MUAC 3630 Basic Jazz Arranging (2 Credits)**

A study and practical analysis of the foundational techniques involved with composing and orchestrating for small group jazz ensembles. This course will cover the basics of form, notation, and orchestration in the small group jazz idiom, consisting of one to four horns and/or vocals, guitar, piano, bass, and drums.

**MUAC 3650 Orchestral Excerpts-Cello (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3655 Orchestral Excerpts-Bass (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock audition and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3660 Orchestral Excerpts-Violin (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3661 Orchestral Excerpts Viola (4 Credits)**

This course explores excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students are given a list of excerpts and coached on how to prepare them. They participate in mock auditions and receive feedback. This course also addresses the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3662 Orchestral Studies for Brass (2 Credits)**

Study of orchestral literature brass players are likely to be asked to play at auditions for professional orchestras. Undergraduate participants should have passed their Sophomore Proficiency jury with distinction.

**MUAC 3663 Orchestral Excerpts, Viola II (4 Credits)**

Companion course to Orchestral Excerpts Viola I, this section expands the repertoire list beyond the standard works used for auditions today. In addition to further honing basic requisite material from section I, students study and prepare less frequently required works and principle viola solo repertoire. There is more extensive discussion of the audition process and mock auditions as a part of the course. While it is advised and preferable that students complete the first section of this course it is possible to take the course with the approval of the instructor.

**MUAC 3677 Bow Art Ensemble (0-1 Credits)**

The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

**MUAC 3682 Topics-Orchestral Repertoire (4 Credits)**

We explore the history of the orchestra and orchestral literature from the baroque through modern eras, and examine a number of test cases in which conventional understanding has been challenged in recent years. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3684 Choral Literature I (2 Credits)**

This course is an analysis of the development of choral repertoire from the Middle Ages through the Baroque era.

**MUAC 3686 Choral Pedagogy I (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3688 Choral Pedagogy II (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3689 Choral Literature II (2 Credits)**

This course is an analysis of the development of choral repertoire from the Classical period until the present day. This course is meant to be taken in sequence after Choral Literature I.

**MUAC 3698 Carillon History and Mechanics (4 Credits)**

A survey of the evolution of signal bells into the musical instrument known as the carillon. This subject is often called "campanology." The history will be traced from the 16th century in the Low Countries through modern times in Europe, North America, Australia/New Zealand and Japan. Topics will include bell foundries, bell casting and tuning, bell chambers, playing actions, carillonneurs, carillon schools, carillon organizations, the use of the carillon in its various regions and basic carillon maintenance.

**MUAC 3700 Carillon Repertoire (4 Credits)**

A survey of the music expressly produced for carillon from the earliest times through the present. Categories include automatic music (e.g., De Sany, Wyckaert, Eggert), the earliest compositions for manual play (Van den Gheyn and the Louvain manuscripts of the 18th century), and the 20th-century categories: Flemish, Dutch, French and North American. Mainstream publishers as well as incidental publications will be covered. The labs will focus on analysis through recordings and live performances by participants.

**MUAC 3706 Pedagogy & Repertoire Tuba (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the tuba.

**MUAC 3708 Pedagogy & Repertoire Horn (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the horn.

**MUAC 3710 Carillon Pedagogy I (2 Credits)**

An exploration of the physical and psychological elements that can lead to effective carillon teaching: technique, handling/pedaling ("fingering" on the piano), and developing an attitude that fosters successful performance.

**MUAC 3712 Pedagogy & Repertoire Trombone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trombone.

**MUAC 3717 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3718 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3719 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3724 Pedagogy & Repertoire Guitar (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the guitar.

**MUAC 3726 Pedagogy & Repertoire Viola (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the viola.

**MUAC 3727 Pedagogy & Repertoire Viola (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the viola.

**MUAC 3730 Pedagogy & Repertoire Cello (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the cello.

**MUAC 3733 Pedagogy & Rep Double Bass (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the double bass.

**MUAC 3736 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3737 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3738 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3739 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3740 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3742 Pedagogy & Repertoire Trumpet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trumpet.

**MUAC 3747 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3748 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3749 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3751 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3752 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3753 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3754 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3755 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3757 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3758 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3761 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3762 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3765 Professional Brass Techniques (4 Credits)**

This 4-hour per week course will be divided into a lecture/seminar for two hours and performance practicum for two hours. Topics discussed and performed include orchestral playing, sight reading, practice, solo performance, jazz survival, ornamentation, transposition, and warm-up/maintenance routine.

**MUAC 3801 Introduction to Schenkerian Analysis (4 Credits)****MUAC 3804 Topics in Music (1-5 Credits)****MUAC 3810 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3811 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3812 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3822 Piano Repertoire I (2 Credits)**

Performance and analysis.

**MUAC 3823 Piano Repertoire II (3 Credits)**

Performance and analysis.

**MUAC 3824 Piano Repertoire III (3 Credits)**

Performance and analysis.

**MUAC 3830 Advanced Jazz Arranging I (2 Credits)**

A study and practical analysis of small to medium jazz ensemble writing with extended instrumentation. Consisting of nonette-style orchestration including orchestral instruments such as horn, tuba, woodwinds, and voice along with extended electronic textures, this course will cover the basics of from, notation and orchestration in the 21st Century hybrid small to medium size jazz ensemble idiom.

**MUAC 3831 Advanced Jazz Arranging II (2 Credits)**

A study and practical analysis of large "studio orchestra" type jazz writing with extended instrumentation. Consisting of medium to full orchestral string section, woodwinds, harp, percussion, brass plus jazz rhythm section, voices, and soloists. Exemplified by such modern ensembles as Snarky Puppy with the Metropole Orchestra, this will be a full studio orchestra with modern 21st Century jazz, rock, and pop sensibilities. String bowings and aspects of dynamic ensemble balances in the studio orchestra will be studied, as well as writing for the harp.

**MUAC 3832 Arranging for Computer-Based Media (2 Credits)**

This course will be an introduction to techniques of composition and arranging music for media, with an emphasis on practical assignments that the student will encounter in the professional world of media composition. Students will learn how to work in collaboration with filmmakers, master techniques of timing and synchronization, use traditional techniques of composition/arranging/orchestration to serve dramatic needs, and work efficiently in the recording studio under time and budget restraints.

**MUAC 3844 21st Century Artistry I (2 Credits)**

21st Century Artistry I is a course of study that examines the full spectrum of attributes and skills necessary for a student to "survive and thrive" in the every-changing landscape of the 21st Century. With a two-fold approach of examining effective strategies for a "modern artistry mindset" along with extensive case studies of successful 21st Century professionals, this course will offer the student a wide array of important recourses to guide their career. The case study aspect of 21st Century Artistry I will be based on multiple evaluations of successful artists in the 21st Century in partnership with local presenters.

**MUAC 3845 Writing for The Modern Large Jazz Ensemble I (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Frank Foster, Sammy Nestico, Slide Hampton, Bob Brookmeyer and other modern practitioners. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3846 Writing for the Modern Large Jazz Ensemble II (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Bob Brookmeyer, Maria Schneider, Gil Evans, Darcy James Argue, and others. A special emphasis will be placed on creating full works for the large jazz ensemble that uses textures and modern extended form approaches indicative of these artists. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3847 Hip-Hop: Theory and Practice (4 Credits)**

Students in this class will examine the socio-cultural, economic, and political significance of hip-hop as a medium of expression for youth around the world. Through analysis of popular writing and media, as well as academic texts, we critically explore issues of race, social justice, masculinity, misogyny, censorship, technology, and intellectual property, as they relate to mainstream and underground hip-hop in America. Having discussed hip-hop's roots in the U.S., the remainder of the quarter will be devoted to tracing hip-hop's global routes.

**MUAC 3860 Basic Jazz Improvisation (4 Credits)**

The study of jazz improvisation techniques and forms. Open to music majors or by instructor permission.

**MUAC 3870 Jazz Improvisation & Composition (4 Credits)**

Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student's improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

**MUAC 3910 Orchestration (4 Credits)**

Techniques of instrumental scoring.

**MUAC 3933 Graduate Music History Review (0 Credits)****MUAC 3959 Movement and Expression for Conductors (4 Credits)**

Conductors use their whole body to communicate and elicit successful performances from their ensemble. If you have unnecessary tension or lack of ease in your body, this is communicated unconsciously to your ensemble, hindering quality of performance. Additionally, physical tension can prevent your ability to communicate and think clearly under pressure. This course is an exploration of freedom of movement and the physicality of musical expression. Classes will include group activities in free-movement, dance, acting, keeping your cool, poise, balance, tension release, as well as hands-on instruction applying Alexander technique to your conducting.

**MUAC 3960 Advanced Orchestral Conducting (2 Credits)**

Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Required of MM Conducting students with Choral or wind concentrations. Open to other students with permission of instructor. Prerequisite: Permission of instructor (not needed for MM Conducting students with Choral or Wind concentration). Fall quarter only.

**MUAC 3961 Advanced Choral Conducting (2 Credits)**

Conducting complex choral works, including those with instrumental accompaniment; phrasing, interpretation and score reading. Prerequisite: MUAC 2940. Fall quarter only.

**MUAC 3962 Advanced Wind Conducting (2 Credits)**

Conducting complex wind compositions; phrasing interpretation and score reading. Prerequisite: MUAC 2970. Spring quarter only.

**MUAC 3973 Advanced Wind Literature I (2 Credits)**

This course is an overview of wind literature appropriate for junior high school, high school, college and professional programs including strategies in effective programming and creation of appropriate program notes.

**MUAC 3974 Advanced Wind Literature II (2 Credits)**

An in-depth study of successful compositional techniques by prominent composers of wind literature. Prerequisite: MUAC 3973.

**MUAC 3980 Advanced Jazz Improvisation and Composition (4 Credits)**

A three term sequence continuing the in-depth study of the theory, performance practices, style, and history of jazz improvisation and composition. Prerequisite: satisfactory completion of the three terms of Jazz Improvisation and Composition or consent of the instructor.

**MUAC 3988 Study Abroad Resident Credit (0-18 Credits)****MUAC 3990 Internship in Music (0-8 Credits)**

Internship in Music will offer opportunities for music majors to experience actual music related careers within a sponsoring music organization chosen by the student and accepted by the supervising faculty of the School of Music.

**MUAC 3991 Independent Study (1-10 Credits)****MUEN 1701 IPA & Lyric Italian Diction (1 Credit)**

Learn the practical application of proper pronunciation in Italian for singing, a necessary tool for communication with an audience. Preparation for a group Liederaabend at the end of the quarter.

**MUEN 1702 Lyric French Diction (1 Credit)**

Learn the practical application of proper pronunciation in French for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

**MUEN 1703 Lyric German Diction (1 Credit)**

Learn the practical application of proper pronunciation in German for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

**MUEN 1988 Study Abroad Resident Credit (0-18 Credits)****MUEN 2988 Study Abroad Resident Credit (0-18 Credits)****MUEN 3025 Ensemble Block (3 Credits)**

Ensemble Block can be taken by students who are assigned to multiple ensembles in one quarter without full participation in each group. Instructor permission is required for registration.

**MUEN 3029 Steel Drum Ensemble (0-1 Credits)**

The steel drum music of Trinidad and Tobago as well as other styles of music from around the world are studied and performed by this ensemble. Participation in this ensemble does not require music notation. Participation in the ensemble is limited; therefore, students are selected by a simple audition process.

**MUEN 3037 Vocal Repertoire Combo (0-1 Credits)**

The Vocal Repertoire Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz solo repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

**MUEN 3038 Vocal Jazz Combo (0-1 Credits)**

The Vocal Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

**MUEN 3041 North Indian Classical Ensemble (0-1 Credits)**

The arts of India are distinguished by their close interrelationship; rhythm, melody and movement are all encompassed by the term "sangeet." In keeping, DU's North Indian Classical Ensemble is dedicated to the practice of all three of these arts, through singing, rhythmic recitation and dance. Participation in this ensemble involves studying the ornate and highly refined systems of Hindustani music and Kathak dance. No prior experience is necessary; all that is required is a positive attitude and a desire to learn!

**MUEN 3045 Flex Jazz Ensemble (0-1 Credits)**

The Flex Jazz Ensemble is a modern jazz group with open-ended instrumentation. The ensemble consists of traditional jazz instruments and vocalists as well as nontraditional jazz instruments (such as double reed, French Horns, strings, etc). While there is no specific instrumentation for the ensemble, the core of the group will always be the traditional modern jazz rhythm section: piano (keys-synth), bass (acoustic and electric), drums (plus an extra percussionist as needed), and guitar (hollow body and Stratocaster-styles with the full range of pedals and gear. With the addition of non-traditional instrumentation, the ensemble reaches out to the classical side of Lamont to give those students a jazz opportunity. Along with the regular fare of programmed concerts, this ensemble also provides opportunities to other departments (theatre, creative writing, studio art, EDP, etc) to incorporate their disciplines in performances.

**MUEN 3046 Indonesian Music Ensemble (0-1 Credits)**

This class provides a practical and theoretical introduction to Indonesian performance traditions from the islands of Bali and Java. Through hands-on instruction and oral transmission, students will learn a variety of gamelan (gong/chime ensemble) traditions. While learning this sophisticated cyclic music, class discussions, assigned readings, films, and guided listening will further familiarize students with the social and cultural meanings of the musics performed in class. Additionally, students will have the opportunity to learn basic hand, foot, and eye movements for Balinese and Javanese dance, as well as to study kecak, a Balinese vocal music that imitates the sound of the gamelan. The course will culminate in an end of the quarter concert.

**MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)**

The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all "classical" and "jazz" instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3048 Bluegrass Ensemble (0-1 Credits)**

In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers' style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3100 Lamont Jazz Small Group (0-1 Credits)**

All Lamont jazz small groups will focus on the basic elements of communication and musicality that make up high-level jazz performance practices. Students will transcribe, compose and or arrange their own material and will have numerous opportunities to perform each quarter. Admission to all small groups is by audition only.

**MUEN 3677 Bow Art Ensemble (0-1 Credits)**

The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

**MUEN 3710 Opera (0-1 Credits)**

Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3712 Lamont Chorale (0-1 Credits)**

The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

**MUEN 3720 Pioneer Pep Band (0-1 Credits)****MUEN 3730 American Heritage Chorale (1 Credit)**

This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3731 The Spirituals Project Choir (0-1 Credits)**

This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3740 Voces Fortes (0-1 Credits)**

Voces Fortis is a low voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**MUEN 3750 Modern Music Ensemble (1 Credit)**

The 20th- and 21st- Centuries have produced some of the most expressive, intriguing, and diverse music ever written. In this course, students have the opportunity to prepare and perform chamber music by 20th-Century masters, as well as recent works by living composers and new pieces written for them by students. This repertoire often involved unusual combinations of instruments (potentially including strings, woodwinds, brass, percussion, plucked instruments, keyboards, vocals, and electronics), providing an opportunity for students to work in less familiar ensembles. Students may also participate in the course by conducting or composing. The course is limited to music majors who are graduate students or advanced undergraduate students. Students in their first or second undergraduate year, and music non-majors may enroll with instructor approval.

**MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3752 Lamont Wind Ensemble (0-1 Credits)**

Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)**

Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)**

The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3769 Organ Accompanying (0-1 Credits)**

Major choral/vocal and major instrumental repertoire with organ accompaniment are studied and prepared for possible performance with chamber groups or local professional/church choirs.

**MUEN 3770 Chamber Ensemble-Piano (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3772 Chamber Ensemble-Harp (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3774 Chamber Ensemble-Brass (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3775 Piano Accompanying (0-2 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3776 Chamber Ensemble-Percussion (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3777 Chamber Ensemble-Strings (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3778 Chamber Ensemble-Woodwind (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3781 Chamber Ensemble-Guitar (0-2 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3800 Vocal Chamber Ensemble (0-1 Credits)**

A small group of outstanding singers interested in singing soloist vocal chamber music.

**MUEN 3900 Voces Aureas (0-1 Credits)**

Voces Aureas is a treble voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**MUEN 3988 Study Abroad Ensemble (2 Credits)**

Ensemble credit for music majors in the Study Abroad Program. Students must have consulted with a Lamont ensemble director for approval to register.

**MUPR 2988 Study Abroad Resident Credit (0-18 Credits)****MUPR 2990 Study Abroad Applied Lessons (4 Credits)**

Applied lessons for students in the Study Abroad Program. Restricted to Bachelor of Music students only.

**MUPR 3120 Alexander Technique (2 Credits)**

The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion.

**MUPR 3121 Alexander Technique (4 Credits)**

The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns may affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion. This class is tailored to the needs of BM students who are experiencing pain or injury and cannot take their regular studio lesson in a given quarter.

**MUPR 3190 Jazz Piano (2 Credits)****MUPR 3210 Piano (2 Credits)**

**Ricardo Iznaola**, Professor, Emeritus, MM, Royal Conservatory of Madrid

**David Kaslow**, Assistant Professor, Emeritus, MM, Manhattan School of Music

**Theodor Lichtmann**, Professor, Emeritus, MM, The University of Texas at Austin

**Robert Penn**, Associate Professor, Emeritus, MA, University of Iowa

**Richard Slavich**, Professor, Emeritus, MM, Indiana University

**Steve Wiest**, Professor, Emeritus, MM, University of North Texas

## Philosophy

Office: Sturm Hall, Room 257

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2063

Email: [philosophy@du.edu](mailto:philosophy@du.edu) ([philosophy@du.edu?subject=website%20inquiry](mailto:philosophy@du.edu?subject=website%20inquiry))

Web Site: [https://](https://liberalarts.du.edu/philosophy/) (<https://liberalarts.du.edu/philosophy/>)liberalarts.du.edu/philosophy (<https://liberalarts.du.edu/philosophy/>)

The curriculum in philosophy is designed to give students a broad grounding in the literature and methods of philosophy and in philosophical approaches to contemporary problems. Philosophy is inherently foundational for all other disciplines and philosophical training sharpens the student's ability to reason soundly, to formulate basic concepts and questions clearly and to work intelligently at solving human problems.

The philosophy curriculum is balanced among historical study, philosophical problem areas and applied courses. Graduates from the philosophy department have distinguished themselves in a variety of fields. A 1982 graduate was recently nominated for a Pulitzer Prize and numerous former

students have attended some of the country's finest graduate programs. Study in philosophy provides an excellent basis for careers in law, business, government, journalism, teaching, social work and the sciences.

# Philosophy

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

Students complete a minimum 40 hours of philosophy coursework. At least 16 of those hours must be at the 3000 level.

Students will take one course in each of three required areas (logic, history, and contemporary) – the most frequently taught courses are shown below.

See Courses by Category tab for complete listing.

40 credits above the 1000 level, may include the following:

Code	Title	Credits
<b>Logic Examples *</b>		<b>4</b>
PHIL 2040	Practical Logic	
PHIL 2160	Symbolic Logic	
PHIL 3333	Logic, Language, and Metaphysics	
<b>History Examples *</b>		<b>4</b>
PHIL 2110	Classical Greek Philosophy	
PHIL 2144	20th-Century Philosophy	
PHIL 3003	Plato's Theory of Knowledge	
PHIL 3010	Great Thinkers: Aristotle	
<b>Contemporary Examples *</b>		<b>4</b>
PHIL 2100	Philosophy of Mind	
PHIL 2101	Philosophy of Language	
PHIL 2120	Nature & Limits of Human Knowledge	
PHIL 2200	Social & Political Philosophy	
PHIL 3070	Great Thinkers: Hegel	
PHIL 3075	Marxism	
PHIL 3178	Metaethics	
PHIL 3466	Contemporary Continental Philosophy	
PHIL 3612	AI and Robotics	
Courses at the 3000 level		16
Select an additional 12 credits of philosophy beyond the 1000 level		12
PHIL 3999	Philosophy Assessment (must complete prior to graduation)	0
<b>Total Credits</b>		<b>40</b>

\* PLEASE NOTE: These are not all the courses that can satisfy these requirements; however these are frequently taught. Other courses may be selected with advisor approval.

### Area of Specialization in Critical Theory

Students may pursue an optional area of specialization in Critical Theory. Students pursuing this area of specialization must take at least one course in three major areas of critical theory at the undergraduate or graduate level. These courses must be approved by the undergraduate advisor. These courses may be taken outside of the Philosophy Department. Students must declare the specialization by filing a declaration form with the department. Completion of the critical theory specialization will not be reflected on the student's transcript or degree.

## Secondary Major Requirements

40 credits. Same requirements as for BA degree.

## Minor Requirements

20 credits in philosophy above the 1000 level.

### Prerequisites

All seminars (3000-level courses) require at least junior standing or instructor's permission.

### Area of Specialization in Critical Theory

Students may pursue an optional area of specialization in Critical Theory. Students pursuing the area of specialization must take at least one course in three major areas of critical theory at the undergraduate or graduate level. These courses must be approved by the undergraduate advisor. These courses may be taken outside of the Philosophy Department. Students must declare the specialization by filing a declaration form with the department. Completion of the critical theory specialization will not be reflected on the student's transcript or degree.

## Requirements for Distinction in the Major in Philosophy

- Minimum 3.4 cumulative GPA
- Minimum 3.85 major GPA
- Completion of a thesis

## BA in Philosophy

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
Analytical Inquiry: Society and Culture <sup>1</sup>	4	PHIL 2040 or 2160 <sup>2</sup>	4	Analytical Inquiry: Society and Culture	4
Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4
Minor or Elective	4	Scientific Inquiry: Society and Culture	4	PHIL2000-level course	4
	<b>16</b>		<b>16</b>		<b>16</b>

### Second Year

Fall	Credits	Winter	Credits	Spring	Credits
Scientific Inquiry: The Natural and Physical World or Foreign Language	4	Scientific Inquiry: The Natural and Physical World or Foreign Language	4	Scientific Inquiry: The Natural and Physical World or Foreign Language	4
PHIL 2000-level course	4	Scientific Inquiry: Society and Culture	4	PHIL 3000-level course	4

INTZ 2501 <sup>3</sup>	2				
	<b>18</b>		<b>16</b>		<b>16</b>

**Total Credits: 98**

<sup>1</sup> There are a large number of courses with the PHIL subject code that will fulfill this Common Curriculum requirement while simultaneously fulfilling credit hours toward the major. Consult the course listings (p. ) in this section for options.

<sup>2</sup> These courses fulfill the Analytical Inquiry: Natural and Physical World (p. 41) requirement.

<sup>3</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**PHIL 1610 Discovering Philosophy (4 Credits)**

In this course we explore a range of philosophical questions and examine the replies that have been made by historical figures. We also think through the methods and strategies that have been used for thinking through those replies and explore these questions further on our own. Topics may include how do we know what actions are moral? What is knowledge? What is the basic structure of the world? What is justice? What assumptions are made by the disciplines that take themselves to study the natural world? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 1988 Study Abroad Resident Credit (0-18 Credits)****PHIL 2001 Philosophy and Fiction (4 Credits)**

Examination of diverse aspects of the relationship between philosophy and fiction. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2003 Philosophy and Popular Culture (4 Credits)**

This course critically explores philosophical questions and issues in the context of contemporary popular culture. On the one hand, it considers more general questions about the nature and function of popular culture, including how popular culture has been defined and "theorized"; the connections between popular culture and the traditional and new media; the economic bases and functions of popular culture; and the political implications of popular culture. On the other, it explores particular philosophical issues—historical, ethical, political, aesthetic, and metaphysical—as they appear in selected areas or examples of popular culture: literature, film, the visual arts, digital media, graphic novels, music, television, etc. The aims are both to enhance students' critical understanding of the ways in which philosophical assumptions and ideas underlie popular culture and to present traditional and contemporary philosophical arguments, movements, and ideas using examples drawn from popular culture as reference points. As examples, we might explore ethical dilemmas posed in the "Sopranos" or "Mad Men"; mind-body problems in the "Matrix" or "Avatar"; or metaphysical issues in "Donny Darko" or "Run, Lola, Run." This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2004 Philosophy of Race (4 Credits)**

This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2005 Philosophy of Religion (4 Credits)**

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGs 2005.

**PHIL 2007 Philosophy and Video Games (4 Credits)**

Traditional and novel metaphysical, ethical, political, and aesthetic issues both arising within video games and posed by this still developing medium. No prerequisites. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with JUST 2008, COMN 2008, RLGs 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2010 Existentialism (4 Credits)**

Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2014 and JUST 2014.

**PHIL 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course is cross-listed with JUST 2026 and RLGS 2026. This course counts for the AI:Society requirement.

**PHIL 2040 Practical Logic (4 Credits)**

In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**PHIL 2050 Jewish Philosophy (4 Credits)**

This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.

**PHIL 2100 Philosophy of Mind (4 Credits)**

Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind—epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2101 Philosophy of Language (4 Credits)**

What do linguistic expressions mean, and how do we use them to communicate? What value judgments are embedded in linguistic practice? In our study of it? How can logical tools illuminate language? What are the limitations of formalism for modeling meaning and language? How might tools in philosophy of language need to be revised in light of investigating oppression and injustice in linguistic communication?

**PHIL 2110 Classical Greek Philosophy (4 Credits)**

The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato's student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the "Golden Age of Greece" has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2111 Greek Moral Philosophy (4 Credits)**

In this course we examine the "Good Life" in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)**

A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2130 Philosophy of Early Modern Age (4 Credits)**

Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2140 Kant to Nietzsche (4 Credits)**

German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2144 20th-Century Philosophy (4 Credits)**

A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2145 Between Deleuze and Foucault (4 Credits)**

Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2150 Philosophy of Law (4 Credits)**

Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2160 Symbolic Logic (4 Credits)**

Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)**

Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?" together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)**

A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the 'modern world.' This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2186 Feminist Ethics: Justice and Care (4 Credits)**

In the late 1950's psychologists began to theorize a notion of human moral development and they created instruments with which to measure such development. By the 1970's there were claims that even well-educated women were—on average—stunted in their moral competence according to these measures. Once a sufficient number of women were engaged in moral theory in both psychology and philosophy, they began to diagnose these theories and instruments as prejudiced by what we would today call 'white, cisgender, male privilege.' The scales were centering a detached notion of justice and equality for all, whereas researchers found that women centered notions of care and engaged in relational (rather than detached) thinking when asked ethical questions. Thus, was born the discipline of Feminist Ethics. While many women (and some men) celebrated the alternative 'ethics of care' over an 'ethics of justice,' others worried that these women had been harmed by their male dominated society and were showing signs of a 'slave mentality' in their moral reasoning that was to be overcome and not celebrated. Predictably (in hindsight), women of color complained that their perspective was not taken into account by these 'caring' white female professors. In this class we will look at this conversation as it unfolded. In the process we will evaluate these theories from a philosophical perspective and see which parts seem most helpful for thinking about current ethical issues. Many or all of the readings were probably written before you were born. In fact, there is very little philosophical literature that labels itself 'feminist ethics' or 'ethics of care' that was written in the 21st century. We will ponder why this is the case. Are these ideas outdated, or have they been sufficiently incorporated into mainstream academic thinking that they no longer wear the label of marginalization?.

**PHIL 2200 Social & Political Philosophy (4 Credits)**

Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2260 Philosophical Perspectives on Perception and Reality (4 Credits)**

An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call "the physical world"). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2346 Philosophy of Nature (4 Credits)**

This course will discuss the nature of nature, the ethics of nature, our knowledge of nature, the politics of nature, the history of the philosophy of nature, physics, and aesthetics. We will read, poetry, philosophy, and literature to pose and answer these questions.

**PHIL 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)**

Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2402 London and Paris: Medieval to Postmodern (4 Credits)**

This is a 3-week summer session course involving one week on campus and two weeks travel to London and Paris. It traces the development of philosophical ideas, politics, social institutions, architecture, and the visual arts from the Middle Ages to the present as they occurred in these two major capitals. Its approach is both historical and comparative and emphasizes understanding and interpreting the contemporary experience of these cities in light of their shared as well as divergent historical paths.

**PHIL 2555 The Philosophy of Technology (4 Credits)**

Serious thought about technology commences with the beginnings of philosophy itself, although it becomes an urgent theme and explicit field of philosophical inquiry only in the 20th century. This course will approach the theme of technology from five perspectives: (1) Historical: How did technology arise as a philosophical concern and how did the development of technology influence thought about it? (2) Metaphysical: What role does technology play in our understanding of 'reality'? Is technology one element among others in what we take to be 'real,' or does it determine our views of 'reality'? (3) Epistemological: What is the relation between science and technology? Is technology a result or application of 'scientific knowledge,' or does technology govern or drive science itself? (4) Ethical/Political: In what ways does technology influence and/or challenge our views about what is 'valuable' about our individual and collective ways of living? Is the development of technology something to be embraced or rejected/limited with respect to human values and aspirations? (5) 'Futurist': Can the 'digital revolution' be understood as continuous with the history of technology itself or does it represent some new metamorphosis of both what it means to be 'human' and of 'reality' itself?.

**PHIL 2700 Biomedical Ethics (4 Credits)**

Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2701 Topics in Philosophy (1-4 Credits)****PHIL 2702 Topics in Philosophy (1-4 Credits)****PHIL 2703 Topics in Philosophy (1-4 Credits)****PHIL 2704 Topics in Philosophy (1-4 Credits)****PHIL 2705 Topics in Philosophy (1-4 Credits)****PHIL 2706 Topics in Philosophy (1-4 Credits)****PHIL 2707 Topics in Philosophy (1-4 Credits)****PHIL 2708 Topics in Philosophy (1-4 Credits)****PHIL 2709 Topics in Philosophy (1-4 Credits)****PHIL 2710 Topics in Philosophy (1-4 Credits)****PHIL 2711 Topics in Philosophy (1-4 Credits)****PHIL 2770 Philosophy of Science (4 Credits)**

This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2785 Environmental Ethics (4 Credits)**

A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

**PHIL 2988 Study Abroad Resident Credit (0-18 Credits)****PHIL 3000 Plato's Metaphysics (4 Credits)**

A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

**PHIL 3003 Plato's Theory of Knowledge (4 Credits)**

A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

**PHIL 3005 Cosmopolitics (4 Credits)**

This class will be a close reading of Plato's dialogue Timaeus, with a special focus on the cosmological, theological, and political dimensions of the text.

**PHIL 3010 Great Thinkers: Aristotle (4 Credits)**

A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

**PHIL 3011 Great Thinkers: Virginia Woolf (4 Credits)**

In this course we will read Virginia Woolf as a philosopher. We will discuss her philosophy of nature, knowledge, art, politics, science, sensation, gender, and materialism throughout her fiction and non-fiction writings.

**PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**PHIL 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"--viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and RLGS 3024. Prerequisite: Junior standing or instructor's permission.

**PHIL 3026 Levinas and the Political (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting insight of "ethics as first philosophy," is a key figure in the histories of phenomenology, metaphysics, and theology. In this class, we examine the implications of Levinas' thought for politics and the political through close readings of his insights on peace, proximity, and justice in such works as "Reflections on the Philosophy of Hitlerism" (1934), Totality and Infinity (1961), Otherwise Than Being or Beyond Essence (1974), and "Peace and Proximity" (1995) in dialogue with key companion works in political thought and political theology, including Benjamin on Divine Violence, Butler on postmodern politics, Connolly on agonism, Critchley on anarchism, Marxist intersections, and Derrida and other "Jewish theologies" of messianistic impossibility. Themes addressed include: Justice; Covenant; Law; the grounding and paradox (or betrayal) of politics-with-ethics; phenomenologies of hospitalities and strangers, friends and enemies; liberalisms, socialisms, fascisms; revolutions and anarchies; agonisms v. antagonisms; impossibility; messianisms without Messiahs; logics of works v. logics of grace; on the role of love v. justice; anarchic grounds; temporalities of covenant and justice; fraternity; forgiveness and its limits; "the 3rd"; rational peace, peace between the wars, and impossible peace. This course is cross-listed: PHIL and JUST. Pre-reqs: This course is open to juniors and seniors except by special permission of the instructor.

**PHIL 3050 Great Thinkers: Hume (4 Credits)**

A detailed study of Hume's "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3061 Kant's Ethics/Aesthetics/Politics (4 Credits)**

A study of Kant's "value theory" and its historical significance. Prerequisite: junior standing or instructor's permission.

**PHIL 3062 Kant's Epistemology and Logic (4 Credits)**

A study of Kant's theory of knowledge, logic and related issues. Prerequisite: junior standing or instructor's permission.

**PHIL 3063 Kant on Religion (4 Credits)**

A study of Immanuel Kant's major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor's permission. Cross-listed with RLGS 3456.

**PHIL 3070 Great Thinkers: Hegel (4 Credits)**

Hegel's "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Cross listed with ECON 3075.

**PHIL 3090 Great Thinkers: Heidegger (4 Credits)**

Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor's permission.

**PHIL 3092 Great Thinkers: The Later Heidegger (4 Credits)**

Study of the works of Heidegger after 1930. Prerequisite: junior standing or instructor's permission.

**PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)**

Each year, the philosophy department offers at least two courses in great thinkers. Specific figures may vary from year to year. Cross-listed with RLGS 3102. Prerequisite: 10 hours of Philosophy at the 2000 level or permission of instructor.

**PHIL 3120 Metaphysics (4 Credits)**

In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

**PHIL 3130 Knowledge Problems (4 Credits)**

Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

**PHIL 3146 Great Thinkers: Levinas (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, *Ethics and Infinity* and *Otherwise Than Being or Beyond Essence*, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with JUST 3146.

**PHIL 3152 Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey (4 Credits)**

Neoplatonism is a unique genre—somewhere between philosophy and mysticism. In this course, we investigate some of the leading themes of Neoplatonism, tracing the Greek ideas of Plotinus (the third century "father of Neoplatonism") into later Jewish and Islamic textual traditions. As part of our journey, we will investigate a host of philosophical writings, including the *Theology of Aristotle* and the *Liber de Causis*, as well as works by Plato, Plotinus, Proclus, Ibn Tufayl, Acemenna, Isaac Israeli, Solomon Ibn Gabirol, and Abraham Ibn Ezra. Themes to be covered include emanation and creation, apophatic discourse, divine desire, the theological significance of imagination, inward reflection and the call to virtue. Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3152.

**PHIL 3175 Morality and the Law (4 Credits)**

A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

**PHIL 3178 Metaethics (4 Credits)**

This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency, or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn't the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

**PHIL 3179 Virtue Ethics (4 Credits)**

Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

**PHIL 3185 Philosophy of Action and Agency (4 Credits)**

Wittgenstein once asked, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Understanding the difference between mere happening and an intentional action became central to the philosophical investigation of action and agency in the 20th century. In this course we examine this distinction and why it should matter to us. Our topics include intentional action, the causal theory of action, the metaphysics of action, agent causation, basic action, acting and trying to act, intentions, weakness of will, strength of will, and mental action. Requires junior standing or permission of instructor.

**PHIL 3201 Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge (4 Credits)**

A study of Wittgenstein, Quine, and Kripke on the nature of necessity, a priori knowledge and their relation to understanding philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3210 Philosophy of Movement (4 Credits)**

Everything is in motion. Yet, philosophers have consistently considered motion to be a derivative or secondary form of being. Why? What are the political and metaphysical consequences of marginalizing motion in the history of philosophy? The aim of this class is to read the history of philosophy with a unique focus on the status of movement and motion from the ancient to contemporary period.

**PHIL 3211 Contemporary Pol Philosophy (4 Credits)**

This class focuses primarily on the philosophical problems generated by thinking about political authority and justice. We discuss the nature of political authority, justice, rights, equality and the role of property in a modern state.

**PHIL 3212 Philosophy and Mythology (4 Credits)**

Before philosophy there was the myth of chaos. In this class we will read the oldest recorded myths in the world to see how their vision of cosmogonic chaos gave birth to form and order. We will track the birth, rise, and fall of creation stories from chaos and identify what may have caused these major shifts, including the rise of philosophy, the state, and imperialism. Specifically we will read the earliest Egyptian, Mesopotamian, Indian, Greek, and Chinese creation stories.

**PHIL 3215 Modern Jewish Philosophy (4 Credits)**

Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3215.

**PHIL 3333 Logic, Language, and Metaphysics (4 Credits)**

This course provides a systematic exploration of the foundations of contemporary philosophy—namely, logic and language—and their metaphysical implications. The class can be divided in three broad modules. Our starting point is the collapse of Kant's system due to staggering discovering in physics and geometry. Next, we shall discuss the subsequent development of mathematical logic and the philosophy of language in the work of Frege, Russell, Tarski, and Goedel. The last portion is devoted to philosophical applications of these logical results in the field of metaphysics. Specifically, we shall explore the work of Carnap, Quine, and Kripke. Junior or senior standing required (or instructor permission).

**PHIL 3445 Cultural Theory and Critique (4 Credits)**

This course will provide an overview of the major theories of culture and cultural critique, as well as a consideration of some of the major controversies and recent developments in this field. It will proceed roughly chronologically, beginning with liberal humanist critique and continuing with hermeneutics, materialist and Marxist critique, psychoanalysis, the Frankfurt School, structuralism, post-structuralism, and contemporary British cultural studies. It will also consider more recent developments, such as feminist critique, GLBT critique, and postcolonialism. While the approach will be mainly philosophical, implications for other areas such as literature, art, emergent media, religion, and politics will also figure in the discussions, so it is appropriate for students in many fields, not just philosophy. Prerequisite: Junior standing or permission of the instructor. Note that this course will serve as a foundational offering for students interested in participating in the Critical Theory specialization.

**PHIL 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and "subjectification" (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled The Hermeneutics of the Subject. This course is cross-listed with RLGS 3448.

**PHIL 3450 Phenomenology and Theology (4 Credits)**

Cross listed with RLGS 3455. Prerequisite: junior standing or instructor's permission.

**PHIL 3460 Nietzsche & the Death of God (4 Credits)**

This course involves an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Prerequisite: junior standing or instructor's permission. Cross listed with RLGS 3460.

**PHIL 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with RLGS 3465. Prerequisite: junior standing or instructor's permission.

**PHIL 3466 Contemporary Continental Philosophy (4 Credits)**

A critical study of current trends in European philosophy, focusing on such thinkers as Deleuze, Badiou, Žižek, Meillassoux, or Laruelle. Prerequisite: junior standing or instructor's permission.

**PHIL 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PSYC 3610. Prerequisites: PSYC 1001 and junior standing (or instructor approval).

**PHIL 3611 The Boundaries of Scientific Knowledge: A Philosophical Exploration (4 Credits)**

Despite its staggering successes, public trust in science is disquietingly low. What has gone wrong? Why is a substantive portion of the population unwilling to trust the advice of specialists? A central problem lies in the tendency of scientists, philosophers, and various pundits to hype, bloat, and overemphasize the promises and results of scientific research. This leads to scientism, broadly conceived as the imperialist tendency to reduce all knowledge to scientific knowledge. But what exactly is scientism? Despite the pejorative connotation of the term, is it an intellectual sin or a virtue? The aim of this course is to map the terrain, exploring various dimensions of scientism, and how it affects the public dimensions of scientific research and its relation to the humanities, religion, and other domains of knowledge, culture, and society.

**PHIL 3612 AI and Robotics (4 Credits)**

In this interdisciplinary seminar we will discuss foundational issues regarding artificially intelligent systems. We will seek to understand how recent advances in AI research bear on our understanding of the nature of the mind, intelligence, agency, rationality, and consciousness. We will also discuss how philosophical advances can advance empirical progress. Additionally, we will discuss some barriers to progress that these technologies might pose. In particular, we will be focused on three groups of questions: 1. What special opportunities and challenges are presented by deep neural net and deep learning technology regarding building and understanding artificially minded intelligent agents? 2. What is the role of the body and environment in producing intelligence? 3. Deep neural net algorithms are already commonly used to predict recidivism rates, diagnose illnesses, and make advertising more effective. In what ways might such algorithms be approaching human or animal intelligence, or shed light on such intelligence? In what ways might human and animal intelligence be importantly different? In what ways might contemporary intelligence research perpetuate injustice and oppression? This seminar is designed to be interdisciplinary, and I welcome students working in philosophy, robotics/AI, and cognitive science who want to work hard and dig deeper. There are no strict prerequisites, but some background knowledge in relevant disciplines will be highly useful.

**PHIL 3618 Philosophy of Biology (4 Credits)**

A survey of conceptual issues that lie at the intersection of biology and philosophy: the central concepts of evolutionary theory (such as natural selection, fitness, adaptation and function), the relation of biology to other "lower" sciences (can it be reduced to physics and chemistry?), whether there are genuine scientific laws in biology, and the relation between biology and other fields like cognitive science and ethics. At least Junior standing required.

**PHIL 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**PHIL 3699 Proseminar in Philosophy (4 Credits)**

Philosophy is a diverse discipline with various subfields, most of which are becoming increasingly specialized and methodologically autonomous. Specialization is often (rightly) perceived as an indicator of disciplinary progress and intellectual development. However, it is important that students of philosophy pursue breadth as well as depth. The goal of this course is to provide an overview of a series of seminal texts in philosophy, from a variety of subfields, epochs, and traditions. Each weekly meeting is devoted to the presentation, analysis, and discussion of a text that any student of philosophy should read at some point in her or his career. Requires junior standing or instructor's permission.

**PHIL 3700 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3701 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3702 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3703 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3704 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3988 Study Abroad Resident Credit (0-18 Credits)****PHIL 3991 Independent Study (1-8 Credits)****PHIL 3995 Independent Research (1-8 Credits)****PHIL 3999 Philosophy Assessment (0 Credits)**

This course involves a required assessment of graduating philosophy majors' knowledge of the discipline based on coursework taken after completing 75% of their coursework. It is available to anyone who has completed at least 30 credits of philosophy courses and is required for graduation.

## Logic Courses

PHIL 2040	Practical Logic	4
PHIL 2160	Symbolic Logic	4
PHIL 3333	Logic, Language, and Metaphysics	4

## History Courses

PHIL 2005	Philosophy of Religion	4
PHIL 2010	Existentialism	4
PHIL 2014	Religious Existentialism: Christian and Jewish	4
PHIL 2050	Jewish Philosophy	4
PHIL 2110	Classical Greek Philosophy	4
PHIL 2111	Greek Moral Philosophy	4
PHIL 2130	Philosophy of Early Modern Age	4
PHIL 2140	Kant to Nietzsche	4
PHIL 2144	20th-Century Philosophy	4
PHIL 2346	Philosophy of Nature	4
PHIL 3000	Plato's Metaphysics	4
PHIL 3003	Plato's Theory of Knowledge	4
PHIL 3005	Cosmopolitics	4
PHIL 3010	Great Thinkers: Aristotle	4
PHIL 3011	Great Thinkers: Virginia Woolf	4
PHIL 3023	Great Thinkers: Maimonides: Politics, Prophecy and Providence	4
PHIL 3024	Maimonides: Greek, Islamic, and Christian Encounters	4
PHIL 3050	Great Thinkers: Hume	4
PHIL 3061	Kant's Ethics/Aesthetics/Politics	4
PHIL 3062	Kant's Epistemology and Logic	4
PHIL 3063	Kant on Religion	4
PHIL 3070	Great Thinkers: Hegel	4
PHIL 3075	Marxism	4
PHIL 3090	Great Thinkers: Heidegger	4
PHIL 3101	Great Thinkers: Kierkegaard	4
PHIL 3146	Great Thinkers: Levinas	4
PHIL 3152	Philosophy Meets Mysticism: A Greek, Jewish and Islamic Neoplatonic Journey	4
PHIL 3201	Wittgenstein, Quine, & Kripke on Necessity and a Priori Knowledge	4
PHIL 3210	Philosophy of Movement	4
PHIL 3212	Philosophy and Mythology	4
PHIL 3448	Theory of the Subject: From Hegel to Zizek	4
PHIL 3450	Phenomenology and Theology	4
PHIL 3460	Nietzsche & the Death of God	4
PHIL 3465	Derrida and Postmodernism	4

## Contemporary Courses

PHIL 2001	Philosophy and Fiction	4
PHIL 2003	Philosophy and Popular Culture	4
PHIL 2004	Philosophy of Race	4
PHIL 2007	Philosophy and Video Games	4
PHIL 2008	Stereotyping and Violence in America Today	4
PHIL 2026	Race: Black, Jew, Other	4
PHIL 2100	Philosophy of Mind	4
PHIL 2101	Philosophy of Language	4
PHIL 2120	Nature & Limits of Human Knowledge	4
PHIL 2145	Between Deleuze and Foucault	4
PHIL 2150	Philosophy of Law	4
PHIL 2180	Ethics	4
PHIL 2181	Aesthetics & Philosophy of Art	4
PHIL 2186	Feminist Ethics: Justice and Care	4

PHIL 2200	Social & Political Philosophy	4
PHIL 2260	Philosophical Perspectives on Perception and Reality	4
PHIL 2401	Social Justice in a Global Context: Theory and Practice	4
PHIL 2555	The Philosophy of Technology	4
PHIL 2700	Biomedical Ethics	4
PHIL 2770	Philosophy of Science	4
PHIL 2785	Environmental Ethics	4
PHIL 3026	Levinas and the Political	4
PHIL 3120	Metaphysics	4
PHIL 3130	Knowledge Problems	4
PHIL 3175	Morality and the Law	4
PHIL 3178	Metaethics	4
PHIL 3179	Virtue Ethics	4

## Faculty

**Marco J. Nathan**, Professor and Department Chair, PhD, Columbia University

**Thomas Andrew Nail**, Professor, PhD, University of Oregon

**Naomi Reshotko**, Professor, PhD, University of Wisconsin - Madison

**Lisa Titus**, Associate Professor, PhD, Rutgers University – New Brunswick

**William D. Anderson**, Associate Professor, Emeritus, PhD, University of Massachusetts - Amherst

**Roscoe Hill**, Associate Professor, Emeritus, PhD, University of Chicago

**Frank Seeburger**, Professor, Emeritus, PhD, University of Colorado - Boulder

**Jere P. Surber**, Professor, Emeritus, PhD, Pennsylvania State University/Rheinische-Universität-Bonn

## Physics and Astronomy

Office: Physics Building, Room 211

Mail Code: 2112 E. Wesley Ave. Denver, CO 80208

Phone: 303-871-2238

Web Site: <https://physics.du.edu/>

The study of physics and astronomy is for anyone who wants to explore the workings of the natural world on scales from the subatomic to the cosmic. The department offers courses of study that can lead either to the BS (for those desiring more rigorous scientific coursework) or the BA (for those needing more flexibility in choosing courses, especially in combination with a non-science major). The BS degree offers three concentrations in the physics major (biological physics, computational physics, and nanophysics) that include additional interdisciplinary coursework from other science and engineering programs. Because of their training in critical thinking, physics and astronomy students acquire an excellent background for a wide variety of careers, including scientific research, medicine, law, finance, information technology, computer science, engineering, scientific or technical writing, K-12 teaching and public education through museums or planetariums. A minor in physics, astrophysics or medical physics is a valuable addition to many majors and is attractive to employers. Moreover, our majors can pursue a 4+1 dual degree, BS in physics with MS in mechanical or electrical engineering.

The department underwent a strong expansion with eight tenure-track and two teaching professor positions filled since 2006. Our diverse and dynamic faculty of 12 includes four women and come from seven different countries. The program is recognized by the APS among US PhD-granting

departments for our high percentage (50%) of female graduates: placing second nationally at the undergraduate level and third at the graduate level (American Physical Society data for the period 2011-2013). We contribute 30% more physics bachelor's degrees to the university STEM graduates than the national average (American Physical Society data for the period 2015-2017). Our low student-to-faculty ratio enables us to provide research opportunities to all undergraduate majors and our small class size facilitates individualized instruction and academic advising. We also have an award-winning chapter of the Society of Physics Students that actively contributes to our community building and outreach efforts. Our graduates go on to graduate, law or medical school, or pursue careers in industry, business, medical research, teaching, and the military.

## Physics

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

52 credits of physics, 35 must be above PHYS 1999. Requirements include the following:

Code	Title	Credits
<b>Physics Requirements</b>		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
PHYS 2251	Modern Physics I	4
PHYS 2252	Modern Physics II	4
PHYS 2260	Modern Physics Lab	1
PHYS 2259	Uncertainty and Error Analysis	2
PHYS 3100	Senior Seminar	2
PHYS 3111	Quantum Physics I	4
PHYS 3510	Analytical Mechanics I	4
PHYS 3611	Electromagnetism I	4
PHYS 3841	Thermal Physics I	4
Upper division courses above PHYS 1999		8
<b>Total Credits</b>		<b>52</b>

### Additional Requirements

Code	Title	Credits
<b>Mathematics</b>		
MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
or MATH 1962	Honors Calculus II	
MATH 1953	Calculus III	4
or MATH 1963	Honors Calculus III	
MATH 2070	Introduction to Differential Equations	0-4
<b>Total Credits</b>		<b>12-16</b>

### Bachelor of Science Major Requirements

(183 credits required for the degree (p. 87))

60 credits of physics, 45 must be above PHYS 1999.<sup>1</sup> Requirements include:<sup>2</sup>

Code	Title	Credits
<b>Physics Requirements</b>		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
PHYS 2251	Modern Physics I	4
PHYS 2252	Modern Physics II	4
PHYS 2260	Modern Physics Lab	1

PHYS 2259	Uncertainty and Error Analysis	2
PHYS 2311	Intermediate Lab I	2
PHYS 2312	Intermediate Lab II	2
PHYS 3100	Senior Seminar <sup>3</sup>	2
PHYS 3111	Quantum Physics I	4
PHYS 3112	Quantum Physics II	4
PHYS 3510	Analytical Mechanics I	4
PHYS 3611	Electromagnetism I	4
PHYS 3612	Electromagnetism II	4
PHYS 3841	Thermal Physics I	4
<b>Total Credits</b>		<b>56</b>

<sup>1</sup> May include PHYS 3991 Independent Study and PHYS 3995 Independent Research.

<sup>2</sup> Students pursuing concentrations will take at least 10 extra credits beyond the required 45 credits above PHYS 1999.

<sup>3</sup> Senior Thesis required for Distinction in Physics.

Two minors are also required, at least one of which is in a BS degree-granting department. Completing the mathematics courses listed in Additional Requirements fulfills this second condition.

## Additional Requirements

Code	Title	Credits
<b>Mathematics</b>		
MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
or MATH 1962	Honors Calculus II	
MATH 1953	Calculus III	4
or MATH 1963	Honors Calculus III	
MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4
<b>Select one sequence from the following:</b>		
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
or BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	
or BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	
<b>Total Credits</b>		<b>24</b>

## Concentrations in The Physics Major

All three concentrations are only available in combination with the BS degree. The concentrations require at least additional 3 courses totaling not less than 10 credits (i.e. in addition to the 45 credits of 1999+ PHYS coursework already required), which may include some courses in other departments. All courses that are applied to the concentrations in the physics major may also be applied to the minors and majors in other departments. Other courses may be substituted for the concentration as approved by the department on a case-by-case basis. PHYS 3100 Senior Seminar Term Paper in a field related to the concentration is required. (Senior Seminar will preferably be taken in the Fall Quarter of the Senior year.)

### Biological Physics Concentration Requirements

Code	Title	Credits
PHYS 3850	Foundations of Biophysics	3
Plus a minimum of 2 additional courses from the following list: <sup>1</sup>		
PHYS 2300	Physics of the Body	
PHYS 2340	Medical Imaging Physics	
PHYS 3350	Physics and Information	
PHYS 3711	Optics I	
PHYS 3860	Numerical and Computational Methods in Physics	
BIOL 2120	Cell Structure and Function	

BIOL 3150	Intracellular Dynamics
BIOL 3160	Biophysics: Ion Channels & Disease
BIOL 3640	Introductory Neurobiology
BIOL 4150	Special Topics in Adv Biology
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I
CHEM 3610	Physical Chemistry I

<sup>1</sup> At least one course from this list must be a BIOL or CHEM course.

## Computational Physics Concentration Requirements

Code	Title	Credits
PHYS 3860	Numerical and Computational Methods in Physics	4
Plus a minimum of 2 additional courses from the following list:		
COMP 1671	Introduction to Computer Science I	
COMP 1672	Introduction to Computer Science II	
COMP 2673	Introduction to Computer Science III	
PHYS 3350	Physics and Information	

## Nanophysics Concentration Requirements

Code	Title	Credits
PHYS 2710	The Nanoscale Physics of Energy, Information, and Environment	4
Plus a minimum of 2 additional courses from the following list:		
ENGR 3200	Introduction to Nanotechnology	
ENME 2410	Materials Science I	
ENME 2651	Fluid Dynamics I	
PHYS 3350	Physics and Information	
PHYS 3720	Light-Matter Interaction	
PHYS 3860	Numerical and Computational Methods in Physics	
PHYS 4100	Foundations of Biophysics	
PHYS 4411	Advanced Condensed Matter I	
PHYS 4412	Advanced Condensed Matter II	

## Minor Requirements

At least 20 credits, including the following:

Code	Title	Credits
One year of introductory physics: <sup>1</sup>		14-15
PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III	
or		
PHYS 1211 & PHYS 1212 & PHYS 1213 or PHYS 1214	University Physics I and University Physics II and University Physics III University Physics III for Engineers	

Two physics courses above PHYS 1999, excluding PHYS 4750 Seminar in Physics, Independent Study and Independent Research <sup>2</sup> 6-8

**Total Credits** 20-23

<sup>1</sup> or equivalent.

<sup>2</sup> Science majors should consider taking PHYS 2251 Modern Physics I and PHYS 2252 Modern Physics II.

## Astrophysics

### Minor Requirements

20 credits required.

Students must complete one year of introductory physics or the equivalent (PHYS 1211 University Physics I, PHYS 1212 University Physics II and either PHYS 1213 University Physics III or PHYS 1214 University Physics III for Engineers) prior to beginning this minor.

Code	Title	Credits
At least 20 credits from the following list:		20
PHYS 2051	Bio-Astronomy of Solar Systems	
PHYS 2052	Stellar Physics	
PHYS 2053	Galaxies and Cosmology	
PHYS 2061	Telescopes and Instrumentation	
PHYS 2062	Astronomy with Digital Cameras	
PHYS 2063	Observing & Data Analysis	
PHYS 2830	Natural Optics	
PHYS 2991	Independent Study	
PHYS 2995	Independent Research	
PHYS 3251	Astrophysics: Radiative Processes	
PHYS 3252	Astrophysics: Observations	
PHYS 3270	Workshop: Practical Astronomy	
PHYS 3711	Optics I	
PHYS 3870	Special and General Relativity	
PHYS 3991	Independent Study (or)	
PHYS 3995	Independent Research	

## Medical Physics

### Minor Requirements

At least 20 credits of physics. Requirements include the following:

Code	Title	Credits
Select one of the following sequences:		14-15
PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III	
PHYS 1211 & PHYS 1212 & PHYS 1213 or PHYS 1214	University Physics I and University Physics II and University Physics III University Physics III for Engineers	
Plus:		
PHYS 2300	Physics of the Body	3
PHYS 2340	Medical Imaging Physics	3
<b>Total Credits</b>		<b>20</b>

## Dual Degrees

The Bachelor of Science in Physics/Master of Science in Engineering (BS/MS) program allows a student to complete both a BS in physics and an MS in Engineering in only five years. This is an attractive option for those who want to combine a strong theoretical background with experience in engineering applications. For more information, please contact a Physics and Astronomy advisor as early as possible upon matriculation.

## Distinction in the Physics Major

A graduating Physics major may be awarded distinction in the Physics major if he or she meets the following requirements:

- Minimum 3.25 GPA in both Physics and Mathematics courses
- Six credit hours of PHYS coursework at the 3000+ level beyond their degree requirements
- A senior thesis report that approximates a journal-submission quality document
- A poster or other presentation of senior thesis work at DU's Undergraduate Symposium (held annually in May) or equivalent
- Community service or public outreach experience (which can include participation in Society of Physics Students)

Individualized distinction options can be proposed for approval by the department.

Total Credits: 183-187

<sup>1</sup> Analytical Inquiry-Society and Scientific Inquiry-Society courses may be taken in any order.

<sup>2</sup> PHYS 3510 *Analytical Mechanics I* and PHYS 3611 *Electromagnetism I* are offered every other year. PHYS 3111 *Quantum Physics I* and PHYS 3841 *Thermal Physics* are offered in the alternating years. Either set of courses may be taken first.

<sup>3</sup> Recommended electives include PHYS 2311 *Intermediate Lab I*, PHYS 3112 *Quantum Physics II*, PHYS 3520 *Analytical Mechanics II*, and PHYS 3612 *Electricity & Magnetism II*. BA students may also enroll in any elective PHYS course, and PHYS 3991 *Independent Study* or PHYS 3995 *Independent Research*; credits for these courses are variable. Graduate-level courses in physics may also count as physics electives with permission.

<sup>1</sup> BIOL 1010 and 1020 (normally offered in winter and spring) or BIOL 1011 and 1021 (normally offered in winter) may be taken instead of CHEM 1010 and 1240.

<sup>2</sup> Analytical Inquiry-Society and Scientific Inquiry-Society courses may be taken in any order.

<sup>3</sup> PHYS 3510/3520 *Analytical Mechanics I,II* and PHYS 3611/3612 *Electromagnetism I/II* are offered every other year. PHYS 3111/3112 *Quantum Physics I/II* and PHYS 3841 *Thermal Physics* are offered in the alternating years. Either set of courses may be taken first.

<sup>4</sup> One Physics elective course must be taken to fulfill the required total of 60 PHYS credits. Our department offers several elective courses, usually in alternating years. Undergraduates may also enroll in graduate-level courses in physics with permission.

<sup>5</sup> BS students will often enroll in PHYS 3991 *Independent Study* or PHYS 3995 *Independent Research* as part of their work toward the senior thesis. Credits for these courses are variable.

#### PHYS 1011 21st-Century Physics and Astronomy I (4 Credits)

First class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

#### PHYS 1012 21st-Century Physics and Astronomy II (4 Credits)

Second class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**PHYS 1013 21st-Century Physics and Astronomy III (4 Credits)**

Third class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**PHYS 1050 Descriptive Astronomy (4 Credits)**

Introduction to the cosmos, including stars, galaxies, and origin and fate of universe; constellations and observing techniques. Includes laboratory and observing sessions at Chamberlin Observatory's 20-inch refractor telescope.

**PHYS 1070 Solar System Astronomy (4 Credits)**

Introduction to advances in knowledge of atmospheres, surfaces and interiors of other planets in our solar system and elsewhere; emphasis on interpretation and significance of discoveries for the nonspecialist. Includes observing at Chamberlin Observatory. Recommended Prerequisite: PHYS 1050.

**PHYS 1090 Cosmology (4 Credits)**

Companion to PHYS 1070. Discoveries of modern era concerning stars, galaxies, and origin and fate of universe, to aid appreciation of new discoveries. Open to majors and non-majors in the sciences. Includes scheduled observing at Chamberlin Observatory. Recommended Prerequisite: PHYS 1050.

**PHYS 1111 General Physics I (5 Credits)**

This is the first of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in mechanics (kinematics, dynamics) including forces, one and two dimensional motion, work, energy and momentum. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1112 General Physics II (5 Credits)**

This is the second of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1113 General Physics III (5 Credits)**

This is the third of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1112. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1200 Physics Preparatory (2 Credits)**

This course is strongly recommended to everyone considering a major in physics and astronomy. It introduces students to problems, techniques, and tools used in physics and astronomy and offers an overview of the research carried out in the Department of Physics and Astronomy. High-school physics knowledge is not required.

**PHYS 1211 University Physics I (5 Credits)**

First of a three-quarter sequence. Kinematics, vectors, force, energy and work, linear momentum, rotation of rigid bodies. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The course includes a rigorous calculus-based laboratory that exposes students to a broad range of the real physical phenomena studied in the lecture course. Through the use of experimental apparatus, computerized instrumentation and data acquisition, data analysis and graphical representation, students use the observed phenomena to exemplify the laws of physics. Physics theory and other relevant background information are explored individually by students in weekly prelab exercises. Students learn to write introductory-level laboratory reports and become familiar with good laboratory technique. Emphasis for this lab is on mechanics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisite: MATH 1951.

**PHYS 1212 University Physics II (5 Credits)**

Second of a three-quarter sequence. Gravitation, fluids; oscillatory motion; waves; thermal physics. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1211 lab portion and builds on laboratory skills and knowledge from that course. Emphasis for this lab is on waves, oscillations, sound, fluids and thermodynamics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: PHYS 1211. Corequisite: MATH 1952.

**PHYS 1213 University Physics III (5 Credits)**

Third of a three-quarter sequence. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1221 and 1222 lab portions and builds on the students' laboratory skills and knowledge from those labs. Emphasis for this lab is on electricity, magnetism and circuits. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1214. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PHYS 1214 University Physics III for Engineers (4 Credits)**

This is the third course of a three-quarter sequence and is for engineers only; this is equivalent to PHYS 1213, but does not include lab component. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all engineering majors. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1213. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PHYS 1991 Independent Study (1-10 Credits)****PHYS 1995 Independent Research (1-10 Credits)****PHYS 2011 Circuits I (3 Credits)**

Cross-listed with ENEE 2012. An introduction to electrical circuits analysis and design. Emphasis is on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and circuit theorems are stressed. AC signals are introduced. Computer analysis software is integrated throughout the course. Cross listed with ENEE 2011. Co-requisites: PHYS 1213 or 1214, MATH 1953, PHYS 2015 or instructor's permission.

**PHYS 2015 Engineering Applications I (1 Credit)**

Cross-listed with ENEE 2015. Laboratory program introduces electronic test equipment, verifies circuit theorems and practices elementary interface circuit design. Cross listed with ENGR 2015. Co-requisite: PHYS 2011 or instructor's permission.

**PHYS 2021 Circuits II (3 Credits)**

Cross-listed with ENEE 2021. AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is on Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single-pole cascade, Butterworth, Chebyshev), and step response circuits. Phasors applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit design. Cross listed with ENEE 2021. Prerequisites: PHYS 2011, PHYS 2015. Corequisites: PHYS 2025, MATH 2070.

**PHYS 2025 Engineering Applications II (1 Credit)**

Cross-listed with ENEE 2025. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Cross listed with ENEE 2025. Prerequisite: PHYS 2011. Corequisite: PHYS 2021 or instructor's permission.

**PHYS 2050 Ways of Seeing and Sensing: Astrophysics (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Media, Film & Journalism Studies, Biological Sciences, and Physics & Astronomy. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We will examine various aspects of nature specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to "seeing" through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To develop the concept of "sensing," we will explore the soundscapes of the KMC as well as the ways plants and animals endemic to this ecosystem sense their surroundings. We will also explore using human senses other than sight to navigate the nighttime environment. The course will focus on science communication, storytelling, and the creation of professional-quality photo and video content for dissemination on the Internet, at environmental film festivals, in galleries, at campus events, and potentially via broadcast outlets. Students will work in teams of 3-4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing the astrophysics focus will also complete assignments on optics and telescope design, coordinates and motions of the night sky, and the use of non-optical wavelengths and multimessenger techniques as ways of "sensing" in modern observational astronomy. This course will meet together with BIOL 2050 and MFJS 2050 courses, which have different prerequisites and discipline-specific assignments. Prerequisites: PHYS 1013 or PHYS 1113 or PHYS 1212.

**PHYS 2051 Bio-Astronomy of Solar Systems (4 Credits)**

The nature of our solar system, and those of recently discovered solar systems around other stars, will be examined using the tools of modern physics and astronomy, with a focus on biogenic opportunities in these diverse environments. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2052 Stellar Physics (4 Credits)**

The physics of stars will be examined using the tools of modern physics and astronomy, with the focus on their structure, interiors, origin and evolution, including single and multiple star systems, white dwarf, neutron stars and black holes. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2053 Galaxies and Cosmology (4 Credits)**

Modern discoveries involving galaxies in our universe and cosmological theories based on these and particle physics findings will be examined using the tools of modern physics and astronomy. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2061 Telescopes and Instrumentation (4 Credits)**

The student will develop and refine facility and experience with telescopes, software, methods, catalogs, libraries, astronomical instrumentation and assorted contents of the universe, including ground-based and space-based telescopes and detector systems. Observing projects included; use of the Student Astronomy Lab and/or internet telescope(s) for observing projects and variable star monitoring, plus occasional use of the 20 inch Clark/Saegmuller refractor or Mt. Evans reflectors for observing, measuring and practicing public instruction. Math tools include algebra, statistics, Excel, Mathcad, IDL, C++, etc. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1050 or PHYS 1070 or PHYS 1090 or PHYS 1112 or PHYS 1212 or instructor's permission.

**PHYS 2062 Astronomy with Digital Cameras (4 Credits)**

The revolution brought about with digital recording systems has revolutionized astronomy by providing access to faint source imaging and in-depth astronomical spectroscopy not possible during the photographic era. This course will train students to apply this technology to problems associated with light and spectrum measurement that facilitate tests of modern astrophysical theories. Each student will select an observing project to develop during the term, pursue data collection and analysis at the Student Astronomy Lab or other telescope(s), and report results on a personal website and/or in poster format. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1050 or PHYS 1070 or PHYS 1090 or PHYS 1113 or PHYS 1213 or instructor's permission.

**PHYS 2063 Observing & Data Analysis (4 Credits)**

Students will learn fundamentals of astronomical research with hands-on data analysis opportunities. After going over the basics of astronomical observations and the standard FITS data file format, students will practice both imaging and spectroscopic data reduction processes using actual astronomical data. Proficiency in computer programming/scripting is strongly desired (strong preference is given to Python, IDL, C, and any other for which FITS I/O routines are available). Students are required to bring their own laptop to class. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2251 Modern Physics I (4 Credits)**

First of a two-quarter sequence. Topics covered: Introduction to special relativity; photons, de Broglie wavelength, Heisenberg uncertainty principles, quantum numbers and invariance principles; introduction to quantum physics of atoms, molecules, solids and nuclei; radioactive decay; elementary particles. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214 and MATH 1953. Corequisite: MATH 2070.

**PHYS 2252 Modern Physics II (4 Credits)**

Second of a two-quarter sequence. Topics covered: Advanced topics in quantum mechanics: particle in a box, tunneling, variational principle, symmetry; introduction to statistical physics and thermodynamics: ensembles, Bose-Einstein condensation, super-fluidity, superconductivity, nanoscience; introduction to chaos: maps, stability analysis, bifurcations; introduction to computational physics. Prerequisite: PHYS 2251. Corequisite: PHYS 2260.

**PHYS 2259 Uncertainty and Error Analysis (2 Credits)**

In this course, students will build on the laboratory experience gained in University Physics Lab. Students will learn why uncertainty analysis is crucial to reducing and correcting errors in science. Additionally, students will develop the theory behind, and learn how to carry out, uncertainty and data analysis calculations. Uncertainty analysis topics include statistical analysis of data, propagation of error, the normal distribution, rejection of data, weighted averages, least-squares fitting, covariance and correlation, the binomial and Poisson distributions, and the chi-squared test. Strong emphasis for this course is placed on having students develop independence with their laboratory skills, as well as preparing students for Modern Physics Lab (PHYS 2260). Prerequisites: PHYS 1213 or PHYS 1214 and MATH 1953 or MATH 1963.

**PHYS 2260 Modern Physics Lab (1 Credit)**

Laboratory to accompany PHYS 2252. Students will perform laboratories that demonstrate special relativity, the wave/particle duality of light, the quantization of charge, and the discrete nature of energy levels in bound systems. Laboratories include the Michelson-Morley experiment, spectroscopy, blackbody radiation, laser diffraction and the double slit experiment, the photoelectric effect, the Millikan oil drop experiment, the charge-to-mass ratio of the electron, and the Franck-Hertz experiment. Students will apply uncertainty and error analysis to real experimental data. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. A Windows-based laptop computer is required for this lab. Lab fee associated with this course. Prerequisites: PHYS 2259 and MATH 2070. Corequisite: PHYS 2252.

**PHYS 2300 Physics of the Body (3 Credits)**

This is the first course required for a medical physics minor. Muscles and forces; physics of the skeleton; energy, heat, work and power of the body; osmosis and kidneys; lungs and breathing; cardiovascular system; electrical and magnetic signals in the body. Prerequisite: PHYS 1113, PHYS 1213, or PHYS 1214.

**PHYS 2311 Intermediate Lab I (2 Credits)**

In this lab, students learn to develop laboratory instrumentation to make physical measurements using electronic circuitry and the personal computer. Laboratory exercises include a review of DC circuits including transistors, LabVIEW programming, the PC parallel port, AC circuits and the oscilloscope, operational amplifiers and the RS-232C serial port. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. Prerequisites: PHYS 2260 and MATH 2070.

**PHYS 2312 Intermediate Lab II (2 Credits)**

This lab is a continuation of PHYS 2311 and builds heavily on the concepts learned during that first quarter. Laboratory exercises include using the personal computer, LabVIEW programming, and electronic circuitry for single point and waveform data acquisition including the Fast Fourier Transform, GPIB and serial devices, transducers, controls and feedback systems, counting, and timing. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. Prerequisite: PHYS 2311.

**PHYS 2313 Intermediate Lab III (2 Credits)**

This lab is the final lab in the Intermediate Lab sequence. Students leverage the knowledge gained in the first two quarters to perform physics experiments using electronic circuitry and the personal computer. It is expected that students will be independent in their ability to perform in the laboratory. Prerequisite: PHYS 2312.

**PHYS 2340 Medical Imaging Physics (3 Credits)**

This is the second course required for a medical physics minor, following Physics of the Body (PHYS 2300). X-rays; nuclear medicine instrumentation; radiography and fluoroscopy; computed tomography; ultrasound; magnetic resonance imaging; radiobiology. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214 and PHYS 2300.

**PHYS 2510 Applied Mechanics I (3 Credits)**

First of a three-quarter sequence. Co-listed with ENME 2510. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2510. Prerequisite: PHYS 1211.

**PHYS 2520 Applied Mechanics II (3 Credits)**

Second of a three-quarter sequence. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum methods for particles and systems of particles, angular momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2520. Prerequisites: PHYS 2510, ENGR 3610.

**PHYS 2530 Applied Mechanics III (3 Credits)**

Third of a three-quarter sequence. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum methods from particles and systems of particles, angular momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2530. Prerequisites: PHYS 2520, ENGR 3610.

**PHYS 2610 Physics of Climate (4 Credits)**

The course will examine energy from the sun and how it flows into the land, atmosphere, and oceans and then out to space, and how that regulates the average temperature of Earth (and other planets). Emphasis will be placed on the carbon cycle of the Earth and related topics: atmospheric chemistry of greenhouse gases, forests and phytoplankton, weathering, glaciers, paleontological climate, and the formation of ancient hydrocarbons. Algebra will be used in the class. A 1000-level NSM course or permission of the instructor is required.

**PHYS 2710 The Nanoscale Physics of Energy, Information, and Environment (4 Credits)**

This course, intended for physics majors with interests in nanoscale science and applications in condensed matter physics, sustainability, complex systems, and similar topics but open to other science or engineering majors on request, is formed from a series of quantitative explorations of the physics underpinning critical challenges for science and society in the 21st century. The level goes beyond introductory material, and students will exercise a basic understanding of quantum mechanics, chemical bonding, and thermodynamics. The goal is provide the bedrock understanding of the grand challenges that enables scientifically "literate" citizenship and action. Planned topics include the molecular and chemical physics that influences climate, the fundamentals of energy consumption in organisms, the nanoscale physics of information technology and energy generation. We will naturally explore connections between these areas. Enforced Prerequisites and Restrictions: (PHYS 1213 OR PHYS 1214) AND MATH 1953.

**PHYS 2830 Natural Optics (3 Credits)**

An investigation of naturally occurring optical phenomena with an emphasis on observational characteristics and causes. The winter 2020 planned offering will be hybrid, with in-class and online meetings. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213 or PHYS 1214 or instructor's permission.

**PHYS 2991 Independent Study (1-10 Credits)****PHYS 2995 Independent Research (1-10 Credits)****PHYS 3100 Senior Seminar (2 Credits)**

This course offers primers on literature research, practices of a good scientific writing, putting together a good presentation or report, carrying out and documenting research, preparing for graduate program and/or job. Required for all Physics majors. Prerequisite: PHYS 2252.

**PHYS 3111 Quantum Physics I (4 Credits)**

First of a two-quarter sequence. The Schrödinger equation: interpretation of wave functions; the uncertainty principle; stationary states; the free particle and wave packets; the harmonic oscillator; square well potentials. Hilbert space: observables, commutator algebra, eigenfunctions of a Hermitian operator; the hydrogen atom and hydrogenic atoms. Prerequisites: PHYS 2252, PHYS 2260, PHYS 2556, PHYS 3612 and MATH 2070.

**PHYS 3112 Quantum Physics II (4 Credits)**

Second of a two-quarter sequence. Angular momentum and spin; identical particles; the Pauli exclusion principle; atoms and solids: band theory; perturbation theory; the fine structure of hydrogen; the Zeeman effect; hyperfine splitting; the variational principle; the WKB approximation; tunneling; time dependent perturbation theory; emission and absorption of radiation. Scattering: partial wave analysis; the Born approximation. Prerequisite: PHYS 3111.

**PHYS 3251 Astrophysics: Radiative Processes (4 Credits)**

Because light is the primary means by which astronomers learn about the Universe, understanding the production and subsequent behavior of light is key to interpreting astronomical observations. This course introduces students to the physics of astrophysical radiation and its interaction with matter as it travels from its source to our detectors. Topics may include radiative transfer, emission and absorption processes, Compton processes, synchrotron radiation, thermodynamic equilibrium, radiative and collisional excitation, and spectroscopy of atoms and molecules. The course is aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. Credit can apply toward physics or astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3252 Astrophysics: Observations (4 Credits)**

Astronomy is fundamentally an observational science and as such it is important for practitioners to understand how their data are collected and analyzed. This course is therefore a comprehensive review of current observational techniques and instruments, aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. This class introduces students to the capabilities and limitations of different types of instruments while exploring the sources and types of noise and providing statistical tools necessary for interpreting observational data. Credit can apply toward physics or astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3254 Astrophysics: Stars (4 Credits)**

Stars are the fundamental building blocks of the Universe. Hence, understanding the nature of stars is the first step toward understanding the Universe. This course is therefore intended to introduce students to the rigorous physical and mathematical treatise of stellar structure and evolution. Topics may include the theoretical origins and applications fundamental equations of stellar structure and other supporting equations, and theoretical and observational applications of stellar evolution. The course is aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. Credit can apply toward Physics major or Astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3270 Workshop: Practical Astronomy (1-5 Credits)**

Capstone coursework featuring studies in experimental, computational, and/or theoretical work in astronomy and astrophysics. Credit can apply toward physics or astrophysics minor.

**PHYS 3350 Physics and Information (4 Credits)**

Students in Physical Sciences are often well versed in the art of model building but less so in the process of model-selection when multiple models can describe the same data. Students rarely learn tools beyond curve fitting and least square error minimization for model selection. Consequently, students are often unaware of the scope of different tools and fail to make judicious choice of algorithms/theories when faced with diverse problems. For example, building a model from data is very different from generating data (stochastic or deterministic) from a model. Next consider two contrasting challenges of model building i) when there is limited data vs ii) when there is too much data. For the first problem – inferring models from limited data – the solution can be traced back to Boltzmann's formulation of Statistical Physics describing motion of atoms. The connection between Information theory, Inference and Boltzmann's description, however, is often overlooked in introductory or even advanced classes in Physics, and Statistics. Studying these similarities can unlock novel solutions for problems well outside of thermodynamics, even as far as Image processing, Biology and Network science. Inference also requires us to appreciate fundamental topics in Probability – difference between frequentist and non-frequentist approach, Bayesian formalism – that are rarely taught to physical scientists, life scientists or engineers. At the other extreme, faced with data deluge, we routinely ask: how do we make sense of too much data? We use clustering, PCA, Neural Networks. In this course we will discuss and connect all these seemingly disparate concepts and apply them – at the appropriate context – to diverse problems in Physics, Chemistry, Biology and beyond. In the process we will gain an in-depth knowledge about commonly heard but perhaps less understood topics such as: Entropy, Likelihood maximization, Bayesian statistics, PCA, Classification algorithms, and Neural Networks. We will also address another often overlooked but fundamental and fascinating topic, biology's inherent ability to encode and decode information. Currently there is no such course that address all these topics in Information and Data Science in an unified manner – deeply connecting their formal basis, regime of applicability – grounded on physical principles, with a forward looking approach towards application in many areas well outside of traditional sciences. A lot of learning in the course will happen 'on the fly', where the tools and application problems are learnt as needed. Prerequisites: Calculus I, Calculus II, and at least two other courses focusing on application of mathematics to problems in physics/chemistry/biology or engineering. Example of this course can be University Physics, Modern Physics, Biostatistics, Differential Equation, Linear Algebra, Computational Physics, or other equivalent courses (upon Instructor approval).

**PHYS 3510 Analytical Mechanics I (4 Credits)**

Lagrangian and Hamiltonian mechanics. Prerequisites: PHYS 1113, PHYS 1213, or PHYS 1214 and MATH 2070 and consent of instructor.

**PHYS 3520 Analytical Mechanics II (4 Credits)**

Second of a two-quarter sequence: two-body central force problems, moving coordinate systems, rotational motion of rigid bodies, coupled oscillations and normal modes, and Hamiltonian mechanics. Prerequisite: PHYS 3510.

**PHYS 3611 Electromagnetism I (4 Credits)**

First of a two-quarter sequence. Vector algebra; differential vector calculus (gradient, divergence and curl); integral vector calculus (gradient, divergence and Stokes' Theorems); line, surface and volume integrals; Electrostatics: the electric field, electric potential, work and energy in electrostatics; method of images, boundary value problems and solutions to Laplace's equation in Cartesian, spherical and cylindrical coordinates; multipole expansion of the electric potential; electric fields in matter: polarization; the electric displacement vector; boundary conditions, linear dielectrics. Magnetostatics: magnetic fields and forces. Prerequisites: PHYS 1113, PHYS 1213, or PHYS 1214 and MATH 2070.

**PHYS 3612 Electromagnetism II (4 Credits)**

Second of a two-quarter sequence. Magnetic vector potential; magnetic fields in matter: magnetization; fields of magnetized objects; linear and nonlinear magnetic materials; electromotive force, Ohm's law; electromagnetic induction; Faraday's law; Maxwell's equations; the displacement current; boundary conditions; the Poynting theorem; momentum and energy density of the fields; the Maxwell stress tensor; the wave equation and electromagnetic waves in vacuum and matter; absorption and dispersion; wave guides; the potential formulation and gauge transformations; retarded potentials; dipole radiation. Prerequisite: PHYS 3611.

**PHYS 3700 Advanced Topics: General (3 Credits)**

Offered irregularly, depending on demand. May be taken more than once for credit. Prerequisite: instructor's permission.

**PHYS 3711 Optics I (4 Credits)**

First of a two-quarter sequence. Gaussian optics and ray tracing; matrix methods and application to optical design; elementary theory of aberrations; light as electromagnetic wave, diffraction and interference; interferometers and their applications. Elementary theory of coherence; selected topics. May include laboratory work as appropriate. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214, and MATH 2070.

**PHYS 3720 Light-Matter Interaction (4 Credits)**

This course will introduce the theory and applications of light-matter interactions. Fundamental theory will be explored from both semi-classical and quantum perspectives, and photon-carrier interactions will be studied in a variety of physical systems, including atoms, glasses, semiconductors, and metals. Experimental techniques will also be discussed, such as absorption, photoluminescence, and coherent spectroscopies, in addition to ultrafast nonlinear optical interactions. Students will also build their own demonstration and teaching module for elementary-age children, and will use their module to teach children at a local school.

**PHYS 3841 Thermal Physics I (4 Credits)**

First of a two-quarter sequence. Laws of thermodynamics; thermal properties of gases and condensed matter; kinetic theory of gases, classical and quantum statistics. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214 and MATH 2070.

**PHYS 3850 Foundations of Biophysics (3 Credits)**

The course highlights application of basic physics principles to the study of cells and macromolecules. Topics include random processes, thermodynamics, statistical mechanics, diffusion, to provide a quantitative description of different processes in biology at the molecular and cellular level.

**PHYS 3860 Numerical and Computational Methods in Physics (4 Credits)**

The main goal of this course is to gain a better understanding of physical problems by solving them numerically; in the process, students learn about several numerical methods and computational techniques that have a very broad range of applications in many other scientific fields. Depending on the problem, students work with a software package (Mathematica), and also acquire coding experience in different programming languages.

**PHYS 3870 Special and General Relativity (4 Credits)**

This course will start with the techniques in Special Relativity and build familiarity with tensors. In the second part of the quarter, we will generalize to curved spaces and the Schwarzschild solution. And, finally, we will set up and solve the Einstein equations using the Cartan equations of structure to study the Robertson Walker metric spacetime used to construct the energy budget of the universe. Prerequisites: MATH 1953 and either PHYS 1213 or PHYS 1214.

**PHYS 3991 Independent Study (1-10 Credits)****PHYS 3995 Independent Research (1-10 Credits)****Faculty**

**Davor Balzar**, Associate Professor and Department Chair, PhD, University of Zagreb

**Maria M. Calbi**, Professor, PhD, Universidad de Buenos Aires

**Xin Fan**, Associate Professor, PhD, University of Delaware

**Kingshuk Ghosh**, Professor, PhD, University of Massachusetts Amherst

**Jennifer L. Hoffman**, Professor, PhD, University of Wisconsin - Madison

**Steven Iona**, Teaching Professor, PhD, University of Denver

**Dinah Loerke**, Associate Professor, PhD, University of Göttingen

**Pavel Salev**, Assistant Professor, PhD, University of Tulsa

**Mark Siemens**, Professor, PhD, University of Colorado Boulder

**Toshiya Ueta**, Associate Professor, PhD, University of Illinois at Urbana-Champaign

**Tristan D. Weber**, Visiting Teaching Assistant Professor, PhD, University of Colorado Boulder

**Barry L. Zink**, Professor, PhD, University of California, San Diego

**Ronald Blatherwick**, Associate Research Professor, Emeritus, PhD, University of Denver

**Robert E. Stencel**, Professor, Emeritus, PhD, University of Michigan

**Walter J. Williams**, Professor, Emeritus, MS, University of Denver

## Political Science

Office: Sturm Hall, Room 466

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2743

Email: [polisci@du.edu](mailto:polisci@du.edu)

Web Site: <http://www.du.edu/ahss/polisci/>

The Department of Political Science offers a broad education focused on several enduring concerns in the study of political life: political theory, centering on the philosophical and moral foundation of political life; comparative and international politics, focusing on political developments and interactions around the world; American politics, concerning the study of American political institutions and processes; and law, studying legal institutions and practice in political and social life.

### Teaching

In teaching, the Department of Political Science is dedicated to providing a rigorous liberal arts experience for undergraduates. Classes emphasize the development of critical reading, thinking, writing and speaking skills in addition to learning about politics. The department also encourages development of a commitment to public service, an understanding of active citizenship and the development of political organizational skills via internship programs and community-engaged scholarship. In addition, the department encourages students to participate in the Cherrington Global Scholars program, where students gain new perspectives at institutions abroad. For qualified students, a departmental honors program also allows students to engage in substantial research projects that are closely directed by department faculty members, and our Global Masters Program allows students to complete a BA and MS in political science in five years through coursework at DU and Lund University in Sweden.

### Research

Scholarly research—including publications in academic journals and books, as well as presentations at professional conferences—is an essential component of the mission of the department. The department views teaching and research as complementary activities, central to the undergraduate experience. Active research and engagement in the discipline encourage improvement in teaching methods and substance. Much of our research also provides an opportunity for advanced undergraduates to work with department faculty. Faculty and student research has received support from the American Political Science Association, National Science Foundation, the Ford Foundation, the Social Science Research Council, the Fulbright Program and the European University Institute.

## Political Science

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

40 credits in political science, with at least 28 credits at the 2000 or 3000 level.

Code	Title	Credits
<b>Introductory Courses</b>		
Complete two of four:		8
PLSC 1000	Introduction to American Politics	
PLSC 1110	Comparing Politics around the World	
PLSC 1610	Introduction to Political Thought	
PLSC 1810	Introduction to Law and Society	
<b>Upper Division Sub-field Requirements</b>		
Complete one course at the 2000 or 3000 level in each of the four departmental sub-fields: American Politics, Comparative and International Politics, Law, Political Theory.		16
<b>Electives</b>		

Complete any two political science courses.	8
<b>Required Courses</b>	
PLSC 2901 Political Inquiry	4
PLSC 3290 Capstone Seminar in Politics	4
<b>Total Credits</b>	<b>40</b>

## Secondary Major Requirements

40 credits. Same requirements as for BA degree.

## Minor Requirements

Minimum of 20 credits in political science, with at least 12 credits at the 2000 or 3000 level.

## Departmental Internship Program

Internships for academic credit are offered in the concentrations of American politics and law; they require attendance in a seminar with other students completing an internship. Internships may be taken only after the completion of one course in the relevant concentration. No more than 4 credits earned in a departmental internship may be counted toward the 40 credits required of majors, though if a student earns more than four credits, those credits may be counted toward the maximum of 60 credits in political science.

### The "DU in DC" Program

The DU in DC program is the product of a partnership between the University of Denver and American University's Washington Semester Program, and it is an excellent opportunity for University of Denver Political Science students. Attending in American University's Fall, Spring and Summer semester (DU's Fall Quarter, our combined Winter and Spring Quarter, or during the Summer) allows you the opportunity to not only live and work in Washington DC, but it also allows you to earn course credit towards your major and overall graduation requirement.

## Distinction in the Political Science Major

Distinction in the major is open to students with a minimum 3.7 major GPA and a 3.5 cumulative GPA. There are three routes to earning distinction in the major: (1) a year-long thesis project (reserved for students pursuing an academic graduate program); (2) the revision of a significant course paper in the major for publication in an undergraduate journal; or (3) nomination by the student's Capstone professor. In all cases, students should consult a political science advisor at least four quarters before graduation.

## BA in Political Science

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

First Year		Second Year	
Fall	Credits	Winter	Credits
FSEM 1111	4	WRIT 1122	4
Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4
Analytical Inquiry: The Natural and Physical World	4	Analytical Inquiry: Society and Culture or Scientific Inquiry: Society and Culture	4
Scientific Inquiry: Society and Culture	4	PLSC: Any 1000-level Course	4
	<b>16</b>		<b>16</b>

**Second Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
Scientific Inquiry: The Natural and Physical World or Foreign Language	4	Scientific Inquiry: The Natural and Physical World or Foreign Language	4	Scientific Inquiry: The Natural and Physical World or Foreign Language	4
PLSC 2901	4	2000-level PLSC Course	4	2000-level PLSC Course	4
Elective	4	Elective	4	2000-level PLSC Course	4
Minor Course	4	Minor Course	4	Elective	4
INTZ 2501 <sup>1</sup>	2				
	<b>18</b>		<b>16</b>		<b>16</b>

**Total Credits: 98**

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**PLSC 1000 Introduction to American Politics (4 Credits)**

Philosophical traditions, historical background, structure and functioning of American government, and political attitudes and behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1110 Comparing Politics around the World (4 Credits)**

This course introduces students to the study of comparative politics, a sub-field within political science that uses a "comparative method" to compare and contrast countries to understand questions such as Where do 'states' come from? Why are only some democratic? How do states promote economic development? Why are some states increasingly rich while others remain poor? Why do people mobilize peacefully to influence politics in some places while they violently attack the established order in others? How do distinct identities rooted in ethnicity, gender, race, and religion influence politics differently around the world? How does globalization affect various countries, and why do some seem to cope with contemporary challenges more effectively than others? This course counts toward the "Scientific inquiry: Society and culture" requirement.

**PLSC 1610 Introduction to Political Thought (4 Credits)**

This course presents an introduction to some of the key ideas and questions in the study of politics. As an introductory course, it cannot present a systematic overview of the entire study of politics; rather, it seeks to introduce students to some central concerns in the study of politics. In this course we learn about the basic principles of human conduct in social contexts and explain how social scientific methods are used to understand these underlying principles. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1810 Introduction to Law and Society (4 Credits)**

This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the "law-on-the-books" and "law-in-action," and what can we learn from gaps between formal law and the "real" law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1988 Study Abroad Resident Credit (0-18 Credits)****PLSC 2001 Law and Politics (4 Credits)**

Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored may include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2002 Abortion Politics and Law (4 Credits)**

Abortion has been, and continues to be, a defining issue in America politics and law. As the traditional story goes, the country has been locked in a high-stakes and highly controversial fight over abortion since the Supreme Court legalized access in 1973 via the Roe v. Wade decision. While a convenient story, it egregiously oversimplifies both the past and present of abortion politics and law. This class aims to explore the cyclical and complex relationship between law and politics of abortion in America: how it came to become a national issue; how and why its contours have changed over time; what effects it has had on people's lives and the country's politics; and how we can constructively think about the new, post-Roe US. In doing so, we will also consider how the case study of abortion can inform our more general understandings of American politics, law, movements, and political parties.

**PLSC 2200 Politics of China (4 Credits)**

Napoleon Bonaparte allegedly said, "let China sleep, for when she wakes up, she will shake the world." Two hundred years later, China is indeed waking up, and the world is feeling the dragon's hot breath. In this class we will examine the fall and rise of the Chinese state, with a focus on its political and economic trajectories after the founding of the People's Republic of China (PRC) in 1949. Some of the key issues to be examined are: China's "economic miracle," when, if ever, will China democratize, its potentially explosive relations with Taiwan, its challenges to America's global hegemony, etc.

**PLSC 2220 Comparative Democratization: East and West (4 Credits)**

This course brings the contested notion of democratization into the East Asian context and tests its relevance for countries at various stages of political and economic development in the region. After introducing the general debates over what democratization is and tracing its emergence in Western Europe and North America, class explores the rise of democratization movements in East Asia and examines the various forms of democratization in different political and economic settings. Satisfies the department distribution requirement in comparative/International politics. Prerequisite: Sophomore standing.

**PLSC 2225 European Political Economy (4 Credits)**

Examines major challenges facing European political economies from the postwar era, including transformations in the welfare state, liberalization in light of market transitions and European integration, and global pressures. Prerequisite: sophomore standing.

**PLSC 2235 Politicized "Ethnicity": Cross-Disciplinary Approaches to the Study of Identity Politics (4 Credits)**

What are racial and ethnic identities? Are they more likely to influence political outcomes than other types of identity (e.g., gender, profession, class), and if so, why? This course introduces competing concepts of ethnic identity and connects them to the historical construction of race and national identities. By studying these issues in cases outside of the United States, you will gain unique comparative perspective about the idiosyncrasies of U.S. politics and history. Course materials include readings, podcasts, videos and documentary footage from political science, sociology, legal studies, and other disciplines. Why take this course? Gaining insight into the construction of ethnic, racial, and national identities will help you better understand yourself, your relationships, political campaigns, activist tactics, and episodes of political violence, among other things. The course satisfies the departmental sub-field requirement for majors in comparative/international politics. Recommended before taking this course: one introductory level course in political science.

**PLSC 2250 Democratic Erosion: Comparing Experiences Across Countries and Over Time (4 Credits)**

As the conclusion of the Cold War spurred a tidal wave of democratization around the globe, western policy makers and pundits often assumed that even in weak, poverty-impacted states attempts to democratize were bound to succeed – at least eventually. By 2008, however, the discourse of democratization had been transformed. "Celebrations of democracy's triumph are premature," wrote a noted scholar of democratization; "in a few short years, the democratic wave has been slowed by a powerful authoritarian undertow." Recently, both the quality and quantity of "democratic" states have declined. Even the world's oldest, most taken-for-granted liberal democratic regimes increasingly flout democratic norms and policies. We consider a range of comparative cases from across world regions. Along the way, we engage with several prominent theories of democratic backsliding or authoritarianization. The course satisfies the departmental sub-field major requirement in comparative/international politics.

**PLSC 2260 Politics of Japan (4 Credits)**

How did Japan rapidly catch up with more advanced industrial powers? Can other developing countries copy the Japanese model? What was the "darker side" behind Japan's economic miracle? How do we come to terms with the sudden burst of Japan's "Bubble Economy?" Will Japan's current economic recovery process, which started in 2002, be sustainable? Is a genuine international reconciliation between Japan and its neighbors possible? These are just some of the questions we will examine in this class. Prerequisite: sophomore standing. Cross listed with ASIA 2601.

**PLSC 2290 Latin American Politics (4 Credits)**

Latin America is home to the uneasy marriage between politics and economics. This course will focus on two major themes in Latin American politics. First, this course will examine why Latin American countries swing between democratic and authoritarian regimes. Second, the course will examine how local and global economic forces interact with politics in the region. The course will also cover some contemporary issues in Latin America such as corruption, inequality, migration, and climate change.

**PLSC 2360 Settler Colonialism and Indigenous Resistance in Three Continents (4 Credits)**

This course explores historical and contemporary aspects of racialized power structures as they have specifically impacted indigenous peoples in Australia, the United States, and Latin America. How did the dynamics of imperialism, capitalism, liberal state-building, and racist (and racist) ideology combine to devastate indigenous communities around the world? How did distinct perspectives on time, space, property, and community allow colonizing populations to conquer native populations even while advocating the most egalitarian political structures ever attempted? Satisfies department distribution requirement in comparative/international politics. Sophomore standing required.

**PLSC 2370 Global Political Economy (4 Credits)**

Global Political Economy (GPE) examines the interplay between politics and economics within and across nation-states in response to international politics and economics. The course explores the effect of political factors on international economic relations and the impact of international economic factors on domestic and international politics. The objective is to evaluate various theories of the global political economy through observation of the global political-economic system. Satisfies the department's distribution requirement in comparative/international politics. Prerequisite: Sophomore standing.

**PLSC 2410 American Government Simulation (4 Credits)**

This course explores American politics by simulating the legislative process of the federal government. Students play either a member of the House of Representatives or a member of the Executive Branch. The simulation requires that students seek the goals related to their position. By putting theory into practice, students gain a better understanding of Washington politics. Satisfies the department distribution requirement in American politics. Prerequisite: Sophomore standing.

**PLSC 2415 Campaigns and Elections (4 Credits)**

The U.S. holds hundreds of elections every year, but presidential elections stand alone as the only truly national contests. What influences presidential selection? What information can we gain as citizens and scholars from national presidential debates? These elections are guided by distinct rules (including nominations via primaries and caucuses, evolving campaign finance laws, and the strict requirements of the Electoral College) with ever-changing strategies to maximize support under these rules. This class provides students with the historic context and political science concepts and theories to better understand the many steps involved in electing U.S. presidents.

**PLSC 2420 American Presidency (4 Credits)**

Historical development and current role and powers of the U.S. presidency. Prerequisite: sophomore standing.

**PLSC 2425 Religion in American Politics (4 Credits)**

This course offers a broad, critical overview of the relationship, and some of the tensions, between religion and politics in the United States. We first review how the historical presence of a variety of American religious groups and perspectives on the relationship between church and state have impacted the nation's often conflicted sense of identity as well as the tenor of our ongoing debates about - and within - religion in American politics. That gives us a foundation for exploring a number of current "hot button" issues like debates over "moral values" and faith-based initiatives. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2430 Political Parties & Interest Groups (4 Credits)**

Evolution and structure of political parties; how they mobilize voters and provide leadership of political issues. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2450 Latinx Politics in the United States (4 Credits)**

Examines the history and contemporary role of the Hispanic/Latinx population in the U.S. political system, exploring themes including identity, racialization, immigration, social movements, public opinion, political behavior, and public policy.

**PLSC 2460 Re-Inventing Europe (4 Credits)**

Politics, economics and culture of Europe of today including basics of parliamentary democracy, contemporary political economy and national identities of major European countries as well as developments in the European Union and Eastern Europe. This course counts toward the sub-field requirement for PLSC majors in the comparative/international politics.

**PLSC 2470 State and Local Politics (4 Credits)**

This course examines the general and the unique traits of the politics, institutions, and policy processes of state governments. We will, in addition, take advantage of our location and focus on the government and politics of Colorado. Satisfies the department distribution requirement in American politics. Prerequisite: Sophomore standing.

**PLSC 2480 U.S. Congress (4 Credits)**

Structure and functions of U.S. Congress and congressional behavior. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2500 Political Psychology (4 Credits)**

This course examines the intersection of politics and psychology. Students will examine how emotion, cognition, and group psychology influence political actors and policy outcomes. Students will apply these concepts to voting, foreign policy decision-making, and the formation of belief systems.

**PLSC 2510 Women in U.S. Politics (4 Credits)**

This course focuses on the role of women in U.S. politics, with an emphasis on voting, elections, and representation. Topics include the woman suffrage movement, women's voting patterns, women as candidates, and women holding elected office. Prerequisite: sophomore standing.

**PLSC 2611 Neoliberalism: The Privatization of Everything, and its Problems (4 Credits)**

This course examines the origins, evolution, and implementation of "neoliberalism," the policy persuasion that advocates privatizing, marketizing, and deregulating the provision of almost all goods and services. Special attention will be given to the privatization of the provision of national security, what historically has been viewed as the most central function of government. This course satisfies the department's political theory distribution requirement.

**PLSC 2620 Quest for Community (4 Credits)**

This course explores how political theory over the past several decades has grappled with the benefits, limitations, and paradoxes of liberalism in the post-modern world. Inquiry revolves around whether and how liberalism can deal with the identities, differences, and distributive inequalities that complicate our world today. Is liberalism -or its successor ideology, neoliberalism- an appropriate model for political community, or should it be replaced with a different paradigm? What would it mean to think beyond liberalism to something more radical and democratic? Satisfies the department distribution requirement in political theory. Junior standing required.

**PLSC 2630 American Political Thought (4 Credits)**

Where do distinctly "American" values and beliefs come from and why are they so fiercely held? Are there viable alternatives to the classic ways in which Americans tend to address our social and political problems? This course offers an exploration of these questions from the perspective of a diverse array of American political thinkers. Starting before the Founding and continuing to political thinkers of the present day, this seminar-style course will examine different interpretations of American identity—and the unique ways they intersect—in American political speech and theory. Satisfies the department distribution requirement in either American politics or political theory. Prerequisite: Sophomore standing.

**PLSC 2650 Democracy and the Corporation (4 Credits)**

Corporations have emerged as dominant governance institutions. The largest of them reach into virtually every country in the world and exceed most governments in size, wealth, logistic capabilities, and influence. Their governance is directed both inward, structuring the environment in which most modern adults work, and outward, influencing government policy and the broader social landscape. This course will focus on the special features of corporations as governance institutions, and on the process through which corporate managers have attained significant autonomy from government and from shareholders in exercising their governance powers. Satisfies the department distribution requirement in political theory. Prerequisite: sophomore standing.

**PLSC 2660 Feminist Political Thought (4 Credits)**

This course surveys political theory literatures on feminist thinking and activism. Readings will survey historical and contemporary theories of gender, identity, patriarchy, misogyny, and liberation. Course will center trans and of-color feminist narratives thinking and practices. Emphasis on critical analysis of various feminist texts in writing and in class discussion.

**PLSC 2670 Radical Democracy (4 Credits)**

What does it mean to say "the people acted"? What is democracy, or what could it be? This course pursues answers to these questions through an exploration of works in political theory. We will read texts that attempt to move beyond procedural forms of democracy such as elections and representation and argue for more substantive forms of democracy in the form of deliberation, racial justice, and democratic agonism (or contestation). To think about the ideas in these texts as resources for enacting radical democracy from within less than democratic institutions, we will also conduct voter registration and or education on or off campus.

**PLSC 2701 Topics in American Politics (4 Credits)**

Focuses on specific issues in politics of the United States. PLSC 2701 satisfies the department's distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2702 Topics in Comparative Politics (4 Credits)**

Focuses on topics in comparative and/or international politics. Satisfies the departmental sub-field requirement in comparative/international politics. Prerequisite: sophomore standing.

**PLSC 2703 Topics in Law and Politics (4 Credits)**

Focuses on topics in law from a political science perspective. Satisfies departmental distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2704 Topics in Political Theory (4 Credits)**

Focuses on topics in political theory. Satisfies departmental sub-field requirements in political theory. Prerequisite: sophomore standing.

**PLSC 2755 Legal Actors and Institutions (4 Credits)**

This course examines the legal system from the points of view of those who work within it. It considers the social characteristics of lawyers, judges, regulators, elected officials and non-state actors, and how they matter to the social construction of law. The emphasis is on the social organization of law and the everyday interactions that bring meaning to the legal system. It considers and seeks to understand how legal roles, legal institutions and power relations within the law influence its development and practice. Throughout the course, students are required to think critically about how society and the social relationships of law influence law's outcomes. Prerequisite: Sophomore standing.

**PLSC 2820 Constitutional Law: Civil Rights and Liberties (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on equal protection of the law, fundamental rights, and freedom of speech and religion. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2860 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2825 The Politics of Rights (4 Credits)**

This course examines rights and rights-claims as complex and contingent resources for political actors. The class aims at equipping students to be better able to identify, understand, and critically evaluate how, why, and to what end rights claims are used in politics. Particular attention is paid to social and political movements that use rights-claims, as well as the various advantages, limitations, and problems that can accompany rights-based political appeals. Prerequisite: sophomore standing or above.

**PLSC 2830 Judicial Politics (4 Credits)**

This course considers the role of courts, especially the Supreme Court, in the U.S. political system. Topics include the the potential dangers and benefits of allocating significant power to un-elected justices, judicial decision-making, Court-Congress interaction in developing public policies, the social and political effects of court rulings, and legal interest groups.

**PLSC 2840 International Law & Human Rights (4 Credits)**

This course explores the role that international law plays in promoting human rights. Why did states first commit to international human rights protections after the Second World War? Why did states voluntarily surrender their sovereignty by signing and ratifying human rights treaties that limit their freedom to act domestically? Does this international law influence governments' human rights practices? Who enforces international human rights law? Which countries are leaders or laggards when it comes to international human rights? This course can count toward the sub-field requirement for PLSC majors in either law or comparative/international politics.

**PLSC 2850 Politics of Criminal Justice in the US (4 Credits)**

Problems and reforms in American criminal justice system; causes and extent of crime, excessive use of force by police, systemic racism, bail reform, probation and parole; prisons and police/community relations. Prerequisite: sophomore standing.

**PLSC 2855 Conservative Politics and the Courts (4 Credits)**

This course focuses on the reasons for and uses of litigation and judicial politics in the pursuit of conservative ends. As such, the class critically examines the different major sub-groups that define modern American conservatism; how these subgroups compare to and interact with one another; the conditions that allow for political movements generally to use courts in pursuing policy ends; and the specific steps that various American conservative groups have taken in order to influence courts, law, and policy. Introduction to American Politics (PLSC 1000) is recommended, but not required.

**PLSC 2860 Constitutional Law: Governmental Structures and Powers (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on federalism, the growth of national power, and separation of powers. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2820 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2870 Theories of Law (4 Credits)**

Approaches to law, courts and judges focusing of various theories of law including legal realism, feminist legal theory, law and society, law and economics, behavioralism. Prerequisite: sophomore standing.

**PLSC 2901 Political Inquiry (4 Credits)**

Introduces political inquiry within the discipline of political science, examining quantitative, qualitative, and historical research methods with a focus on basic principles of effective research design and data analysis; no previous mathematical background is necessary. By the end of the course, students are able to evaluate scientific research, frame a research question, and design a research study. Prerequisite: sophomore standing.

**PLSC 2988 Study Abroad Resident Credit (0-18 Credits)****PLSC 3290 Capstone Seminar in Politics (4 Credits)**

This capstone seminar is required for all majors and explores theoretical and empirical issues of politics with application to specific political developments. Topics vary by section and instructor. All students complete a significant independent research paper based in part on analysis of primary source materials. Senior standing required. Political Science majors only.

**PLSC 3701 Topics in Political Science (1-4 Credits)****PLSC 3702 Topics in Political Science (1-4 Credits)****PLSC 3703 Topics in Political Science (1-4 Credits)****PLSC 3704 Topics in Political Science (1-4 Credits)****PLSC 3982 Political Internship (1-4 Credits)**

This is a hybrid on-line/in-class internship course. Students may work on political campaigns at the federal, state, or local level. Students will keep journals structured by questions from a faculty member, meet in a seminar with others doing an internship to reflect on service in their placement, respond to on-line assignments and writing prompts, and write a research paper integrating their experience with relevant scholarship.

**PLSC 3985 Legal Internship (4 Credits)**

This is an online class for students working in internships related to the legal profession. Students may work in the local courts, advocacy organizations, the public defender's office, or the district attorney's office, either in Denver or elsewhere in the U.S. Students will complete internship hours in addition to engaging in an online course that focuses on professional development, reflections on the internship experience, and relevant legal scholarship. Students are responsible for applying to and securing their own internships (with assistance from the professor), and should plan to begin this process early, typically in advance of registration.

**PLSC 3988 Study Abroad Resident Credit (0-18 Credits)****PLSC 3990 Honors Thesis (2-8 Credits)**

Independent work on honors thesis. Prerequisite: senior standing.

**PLSC 3991 Independent Study (1-4 Credits)**

Independent scholarship on a theoretical or empirical project. Prerequisite: faculty approval.

**PLSC 3995 Independent Research (1-10 Credits)**

Students must get instructor permission and fill out an Independent Study/Research form in order to enroll in an independent research course.

## American Politics

PLSC 2410	American Government Simulation	4
PLSC 2420	American Presidency	4
PLSC 2430	Political Parties & Interest Groups	4
PLSC 2470	State and Local Politics	4
PLSC 2500	Political Psychology	4
PLSC 2510	Women in U.S. Politics	4
PLSC 2701	Topics in American Politics	4

## Comparative and International Politics

PLSC 2200	Politics of China	4
PLSC 2220	Comparative Democratization: East and West	4
PLSC 2225	European Political Economy	4
PLSC 2235	Politicized "Ethnicity": Cross-Disciplinary Approaches to the Study of Identity Politics	4
PLSC 2250	Democratic Erosion: Comparing Experiences Across Countries and Over Time	4
PLSC 2260	Politics of Japan	4
PLSC 2290	Latin American Politics	4
PLSC 2360	Settler Colonialism and Indigenous Resistance in Three Continents	4
PLSC 2370	Global Political Economy	4
PLSC 2460	Re-Inventing Europe	4
PLSC 2702	Topics in Comparative Politics	4

## Law

PLSC 2001	Law and Politics	4
PLSC 2703	Topics in Law and Politics	4
PLSC 2755	Legal Actors and Institutions	4
PLSC 2820	Constitutional Law: Civil Rights and Liberties	4
PLSC 2825	The Politics of Rights	4
PLSC 2830	Judicial Politics	4

PLSC 2870	Theories of Law	4

## Political Theory

PLSC 2611	Neoliberalism: The Privatization of Everything, and its Problems	4
PLSC 2620	Quest for Community	4
PLSC 2630	American Political Thought	4
PLSC 2650	Democracy and the Corporation	4
PLSC 2660	Feminist Political Thought	4
PLSC 2670	Radical Democracy	4
PLSC 2704	Topics in Political Theory	4

## Faculty

**Jesse Acevedo**, Assistant Professor, PhD, University of California, Los Angeles

**Sara Chatfield**, Assistant Professor, PhD, University of California, Berkeley

**Philip Chen**, Assistant Professor, PhD, University of Minnesota

**Lisa Conant**, Professor, PhD, University of Washington

**Michael Greenberger**, Assistant Professor, PhD, University of North Carolina, Chapel Hill

**Seth Masket**, Professor, PhD, University of California, Los Angeles

**Elizabeth Sheridan Sperber**, Assistant Professor, PhD, Columbia University

**Jing Sun**, Professor, PhD, University of Wisconsin - Madison

**Tanika Vigil**, Visiting Assistant Teaching Professor, JD, Harvard University

**Joshua C. Wilson**, Professor and Department Chair, PhD, University of California, Berkeley

**Nancy Wadsworth**, Professor, PhD, The New School For Social Research

**Randy Wagner**, Visiting Teaching Assistant Professor, PhD, Yale University

**Alena L. Wolfink**, Assistant Professor, PhD, University of California, Santa Cruz

**Gregg Kvistad**, Provost and Dean, Emeritus, PhD, University of California, Berkeley

**E. Spencer Wellhofer**, Professor, Emeritus, PhD, Columbia University

## Psychology

Office: Frontier Hall

Mail Code: 2155 S. Race Street, Denver CO 80208

Phone: 303-871-2478

Web Site: [www.du.edu/ahss/psychology](http://www.du.edu/ahss/psychology) (<http://www.du.edu/ahss/psychology/>)

The quest to understand human behavior is the heart of psychology. Through application of scientific principles, the psychologist searches for laws that explain human behavior and looks for ways to help people improve the quality of their lives.

Within the psychology department, students can work toward either a BA or BS and can focus study in a number of different content areas, including clinical, developmental, cognitive/neuroscience, social or quantitative psychology.

Faculty members are nationally recognized scholars and researchers as well as dedicated instructors. The department has excellent research and computing facilities and undergraduate students are encouraged to participate actively in research with their professors. Many students have coauthored one or more papers or publications with faculty members. The department also has an outstanding two-year distinction sequence, beginning in the junior year with an introduction to basic research principles and culminating in the senior year with the completion of a senior honors research project. A one-year internship experience is also available in a community hospital or agency for students with clinical interests.

While many psychology students pursue advanced degrees, interesting positions in related fields are also available for students with a BA or BS. These include positions as counselors, educators, parole officers, welfare officers and childcare and advocacy workers. A major in psychology can also provide strong preparation for careers in fields such as business, law and medicine. Students with an interest in brain function may want to consider the concentration in cognitive neuroscience, a joint major involving psychology and biological sciences. Please see the cognitive neuroscience section of this bulletin for more information.

## Psychology

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

40 credits of psychology, with 25 credits at the 2000 or 3000 level. Requirements include:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
PSYC 2300	Introduction to Statistics	4
PSYC 3050	Research Methods	4
<b>Content Courses</b>		
Complete one 2000-level course meeting three of the following four content areas: <sup>1</sup>		12
Clinical:		
PSYC 2500	Adult Psychopathology	
Cognition and Neuroscience:		
PSYC 2031	Introduction to Cognitive Neuroscience	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		
PSYC 2740	Social Psychology	
<b>Electives</b>		
Complete additional psychology courses to meet the 40 credit minimum; these can include extra courses from above.		16
<b>Total Credits</b>		<b>40</b>

Students must earn one minor or a second major. Note that only 60 credits of PSYC can count toward the total University credits necessary for the BA degree, with the exception that courses in the distinction sequence (PSYC 2751 Junior Honors Research Seminar, PSYC 2752 Junior Honors Research Seminar, PSYC 3150 Senior Honors Research Seminar, PSYC 3151 Senior Honors Research Seminar, PSYC 3152 Senior Honors Research Seminar) do not count against the 60 credit maximum.

Students interested in Distinction in the Major should consult with an advisor or the instructor for the Junior Honors sequence for additional information.

<sup>1</sup> Students may have additional options, contact advisor.

## Secondary Major Requirements

40 credits. Same requirements as for BA degree.

## Bachelor of Science Major Requirements

(183 credits required for the degree (p. 87))

45 credits of psychology, with 25 credits at the 2000 or 3000 level. Requirements include:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
PSYC 2300	Introduction to Statistics	4
PSYC 3050	Research Methods	4
<b>Content Courses</b>		<b>4</b>
Complete one 2000-level course from each of the following four content areas: <sup>1</sup>		16
Clinical:		
PSYC 2500	Adult Psychopathology	
Cognition and Neuroscience:		
PSYC 2031	Introduction to Cognitive Neuroscience	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		
PSYC 2740	Social Psychology	
<b>Electives</b>		
Complete additional psychology courses to meet the 45 credit minimum; these can include extra courses from above.		17
<b>Total Credits</b>		<b>45</b>

Students must have either two minors or a second major with a minor, with at least one of these two being a natural or computer science or mathematics. Students interested in the Distinction in the Major should consult with an advisor or the instructor for the Junior Honors sequence for additional information.

<sup>1</sup> Students may have additional options, contact advisor.

## Minor Requirements

20 credits of psychology, including:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
<b>Content Courses</b>		
Complete one 2000-level course meeting two of the following four content areas: <sup>1</sup>		8
Clinical:		
PSYC 2500	Adult Psychopathology	
Cognition and Neuroscience:		
PSYC 2031	Introduction to Cognitive Neuroscience	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		

PSYC 2740

Social Psychology

**Electives**

Complete additional psychology courses to meet the 20 credit minimum; these can include extra courses from above.

8

**Total Credits****20**<sup>1</sup> Students may have additional options, contact advisor.

## Cognitive Neuroscience

### Requirements for Psychology with Cognitive Neuroscience Concentration: Bachelor of Arts

(183 credits required for the degree (p. 85))

40 credits of psychology, with 25 credits at the 2000 or 3000 level. Requirements include:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
PSYC 2300	Introduction to Statistics	4
<b>Research Methods</b>		
Select one of the following:		4
PSYC 3050	Research Methods	
PSYC 2751 & PSYC 2752	Junior Honors Research Seminar and Junior Honors Research Seminar	
<b>Content Courses</b>		
Complete one 2000-level course from each of the following four content areas: <sup>1</sup>		16
Clinical:		
PSYC 2500	Adult Psychopathology	
Cognition and Neuroscience:		
PSYC 2031	Introduction to Cognitive Neuroscience	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		
PSYC 2740	Social Psychology	
<b>Cognitive Neuroscience Electives</b>		
Complete one course listed below or that lists PSYC 2031 as prerequisite.		4
PSYC 3045	The Developing Brain (The Developing Brain)	
PSYC 3055	The Neuroscience and Psychology of Parenthood and Parent-Child Relationships	
PSYC 3080	Drugs and Behavior	
PSYC 3120	The Science of Love	
PSYC 3155	Motivation and Emotion	
PSYC 3160	Emotion Regulation	
PSYC 3660	Perception: A Cognitive Neuroscience Approach	
PSYC 3665	Executive Functioning	
PSYC 3688	Clinical Psychopharmacology	
<b>Additional Required Courses</b>		
PSYC 3035	Seminar: Cognitive Neuroscience	2
<b>Psychology Electives</b>		
Complete additional psychology courses to meet the 40 credit minimum; these can include extra courses from above.		6
<b>Total Credits</b>		<b>40</b>

Students must also have a major or minor in Biological Sciences with a Cognitive Neuroscience Concentration. Note that only 60 credits of PSYC can count toward the total University credits necessary for the BA degree, with the exception that courses in the distinction sequence (PSYC 2751 Junior Honors Research Seminar, PSYC 2752 Junior Honors Research Seminar, PSYC 3150 Senior Honors Research Seminar, PSYC 3151 Senior Honors Research Seminar, PSYC 3152 Senior Honors Research Seminar) do not count against the 60 credit maximum.

Students interested in Distinction in the Major should consult with an advisor or the instructor for the Junior Honors sequence for additional information.

<sup>1</sup> Students may have additional options, contact advisor.

## Requirements for Psychology with Cognitive Neuroscience Concentration: Bachelor of Science

(183 credits required for the degree (p. 87))

45 credits of psychology, with 25 credits at the 2000–3000 level. Requirements include:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
PSYC 2300	Introduction to Statistics	4
<b>Research Methods</b>		
Select one of the following:		4
PSYC 3050	Research Methods	
PSYC 2751 & PSYC 2752	Junior Honors Research Seminar and Junior Honors Research Seminar	
<b>Content Courses</b>		
Complete one 2000-level course from each of the following four content areas: <sup>1</sup>		16
Clinical:		
PSYC 2500	Adult Psychopathology	
Cognition and Neuroscience:		
PSYC 2031	Introduction to Cognitive Neuroscience	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		
PSYC 2740	Social Psychology	
<b>Cognitive Neuroscience Electives</b>		
Select one course listed below or that lists PSYC 2031 as prerequisite.		4
PSYC 3045	The Developing Brain (The Developing Brain)	
PSYC 3055	The Neuroscience and Psychology of Parenthood and Parent-Child Relationships	
PSYC 3080	Drugs and Behavior	
PSYC 3120	The Science of Love	
PSYC 3155	Motivation and Emotion	
PSYC 3160	Emotion Regulation	
PSYC 3660	Perception: A Cognitive Neuroscience Approach	
PSYC 3665	Executive Functioning	
PSYC 3688	Clinical Psychopharmacology	
<b>Additional Required Courses</b>		
PSYC 3035	Seminar: Cognitive Neuroscience	2
<b>Psychology Electives</b>		
Complete additional psychology courses to meet the 45 credit minimum; these can include extra courses from above.		11

Students must have either two minors or a second major with a minor, one of which must be in Biological Sciences with a Cognitive Neuroscience Concentration. Students interested in the Distinction in the Major should consult with an advisor or the instructor for the Junior Honors sequence for additional information.

<sup>1</sup> Students may have additional options, contact advisor.

## Requirements for Psychology Minor with Cognitive Neuroscience Concentration

Concentration requirements for psychology majors are listed above. Please see the Department of Biological Sciences (p. 168) for biological sciences minor requirements associated with this concentration.

**Minor Requirements:**

Students must have a major in biological sciences or molecular biology with the cognitive neuroscience concentration. 22 credits, including:

Code	Title	Credits
PSYC 1001	Foundations of Psychological Science	4
PSYC 2031	Introduction to Cognitive Neuroscience	4
PSYC 3050	Research Methods	4
PSYC 2300	Introduction to Statistics <sup>1</sup>	
<b>Content Course</b>		
Complete one of the following courses: <sup>2</sup>		4
Clinical:		
PSYC 2500	Adult Psychopathology	
Developmental:		
PSYC 2070	Child and Lifespan Development	
Social:		
PSYC 2740	Social Psychology	
<b>Cognitive Neuroscience Electives</b>		
Select one course listed below or that lists PSYC 2031 as prerequisite.		4
PSYC 3045	The Developing Brain (The Developing Brain)	
PSYC 3055	The Neuroscience and Psychology of Parenthood and Parent-Child Relationships	
PSYC 3080	Drugs and Behavior	
PSYC 3120	The Science of Love	
PSYC 3155	Motivation and Emotion	
PSYC 3160	Emotion Regulation	
PSYC 3660	Perception: A Cognitive Neuroscience Approach	
PSYC 3665	Executive Functioning	
PSYC 3688	Clinical Psychopharmacology	
<b>Additional Required Course</b>		
PSYC 3035	Seminar: Cognitive Neuroscience	2
<b>Total Credits</b>		<b>22</b>

<sup>1</sup> PSYC 2300 or an equivalent is a required prerequisite for PSYC 3050.

<sup>2</sup> Students may have additional options, contact advisor.

**Requirements for Distinction in the Major in Psychology**

- Two quarters of PSYC 2751 Junior Honors Research Seminar PSYC 2752 Junior Honors Research Seminar (at least five credits)
- Three quarters of PSYC 3150 Senior Honors Research Seminar PSYC 3151 Senior Honors Research Seminar PSYC 3152 Senior Honors Research Seminar (at least five credits)
- Completion of a research project

**BA/BS in Psychology**

Psychology is one of the most popular majors at DU! We offer enough sections of our courses to accommodate students who are planning ahead to graduate in four years. Students concerned with their major progress should make an advising appointment to review their degree progress after checking their own progress against the typical schedule below.

Here is a sample four-year schedule of courses for a psychology major:

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111		4 WRIT 1122		4 WRIT 1133	4
Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4

#### PSYC 1001 Foundations of Psychological Science (4 Credits)

The goal of this course is to provide a general introduction to psychology examining the biological basis of behavior, perception, learning, memory, developmental transitions, personality, psychopathology, treatment, and social contexts for behavior. After completing this course, students will be able to (1) demonstrate an understanding of the defining principles and perspectives central to the inquiry of psychological science, (2) understand appropriate methods, technologies, and data that social and behavioral scientists use to investigate human functioning and conduct, and (3) develop and communicate alternative explanations or solutions for social issues considering cultural and social contexts. This course counts toward the Scientific Inquiry: Society and Culture requirement.

#### PSYC 1700 Topics in Psychology (4 Credits)

##### PSYC 2031 Introduction to Cognitive Neuroscience (4 Credits)

The goal of this course is to examine the relations between brain and behavior to better understand how complex behavior is mediated by the brain. Prerequisite: PSYC 1001.

##### PSYC 2070 Child and Lifespan Development (4 Credits)

This course explores biological, cognitive, social and emotional development across the lifespan, from the prenatal period through old age. After completing this course, students will be able to understand developmental methods and data that scientists use to investigate human development, apply developmental concepts to real-life situations and contexts, and understand explanatory systems and theories. Special attention is given to the influence of cultural and socioeconomic variations on human development. Prerequisite: PSYC1001.

##### PSYC 2090 Human Sexuality (4 Credits)

Physiological, behavioral and social aspects of human behavior. Prerequisite: PSYC 1001.

##### PSYC 2112 Psychology Research (1-5 Credits)

Through this course, students receive course credit while working on research projects in faculty-directed research groups. Roles and responsibilities vary by type of research conducted, phase of research projects that are active, and experience of the student participating in research. Students should reach out to those running research groups to ask about availability for any given quarter. Permission of instructor required.

##### PSYC 2300 Introduction to Statistics (4 Credits)

Elementary statistical methods in psychology and education. Required for all students, but especially important for students planning graduate work in psychology. Recommended: knowledge of basic algebra. Prerequisite: PSYC 1001.

##### PSYC 2500 Adult Psychopathology (4 Credits)

Nature, causes, treatment and prevention of patterns of psychopathology (clinical disorders), primarily in adults. Prerequisite: PSYC 1001.

##### PSYC 2540 The Psychology of Couples Relationships: From Dating to Mating and Beyond (4 Credits)

The primary complaints of couples in therapy include: "We can't communicate." "We fight too much." "We have grown apart and have no sex." "He/she cheats on me and /or is aggressive." We cover research on these issues, as well as how to help couples select great mates and have a lifetime loving healthy relationship. Throughout the course we cover overarching themes including the influence of popular culture (listening to music, watching movie clips) diversity in relationships (e.g., Same-sex Marriage). Prerequisite: PSYC 1001.

**PSYC 2610 Forensic Psychology (4 Credits)**

Scientific study of the the intersection of human behavior and the legal process. Prerequisite: PSYC 1001.

**PSYC 2620 Psychology of Diversity (4 Credits)**

This course provides a deep investigation into issues of diversity from a psychological perspective, including how we can understand both the value of and the threats to diversity in regards to gender, race, age, weight, and more. Prerequisite: PSYC 1001.

**PSYC 2630 Organizational Psychology (4 Credits)**

This course will provide an introduction to the field of Organizational Psychology. Organizational psychologists aim to understand behavior in organizational settings. Additionally, they apply psychological research to understanding behavior at work. The course will be broken into three units that focus on different levels of the organization. In the first unit, we will discuss the individual-level, including topics such as personality and diversity. The second unit will focus on groups, including topics such as group dynamics and negotiation. In the third unit, we will apply what we've already learned to understand the system-level, including discussions of organizational culture and organizational change. Prerequisite: PSYC 1001.

**PSYC 2700 Topics in Psychology (1-4 Credits)**

Prerequisite: PSYC 1001.

**PSYC 2701 Topics in Psychology (1-4 Credits)**

Prerequisite: PSYC 1001.

**PSYC 2740 Social Psychology (4 Credits)**

Concepts, data and principles regarding social influences on human behavior. Prerequisite: PSYC 1001.

**PSYC 2751 Junior Honors Research Seminar (1-4 Credits)**

First course in a two-year sequence. Research, design and methodology to facilitate a senior research thesis. Prerequisites: PSYC 1001. PSYC 3050. Requires acceptance to psychology distinction program and permission of instructor.

**PSYC 2752 Junior Honors Research Seminar (1-4 Credits)**

Second course in a two-year sequence. Research, design and methodology to facilitate a senior research thesis. Prerequisites: PSYC 1001. Requires acceptance to psychology distinction program and permission of instructor.

**PSYC 2760 Field Experiences in Learning & Applied Behavior Analysis (4 Credits)**

Introduction to the application of learning principles and applied behavior analysis. Students obtain first-hand experiences working in a community setting. Prerequisites: PSYC 1001. Permission of instructor required.

**PSYC 3015 Nonverbal Behavior (4 Credits)****PSYC 3020 Adolescence (4 Credits)**

This course examines development during the adolescent years exploring biological, cognitive, and social transitions central to this developmental stage. It considers key contexts in which adolescents develop: families, peer groups, schools, work, leisure, and the mass media. Special attention is given to the importance of diverse social and cultural experiences and its impact on adolescent behavior and cognition. Prerequisites: PSYC2070 and PSYC3050, must be major or minor in psychology, must have junior or senior standing.

**PSYC 3028 Social Cognition (4 Credits)**

Social cognition describes how people make sense of themselves and others. The emphasis on "how" is important—social cognition research focuses on perceptual, cognitive, and affective processes that help people think about themselves and others. You will learn about the theories, findings, and methods in a specific area of study. If you have not taken one of those courses, you should talk the instructor before signing up for this class. Prerequisites: PSYC 2740 and PSYC 3050. Course is restricted to psychology majors or minors with at least junior standing.

**PSYC 3029 Imaging the Mind (4 Credits)**

Imaging the Mind is an introductory course to the basic theory and data analysis techniques used in functional magnetic resonance imaging (fMRI). It will cover basic brain anatomy, the basic physics of MRI, experimental design, data processing and the issues associated with data processing, and interpretation of fMRI data. Students in this course will receive hands-on experience in processing a data set from start to finish. They will apply different image preprocessing techniques, statistical design parameters, and statistical models to determine how these factors influence the outcome of the data and how these factors influence the interpretation of that data. In this manner, each student will be exposed individually to the decision issues and interpretation pitfalls involved in fMRI data analysis. Cross listed with PSYC 4255. Prerequisites: PSYC 2031 and PSYC 3050, must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3032 Introduction to Neural Networks (4 Credits)**

Introduction to basic principles and computational methods in artificial neural network modeling; neural models of cognitive and psychological processes examined and evaluated. Cross listed with PSYC 4254. Prerequisite: PSYC 1001 and PSYC 3050. Must be major or minor in psychology. Must have junior standing. Permission of instructor required.

**PSYC 3035 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is for students in the cognitive neuroscience specialization, a joint program with Biological Sciences. The goal of the seminar is to provide an opportunity for senior-level cognitive neuroscience majors to apply the knowledge and skills they have acquired in other courses to current cutting-edge topics in the field. Prerequisites: PSYC 2031 and PSYC 3050, must have cognitive neuroscience concentration, must have senior standing.

**PSYC 3045 The Developing Brain (4 Credits)**

This course presents an overview of current research and methods in the field of developmental cognitive/affective/social neuroscience. The course examines what the brain tells us about development and what development tells us about the brain. Topics include sensitive periods for neuroplasticity, pediatric neuroimaging methods, attention, language, affective and social development. Cross-listed with PSYC 4045. Prerequisites: PSYC 2031, PSYC 2070 and PSYC 3050. Must be major or minor in psychology, must have junior standing.

**PSYC 3050 Research Methods (4 Credits)**

Survey of research methods and research designs in psychology used to study behavior. Required for all psychology majors, especially foundational for those planning graduate work focusing on research in psychology. Prerequisites: PSYC 2300 or INFO 1020 or BIOL 2090 or STAT 1300. Must be major or minor in psychology.

**PSYC 3055 The Neuroscience and Psychology of Parenthood and Parent-Child Relationships (4 Credits)**

This course explores the theory, research and issues relevant to parenthood and parent-child relationships. The course overviews the evolutionary, neurobiological, and psychological perspective of parent-child relationships with a focus on the understanding of recent advances in neuroscience research. Topics include neuroplasticity of parental brain, maternal vs. paternal biology for parenting, and social and biological determinants of parent-child relationships. Emphasis is placed on discussion of current research, evaluation of the findings, and proposals and ideas of new research in the field. The goal is not to memorize facts but rather to learn to think like a developmental cognitive/social neuroscientist. Cross-listed with course PSYC 4055. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology; must have junior standing.

**PSYC 3060 Eating Disorders (4 Credits)**

Overview of etiology, clinical presentation, prevention and treatment of eating disorders. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3080 Drugs and Behavior (4 Credits)**

Nature of licit and illicit drugs; their short- and long-term biological and psychological effects. Prerequisites: PSYC 2031 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3085 Autism (4 Credits)**

This course offers an in-depth examination of autism spectrum disorder (ASD) including a discussion of the characteristics of ASD, variables that contribute to one's likelihood of developing ASD, and treatments and strategies that are effective in supporting individuals with ASD. Prerequisites: PSYC 2070 and PSYC 3050; must be majoring or minoring in psychology, must have junior standing.

**PSYC 3090 Infancy and Early Childhood (4 Credits)**

The objective of this course is to introduce the study of early development focusing on the prenatal and infant periods. This course considers the exciting changes that take place during pregnancy for both mom and fetus. This course considers biological, cognitive, social, and physical development. This course is part of the field of Developmental Science. The prominent theories and research in the field are considered. Questions developmental psychologists currently and historically study and the research they conduct to help answer these questions are explored. Prerequisite: PSYC 2070 or PSYC 2050 or PSYC 2055, and PSYC 3050. Must be either a major or minor in psychology. Must have junior standing.

**PSYC 3095 Middle Childhood (4 Credits)**

Introduction to the physical, social-emotional, and cognitive development of children ages 6 to 12. The influence of families, culture, race/ethnicity, and teacher/school characteristics on children's development will be emphasized. Prerequisites: PSYC 3050; Must be either a major or minor in Psychology; Junior standing.

**PSYC 3109 Depression (4 Credits)**

This course extends knowledge acquired in PSYC 1001 and in PSYC 2500 to the in-depth study of mood disorders (unipolar and bipolar depression) across the lifespan. It covers in depth various topics, including description and classification of mood disorders, the various causes of these emotional disturbances (e.g., psychosocial, biological, genetic), and treatments of these disorders across the lifespan. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3112 Advanced Psychology Research (1-5 Credits)**

This course provides an opportunity for students who have already completed 10 hours of PSYC 2112 Psychology Research to gain advanced experience in a current research group run by a faculty member in psychology. Prerequisites: 10 hours of PSYC 2112, 40 credit hours in psychology, and permission of instructor.

**PSYC 3120 The Science of Love (4 Credits)**

This course explores the theory, research and issues relevant to love in parent-child and romantic relationships. Prerequisites: PSYC 1001, and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3130 Couples Therapy and Relationship Education: Current Status and Future Directions (4 Credits)**

There are two major approaches to helping couples achieve happy and healthy relationships over time: Couples Therapy and Couples Relationship Education. Whereas therapy helps distressed couples improve an unhappy relationship, relationship education serves as a preventative intervention designed to help happy couples protect and preserve their happiness. This course covers the major research-based approaches to couples therapy, including Cognitive-Behavioral Therapy, Integrative-Behavioral Couples Therapy and Emotional-Focused Couples Therapy. In addition, the class covers the major research-based approaches to couples relationship education, including PREP, CouplesCare, and Relationship Education. The class also focuses on both common and distinctive challenges that couples face, including: long-distance relationships, having a child, overseas deployments for military couples, psychological issues, substance abuse, medical issues, infidelity, aggression, dealing with social media and aging. Finally, the class covers issues related to diversity, including same-sex couples, interracial couples and couples from other countries and cultures. Prerequisites: PSYC 3050, PSYC 2740 and PSYC 2300 or equivalent. Must be a major or minor in psychology, must have junior standing.

**PSYC 3150 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2750, PSYC 2751 and PSYC 2752.

**PSYC 3151 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2750, PSYC 2751 and PSYC 2752.

**PSYC 3152 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2751 and PSYC 2752.

**PSYC 3155 Motivation and Emotion (4 Credits)**

Social and biological approaches to study of motivation and emotion in humans and lower animals. Prerequisites: PSYC 2031 and PSYC 3050. Must be major or minor in psychology. Must have junior standing.

**PSYC 3160 Emotion Regulation (4 Credits)**

This course covers the current state of psychological and neuroscience research on how we're able to control our emotions (emotion regulation). This topic includes studies of different types of emotion regulation strategies, such as cognitive reappraisal and expressive suppression, stress and coping, as well as self-regulation more broadly. This is a service learning course; students are required to give presentations to the class and to community members. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3262 Affective Neuroscience (4 Credits)**

Affective neuroscience is the study of emotions in the brain. In this course, we explore how new frontiers in emotion research, from brain scans to psychoactive drugs to monkey colonies, have changed the way we think about emotions and moods. We aim to learn how scientists ask these new questions: How and what can we learn about emotion from animal models, patient studies, genetic studies, brain scans, and drugs? We learn and debate different theories about what emotions are: When are emotions helpful and harmful? Why do we have them? How many are there? Can we control how we feel? Finally, we learn how to think about emotions scientifically: What kind of evidence matters? How do emotion scholars talk about their work? What kind of questions can we ask, and what kind can we hope to answer? Cross listed with PSYC 4262. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3300 Psychology of Inequality (4 Credits)**

Living in contexts of high economic inequality has psychological implications for everyone, not just those at the upper or lower ends of the economic spectrum. In this course, we will explore current trends in economic inequality and discuss how people think about inequality. We will also examine the consequences of inequality for individuals and for social groups. We will pay particular attention to how the cultural and social environment may lead to thought processes that justify and reinforce inequalities. Finally, we will discuss potential strategies that can help reduce inequality or buffer against its consequences. Prerequisites: PSYC 2620 and PSYC 3050.

**PSYC 3350 Cultural Psychology (4 Credits)**

This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3520 Introduction to Clinical Psychology (4 Credits)**

Overview of clinical roles theory and research; function and dilemmas of clinical psychologists. Prerequisites: PSYC 2500 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3530 Child Psychopathology (4 Credits)**

Child Psychopathology surveys the latest theory and research in the field of developmental psychopathology, which is the study of abnormal behavior from a developmental perspective. Students learn about what the emotional and behavioral disorders of childhood and adolescence are, what causes them, and how they are treated. Additionally, the course covers how we judge what is considered to be abnormal or atypical, how we classify abnormal or atypical behavior, and how we acquire knowledge about developmental psychopathology. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3550 Personality (4 Credits)**

This course will provide an introduction to the study of personality. Personality psychologists aim to understand how people make sense of who they are, why people behave the way that they do, and how individuals are similar to and different from one another. Course restricted to psychology major or minor students with at least junior standing. Prerequisites: PSYC 2500 and PSYC 3050.

**PSYC 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PHIL 3610. Prerequisites: PSYC 1001 and PSYC 3050; must have junior standing.

**PSYC 3660 Perception: A Cognitive Neuroscience Approach (4 Credits)**

An introduction to human perception with a strong emphasis on visual perception. This course evaluates the current understanding of how neural activity in the brain allows people to perceive basic sensory features (e.g., brightness, color, size, position, depth, movement, loudness and pitch) as well as recognize and discriminate complex perceptual patterns (e.g., 2D-shapes, 3D-objects, faces, and scenes). The underlying mechanisms are discussed on the basis of behavioral, neurophysiological, and computational evidence. We attempt to understand how the brain creates what we see and hear. Cross-listed with PSYC 4660. Prerequisites: PSYC 2031 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3665 Executive Functioning (4 Credits)**

This course provides an overview of current research, theories, and methods in the study of executive function and cognitive control. We will explore executive function from an interdisciplinary perspective, drawing on work from cognitive psychology and neuroscience, clinical neuropsychology, and developmental and educational psychology. Topics include the brain basis of executive function and cognitive control, the unity and diversity of executive functions, the development of executive functions, emotion and motivation as modulating influences on executive control, executive function in psychopathology, the role of individual differences, and links between executive function performance and higher-order behavioral outcomes. Prerequisites: PSYC 2031. Enrollment restricted to PSYC majors or minors with Junior standing.

**PSYC 3666 Brain Development & Cognition (4 Credits)**

Examines what the brain tells us about development and what development tells us about the brain. Topics include subcortical and cortical developments to the acquisition of language and drawing. Prerequisites: PSYC 2070 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3688 Clinical Psychopharmacology (4 Credits)**

This course offers an in-depth examination of medications used to treat mental disorders, including the neurobiology of these medications. Different options available for each disorder will be discussed, along with issues related to the effective use of psychiatric medications. Prerequisites: (PSYC 3080 or BIOL 3642) and PSYC 3050, must be major or minor in psychology, must have junior standing.

**PSYC 3701 Topics in Psychology (1-4 Credits)**

Prerequisites: PSYC 1001 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3759 Foundations for Field Experiences (2 Credits)**

Students prepare for internships in the helping field by learning about various placement settings that provide services to client populations, learning basic therapeutic skills, and preparing to seek internships. Prerequisites: PSYC 2500 or equivalent, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required. Corequisite: PSYC 3760.

**PSYC 3760 Field Experiences in Psychology (1-2 Credits)**

Students meet weekly with professor and complete an unpaid internship at a community organization. Prerequisites: PSYC 2500 or equivalent, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required. Corequisite: PSYC 3759.

**PSYC 3761 Field Experiences in Psychology (3-5 Credits)**

Students meet weekly with professor and complete an unpaid internship at a community organization. This class has a service learning component. Prerequisites: PSYC 2500 or equivalent, PSYC 3759, PSYC 3760, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3762 Field Experiences in Psychology (1-5 Credits)**

Students meet weekly with professor and complete an unpaid internship at a community organization. This class has a service learning component. Prerequisites: PSYC 2500 or equivalent, PSYC 3759, PSYC 3760, PSYC 3761, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3800 Internships in Psychology (4 Credits)**

Students complete an internship in the mental health or social work field while simultaneously completing assignments via our online classroom environment aimed at enhancing their understanding of 1) the application of psychological knowledge, b) professional development issues, and c) ethical and legal guidelines that impact social service providers. Must be a psychology major. Permission of instructor required and written confirmation from an internship site that indicates they will provide an unpaid internship slot for the student during the course duration. Prerequisites: PSYC 1001 or its equivalent, and PSYC 2500 or its equivalent.

**PSYC 3991 Independent Study (1-10 Credits)**

Maximum of 5 hours per quarter not to exceed a total of 10 quarter hours.

**PSYC 3999 Psychology Senior Assessment (0 Credits)**

This course involves a required assessment of graduating psychology majors' knowledge of the discipline based on coursework taken one quarter prior to graduation. Prerequisites: at least any four of the following courses required for the major: PSYC 1001 or equivalent, PSYC 2300, 3050, PSYC 2500, PSYC 2070, PSYC 2031, PSYC 2740, and at least 163 total credit hours or at least 30 credits of psychology hours.

**Faculty**

**Kimberly Sarah Chiew**, Associate Professor, PhD, Washington University

**Elysia P. Davis**, Professor, PhD, University of Minnesota

**Anne P. DePrince**, Professor, PhD, University of Oregon

**Julia O. Dmitrieva**, Associate Professor, PhD, University of California at Irvine

**Jenalee Doom**, Assistant Professor, PhD, University of Minnesota

**Kathryn R. Fox**, Assistant Professor, PhD, Harvard University

**Edward Garrido**, Teaching Assistant Professor, PhD, University of Houston

**Jill Holm-Denoma**, Clinical Professor, PhD, Florida State University

**Sarah Huff**, Teaching Assistant Professor, PhD, University of Michigan

**Pilyoung Kim**, Professor, PhD, Cornell University

**Annie Le**, Research Assistant Professor, WDR, Pennsylvania State University University Park

**Kamilah B. Legette**, Assistant Professor, PhD, University of North Carolina at Greensboro

**E. Paige Lloyd**, Assistant Professor, PhD, Miami University

**Erika Manczak**, Assistant Professor, PhD, Northwestern University

**Howard J. Markman**, Professor, PhD, Indiana University

**Lauren McGrath**, Associate Professor, PhD, University of Denver

**Kateri McRae**, Professor, PhD, University of Arizona

**Pamela Miller**, Teaching Professor, PhD, University of Texas at Austin

**Angela J. Narayan**, Associate Professor, PhD, University of Minnesota

**Nicholas Perry**, Research Assistant Professor, BA, Vassar College

**Chip S. Reichardt**, Professor, PhD, Northwestern University

**Aimee Reichmann-Decker**, Teaching Professor, PhD, University of Denver

**Christy Rossi**, Teaching Associate Professor, PsyD, University of Colorado at Denver

**Michelle Rozenman**, Associate Professor, PhD, San Diego State University

**Laura E. Santerre-Lemmon**, Clinical Assistant Professor, PhD, University of Denver

**Peter Sokol-Hessner**, Assistant Professor, PhD, New York University

**Daniel Shafik Storage**, Teaching Assistant Professor, PhD, University of Illinois

**Timothy Daniel Sweeny**, Associate Professor, PhD, Northwestern University

**Heidi Anahi Vuletich**, Assistant Professor, PhD, North Carolina State University

**Sarah Enos Watamura**, Professor and Department Chair, PhD, Cornell University

**Max Weisbuch**, Associate Professor, PhD, University of California, Santa Barbara

**Janette B. Benson**, Associate Professor, Emerita, PhD, Clark University

**Wyndol Furman**, Professor, Emeritus, PhD, University of Minnesota

**Marshall M. Haith**, Professor, Emeritus, PhD, University of California

**Arthur C. Jones**, Professor, Emeritus, PhD, University of Iowa

**Janice Keenan**, Professor, Emerita, PhD, University of Colorado Boulder

**Daniel McIntosh**, Professor and Dean, Emeritus, PhD, University of Michigan

**Bruce Pennington**, Professor, Emeritus, PhD, Duke University

**George Potts**, Professor, Emeritus, PhD, Indiana University

**Rob Roberts**, Associate Professor, Emeritus, PhD, University of Virginia

**Stephen Shirk**, Professor, Emeritus, PhD, The New School for Social Research

**Norman Watt**, Professor, Emeritus, PhD, The Ohio State University

## Public Policy

Office: Sie International Relations Complex

Mail Code: 2201 South Gaylord Street, Denver, CO 80208

Phone: 303-871-2468

Email: [baints@du.edu](mailto:baints@du.edu)

Web Site: <https://korbel.du.edu/academics-advising/programs-ug/ba-minor-public-policy> (<https://korbel.du.edu/academics-advising/programs-ug/ba-minor-public-policy/>)

Public policy is where law, politics and business meet. It is a multidisciplinary approach to analyzing and evaluating information to solve policy problems. Public policy professionals develop, assess and evaluate alternative approaches to current and emerging issues, such as education, health care, national defense or immigration. The undergraduate program in public policy provides a focused, highly competitive major and minor in public policy for ambitious and motivated students.

Since its creation in 1981, the program has graduated students who have enrolled in some of the best graduate and law schools in the United States; worked as legislative aides for the U.S. Congress or as staff assistants for various branches of government; and have found their studies immediately applicable to the public, private and nonprofit sectors. Part of the Josef Korbel School of International Studies, the undergraduate program has both a domestic and an international focus.

Students must complete 48 credits in order to fulfill the major requirements, including five core classes, a three course specialization, and four public policy electives.

## Public Policy

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

48 credits in public policy or select courses approved for elective credit by the program director. Requirements include the following:

Code	Title	Credits
<b>Required courses</b>		
PPOL 1910	Hard Choices in Public Policy	4
PPOL 2000	The Politics of American Policymaking	4
PPOL 3115	Economics for Public Policy I: Aggregates and Production	4
PPOL 3230	Analytical & Critical Skills	4
PPOL 3300	Ethics in Public Policy	4
<b>Specialization</b>		<b>12</b>
Select at least three courses in an approved area of specialization		
<b>Electives</b>		
Select additional courses in public policy to meet the 48 credit minimum.		16

## Minor Requirements

24 credits, including the following:

Code	Title	Credits
<b>Required courses</b>		
PPOL 1910	Hard Choices in Public Policy	4
PPOL 2000	The Politics of American Policymaking	4
<b>Electives</b>		
Select additional credit in public policy to meet the 24 credit minimum.		16
<b>Total Credits</b>		<b>24</b>

## Requirements for Distinction in the Major in Public Policy

- Minimum 3.5 cumulative GPA (at the time of application and graduation);
- Minimum 3.7 major GPA (at the time of application and graduation);
- Submission of Departmental Distinction application, by **April 01 of junior year** (assuming a traditional four-year timeline). The application form is available on our BA Program Portfolio Community site (<https://portfolio.du.edu/baints/>), under the “Distinction Program” tab. Failure to apply on time will invalidate a student’s eligibility to participate in the program.
- Students accepted to the Departmental Distinction Program must successfully complete the following curriculum in a satisfactory manner in order to achieve distinction in PPOL:
- PPOL 3990 (<http://bulletin.du.edu/search/?P=INTS%203990>) Thesis: Completion of Senior Analytical Policy Memorandum (4 credit hours) - Fall or Winter Quarter of senior year.

Total Credits: 178-196

<sup>1</sup> INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**PPOL 1910 Hard Choices in Public Policy (4 Credits)**

This course provides an opportunity to develop comprehensive knowledge of America's most intriguing public policy dilemmas. Policy issues to be discussed include intergenerational equity, competitiveness, the budget and trade deficits, crime, AIDS, education, health care, the environment, entitlements, immigration, race and affirmative action, public involvement, and social welfare. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PPOL 2000 The Politics of American Policymaking (4 Credits)**

This course is designed as a rigorous, analytical introduction for public policy majors to the ways in which American public policy is actually made and includes discussion of (1) Congress; (2) the President; (3) the Supreme Court; and (4) Regulatory agencies. The course is problem-centered and core policy dilemmas are discussed from both cost-benefit and decision-making perspectives. Key topics include the following interrelated issues: (a) fiscal policy and the federal budget; (b) entitlement reform; (c) health care; (d) national security; (e) the financial crisis and economic growth; (f) education; (g) criminal justice; and (h) environmental policy.

**PPOL 2701 Topics in Public Policy (4 Credits)**

Various topics in public policy are covered. Topics change each term as deemed appropriate with local, regional, and federal policy issues and regulation changes. Prerequisite: PPOL 2000.

**PPOL 2710 Demography of Public Policy (4 Credits)**

Demography is destiny." The consequences for American public policy are profound. America is aging, but becoming more diverse. A society in the midst of dynamic change is a society full of possibilities, but vulnerable to conflict. Values become indeterminate, with traditional communities vying for legitimacy with emergent cultures. Social movements, often populist in nature, challenge the established political order. This course focuses on the delineation of effective public policies to deal with demographic challenges, including (1) immigration policy; (2) the process of assimilation; (3) education; (4) geographic realignment; (5) competitive advantage of the United States relative to the European Union, Russia, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PPOL 2802 Supreme Court & Public Policy (4 Credits)**

Students examine the policy-making role of the Supreme Court in such areas as civil rights, economic policy, freedom of expression, and criminal justice, while studying the overall power of the Court to determine social policy.

**PPOL 2804 Federal Budgetary Policy (4 Credits)**

Students gain knowledge of the basics of government fiscal planning through a simulation of the federal budget process.

**PPOL 3115 Economics for Public Policy I: Aggregates and Production (4 Credits)**

The tools and techniques of economics are essential for policy analysis. This course provides an intensive and comprehensive introduction to the field of economic analysis, with a specific emphasis on the applicability of economics to public policy and problem solving within the field of policy analysis. Topics include supply and demand; gross domestic product; business cycles; classical and neo-classical economic theory; Keynesianism and Keynesian equilibrium; the "Chicago School"; fiscal policy; inflation; stimulation of aggregate demand; employment and unemployment equilibrium; creation of money; the Federal Reserve system; national debt; the financial sector; public and private debt. Prerequisite: sophomore standing. Recommended Prerequisite: PPOL 2000.

**PPOL 3116 Economics for Public Policy II: Choices and Competition (4 Credits)**

This course is the sequel to PPOL 3115. Core topics include consumer choice; choices in the public and private sector; the role of private self-interest; the role of governmental self-interest ("public choice"); utility maximization; price elasticity of demand; short and long-run costs; competition; monopoly; efficiency; oligopoly; antitrust policy; positive and negative externalities, such as taxes and regulations; effects of governmental uncertainty; market distortions; trade policy; profitability; productivity; the economics of health care and environmental regulation; leading and lagging indications of economic activity; creation of economic policy; "theory" vs. "applied" considerations. Prerequisites: PPOL 3115 and sophomore standing. Recommended Prerequisite: PPOL 2000.

**PPOL 3118 Public Policy-Money & Finance (4 Credits)**

This course is about money—the fuel that powers American society. Students will develop a sophisticated understanding of the American financial system, while coming to terms with the relationship between money, markets, and government. Students will learn key concepts in public finance, along with the operation of financial instruments like stocks, bonds, commodities and derivatives. Students who take this course will understand monetary and fiscal policy, taxation, exchange rates, and the vital role of credit.

**PPOL 3125 Power and Policy (4 Credits)**

This course focuses on the historical development of American 20th-century policy trends and will emphasize (1) the creation of the regulatory state, beginning in the late 1890s and accelerating through the Progressive Era; (2) the Great Depression, the New Deal, and the rise of entitlement culture; (3) World War II, the rise of the military-industrial state and the suburbanization of the 1950s; (4) the Civil Rights Revolution, the New Frontier and Great Society of Kennedy and Johnson—together with the value changes of the 1960s; (5) the Regan Era and the conservative challenge to big government; and (6) the policy dichotomies and uncertainties.

**PPOL 3230 Analytical & Critical Skills (4 Credits)**

Students gain the tools necessary to analyze competing points of view using empirical techniques and statistical inference. Students also learn the history and development of the scientific method; how to distinguish between speculation, theory, fact, and opinion; how to identify the validity of data; how to identify the intentional obfuscation of issues; and how to evaluate one's own prejudices and vulnerability to argument.

**PPOL 3250 Evidence & Logic in Public Policy (4 Credits)**

This course provides a focus for public policy majors on actual decision-making process within the executive and legislative branches of the federal government. Consideration is given to (1) the role of evidence, empirical analysis, and logic; (2) the role of politics; (3) the role of party affiliation and ideology in the decision-making process; (4) the role of key actors and agencies and the distribution of responsibility; (5) the role of outside experts, such as think tanks and journalists; and (6) the influence of lobbyists and other "rent seekers." Students consider such critical examples of decision-making as the Cuban Missile Crisis; the Gulf of Tonkin Resolution; the decision to invade Afghanistan and Iraq; congressional decisions relating to "health care reform" in 2009 and 2010; and the executive branch decisions involving the financial crisis of 2008, including the emergency implementation of the Troubled Asset Relief Program (TARP). Students write a detailed policy memorandum to a member of the executive branch or to a congressional leader, containing a situational analysis and action recommendation pertinent to a significant "real time" policy controversy.

**PPOL 3300 Ethics in Public Policy (4 Credits)**

1. Survey prominent fields of ethical discourse—academic and public intellectual—ranging from ancient understandings of virtue through contemporary humanism. 2. Evaluate these approaches to ethical decisions by examining a number of current moral issues. 3. Analyze the fundamental relations between morality and the law in general and in a pluralistic, democratic society in particular. 4. Practice civil dialogue. Consider the absolute necessity, but also the limits, of publicly reasoned discourse on this country's most pressing moral challenges. 5. Consider the role of normative theory in personal decision-making, community decision-making, and overlap between the two.

**PPOL 3470 Congressional Internship (1-10 Credits)****PPOL 3701 Topics in Public Policy (4 Credits)****PPOL 3980 Internships in Public Policy (0-4 Credits)**

Experience is an important asset when applying for any job. As you will find after graduation, the job market is incredibly competitive, and becoming more so. Gaining real world experience during college will make you a much stronger candidate when seeking that first position after graduation. Through PPOL 3980, you have the opportunity to earn between 0 and 4 quarter credit hours for internships, depending on the number of hours worked. The internship portfolio facilitates a student's academic, professional, and personal growth by providing documentation and representation of the internship experience. Elements of the portfolio will help bridge academic experience with career possibilities, and provides an opportunity for self-reflection through your experience. Analysis of your internship will help identify areas of success and points where you could improve overall. The objective of all aspects is to enable you to be more competitive in a global job market. Internships require departmental approval and must be undertaken during the quarter in which you register for credit. The BA program in PPOL will not award credit retroactively for internships completed prior to the quarter in which students are registered. Prerequisites: Must be a PPOL major and receive departmental permission.

**PPOL 3990 Thesis (4 Credits)**

The Departmental Distinction Program in Public Policy is geared towards advanced students who wish to pursue their study in public policy in a more intensive manner. The thesis provides an opportunity for students to do in-depth research on a topic of their choice, focusing on providing evidence-based solutions to a real-life policy issue.

**PPOL 3991 Independent Study (1-10 Credits)****PPOL 3995 Independent Research (1-5 Credits)****Faculty**

**Naazneen Barma**, Associate Professor, PhD, University of California, Berkeley

**Ajenai Shareece Clemmons**, Assistant Professor, PhD, Duke University

**Hinckley Jones-Sanpei**, Visiting Teaching Assistant Professor, PhD, University of North Carolina-Chapel Hill

**Matthew Andrew Kazan**, Professor of the Practice, MPP, The George Washington University

**Lapo Salucci**, Teaching Associate Professor, PhD, University of Colorado

**Kaitlyn Margaret Sims**, Assistant Professor, PhD, University of Wisconsin

**Real Estate & Construction Management**

Office: Daniels College of Business, Room 380

Mail Code: 2101 S. University Blvd. Denver, CO 80208

Phone: 303-871-3432

Web Site: <http://daniels.du.edu/burns> (<http://daniels.du.edu/burns/>)

The Franklin L. Burns School of Real Estate and Construction Management at the Daniels College of Business provides a one-of-a-kind education. With an emphasis on the business of the built environment, The Burns School programs are designed to equip you with the skills necessary to succeed.

Our degrees provide students with an understanding of the full life cycle of the built environment while acquiring expertise in a specific education discipline of their choice. This is an advantage because courses are taught from a managerial point of view, as opposed to the strictly technical programs often found in schools of architecture, engineering or technology. Finance, marketing, accounting and management are integrated into your degree to provide an even greater competitive edge. Students in the Burns School have the opportunity to see classroom theory come alive in the city of Denver, a wonderful urban laboratory for applications, research and internships.

The placement record for Burns School graduates has traditionally been very strong. Most of these jobs are a result of professor-industry contacts. Careers for students interested in Real Estate include acquisitions, real estate finance/underwriting, real estate development, investment fund/asset managers, property management, real estate appraisers, real estate asset management, real estate leasing, and transactions/brokerage. On the Construction Management side, careers include project management, corporate real estate, facilities management, and cost estimators.

Students interested in advanced degrees go on to the Burns School Master of Science in Real estate and the Built Environment, Law school or MBA programs at the University of Denver and other highly respected universities.

## Real Estate and the Built Environment

### Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 91))

Minimum of 44 credits. Requirements include:

Code	Title	Credits
Complete the following Real Estate and the Built Environment Major Core Requirements then select one Concentration; Real Estate, Real Estate Development or Construction Project Management for a total of 44 credit hours.		28
REAL 1700	Fundamentals of Real Estate and the Built Environment	4
REAL 3307	Real Estate Finance	4
REAL 3007	Real Estate Financial Analysis	4
REAL 3357	Corporate Real Estate and Management	4
REAL 3438	Legal Aspects of Real Estate and the Built Environment	4
CMGT 2170	Construction Building Systems	4
CMGT 2300	Introduction to Architecture and Design Management	4

#### Real Estate Concentration Requirements: *(Select any 4 Electives listed below)*

Code	Title	Credits
REAL 3010	Real Estate Capital Markets	4
REAL 3317	Real Estate Valuation and Appraisal	4
REAL 3367	Development and Feasibility	4
REAL 3369	Real Estate Taxation	4
or REAL 3337	Real Estate Securities and Syndications	
REAL 3377	Real Estate Investment Seminar	4
<b>Total Credits</b>		<b>16</b>

#### Real Estate Development Concentration Requirements: *(Select any 4 Electives listed below)*

Code	Title	Credits
REAL 3210	Planning, Entitlements, and Public Finance	4
REAL 3367	Development and Feasibility	4
REAL 3377	Real Estate Investment Seminar	4
CMGT 3155	Sustainable Development	4
CMGT 3190	Residential Development	4
<b>Total Credits</b>		<b>16</b>

#### Construction Project Management Concentration Requirements: *(Select any 4 Electives listed below)*

Code	Title	Credits
CMGT 3100	Construction Estimating	4
CMGT 3120	Construction Scheduling and Project Controls	4
CMGT 3155	Sustainable Development	4
CMGT 3177	Environmental Systems and MEP Coordination	4

CMGT 3480	Construction Project Management	4
<b>Total Credits</b>		<b>16</b>

### Elective: (REBE students are able to substitute one of the Concentration electives listed above.)

Code	Title	Credits
REAL 3140	International Immersion in the Built Environment <sup>1</sup>	4

<sup>1</sup> Can count towards international experience requirement.

## Real Estate Minor Requirements

20 credits as follows:

Code	Title	Credits
REAL 1700	Fundamentals of Real Estate and the Built Environment	4
REAL 3307	Real Estate Finance	4
REAL 3007	Real Estate Financial Analysis	4
<b>Select two courses from the following:</b>		<b>8</b>
REAL 3010	Real Estate Capital Markets	
REAL 3317	Real Estate Valuation and Appraisal	
REAL 3367	Development and Feasibility	
REAL 3369	Real Estate Taxation	
REAL 3377	Real Estate Investment Seminar	
REAL 3438	Legal Aspects of Real Estate and the Built Environment	
<b>Total Credits</b>		<b>20</b>

## Real Estate Development Minor Requirements

20 credits as follows:

Code	Title	Credits
REAL 1700	Fundamentals of Real Estate and the Built Environment	4
REAL 3307	Real Estate Finance	4
REAL 3007	Real Estate Financial Analysis	4
REAL 3210	Planning, Entitlements, and Public Finance	4
CMGT 2170	Construction Building Systems	4
<b>Total Credits</b>		<b>20</b>

## Construction Project Management Minor Requirements

20 credits as follows:

Code	Title	Credits
CMGT 2170	Construction Building Systems	4
CMGT 2300	Introduction to Architecture and Design Management	4
CMGT 3100	Construction Estimating	4
CMGT 3120	Construction Scheduling and Project Controls	4
CMGT 3480	Construction Project Management	4
<b>Total Credits</b>		<b>20</b>

## Requirements for Distinction in the Major in Real Estate and the Built Environment

Students participating in the University Honors Program, and students with a 3.85 cumulative GPA or higher upon reaching 90 hours completed, are invited to create a portfolio of in-depth business experiences to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

## Real Estate and Construction Management

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You MUST meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

### First Year

<sup>1</sup> Fulfills Analytical Inquiry: The Natural and Physical World

<sup>2</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegreerequirements/>)

<sup>3</sup> Fulfills Scientific Inquiry: Society and Culture

<sup>4</sup> INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

<sup>5</sup> If NOT studying abroad: CMGT 2170, CMGT 2300 and 2 General Electives. Please note, if not studying abroad you MUST take 4 credits of an International Elective.

<sup>6</sup> Construction Project Mgmt Concentration students are required to choose four of the following: CMGT 3100, CMGT 3120, CMGT 3155, CMGT 3177 or CMGT 3480

<sup>7</sup> Real Estate Concentration students are required to choose four of the following: REAL 3010, REAL 3317, REAL 3337 or REAL 3369, REAL 3367, REAL 3377

<sup>8</sup> Real Estate Development Concentration students are required to choose four of the following: REAL 3210, REAL 3367, REAL 3377, CMGT 3155 or CMGT 3190

Common Curriculum requirements in the First Year are generally satisfied through the sequential full-year foreign language (FOLA) requirement.

Common Curriculum requirements in the Second Year are generally satisfied through the sequential full-year Scientific Inquiry: Natural requirement.

#### **CMGT 2170 Construction Building Systems (4 Credits)**

A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced. This class will also have an off campus , experiential learning lab associated with it.

#### **CMGT 2300 Introduction to Architecture and Design Management (4 Credits)**

This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students are introduced to principles, protocols and the planning process related to the design function and the link between the architect's vision and the finished physical structure. Students are introduced to design thinking theory and application. Students learn to read and interpret the various graphical and written construction documents, know how they are developed and what information they contain. Coverage of architectural, structural, mechanical, electrical, plumbing, and civil drawings and specifications. The business model for design services is explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction. Experiential learning lab is associated with this course.

#### **CMGT 3100 Construction Estimating (4 Credits)**

This course is designed to provide the student with the theory, principles and techniques of quantity analysis (take-off), labor determinations, overhead and profit analysis. It offers insight into the construction estimating process. The role of the estimator, types of estimating, CSI Divisions, bid/contract documents, change order pricing, design/build projects, and estimation compilation will be introduced. Discussions regarding the cost/benefit of sustainable materials and typical construction materials will enhance the requisite knowledge of construction estimating. Prerequisites: CMGT 2300 and CMGT 2170. This course also has a required lab. This course is a Co/Prerequisite for CMGT 3120.

#### **CMGT 3120 Construction Scheduling and Project Controls (4 Credits)**

Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Pre/Corequisites: CMGT 3100.

**CMGT 3155 Sustainable Development/LEED (4 Credits)**

The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis will be placed on how LEED project certification influences the overall construction project. Topics will include LEED certification techniques for sustainable sites, water efficiency, energy & atmosphere, materials & resources, indoor environmental quality, innovation and design. The following topics will be covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student will study and analyze how management and LEED techniques are applied to current construction projects. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3177 Environmental Systems and MEP Coordination (4 Credits)**

A study of electrical and mechanical systems (MEP) used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating of systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings. Prerequisite: REAL 1700, CMGT 2170 and CMGT 2300.

**CMGT 3190 Residential Development (4 Credits)**

A course sequence designed to emphasize the practical application of the theories and concepts of residential development. The course provides a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property in a case format. Students will apply accounting, finance, marketing, real estate and construction management techniques in the planning for a residential development. The application of green building materials and methods is emphasized. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3480 Construction Project Management (4 Credits)**

This course offers a study of Construction Project Management including different scheduling techniques, use of estimation against scheduling, contracting, construction law, and software use for scheduling. Students obtain the needs for thought process of construction management including scheduling, bidding, proposals, communications, contracts, project planning and initialization, scheduling, estimating, resource planning, organizing, and project control. Use of software is critical and programs are chosen based on independent needs of students. Prerequisites: CMGT 2170 & CMGT 2300.

**CMGT 3700 Topics in Construction Mgmt (0-4 Credits)**

Exploration of various topics and issues related to construction management. Prerequisite: degree checkpoint 2.

**CMGT 3980 Construction Management Internship (1-10 Credits)**

Practical experience (field study); requires written report. Prerequisite: instructor's permission.

**CMGT 3991 Independent Study (1-10 Credits)**

Individual research/study; requires written report. Prerequisite: junior standing and instructor's permission.

**REAL 1700 Fundamentals of Real Estate and the Built Environment (4 Credits)**

An exploration of the importance of real estate and the built environment through triple bottom line analysis of its social, environmental, and economic impacts. The course considers a "cradle to cradle" sustainability model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value-generating solutions for society. Professional practices/skill sets associated with the many career options that engage the built environment are demonstrated. Also covered are the principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan finance, appraisal investment and tax benefits. Partially satisfies Colorado real estate broker licensing requirements.

**REAL 3007 Real Estate Financial Analysis (4 Credits)**

Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisites: REAL 3307.

**REAL 3010 Real Estate Capital Markets (4 Credits)**

This course will expose students to the commercial real estate capital markets that have evolved from exclusively private in the 1980's to a mix of private and public including commercial mortgage backed securities (CMBS) and real estate investment trusts (REITs) in the 1990's. Any person involved in real estate today must understand all the alternative capital sources available and their requirements. Students will be exposed to the positives and pitfalls of all the capital market products. Prerequisite: REAL 3007.

**REAL 3140 International Immersion in the Built Environment (4 Credits)**

Inbound U.S. and outbound U.S. real estate issues, with a mix of cultural issues that impact real estate transactions. Application of sustainability concepts is important in this course dealing with international real estate issues. Prereq. REAL 1700 or REAL 3438, Junior Standing.

**REAL 3210 Planning, Entitlements, and Public Finance (4 Credits)**

Real estate development, place making and community building require the combined efforts of the public, for-profit, and non-profit sectors. Participants in the real estate development process need to understand and appreciate the sometimes competing, and sometimes collaborative interests of governments, agencies, and the private developer. This course is designed to familiarize students with the overall context of urban planning and land use. Students discover the variety of participants in the development process and become familiar with the project entitlement process, zoning and land use regulation. Students also examine public/private financing structures such as public-private-partnerships (P3s) and become familiar with detailed calculations relating to Tax Incremental Financing (TIF) and Metropolitan Districts. Prerequisite: REAL 3007.

**REAL 3307 Real Estate Finance (4 Credits)**

Sources of financing including institutions and individuals, primary and secondary mortgage markets, mortgage banking, impact of monetary and fiscal policies on financing, underwriting analysis, traditional and alternative or creative financing techniques. Prereq. MATH 1200.

**REAL 3311 Real Estate Internship (1-4 Credits)**

Practical experience (field study) in a responsible assignment with a real estate firm; experiences presented to faculty in report form. Maximum 1 quarter hour, unless approved by program director.

**REAL 3317 Real Estate Valuation and Appraisal (4 Credits)**

Appraisal principles, including market, cost and income approaches to value, highest and best use, neighborhood and site analysis; valuation of income properties applying market, cost and income approaches to value; capitalization theory and techniques, mortgage-equity analysis, and investment value concepts. Prerequisites: REAL 3307.

**REAL 3337 Real Estate Securities and Syndications (4 Credits)**

Introduction to real estate securities; emphasis on private offerings; determining whether a contemplated transaction involves a security, and what happens if it does; exemptions from registration (Reg D); registration requirements; investor suitability, how to syndicate, acquisition of property, marketing of the property, tax structure and formation of syndication, compensation to syndicators, real estate tax considerations. Application of sustainability concepts is important in this class dealing with real estate securities issues.

**REAL 3357 Corporate Real Estate and Management (4 Credits)**

This course provides a snapshot view of the corporate real estate life cycle and how to strategically plan and manage it. Over the ten week period we will address the diverse but critical components that together account for Facility Management. These shall include: Building Life Cycles and sustainability, facility management as part of the enterprise model within a corporate structure, regulatory agencies, professional relationships and the impact of the build environment on the bottom line, contracting and budget management, move-add-change (MAC) / operations, and general administrative services. Prereq. REAL 1700 or REAL 3438.

**REAL 3367 Development and Feasibility (4 Credits)**

This course is designed to give students a hands on approach of the steps necessary in performing market feasibility analysis to emphasize market research in the development process and understand site selection factors for commercial (office, industrial, retail, apartment, hotel) real estate. The physical and financial development process is covered in a real world project chosen by the student. This is a capstone course for graduating seniors. Prerequisites: REAL 3307.

**REAL 3369 Real Estate Taxation (4 Credits)**

Tax factors affecting real estate investments; legal forms of ownership, capital gain and loss; deductions, credits, depreciation, tax basis, tax impacts on exchanges, syndications, real estate securities, and other federal tax laws affecting real estate. Application of sustainability concepts are important in this course dealing with real estate tax issues.

**REAL 3377 Real Estate Investment Seminar (4 Credits)**

Capstone course for graduating seniors. Case method applied to real property development and real estate investment analysis for decision making; computer software for discounted cash flow, risk and simulation analysis; growth, sustainability and environmental issues, portfolio strategy and analysis. Prerequisites: REAL 3007.

**REAL 3438 Legal Aspects of Real Estate and the Built Environment (4 Credits)**

General contract and real estate law, tax law, landlord-tenant law, and various areas of liability for real estate practitioners. Construction contract preparation, bonding and insurance requirements, indemnity agreements, rights and remedies of property owners, contractors and subcontractors, emphasis on administration of a complete contract package for procurement and construction.

**REAL 3701 Topics in Real Estate (1-4 Credits)****REAL 3800 NAIOP Challenge (2-4 Credits)**

Student teams analyze and formulate real-world solutions for an existing complex real estate problem, culminating in internal and external competitions. Includes a comprehensive written report and oral presentation. Cross listed with CMGT 3800, CMGT 4800, REAL 4800. Prerequisite: Instructor's permission.

**REAL 3980 Real Estate Internship (1-10 Credits)**

Prerequisite: instructor's permission.

**REAL 3991 Independent Study (1-10 Credits)**

Independent study/research; requires written report. Prerequisites: approval of instructor.

## Faculty

**Jeff L. Engelstad**, Professor of the Practice of RECM, PhD, University of Denver

**Eric A. Holt**, Assistant Professor, PhD, Purdue University-West Lafayette

**Mark L. Levine**, Professor, JD, University of Denver

**Glenn R. Mueller**, Professor, PhD, Georgia State University

**Drew Glenn Mueller**, Associate Professor, PhD, Colorado State University

**Vivek Sah**, Professor and Director, PhD, Georgia State University

**Ron L. Throupe**, Associate Professor, PhD, University of Georgia

**Daniel Joseph Trujillo**, Assistant Professor of the Practice, PhD, University of Denver

## Religious Studies

Office: Sturm Hall, Room 266

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2749

Email: [rlgs@du.edu](mailto:rlgs@du.edu) ([rlgs@du.edu?subject=Inquiry%20for%20the%20Department%20of%20Religious%20Studies](mailto:rlgs@du.edu?subject=Inquiry%20for%20the%20Department%20of%20Religious%20Studies))

Web Site: <http://www.du.edu/ahss/religiousstudies> (<http://www.du.edu/ahss/religiousstudies/>)

The University of Denver's undergraduate religious studies program offers you the opportunity to study religion in ways that you won't find at other universities—as a major, a double major, or a minor.

- You'll learn about many of the major religious traditions of the world.
- You'll investigate how theories of religion can help you interpret the religious phenomena that you see around you.
- You'll learn about religion by experiencing it, for instance by going on class visits to religious institutions in Denver and by doing projects in local religious communities.
- You'll be able to take a community-engaged learning course, where you'll see up close why many religions emphasize the value of service to others.
- Finally, you'll learn what it means to do independent research in religious studies while developing excellent writing skills.

The department also serves other students who want introductory courses in religious studies or advanced courses coordinated with their special interests.

The religious studies major is a thoroughly interdisciplinary liberal arts program providing graduates with an excellent basis from which to pursue careers requiring imagination, problem-solving, communication skills and an awareness of human diversity.

## Religious Studies

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

Majors take a minimum of 40 credits in religious studies including 12 credits of courses focused on specific religious traditions; a four-credit theory course; and six elective courses. Students are encouraged to participate in accredited international programs with religious studies content. Honors students and majors demonstrating high academic achievement in religious studies may pursue "distinction in the major" by completing a thesis or customized project on a topic of specific interest. They will design their project in consultation with a religious studies faculty mentor and present a proposal to the department faculty.

The following course lists are suggestions and not exhaustive. If you have questions about whether a course satisfies one of the requirements, please consult with the department advisor.

Code	Title	Credits
<b>Global Religions</b>		
Choose 3 course at the 2000 or 3000 level: 12		
RLGS 2250	Introduction to African American Religions	
RLGS 2301	American Indian Religion	
RLGS 3001	Judaism	
RLGS 3102	Early Judaism	

RLGS 3203	Christianity
RLGS 3192	Christian Classics
RLGS 3500	Islam
RLGS 3503	Quran and Hadith
RLGS 3814	Modern Hinduism
RLGS 3820	Buddhism

### Theory

Choose 1 course at the 2000 or 3000 level: 4

RLGS 2106	Religious and Social Justice in Vienna
RLGS 2118	"Women as the Gateway to Hell": Gender and Identity in South Asia
RLGS 2119	Caste, Race and Colonialism
RLGS 2401	Social Justice in a Global Context: Theory and Practice
RLGS 3456	Kant on Religion
RLGS 3642	Martin Luther King, Jr., Malcolm X and Civil Rights
RLGS 3645	Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism
RLGS 3695	Digital Religion
RLGS 3002	Creation & Humanity
RLGS 3300	Psychology of Religion
RLGS 3315	Religion & Moral Psychology
RLGS 3350	Culture, Psyche, and Religion
RLGS 3370	Freud, Psychology, & Religion
RLGS 3448	Theory of the Subject: From Hegel to Zizek
RLGS 3453	Is God a Racist Sexist?: Black Liberation and Womanist Theology
RLGS 3452	Political Theology
RLGS 3454	Capitalism, Religion, Democracy
RLGS 3460	Nietzsche & the Death of God
RLGS 3642	Martin Luther King, Jr., Malcolm X and Civil Rights
RLGS 3465	Derrida and Postmodernism
RLGS 3694	Religion in the Virtual Space: A Critical Theory Approach
RLGS 3740	Bodies and Souls
RLGS 3760	Globalization and Religion: Theory and Methods
RLGS 3890	Religion and Diaspora

### Electives

Choose 6 courses at the 2000 or 3000 level: 24

RLGS 2002	Comparative Religion and Interreligious/Interfaith Dialogue
RLGS 2004	Anthropology of Jews & Judaism
RLGS 2005	Philosophy of Religion
RLGS 2012	Jewish Politics and Political Jews in the United States
RLGS 2026	Race: Black, Jew, Other
RLGS 2102	Judaism, Christianity & Islam
RLGS 2103	Religions of China & Japan
RLGS 2104	The Bible as Literature
RLGS 2108	Islam in the United States
RLGS 2109	Religions of Tibet
RLGS 2110	Buddhism in the U.S.A.
RLGS 2111	Islam and United States Politics
RLGS 2112	Major Islamic Thinkers 1900s-2000s
RLGS 2114	Roots of Yoga and Tantra: Methodologies and Modern Practice
RLGS 2115	Common Figures in the Bible and Qur'an
RLGS 2116	American Mythology
RLGS 2117	Religions of India
RLGS 2251	Contemporary Gospel Music: Religion, Culture, and the Black Church

RLGS 2202	New Testament
RLGS 2205	Women, Gender, and the Bible
RLGS 2303	Lived Religions
RLGS 2310	World Christianities
RLGS 2501	Islam on Film
RLGS 2600	Religion and Popular Culture
RLGS 3024	Maimonides: Greek, Islamic, and Christian Encounters
RLGS 3086	The Emergence of Monotheism
RLGS 3150	The Bible & Dead Sea Scrolls
RLGS 3151	Dead Sea Scrolls
RLGS 3205	Native Americans and Christianity in USA
RLGS 3470	Mysticism & Psychedelics
RLGS 3502	Contemporary Islam
RLGS 3504	Islam and Gender
RLGS 3693	Religion and the Media
RLGS 3708	First Americans in Film: Religion, Land, and Identity
RLGS 3707	Religion and Film
RLGS 3832	Religious Lives: The Dalai Lamas
RLGS 3885	Islamic Mysticism
RLGS 3891	Justice: A Biblical Perspective
RLGS 3893	Buddhism and Social Justice

**Total Credits****40**

## Secondary Major Requirements

40 credits. Same requirements as for BA degree.

## Minor Requirements

The Religious Studies minor is a carefully planned program of 20 credits that works well with other majors in the liberal arts and sciences, as well as other fields. In order to complete the Religious Studies minor, the student will complete the following requirements:

3 Global Religions courses

1 Theory course

1 Elective course

Please note: Requirements may be fulfilled with both 2000 and 3000 level courses. Any Religious Studies course may count toward the Elective requirement.

Here is a sample course list for how requirements for a minor in Religious Studies might be fulfilled:

Code	Title	Credits
<b>Global Religions - choose 3 courses taken at 2000 or 3000 level</b>		<b>12</b>
RLGS 2250	Introduction to African American Religions	4
RLGS 2301	American Indian Religion	4
RLGS 3001	Judaism	4
RLGS 3102	Early Judaism	4
RLGS 3203	Christianity	4
RLGS 3192	Christian Classics	4
RLGS 3500	Islam	4
RLGS 3503	Quran and Hadith	4
RLGS 3814	Modern Hinduism	4
RLGS 3820	Buddhism	4
<b>Theory - choose 1 course at the 2000 or 3000 level</b>		<b>4</b>

RLGS 2119	Caste, Race and Colonialism	4
RLGS 2401	Social Justice in a Global Context: Theory and Practice	4
RLGS 3002	Creation & Humanity	4
RLGS 3300	Psychology of Religion	4
RLGS 3350	Culture, Psyche, and Religion	4
RLGS 3370	Freud, Psychology, & Religion	4
RLGS 3453	Is God a Racist Sexist?: Black Liberation and Womanist Theology	4
RLGS 3454	Capitalism, Religion, Democracy	4
RLGS 3456	Kant on Religion	4
RLGS 3642	Martin Luther King, Jr., Malcolm X and Civil Rights	4

RLGS 3452	Political Theology	4
RLGS 3470	Mysticism & Psychedelics	4
RLGS 3502	Contemporary Islam	4
RLGS 3707	Religion and Film	4
RLGS 3832	Religious Lives: The Dalai Lamas	4
RLGS 3460	Nietzsche & the Death of God	4

## Requirements for Distinction in the Major in Religious Studies

- Minimum 3.5 cumulative GPA by the end of the Winter Quarter of the Junior Year
- Minimum 3.75 major GPA by the end of the Winter Quarter of the Junior Year
- Be nominated by a faculty member or the undergraduate advisor (in consultation with other faculty members in the department) to pursue Distinction in the major (majors of high academic caliber who plan to study abroad for all or part of the Junior Year may be recommended by the undergraduate advisor for nomination earlier)
- Upon review of the entire faculty, be invited to prepare a curriculum plan for the final year of study in the major
- Identify a faculty member with whom to consult in preparing the curriculum plan and who will oversee the final project (see below)
- Submit a curriculum plan, to be approved by faculty, by which the student will be able to demonstrate an *area of concentration within the major*, one that brings the required and upper-division, elective courses within the department and approved, upper-division courses outside the department into a certain “constellation” or coherence
- Submit a portfolio of representative work undertaken in the major
- Submit a final project to be designed in consultation with a faculty mentor in the department. The final project may take the form of:
  - A rewritten and expanded research paper taken from a Religious Studies course;
  - A separate senior “thesis”;
  - A translation effort;
  - A substantive service learning assignment/commitment with a considerably sophisticated reflection component and evaluation by the supervisor;
  - A creative work (e.g., poetry, a play, a film, a photographic essay, etc.).
- Meet with faculty mentor and one other faculty member of the department at the end of the quarter prior to graduation at which time the portfolio and final project will be reviewed and a vote of recommendation to receive Departmental Distinction taken.

## BA in Religious Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

The major in Religious Studies comprises 40 hours (10 courses) distributed as follows:

3 Global Religion courses

1 Theory course

6 Elective courses

We recommend the following plan of study, which should be pursued in consultation with the Department's undergraduate advisor

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
First-Year Seminar	4	WRIT course (often WRIT 1122)	4	WRIT course (often WRIT 1133)	4
RLGS: 2000-level course	4	RLGS: 2000-level course	4	RLGS: Global Religions	4
Common curriculum course	4	Common curriculum course	4	Common curriculum course	4
Common curriculum course	4	Common curriculum course	4	Second Major, Minor, or Elective	4
	16		16		16

### Second Year

Fall	Credits	Winter	Credits	Spring	Credits
RLGS: Global Religions	4	RLGS: Global Religions	4	RLGS: Theory or Elective	4
Common curriculum course	4	Common curriculum course	4	Common curriculum course	4
Common curriculum course	4	Second Major, Minor, or Elective	4	Common curriculum course	4
Second Major, Minor, or Elective	4	INTZ 2501 <sup>1</sup>	2	Second Major, Minor, or Elective	4
	16		14		16

### Third Year

Fall	Credits	Winter	Credits	Spring	Credits
Study Abroad	4	RLGS: Theory or Elective	4	RLGS: Elective	4
Study Abroad	4	Advanced Seminar (ASEM)	4	Second Major, Minor, or Elective	4
Study Abroad	4	Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4
Study Abroad	4	Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4
	16		16		16

### Fourth Year

Fall	Credits	Winter	Credits	Spring	Credits
RLGS: Elective	4	RLGS: Elective	4	Second Major, Minor, or Elective	4
Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4
Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4
Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4	Second Major, Minor, or Elective	4
	16		16		12

Total Credits: 186

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

## Additional Notes

If you have maintained a 3.75 GPA in the major and have achieved an overall DU GPA of 3.5 by the end of the Winter Quarter of your Junior year AND you wish to pursue Distinction in the Major (p. 585), which requires the completion of a final project, you should consult with the undergraduate advisor, identify a faculty mentor, and submit a curriculum plan during the Spring term of this year.

### **RLGS 2002 Comparative Religion and Interreligious/Interfaith Dialogue (4 Credits)**

This course is an introduction to the comparative study of religion, a venerable sub-discipline in the field of religious studies. It is also an introduction to a new, emerging sub-discipline: interfaith or interreligious dialogue. It seeks to equip students with the knowledge base and skill set needed to engage religious diversity in ways that promote, admittedly, idealistic, 21st-century goals: cooperation, stability, and peace. The course seeks to increase religious literacy by 1) introducing students to the world's great religious traditions and 2) to theoretical approaches that enable an appropriate comparison of those traditions. By means of 3) site visits to several religious communities and 4) interaction with religious leaders and practitioners in the Denver metropolitan area, students will gain experience-based knowledge of religious traditions other than their own. The course will also provide 5) leadership strategies for promoting genuine interreligious understanding. While this course fulfills a Common Curriculum, AI-S requirement and invites all interested students from throughout the University, it also serves as the entry ramp course for majors in Religious Studies or other programs to fulfill the College of Arts, Humanities & Social Sciences (CAHSS) Keystone Experience requirement in Comparative Religion & Interfaith Dialogue.

### **RLGS 2004 Anthropology of Jews & Judaism (4 Credits)**

This course is cross-listed with ANTH 2004 and JUST 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

### **RLGS 2005 Philosophy of Religion (4 Credits)**

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2005.

### **RLGS 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **RLGS 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and JUST 2011.

### **RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

**RLGS 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and JUST 2014.

**RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)**

The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces.

**RLGS 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. Cross-listed with JUST-2026 and PHIL-2026.

**RLGS 2070 American Jewish Experience (4 Credits)**

In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry's religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life. Cross-listed with ANTH 2070 and JUST 2070.

**RLGS 2102 Judaism, Christianity & Islam (4 Credits)**

This course introduces students to the three major monotheistic religious traditions: Judaism, Christianity, and Islam. In the process of tracing the long and rich histories of Judaism, Christianity, and Islam, we examine the beliefs and practices that became central and definitive for Jews, Christians, and Muslims. We begin with the ancient heritage of each religion (scriptures, founders, early institutions). Then we explore how these foundational traditions were preserved and re-invigorated in response to centuries of social change and critical moments of political upheaval. Most significant, in this regard, is the Jewish, Christian, and Muslim encounter with their respective holy Scriptures—as generation after generation of adherents have attempted to understand the revealed words of God, to proclaim their continual relevance for all places and all times and to inscribe them upon their bodies and hearts through prayer, worship, and daily life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2103 Religions of China & Japan (4 Credits)**

This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2702.

**RLGS 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and JUST 2104.

**RLGS 2106 Religious and Social Justice in Vienna (4 Credits)**

This special travel course provides an opportunity for students to learn how certain major religions are globally engaged in the promotion of social justice through humanitarian relief work and cultural exchanges. In addition to a brief survey of the historical relationship between the beliefs, teachings, and social practices of the major Western traditions, the course offers hands-on experience and interaction with Jewish, Catholic, and Protestant relief agencies as well as other non-governmental organizations in Vienna, Austria, which has become the international center for UN-directed human services and humanitarian relief efforts as well as global headquarters for leading NGOs. Students discover how the culture, history, and geography of Vienna have nurtured the vast global human services "economy" to which these religious organizations contribute and which are built around the work of the United Nations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2108 Islam in the United States (4 Credits)**

A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with "American" accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2109 Religions of Tibet (4 Credits)**

This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2110 Buddhism in the U.S.A. (4 Credits)**

Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the "two-way traffic" between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2111 Islam and United States Politics (4 Credits)**

This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans' relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2112 Major Islamic Thinkers 1900s-2000s (4 Credits)**

This course offers students a substantive introduction to major Islamic thinkers of the 20th and 21st centuries. Starting with Abu `Ala Maududi, whose work on Qur'anic interpretation and the meaning of jihad laid the groundwork for new waves of radical activism in the modern Muslim world, this course exposes students to the works of "movers and shakers" like Sayyid Qutb and Ayatollah Ruhollah Khomeini. Students engage these thinkers through a mix of primary and secondary sources, developing a sense of context as they work through their arguments. The course continues with some of the major later 20th-century Islamic thinkers active in Muslim-minority spaces, focusing on Bosnian Grand Mufti Mustafa Cerić and the Moroccan-French scholar Mohammed Arkoun. It concludes by looking at two major figures of the early 21st century, noting how they blend intellectual and political activism: Iranian cleric Mohsen Kadivar and American scholar Amina Wadud. Throughout the course, student groups present on various contemporary issues, helping them develop presentation and writing skills while allowing them to apply course knowledge to real-world issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**

This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the the guru/śiṣya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ASIA 2714.

**RLGS 2115 Common Figures in the Bible and Qur'an (4 Credits)**

This course offers students a thematic introduction to the key common figures in the Bible and Qur'an, focusing on the major prophets, from Adam to Jesus, as well as Eve and Mary. Grounded in the primary source texts while exposing students to classic and contemporary scholarly work on these figures, it concludes with a look at the figure of God in the two scriptures.

**RLGS 2116 American Mythology (4 Credits)**

Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish "symbolic articulation of the social patterns" of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, "How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they "performed" today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the "idea of America" has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American "civil religion"—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study.

**RLGS 2117 Religions of India (4 Credits)**

This course introduces students to the religions of India, which include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. These religious traditions are distinct but always in dialogue and often in competition with one another. Students will explore how different religious communities intersect and overlap in different contexts and historical periods, including in religious spaces: temples, monasteries, pilgrimages sites, and sacred spaces. Students will learn about histories, rituals, and literature, with a focus on lived religions, past and present. This course counts toward the Analytic Inquiry: Society and Culture requirement.

**RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)**

This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified "feminine" and the construction of gender within modern South Asia.

**RLGS 2119 Caste, Race and Colonialism (4 Credits)**

This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how "identity" and "privilege" are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast) in order for them to "see" how they both produce and are "produced" by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces?.

**RLGS 2202 New Testament (4 Credits)**

This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church's slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion's encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2202.

**RLGS 2205 Women, Gender, and the Bible (4 Credits)**

From Eve to Mary Magdalene, women play essential roles in biblical texts. While many courses, books, and Bible studies focus primarily on men, this course will focus women included in biblical and apocryphal texts as well as the way the Bible has been used to regulate gender in society, leadership, churches, and homes. Feminist and womanist biblical criticism will be used throughout this course, as will a focus on gender critical readings. Through critical reading and reflection on both primary texts and secondary texts, students will form their own views of the representations of female characters, named and unnamed, in the Bible. Additionally, students will ponder the ways that these texts still affect women today.

**RLGS 2250 Introduction to African American Religions (4 Credits)**

This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America.

**RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. Cross-listed with MUAC 2251.

**RLGS 2301 American Indian Religion (4 Credits)**

This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the "Great Plains Indians" (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues.

**RLGS 2303 Lived Religions (4 Credits)**

The concept of "lived religions" has become prominent in religious studies since the 2000's. While people may think of religions as sets of sacred writings, rules, and rituals, the "lived religions" approach focuses on the ways that people incorporate religion into their activities. The approach is new enough that scholars have not yet come to full agreement on what the term "lived religions" should include and what it implies about religions and how to study them. The course will make room, therefore, to debate the advantages and drawbacks of studying religions through the ways people use religion to shape their life. Students will examine examples of how people live their religion and trace the relationships of these practices to religious teachings and ideas. This effort will involve asking a variety of questions. How closely are religious practices related to teachings and ideas? Does a specific religion put greater emphasis on engaging in specific activities or on agreeing with particular teachings? If people's behavior does not fit with a religion's teachings but the people still consider it to be related to key aspects of religion, does it count as religious? Or have these people moved away from religion into a practice that is spiritually meaningful but not religious? Or is spirituality something even more sharply different from religion? Or is spirituality also part of religion? If we look closely at how people in a religious tradition live, what do we see that we would not notice if we were looking at the religion as only a system of beliefs? For instance, does the sense of time of people who adhere to the religion's calendar of remembrances differ from the sense of time of people who do not? And what specifically would we do to learn about religion, if we concentrate on people's actions? In opening up such inquiries students will learn both about studying religions and about major facets of religious traditions. The course will require reading and successful completion of tests. Visits to off-campus sites and completion of reports on site visits will facilitate learning through encounter and participation. Students will also undertake a project using concepts from the course to imagine and interpret lived religion in behaviors or in aspects of the physical or social world. The religions, practices, and sites for study, observation, and interpretation—as well as the assignments—may vary each time the course is offered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2310 World Christianities (4 Credits)**

This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as its foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization.

**RLGS 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)**

Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2501 Islam on Film (4 Credits)**

This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2600 Religion and Popular Culture (4 Credits)**

Although religion and popular culture are often seen as separate conceptual spheres—the former dealing with the "sacred" and the latter with the "profane"—these two spheres are deeply intertwined and shape one another. Religion often expresses itself in popular culture through the arts and various forms of media, while popular religion frequently expresses itself through religious memes and other representations. This course will explore the complex relationship between religion and popular culture. By studying film, comics, music, tattooing, and other cultural products, we will discover how beliefs, ideals, practices, institutions from various religious traditions shape popular culture and how symbols that are embedded in popular culture shape religious traditions.

**RLGS 2980 Internship (1-4 Credits)**

Designed to provide undergraduate majors and minors with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. Restrictions: junior or senior standing; at least 20 credits of RLGS courses for majors or at least 12 credits for minors.

**RLGS 3001 Judaism (4 Credits)**

A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with JUST 3001.

**RLGS 3002 Creation & Humanity (4 Credits)**

Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity's role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity's relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

**RLGS 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)**

The "Abrahamic Traditions" (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions – Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with JUST 3003.

**RLGS 3023 Great Thinkers: Maimonides (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**RLGS 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and PHIL 3024. Prerequisite: Junior standing or instructor's permission.

**RLGS 3086 The Emergence of Monotheism (4 Credits)**

This course is cross-listed with JUST 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

**RLGS 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and ANTH 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**RLGS 3102 Early Judaism (4 Credits)**

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with JUST 3102.

**RLGS 3150 The Bible & Dead Sea Scrolls (4 Credits)**

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with JUST 3150. Prerequisites: One year of Hebrew language or equivalent or by special permission of the instructor.

**RLGS 3151 Dead Sea Scrolls (4 Credits)**

The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with JUST 3151.

**RLGS 3192 Christian Classics (4 Credits)**

Reading and discussion of influential historic books pertaining to Christian life and devotion.

**RLGS 3203 Christianity (4 Credits)**

This is an introductory course about the Christian religion, with a substantial component devoted to experiential learning. The primary goal of the course is to acquaint students with the richness, dynamism and diversity of one of the world's largest and most influential religious traditions. Even those students who have some general knowledge of Christianity benefit from the disciplined approach of the academic study of religion.

**RLGS 3205 Native Americans and Christianity in USA (4 Credits)**

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed "contextualized" forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

**RLGS 3300 Psychology of Religion (4 Credits)**

Beliefs, feelings and actions representing human religious response of experience; function of religion in individual life.

**RLGS 3302 Islamic Fundamentalism (4 Credits)**

This writing-intensive course introduces students to the history and scope of fundamentalist movements in the Muslim world, focusing on the Middle East. Beginning with a look at the internal traditions of renewal and reform built around the idea of a return to the fundament or origins of Islam, the course examines the rise of major movements from the 1700s to the present. Students will engage with key questions, including the following: What distinguishes fundamentalism from radicalism? How do Sunni and Shii fundamentalisms differ? What roles have these movements played in politics and society, and how might these evolve in the future? How might policy makers and others best approach fundamentalist groups? A basic knowledge of Islam is assumed; students wishing to enroll without this background knowledge will be provided supplementary readings.

**RLGS 3315 Religion & Moral Psychology (4 Credits)**

Philosophical foundations and research strategies of psychological studies of moral thought; Aristotelian, Kantian and utilitarian thought included, as well as religious dimensions of morality.

**RLGS 3350 Culture, Psyche, and Religion (4 Credits)****RLGS 3370 Freud, Psychology, & Religion (4 Credits)**

Readings, discussion, and papers help students learn about the life, intellectual and social environment, and clinical and theoretical work of Sigmund Freud. Attention is given to the influence of Freud's work on the understanding of religion at the beginning of the 21st century.

**RLGS 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and "subjectification" (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled The Hermeneutics of the Subject. This course is cross-listed with PHIL 3448.

**RLGS 3452 Political Theology (4 Credits)**

A general inquiry, focusing on the modern and postmodern eras, into various forms of philosophical reflection on the relationship between religion and political theory. Survey of the seminal ideas of such major thinkers as Kant, Hegel, Schmidt, Strauss, Derrida, Agamben, Asad, and Žižek.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3454 Capitalism, Religion, Democracy (4 Credits)**

The course explores the historical and contemporary relationship between capitalism, religion, and democracy at a theoretical level. Focus will be on the question of what exactly is capitalism as understood by key political philosophers and social theorists in relationship to the religious world views and values that authorize it. At the same time, the course will examine in what measure these world views and values also promote liberal democracy, or work against it, while offering a genealogical account of such phenomena as slavery, colonialism, gender and class domination, along with present day iterations of ethno-nationalism and neoliberal hegemony.

**RLGS 3456 Kant on Religion (4 Credits)**

A study of the philosopher Immanuel Kant's major writings on religion and their subsequent influence on critical theory and the philosophy of religion.

**RLGS 3460 Nietzsche & the Death of God (4 Credits)**

This course will involve an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Cross listed with PHIL 3460.

**RLGS 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with PHIL 3465.

**RLGS 3470 Mysticism & Psychedelics (4 Credits)**

The course will examine various texts, traditions, and practice from indigenous to New Age religions that fall under the general category of what has been historically labelled "mysticism." Special emphasis will be placed on chemical or plant-induced forms of altered consciousness, commonly known as "psychedelics" or "entheogens". that both simulate, and are frequently employed by different peoples in different times and places in tandem with, mystical experiences. The course will also examine the transcultural as well as the syncretic nature of mystical practices, spiritual disciplines, and the use of mind-altering substances, in particular with reference to the misuse of these forms by secular enthusiasts who are responsible for what is known as "cultural appropriation" or "neocolonial" misrepresentation.

**RLGS 3475 Deleuze and Semiotics (4 Credits)**

Examines the development of the thought of the famous French postmodern thinker Gilles Deleuze with special attention to his cultural and semiotic theory to the degree that it is relevant to the philosophy of religion. The course also investigates how Deleuze's work has shaped, and is beginning to push in new directions, contemporary postmodern philosophy. Prerequisites: must be at least junior standing and have completed at least two undergraduate courses in philosophy.

**RLGS 3500 Islam (4 Credits)**

Introduction to the history, faith, practice, culture(s), and politics of Islam, starting with the Judeo-Christian Near Eastern context in which it emerged and tracing its theological development and geographic spread around the world. Proceeding thematically along a broad historical frame, the course ends with an examination of the numerous, often competing, trends in contemporary Muslim communities.

**RLGS 3502 Contemporary Islam (4 Credits)**

This course introduces students to contemporary Islam. After a historical overview, the course looks thematically at different spheres of Muslim life. It considers changes that relate to political systems and forms of governance, styles of education, labor and professional work, changes in daily life habits such as timing and organization, changes in gender relations, and changes in religious authority. It also pays attention to the ways in which faith and practice are articulated through cultural practices like pop music and film.

**RLGS 3503 Quran and Hadith (4 Credits)**

This writing-intensive course introduces students to the key texts of Islam--the Qur'an and hadith--including their origins and meaning as well as how they have been interpreted by Muslims over time, and focusing as well on case studies that highlight issues of crucial relevance for today and the future.

**RLGS 3504 Islam and Gender (4 Credits)**

This upper-level course introduces students to key debates, historical developments, and thematic issues in the study of Islam and gender. It grounds this study in theoretical texts but takes a lived religions approach, focusing primarily on the production of "modern" gender norms in the colonial and post-colonial era. It proceeds thematically, with class sessions on sexualities, dress, reproduction, family roles, masculinities, pious self-construction, and the gendering of pilgrimage, and concludes with a look at contemporary and likely future debates.

**RLGS 3505 Gender and Politics in Muslim Pop Cultures (4 Credits)**

This undergraduate/graduate course introduces students to contemporary Muslim popular cultures, in the United States and around the world. It uses gender and politics as thematic lenses, taking a lived religions approach to phenomena that range from pious television programming to online efforts to spread Islamophobia.

**RLGS 3570 Religion and Morality in the American Public Square (4 Credits)**

Close focus on one or two moral issues in which religion is drawn into public debate in the contemporary U.S. Observation of the debate first hand at demonstrations, town meetings, and discussion groups, etc. Analysis of these observations is facilitated by readings on the subject and class discussion.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**RLGS 3645 Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism (4 Credits)**

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as "religion", "nationalism", and "secular" in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

**RLGS 3693 Religion and the Media (4 Credits)**

Interactions between religion and all forms of communications media in American life.

**RLGS 3694 Religion in the Virtual Space: A Critical Theory Approach (4 Credits)**

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netnography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacques Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

**RLGS 3695 Digital Religion (4 Credits)**

This course introduces students to the study of digital religion from a lived religions perspective. It begins with an examination of the history, concepts and methods of the field, and continues with thematic explorations of digital religion scholarship across varied religious traditions. Students develop an understanding of how scholars study religion and spiritual identities, beliefs, and practices online, and how the religious and digital arenas influence and shape one another.

**RLGS 3701 Topics in Religious Studies (1-4 Credits)**

An exploration of various topics and issues related to the academic study of religion. The subject matter of the course varies and may be taught by the regular faculty of the department or a visiting scholar. Some offerings may include a travel component.

**RLGS 3707 Religion and Film (4 Credits)**

Understanding religion requires us to take culture seriously. In doing so, we must consider products of culture, including popular culture. This course engages both classic and more recent films as "texts" to be analyzed, not as mere entertainments or diversions. We focus not only on those films that identify themselves explicitly as "religious" or reflect a particular religious tradition, but also moved that render the subject more obliquely, which reveal – via image and sound – religion as a complex human activity.

**RLGS 3708 First Americans in Film: Religion, Land, and Identity (4 Credits)**

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

**RLGS 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.

**RLGS 3760 Globalization and Religion: Theory and Methods (4 Credits)**

This course explores how religious movements around the world both affect, and are affected by, the process of globalization. A major segment of the course is devoted to various theories of globalization and how they account for the increasingly important role of religion. Focus is largely on the relationship between Christianity, Judaism, and Islam.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism. Cross listed with RLGS 3814.

**RLGS 3820 Buddhism (4 Credits)**

Buddhist life and thought from origins to present in India, Tibet, Japan and China. Cross listed with ASIA 2704.

**RLGS 3832 Religious Lives: The Dalai Lamas (4 Credits)**

This course explores the many lives of the Dalai Lamas and the transformation of a reincarnated religious teacher into the political leader of Tibet and, eventually, a worldwide religious personality. In order to understand that transformation, the course investigates the institution of the Dalai Lamas from historical, doctrinal, and ritual perspectives. We will look at the role of the Dalai Lama as an embodiment of the bodhisattva of compassion at the center of a tapestry of religious ceremony and ritual performances. The course will also consider the religious, ethical, and political thought of several of the most prominent Dalai Lamas, with significant attention given to the writings and work of the current, fourteenth, Dalai Lama. Cross listed with ASIA 3732.

**RLGS 3885 Islamic Mysticism (4 Credits)**

The origins and development of Islamic mysticism, including asceticism and the Sufi orders.

**RLGS 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

**RLGS 3891 Justice: A Biblical Perspective (4 Credits)**

This is a service learning course designed for religious studies undergraduate majors, though non-majors are welcome to enroll. Cross listed with JUST 3891.

**RLGS 3892 Grant Writing for Community Engagement and Research (4 Credits)**

This community engagement course introduces student to non-profit work and to scholarship on non-profit activities. It connects students with community partners, continuing the department's commitment to experiential learning and to engagement with living faith communities. Students spend course time discussing scholarship on grant writing and non-profit grant support and discussing logistical and other issues related to their community engagement partners. This course is intended to help provide advanced undergraduate and graduate students with arenas for future research, including possible thesis topics, while also offering a practical opportunity for professional development. Understanding 501(c)3 corporations and experience in writing grant proposals will be an asset for students planning to work in non-profits as well as for those continuing on to doctoral work.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**

This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**RLGS 3898 Dharamsala: Myth, Land, and Traditions (4 Credits)**

This course explores the myths and stories that root cultural, religious, social and political traditions in the material landscape of India. It will explore the sacred spaces, images, rituals, and belief-traditions of the Himalayan region surrounding Dharamsala, India. As a study-abroad course, the materials, site visits, and community-engaged learning projects interrogate how myths operate as both cultural “glue” and demarcations of difference. Students participate in community-engaged learning placements to learn how myth creates and fosters cultural communities. Through site visits and readings we will learn how the “lived experience” of cultural belief-traditions, social and political practices, and sacred images and spaces are products of a unique marriage of land, story, and community. We will also have lectures and a Canvas site with pre-travel readings that will prepare you for the cultural and social belief-traditions we will encounter within Dharamsala. While in India, we will continue to read about ritual, devotion, stories of the land, social and political identities rooted in the land, and more. This course will be cross-listed with INTS for undergraduate and graduate elective credit.

**RLGS 3988 Study Abroad Resident Credit (0-18 Credits)****RLGS 3991 Independent Study (1-10 Credits)****RLGS 3995 Independent Research (1-10 Credits)****Faculty**

**Christy Cobb**, Assistant Professor, Doctor of Philosophy, University of Denver

**Sandra Lee Dixon**, Associate Professor and Department Chair, PhD, University of Chicago

**Jason Jeffries**, Assistant Professor, PhD, Rice University

**Benjamin James Nourse**, Assistant Professor, PhD, University of Virginia

**Carl A. Raschke**, Professor, PhD, Harvard University

**Andrea Stanton**, Associate Professor and Senior Associate Dean, PhD, Columbia University

**Dheepa Sundaram**, Assistant Professor, PhD, University of Illinois

**William B. Gravely**, Professor, Emeritus, PhD, Duke University

**Gregory A. Robbins**, Professor, Emeritus, PhD, Duke University

**Socio-Legal Studies**

Office: Ricketson Law Building, Room 465A

Mail Code: 2255 E. Evans Ave. Denver, CO 80208

Phone: 303-871-6761

Email: [randolph.wagner@du.edu](mailto:randolph.wagner@du.edu)

Web Site: [www.du.edu/ahss/sociolegal/](http://www.du.edu/ahss/sociolegal/) (<http://www.du.edu/ahss/sociolegal/>)

Law affects many aspects of our lives. Students who major or minor in socio-legal studies—an interdisciplinary program within the College of Arts, Humanities and Social Sciences—focus on important questions about modern society: How does law operate in people’s everyday lives? How do social institutions shape law? How are social institutions shaped by law? How does law empower and constrain individuals, groups, organizations and communities? When can the law be used to change the society? Students majoring in socio-legal studies often pursue a legal career, but the issues addressed in the major are relevant to all fields of endeavor.

**Socio-Legal Studies****Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 85))

All students must take a minimum of 40 credits of coursework. To ensure a broad education, students majoring in Socio-Legal Studies must also complete a second major.

Code	Title	Credits
<b>Required Courses</b>		
PLSC 1810	Introduction to Law and Society	4
SOCI 2120	Methods of Socio-Legal Inquiry	4
PLSC 2755	Legal Actors and Institutions	4
<b>Electives</b>		

Remaining hours must be selected from the following approved electives (see internship option below) and topics courses approved by the director.

#### Environmental Science

ENVI 3000	Environmental Law	4
-----------	-------------------	---

#### Media, Film and Journalism Studies

MFJS 3040	Media Law	4
-----------	-----------	---

MFJS 3700	New Media Law & Regulation	4

#### Internships

Student may complete pre-approved internships to fulfill up to 8 credits toward the major. Major and minor courses cannot be double counted.

#### Total Credits

40

## Secondary Major

40 credits. Same requirements as for BA degree.

## Minor Requirements

The minor requires 20 credits including one of the following: PLSC 1810 Introduction to Law and Society, SOCI 2120 Methods of Socio-Legal Inquiry, PLSC 2755 Legal Actors and Institutions. Remaining credits are selected from electives listed in the major. Only one course in the student's minor can be from that student's major area. Student may complete a pre-approved internship to fulfill up to 4 credits toward the minor. Major and minor courses cannot be double counted.

## Requirements for Distinction in the Major in Socio-Legal Studies

Socio-legal majors may pursue graduating with Program Distinction if they receive a recommendation from a member of the Socio-legal Studies faculty and have an overall DU GPA of 3.5, and GPA within the Socio-legal Studies major of 3.75.

To win the designation of graduation with Distinction in Socio-legal Studies, students must successfully complete a Senior Thesis. The guidelines for completing the thesis are as follows:

- Students must select a faculty member from the Program who will agree to act as Thesis Advisor.
- Students will submit a thesis proposal to the Thesis Advisor for approval before October 15 of the

senior year.

- Students wishing course credit for thesis work should contact the Program Director to register for an appropriate course. The Thesis Advisor will act as the designated instructor.
- The completed thesis, once approved by the Thesis Advisor, must be submitted to a committee of three faculty by April 1 of the senior year. The committee will consist of the Thesis Advisor and two other faculty, one of whom may be from outside the Socio-legal Studies faculty.
- During the month of April, the Thesis Advisor will schedule a one-hour meeting between the student and the faculty committee to discuss the thesis and its implications for the discipline.

o NOTE: If you are in the University Honors Program, you should check with them for specifics on their calendar and requirements for completion of the thesis; their deadlines are different than ours.

o Departmental Theses (for students who are NOT in the HONORS program) MUST be defended by the end of the 7<sup>th</sup> week of any quarter to ensure timely major approval and inclusion in the commencement program.

- Students who satisfactorily complete a thesis, as determined by the faculty committee, will receive program distinction, which will be noted in the Commencement program and on your transcript. You will also be recognized at our Department Recognition Ceremony in early June.
- Honor cords are not given out for Distinction in the Major; they are only given to students invited to join Alpha Kappa Delta (AKD), the Sociology Honor Society.

Students wishing further information should contact the Program Director (Randy Wagner; Ricketson Law Building 450; phone: 303.871.6761 email: randolph.wagner@du.edu).

## BA in Socio-Legal Studies

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111		4 WRIT 1122		4 WRIT 1133	4
Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4

INTZ 2501 <sup>1</sup>	2	Minor or Elective	4
	18	16	17-18

Total Credits: 99-100

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

#### **ANTH 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with JUST 2011 and RLGS 2011.

#### **ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

#### **ENVI 3000 Environmental Law (4 Credits)**

Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

#### **JUST 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and RLGS 2011.

#### **JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

#### **LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

#### **LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**MFJS 3040 Media Law (4 Credits)**

Introduction to freedom of expression and media law. Students learn how the American legal system works and gain an understanding and appreciation of the philosophical foundations of free expression. In addition, students confront many of the issues facing professional communicators today. Topics include incitement, hate speech, student speech, copyright, defamation, and other issues crucial to mass media professionals. The course examines also explores challenges to free expression brought by new(er) communication technologies. The purpose of this class is to give students the knowledge and critical thinking skills needed to be successful in today's rapidly changing communication environment. Cross-listed with MFJS 4300.

**MFJS 3700 New Media Law & Regulation (4 Credits)**

An examination of recent developments in internet and social media law and regulation.

**PHIL 2040 Practical Logic (4 Credits)**

In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**PHIL 2150 Philosophy of Law (4 Credits)**

Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2700 Biomedical Ethics (4 Credits)**

Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 3061 Kant's Ethics/Aesthetics/Politics (4 Credits)**

A study of Kant's "value theory" and its historical significance. Prerequisite: junior standing or instructor's permission.

**PHIL 3175 Morality and the Law (4 Credits)**

A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

**PHIL 3179 Virtue Ethics (4 Credits)**

Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

**PHIL 3211 Contemporary Pol Philosophy (4 Credits)**

This class focuses primarily on the philosophical problems generated by thinking about political authority and justice. We discuss the nature of political authority, justice, rights, equality and the role of property in a modern state.

**PLSC 1810 Introduction to Law and Society (4 Credits)**

This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the "law-on-the-books" and "law-in-action," and what can we learn from gaps between formal law and the "real" law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 2001 Law and Politics (4 Credits)**

Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored may include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2002 Abortion Politics and Law (4 Credits)**

Abortion has been, and continues to be, a defining issue in America politics and law. As the traditional story goes, the country has been locked in a high-stakes and highly controversial fight over abortion since the Supreme Court legalized access in 1973 via the Roe v. Wade decision. While a convenient story, it egregiously oversimplifies both the past and present of abortion politics and law. This class aims to explore the cyclical and complex relationship between law and politics of abortion in America: how it came to become a national issue; how and why its contours have changed over time; what effects it has had on people's lives and the country's politics; and how we can constructively think about the new, post-Roe US. In doing so, we will also consider how the case study of abortion can inform our more general understandings of American politics, law, movements, and political parties.

**PLSC 2703 Topics in Law and Politics (4 Credits)**

Focuses on topics in law from a political science perspective. Satisfies departmental distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2755 Legal Actors and Institutions (4 Credits)**

This course examines the legal system from the points of view of those who work within it. It considers the social characteristics of lawyers, judges, regulators, elected officials and non-state actors, and how they matter to the social construction of law. The emphasis is on the social organization of law and the everyday interactions that bring meaning to the legal system. It considers and seeks to understand how legal roles, legal institutions and power relations within the law influence its development and practice. Throughout the course, students are required to think critically about how society and the social relationships of law influence law's outcomes. Prerequisite: Sophomore standing.

**PLSC 2820 Constitutional Law: Civil Rights and Liberties (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on equal protection of the law, fundamental rights, and freedom of speech and religion. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2860 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2830 Judicial Politics (4 Credits)**

This course considers the role of courts, especially the Supreme Court, in the U.S. political system. Topics include the the potential dangers and benefits of allocating significant power to un-elected justices, judicial decision-making, Court-Congress interaction in developing public policies, the social and political effects of court rulings, and legal interest groups.

**PLSC 2840 International Law & Human Rights (4 Credits)**

This course explores the role that international law plays in promoting human rights. Why did states first commit to international human rights protections after the Second World War? Why did states voluntarily surrender their sovereignty by signing and ratifying human rights treaties that limit their freedom to act domestically? Does this international law influence governments' human rights practices? Who enforces international human rights law? Which countries are leaders or laggards when it comes to international human rights? This course can count toward the sub-field requirement for PLSC majors in either law or comparative/international politics.

**PLSC 2850 Politics of Criminal Justice in the US (4 Credits)**

Problems and reforms in American criminal justice system; causes and extent of crime, excessive use of force by police, systemic racism, bail reform, probation and parole; prisons and police/community relations. Prerequisite: sophomore standing.

**PLSC 2855 Conservative Politics and the Courts (4 Credits)**

This course focuses on the reasons for and uses of litigation and judicial politics in the pursuit of conservative ends. As such, the class critically examines the different major sub-groups that define modern American conservatism; how these subgroups compare to and interact with one another; the conditions that allow for political movements generally to use courts in pursuing policy ends; and the specific steps that various American conservative groups have taken in order to influence courts, law, and policy. Introduction to American Politics (PLSC 1000) is recommended, but not required.

**PLSC 2860 Constitutional Law: Governmental Structures and Powers (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on federalism, the growth of national power, and separation of powers. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2820 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2870 Theories of Law (4 Credits)**

Approaches to law, courts and judges focusing of various theories of law including legal realism, feminist legal theory, law and society, law and economics, behavioralism. Prerequisite: sophomore standing.

**PLSC 3985 Legal Internship (4 Credits)**

This is an online class for students working in internships related to the legal profession. Students may work in the local courts, advocacy organizations, the public defender's office, or the district attorney's office, either in Denver or elsewhere in the U.S. Students will complete internship hours in addition to engaging in an online course that focuses on professional development, reflections on the internship experience, and relevant legal scholarship. Students are responsible for applying to and securing their own internships (with assistance from the professor), and should plan to begin this process early, typically in advance of registration.

**PSYC 2610 Forensic Psychology (4 Credits)**

Scientific study of the the intersection of human behavior and the legal process. Prerequisite: PSYC 1001.

**RLGS 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and JUST 2011.

**RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group’s significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

**SOCI 2120 Methods of Socio-Legal Inquiry (4 Credits)**

This course provides a broad overview of socio-legal research methods. Specifically, the course examines how qualitative and quantitative research methods are used to answer socio-legal research questions. Students participate in research in order to understand the process of designing a project, collecting data, analyzing data, and reporting findings.

**SOCI 2250 Criminology (4 Credits)**

Social meaning of criminal behavior; relationship between crime and society in particular, how production and distribution of economic, political and cultural resources shape construction of law, order and crime; different types of crime, criminals and victims, and efforts to understand and control them. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2622 Deportation Nation (4 Credits)**

This service-learning course examines the nexus of the criminal justice and immigration—or, crimmigration—system. Through a scholarly analysis situated of the historical, social, and political processes that have informed contemporary immigration law and policy, the course focuses on the shift to enhanced enforcement, detention, and mass deportation. Prerequisite: SOCI 1810.

**SOCI 2750 Sociology of Law (4 Credits)**

Overview of theory and research about relationship between law and society; legal rules, roles, organizations and inter-institutional relations; activities of legal profession, courts, juries, legislatures and regulatory agencies. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2760 Discipline and Punishment (4 Credits)**

Institutional mechanisms for imposing discipline and for punishing wayward individuals and groups; contradictory social objectives of punishment and corrections; organizational settings for administering punishment and identifying predominant institutional routines in coercive environments. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2765 The Female Offender (4 Credits)**

Female offenders are one of the fastest growing segments in both the juvenile and adult justice systems. This course introduces students to debates and issues surrounding girls, women, and crime; explores different theoretical perspectives of gender and crime; and examines the impact of gender on the construction and treatment of female offenders by the justice system. In addition, this course specifically looks at girls’ and women’s pathways to offending and incarcerations; understanding girls’ violence in the inner city; exploring the reality of prison life for women, with a particular focus on the gender-sensitive programming for incarcerated mothers; and ending with an examination of how capital punishment has affected women offenders historically and contemporarily. Cross listed with GWST 2765. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2770 Kids and Courts (4 Credits)**

This course examines how American society has responded to the problem of at-risk and delinquent youth in the twentieth and twenty-first centuries. The primary focus will be on the juvenile court’s and the encompassing juvenile justice system’s efforts to address this problem. The court’s and the system’s ameliorative attempts to help at-risk children/adolescents as well as their more punitive policies directed at serious and violent young offenders will be investigated. Differences in juvenile court policies and practices over time and across jurisdictions (both in the United States and in other countries) will be considered. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2775 Wrongful Conviction (4 Credits)**

The criminal justice system was once considered infallible—innocent people did not end up in prison. But DNA evidence has revealed that innocents are incarcerated and perhaps even executed. This course focuses on the prevalence of wrongful conviction; the harms caused by wrongful conviction; the causes of wrongful conviction; strategies for reducing wrongful conviction; and the prospect of compensating the wrongfully convicted. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2780 Women and the Law (4 Credits)**

This course explores the relationship between women and the law, looking at the way the categories of sex and gender have been produced and reproduced through law. Through a look at case law and sociological research, students will examine women as bodies, workers and family members. This course also explores the development and current status of American law in the areas of women’s constitutional equality, pay equity and equal opportunity, women’s access to education, women in the workplace and violence against women. Cross listed with GWST 2780. Prerequisite: SOCI 1810 or permission of the instructor.

**SOCI 2785 Family and the Law (4 Credits)**

The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with GWST 2785. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2790 Policing Society (4 Credits)**

Emergence and development of police organizations and tactics; factors that influence policing styles and objectives; historical precedents; policing the street; policing the board room; policing the world; and policing everyday life. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2795 Capital Punishment (4 Credits)**

This course examines three main topics: the history of capital punishment (facts and trends, public opinion, legislation, and landmark Supreme Court cases); arguments often made for abolition (arbitrariness, cost, and innocence); and arguments often made for retention (deterrence, incapacitation, and retribution). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2820 Drugs and Society (4 Credits)**

Relationship between drug use, drug control and social contexts; various sociological themes relating to use and control of drugs in American society. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2825 Sexualities and the Law (4 Credits)**

This course provides an overall conceptual and applied understanding of sexualities (sexual identities, relationships, behavior, and choices), law, and punishment in the United States. All of the following areas will be examined: sexual minorities' rights (with a focus on marriage equality) and relationships; reproductive regulation; sex industry; pornography; and responses to sex offenses (with a focus on responses to college sexual assault). Students in this course will identify the ways legislation and the courts define and regulate sexualities in society. Prerequisite: SOCI 1810.

## Sociology and Criminology

Office: Sturm Hall, Room 446

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303.871.2948

Email: sociology@du.edu

Web Site: <http://www.du.edu/ahss/sociology/>

What causes delinquent and criminal behavior? How are gender, racial and class inequalities reproduced and challenged by groups and institutions? What are the origins of the self? These are the kinds of questions sociologists and criminologists attempt to answer. For students interested in sociology or criminology, the department offers non-majors an understanding of human social systems as part of a liberal arts education and prepares majors for graduate or professional school. The broad perspectives of sociology and criminology are also useful backgrounds for students planning to enter a variety of careers such as law, social work, education or management.

Our low student/faculty ratio allows professors to guide, counsel and advise students according to individual needs and career goals. As well as taking an active, creative role in the classroom and as advisors, DU professors are involved in exciting research projects in which undergraduate students can participate. The department also offers an internship program designed to give sociology and criminology majors and minors the opportunity to gain valuable work experience in a community agency.

Many of the department's majors go on to law school or to graduate programs in sociology, criminology or social work. Others choose to work in various social service agencies, private organizations and businesses.

## Sociology

The sociology major provides a general background in theory, methods and a variety of substantive areas within sociology.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

Program note: Students may not double-major, double-minor or major-minor in both sociology and criminology.

40 credits, including the following:

Code	Title	Credits
<b>Required coursework</b>		
SOCI 1810	Understanding Social Life	4
SOCI 2020	Sociological Classics	4
SOCI 2005	Sociological Imagination and Inquiry--Part A	4
SOCI 2006	Sociological Imagination and Inquiry--Part B	4
SOCI 2420	Social Inequality	4
SOCI 3999	Sociology Assessment	0
<b>Electives</b>		

Complete additional sociology courses to meet the 40 credit minimum. Of these courses, 16 credits of electives must be taken from our roster of sociology courses. The remaining 4 credits may be taken from our roster of criminology courses, or can be used for internship or practicum.

---

**Total Credits**
**40**

<sup>1</sup> Internship note: Students must meet the following prerequisites to enroll in the internship program: have junior or senior standing, be sociology or criminology majors or minors, have a cumulative GPA of 3.25 and have taken at least three sociology- or criminology-related courses beyond Understanding Social Life (SOCI 1810).

## Secondary Major

40 credits. Same requirements as for BA degree.

## Minor Requirements

Pre-law and pre-social work students will find a minor in sociology especially helpful to their long-term careers.

Program note: Students may not double-major, double-minor or major-minor in both sociology and criminology.

20 credits, including:

Code	Title	Credits
SOCI 1810	Understanding Social Life	4
<b>Electives</b>		
Complete additional sociology courses to meet the 20 credit minimum. 12 of these credits must be taken from our roster of sociology courses. The remaining 4 credits may be taken from our roster of criminology courses, or as internship (see internship note above in major requirements section).		16
<b>Total Credits</b>		<b>20</b>

## Criminology

The criminology major provides a general background in theory and methods and a variety of substantive courses on the creation and application of criminal law, the causes of criminal behavior and societal responses to lawbreaking.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

Program note: Students may not double-major, double-minor, or major-minor in both sociology and criminology.

40 credits, including the following:

Code	Title	Credits
<b>Required coursework</b>		
SOCI 1810	Understanding Social Life	4
SOCI 2020	Sociological Classics	4
SOCI 2005	Sociological Imagination and Inquiry--Part A	4
SOCI 2006	Sociological Imagination and Inquiry--Part B	4
SOCI 2250	Criminology	4
SOCI 3998	Criminology Assessment	0
<b>Electives</b> <sup>1</sup>		<b>20</b>
Select five of the following: <sup>2</sup>		
SOCI 2255	Juvenile Delinquency	
SOCI 2260	Deviance and Society	
SOCI 2710	Crime and Inequality	
SOCI 2750	Sociology of Law	
SOCI 2755		
SOCI 2757	State Violence	
SOCI 2760	Discipline and Punishment	
SOCI 2765	The Female Offender	

SOCI 2770	Kids and Courts
SOCI 2775	Wrongful Conviction
SOCI 2780	Women and the Law
SOCI 2785	Family and the Law
SOCI 2790	Policing Society
SOCI 2795	Capital Punishment
SOCI 2820	Drugs and Society
SOCI 2830	White-Collar Crime
SOCI 2855	Crime and the Media

**Total Credits****40**

<sup>1</sup> Up to four credits can be the internship. Internship note: Students must meet the following prerequisites to enroll in the internship program: have junior or senior standing, be sociology or criminology majors or minors, have a cumulative GPA of 3.25 and have taken at least three criminology-related courses beyond Understanding Social Life (SOCI 1810).

<sup>2</sup> Complete additional criminology courses to meet the 40 credit minimum. Of these courses, 16 credits of electives must be taken from our roster of criminology courses. The remaining 4 credits may be taken from our roster of sociology courses, or can be used for internship or practicum.

## Secondary Major

40 credits. Same requirements as for BA degree.

## Minor Requirements

Students interested in law or law enforcement will find a minor in criminology especially helpful to their long-term career goals.

Program note: Students may not double-major, double-minor or major-minor in both sociology and criminology.

20 credits of criminology-related courses, including the following:

Code	Title	Credits
SOCI 1810	Understanding Social Life	4
SOCI 2250	Criminology	4
<b>Electives <sup>1</sup></b>		<b>12</b>
Select three of the following: <sup>2</sup>		
SOCI 2255	Juvenile Delinquency	
SOCI 2260	Deviance and Society	
SOCI 2710	Crime and Inequality	
SOCI 2750	Sociology of Law	
SOCI 2755		
SOCI 2757	State Violence	
SOCI 2760	Discipline and Punishment	
SOCI 2765	The Female Offender	
SOCI 2770	Kids and Courts	
SOCI 2775	Wrongful Conviction	
SOCI 2780	Women and the Law	
SOCI 2785	Family and the Law	
SOCI 2790	Policing Society	
SOCI 2795	Capital Punishment	
SOCI 2820	Drugs and Society	
SOCI 2830	White-Collar Crime	
SOCI 2855	Crime and the Media	

**Total Credits****20**

<sup>1</sup> Up to four credits can be the internship. Internship note: Students must meet the following prerequisites to enroll in the internship program: have junior or senior standing, be sociology or criminology majors or minors, have a cumulative GPA of 3.25 and have taken at least three sociology- or criminology-related courses beyond "Understanding Social Life" (SOCI 1810).

- <sup>2</sup> Complete additional criminology courses (typically 12 credits) to meet the 20 credit minimum. 4 credits may be taken as internship, and can substitute for one criminology elective (see internship note above in major requirements section).

## Requirements for Distinction in the Major in Sociology and/or Criminology

- Minimum of 3.5 major GPA and 3.25 overall GPA
- Completion of Senior Thesis
- Student must select a faculty member from the Department who will agree to act as Thesis Advisor
- Student will submit a thesis proposal to the Thesis Advisor for approval before October 15 of the senior year
- The completed thesis, once approved by the Thesis Advisor, must be submitted to a committee of three faculty by April 1 of the senior year. The committee will consist of the Thesis Advisor and two other faculty, one of whom may be from another department within the University of Denver
- During the month of April, the student and faculty committee will meet to discuss the thesis and its implications for the discipline
  - NOTE: University Honors Program requirements may be different than ours; please confirm calendar requirements with that program
  - Departmental Theses (for students who are NOT in the Honors Program) MUST be defended by the end of the 7<sup>th</sup> week of any quarter to ensure timely major approval and inclusion in the commencement program
- Students who satisfactorily complete a thesis, as determined by the faculty committee, will receive departmental distinction, which will be noted in the Commencement program and on your transcript

Students wishing further information should contact the Departmental Chairperson (Dr. Hava Gordon; Sturm Hall 427; phone: 303.871.3603; email: Hava.Gordon@du.edu).

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

## BA in Sociology

Total Credits: 102

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

#### **SOCI 1810 Understanding Social Life (4 Credits)**

This course is an introduction to the discipline of sociology and to the insights it provides into the human condition. This course counts toward the Scientific Inquiry: Society and Culture requirement.

#### **SOCI 1988 Study Abroad Resident Credit (0-18 Credits)**

#### **SOCI 2005 Sociological Imagination and Inquiry--Part A (4 Credits)**

This course is the first of a two-quarter sequence on sociological research methods and focuses on introducing students to the many qualitative methods used in sociological research. We explore what social research is, what the goals of such research are, and how research questions guide the selection of different methodologies. The remainder of the course focuses on qualitative data collection, including in-depth interviewing, ethnographic methods, historical comparative and content analysis methods, and other qualitative methods. Prerequisites: SOCI 1810 and sophomore standing or permission of instructor.

#### **SOCI 2006 Sociological Imagination and Inquiry--Part B (4 Credits)**

This course is the second of a two-quarter sequence on sociological research methods, and examines how sociological research questions can be answered using quantitative methods. Specifically, the course focuses on survey research design and statistics. Prerequisites: SOCI 2005 and sophomore standing or permission of instructor.

#### **SOCI 2020 Sociological Classics (4 Credits)**

Two or more classic works read and discussed in detail; emphasis on understanding particular classical work and its place in sociological tradition. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

#### **SOCI 2060 Self and Society (4 Credits)**

Impact of social groups and socialization processes on formation of individual perceptions, thoughts, emotions and self-awareness; both normal and deviant formations considered. Prerequisite: SOCI 1810.

#### **SOCI 2120 Methods of Socio-Legal Inquiry (4 Credits)**

This course provides a broad overview of socio-legal research methods. Specifically, the course examines how qualitative and quantitative research methods are used to answer socio-legal research questions. Students participate in research in order to understand the process of designing a project, collecting data, analyzing data, and reporting findings.

#### **SOCI 2140 Urban Sociology (4 Credits)**

Sociological study of the city focuses on interrelationships among people, social institutions and space; process of urban development; comparison of competing theoretical perspectives. Prerequisite: SOCI 1810.

#### **SOCI 2160 Racism and Anti-Racism through Film (4 Credits)**

This course is an examination of the socio-historical and political evolution of racism and anti-racism through documentary film. We will trace the origins and continued significance of race, racism, and anti-racism from the pre-colonial era to the present. While our primary focus will be on the United States, we will also pay attention to race, racism and anti-racism in a global context. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2190 American Communities (4 Credits)**

Study of 'community' as a foundational concept in the discipline; consideration of the changing structural contexts of community, as well as the social-psychological aspects of community; emphasis on emerging forms of community in the contemporary U.S. Prerequisite: SOCI 1810.

**SOCI 2210 The Family (4 Credits)**

Emphasis on different kinds of families and on contemporary issues of changing gender roles, intimacy, childbearing, family breakup and reconstitution, and family's relationships with other social institutions. Cross listed with GWST 2210. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2220 Sociology of Childhood (4 Credits)**

This course explores the social meanings of childhood. In this course we will examine aspects of the symbolic meanings of childhood as well as the experiences of being a child. The commercialization of childhood through marketing to children, contradictory messages about children as innocent or problematic, the experience of gender socialization for children, and the expectations of creating perfect children will be explored in detail. Cross listed with GWST 2220. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2240 Sociology of Health (4 Credits)**

This course explores questions of how individuals experience health and illness, how they interact with institutions and providers, and how these experiences are filtered through social structures that lead to inequality. Using a sociological perspective, we analyze how individuals' experiences of health and illness, medical institutions, and work in the health professions are influenced by racial/ethnic background, gender, social class, sexual identity, and age. We analyze these concepts by looking at who gets to define health and illness as well as how medical decisions are made, including who has the right to make decisions, what are the limits on the kinds of decisions that can be made, and how are decisions enforced and challenged by law. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2250 Criminology (4 Credits)**

Social meaning of criminal behavior; relationship between crime and society in particular, how production and distribution of economic, political and cultural resources shape construction of law, order and crime; different types of crime, criminals and victims, and efforts to understand and control them. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2255 Juvenile Delinquency (4 Credits)**

Introduction to sociological study of delinquency in American society; history of juvenile delinquency, the creation of delinquent misconduct as a social and legal category, and current state of delinquent behavior. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2260 Deviance and Society (4 Credits)**

Examines some behaviors often called deviant, such as mental illness, substance abuse, governmental crime and unconventional lifestyles, and asks what groups call them deviant, why and how behavior affects community. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2320 Race and Ethnic Relations (4 Credits)**

Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2350 Comedy and Society (4 Credits)**

This course explores humor and comedy from a sociological perspective. We will examine humor and comedy as a means of social and cultural critique and as social and cultural reproduction. Specifically, we will pay close attention to the intersections of humor and comedy as it relates to questions of race, class, gender and power. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2370 Micropolitics of Race (4 Credits)**

This class explores racialized experiences and controversies that affect daily life in the United States. We use insights from sociology to analyze racial identity and public behavior. For example, why do many people of color often "code-switch" as they move from interacting with family and friends and into their workplace? Why are some Black people accustomed to giving "the nod" to other Black people they encounter in majority-white spaces? Why are many native-born Asian-Americans told that they "speak really good English" (what sociologists would call a microaggression)? We also explore controversies, including interracial dating, gentrification, "transracial" individuals, and Elizabeth Warren's Native American identity claims. We will situate our analyses of the everyday politics of race within institutional and structural racism. Prerequisite: SOCI 1810.

**SOCI 2420 Social Inequality (4 Credits)**

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2500 Schooling and Society (4 Credits)**

The objective of this course is to examine the relationship between schooling and the larger social inequalities (e.g., racism, poverty, and gender) that profoundly shape education. The major focus in this seminar will be on U.S. K-12 public education. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2540 Current Social Problems (4 Credits)**

We often think about social problems in our social worlds. However, rarely do we consider how certain situations come to be defined as problems and why some "problems" remain a focal point of public attention while others fade, even when the circumstances around that issue have not improved. In this course, we look at these very issues. Using current social problems, we explore how a social phenomenon comes to be seen as a social problem, what is at stake in this process, and how these dynamics matter in terms of thinking about inequality. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2565 Men and Masculinities (4 Credits)**

Many of us believe that anatomy is what determines our behavior and that our bodies dictate our social and psychological temperament. Looking specifically at men and masculinities, this course tests that general notion, investigates the various ways male behavior is gendered and critically explores the meanings of masculinity in contemporary institutions. Throughout the course, we look at the multidimensional and multicultural ways masculinity is produced, constructed, enacted, and resisted; how masculinities structure power and resources; and how masculinities benefit, regulate, and hurt men's lives. Cross listed with GWST 2565. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2611 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2612 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2613 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2620 Crime over Time (4 Credits)**

This course examines the long-term decline of human violence across thousands of years, including: the extent of the decline, the causes of the decline, and the reasons why most people find it hard to believe that human violence has indeed declined precipitously. Prerequisite: SOCI 1810.

**SOCI 2622 Deportation Nation (4 Credits)**

This service-learning course examines the nexus of the criminal justice and immigration—or, crimmigration—system. Through a scholarly analysis situated of the historical, social, and political processes that have informed contemporary immigration law and policy, the course focuses on the shift to enhanced enforcement, detention, and mass deportation. Prerequisite: SOCI 1810.

**SOCI 2624 Labor and the Contemporary Prison System (4 Credits)**

Sociology is the “study of society” that examines and questions patterns of social behavior. Criminology is the study of crime, its changing definitions, its causes, and responses to it. In this course, we will explore sociological and criminological concepts and theories central to understanding labor in, at, around, and tied to the contemporary prison. We will move beyond common-sense understandings of these topics. The goal is for you to learn to critically evaluate the institution of penal labor, the work of prisoners and other individuals in and surrounding the prison, the impacts of penal labor on the economy, and challenges that different groups encounter in the face of these phenomena. Throughout the session, you will learn to use sociological and criminological “tools” to evaluate these elements of the social world to gain a better understanding of your life and the lives of those around you. Prerequisite: SOCI 1810.

**SOCI 2626 Sociology of Popular Culture (4 Credits)**

Sociology is the “study of society” that examines and questions patterns of social behavior. In this course, we will focus on one prominent aspect of social life: popular culture. You will explore theories and concepts central to the sociological study of popular culture in an effort to move beyond a common-sense understanding of ubiquitous cultural objects and their producers. The goal is for you to more critically evaluate and appreciate pop culture in regard to its production, consumption, meanings, and use. Throughout the quarter, we will discuss music, television, film, literature, comic books, sports, art, fashion, and other pop culture topics. You will learn to use sociological theory and concepts to evaluate these elements of the social world in order to gain a better understanding of your life and the lives of those around you. Prerequisite: SOCI 1810.

**SOCI 2628 Mass Incarceration (4 Credits)**

This course is designed for upper-level students interested in social policy, politics, inequality and law. It explores the “carceral state” or the institutions and policies that create a system of criminalization and punishment in the United States. Within the carceral state, the focus of the course is on the history and policies in the United States that led to the highest per capita incarceration rate in the world. The course examines and moves beyond various common explanations for mass incarceration, including crime, politics, public opinion, racism and the “prison industrial complex.” We then explore specific policies and practices that created and sustain high levels of incarceration, including sentencing, prison programming, and prosecutorial discretion, and the ways that these factors are deeply intertwined with America's history of race and inequality. We will study mass incarceration's complexity by exploring variation in punishment across federal, state and local levels. Finally, the course addresses recent attempts at reform, including policies around re-entry, drug courts and prison conditions. Prerequisite: SOCI 1810.

**SOCI 2650 Sociology of Immigration (4 Credits)**

This course applies a sociological approach to the study of international migration. Students examine early and contemporary waves of migration to the U.S.; theories of migration; processes of settlement and incorporation; the construction of immigration and citizenship; and institutional responses to immigration across and within immigrant groups. The course also examines variation in immigrant experiences along the lines of race/ethnicity, gender, and sexual and age identities. The course culminates in an examination of the impact of migration on the U.S. and on immigrants' sending communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2655 Latina/os in American Society (4 Credits)**

Latinas and Latinos constitute one of the largest and fastest growing ethnic groups in the United States. This course uses a sociological lens to understand Latina/os' experiences in the U.S. Specifically, we address Latinas' and Latinos' historical experiences and migration trajectories; assimilation, incorporation and racial/ethnic identity formation; the family, schools and labor markets; and political participation. In so doing, we discuss and challenge stereotypes about Latina/os, present alternative perspectives about Latina/o experiences in the U.S. and most importantly, understand their contributions to their families, their communities, and to the nation as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2701 Topics in Sociology (4 Credits)**

Topics vary. Recent topics have included urban poverty, ethics, women and crime, and school and workplace violence. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2710 Crime and Inequality (4 Credits)**

This course conducts a systematic investigation of the nature of inequality as it is related to crime and criminal justice in America. Racial, gender and class disparities are explored at critical stages of the criminal justice process, including crime commission, law-making, policing, court actions, and sentencing. This course considers the effects of inequality - particularly on system functions, employment opportunities, family stability and offenders' communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2715 Violence in Society (4 Credits)**

This course surveys how social scientists examine and understand violence in society. The first section of the course examines historical trends in violence over the past 500 years. We will then examine patterns of criminal violence in American society along with modern criminological theories. The final section of the course examines how sociological theories can help us understand newer forms of violence like genocide, terrorism, and state repression of movements. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2719 Social Movements (4 Credits)**

Studies in range of perspectives and research issues pertinent to understanding of social movements (groups operating without clear-cut direction from established social structure and culture). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2720 Guns and Society (4 Credits)**

Guns are a fact of life in the United States; there are more guns in the US civilian stockpile than any other nation. In this course, we will take a step back from the partisan debates and assess both the history of guns and gun policy in the United States as well as the current state of knowledge around firearms in society. During the course of this class we will explore how science, politics, and culture converge to make guns a controversial topic in the US and what it means for society and policy. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2722 Criminal Justice Reform in the U.S. (4 Credits)**

Events in 2020 have left many people wondering why our criminal justice system looks as it does today and asking what we can do to make it better. Despite the wave of political and cultural support for reform, little has changed. Why? The answers lie in the complicated historical processes that created the loose network of institutions that we refer to as "the criminal justice system," and in the contemporary socioeconomic and political structures that sustain these institutions. To better understand the contemporary state of reform, we will study the forces that gave rise to them, including race's central role in the politics of criminal justice, and the complexities of American federalism. We will research contemporary reform efforts targeting policing, mass incarceration, prosecutorial discretion, and other issues. Prerequisite: SOCI 1810.

**SOCI 2724 Law and Social Control (4 Credits)**

Why do people obey the law even when doing so is not to their benefit? How do legal systems mobilize the threat of punishment to compel obedience? How do legal issues and institutions reflect deeper forces rooted in social life? This course explores these questions and examines how socio-legal and sociology of punishment scholarship help explain contemporary and historical developments in law and social control. We emphasize law's role in establishing and maintaining particular forms of social order, and explore how this becomes manifest in modern institutions, especially criminal justice systems. Prerequisite: SOCI 1810.

**SOCI 2726 Hate Crimes and Hate Groups (4 Credits)**

This course will examine how hate crimes and hate groups in the United States have been studied by social scientists and how their findings can inform the public good. Over the quarter this course will explore how hate crimes are defined relative to other forms of bias and crime, how the criminal justice system addresses hate crime and bias, how social movement mobilization influences hate crime trends, and how hate groups influence bias and hate incidents in the United States. The course will begin by asking how we all view hate in the United States, Colorado, and Denver as lay people. Then we will explore the political determinants and forces as play in how hate crime laws came to fruition and their argued effects. Next we will explore trends and patterns in hate crime victimization and offending. Next we will explore research on hate group ideologies, formation, and relations to hate crime offending. Finally, we will conclude with broader look at how hate relates to long term trends in violence and the state and what seems to be the next best steps for addressing hate in the United States. Prerequisite: SOCI 1810.

**SOCI 2730 Gender in Society (4 Credits)**

How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with GWST 2730. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2735 Technology & Society: Identity, Interaction, & Control (4 Credits)**

This course applies a sociological and criminological approach to the study of technology. We will explore the ways that technological developments alter how people experience self-identity and social interaction. We will also consider the impact of contemporary technological developments on violence and social control. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2737 The Sociology of Denial and Acknowledgment (4 Credits)**

Humans are adept at downplaying, excusing, and outright ignoring uncomfortable truths. In our everyday encounters, we overlook our stumbles, mistakes, and blemishes to avoid embarrassing each other. In this way, denial allows us to maintain smooth social interactions, even in the face of disturbances. At the same time, denial permits us to live with extreme forms of inequality, deep and abiding social problems, and violations of others' rights. Many of us rationalize inaction in the face of others' suffering or overlook the bad decisions – and crimes too – of our political allies. In this class, we will investigate denial and its functions. We will also examine the efforts people make to overcome collective denial through interventions, acknowledgment, and memorialization. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2741 Work and Occupations (4 Credits)**

How individuals fit into, are influenced by and in turn influence business institutions; changes in structure and meaning of workplace; different types of business and work relationships, forms of work, business roles and organizational structures; how business institutions affect society as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2750 Sociology of Law (4 Credits)**

Overview of theory and research about relationship between law and society; legal rules, roles, organizations and inter-institutional relations; activities of legal profession, courts, juries, legislatures and regulatory agencies. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2751 Masculinities and Sexualities (4 Credits)**

This course takes an interdisciplinary approach to explore the intersections of masculinities and sexualities in our culture. Through scholarly works in the studies of media, gender, sexualities, sociology, anthropology, and history, we will examine personal narratives, art, film, media, and literature to uncover power and inequality as they are complicated by a hierarchy of multiple masculine and sexual identities. Beyond gender and sexuality, we will also consider the significance of race, class, and disabilities as they also impact the lived experiences of people who claim masculine and sexual identities. This course will employ a variety of methods for uncovering what it means to be masculine and a sexual person in our contemporary culture. Prerequisite: SOCI 1810.

**SOCI 2752 Youth in Society (4 Credits)**

Although commonly understood to be a natural and universal phase in the life course, many scholars argue that "youth" is socially constructed. The goal of this course is to examine how young people in the United States are both "constructed" as a distinct social group by institutions such as media, schooling, criminal justice, and work, and how youth in turn construct their own social worlds and even spark social change. This is a hands-on exploratory course about youth cultures, youth issues, generational differences, and age as an axis of inequality. This means that in addition to reading about historic and contemporary youth, students will get a chance to explore a youth issue, controversy, or subculture in real time by reviewing relevant sociological research and collecting original data. Prerequisite: SOCI 1810.

**SOCI 2757 State Violence (4 Credits)**

This course applies a socio-legal approach to the study of state violence. We will explore the ways that social institutions, culture, and law shape states' uses of violence both internationally and domestically. We will also examine the socio-legal foundations of efforts to control and collectively respond to state violence. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2760 Discipline and Punishment (4 Credits)**

Institutional mechanisms for imposing discipline and for punishing wayward individuals and groups; contradictory social objectives of punishment and corrections; organizational settings for administering punishment and identifying predominant institutional routines in coercive environments. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2765 The Female Offender (4 Credits)**

Female offenders are one of the fastest growing segments in both the juvenile and adult justice systems. This course introduces students to debates and issues surrounding girls, women, and crime; explores different theoretical perspectives of gender and crime; and examines the impact of gender on the construction and treatment of female offenders by the justice system. In addition, this course specifically looks at girls' and women's pathways to offending and incarcerations; understanding girls' violence in the inner city; exploring the reality of prison life for women, with a particular focus on the gender-sensitive programming for incarcerated mothers; and ending with an examination of how capital punishment has affected women offenders historically and contemporarily. Cross listed with GWST 2765. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2770 Kids and Courts (4 Credits)**

This course examines how American society has responded to the problem of at-risk and delinquent youth in the twentieth and twenty-first centuries. The primary focus will be on the juvenile court's and the encompassing juvenile justice system's efforts to address this problem. The court's and the system's ameliorative attempts to help at-risk children/adolescents as well as their more punitive policies directed at serious and violent young offenders will be investigated. Differences in juvenile court policies and practices over time and across jurisdictions (both in the United States and in other countries) will be considered. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2775 Wrongful Conviction (4 Credits)**

The criminal justice system was once considered infallible—innocent people did not end up in prison. But DNA evidence has revealed that innocents are incarcerated and perhaps even executed. This course focuses on the prevalence of wrongful conviction; the harms caused by wrongful conviction; the causes of wrongful conviction; strategies for reducing wrongful conviction; and the prospect of compensating the wrongfully convicted. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2780 Women and the Law (4 Credits)**

This course explores the relationship between women and the law, looking at the way the categories of sex and gender have been produced and reproduced through law. Through a look at case law and sociological research, students will examine women as bodies, workers and family members. This course also explores the development and current status of American law in the areas of women's constitutional equality, pay equity and equal opportunity, women's access to education, women in the workplace and violence against women. Cross listed with GWST 2780. Prerequisite: SOCI 1810 or permission of the instructor.

**SOCI 2785 Family and the Law (4 Credits)**

The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with GWST 2785. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2790 Policing Society (4 Credits)**

Emergence and development of police organizations and tactics; factors that influence policing styles and objectives; historical precedents; policing the street; policing the board room; policing the world; and policing everyday life. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2795 Capital Punishment (4 Credits)**

This course examines three main topics: the history of capital punishment (facts and trends, public opinion, legislation, and landmark Supreme Court cases); arguments often made for abolition (arbitrariness, cost, and innocence); and arguments often made for retention (deterrence, incapacitation, and retribution). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2800 Sociology of Sport (4 Credits)**

Locating contemporary sport within context of history of work and leisure to explore sociological forces that have shaped the way we work and play; emphasis on how sport fits into the American culture; aspects such as race, gender, class, intercollegiate athletics, socialization, professionalization, economics, politics and social change. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2820 Drugs and Society (4 Credits)**

Relationship between drug use, drug control and social contexts; various sociological themes relating to use and control of drugs in American society. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2825 Sexualities and the Law (4 Credits)**

This course provides an overall conceptual and applied understanding of sexualities (sexual identities, relationships, behavior, and choices), law, and punishment in the United States. All of the following areas will be examined: sexual minorities' rights (with a focus on marriage equality) and relationships; reproductive regulation; sex industry; pornography; and responses to sex offenses (with a focus on responses to college sexual assault). Students in this course will identify the ways legislation and the courts define and regulate sexualities in society. Prerequisite: SOCI 1810.

**SOCI 2830 White-Collar Crime (4 Credits)**

Organization and control of white-collar crime, including fraud, corruption, price fixing, embezzlement, regulatory violations and other crimes committed by high-status individuals for and against organizations. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2850 Sociology of Poverty (4 Credits)**

Causes, incidence and consequences of poverty; the various "pockets" of poverty: aged, urban, ethnic minorities, women; exploration of poverty in the U.S. and cross-culturally. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2855 Crime and the Media (4 Credits)**

This course explores the complex relationship between crime and the media. We use sociological and cultural theories to examine how crime, criminals, and the criminal justice system are portrayed in print and visual media outlets. We explore the media's role in shaping crime control and other public policies. We investigate the influence of offender and victim characteristics (e.g., race, gender, class, celebrity status) on how crime is presented. We also "turn the tables" to learn about how media itself may influence patterns of criminal offending (think violent video games). The overarching goal of this class is to teach students to watch/read crime media with an educated, critical eye. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2860 Conflict and the Law (4 Credits)**

This course focuses on Sociologist Donald Black's theoretical models to examine: the cause of human conflict; the conditions that lead disputants to turn to the legal system to handle conflict; and the impact of the disputants' social characteristics on the outcome of the case.

**SOCI 2988 Study Abroad Resident Credit (0-18 Credits)****SOCI 3701 Topics in Sociology (4 Credits)**

Topics vary. Recent topics have included criminal justice policy; qualitative methods and data analysis; environmental governance; advanced ethnographic methods; community values. Prerequisites: junior or senior standing and permission of instructor.

**SOCI 3981 Internship (1-4 Credits)**

Opportunity to gain valuable work experience, explore various career options, develop job competencies and apply theoretical knowledge to practical concerns of the world. Must have junior or senior standing, be sociology or criminology major or minor, have a cumulative GPA of 3.0, and have taken at least three sociology- and/or criminology-related courses beyond SOCI 1810.

**SOCI 3982 Internship (1-4 Credits)**

Opportunity to gain valuable work experience, explore various career options, develop job competencies and apply theoretical knowledge to practical concerns of the world. Must have junior or senior standing, be sociology or criminology major or minor, have a cumulative GPA of 3.0, and have taken at least three sociology- and/or criminology-related courses beyond SOCI 1810.

**SOCI 3985 Thesis Research Seminar (2 Credits)**

This course is designed to provide support and structure for students working on their senior thesis. The course presumes that students have completed a methods sequence, have chosen a thesis topic, and have a plan for how they will develop their thesis. Prerequisites: SOCI 2005 and SOCI 2006; permission of the instructor.

**SOCI 3986 Thesis Writing Seminar (2 Credits)**

This course is designed to provide continued support and structure for students working on their senior thesis. The class helps students with the structure of writing and defending their thesis. The course presumes that students have begun their projects, are significantly or nearly finished with data collection and organization, and are ready for analysis and writing. Prerequisites: SOCI 2005, SOCI 2006 and SOCI 3985; permission of the instructor.

**SOCI 3988 Study Abroad Resident Credit (0-18 Credits)**

**SOCI 3991 Independent Study (1-8 Credits)**

**SOCI 3998 Criminology Assessment (0 Credits)**

This course involves a required assessment of graduating sociology and criminology majors' knowledge of the discipline based on courses taken. Prerequisites: SOCI 1810, SOCI 2005, SOCI 2006, SOCI 2020, and SOCI 2250; permission of instructor.

**SOCI 3999 Sociology Assessment (0 Credits)**

This course involves a required assessment of graduating sociology and criminology majors' knowledge of the discipline based on courses taken. Prerequisites: SOCI 1810, SOCI 2005, SOCI 2006, SOCI 2020, and SOCI 2420; permission of instructor.

## Faculty

**Reginald Byron**, Associate Professor, PhD, The Ohio State University

**Michael C. Campbell**, Associate Professor, PhD, University of California, Irvine

**Jared Del Rosso**, Associate Professor, PhD, Boston College

**Jessica Garrick**, Teaching Assistant Professor, PhD, University of Michigan

**Michael Gibson-Light**, Assistant Professor, PhD, University of Arizona

**Hava Rachel Gordon**, Professor, PhD, University of Oregon

**Alana Inlow**, Teaching Assistant Professor, PhD, Washington State University–Vancouver

**Rachel Lautenschlager**, Assistant Professor, PhD, The University of Miami

**Amie E. Levesque**, Teaching Associate Professor, PhD, Northeastern University

**Jeffrey Lin**, Associate Professor, PhD, New York University

**Lisa M. Martinez**, Professor, PhD, University of Arizona

**Lisa Jean Pasko**, Professor and Department Chair, PhD, University of Hawaii at Manoa

**Scott Phillips**, Professor, PhD, University of Georgia

**Peter Alder**, Professor, Emeritus, PhD, University of California, San Diego

**Paul Colomy**, Professor, Emeritus, PhD, University of California, Los Angeles

**Anne Mahoney**, Professor, Emerita, PhD, Columbia University

**Nancy Reichman**, Professor, Emerita, PhD, Massachusetts Institute of Technology

## Spanish Language, Literary, and Cultural Studies

Office: Sturm Hall 391

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2160

Email: sllcs@du.edu

The Department of Spanish Language, Literary, and Cultural Studies recognizes Spanish both as a local language with a long and rich history in the United States and as a global language spoken by millions of people around the world. The department promotes the critical study of—and active engagement with—the diverse range of linguistic, literary, social, political, and cultural experiences associated with these local and global communities.

The faculty of the department includes specialists in literature, linguistics, and pedagogy. In addition to developing language proficiency, the program provides students with critical tools and interdisciplinary perspectives on key topics in the intellectual and cultural history of the Spanish-speaking world. While Spanish language courses focus on advancing and refining students' written and oral communication skills, the upper-division program is multidisciplinary, comparative and transnational in scope, integrating such critical frameworks as human rights, racial and ethnic identity, and gender and social change. Our upper-division courses focus on literature, travel writing, film studies and creative writing, among others. Students can choose to emphasize one or more areas of study: Latin America, Spain or Latinx studies. Program graduates have found satisfying careers in education, public relations, social work, government service, international business, law, medicine and other fields.

## Program for Heritage/Bilingual Speakers

The Spanish Program for Heritage/Bilingual Learners, founded in 2018 under the direction of Dr. Lina Rednicek-Parrado, generates curriculum to meet the educational and linguistic needs of our changing student population. It is designed specifically for heritage or bilingual speakers of Spanish, or students who have a personal, familial or community connection to the Spanish language. It prepares students for culture and upper-level courses and helps them develop the literacy skills needed to use Spanish in formal/professional settings.

Students who speak Spanish at home with parents, siblings or extended family members, and have personal ties to a Spanish-speaking community, should complete the Spanish Heritage Language Assessment (<https://canvas.du.edu/enroll/MGJTJ6/>) before enrolling in Spanish for Heritage Speakers courses. Students who have significant experience studying abroad or have completed part of their education in a Spanish-speaking country, should contact Dr. Lina Reznicek-Parrado at [Lina.Reznicek-Parrado@du.edu](mailto:Lina.Reznicek-Parrado@du.edu).

## Study Abroad Opportunities

The Department of Spanish Language, Literary, and Cultural Studies runs a DU-faculty led summer program in Santander, Spain, in conjunction with the Universidad Internacional Menéndez Pelayo (UIMP). Due to the pandemic, this programs is temporarily unavailable. For more information, please contact us.

DU participates in the International Student Exchange Program, which provides opportunities to study at scores of universities worldwide. Also, our students benefit from DU partnerships with universities around the world and can take advantage of DU's Cherrington Global Scholars (<https://www.du.edu/abroad/costs/cherrington.html>) program, which allows eligible students to study abroad at a cost comparable to that of a term at DU.

## Spanish

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

44 credits of approved courses for the major.

Code	Title	Credits
<b>Required courses include:</b>		
Select one from the following		4
SPAN 2100	Conversation and Composition	
Or if you are a heritage/bilingual speaker:		
SPAN 2200	Spanish for Heritage/Bilingual Speakers I <sup>1</sup>	
or SPAN 2250	Spanish for Heritage Speakers II	
SPAN 2300	Iberian Culture & Civilization	4
SPAN 2350	Latin American Culture and Societies	4
SPAN 2400	Latino Cultures in the United States	4
SPAN 3990	Senior Seminar <sup>1</sup>	4
Students must complete an additional 12 credits in 3000-level courses		12
<b>Electives</b>		
Remaining credits must be SPAN courses above 2001.		12
<b>Total Credits</b>		<b>44</b>

<sup>1</sup> Heritage speakers are strongly encouraged to take both of the heritage courses.

<sup>2</sup> SPAN 3990 must be taken at DU and a student must have senior standing and have taken a minimum of 12 credits at the 3000 level prior to enrolling in this course.

## Secondary Major Requirements

44 credits. Same requirements as for BA degree.

## Minor Requirements

A minimum of 24 credits required for the minor.

Code	Title	Credits
<b>Required courses include:</b>		
Select one from the following		4

SPAN 2100	Conversation and Composition	
Or if you are a heritage/bilingual speaker:		
SPAN 2200	Spanish for Heritage/Bilingual Speakers I <sup>1</sup>

## Requirements For Distinction in the Major in Spanish

- Minimum 3.3 cumulative GPA
- Minimum 3.6 major GPA
- Completion of a thesis

### SPAN 1001 Beginning Spanish (4 Credits)

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Span 1001 is designed for students with no previous Spanish experience. Students with more than 2 years of high school Spanish or who grew up in a Spanish-speaking environment must take the placement exam and enroll in a higher-level course.

### SPAN 1002 Beginning Spanish (4 Credits)

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1001 or equivalent.

### SPAN 1003 Beginning Spanish (4 Credits)

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1002 or equivalent.

### SPAN 1988 Study Abroad Resident Credit (0-18 Credits)

### SPAN 2001 Intermediate Spanish (4 Credits)

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 1003 or equivalent. Three quarter sequence.

### SPAN 2002 Intermediate Spanish (4 Credits)

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2001 or equivalent. Three quarter sequence.

### SPAN 2003 Intermediate Spanish (4 Credits)

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2002 or equivalent. Three quarter sequence.

### SPAN 2050 Form, Meaning and Communication in Spanish (4 Credits)

This course is an overview of advanced Spanish grammatical structures necessary for creating meaning and communication through a cultural, political and social framework. As such, it emphasizes that the Spanish language has a variable grammatical system that changes across its communities and according to contexts of use. This course offers extensive oral and written practice to improve students' standard grammatical accuracy as well as an overall understanding of the structure of the language. This course provides the metalinguistic knowledge necessary for students to successfully communicate in Spanish both in oral and written form and prepare for upper-level courses, while validating and honoring the rich linguistic differences that characterize the Spanish-speaking world.

### SPAN 2100 Conversation and Composition (4 Credits)

Intensive practice in written and oral skills, grammar review, and introduction to Spanish thought and cultural patterns. Prerequisite: SPAN 2003 or equivalent.

**SPAN 2200 Spanish for Heritage/Bilingual Speakers I (4 Credits)**

Development of the linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. Overview of topics relevant to Spanish-speaking communities in the United States. This section is for bilingual/heritage speakers of Spanish only.

**SPAN 2250 Spanish for Heritage Speakers II (4 Credits)**

Second course of the 2-course sequence for heritage speakers. Continuation of the development of linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. This section is for heritage speakers of Spanish only.

**SPAN 2300 Iberian Culture & Civilization (4 Credits)**

Intensive study of culture of Spain; manifestations of culture found in history, art, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2350 Latin American Culture and Societies (4 Credits)**

An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2400 Latino Cultures in the United States (4 Credits)**

Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2701 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 2702 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2300 or equivalent.

**SPAN 2703 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2350 or equivalent.

**SPAN 2704 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: SPAN 2300 and SPAN 2350.

**SPAN 2705 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2400.

**SPAN 2801 Writing, Memory & Terror: Post-Dictatorship Literature of the Southern Cone (4 Credits)**

This course explores the representation of violence, repression and disappearance in the post-dictatorship literature of Argentina, Chile and Uruguay in literature and memorialization projects. Students will examine literary testimony in a variety of genres: narrative, poetry, theatre, and critical essays in their social, political and historical contexts, as well as its manifestations in music and film. We will discuss the role of memory in reconstructing discourses; testimonial literature and the modern and postmodern views of representation and memorialization; and points of convergence between this literature and other survivor testimonial narratives, particularly those of the Shoah. No knowledge of Spanish is required or expected. This class does not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2802 Afro-Latinos in the US (4 Credits)**

Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2803 Religion and Violence in Latin America (4 Credits)**

The Spanish and Portuguese imposed Catholicism in the Americas during the conquest and colonization, brutally repressing indigenous religious expression through persecution and forced conversions. While Catholic doctrine officially replaced the polytheism, animism and ancestor worship of indigenous religions, in actuality, the Colonial period saw great diversity in religious practice, as indigenous populations and African slaves developed systems of religious syncretism adapting the Catholic dogma to their beliefs and practices. However, although Latin America is currently home to more than 425 million Catholics—an estimated 40% of the Catholic population worldwide—and the Roman Catholic Church now has a Latin American pope for the first time in its history, the region is far from being religiously homogeneous. Since independence, immigration, politics, and economics have played an important role in effectively changing the religious demography of Latin America. This course will examine religion and violence in Latin America, from pre-Columbian times until 1983, focusing on the relationship between religion and political power. We will explore pre-Columbian religions; the role of religion in the conquest and colonization of the Americas; African religion and slave religious ritual; religious syncretism; religious art; immigration and religion; revolution and religion; and the political implications of Protestantism and Liberation Theology. This course will be taught in English, although students will have the option of completing writing assignments in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2804 Latin American Popular Culture (4 Credits)**

This course is an introduction to the study of Latin American popular culture. Basic theoretical notions about the subject will be introduced but the emphasis of the class will be on the discussion of literature analyzing specific situations, events or expressions drawn from various Latin American countries during the nineteenth and twentieth centuries as well as the United States in the twentieth century. This class will be conducted in English and will not count toward the major or minor in Spanish.

**SPAN 2805 The Sociopolitics of a Majority-Minority Language in the U.S. (4 Credits)**

This course is an introduction and critical exploration of the sociohistorical, sociopolitical and sociolinguistic implications of Spanish as a language of use in local communities across the United States. Because the primary focus of exploration, in this case, is the social and political issues related to Spanish in the U.S., we will focus on its use and representation, rather than on its linguistic representation. Similarly, we will conceive of language—any language—as social action, particularly the ways in which people use language to convey social and political meanings. To achieve such an undertaking, students will be exposed to an interdisciplinary, sociopolitical approach to a language spoken by more than 40 million people in the United States today (American Community Survey, 2020), exploring the complex historical context that makes Spanish the de facto second language spoken locally as well as nationally. Key to this analysis will be the introduction of social constructionism and other critical sociolinguistic notions that explain social categories such as race, language, gender and class as not fixed but rather, socially constructed. In all, this course will explore how Spanish, as a minority-majority language, presents fertile ground for recognizing the social and political implications of language use. Students will engage with the material through course lectures, active discussions, and analyses of real-life examples of Spanish use on the ground. This class will be conducted in English and will not count toward the major or minor in Spanish.

**SPAN 2806 Latin American Food Landscapes (4 Credits)**

This course focuses on the ways in which Latin American food landscapes—alimentary cultivation, production, purveyance, preparation, and consumption—reveal the complexities of various political, socioeconomic, ecological, and cultural contexts. Students will be challenged to consider the ways in which, throughout the Américas and since the pre-conquest era, diverse food landscapes have often provided marginalized individuals and communities with opportunities to creatively resist policies or prejudices aimed at erasing local food and agricultural practices and preferences. Course lectures and readings are informed by key tenets of global and interdisciplinary food studies and offer students with the opportunity to explore a variety of genres and areas of knowledge. Course topics include the intersections of Latin American Food Landscapes and: notions of freedom, identity, and nationality; gastro-imperialism; culinary arts and seduction; food-related religious and spiritual practices; agroecology & Indigenous epistemologies; agrarian reform & food security activism; urban agriculture; breastfeeding practices and polemics; gastrotourism; cross-cultural food & mountain studies. No knowledge of Spanish is required or expected, although interested students may choose to complete select course readings or assignments in Spanish, Portuguese, and/or Quechua. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class does not count toward the major or minor in Spanish.

**SPAN 2900 Introduction to Literary and Cultural Studies (4 Credits)**

Intended as a transition between 2000-level advanced language and cultural courses and 3000-level cultural and literature analysis courses, SPAN 2600 presents students with the opportunity to refine their analytical and interpretive skills, by examining a wide variety of Spanish language texts drawn from the literary cultural milieu of Latin America, Spain, and the United States. Throughout this course, students will acquire and utilize fundamental tools and strategies for contemporary literary and cultural studies in Spanish, including: gender and sexuality studies; race and ethnicity; decolonial thinking; pop culture; nationalism; ideology; and formal elements of interpreting texts. At the end of this course, students should be able to demonstrate relationships between distinct texts of varied media and genre (journalism, essay, short story, autobiography/memoir, historiography, oral tradition, film, photography, the plastic arts, etc.) in the interdisciplinary perspective that characterizes literary and cultural studies in the 21st century. Prerequisites: SPAN 2100 and SPAN 2300 or SPAN 2350.

**SPAN 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit some of the landmarks of Mexican History, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis. Prerequisite: SPAN 2350.

**SPAN 2988 Study Abroad Resident Credit (0-18 Credits)****SPAN 3200 Eroticism and Nation in the Latin American Novel (4 Credits)**

A study of the foundational fictions of Latin America and their twentieth-century rewriting. Nineteenth-century novels showcasing the interplay of sentimental love, eroticism, class struggle, and political agendas in the formative years of the Latin American nations are analyzed and contrasted with twentieth-century narratives where such nation (and narrative) building is put to question. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3230 Musicalized Literature (4 Credits)**

Introduction to musicalized literature: a study of literary texts that provoke in the reader a sense of being related to music or prompt a "musical" experience while reading. The course focuses on various Latin American narrative texts whose relation with songs or genres of popular music is more or less explicit. The analysis aims first to illuminate their musical aspects, but also addresses other angles (social, historical, political). Basic information about several genres of popular music is provided in order to facilitate comprehension. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3300 Travel Narratives (4 Credits)**

Travel accounts, rather than candid and unbiased testimonies about places and people, are challenging texts that require critical analysis. This class offers an overview of the evolution of travel narratives, from the times of the Grand Tour to contemporary accounts representing cross-cultural interactions between Spaniards and their 'others'. Travelogues by authors such as Washington Irving, Domingo Faustino Sarmiento, Julio Camba and Juan Goytisolo. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3320 Class and Gender in 19th-Century Spain (4 Credits)**

Spain underwent social and political revolutions during the nineteenth century from which new values emerged. Through the analysis of literary, political and cultural texts from the late nineteenth-century, students explore the changed view of gender and class identity. Students will read and critically examine several works by prominent authors of the Spanish Realist tradition, including Benito Pérez Galdós, Leopoldo Alas (Clarín) and Emilia Pardo Bazán. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3330 Rebels, Lovers and Outlaws in Spanish Romanticism (4 Credits)**

This course studies the literary and cultural tropes of Spanish Romanticism. Themes discussed include the rebellion against an unjust social order, the portrayal of marginal social groups and the creation of subjectivity in the Spanish Romantic tradition. The literary genres studied are drama, essay and poetry; the primary authors include Larra, Zorrilla, Espronceda, Bécquer, and de Castro. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3333 The Fertile Friendship: Bunuel, Lorca, Dali and Spanish Surrealism (4 Credits)**

An interdisciplinary study of the relationships of three Spanish artists (Salvador Dalí, Federico García Lorca and Luis Buñuel) and the development of Surrealism in Spain. Through the intriguing intersections of the life and art of the painter, the poet, and the filmmaker, a better understanding of this fascinating artistic movement is achieved. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3400 Spanish Theatre in Performance (4 Credits)**

Reading, discussion and performance of plays written in Spanish. The focus will be on improving pronunciation, intonation and dramatic expression as well as providing a better understanding of contemporary theatrical movements in the Spanish speaking world such as teatro del absurdo, teatro posibilitista or teatro campesino. The course includes a final performance (in front of a real audience) of the play. Plays by authors such as Susana Torres Molina (argentine), Federico Garcia Lorca (Spain), Emilio Carballido (Mexico), and other authors from the Spanish speaking world. No prior experience in theater is required. Prerequisite: SPAN 2300 or SPAN 2350 or equivalent.

**SPAN 3420 Contemporary Film in Spain (4 Credits)**

Through contemporary Spanish film and essays this course examines the representation of key cultural aspects of Spanish society, such as national and regional identities, immigration, and gender issues. Students critically evaluate the causes, cultural manifestations and consequences of the social themes studied first by reading about them and then by viewing films that consider the same issues. They learn to identify the formal elements of film and develop a critical vocabulary with which they analyze and write about them. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3490 The Quixote Archive: Cervantes in Context (4 Credits)**

This course offers students a critical introduction to one of the most influential texts ever written: Miguel de Cervantes' "Don Quixote" (1605, 1615). Careful attention will be paid to the historical, social, political, and literary contexts with which Cervantes' text dialogues. We will also assess a variety of adaptations of Cervantes' work in other media, and will engage with the substantive body of secondary critical literature informing interpretations of "Don Quixote" for the past 400 years. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3500 Interrogating 'convivencia': Muslims, Christians, and Jews in Iberia (4 Credits)**

This course proposes to critically interrogate the complex relationship between the Muslim, Christian, and Jewish communities of the Iberian Peninsula, and the lasting impact of the historical relationship between these communities on the culture, literature, art, politics, and economy of Spain, with particular emphasis on the period 711-1700. Special attention is paid to problematizing the notion of 'convivencia' and to considering how diverse representations of the 'three cultures' are appropriated in the construction of national(ist) ideals that are overtly reflected in literature and art, both in Medieval and Early Modern Iberia and in contemporary Spain. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400, or equivalent.

**SPAN 3510 Sex, Bodies, and Power in Imperial Spain (4 Credits)**

This course considers the body a key locus of social and political struggle in the 16th and 17th Centuries in Spain and in the Indies. Contemplating the role of a variety of discourses from diverse fields (medicine, law, philosophy, theology, politics), we will ask such questions as: What is the body and how does it work in physical terms? How is the body used to perform or problematize legal, moral, and social identities? How is the body used as a mechanism to marginalize, control, or exclude individuals or groups, or to legitimize the authority and power of other individuals or groups? We will contemplate representations of the body in diverse media and genres (painting, sculpture, engravings, theater, novels, poetry, autobiography, medical treatises, moralizing tracts) in order to reconstruct the complex epistemology through which the body, and especially problems of race, gender, and sexuality, was conceptualized in the 16th and 17th Centuries. Particular attention will be paid to the representation of the materiality of the body (physiology as a key to moral and cultural difference), eroticism, homosexuality, cross-dressing, 'monsters,' sickness, and reproduction, considering the representation of such corporeal phenomena to be a privileged space for interrogating the ideologies and structures upon which Power is built. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400 or equivalent.

**SPAN 3600 Caribbean Blackness: Conflictive Identity (4 Credits)**

Introduces the student to the Caribbean region, particularly examining cultural characteristics of the Spanish speaking Caribbean, with an emphasis on race relations and the contributions of peoples of African descent. The focus is interdisciplinary and includes readings on anthropology, religion, and history among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3650 The Andean World: Artistic Representations of Power, Resistance and Social Change (4 Credits)**

Survey of Andean literature and art created during the nineteenth, twentieth and twenty-first centuries; artists' portrayals of strategies for resistance and the struggle for social justice in modern Andean society. Study of a wide variety of genres including short stories, novels, testimonials, poetry, essays, songs, visual art and film. Class discussions, theoretical texts and student analyses focus on the central theme of representations of power, resistance and social change in the Andes. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3660 The Fantastic Short Story in Latin America (4 Credits)**

Introduction to the genre of the fantastic short story in nineteenth- and twentieth-century Latin American literature. Study of the rise of the short story genre in Latin America and the ways in which we can understand the Fantastic and its relationship to the Gothic and the Magical Real. Assigned readings by authors such as Horacio Quiroga, Jorge Luis Borges, Julio Cortazar, Gabriel Garcia Marquez, Carlos Fuentes, Silvina Ocampo and Rosario Ferre. Class discussions, theoretical texts and student analyses focus on a text's themes, literary devices, and writing styles, as well as metatextual and historical references. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3670 Exploring the Amazon: A Literary, Filmic and Ethnographic Journey (4 Credits)**

Introduces the student to the Amazonian region of South America and the ways in which this fascinating landscape and the diverse peoples who inhabit it have been portrayed and exploited by "outsider" novelists, filmmakers, explorers, anthropologists, businessmen, and scientists beginning in the sixteenth century. This course also includes a survey of texts selected from the oral traditions of indigenous Amazonian groups such as the Ashanika, Machiguenga, Cashinahua and Ese'ejá. Assigned readings underscore the course's interdisciplinary focus and encourage students to hone their course reading and analytical writing skills through the study of anthropological, historical, literary and filmic texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3680 Food, Power and Identity in Latin American Literatures and Cultures (4 Credits)**

A study of culinary representations and the role of food in Latin American literature, film, culture and politics. Assigned texts include short stories, novels, films and a selection of literary, historical and political essays that relate to food politics and poetics. A review of key food policies and politics throughout colonial and contemporary Latin America reveal legacies of colonial power struggles, as well as the important intersections between food and constructions of identity, nationality, and socioeconomic and cultural emancipation. The course also explores themes such as the art of cooking as a tool for seduction, culinary witchcraft, and contemporary national and regional struggles to achieve food sovereignty in an era of globalization and neoliberal politics. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3702 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3703 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3704 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3705 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)**

Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3988 Study Abroad Resident Credit (0-18 Credits)****SPAN 3990 Senior Seminar (4 Credits)**

This is the capstone course of the Spanish major and requires students to complete an in depth, scholarly study of a topic or issue pertinent to their seminar's central theme(s). Spanish majors must take a minimum of one senior seminar and this course must be taken at DU once a student has reached senior standing. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level. A selection of seminar topics includes Latin American Popular Culture, Contemporary Spanish Novel, Pre-Columbian and Colonial Andean Literature and Culture, Puerto Rican Literature and Society, Layqas, Ñakáqs and Saqras: Representations of the 'Supernatural' in Quechua Oral Traditions, Latin American Narrative, El Romancero, Contemporary Socio-Political Poetry in Latin America, Latin American Women Poets, and Masterpieces of Latin American Literature. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level and senior standing.

**SPAN 3991 Independent Study (1-4 Credits)****SPAN 3997 Internship in Spanish (4 Credits)**

This course serves as curricular, intellectual, and professional support to a 10-week Spanish internship. Students will be matched to an internship with a community partner (private or public agency, institutional office, non-profit or community organizer) whose mission aligns with students' professional aspirations in a variety of disciplines. Through the exploration of notions in critical service-learning, students will be given the opportunity to reflect upon their own positionality and its implications for issues in social justice, equity and linguistic diversity as they participate in an internship site. Students are expected to mobilize their linguistic skills in Spanish as part of the experience, and especially as part of their role in supporting community partners explore and understand better ways to serve Spanish-speaking communities across the Denver Metro area. Students will engage with readings, workshops, reflections and a portfolio that showcases their community-engaged work while furthering an understanding of the sociolinguistic implications of Spanish as a U.S. language which is spoken and used in a variety of communities across Denver. An end-of-term showcase will be expected as part of participation in this course. Prerequisite: SPAN 2200, SPAN 2250, or SPAN 2400.

**SPAN 3998 Honors Thesis (1-10 Credits)**

The three sample course plans presented below outline schedules students could follow based on their placement in an initial Spanish course or background as a heritage speaker. Please note that students may begin studies for the Spanish major at a variety of different points in our course sequence, depending on placement test results. For questions about individualized course plans, we encourage students to consult with advisors from the Department of Spanish Language, Literature & Cultural Studies.

Web Site: <https://www.geography.du.edu/academics-advising/undergraduate-programs#sustain-ug> (<https://www.geography.du.edu/academics-advising/undergraduate-programs/#sustain-ug>)

Sustainability is a concept that is becoming increasingly important as human societies recognize the finite nature of many natural resources and the lingering ill effects of overconsumption, pollution and poorly planned land uses. Sustainability is defined as meeting the needs of the current generation without compromising the ability of future generations to meet their own needs and to do so while maintaining ecological processes, functions, biodiversity and productivity into the future. An understanding of sustainability includes the scientific basis for sustainable resource use as well as the social and economic implications and/or costs of sustainable practices. Given the state of the global economy, the social unrest that is building throughout many parts of the world, the ultimate dependence of both developed and developing nations on an increasingly stressed natural environment, and the connections between these, moving toward a sustainable future requires an interdisciplinary perspective of the challenges facing society today.

## Sustainability

### Minor Requirements

Minimum of 24 credits as follows:

Code	Title	Credits
<b>Gateway Course</b>		<b>4</b>
GEOG 2500 or GEOG 2511	Sustainability & Human Society Principles of Sustainability - Honors	
<b>Elective Lens Courses</b>		<b>16</b>
16 elective credits, including at least one course from each of the three "lens" categories: Natural & Physical Sciences; Social Sciences; and Arts & Humanities.		
Natural/Physical Science Electives (select at least one from this category)		
BIOL 2010	General Ecology	
BIOL 2050	Conservation Biology	
BIOL 3035	Invasive Species Ecology	
BIOL 3055	Ecology of the Rockies	
BIOL 3070	Ecological Field Methods	
BIOL 3095	Global Change Ecology	
BIOL 3044	Coral Reef Ecology	
BIOL 3045	Coral Reef Ecology Lab	
BIOL 3085	Insect Ecology	
BIOL 3110	Special Topics: Biology	
BIOL 3700	Topics in Ecology	
BIOL 3707	Advanced Topics in Conservation Biology	
CHEM 2240	Introduction to Environmental Chemistry	
CHEM 3410	Atmospheric Chemistry	
CHEM 3411	Aquatic Chemistry	
CHEM 3412	Environmental Chemistry & Toxicology	
EALC 2001	ESLLC: Local and Regional Environmental Issues (LLC: restricted)	
EALC 2002	ESLLC: The Impact of Development on the Environment (LLC; restricted)	
EALC 2003	ESLLC: Energy in American Society (LLC; restricted)	
GEOG 2608	Human Dimensions of Global Change	

GEOG 2700	Contemporary Environmental Issues
GEOG 2730	Geography of Surfing
GEOG 2880	Geographies of South Africa
GEOG 3120	Environmental/GIS Modeling
GEOG 3610	Climatology
GEOG 3620	Applied Climatology
GEOG 3630	Dendroclimatology
GEOG 3640	Climate Change and Society
GEOG 3720	Mountain Environments and Sustainability
GEOG 3750	Topics in Human-Environment Interactions
GEOG 3800	Geography of Colorado
GEOG 3870	Water Resources & Sustainability
GEOG 2320	Andean Landscapes (Inter-term travel course)
GEOL 3100	Environmental Geology
PHYS 2610	Physics of Climate
Social Sciences & Korbel Electives (select at least one from this category)	
ANTH 2011	Religion, Environmentalism, and Politics
ANTH 2200	Contemporary Issues of Native North America
ANTH 2420	Science, Technology and Human Values
ANTH 3040	Anthropologies of Place
ANTH 3255	Ancient North America
ANTH 3310	Indigenous Environment
ANTH 3500	Culture and The City
ANTH 3510	The Ancient City
ANTH 3880	Culture, Ecology, Adaptation
ECON 2360	Economics, Ecology, and Social Welfare
ECON 2450	Race in the Economy
ECON 3590	Urban Economics
ECON 3970	Environmental Economics
ENVI 3000	Environmental Law
GEOG 2401	The Human Population
GEOG 2410	Economic Geography
GEOG 2430	World Cities
GEOG 2810	Geography of Latin America
GEOG 3310	Culture/Nature/Economics-Human Ecology
GEOG 3340	Geographies of Migration
GEOG 3400	Urban Landscapes
GEOG 3420	Urban and Regional Planning
GEOG 3425	Urban Sustainability
GEOG 3450	Transportation and Mobilities
GEOG 3440	Urban Transportation Planning
GEOG 3445	Sustainability and Transportation
GEOG 3750	Topics in Human-Environment Interactions
GEOG 3755	Geography of Health
GEOG 3825	Geographies of International Development in Africa
GEOG 3890	Ecological Economics
GEOG 3940	Urban Geography Seminar
INTS 2380	Comparative Development Strategies
INTS 2490	Introduction to Global Health
INTS 3421	Environmental Justice Policy and Practice
INTS 3630	Global Environment
INTS 3715	The Politics and Policy of Sustainable Energy

LGST 3701	Topics in Legal Studies (Business & Sustainability) <sup>1</sup>	
PLSC 2840	International Law & Human Rights	
<b>Arts &amp; Humanities Electives (select at least one from this category)</b>		
ARTH 3813	Arts of the American West	
ARTH 3867	The Circle and the Four Corners: Native North American Art	
EDPX 3200	Data Visualization	
EDPX 3340	Designing Social Good	
EDPX 3350	Sustainable Design	
EDPX 3701	Topics in Emergent Digital Making (Biomedica)	
ENGL 2715	Native American Literature	
ENGL 3706	Writing the American West	
HIST 2531	Twentieth Century Native American History	
HIST 2551	The American West Since 1860	
HIST 2710	From Sea to Shining Sea: Nature in American History to 1900	
HIST 2720	Paved Paradise? Nature and History in Modern America	
HIST 2702	Topics in History	
HIST 3650	Native Crude: Indigenous Oil Politics and Activism	
HIST 3680	The Strange History of American Suburbia	
PHIL 2180	Ethics	
PHIL 2200	Social & Political Philosophy	
PHIL 2785	Environmental Ethics	
PHIL 3011	Great Thinkers: Virginia Woolf	
RLGS 2011	Religion, Environmentalism, and Politics	
<b>Additional elective credits may come from any lens category or other approved electives.</b>		<b>0-4</b>
<b>Other Approved Courses + Internships <sup>2</sup></b>		<b>0-4</b>
LDRS 2400	Leadership and Sustainability in Belize (Inter-term travel course)	
MGMT 3100	Business Ethics and Social Responsibility	
SJUS 2010	Social Justice: Exploring Oppression <sup>(LLC; restricted)</sup>	
<b>Capstone Seminar</b>		
GEOG 2550: Current Issues in Sustainability (topics vary by instructor)		

**Total Credits****24**

<sup>1</sup> Topics courses must have Sustainability Attribute.

<sup>2</sup> Additional courses including topics courses, study abroad courses, independent studies, and internships may be approved for elective credit on a case by case basis by the Sustainability Minor Advisor.

**ACTG 4735 Accounting for ESG -- Eastern Europe (4 Credits)**

This course is designed to give students an introduction to ESG accounting measurement and reporting issues from the perspective of multiple players in this arena (companies, accounting firms, standard setters, regulators etc.). This course juxtaposes US ESG accounting standard setting, measurement issues and best practices with Eastern European viewpoints on the same issues. With that in mind, this course will provide participants with the ability to be able to research, obtain and interpret current information on ESG accounting rules and standard setting.

**ADMN 4817 Administrative Internship (0-6 Credits)**

Opportunity to be supervised in on-the-job experience to better prepare school administration students for district administration careers.

**ANTH 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with JUST 2011 and RLGS 2011.

**ANTH 2200 Contemporary Issues of Native North America (4 Credits)**

This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land.

**ANTH 3040 Anthropologies of Place (4 Credits)**

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3310 Indigenous Environment (4 Credits)**

The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

**ANTH 3500 Culture and The City (4 Credits)**

Examines the past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of cities in antiquity and ends with contemporary urban landscapes. Analysis is sensitive to both the technologies and aesthetics of urban form. Emphasis is on the possibilities for urban redesign to meet the problems of 21st century city life.

**ANTH 3880 Culture, Ecology, Adaptation (4 Credits)**

This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

**ASEM 2473 Climate Science and Policy (4 Credits)**

Climate Science and Policy (CSP) addresses the scientific principles and data that show the climate is changing and that humans are causing a significant portion of that change. CSP also addresses the nature of the current American discourse on climate change and climate policy. CSP finally provides students with the opportunity to suggest ways out of our present policy paralysis, with prescriptions that address the current scientific findings and principles, economic realities and American policy practices.

**BIOL 2010 General Ecology (4 Credits)**

Topics in ecosystems, population and community ecology, as well as behavioral ecology. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

**BIOL 2055 Ways of Seeing and Sensing in Biological Systems at Kennedy Mountain Campus (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Biological Sciences, Physics & Astronomy, and Media, Film & Journalism Studies at DU's Kennedy Mountain Campus (KMC). As part of this course, students will collaborate as part of multidisciplinary teams; to compile and apply new content knowledge in biology/ecology, film-making, science communication and story-telling in a project-based curriculum unique to the KMC. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We will examine various aspects of natural systems specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to "seeing" through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To further develop the concept of "sensing," we will explore the soundscapes of the KMC as well as the ways plants and animals in this ecosystem sense their surroundings. We will also explore the KMC using human senses other than sight to navigate the nighttime environment. Students will work in teams of 3–4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing to participate for credit in Biological Sciences will complete additional reading and assignments focusing on the various ways that biological systems (from cells, to organisms, to communities) sense and respond to changes in their environment, including light, heat, sound, chemical cues, and physical forces such as electricity and gravity. This course will meet together with PHYS 2050 and MFJS 2050 courses, which each have different prerequisites and discipline-specific assignments. Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 2320 Andean Landscapes (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in the Andes of Peru through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits and occurs during winter interterm. Over a period of 11 days we will visit the cities and surroundings of Lima, Arequipa, and Cusco, Peru where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The Andean environment offers unique challenges for environment and societies and by understanding the locations and patterns of human activity in the Andes, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in situ critical thinking skills and the promotion of cultural diversity and global awareness. This course counts toward the sustainability minor and the intercultural global studies minor. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 2825 Biogeographies of Conservation in Serengeti & Zanzibar (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem and Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 3035 Invasive Species Ecology (4 Credits)**

This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

**BIOL 3044 Coral Reef Ecology (3 Credits)**

Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef conservation. This course counts as a category elective for Ecology and Biodiversity majors. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).

**BIOL 3055 Ecology of the Rockies (4 Credits)**

A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 2010 or permission of instructor.

**BIOL 3070 Ecological Field Methods (4 Credits)**

Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3095 Global Change Ecology (4 Credits)**

Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth's organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITES/COREQUISITES: BIOL 2090.

**BIOL 3350 Conservation Biology (5 Credits)**

Conservation Biology is the study of documenting the earth's biodiversity, its threats, and how it may be protected. It is a multidisciplinary science within ecology with contributions from environmental chemistry, geography, sociology, and political science, among other fields. In this class students learn the language of conservation biology, the methods used by conservation biologists, and the nuances of current issues. In class, material is learned through both lecture and interactive exercises in the classroom portion, with hands-on practice in techniques and applications during the lab. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 2010.

**CHEM 2240 Introduction to Environmental Chemistry (4 Credits)**

An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

**CHEM 3410 Atmospheric Chemistry (3 Credits)**

The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 and CHEM 2453) OR CHEM 2240.

**CHEM 3411 Aquatic Chemistry (3 Credits)**

The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 and CHEM 2453) or CHEM 2240.

**CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)**

A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: (CHEM 2270 or CHEM 2011) and CHEM 2453.

**COMN 3701 Topics in Communication (1-4 Credits)****EALC 2001 ESLLC: Local and Regional Environmental Issues (1,2 Credit)**

This course introduces students to Denver and the Front Range region as we investigate the current environmental issues this region faces today. We explore Denver's environmental framework through visits to environmental non-profits and sustainable business, as well as by engaging in collaborative sustainability initiatives on our campus. Excursions to places such as Old South Pearl Street and historic Lower Downtown allow us to trace Denver's past through geological and historical lenses. Restricted to Environmental Sustainability LLC students.

**EALC 2002 ESLLC: The Impact of Development on the Environment (1,2 Credit)**

This course takes a detailed look at human/environmental interactions, with particular emphasis on the explosive population growth and pressures on the global water supply. We discuss the demand on water globally and locally to further demonstrate the impacts of development. Restricted to Environmental Sustainability LLC students.

**EALC 2003 ESLLC: Energy in American Society (1,2 Credit)**

This course examines key issues surrounding energy in American society. Using Colorado's environment as a backdrop, students learn about the different types of conventional, alternative and renewable energy as well as the associated benefits and risks that each option presents. We explore these associated benefits and risks from the raw materials used to create energy all the way to the outputs of energy consumption. Restricted to Environmental Sustainability LLC students.

**ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)**

This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

**ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

**ECON 3970 Environmental Economics (4 Credits)**

This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

**EDPX 3350 Sustainable Design (4 Credits)**

This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

**EDPX 3700 Topics in Emergent Digital Culture (4 Credits)**

This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

**ENGL 2715 Native American Literature (4 Credits)**

Native American Literature explores the relationships between contemporary Native American narratives and Native American oral traditions. We will examine the intellectual underpinnings of Native American literary expressions, focusing on tribally specific Native American concepts of language, perception, and process in relation to Native cultural and political survival. This course aims to celebrate Native American cultural expression through lectures and discussion, group work and intellectual exercises.

**ENGL 3706 Writing the American West (4 Credits)**

Explores historical and contemporary writing produced in and about the American West.

**ENVI 3000 Environmental Law (4 Credits)**

Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

**EPM 4510 Environmental, and Health & Safety Management (4 Credits)**

This course presents the intricacies of establishing environmental and health and safety programs in the workplace. The course is divided into specific environmental and health and safety topics that are relevant to environmental and safety management. There are multiple topics that address the benefits and barriers to designing, implementing, and maintaining environmental and health and safety programs.

**GEOG 2320 Andean Landscapes (4 Credits)**

This class introduces students to intensive field activities pertinent to the study of Andean individuals and societies. Students study the characteristics of people, activities, as well as landscapes across the locations of Lima, Cusco and Puno in Peru. This course focuses on geography, history, archaeology, anthropology, biology, ecology and sustainability issues surrounding the above mentioned destinations. This course involves moderate physical activity (Inca Trail hike).

**GEOG 2401 The Human Population (4 Credits)**

This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2410 Economic Geography (4 Credits)**

Economic elements as spatially arranged, distribution of economic activities on the Earth's surface; market, resource and transportation factors in location theory.

**GEOG 2430 World Cities (4 Credits)**

The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities.

**GEOG 2500 Sustainability & Human Society (4 Credits)**

Sustainability has become a catch phrase in discussions concerning the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students are introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, and social justice, and various metrics used to assess sustainable behavior and practices. Students study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings.

**GEOG 2511 Principles of Sustainability - Honors (4 Credits)**

Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

**GEOG 2608 Human Dimensions of Global Change (4 Credits)**

This course documents and explores the transformations of the global environment that have occurred in the last 300 years and relates them to contemporaneous changes in population and society. Students examine the complexity of human-induced environmental changes by looking at the various social, economic, political, institutional and behavioral components of these forces at work. By using various case studies, students examine the processes and spatial distributions of anthropological changes to the world's lands, freshwater, biota, oceans and atmosphere.

**GEOG 2700 Contemporary Environmental Issues (4 Credits)**

Principles, practices, issues, and status of care of environment; lectures, readings, and discussions focus on causes, effects, and mitigation of a selection of topical regional, national, and international environmental problems including Denver's air pollution, acid deposition, hazardous waste management, global warming, and tropical deforestation.

**GEOG 2730 Geography of Surfing (4 Credits)**

Surfing is often viewed simply as a recreational sport. But it is also so, so, much more. It is a multi-billion dollar global industry, a reflection of global climate patterns interacting with sedimentation regimes and the land, a globalizing culture diffusing from strong regional identities, and a reason to travel to exotic locations and explore the planet. This course uses geographic perspectives to study the many facets of the sport. Geography provides a perfect set of tools to study surfing ranging from the propagation of swells to the diffusion of culture. The goal of the course is to introduce students to the core analytical approaches used in Geography as well as for students to understand that surfing is much more than a recreational sport.

**GEOG 2815 Geographies of Conquest: Christian, Jewish, and Islamic Societies in Andalusia (4 Credits)**

This course introduces students to the cultural landscapes, former and current, of the different societies that converged in Iberia. The class will focus on medieval Al-Andalus, the Islamic kingdoms that flourished there. During medieval times, Christian, Islamic, and Jewish societies lived side by side in an environment that oscillated between tolerance and open persecution. Science, art, scholarship, and political strategy motivated tolerance while religious fundamentalism and geopolitical considerations motivated persecution. This class will cover the human-environment interactions in the landscapes of Andalusia through an immersive field study and travel experience. This field class equals 4 academic credits. Over a period of 8 days we will visit the cities and surroundings of Madrid, Cordoba, Seville, and Granada in Spain where we will examine and compare cultural geography (past and present), history, and anthropological issues surrounding the communities that interacted in Al-Andalu.

**GEOG 2825 Biogeographies of Conservation (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem, Ngorongoro Crater, Olduvai Gorge, and the island of Zanzibar in Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements.

**GEOG 3100 Geospatial Data (4 Credits)**

This graduate-level course is designed to provide graduate students from a broad range of disciplines with the skills to carry out applied research tasks and projects requiring the integration of geographic information system technologies and geospatial data. Students are introduced to a collection of techniques and data sources with a focus on acquiring and integrating data. Legal, ethical, and institutional problems related to data acquisition for geospatial information systems are also discussed.

**GEOG 3310 Culture/Nature/Economics-Human Ecology (4 Credits)**

Cultural adaptation, livelihood strategies and environmental modification among subsistence and peasant societies: responses of such groups to technological change and economic integration.

**GEOG 3340 Geographies of Migration (4 Credits)**

This course explores contemporary movement of people across international borders and the social, cultural, political, economic, and environmental repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.

**GEOG 3400 Urban Landscapes (4 Credits)**

Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

**GEOG 3420 Urban and Regional Planning (4 Credits)**

Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

**GEOG 3425 Urban Sustainability (4 Credits)**

The 21st century is being called the 'century of the city.' Now more than ever, humans across the globe call the city their home. Many of the world's most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As 'sustainability' becomes part of mainstream discourse, this course explores what sustainability means for urban contexts around the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

**GEOG 3440 Urban Transportation Planning (4 Credits)**

A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

**GEOG 3445 Sustainability and Transportation (4 Credits)**

Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.

**GEOG 3610 Climatology (4 Credits)**

Climatology is the study of the processes that result in spatial and temporal variation of weather. This course introduces the student to the processes responsible for the transfer of matter and energy between the Earth's surface and the atmosphere and the average weather conditions that result. In addition, topics of global concern, such as greenhouse effect, El Nino, urban heat islands and acid rain, are discussed. Laboratory exercises provide an opportunity to investigate climate variation and climatic change through the use of a variety of computer simulations. Prerequisites: GEOG 1201, GEOG 1216, & GEOG 1264.

**GEOG 3640 Climate Change and Society (4 Credits)**

The science of anthropogenic climate change will be presented with an emphasis on critical evaluation of the evidence of climate change and future scenarios and migration strategies. Students will be introduced to the latest climate change research, including the Intergovernmental Panel on Climate Change report, and the most recent literature from the field. The societal and cultural implications of climate change will also be discussed. Prerequisites: GEOG 1201, GEOG 1216, or GEOG 1264.

**GEOG 3720 Mountain Environments and Sustainability (4 Credits)**

Mountain Environments and Sustainability explores the unique physical and cultural aspects of high relief and/or high altitude environments. Covering one quarter of the Earth's land surface, mountains directly or indirectly impact the lives of millions of people. We examine the significance of mountains to climate, water resources, and human activities, and discuss the sustainability of these environments and communities in light of rapid changes in many mountain regions resulting from anthropogenic factors and global change. GEOG 1201, 1202, and 1203 or instructor approval.

**GEOG 3750 Topics in Human-Environment Interactions (1-4 Credits)**

This course investigates various aspects of the relationships between human societies and the natural environment.

**GEOG 3755 Geography of Health (4 Credits)**

The geography of health is a thriving area of study that considers the impact of natural, built, and social environments on human health. This course introduces students to three geographical contributions to health studies. First, it emphasizes the importance of ecological approaches to health, which consider interactions between humans and their environments, including topics such as how climate change might influence disease distributions, and how the built environment can influence patterns of physical activity. A second focus is social theory, exploring how aspects such as race, socioeconomic status, and identity play a critical role in influencing human health. A third section of the course considers how spatial methods (cartography, GIS, and spacial statistics) can help answer health-related questions.

**GEOG 3800 Geography of Colorado (4 Credits)**

This course focuses on the physical and human geography of Colorado, a state that includes the western Great Plains, the southern Rocky Mountains, and the eastern Colorado Plateau. Colorado's varied natural landscapes provide equally varied settings for human settlement and resource use. Recommended Prerequisites: GEOG 1201, GEOG 1202, and GEOG 1203.

**GEOG 3835 Sustainability in South Florida: The Everglades and Florida Keys (4 Credits)**

South Florida represents a unique region in the United States and faces the challenge of trying to balance a tourist economy with protection of natural landscapes and resources. The region's significant sustainability challenges include: climate change (particularly sea level rise), invasive species, fisheries management, and landscape protection. This class uses a field-based case study approach to unpick some of these complex issues as we visit local sites and explore topics such as protecting native species, sustainable resource use, and ecotourism.

**GEOG 3870 Water Resources & Sustainability (4 Credits)**

In this course, we look at water as both a local and global resource and examine what sustainability means for human and ecological realms. After an overview of the physical processes that drive the hydrologic cycle, surface and groundwater hydrology, we examine how we humans have harnessed water for our use and how we both alter and treat its quality. We examine the legal aspects of water allocation in the U.S. and the groups and agencies that are most involved in managing and overseeing water issues. Finally, we examine the most pressing water "issues" related to wildlife, development, scarcity and conflict. We look forward to imagining the power of both the individual and the collective in meeting our future, global water needs.

**GEOG 3890 Ecological Economics (4 Credits)**

Ecological Economics is an emerging transdisciplinary endeavor that reintegrates the natural and social sciences toward the goal of developing a united understanding of natural and human-dominated ecosystems and designing a sustainable and desirable future for humans on a materially finite planet. In this course we start with a basic overview and summary of the neo-classical economic perspective with a particular focus on the recognized market failures of public goods, common property, and externalities. We begin with a reconceptualization of economic theory by imposing scientific constraints (e.g. conservation of mass and energy, the laws of thermodynamics, evolutionary theory, etc.). Using the ideas developed in this reconceptualization of economic theory we explore the implications for international trade and myriad public policies associated with the ethical, environmental, and economic aspects of sustainability.

**GEOG 4930 Nicaragua: Development Dilemmas (4 Credits)**

This class takes students to post-revolutionary Nicaragua to examine the consequences of recent land grabs by foreigners and transnational companies. Students learn to operate in a country with minimal "western" infrastructure. They learn to examine developing landscapes (that is, resorts and tourism infrastructure) with new eyes and from the perspective of locals who have been left out of the development loop. By the end of the class, students begin to understand the "development game", begin to question the role of tourism in developing economies, begin to know how to interact with other cultures, and finally learn to question the landscapes we "see" and begin to peel back the layers to understand the social and physical evolution of the landscape before their eyes. This class takes an experiential approach and requires students to participate in a service learning experience. Service learning is defined as a course-based, credit bearing educational experience in which faculty, students, and community members participate in an organized service activity that addresses a self-identified community need. We work with several community-based and non-governmental organizations to ensure a good fit between community needs and student expertise.

**HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)**

In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2720 Paved Paradise? Nature and History in Modern America (4 Credits)**

Oil drilling and outdoor recreation, "medical miracles" and natural disasters, the making of national parks and suburban landscapes, and political battles over pollution, property rights, energy, wilderness, endangered species, and toxic waste all belong to the environmental history of the recent U.S. In this class we explore that history, weighing how Americans from the late nineteenth century to the present day have thought about nature, modified and made use of it, and competed for control of resources and land.

**INTS 2380 Comparative Development Strategies (4 Credits)**

Why do people in some countries have so much, while people in other countries lack basic necessities? This course explores the field of development economics, exploring the challenges improving quality of life in poor countries. We look at national-level indicators and explore theories of aggregate economic growth. But we also zoom in on particularly pernicious challenges, including health, education, the environment, agricultural transitions, demographic shifts, and human mobility. Students are invited to act as development practitioners themselves, developing skills in data analysis as well as grant writing.

**INTS 3630 Global Environment (4 Credits)**

The linkages between social change, economic change and alterations to ecosystems have been apparent, if not overtly acknowledged, throughout history. It was not until 1987, however, with the publication of *Our Common Future*, that such linkages were couched in terms of development and explicitly placed on the international development agenda. The idea appears simple—environmental change, patterns of social change and economic development, social and political factors operate together and impact local, national, regional and global ecosystems. But impacts of the change in any one sector are seldom confined within national boundaries. How then does one address environmental issues across different regulatory, political, institutional and geographic scales? This course examines the connectivity between diverse elements of our planet's ecosystem, explores how a change in one element can have immediate and long-term impacts across local and global territory, and looks at strategies to create greater harmony across environmental, social, political and economic interests. Prerequisites: INTS 1500 and INTS 1700.

**JUST 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and RLGS 2011.

**LDRS 2400 Leadership and Sustainability in Belize (4 Credits)**

Every day, decisions are made by leaders in business, government, and non-profit settings that impact sustainability in its many forms. This course explores multiple meanings and interpretations of sustainability. The course location of Belize provides a perfect learning laboratory to examine how one country is attempting to balance the sometimes competing demands of economic, cultural, and environmental sustainability. Course activities include staying at a low-environmental impact conference center in the rainforest, visiting a model environmentally sustainable island community, hearing guest lectures from various country experts, and exploring Mayan ruins. Through these activities students examine the role that leadership plays in contributing to small and large scale sustainability efforts. Students must apply and receive instructor permission to register for this course.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3701 Topics in Legal Studies (1-4 Credits)**

Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.

**MGMT 3100 Business Ethics and Social Responsibility (4 Credits)**

This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2200 Social & Political Philosophy (4 Credits)**

Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2346 Philosophy of Nature (4 Credits)**

This course will discuss the nature of nature, the ethics of nature, our knowledge of nature, the politics of nature, the history of the philosophy of nature, physics, and aesthetics. We will read, poetry, philosophy, and literature to pose and answer these questions.

**PHIL 2785 Environmental Ethics (4 Credits)**

A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

**PHIL 3011 Great Thinkers: Virginia Woolf (4 Credits)**

In this course we will read Virginia Woolf as a philosopher. We will discuss her philosophy of nature, knowledge, art, politics, science, sensation, gender, and materialism throughout her fiction and non-fiction writings.

**PHYS 2610 Physics of Climate (4 Credits)**

The course will examine energy from the sun and how it flows into the land, atmosphere, and oceans and then out to space, and how that regulates the average temperature of Earth (and other planets). Emphasis will be placed on the carbon cycle of the Earth and related topics: atmospheric chemistry of greenhouse gases, forests and phytoplankton, weathering, glaciers, paleontological climate, and the formation of ancient hydrocarbons. Algebra will be used in the class. A 1000-level NSM course or permission of the instructor is required.

**PHYS 3350 Physics and Information (4 Credits)**

Students in Physical Sciences are often well versed in the art of model building but less so in the process of model-selection when multiple models can describe the same data. Students rarely learn tools beyond curve fitting and least square error minimization for model selection. Consequently, students are often unaware of the scope of different tools and fail to make judicious choice of algorithms/theories when faced with diverse problems. For example, building a model from data is very different from generating data (stochastic or deterministic) from a model. Next consider two contrasting challenges of model building i) when there is limited data vs ii) when there is too much data. For the first problem – inferring models from limited data – the solution can be traced back to Boltzmann's formulation of Statistical Physics describing motion of atoms. The connection between Information theory, Inference and Boltzmann's description, however, is often overlooked in introductory or even advanced classes in Physics, and Statistics. Studying these similarities can unlock novel solutions for problems well outside of thermodynamics, even as far as Image processing, Biology and Network science. Inference also requires us to appreciate fundamental topics in Probability – difference between frequentist and non-frequentist approach, Bayesian formalism – that are rarely taught to physical scientists, life scientists or engineers. At the other extreme, faced with data deluge, we routinely ask: how do we make sense of too much data? We use clustering, PCA, Neural Networks. In this course we will discuss and connect all these seemingly disparate concepts and apply them – at the appropriate context – to diverse problems in Physics, Chemistry, Biology and beyond. In the process we will gain an in-depth knowledge about commonly heard but perhaps less understood topics such as: Entropy, Likelihood maximization, Bayesian statistics, PCA, Classification algorithms, and Neural Networks. We will also address another often overlooked but fundamental and fascinating topic, biology's inherent ability to encode and decode information. Currently there is no such course that address all these topics in Information and Data Science in an unified manner – deeply connecting their formal basis, regime of applicability – grounded on physical principles, with a forward looking approach towards application in many areas well outside of traditional sciences. A lot of learning in the course will happen 'on the fly', where the tools and application problems are learnt as needed. Prerequisites: Calculus I, Calculus II, and at least two other courses focusing on application of mathematics to problems in physics/chemistry/biology or engineering. Example of this course can be University Physics, Modern Physics, Biostatistics, Differential Equation, Linear Algebra, Computational Physics, or other equivalent courses (upon Instructor approval).

**PLSC 2840 International Law & Human Rights (4 Credits)**

This course explores the role that international law plays in promoting human rights. Why did states first commit to international human rights protections after the Second World War? Why did states voluntarily surrender their sovereignty by signing and ratifying human rights treaties that limit their freedom to act domestically? Does this international law influence governments' human rights practices? Who enforces international human rights law? Which countries are leaders or laggards when it comes to international human rights? This course can count toward the sub-field requirement for PLSC majors in either law or comparative/international politics.

**RLGS 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and JUST 2011.

**SJUS 2010 Social Justice: Exploring Oppression (1,2 Credit)**

This course critically examines ideas, figures, and texts from the social justice tradition, allowing students the opportunity to develop a deeper understanding of the broad philosophical and historical contexts in which their own social justice efforts take shape. Particularly focused on racial justice, this course also lays the foundation for work that Social Justice LLC students will do in their second and third quarters, as well as work they will do in the Denver community. Restricted to Social Justice LLC students.

## Theatre

Office: Johnson McFarlane Hall

Mail Code: 1903 E. Iliff Ave. Denver, CO 80208

Phone: 303-871-2518

Email: theatre@du.edu

Web Site: <https://liberalarts.du.edu/theatre> (<https://liberalarts.du.edu/theatre/>)

**An artistic home where students expand their perspectives**

Students who take classes in the Department of Theatre become part of a close-knit community engaged in every aspect of theatre. DU theatre majors do it all: write, design, build, act, direct, manage and produce. Our hands-on approach gives students a broad perspective—one that will help them develop creative problem-solving skills to take with them into their careers.

**Engaged faculty**

We credit the success of our program largely to our highly engaged faculty members. When not teaching or in production here on campus, many collaborate with a variety of local, regional and national theatre companies.

**A hands-on experience**

There are many ways to learn theatre at DU—in class, in rehearsal, on stage and backstage. Our students are the heart of the program, providing the actors, technicians and publicity for each production.

**Intensive study**

Students begin by developing a solid foundation in all the aspects of theatre and can focus on one area of emphasis in their third or fourth year—anything from performance to design to management to directing.

## Theatre

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 85))

Minimum of 45 credits to include the following:

Code	Title	Credits
<b>First/Second year priorities</b>		
THEA 1861	Theatre Imagination	4
THEA 1862	How to Read a Play	4
THEA 1600	Stagecraft for Theatre	4
THEA 1880	Fundamentals of Theatre Design	4
<b>Production</b>		

THEA 1200	Tech Studio <sup>1</sup>	4
or & 1300	and Costume Studio	
THEA 1400	Production Performance Studio <sup>2</sup>	0
<b>Acting</b>		
THEA 2870	Acting I	4
<b>Design and Management</b>		
Select one of the following:		4
THEA 2880	Scene Design I	
THEA 2881	Lighting Design I	
THEA 2882	Costume Design I	
THEA 2883	Sound Design I	
THEA 3760	Stage Management	
<b>Directing</b>		
THEA 2885	Directing I (Prerequisite: THEA 1861, THEA 1862, THEA 2870)	4
<b>History</b>		
THEA 2890	Theatre History I	4
THEA 2891	Theatre History II	4
<b>Senior Capstone Production</b>		
THEA 3861	Junior Seminar	2
THEA 3862	Practicum in Theatre <sup>3</sup>	2
<b>Electives</b>		
4 additional THEA credits of the student's choosing (2000 level or higher)		4
<b>Total Credits</b>		<b>48</b>

<sup>1</sup> Combined total four quarters required THEA 1200 and THEA 1300 Costume Studio

<sup>2</sup> Five quarters required; two must be a crew position

<sup>3</sup> Enrollment in two sections of THEA 3862 Practicum in Theatre is required

## Secondary Major Requirements

45 credits. Same requirements as for BA degree.

## Minor Requirements

Minimum of 24 credits to include the following:

Code	Title	Credits
<b>Required courses</b>		
THEA 1861	Theatre Imagination	4
THEA 1862	How to Read a Play	4
THEA 1880	Fundamentals of Theatre Design	4
THEA 2890	Theatre History I	4
or THEA 2891	Theatre History II	
THEA 1200	Tech Studio	1
THEA 1300	Costume Studio	1
THEA 1400	Production Performance Studio <sup>1</sup>	0
<b>Electives</b>		
6 additional THEA credits of the student's choosing (at least 2000 level or higher)		6
<b>Total Credits</b>		<b>24</b>

<sup>1</sup> Three quarters required; one must be a crew position

## Requirements for Distinction in the Major in Theatre

The purpose of granting Distinction in Theatre is to recognize outstanding student work in the Department's courses of study and in its production processes.

Students awarded Distinction will have demonstrated the qualities of professional work in their field.

For example, a scene designer will have demonstrated the ability to work in a collaborative manner. An actor will have demonstrated the ability to attend rehearsals on time and be properly prepared/warmed up. If there are any questions about this, or about any other aspect of the Departmental Distinction process, be sure to communicate with faculty about expectations.

The Department of Theatre may award Distinction in more than one area, but the same show cannot be counted toward Distinction in both areas.

The official "Departmental Distinction" designation appears in two places: the student transcript and the commencement program.

### To apply

- Submit a letter of intent to the Departmental Chair via email
- Include a completed checklist of the requirements
- Also include any supporting comments/notes/details, as needed

### Deadline

- End of the 2<sup>nd</sup> week of the final quarter before the candidate's graduation

**Note:** *Fulfilling the requirements listed below does not automatically grant Departmental Distinction to the candidate. The faculty has the final say as to whether the work is of sufficient quality to earn this designation.*

### Requirements for Distinction, by area:

**Note:** *Departmental production = fully-produced show, part of the department's mainstage season, directed by faculty or professional guest artist. For the purposes of Distinction, "departmental" productions do not include class projects, independent projects, senior capstones, or staged readings.*

*This excludes Senior Capstones and other student productions.*

#### DESIGN

- Design one departmental production and five other productions that aren't part of a class requirement
- Complete a Directed Study with faculty mentors as an Assistant Designer
- Compile a portfolio in consultation with your Design advisor; make a formal presentation for faculty review
- 3.7 GPA in at least five design and technology classes at the 2000 or 3000 level

#### ACTING

- Act in six productions, at least four of which must be departmental
- 3.7 GPA in Acting I, Acting II, Acting III, and two other acting courses

#### DIRECTING

- Assistant-direct one departmental production (faculty or guest professional director)
- Direct two productions (that are not part of a class or practicum assignment; can be on campus or off; staged readings are not considered productions)
- Complete two Independent Studies with faculty mentors in Directing or Directing-related areas
- 3.7 GPA in both Directing 1 and Independent Studies

#### PLAYWRITING

- Have a play produced as a departmental or off-campus production, or have three works developed at DU through staged readings, talkbacks and rewrites
- 3.7 GPA in playwriting and two dramatic literature classes

#### THEATRE HISTORY

- Complete a written thesis (research or production-related)
- 3.7 GPA in both theatre history classes, aesthetics in performance, and two others in history, art history or cultural studies

#### STAGE MANAGEMENT

- Stage manage or assistant stage manage five productions: three departmental and two others
- Complete a professional production internship
- Compile a portfolio in consultation with your Stage Management advisor; make a formal presentation for faculty review
- 3.7 GPA in Stage Management, Directing, Acting I and one design class at the 2000 or 3000 level

#### DRAMATURGY

- Dramaturg three departmental productions
- 3.7 GPA in five classes chosen from theater history and dramatic literature, including seminars, Shakespeare, etc.

#### THEATRE

- Complete a written thesis in the senior year under the supervision of a Theatre faculty mentor (may be completed with Independent Study hours and/or PINS)
- 3.7 GPA in all Theatre classes

#### OTHER GUIDELINES ABOUT DISTINCTIONS:

- We may award distinction in more than one area, but the same production or project cannot be listed for multiple awards.
- For instance, if a student wants distinction in both directing and stage management, he or she must participate in four departmental productions in addition to the other respective requirements listed.
- "Departmental" refers to the major production(s) each quarter, directed by a faculty member or guest artist. This excludes senior projects and independent student productions.

## BA in Theatre

The following course plan is a sample quarter-by-quarter schedule for intended majors. Because the bachelor of arts (p. 85) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years.

Ideally, Common Curriculum (p. 81) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 42) and Scientific Inquiry: Society and Culture (p. 76) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
First-Year Seminar (FSEM)		4 WRIT 1122		4 WRIT 1133	4
THEA 1861	4	THEA 1862		4 THEA 1200, 1300, or 1400	1
THEA 1880	4	Minor or Elective		4 Scientific Inquiry: Society and Culture	4
Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4	Foreign Language or Scientific Inquiry: The Natural and Physical World	4
				Minor or Elective	4
	16		16		17

Total Credits: 49

**THEA 1010 Stage Movement & Dance (1 Credit)**

Movement class for dancers and non-dancers alike. Topics may include Stage Combat, Broadway, Period Movement, Tai Chi, Masks & Storytelling, World Dance Styles, Movement Analysis, etc. Check with department for quarterly offerings.

**THEA 1011 Stage Movement & Dance (1 Credit)**

Movement class for dancers and non-dancers alike. Topics may include Stage Combat, Broadway, Period Movement, Tai Chi, Masks & Storytelling, World Dance Styles, Movement Analysis, etc. Check with department for quarterly offerings.

**THEA 1012 Stage Movement & Dance (1 Credit)**

Movement class for dancers and non-dancers alike. Topics may include: Stage Combat, Broadway, Period Movement, Tai Chi, Masks & Storytelling, World Dance Styles, Movement Analysis, etc. Check with Department for quarterly offerings.

**THEA 1200 Tech Studio (1 Credit)**

Tech studio is a basic course in the principles of scenic construction and preparation for department productions: hands-on training and application of technical theatre skills. Includes scenic construction, properties crafts, sound engineering, lighting electrics, scene painting, and related theatrical design elements, as defined by the needs of the departmental production season. Special emphasis on developing core competencies within a framework of professionally-modeled safety protocols.

**THEA 1300 Costume Studio (1 Credit)**

Costume Studio is a basic course in the principles of costume construction and preparation for departmental productions: hands-on training and application of costume building skills. Includes sewing, patterning, draping, tailoring, dyeing, maintenance/upkeep, and related skills necessary to the successful realization of the costume design process within the context of the departmental production season. Special emphasis on developing core competencies within a framework of professionally-modeled safety protocols.

**THEA 1325 Costume Tech Bootcamp: Construction Skills & Craft Intensive – Introduction to Pattern & Fit (1 Credit)**

The intention of this garment-building intensive is to introduce and solidify certain foundational technical skills and craft competencies of early-career costume students, so that they may take their costume or fashion design studies to the next level. Through an aggressive series of exercises and projects focused on patterning and fit technique, in a hands-on studio setting, students will finish the week of instruction with a skills portfolio prepared according to industry standards as set forth by the United States Institute for Theatre Technology Costume Commission. Specialized technique, proper and safe operation of industrial equipment, historical construction practices and 3-dimensional interpretation and pre-visualization are all topics for inclusion. The exact makeup and focus of study will be determined by the interests of the group.

**THEA 1400 Production Performance Studio (0 Credits)**

Production Performance Studio is a course that provides hands-on training and application of acting and/or production performance skills. Includes acting, stage management, directing, designing, light/sound board operations, stage crew, wardrobe, and related roles in the production and performance process, applied within the context of departmental productions. Builds upon the foundation provided by departmental courses. Audition and/or faculty permission required for enrollment.

**THEA 1600 Stagecraft for Theatre (4 Credits)**

Stagecraft introduces students to the basic skills that allow us to realize the art of Theatre. Students will have the chance to learn construction, craft and design skills in the scenic and costume areas that can be applied in advanced Theatre classes, and in everyday life. Theatre technicians and artisans need breadth and problem-solving skills with a wide range of techniques and materials, and an awareness of the performance from all aspects. Having technical awareness makes all students better at what they do. 1. Learn through doing: experience the work of the theatre technician through complex hands-on projects in which the students have opportunities to work as craftsman and artist. 2. Learn and use the fundamental vocabulary and tools of design, as they apply to theatre production 3. Learn about -and experience creating- following the process that theatre technicians use to create multi-phase artistic projects. 4. Be introduced to the intersection of theatre design and theatre production as we practice it today in the profession- personnel, practices, the collaborative nature of the art form and our industry. 5. Students will learn safety practices, including personal protection equipment, fire code, safe tool handling, and environmental health and safety practices for the beginning artist. 6. Students will learn to use power tools, including saws, sanders, pneumatic tools and hand tools. 7. Students will learn techniques for hand and machine sewing. 8. Students will learn to select materials and techniques to build projects. 9. Students will plan a project from idea to scaled drawing to realizing the project using power and hand tools. 10. Students will learn painting techniques, and plan and execute a multi-step painted surface.

**THEA 1810 The Process of Theatre: Page to Stage (4 Credits)**

Exploration of the process playwrights, directors, actors, and designers use in creating a theatrical production. Individual sections may focus on single areas only—please see department for current offerings. In this course, students will demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture. They will also identify and analyze the connections between these things and the human experience/perception of the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1861 Theatre Imagination (4 Credits)**

Beginning exploration of nature of theatricality through exercises and study of specific plays; explore acting, directing, designing and writing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1862 How to Read a Play (4 Credits)**

Close analysis of selected dramatic texts from Aeschylus to Caryl Churchill. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1880 Fundamentals of Theatre Design (4 Credits)**

The work of the theatre designer is to transform a text into visual and aural expression, by planning and creating the physical environment of a live performance. Students will learn about – and learn appreciation for – theatre design in order to be better theatre artists (and audience members) themselves, through the applied practice of designing a "paper" production, collaboratively with a small team.

**THEA 1988 Study Abroad Resident Credit (0-18 Credits)****THEA 2200 Voice for the Actor (2 Credits)**

Exploration and application of foundational vocal techniques for stage actors.

**THEA 2230 Movement and Voice Training for Actors (4 Credits)**

Actors often learn movement and vocal training separately, despite the fact that speaking is a physical act and that an actor's voice and body are constantly working in relationship to each other. This course has two main objectives: 1) to train your actor instrument through rigorous physical and vocal training, and 2) to help you understand the essential and dynamic relationship between an actor's breath, body, and voice. You'll explore how physical actor training strengthens and improves the ability to speak while ultimately allowing you to embody a character more successfully. Drawing from many areas of study in movement and voice, you will connect physical and vocal action through a series of exercises and explorations. Specifically, we'll investigate 1) how to prepare your body for performance circumstances and to successfully support your vocal needs, and 2) how your body and voice can work symbiotically during performance to deliver a more powerful, precise, engaging performance. The course will begin with extensive physical and vocal actor training; then we'll apply this training to specific theatrical texts; it will culminate in a collaborative performance that will provide opportunities for both individual and group performances. This work will strengthen stage presence and characterization and will heighten your emotional and physical power and commitment to each moment onstage. By the end of the quarter, if you do the work, you will be vocally and physically transformed, armed with a new approach to moving and speaking onstage.

**THEA 2870 Acting I (4 Credits)**

Exploration of acting through physical and vocal exercises, followed by scene study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2871 Acting I (4 Credits)**

Exploration of acting through physical and vocal exercises, followed by scene study.

**THEA 2880 Scene Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2881 Lighting Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2882 Costume Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming costume concepts into actual practice.

**THEA 2883 Sound Design I (4 Credits)**

Exploring methods, techniques and procedures involved in transforming sound effects/sound design into actual practice.

**THEA 2884 Production Management (4 Credits)**

Exploration of core competencies, their development and application throughout the collaborative theatrical production process, with the explicit goal of ensuring the successful execution of an artistic vision within the resources of a producing organization.

**THEA 2885 Directing I (4 Credits)**

Theory and practice of staging plays. Prerequisites: THEA 1861, THEA 1862, THEA 2870.

**THEA 2890 Theatre History I (4 Credits)**

This course examines the development of Western theatre and drama from the Ancient Greeks to the 19th-Century, concentrating on the intellectual, social and artistic foundations of theatre and drama. The course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among the students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from Fifth-Century B.C.E. into the early 19th-Century. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2891 Theatre History II (4 Credits)**

This course examines the development of Western theatre and drama from the 19th-Century to the present. Concentrating on the intellectual, social and artistic foundations of theatre and drama, this course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from the 19th-Century to the present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2988 Study Abroad Resident Credit (0-18 Credits)****THEA 3700 Topics in Theatre (1-4 Credits)****THEA 3701 Topics in Theatre (1-4 Credits)****THEA 3702 Topics in Theatre (1-4 Credits)****THEA 3703 Topics in Theatre (1-4 Credits)****THEA 3704 Topics in Theatre (1-4 Credits)****THEA 3711 Playwriting (4 Credits)**

Introductory course designed to provide students with the necessary tools to create dramatic texts for reading and performance. Through textbook and published play reading assignments engineered to highlight successful practices, and exercises devised to tap into different modes of creative generation, students will discover different methodologies for developing new work for the stage.

**THEA 3760 Stage Management (4 Credits)**

Survey, exploration, and application of the component parts of the stage manager's role, based upon current methods practiced by professional theatre companies in the United States. Stage managers facilitate the creation of a fully-realized work of theatrical art, born of the collaboration of numerous artists, craftspeople and technicians.

**THEA 3861 Junior Seminar (2 Credits)**

Roundtable discussions of play-selection, production requirements and creative strategies taken the year prior to the Senior Practicum Project (THEA 3862). Additionally, students will consider their post-graduation goals and receive practical advice on advanced studies or a career in the theatre.

**THEA 3862 Practicum in Theatre (1 Credit)**

Senior capstone project synthesizing all aspects of the BA program. As a "principal artist" (actor, director, designer, playwright, etc.) on a production of the student's choosing, each graduating senior will be given the chance to put "theory into practice" and fully mount a play for an audience.

**THEA 3865 Seminar in Dramatic Literature (4 Credits)**

Selected problems and periods.

**THEA 3870 Acting II (4 Credits)**

Continuing exploration of acting through text analysis, scansion, vocal technique and scene presentation. Prerequisite: THEA 2870.

**THEA 3873 Acting III (4 Credits)**

Advanced exploration of acting through scene study, intense physical and vocal work and rehearsal techniques. Prerequisites: THEA 2870, THEA 3870.

**THEA 3883 Stage Makeup (2 Credits)**

Hands-on instruction in application and design of theatrical makeup.

**THEA 3884 Scene Painting (4 Credits)**

Exploration of two- and three-dimensional techniques for painting stage scenery.

**THEA 3980 Theatre Internship (1-12 Credits)**

Internships in theatre include everything from front of house jobs to acting on stage. Internships can be for any entertainment related field and include theme parks, cruise ships and regional theatres.

**THEA 3988 Study Abroad Resident Credit (0-18 Credits)****THEA 3991 Independent Study (1-10 Credits)**

In-depth exploration of a specific topic or project of the student's choosing, undertaken in consultation with and under the close supervision of a faculty advisor. These courses may also be taken in preparation for an honor's thesis in any theatrical discipline.

**Faculty**

**Rick Barbour**, Professor, MFA, Temple University

**Ashley Lauren Hamilton**, Associate Professor, PhD, New York University

**Janice Benning Lacek**, Associate Professor, MFA, University of California, San Diego

**Steven McDonald**, Associate Professor and Department Chair, MFA, University of California, Irvine

**Shannon Lynn McKinney**, Associate Professor, MFA, Northwestern University

**Anne Catherine Penner**, Professor, MFA, Columbia University

**Gregory Ungar**, Associate Professor, PhD, University of California, Irvine

**William Temple "Davy" Davis**, Professor, Emeritus, PhD, University of Denver

# Urban Studies

Office: Sturm Hall, Room S105

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2680

Email: dsaitta@du.edu

Web Site: [www.du.edu/urbanstudies/](http://www.du.edu/urbanstudies/) (<http://www.du.edu/urbanstudies/>)

The urban studies minor offers a broad, interdisciplinary introduction to the urban social and material environment. Students learn about the history of urban society in the United States and other parts of the world, different approaches to understanding the contemporary city and its problems, and the role of urban politics, economics, and culture in shaping city life. The minor provides an excellent accompaniment to a number of academic majors including Anthropology, Geography, History, Real Estate, and Sociology. It also provides excellent synergies with other interdisciplinary minors, such as Sustainability and Critical Race and Ethnic Studies. The Urban Studies minor prepares students for advanced study and professional careers that require thoughtful urban analysis and advocacy.

Urban Studies

## Minor Requirements

24 credits, with no more than 8 credits selected from any discipline (listed below) participating in the minor. Exceptions to this may be made based on circumstances. Students customize their program by selecting courses that fit with their particular interests. There are no required courses. The courses listed below are only some of the courses that are relevant to the minor. Courses having urban studies content in any department listed below or in any other department on campus may be used for Urban Studies credit pending approval by the program director.

Code	Title	Credits
<b>Anthropology</b>		
ANTH 3040	Anthropologies of Place	4
ANTH 3500	Culture and The City	4

SOCI 2650	Sociology of Immigration	4
SOCI 2655	Latina/os in American Society	4
<b>Other courses may work pending approval of the Director.</b>		

**ANTH 3040 Anthropologies of Place (4 Credits)**

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3500 Culture and The City (4 Credits)**

Examines the past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of cities in antiquity and ends with contemporary urban landscapes. Analysis is sensitive to both the technologies and aesthetics of urban form. Emphasis is on the possibilities for urban redesign to meet the problems of 21st century city life.

**ANTH 3510 The Ancient City (4 Credits)**

The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

**COMN 1700 Fundamentals of Intercultural Communication (4 Credits)**

This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**GEOG 2401 The Human Population (4 Credits)**

This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2430 World Cities (4 Credits)**

The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities.

**GEOG 3340 Geographies of Migration (4 Credits)**

This course explores contemporary movement of people across international borders and the social, cultural, political, economic, and environmental repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.

**GEOG 3400 Urban Landscapes (4 Credits)**

Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

**GEOG 3410 Urban Applications in GIS (4 Credits)**

This course uses the tools of geographic information systems (GIS) to explore concepts of traditional urban geography, including defining cities/metropolis, internal urban structures, urban systems, industrial location, social and residential patterns, urban form, environmental problems, and urban planning. The course allows students to practice fundamental skills in GIS (e.g., working with attribute tables, spatial analysis, spatial queries) and cartography (map design, color theory, display of information). Depending on the quarter, students pursue individual projects of interest or client-based projects. Prerequisite: GEOG 2100 or GEOG 3100 or equivalent.

**GEOG 3420 Urban and Regional Planning (4 Credits)**

Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

**GEOG 3425 Urban Sustainability (4 Credits)**

The 21st century is being called the 'century of the city.' Now more than ever, humans across the globe call the city their home. Many of the world's most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As 'sustainability' becomes part of mainstream discourse, this course explores what sustainability means for urban contexts around the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

**GEOG 3440 Urban Transportation Planning (4 Credits)**

A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

**GEOG 3445 Sustainability and Transportation (4 Credits)**

Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.

**GEOG 4420 Urban and Regional Planning (4 Credits)**

The field of urban and regional planning is concerned with the future of cities, neighborhoods, metropolitan areas, and extended regions. How do local governments (cities, counties) and metropolitan planning organizations (regional planning agencies, councils of governments) work with community stakeholders (neighborhood associations, chambers of commerce, businesses, citizens, non-governmental organizations) to formulate plans that will guide the future development of a city and its region? Cities and their regions face numerous challenges including population and employment growth or decline, economic development, neighborhood vitality, housing availability and affordability, urban design, land use, transportation, sustainability, access to parks and open space, air quality, floodplain management, water resources, and social equity among many others. How places address these challenges is critical to the future health and livability of our cities, neighborhoods, metropolitan areas, and extended regions. This course will have a community-engaged service learning component. Community-engaged scholarship and teaching comprise intellectually and methodologically rigorous work that is grounded in the norms of democratic education: inclusiveness, participation, task sharing, reciprocity in public problem solving, and an equality of respect for the knowledge and experience that everyone involved contributes to education and community building. The specific service learning project for the class will be to assist the Metropolitan Denver Nature Alliance (Metro DNA) with its goal to increase the community's engagement with nearby nature by reviewing, analyzing, and collecting data from park/ open space plans of cities and counties in the Denver metropolitan area. Cross-listed with GEOG 3420.

**HIST 1110 Ancient Rome (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1520 Immigrant Voices in Modern America (4 Credits)**

This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony--autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

**HIST 3100 Cities and Society in Latin America (4 Credits)**

This course approaches the history of Latin America through the prism of its cities, paying particular attention to the ways in which the urban environment defined and was affected by the regional path of socio-economic and cultural development. In addition to examining how cities evolved, and how people have therein lived (worked, engaged in political activities, etc.), we seek to understand how cities were historically conceived as a primary focus of public policies and projects to the goal of modernization in the region.

**HIST 3680 The Strange History of American Suburbia (4 Credits)**

Everyone knows the emblems of American suburbia: single-family houses with attached garages, grassy lawns, curving streets and cul-de-sacs, office parks and shopping malls. But there's a history behind these settings that's poorly understood - that that is key to understanding much about the U.S. Suburbia sheds light on American popular attitudes toward nature, technology, health, politics, and patriotism, and on the complicated dynamics of race, gender, family, class, and religion in American society. In this course, we explore how the U.S. became a "suburban nation," from the Romantic retreats of the nineteenth century, through suburbia's triumphant yet troubled "golden age" in the 1950s, to the stereotype-shattering suburbs of our own time. We consider the surprisingly powerful ways suburbia history has shaped U.S. history more broadly.

**LDRS 2040 Leading Community Change (4 Credits)**

This course builds on the themes we began in the first-year PLP sequence. Specifically, we continue to expand your understanding of community, citizenship, and spheres of influence. Last year, you explored theories of leadership as well as your own assets and passions you carry into leadership. During the second-year course series we learn how to think strategically and act purposefully to make change happen in a larger context—the community. This course asks you to look at and practice leadership as a relational process that brings people together around common interests in order to effect positive change within institutions and/or communities. We will examine and practice key leadership concepts including self-interest, power, and collaboration. We will also practice specific leadership strategies, including 1-1 interviewing techniques, issue research, developing mission statements and action plans, and conducting community research. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), or permission of the PLP faculty.

**MFJS 2220 Popular Music and Social Justice (4 Credits)**

What makes popular music a powerful medium for us to "fight the power" and motivate social change, and what hinders it from achieving its full potential? This course examines a range of 20th and 21st century popular music (blues, folk, rock, hip-hop, musicals, etc.) to better understand the complex relationships between music and social (in)justices. You will also research to understand the great mind of a musician you admire and apply your learning by picking up the powerful tool of "sampling" for a final creative project of your choosing – a song, a cover, lyrics, or spoken word – to put out a message that exemplifies the powerful potential of popular music as a tool for advancing social justice.

**PLSC 2200 Politics of China (4 Credits)**

Napoleon Bonaparte allegedly said, "let China sleep, for when she wakes up, she will shake the world." Two hundred years later, China is indeed waking up, and the world is feeling the dragon's hot breath. In this class we will examine the fall and rise of the Chinese state, with a focus on its political and economic trajectories after the founding of the People's Republic of China (PRC) in 1949. Some of the key issues to be examined are: China's "economic miracle," when, if ever, will China democratize, its potentially explosive relations with Taiwan, its challenges to America's global hegemony, etc.

**PLSC 2450 Latinx Politics in the United States (4 Credits)**

Examines the history and contemporary role of the Hispanic/Latinx population in the U.S. political system, exploring themes including identity, racialization, immigration, social movements, public opinion, political behavior, and public policy.

**PLSC 2825 The Politics of Rights (4 Credits)**

This course examines rights and rights-claims as complex and contingent resources for political actors. The class aims at equipping students to be better able to identify, understand, and critically evaluate how, why, and to what end rights claims are used in politics. Particular attention is paid to social and political movements that use rights-claims, as well as the various advantages, limitations, and problems that can accompany rights-based political appeals. Prerequisite: sophomore standing or above.

**REAL 1700 Fundamentals of Real Estate and the Built Environment (4 Credits)**

An exploration of the importance of real estate and the built environment through triple bottom line analysis of its social, environmental, and economic impacts. The course considers a "cradle to cradle" sustainability model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value-generating solutions for society. Professional practices/skill sets associated with the many career options that engage the built environment are demonstrated. Also covered are the principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan finance, appraisal investment and tax benefits. Partially satisfies Colorado real estate broker licensing requirements.

**SOCI 2140 Urban Sociology (4 Credits)**

Sociological study of the city focuses on interrelationships among people, social institutions and space; process of urban development; comparison of competing theoretical perspectives. Prerequisite: SOCI 1810.

**SOCI 2190 American Communities (4 Credits)**

Study of 'community' as a foundational concept in the discipline; consideration of the changing structural contexts of community, as well as the social-psychological aspects of community; emphasis on emerging forms of community in the contemporary U.S. Prerequisite: SOCI 1810.

**SOCI 2320 Race and Ethnic Relations (4 Credits)**

Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2420 Social Inequality (4 Credits)**

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2500 Schooling and Society (4 Credits)**

The objective of this course is to examine the relationship between schooling and the larger social inequalities (e.g., racism, poverty, and gender) that profoundly shape education. The major focus in this seminar will be on U.S. K-12 public education. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2650 Sociology of Immigration (4 Credits)**

This course applies a sociological approach to the study of international migration. Students examine early and contemporary waves of migration to the U.S.; theories of migration; processes of settlement and incorporation; the construction of immigration and citizenship; and institutional responses to immigration across and within immigrant groups. The course also examines variation in immigrant experiences along the lines of race/ethnicity, gender, and sexual and age identities. The course culminates in an examination of the impact of migration on the U.S. and on immigrants' sending communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2655 Latina/os in American Society (4 Credits)**

Latinas and Latinos constitute one of the largest and fastest growing ethnic groups in the United States. This course uses a sociological lens to understand Latina/os' experiences in the U.S. Specifically, we address Latinas' and Latinos' historical experiences and migration trajectories; assimilation, incorporation and racial/ethnic identity formation; the family, schools and labor markets; and political participation. In so doing, we discuss and challenge stereotypes about Latina/os, present alternative perspectives about Latina/o experiences in the U.S. and most importantly, understand their contributions to their families, their communities, and to the nation as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2720 Guns and Society (4 Credits)**

Guns are a fact of life in the United States; there are more guns in the US civilian stockpile than any other nation. In this course, we will take a step back from the partisan debates and assess both the history of guns and gun policy in the United States as well as the current state of knowledge around firearms in society. During the course of this class we will explore how science, politics, and culture converge to make guns a controversial topic in the US and what it means for society and policy. Prerequisite: SOCI 1810 or permission of instructor.

**SPAN 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit some of the landmarks of Mexican History, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis. Prerequisite: SPAN 2350.

## Wellness Minor

**Office:** Dimond Family Residential Village, P185

**Mail Code:** 2050 East Evans Avenue Denver, CO 80208

**Phone:** 303-871-2309

**Email:** [UAP.wellnessminor@du.edu](mailto:UAP.wellnessminor@du.edu)

**Web Site:** <http://www.du.edu/livinglearning/wellness> (<http://www.du.edu/livinglearning/wellness/>)/minor.html (<https://www.du.edu/livinglearning/wellness/minor.html>)

The Wellness Minor is [open to all students at DU](#). Students can pursue the Wellness Minor without being part of the Wellness Living and Learning Community.

Wellness is a unifying concept that weaves together many different disciplines, curricula, and facets of experience to promote conscious growth and dynamic balance in life. As one of the four key dimensions of a DU student 4D experience, the Wellness Minor is designed around a multidimensional model that includes achieving social, emotional, physical, spiritual and financial wellness. An undergraduate who completes a minor in Wellness will have an increased ability to navigate the health care, wellness, or corporate arenas which are increasingly embracing preventative, proactive approaches to health. These undergraduates will delve into various approaches that prepare them to have a foundation for healthy living, gaining a breadth of exposure to various approaches to wellness. The wellness minor is suited for individuals who want to support their major with a balanced academic and experiential emphasis on the practice of wellness. This minor supports the 4D model experience by focusing on learning about and practicing well-being through the following dimensions:

### Dimensions of Wellness

- Mental Wellness
- Community Wellness
- Physical Wellness
- Emotional Wellness
- Spiritual Wellness
- Multicultural Wellness
- Social/Relational Wellness

- Intellectual/Occupational Wellness
- Environmental Wellness

# Wellness

## Minor Requirements

24 credits, including the following:

Code	Title	Credits
<b>Required Courses for WELLNESS LLC Students ONLY</b>		
4-6		
Four to six credits from the Wellness LLC series (these courses are only available to members of the Wellness Living & Learning Community):		
WELL 2013	WLLC: Introduction to Wellness	
WELL 2015	WLLC: Spiritual and Emotional Wellness	
WELL 2014	WLLC: Community and Social Wellness	
<b>Students not enrolled in the Wellness Living and Learning Community are required to take the following introductory course:</b>		
This course does not have to be taken first to begin the minor.		
WELL 1013	Introduction to Wellness Studies (Offered Spring Quarter)	
<b>Electives</b>		
18-20		
Choose 5 courses from at least 2 different wellness domains (totaling 24 credits for the minor). At least 8 credits need to be earned at the 2000 level or above. Please be aware some of these courses may require prerequisites. Elective courses may include the following: <sup>1</sup>		
<b>Environmental</b>		
ANTH 3500	Culture and The City	
ENVI 3000	Environmental Law	
GEOG 3755	Geography of Health	
PHIL 2785	Environmental Ethics	
<b>Community</b>		
CENG 2510	Denver Urban Issues and Policy	
CENG 2520	Community Organizing	
CENG 2590	From Public Good Theory to Action	
ANTH 1010	Anthropology: Humankind in Context	
COMN 2030	Social Movement Rhetoric	
COMN 2210/GWST 2212	Gender, Communication, Culture	
PPSS 2100	Concepts of the Public Good	
PSYC 2740	Social Psychology (Prerequisite: PSYC 1001)	
SOCI 1810	Understanding Social Life	
SOCI 2060	Self and Society (Prerequisite: SOCI 1810)	
SOCI 2240	Sociology of Health (Prerequisite: SOCI 1810)	
SOCI 2800	Sociology of Sport (Prerequisite: SOCI 1810)	
SOCI 2820	Drugs and Society (Prerequisite: SOCI 1810)	
<b>Physical</b>		
ANTH 2010	Cultural Anthropology	
BIOL 1220	Molecules to Humankind I	
BIOL 1221	Molecules to Humankind II	
BIOL 1222	Molecules to Humankind III	
COMN 3010	Critical Sexuality Studies	
COMN 3270	Health Communication	
GWST 2500/	Biology of Women	
PHIL 2700	Biomedical Ethics	
PSYC 2070	Child and Lifespan Development (Prerequisite: PSYC 1001)	
PSYC 2090	Human Sexuality (Prerequisite: PSYC 1001)	
SOCI 2240	Sociology of Health (Prerequisite: SOCI 1810)	
<b>Emotional</b>		
CNP 1650	Unlearning to Learn: A Journey in Self Discovery (1 credit)	

SOCI 2060	Self and Society (Prerequisite: SOCI 1810)
<b>Mental</b>	
CNP 3263	Counseling Psychology: The Psychology of Sex and Intimate Relationships
PHIL 2100	Philosophy of Mind
PSYC 1001	Foundations of Psychological Science
PSYC 2031	Introduction to Cognitive Neuroscience (Prerequisite: PSYC 1001)
SOCI 2820	Drugs and Society (Prerequisite: SOCI 1810)
<b>Spiritual</b>	
ANTH 3020	Native Religions
PHIL/RLGS 2005	Philosophy of Religion
PLSC 2425	Religion in American Politics (Prerequisite: Must be Sophomore standing)
RLGS 2114/ASIA 2714	Roots of Yoga and Tantra: Methodologies and Modern Practice
RLGS 3002	Creation & Humanity
RLGS 3315	Religion & Moral Psychology
RLGS 3350	Culture, Psyche, and Religion
RLGS/GWST/JUST 3740	Bodies and Souls
<b>Multicultural</b>	
ANTH 2010	Cultural Anthropology
ANTH 3060	Cultural Narratives (Prerequisite: Must be Junior standing)
ARTH 1010	Images of Culture
CNP 3262	Diversity of Counseling Psychology and Mental Health
COMN/GWST 3050	Feminism and Intersectionality
COMN 3310	Globalization, Culture, and Communication
COMN/GWST 1015	Voice and Gender
COMN 1700	Fundamentals of Intercultural Communication
COMN 3140	Advanced Intercultural Communication
RLGS 2401	Social Justice in a Global Context: Theory and Practice
SOCI/GWST 2730	Gender in Society (Prerequisite: SOCI 1810)
<b>Social/Relational</b>	
COMN 1100	Communication in Personal Relationships
COMN 2140	The Dark Side of Relationships
COMN 2470	Gender and Communication
COMN 3280	Family Communication
COMN 3770	Mediated Communication and Relationships
GWST 2210/2210	The Family (Prerequisite: SOCI 1810)
PSYC 2540	The Psychology of Couples Relationships: From Dating to Mating and Beyond (Prerequisite: PSYC 1001)
<b>Intellectual/Career</b>	
BUS 1900	Managing Your Financial Affairs
CNP 1200	Career Decision Making (2 credits)
CNP 1250	Peer Counseling (2 credits)
COMN 1012	Speaking on Ideas that Matter
COMN 1550	Communication in the Workplace
COMN 3020	Conflict Management
MGMT 3150	Creativity, Innovation, and Design Thinking (Prerequisites: MGMT 2100 and admission to Daniels.)
MGMT 3700	Topics in Management (Prerequisite: Degree checkpoint 2 and MGMT 2100)

**Total Credits****24**

<sup>1</sup> Relevant coursework may be substituted with approval from minor coordinator. Please have the syllabus for the course you would like to substitute and find a course description from the electives list on the undergraduate course bulletin (above) that parallels the syllabus. Please email your syllabus and the parallel DU course name, number and description to UAP.wellnessminor@du.edu.

**WELL 1013 Introduction to Wellness Studies (4 Credits)**

This course is designed to help students critically analyze concepts and theories of wellness and to promote wellness in their everyday lives. An emphasis will be placed on the research and application of knowledge and skills to increase personal awareness of health and to promote wellness and quality of life.

**WELL 2013 WLLC: Introduction to Wellness (1,2 Credit)**

This course is designed to help students critically analyze the determinants of wellness and to promote wellness in the everyday lives we lead, both personally and as members of a community. An emphasis is placed on the research and application of knowledge and skills to increase personal awareness of health and to promote wellness in the quality of life in a community. Restricted to Wellness LLC students.

**WELL 2014 WLLC: Community and Social Wellness (1,2 Credit)**

This course helps students explore their own perspectives and identities in terms of community and social wellness. Students explore different facets of the community from a development approach to analyze critically what determines the relationship between community wellness and social wellness across time, the life cycle, socio-economic boundaries, cultures and communities. An emphasis is placed on informed discussion, working together, sensitivity to others' perspectives, and creating greater awareness of our power to effect change in our community and our world. Restricted to Wellness LLC students.

**WELL 2015 WLLC: Spiritual and Emotional Wellness (1,2 Credit)**

This course helps students explore their own perspectives and identities in terms of spirituality as it relates to personal wellness. The course creates opportunities for students to explore different spiritual experiences to analyze critically the relationship between spirituality and wellness across time, the life cycle, various socio-economic levels, cultures and communities. An emphasis is placed on informed discussion, sensitivity to others' perspectives, and creating great awareness in our community. Restricted to Wellness LLC students.

**WELL 2100 Writing for Wellness (4 Credits)**

Mental health problems among college students have increased significantly in recent years, and student depression rates have doubled since 2009. However, a growing body of research suggests that many individuals can improve feelings of wellbeing through a variety of writing practices, including journaling, critical reflection, and expressive writing. Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this wellness course explores current research on wellbeing, and engages students in the role writing can play in personal, academic, and professional wellness. In this course, students explore academic research on writing for wellness, experiment with wellness writing approaches themselves, and design a wellness writing self-study.

## University Writing Program

Office: Anderson Academic Commons, Room 282

Mail Code: 2150 E. Evans Ave. Denver, CO 80208

Phone: 303-871-7448

Email: [writing@du.edu](mailto:writing@du.edu)

Web Site: <http://www.du.edu/writing> (<http://www.du.edu/writing/>)

With our students and partners on and off campus, the Writing Program fosters inclusive, accessible, collaborative, and ethical writing and literacy practices needed in diverse rhetorical contexts.

The Writing Program promotes an understanding of writing as a complex set of rhetorical, multimodal, and multilingual concepts and practices. We facilitate engagement with diverse audiences, genres, epistemologies, and research methods to support ethical, accessible, and culturally sustaining communication in academic, professional, public, and personal contexts.

The Writing Program has responsibility for required first-year writing courses; hosts a thriving writing center that supports individual undergraduate, graduate, and faculty writers, as well as sponsoring workshops, events, and classroom teaching; hosts a Minor in Writing Practices; and is the academic home of the Advanced Seminar Program.

## Writing Practices

### Minor Requirements

The Minor in Writing Practices develops writing proficiencies across a variety of rhetorical situations towards building confident and rhetorically versatile writers. Students will have the opportunity to further their understanding of the origins, cultural influences, evolving technologies, and purposes of writing in diverse settings. The minor is open to all undergraduates who have successfully completed WRIT xx33 and want to hone their writing, further understanding of writing concepts and theories, and demonstrate abilities to employers and others. Students will complete at least 20 credits of courses culminating in a formal portfolio of their work in WRIT 3500.

- WRIT 2000: Theories of Writing (4 credits)
- Two courses from a list of approved Applied Writing courses (8 credits)
- One course from a list of approved Theory, History, or Research in Writing courses (4 credits)
- WRIT 3500: Capstone: Writing Design and Circulation (4 credits)

Students select approved courses from several departments and programs, which offers flexibility and breadth.

Code	Title	Credits
<b>Introduction</b>		<b>4</b>
WRIT 2000	Theories of Writing	
<b>Theory, History, Research in Writing</b>		<b>4</b>
ANTH 2020	Artifacts, Texts, Meaning	
ANTH 3060	Cultural Narratives	
COMN 2150	Rhetorical/Critical Communication Inquiry	
COMN 2300	Fundamentals of Argumentation	
COMN 2400	Landmarks in Rhetorical Theory	
ENGL 2815	Studies in Rhetoric	
ENGL 3815	Studies in Rhetoric	
ENGL 3817	History of Rhetoric	
WRIT 3818	Composition Theories and Pedagogies	
ENGL 3818	Composition Theory	
WRIT 2500	Topics in Writing Theory, History, Research	
WRIT 2555	Diverse Rhetorics	
WRIT 2650	Digital Rhetorics

WRIT 2050	Style and Rhetorical Grammar	
WRIT 2120	Writing for Wellness	
WRIT 2200	Environmental Writing	
WRIT 2400	Editing and Publishing	
WRIT 2600	Travel Writing	
WRIT 2701	Topics in Applied Writing	
<b>Capstone</b>		<b>4</b>
WRIT 3500	Capstone: Writing Design and Circulation	
<b>Total Credits</b>		<b>20</b>

#### WRIT 1022 English for Academic Purposes (4 Credits)

This 4-credit course is designed to facilitate the acquisition of US English for Academic Purposes (EAP) by multilingual students who use English as an additional language. In this class, students will be immersed into the academic world that the University of Denver participates in, to develop proficiency in usage conventions while paying attention to the reading, writing, speaking, and listening skills that are necessary for a student's holistic participation in diverse academic cultures. In addition to classroom instruction and working in the language lab, we will spend a significant amount of time interacting with the community around DU to gain experience communicating in different contexts and rhetorical situations. Students are encouraged to use all resources (including languages they are proficient in) available to them as they work to improve their EAP proficiency.

**WRIT 1122 Rhetoric and Academic Writing (4 Credits)**

WRIT 1122 teaches strategies that are vital in writing for diverse audiences, primarily in situations that require students to present and justify positions. The course teaches rhetorical analysis and practices, the effective use of readings and source materials, and techniques for generating, revising, and editing texts produced to meet specific situations. WRIT 1122 provides sustained practice in writing, with systematic instructor feedback, across multiple assignments and drafts, totaling 3,000-5,000 words by quarter's end.

**WRIT 1133 Writing and Research (4 Credits)**

This course builds on the writing and rhetorical skills learned in WRIT 1122 by shifting attention from general rhetorical strategies to specific rhetorical strategies that shape different kinds of academic inquiry. Through introduction to quantitative, qualitative, and textual research traditions, students identify how written reasoning varies in terms of the questions posed, the kind of evidence used to answer them, and the nature of the audience or forum for the result. In addition, the course teaches how to shape research into substantive academic arguments, with attention to the ethical consequences of their rhetorical choices. Students are asked to develop further their linguistic, design, and reasoning competencies, with added consideration of citation conventions. Students complete at least 20 pages of revised and polished writing, in multiple assignments, as well as numerous additional exercises, in projects requiring library-based research as well as other types. Final portfolio. Prerequisite: WRIT 1122.

**WRIT 1533 Writing and Research (4 Credits)**

This course, designed for transfer students, builds on the writing and rhetorical skills learned in WRIT 1122 by shifting attention from general rhetorical strategies to specific rhetorical strategies that shape different kinds of academic inquiry. Through introduction to quantitative, qualitative, and textual research traditions, students identify how written reasoning varies in terms of the questions posed, the kind of evidence used to answer them, and the nature of the audience or forum for the result. In addition, the course teaches how to shape research into substantive academic arguments, with attention to the ethical consequences of their rhetorical choices. Students are asked to develop further their linguistic, design, and reasoning competencies, with added consideration of citation conventions. Students complete at least 20 pages of revised and polished writing, in multiple assignments, as well as numerous additional exercises, in projects requiring library-based research as well as other types. Final Portfolio. For transfer students. Prerequisite: WRIT 1122 or transfer equivalent and permission of instructor.

**WRIT 1622 Advanced Rhetoric and Writing (4 Credits)**

A writing course for advanced first-year students, emphasizing rhetorical strategies for different academic and civic audiences and purposes; critical reading and analysis; and research. Course sections focus on a coherent set of texts, usually on an issue or theme; contact the Writing Program for specific information each quarter. Students complete at least 20 pages of polished prose in multiple assignments. Final portfolio. Satisfies the same graduation requirement as WRIT 1122. Prerequisite (one of the following): Admission to honors program; score of three or better on AP Language and Composition or Language and Literature exams, or four on the IB English; or specific permission of the director of writing.

**WRIT 1633 Advanced Writing and Research (4 Credits)**

A continuation of WRIT 1622, this is a writing course for advanced first-year students, emphasizing rhetorical strategies for different academic and civic audiences and purposes; critical reading and analysis; and research. The course has a significant research component. Course sections focus on a coherent set of texts, usually on an issue or theme; contract the Writing Program for specific information each quarter. Students complete at least 20 pages of polished prose in multiple assignments. Final portfolio. Satisfies the same graduation requirement as WRIT 1133. Prerequisites: WRIT 1122 or 1622, plus one of the following: either admission to the honors program; score of three or better on AP Language and Composition or Language and Literature exams, or four on the IB English; or specific permission of the director of writing.

**WRIT 1733 Honors Writing (4 Credits)**

Honors Writing is designed for students who will benefit from a particularly rigorous and in-depth experience with language. This class offers a theme around which students read serious and challenging texts, including some primary readings in rhetorical theory, and write at least 25 pages of polished prose, with additional less formal writings. The course offers advanced instruction in rhetorical theory and practice, as well as writing in multiple research traditions in the academy. Class has a highly participatory discussion format and students will have latitude in choosing and directing much of their work. Topics vary from section to section. Required for honors students. Prerequisites: admission to the honors program and either WRIT 1622 or WRIT 1122; or permission of the director of writing, in consultation with the director of honors.

**WRIT 1991 Independent Study (1-4 Credits)****WRIT 2000 Theories of Writing (4 Credits)**

This course introduces a number of theories of writing, providing an overview of complex issues and research into the state and status of writing and writers. It takes up such questions as these: What is writing? Where did it come from? How did it develop—and did it do so the same or differently in other cultures? How do writers develop—and what accounts for differences? What are different types of writing, different situations for writing, different tools and practices—and how do these interconnect? What does it mean to study writing? How have major figures theorized writing, and what tensions emerge among their theories? What are relationships among thought, speech, and writing—and among image, film/video, and sound? How do such theories change our notions of what texts are and what texts do? Students will learn how various theorists, historians, and researchers answer these questions, and they will apply that knowledge to their own projects. Prerequisites: WRIT 1133, 1533, 1633, or 1733.

**WRIT 2040 Memoir and Personal Writing (2,4 Credits)**

In learning to write memoirs, a writer is learning how to analyze memory, select experiences, invent narratives—all while still being "truthful." In this course, students distinguish memoir from other forms of writing about the self, including autobiography, diaries and journals, blogs, and letters. They read excerpts of published memoirs and drafts of memoirs they write during the course, with a particular interest in how these writers shape and represent their experiences textually: how do people construct the stories they tell about their lives? What is the value of personal writing for writers and readers? And perhaps most importantly, how can we begin to create stories of experiences in compelling ways? Students complete multiple writing projects, including at least one polished short memoir.

**WRIT 2050 Style and Rhetorical Grammar (4 Credits)**

Be concise. Don't split infinitives. Write with flow. Don't end a sentence with a preposition. Avoid the passive voice. Never use "I" in academic writing. Everyone has heard these maxims about writing and grammar. This course will interrogate those maxims, and provide systematic ways to draft, revise, and polish prose based on the needs and demands of the audience. More specifically, students consider matters of sentence structure and sentence rhythm, cohesion, and concision, as well as voice and point of view. Through a series of shorter and longer writing assignments, in-class exercises and activities, and course readings, students hone their writing and grammar skills, all with the goal of writing with improved clarity and grace. The course is open to all students who want to take their writing to another level of sophistication, clarity, and range. Prerequisite: WRIT 1122 or permission of instructor.

**WRIT 2100 Internship in Writing and Rhetoric (0-4 Credits)**

The Internship in Writing and Rhetoric provides academic credit for professional or paraprofessional work in applied rhetoric or writing directed by a University Writing Program faculty member, perhaps in collaboration with one of the Program's community partners. Internship opportunities are individually designed as experiences for students who have completed the first-year WRIT sequence, and they require approval from the Executive Director of Writing. Enforced Prerequisites and Restrictions: WRIT 1133, or WRIT 1633, or WRIT 1733.

**WRIT 2120 Writing for Wellness (4 Credits)**

Mental health problems among college students have increased significantly in recent years, and student depression rates have doubled since 2009. However, a growing body of research suggests that many individuals can improve feelings of wellbeing through a variety of writing practices, including journaling, critical reflection, and expressive writing. Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this wellness course explores current research on wellbeing, and engages students in the role writing can play in personal, academic, and professional wellness. In this course, students explore academic research on writing for wellness, experiment with wellness writing approaches themselves, and design a wellness writing self-study. Cross-listed with WELL 2100.

**WRIT 2200 Environmental Writing (4 Credits)**

This writing course examines humanity's relationship with the natural world by developing writing abilities in traditional and emerging environmental genres. Using sustainability and interconnectedness as guiding principles, the course considers the wide range of interactions and encounters that humans can have with nature and place, while also exploring topics that might include climate change, environmental justice, and green rhetoric. Assignments include a range of non-fiction genres that communicate complex ecological concepts, perform advocacy work, or create aesthetic experiences. Prerequisite: WRIT 1122 or permission of instructor.

**WRIT 2300 Professional Writing (4 Credits)**

This course introduces modes and approaches vital to communicating in contemporary workplaces and organizations. As an applied writing course, it covers strategies and requires practice in techniques for composing genres commonly used in professional settings: rhetorically effective emails, memos, instructions, visual data, social media presences, and others. It also includes approaches to document management and communication workflows that support collaboration and composing processes. The course, which fulfills a requirement for the Minor in Writing Practices, is appropriate, beneficial, and open to students from all majors, whether in sciences, humanities, social sciences, the arts, or professional fields.

**WRIT 2400 Editing and Publishing (4 Credits)**

Editors wear several hats: they are readers and writers, researchers, fact-checkers, curators, and deciders. They are coaches and critics. They are gatekeepers and beta readers. The work editors do is partly mechanical—making specific changes to texts in light of recognizable conventions; and it is also intellectual—deciding how and when to apply and adapt those conventions to meet, respect, and challenge the needs of readers and writers. Depending on their responsibilities, editors may also help develop and sustain a publication's mission or vision, communicate with authors and reviewers, design visually effective page layouts and other materials, and create social media and other marketing campaigns attracting readers to the publication. Through hands-on practice with specific publications, primarily campus/student publications, this course teaches several kinds of editing: 1) copyediting texts for consistent, mechanics, and adherence to language conventions within particular publishing contexts; 2) comprehensively editing texts for content, organization, style, design, and relationship to source texts; and 3) editing from the perspective of an academic journal or periodical.

**WRIT 2500 Topics in Writing Theory, History, Research (4 Credits)**

This course provides curricular space for various subjects and foci related to theories about writing, histories of writing and its status and development, or research about writing. Specific offerings of the course will vary according to professor or student needs, interests, and opportunities, and to developing knowledge and research in the field. Examples of possible topics might include multimodality and writing, relationships between visual and verbal rhetoric, the development of specific genres over time, the relationship between academic and civic writing, the history of writing in specific schools or settings, research into the acquisition of writing skills, social policies and practices that affect writing, ethical issues in writing practices, the effects of technologies on writing, and so on. The preceding list is illustrative, not exclusive. Prerequisites: WRIT 1133.

**WRIT 2555 Diverse Rhetorics (4 Credits)**

Rhetoric's origins in classical texts, in the western canon, developed to serve early forms of democracy and civic participation. Despite classical rhetoric's formative impact, plenty of languages and cultures have their own means of persuasion and civic participation. This course introduces ways that rhetoric is practiced in diverse contexts, not as a stable idea, but as an adaptive practice situated in cultures, identities, and languages, bridging writer, audience and purpose. This course starts with classical Western rhetoric, but then explores the varied practices and theories of, for example, African American, Asian, Latinx, Indigenous, and queer rhetorics, to name a few.

**WRIT 2600 Travel Writing (4 Credits)**

Travel writing captures and sometimes invents a place for an audience. We see it expressed in many different genres and purposes, from literary nonfiction, to travel guides, to online reviews. How best can writers convey their experiences of a place as an outsider? What writing strategies are best for creating a narrative of experiences and enticing an audience? This applied writing course involves writing in several genres and for different audiences.

**WRIT 2650 Digital Rhetorics (4 Credits)**

Digital media and online spaces have both introduced and challenged how we write and interact. This course covers contemporary theories and genres of rhetorical practice including network literacies, remix and re-appropriation, theories of social media, sonic, visual, procedural and algorithmic rhetorics. This course emphasizes through theory and practice new rhetorical skills including design thinking, multimedia production, iterative composing, and social media engagement. Prerequisite: WRIT 1122 or permission of instructor.

**WRIT 2681 Reflection & Learning: Making Sense of Your College Experiences (1 Credit)**

Designed for graduating seniors, this course engages reflective practice as a tool for contemplation, growth, and life design. This immersive learning experience provides students space to reflect on their time at the University of Denver, and explore ways to interpret and transfer learning to future experiences and contexts. The one-day short course takes place dually on the DU main campus and the Kennedy Mountain Campus. Course activities are informed by each location, with students invited to practice reflection among the panoramic views and scenic habitats of the mountain campus, and consider critical transitions that occurred during their time in Denver. By exploring reflective theory (in a multitude of disciplines), students will learn ways reflection enhances communication and knowledge transfer in a variety of contexts. Students will read, write, and reflect as part of this course and develop a multi-modal project at its conclusion.

**WRIT 2700 Collect, Select, Reflect: Learning through ePortfolios (2 Credits)**

This course focuses on developing an ePortfolio through an intentional reflective framework, to foster meaningful connections across students' experiences (academic, co-curricular, and community) that help develop critical thinking skills and the ability to be reflective practitioners. It focuses on three portfolio elements: artifacts (things the maker has created, including papers, projects, recordings, presentations); reflection and interpretation (the analysis of artifacts selected, the nature of learning); and design (skillfully and engagingly presenting the portfolio to an audience). Students create an electronic portfolio, learning to use different kinds of platforms and tools. The course presumes no technical knowledge or experience with those tools.

**WRIT 2701 Topics in Applied Writing (4 Credits)**

Individual offerings of this Topics course teach skills and strategies for writing in a specific professional or public context or for improving in a specific type of writing. The focus is on the texts, genres, conventions, habits, and critical questions salient to writers in a given situation. Each offering will focus on a topic not available in existing courses. Benefitting the course, the primary writing focus will be on producing texts for/within the topical focus, with emphasis on drafting, revision, and design. Students will also write responses to and analyses of assigned readings (including the work of other students). Prerequisites: WRIT 1133 or permission of the Executive Director of Writing.

**WRIT 2800 Community Writing (4 Credits)**

Writing plays an integral role in advocacy, civic responsibility, and engagement between and among groups. This course explored the history and theory of community writing, including the rhetorical constraints and opportunities afforded to writing with/for/in communities. The course includes opportunities to practice and analyze different rhetorical situations, such as writing for nonprofits, writing with community partners, grant writing, theories of community-engaged writing, writing for the public good, and community-engaged writing research. The course may count as one of the applied courses in the Minor in Writing Practices. Prerequisite: WRIT 1122 or permission of the Executive Director of Writing.

**WRIT 2900 Life Back from Abroad (1 Credit)**

This course focuses on life back from abroad – generating understanding(s) about integration back into American culture, specifically life at the University of Denver. This will be a pop-up style course which means it will meet for 10 hours, 1 evening a week. The course will have an intentional focus on reflection as a way to foster meaningful connections across cultural learning experiences. The final project's focus on an artifact students "collected" while abroad – a blog they created, a series of images they took, a video they made, etc. – and they will revise it to add to their ePortfolio.

**WRIT 2910 Undergraduate Peer Tutoring in Writing (4 Credits)**

Helping others to write is a collaborative process that can help tutors—as well as writers—to enhance their writing practices and their rhetorical skills and flexibility. This course entails participating in conversations about writing in and beyond the University Writing Center. The complexities of learning how to write motivate entire fields of study, from rhetoric and composition to literacy, genre, and writing center studies. The course features broad reading in these fields to develop a repertoire of lenses and strategies for working with writers in diverse disciplines. It introduces literacy and learning theories; revision strategies; ethical considerations in writing and tutoring; methods of tutoring; tutoring roles and responsibilities; working in genres across academic disciplines; and writing center history. Students regularly observe, analyze, and reflect on tutoring sessions at the University Writing Center and develop their own tutoring practices. Students who successfully complete this course will be invited to apply to work at the University Writing Center. Prerequisite: WRIT 1133 or permission of instructor.

**WRIT 3500 Capstone: Writing Design and Circulation (4 Credits)**

The primary goal of this capstone course for the Minor in Writing Practices is to create and present a professional electronic/web-based portfolio synthesizing university writing experiences. The portfolio showcases and offers reflective insight into a student's writings, demonstrating the writer's ability to navigate diverse rhetorical situations. Students will learn theories and practices for selecting, arranging, and circulating/publishing written work, culminating in a required portfolio that synthesizes their university writing experiences. In addition to practicing principles of editing and design, students will produce a substantive revision of a previous piece of their own writing. The course covers design considerations and strategies and offers studio time for peer and instructor feedback. It culminates with a public showcase. Prerequisites: WRIT 2000 and completion of at least two other courses in the Writing Practices minor.

**WRIT 3600 Black Studies Capstone (4 Credits)**

This capstone course is designed for students completing the Minor in Black Studies at the University of Denver. The primary goal of this course is to create an original capstone project that demonstrates synthesis of their study in the field and deepens their skills in research. Black Studies minors should plan to enroll in BLST 3XXX after completing all course work for the minor. As part of this capstone course, each student will complete a capstone project, of their own design, that explores some aspect of Black/African American life, history, culture, or experience. This course encourages creative capstone projects that allow students to present their work in a form other than the standard written thesis model. This course will guide the capstone projects for students conducting intensive research on topics in Black Studies. Drawing from disciplinary and interdisciplinary methodologies, theories, and concepts in the humanities and social sciences, capstone project topics will cover broadly defined themes in Black Studies such as the effects of Atlantic slavery on the United States, the Americas, Africa, and Europe; the Black freedom struggle in the United States; and women, gender, and sexuality in Black America. Through a collaborative learning process, students will define clear project objectives, refine their analytical skills, effectively engage major issues in their research materials, and make critical intellectual interventions. Students will be encouraged to critically explore topics from courses they have taken in Black Studies and related disciplines as topics for their capstone research projects.

**WRIT 3818 Composition Theories and Pedagogies (4 Credits)**

This course focuses on the vast body of theory, research, and practice in the discipline of Composition Studies, primarily focusing on developments since 1963, though with some attention to the field's roots in classical, medieval, and modern rhetoric and in 19th American universities. Course topics include rhetoric and composition, cognitive development and composition, social theories of writing, process theories and research, contemporary threshold concepts in writing, linguistics and writing, digital and multimodal composition, research design, writing across the curriculum, writing pedagogies, assessment, theories of literacy (including race, class, and gender implications), and some relationships between composition and related areas of writing studies. Prerequisite: WRIT 1133.

**WRIT 3991 Independent Study (1-4 Credits)**

Independent Study.

**Faculty**

**Brad P. Benz**, Teaching Professor, PhD, University of Washington

**Russ Allen Brakefield**, Teaching Assistant Professor, MFA, University of Michigan Ann Arbor

**Sheila Carter-Tod**, Associate Professor and Executive Director, PhD, Virginia Tech University

**Jennifer Campbell**, Teaching Professor, PhD, Auburn University

**Libby Martin Catchings**, Teaching Associate Professor, PhD, University of California

**April Dawn Chapman-Ludwig**, Teaching Associate Professor, MA, Illinois State University

**Richard J. Colby**, Teaching Professor, PhD, Bowling Green St Univ Fireland

**David J. Daniels**, Teaching Professor, MFA, Indiana University

**Robert Donald Gilmor**, Teaching Associate Professor, PhD, University of Denver

**Sarah Elizabeth Hart-Micke**, Teaching Professor, PhD, Texas A&M University

**Matthew A. Hill**, Teaching Associate Professor, MA, Washington State University

**Veronica House**, Teaching Associate Professor, PhD, University of Texas at Austin

**Megan Jensen Kelly**, Teaching Professor, MA, University of Washington

**Kamila Kinyon**, Teaching Associate Professor, PhD, University of Chicago

**Catherine A. Marotta**, Teaching Assistant Professor, PhD, Wisconsin International University

**Heather N. Martin**, Teaching Professor, PhD, University of Denver

**Logan P. Middleton**, Teaching Assistant Professor, PhD, Illinois State University

**Alfred L. Owusu-Ansah**, Teaching Assistant Professor, PhD, Michigan Tech University

**Juli Jean-Marie Parrish**, Teaching Professor, PhD, University of Pittsburgh

**LP Picard**, Teaching Professor, MFA, Emerson College

**David John Riche**, Teaching Associate Professor, PhD, Louisiana State University

**Rebekah E. Shultz Colby**, Teaching Professor, PhD, Bowling Green State University

**Angela R. Sowa**, Teaching Professor, PhD, Texas Women's University

**Geoffrey L. Stacks**, Teaching Professor, PhD, Purdue University

**Jesse J. Stommel**, Teaching Assistant Professor, PhD, University of Colorado Boulder

**Kara Taczak**, Teaching Professor, PhD, Florida State University

**John S. Tiedemann**, Teaching Associate Professor, MA, University of Wisconsin - Madison

**Olivia Renee Tracy**, Teaching Assistant Professor, PhD, University of Denver

**Nicole M. Turnipseed**, Teaching Assistant Professor, PhD, Urbana University

## University College Bachelor of Arts Completion Program

Most majors, and some minors, may only be pursued in conjunction with specific degree programs. The Degrees and Programs of Study (p. 33) section of this bulletin lists possible degree and major/minor combinations. Students must meet overall requirements for their degree as well as specific requirements outlined in majors and minors.

## Common Learning Experience

Office: University College Student Support Center  
Mail Code: 2211 S. Josephine St., Denver, CO 80208  
Phone: 303-871-2291, 800-347-2042  
Email: [ucol-support@du.edu](mailto:ucol-support@du.edu)  
Web Site: <http://www.universitycollege.du.edu>

The Common Learning curriculum includes ten carefully selected courses in five areas where students can sharpen their skills and develop essential knowledge needed for thriving in the knowledge age. The common learning courses are a set of interdisciplinary courses for people who have been in the working world and are highly motivated. Interdisciplinary simply means that the perspectives and materials of several disciplines have been brought together in the design of each course. These courses provide a common foundational experience for instruction in advanced courses. The Common Learning Experience will help students learn how to learn, think critically, and improve communication skills, which will serve them in their future academic and professional careers.

### CA 2050 Effective Communication (4 Credits)

In this course, students develop communication competence while applying communication skills that are both effective and appropriate in diverse contexts. The focus of the course is on developing skills that lead to improved collaborations, organizations, and relationships as well as improved presentation of persuasive arguments using credible supporting evidence. By fostering understanding of communication competency, as well as how communication shapes identity, perception, and culture, the course strives to enable students to better navigate complex personal and professional worlds.

### CA 2100 Creativity and Innovation (4 Credits)

Everyone has a creative core. It can become hidden or lost, but the ability to recognize one's creative source and tap into it provides an increased range of communication options. This course focuses on analyzing approaches to the creative process, as well as cultivating best creativity practices for use in professional and personal life. Students will learn about the significant creativity theories of prominent creativity scholars. Also, course participants will explore the association between adult playful personality and individual, as well as organizational creativity. The experiences and activities of this course build skills and confidence in using creativity and innovative thought in a variety of disciplines.

### CA 3050 Media and Society (4 Credits)

This course provides a critical examination of media forms and their impact on society. The representation of culture through print media (books, magazines, newspapers, and online media) and through various visual media (film, television, Internet) is explored. Students learn how informational, entertainment, literary, and commercial messages are crafted and transmitted. The focus is on messages, the institutions behind the messages, and their impact on society.

**CA 3100 Cross-Cultural Communication (4 Credits)**

In an increasingly global society and a world of growing international interaction, communicating effectively with people of different cultural and ethnic backgrounds becomes a challenge but also an opportunity. The ability to accept and transcend differences has personal and professional transformative powers. This course explores a range of communication concepts and theories such as cultural competency, identity theory salience, and the nature of prejudice and its impact on communication. Students have the opportunity to develop and practice skills and abilities that enhance sincere, sensitive, and effective communication across differences.

**CA 3150 Effective Presentations (4 Credits)**

Researching and refining ideas and then representing them effectively are indispensable skills. This course focuses on crafting effective written and spoken presentations that employ appropriate organizational, visual, and physical elements. Students have opportunities to select visual elements such as images, graphs, and charts; to address physical considerations such as voice, gesture, and body language; and to relate text, movement, and visuals in effective professional presentations. Students learn to use PowerPoint and other graphic presentation software in crafting and supporting presentations.

**CA 3200 Art and Interpretation (4 Credits)**

Students will learn to describe, analyze, and interpret visual imagery with a specific focus placed on understanding and examining various forms of contemporary art and digital media. Students will cultivate expanded visual literacy skills for understanding and evaluating digital culture and become critical consumers of visual media. Students will leave this course with tools and concepts for art interpretation and its application that can be applied to new and emerging media, across fields, and in everyday life.

**CA 3250 Visual & Physical Communication (4 Credits)**

How does body language reveal or conceal true intent? Humans appear to be "hard-wired" to assess, examine, and respond to the physical language of others. Although this process is often automatic or unconscious, people can learn to identify visual signs and employ the elements of physical rhetoric (posture, stance, bearing, expression, and gait) in conscious ways to persuade others. This course will explore the body's physical response to certain triggers like anxiety, anger, and stress and how those triggers manifest outwardly. Students will examine strategies for reading physical signs in others and for managing their own physical and visual language. Students will learn techniques for performing nonverbal language, gaining tools for communicating leadership, power, acceptance, openness, and other nonverbal behaviors that impact communication in professional settings.

**CA 3300 Communication for Challenging Situations (4 Credits)**

This course moves beyond core communication mechanics to applying communication skills in interpersonal and professional settings that reflect a culturally complex and global world. Students will explore communication constructs relative to a variety of audiences and use this knowledge to achieve the desired communication outcomes. In addition, the ability to lead and participate effectively in individual and group conversations requires the knowledge and selection of communication processes including strategies and techniques such as conflict resolution, facilitation, dialogue, debate, and negotiations. Students will become better prepared to manage difficult conversations in multiple settings.

**LOS 1000 Frontline Manager Leadership Essentials (5 Credits)**

The course delivers foundational leadership and management skills necessary to succeed in a first management position and incorporates extensive one-on-one learner coaching. The core concepts for this course include the following: Understanding oneself as a leader, including styles of leadership; strengthening relationships by understanding others, including diversity, equity, and inclusion; professional communication skills (oral, written, listening); delivering and receiving feedback and coaching employees; transitioning from a peer to a leader/manager role, developing a robust and inclusive team culture; building and motivating a high-performance team; and hiring, onboarding, and individual performance management. Practical experience and application of content form the student experience. Students leave with a professional leadership development plan for implementation in their front-line manager roles.

**LOS 2025 Leadership Development in Action (4 Credits)**

Developing effective and successful leadership competencies is a lifelong endeavor that begins with the self and evolves throughout our career journey. In this course, inclusive leaders will be examined, including core leadership competencies and practices that may vary due to the organizational culture and structure. Students will identify core behaviors and practices along with effective communication skills and problem-solving tools to effectively move an organization forward. Students will assess their own leadership competencies and areas for growth to construct a personal leadership development plan.

**LOS 2050 Organizational Behavior (4 Credits)**

Organizations serve as the fundamental building blocks of society. Most people spend hours of time weekly working in organizations. This course focuses on organizational structure and design by uncovering the dynamics of individual, work group/team and corporate behavior. Through reading, case studies and interaction, students learn about decision-making, problem-solving, patterns of interaction and facilitation of change.

**LOS 2100 Leadership (4 Credits)**

What is leadership and how do leaders lead? Can leadership be learned? What skills do 21st-century leaders need? This course provides an opportunity to examine leadership theories, to develop a personal understanding of leadership, and to explore the relations of leaders and followers. The essential skills of effective leaders are explored, such as elaborating a vision, facilitating communication, working with diversity in organizations, shaping an ethical climate, and facilitating change. Students will be encouraged to examine systematically their own leadership potential as they reflect on historical and contemporary examples of effective business and political leaders as well as leaders of causes and social movements.

**LOS 3050 Financial Management (4 Credits)**

All organizations, businesses, governments, and not-for-profits must deal with financial matters. This course provides opportunities to learn how to read and use financial data in order to develop systems for budget creation and control, profit forecasting, and long-range development. Basic principles of accounting, cost analysis and control, revenue and expense forecasting, return on investment, and capital reinvestment are studied and applied to examples. The leader's roles in financial management are examined, including technical, conceptual, and value considerations.

**LOS 3100 Leading with an Entrepreneurial Mindset (4 Credits)**

Many people dream of being their own boss or starting their own business. This course explores the challenges of entrepreneurship, both starting a new business and bringing the entrepreneurial mindset to a large organization. Students examine the basic processes underlying entrepreneurship, including idea generation, prospect assessment, cost analysis, creating buy-in, and launching the product or service. Examples of successful and unsuccessful entrepreneurs will be examined to identify common patterns. Students will study and discuss entrepreneurship as a set of skills, values, and attitudes, and are invited to consider how they can apply entrepreneurship as a life skill.

**LOS 3150 Leading Groups and Teams (4 Credits)**

All teams are groups, but not all groups truly function as teams. Successful organizational leaders recognize the differences and are adept at strategically creating diverse groups and teams to accomplish organizational goals. This course offers applied leadership strategies addressing the various types of teams, principles of team behavior, strategies for avoiding team dysfunction, effective team leadership, and leveraging interpersonal strategies and organizational resources to ensure collaboration, synergy, and effectiveness.

**LOS 3200 Cross-Cultural Leadership (4 Credits)**

This course examines the leadership dynamics of culture, including but not limited to gender, socioeconomic status, race, religion, and social values at a global level. The purpose is to allow for the students to understand cultural competencies and give them the ability to manage in a diverse workforce in our twenty-first-century global society. #Because most successful companies recognize the value of workplace diversity and its impact on organizational effectiveness, many invest considerable time and resources into the development of cross-cultural leadership. #This course explores the dynamic subject of cross-cultural leadership from multiple perspectives, using both domestic and international lenses for inquiry. #It examines the related concepts of organizational communication, culture and cultural awareness, conflict resolution, and inclusive business systems. Students will learn about leadership prospects and examine how cooperation among different cultural backgrounds lead to the achievement of common goals. Students will explore best practice models that address cultural differences in the professional and personal space. Additionally, they will learn how to adapt, communicate, and think critically in professional and personal settings.

**LOS 3250 Learning in Organizations (4 Credits)**

Accelerating change in society and in organizations#challenges individuals and the organization as a whole to engage in a process of continuous learning. #In this course, basic concepts of individual and organizational learning are explored both in terms of their intrinsic value to individuals and as the source of competitive advantage to the organization. #How is learning conceived of and structured throughout organizations? #How is the return on investment in learning evaluated? #This course provides an overview of what organizations do for the training and development of employees, how they structure knowledge sharing, and how they institutionalize within the organization the knowledge of its members through effective knowledge management practices.

**LOS 3300 Project Management (4 Credits)**

Work in organizations, or in the collaboration among organizations is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have deliverables that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management including how to establish standards of performance, allot time, calculate costs, develop work-break-down structures, and delineate critical pathways. Students also learn about software tools available to plan and track successful projects to completion. Work in organizations, or in the collaboration among organizations, is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have "deliverables" that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management: how to establish standards of performance, allot time, calculate costs, develop work breakdown structures, delineate critical pathways, enlist people and resources, and motivate accomplishment.

**LOS 3325 Applied Project Management II (3 Credits)**

This applied project management course is a continuation of concepts learned in LOS 3300 Project Management and focuses on project management strategies and tactics, including understanding data, tracking, and software used to manage projects. A project will be managed from conceptualization to evaluation. Students must register for a corresponding lab section. Prerequisite: LOS 3300.

**LOS 3326 Applied Project Management II Lab (1 Credit)**

Taken in conjunction with LOS 3325 Applied Project Management, this course provides students with hands-on use of project management tools to execute projects related to their major. Students focus on real-world examples, best practices, and have the opportunity to develop, deploy, and evaluate project management tools and technologies. Prerequisite: LOS 3300.

**PPSS 2050 Ethical Decision Making (4 Credits)**

Ethical decision making is essential for values-based leadership. Most decisions have ethical implications, but discerning the ethical dimension requires skill and an understanding of how ethical issues are shaped and informed by ethical theory. In this class students encounter theories from the field of ethics such as utilitarian, deontological, social contract, communitarian, and natural law. Students also interact with major philosophical concepts such as principles of non-maleficence; beneficence; justice and respect for persons; and virtues of care, compassion, integrity and courage. Through the use of case studies, students cultivate their capacity for ethical perception, learn to distinguish tough choices from genuine ethical dilemmas, and gain practice deliberating effectively about a variety of ethical issues drawn from both social and professional contexts.

**PPSS 2100 Concepts of the Public Good (4 Credits)**

All societies have to deal with natural and social inequalities, tension between individuality and community, and competing concepts of what constitutes the good society. What are the forces that create differing concepts of the public good and how are conflicts between competing visions settled? Case studies from cross-cultural research as well as historical and current examples from United States culture are used to explore the role of power, class, and group identification in shaping ideas of the public good. An important focus of this course is on understanding how concepts of the public good translate into structures that provide or limit the provision of social services.

**ST 2050 Scientific & Critical Thinking (4 Credits)**

Using scientific topics drawn from the headlines, the following questions will be addressed: What is the scientific method and how is it used appropriately? How are problems formulated, research questions designed, tests, and other measurements constructed, data gathered and analyzed, conclusions drawn, and findings incorporated into theories? In addition, critical thinking processes and models of decision-making and problem-solving will be discussed. The suitability and effectiveness of critical-thinking models in achieving positive organizational outcomes will be emphasized.

**ST 2100 The Digital Age (4 Credits)**

Digitization influences nearly all aspects of life today: how we communicate, conduct business, operate governments, and how we behave as consumers. This course provides opportunities to explore controversies and ethical dilemmas spawned by digitization. Students also reflect on how digital technologies are transforming our world and create a plan for the future.

**ST 3050 Quantitative Reasoning (4 Credits)**

Numbers provide a language for reasoning. Numbers are used to quantify data, analyze trends and exceptions, and establish the reliability of conclusions. Using practical problems from business, health care, social services, and government operations, this course provides the opportunity to learn how basic concepts from mathematics can be applied in organizational settings.

## Communication Arts

Office: University College Student Support Center  
Mail Code: 2211 S. Josephine St. Denver, CO 80208  
Phone: 303-871-2291, 800-347-2042  
Email: [ucol-support@du.edu](mailto:ucol-support@du.edu)  
Web Site: <http://www.universitycollege.du.edu>

A bachelor's degree in the field of communication provides students with the skills and strategies needed in the business world, such as creating and delivering effective presentations, crafting a well-reasoned argument, and building and enhancing dialogue between people and groups. The Bachelor of Arts in Communication Arts prepares graduates to solve problems, resolve conflict, and increase communication options. A communication degree allows students to explore how the media, entertainment industry, and commercial institutions affect individuals and society. In addition, students will enrich their understanding of verbal and non-verbal communication, such as writing, speaking, and visual images and movement; and students will learn how to use art, photographs, and other media in presentations. Students complete their bachelor's degree with a major in communication arts to improve written and verbal skills for personal and professional development. The communication degree requires an integrative project, in which students will synthesize their studies and demonstrate their communication skills. Classes are available as hybrid and/or online.

This degree prepares students to:

- Demonstrate effective and persuasive oral, written, and non-verbal communication techniques using tone and principles appropriate to the audience.
- Apply communication theory and principles to formulate well-organized arguments in writing and speaking that contain a clear purpose, relevant content, and a conclusion that directly reflects the purpose and strength of the content.
- Employ art, photographs, and other visual media for appropriate use in communication strategies.
- Use appropriate techniques and strategies to increase communication options in groups and teams.
- Analyze media messages identifying and explaining a variety of possible differences such as bias, inclusion and exclusion of information, source, and type of presentation media.

 Email: ucolsupport@du.edu  
 Web Site: <http://www.universitycollege.du.edu>

Students interested in international relations learn how social, economic, and political issues across national boundaries become global issues with a bachelor's degree in Global Studies at University College, where classes are available as hybrid and/or online. Degree seekers will examine the interface of economics and politics at the global level and question whether we are moving toward a world of one strong global culture or many local ones. This Bachelor of Arts Completion Program major encourages students to analyze theories of internationalization and make sense of globalization and international relations. Degree-seeking students will work with concepts drawn from history, geography, and international studies to understand how the world came to be the way it is. Students will also examine how an individual's identity is shaped, both as a citizen of an individual nation and as a citizen of the world. Bachelor's completion students complete a global studies integrative project that expands their perspective of globalization, allowing them to further explore another area of the world through research and writing.

This degree prepares students to:

- Demonstrate effective and persuasive oral, written, and non-verbal communication techniques using tone and principles appropriate to the audience.
- Apply relevant program theory and principles to formulate well-organized arguments in writing and speaking that contain a clear purpose, relevant content, and a conclusion that directly reflects the purpose and strength of the content.
- Define and discuss globalization in terms of business, culture, government, legalities, and major issues.
- Define culture and assess cultural differences.
- Research cultural traditions and regional histories to holistically describe and work within another culture in a context of global affairs.

## Global Studies

**GS 2050 21st Century Global Issues (4 Credits)**

Certain problems migrate across national boundaries to become global issues. Global issues related to population growth and the movement of people, energy use, environmental impact, the spread of disease and hunger, and the control of weapons of mass destruction are all examples of challenges that must be addressed by all nations. This course guides students through the complex process of understanding how certain global issues are addressed (or unaddressed) by nation states, international organizations, and non-governmental organizations. Students learn processes to identify these global issues and apply those methods through group and individual projects. Students will be encouraged to reflect on how these issues may affect them personally and how to formulate strategies to deal with transnational problems.

**GS 2100 The Past as Prologue (4 Credits)**

The present-day character of the world's major regions—Africa, Asia, the Middle East, Europe, and Latin America—has been shaped by centuries of history, not only specific events such as wars, elections and peace treaties but also long-term developments in culture, language, religion and politics. This course provides a framework for thinking about general historical trends in selected regions of the world, while emphasizing case histories of countries in each region. By examining these national histories, students not only deepen their knowledge of key regions around the world, but also gain analytical skills that enable them to continue learning about other cultures and societies, and the many ways in which the past shapes the present.

**GS 3050 Economics and Finance (4 Credits)**

This course begins with a review of fundamental economic concepts, such as supply and demand, cost analysis, money and banking, saving and investment, and the nature and limitations of markets. The emphasis is on how basic economic factors influence all types of organizations and what organizations do to manage their financial affairs through budgets, financial controls, investments, and collaborations with other organizations. The role of international and financial institutions, such as the World Trade Organization, World Bank Group, and International Monetary Fund, will be examined. How globalization has altered the economic and financial arrangements between countries is also explored. Students learn to utilize economic and financial tools to identify and analyze international business opportunities.

**GS 3100 Understanding International Trade (4 Credits)**

Basic concepts of international economics are reviewed to explore how economic factors, such as exchange rates, balance of payments, inflation, labor, tariffs, and the flow of capital, affect trade. Using existing data sources, students explore what countries and regions trade with each other, to what extent, and in what products and services. Students analyze the international trade interactions of a particular state, country, or region, as well as the historical and current factors that impact these patterns. Students explore legal constraints to engaging in international trade, such as requirements for export licenses and screening for individuals and countries where trade is illegal.

**GS 3150 Global Politics (4 Credits)**

What will the global political landscape look like in the next 10, 25, 50 years? Which countries will dominate the political order? Will there be any dominant Superpowers, or will power be distributed among a variety of nations? In this course, students examine the shifting role of government as the world becomes more interconnected through global trade, communication, and travel. Historical theories of international relations are contrasted with new theories that attempt to describe the complex interdependence between countries. What strategies do nation-states employ to advance their global interests? How do nation-states and international organizations interact? What is global governance? In addition to answering these questions, this course also focuses on the changing role of people, of non-governmental organizations (NGOs), and of multinational businesses in this interconnected world.

**GS 3200 Global Peace & Security (4 Credits)**

Conflict abounds as do issues of safety and security in a global society. This course begins with a short history and theoretical understanding of global conflict and security issues in exploring paradigms of identity, difference, and otherness, including the rise of extremism. From there, students explore the impact that global conflict and security have on the following shared human experiences: economic, humanitarian, political, religious, cultural, and environmental/health. The content of the course is framed by a shared need to infuse more sustainable forms of diversity, equity, and inclusivity into the peace creation and safety needs of our global society in building greater ways to create awareness, empathy, and cooperation across nations and cultures.

**GS 3250 Society Through Novels and Film (4 Credits)**

Artistic modes of expression such as film and literature offer a lens for understanding the forces and concerns that have shaped and are continuing to shape, countries, regions, and peoples. Literary and artistic movements arise because of the particular confluence of history and the creative choices of artists, reflecting the issues that are at the vanguard of the times. Students analyze key works of literature and film in order to learn how these works can provide a concrete understanding of society's cultural values and political events. Simultaneously, students learn how their own values and history, as well as their assumptions about artistic creators and observers, are present in their interactions with the work being studied and how these factors affect their understanding of the region, area, or people they wish to study.

**GS 3300 Human Geography (4 Credits)**

Human geography analyzes people and places and how they interact across broad expanses of history and multi-continental distances. This course examines the roles geography and humanity have played in shaping one another in space and time. This course pays special attention to how and why cultures have developed in particular spaces. Global, regional, and national factors are emphasized in considering how a specific place shapes one's identity, values, and traditions. This course also provides an introduction to GIS mapping and considers issues of global health, eco-refugees, climate change, poverty, sustainability, war, and economics. Students gauge the influence of media and governments on issues of geographic importance.

**GS 3800 The Puerto Rican Paradox: Challenges and Opportunities in Uncertain Times (4 Credits)**

The Commonwealth of Puerto Rico is a tropical paradise boasting vibrant communities, rich cultures, and abundant natural resources. Once coined a “natural jewelry box” by the BBC, Puerto Rico offers sparkling turquoise waters, bioluminescent bays, lush mountainous terrain, and colorful colonial architecture. It is also plagued by a debilitating debt crisis, political corruption, and a crumbling infrastructure, which, particularly in the aftermath of hurricanes Irma and Maria, have caused many residents to flee the island in search of better opportunities and more stable living conditions. In this course, students will examine the paradox that is Puerto Rico. Drawing from literature on culture, history, power, and politics, students will research a topic of their choosing, with the professor’s approval. They will then work with local communities in Puerto Rico on a project of mutual interest and importance, culminating in an approach or proposal for addressing the issue(s) at hand. Students will be required to spend 5 days on-site in Puerto Rico, plus any necessary travel time. This course will give students broad exposure to the history and culture of Puerto Rico, in addition to a nuanced understanding of a specific industry, issue, or problem. It will additionally highlight the power, privilege, and oppression that exists in our own backyards on this U.S. Commonwealth island.

## Healthcare Administration

Office: University College Student Support Center  
 Mail Code: 2211 S. Josephine St. Denver, CO 80208  
 Phone: 303-871-2291, 800-347-2042  
 Email: [ucolssupport@du.edu](mailto:ucolssupport@du.edu) ([ucolssupport@du.edu](mailto:ucolssupport@du.edu))  
 Web Site: <http://www.universitycollege.du.edu>

Typically, a bachelor’s degree is essential for those in the healthcare industry. The Bachelor of Arts Degree Completion program is posed to allow adults who have some college education but no degree to return to school as a Healthcare Administration major to gain the necessary knowledge, skills, and abilities to fill the gaps in the healthcare employment sector.

The mission of the Healthcare Administration major is to develop healthcare professionals that have the foundational knowledge of understanding healthcare from the 4P perspective: patient, provider, payer, and population. Like all University College programs, the Healthcare Administration major will emphasize a broad understanding of context and focused development of skills through practical courses taught by professionals currently working in the field.

This degree prepares students to:

- Use independent and collective inquiry when creating health industry projects and papers as well as when participating in practicums or internships.
- Evaluate theories and approaches to practices and systems to solve complex problems in the health industry.
- Frame problems and controversies in the health industry through an ethical lens to construct coherent arguments in writing and oral presentations.
- Analyze quantitative and qualitative information to develop reasoned conclusions and create solutions in the health industry.

## Healthcare Administration

# MASTER OF SCIENCE IN HEALTHCARE MANAGEMENT AND BACHELOR OF ARTS IN healthcare administration (BACHELOR OF ARTS COMPLETION PROGRAM)

Undergraduate-level credits required with the dual degree: 172

Undergraduate credit reduction with dual degree: 8 credits from the original 180 required for the undergraduate degree

Graduate-level credits required with dual degree: 48

Graduate credit reduction: 0

Minimum number of credits required with dual degree: 220

All students pursuing the dual BA in Healthcare Administration (BA Completion Program)/MS in Healthcare Management are required to complete all degree requirements for both the BA and MS degrees.

Master of Science in Healthcare Management

[Admission Requirements \(http://bulletin.du.edu/graduate/schoolscollegesanddivisions/universitycollege/healthcareleadership/#admissionrequirementstext\)](http://bulletin.du.edu/graduate/schoolscollegesanddivisions/universitycollege/healthcareleadership/#admissionrequirementstext)

## **BACP 2050 Writing Workshop (4 Credits)**

Course Description: The Writing Workshop re-introduces students to skills essential for successful university study as well as workplace writing. This is not just an "academic" subject. It is also important to career development and confidence in the workplace. This course focuses on knowledge and skills of expression that bring university study and workplace experience closer together. It deals with close reading, identifying and assessing arguments in texts and other media, approaches to note-taking, and the effective annotation of potential sources; quoting sources accurately and ethically while integrating the quoted material into one's own writing; creating accurate and ethical summaries and paraphrases; demonstrating a university-level grasp of grammar, mechanics, and style; and giving clear, actionable feedback to fellow student writers with the aim of helping them improve their work.

## **BACP 2075 Data Concepts and Structures (4 Credits)**

This course will cover the basics of data to include data concepts, terminology, and literacy. Students will learn what typical data sets are, how data relationships work, and where data is stored. These concepts will be the basis for data analysis using commonly available tools and techniques.

## **BACP 3350 Directed Research (4 Credits)**

Directed Research introduces students to academic research with focus on developing substantive academic arguments. In this course, students select a topic from their majors to research and produce an argumentative research paper. This course focuses on several aspects of the academic writing and research process. Students will apply critical thinking, identification, assessment, and application of arguments in academic work. They will practice developing claims, annotating sources, and integrating effective and accurate sources into one's own writing. This course also emphasizes appropriate use of collegiate-level grammar, mechanics, and style, and correct use of Turabian Author-Date style citations and University College format requirements.

## **BACP 3400 Civic Engagement (4 Credits)**

Because education has social as well as personal benefits, it carries with it opportunities and obligations for civic engagement. Most people have some desire to be of help to others, but knowing how to help without interfering or being condescending often requires cultivated sensitivity. The Civic Engagement project provides students with an opportunity to identify a community need, learn how that need is or is not being addressed, and get engaged in a particular set of service activities for an agreed upon duration of time. Students may receive help with finding appropriate settings through DU's Center for Community Engagement and Service Learning. Online students receive help in how to identify service learning opportunities in their local communities or through their employers. Students are expected to keep and submit a reflective log on the nature of their activity and the learning they have derived from it.

## **BACP 3450 Integrative Project Design (4 Credits)**

Through this course, students create a project design for their integrative project which is conducted and completed in BACP 3500. This course, along with BACP 3500, emphasizes B.A. Completion Program learning objectives: creativity, critical thinking, knowledge utilization, decision-making, empowerment, and effective communication. Students design a research-based project, which, when the project is completed, illuminates the problem and argues for a set of activities addressing the issues and proposing a possible solution. In doing so, students draw on theories, concepts, and knowledge from several different courses in their major. Students complete the design document for the Integrative Project Report including the identification and definition of the problem, purpose of their project, setting/context for the project, an extensive literature review outline, preliminary methods of investigation, and a timeline for completion. Students leave the course prepared to begin the Integrative Project.

**BACP 3500 Integrative Project (4 Credits)**

Students in all majors design, complete, and submit an integrative project. The project comprises implementation of the project design developed in BACP 3450. The integrative project requires: clear problem definition; gathering high-quality relevant evidence; analyzing and evaluating evidence, data, and information; developing findings (e.g., conclusions, recommendations, decisions, results, observations, inferences, solutions, etc.); and crafting arguments to explain how and why these findings were reached, and why the findings are valid. The project focuses on utilizing background knowledge or skills developed throughout the BACP, integration of evidence, applying critical thinking skills, and presenting a coherent and persuasive culminating academic paper. The emphasis is on combining several concepts, types of knowledge, and skills learned through the B.A. Completion Program to address a specific challenge. Through this project students learn how multiple perspectives can be integrated to create useful solutions to defined problems.

**BACP 3980 Internship (0-4 Credits)**

The Bachelor of Arts Degree Completion Program Internship is designed to offer students a purposeful experience in a practical, industry-related setting. The internship is an individualized learning experience. A training plan is created for each student in conjunction with the internship site supervisor to provide experiences related to the skills and knowledge covered in the certificate and master's programs as well as professional goals. Students are responsible for finding their own internship site and proposing their internship ideas. University College will send notification to all COMM students if they hear of internship possibilities. Students may also work with the DU career center, to explore opportunities for internship experiences. To be eligible for an internship, completion of a minimum of 28 hours of coursework is required OR Academic Director approval for students with previous experience in the field.

**BACP 3991 Independent Study (1-4 Credits)**

Student completes special learning project on a topic which is not covered by an existing course. This project is completed under faculty supervision. Topic and assignments must be approved by supervising instructor and Bachelor of Arts Completion Program director.

## Information Technology

Office: University College Student Support Center  
Mail Code: 2211 S. Josephine St. Denver, CO 80208  
Phone: 303-871-2291, 800-347-2042  
Email: [ucol-support@du.edu](mailto:ucol-support@du.edu)  
Web Site: <http://www.universitycollege.du.edu>

Students pursuing the information technology major expand their fundamental technology knowledge and take their IT careers to the next level at University College, where classes are designed and delivered for busy adults.

A technology degree, offered as hybrid and/or online, allows students to explore and develop practical skills in systems analysis and design, networking, cybersecurity, databases, and web design and programming. Whether currently working in the information technology field or aspiring to, the hands-on instruction and interdisciplinary approach provide students with the skills necessary to thrive in the IT industry.

## Bachelor of Arts in Information and Communications Technology

Students who major in information technology will be well-prepared to apply for the Information and Communications Technology (ICT) master's program offered by University College, as the undergraduate major provides the fundamental building blocks for a technology career or further study of ICT at the graduate level. Bachelor's completion students complete an information technology integrative project that expands their fundamental knowledge, allowing them to further explore the field through research and writing.

This degree prepares students to:

- Demonstrate effective and persuasive oral, written, and non-verbal communication techniques using tone and principles appropriate to the audience.
- Apply information technology theory and principles to formulate well-organized arguments in writing and speaking that contain a clear purpose, relevant content, and a conclusion that directly reflects the purpose and strength of the content.
- Plan, create, assess, and evaluate effective web design using current web development tools, written evaluations, and design projects.
- Distinguish, reproduce, and employ informational technology programming skills using web and non-web-based practical projects, program analysis, and project management techniques.
- Quantify data, analyze trends and exceptions, and establish the reliability of conclusions within an information technology framework.

## Undergraduate Certificate in Information Technology Foundations

Students in the Information Technology Foundations certificate will develop the foundational knowledge of the IT field needed to work within the information technology field through hands-on applied instruction on topics such as systems analysis and design, network fundamentals, programming, and data structures, and one specific area of interest within the field.

This certificate prepares students to:

- Employ structured programming concepts focused on logic and data.
- Explain the purpose, objectives, and fundamental principles of IT for systems design.
- Evaluate existing network and technology options for identifying which will best meet organizational needs.
- Articulate an in-depth understanding of one key sub-sector within the technology field.

## Information Technology

ICT 3200	Cybersecurity	4
ICT 3300	Programming and Data Structures	4
ICT 3400	Database Fundamentals	4
<b>Total Credits</b>		<b>16</b>

Minimum number of credits required for certificate: **16 credits**

#### ICT 3100 Systems Analysis and Design (4 Credits)

This course examines the systems analysis and design process from understanding what a system should do through how a system should be implemented. Topics include the System Development Life Cycle (SDLC); the roles of the Systems Analyst and Designer; an introduction to requirements gathering, including identifying user stories, use cases, use of modeling tools; and system design, user interface design, and database design. The course encourages interpersonal skill development with clients, users, and personnel involved in development, operation, and maintenance of a system. Quality issues such as software testing, configuration management, quality management, and process improvement are addressed throughout the course.

#### ICT 3200 Cybersecurity (4 Credits)

Given the constant increase of global technology usage, coupled with an escalation of threats to those systems, cybersecurity is a crucial practice for every learner to understand. This course will provide students with a fundamental overview of cybersecurity, including a set of basic skills needed to evaluate, remediate, and defend against risks within a technological environment. Additionally, students will gain the knowledge required to develop security plans for technological frameworks that are used personally and in organizations. This course is designed for students with varying cybersecurity experience and will empower them to acquire and maintain a strong security posture in their personal and professional lives. From those tasked with building new IT infrastructures to those managing marketing teams, this class will teach students how to best leverage cybersecurity for a safer digital community.

**ICT 3300 Programming and Data Structures (4 Credits)**

This course provides a first exposure to algorithms and fundamental data structures. Working "hands-on" with an integrated development environment, students learn to write and modify code in a widely used contemporary programming language, and discover how their acquired programming skills contribute to the plans, designs, implementations, tests, and maintenance of software solutions. Emphasis is placed on language syntax and structure, data types, arrays, Boolean logic, and functions. The course progresses to topics such as indirection, list and tree structures, object-oriented programming, application programming interfaces, and simple user interfaces.

**ICT 3400 Database Fundamentals (4 Credits)**

This course introduces databases and database system concepts. The material covers information systems design and implementation within a database management system environment. Incorporating lecture content and lab exercises, this course gives students a solid comprehension of the benefits and limitations of databases, while allowing them to get hands-on experience building a user interface to an existing database. All application development will be done in a graphical environment, using a popular desktop database workbench. File processing issues will also be introduced. Prerequisites: ICT 3100, ICT 3300, or equivalent experience.

**ICT 3500 Web Fundamentals (4 Credits)**

This course explores the fundamental development techniques of web page design using Hypertext Markup Language (HTML). Students learn how to create fully functional web pages by utilizing web fundamentals and best practices, including: how to effectively create layouts, use graphics, create hyperlinks, and use text formatting features of HTML. In addition, students are introduced to the use of cascading style sheets (CSS) to enhance the look of web pages. To better prepare students for evolving web standards, the course introduces students to the new HTML5 specifications and CSS3 features.

**ICT 3800 Network and Internet Fundamentals (4 Credits)**

This course covers networking and Internet technologies, hardware, software, and network communications protocols. Students gain knowledge of networking and telecommunications fundamentals including Local and Wide Area Networks, wireless communications, and the Internet. The core of the TCP/IP protocol suite is explored. Voice and data communication concepts, models, standards, and protocols are studied. Students learn about the ramifications of network characteristics such as throughput, latency and jitter on applications and the user experience. Students are introduced to the process of evaluation, selection, and implementation of different communication options within an organization.

## Leadership and Organization Studies

Office: University College Student Support Center  
Mail Code: 2211 S. Josephine St. Denver, CO 80208  
Phone: 303-871-2291, 800-347-2042  
Email: [ucol-support@du.edu](mailto:ucol-support@du.edu)  
Web Site: <http://www.universitycollege.du.edu>

With more than 20 percent of all undergraduate degrees in the United States being business-related, individuals must differentiate themselves to compete in the global job market. A bachelor's degree in Leadership and Organization Studies draws on several diverse subjects such as management, economics, sociology, and psychology to help students learn how to function creatively and effectively in all types of organizations including business, government, and non-profit.

The critical learning outcomes of a leadership degree are similar to a traditional undergraduate business major; however, it offers much more, including civic engagement opportunities, training and development techniques, organizational behavior knowledge, and key communication skills. A leadership degree prepares graduates to analyze and change organizational structures, as well as gain perspective on the roles of effective leaders and followers within business. Degree-seekers can take their education to the next level by combining essential business skills with leadership, project management, and communication techniques—a diverse portfolio of knowledge that will help students succeed as leaders in the business world.

Students in the Bachelor of Arts Completion Program have the opportunity to learn through applied classes that are career-relevant and focus on the experience students bring to the classroom. Students can take classes in this bachelor's degree completion program as hybrid and/or online and learn how to function on high-performance teams, leverage diversity, and resolve conflict. Bachelor's completion students complete a leadership integrative project that expands their perspectives of leadership.

This degree prepares students to:

- Demonstrate effective and persuasive oral, written, and non-verbal communication techniques using tone and principles appropriate to the audience.
- Apply leadership and organization studies theory and principles to formulate well-organized arguments in writing and speaking that contain a clear purpose, relevant content, and a conclusion that directly reflects the purpose and strength of the content.
- Explain and compare roles, ethics, and theoretical perspectives of effective leaders and followers.
- Recognize and apply key functions of leadership through support, consideration, and management of cultural diversity.
- Investigate, explain, and apply the skills of financial oversight to an organization using readily available information.

## Undergraduate Certificate in Leading Teams

The Leading Teams certificate allows students to demonstrate greater expertise in leading professional teams. The certificate allows for the further development of leadership skills and competencies for application in students' professional lives including awareness of the self as a leader, key leadership perspectives, cultural diversity considerations, and impactfully managing groups and teams. The certificate applies a keen awareness of diversity, equity, and inclusion concepts throughout the coursework.

Transfer courses are not accepted for the certificate courses. All 16 or 17 credits must be completed within University College.

### This certificate prepares students to:

- Explain the roles, ethics, and theoretical perspectives of effective leaders and followers.
- Articulate a vision for themselves as leaders within organizations and to their teams.
- Apply key functions of leadership through support, consideration, and management of cultural diversity.
- Evaluate effective leadership behaviors, skills, and characteristics that positively and negatively impact groups and teams.

### LOS 1000 Frontline Manager Leadership Essentials (5 Credits)

The course delivers foundational leadership and management skills necessary to succeed in a first management position and incorporates extensive one-on-one learner coaching. The core concepts for this course include the following: Understanding oneself as a leader, including styles of leadership; strengthening relationships by understanding others, including diversity, equity, and inclusion; professional communication skills (oral, written, listening); delivering and receiving feedback and coaching employees; transitioning from a peer to a leader/manager role, developing a robust and inclusive team culture; building and motivating a high-performance team; and hiring, onboarding, and individual performance management. Practical experience and application of content form the student experience. Students leave with a professional leadership development plan for implementation in their front-line manager roles.

**LOS 2025 Leadership Development in Action (4 Credits)**

Developing effective and successful leadership competencies is a lifelong endeavor that begins with the self and evolves throughout our career journey. In this course, inclusive leaders will be examined, including core leadership competencies and practices that may vary due to the organizational culture and structure. Students will identify core behaviors and practices along with effective communication skills and problem-solving tools to effectively move an organization forward. Students will assess their own leadership competencies and areas for growth to construct a personal leadership development plan.

**LOS 2050 Organizational Behavior (4 Credits)**

Organizations serve as the fundamental building blocks of society. Most people spend hours of time weekly working in organizations. This course focuses on organizational structure and design by uncovering the dynamics of individual, work group/team and corporate behavior. Through reading, case studies and interaction, students learn about decision-making, problem-solving, patterns of interaction and facilitation of change.

**LOS 2100 Leadership (4 Credits)**

What is leadership and how do leaders lead? Can leadership be learned? What skills do 21st-century leaders need? This course provides an opportunity to examine leadership theories, to develop a personal understanding of leadership, and to explore the relations of leaders and followers. The essential skills of effective leaders are explored, such as elaborating a vision, facilitating communication, working with diversity in organizations, shaping an ethical climate, and facilitating change. Students will be encouraged to examine systematically their own leadership potential as they reflect on historical and contemporary examples of effective business and political leaders as well as leaders of causes and social movements.

**LOS 3050 Financial Management (4 Credits)**

All organizations, businesses, governments, and not-for-profits must deal with financial matters. This course provides opportunities to learn how to read and use financial data in order to develop systems for budget creation and control, profit forecasting, and long-range development. Basic principles of accounting, cost analysis and control, revenue and expense forecasting, return on investment, and capital reinvestment are studied and applied to examples. The leader's roles in financial management are examined, including technical, conceptual, and value considerations.

**LOS 3100 Leading with an Entrepreneurial Mindset (4 Credits)**

Many people dream of being their own boss or starting their own business. This course explores the challenges of entrepreneurship, both starting a new business and bringing the entrepreneurial mindset to a large organization. Students examine the basic processes underlying entrepreneurship, including idea generation, prospect assessment, cost analysis, creating buy-in, and launching the product or service. Examples of successful and unsuccessful entrepreneurs will be examined to identify common patterns. Students will study and discuss entrepreneurship as a set of skills, values, and attitudes, and are invited to consider how they can apply entrepreneurship as a life skill.

**LOS 3150 Leading Groups and Teams (4 Credits)**

All teams are groups, but not all groups truly function as teams. Successful organizational leaders recognize the differences and are adept at strategically creating diverse groups and teams to accomplish organizational goals. This course offers applied leadership strategies addressing the various types of teams, principles of team behavior, strategies for avoiding team dysfunction, effective team leadership, and leveraging interpersonal strategies and organizational resources to ensure collaboration, synergy, and effectiveness.

**LOS 3200 Cross-Cultural Leadership (4 Credits)**

This course examines the leadership dynamics of culture, including but not limited to gender, socioeconomic status, race, religion, and social values at a global level. The purpose is to allow for the students to understand cultural competencies and give them the ability to manage in a diverse workforce in our twenty-first-century global society. Because most successful companies recognize the value of workplace diversity and its impact on organizational effectiveness, many invest considerable time and resources into the development of cross-cultural leadership. This course explores the dynamic subject of cross-cultural leadership from multiple perspectives, using both domestic and international lenses for inquiry. It examines the related concepts of organizational communication, culture and cultural awareness, conflict resolution, and inclusive business systems. Students will learn about leadership prospects and examine how cooperation among different cultural backgrounds lead to the achievement of common goals. Students will explore best practice models that address cultural differences in the professional and personal space. Additionally, they will learn how to adapt, communicate, and think critically in professional and personal settings.

**LOS 3250 Learning in Organizations (4 Credits)**

Accelerating change in society and in organizations challenges individuals and the organization as a whole to engage in a process of continuous learning. In this course, basic concepts of individual and organizational learning are explored both in terms of their intrinsic value to individuals and as the source of competitive advantage to the organization. How is learning conceived of and structured throughout organizations? How is the return on investment in learning evaluated? This course provides an overview of what organizations do for the training and development of employees, how they structure knowledge sharing, and how they institutionalize within the organization the knowledge of its members through effective knowledge management practices.

**LOS 3300 Project Management (4 Credits)**

Work in organizations, or in the collaboration among organizations is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have deliverables that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management including how to establish standards of performance, allot time, calculate costs, develop work-break-down structures, and delineate critical pathways. Students also learn about software tools available to plan and track successful projects to completion. Work in organizations, or in the collaboration among organizations, is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have “deliverables” that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management: how to establish standards of performance, allot time, calculate costs, develop work breakdown structures, delineate critical pathways, enlist people and resources, and motivate accomplishment.

**LOS 3325 Applied Project Management II (3 Credits)**

This applied project management course is a continuation of concepts learned in LOS 3300 Project Management and focuses on project management strategies and tactics, including understanding data, tracking, and software used to manage projects. A project will be managed from conceptualization to evaluation. Students must register for a corresponding lab section. Prerequisite: LOS 3300.

**LOS 3326 Applied Project Management II Lab (1 Credit)**

Taken in conjunction with LOS 3325 Applied Project Management, this course provides students with hands-on use of project management tools to execute projects related to their major. Students focus on real-world examples, best practices, and have the opportunity to develop, deploy, and evaluate project management tools and technologies. Prerequisite: LOS 3300.

## Transportation and Supply Chain

Office: University College Student Support Center  
 Mail Code: 2211 S. Josephine St. Denver, CO 80208  
 Phone: 303-871-2291, 800-347-2042  
 Email: ucolsupport@du.edu  
 Web Site: <http://www.universitycollege.du.edu>

## Bachelor of Arts in Transportation and Supply Chain

Gain the foundational elements needed to effectively manage the transportation of goods and people through a Bachelor of Arts in Transportation and Supply Chain. This exciting major offered in the Bachelor of Arts Completion Program at University College will prepare students to pursue more advanced career opportunities or education in the transportation and supply chain sectors.

Developed in partnership with the Transportation and Supply Chain Institute at the University of Denver, the BA in Transportation and Supply Chain offers hands-on instruction that covers transportation safety and security issues, law and policy, economics and finance, international trade, supply-chain logistics, and transportation modes and nodes. Students who major in Transportation and Supply Chain will also develop superior communication, creative, and decision-making skills—transferable outcomes provided by the bachelor’s program that can be applied immediately. The Transportation and Supply Chain degree requires a field experience, which allows the student to further explore the sector through a professionally-focused project.

This degree prepares students to:

- Demonstrate effective and persuasive oral, written, and non-verbal communication techniques using tone and principles appropriate to the audience.
- Apply global commerce and transportation theory and principles to formulate well-organized arguments in writing and speaking that contain a clear purpose, relevant content, and a conclusion that directly reflects the purpose and strength of the content.
- Describe how different transportation modes and intermodal transportation interface with key supply chain nodes to create a global supply chain.
- Analyze the strengths and limitations of transportation policy in promoting public welfare.
- Quantify data, analyze trends and exceptions, and establish the reliability of conclusions within an intermodal transportation framework.

## Undergraduate Certificate in Transportation and Supply Chain Operations

Developed in partnership with the Transportation Institute at the University of Denver, the Transportation and Supply Chain Operations certificate offers hands-on instruction that covers foundational elements within the transportation and supply chain industry, safety and security issues, law and policy, economics and finance, supply-chain logistics, and transportation modalities.

This certificate prepares students to:

- Describe how different transportation modalities interface with key supply chains for the movement of goods.
- Analyze market dynamics and trends across transportation and supply chain functions.
- Identify the opportunities and business risks, strengths and limitations of operations, inventory management, and warehousing.

## Transportation and Supply Chain Bachelor of Arts Major Requirements

(180 credits required for the degree) (p. 99)

### Required courses for the Transportation and Supply Chain major:

Code	Title	Credits
BACP 2075	Data Concepts and Structures	4
GS 3050	Economics and Finance	4
GS 3100	Understanding International Trade	4
GLBL 3100	Procurement, Sales, and Customer Relationships	4
GLBL 3200	Transportation Modes and Nodes	4
GLBL 3250	Supply Chain and Logistics Systems	4
GLBL 3275	Warehouse and Asset Management	4
GLBL 3300	Transportation Policy, Safety, & Security	4
GLBL 3325	Integrated Operations Planning and Inventory Management	4
GLBL 3500	Field Experience in Transportation and Supply Chain	4
LOS 3300	Project Management	4
LOS 3325	Applied Project Management II	3
LOS 3326	Applied Project Management II Lab	1
<b>Total Credits</b>		<b>48</b>

### certificate in Transportation and Supply Chain Operations

Code	Title	Credits
GLBL 3200	Transportation Modes and Nodes	4
GLBL 3250	Supply Chain and Logistics Systems	4
GLBL 3275	Warehouse and Asset Management	4
GLBL 3325	Integrated Operations Planning and Inventory Management	4
<b>Total Credits</b>		<b>16</b>

Minimum number of credits required for certificate: 16 credits

#### GLBL 3100 Procurement, Sales, and Customer Relationships (4 Credits)

This course exposes students to the theory and practices commonly used by best-in-class organizations relative to procurement, sales, and customer relationship management. The focus of the course is on the tactical approaches involved in marketing to potential customers, the procurement process, account set-up, quality customer experience, and customer relationship management including customer retention strategies.

#### GLBL 3200 Transportation Modes and Nodes (4 Credits)

This course provides an overview of the role of freight transportation to drive global economic development from its historical roots into the future. Global supply chains are built on a foundation of transportation modes. This foundation has evolved with value derived from speed, cost, capacity, flexibility, reliability, and technological adaption. Greater risk is now present in this foundation stemming from cyberthreats, political volatility, and public health crises. Transport modes have grown over time to include maritime (ships and barges,) surface (rail, trucks, and vans,) air (planes, helicopters, and drones,) and underground (pipelines.) Students will learn about the characteristics of these modes and the nodes with which they interact including ports, terminals, distribution centers, and flow centers. Whether working for a manufacturer, distributor, retailer, or e-tailer, students learn how effectively manage transportation, which is a key factor in profitability and customer satisfaction.

**GLBL 3250 Supply Chain and Logistics Systems (4 Credits)**

This class provides an overview of supply chain management as a key business function that holistically integrates functions such as planning, purchasing, inventory control, transportation, and warehousing. Students learn about topics such as designing supply and distribution networks aligned with the firm's business and supply chain strategy as well as improving supply chain performance via SCOR, Lean, and Six Sigma techniques. Students explore how various aspects of supply chain management are integrated within the firm as well as coordinated with suppliers, trading partners, and logistics/transportation providers to deliver superior customer satisfaction. Making sound strategic and tactical decisions are learned by managing a global consumer electronics supply chain via an online simulation. Best practices are investigated by studying some of the world's top supply chains.

**GLBL 3275 Warehouse and Asset Management (4 Credits)**

Learn the essential elements of warehouse management, focused on the role of an operations manager to lead people, develop and manage processes, and design and implement technologies. The scope of the course will be related to both warehouses and distribution centers within the supply chain. Gain an understanding of the role of warehouses and distribution centers in relation to the overall global supply chain system.

**GLBL 3300 Transportation Policy, Safety, & Security (4 Credits)**

This course provides an overview of the many public policy dimensions of transportation systems. It examines government regulations affecting transportation businesses, environmental regulations, labor laws, finance, public welfare, and the general relationship between economic policy and transportation investment. The class focuses on personal mobility (autos, highways, urban transit, and airlines), including freight transport (rail, ports, and pipelines). Future directions in transportation-related public policy are also addressed.

**GLBL 3325 Integrated Operations Planning and Inventory Management (4 Credits)**

The world of interconnectedness requires sophisticated planning and execution to supply the world. Sales, Inventory, and Operational Planning (SIOP) are parts of an integrated business management process through which the executive/leadership teams can continuously achieve focus, alignment, and harmonization among all functions of an organization. In this course, students will learn the essential components of this process, how strategic operational plans are developed and synchronized, the inputs and outputs of the process, and the ways Key Performance Indicators (KPI) influence and guide the organization.

**GLBL 3350 Transportation Safety and Security (4 Credits)**

Transportation security in the 21st century challenges the capabilities of our global transportation infrastructure. This course explores the ever-evolving requirements imposed on industry practitioners and encourages students to develop skill sets and knowledge required to embed security in transportation systems. We examine the evolution of the industry's concerns about safety, including concerns about security, and analyze how these concerns drive workforce training and resource allocation. Students assess technological and economic challenges to ensure safe and secure transportation systems. In addition to physical security issues, this course also examines the issues of resilience and preparedness, and how they drive industry practitioners, policy planners, and stakeholders.

**GLBL 3500 Field Experience in Transportation and Supply Chain (4 Credits)**

This course is an experiential learning collaboration between a student, a faculty advisor, and a professional supervisor, offering students an opportunity to apply their content knowledge to a professional setting. Students will integrate academic theory with practical experience in a professional field of interest. Additional site-specific learning outcomes are established in conjunction with the site supervisor.

## Dual Undergraduate/Graduate Programs

University of Denver Dual Programs (p. 670)

Global Masters Scholars (p. 670)

## University of Denver Dual Programs

A Dual Undergraduate-Graduate Degree Program is an institutionally approved program in which a DU undergraduate student begins taking classes toward a graduate degree program prior to earning a baccalaureate degree. Both degrees must be earned within five years of matriculation into the undergraduate degree program. Students pursuing a dual degree with a Juris Doctorate must earn both degrees within six years.

The programs may reduce a limited number of both undergraduate and graduate credit hours toward both degrees. A listing of Dual Undergraduate-Graduate Programs, including admission and program credit requirements, may be found in the University of Denver Graduate Bulletin (<http://bulletin.du.edu/graduate/dual-degrees/dual-undergraduate-graduate-degree-programs/>).

## Global Masters Scholars

A Global Masters Scholars program is an articulated agreement between a DU academic department, a strategic or priority partner institution, and the DU Office of Internationalization where the curriculum is mapped so that the student is able to complete the DU undergraduate degree and be prepared to successfully enter a master's degree at the partner institution.

The Global Masters model consists of the first 3 years of undergraduate study taking place at DU, then 1 year of study abroad at the partner institution (DU's fourth year). The 3 years at DU and 1 year of study abroad constitutes a Bachelor's Degree from the University of Denver. During the 1 year of study abroad, students will follow all Office of International Education (p. 697) policies and be able to apply Cherrington Global Scholars benefits if applicable. Upon completion of the 1 year study abroad, the student will graduate from the University of Denver and no longer be a DU student. The

fifth and final year of study will take place at the partner institution, in which the student will be a full-time student of the partner institution and, upon completion, will be awarded a Master's degree by the partner institution. Students enrolled at DU may opt into the Global Masters programs if they meet their department's eligibility requirements, DU's study abroad and exchange requirements, and any additional requirements determined for a specific Global Masters programs.

## Global Masters Programs

### Lund University, Sweden

- **Global Masters in Gender Studies:** DU Gender & Women's Studies (p. 331) and LU Department of Gender Studies
- **Global Masters in Biological Sciences:** DU Department of Biological Sciences (p. 168) and LU Department of Biology
- **Global Masters in Political Science:** Department of Political Science (p. 553) and LU Department of Political Science
- **Global Masters in Geography:** DU Department of Geography and Environment (p. 335) and LU Department of Physical Geography and Ecosystem Science

### University of Glasgow, Scotland

- **Global Masters in English:** DU Department of English (p. 313) and GU School of Critical Studies
- **Global Masters in Engineering:** DU Daniel Felix Ritchie School of Engineering and Computer Science (MME (p. 455) & ECE (p. 280)) and GU School of Engineering

### University of Western Australia, Australia

- **Global Masters in Business Information & Logistics:** DU Department of Business Information & Analytics (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/businessintelligenceandanalytics/>) and UWA Business School
- **Global Masters in Biological Sciences:** DU Department of Biological Sciences (p. 168) and UWA School of Biological Sciences
- **Global Masters in Biotechnology:** DU Department of Biological Sciences (p. 168) and UWA School of Agriculture and Environment
- **Global Masters in Environmental Science:** DU Department of Geography and Environment (p. 335) and UWA School of Agriculture and Environment

## General Admissions Criteria & Process

These are the general guidelines for Global Masters Scholars at the University of Denver. Please consult with the individual DU academic department on other specific requirements.

- Students must be majoring in the Global Masters Program's subject area at the University of Denver.
- Students must apply and be approved through DU department or unit.
- Students must meet all the Office of International Education's admissions requirements and deadlines.
- A minimum 3.0 overall GPA at the time of application for the Global Masters program with DU department or unit and maintained through degree program after application submission (*Deadlines are typically in the Fall as established by the department or unit*).
- A minimum 3.5 GPA in the major is recommended by the Office of Internationalization. However, the DU department or unit, in collaboration with the partner university, will establish the GPA requirement, if higher than 3.0.

## Academic Advising

Academic Advising at the University of Denver is a partnership between students, faculty and staff academic advisors. Academic advising is a critical part of a student's educational experience. Students are provided with information regarding course planning, major, minor and degree requirements, transfer credit, academic policies, the academic exceptions process and campus resources that are available to empower students to meet their goals.

## Academic Advising for Traditional Programs

### Office of Academic Advising

Academic Advisors in the Office of Academic Advising support undergraduate students, with a focus on first-year students and exploratory/undeclared students. When students declare a major in their second year and beyond, students receive guidance from either a faculty advisor or program advisor to draw from their expertise in the major field.

The Office of Academic Advising is located in the Community Commons, Suite 3100. Office hours are 8 a.m.–4:30 p.m., Monday–Friday. For more information, call 303-871-7001, email [advising@du.edu](mailto:advising@du.edu) or visit the website at <https://academicaffairs.du.edu/academic-advising> (<https://academicaffairs.du.edu/academic-advising/>)

### Orientation and Transition Programs

To help students make the transition to college, DU offers several programs. These programs are designed to provide students with information, connect them to resources and services, and establish peer mentor connections. For more information, please visit the New Student & Family Programs website at <https://studentaffairs.du.edu/new-student-family>, or email at [Discoveries@du.edu](mailto:Discoveries@du.edu). The office can be reached by phone at 303-871-7599.

### Discoveries (DU New Student Welcome Experience)

Discoveries is our DU new student welcome experience designed to assist all new students as they begin their journey at the University of Denver.

- “DU Bound” Summer Newsletter - is a monthly new student email newsletter with essential information to help guide students along their DU journey and the Discoveries experience. Students should regularly check their DU email to stay informed.
- Discoveries Online – is a series of required online courses offered through Canvas (DU's campus Learning Management System) that provides students with essential information and resources to aid in orienting them to our community.
- Peer to Peer Mentorship – is offered to all new students. New students are paired with a current DU student, a 4D Peer Mentor, who supports them during their first year at DU. New students will be introduced to their 4D Peer Mentor prior to on-campus arrival.
- Discoveries Orientation - is a 5-day experience designed to physically orient new students to the DU campus, provide introductions to campus resources and support services, and afford time and opportunities to connect with other new DU students.
- First Ascent – is an experiential opportunity at the breathtaking Kennedy Mountain Campus (KMC). This experience allows students time and space to self-reflect and enjoy nature while connecting with their peers.

Discoveries information is sent to all students who have paid the admission deposit. Discoveries facilitates holistic student development by setting the foundation for academic progress, career preparation, wellness, living, learning, and personal development. Discoveries Orientation includes educational and experiential opportunities that help students get to know the University of Denver, the surrounding Denver community as well as our campus community standards and expectations. During orientation, new students will have small group meetings with peers and 4D Peer Mentors, meet their FSEM faculty member, learn to navigate campus, hear about essential resources, and reflect on their academic success in addition to their overall health, safety, and well-being. During evening activities, students meet other students and sample the many co-curricular opportunities available at DU.

## First-Year Seminar Program

The instructor for the student's FSEM 1111 First Year Seminar serves as the student's primary faculty for the introduction to the intellectual life of the University. Our FSEM faculty provide first year students with consistent mentoring and support while navigating university academic experiences. This course is required for all first-time, first-year students. Students register for FSEM 1111 online the summer prior to their enrollment. Students who do not pass or withdraw from their First-Year Seminar will be required to take **two** Advanced Seminars (ASEMs) to complete their Common Curriculum requirements.

## Business & International Studies Advising

### Daniels College of Business Advising

Daniels College of Business Undergraduate Programs is located in Margery Reed Hall and addresses questions about academic and career advising for students who are interested in or already have declared business majors or minors. For more information, email [daniels.undergrad@du.edu](mailto:daniels.undergrad@du.edu) ([dcbundergrad@du.edu](mailto:dcbundergrad@du.edu)) or call 303-871-6910.

### International Studies Advising

The BA Program in International Studies advises current and prospective majors and minors on international studies program requirements and academic progress and verifies the completion of major requirements at the time of graduation. For more information, or to schedule an advising appointment, please email [baints@du.edu](mailto:baints@du.edu) or call 303-871-4495.

## Pre-Professional Programs

### Pre-Health EDUCATION & ADVISING (Pre-Dental, Medical, Nursing, Pharmacy, Physical Therapy, Physician Assistant, VETERINARY, and Other Health-Related Professions)

The Office of Pre-Health Education & Advising provides academic and career advising for students from all majors who are interested in pursuing health-related careers (medicine, physician assistant, nursing, dentistry, pharmacy, physical therapy, veterinary medicine, and others). Pre-Health Education & Advising guides students in building strong academic and extracurricular preparation for professional school and developing the most competitive pre-health portfolio possible. Advising begins even before classes start in the freshman year and continues through all undergrad years, and even after graduation. Pre-Health Education & Advising provides support through advising, coordinating clinical, volunteer and research opportunities, and providing numerous workshops and events that enhance:

- portfolio development (volunteer, clinical and research experiences, and resume building)
- healthcare education and knowledge (academic courses, workshops, guest speakers and special events and activities)
- entrance exam preparation (advising for academic content and study skills, study prep and mock exams and interviews)
- process of applying to professional schools (educating and advising about writing personal statements, building competencies, interviewing and professional skills) The PreProfessional Committee provides application consultation and committee letters.
- participation in health-related student organizations (network and learn from DU peers and off-campus professionals)

Refer to the Pre-Health Education & Advising web site on the College of Natural Sciences & Mathematics home page for detailed information <https://science.du.edu/pre-health-advising> (<https://science.du.edu/pre-health-advising/>).

## Law

A student preparing for a career in law does not have to take any prescribed pre-legal courses or claim any particular major. The DU Sturm College of Law and most other leading law schools require students to earn a four-year baccalaureate degree with superior grades.

Business students may be interested in a legal studies (p. 204) minor. Liberal arts students may be interested in a socio-legal studies (p. 597) major or minor.

## University College Advising

The mission of the University College Advising Department is to provide guidance and tools to University College students that allow them to achieve their educational goals. To help students with their academic program, University College Academic Advisors are available to assist students by:

- explaining program requirements and assisting with course selection
- providing support and outreach to students with academic difficulty
- counseling students on policy or appeals procedures
- assisting with program changes
- helping students become active and strategic learners
- establishing student connections to faculty and campus resources.

Academic advising is available to all students at University College. Students may schedule an appointment with their academic advisor through MyDU or by calling the Student Support Center at 303-871-2291 or 1-800-347-2042. To schedule an advising appointment, log into MyDU and search "university college advisors". Choose Advisor(s) by program link, then select the program. Students can check availability and choose if they would prefer an in-office, phone, Teams, or Zoom appointment.

## Degree Audit

### Degree Audit

The Degree Audit is a planning document that provides a record of a student's progress toward fulfilling degree requirements.

It is a summary of the completion of overall degree requirements (e.g., common curriculum requirements, major and minor requirements and electives), including grade point average (GPA). Keep in mind that while the degree audit is useful, it is not a substitute for an appointment with an academic advisor nor is it an official record of courses and grades. The degree audit is intended as an advising tool only; it is not a transcript.

### Instructions for printing degree audits:

- a. Log in to the MyDU Portal (<https://my.du.edu/>) using your DU ID number and password.
- b. Using the search bar at the top of the page, type in Degree Audit.

- c. Click on the link to open the degree audit.
- d. Your Audit Worksheet will then load.
- e. The audit worksheet displays a summary of the completion of overall current degree requirements.
- f. If you have never generated a degree audit, click on the Process button located in the Degree Progress card. This same button will generate a new audit.
- g. Click the print button at the top of the worksheet.

### "What-If" Analysis

Students may choose to run a degree audit for any degree or major using a "What-if" analysis. The *What-If* analysis allows you to run a degree audit for any degree and major combination to see how changes in the Program of Study could impact degree completion. Undergraduate students, if your current major is History, the *What-If* option can help you determine how your current courses would apply if you changed your major to French. Graduate students considering a change of program can run a degree audit to view course requirements for another program.

Please note: Undergraduate majors are still changed through the declaration of major form; some majors require a secondary admission process. Graduate students must still follow formal admission processes to change programs.

Instructions for generating and printing a "What-If" analysis:

- a. Log in to the MyDU Portal (<https://my.du.edu/>) using your DU ID number and password.
- b. Using the search bar at the top of the page, type in Degree Audit.
- c. Click on the link to open the degree audit.
- d. Your Audit Worksheet will then load.
- e. Click on the What-If tab, next to the academic tab, located under the box that contains your name, ID, and degree information.
- f. The What-If scenario will require you to enter information regarding the curricula you would like to view. Enter all of the required information and click the Process button when you are ready.
- g. The What-If audit will be created based on the information you entered and show you how completed courses, as well as in-progress and preregistered courses, will apply under the new curricula.
- h. Click the print button at the top of the worksheet.

## Registration

### Registration Offices

Registration is overseen by different offices depending upon the student's program. Questions about the registration policies or procedures detailed below should be directed toward the appropriate office.

Traditional undergraduates may contact the Office of the Registrar at 303-871-4095 or visit [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>).

The University College Registrar can be reached at 303-871-2291 or visit [www.universitycollege.du.edu/bachelors](http://www.universitycollege.du.edu/bachelors) (<http://www.universitycollege.du.edu/bachelors/>).

### Registration Access

Students may not attend classes without being officially registered for them. Students may register online via the secure University portal MyDU (<https://my.du.edu/>) or in their program's registration office. Instructions for Web registration are available at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>). The University of Denver does not print a quarterly course schedule. Go to [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>) and select Schedule of Classes from the Courses and Schedules dropdown menu. Select the appropriate quarter (only the Sturm College of Law uses the semester system) to search for course listings.

### Student's Financial Liability

It is the student's responsibility to know and abide by the University's payment and refund policies. By completing registration, the student agrees to pay the total amount of tuition and other charges set forth, whether or not the student attends these courses. It is the student's responsibility to drop any courses not attended or courses that the student does not plan to complete.

### Registration Clearance

Prior to each registration period, students must seek advising (p. 671) from their appropriate academic advisor in order to register for the upcoming quarter. Once a student has received advising, the advisor will indicate the student is cleared to register for courses at the student's assigned registration time. Students are responsible for knowing add/drop deadlines and processes, tuition refund schedules and health insurance waiver information, including waiver deadlines. All of this information can be obtained online at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>).

## Registration Access

Students may register at or after their assigned time but not before. Students should not miss class to register. Registration is generally available online at M (<https://PioneerWeb.du.edu>)yDU (<https://my.du.edu/>) 24 hours a day, seven days a week during official registration periods. Online registration access may be unavailable when system maintenance is required. Students may also conduct registration transactions in their appropriate program office. Instructions for registering on the Web can be found at <http://www.du.edu/registrar/registration/howtoregister.html>.

## Registration Holds

A hold indicates that there is an obligation to fulfill or an action to be taken with an office on campus. The majority of holds prevent registration activities. Holds are also used to prevent the release of transcripts or the acceptance of admission applications.

Prior to the registration process, students are expected to check for holds. Holds typically have a contact phone number included in their description. To clear a hold, the student must contact the office issuing the hold to find out what must be done to fulfill the obligation(s).

Holds can be checked at any time by logging on to MyDU (<https://my.du.edu/>). Visit My Student Profile under Student Tools. Click on the Holds link in the top right corner. The type of hold is listed along with a contact phone number so that it can be addressed. Only the office that placed the hold can remove it.

## Registration for Traditional Undergraduates

The Time Ticket assignment process controls and manages the size and order of registration times. Time assignments are generated based on the number of credits a student has earned, including study abroad and transfer credits, and hours in progress (credits for which the student has registered but have not been graded). The system is designed so that the closer the student is to completing their degree, the more priority they are given to take the specific classes they need to finish their program. Students are placed in groups of 50-70 students in 10-minute timing intervals.

The University of Denver allows priority registration for the following types of students:

- Students with an approved accommodation through the Disability Services Program
  - Students who require pre-arranged support services, such as sign language interpreters that are necessary for accommodation;
  - Students who have physical constraints due to mobility loss, speed, and/or endurance;
  - Students who have physical or cognitive restrictions due to fatigue, sleep disorders, medication side effects, or sustained concentration as verified by a physician, medical reports, or psycho-educational evaluation;
  - Students who require medical treatment/intervention/therapy that highly impacts scheduling
- ROTC Students
- Athletes
- University Honors

Students granted priority registration are given an additional 45-credit placeholder in the calculation of their time assignment placing them in groups of students approximately one year ahead in progress toward their degrees. The groups of students accorded registration priority have been granted this based in recognition of unique scheduling constraints faced by these groups.

Go to <https://www.du.edu/registrar/registration/when-register> for more information.

## Readmitted and Returning Students

Students in good academic standing who are returning to the University after taking a leave of absence of one or more terms are eligible for registration provided the appropriate University official is notified prior to the first day of the scheduled registration period. Traditional students should meet with an academic advisor in Academic Advising prior to a leave of absence and upon returning to their program. University College students should consult with their academic advisor.

## Late Registration

Registration beginning on the first day of the quarter is considered late registration. Traditional students (continuing, new, returning from leave of absence and readmitted) who do not register for at least one course before the first day of the quarter are assessed a late-registration service charge that cannot be waived. A service charge of \$25 is assessed the first day of the quarter for all students who have not enrolled in at least one course prior to the first day of the quarter. A \$50 service charge is assessed from the second through the fifth days of the quarter. A \$100 service charge is assessed beginning the sixth business day and continuing through the remainder of the quarter.

## Course Registration

### Changes to Registration

Traditional undergraduate students may drop or add courses during a standard ten week term without approval or penalty during the first seven days of a quarter (Monday-Sunday, summer session excluded). Schedule changes can be made online via M (<https://PioneerWeb.du.edu>)yDU (<https://>

my.du.edu/dashboard/). Students may also make schedule changes by contacting their college's registration office. See [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>) for specific dates and procedures regarding registration and drop/add deadlines.

## Section Changes

Students may change from one section of a course to another with the instructor's approval for the section being added. The section being dropped is deleted from the student's record.

## Adding Courses

Traditional students may add open courses through the first week of a standard ten week quarter without approval unless course-specific permissions are required (i.e., instructor, department, independent study/research form). University College courses must have instructor approval to add once they have begun.

After the first week of the quarter, students must add classes through their college's registration office. Instructor approval is required.

Students must be registered in courses they are attending. Students may not attend classes for which they are not enrolled. It is at the instructor's discretion to allow a student to enroll in a course after the first week of the term. Students are responsible for making up assignments for missed class meetings.

Under no circumstances may courses be added after the eighth week of the quarter (during the last 10 business days of the quarter). Refer to the Important Dates link under Calendars and Deadlines on the registrar's website for specific dates.

## Variable Credit Hours

Some courses can be taken for variable credit hours (e.g., a course can be taken for either 2 or 3 credits). If appropriate, students can select the desired credit hours during Web registration. When registering for a course with variable credit hours via the Web, by default a student is registered for the minimum number of credit hours. The student is responsible for changing the credit hours. This is accomplished once the course is added by clicking on the Schedule and Options tab in the top left corner of the registration screen. In the Schedule and Options tab, click on the underlined number in the Hours field. A drop down will become visible. Select the appropriate credits you wish to be registered for. Hit submit in the lower right hand corner. The credit hours for the course should change to the desired number.

## Registration Approvals

Courses requiring special permission or forms, such as independent study, directed study or independent research, may require registration in the appropriate registration office. Students are expected to identify prerequisites and course restrictions prior to attempting to register. Up-to-date prerequisite and restriction information is available on the online schedule of classes. Courses that have been transferred in from other institutions may not be recognized as meeting prerequisites and could result in a registration error message (due to missing prerequisites).

To prevent registration errors that block a student's ability to enroll in a course, the student should contact the appropriate office before the registration time assignment for required approvals or with requests for exceptions to restrictions. Proactive actions are particularly important for students participating in a study abroad program. When an academic unit deems it appropriate to grant approvals or permissions to override restrictions, or to enroll in closed courses, the approval can be given via the Faculty or Advisor granting a permit override or a signed drop/add form.

When a form is required or a registration error results at the time enrollment is attempted, the student should register for all other courses via the Web. The student can then procure the appropriate forms, signatures or electronic approvals without compromising his or her course schedule. Students who feel they are blocked from a course in error should contact their registration office immediately.

## Maximum Credit Hours and Full-Time Status

A full-time traditional undergraduate student may enroll for 12–19 quarter hours of credit each quarter. However, the tuition flat rate is set at 12–18 quarter hours (i.e., upon enrollment in 12 quarter hours, tuition remains the same through 18 quarter hours). Each quarter hour taken in excess of 18 hours, therefore, is charged at the current hourly tuition rate. University College students are not eligible for the flat-rate fee.

A quarter-hour load of more than 19 hours requires approval from Academic Resources; students in the Daniels College of Business may also need approval from Daniels College of Business Student Services. The total study load includes all courses taken at the University of Denver and at other institutions concurrently.

Courses taken for no credit (NC) are applied toward the total study load and tuition fee assessment. Approval for an overload status depends on a student's grade point average (minimum 3.0 the preceding quarter), the reason for requesting the overload and the student's work schedule. The maximum enrollment for any quarter is 20 quarter hours.

# Dropping Courses

## Administrative Withdrawal from Cancelled Courses

Students are administratively withdrawn from courses that are cancelled by the University. Cancelled courses are deleted from the student's record and tuition charges are reversed if appropriate. Students are notified of the cancellation by the department, college or school responsible for offering and cancelling the course.

## Student Responsibility

With the exception of administrative withdrawals, a student must officially drop a course or a failing ("F") grade is assigned. For example, if a student ceases to attend a course, the student remains enrolled in the course unless the student officially drops the course online or through their registration office. University College students must contact their registration office to officially withdraw from a course. Courses dropped after the end of the sixth week of the quarter require instructor's approval. The instructor's signature is required on an add/drop form.

A request for withdrawal submitted without required approvals will not be processed, and the student receives a failing ("F") grade for the course. The student is liable for payment of all tuition and charges related to the course.

## Mandated Withdrawal Resulting from Non-Attendance

The attendance policy for a course is left to each instructor's discretion. Traditional students who have not attended the first week of classes (or equivalent) and who have not made arrangements with instructors for excused absences prior to the first class meeting can be required to drop the course. Once the instructor notifies a student that she or he cannot attend the course, the student is expected to initiate the drop in their program's registration office. Students who are not allowed to continue in a course but who do not officially drop the course will earn a failing grade ("F") for the course. Students subject to mandated withdrawal due to nonattendance will be responsible for tuition and fees associated with the course at the time of withdrawal. Students who do not officially withdraw from the course will be responsible for all tuition and fees associated with the course.

## Official Drop Periods

Courses dropped through the first seven days of a traditional ten week quarter (Monday–Sunday, summer session excluded) are deleted from the student's record. Tuition will be reversed through this time period (first 10 percent of the term), if applicable.

A notation designating a withdrawal ("W") is assigned for courses officially dropped after the first week of the traditional ten week quarter. The course appears on the student's record with a withdrawal ("W") grade notation. Credit hours for the withdrawn course are not earned and the "W" grade notation is not calculated in the GPA. A course may be dropped without instructor approval through the published date for automatic withdrawal (generally the end of the sixth week of a quarter, 60 percent of the term). Withdrawal deadlines and tuition refund schedules are available at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>).

## Withdrawal Restrictions

### Academic Integrity

The University of Denver creates an academic learning environment grounded in Academic Integrity. Students are expected to engage honestly and demonstrate responsibility in research and academic assignments. Therefore, all work and grades should result from the Student's own understanding of the materials and their effort.

When evidence/information indicates that a Student may have violated an Academic Integrity Policy, Academic Actions, Educational Outcomes, and Status Outcomes are possibilities. Academic Actions include, but are not limited to required re-do of an assignment, grade reduction, failure of an assignment, and/or failure of a course. Status Outcomes include written warning, probation, elevated probation, suspension, or dismissal. Students may appeal these decisions.

A student can be prevented from dropping a course when it is alleged they have engaged in academic dishonesty. A course can be reinstated if the student has dropped the course during the automatic withdrawal ("W") period. In cases of suspected academic dishonesty, the Office of the Registrar can reinstate a previously dropped course. The Office of the Registrar is not required to notify the student of reinstatement. Once the case is heard by the Office of Student Rights & Responsibilities and academic dishonesty is determined, an instructor may assign a failing ("F") grade for the course in question. A withdrawal notation ("W") for the course, even if processed during the automatic withdrawal period, is not honored. If the Student is found not responsible for violating an academic integrity policy, and there has been an attempt to drop during the automatic withdrawal period, the drop is processed and a notation of withdrawn ("W") assigned. Refer to [www.du.edu/studentlife/studentconduct](http://www.du.edu/studentlife/studentconduct) (<http://www.du.edu/studentlife/studentconduct/>) for policies and procedures concerning academic integrity and the University of Denver Honor Code.

### Drops with Approval

An instructor may refuse permission to drop a course when a student is failing the course. After the sixth week of the quarter, approval from the instructor is required to drop a course. See [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>) for these and other important dates. Note: Five-week courses, interterms and summer sessions may have different deadlines. Please consult the Registrar's website for up-to-date information about add/drop and refund deadlines.

### Drop Deadlines

Withdrawals during the two weeks (10 business days, Monday–Friday) before the scheduled final exam period are not permitted. Exceptional approval: Students who have extenuating circumstances that make it necessary to drop classes after the drop deadline may contact Academic Resources to file

a Petition for Exception to Academic Policy. If granted, approval to drop courses after the drop deadline does not automatically grant a tuition refund. See the process for Tuition Refund Appeal (p. 682).

## Repeating Courses

Students must receive approval from their major department or college to repeat a nonrepeatable course. Credits in the major and the minor must be earned at the level of "C-" or better. Some degree programs require a "C-" or better for other requirements. A student may, if required by the program, repeat a nonrepeatable course. The highest grade received, if "C-" or better, fulfills requirements. However, hours earned toward graduation are counted only once. The course is counted as part of the regular class load, and the cumulative GPA includes all grades for the course.

Regular tuition is charged for the repeated course. However, only one repetition of a previously-passed course may count in a student's enrollment status for federal financial aid purposes. In other words, the third repetition may not be counted for federal financial aid such as student loans or grants.

## Course Information

### Online Schedule of Classes

Detailed information pertaining to classes available for the current academic year is viewable online via a searchable schedule of classes. Schedules for prior years are available in schedule archives. The online schedule of classes, instructions for use and schedule archives can be found on the Office of the Registrar website at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>).

Because the online schedule of classes is available to the general public, prospective students and other interested parties can view detailed information about courses offered for specific terms. The detailed information available from the schedule of classes makes it a valuable tool for developing course schedules prior to advising and registration. The class schedule listing page includes instructor email links, section notes, meeting times and links to other section information for courses meeting search criteria.

### Course Number Designation

0001-0999: pre-collegiate, remedial, or continuing education unit courses

1000-1999: undergraduate courses (lower division)

2000-2999: advanced undergraduate courses (upper division)

3000-3999: advanced undergraduate and graduate courses (combined)

4000 or over: graduate courses

### Independent Study

Independent study offers the opportunity to extend learning beyond formal courses and to explore intellectual independence. To be eligible for Independent Study, a student should demonstrate qualities necessary for interested and intensive inquiry. Students must obtain an independent study form from their program's registration office. Registrar approval is required before the form is completed by the student, instructor and chair of the department.

The following policies apply:

- The independent study project must be considered as upper-division credit (course number 3991).
- At least one hour (quarter) of credit is required for Independent Study, and a maximum of 10 credit hours can be applied toward degree requirements, except for students in the Honors Program. Ordinarily, a maximum of five credit hours of independent study may be taken in any quarter.
- Individual academic departments may have further restrictions on the number of Independent Study hours that can be applied toward major requirements.
- Independent study may not replace a course listed in the course catalog.
- The student, instructor and chair of the department must agree upon the title and outline of the independent study project.

In addition to these policies, undergraduate students who do not meet the following criteria will not be approved for independent study.

### Non-Business Independent Study

To be eligible for independent study in non-business disciplines, an undergraduate must meet the following criteria:

- The student must be in academic good standing (i.e., a minimum 2.0 GPA).
- The student must have been enrolled as a full-time student during the preceding quarter.

## Business Independent Study

To be eligible for independent study in business disciplines, an undergraduate must meet the following criteria:

- The student must be a business major.
- Of the hours completed, 45 must have been completed at the University of Denver.
- The student must have been enrolled as a full-time student during the preceding quarter.
- The student must have a minimum 2.5 GPA.

## Independent Research

Independent research opportunities are available to students for dissertation and thesis research or other independent research.

The following policies apply:

- Independent research projects (course numbers generally ending in 995) appear on the student's transcript with the specific topic as the course title.
- On successful completion of the project or on its termination by request of the department, the research advisor will record a final grade. The department may use the A-F grading system in evaluating the research or record 'P' (pass) or 'F' (fail).
- Projects must be undertaken within the academic term in which they are registered.
- Students obtain applications from their academic department or the Office of the Registrar. Partial applications will not be processed.
- The responsibilities of the instructor of record are the following:
  - a. See that the grades are submitted;
  - b. Approve the course of research;
  - c. Approve the credentials of other faculty involved;
  - d. Agree to assume responsibility if problems arise.
- Registration after published registration dates is not permitted.

## Directed Study

A directed study course is a permanent catalog course delivered on an individual basis when the course is not offered in a given term. Directed study courses are approved under extenuating circumstances to provide an opportunity to complete a required course. The following policies apply:

- Directed study courses must be approved by the instructor and department concerned.
- Projects must be undertaken within the academic term in which they are registered.
- There can be no change in the basic content of the course. In particular, this means the level, subject code, description, title, grading policy (A-F, P/NP), credits and course content cannot differ from the permanent course.
- Directed study courses use the same forms and processes as independent study. Partial applications are not processed.
- Registration after published registration dates is not permitted.
- The responsibilities of the instructor of record are to
  - a. See that the grades are submitted;
  - b. See that the material is presented in full in a timely manner;
  - c. Approve the course of study;
  - d. Approve the credentials of other faculty involved; and
  - e. Agree to assume responsibility if problems arise. The faculty member must have taught the permanent course or a related course prior to teaching a directed study.

## Experiential Learning/Internship Credit

Juniors and seniors may earn up to 10 quarter hours of credit for cooperative education and internships if offered in their program. Approval by the faculty advisor and/or director of internships and cooperative education is required prior to registration or beginning the work experience. All internships follow a planned schedule of activities as established by the school in cooperation with the job establishment. Students are expected to maintain regular contact with their faculty advisor and complete appropriate assignments as dictated by their instructor.

## No Credit Registration

A student may register for no credit (NC) in any course with approval of the course instructor. Some programs may require additional approvals. No credit courses appear on the student's permanent record (transcript) with a grade of No Credit (NC). No Credit grades are not calculated in a student's

GPA, and the credit hours do not apply toward a degree. All applicable tuition and fees are charged for NC registration. Course restrictions such as prerequisites apply to NC registration.

No-credit registration may not be changed to credit registration after the deadline for registration has passed. Credit registration may not be changed to no-credit registration after the deadline to drop classes.

No-credit course registrations count as full credit value in determining the total study load allowed. If adding the no-credit course creates a course overload, standard overload procedures apply.

Students receiving any type of financial aid, scholarship, grants or tuition waiver should check with the Office of Financial Aid before registering for NC as financial aid or waiver generally cannot be applied to courses taken for no credit.

## Audit Registration

Fulltime DU students may register to audit courses on a space-available basis. Audit registration permits students to participate in courses, but grades are not recorded and credit is not awarded. Permission from the instructor is required and some programs may require additional approvals. Course restrictions such as prerequisites apply to course auditors. The following course types may not be audited: online, lab, clinical, practicum, performance (except for ensemble), internship/externship, independent or directed study or studio. Course auditors do not submit assignments or participate in exams. Audited courses do not appear on a student's transcript and do not count for fulltime status, loan deferments, financial aid, etc.

Audit registration may not be changed to credit registration after the deadline for registration has passed. Credit registration may not be changed to audit registration after the deadline to drop classes. Students may audit only one course per term.

Enrolled, degree-seeking DU students may audit certain courses on a space available basis. Tuition is not charged, but relevant course fees are charged.

## Permission for Undergraduates to Register for Graduate Courses

Undergraduates may request to enroll in graduate courses that are well suited to their programs of study. This opportunity is available to seniors whose academic achievement makes graduate-level work appropriate. This policy applies to graduate courses with course numbers of 4000 and above. Some 3000-level courses are approved for either undergraduate or graduate credit. Undergraduate courses may not be taken for graduate credit.

### Graduate courses for undergraduate credit

Students must be classified as a senior and have an overall cumulative GPA of at least 3.0. The student must obtain approval of the course instructor; chair or program director of the graduate program; Office of Graduate Education; and the student's major advisor. Graduate courses taken for undergraduate credit may not be subsequently used to satisfy graduate requirements unless the student is in an approved dual undergraduate/graduate degree program.

### Graduate courses for graduate credit

Students who have been admitted to a DU graduate program do not require permission to register for a graduate course for graduate credit. Otherwise, undergraduate students must be classified as a senior and have an overall cumulative GPA of at least 3.0. The student must obtain approval of the course instructor; chair or program director of the graduate program; and Office of Graduate Education. Courses taken for graduate credit may not be used to satisfy undergraduate requirements unless the student is in an approved dual undergraduate/graduate degree program.

## Concurrent Registration

Students wanting to enroll in courses at another institution while enrolled at DU must petition the Academic Exceptions Committee (p. 691). No transfer credit is allowed for courses carried concurrently without prior permission. The total study load allowed may not exceed 19 quarter hours. Courses taken concurrently must not be available at the University of Denver.

# Immunizations and Health Insurance Requirements

## IMMUNIZATION REQUIREMENTS

### STATE OF COLORADO AND UNIVERSITY OF DENVER IMMUNIZATION REQUIREMENTS

Colorado State Law and University of Denver policy requires all students to receive two (2) doses of vaccine against measles, mumps, and rubella (MMR) and a review of information regarding Meningococcal disease (meningitis) prior to registration. Additionally, all first year undergraduates and students living in DU Housing must show proof the Meningococcal ACWY vaccination given within the past five (5) years.

If proof of immunity and acknowledgement of meningitis information (or proof of vaccination for incoming class) is not submitted to the University of Denver Health & Counseling Center, you will not be registered for classes. **Immunization record information must be submitted to the DU Health and Counseling Center by your program's registration date.**

(Colorado Revised Statutes §25-4-901 to 909)

**Students will NOT be able to register for Fall Term classes without providing this information.**

In the event of an MMR or meningitis outbreak on campus, those students for whom an exemption has been submitted will be withdrawn from classes by the CDPHE (Colorado Department of Public Health and Environment) until the outbreak is contained (this can take six to eight weeks). Those students who have exempted out of the requirements will not be entitled to a refund of tuition or a tuition credit for any missed time.

#### **Diversity, Equity and Inclusion Note**

The HCC/DU recognizes that mandatory vaccination requirements may place undue burden on communities of color and those with trauma related to historical and contemporary experiences with medical care. We are relying on your compliance as we work to keep our communities safe. We have made efforts to remove barriers to care such as cost and access and follow the most rigorous scientific evidence available when providing and recommending healthcare to students. The premium is included on the tuition bill and is split into two coverage periods, fall and spring when students are enrolled in one (1) or more credit hours per quarter or semester.

<https://www.du.edu/health-and-counseling-center/medical/immunization.html>

**Note:** University College students are exempt from this requirement.

## **HEALTH INSURANCE REQUIREMENTS**

Student Health Insurance is a mandatory requirement at the University of Denver. If a student is covered by other insurance that complies with the Affordable Care Act requirement, in that can be waived. Refer to the Adequate Health Insurance Coverage (<https://www.du.edu/health-and-counseling-center/coveragecosts/waiver.html>) information.

*While the Health & Counseling Center (HCC) is open to all students, the HCC is not a Medicaid/Medicare provider. We encourage students to purchase the Health & Counseling Fee (HCF) in order to receive discounted services but the student is responsible for the remaining amounts as we do not bill insurance companies which includes Medicaid/Medicare. If a student is covered by Medicaid/Medicare, it is the patient's responsibility to seek a Medicaid/Medicare provider to ensure coverage for services.*

Please consider the many benefits of participating before waiving, especially if the student plans on enrolling in the Health and Counseling Fee. HCC Coverage Options (<https://www.du.edu/health-and-counseling-center/coveragecosts/>)

The Student Health Insurance Premium is assessed to students registered in most academic units on campus (excluding University College and programs including the Graduate Tax, Executive MBA and Continuous Enrollment for all programs). *The premium is included on the tuition bill and is split into two coverage periods, fall and spring when students are enrolled in one (1) or more credit hours per quarter or semester.*

\*DU students enrolled in a completely online program are not eligible for HCC services or to enroll in the DU Student Health Insurance Plan.

Please note: The DU HCC is the primary care provider for the DU SHIP.

<https://www.du.edu/health-and-counseling-center/coveragecosts/index.html> (<https://www.du.edu/health-and-counseling-center/coveragecosts/>)

## **Tuition and Fees and Financial Aid**

### **Bursar's Office**

The Bursar's Office provides the following services: tuition-billing, payment-counseling services, federal Perkins post-disbursement servicing, emergency and institutional short-term loans, tuition-receivable collection, past-due tuition payment arrangements and cashiering services. The Bursar's Office is located on the second level of University Hall, room 223. Cashiering services provided include processing tuition and loan payments. The Cashier's Office, located within the Bursar's Office, is open from 10 a.m. – Noon and 1 p.m. - 3 p.m. (MST), Monday–Thursday. The Bursar's Office can be contacted by phone at 303-871-4944, by email at [bursar@du.edu](mailto:bursar@du.edu) and by mail at Bursar's Office, 2197 S. University Blvd., Denver, CO 80208-9404.

### **Financial Aid**

In Financial Aid, we help students and their families finance a DU education. From applying for aid to managing unmet cost, we'll provide you with guidance, resources, and advice at every step along the way. Approximately 84 percent of undergraduate students receive financial assistance from the University in the form of merit scholarships, talent scholarships, need-based grants, long-term loans, and/or part-time employment. Financial aid is provided by the University, the State of Colorado, the federal government, and University supporters. All students who wish to apply for need-based aid, including scholarships, should file the Free Application for Federal Student Aid (<https://studentaid.gov/h/apply-for-aid/fafsa/>) (FAFSA) for consideration of federal and state financial aid and the CSS Profile (<https://cssprofile.collegeboard.org/>) for consideration of institutional aid. For a current student to be given priority consideration for all available funds, **the FAFSA and the CSS Profile should be filed no later than March 15th every year.** Additional documents may be requested for students who are selected for federal verification or who have conflicting information between the FAFSA and CSS Profile.

# Tuition and Fees

## Tuition and Fees

### Tuition Deposit

New undergraduate students must submit a nonrefundable \$300 deposit, payable through the Office of Admission, by May 1. The deposit is applied to the first quarter's tuition. The \$300 deposit does not apply to University College undergraduate students.

### Tuition Charges

Tuition for traditional undergraduate programs during the regular academic year (fall, winter and spring quarters) is charged at a "flat rate" for students carrying 12-18 quarter hours. Students registering for more than 18 quarter hours, including courses for no credit, are charged an hourly rate per quarter hour over 18. Other academic programs, such as those through University College, are charged an hourly rate and may have different rates. The "flat rate" does not apply to these programs. Tuition rates are the same for Colorado residents and nonresidents. The University reserves the right to make changes in tuition charges and refund policies without advance notice. Tuition and fees are due and payable on the 22nd of the month prior to the first day of the term. If registration activity occurs after the due date, tuition and fees are due and payable on the 22nd of the month following the registration activity. Information regarding payment methods and options can be found at [www.du.edu/bursar](http://www.du.edu/bursar) (<http://www.du.edu/bursar/>).

### Student Fees

To enhance opportunities for students' use of technology in and out of the classroom and to provide multiple modalities of student learning, a quarterly technology fee is charged to all students. This fee is based per quarter hour taken. The student activity fee is assessed to all undergraduates and provides funding for various campus activities designed to appeal to the entire undergraduate population.

### Late Payment Fee

Registered students for a given term who have not paid or made appropriate arrangements to pay their tuition by the due date may be assessed a late payment fee. Every 30 days thereafter an additional late payment fee will be assessed until the account is paid in full.

### Student Financial Liability

It is the student's responsibility to abide by the University's payment and refund policies.

If, after completing the registration process, the student does not withdraw from registration by the last day for 100% refund for dropped classes date published on the Academic Calendar (<http://www.du.edu/registrar/calendar/>) on the Office of the Registrar's website, the student agrees to pay the total amount of tuition and other charges set forth. The student understands that if any payment is not made when due, or if the student withdraws, or is required to withdraw, from the University for any reason, then all remaining tuition and other charges are immediately due and payable. All amounts not paid when due may begin to accrue monthly late fees. In addition, the student agrees to pay all collection costs and amounts. If the student has any overdue charges outstanding, the University may recover those overdue amounts by reducing any payments owed by the University to the student.

Students are not removed from classes based only upon non-payment. Students who do not officially withdraw from classes and do not attend have "F" grades assigned and may owe tuition and charges as specified above.

Students with a past due balance for a given term are not allowed to enroll in classes for any subsequent term. Grades and other attendance certifications are withheld and a financial hold placed on the account until payment is received.

## Tuition Refund

### Refund Information

The date of withdrawal from a class is the date that the Registration Office receives written notification of withdrawal, or the date the student drops the class via the Web. For tuition charges to be reversed at 100 percent for complete withdrawals, refer to registration deadlines listed on the Office of the Registrar's website at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>). The website posts specific refund dates. Refunds are first applied to any obligations owed to the University, including charges associated with future dates.

### Tuition Refund Appeals

A student may appeal for an exception to the University refund policy in cases where circumstances are beyond the student's control. A student must officially withdraw from the course(s) prior to beginning the appeals process. The statute of limitations for appeal is 90 days from the end of the course term for which the tuition is being appealed.

### Informal Appeal/Automatic Refund

If a student drops all classes for a given term, an informal appeal for a full refund may be made to the Office of the Registrar. An informal appeal requires that the withdrawal is completed and a request for a tuition refund is made prior to the end of the sixth week of the term (defined by the deadline for an automatic "W"). To be eligible for an automatic refund, the condition for withdrawal must meet one or more of the following criteria and must be accompanied by appropriate documentation as specified.

The death of a student (sixth-week deadline for informal appeal waived) prevents the student from completing the course(s). Documentation required: a memorial service folder, notice in the paper or copy of the death certificate.

You can't complete the course(s) because an immediate family member or a family member has died. **Documentation:** (for death) memorial service folder, notice in the paper or copy of death certificate

You've been forced to relocate for your job, or you've involuntarily lost your job and no longer are eligible for reimbursement through your employer.

**Documentation:** letter on letterhead from immediate supervisor or human resource administrator.

You're unable to complete your course(s) because of an unexpected increase in job responsibilities, required change in your work schedule or required travel. **Documentation:** letter on letterhead from immediate supervisor or human resources administrator that specifies dates of increased workload or travel

## Formal Appeal

In cases where circumstances do not fit the criteria for an informal appeal, the end of the sixth-week (automatic "W") deadline has passed or an informal appeal is not accepted, a formal appeal for a full or partial refund may be filed. Petitions are filed through MyDU (<https://my.du.edu/dashboard/>). Navigate to Student Tools, Records and Requests, then Request a tuition appeal. Petitions are reviewed and decided by the tuition appeals committee, which meets monthly. The decision of the committee is final and is communicated to the student by letter.

NOTE: In accordance with federal, state and institutional regulations, approval of an appeal may require forfeiture of any financial aid proceeds received, which may result in an outstanding balance owed to the University.

## Financial Aid

### Financial Aid Applications

- **Free Application for Federal Student Aid (FAFSA) - typically available October 1st for the following academic year**  
<https://studentaid.gov/h/apply-for-aid/fafsa> (<https://studentaid.gov/h/apply-for-aid/fafsa/>) | **School code: 001371**

The Free Application for Federal Student Aid (FAFSA) is used to determine eligibility for federal aid. We strongly encourage you to use the IRS data retrieval process when completing your FAFSA. Using this process will quickly transfer tax return data directly into your application and may prevent you from having to submit further documentation from the IRS.

- **CSS Profile - available October 1st for the following academic year**  
<https://cssprofile.collegeboard.org/> | **School code: 4842**

This application—provided through the College Board—is used to determine undergraduate eligibility for institutional aid. If your parents are divorced or separated, the noncustodial parent (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/application-process/#ncp>) must also complete a separate CSS Profile application. (Note: The CSS Profile is not required for graduate or law students, or students in the University College Bachelor's Completion program.)

## Federal Direct Subsidized/Unsubsidized Loans

An education is one of the best long-term investments you can make in your future, and borrowing is one way to fund that investment. With careful planning, a loan can be a smart decision for you and your family, as many educational loans have more favorable terms than other consumer loans (such as car loans or credit cards). However, since all loans must be repaid, you should only borrow what you need.

### Lender:

U.S. Department of Education

### Eligibility Requirements:

Available to students who have submitted a FAFSA. Subsidized loans are available to students with financial need; unsubsidized loans are available regardless of need. If eligible, one or both of these loans will be included in your financial aid offer.

### Maximum Loan Amount:

- **Dependent Students as defined by the FAFSA (except students whose parents are unable to obtain PLUS Loans):**
  - First-Year Undergraduate: \$5,500—No more than \$3,500 of this amount may be in subsidized loans.
  - Second-Year Undergraduate: \$6,500—No more than \$4,500 of this amount may be in subsidized loans.
  - Third-Year and Beyond Undergraduate: \$7,500—No more than \$5,500 of this amount may be in subsidized loans.
- **Independent Students as defined by the FAFSA (and dependent undergraduate students whose parents are unable to obtain PLUS Loans):**
  - First-Year Undergraduate: \$9,500—No more than \$3,500 of this amount may be in subsidized loans.
  - Second-Year Undergraduate: \$10,500—No more than \$4,500 of this amount may be in subsidized loans.
  - Third-Year and Beyond Undergraduate: \$12,500—No more than \$5,500 of this amount may be in subsidized loans.

### Interest Rate:

Both types of loans have a fixed interest rate (<https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized/#what-are-the-current-interest-rates>). The U.S. Department of Education pays the interest on a subsidized loan while you are enrolled at least half-time (6 credits). Interest

accrues on an unsubsidized loan while you are in school and on both loans during the grace period and during repayment. Interest can be paid as it accrues; if not paid, it will be capitalized at repayment. New fixed interest rates are set each July 1st for the upcoming academic year.

**Fees:**

An origination fee (<https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized/#other-than-interest-is-there-a-charge-for-this-loan>) is deducted at the disbursement of each installment of the loan, which means the amount you actually receive will be slightly less than the amount borrowed.

**Disbursement Requirements:**

To receive funds, you must accept the loan(s) through MyDU, complete both a Master Promissory Note and Entrance Counseling online at [www.StudentAid.gov](http://www.StudentAid.gov) (<https://studentaid.gov/>), and be enrolled in at least 6 credits (half time) that count toward your degree.

**Repayment Terms:**

Repayment begins once the 6-month grace period ends after you graduate or after you are no longer enrolled at least half time. Payments are made to your Direct Loan servicer.

**Repayment Options:**

The standard repayment period is 10 years but can be as long as 30 years depending on total borrowing and chosen repayment plan. Loans may be consolidated with other federal loans.

## Federal Work-Study/Student Employment Program

There are many good reasons to work while attending DU. Students minimize borrowing by earning money to help pay for college expenses and gain valuable skills and experience. Many studies show that working while taking classes can improve academic performance.

Financial Aid is here to assist DU students with two kinds of work opportunities: work-study and other part-time positions.

**What is work-study?**

Work-study is a need-based type of financial aid that allows students to work on campus (or with an approved off-campus employer) to earn money to help pay for educational expenses. It's not a grant (because you must work to earn it), and it's not a loan (because you don't have to repay it).

**Eligibility:**

Because work-study funding is limited, it's not included in all students' aid offers. Priority is given to those who applied for financial aid by the priority deadline, and if eligible, it will be included in their financial aid offer. If you have been offered work-study, you must accept it in MyDU by **July 1st** and secure a position by **November 1st** or it will be canceled. (Current students who are studying abroad in the fall have until **January 31st** to secure a position.)

You can only apply for work-study positions if you have this award as a part of your financial aid offer, and you must be enrolled in at least 6 credits (half time) that count toward your degree to use it.

**Getting Paid:**

The amount shown in your financial aid offer is the maximum amount you can earn over the academic year (typically **\$2,500** for new students and **\$3,000** for continuing students). Actual earnings will depend on your work schedule and hourly rate. Since there is no pre-set pay rate, the amount earned will depend on your position. You'll be paid every two weeks for the hours worked, and your paycheck will be sent directly to you (not applied to the student's bill).

**Other Part-Time Positions:**

There are other work opportunities available! Student Employment maintains an online job board of part-time on- and off-campus positions. These positions are available to all students, regardless of financial need or work-study eligibility. Access the job board listings through Pioneer Careers (<http://du.edu/pioneer-careers/>).

For more information about employment opportunities, contact [stuemp@du.edu](mailto:stuemp@du.edu).

## AID-ELIGIBLE COURSEWORK POLICY

The U.S. Department of Education requires institutions to ensure that federal financial aid funds are only used to pay for courses that apply to a student's degree program. Beginning with the 2023 fall term, courses that do not count toward a student's degree program may be ineligible for federal or state financial aid.

**Types of Aid Affected**

All types of federal and state financial aid are impacted by this policy. This includes:

- Federal grants and scholarships (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/grants-scholarships/#federal>) (including the Pell Grant and SEOG), work-study (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/work-study/>), Direct Subsidized/Unsubsidized loans (<https://www.du.edu/admission-aid/financial-aid->

scholarships/undergraduate-financial-aid/types-aid/loans/), and the Direct Parent PLUS loan (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/loans/>)

- Colorado Student Grant (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/grants-scholarships/#state>) and Colorado Work-Study (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/work-study/>)

**Institutional grants and scholarships (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/grants-scholarships/>) and the College Opportunity Fund (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/types-aid/grants-scholarships/#state>) (COF) are not impacted by the aid-eligible coursework policy.** Please note, however, that most types of institutional aid require full-time enrollment (12 credits or more) to remain eligible for funding.

### Determining Courses in Degree Program

A student's degree program is defined by the course and credit requirements listed in the bulletin (<http://bulletin.du.edu/graduate/>). You can use the degree audit tool (<https://www.du.edu/registrar/academic-programs/degree-evaluation/>) to view the courses you must complete for your degree and monitor your academic progress toward graduation. Please contact your academic advisor with any questions about program requirements.

### Courses Eligible for Federal & State Aid

Your financial aid enrollment status may be different from your actual enrollment status. With the exception of the Pell Grant, undergraduate students need to be enrolled in **at least 6 credits** that count toward their degree to be eligible for all types of federal and state aid. So, even if you're enrolled in a class that doesn't count toward your degree, you may still be eligible for federal and state aid. The Pell grant works a little differently. If a student is enrolled in less than 12 credits, the Pell grant is reduced. Students with an EFC less than 4401 (<https://studentaid.gov/help-center/answers/article/what-is-efc/>) may still be eligible for a portion of their Pell Grant if enrolled less than half time.

### Notifications and Adjustments

Students whose aid eligibility is impacted by the aid-eligible coursework policy will be notified after class registration via their DU student email. If you're no longer eligible for federal or state aid, your financial aid will be adjusted prior to disbursement (<https://www.du.edu/admission-aid/financial-aid-scholarships/graduate-financial-aid/managing-your-aid/your-bill-receiving-your-aid/>) for that term.

Please visit the financial aid website (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/policies-maintaining-aid-eligibility/aid-eligible-coursework/>) for much more information about this policy.

## Satisfactory Academic Progress

To continue receiving financial aid, you must maintain Satisfactory Academic Progress (SAP).

Federal regulations require us to monitor the academic progress of *all* students receiving financial aid toward the completion of their degree. **(Please note: this policy pertains only to financial aid and is separate from other academic policies published by the institution.)** SAP is monitored every year—usually in mid-to-late summer—and is effective the following fall term. As a financial aid recipient, you must maintain the following minimum standards to continue receiving financial aid:

- **You must maintain a Cumulative Grade Point Average (CGPA) of 2.00** (2.50 for BS in Accounting students).
- **You must complete and pass a minimum of 66.6% of all courses attempted.** This is known as your Cumulative Completion Rate (CCR).
- **You must complete your degree within 150% of the minimum credits required to graduate.** This is known as the Maximum Time Frame (MTF) limit.

Visit the Financial Aid website (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/policies-maintaining-aid/sap/>) for more information.

## Withdrawal and Financial Aid

Any student who begins classes at DU, applies for financial aid, completes all of the requirements to obtain aid, and then withdraws from classes may have their financial aid adjusted according to federal, state, and institutional regulations. Students must contact the Office of the Registrar to withdraw officially from the University and must contact Academic Advising after withdrawing to complete leave of absence information. Leave of absence affects financial aid status upon return to the University; it does not affect withdrawing from the University.

Students who withdraw during the 100 percent refund period (drop/add) for any term may have all of their aid for that term canceled and returned depending on the type of withdrawal. Students who drop below the number of hours reflected in their financial aid budget during the drop/add period will have their budget adjusted to reflect the new hours and aid will be adjusted accordingly.

## Return of Title IV (R2T4) Funds Policy

Title IV (Federal) funds are awarded to you under the assumption that you will attend school for the entire period for which the assistance is awarded. When you withdraw from all courses, for any reason including medical withdrawals, you may no longer be eligible for the full amount of Title IV funds you were originally scheduled to receive.

If you withdraw from all courses before completing at least 60% of the term, you may be required to repay a portion of the federal financial aid you received for that term. A pro-rata schedule is used to determine the amount of federal student aid funds you will have earned at the time of withdrawal.

The return of funds is based upon the concept that students earn their financial aid in proportion to the amount of time in which they are enrolled. Under this reasoning, a student who withdraws in the second week of classes has earned less of his/her financial aid than a student who withdraws in the seventh week. Once 60% of the term is completed, you are considered to have earned all of your financial aid and will not be required to return any funds. If you withdraw during the 100% refund (add/drop) period for any term, all of your aid for that term will be canceled and returned.

Visit the financial aid website (<https://www.du.edu/admission-aid/financial-aid-scholarships/undergraduate-financial-aid/policies-maintaining-aid/withdrawal/>) for more information.

## Academic Standards and Grading

### Academic Standards

#### Good Academic Standing

A student in good academic standing has earned a number of grade points equal to at least twice the number of quarter hours attempted (i.e., has a 2.0 cumulative GPA).

#### Academic Warning, Probation, Suspension, and Dismissal

Registration can be denied to any student not in good academic standing.

The records of students not making satisfactory academic progress are reviewed after fall, winter, spring, and summer quarters.

Students on academic probation, last quarter probation, suspension, or dismissal are notified at the end of each quarter via the student's DU email address. Expectations for students on academic probation are communicated in writing to the student.

Students with a GPA below 2.0 are ineligible to represent the University in intercollegiate activities.

#### *Precipitous Decline*

Students who have a cumulative GPA of above 2.2 but earn below a 1.5 in an individual quarter will receive a notification of the decline in their GPA.

#### *Academic Warning*

A student with a cumulative GPA between 2.2 and 2.0 is placed on academic warning while remaining in good academic standing with the University.

#### *Academic Probation*

A student will be placed on academic probation if their cumulative GPA drops below 2.0.

A student on academic probation may continue enrollment but must meet certain conditions set by the University and the appropriate academic unit.

Failure to meet the terms of academic probation for two consecutive terms, or one term if the cumulative GPA is below 1.0, will result in last quarter probation.

#### *Last Quarter Probation*

A student will be placed on last quarter probation if they meet one or more of the following criteria:

- a. Has not earned a term GPA of 2.0
- b. Has failed to meet the terms of their academic probation

A student on last quarter probation may continue enrollment but must meet certain conditions set by the University and the appropriate academic unit.

Failure to meet the terms of last quarter probation will result in academic suspension, and may result in dismissal. Meeting the terms of last quarter probation will move the student back to academic probation (if GPA is still below 2.0), academic warning (if GPA is between 2.0 and 2.2), or good standing (if GPA is above 2.2).

#### *Academic Suspension*

Students may be academically suspended for up to one academic year. Students may apply for early re-entry; details will be included in the student's suspension letter.

An academically suspended student who wishes to re-enroll must apply for re-entry to the University at least six weeks before the start of the quarter in which the student wishes to enroll.

Students will re-enter the university as re-entry probation status. Students must meet the requirements for last quarter probation above. Failure to meet these requirements will result in dismissal.

#### *Academic Dismissal*

Students may be dismissed if they fail to meet the terms of academic probation or last quarter probation.

A student who is academically dismissed may not enroll again at the University of Denver as an undergraduate student.

#### **Appeals**

A student placed on academic suspension or academically dismissed from the university may appeal the decision, within three business days of the original decision. Instructions for appeal are included within the student's suspension or dismissal letter. Placement on academic warning, academic probation, or last quarter probation may not be appealed.

## **University Grading System**

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at the University of Denver:

Grade Symbols	Grade Points	Interpretation
A	4	excellent
A-	3.7	
B+	3.3	
B	3	good
B-	2.7	
C+	2.3	
C	2	satisfactory
C-	1.7	
D+	1.3	
D	1.0	
D-	0.7	minimum passing
F	0	failure

If a student ceases attending classes or submitting assignments (and has not earned a passing grade) and if the student has not made arrangements for an incomplete (I), a failing (F) grade must be assigned.

Failing ("F") grades may also be assigned under the following circumstances:

- A student drops a course without permission and/or official notice to the Office of the Registrar.
- A student's academic work is judged failing as a result of a finding of academic dishonesty.

If a student registers for a class but never attends any sessions, then a grade of Never-Attend ("NA") should be assigned instead of a failing (F) grade. A never-attend (NA) grade is treated like a failing (F) grade and will show up as an NA on the student's transcript.

An incomplete ("I") is a temporary grade that may be given to a student at the instructor's discretion when illness, necessary absence or other reasons beyond the control of the student prevent completion of course requirements by the end of the academic term. Incomplete grades may only be given in the following circumstances:

- The student's work to date is passing.
- Attendance has been satisfactory through at least 60 percent of the term.
- An illness or other extenuating circumstance legitimately prevents completion of required work by the due date.
- Required work may reasonably be completed in an agreed upon time frame.
- The incomplete is not given as a substitute for a failing grade.
- The incomplete is not based solely on a student's failure to complete work or as a means of raising his or her grade by doing additional work after the grade report time.
- The student initiates the request for an incomplete grade before the end of the academic term.

Appropriate grades must be assigned in other circumstances. A failing grade and last date of attendance should be recorded for students who cease attending class without authorization. Students who are unable to complete a course and who do not meet these circumstances should consider dropping the course.

The following provisions for incomplete grades apply:

- Instructors are to record the incomplete initially in MyDU under the Grade Entry page. When the student's work has been completed, the instructor then submits the final grade using the Change of Grade Process through M (<https://my.du.edu/dashboard/>)yDU (<https://my.du.edu/dashboard/>). Steps for this process can be found at <http://www.du.edu/registrar/records/changinggrades.html>.
- It is in the student's best interest that incomplete grades be made up by the end of the following academic term. Incomplete grades must be made up and final grades submitted within one calendar year from the date the incomplete was recorded.
- The course work may be completed while the student is not enrolled.
- Incomplete grades appear on the transcript for one year. Incomplete grades do not affect the grade point average. After one year, or at the time of graduation, incomplete grades will change to "F" and affect GPA. This policy affects incomplete grades given in fall 1995 and thereafter. Prior to 1995, unchanged incompletes remained on the permanent record as part of hours attempted and were calculated as a failing ("F") grade in the GPA.
- An incomplete grade may not be considered passing for purposes of determining academic standing, federal financial aid eligibility, athletic eligibility or other purposes.
- Notation of the original incomplete status of the grade remains on the student's transcript along with the final grade.
- An incomplete should not be assigned when it is necessary for the student to attend additional class meetings to complete the course requirements. Students who receive an incomplete grade in a course must not register again for the course in order to remove the "I."
- An incomplete is not to be assigned where the normal practice requires extension of course requirements beyond the close of a term (e.g., thesis or project type courses).

NC: registered for no credit

W: a notation that the course is withdrawn without prejudice; zero grade points per quarter hour; no hours credited

Use of intermediate grades (plus and minus) is at the discretion of the instructor.

See Grade Appeals (p. 690) for more information.

## Grade Point Average (GPA)

The GPA is determined by multiplying the credit points (for example, "B+" = 3.3) by the number of credit hours for each course. Total the credit hours attempted, total the credit points and divide the latter by the former. Grades of NC, I, P+, P, NP and W are not included in the GPA. Incompletes that are not completed within one year are calculated as an "F" in the GPA. All grades for repeated courses are included in determining GPA. Undergraduate, graduate and specific program GPAs may be calculated separately.

## Pass/Fail

In general, undergraduates may not take a course for pass/fail credit.

## Change of Grade

Grades submitted by instructors at the end of the quarter are final and not subject to change by reason of revision of judgment on the part of the instructor. Grades cannot be changed on the basis of second trial, such as a new examination or additional work undertaken or completed after the grade report has been submitted to the Office of the Registrar. Grades may only be changed due to one of the following:

1. Correction of Error in Grading
2. Grade Appeal
3. Completion of an Incomplete Grade

An instructor of a course is the only individual who can change a grade. In the event of error, the faculty member should initiate the Change of Grade Process through M (<https://my.du.edu/dashboard/>)yDU (<https://my.du.edu/dashboard/>). Steps for this process can be found at <https://www.du.edu/registrar/faculty-staff-resources/grading-guide>. Any correction or appeal of a grade must take place in the quarter following the one in which the grade was given.

## GPA Replacement Policy

The University of Denver allows degree-seeking undergraduate and graduate students to repeat most courses in order to meet the minimum grade requirement for a required course, subject to limits imposed by individual schools and colleges. When a student repeats a course, grades from

all attempts appear on the student transcript, and all grades are used in computing cumulative and major grade point averages, total credits, and academic standing. This policy adds the option of GPA replacement to the option of repeating a course.

## Additional Details:

In order to invoke GPA replacement policy for a course, a student must have received an eligible grade in a prior attempt of the course. Grades of **C-, D+, D, D- or F** are eligible for repeat/replace for **undergraduate** students, and grades of **B-, C+, C, C-, D+, D, D- or F** are eligible for repeat/replace for **graduate** students. Once a student invokes the GPA replacement policy for a course, that decision is irrevocable.

When GPA replacement is invoked, the grade from the latest attempt of a course replaces the grade from the most recent prior attempt of the same course in the cumulative GPA.

Grades from all attempts of a course appear on a student's transcript, with those attempts that have been replaced appropriately indicated. The replaced grade is excluded from cumulative grade point average and credit totals in the official academic record; the grade from the latest attempt is included, even if the grade earned in the latest attempt is lower than the replaced grade.

Students should consider whether this is the best way to improve their GPA. Most students will find that when they repeat a course, there is only a small impact on their overall GPA. Another way to increase GPA is to take additional courses and do well in them. Finally, if a student is repeating a course to increase their GPA for their graduate or professional school applications, it is useful to know that these schools may calculate a student's GPA differently.

A student may wish or need to strengthen their knowledge of a particular topic in order to prepare for future classes. This can be a good reason for repeating a course. Undergraduate majors and minors require students to achieve a minimum grade of "C-" in order to count toward graduation requirements. In some programs, Graduate students are required in to receive a B- or better in their coursework.

**A course will not necessarily be easier the second time around. If a student chooses to repeat a course, they should maximize their chances for success by utilizing available resources and practicing good study habits.**

## Eligibility:

- This policy may be invoked only by currently enrolled, degree-seeking University of Denver undergraduate or graduate students. Sturm College of Law students may not invoke this policy and are subject to the academic and grading policies of the Law School.
- Students who have graduated are not eligible for GPA replacement for courses taken prior to earning their degree.
- The policy applies only to undergraduate or graduate courses taken and repeated at DU. Classes ineligible for grade replacement are FSEM, special topics courses and courses designated in the catalog as repeatable for credit (e.g. independent study/research, internship, field experience, thesis/dissertation hours, directed research/study, performance).
- **Undergraduate** students may request grade replacement for up to **4 classes**.
- **Graduate** students may request grade replacement for up to **2 classes**.
- If a student receives a low grade in a class due to academic dishonesty, that grade is not eligible for GPA replacement via this policy.
- Once a student invokes the GPA replacement policy for a course, that decision is irrevocable.
- Courses taken for GPA replacement must be taken for a letter grade.
- Students may request grade repeat/replace only if the particular course is offered again. There is no guarantee that all courses are offered on a schedule that would permit repeat for every student.
- No retroactive adjustments or transactions for prior terms will be performed as a result of repeating a course, including changes to academic standing, or eligibility for honors, athletics, or financial aid.
- Some academic units may limit the number of times a student can enroll in a given course. Such limits must be observed when invoking this policy.
- Grades of incomplete are not eligible for repeat with GPA replacement.
- Requests to invoke the GPA replacement policy must be completed by the **last date for course withdrawal**.
- A request to invoke the policy will be approved as long as the exact same course (subject code, course number) is selected, and the student has enough grade repetition credits left to cover the course. Once the grade repeat/replace credits are fully used, then there will be further no GPA replacement and all subsequent grades will be calculated into the cumulative GPA.
- If a student invokes the grade repeat/replacement policy but drops or withdraws from the course before the end of the term, this attempt does not count against the number of credits a student is allowed to repeat, and the grade from the most recent prior attempt stands.
- All occurrences of the course along with associated grades will remain on the student's academic record as well as on the official transcript. Only the replacement grade will be calculated into the cumulative GPA.
- Tuition is charged for all course attempts. There may be federal financial aid implications for the number of times a specific course is repeated. Students are responsible for checking with the Office of Financial Aid regarding course repeats and aid eligibility.

# Procedure for Grade Appeals

## Procedure for Grade Appeals

### Guidelines for Interpretation and Implementation

#### Scope of Review

Grade appeals must be based on problems of process and not on differences in judgment or opinion concerning academic performance. The burden of proof rests on the student to demonstrate that one or more of the following occurred:

- The grading decision was made on some basis other than academic performance and other than as a penalty for academic misconduct.
- The grading decision was based upon standards unreasonably different from those which were applied to other students in the same course and section.
- The grading decision was based on an unreasonable departure from previously articulated standards, such as standards defined in the course syllabus.

The chairperson, grade appeal committee, or dean may recommend grade changes but shall have the power to alter grades only in cases of clearly established procedural error or substantial capriciousness or arbitrariness in evaluation.

#### Timeline

The formal procedure must be started within 45 calendar days after the contested decision or grade was officially recorded. The grade appeal process officially begins on the date the "Academic Appeal" document is received by the faculty member.

#### Appeal Record

Any appeal must be in writing, dated and headed with the words "Academic Appeal." Once a formal appeal is presented to a faculty member, it must be presented in its original form at all later levels of appeal, although new statements may be added at any time.

Any evidence and all direct and supporting statements once made become part of the permanent record of the appeal and must be produced at each level of appeal.

At each level of appeal, a written, dated decision and written reasons for the decision must be provided to the affected party or parties—the student, the faculty member, and any person who has rendered a decision at an earlier level of appeal.

Students are permitted to submit evidence in writing. At the discretion of the University, students may be invited to present their appeal in person.

## Grade Appeal Process

### First Level: Appeal to the Faculty Member

A student will, where possible, attempt to resolve the issue informally with the professor before filing a written grievance. Should attempts at informal resolution fail, the student may wish to file a formal grade appeal. After receiving a formal appeal, the faculty member shall assure that a written decision with express reasons is available or delivered to the student within 30 calendar days. Should the student fail to take further action within seven calendar days after receiving the faculty member's decision, that decision shall stand. If the student is dissatisfied with the decision or does not receive a response from the faculty member within 30 calendar days, he or she may proceed to the second level of appeal.

### Second Level: Appeal to the Department Chair/Program Director

If the student elects to continue the appeal, he or she may appeal to the chair of the department or program director if there is no chair. The chair or director shall assure that a written decision or recommendation about the appeal is available or delivered with express reasons within 30 calendar days after receiving the appeal.

If the student is dissatisfied with the decision or does not receive a response from the chair or director within 30 calendar days, he or she may proceed to the third level of appeal. Should the student or faculty member fail to take action on the chair's decision or recommendation within seven calendar days following its receipt, the accepted recommendation of the faculty member or new decision by the department chair shall be final.

### Third level: Appeals Committee

If the student elects to continue the appeal after the chair's decision or recommendation has been received, he or she may take the matter to the dean of the appropriate academic unit (or the dean's designee) within seven calendar days.

The dean shall ascertain within 30 calendar days whether the appeal procedures at the first and second levels have been duly followed; if they have not, he or she will require that they be followed before taking further action.

The appeals committee shall consist of three faculty members chosen by the dean or the dean's designee. The dean or designee shall serve on the appeals committee as chairperson without vote. All deliberations of the committee will be closed and confidential.

Faculty from the same department as the faculty member involved in the case may not serve on the appeals committee.

The appeals committee should meet as soon as possible, but no later than 30 calendar days after a written, dated request for appeal at this level has been received and the Dean has ascertained that appeal procedures at the first and second levels have been duly followed. The presence of all eligible committee members (the three faculty members and the dean or designee) shall constitute the quorum.

A written recommendation shall be furnished by the appeals committee and transmitted through the office of the dean to all affected parties within seven calendar days after the conclusion of the committee's deliberations.

The decision of the appeals committee is final.

**Note:** *There is a separate appeal procedure for courses taught in the College of Law. Students with grievances in College of Law (<http://www.law.du.edu/>) courses should consult the specific guidelines for academic grievance procedures for that unit.*

## Academic Exceptions Policy

### Academic Exceptions Policy

Academic policies define institutional standards and ensure equitable treatment of all students. All students are expected to observe the academic policies and practices of the University set forth in the University Bulletin. However, in instances of documented extraordinary circumstances, a student may request an exception to a policy or practice.

The Academic Exceptions Committee is a standing subcommittee of the Undergraduate & Graduate Councils which represents the Councils' interests as advisory to the Vice Provost for Academic Affairs. As chair of the Committee, the Vice Provost appoints its members and ensures that the Committee is representative of appropriate academic and administrative units. Decisions of the Committee are final.

#### Purview

The Academic Exceptions Committee considers requests for exceptions to University-wide academic policies affecting students. This is an academic committee that cannot take considerations of convenience, financial cost, or academic standing into the decision.

Exceptions should be submitted within one calendar year after the completion of the quarter in question and prior to a student's degree being certified and posted to the transcript. Any exceptions that do not meet this expectation should include a rationale for why the request was not made within the appropriate timeframe.

#### Required Documentation

A valid petition includes, at minimum, the official online request submission through [M \(https://my.du.edu/dashboard/\)](https://my.du.edu/dashboard/) [yDU \(https://my.du.edu/dashboard/\)](https://my.du.edu/dashboard/), written documentation from the student and supporting documentation, as appropriate for the petition type. Additional documentation may be required. Documentation may be emailed to [academicexceptions@du.edu](mailto:academicexceptions@du.edu) or faxed to 303-871-4566. It is the responsibility of the student to ensure that all documents are submitted in a timely fashion.

The Vice Provost for Academic Affairs or designee has final determination as to whether the documentation the student has submitted is sufficient.

#### Petition Review and Status

- It is the responsibility of the students to check the status of their petitions and respond to requests by the Committee representative.
- The student will be notified (via MyDU (<https://my.du.edu/dashboard/>)) of the decision within one week of when the request was reviewed.
- A student has 45 days from the initial submission to complete the petition. If, at the end of 45 days there are still outstanding documents, the petition will be cancelled, and the student will need to resubmit a new petition.
- A student may re-petition if there is new documentation that was not reasonably available at the time of the initial decision.

## Procedures for Academic Grievances and Appeals

Active students may appeal academic and student status related decisions and/or seek resolution of complaints or grievances through the Academic Grievance and Appeal Procedure during their enrollment at the University of Denver.

Graduate units may have additional requirements specific to their accreditation or professional standards. It is the responsibility of the student to determine whether the graduate unit has specific requirements and the responsibility of the unit to ensure that those requirements are addressed prior to advancing the grievance to the Office of the Provost. In the event of conflict between any grievance process published in unit manuals or websites, the formal grievance process (p. ) will govern.

## Eligible and Ineligible Concerns

### Eligible Concerns

These procedures may be used only by active students with the following concerns:

- A grievance or appeal regarding academic standing during their enrollment at DU.
- An academic decision made by a faculty or staff member, administrator or committee of the University of Denver that directly and adversely affects the student—e.g., program termination or dismissal, academic suspension, removal from a course, termination of GTA or GRA appointment.
- The grievance or appeal must be based on problems of process or concerns of bias, retaliation, or other impropriety and not on differences in judgment or opinion concerning academic performance.

**Note:** Students who wish to appeal a termination or dismissal from a program must do so within 45 calendar days of the term following their last term as an active student. For concerns of bias and retaliation based upon a protected class, the grievance will be referred to the Equal Opportunity Office, which may alter the timeline and process.

## Ineligible Concerns

These procedures may not be used to resolve the following concerns:

- appeals related to disciplinary actions taken by the Conduct Review Board
- grade appeals
- admission decisions
- appeals or grievances submitted beyond the published timeline

# Formal Grievance and Appeal Process

## First Level: Informal Resolution

Students are expected to attempt to resolve complaints informally with the faculty or staff member, administrator or committee responsible for the academic decision. This attempt must include discussion of the complaint with the involved party or parties. *If all reasonable informal efforts to resolve a complaint fail, the student may file a formal grievance or appeal.*

If the complaint involves a charge of unlawful discrimination, the student may report the situation to the Office of Equal Opportunity or an appropriate supervisor who must immediately notify the Office of Equal Opportunity.

## Second Level: Submission of the Formal Grievance or Appeal to Program Director/Chair

If a student elects to file a formal grievance or appeal, it must be filed within 45 calendar days into the next quarter after the contested decision or grade was officially recorded and during which the student is enrolled at DU. All grievances and appeals must be filed in writing, signed and dated by the student and include supporting documentation at the time it is filed. The grievant/appellant must minimally provide the following:

- a clear description of the decision being grieved or appealed,
- the basis or bases for challenging the decision,
- the identity of the party or parties who made the decision,
- the specific remedy or remedies requested, and
- a description of all informal resolution attempted.

The decision of the program director or department chair must be issued in writing within 30 calendar days of receiving the grievance and shall include all of the following:

- a copy of the student's formal grievance,
- relevant findings of fact,
- decision and the reasons for the decision reached, and
- the remedy which is either granted or denied and/or any alternative remedies suggested.

## Third Level: Submission of the Formal Grievance or Appeal to Dean

The party who finds the resolution unsatisfactory may appeal the decision in writing to the dean of the academic unit within five business days of receiving the program director or department chair's written decision.

The dean may render a decision on the matter or may refer the grievance or appeal to a standing grievance/appeal committee or establish an ad hoc committee to hear the matter. When an ad hoc committee is established, the student who lodges the appeal may designate one of the faculty members who will serve on this committee. This member must be tenured or tenure-track faculty from the University of Denver. Members of the unit involved in the grievance may not serve on the ad hoc committee and must recuse themselves if they are members of the standing committee.

The committee may, at its discretion, receive from the student, relevant faculty or staff members or other individuals, any additional evidence or argument that it deems necessary to resolve the grievance or appeal.

The appeals committee will begin deliberations as soon as possible and provide the dean a written recommendation no later than 30 calendar days after the date that the dean's office received the written, dated request for appeal at this level. The dean will make a final decision and distribute it to all affected parties within five business days after receiving the committee's recommendation.

### **Fourth Level: Submission of the Formal Grievance or Appeal to Provost**

The party who finds the resolution unsatisfactory may appeal the decision to the Provost within five business days of receiving the dean's decision. The Provost will hear only those grievances and appeals based on problems of process or concerns of bias, retaliation, or other improprieties unrelated to protected class status and not on differences in judgment or opinion concerning academic performance. Within five business days after receiving the appeal, the Provost may refer grievances or appeals to appropriate bodies or personnel. If the issue is referred to the Graduate Council, its chair will appoint three members of the Council as a Grievance Committee to hear the case and shall designate one of the committee members to serve as chair.

Anyone called upon by the Provost or the Provost's designee shall submit a written recommendation within 30 calendar days of receiving the case. The Provost is the final authority in the matter and will report the disposition of the case to all involved parties within 30 calendar days of receiving a recommendation from the designee.

### **Scope of Review**

Any University agent charged with reviewing a formal grievance or appeal may gather additional relevant facts if necessary and/or meet with involved parties. The reviewer will base a decision on documented evidence.

### **Deviation from Procedures**

These guidelines provide basic steps for resolving appeals and grievances. The steps may vary based upon the structure of the academic unit or the particularities of the situation. The Provost or the Provost's designee may choose to approve or may direct a deviation from these procedures, for example, postponement of a time limit or elimination or addition of a step in the process, in order to ensure an effective and timely resolution.

### **Grievance or Appeal Record**

Documentation in support of a grievance or appeal will be held by the person responsible for considering the grievance or appeal at that stage and passed along to the person responsible for the next step, if any. A record of meetings or interviews must be made and kept as part of the grievance or appeal record as well. The complete grievance or appeal record will consist of the original grievance or appeal, all documentary evidence and all formal decisions made at each step of the process.

### **Failure to Meet Deadlines**

If after a formal grievance or appeal is filed, the University agent charged with review of the grievance or appeal fails to meet any deadline at any stage of the process, the grievant/appellant may proceed directly to appeal to the next higher University administrator in the manner prescribed by these Procedures, subject to the relevant time limitation calculated from the date of the missed deadline. The failure of any University administrator to meet any deadline shall not entitle the grievant/appellant to any relief requested, nor shall such a failure be construed as tantamount to a decision in the grievant/appellant's favor. Any grievant who fails to meet the deadlines imposed by these Procedures will be bound by the decisions previously made.

*\* The Provost may refer grievance appeals to appropriate bodies or personnel.*

## **Discrimination or Harassment Complaint Procedures**

The University is committed to creating and maintaining a community in which people are treated with dignity, decency, and respect. The environment of the University should be characterized by mutual trust, freedom of inquiry and expression, and the absence of intimidation, oppression, and exploitation. People in this community should be able to work and learn in a safe atmosphere. The accomplishment of this goal is essential to the academic mission of the University. Consistent with this commitment, the University will not tolerate any unlawful discrimination, harassment, or gender-based violence of any kind. When the University becomes aware that a member of the University community may have been subjected to or affected by discrimination, harassment, gender-based violence, the University will take prompt, appropriate action to enforce University policy.

We do this by facilitating compliance with Title VI, Title VII, Title IX, Affirmative Action, Equal Pay, Age Discrimination in Employment, ADA and Section 504, VEVRRA, USERRA, GINA, as well as other applicable federal, state, and local non-discrimination laws.

The University's Office of Equal Opportunity & Title IX (EOIX) is responsible for enforcing the University's Discrimination and Harassment Policy pursuant to the published University's procedures located on the Office of Equal Opportunity & Title IX's website (<https://www.du.edu/equalopportunity/policies-procedures/>), which offer options for supportive measures, informal, and formal resolution. The policy and procedures are intended to comply with the prohibitions of all applicable federal, state, and local non-discrimination laws.

Office of Equal Opportunity & Title IX policies and procedures ([https://www.du.edu/equalopportunity/policies\\_procedures/](https://www.du.edu/equalopportunity/policies_procedures/))

## Discrimination or Harassment Complaint Procedures

The University is committed to creating and maintaining a community in which people are treated with dignity, decency, and respect. Office of Equal Opportunity & Title IX policies and procedures ([https://www.du.edu/equalopportunity/policies\\_procedures/](https://www.du.edu/equalopportunity/policies_procedures/))

## Complaints for External Agencies

Several external agencies are available to students who have exhausted all other opportunities for resolution within the University.

### Colorado Department of Higher Education

The Colorado Department of Higher Education regulates Colorado institutions of higher education. Their complaint policy may be found on the Colorado Department of Higher Education (<https://higher.ed.colorado.gov/students/how-do-i/file-a-student-complaint/>) website.

### U.S. State Education Regulatory Agencies

Through distance learning and other programs, the University of Denver provides instruction throughout the world. Students may direct concerns or complaints to regulatory agencies in their state. A list of U.S. state education regulatory agencies can be found on the State Contacts (<https://www.du.edu/site-utilities/statecontact/>) page.

### Higher Learning Commission

Complaints regarding the institution's ongoing ability to meet the criteria of institutional accreditation may be directed to the Higher Learning Commission. Individuals interested in bringing an appropriate complaint to the attention of the Commission should take some time to compile a complete submission, as outlined below. The official complaint must be submitted through the on-line form (<https://www.hlcommission.org/Student-Resources/complaints.html>).

- a. Write a letter directed to the Commission containing a brief narrative of the facts of the complaint. In most cases, such a narrative need be no longer than a few pages.
- b. Indicate in your complaint why you believe the issues raised in your complaint are accrediting issues. If possible, please review the Commission's Criteria for Accreditation (<https://www.hlcommission.org/Policies/criteria-and-core-components.html>) on the Commission's (<https://www.hlcommission.org/>) website prior to writing this section. You should also indicate how you believe the Commission can assist you with this matter. Remember that the Commission cannot assist you in understanding your tuition bill, arranging for a refund of tuition, obtaining a higher grade for a course, seeking reinstatement to an academic program, etc.
- c. Attach documentation to support your narrative wherever possible. (For example, if you make reference in your complaint to an institutional policy, include a copy of the policy with your complaint.) Helpful documentation might include relevant portions of the catalog, letters or email exchanged between you and the institution, learning agreements, etc.
- d. A few reminders:
  - Please do not use abbreviations or nicknames (e.g., NMS or USC or U of N).
  - Include contact information for future correspondence.
  - If you are writing on behalf of someone else (son/daughter or client), be sure to provide that person's consent in writing to allow you to communicate with the Commission on the student's behalf.

Please note that the Commission will not consider those complaints that are not in writing and do not contain the elements noted here. The Commission's complaint policy precludes it from considering matters more than 5 years old.

The Commission will acknowledge your complaint within thirty days of receiving it and let you know whether your complaint is complete and whether it raises issues that are related to accrediting requirements or whether it is an individual dispute outside the jurisdiction of the Commission's complaint policy.

Email questions to [complaints@hlcommission.org](mailto:complaints@hlcommission.org)

## Academic Support

### Anderson Academic Commons

The Anderson Academic Commons brings together the University of Denver's top library and academic support services in one place to enhance student learning. The Academic Commons is the campus centerpiece for collaborative, technology-infused teaching, learning, and engagement. The main library and other key services located in the Anderson Academic Commons support research, writing, teaching and learning as well as provide access to collections, services, technology and a wide variety of study spaces. For more information on the library's services and collections, please see <http://library.du.edu> (<http://library.du.edu/>).

### Center for World Languages and Cultures

The Center for World Languages and Cultures (CWLC) supports and encourages the study of languages and cultures and provides free language tutoring for all DU students, including English for non-native speakers, at the Language Center in the Anderson Academic Commons. In addition, the Center facilitates the study of a number of less commonly taught languages through various programs. The CWLC administers the language placement tests for DU undergraduate students, as well as the graduate language proficiency tests. The CWLC is generally open from 8 a.m.-4:30 p.m., Monday-Friday. For more information, visit our website (<https://liberalarts.du.edu/cwlc/>) <https://liberalarts.du.edu/cwlc> (<https://liberalarts.du.edu/cwlc/>) or contact us at 303-871-4601 or [cwlc@du.edu](mailto:cwlc@du.edu).

### Digital Media Center

The Digital Media Center (DMC) is a self-service, post-production studio and is open to students, faculty, staff and members of the public. A key value of the DMC is the empowerment of all users, from beginner to advanced, so that users become independent and proficient in using high-end professional production and editing software.

### Information Technology Help Center

The Information Technology (IT) Help Center provides phone, email, chat, web, and drop-in services for computer support for all faculty, staff, and students at the University of Denver. Hardware and software support is provided for both PCs and Macs. The Help Center also assists with issues related to DU network services and Microsoft Office products.

### Lending Services Desk

The Lending Services Desk facilitates access to the University Libraries systems, services, materials and information. Key services available at the desk include materials and gadget check-out, course reserves, and interlibrary loan.

### Math Center

The Math Center offers free, drop-in assistance for Business Calculus, Calculus I, II and III, Elements of College Algebra, and College Algebra and Trigonometry. The Math Center provides a place to study, to do homework, and to ask questions. Students are encouraged to work with other students in the same class.

### Research Center

The Research Center offers expert guidance through the research process: from refining a topic to finding and evaluating relevant sources to using citation software. A consultation session can ease anxiety about a project or paper and teach research and evaluation skills for life-long learning. One-on-one and small group research consultations (both in-person and virtual) are available to current DU students, faculty, and staff at any stage of the research process. Visit <https://libraryhelp.du.edu> (<https://libraryhelp.du.edu>) (<https://libraryhelp.du.edu>) for more information, to ask a question, or to schedule a consultation.

### Science and Engineering Center

The Science and Engineering Center is a collaborative space staffed by undergraduate and graduate learning assistants (LAs) trained to assist students with first and second year biology, chemistry, physics, and engineering lecture and laboratory courses. Our goal is to help students grow as problem solvers by assisting with homework sets, lab reports, and preparing for exams. The Science and Engineering Center is not a one-on-one tutoring center, but is rather a support system where students can get guidance from TAs as well as their peers. This center is open to all DU students.

### Special Collections and Archives

Special Collections and Archives provides access to and assistance with using rare books, manuscripts and personal papers, including the University of Denver Archives, the Beck Archives on Rocky Mountain Jewish History and fine press and artists' books.

## Writing Center

The Writing Center supports and promotes effective student writing practices across the University of Denver campus. In a learning-oriented, non-evaluative, and collaborative setting, the Center works with any DU-affiliated student, faculty, or staff member on any kind of writing project (academic, professional, multimedia, etc.) and at any stage of the writing process. Visit [www.du.edu/writing/writingcenter](http://www.du.edu/writing/writingcenter) for more information.

## Disability Services Program (DSP)

The DSP is dedicated to giving students with disabilities an equal opportunity to participate in the University's programs, courses and activities. DSP provides reasonable accommodations, at no cost, to any student who has a documented disability as required by the Americans with Disabilities Act and Section 504 of the Rehabilitation Act, as well as other applicable legislation. The DSP works with the student to design accommodations intended to mitigate the impact of a student's disability and to afford equal opportunity and full participation in University programs for undergraduate, graduate and non-degree seeking students.

Students who need accommodations for a disability in order to fully participate in University programs, courses and activities should contact the DSP. This contact should be made as far in advance as possible. It is the joint responsibility of the student, DSP and other DU faculty and staff to work together to meet students' needs. Students should familiarize themselves with the Handbook for Students with Disabilities, Medical and Mental Health Conditions available at <https://www.du.edu/studentlife/disability-services/index.html> (<https://www.du.edu/studentlife/disability-services/>) or can be requested in alternative formats by contacting the DSP office.

The DSP requires current supporting documentation of a student's disability in order to establish protections under the ADA/Section 504 and determine appropriate and reasonable accommodations and/or academic adjustments. A student's documentation is kept separate and private and is not shared as part of the student's DU Transcript. Students can choose to sign a Release of Information form so that DSP staff members are able to speak with others, including but not limited to; the students' family members, healthcare and/or mental healthcare professional(s), and/or DU faculty and staff on the student's behalf.

For more information, please visit the DSP website (<https://www.du.edu/studentlife/disability-services/>), or stop by our office in Driscoll South, Suite 13 or call us at 303-871-3241. DSP hours are 8 a.m.–4:30 p.m., Monday–Friday.

## Learning Effectiveness Program (LEP)

The LEP provides academic support to DU students who are neurodivergent and/or have learning differences. LEP is a fee for service program. Students enrolled in LEP sign a one-year renewable contract. LEP assists students in developing compensatory and academic skills. These skills are not only useful during the undergraduate and graduate experience, but also readily transfer to the world of work.

The four cornerstones of LEP student development are self-advocacy, self-awareness, self-determination and accountability. Students and academic counselors build a trusting and caring relationship based on mutual respect. LEP expects that all students in the program meet with their academic counselor for a minimum of one hour per week.

LEP offers a number of additional components including:

- **Transition Support:** First LEP Year Total Experience (FLYTE) provides incoming students the opportunity to attend LEP's pre-orientation weekend, join a small cohort of LEP peers led by Peer Leaders, and participate in events and workshops throughout the year to help navigate their transition into college as a neurodiverse learner.
- **Tutoring:** The LEP tutorial staff includes adjunct faculty, graduate students and upper-level students who have demonstrated a solid mastery of their discipline. Students can schedule tutoring appointments through an online scheduler called Accudemia.
- **Executive Functioning Support:** All students receive basic support in areas such as organization, time management, task initiation, working memory, and mental flexibility in their work with their Academic Counselor. Students with additional need can schedule one-on-one executive functioning coaching meetings with the LEP Executive Functioning Specialist.
- **Social Engagement:** Students have opportunities to interact with other LEP students in a social environment. Students with a higher need for social skills training can join a social skills group or schedule one-on-one meetings with the Academic Counselor who provides social skills training.
- **Leadership Opportunities:** LEP students have the opportunity to participate in a variety of leadership positions that support incoming LEP students as well as advocate for neurodiverse learners across the DU campus.

LEP is located on the fourth floor of Katherine A. Ruffatto Hall. Contact LEP by calling 303-871-2372 or by visiting [www.du.edu/lep](http://www.du.edu/lep) (<http://www.du.edu/disability/>). Office hours are 8 a.m.–4:30 p.m., Monday–Friday.

## Center for Community Engagement to advance Scholarship and Learning

Many students who come to the University of Denver want to contribute to the public good and continue their civic development. The Center for Community Engagement to advance Scholarship and Learning (CCESL) leads the campus in embracing the University of Denver's commitment to "being a great private university dedicated to the public good." CCESL's vision is to be a university working with communities to improve lives.

Therefore, CCESL programs focus on activating student, faculty, and community potential through reciprocal collaborations that are guided by a community organizing framework. Community organizing is about people working together for lasting social change.

CCESL works with students and faculty across multiple programs and initiatives. Students tackle grand challenges and connect with university and community change-makers when they apply their academic learning to public problems through DU Grand Challenges. Students connect learning and doing through community-engaged courses that involve partnerships between classes and communities. These courses offer students opportunities to advance critical thinking, develop civic skills, address public problems and develop leadership skills. Students advance discovery by working with faculty to do research and creative work with community partners for the public good. Honing skills to become tomorrow's civic leaders, students learn to collaborate through research and creative work with community partners from CCESL's Scholar Shop. As Community-Engaged Fellows or Scholars, students develop their civic identities while preparing for active participation in civic life through public good work and community organizing. Students connect service activities to academic learning through critical reflection, examination of root causes, community building and increasing campus and community capacities.

CCESL is a gateway for students to deepen their public good work. Please visit our website at [www.du.edu/ccesl](http://www.du.edu/ccesl) (<http://www.du.edu/ccesl/>) or call at 303-871-3706, or email [ccesl@du.edu](mailto:ccesl@du.edu).

## Study Abroad

At the University of Denver, we believe in exceptional education in our Denver classrooms and beyond and we support and encourage all students to study abroad during their DU career. We want our graduates to become more curious and to learn to appreciate differences and interdependencies that connect our world.

The University of Denver strongly invests in studying abroad because we believe that as many students as possible should have the opportunity to discover how education comes to life in an international context.

DU's Office of International Education (OIE) offers more than 100 DU Partner Programs around the globe. DU Partner Programs are programs with which DU has a formal affiliation and credit earned is counted as DU resident credit. DU's OIE reviews each of these programs with the intent to provide high-quality international academic programming and opportunities that will among other things:

- give students the tools to examine global issues from multiple perspectives, a skill that is essential in the current job marketplace.
- let students fulfill some of their general degree requirements through elective credit and/or major/minor course approvals.
- gain real-life competencies through volunteering, service learning, or an internship (on select programs);
- help students develop a new international perspective on their academic discipline and/or career;
- give students the opportunity to explore in-depth aspects of the history, society, and culture of the host country;
- further provide students with instructional and real-life development of language skills (on select programs).

While most students find a DU Partner Program that fits their needs, it is sometimes appropriate for a student to participate in an unaffiliated program if its academic offerings cannot be reasonably matched by a DU Partner Program. The unaffiliated program selected by a student may not duplicate a study abroad program already offered by DU and must be pre-approved by the Office of International Education. Credits earned on unaffiliated programs are transfer credits. A more detailed comparison of the differences between DU Partner Programs and unaffiliated programs can be found at [www.du.edu/abroad/getting\\_started/programs.html](http://www.du.edu/abroad/getting_started/programs.html) (p. 697)

## Cherrington Global Scholars

To foster an internationalized campus culture, in Fall of 2004 the University of Denver introduced the Cherrington Global Scholars (CGS) initiative. CGS-eligible students studying abroad on a DU Partner Program receive financial benefits that help offset additional costs, such as a round-trip flight and direct immigration fees (i.e. student visas). More information on the Cherrington Global Scholars initiative, including a review of the benefits and qualifications, can be found at: <https://www.du.edu/abroad/costs/cherrington.html>.

The Cherrington Global Scholars initiative is an exciting opportunity for students and a dramatic statement of the University of Denver's commitment to internationalizing undergraduate education. It reflects a campus-wide commitment—in curriculum development, financing, and academic programming—to fostering international study, research, and outreach.

Please visit <http://www.du.edu/abroad/index.html> (<http://www.du.edu/abroad/>) for more details.

## Transfer and International Education Reporting System

The University of Denver's Transfer and International Education Reporting System ([http://myweb.du.edu/mdb/du\\_bwcktart.P\\_DU\\_Choose\\_Geog\\_Area/](http://myweb.du.edu/mdb/du_bwcktart.P_DU_Choose_Geog_Area/)) (TIERS) allows students to access a list of approved transfer and study abroad courses. Courses that do not appear in the system are not necessarily unacceptable for transfer. Courses will continue to be added as new ones are evaluated and equivalents determined. You can access TIERS through MyDU under Student Tools and then Records and Requests.

For more information regarding how to utilize the TIERS system for study abroad, please see this page:

<https://www.du.edu/abroad/academics/earning-credit.html>.

## Undergraduate Research Center

The Undergraduate Research Center (URC) is devoted to enhancing the undergraduate experience by facilitating students' investigations that make original intellectual or creative contributions within and across disciplines. The URC directly advances the University's mission to promote learning by engaging with students in advancing scholarly inquiry, cultivating critical and creative thought, and generating knowledge. The URC provides the educational resources and funding to help students develop their research skills through several different programs:

- **education** for undergraduates and mentors regarding research and presentation of that research. The URC sponsors many workshops and seminars during the year to assist students in strengthening their analytical and scholarly research skills.
- **resources** for information about research and outside funding opportunities, for workshops and seminars, and for events at which students can present their research.
- **support** in the form of research scholarships for research projects and for travel to present research at professional meetings.
- **celebration** and showcasing of undergraduate research on campus, nationally and internationally.

The URC funds student research through the Partners in Scholarship Program (PinS) and Summer Research Grants in which students can apply in partnership with a faculty member on campus to conduct research or systematically explore a creative topic toward making a new contribution to a body of literature. The URC also provides funding so students may disseminate findings of their research, most often at national or regional academic conferences, through the Student Scholar Travel Fund. In addition, the URC hosts an annual showcase for student research and shares results with the DU community at the DU Research & Scholarship Showcase (<https://www.du.edu/uap/showcase/>), held each spring. For more information on these programs, visit [www.du.edu/urc](http://www.du.edu/urc) (<http://www.du.edu/urc/>).

## Other Academic Opportunities

### Career@DU

#### Classrooms to Careers

##### The Mission of Career@DU

Career@DU is a collection of career offices across campus designed to meet the needs of every student. Whether you are a traditional undergraduate, a graduate student in a professional program or a student with unique needs, we have career advisors, and programs dedicated to supporting your career and professional development. Read below for a description of each unit and to determine which is best suited to meet your needs.

#### Career and Professional Development

Serving undergraduate students, graduate students, and alumni from a variety of majors  
303.871.2150 | [career@du.edu](mailto:career@du.edu) | Career & Professional Development (<https://career.du.edu/>)  
Located in the Burwell Center for Career Achievement

#### Daniels Career Services

Serving Daniels College of Business undergraduate & graduate students  
303.871.3911 | [danielscareers@du.edu](mailto:danielscareers@du.edu) | Daniels Career Services (<http://daniels.du.edu/career-services/>)  
Located in 155 Daniels College of Business (graduate students) / 107 Margery Reed Hall (undergraduate students) / Management majors): Margery Reed Hall—Suite 107 / Hospitality Management: Joy Burns Center—Suite 318

#### Korbel Office of Career & Professional Development

Serving graduate students and alumni of the Josef Korbel School of International Studies  
303.871.4490 | [korbelcareers@du.edu](mailto:korbelcareers@du.edu) | Korbel Office of Career & Professional Development (<http://www.du.edu/korbel/careers/>)  
Located in 1005 Sie Complex

#### Sturm Office of Career Development & Opportunities

Serving professional students in the Sturm College of Law  
303.871.6124 | [careers@law.du.edu](mailto:careers@law.du.edu) | Office of Career Development & Opportunities (<http://www.law.du.edu/index.php/career-development-and-opportunities/>)  
Located in suite 223 Sturm College of Law

#### Graduate School of Social Work Career Services

Serving students in the Graduate School of Social Work  
303.871.3841 | [gssw.careers@du.edu](mailto:gssw.careers@du.edu) | Social Work Career Services (<https://www.du.edu/socialwork/currentstudents/careerdevelopment.html>)  
Located in 184 Craig Hall

## Alumni Career & Professional Development

Serving alumni from all colleges

303.871.4331 | [alumnicareers@du.edu](mailto:alumnicareers@du.edu) | Alumni Career & Professional Development (<https://alumni.du.edu/resources-benefits/careers-employer-connections/>)

Located in the Burwell Center for Career Achievement

## Honors Program

DU's University Honors program is a community of students, faculty, and staff who are hungry for knowledge, passionate about a wide range of topics, and who want to learn in community with one another – both within the classroom and beyond.

Our program fosters a distinctive liberal arts education that challenges students to cultivate depth in critical and creative thought, and facilitates students' original contributions to intellectual life, their community, and their chosen field.

Information on admission to the Honors Program is available on our website (<https://www.du.edu/honors/>).

## Honors Curriculum and Requirements

Students graduate with University Honors upon satisfaction of the following requirements:

(1) Completion of Honors course requirements - Honors students have the opportunity to meet many of their university requirements in small, discussion-based, Honors-only courses. Honors courses are meant to be more engaging, not more difficult. The majority of these courses count directly towards your common core requirements (including one Honors course in the humanities, one Honors course the social sciences, an approved Honors sequence in the natural sciences, Honors writing, an Honors advanced seminar). The only additional coursework are two two-credit Honors Seminars. More details available on our Honors Checklist (<https://www.du.edu/honors/media/documents/honors-checklist.pdf>).

(2) Satisfaction of all requirements for distinction in at least one major - Every department has developed a distinction plan with its own timing, admission criteria, procedures, and completion requirements. Requirements might include courses in research and methodologies, interdisciplinary courses, or a larger percentage of upper level course work. It usually also includes some type of culminating project or a thesis. Honors students should contact their major advisor in order to learn about the distinction program in the major they declare.

(3) Cumulative GPA of 3.5 or higher at graduation

Students from any major may be a part of the Honors Program. As with all DU students, the requirements set out in the Bulletin (<https://www.du.edu/registrar/academic-programs/bulletins-catalogs/>) for the year they entered must be satisfied for graduation. To remain active in the Honors Program, students must be in "good standing" at the University, continue to make positive progress towards completing Honors requirements, and remain responsive to communication from Honors Program staff.

## Honors Community and Enrichment

In addition to its academic opportunities, the Honors Program provides its community of students and faculty many ways to come together for co-curricular enrichment. The Honors Program sponsors a variety of activities throughout the year, and partners with other groups on campus to facilitate unique student experiences and opportunities. Honors students also organize events of their own through the Honors Student Association.

## Honors Floor

The Honors floor, located in Dimond Family Residential Village, is a residential opportunity specifically designed for first-year students in the University Honors Program. The Honors floor provides a unique living environment for students of diverse majors and interests who have made academic work a priority. For many Honors students, living together and sharing special programming enhances their first year experience at college, and helps create lasting friendships. The Honors floor is an option for those who have been admitted to the University Honors program, but is not a requirement.

For more information, contact the University Honors Program at [honors@du.edu](mailto:honors@du.edu) or 303-871-2035.

## Lamont School of Music

Students of all majors can pursue opportunities in ensembles, elective lessons, and classes offered by the Lamont School of Music. More information about these course offerings can be found online at <https://liberalarts.du.edu/lamont/academics/opportunities-non-majors> (<https://liberalarts.du.edu/lamont/academics/opportunities-non-majors/>).

Performing ensembles are open to all DU students by audition, and rehearsals and concerts are held in the stunning Robert and Judi Newman Center for the Performing Arts.

Lamont offers nearly 300 performances each year, including musicals, operas, and prominent ensemble performances, as well as guest artist performances and recitals. Most of these are free to DU ID card holders.

## Living and Learning Communities

DU's Living and Learning Communities (LLCs) prepare students to contribute to the public good by connecting their learning across living, academic, and co-curricular experiences with a cohort of peers.

When students join an LLC, they become part of a community that includes 20-30 peers, a Faculty Director, and a Program Coordinator. Together, communities:

- Live on the same hall;
- Learn in a sequence of classes together. These courses open pathways to minors and future academic experiences;
- Participate in events and activities together, such as retreats, professional development opportunities, and social nights.

In AY 23-24, LLCs are offered for first- and second-year students.

Each LLC is organized around a theme and central question. First-year LLCs include:

- a. Environmental Sustainability. How do we promote positive environmental community awareness that leads to action?
- b. Global Engagement: How do we foster cultural awareness and a deep understanding of global interdependence?
- c. Students Organizing Against Racism (S.O.A.R.): What is institutional and systemic racism and how can students organize against it?

Second-year LLCs include:

- a. Health Promotion: How do we engage and empower individuals and communities to promote health?
- b. Social Change: How do we become powerful social change agents in our communities?

To apply to join an LLC, visit <https://academicaffairs.du.edu/livinglearning/how-apply>.

## Pioneer Leadership Program

The PLP Leadership Studies program is an academic and co-curricular undergraduate minor committed to developing a new generation of thought leaders and social entrepreneurs that create a more equitable and inclusive world. PLP selects 88 incoming students by application each year, who live together their first year in Dimond Family Residential Village. Students take a 2 credit leadership studies course each quarter, while doing community-based service learning with a Metro Denver non-profit, school or government agency. During the second year, students learn about leading community change and enact a year-long project that is undergirded by a course on collaborative and inclusive leadership each quarter. PLP students finish the Leadership Studies minor in their junior or senior year with a PLP leadership ethics course and 6 electives from across the DU undergraduate curriculum or from studying abroad. To learn more and apply, visit [www.du.edu/leadership](http://www.du.edu/leadership) (<http://www.du.edu/leadership/>).

## Vicki Myhren Gallery

The Vicki Myhren Gallery is the principal exhibition venue of the School of Art & Art History and is integral to the school's educational mission. It provides a physical and programmatic home of exhibitions and interdisciplinary programs that explore the visual arts and the language of images. Its exhibitions feature artistic achievements from the school, region, nation and around the world.

## Student Rights & Responsibilities

The Office of Student Rights & Responsibilities at the University of Denver supports the University's mission by providing programs and services designed to foster an inclusive campus community and promote opportunities for holistic student living, learning, and growth. We strive to achieve a safe campus community in which Students:

- respect themselves, others, the University, and surrounding community;
- honor differences and gain an appreciation for living in a diverse society;
- maintain high standards of their personal and academic integrity;
- understand the impact of their actions and choices upon themselves, others, the University, and surrounding communities; and
- seek opportunities to repair harm, restore trust, and acknowledge the impact of their actions and choices

The Office of Student Rights & Responsibilities strives to be educational and restorative in our processes by offering educational Outcomes, workshops and alternate case resolution options. Through the Outcomes assigned to Students, we hope to encourage self-awareness, social engagement, and provide opportunities for reflection and meaning-making.

The Honor Code (<https://www.du.edu/studentlife/studentconduct/honorcode.html>) is the Student code of conduct that outlines the expectations, rights, and responsibilities of every Student at the University. This document provides information to support our Students in developing and demonstrating integrity, respect, and individual and community responsibility. All Students at the University should read this Honor Code carefully to understand the expectations, policies, and procedures that apply when a Student is alleged to have violated a policy. You are expected to know and to understand your rights as well as your responsibilities to be a positive contributor and successful community member at the University.

The Student Rights & Responsibilities Staff is available to answer questions and address concerns about these areas of responsibility. Please email [SRR@du.edu](mailto:SRR@du.edu) or visit [www.du.edu/studentlife/studentconduct](http://www.du.edu/studentlife/studentconduct) for more information.

## Student Information and Records

### Maintaining Contact Information

#### E-Mail

You will receive an @du.edu email address to use while enrolled at the University of Denver. All emails sent to you by the University will be delivered to your @du.edu email address. Information on accessing your @du.edu email address can be found at <http://go.du.edu/office365> ([https://univofdenver.service-now.com/techservices/sub\\_content.do?sysparm\\_article=KB0011276](https://univofdenver.service-now.com/techservices/sub_content.do?sysparm_article=KB0011276)). Upon graduation, you will have the option to move your email account to an @alumni.du.edu address.

The UTS Computer HelpDesk can assist with logging into MyDU (<https://my.du.edu/dashboard/>) and answer questions on a variety of other technical topics. To contact the HelpDesk call 303-871-4700, send email to [support@du.edu](mailto:support@du.edu) or access support through the UTS website (<http://www.du.edu/uts/helpdesk/>).

The University sends much of its correspondence solely through email. This includes policy announcements, emergency notices, meeting and event notifications, course syllabi and requirements, and correspondence between faculty, staff, and students. The University is not responsible if payment of tuition and fees is not made because a student did not receive a billing notice. Students may be assessed a late fee if payment is not received by the due date printed on the bill. Such correspondence is mailed only to the official university email address. Faculty, staff, and students are expected to check their email on a frequent and consistent basis in order to stay current with University-related communications. Faculty, staff, and students have the responsibility to recognize that certain communications may be time-critical. This policy applies to all members of the University of Denver community; faculty, staff, and students.

#### Address Information

##### Student Location and Addresses Policy

Accurate address and student location information is imperative for many reasons. Safety and emergency notification processes require accurate student location information. Certain educational benefits are based on student location; regulations for international students require the University to maintain accurate address information. Federal regulations (34 CFR § 668.43) require that for programs leading to licensure, the university must determine the location of the student enrolled in the program and must notify students if professional licensure or certification requirements in the state in which they are located are not met by the curriculum of the program, or if DU has not determined whether the curriculum meets the requirements in the state where they are located. Other federal regulations (34 CFR § 600.9) also require DU to obtain authorization to operate in any state where a student is located.

DU will determine all students' location (state):

- a. At the time of the student's initial application to an educational program; and
- b. Upon receipt from the student of information about a change in the student's location or address;
- c. DU will solicit student location and address information at least two times per year and maintain and publish processes for students to provide address and location information;
- d. If a student does not provide a physical location, and the student is enrolled in at least one on-campus course, then the student's physical location is determined to be Colorado.
- e. If a student does not provide a physical location, and the student is not enrolled in at least one on-campus course, then the student's physical location is determined to be the state provided in the student's address.

Students unable to make address changes online can pursue the following options:

- Visit the registrar's office on the garden level of University Hall or download the Address/Phone/Email Change Request form from <http://www.du.edu/registrar> (<http://www.du.edu/registrar/>).
- Send an email to [registrar@du.edu](mailto:registrar@du.edu); include student number and indicate which address or addresses are to be changed. (See following address types.)
- Call 303-871-4095. (For security reasons, students are asked to give identifying information.)
- Send a fax to 303-871-4300. (Include student number, month and date of birth, and indicate which address types are to be changed.)

## Types of Addresses

- **Mailing:** This is the default address used by DU. All constituents should have a correct mailing address.
- **Billing:** Used to send the tuition bill to a different address from the mailing address.
- **Business:** Your place of work. For DU employees, this will be your office address.
- **Grades:** Used to send grades to to a different address than the mailing address.
- **Home:** Used to distinguish a permanent (family) address for students from out of the area, or a home address for alumni. International students and employees (visa classes F, M and J) must maintain a valid foreign address in this field.
- **On--Campus:** Used only for University housing addresses. It is populated automatically each term.
- **Parents:** DU can maintain up to two addresses for parents.
- **Seasonal:** Used to override your permanent mailing address for certain times each year—e.g., a summer house.
- **Temporary:** Used to override your permanent mailing address for a single specified period.

## Telephone Numbers

Students can enter several different types of telephone numbers in their student account: permanent home, business, cell, fax and local (if different from permanent home). Indicate the type and whether the number should be added or deleted on the front of the form. If checked as “unlisted,” the telephone number will only be released to University officials.

## Notification preferences

Students may opt to receive emergency notifications and other official University notifications via text message. Notification preferences may be updated in MyDU (<https://my.du.edu/dashboard/>) by navigating to Student Tools, Records and Requests, Update your notification preferences.

## Critical Incident Notification Systems

### Registration Instructions

The University can send voice or text messages to students in the event of an urgent situation. The system will call every contact number provided and leave a voicemail if the call is unanswered. Text messages are optional and sent to only one number. The owner assumes any costs associated with receiving text messages.

You may designate one number to receive text messages. If you have elected to receive a text message, you will receive a text message from the CINS vendor to confirm that you wish to opt in to receive future emergency text messages. You will be responsible for any costs associated with your text messages. Remember this is how we reach you in an emergency.

Students must provide valid contact information in order to receive a text message or voice mail alert. To update contact information, log into MyDU (<https://my.du.edu/dashboard/>) and navigate to Student Tools, Records and Requests, Update your notification preferences.

### Emergency Contacts

You may provide the University with contact information for individuals you wish us to contact in the event of an emergency. You may update emergency contact information in Personal Information, which is found in myWeb in the MyDU (<https://my.du.edu/>) portal.

## Educational Records Rights and Privacy

The Family Educational Rights and Privacy Act (FERPA) affords eligible students certain rights with respect to their education records. (An “eligible student” under FERPA is a student who is 18 years of age or older or who attends a postsecondary institution.) These rights include:

- a. The right to inspect and review the student’s education records within 45 days after the day the University receives a request for access. A student should submit to the Registrar a written request that identifies the record(s) the student wishes to inspect. Request forms are available from the Registrar. The registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the registrar, the registrar shall advise the student of the correct official to whom the request should be addressed.
- b. The right to request the amendment of the student’s education records that the student believes is inaccurate, misleading or otherwise in violation of the student’s privacy rights under FERPA. A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
- c. The right to provide written consent before the University discloses personally identifiable information (PII) from the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to University officials with legitimate educational interests. A University official is a

person employed by the University in an administrative, supervisory, academic, research or staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student, volunteer or employee of a partner organization serving on an official committee, such as an admission, disciplinary or grievance committee, or assisting another University official in performing his or her tasks. A University official also may include a contractor outside of the University who performs an institutional service or function for which the University would otherwise use its own employees and who is under the direct control of the University with respect to the use and maintenance of PII from education records, such as an attorney, auditor or collection agent or a student volunteering to assist another University official in performing his or her tasks. A University official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her institutional duties for the university.

- d. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Student Privacy Policy Office  
U.S. Department of Education  
400 Maryland Avenue, SW  
Washington, DC 20202-4605

## Directory Information

The law provides that “directory information” may be released without the consent of the student. The University of Denver designates the following student information as “directory information:”

The student’s name (including prefix/honorific and personal pronouns), addresses, telephone numbers, electronic mail and webpage addresses, employer, job title, photographic and video images, date and place of birth, field of study, full-time or part-time status, class (e.g., graduate, sophomore, junior), participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, anticipated date of graduation, degrees and awards received, thesis and dissertation titles, the most recent previous educational agency or institution attended by the student.

Students may prevent the University from disclosing directory information by submitting a “Request to Prevent Disclosure of Directory Information” form (available online and from the Office of the Registrar) to the Office of the Registrar, University Hall, G33.

## Disclosure

Students may authorize the University to share information from education records with third parties such as parents. Authorizations may be completed online or by completing an authorization form available in the Office of the Registrar.

FERPA permits the disclosure of PII from students’ education records, without consent of the student, if the disclosure meets certain conditions found in §99.31 of the FERPA regulations. Except for disclosures to University officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information and disclosures to the student, §99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student –

- To University officials, including faculty, within the University whom the University has determined to have legitimate educational interests. This includes contractors, consultants, volunteers or other parties to whom the University has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B)(7)-(a)(1)(i)(B)(2) are met. (§99.31(a)(1))
- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2)).
- To authorized representatives of the U. S. Comptroller General, the U. S. Attorney General, the U.S. Secretary of Education or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the University’s State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs or for the enforcement of or compliance with Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35)
- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid or enforce the terms and conditions of the aid. (§99.31(a)(4))
- To organizations conducting studies for, or on behalf of, the University, in order to (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6))
- To accrediting organizations to carry out their accrediting functions. (§99.31(a)(7))
- To parents of an eligible student if the student is a dependent for IRS tax purposes. (§99.31(a)(8))
- To comply with a judicial order or lawfully issued subpoena. (§99.31(a)(9))
- To appropriate officials in connection with a health or safety emergency, subject to §99.36. (§99.31(a)(10))
- Information the University has designated as “directory information” under §99.37. (§99.31(a)(11))

- To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of §99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§99.31(a)(13))
- To the general public, the final results of a disciplinary proceeding, subject to the requirements of §99.39, if the University determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the University's rules or policies with respect to the allegation made against him or her. (§99.31(a)(14))
- To parents of a student regarding the student's violation of any Federal, State or local law, or of any rule or policy of the University, governing the use or possession of alcohol or a controlled substance if the University determines the student committed a disciplinary violation and the student is under the age of 21. (§99.31(a)(15))

As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which a student's education records and PII contained in such records—including Social Security Number, grades, or other private information—may be accessed without the student's consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education or state and local education authorities ("Federal and State authorities") may allow access to student records and PII without consent to any third party designated by a Federal or State authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution. Second, Federal and State Authorities may allow access to a student's education records and PII without the student's consent to researchers performing certain types of studies, in certain cases even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the entities that they authorize to receive PII, but the Authorities need not maintain direct control over such entities. In addition, in connection with Statewide Longitudinal Data Systems, State authorities may collect, compile, permanently retain and share without the student's consent PII from education records, and they may track participation in education and other programs by linking such PII to other personal information about the student that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

## Additional Information

Questions about these policies and procedures may be directed to the Office of the Registrar at 303.871.3897. Request forms and additional information are available on the web at [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>) or in the Office of the Registrar at 2197 South University Blvd., Room G33, Denver, Colorado 80208.

# Preferred First Name and Chosen/Lived/Professional Names and Pronoun Usage

## Preferred First Names and Chosen/Lived/Professional Names

The University of Denver recognizes that many of its constituents routinely use a first name or full name other than their legal name. As part of being a welcoming and inclusive campus, the University of Denver uses preferred first names and chosen/professional names widely in the course of DU business and education.

### What is a "Preferred First Name" and what is a "Chosen/Lived/Professional Name?"

Beyond legal name, DU maintains two options for names which substitute in place of all or part of the legal name in University systems.

#### Preferred First Name:

A first name by which an individual wishes to be identified that is other than the individual's legal name is a "preferred first name." This is analogous to a nickname. Students and employees can submit a preferred first name online. The preferred first name will be displayed in addition to legal name rather than replace it, for example: Shaquille Rashaun O'Neal (Shaq).

#### Chosen/Lived/Professional Name:

A chosen/lived/professional name is used in place of a legal name and replaces the legal name in most cases. This name option can include a first, middle and/or last name. For example, chosen/lived/professional name of Cardi B would replace the legal name of Belcalis Marlenis Almanzar.

#### Limitations on Use of Chosen/Lived/Professional Names

Because use of legal name is necessary in certain records and communications, both the legal name and chosen/lived/professional name are stored in DU's information systems. When a student or employee contacts a DU office in person or by phone, the staff in that office may only have electronic access to the legal name.

While DU will use of the chosen/lived/professional name in most instances, students and employees should be aware that the use of the legal name will continue to be necessary in certain communications and processes due to DU business or legal requirements and/or system limitations.

## More Information on Name Options

### Reasons for using Preferred First Names or Chosen/Lived/Professional Names

Many members of the DU community use a first name or full name that differs from their legal name. These may include individuals who prefer to use:

- a middle name instead of a first name;
- a nickname;
- an anglicized name;
- names with special characters: e.g., Renée, François, Zoë, Sørina, Peña
- a name to which the individual is in the process of legally changing;
- a name that better represents the individual's gender identity;
- a name that reflects professional activities, publications, etc.

#### How to request a preferred first name be entered in DU information systems

Members of the DU community can submit a preferred first name online through MyDU (<http://my.du.edu/>). Type "profile" in the search, select My Person Profile. Preferred first names can be removed by clicking Update with nothing in the field.

#### How to request a chosen/lived/professional name be entered in DU information systems

To request your chosen/lived/professional name, you can complete and submit your request using our online form (<https://na4.docusign.net/Member/PowerFormSigning.aspx?PowerFormId=371b95bf-9b4f-4b2c-a89a-dcfb608e8167&env=na4&acct=b24a216b-183e-4eeb-93f6-edfd6712ee1b&v=2>) or our paper Name Change Request Form (<https://www.du.edu/sites/default/files/2022-11/namechangerequestform.pdf>). Please submit the form to the office indicated in the instructions. Chosen/professional names may be removed using the same form.

#### Use of Names within DU Systems

DU displays preferred first names and chosen/lived/professional names in most public-facing uses. This includes written communications, web displays and internal reports and processes. Not all University departments will have access to preferred first names while interacting with students.

#### Use of Legal Name

Use of legal name is necessary for certain data exchanges such as those to government agencies that verify the identity of a student by using the student's legal name. These include (but are not limited to) transcripts, payroll, tax, insurance, banking, financial aid and federal or state reporting.

#### Name Designation Request Policy

Individuals may designate a preferred first name or chosen/lived/professional name with which they identify and by which they prefer to be known. DU reserves the right to deny a request to include a preferred name in its information systems if the request is fraudulent, carries connotations offensive to good taste and decency, or violates University Regulations and/or Student Code of Conduct.

#### Pioneer Cards and

The ID printing system will automatically pull your first and last name from the DU information platform. You can request for your "preferred first name" to be used instead; simply let the ID office know prior to printing. In order to use a preferred name, you must have added that name into the DU system and wait about 24 hours for the systems to fully update.

#### Email Addresses

DU will provide a new DU email address, upon request, for students or employees who have requested a chosen/lived/professional name. For further information, contact the IT Computer Help Center: <https://www.du.edu/uts/helpdesk/>.

#### Diploma Name

Students may also specify a 'diploma name' to use on DU diplomas.

## Gender Designation & Personal Pronouns

We've added fields to your information systems that allow members of our community to self-identify by gender identity and pronouns. DU already asks affiliates to self-identify by current legal sex (often coded as "gender"), race/ethnicity, veteran status and disability. By expanding our optional self-identification categories related to gender identity, we're able to understand and acknowledge our constituents more accurately and inclusively.

### How Do I Update My Information?

Prospective students and employees are asked some basic demographics questions when applying, while current community members can update their personal information through MyDU (<https://my.du.edu/>).

The expanded fields are optional but encouraged, and a "prefer not to respond" option is available. Unless you indicate something different, your legal name and sex will remain the default in all systems; other fields will note "not available" or be blank.

We recognize that even these expanded options do not represent all the categories that DU affiliates use to describe themselves. We are using the additional fields and these expanded options to gauge constituent interest and institutional utility. We plan to follow up with various campus constituencies to assess how we might improve descriptors, and potentially offer more and better options in the future.

Identity	Options Offered	Explanation
Legal Sex	<ul style="list-style-type: none"> <li>• Male</li> </ul>	For DU's required reporting, and to avoid even the appearance of identity fraud, this must match current government designation.

	<ul style="list-style-type: none"> <li>• Female</li> </ul>	
	<ul style="list-style-type: none"> <li>• I elect not to self-identify at this time</li> </ul>	
Gender Designation	<ul style="list-style-type: none"> <li>• Man</li> </ul>	Consistent, lived identity. Unlike legal sex or anatomical descriptors, this is the level at which most people interact with others.
	<ul style="list-style-type: none"> <li>• Woman</li> </ul>	
	<ul style="list-style-type: none"> <li>• Non-binary</li> </ul>	
	<ul style="list-style-type: none"> <li>• I elect not to self-identify at this time</li> </ul>	
	<ul style="list-style-type: none"> <li>• Option not listed</li> </ul>	
Personal Pronouns	<ul style="list-style-type: none"> <li>• he/him/his</li> </ul>	Term used as stand-in for name in conversation and correspondence.
	<ul style="list-style-type: none"> <li>• she/her/hers</li> </ul>	
	<ul style="list-style-type: none"> <li>• they/them/theirs</li> </ul>	
	<ul style="list-style-type: none"> <li>• I elect not to self-identify at this time</li> </ul>	
	<ul style="list-style-type: none"> <li>• Option not listed</li> </ul>	
Prefix/Honorific	<ul style="list-style-type: none"> <li>• Mr.</li> </ul>	Example optional titles or honorifics used in formal greeting or correspondence. Some are traditionally based on gender, age and/or marital status.
	<ul style="list-style-type: none"> <li>• Mrs.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Ms.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Mx.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Dr.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Hon.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Prof.</li> </ul>	
	<ul style="list-style-type: none"> <li>• Rev.</li> </ul>	

### How Will This Information Be Used?

Most immediately, the University will use aggregate information to understand campus demographics better, and to improve our acknowledgment of and services to our diverse communities. This can include more robust support resources, enhanced training for service providers, more accurate reports and potential advocacy to external reporting agencies for improving their systems.

With this additional information, we are working to better connect various campus software systems so that your preferred name, pronouns and salutations are available from the central database, and are used consistently, accurately and respectfully by all affiliates. Ideally, every University interaction would be informed by the appropriate info: employees having phone and in-person conversations, auto-generated messages and online records would all use preferred names and pronouns. However, please note that we cannot yet guarantee every communication will use these selections.

### Who Will Have Access to This Information?

With the exception of student directory information, access to all affiliate information is restricted by law and policy to University officials and those granted access by individual students.

Like most other personal information, an affiliate's legal sex and gender designation are not considered directory information and are not released, accessed or used without permission. However, students who sign FERPA releases for their parents/guardians/others should understand that this identifier information can be requested/disclosed.

As part of a student's name, prefix/honorific titles are considered directory information and will be used publicly.

All affiliates should be aware that providing this information to DU does make it available within the restrictions outlined above, so it should be provided thoughtfully and intentionally.

## Emergency Contacts

You may provide the University with contact information for individuals you wish us to contact in the event of an emergency. You may update emergency contact information in My Person Profile, which is found under the Student Tools in MyDU (<https://my.du.edu/>).

## Transcripts

A transcript is an official copy of a student's academic record showing the student's academic status at the time it is issued. The official transcript includes the complete academic record of courses taken at the University of Denver. Transcripts may be ordered online, by mail or fax, or in person at University Hall, garden level in the main hall. Transcripts require one to two working days of processing time. To order official transcripts online, log in to MyDU (<https://my.du.edu/dashboard/>) and type Transcripts in the search. A credit card is needed to complete online orders. To order transcripts by mail or fax, a signed Transcript Order Form (<http://www.du.edu/registrar/media/documents/transcript.pdf>) is required along with payment in the form of cash, check or money order. An email request is NOT accepted.

Send written transcript requests to

University of Denver  
Office of the Registrar  
2197 S. University Blvd.  
Denver, CO 80208-9405  
Attn: Transcripts

Official transcripts are NOT ISSUED until ALL OUTSTANDING ACCOUNTS with the University are paid. Students may check for current holds at M (<https://PioneerWeb.du.edu>)yDU (<https://my.du.edu/dashboard/>). The registrar does not hold transcripts pending change of grade. "Issued to Student" is stamped on official transcripts sent to or picked up by students.

Unofficial transcripts or transcripts from Colorado Women's College/Temple Buell are also available through this method.

## Contact Information

For transcript information and status inquiries, call 303-871-4095 or email [transcripts@du.edu](mailto:transcripts@du.edu).

## Leave of Absence and Withdrawal from the University

### Withdrawal

Students who wish to no longer be enrolled at the University are typically able to withdraw through the eighth week of the quarter. Depending on the specific timing and circumstances of this decision, including whether the withdrawing student plans to be readmitted, the procedure (<https://www.du.edu/registrar/registration/withdrawal-readmission/steps/>) for the applicable withdrawal type outlined below should be followed. Please consult Calendars & Deadlines (<https://www.du.edu/registrar/content/calendars-deadlines/>) for official withdrawal deadlines.

### PERSONAL Leave of Absence

Students planning on withdrawing temporarily from the University should indicate their intent to return by applying for a personal leave of absence during the withdrawal process, and include the quarter they plan to return on the withdrawal form.

## Official Withdrawal

### Official Withdrawal

A student officially withdraws from the University by notifying their program's registration office (p. 674) of the intent to withdraw. Students may also submit notification of their intent to withdraw online. University College students must submit an official withdrawal form to the University College Student Support Center and meet with a University College academic advisor if dropping all courses for the quarter.

After following due process, a University official may administratively withdraw a student for academic or disciplinary reasons, such as the following:

- academic suspension (mandated leave of absence)
- academic dismissal
- disciplinary suspension (mandated leave of absence)
- disciplinary dismissal (permanent dismissal from the University)

## Official Withdrawal Guidelines

Students who enroll in classes prior to the beginning of a quarter and do not intend to attend those classes are responsible for notifying their registration office of their intentions to withdraw so that classes will be dropped. The effective date of withdrawal is the date that the office is notified. See [www.du.edu/registrar](http://www.du.edu/registrar) (<http://www.du.edu/registrar/>) for the tuition and fee refund schedule.

Students cannot completely withdraw from all classes via the Web. Unofficial withdrawal (nonattendance) may result in grades of “F” and outstanding tuition charges for courses for which the student is registered.

Students who have received federal or state funds through financial aid programs must also have an exit interview with the Office of Financial Aid. Refer to the financial aid section of this bulletin, the financial aid website at [www.du.edu/finaid](http://www.du.edu/finaid) (<http://www.du.edu/finaid/>) or contact the Office of Financial Aid for up-to-date information regarding financial aid withdrawal processes.

Official withdrawal during the second through sixth week of the quarter (automatic withdrawal period) results in the recording of grades of “W” for all courses. A grade of “W” is not calculated in the student’s GPA. Courses dropped before the end of the first week of the quarter are deleted from the student’s record. Students withdrawing after the deadline for automatic “W” (after the sixth week) require approval from instructors and Academic Resources. An instructor has the authority to refuse a drop if the student is failing the course.

## Unofficial Withdrawal

### Unofficial Withdrawal

An unofficial withdrawal occurs when a student ceases to attend classes and does not make official notification of the withdrawal. Students who earn all non-passing grades for an enrolled term are, for financial aid purposes, considered unofficially withdrawn for the term. Students who unofficially withdraw (stop attending classes or earn all non-passing grades) for a given term will have their financial aid adjusted according to federal, state and institutional regulations:

- Non-attendance: Student enrolls but does not attend—may result in grades of “F” and outstanding tuition charges for courses for which the student is registered.
- Inactive status: Student does not enroll for one or more terms and loses automatic registration eligibility.
- Student fails to complete term with all passing grades (constitutes withdrawal that may impact current and future financial aid awards).

At the end of the quarter, the Office of the Registrar attempts to identify students who are enrolled in classes but who did not attend the University. When nonattendance is confirmed for all classes, the classes may be deleted from the student’s record, tuition and fees reversed and financial aid returned. Nonattendance confirmation is dependent on information received from instructors during grade processing. Verification of non-attendance is a good faith action taken by the Office of the Registrar.

The ultimate responsibility for withdrawing from classes when not in attendance remains with the student. Refer to the financial aid website at [www.du.edu/finaid](http://www.du.edu/finaid) (<http://www.du.edu/financialaid/>) or contact the Office of Financial Aid for up-to-date information regarding financial aid withdrawal processes.

## Medical Leave of Absence

### Medical Leaves and Reentries

A student with a mental health and/or physical health condition may elect to apply for a Medical Leave of Absence from the University. The Medical Leave of Absence and Medical Reentry Policies describe the circumstances under which a student may request a Medical Leave of Absence and the student is responsible for both the documentation for the Medical Leave of Absence and the Medical Reentry process. The procedures the student must follow are outlined in the policy.

The full policy can be found here: <https://www.du.edu/studentlife/studentsupport/media/documents/du-medical-leave-of-absence-and-reentry.pdf>

## Students Called for Military Duty

### Introduction

The University of Denver supports students called to active duty in the armed services by providing academic support, tuition relief or refunds, and reinstatement of students whose documented service has required their sudden withdrawal or prolonged absence from their enrollment at the institution. Service is defined by voluntary or involuntary active duty in the Armed Forces, including such service by a member of the National Guard or Reserve. When a University of Denver student is under a call or ordered to active duty, the following provisions will apply.

### Purpose

This guideline offers suggestions for ways in which academic and administrative units and faculty may assist students who are called to active military duty.

## Student Responsibility

A student who receives orders to report for active military duty should submit a copy of those orders to the Lead Academic Certifying Specialist in the Office of the Registrar. The Lead Academic Certifying Specialist will provide a copy of the orders and an official leave of absence request (if applicable) to the Office of Graduate Education or the Office of Undergraduate Academic Resources, as well as the Office of Financial Aid (if applicable), and notify the student's instructors. The Specialist may also assist with the arrangement of course completion options, but it is generally the student's responsibility to work directly with instructors to determine appropriate course completion options.

If, due to the urgency of their military assignments, students are unable to submit the orders before reporting, they may submit them either while on duty or upon returning to school. DU can only consider requests for changes to grades or tuition charges after official orders have been submitted.

## Course Completion Options

Instructors are urged to work with students called for military duty to enable the completion of coursework whenever it is reasonably feasible. If the majority of course's class sessions must be missed, however, the course should usually be dropped. When military orders are received late in the term, instructors may offer the option of an incomplete, if academically appropriate.

If, after arranging a course completion strategy, the nature of a student's military service prevents completion of the coursework, the instructor and the Lead Academic Certifying Specialist should be notified. They will assist the student in determining and implementing an appropriate course of action.

## Other Academic Matters

- Students who have suspended enrollment due to service requirements are allowed to re-enter their programs, provided satisfactory academic progress had been made prior to suspension. Existing policies for re-entry or readmission to the University will apply.
- Time spent away from the University by graduate students on military deployments will not count toward time limits set for degree completion.

## Administrative Matters

- A student who is forced by virtue of military orders to drop selected courses or withdraw from a term should receive a 100% refund of any tuition the student has paid for the courses dropped or withdrawn. Refunds of tuition and fees paid by financial aid or other third parties will be handled by the Bursar and the Office of Financial Aid so as not to disadvantage the student but in accordance with applicable regulations.
- A student on financial aid who is forced by virtue of military orders to drop selected courses or withdraw from a term should not be penalized in terms of financial aid eligibility, making academic progress, or other financial aid criteria.
- If a student has arranged an attempt to complete a course and finds that the nature of the military service prevents the student from completing the course work, the student should notify the faculty member and the Lead Academic Certifying Specialist and request their assistance in determining and implementing an appropriate course of action (e.g., requesting an incomplete, dropping the course, and written official leave of absence if needed).
- Room and board charges will be pro-rated based on the student's official check-out date.
- For new students, an enrollment deposit is required to confirm their acceptance of the offer of admission. If a student is deployed to active duty military service before the beginning of the planned term of enrollment, the deposit will be refunded.
- Students may appeal any administrative decisions related to their military participation by requesting the procedures for doing so from the Lead Academic Certifying Specialist.

## Readmitted Students

### Returning Students

A traditional student in academic good standing who withdraws from the University for one or more quarters (except summer session) but fewer than five calendar years must submit a request to re-enroll to registrar@du.edu. They should also submit official transcripts of any college study completed during the time of absence to the Registrar's Office.

Traditional bachelor's program students who have not been enrolled at the University for more than five calendar years from their last term of enrollment must reapply for admission to the University through the Office of Undergraduate Admission. University College students must contact the University College Student Support Center for information on re-entry. Students who are accepted for readmission may choose to complete their degree under the requirements of their original DU bulletin or the current bulletin.

## Graduation Policies

### Requirements for Graduation

- A student must complete the degree requirements listed in the bulletin in effect at the time they were admitted as degree-seeking student at the University. The final responsibility for completing graduation requirements rests with the student.
- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

- Any departure from degree requirements must be approved by the Academic Exceptions Committee.
- Any non-final grade (i.e., incomplete or non-reported grade) must be changed to a final grade.

## Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.
- Students who take classes at another institution while on leave must submit transcripts upon their return to the University.
- Regardless of the degree requirements (coursework and credits) satisfied by the transfer work, the 45-quarter-hour residency requirement must also be satisfied.

## Class Attendance

A graduating senior must attend classes through the last scheduled session of the quarter unless the instructors approve the absence.

## Commencement

### Commencement Ceremonies

Four formal commencement ceremonies are held at the University of Denver each year.

- At the conclusion of the spring semester, a commencement ceremony is held for the Sturm College of Law.
- At the conclusion of the spring quarter, separate ceremonies are held for undergraduate and graduate students.
- At the conclusion of the summer quarter and summer semester, a commencement ceremony is held for all summer graduates.

Students who have completed all graduation requirements during the autumn or winter terms, or will complete all graduation requirements during spring term of the current academic year, are invited to participate in the spring ceremonies.

Students who will complete all graduation requirements during the summer quarter or semester are invited to participate in the summer ceremony.

### Walking in the ceremony

Under some circumstances, students who have not met graduation requirements are allowed, by petition, to participate (walk) in commencement exercises. Students may request to walk in the commencement ceremony.

For additional information about eligibility to walk in the commencement ceremony, please see Undergraduate Request to Walk in Commencement Ceremony (<http://www.du.edu/registrar/media/documents/commencementwalkrequest.pdf>) (PDF) or Graduate Request to Participate in Ceremony (<http://www.du.edu/media/documents/graduates/walking.pdf>) (PDF).

## Commencement Program

The commencement program lists the names of all graduation candidates who applied at the appropriate time to receive degrees at that specific commencement ceremony. The appearance of a name in the program does not guarantee a student's graduation at that time unless all degree requirements have been completed.

## Diplomas

### Diplomas

Diplomas are issued eight to ten weeks after the conclusion of the term in which the student graduates.

### Diploma Name Policy

The student name listed on a diploma or certificate must match the official name on file at the University (first name, middle name, last name), with the following exceptions:

- option of first name or initial;
- option of diminutive or alternate form for the first name;
- option of a first name which conforms with the graduate's genuine expression of gender identity;
- omission of the first name when the middle name is used as a salutary name;
- option of middle name or initial;
- omission of the middle name;
- inclusion of former or maiden name(s);

- inclusion of proper capitalization and accentuation of name; and,
- inclusion of Hispanic maternal surnames.

Neither titles nor degrees previously earned will be included as part of a graduate's name on a diploma.

## Dean's Honor List and Hornbeck Scholars

The Undergraduate Dean's List and Hornbeck Scholars are publicized every quarter in recognition of outstanding academic achievement.

To be eligible for the Dean's Honor List, a student must achieve a quarterly grade point average of at least 3.75 with 12 earned quarter hours or more. A student who earns a quarterly GPA of 4.0 with a minimum of 12 earned quarter hours is named a Hornbeck Scholar, in memory of Stanley K. Hornbeck's outstanding service and scholarship to the University. (Hornbeck received his bachelor's degree from DU in 1904 and became the first Rhodes Scholar from Colorado. He later served the United States as ambassador to the Netherlands.)

Dean's List and Hornbeck Scholars are noted on students' transcripts as "Dean's List." Academic standing and Dean's List calculations are made at the end of grade processing. Standing is not recalculated with subsequent changes of grades (e.g., late grade submissions or makeup of incomplete grades).

## Degrees with Honors

### Latin Honors

Honor designations for baccalaureate degrees are cum laude, magna cum laude and summa cum laude.

- Cum laude is awarded to a degree candidate who has completed at least 90 quarter hours at the University with a minimum GPA of 3.75 in all course work taken at DU. For candidates with fewer than 90 quarter hours, cum laude is awarded if the student received a recommendation from the major department and if he or she achieved a minimum GPA of 3.75 at the University.
- Magna cum laude is awarded to a degree candidate who has completed at least 90 quarter hours at the University with a minimum GPA of 3.85 in all course work taken at DU. A candidate for this honor must present a thesis or project, or receive distinction in his or her major. For candidates with fewer than 90 quarter hours, magna cum laude is awarded if the student received a recommendation from the major department and if he or she achieved a minimum GPA of 3.85 at the University.
- Summa cum laude is awarded to a degree candidate who has earned a minimum of 90 quarter hours at the University with a minimum GPA of 3.95. A candidate for this honor must present a thesis or project, or receive distinction in his or her major. For candidates with fewer than 90 quarter hours, summa cum laude is awarded if the student received a recommendation from the major department and if he or she achieved a minimum GPA of 3.95 at the University.

## University Honors

University Honors Program (p. 698) students who successfully complete honors course requirements along with distinction in their major are recognized upon graduation with both university honors and distinction in the major.

## Distinction in the Major

Most departments offer recognition in the form of distinction in the major. These programs typically include special course requirements and completion of a senior thesis or project. Timing and requirements for entry and completion vary by department, so students should contact a major advisor for details and consult distinction requirements listed in this bulletin under individual programs. Graduation with university honors requires completion of distinction in the major, but students not in the University Honors Program can earn distinction in most departments as well.

## Honor Societies

### Beta Gamma Sigma

Beta Gamma Sigma BGS was founded in 1913, and is the international business honor society for schools accredited by the Association to Advance Collegiate Schools of Business (AACSB), which are the top 5 percent of business school programs around the world. Membership in Beta Gamma Sigma is the highest recognition a business student anywhere in the world can receive in a business program accredited by AACSB International. Inducted as students, BGS members go on to serve in critical leadership roles in corporate, entrepreneurial, government, non-profit, and academic sectors. Members currently reside in all 50 U.S. states and more than 190 countries. The University of Denver chapter is among the oldest BGS chapters, founded as number 19 in 1926.

### Phi Beta Kappa

Chartered in 1940, the Phi Beta Kappa, Gamma of Colorado chapter elects a small number of juniors and seniors each year to membership in North America's oldest and most prestigious academic honor society. Membership is by election only and is based on a high level of academic performance,

broad course distribution across the liberal arts and sciences and a sustained, demonstrated commitment to intellectual curiosity and the spirit of a liberal arts education.

## Honor Societies

There are many additional honor societies open to students at the University. Students should consult with their major advisor or department for information about other honor societies specific to their discipline.

## Course Descriptions

- Accounting (ACTG) (p. 714)
- Advanced Seminar (ASEM) (p. 716)
- Air Force ROTC (RTC2) (p. 743)
- Anthropology (ANTH) (p. 744)
- Arabic (ARAB) (p. 751)
- Army ROTC (RTC1) (p. 752)
- Art - Studio (ARTS) (p. 753)
- Art History (ARTH) (p. 757)
- Arts and Humanities (AH) (p. 760)
- Asian Studies (ASIA) (p. 760)
- Bachelor of Arts Completion Program (BACP) (p. 761)
- Biology (BIOL) (p. 762)
- Black Studies (BLST) (p. 771)
- Business Core (BUS) (p. 771)
- Business Ethics and Legal Studies (LGST) (p. 773)
- Business Information and Analytics (INFO) (p. 775)
- Chemistry (CHEM) (p. 777)
- Chinese (CHIN) (p. 780)
- Clinical Psychology (CPSY) (p. 781)
- Communication Arts (CA) (p. 781)
- Communication Studies (COMN) (p. 782)
- Community Engagement (CENG) (p. 788)
- Computer Science (COMP) (p. 789)
- Construction Management (CMGT) (p. 794)
- Counseling Psychology (CNP) (p. 795)
- Critical Race & Ethnic Studies (ETHN) (<http://bulletin.du.edu/undergraduate/coursedescriptions/ethn/>)
- Economics (ECON) (p. 796)
- Emergent Digital Practices (EDPX) (p. 800)
- Engineering (ENGR) (p. 804)
- Engineering, Bio (ENBI) (p. 808)
- Engineering, Computer (ENCE) (p. 808)
- Engineering, Electrical (ENEE) (p. 809)
- Engineering, Mechanical (ENME) (p. 811)
- Engineering, Mechatronic Syst (ENMT) (p. 812)
- English (ENGL) (p. 813)
- English General (ENGG) (p. 820)
- Entrepreneurship & Venture Mgt (EVM) (p. 820)
- Environmental Awareness LLC (EALC) (p. 826)
- Environmental Science (ENVI) (p. 827)
- Environmental Studies (ENVU) (p. 827)
- Finance (FIN) (p. 828)

# Accounting (ACTG)

## **ACTG 1988 Study Abroad Resident Credit (0-18 Credits)**

### **ACTG 2010 Survey of Accounting (4 Credits)**

Accounting for running a business, with modules on financial accounting and a focus on managerial accounting. Prerequisite: Sophomore standing. Business minors only.

### **ACTG 2200 Introduction to Financial Reporting (4 Credits)**

The purpose of this course is to introduce students to accounting and its relevance in the business world. Students learn how to analyze transactions and prepare financial statements. In addition, students are introduced to publicly traded company's annual reports and 10k's.

### **ACTG 2300 Accounting for Decision Making (4 Credits)**

Introduces or reinforces concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting financial information and making business decisions, not accumulating or preparing accounting information. Students will learn the concepts of cost behavior, cost-volume-profit analysis, master budgeting, relevant factors for short-term decision making and cost allocation. Prerequisites: ACTG 2200 and Microsoft Excel Certification. Must have Daniels student status.

## **ACTG 2988 Study Abroad Resident Credit (0-18 Credits)**

### **ACTG 3014 Accounting Core I - Accounting Fundamentals (4 Credits)**

The course prepares the future accountant to understand how the accounting system and profession functions within marketplace. At the conclusion of this course the student should understand: (1) the fundamental elements and terminology of business transactions and related financial accounting (2) the accounting system of recording, classifying and summarizing information, (3) economic and ethical issues relating to financial accounting, and (4) technical and communication skills necessary for the professional accountant. The practice of technical skills is supplemented with learning concepts and techniques for effective oral and written business functions, with a focus on reinforcing speaking and writing skills through practice and feedback. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.

### **ACTG 3017 Accounting Information Systems & Controls (4 Credits)**

The objective of this course is to provide an integrated learning opportunity that encompasses financial internal controls and accounting information systems. Students will learn skills that can immediately be translated to their jobs/internships. The first part of the course focuses on advanced Excel concepts and certification, as well as learning some basic concepts for database systems using Access. The second part of the course will focus on completing the accounting cycle for a business in a manual environment. The purpose being to understand the relationship of all of the documents and the needed controls. The third part of the course focuses on the use of accounting software to automate the processes from the second part of the course. The emphasis being on understanding the impact on the controls within the system. Prerequisites: ACTG 2200, ACTG 2300, and FIN 2800.

### **ACTG 3018 Intermediate Financial Accounting I (4 Credits)**

Foundations of financial statement content, including structure of financial accounting theory; accounting process and cycle; income determination and reporting; compound interest concepts and relationship to accounting; accounting and reporting for current assets. Case studies of open-ended accounting problems requiring application of GAAP guidance to fact patterns. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800. Must be a Daniels Student.

### **ACTG 3019 Cost Management (4 Credits)**

This course introduces objectives, methods and problems encountered in cost accounting. Cost accounting is a broad field that often links financial and management accounting, involving communication between accountants and management. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.

### **ACTG 3034 Accounting Data Analytics (4 Credits)**

In today's information world, accountants must be well equipped to understand and utilize the vast and varying data systems that feed a company's decision-making process. The course fosters a data analytics mindset in accounting students by providing hands on skills with software tools with a strong emphasis on interpreting and communicating the results to the business. Students will gain experience coding in SQL, loading and manipulating data files in Alteryx, and visualizing data for effective storytelling in Tableau. Projects focus on large scale business cycles and challenge students to craft appropriate questions of the data and dig beyond initial data results to identify trends and root causes. Strong focus is placed on visually and verbally communicating the results of the data analysis to a non-technical business audience.

### **ACTG 3036 Accounting Core II - Federal Income Taxation (4 Credits)**

This is the first course in taxation which introduces the federal taxation system, the importance of tax authorities, the concepts of gross income and tax deductions and the tax implications of common property transactions. This course generally focuses on property transactions, but the taxation of individuals is emphasized with an objective being that students are able to properly prepare complex individual tax returns. Prerequisites: ACTG 3014, ACTG 3018 and ACTG 3019.

### **ACTG 3037 Cost Management (4 Credits)**

Cost Management builds upon basic concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting both high-level and detailed financial information and making business decisions, not accumulating or preparing accounting information. After completing this course, the student should understand: • Cost behavior. • Techniques and uses of cost-volume-profit analysis. • Relevant factors for short-term decision-making. • Cost accumulation, tracing, and allocation. • Components and uses of the master budget. To master the course material, the student will need a basic understanding of historical financial accounting, but the course emphasizes present and future management actions. Prerequisites: ACTG 2300 and ACTG 3018.

**ACTG 3038 Accounting Core II - Intermediate Financial Accounting II (4 Credits)**

The focus of this course is the foundation and content of published financial statements. Specifically, it covers the following two modules: 1) assets: recognition, measurement and reporting issues, a) fixed assets and b) intangible assets; 2) liabilities: recognition, measurement and reporting issues, a) current liabilities, b) contingencies, and c) long-term liabilities. Common to each of the modules is an emphasis on reading GAAP and applying the GAAP guidance to fact patterns. In particular, the course is designed to enhance each student's ability to identify, discuss, and resolve open-ended problems (i.e., those having no single "correct" answer). Therefore, each student must commit to being an active participant in the class discussions. The two main reasons to participate are that (1) the class will be a richer experience if we hear a variety of views on each issue and (2) it is important to develop confidence in your ability to analyze and discuss complex technical issues, and to explain and justify your conclusions. Prerequisites: ACTG 3014, ACTG 3019 and ACTG 3018.

**ACTG 3049 Accounting Information Systems (4 Credits)**

The objective of this course is to provide an integrated learning opportunity that encompasses financial statement assurance and accounting information systems. The first part of the course exposes these issues using a hypothetical company based on an actual company. The student should develop a knowledge and understanding of this particular industry and how it provides assurance of the company's financial statements as well as address a variety of challenging accounting information systems issues. The second part of the course focuses on a conceptual framework to emphasize the professional and legal responsibility of accountants, auditors, and management for the design, operation, and control of AIS applications.

**ACTG 3068 Intermediate Financial Accounting III (4 Credits)**

This course is a continuation of ACTG 3018 and ACTG 3038 and completes the examination of the foundation and content of published financial statements. Specific topics include: stockholders' equity, investments in debt and equity securities, revenue recognition, income taxes, pensions, leases, statement of cash flows, accounting changes and errors, and interim reporting. Prerequisites: ACTG 3034, ACTG 3037, and ACTG 3038.

**ACTG 3069 Accounting Communications (4 Credits)**

This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and team building.

**ACTG 3130 RPA in the Business and Accounting Environment (4 Credits)**

Robotic Process Automation (RPA) is an emerging technology that is changing the way businesses process data. RPA allows many business processes to be automated and remove the human from performing repetitive tasks. This course will teach the basics of the technology using one of the most popular RPA software programs, UiPath. Students will learn the theory, design an application of RPA through small projects.

**ACTG 3220 Understanding Financial Statements (4 Credits)**

Provides business majors with the necessary understanding to read, interpret, and use published financial statements. Cross listed with ACTG 4222. Prerequisite: ACTG 2200 and admission to Daniels.

**ACTG 3230 Financial Statement Analysis (4 Credits)**

Consolidated financial statements, accounting for leases, currency translation, and options and futures impacts, GAAP to restate financial statements for differences between companies. Impact of financial transactions and evaluating a firm's performance from a user's perspective.

**ACTG 3284 Consolidated Financial Statement (2 Credits)**

Consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements.

**ACTG 3285 Accounting for Foreign Operations (2 Credits)**

Financial statement impact from doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

**ACTG 3340 Topics and Cases in Managerial Accounting (4 Credits)**

Topics & Cases in Managerial Accounting focuses upon contemporary methodologies used by managerial accountants. Such methodologies are examined through classroom discussions of case studies and related articles. The course is designed to develop and enhance skills that are essential for the long-term success of career in accounting and finance. Prerequisites: ACTG 2300.

**ACTG 3360 Profit, Planning & Control (4 Credits)**

Comprehensive planning in the corporate environment involving in-depth study of goals, procedures, responsibility, and coordination of planning and control process. Objectives and structuring of planning process, significant problem areas, benchmarks for alternative evaluation processes, and correction and control tools. Prerequisite: ACTG 2300.

**ACTG 3440 Business and Investment Tax Issues (4 Credits)**

Income tax conceptual framework applicable to common business and investment transactions, including tax implications of business decisions. How effective business planning depends on accurate assessment of relevant tax factors. Prerequisites: ACTG 2200.

**ACTG 3461 Individual Income Tax (4 Credits)**

Federal income tax as it applies to individuals, including discussion of rates, exemptions, deductions, and accounting methods; gross income, property transactions, tax deferred exchanges; business operating taxpayer issues. Prerequisites: ACTG 2200.

**ACTG 3462 Corporate & Partnership Tax (4 Credits)**

Federal income tax as applied to the formation, operation and dissolution of business entities. Determination of corporate taxable income, special deductions, credits, methods of computing tax liability and estimated tax requirements. Determination of partnership and S Corporation ordinary income; classification and amount of separately stated items allocable to partners and S Corporation shareholders in accordance with the conduit principle.

**ACTG 3551 Auditing (4 Credits)**

This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports.

**ACTG 3620 Accounting Ethics (4 Credits)**

This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed.

**ACTG 3701 Topics in Accounting (1-4 Credits)****ACTG 3702 Topics in Accounting (1-4 Credits)****ACTG 3703 Topics in Accounting (1-4 Credits)****ACTG 3704 Topics in Accounting (1-4 Credits)****ACTG 3705 Topics in Accounting (4 Credits)**

Prerequisite: ACTG 3068 or instructor's permission.

**ACTG 3740 Valuation and Modeling (4 Credits)**

Professional decisions in the face of uncertainty are made using a combination of judgment and sound analysis. Even skilled professionals in any field will make incorrect decisions when working with incorrect or insufficient information or when making careless analyses. One key to improving decision-making is superior analytical insights and skills. Given this, the ultimate purpose of the course is to: 1. Provide you with experience in identifying critical decisions that can best be improved through analysis of data and modeling. Once key issues are identified. 2. Provide you with the knowledge and insight necessary to identify appropriate (and reject inappropriate) models or analyses. Once an appropriate model or models are identified: 3. Provide you with the tools and skills necessary to correctly use those models by identifying, measuring and evaluating critical factors, data and assumptions. 4. Gain experience in critically evaluating and auditing your work and the work of other professionals. For example, has management used appropriate models, appropriate data and reasonable assumptions in their estimates of fair value for various assets. Prerequisites: INFO 1020, ACTG 2200 and FIN 2800.

**ACTG 3880 Internship - Undergraduate (0-4 Credits)**

Practical work experience.

**ACTG 3885 Undergraduate Field Experience (0 Credits)**

Compensated work experience; no academic credit. Prerequisite: instructor's permission.

**ACTG 3988 Study Abroad Resident Credit (0-18 Credits)****ACTG 3991 Independent Study (1-10 Credits)**

Independent research/study; requires written report. Prerequisite: instructor's permission.

**ACTG 3995 Independent Research (1-10 Credits)**

## Advanced Seminar (ASEM)

**ASEM 2401 'Extreme' Philosophy: Major Philosophical Issues of the 21st Century (4 Credits)**

This course involves an exploration and critical assessment of several of the most important 21st century philosophical issues: the "Doomsday Argument," the "Singularity Argument," the "Simulation Argument," and various views surrounding the possibility (and probability) of extraterrestrial intelligence (ETI). There are no prior knowledge prerequisites; all necessary background information will be presented in the course. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2402 Culture and Identity in American Political Development (4 Credits)**

This course considers the development of American politics over time, through the lens of struggles over culture and identity. We discuss how political and institutional change around these topics happens in the American political system. The first section of the course reviews broad theories in the field of American Political Development, addressing the role of culture, institutions, and policy. We then turn to closer consideration of the ways in which scholars from multiple disciplines have applied these theories to specific areas of American politics. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2403 Versions of Egypt (4 Credits)**

This course will study a handful of books that lead up to and study the recent Egyptian Revolutions. We will read Alifa Rifaat's *Distant View of the Minaret*, Amitav Ghosh's *In an Antique Land*, Alaa al Aswany's *The Yacoubian Building*, Wael Ghonim's *Revolution 2.0*, and excerpts from Peter Hessler's forthcoming book about post-revolutionary Egypt. The class will attempt to understand both 21st century Egypt and the aftereffects of the dramatic changes in Egypt since the first revolution of February 2011. Students will write both critical and creative essays for this seminar.

**ASEM 2404 Music Preference, Identity, Genre, and Recommendation (4 Credits)**

Students examine the relationship between music preferences, personality, and identity. Because music preferences are strongly mediated by cultural industries and institutions, students also examine two of the music industry's tools for connecting listeners to their preferred music: genre systems and a more recent tool, automated music recommendation engines. The course includes three medium-length papers and many written responses to scholarly writing drawn from music psychology, musicology, and music informatics.

**ASEM 2405 Decision-making and Neuroeconomics (4 Credits)**

How do you decide what to buy, who to trust, which job to take, or what you'll want to eat tomorrow? This seminar-style course integrates perspectives from psychology, neuroscience, and economics to understand decision-making, how it is affected by emotions or social contexts, and how it is implemented in the human brain. The course emphasizes active participation, and relies upon primary scientific sources (i.e. peer-reviewed empirical articles). Recommended: a familiarity with at least one of cognitive psychology, human neuroscience, or behavioral economics. Recommended: a familiarity with at least one of cognitive psychology, human neuroscience, or behavioral economics.

**ASEM 2406 Myths of Medieval Encounter (4 Credits)**

Using three case studies (Vikings, Crusaders, and Conquistadors) this course examines how pre-modern authors shaped the image of Europe by depicting foreign cultures and how we use the texts of the past to understand not just the cultures they describe, but also the changing face of Europe across the centuries.

**ASEM 2407 The Individual in Modern Economies (4 Credits)**

This course discusses the role of the individual in modern economies, and the impact that modern economic systems have on individuals and their lives. The course will include objectives that people pursue in societies, and how the structure of the economic system can help or hinder achieving them. To that end, a conceptual understanding of different perspectives on modern economies will be at the center of the class. Those perspectives will be drawn not only from economic concepts in a narrow sense, but also be informed by sociology, political science, and psychology, among other disciplines.

**ASEM 2408 Income and Wealth Inequality in the 21st Century (4 Credits)**

The work of Emmanuel Saez and Thomas Piketty in the early 2000s revealed that the share of income being captured by the top 1% of income earners has been rising steadily for the past three decades. Their observation was the key stylized fact behind the Occupy Movement rallying cry "We are the 99%!" This seminar on income and wealth inequality takes a closer look at the key empirical discoveries and theoretical insights. In the course of reading Piketty's book *Capital in the 21st Century* and supplemental texts representing multiple traditions and perspectives, students engage critically with these topics and the controversies around them. The objective of this course is for students to leave with an in-depth understanding of issues in income and wealth inequality, the controversies around works like Piketty's book, and their relevance for the economic and political present. Enforced Prerequisites: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2409 Performing India: Performance, Ritual, and the Indian Body Politic (4 Credits)**

This course explores "performance" as an organizing principle of Indian cultural, political, and religious expression. We delve into the shared poetic and spiritual experience of the performer and spectator as a foundational aspect of performance that fundamentally shapes the Indian body politic. This interaction between spectator and performer functions as a guide trope as we examine the Pan-Indian oral performance tradition through the transmission, rewriting, recasting, regionalization, and politicization of canonical Indian epics, the "Mahabharata" and "Ramayana".

**ASEM 2410 Science & Religion in Dialogue (4 Credits)**

This course examines the relationship between science and religion. Our key question is "What is the best way to understand or construe this relationship?" We begin by attempting to identify and, then, dispel certain popular "myths" about science and religion. Then we turn our attention to the life, the scientific discoveries, the religious commitments and struggles of Charles Darwin. Darwin's career is the perfect entry point for considering much broader issues in the relationship between science and religion. Darwin's evolutionary theory fundamentally shaped modern science. But in so doing it also raised significant challenges to traditional religious belief, particularly in Christian communities of faith. For that reason, Darwin is as controversial today as he was 150 years ago, especially in (tho' not limited to) America. With that foundation, we shall be in a position to wrestle with a quite recent, thorough-going reassessment of the science/religion debate, one that is both critical and constructive. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2411 Race and the Politics of Punishment (4 Credits)**

This course uses perspectives from history and politics to explore questions about race-based practices and policies in contemporary America. One rich lens on these questions is provided by the current of mass incarceration. Michelle Alexander's book, *The New Jim Crow*, argues "we have not ended racial caste in America; we have merely redesigned it." The course investigates her argument: what would it mean for mass incarceration to be the New Jim Crow? What does that framing reveal, and what does it conceal? Students develop a solid understanding of the origins and consequences of race-based practices and policies (whether explicit or implicit) in American politics, as well as of mass incarceration. Specific examples raise broader questions about racism in American political history, political power, and political change.

**ASEM 2412 Emotions in Theatre and the Brain (4 Credits)**

This course examines one core aspect of human nature: emotion, exploring its dimensions from the perspectives of philosophy, psychology, neuroscience, and theatre.

**ASEM 2413 Applied Neural Networks (4 Credits)**

Artificial neural networks (ANN) are a set of important technological tools that have a wide array of practical applications, ranging from weather forecasting to engineering. This course defines and explains ANNs and how they have been applied to a wide variety of real phenomena.

**ASEM 2414 Wealth, Power & Justice in the European Union (4 Credits)**

This course explores the regional integration of Europe in the postwar era. Since the European Union "began" back in 1950, the central question we consider is why states that fought devastating wars for centuries chose to put down their arms and merge their destinies with a common market, single currency, and binding "supranational" legal system. We focus on the evolution of economic and political motivations for integration and the legal pressures that erode state sovereignty today. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2415 Friendships and Communities (4 Credits)**

Students will examine traditional understandings of social capital and how we form and maintain relationships for personal, social, and political ends. From this background, students will examine new insights about social capital from an interdisciplinary approach (e.g., evolutionary psychology, philosophy, and anthropology). Finally, students will explore these "new syntheses" in relation to contemporary critical issues that cross race, class, and national borders. Possible examples of such issues include incarceration, homelessness, or the function/effects of social networks like Facebook.

**ASEM 2416 France and Germany: From Carnage to Community (4 Credits)**

Today, much to the United Kingdom's chagrin, the European Union is dominated by a closely cooperating "dyarchy" of the French Republic and the Federal Republic of Germany. Go back a century, however, or two or three, and you find France—whether republic (1909), empire (1809), or kingdom (1709)—preparing for war with Germany (1909) or catching her breath between campaigns against various German states (1809, 1709). Hundreds of years of European history are marked and marred by increasingly devastating collisions between these two proud nations. When we review and appreciate that bloody "back-story," their present harmony, indeed on many important matters their unison, is an astonishing outcome, which this course attempts to explain, examining implications for the future of Europe, of the Western alliance, and of the world.

**ASEM 2417 Cultural Dynamics-African American Music (4 Credits)**

This course examines the cultural and psychological functions of various genres of African American music both historically and in contemporary society. The course is built around the thesis that various forms of African American music—e.g., the spirituals, the blues, gospel, jazz, rap - have served common functions in the culture historically (even while serving distinctive needs at different points in history), and have all served as core features of both African American culture and, more broadly, American aesthetic sensibility.

**ASEM 2418 Innovation Nation (4 Credits)**

An in-depth discussion of the American future, which will be defined for the Millennial generation as one in which a confluence of trends will combine to alter the structure of opportunity. Focus on technological change and who it affects economic and national security, privacy and personal liberty, and employment opportunities. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2419 Girl Power: Gender in the Media (4 Credits)**

This course employs an interdisciplinary feminist lens to explore the historical construction and meaning of gender and "girlhood" in contemporary American media culture. It explores how the various discourses of girlhood are constructed through media images and stories about female youth in mainstream culture. Students learn and practice different forms of critical writing. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2420 The Cultured Ape (4 Credits)**

Examines the field of human evolutionary psychology. Evolutionary Psychology examines how human behavior is influenced by our heritage as evolved primates. It challenges the understanding of humans as "blank slates" primarily shaped by their social and cultural environments. The course considers the implications of this perspective for social policy.

**ASEM 2421 War and Peace in Japanese Film (4 Credits)**

War and Peace in Japanese Film looks at Japanese films of the 20th century as documents of the transformation of Japan from an imperialistic and aggressive state to something quite different. It considers contrasting interpretations of Japanese film, ranging from orientalist stereotyping to postmodern critiques of standard categories. The course examines the work of established directors like Kurosawa and Ozu, but also newer filmmakers and challenges too-narrow cultural preconceptions.

**ASEM 2422 Textual Bodies: Discourse and the Corporeal in American Culture (4 Credits)**

This course explores how bodies acquire meanings, and how those meanings are created, represented, disseminated, or contested through discursive and embodied means. Course practices include close readings of literary, philosophical and visual texts; creative and auto-ethnographic writing exercises; and in-class dance-based movement drills. Prerequisite: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2423 The American Road Trip (4 Credits)**

As Frederick Jackson Turner told us back in the 19th Century, American cultural identity has hinged on the idea of an ever-receding frontier and the possibility of reaching it. We will chart how the road figures as both a promise and a burden, and how it reflects changing social and cultural issues in American life. We will consider documents of fiction, philosophy and history as well as film and aspects of popular culture as we consider the America fascination with the road and the careers of its many and diverse travelers. Enrollment restricted to students in the Honors Program.

**ASEM 2424 Poetic Minds (4 Credits)**

How do we know who we are? How do we know what is real? How do we decide what is right? In this ASEM, course participants will trace these key questions from Enlightenment philosophy to British Romantic literature and, finally, to their echoes and afterlives in contemporary literature.

**ASEM 2425 Humans vs. Machines: When will the Robots Leave Us in the Dust? (4 Credits)**

The rise of robotics, automation, big data, cloud computing and artificial intelligence have widely delivered both positive and negative impacts to our economy and society. On the one hand, robots, machines and complex algorithms have drastically improved production, national outputs and economic growth. On the other hand, they have also displaced jobs, weakened human interactions and substantially altered the nature of work and employer-employee relationship across developed and developing countries. This seminar assesses the rise of technology, the disruptions that it entails and the policies needed to confront those changes. The objective of this course is for students to be informed and engaged with opposing arguments and approaches that characterize the creation, promotion, use and problems created by the current and future waves of technological change. The "replicants" are rising; can the humans fight back?.

**ASEM 2426 Narrating Memory, History, Space in the City (4 Credits)**

This course draws on a variety of anthropological questions, theoretical approaches, and methodological techniques to examine the city and city life. It begins with the origins and development of cities and the identification of urban areas as sites for investigation in social theory. It next turns attention to exploring how ethnographers link everyday life on the social periphery to larger historical, political, and economic processes. A major course theme is understanding how urban spaces shape identities and communities, and it uses Denver's changing urban landscape to illustrate the theme. The course considers the basic human practice of listening to stories, as well as the meaning of narration in and about the city.

**ASEM 2427 Mid-Century Mod, Redrawn (4 Credits)**

Studying the art history of the mid-20th Century is not an exercise in nostalgia but a study of the way we think, communicate, and innovate. Artists like Grace Hartigan, Tadeusz Kantor, and El Anatsui illustrate creative labor in a rapidly changing, globalizing world. This course, designed for all majors as part of the advanced seminar common curriculum requirement, takes in part its inspiration from MoMA's initiative Contemporary and Modern Art Perspectives, which aims to redraw understandings of modernism within the purview of global art history and larger cultural framework, including social, political, economic, and intellectual. The course reconsiders the 1950s and 1960s and the notion of "modernity" from multiple geographies and identities: Western and Central-Eastern Europe, Latin and North America, and Africa.

**ASEM 2428 Religion, Nation, and Money (4 Credits)**

Primarily through the lens of Religious Studies, this course, accessible to students from various majors, explores the intellectual history and continued existence of Manifest Destiny in the United States and fosters nuanced perspective concerning the construction of American Identity and U.S. Nationalism. Students examine the relationship between the following: religion and capitalism, religion and national identity, religion and ethnic particularity, religion and race, and religion and armed conflict. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2429 Media Infrastructures and Materiality (4 Credits)**

While people often think of the internet as existing over the air and cell phones as untethered allowing fluid mobility, these digital technologies have a physical and material infrastructure. This course examines and interrogates the materiality of digital technology (cell towers, underwater sea cables, data centers, internet cafes, etc.) and explores "the digital" as a feature of the human within social and historical contexts. The course draws on multiple perspectives to examine the intersection of technology and society in everyday lives by using an ethnographic methodology. Participants working in research teams to carry out ethnographic research, media studies research, and interview-based research to produce media products (audio or video documentary, social media campaign, public art installation, website, or so on) to report about a media infrastructure to be shared publicly in Denver. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2430 Romanticism in Germany (4 Credits)**

The German Romantic movement of the late 18th and early 19th-centuries was one of the most exciting and perilous intellectual adventures in the history of western culture. Some of the most daring, creative and prophetic work was done at this time, and it dramatically affected nearly every facet of German culture, inspiring novel, sometimes unprecedented, developments in philosophy, aesthetics, poetry, literature, music and criticism. Nor were these developments limited to German culture, but extended to its politics and efforts to form a unified national front against the deracinating effects of industrialization and modernization. The course traces these developments through an exploration of some of the seminal figures, themes and ideas of the Romantic period, primarily in relation to their intersection with philosophy, politics and art and German history. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2434 American Film Censorship and the Hollywood Production Code (4 Credits)**

This course focuses on the evolution of censorship in American cinema and its wider implications. Such focus involves careful examination of the moral, political, and social choices that impact "what" stories can be told and "how" they are told. The course emphasizes critical analyses of how social values and norms influence cinematic storytelling and aesthetics. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2435 Utopia and Dystopia: Brazilian Art & Culture in the Latin American Context (4 Credits)**

This course is an interdisciplinary examination of utopia, and its counterpart dystopia, in Brazilian art and culture. "Utopia and Dystopia" traces the history of these concepts through theoretical readings and in-depth analyses of specific projects in Brazilian art, architecture, literature, music, and cinema. Upon successful completion of the course, students understand how these two concepts have shaped Brazilian identities both from within and as imposed by colonialist projects from without. Students develop advanced writing skills by comparing and contrasting different expressions of the utopia/dystopia dichotomy and by analyzing cultural artifacts from several different traditions in Brazil and, more widely, in Latin America.

**ASEM 2436 Life and Death (4 Credits)**

In this course, students examine several of the moral issues concerning the circumstances under which it is appropriate for humans to bring about life or death. For example, is it morally permissible to bring about, and subsequently destroy, human life in a petri dish? Is it permissible to bring about the death of people who have killed others? We examine and evaluate others' responses to such issues. En route to answering these questions, we pay significant attention to the scientific and empirical factors relevant to which moral responses we should have and to the legal factors determining the actual policies we do have.

**ASEM 2437 Rhetorics of Monstrosity (4 Credits)**

In this course we will examine how the construct of monstrosity can help us understand societal, political, and cultural meanings around race, class, gender, sexuality, and ability. Monsters can tell us a great deal about the cultures that produce them, such as their social anxieties and ideological struggles. We will examine monstrosity rhetorically in order to gain tools to critically unpack nuanced and complex issues of power and difference.

**ASEM 2438 Music and Language (4 Credits)**

Music and language are two of the most complex and powerful communication systems shared by humans globally. Drawing on methods and theories from anthropology, ethnomusicology, cognitive psychology, and literary theory, students in this seminar explore the music-language interface from interdisciplinary and cross-cultural perspectives.

**ASEM 2439 Music, Politics, and Policy (4 Credits)**

Music is often considered a positive, peace-building force in the world. Like all other forms of human expression (e.g., speech, prose), however, music engages with diverse political agendas and ideals, from peaceful humanist ones to violent nationalist ones. This course examines the ways in which politics and policies engage with popular, jazz, folk, and classical musics around the world. Students will explore contemporary and historical cases in which governments and NGOs foster, transform, reject, and otherwise use musics to promote their own ideas about local economies, national cultures, diplomacy, democracy, innovation, cultural diversity, and even criminal law. The course asks how might music and the arts more broadly have a unique role in these contexts? How is artistic expression different from other forms of human expression here? Can music promote peace? Democracy? How? How do governments create local and national music scenes? Which local and national cultures do they promote and protect? To what end? It looks at how the Cuban government has embraced rap music as emblematic of the nation's revolutionary ethos; how the United States government used jazz as a diplomatic tool during the Cold War; how NGOs in Israel and Palestine used popular and classical musics to promote peace and understanding; how American courts have used rap music as evidence in criminal cases; and how funding and intellectual property laws impact musical ownership, tradition, innovation, and creativity.

**ASEM 2440 Traumatic Encounters through the Lenses of Philosophy and Literature (4 Credits)**

The course explores the intersection of philosophy and literature in relationship to trauma, art, politics and the modern ecological crisis. The course is divided into three parts, each exploring a way that philosophy and literature address the challenges and dilemmas of our contemporary situation, from questions about human sovereignty, freedom and dignity to questions concerning technology, the natural world and global economic justice. In part one, "Sovereignty and Bare Life," questions related to state power, love, intergenerational conflict and displacement are explored through considering Shakespeare's *King Lear* and Giorgio Agamben's *Homo Sacer*. Part two, "Remembering the Future: Trauma and Time's Reminders," considers how F. W. J. Schelling's *Ages of the World* and Toni Morrison's *Beloved* respond to personal and historical traumas, and how these works redefine time, memory and belonging. Part three, "The Ends of the World: Poetry and Philosophy in a Time of Crisis," confronts the unfolding ecological crisis through an exploration of W. S. Merwin's poetry and the late, poetically inspired philosophy of Martin Heidegger. The course is multiperspectival in terms of disciplinary and thematic content and in terms of methodology. Readings highlight how concepts, methods and interpretive strategies of philosophy, can augment analysis of literary works, while literature can not only enliven philosophical argument but approach the limits of what can be communicated philosophically.

**ASEM 2441 Changing Meaning of Adulthood (4 Credits)**

When does a person reach adulthood? Age 18? Age 40? Never? What is adulthood, and how do we measure it? Is it when one's frontal lobe matures, when one starts a family of their own, or simply when one feels "mature"? This class surveys various, competing perspectives on what adulthood means and questions whether adulthood has changed. It approaches adulthood from several disciplinary perspectives, mainly neuroscience, psychology, sociology. Students also engage with the media's angst about Millennials' "failure to adult" by writing Op-eds that draw on academic research. Prerequisites: Completion of all of Common Curriculum Requirements.

**ASEM 2442 Mental Health from a Public Health Perspective (4 Credits)**

This course examines mental health as a public health issue. It addresses a wide range of topics relevant to public mental health care, from the micro-level focus of the psychiatric domain to the macro-level focus of the sociological domain. Particular attention is focused on the structure and function of the mental health care system, the measurement and burden of mental disorder, the social determinants of mental illness, and cross-cultural perspectives on mental health. Also emphasized are the roles that mental health and illness play in un/intentional injury, in the experience of and recovery from disaster, and in the American criminal justice system.

**ASEM 2443 "All the world's a stage": Shakespeare Then and Now (4 Credits)**

"All the world's a stage": *Shakespeare Then and Now* is an ASEM team-taught by faculty from the Departments of English and Literary Arts and Theatre. It emphasizes close reading, writing and interpretation as well as acting techniques and dramatic performance of selected scenes. The four plays and two contemporary novels based on the plays are chosen to underscore the range and diversity Shakespeare displayed in his choice of plot, setting and character and to demonstrate Shakespeare's continuing relevance to political, racial, religious and gender issues. Prerequisites: Completion of all other Common Curriculum Requirements.

**ASEM 2444 Colonialism/Race/Decolonization (4 Credits)**

This class examines how colonialism and race function as different but interlocking systems that cannot be understood separately. The course examines how the two continue to have an effect on the world and continue to be important to understand global inequalities. The writings of anti-colonial and anti-racist indigenous, black, feminist, and third world intellectuals, along with texts from European figures such as Hobbes, will be used to explore colonialization and racism. Prerequisites: Completion of all other Common Curriculum Requirements.

**ASEM 2445 Freestyle: Technology, Culture, and Improvisation (4 Credits)**

This course introduces the recent history of musical and cultural forms devoted to improvisation, including jazz, free music, psychedelic and progressive rock, and jam bands, culminating with a focus on the practice of freestyling within hip-hop. It explores the importance of civil rights and human rights discourses to these musical and cultural forms, as well as the critical role these forms have played in civil and human rights movements. The course emphasizes how diverse subcultures of artists, producers, concert organizers, and audience/listeners form around these types of musical expression. It examines improvisation as a response to emerging technological forms (new musical instruments, recording technologies, concert presentation, accessibility and distribution, particularly those enabled by networking technologies) by which musicians and listeners embody new personal as well as collective identities.

**ASEM 2446 Ethics of Creating the Impossible in Modernity and Postmodernity (4 Credits)**

In modernity and post-modernity, good intentions have not always led to good results, and even "good" results come with costs. Creating the impossible turns to ethical studies to analyze the most amazing technological successes--and the social, ecological, and economic costs associated with scientifically and technologically engineering the impossible. Using a case study model covering topics including ecology, biomedical research, enslavement, gender reassignment, urban planning/policing, the technological singularity, internet privacy, contemporary eugenics, and cutting-edge military research and development, this course addresses a central question: "Sure, we can make that happen, but should we?"

**ASEM 2447 Arab Feminisms in Everyday Life (4 Credits)**

This course is designed to introduce students to Arab feminism. We use Arab feminism to analyze and reflect on everyday life experiences of Arabs around the world and how they relate to larger political and social structures. Feminism is represented as incompatible with Arab societies. The goal for this class is to engage with texts that privilege Arab feminist perspectives to analyze issues of social and political importance. Further, we focus on texts that resist historical and contemporary Orientalist discourses that directly link Islam to the Middle East and Arab identity. The main objective of this course is to offer an overview of the study of feminism through a non-white and underrepresented positionality taking into account religion, race, class, gender and citizenship. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2448 Letters to the History of Photography (4 Credits)**

Through presentations, readings and writing assignments, this course advances the multidisciplinary impact of photography and how photography is directly or obliquely linked to all fields of experience and knowledge. The course objectives embrace interdisciplinary learning and promote the premise that absolutely everything is connected. Employing an epistolary approach (writing letters) students respond to weekly assignments by corresponding with a diversity of practitioners and scholars related to the cultural, historical, and scientific evolution of photography. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2449 American Material Culture: Honors (4 Credits)**

The aim of the class is to engender a richer understanding of everyday life in the United States, both in the past and the present. Material culture around which the course centers is broadly defined and includes settlement structure, architecture, domestic artifacts, art, foodways, and trash disposal. These phenomena are investigated telescopically, as a way to view national structures and trends and, microscopically, to focus on individual actions and lives. Enrollment restricted to students in the Honors Program.

**ASEM 2450 Settler Colonialism: Pasts/Presents/Futures (4 Credits)**

Informed by work in critical indigenous studies, this course examines settler colonialism as a particular form of colonialism which is not a phenomena of the past but one that is central to the organization of contemporary society. Starting with the theft of indigenous lands, settlers unleashed processes that have had far-reaching impact across several domains. These range from altering the sexual organization of the family and the economic organization of society to the use of technologies and processes developed against indigenous people to oppress non-indigenous racial and other minorities. This class explores all these phenomena starting with the profound life-altering impact that settler-colonialism has for indigenous people and then branches out to explore the place of settlers, non-indigenous people of color, and other minorities in the settler-colonial matrix. Furthermore, the class explores settler colonialism as a transnational phenomenon by looking at other settler-colonial sites such as Palestine/Israel, Australia, and New Zealand, among others. The course ends by considering decolonization as a politics that is committed to indigenous liberation and as an ethic that is both incommensurable with other political projects but can also profoundly transform them. Writing intensive. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2452 Media and Terrorism (4 Credits)**

A 2018 Pew national survey showed that Americans rank terrorism as the top priority the U.S. President and Congress should address despite terrorism accounting for 0.05% of deaths worldwide. The media play a role in that disconnect. We live in a world where no single entity can exercise a monopoly over communication channels. Hence, partisan media, ideologically-driven news outlets, social networking sites, and encrypted messaging apps serve as venues harboring polarizing, contested rhetoric that catalyzes fear. This seminar investigates the media-terrorism nexus. The readings, discussions, and writing projects empower students to grasp how the media cover terrorism, violent actors co-opt the media, and various players craft anti-extremism messaging.

**ASEM 2453 London and Media: Then and Now (4 Credits)**

This seminar explores London's "popular" and "high culture" media in the 19th and 20th centuries. Taking advantage of both the University of Denver's online databases and London library holding, students explore a number of the major 19th century London-based British newspapers and journals that proliferated after the abolition of the Stamp Tax in 1855. Students explore significant differences between popular and high culture in 19th century newspapers and journals that target different audiences. Simultaneously, students read articles from contemporary London newspapers. They have a constant commentary on contemporary issues to counterpoint the 19th century readings. From these parallel readings, students discover not only similarities and differences in key issues but also learn how rhetoric, style, diction and voice differ between 19th- and 20th-century journalism. Class discussions and writing assignments focus on comparisons between 19th- and 20th-century topics, intended readership, style and rhetoric.

**ASEM 2454 Psychology of Religious and Spiritual Practices (4 Credits)**

This writing-intensive course focuses on understanding religious and spiritual practices integrating multiple sources of information. Examples include meditation, prayer, group worship, psychedelics, and gratitude. Students find and analyze scholarly and non-scholarly information and integrate multiple disciplines and perspectives in understanding these practices. Students communicate and extend their understandings through discussion, writing, and presentation. The goal is for students to gain a deeper understanding of these practices, learn multiple approaches to studying human activities, and improve their writing skills. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2455 Music, Virtuosity, and Value (4 Credits)**

This course explores the concept and phenomenon of musical virtuosity across multiple historical and historical contexts. We consider the meanings of musical skill and how debates about virtuosity's merits or dangers reflect aesthetic and ethical values. There are no prior knowledge prerequisites; necessary background information will be presented in the course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2456 Remembering Medieval Iberia, from 711 to 2020 (4 Credits)**

Medieval Iberia was home to Muslims, Christians, and Jews who lived together and interacted in complex ways that were both conflictive and cooperative. This course explores the complexities and contradictions of medieval Iberia by paying particular attention to the divergent ways that the period itself has been understood and instrumentalized in post-medieval times. The course uses a range of disciplinary perspectives, informed by religious studies, literary and cultural studies, history, political science, anthropology, and linguistics, to address some key questions. How has the 'coexistence' of Islam, Christianity, and Judaism in Iberia been interpreted in modern times? How do the categories of politics, nationalism, race, language, or faith shape opposing readings of the past? What can medieval Iberia teach us today about the world we live in? Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2457 Bioethics in Today's World (4 Credits)**

Bioethics is a field fueled by the need for information, analysis and consultation among policy makers, health-care professionals and institutions. Ethical issues related to scientific research and health care have recently gained much attention, generating significant demand for students and citizens to understand their moral, legal and risk/benefit aspects. This course operates on a cooperative learning basis, using a debate model to inform and involve students in controversies in bioethics. Course readings represent the arguments of leading philosophers and social commentators, treating such topics as death and dying; choices in reproduction; children and bioethics; and genetics. Additionally, the course examines some basic ethics tests: harm/beneficence, publicity, reversibility, code of ethics, and feasibility. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2458 Satire in the Arts & Media (4 Credits)**

This class explores how satire, in its myriad manifestations, juggles immediacy and universality in the cultures and time periods in which it is born. The course's interdisciplinary nature makes it unique, and its celebration of satire as a discipline that traverses a multitude of forms gives the course an exciting, dynamic quality.

**ASEM 2459 Anti-Social Media (4 Credits)**

This course addresses the negative effects of our connective technologies. Examining the media landscape of 100 years ago through the lenses of literary analysis, media theory, and history, it presents the 20th-century origins of our concerns with the media "bubble," with the threat that new media pose to democracy, and with loneliness. By grounding the question of media in history and in the disciplined analysis of literary form, this course seeks to generate more effective modes of thinking about the mediated life. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2460 Latina/o Religious Traditions (4 Credits)**

This course is organized around the broad question: Is there enough commonality in the texts (including cultural texts) we have studied to organize and name a singular field of social relations we can rightly call "Lainta/o Religion?" This course engages and excites students by enabling them to study religious traditions in an academic place removed from direct faith commitments. Toward this end, we will view art, hear music, watch films and talk to religious leaders.

**ASEM 2461 Fairy Tale Morality (4 Credits)**

Stories and books for children carry implicit and explicit messages about stereotypes, beliefs and expectations in our culture, and make assumptions about the cognitive, social and emotional maturity of the child. This course explores a range of children's books, examining the cultural messages they send and the assumptions they make about children's development. Selected books will be those written for different ages and cultures, as well as from different historical periods, to highlight how children's literature mirrors and propagates cultural norms. We examine selected works using literary, psychological, sociological and educational perspectives.

**ASEM 2462 Psychedelia in the Age of Artificial Intelligence (4 Credits)**

This course introduces the history and current status of psychedelic music. In pop, rock, electronic dance music and techno, hip-hop, and other forms, psychedelia is examined as a symptom of and response to emerging cultural, technological, and scientific ways of knowing and being in the world. Particular attention is given to the intersection of contemporary psychedelic research and recent developments in cognitive and computer science, including machine learning and artificial intelligence. Prerequisites: Completion of all other common curriculum requirements.

**ASEM 2463 Identity and Politics: Multidisciplinary Approaches (4 Credits)**

What is identity? Are some types of identity (e.g., religion or "race") more likely to influence political outcomes than other types of identity (e.g., profession or class)? If so, why? This course introduces three different approaches to the study of identity and politics, including political science, evolutionary psychology (and biology), and comparative historical sociology. We analyze what is useful and problematic about each approach, and use these periods of reflection to hone critical reading, writing, and discussion skills. Students walk away from the course with significantly greater insights into the processes by which individuals and societies construct identities, including our conscious social behavior, unconscious cognitive tendencies, and struggles over political institutions and social norms. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2465 Environmental Controversies (4 Credits)**

This course concentrates on how various political actors and institutions have constructed the relationship between humans and the natural environment. Through important rhetorical texts and controversies in American history, this class critically engages diverse voices and styles of discourse, including those of elected officials, bureaucrats, lobbyists, grassroots activists and citizens more generally.

**ASEM 2466 When Love Becomes Weapon: Charm in International Relations (4 Credits)**

Scholars of international relations have long believed that it is better to be feared than to be loved. However, as America prevailed over the Soviet Union in the Cold War, a new theory emerged: America won simply because it was perceived to be more attractive than the Soviet Union. America won because of its values, not its guns. How might we assess this argument? What goes into the making of American power: missiles or Rock'n'Roll? To what extent has China, among other competitors, challenged American soft power? Where should one draw the line between soft power and propaganda? What is the future of soft power, as countries' pursuits of their national interest often collide with transnational common issues like protecting the environment? This course explores these questions through multiple perspectives drawn not only from political science and history but also from sociology, philosophy, cultural studies/popular culture, and so on. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2467 Queer Memoirs (4 Credits)**

The memoir, or the fictionalized autobiography, holds an important place in LGBTQ culture. In some ways it is the most complex and lasting form of coming out, a permanent announcement of the author's queer identity to a potentially vast audience in a way that allows for intricate explorations of the body, gender, sex, and the self. The course traces the importance and predominance of this queer art form over the past half century, starting with very recent work, such as Akwaeke Emezi's *Freshwater* and Ocean Vuong's *On Earth We're Briefly Gorgeous*, and work its way back to earlier work dealing with moments in which homosexuality was still criminalized in Great Britain and the United States, such as James Baldwin's *Giovanni's Room* and Quentin Crisp's *Naked Civil Servant*. Objects of study will include literary works as well as other art forms, such as the Magnetic Field's *50 Song Memoir*, Alison Bechdel's *Fun Home*, and Mike Nichols's adaptation of Tony Kushner's *Angels in America*. Such a topic and a trajectory will necessitate an interdisciplinary approach. In examining literary texts, music, film, and other forms of visual arts, the course will approach them with methods drawn from art history, history, legal studies, literature, media studies, music, philosophy, and sociology. Students produce different sorts of writing, including advanced scholarly and creative work. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2468 In Search of Eudaimonia: The Art and Science of Student Wellbeing (4 Credits)**

Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this Advanced Seminar explores current research on health and wellbeing and engages broader questions of how higher education contributes (or doesn't) to student wellness. The course draws on scholarship from disciplines including health, psychology, philosophy, sociology, and others to explore various wellness approaches. This writing-intensive course includes research-driven projects culminating in proposals to improve student wellbeing. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2469 Imagining the Amazon (4 Credits)**

Representations of Amazonia often invoke images of either an earthly paradise or a green inferno. This course begins by challenging students to critically (re)frame their images of the Amazon by underscoring the unequal power dynamics that have come into play whenever outsiders have represented the landscapes and the peoples of Amazonia over the past 500 years. Using a variety of theoretical paradigms, students in this course study representations of Amazonia created both by indigenous writers and activists, as well as several widely disseminated (and critically heralded) novels, films, and journalistic essays created by 'outsider' authors and auteurs from Latin America, the U.S., and Europe.

**ASEM 2470 Words, Music and Social Change (4 Credits)**

"Words, Music and Social Change" examines how critical conflicts in several countries and historical time periods can be understood by studying music and musical performances in those places and time. The course focuses on song performances and videos in relation to societal changes. Among conflicts explored are the American civil rights movement, immigrant issues, the crisis of AIDS, the South African revolt against British diaspora, Russian youth embrace of the Beatles, and the role of singing in Estonian to independence from Russia. In addition to the music itself, primary and secondary source readings articulate the power of songs to elicit societal change. Prerequisites: completion of all other common curriculum requirements.

**ASEM 2472 Islamic Art and Mysticism (4 Credits)**

This course introduces Islamic art and architecture, focusing on appreciating and understanding formal qualities of works of art, their meaning, and their cultural significance in larger contexts. The course discusses the intimate connections between art, literature, and historical events, with readings that include texts in art history, Middle Eastern history, the rise of Islam, and translated literature. The course includes units in Painting and Literature, Early Islamic Literature and Material Culture, and Islamic Mysticism and the Arts. Like all ASEM courses, Islamic Art and Mysticism is writing intensive. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2473 Climate Science and Policy (4 Credits)**

Climate Science and Policy (CSP) addresses the scientific principles and data that show the climate is changing and that humans are causing a significant portion of that change. CSP also addresses the nature of the current American discourse on climate change and climate policy. CSP finally provides students with the opportunity to suggest ways out of our present policy paralysis, with prescriptions that address the current scientific findings and principles, economic realities and American policy practices.

**ASEM 2474 Media & Democratization: A Comparative Perspective (4 Credits)**

This class treats the media as a crucial linkage institution between state and society. It examines the interactions between the media (as a socially constructed functional group) and their larger political, social and economic environments. It also explores the relations that govern these interactions.

**ASEM 2475 U.S. Immigrant Narratives (4 Credits)**

U.S. migrant narratives tell a story about nation-building, citizenship, and globalization. This course explores the diverse ethno-racial experiences of migration in the 20th and 21st century through literature and film. Course readings provide a nuanced lens for considering the broader policies and discourses on nativism, immigration law, media representations, and border fortification. What do these stories tell us about the past, present, and future of migration/immigration? How are these narratives encoded with popular and political practices and discourses? How do these stories disrupt, challenge, or consolidate these discourses? Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2476 Capital Punishment (4 Credits)**

This course draws on research from multiple academic disciplines to examine the following: (1) the history of capital punishment in America (temporal trends, public opinion, landmark Supreme Court cases and the impact on parties); (2) the case against capital punishment (race, class, gender, cost, juror qualification, juror error and innocence); and (3) the case for capital punishment (deterrence, incapacitation, quelling vigilantism and retribution). Most students have an opinion on capital punishment despite limited knowledge. Regardless of whether a student is in favor of capital punishment or opposed, the course is exciting and challenging because the student is forced to question and perhaps even reconsider her/his opinion in light of the evidence.

**ASEM 2479 Environmental Culture in East Asia (4 Credits)**

This course explores current environmental and ecological challenges in major East Asian countries such as Korea, Japan, China and Taiwan through the lens of ancient and contemporary cultural and philosophical traditions. The course examines 1) primary traditional Asian philosophic and religious concepts about Nature, such as Confucianism, Taoism, and Buddhism, as well as traditional literatures and arts that reflect those concepts; 2) contemporary eco-literature and eco-cinema that function as responses to, and critical reflections of, the urgent environmental crises in those countries; 3) cultural practices that are officially, communally, or privately implemented for eco-preservation and environmental-protection. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2481 Witchcraft & Renaissance Drama (4 Credits)**

Witchcraft and Renaissance Drama traces how the rise of the witchcraft panic in England is reflected in and fueled by several venues of cultural production in England from 1558-1621. The course takes an historical journey through the laws against witchcraft, the witch trial transcripts, the emerging gender pamphlet wars and the popular drama as all manifestations of how the metaphor of witchcraft served to address several cultural fears of the transition between Early Tudor, Late Elizabethan and Early Jacobean to explore how the drama both responded to and shaped the development of the Witch craze.

**ASEM 2482 Africa (4 Credits)**

In this course, we study the literature, politics and culture of Africa from pre-colonial times to the present. We begin by examining Africa as the locus of the world's oldest civilization and by discussing some key moments in African history. We then focus on the four regions of Africa, on country- or region-based examples of culture and politics in Africa—such as colonial rule in East Africa, war of independence in North Africa, military rule in West Africa, Apartheid in Southern Africa. We also discuss Africa and the world, or Africa in the context of modern-day globalization. In each case, we discuss historical accounts and literary representations as well as political and cultural contexts.

**ASEM 2483 Beyond Play: Board Games as Social Texts (4 Credits)**

Since the early 2000s, board and tabletop games have experienced a renaissance of sorts in sales and popularity. These games and the contexts in which they exist and are played provide interesting foci for cultural study and production. This ASEM focuses on possibilities and implications within the realm of physical games. It complicates traditional understandings of understand gaming or “play” in the sense of diversion, a framework in which games are viewed mostly as sold through major markets as tools for fun. This course values that form of cultural meaning but pushes class members to study and make games that serve different purposes. The course examines cultural and psychological studies of games and players, histories of gaming, statistical modeling, rhetoric and other topics and disciplinary lenses. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2484 Culture of Desire (4 Credits)**

How does desire shape the identity of a culture or society, how is it expressed, and how is it limited? This course examines four different postulated societies to see how they shape their gendered desire. Using queer theory and its impact on interpreting the body and its limitations and freedom, the course examines questions raised by these future imaginings, testing them in applications to contemporary society and our understanding of ourselves. This course brings together literature, sociology, anthropology, linguistics in queer journey through reality and the imagination. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2485 Sustainable Living (4 Credits)**

In light of today's global environmental exigencies, and in keeping with the university's new sustainability priorities, this course challenges students to work out the sustainable provisioning of shelter, power, water and food at the residential level. In this course, students examine the ways in which our current practices are unsustainable, explore more sustainable alternatives (some very old, some very new), and explore the politics and policies that hinder or help the movement toward these more sustainable alternatives. Material is presented in the form of readings, some field trips and campus walks, and some hands-on learning in workshops.

**ASEM 2486 Chaucer's London (4 Credits)**

This course is a study of the medieval London - the people, customs and social order--by looking through the lens of the great satirist of the fourteenth century, Geoffrey Chaucer. We read a few of the Canterbury Tales and some medieval documents that give a fuller picture of medieval London. Our focus is on seeing the medieval origins of the modern city, and comparing the medieval cosmopolitan city with the cosmopolitan city of the early twenty-first century. In addition to reading original documents and secondary research on medieval London, we take virtual trips to Canterbury, the medieval university towns of Oxford and Cambridge, the medieval cities of York and Norwich, the Museum of London, and learn about the historical significance of the Tower, Westminster Abbey, Guildhall, Inns of Court, and St. Bartholomew-the-Great.

**ASEM 2487 Environmental Issues in Italy (4 Credits)**

This course explores the geography of Italy from the cities to the coasts with a specific focus on environmental issues. From the more highly urbanized and industrial north to the more rural and agrarian south, Italy's regions display fascinating contrasts in physical geography, population, culture, politics, and economic/social development. Within each of the regional contexts, a focus on the cities reveals insights into the nature of the Italian urban landscape, while discussion of environmental issues in both urban and rural settings highlights the importance of sustainable development in Italy.

**ASEM 2488 Exploring Contemporary Art "in situ" (4 Credits)**

Exploring Contemporary Art "in situ" is an exploration of contemporary artworks situated in galleries, museums, and public sites in greater Denver. Students will closely observe artworks by various living artists and read them as primary texts to which they will respond with their own writings in contemporary social media. The course will meet on location at least once each week to be in the presence of the source art works.

**ASEM 2490 Politics of Rights (4 Credits)**

This course explores the relationship between politics and rights from a comparative perspective.

**ASEM 2491 Art and the Environment (4 Credits)**

This course takes an historic approach to a discussion of art and the environment. While certainly we could go back to the integration of art and its environs in the Prehistoric period, this class focuses on the contemporary art world.

**ASEM 2492 Animals and Human Societies (4 Credits)**

This course considers human-animal relationships from a variety of disciplinary perspectives. Focusing on Western Europe and America, we explore the many ways in which people interact with non-human species--killing them for pleasure, eating them, observing them and caring for them--and the effects of these interactions on both animals and people. Thinking about animals sheds light on crucial issues in today's society, with implications for everything from environmental change to the impact of consumer culture to the ethics of euthanasia.

**ASEM 2493 Caring in a Capitalist Economy (4 Credits)**

How does a good society address the needs of members of that society who cannot fully take care of themselves? Does caring have a place in our capitalist economy? Do we organize the provision of care in a just way? How do we balance our caregiving responsibilities in our daily lives? Through course lecture, discussion and community caregiving, we explore these challenging questions using insight from economists, philosophers, sociologists and others to help us better understand how we provide care within our capitalist economy.

**ASEM 2494 Global Ecology of America (4 Credits)**

Ecology is the science of interconnections, and "The Global Ecology of America" encourages students to think anew about the ways the United States interconnects with the rest of the world. As the word "ecology" suggests, our primary focus is on environmental interconnection. This class is concerned with both communities and environments. It seeks to make students more aware of the essential links between the two, and it also seeks to shed light on the often unseen or ignored ways our lives, as Americans, shape--and are in turn shaped by--the lives of other people in other places all around the planet.

**ASEM 2499 Mountains: Ecology, Imagination, Aesthetics, and Challenges (4 Credits)**

Why are people drawn to mountains? What geological and biological features account for our interest, and how might the psychology and philosophy of aesthetics explain why mountains have multiple uses and effects, recreational to religious? How have writers, artists, filmmakers, climbers, skiers, and hikers historically represented mountain experiences? And what are the economic and ecological consequences of all this attention? Can we "ruin" mountains? This writing-intensive course addresses these complex questions through multiple perspectives drawn from the several disciplines noted above. Equally complementing scholarly readings are several popular personal and creative works: films, stories, adventure memoirs, diaries, and so on. Course may include, when circumstances permit, field experiences in the Colorado Rockies and archival work at the American Alpine Club Library in Golden. This ASEM course is open and accessible to advanced undergraduates from all majors, regardless of experience and academic background. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2501 The Addictive Self (4 Credits)**

This course examines the interconnections between addiction and the formation of the sense of self or "self-identity." Students construct a working theory of addiction in relationship to selfhood, considering narratives of addiction, and explore the stories not only of alcoholism and drug addiction, but also of food and "process" addictions. The course explores the texts and issues involved from a variety of disciplinary perspectives, including especially those of psychology, sociology, psychoanalysis, literary criticism cultural theory and philosophy.

**ASEM 2502 Fictitious Ecologies: Envisioning Provisioning Through Science Fiction (4 Credits)**

This course uses science fiction to examine some of humankind's social and ecological ills through multiple perspectives and disciplines. These include environmental science, ecology, ecocriticism, and science fiction, especially its history, genres, and topics, for example, climate fiction (cli-fi), Afrofuturism, cyberpunk, indigenous epistemologies, ecodystopias, and post-apocalypses. The course also includes different paradigms of economic analysis, including ecological, feminist, and institutional. A goal of the course is to envision future provisioning possibilities that are in line with Earth System stabilization and reducing social disharmony. As an ASEM, the course is writing intensive. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2503 AIDS: Then and Now (4 Credits)**

HIV/AIDS is for the most part forgotten in the developed world; it has morphed into a manageable chronic disease. But it has not disappeared, and it has had an enormous impact on our lives and identities. This course will examine the ongoing cultural legacy of HIV/AIDS, concentrating on activist movements in the United States, followed by an examination of HIV/AIDS in sub-Saharan Africa today. This course brings together biology, literature, sociology, and linguistics in a queer journey through the impact of HIV/AIDS. As an Advanced Seminar, this course is writing-intensive, and you will be working on your written expression during the quarter. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2504 Land and Law in Africa: The Politics of Land Acquisition and Distribution (4 Credits)**

In settler colonies in Southern and East Africa, millions of African people were displaced from the land on which they had lived for centuries to make way for European settlement and agriculture. In the postcolonial era, these countries have attempted to redress these legacies by legally redistributing land from the descendants of white farmers to Black farmers and shareholders, with controversial results. Focusing on Kenya, Zimbabwe, and South Africa, this class considers the histories of precolonial systems of land tenure and the colonial legal mechanisms enforced in the often-forced acquisition of land, and how contested meanings over land to different communities are articulated in the postcolonial world in considering who the land belongs to today. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2505 Early Social Experiences and Health Throughout the Lifespan (4 Credits)**

This writing-intensive course focuses on how social experiences during infancy, childhood, and adolescence influence mental and physical health throughout the lifespan. It covers social experiences broadly, including close relationships, neighborhood-level factors, policy, built environments, and social stress, among others. It discusses the positive and negative experiences that can shape development directly and indirectly, and students innovate ways to enhance the public good through applying research. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2506 Creativity (4 Credits)**

The course inspires students to be creative in all facets of life and provides extensive practice, with feedback, in being creative through daily class activities, outside-of-class writing assignments, and class presentations. Students learn the classic techniques for getting novel ideas as well as how to navigate the obstacles that so often restrict creative expression. Students learn how to be creative in a wide variety of different genres so as to fashion their own personal styles.

**ASEM 2507 Earth Sound - Earth Listening (4 Credits)**

This course is an environmental humanities seminar that takes an art/science approach to the study of ecoacoustics: the relationship between human beings and their environment through sound. The seminar approaches ecoacoustics through sound studies and ecological sciences. It emphasizes transdisciplinary problem-solving and developing proficiencies in critical dialogue. The course introduces ecoacoustic literacy as an exemplary art/science toolkit for understanding noise pollution and acoustic ecology extinction as emerging environmental crises, and it develops the case for preserving personal, societal and biospheric spaces. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2508 The Cinematic Essay (4 Credits)**

As an Advanced Seminar, The Cinematic Essay is a creative and critical praxis course which focuses on formal and thematic analysis of documentary films from a wide range of international directors for the purpose of developing new methods of visual written work. Directors include filmmakers like Dziga Vertov, Angélica Varada, Farrokh Farakzad, Chris Marker, Abbas Kiarostami, John Akomfrah, Ari Folman, and Chantal Akerman. Students watch films, read theory related to both cinematic technique and lyric essay, write both critical and creative short assignments, with the goal toward transferring cinematic documentary techniques and cinematic theoretical approach into creative, nonfiction essays, developed in a workshop environment. The course also promotes cultural knowledge, investigates hidden biases, and explores culture privilege. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2509 Communication and Production of Cultures (4 Credits)**

Profound changes in the last two decades on the global, national and local scales have brought about a collapse in people's traditional sources of self-definition, notably those ethnic, racial, geographic, sexual and national bases of group belonging and identity. Given such undermining of the old certainties, answers to the question "Who am I?" have become more tenuous, if not totally "up for grabs." Fragmentation of identities, ethnic conflict, social alienation and a loss of a sense of grounding are only some of the noted hallmarks of the present time. This course is designed to address the implications of this shift in signification—from identity to difference—for the dynamics of identity formation and the search for alternative bases for consensus-formation in the new millennium.

**ASEM 2510 India: Caste/race/religion (4 Credits)**

India: Caste/race/religion explores the idea that caste is the foundational structure of Indian society and that all the modern problems that plague India—casteism and untouchability, the genocidal treatment of Dalits and Muslims, the degradation of women and queer people, communalism, and the systematic disenfranchisement of a majority of Indian society, to name a few—have their foundations in caste. We will also pay special attention to how progressive movements founded on anticaste values have challenged social exclusion by drawing upon indigenous and other liberatory philosophical traditions.

**ASEM 2511 Race, Class and Gender (4 Credits)**

Issues of race, class and gender are of salient importance as the population demographics of the United States have shifted dramatically over the last decade. The experience of working and living in isolation from people different from oneself will be increasingly rare in the years ahead. In this course, using a multidisciplinary anthology of essays as the primary text, the focus is on the psychological experience of intercultural discourse that stems from the intersection of race, class and gender in the United States at the beginning of the 21st century.

**ASEM 2512 Humor Theory and Application (4 Credits)**

Students in this course study psychology of humor and practice skills in comedic performance. Students learn the psychological theories of humor and apply these theories to the work of a variety of comedians and humorists and to satires or parodies, such as mockumentaries. Additionally, students analyze humor from a cross cultural perspective and learn about humor and laughter research in experimental psychology. As the ability to understand and use humor appropriately is a key component of interpersonal and occupational success, this course additionally helps students recognize and develop their own humor styles.

**ASEM 2513 Constructing Freedom and Bondage (4 Credits)**

Historically, claims about what it means to be free – or even human – have been made through discourses about enslavement and imprisonment; some have used bondage as a trope to explore philosophical or artistic projects, while others have used it to interrogate the assumptions of various political and economic paradigms. Others, still, have used these tropes as a means of advocating for social change, notably through slavery and prison abolition movements. This course examines how writers such as Hegel, Frederick Douglass, Angela Davis, and Dylan Rodríguez define the relationship between freedom and bondage, and it examines the stakes of those definitions for an American ethos deeply invested in the concept of freedom. The course uses frameworks of critical discourse analysis to consider peer-reviewed scholarship, political speeches, reality TV, music videos, and documentary films. The course also explores conceptions of civic identity in the United States. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2516 Do the Wicked Prosper? (4 Credits)**

This course revolves around a question, which is famously quoted from the Bible, "Why do the wicked prosper?" The quotation presupposes that the wicked do prosper, but many strands of human thought challenge the supposition. This course examines the students' reactions to this question and leads them to approach the question and their reactions to it from a variety of academic perspectives.

**ASEM 2517 Prostitutes of the Pen and Novel: 18th Century Women Novelists (4 Credits)**

In *Seductive Forms* (1986), leading feminist scholar Ros Ballaster famously coined the phrase "prostitutes of the pen" to describe the common perception regarding the first English professional female authors of the late seventeenth and early eighteenth centuries. It encapsulates the cultural conditions with which women had to contend and their extremely limited options for earning a living. We will trace the social, economic, and historical issues with which English society, particularly the women of the eighteenth century, faced. The eighteenth century witnessed the rise of capitalism, trade, the merchant class, and with these various developments also saw "the separation of spheres"—the domestic from the public. This separation of the domestic from the public constructed a division between men and women, whereby men ruled the public world: economy, politics, and education, and women were relegated to the home and excluded from the public sphere. One of the major effects of this division was the lack of professional opportunities for women. Other than acting as domestic servants, there was little chance for financial independence. Therefore, these "prostitutes of the pen" were true pioneers, women who created a profession for themselves and a way to survive. Beginning with these early British novelists, this course intends to investigate the history and work of English women writers in the eighteenth century, extending to the end of the century. Additionally, this course seeks to explore women's history in the eighteenth century—their educational and professional opportunities and the ways in which patriarchy, property, and English law affected women and informed their fictional works. Moreover, this course will assess how novels afforded these women authors a voice of protest as well as at times becoming a voice of consent within popular culture.

**ASEM 2518 Exploring Italy (4 Credits)**

This class combines a seminar meeting throughout fall quarter with two weeks travel to Italy following exams. Students focus on the art and literature of Rome, Florence and Venice in preparation for their travels. Students concurrently enroll in Excavating Italy (ARTH 2613 or ENGL 2613) as a co-requisite.

**ASEM 2519 Music of Southeast Asia (4 Credits)**

This course examines traditional, popular, and diasporic musical genres in Southeast Asia, using that lens to explore more broadly how music and culture interact on a critical global scale, drawing on histories of colonialism and power. From Javanese court gamelan, to Thai Luk Thung, and from karaoke among immigrant Vietnamese communities in the United States, to Malaysian shadow puppet theater, the course explores the varied and diverse region that is Southeast Asia. It examines both classical and popular musical traditions, approaching music not from a music theory perspective, but rather from an ethnomusicological standpoint – drawing on cultural studies, history, sound studies, critical theory, anthropology, sociology, and religious studies. Content includes music and performances, academic articles, first-hand accounts, and documentary films, focused on topics in music, dance, genocide, and social and political movements. Students will develop writing, listening, thinking, and oral skills. No formal music training or previous musical experience is required for this course. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2520 Contemporary Theory and Art (4 Credits)**

This course examines continually changing theoretical perspectives that have influenced culture, using artworks and artists to understanding those theories and their influences on creation and interpretation. A larger concern is how these perspectives affect contemporary world views and how we have arrived in the current cultural climate; to those ends, the course offers a broad overview from Enlightenment thought through Postmodernism. While these theories circulate among various discourses in philosophy, physics, sociology, psychology and politics, the main focus and example is how art and culture have moved through this epoch. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2521 Representations of Youth: The Case of Italian Fiction (4 Credits)**

This class explores broad questions about the representation of youth and adolescence, using the lens of fictional representations of youth in Italian literature and cinema of the 20th and 21st century, especially contemporary Italy. In addition to studying novels and films, the course will feature historical and sociological sources (including from youth studies), and will provide tools for a methodological approach to storytelling. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2522 Social Change and Interview-Based Theatre (4 Credits)**

This course is an exploration of the theory, techniques and processes used to create interview-based theatre. This course will explore both the theoretical and practical side of this specific theatre form. Students will read, analyze and reflect on past examples of interview-based theatre in order to gain a stronger sense of the ethics, limitations, possibilities and aesthetics that impact this particular theatre practice. In addition to the theoretical, students will have the opportunity to craft an interview-based play as groups in class, based on an exploration of the theme of their choosing. In a small group, students will craft interview questions, facilitate interviews, transcribe interviews, craft a script and have a staged reading of the final text. Additionally, students will write short reflections and a final paper. The objective of this course is to provide students, regardless of previous experience, with a deeper understanding of how to tell stories using interview as data - through a practical and analytical lens. This course will give students a general and specific understanding of the creative process used to produce an interview-based play as well as give them an opportunity to critique and analyze the form.

**ASEM 2524 Paranormal Phenomena (4 Credits)**

Whether paranormal phenomena exist is an open and controversial question. "Believers" are convinced the evidence in support of paranormal phenomena is compelling, if not indisputable. "Skeptics" believe that extraordinary claims demand extraordinary evidence, and that the evidence for paranormal phenomena is nowhere near extraordinary, if it exists at all. This course examines the evidence for and against the reality of paranormal phenomena.

**ASEM 2525 Expressive Culture in Everyday Life (4 Credits)**

This class examines expressive culture as a site for analyzing the role of concepts like aesthetics, creativity and style in our daily lives. The seminar will explore the importance and meanings of expressive cultural forms, such as music, dance, theater, festival, narrative, in a variety of cultural contexts and which contribute to group solidarity and cohesion.

**ASEM 2526 Communication in Close Relationships (4 Credits)**

Communication in Close Relationships emphasizes the relationship between the self and others at a personal level. We examine research from a variety of disciplines, including communication, psychology, sociology, family studies and history, to increase our understanding of relationships from diverse perspectives. The three main perspectives we investigate show how relationships affect and are affected by their context, the individuals involved and the relational system. The goals of this course are for students to increase their understanding of relationships from diverse perspectives; evaluate critically the information about relationships that we encounter in our everyday lives; ask and investigate questions about real-life relationships; and communicate insights into communication and relationships in a variety of formats.

**ASEM 2527 Life's Aim (4 Credits)**

How do our everyday activities and our short-term goals, like graduating from college and finding a job, fit together with some of our less concrete and more long-term concerns like finding happiness and meaning in our lives? Is there some way to understand our daily activities as coherent with and supportive of these overarching goals? Using philosophical, literary, psychological and economic texts, this course consists of an examination of the conceptual dichotomy of means vs. ends and the role that it plays in our analysis of human activity.

**ASEM 2529 Analyzing the American Dream - Expressionist Film in 1950's Hollywood (4 Credits)**

This course focuses on the output of a few Hollywood directors (primarily Ida Lupino, Nicholas Ray and Douglas Sirk) who seem to reflect the dominant ideologies of post-war Hollywood. On the surface, their films celebrate middle-class success, a simple American can-do attitude and, most important for this class, characters who seem to reestablish pre-war expectations of femininity and masculinity. Rules of femininity, masculinity and sexuality are a constant focus for these directors, and each has his or her own approach to exploring the repercussions of strict gender assignment.

**ASEM 2530 Deportation Nation (4 Credits)**

The U.S. is engaged in the greatest mass deportation in its history. This course examines the evolution of deportation laws, their functions, and their effects. Controversies related to undocumented migration will be explored from multiple perspectives and through experiential learning activities. Students will develop evidence-based ideas for effective and humane reform.

**ASEM 2531 Culture of Desire (4 Credits)**

Sex—we talk about it all the time. Talk shows, online, in magazines, in plays and music, sex shows up everywhere. Why do we expend so much energy on something that, in most cultures, isn't really discussed much in public? And what is sex, exactly? How do we define it? How do we legitimize sex, and why have we decided to categorize people as heterosexual, homosexual, bisexual..? What structures have we developed to make us conform to those categories, and what discrepancies have we chosen to ignore? Why is it problematic to base arguments about relationships on historical evidence? In this course, students find out answers to these questions, answers that will lead to even more questions and problems.

**ASEM 2532 Death & Dying in Hindu Traditions (4 Credits)**

This course explores the meanings of death and dying in Hindu perspectives. The inevitability of death has led cultures throughout the world to speculate on what happens to the individual during, at the moment of, and after death. Until the modern period, religions have typically been the first or only place where people turned for answers to basic questions of existence: What happens at death? Will I and the people I love disappear forever? Or will we continue on after death in some way? Is this the only life we have? What is the relationship between the life we lead now and what happens at and after death? These kinds of universal questions have led to culturally specific and conditioned answers and speculations, some of which we will examine in this course.

**ASEM 2534 Trade Wars and Agreements (4 Credits)**

Trade between nations and its governance are as old as the history of interaction among human beings. But they have gone through major changes throughout the history since changing economic and geopolitical conditions have long challenged the international system of trade governance. This course investigates the evolution of international trade agreements as well as wars. It is about an inquiry of trade wars and agreements in the context of case studies (such as the 2018 US-China trade war) from a political economy perspective. Have the parties involved in trade been (un)fair to each other (e.g., China vs. the U.S.)? Are they (e.g., the U.S. and China) so interdependent that they must resolve trade conflicts? These questions remain valid even when countries reach a trade agreement. The course addresses those questions from the perspectives of various fields such as economics, political science, history, and cultural studies, and it illustrates the effects of trade wars on ordinary citizens. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2535 The Multiracial Individual (4 Credits)**

This course explores the historical racial tensions in the U.S. that have made it difficult to acknowledge the reality of multi-racial peoples in its midst, and traces the trends in culture and national consciousness that made it possible for a change to occur in the 2000 census. We survey the varying ways in which multiracial people have been regarded by the larger society in different social contexts, as well as the ways in which the sociological, psychological and political dynamics of multiracial identity have changed over time and have impacted the experience of multiracial people themselves.

**ASEM 2537 Politics and Art (4 Credits)**

From the political monuments of the Roman Empire to the installation of Kehinde Wiley's Rumor of War in Richmond, Virginia, near several confederate statues, art and artists have shaped the way many interpret and react to important historical and current events. This course evaluates a broad range of imagery, focusing on the artists' choices for representation, the cultural climate of the time period in which the art was created, and the political influence of the resulting imagery. The course, drawing on art history/theory, political science, cinema studies, history, and other fields, explores issues of repatriation of artworks, political bans of imagery, photographic manipulation, and political portraiture. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2538 Critical Animal Studies (4 Credits)**

Critical Animal Studies will analyze a range of approaches to human and nonhuman animal relationships from the disciplines of philosophy, zoology, literature, art history, and media studies. Students will critically analyze a variety of disciplinary approaches to animal subjects, and reflect on their personal values, lifestyles, and identities as human animals.

**ASEM 2539 Health, Media and the Self (4 Credits)**

What are cultural beliefs about health, about prevention and about risk? We focus on how culture, media, peers, medical professionals and family influence how we construct and define health and the many key concepts scholars have linked to the notion of being healthy, preventing ill health and pursuing good health. We also examine the impact and function of these definitions on our everyday lives by exploring what health perceptions have to do with one's self concept, identity, self esteem, relationships, expectations, attitudes, beliefs and behaviors.

**ASEM 2540 Culture, Media and Power (4 Credits)**

Often, films, television programs (both entertainment and journalistic), print journalism and advertising are viewed as having the inherent power to shape the individual's values and beliefs about the identity of one's self as well as that of others. The cultural studies' perspective of this course takes the position that the power to shape values about identity is not solely the providence of cultural texts, but stems from the complex intersection of media institutions, various social groups and the interpretive process. This class explores how various forms of textual, interpretive, social and economic power come to bear on the production of different kinds of cultural media texts and the range of possible meanings about identity available within them. By the end of the course, students should be able to critically analyze the links between various media texts and messages and the definition of their self-identity.

**ASEM 2541 Engaged Learning Portfolios: A Pilot Course in Synthesizing Curricular and Co-Curricular Learning (4 Credits)**

In this pilot offering of ASEM, students investigate their curricular and co-curricular experiences at DU through the lenses of engaged pedagogy, community engagement, and the public good. They consider the purposes and implications of a liberal arts education in relation to these complex and diverse experiences. Students discover and articulate connections between their various Common Curriculum courses and their experiences beyond the classroom, including study abroad and internships. The main course project requires students to analyze and synthesize artifacts of their learning to create a digital portfolio. This course is conducted primarily in a workshop format.

**ASEM 2542 Knowledge and Ignorance in Contemporary Scientific Practice (4 Credits)**

Over the last few decades, an increasing number of scientists, philosophers, historians, and sociologists have emphasized that the traditional depiction of science as a progressive accumulation of true - or approximately true - descriptions is an oversimplification. We have come to realize that the right kind of ignorance and failure can truly be a gateway to success, to deeper understanding. But how is this possible? What kind of failure can be turned into knowledge? How does science deal with ignorance? How does one use ignorance to its advantage? This course provides a long answer to these questions. Specifically, it recasts some classic philosophical issues by bringing attention to a widespread scientific practice that can be aptly called "black-boxing." The course examines and illustrates these issues with some prominent episodes in the history of science, from fields ranging from biology and psychology to economics. Beyond completing the Common Curriculum, there are no prerequisites for this course, which is introductory in character, presupposes no previous acquaintance with philosophy, the natural sciences, or the social sciences, and is entirely self-contained.

**ASEM 2543 Sound and Music in Early Modern England (4 Credits)**

Imagine waking to the sound of bells, getting the latest news and gossip via song, singing bawdy rounds at the tavern, or gathering in a secret location to hear forbidden music. This course examines the profound cultural changes taking place in seventeenth-century England and the English empire and how music reflected and helped create these transformations. It considers religious extremism, colonialism, political and scientific revolutions, and their connection to our own political and cultural conflicts. No prior music experience required.

**ASEM 2545 Medievalism in Music and Popular Culture (4 Credits)**

This course explores the phenomenon of medievalism—that is, the perception and representation of medieval culture in post-medieval eras—and examines its impact on Western (that is, primarily European-derived and influenced) popular cultures, especially in music. The course examines ways that artists past and present have used images of the medieval past to connote authenticity, spirituality, liberty, virtue, class, gender, race, rebellion, democracy, alienation, horror, romanticism, and magic. Sites of medievalism discussed in the course include novels, films, operas and musical theatre, folk songs, visual art and architecture, politics (including disturbing elements such as fascist and white supremacist movements), hip-hop, new media, and digital cultures that draw on medievalism. As are all ASEM courses, this one is writing-intensive. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2546 Gender and Power in Africa (4 Credits)**

This course explores how gender relations are enacted in Africa, including how those relations were (and are) impacted by colonial and post-colonial influences of western powers. The course examines multiple beliefs, attitudes, symbols, behavior and actions that define women and men in various African societies, in ways that are not binary or polar, but rather situational and dynamic. Illustrations of these issues are drawn from ethnographies, movies, novels and so on. The course employs mainly anthropological perspectives and research, but it also includes historical and literary materials. Completion of all other Common Curriculum is required before students can register for this course.

**ASEM 2547 Writing About Music in the 21st Century (4 Credits)**

Students analyze music from a variety of disciplinary perspectives, including historical, political, and sociological approaches, and then learn to write about music in genres ranging from album reviews, musician and/or scene profiles, cultural criticism, liner notes, music blogs, performance reviews, and personal essays. Students read nonfiction about music, attend concerts, and research musicians, their music, and musical communities. With an eye toward broader publication, students craft and share their findings with public audiences. Course texts such as *How to Write About Music* will be supplemented by historical and theoretical readings and by works from music writers like Lester Bangs, Amiri Baraka, Jeff Chang, Gerald Early, bell hooks, Amanda Petrusich, Ellen Willis, and so on.

**ASEM 2548 Critical Consumer Culture (4 Credits)**

Students will engage in critical analysis of consumer culture, with a focus on how media, social media, advertising, spectacles/mega-events, and consumption spaces are a part of meaning-making in everyday life. In addition to reading historical and contemporary research articles about many facets of advertising and consumption, students will conduct their own analysis and write about various practices that make up this culture. To the extent possible, students will approach the study of consumer culture in the United States as if they were anthropologist or ethnographers, attempting to 'make strange' a set of familiar spaces and practices around consumption.

**ASEM 2550 Music, Gender, and Sexuality (4 Credits)**

Can music express gender and sexual identities? When a small group of scholars tenaciously raised this question in the 1990s, it created a contentious moment in the study of music history. Students will trace this lively debate through seminal interpretations of classical and popular music while honing listening and interpretive skills. Prior study of music is not required.

**ASEM 2555 India and Historical Film (4 Credits)**

This is a course that utilizes films, fiction and writings of professional historians to explore themes in Indian society and culture such as the colonizer 'self' and the colonized 'other', the mechanisms of difference whether based on race, gender or religion, the processes of identity formation through national movements or community ties, real or imagined, and the quest for modernity through economic development and societal reform.

**ASEM 2556 Social Media (4 Credits)**

Social media enable individuals to create, collaborate, and share messages with networks of all sizes. They are also tools for surveillance that are radically changing how governments and corporations engage with publics, challenging long established notions of privacy, freedom, and civil liberties. This course introduces students to the historical, economic, legal, and cultural context of social media and explores the ways we shape and are shaped by these emergent and ever-changing tools.

**ASEM 2557 Body & Sexuality in Religion (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modification? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective.

**ASEM 2558 Digital Gods: Media and Religion in the 21st Century (4 Credits)**

This course explores the intersections between media, religion and culture in the United States. Religion continues to hold sway in the 21st Century as a social, cultural, and political force. Religion, broadly defined, remains active in the media age and is increasingly mediated through television, film, politics, and consumer culture. This course examines TV, film, sports, social media, and more to explore digital gods of the 21st century and how they influence and inform US culture.

**ASEM 2559 Globalization and Film (4 Credits)**

This course explores the varying ways that globalization impacts cinema on a national and transnational level. Designed as a seminar, this course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what "globalization" means and how it influences films, both behind-the-scenes and onscreen. To reify your understanding of globalization, you will research and write original scholarship on globalization and a select film to contribute to the academic community.

**ASEM 2560 America Through Foreign Eyes (4 Credits)**

The United States, and Americans, occupy a unique, privileged and powerful position in the contemporary world order. Indeed, according to many scholarly and public accounts, the U.S. has achieved unprecedented status as the preeminent world power. Yet, despite or, paradoxically, perhaps because of its status as what some have called a world "hyperpower," large numbers of Americans are mostly, if not totally unaware of what U.S. global preeminence means to them and to other people around the world. This course aims to inspire critical reflection on the student's part about the role of the United States - its political and economic systems and practices, its culture, and most fundamentally its social actors, meaning its people(s), in a globalizing world.

**ASEM 2562 Modern and Postmodern Music (4 Credits)**

Students explore multiple musical styles and genres, primarily from the 20th century to the present, as they develop new cognitive pathways for experiencing all music. The course devotes substantial time to developing a vocabulary of descriptive terms that apply universally to music even outside the modern and postmodern subject matter.

**ASEM 2565 The Power of Place-Making (4 Credits)**

Places are imbued with meaning, functioning as intersections of identity, memory, and power. Through an interdisciplinary critical perspective, students will explore place-making: how various forms of textual, interpretive, social, and economic power affect the production and experience of places, and the range of possibilities for social justice available through them.

**ASEM 2566 Society Through Literature and Cinema (4 Credits)**

This course will study the interconnection of human societies (or nation states) as evident in different kinds of narratives. Discussing literary and film narratives in particular, we will examine the beliefs and influences that shape relationships within the same society as well as the beliefs and influences that shape relationships between different peoples and societies. Our examination will include an exploration of how these beliefs and influences are generated and modified. Our study will be aided by the interpretive insights of artists and visionaries. Our examples will be taken from different regions of the world.

**ASEM 2567 Violence, Law, & the State (4 Credits)**

This class is built on interrogating arguably the fundamental issue facing every state: how to deal with violence. Through a mix of academic readings, films, documentaries, and reputable media, we will consider a range of issues regarding violence and the state in the modern world. The three organizing themes for the class are understanding the lived problems of violence, the nature and value of freedom in relation to violence and the state, and the question of how law relates to violence and the state.

**ASEM 2568 Outsiders in Italian Fiction (4 Credits)**

This class addresses the recurring representation of the character as an outsider in the Italian literary and cinematic tradition of the 20th and 21st centuries. Novels, theatrical plays, and films will be supplemented by a collection of secondary sources on psychology and sociology, providing the tools for a correct thematic and methodological approach to storytelling.

**ASEM 2572 Philosophy, Psychology, Neuroscience, and Free Will (4 Credits)**

This seminar introduces students to the topic of human freedom from the perspective of philosophy, neuroscience, and psychology. If everything that you do and have ever done is the inevitable byproduct of the political, social, economic, cultural, familial, psychological, and neurological forces at work within and around you, in what sense could you be free and morally accountable for your actions? In what sense could you be worthy of praise for your accomplishments and blame for your failures? The course will address the topic of free will using contemporary scholarship in philosophy, neuroscience, and developmental and social psychology, and we will ask questions such as: What, exactly, is free will? What can our understanding of causation tell us about free will? What is moral responsibility, and how is it related to free will? What brain processes underlie our decisions? Prerequisite: Completion of all other Common Curriculum requirements.

**ASEM 2573 Violence, Law and the State (4 Credits)**

This class will interrogate what is arguably the most fundamental issue facing every government: how to deal with violence. Through a mixture of academic readings, films, documentaries, and reputable media, the course will consider a range of issues regarding violence and the state in the modern world. Prerequisite: completion of all other Common Curriculum requirements.

**ASEM 2576 Art, Thought, Spirituality (4 Credits)**

This course examines the close and complex relationship between esthetic expression and private religiosity, or "spirituality." The course will examine how theories as well as personal accounts of artistic creativity, experience and appreciation can both broaden and deepen our understanding of the inner life that is otherwise communicated in religious terms and how artistic expression can also have a quasi-religious or "spiritual" character. The central objective will be to illumine the way in which the construction of the individual self and the formation of the personal identity are intimately tied to different quests that are artistic and spiritual at once.

**ASEM 2577 Cultural Intersections (4 Credits)**

In this course, we explore the dynamics of cultural reception or the translational dimension of modern culture, particularly the reception of narratives within particular cultures and beyond. Our main focus is the principles that integrate and divide people along the lines of race, class, ethnicity and culture. Our journey involves studies of cultural contacts, contexts and narratives from Africa and the Caribbean, Asia and the Middle East, Europe and the Americas.

**ASEM 2578 Travel Writing Through the Ages: Exploring Italy and the Self (4 Credits)**

A panorama of the evolution of the Travel Writing genre shows how different travelers have interacted with foreign environments for centuries and provides students the model to create their own travel journal. The course focuses on travel narratives to, from, and within Italy. The reading list includes Italian and American writers such as Christopher Columbus, Margaret Fuller, Mark Twain, Carlo Levi, Italo Calvino and Umberto Eco. Excursions to different parts of Italy, visits to historical sites and museums and screenings of relevant Italian films complement the class.

**ASEM 2579 From Literature to Film (4 Credits)**

In this course, we examine the adaptation of literary works into films. We closely study selected modern literary works and the film interpretations of each work. Focusing on the transition from one narrative form to another, the course enhances the critical skill of students as well as their creative ability with respect to cinematic translations. We, therefore, also have mini scriptwriting workshops as a way of imaginatively highlighting the sort of considerations that go into the making of the film script.

**ASEM 2580 Celtic Identities and Nationalisms (4 Credits)**

Every March 17th, millions of people around the world engage in invented rituals of drinking, parades, & music in celebration of St. Patrick's Day. Summer finds Scottish Highland Games enacted by kilt-wearing, bagpipe-playing, Celtic-culture aficionados across the English-speaking world. The European Union has funded Celtic-History Trails & sites across Western Europe to link itself to an earlier period of 'unification.' Millions of people claim Celtic heritage and ancestry in the U.S.A. and across the globe. But what does that really mean? Who is entitled to claim such identities? Who is not? How do people reconcile 'Celticness' with other elements of individual, national, and group identities across the globe? This course uses Celtic identity as a means of engaging students in a critical examination of the meaning and process of identity formation. Students identify, compare, and evaluate the methods used to define and claim legitimate and illegitimate definitions of "Celtic" identity espoused by past and current nationalists, musicians, archaeologists, political scientists, historians, governments, film-makers, shopkeepers in Wales, Scotland, Ireland, Brittany, Europe.

**ASEM 2581 Forgiveness, Politics and Film (4 Credits)**

This course covers a number of reconciliation frameworks that have been employed as transformative and peacemaking strategies in various interpersonal, social and political contexts. We discuss the value (and limitations) of core reconciliation concepts, see how they have been used productively, and consider their possible application to ongoing problems in the world today.

**ASEM 2582 Latina/o Identity & Community (4 Credits)**

This course analyzes the complexity of Latinos' unique social position, using an interdisciplinary approach to understand the construction, maintenance, and change of Latino identity and community formation over time in the United States. As students will learn, Latino identity in the U.S. has experienced a continual process of negotiation between dominant discourses--regarding gender, race, politics, economics and culture--and the socio-political and cultural histories of their own communities. Accordingly, we explore the variety of ways in which identity and culture are socially constructed and actively contested, with particular regard to the diversity among and within Latino groups.

**ASEM 2583 Individuals, Individuality, and Society (4 Credits)**

Individual" is a key term in discussions of human life and human interaction, but it tends to be inadequately defined. We often assume that we already all understand what an individual is. In social science, especially, "individual" is typically assumed to correspond to individualism, and, particularly, to methodological individualism, the view that the individual parts making up a whole entirely and exhaustively define and determine that whole; from which it follows that each individual is to be understood as what it is in isolation, unrelated to any other individual. This course, by contrast, starts from the claim that the question "what is an individual?" is genuinely difficult, and that much too little attention has been given to it.

**ASEM 2586 Memoirs of Madness (4 Credits)**

We examine mental illness from a literature perspective—through analysis of memoirs, and in concert with a scientific perspective—through psychological-based texts and lectures. This unique approach to study mental illness should be inherently interesting for students because of the subject matter and the chance to engage the material through personal narratives. The use of memoirs allows for a rich understanding of a variety of impairments with the added benefit of the firm anchor of clinical science.

**ASEM 2589 Thinking (4 Credits)**

This course helps students both learn how to think well and to understand why they often don't think well. The course addresses a wide range of topics in which thinking is relevant including creativity, science, argumentation, rhetoric and intelligence. Students come to understand their personal strengths and weaknesses in thinking and students spend a substantial amount of time improving their areas of both strength and weakness.

**ASEM 2590 Interpreting the Holocaust Through Film (4 Credits)**

This course takes students on a journey from Nazi Germany to the present day through the lens of the camera. We examine how the Nazis used film to convey their messages, explore the varied experiences of those who lived during the time of the Holocaust as depicted in films, view movies that address various ethical dilemmas presented to Jews and Gentiles as a result of these trying times, and discuss the ways that the Holocaust has been represented and memorialized through films in more contemporary times.

**ASEM 2591 Latina/os in Popular Culture (4 Credits)**

This course examines trajectories of representations of Latina/o identities in popular culture (i.e. film, music, television), both produced by the dominant culture, as well as self-produced. Students first work to understand the complexity that comprises Latina/o communities by reading some foundational works on Latina/o identities (i.e. Gloria Anzaldúa's *Borderlands/La Frontera: The New Mestiza*). Following this, through a historical perspective we trace the emergence of Latina/o images in popular culture and how those images are tied to contemporary events of the time.

**ASEM 2594 Memory and Memorialization (4 Credits)**

This course focuses on how social groups represent, experience and commemorate the remembered past. We explore issues of construction of memory, particularly addressing issues of how the representations of the past—and its materialization through monuments, ruins and landscapes—are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Memory and its material representation are addressed through interdisciplinary readings and case studies from different geographical areas, and as much as possible, we use the city of Denver and Colorado as our study site to apply our observations and readings.

**ASEM 2596 Politics of Reconciliation (4 Credits)**

This class addresses the national and international efforts to seek justice and achieve reconciliation. It examines how state and non-state actors reflect on an unfortunate or hostile past with a designated "other": how did their relations and interactions with this targeted "other" go wrong? What were the material, philosophical and emotional grounds to breed such hostilities? What were the consequences? Has the memory of the "past self" and "past others" shaped the way the two groups interact today? Why do some actors refuse to say "sorry," and why do some victims refuse to forgive? What are the similarities and differences among various reconciliation projects? In this class, we lead students to explore these challenging yet exciting questions.

**ASEM 2597 Unwrapping the Rhetoric of Consumption (4 Credits)**

Unwrapping the Rhetoric of Consumption: A Critical Investigation of the Relationship between Communication, Consumption, Shopping, and Identity is a writing intensive course that offers an introduction to the study of consumption as a communicative phenomenon. People often use consumption to demonstrate who they are, their worth/importance, their relational ties, their gender, etc. The course will examine the socially positive and negative implications of these practices of consumption. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2599 Sport, Deviance, Social Control (4 Credits)**

This course explores four broad themes: sociological theories of sport, sport identities, sport deviance and the confluence of sport, media and social control. It examines timely real-world examples and draws on a range of disciplines that have investigated sport in society, including cultural studies, sociology, psychology, anthropology, criminology and kinesiology. Completion of all other Common Curriculum is required before students can register for this course.

**ASEM 2602 The Black Spiritual (4 Credits)**

This course examines the role of traditional black, or "Negro," spirituals (the songs created and first sung by African Americans in slavery) in the evolution of American ideals of freedom, justice and grounded spirituality. A history of the spiritual as folk and concert music is paralleled by an examination of the very concept of "American" that evolved, both from the perspective of those excluded and those included in that concept.

**ASEM 2603 Indigenous Approaches to Gender and Sexuality (4 Credits)**

This course introduces various ways that indigenous communities in the U.S. and Canada have understood and attempted to navigate issues gender and sexuality in a religious context. It introduces foundational understandings of gender and sexuality that inform both Western and Indigenous cultures, and it explores the fundamental differences between those understandings. The course also presents emergent theories that challenge assumptions common within the Euro-American tradition. Through research and writing, students add to the contextual breadth of the class.

**ASEM 2604 Russia: Revolutions & Utopias (4 Credits)**

This course examines Russian culture and society from the late 1800s to the 1930s, when Moscow and Saint Petersburg/Petrograd were synonymous with cutting-edge and avant-garde, staging revolutions—and dreaming of utopias—in politics, art, sex and science, to name but a few areas. The course compares the ideals of those times with Russia today as well as with developments in Western Europe and North America.

**ASEM 2605 Society, Nature and Animals (4 Credits)**

Society, Nature and Animals examines the enormously engaging and complex relationships between human communities/societies, on the one hand, and the natural world and nonhuman animals on the other. The course focuses principally, though not exclusively, on the United States, where these relationships have been imbued with special significance, and prominent political and intellectual figures have cast the country as "nature's nation." The course also considers how different social groups, particularly those structured around gender, race/ethnicity, cultural/national identity and social class, are connected to the natural world and nonhuman animals.

**ASEM 2606 Japanese Film (4 Credits)**

This course examines some of the most iconic films in the Japanese cinematic tradition in order to identify and critically engage in narratives of Japanese aesthetics and cultural identity, especially ones that take culture as the site for locating tradition and/or modernity. No previous knowledge of Japanese or film required.

**ASEM 2609 Literature of Nature and Apocalypse (4 Credits)**

Concern about the declining state of the environment has been a topic of longstanding interest, from Henry David Thoreau to John Muir, and writers like Edward Abbey, Ernest Callenbach, Louise Erdrich, T.C. Boyle, Octavia Butler, Cormac McCarthy and others. This writing intensive course examines questions relating to environmental activism and social structures predicated upon technological and materialist culture. It considers how American writers have reassessed the relation between religious beliefs and notions of utopia and apocalypse. It examines and analyzes timely and relevant historical, literary, and philosophical issues relating to the current state of the environment.

**ASEM 2610 The Politics of Bilingualism (4 Credits)**

While more and more college students are required to take a "foreign" language and bilingual programs grow in popularity in the K-12 systems, formal education in languages other than English in the US has often been at the heart of fierce debates claiming it is impractical, irrelevant and even "un-American". This course addresses a variety of concerns around the perception and manifestations of bi- and multilingual policies in the US. We examine how the perception of English as a "national language" and a "language of opportunity", contrasted with other languages (and the people who speak them) as a "distraction" or "threat" contribute to personal and public policies surrounding language use in the US.

**ASEM 2611 Being Human: Sex and Sexuality (4 Credits)**

Relationships are the greatest thing in the world—until they end. Many people have experienced both the exhilaration and the misery of a romantic relationship. The same can be true for other types of social relationships. How do you make sense of the relationships around you? To navigate better our complex human landscape, understanding the basis of human sexuality and sexual expression is important. This course examines behavior and emotion by introducing the results of high-quality scientific studies of sexual behavior and its evolution and expression. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2615 Disease in World History (4 Credits)**

This course examines the social and political impact of disease in global history, and also considers how understandings of disease have changed over time. We will focus on the modern period (roughly the past two hundred years) and examine demographically significant diseases such as tuberculosis, malaria, and smallpox. Themes that we'll explore together include how the distribution of power and wealth in the 19th-20th centuries helped determine global distribution of diseases today; how our ideas about a disease influence how willing and able we are to deal with it effectively; and the notion that disease is as much as socioeconomic problem as a biotechnical one.

**ASEM 2616 Globalization and its Discontents (4 Credits)**

This course examines the expansion of the world economy in a comparative historical perspective and draws on the disciplines of economics, history and political science. The course begins by introducing the current popular/journalistic debates using social science and historical arguments and evidence. The purpose is to provide the students with tools for critical analysis and a conceptual map to understanding the debate.

**ASEM 2620 Inventing America (4 Credits)**

This class introduces students to exemplary public documents, primarily in the form of speeches, which address the promises set out in the preamble of the U.S. Declaration of Independence: the rights to life, liberty and the pursuit of happiness. The course traces how these promises have been articulated by a succession of public actors ranging from U.S. Presidents to members of radical political factions. The course always addresses three major political movements: (1) the movement for political inclusion of Blacks, beginning with early abolitionists and extending to the struggle for civil rights, including the black power movement; (2) the movement for the political inclusion of women, beginning with the suffragists and extending to include feminism, including the fights over sexual freedom; and (3) the struggle over economic rights, beginning with early U.S. socialist and anarchist movements and extending into the contest over the creation and pruning of the U.S. welfare system.

**ASEM 2625 Rough Draft History: Film and Video Documentary (4 Credits)**

This course presents a historical study of documentary film and video, from the films of the Lumière brothers in the 1890s to several contemporary examples. We will explore such issues as the nature of documentary and what distinguishes it from fiction, the development of various documentary modes or styles, propaganda and ideology in documentary film, documentary ethics, borderline forms that combine documentary and fiction, and documentary's role in supporting established institutions and regimes and/or promoting social change.

**ASEM 2626 Politics, Policy and Economics of Healthcare (4 Credits)**

This course takes an intensive look at American history from 1945 to 1955 in order to investigate the relationship among international relations, domestic politics and American culture. While anticommunism was perhaps the preeminent influence over American politics and culture, this course also investigates other related cultural developments, such as the moral and cultural anxiety resulting from the revelations of the Holocaust and Stalinism, the anguish represented by the height of existentialism in American thought, the exploding popularity of abstract expressionism, the gradual growth of consumerism, and the effects of the baby boom.

**ASEM 2629 Truth and Treason in the Cold War (4 Credits)**

This course takes an intensive look at American history from 1945 to 1955 in order to investigate the relationship among international relations, domestic politics, and American culture. While anticommunism was perhaps the preeminent influence over American politics and culture, this course also investigates other related cultural developments, such as the moral and cultural anxiety resulting from the revelations of the Holocaust and Stalinism, the anguish represented by the height of existentialism in American thought, the exploding popularity of abstract expressionism, the gradual growth of consumerism, and the effects of the baby boom.

**ASEM 2633 Literature of Trauma (4 Credits)**

This course examines the relation between memory, trauma and history in postwar American literature and culture, as those have become major themes in novels and films. The works examined in this course provide us a window into experiences of victims of trauma, while extending the possibility of forming a more sensitive and inclusive conception of American history and culture. Readings include literary works and a selection of secondary critical and historical texts. Completion of all other Common Curriculum requirements is required prior to registering for this course.

**ASEM 2637 James Joyce's Ulysses (4 Credits)**

This Advanced Seminar will focus on James Joyce's famously difficult—but in many ways not all that difficult—modernist masterpiece *Ulysses*, which will in turn be the subject of three writing assignments that will allow you to explore the roles and responsibilities of the reader, the writer, and the critic. There are many reasons to devote an entire quarter to James Joyce's *Ulysses*, which turned 100 years old on 2/2/2022, but here are two: 1) its reputation as a "difficult" book often overshadows the fact that it's beautiful, funny, and in many ways quite accessible, and 2) it's a useful book for thinking about being with (and without) other people. In this course, we will try to find out both what this book can teach us and what we can teach one another about it.

**ASEM 2640 New England: Myth and Memory (4 Credits)**

The subject of this course is historical memory or, to put it simply, the relationship of the present to the past. Historians take for granted what has been called "the invention of tradition," but most people do not appreciate the constructed nature of the past and do not recognize the possibility that there have been (and continue to be) contests over which version of key historical events or movements is to be disseminated to the public. This course focuses on region—New England—and its racial history as a case study of the process of fabricating historical memory. New England's history is particularly useful for this purpose because the region has had an inordinate impact on our national history.

**ASEM 2641 Globalization from Above and Below (4 Credits)**

This course provides a unique and challenging opportunity for students to clarify the concept of globalization by exploring parallel and interesting forces "from above and below." This course draws widely from international studies, economics, political science, sociology, environmental studies, and feminist theory to examine processes of global social change and conflict. Through academic theorizing and activist writings, the course familiarizes students with some of the landmark debates on globalization. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2642 Between Persecution and Revolution (4 Credits)**

This course will investigate how women in America, France and Iran have written their way into and beyond male power structures. Ranging from the 17th to the 21st centuries, we will study literary, religious, political, psychological, and biological writings that probe the vexed power of female voices in the public sphere. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2643 Comparative Democratization: East and West (4 Credits)**

The purpose of this course is to examine the contested meanings of revolution and to clarify its paths and goals. To advance these purposes, this course highlights the experiences of a variety of revolutionary projects in different regions, eras and cultures. It also explores the weights that different actors (state, society, global orders, charismatic leaders, etc.) hold in shaping the processes of radical political changes. The course will conclude by exploring new thinking on the politics of revolution for the twenty-first century. We will ask how issues of ecology, gender, changing values, indigenous movements (to name just a few) can liberate our imagination about revolution in specific and political change in general in a post-modern world.

**ASEM 2646 Dance in India (4 Credits)**

As a discipline in which the body is trained to become "naturalized" in very specific ways, dance tells us much about the culture in which it is a part. Dance movements and meanings also become sites of conflict during periods of cultural transition, and yet because of dance's ephemeral nature, its relative adherence to tradition, or lack thereof, is difficult to ascertain, and thus often hotly contested. This course explores the tension between change (innovation) and continuity (tradition) in four different forms of dance from the Indian subcontinent: Bharata Natyam, a classical dance form from South India; Kathak, a classical dance form from North India; Bhangra, a folk dance form from Northwestern India; and the mass-mediated, syncretic form of dance predominant in the Bollywood film industry.

**ASEM 2648 Good Vibrations - Electronic Music: Technology and Culture (4 Credits)**

This course hopes to supply the answer to the question, "How did we get here?" To answer that question, we need to look at the phenomenon from many different perspectives. History frames the topics of the course. In order to understand characteristics of electronic instruments, we start with traditional mechanical-acoustic instruments. Their characteristics are the model for many modern electronic instruments. Although in the experimental years early in the 20th century, all traditional models of music were questioned; those included musical notation which has been in place since Charlemagne's rule in A.D. 800, the number of notes within an octave, the number of notes within a span of time, and dynamic range (loudness and softness). We look at the anatomy, physiology and perception (psychoacoustics) of human auditory response in order to frame the limits of the characteristics of electronic music and the means to produce them. Of course, the "electronics" are presented at a higher system level to promote understanding of the electronic instruments themselves. (NOTE: No human subjects will be harmed or subjected to any inhumane treatment by presentation of analog or digital circuits during the delivery of this course.)

**ASEM 2651 The Peopling of the Western Hemisphere: Science, Evidence, Controversy (4 Credits)**

The migration and colonization of North and South America is analyzed based on data and observations made from the archaeological record. While it is evident that people did arrive in the Western Hemisphere in the distant past, there is a great deal of dispute about where they came from, when they arrived, and how they adapted to the new environments they encountered. The course evaluates various claims about all these important aspects of human migration. It tests conflicting models about which people arrived first, where they first landed, and what they did when they got here. The primary tools for this analysis are archaeological materials, but the course also draws on recent DNA and linguistic evidence of living Native American groups.

**ASEM 2652 Conspiracy Theories and Contemporary Culture (4 Credits)**

What have become called "Conspiracy Theories" (CTs) have been around since some of the earliest human narratives but have only quite recently been studied as a distinctive phenomenon. Underlying this explosion of popular interest in CTs are a number of intriguing philosophical, psychological and socio-political issues that reveal a great deal about how social discourse is pursued, formed, circulated and empowered (or disempowered) in the contemporary world. In this course, we will view this broad phenomenon of CTs from three different perspectives: (1) philosophical, (2) psychological, (3) social and political.

**ASEM 2653 Law & Politics of Reproduction (4 Credits)**

This course engages issues by examining them from multiple perspectives, using analytical tools from multiple disciplines. We explore historical and cultural changes over time, tracing them through historical and political writings, U.S. Supreme Court cases, legislation, statistical data, memoir, and sociological, philosophical and anthropological analyses. In drawing on these multiple sources, we examine past and present while also considering the relationship of these issues to the future.

**ASEM 2657 Harry Potter and Esotericism (4 Credits)**

Today's students have grown up with J. K. Rowling's seven Harry Potter books. This incredible publishing phenomenon has inspired children and adults alike to devour 500-page books within days of publication, at a time when statistics seem to indicate that people are no longer reading. Why would these tales of English school children learning a curriculum of magical skills have so captured the imagination of a generation of young people living in a post-modern world? The purpose of this class then is to examine the role of esoteric themes that pervade the Harry Potter books and to investigate the history of those subjects from the Middle Ages to the present, by focusing on the visual traditions they inspired. Areas discussed include the history of magic and witchcraft, classical and Celtic mythology, alchemy, astrology, fantastic beasts, "books of secrets" and their healing potions, the mythic lore of botany, divination and various esoteric paths of enlightenment.

**ASEM 2658 The Long Civil Rights Movement (4 Credits)**

This course explores the Long Civil Rights Movement—focusing on the ongoing struggles for racial equity in education. While the course is broadly historical in scope, covering debates about public education over the last century, it explores historical and cultural changes in education by focusing on three primary struggles: (1) the African American quest for equal education; (2) the Mexican-American fight for bilingual education; and (3) the Native American pursuit of self-determination through education. Throughout the course we consider how these historical struggles echo in contemporary debates of race, education and equity.

**ASEM 2660 Cinematic Storytelling (4 Credits)**

The course acquaints students with basic concepts and methods used in the analysis of stories, the theoretical assumptions and models describing and justifying those concepts and models, and practical applications of story analysis in cinematic and script form. We begin with Aristotle, provide an interdisciplinary and historical overview of narratology, move to literary narrative analysis, and then focus on film-theoretical approaches while gaining practical skills in analysis of the elements of storytelling in fiction, film and television. In this way, students gain some historical perspectives on the form and function of story - its timeless prevalence as well as its more current iterations.

**ASEM 2661 The French Revolution (4 Credits)**

This course is an interdisciplinary exploration of the French Revolution. Students learn about the many ways in which the Revolutionary decade of 1789 to 1799 marked a significant break with the French past - politically, socially and culturally. Yet these profound changes could not occur without some continuities. Students reflect upon political, sociological and philosophical questions that make the Revolution relevant today: How do democratic values take root in a traditionally monarchical society? Can these values be exported to societies without democratic traditions? Are liberty and equality compatible? How are nations defined? Can people thrive in a strictly secular—or fundamentalist—society? What is the role of violence and war in effecting political and social change?.

**ASEM 2662 Testimony, Memory and Allegory: the Representations of the Chinese Cultural Revolution (4 Credits)**

This course investigates how the Cultural Revolution serves as a critical link of the Revolutionary Era (1919-1980) and Reform Era (from 1980 on), via closely and critically examining various representations and surreal fiction, melodramatic and avant-garde cinema, lyric poems, music and visual arts. Although much of the material discussed is socio-politically oriented, the focus of the course is within the realm of literary and cultural criticism. This course explores complicated and often interwoven relationships between testimony, memory, signs, meanings of both writing and reading about traumatic events of the Cultural Revolution, ethical (personal and communal) commitment to memory and the engrossing historical, literary and artistic representations of the past expressed in different media. By doing so, the course reveals how each representative account copes with its producer's distinctive memories of the Cultural Revolution and, more importantly, responds to the cultural and political contingencies of the producer's time, as well as the artistic conventions of the producer. As such, it functions not only as a connection to the past but also a reconfiguration of the present.

**ASEM 2663 The Dark Knight Exposed: Exploring the Complicatedness of Superheroes (4 Credits)**

The 21st century has seen a rebirth of interest in fictional superheroes, and this course will explore how such characters can be seen as representing aspects of contemporary society. Especially noteworthy are conflicts between good and evil that so many superheroes embody. As Batman character Harvey Dent explains, "You either die a hero or you live long enough to see yourself become the villain." The course uses readings from psychology, literary studies, and popular culture to explore figures from the X-Men, Superman, the Avengers, and other comics and movies, with a central case study focus on Batman. The goal is for students to come away with a deep understanding of and appreciation for the complexities of superheroes and what they represent: what conflicts hide below their surfaces and our society's?.

**ASEM 2664 Contemporary Issues in Africa (4 Credits)**

Through the study of a variety of literary, visual, and oral cultural artifacts, this course will investigate contemporary issues of gender identity, education, development, and political culture in different areas of the African continent.

**ASEM 2665 Occupied France in Perspective (4 Credits)**

This course deals with the Occupation of France during World War II. Students, throughout the course, learn to understand, describe and articulate selected crucial aspects of this four-year period of military occupation. This course examines the question of the image of the Resistance and Occupation in cultural memory; this is a much studied and debated issue today, and forms the conclusion to the course. Forms of collaboration and resistance are very much in question in historical, cultural and literary debates today.

**ASEM 2666 Murder in America (4 Credits)**

This course draws on research from several perspectives in order to examine: (1) the definitions, scope, consequences and historical trends of homicide in America over the last century, including a case study investigation of why the murder rate dropped dramatically in New York City by the late 1990s; (2) past and current sociological/cultural and psychological explanations for lethal violence, including an in-depth look at serial, mass and spree killers; (3) crime policies and techniques aimed at reducing lethal violence, which entails a critical look at Three Strikes and You're Out laws aimed at violent offenders; and (4) media representations of homicide defendants and victims.

**ASEM 2667 Magic and Religion (4 Credits)**

The course examines, first, magic and witchcraft described in the Hellenistic world, India, and Medieval Europe and, second, magic and witchcraft in twentieth-century settings in the Upper Nile and rural France. The course also includes a study of twentieth and twenty-first century esotericism and occultism. Magic practices include pragmatic rites that cause effects ranging from love to murder, astrology-based medicine, conjuring and transacting with invisible creatures, creating power-bestowing diagrams, consecration of amulets, deploying and removing curses and disease, and weather control. Witchcraft includes sorcery and counter-sorcery rites, divination, and folk medicines. Magic is usually described as opposing religion, but the religious lives of most religious people contain magic practices; therefore, studying magic is a tool for studying cultures in both theory and practice. Research projects engage a magic practice to garner insights into the culture or cultures that circulate such lore.

**ASEM 2669 American Religious Movements (4 Credits)**

This course explores the history and contemporary relevance of religious movements in the United States, coupling that knowledge with selected social scientific perspectives on how social movements generally emerge, succeed and die out. Topics may include the Great Awakenings of American Protestantism in the 16th through 19th centuries; the array of religious transformations of the 20th century, such as the heightened religious pluralism shaped by the "new immigration"; sectarian divides; social activism that draws upon religious ideologies, resources and discourses; and struggles for change within religious groups themselves.

**ASEM 2670 Development in Latin America (4 Credits)**

This is a writing-intensive course centered on examining in a critical manner the continued efforts made by several countries in Latin America throughout the 20th century in promoting different projects of national economic and political development. Among other topics, we analyze the incorporation of Latin American countries into the international economy and the consolidation of its local oligarchic regimes (circa 1880s to 1930s); the importance of populism and elite pacts (of the 1940s and 1950s) for the promotion of industrial programs; the process of radicalization of the left, the democratic breakdowns and the ensuing military rule (of the mid-1960s and 1970s); the transitions to democratic rule (1980s); the implementation of market-reforms (1990s); and the current challenges for democratic consolidation.

**ASEM 2672 The Berlin Republic: Germany since 1990 (4 Credits)**

For roughly two decades, Germany, a once divided nation in the heart of Europe held responsible for World Wars, has been re-united. Forty years of division between West- and East-Germany—a division exacerbated by their respective geopolitical roles in the Cold War—left its mark on what many intellectuals considered a 'cultural nation' in spite of their political separation. This class examines the pains and gains of twenty years of unity, a process that has repeatedly been described as an attempt to "normalize" Germany's complicated history. We analyze various political, historical, but mostly cultural developments (and debates) that have accomplished and, at times, questioned this unification.

**ASEM 2677 The Sixties: Swinging London (4 Credits)**

Most of us are familiar with the main images of the 1960s in Britain, miniskirts, Mods, scooters, hippies, free love, the Beatles, the Rolling Stones, and James Bond. Considered the great decade of change, students' parents and other baby-boomers look back on it with nostalgia and the media continues to romanticize the period as being more innocent than today. Yet scholars continue to argue about the degree to which the Sixties really changed British society. While popular culture was clearly departing from that of the pre and immediately post-war era, many scholars from various disciplines assert that these changes, including the rise of the music industry, the teenager and youth culture, consumer-oriented society, spy literature, gender and racial issues found their roots in the post-war experience. Other scholars assert that the decade was dominated by contradictory impulses and that the major changes were uneven and often on the surface. This course traces the major themes of the period, including the rise of popular youth-based consumer culture, an unfettered media in Fleet Street, the center of world fashion-Carnaby Street, espionage literature on the page and on the screen, race and immigration issues, challenges to gender norms and sexual 'liberation', Britain's changing position in the world, the end of the British Empire, and the redefining of British national identity. These themes are investigated using a variety of sources including popular and documentary films, personal memoirs, novels, primary documents, secondary literature, fashion, poster art and other non-traditional sources.

**ASEM 2679 Thinking, Eating, and Writing: Food History (4 Credits)**

Nearly everything related to food and drink has a fascinating history: origins of dishes, food habits, customs, traditions, manners and modes of consuming food. This course integrates academic and some popular histories of food with student-created histories based on research, experience, and observation. Students read widely to understand the production of knowledge in food history and its vast scope, from a range of approaches, including theoretical, geographical and topical. Students engage in exercises to strengthen skills as historians and produce original archival research.

**ASEM 2680 Jewish Latin America (4 Credits)**

This course examines Jewish presence in Latin America from colonial times to the present, focusing on Jewish writers in Spanish America throughout the 20th century and considering Jewish-Brazilian and Jewish-Latino writers, Jewish themes in non-Jewish Latin American literature, and the various waves of Jewish immigration to Latin America. This course considers how they helped shape their specific communities and their responses to assimilation, state-sponsored anti-Semitism and Aliyah. Topics to be discussed include assimilation vs. integration; the construction of Jewish and national identities; and anti-Semitism in literature, film and political discourse. The course integrates critical readings alongside the literature, specifically in the areas of trauma and representation. No knowledge of Spanish is required, as the language of instruction is English and all required texts are available in English translation.

**ASEM 2682 Strange Beasts: Nuclear Japan (4 Credits)**

This course is a critical examination of literary and popular culture from Japan's experience of the Atomic bomb, through the "economic miracle" years of the 1960s to the present, focusing on the paired themes of humanity and monstrosity in nuclear experience during the acceleration of technological change.

**ASEM 2683 Bad Girls, Riot Grrrls and Misbehaving Women (4 Credits)**

This course introduces women who subvert mainstream expectations of femininity and explore misbehaving as a means of self-definition and empowerment in popular culture. From "Bad Girl" artists and the Riot Grrrl movement in the 1990s, to current day roller derby skaters and burlesque queens, the course traces the intersections of feminist art, DIY (do-it-yourself) approaches, creative production, performative outlets and socio-political consciousness. Unladylike behavior is explored as a strategy to articulate personal, social, political and cultural identity.

**ASEM 2685 Religion and Filmmaking (4 Credits)**

This course examines film and television representations of religions from around the world in an effort to understand the goals of the media makers and the effects of their productions. The techniques, theory and rhetoric of the films viewed are dissected and discussed. The course enables students to participate in critical, yet respectful debates about the cinematic mediation of religious concepts.

**ASEM 2687 Sex and Globalization (4 Credits)**

This course examines the complex phenomena of "globalization" within the framework of critical gender, sexuality and race studies. Topics range from sexual dimensions of war and empire building to the ways in which sexuality and gender shape global migration, tourism and commerce. In addition to consulting scholarly readings, we also examine and research representations of these phenomena as they occur in the media, online, and in popular culture.

**ASEM 2688 Music and Consciousness (4 Credits)**

This course explores ways of framing and defining individual and collective responses to musical arts, and, in turn, how understanding these responses can lead to a broader view of human consciousness. Through studying different musical cultures (and subcultures), students critically examine their own musical preferences and respond to other's aesthetic positions. Students explore 20th-century musical writings and compositions; examine themes of development, change, unity and variety in different musical genres; entertain musical manifestos written by various composers and musicians; and write their own "musical constitution."

**ASEM 2692 Philosophy of Migration and Global Citizenship (4 Credits)**

The 21st century is already being described by many as "The Age of Migration." This course explores the implications of mass global migration for the political philosophies of citizenship on which sovereign states are founded. Is something like a global citizenship possible? This seminar offers a cross-disciplinary perspective on this and other related issues. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2693 The Unfathomable Russian Soul: Identity and Self-Perception in 19th Century Literature and Culture (4 Credits)**

This course explores Russian identity and the idea that it resides in the "unfathomable Russian soul" that defies rational explanation. Students examine how classic Russian authors (Pushkin, Gogol, Turgenev) imagined and shaped "Russian soul" in their dialogues with Western European cultures and Russia's native traditions (folklore, Orthodox Christianity). Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2694 The Golden Age of Musicals (4 Credits)**

This course maps and analyzes the developments, constructs, creators and canonical works of the musical theatre genre up to and through its formative, formidable period known as the "Golden Age" (c. 1943-1964) as well as the genre's wider social/cultural implications and contemporary relevance. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2695 Religion and Politics in China (4 Credits)**

This course explores the concept of "religion" in the political history of modern China. Students gain new insight into two concurrent and divergent historical processes—state-driven secularization and religious revival—in China and Taiwan. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2696 Communication and Adoption (4 Credits)**

This course explores the communicative dynamics of adoptive families. This course focuses on issues surrounding identity, cultural context, race, sexual orientation, loss and ethics. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2697 Muslims and Identity in Europe (4 Credits)**

This course introduces students to the diverse Muslim populations across Europe, taking a case study approach that focuses on the histories, national politics, and societal contexts that help form Muslim European identities. Students gain exposure to anthropological, historical, political science, and religious studies techniques and perspectives, while writings focus on real-world genres that support students' professional development. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2698 Justice, Legal Obligation and Judicial Decision Making (4 Credits)**

This course provides students with an introduction to the major theories of judicial decision-making and the basic philosophical problems involved in understanding the concept of how law binds citizens, especially judges, in a liberal democracy. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2710 Free Form Film (4 Credits)**

Unlike Hollywood studio films, the works of video artists, experimental filmmakers and avant-garde auteurs almost never make their way to a theatre near you. Instead, many media artists find they need to make work for a culture that is already prepared for something other than mainstream filmmaking. How does this "fringe" film culture function and how do critics, curators and "underground" media-makers define their world of film festivals, gallery exhibits and grant proposals? Exploring aesthetic, critical, economic and technical aspects, this course features visits from influential filmmakers and others within the art-film community as we assess and critique groundbreaking ideas that have absolutely nothing to do with Hollywood. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2712 Participatory Culture and Fandom (4 Credits)**

Students explore practice and theories of participatory culture. From writers to fan fiction to grassroots activists to proponents of Web 2.0, those who consume culture are also those who produce it, and this state of affairs raises critical questions about taste, intellectual property, subcultures, and globalization.

**ASEM 2713 Food Culture: Foodies, Foragers and Food Politics (4 Credits)**

Culture, history, identity, sustainability, power: food is the bridge that connects us. Food is used to nourish and heal, mark celebrations, build community, and symbolize identity. This seminar investigates the connections between our food choices and political and cultural power. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2714 Framing the Debate (4 Credits)**

This seminar conducts a bipartisan, multimedia, interdisciplinary investigation of historical and contemporary presidential debates. In addition to following campaign and debate-related news, we read studies from multiple fields – history, political science, communications, sociology, psychology, rhetoric – and apply their insights and methods to analyze debate performances and research debate effects.

**ASEM 2715 Belonging in America (4 Credits)**

Who belongs in America? Who is on the inside/outside, and why? How do we define, experience, maintain, reject, and embrace our own insider/outsider status? Finally, how do American novels and dramas conceptualize and dramatize the many negotiations involved in belonging? This course explores the social, cultural, and experiential aspects of belonging in America. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2716 Tango: Border Crossings in Art, Race, Gender, and Politics (4 Credits)**

This course is a study of the appeal of Argentine tango and why a dance so closely linked to one culture appeals so intensely to people with such different cultural identities. We consider competing answers from academics in many fields – from gender, film, and rhetorical studies to art, politics, and dance – as well as testimonies of dancers and teachers, in Buenos Aires and from around the world. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2717 Pursuing Equality: Gender, Politics and Law (4 Credits)**

This seminar combines theoretical and empirical insights from law with sociology, economics, political science, anthropology, and women's studies to introduce students to the conceptual frameworks, legal mechanisms, and practical realities affecting gender equality primarily in the United States, but with some cross-national comparisons. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2719 Presidents, War, and the Constitution (4 Credits)**

The United States government is based on the idea of limited power. In this course, students analyze the kinds of power presidents have claimed in wartime, how courts have responded, and the consequences for individual rights with a study of the Civil War, World War II and the War on Terror.

Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2720 Nazi Germany: History, Literature, Culture (4 Credits)**

This course explores Germany's Nazi era. It focuses on themes like redemption, temptation, national community, conflict and memory while analyzing both texts and visuals from and related to the period. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2722 Freaks: Stigma and Resistance (4 Credits)**

The "freak" exists in a system of mutually reinforcing cultural categories: normal/deviant, masculine/feminine, white/nonwhite, civilized/savage, heterosexual/homosexual, able-bodied/disabled, and so on. The course examines how these categories arrange societies and cultural practices in ways that reject the heterogeneity of human experience. Using films, images, and texts from a wide range of fields, the course asks, "How do people become stigmatized?" More importantly, "How do stigmatized people resist marginalization?" Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2723 Contemporary Art in Context (4 Credits)**

This course examines key trends that have shaped contemporary art and considers how artists have turned to traditional media such as painting and photography and created new forms of art through performance, social media, and digital technologies to produce aesthetic and physical experiences that reflect on contemporary life. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2724 Jammin: Technoculture and Improvisation (4 Credits)**

This course introduces students to the recent history of musical and cultural forms devoted to improvisation, including jazz, free music, psychedelic rock, funk, jam bands, and electronic dance music. Improvisation is examined as a response to emerging technological forms by which musicians and listeners embody new personal and collective identities. The course includes perspectives from cultural studies, philosophy, history, media studies, sound studies, and critical theory. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2725 The Female Outlaw (4 Credits)**

This course examines female outlaws and renegades in politics, art, literature, and popular culture. Students assess how women intervene in the masculine mode of transgressive art and fiction, engaging themes of violence, difference, and empowerment. The female outlaw provides a model for writing with conviction, and challenging boundaries. Prerequisite: Completion of all other Common Curriculum Requirements. Course open to Colorado Women's College students only.

**ASEM 2726 Belonging: State and Family in our World (4 Credits)**

This course examines the state regulation of belonging in families and the international ambiguities of rights and belonging to states. It develops concepts by looking closely at histories and stories of adoption and of people who have been caught in-between in the regulation of citizenship: people who lose or mistrust the value of their citizenship, or can't claim the rights of citizens, or flee their countries. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2728 Identity, Power, and Media Culture (4 Credits)**

In our contemporary cultural landscape, information is delivered in many formats, through various mediums, to global audiences. Understanding media systems as information delivery is often tied to journalism and/or financial institutions; "news" and "data," have become synonymous with what we officially learn from media culture. However, those same images and messages that help us understand our social condition are also delivering important meanings about ourselves and those around us. This course focuses on this branch of inquiry within media studies—highlighted by the work of cultural studies—and focuses on the intersections of identity and power. As a fundamental source of the signification of identity, media culture becomes a social tool, and therefore must be understood as a system that shapes our relationships to individuals and communities. This course will explore the importance of this process, will equip students with the means to critically analyze media texts and production, and will sharpen awareness to dominant norms and values in our society. Overall, this course provides students an opportunity to directly confront the questions: How do media shape our understandings of intersecting identities such as gender, race, ability and class? How can we critically identify stereotypes and misrepresentation, including our own privilege? How do dynamics of identity operate at the production level(s)? What are the implications of these representations and how are they related to power dynamics in contemporary culture?.

**ASEM 2729 Seduction and Satire in British Women's Novels of the 18th Century (4 Credits)**

This course explores how fiction by 18th century British women relates to larger themes of gender (and genre) construction. What is the gender of the novel in the eighteenth century? Why do these female authors make sustained use of the seduction narrative, and how do they work to combine it with more traditionally "masculine" forms such as satire? Are they conforming to or subverting received notions of femininity with such use?.

**ASEM 2730 Queer Lives in Musical Theatre (4 Credits)**

Musicals are one of the most popular forms of American theatre, commonly considered family friendly and mainstream. However, since its beginning musical theater has also been strongly connected to queer culture. Through watching and listening to musicals as well as studying queer theory, students identify and analyze depictions of queer life throughout musical theatre history.

**ASEM 2731 Postcolonial Lit and Performance (4 Credits)**

Postcolonial studies investigates contemporary cultures as an embodied consequence of historical power struggles. The major questions covered in this course are: What is colonialism and what are its lingering effects on society? How do we collectively experience, record, and resist dominant modes of oppression through artistic expression?.

**ASEM 2732 New Media, Conflict and Control (4 Credits)**

This course explores the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts illustrate how citizens and regimes use new media to communicate, report, mobilize, monitor, and/or control. Students utilize new media as they research instances of democracy and control.

**ASEM 2733 Media, Culture and Globalization (4 Credits)**

This course explores the importance of understanding media as it relates and impacts globalization, and equips students with the means to critically confront the ways that globalized media impacts culture, and sharpens awareness through written assignments that highlight connections between theory and lived experience.

**ASEM 2734 Music and Spirituality (4 Credits)**

At a time when "spiritual" music appears in a wide variety of contexts such as churches, yoga studios, raves, and radio broadcasts, "Music and Spirituality" explores individual and collective perspectives on music and transcendence, and teaches how a deeper understanding of those perspectives can lead to a broader view of meaning in human experience.

**ASEM 2735 Perspectives on Climate Change (4 Credits)**

This course explores the complex, controversial issue of global climate change from multiple perspectives and using multiple types of sources. The goal is for each student to develop an educated perspective on this issue and be able to advocate for her perspective. Students write at least twenty pages in the class, including short weekly online posts, an op-ed piece, a film review, and a position statement based on knowledge acquired during the class. Writing intensive. Prerequisite: Completion of all other Common Curriculum Requirements or permission of instructor.

**ASEM 2736 Spirituals and the Blues (4 Credits)**

This course examines spirituals and the blues, two song forms from the canon of African American music. A multifaceted approach (both historical and analytical) reveals the ways in which the music is transformative, healing, and liberating, as well as providing a vehicle for agency. The course also studies the music's larger sociopolitical landscape.

**ASEM 2737 Experiencing the Future (4 Credits)**

This course introduces students to the study of the representation and evaluation of possible futures. Students observe the mechanisms impacting future-oriented thinking, and trace the ways that our thoughts about the future shape our day-to-day living. Students draw on insights from literature from a wide array of disciplines—including Sociology, Psychology, Economics and Public Policy—to explore the many ways in which the future is being visualized, colonized, calculated and produced in the society where they live.

**ASEM 2738 Brands, Culture, and Identity (4 Credits)**

Brands have become ubiquitous in every aspect of life in contemporary culture. How has this come to pass and what are the social, political and cultural consequences of living in a culture saturated by brands? This course explores critically the roles and meanings of brands in the making of cultures and identities.

**ASEM 2739 Can College Teach Reasoning? (4 Credits)**

In the last several years, colleges and universities have made national news with a series of controversies over diversity, inclusivity, and free speech. Many commentators see free speech at odds with diversity and inclusivity. Those who stress the importance of free speech on campus often embrace an idea with a long philosophical history: the "thinking cure." According to this line of thinking, a principal task of education—particularly higher education—is to teach critical thinking. A well-functioning university (not to mention a well-functioning democracy) is a marketplace of ideas where participants are free to rationally debate the issues of the day. The best ideas will eventually win out. People need the skills to debate rationally, which education should provide, and the freedom to deploy those skills in arguing for their versions of the true and the good, which educational institutions and the courts should protect. This course aims to understand and critically analyze this line of thinking through the lens of philosophy, empirical psychology, and contemporary journalism. Can we really be trained to reason in the way that this line of thinking requires? The course considers arguments that emphasize the limitations on our ability to reason, arguments that we are frequently subject to (sometimes insuperable) biases. We examine how these arguments bear on the aims of education generally, and on free speech provisions in particular.

**ASEM 2740 Rhetorics of Belonging (4 Credits)**

This course explores how particular uses of language shape and convey historical and current understandings of American citizenship. Students examine how language creates, reinforces, and challenges the idea of "belonging." What is at stake in accepting or denying identities for certain groups? The course analyzes the role literacy has played in constructions of citizenship, pertinent relationships between culture and language, and the rhetorics of belonging. The course uses both primary and secondary texts to examine the complicated, dynamic, and nuanced history of immigration from multiple perspectives.

**ASEM 2741 Music in Science Fiction Film (4 Credits)**

This course examines music and sound design in science fiction film 1895–2015, exploring key concepts and practices in music, and placing films studied in social and political context, as well as the aesthetic and technological trajectory of the genre. The course addresses recurring themes in science fiction, as well as the impact of new sound technology, non-traditional orchestration, and sound effects on the development of the film genre. The course presumes no prior specialized knowledge of music or film.

**ASEM 2742 Media and Marketplace Feminism (4 Credits)**

This course tracks the historical trajectory of marketplace feminism—also known as commodity feminism, lifestyle feminism, or white feminism—through its dynamic relationship to media culture. In an effort to highlight the complexities surrounding both feminism as political praxis, as well as feminism as a commodity, multiple perspectives are offered for classroom discussion and critique, including readings from feminists, pop culture/literary critics, media studies scholars and feminist media studies scholars.

**ASEM 2743 Bad Words: The Ideologies of Profanity (4 Credits)**

Students explore bad words in all of their variations (e.g., expletives, obscenities, profanities, etc.). The course combines an historical study of bad words with an examination of current usage and issues, looking at bad words through a range of readings from history, neurology, ideology, psychology, and other fields.

**ASEM 2744 The Academy Awards & Academia (4 Credits)**

This course introduces students to the history and politics of the Academy Awards, through weekly film screenings and a variety of scholarly texts from across the disciplines. From war sagas and romantic comedies to horror flicks and musicals, the films covered represent the best of the best, at least according to members of the voting Academy. The course's scholarly lenses will range from statistical analyses of features of Best Picture winners to historical, political, sociological, and cultural interpretations of how the Oscars have reflected shifting societal values.

**ASEM 2745 American Jews, Zionism, and Israel (4 Credits)**

It is often taken as a given, by both Jewish and non-Jewish Americans, that American Jews have always supported Zionism and, since its creation in May 1948, supported the state of Israel's actions. However, the historical relationship between American Jews, Zionism, and the state of Israel has been complex and multifaceted. This course examines and analyzes this historical relationship from multiple perspectives, beginning approximately fifty years before the creation of the state of Israel, while also paying attention to recent shifts in the ways in which contemporary American Jews relate to and view the state of Israel.

**ASEM 2746 Music and Disaster (4 Credits)**

This course examines the role of music within the context of disaster. Understood to be catalysts for artistic expression, disasters produce musical expressions related to trauma in myriad forms. Following an historical overview of large-scale natural and man-made disasters and the kinds of music produced in relation to them, we examine how disaster figures into the production and consumption of music in Haiti, New Orleans, Indonesia, South Africa, Cambodia, Uganda, and in the Post-9/11 world. The course additionally examines music as a tool in social justice, considering how music provides social commentary, critique, and a form of social activism. Students understand how music and disaster are historically intertwined, and how music shapes understandings of conflict and catastrophe. No previous musical experience is required.

**ASEM 2747 Complexity in the Social Sciences with a Focus on Economics (4 Credits)**

The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2789 Deviant Bodies (4 Credits)**

Students will explore the meanings of deviant bodies. They will examine narratives of fatness, illness, disabilities, sexualities, femininities, masculinities, race, and contamination from sociological, historical, anthropological, and feminist perspectives. Discussions and intensive writing about deviant bodies will be prompted by scholarship on embodiment, gender, and social inequality, through examinations of popular culture, social media, film, and students' own social interactions.

**ASEM 2860 Critical Disability and Culture (4 Credits)**

This course explores how the concept of disability (physical, developmental, cognitive, emotional, psychosocial and so on) is constructed through a variety of lenses. Topics may include biomedical discourse of disability in everyday life; relationships and the workspace; the discourse of normalcy as it is constructed by persons with disabilities; and meaning-making process of disability in various cultural and contextual spaces. Utilizing academic research, popular culture references, visual media and writing, students deconstruct, critique, and analyze the different discourses of disability through basic character-driven gaming, using standards of Universal Design.

**ASEM 2861 Taboo Tales: Cultural Literacy through Fairy Tales (4 Credits)**

Cultural literacy requires that we grapple not only with social boundaries, but also with what lies beyond them – the taboos that frighten us, and the taboos that intrigue us. In this course, we will explore the topic of taboo through the lens of storytelling, with a particular focus on the unsettling themes represented in folklore. We will approach the study of taboo in a multi-disciplinary manner, using a blend of folklore, history, psychology, film, and textual studies to examine various tales of taboo from diverse cultures, including Native American, Chinese, Indian, European, Russian, and African fairy tales. Please note that this course will cover unsettling and violent topics; be prepared to read about these themes.

**ASEM 2862 Racism, Schooling, & Development (4 Credits)**

This course will focus on ways everyday school practices can perpetuate racial inequity in school and society as well as impacting racially minoritized youth development. Specifically, we will explore how various school practices (e.g., discipline) disproportionately impact Black and Latine youth schooling experiences as well as their social, emotional, and cognitive development. Students will read empirical and popular press articles and engage the literature with in class and out of class written assignments.

**ASEM 2863 Religion and Science Fiction (4 Credits)**

Who are we? Why are we here? Where are we going? What happens when we die? How do we define what it means to be human? What do we do when others look at us as Others? These are some of the questions that human communities have explored through philosophy and theology. Science fiction (SF) and fantasy represent a massive amount of cultural production, creating a space in which we collectively explore many of these same questions. In this course we will examine novels, short stories, film, and television programs in order to analyze the production of popular culture, meaning making, and modern-day mythology, all with an eye towards resonances with these vital questions about what it means to be human.

**ASEM 2864 Ethics of AI (4 Credits)**

Artificial Intelligence (AI) tools and technology, including robotic technology, are already widespread and only becoming more so. As these technologies are developed and integrated into human life, what are the ethical implications? In this interdisciplinary course, we will read work by philosophers, feminist and critical race and ethnic studies scholars, computer scientists, engineers, and military professionals in order to acquire a detailed, nuanced perspective on the ethics of AI. Using these multiple perspectives, we will focus several topics, including: bias in algorithms, privacy and data rights, whether we should be trying to create machines that represent and act on moral values like humans, the social impacts of AI and technology, and AI and Robotics in Warfare.

## Air Force ROTC (RTC2)

**RTC2 1010 Heritage and Values I (0-1.5 Credits)**

This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1020 Heritage and Values II (0-1.5 Credits)**

A continuation of RTC2 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1234 Leadership Laboratory (0 Credits)**

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab). These courses are taken at CU Boulder. Co-requisites: One of RTC2 1010, RTC2 1020, RTC2 3010, RTC2 3030.

**RTC2 2010 Team and Leadership Fundamentals 1 (0-1.5 Credits)**

This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 2020 Team and Leadership Fundamentals 2 (0-1.5 Credits)**

A continuation of RTC2 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3010 Leading People and Effective Communication 1 (0-4.5 Credits)**

This course is designed to build on the leadership fundamentals. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3020 Leading People and Effective Communication 2 (0-4.5 Credits)**

Continuation of RTC2 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3030 National Security, Leadership Responsibilities/Commissioning Preparation 1 (0-4.5 Credits)**

This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3031 National Security, Leadership Responsibilities/Commissioning Preparation 2 (0-4.5 Credits)**

This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. Classes meet on CU-Boulder campus on the semester calendar.

## Anthropology (ANTH)

**ANTH 1006 Paranormal Archaeology (4 Credits)**

This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1010 Anthropology: Humankind in Context (4 Credits)**

This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species' place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1910 Ancient Worlds (4 Credits)**

This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history: the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 1988 Study Abroad Resident Credit (0-18 Credits)****ANTH 2000 Genealogies of Anthropology: Foundations and Futures (4 Credits)**

Explores the development of anthropology as a field of study, including important thinkers, ideas, and movements in their historical and social contexts as well as their relevance to contemporary issues.

**ANTH 2004 Anthropology of Jews & Judaism (4 Credits)**

This course is cross-listed with JUST 2004 and RLGS 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

**ANTH 2010 Cultural Anthropology (4 Credits)**

This course is an introduction to cultural anthropology. As one of anthropology's main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically.

**ANTH 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with JUST 2011 and RLGS 2011.

**ANTH 2020 Artifacts, Texts, Meaning (4 Credits)**

How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2040 Historical Archaeology (4 Credits)**

Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus but also address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 4040. Prerequisite: ANTH 2310 or permission of instructor.

**ANTH 2070 American Jewish Experience (4 Credits)**

This course is cross-listed with JUST 2070 and RLGS 2070. In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry's religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life.

**ANTH 2105 Human Nature (4 Credits)**

Human biological variation in time and space; investigation of the environmental and cultural impacts on the human organism that have led to the present diversity of the species. A scientific, evolutionary approach to human nature. Required for all anthropology majors.

**ANTH 2125 Primates (4 Credits)**

Non-human primates are used within numerous disciplines as models for understanding the evolution of our own behavior. This course examines non-human primates within the framework of anthropology and explores the ways that the study of other primates contributes to our understanding of human behavior and evolution, and serves to connect us to the living world. The course will examine three aspects of primate life (the three F's: feeding, fighting, and family) first from the non-human primate perspective and then through the lens of human behavior and social organization. To better understand the methods of primatology, students will develop their own research project to take place at the Denver Zoo. As an SI: Society course students will develop an understanding of the defining principles central to inquiry within the discipline of anthropology as well as become proficient in the use and application of anthropological, and specifically primatological, research methods.

**ANTH 2200 Contemporary Issues of Native North America (4 Credits)**

This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land.

**ANTH 2310 Fundamentals of Archaeology (4 Credits)**

This course focuses on the practice of archaeology—why and how archaeologists recover and analyze their data. By the end of this course, students have an understanding not only of the nature of the archaeological record, but also how models of the past are built and interact with general public knowledge.

**ANTH 2323 Global Health (4 Credits)**

This course is an introduction to global health. As one of the world's faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2420 Science, Technology and Human Values (4 Credits)**

This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2424 The Social Determination of Health (4 Credits)**

This course is an introduction to sociocultural epidemiology. As the scientific basis of public health, epidemiology is the discipline that aims to describe the distribution and causes of health problems in a society, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, disease and health care and their manifestations around the world. This course presents an overview of epidemiology's history and methods, to then concentrate on the social and cultural aspects of health. The course offers an in-depth exploration of the notion of disease causation, with historical and current examples. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, and sociology. We will explore ideas and behaviors related to disease causation in different societies and social groups. Topics include the history of epidemiology and theories of disease causation, research methods in epidemiology, social determinants of health, and the notions of disease causation and determination. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of cases in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects.

**ANTH 2600 Museums and Public Culture (4 Credits)**

A critical introduction to how cultures and peoples are presented in museums, festivals, tourism venues and the popular media. The course introduces students to the historical and contemporary role of museums and anthropology in public culture and the importance of both in civic life.

**ANTH 2988 Study Abroad Resident Credit (0-18 Credits)****ANTH 3001 Race, Sex and Evolution (4 Credits)**

The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

**ANTH 3020 Native Religions (4 Credits)**

A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channeling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

**ANTH 3030 Digital Anthropology (4 Credits)**

Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

**ANTH 3040 Anthropologies of Place (4 Credits)**

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3060 Cultural Narratives (4 Credits)**

Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non-anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity, both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

**ANTH 3070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Prerequisite: introductory social science course. Cross-listed with ANTH 4070.

**ANTH 3080 Memory and Memorialization (4 Credits)**

The course focuses on how social groups represent, experience and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past- and its materialization through monuments, ruins, and landscapes- are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as "authenticity," "tradition," and "modernity" in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

**ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**ANTH 3110 The Cultured Ape (4 Credits)**

This course is an examination of human evolutionary psychology. Evolutionary Psychology deals with how contemporary human behavior is constrained by our heritage as evolved primates. It questions the standard social science and mainstream anthropological model of humans as "blank slates" who are primarily shaped by their social and cultural environments. In other words, Evolutionary Psychology views humans as "cultured apes."

**ANTH 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

**ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)**

Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

**ANTH 3155 Native American Resistance in the Digital Age (4 Credits)**

Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

**ANTH 3170 Applied Heritage Management (4 Credits)**

Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

**ANTH 3200 Human Origins and Evolution (4 Credits)**

Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

**ANTH 3225 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 3255 Ancient North America (4 Credits)**

This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.

**ANTH 3290 Art and Anthropology (4 Credits)**

Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

**ANTH 3310 Indigenous Environment (4 Credits)**

The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

**ANTH 3320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 3330 Human Rights of Indg Peoples (4 Credits)**

This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

**ANTH 3350 Latin American Archaeology (4 Credits)**

Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

**ANTH 3370 Sex, Class and Race in Latin America (4 Credits)**

This course uses an intersectional approach to the study of sex, class and race in Latin America. Intersectionality aims at understanding the interlocking relation between sex, class, race and other aspects, and how these are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. In this course we will aim at understanding such history, culture and peoples with a special emphasis on examining their heterogeneity, and aiming at understanding how such heterogeneity is also related with social inequality. We will also examine some contemporary issues such as women's rights, indigenous movements, human rights, migrations, and economy with an emphasis on their manifestations at the intersections of sex, class, and race.

**ANTH 3390 Geoarchaeology (4 Credits)**

Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

**ANTH 3470 Applied Anthropology (4 Credits)**

The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

**ANTH 3500 Culture and The City (4 Credits)**

Examines the past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of cities in antiquity and ends with contemporary urban landscapes. Analysis is sensitive to both the technologies and aesthetics of urban form. Emphasis is on the possibilities for urban redesign to meet the problems of 21st century city life.

**ANTH 3510 The Ancient City (4 Credits)**

The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

**ANTH 3540 The Nature of Language (4 Credits)**

Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

**ANTH 3620 Ethnoarchaeology (4 Credits)**

Ethnography has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

**ANTH 3630 Archaeological Method and Theory (4 Credits)**

This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

**ANTH 3640 Race and Human Evolution (4 Credits)**

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

**ANTH 3655 Indigenous Feminisms (4 Credits)**

This course examines a wide array of Indigenous feminisms. Rather than think of Indigenous feminisms as one static thing, we will inspect the field from multiple viewpoints and perspectives. We will draw from various thematic and transnational contexts across the Americas and Native Pacific in order to analyze the scope and significance of such knowledges, particularly as they relate to broader theories and practices of decolonization. We will begin by examining the foundational inquiries and methods of Indigenous feminist scholarship. Is gender a useful category of analysis? How have Indigenous women thought of gender? How have Indigenous women thought about, and responded to, feminism? With an emphasis on Indigenous scholars and feminists, we will cover a range of topics including (but not limited to) how Indigenous feminism fits into the feminist project, the connection between colonization and violence against Native women, the reclamation of women's initiations, gender and sovereignty, queer indigeneity, Indigenous feminist allies, and decolonial love. We will draw from readings across feminist movements, and as feminist Kanaka Maoli Professor Lani Teves says, we will attempt to "make links between Indigenous feminisms and Latinx feminisms, Black feminisms, and transnational feminisms. Rather than shy away from the tensions that emerge between multiple feminisms, instead we will attempt to cultivate nodes of alliance and solidarity to diversify our feminist tactics."

**ANTH 3660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographical research.

**ANTH 3661 Museums and their Visitors (4 Credits)**

This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors' experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences? Cross listed with ARTH 3661.

**ANTH 3680 Quantitative Methods-Anthropology (4 Credits)**

The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

**ANTH 3701 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

**ANTH 3702 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3703 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3742 Museum Exhibit Development (4 Credits)**

Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

**ANTH 3743 Managing Collections (4 Credits)**

Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

**ANTH 3750 Ethnographic Methods (4 Credits)**

In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association's Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

**ANTH 3790 Field Methods in Archaeology (4 Credits)**

The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field. Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

**ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)**

This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and event natural environment that was used and marked by human action.

**ANTH 3800 Capstone Seminar Anthropology (4 Credits)**

This seminar brings anthropology to bear on a topic of special significance. It assesses grasp of the key concepts, theories and insights of anthropology, and critically reflects on the nature and history of the discipline. Prerequisite: Senior standing.

**ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)**

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

**ANTH 3875 Research Methods in Anthropology (4 Credits)**

This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

**ANTH 3880 Culture, Ecology, Adaptation (4 Credits)**

This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

**ANTH 3890 Context of Material Culture (4 Credits)**

Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnology, archaeology, folklore, geography, history, art and architecture.

**ANTH 3980 Internship (1-8 Credits)****ANTH 3981 Museum Internship (1-6 Credits)****ANTH 3988 Study Abroad Resident Credit (0-18 Credits)****ANTH 3990 Summer Field School-Archaeology (4-6 Credits)**

Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.

**ANTH 3991 Independent Study (1-15 Credits)**

**ANTH 3995 Independent Research (1-10 Credits)**

## **Arabic (ARAB)**

### **ARAB 1001 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Arabic 1001 is designed for students with no prior knowledge of Arabic. Students with experience with the Arabic language should complete the placement test to determine the appropriate course level for their background.

### **ARAB 1002 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1001 or equivalent.

### **ARAB 1003 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence aims at building practical communication skills to interact with speakers of Arabic and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Considering the diglossic nature of Arabic, students learn to speak in the Levantine dialect and read and write in Modern Standard Arabic, just like native speakers do. Students will also explore and reflect on Arabic cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Arabic sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Arabic context, operating at the novice high to intermediate low proficiency level. Prerequisite: ARAB 1002 or equivalent.

### **ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)**

This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested.

### **ARAB 1351 Tales from the Arabian Nights: Reading across Time and Space (4 Credits)**

No doubt that through their magical transformations and marvelous plots, the stories of the Arabian Nights, also known as One Thousand and One Nights, have a great entertainment value and that the imaginary setting of the tales has fascinated and inspired many authors and artists. However, this collection of stories has also significantly contributed to how the West views the Middle East: an exotic world populated by negative images such as conniving and manipulating harem women and violent and unscrupulous Arab men. The Tales of the Arabian Nights provide a unique platform for the discussion of current issues such as orientalism, stereotyping, and gender discrimination. In this course, we will select a handful of stories to serve as a catalyst for inquiry to show how this shared narrative passed on from generation to generation, has contributed to the creation of an 'exotic' East invented by the colonial West. We will show that the Middle East, like the rest of the world, is in a state of flux and the text is not a historical account of the medieval Arab world and cannot be viewed a-historically. We will unveil all the stereotypes that have been subtly, or not so subtly, implanted in the mind of the west through an often-erroneous portrayal of the Arab world.

### **ARAB 2001 Intermediate Arabic (4 Credits)**

Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 1003 or equivalent.

### **ARAB 2002 Intermediate Arabic (4 Credits)**

Continued study of Arabic language with an enhanced cultural component. Two quarter sequence. Prerequisite: ARAB 2001 or equivalent.

### **ARAB 2100 Conversation & Composition (4 Credits)**

This is the third quarter of the second year. Intensive practice in oral skills and grammar review. Writing, discussion and reading based on a topic or topics in Arabic language and culture. Increased attention paid to writing skills. Prerequisite: ARAB 2002, equivalent, or permission of instructor.

**ARAB 3700 Topics in Arabic (1-4 Credits)**

**ARAB 3701 Topics in Arabic (1-4 Credits)**

**ARAB 3702 Topics in Arabic (1-4 Credits)**

**ARAB 3703 Topics in Arabic (1-4 Credits)**

**ARAB 3704 Topics in Arabic (1-4 Credits)**

**ARAB 3991 Independent Study (1-5 Credits)**

## Army ROTC (RTC1)

### **RTC1 1011 Adventures in Leadership 1 (1-3 Credits)**

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing, techniques and some basic military tactics.

### **RTC1 1021 Adventures in Leadership 2 (0-3 Credits)**

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

### **RTC1 2031 Methods of Leadership and Management 1 (1-4.5 Credits)**

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

### **RTC1 2041 Methods of Leadership and Management 2 (0-4.5 Credits)**

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

### **RTC1 3052 Military Operations and Training 1 (0-4.5 Credits)**

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Instructor permission required.

### **RTC1 3062 Military Operations and Training 2 (0-4.5 Credits)**

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Instructor permission required.

### **RTC1 3072 Adaptive Leadership (0-4.5 Credits)**

This course focuses on developing leaders of character that will excel in a complex, ambiguous and dynamic future operating environment. While centered on leadership within the military, and designed to ensure future second lieutenants are prepared for their professional responsibilities, the course develops universal leadership attributes. We will discuss personal growth, effective communication, critical thinking, problem solving, and ethical leadership. The objectives of the course are to understand basic leadership principles – to include knowledge of one's self as well as techniques to effectively influence others, improve communication – both written and oral, enhance the ability to analyze issues, articulate a problem, extrapolate pertinent information, make valid assumptions to overcome knowledge gaps, identify potential solutions and develop a way forward, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

### **RTC1 3082 Leadership in a Complex World (0-4.5 Credits)**

Continues RTC1 3072 study by focusing on developing leaders of character that will excel in a complex, ambiguous, and dynamic future operating environment. The course will center on Students' understanding of their environment. The objectives of the course are to understand organizational leadership principles – to include leading diverse teams, leading change, and creating a vision, improve communication – both written and oral, enhance one's understanding of the contemporary operating environment, gain an appreciation for other actors in the national security arena; appreciate cultures of other military services as well as civilian organizations and agencies, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

### **RTC1 3090 Military Theory and Tactical Leadership (0 Credits)**

Application of military domain knowledge, small unit leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. Co-requisites: One of RTC1 1011, RTC1 1021, RTC1 2031, RTC1 2041, RTC1 3062, RTC1 4072 or RTC1 4082.

# Art - Studio (ARTS)

## **ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)**

This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTS 1100 2-D Approaches (4 Credits)**

Students are introduced to the elements of design, vocabulary of art and visual analysis. Explorations of the formal language of two-dimensional media include color, digital processes and mark making. Students also develop an understanding of compositional strategies, materials and processes. Verbal and written exercises supplement group activities and visual learning. Students explore across material boundaries. Increasing emphasis is placed on subjectivity, content and conceptual development. Lab fee. No prerequisites.

## **ARTS 1200 3-D Approaches (4 Credits)**

Students are introduced to spatial thinking, the fundamentals of structure and construction, and the formal language of three dimensional forms. Applying a variety of materials, explorations include additive and subtractive methods, basic mold making, and an introduction to hand and power tools. Verbal and written exercises supplement the Studio environment and visual learning, and basic digital methods and color relationships are explored. Emphasis is placed on subjectivity, artistic choice and craft, alongside the beginnings of content and conceptual development. Lab fee. No prerequisites.

## **ARTS 1250 Drawing (4 Credits)**

Fundamental drawing practice and history based on selected exercises, slide presentations, comprehensive group/individual critiques and workshops. Still-life and figure drawing are covered in this course. Projects focus on ways to comprehend and draw three-dimensional forms, with emphasis on conceptual issues and use of materials. This class is required of all majors in studio art prior to taking upper-level courses. It is also required of all EDP students.

## **ARTS 1300 Concepts (4 Credits)**

Students integrate the skills and principles acquired from ARTS 1100 and ARTS 1200. Two topics are explored: 'Culture & Context' and 'Time, Space & Duration'. A greater complexity of studio activity is stressed through collaborative exercises and individual approaches to themes. Greater exploration of context and concept is expected, with emphasis on visual communication and personal awareness. Lab fee. Prerequisites: ARTS 1100 and ARTS 1200.

## **ARTS 1400 4D Approaches (4 Credits)**

Students are introduced to the fundamental principles of four-dimensional art and design through a survey of concepts, techniques, and practices. Emphasis is placed on critical thinking, creative problem-solving, and experimentation through investigations of technological form and innovation, time and motion, and the ephemeral. Verbal and written exercises supplement group activities and visual learning. Lab fee. No prerequisites.

## **ARTS 1988 Study Abroad Resident Credit (0-18 Credits)**

## **ARTS 2000 Open Media Studio (4 Credits)**

This course is a topic driven, interdisciplinary research studio. Students investigate the topic and their relationship to it in a variety of media, and supplement their inquiry with research that occurs outside the classroom. An exploration of different processes, materials, expression and connection with the larger world is emphasized. Lab fee. All students must complete ARTS 1300 first.

## **ARTS 2045 Intermediate Drawing (4 Credits)**

This course covers a wide range of materials and ideas, both traditional and experimental. Emphasis is divided between technical and conceptual issues, building on the skills established in ARTS 1250 Drawing. Lab fee. Prerequisite: ARTS 1250 or permission of instructor.

## **ARTS 2055 Color (4 Credits)**

Color is a studio-based course focused on developing a more sophisticated and practical understanding of how colors act on us and vice versa, physiologically, psychologically, emotionally and culturally. It is designed specifically to enhance the abilities of people who work with color, be they painters, web designers, video artists, art historians, art therapists or conservators. However, because of the intentionally basic level of art skills involved, this is a course that is also taken by non-art majors with success. It includes in-class color work that retrains students in their ability to "see" more color and to become confident in their ability to interpret and manipulate color for any specific need. In addition, there is required reading on the physics of color, and discussion of the historical influences and legacy of color in primarily Western culture. Lab fee. Majors should complete ARTS 1250 and ARTS 1300 first.

## **ARTS 2115 Introduction to Oil Painting (4 Credits)**

Introduction to Oil Painting builds on the ideas and skills learned in Drawing. Working with oil paint, students explore the possibilities of creating the illusion of three-dimensional form and space on the flat surface of a canvas. Emphasis is on really looking to heighten one's visual awareness of the physical world and seeing the effects light has on form, color and space. Students work from objects, the human form (models), imagination and art history. Critical abilities will be developed as students learn to think, speak and write about art. Discussions and critiques explore the social, political and the expressive possibilities of art-making. Students are given individual work-space to focus and develop their paintings. Students complete paintings in and out of class; contemporary and historical artists' work is explored, and students visit an area museum or gallery. Lab fee.

**ARTS 2215 Relief Printmaking (4 Credits)**

Concentration on selected areas of relief printmaking and related contemporary attitudes. This course covers relief, ranging from linoleum and woodcut processes to experimental approaches. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2225 Intaglio Printmaking (4 Credits)**

Concentration on selected areas of Intaglio printmaking. Emphasis is placed on conceptual and technical development, and on personal expression through this medium. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2235 Screen Printing (4 Credits)**

This course focuses on water-based screen printing and its applications in a workshop/studio intensive atmosphere. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2415 Introduction to Photography (4 Credits)**

This class presents the basic concepts of photographic practice and discourse regarding; the historical, cultural and personal impact of photography. The goals are: introduce camera basics: digital photography workflow; (camera, image processing and digital printing); creative cell phone photography; online book publishing; development of an artistic and aesthetic way of seeing; engagement in critical analysis of photography; and most importantly, have fun learning a new skill. Participants will practice basic principles of photography, such as; camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing tools. Emphasis will be on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited selection of prints, or published online. Creation of a personal website will be encouraged. Community engaged collaboration may be a component of this course. Collaboration with another DU class may also be a component. No prerequisites. MUST HAVE A DIGITAL CAMERA WITH MANUAL METERING CAPABILITY. If you are unable to meet this requirement, please contact the professor. Lab fee. Art majors must complete ARTS 1250 and ARTS 1300 first.

**ARTS 2445 Digital Photography and Experimentation (4 Credits)**

This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. Students gain an understanding of digital photography and the use of Adobe Photoshop in the process of making art. Through labs and classroom demonstrations this course is designed to improve student's skill level as an artist/photographer, both technically and conceptually. Projects are viewed and discussed in critique sessions. Students must have a digital camera with manual metering capabilities. Lab fee. Prerequisite: ARTS 2415 Intro to Photography or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

**ARTS 2515 Introduction to Ceramics (4 Credits)**

This course investigates the unique, material nature of clay as a medium for exploring artistic concepts and ideas. Studio assignments and demonstrations introduce several basic handbuilding methods as well as glazing and firing techniques. This course provides the fundamentals upon which students build their own direction and invention. Emphasis is on experimentation and individuality. Lab fee. Majors must complete ARTS 1250 and ARTS 1300 first.

**ARTS 2535 Ceramics: Food and Function (4 Credits)**

Gastronomy is the study of the relationship between culture and food. In this class, we explore gastronomic objects associated with food, both functional and sculptural. The importance of food is intimately involved with our concepts and design choices. Studio assignments and demonstrations serve as springboards for the student's own research and interpretations. Students use many different technical approaches such as throwing, handbuilding, casting as well as mixed media. Ultimately, students investigate, create and EAT! Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2555 Ceramics: Multiples (4 Credits)**

This course investigates the many aspects of working with repetition and multiples. Assignments fall under the headings of Repetition, The Series, The Unit and The Collection. Students learn mold making and slipcasting techniques in addition to handbuilding and glazing. Students develop ideas on a conceptual level first and then move into building their pieces, combining the appropriate construction methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2565 Ceramics: Surface (4 Credits)**

This course explores the ceramic surface as a canvas for decoration and narrative in both functional and sculptural forms. Students do extensive exploration and experimentation combining traditional ceramics techniques with those of drawing and printmaking. Students develop ideas on a conceptual level first and then move into creating their pieces, combining the appropriate methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2615 Introduction to Sculpture (4 Credits)**

This course offers a supportive but critical context to extend students' understanding of three dimensional form and its creation. Building on construction methods and spatial relationships formed in ARTS 1200, the course emphasizes the experiential and conceptual aspects of sculpture, and the interrelationship of ideas, form, material and technical means. Lab fee. Prerequisite: ARTS 1200. Majors should complete foundations sequence first (ARTS 1100, ARTS 1200, ARTS 1250, ARTS 1300).

**ARTS 2645 Mold Making and Casting (4 Credits)**

This course explores moldmaking and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced to techniques for reproducing form such as open face molds, two-part molds, and castings from life. Students learn to express ideas by exploring the conceptual significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content introduces students to contemporary artists and critical dialog.

**ARTS 2701 Topics in Studio Art (4 Credits)**

Selected topics in studio art research. May be repeated to a maximum of 12 credits.

**ARTS 2775 Integrated Practice (4 Credits)**

The overall approach of Integrated Practice (IP) is to offer students ways to articulate their individual "non-art" degree interests and knowledge as artistic outcomes. Modeled as a Studio course in format (curiosity, research, and making) the course encourages the expression of knowledge in other areas (Biology or International Studies, for example) through the vehicle of art. Additionally, the course offers students opportunities to pursue and further existing art skills and experiment with new ones, so choices of medium and process are flexible. For example, if a student enjoys photography or sculpture, there will be options to explore the projects using those mediums or technical approaches. Projects in IP will examine different means to translate non-visual knowledge to that which is visual or tangible. Examples may include ways to visualize "data" (broadly), exploring the approaches of mapping to examine the real and the imaginary, and more site-specific/interactive means of addressing ideas of place. There are options for 2 dimensional, 3 dimensional and virtual explorations of ideas, building further bridges between disciplines. Overall, the course encourages a holistic synthesis between "non-art" knowledge (academic or otherwise) and art making practice. Course pre-requisites include at least two prior ARTS (Studio) courses and/or permission of the instructor.

**ARTS 2988 Study Abroad Resident Credit (0-18 Credits)****ARTS 3055 Advanced Drawing (4 Credits)**

Working with a variety of materials and techniques, students hone their drawing skill and at the same time create finished drawings defined by content. Problems posed encourage independent thinking, experimentation and the development of a personal technical base. Lab Fee. Prerequisite: ARTS 2045 or ARTS 3065 or permission of instructor.

**ARTS 3065 Life Drawing (4 Credits)**

An intensive course in drawing the human figure, clothed and unclothed, to explore the human form in terms of proportion, movement, light and shadow, composition, color and personal expression. Students experiment with a range of materials. Lab Fee. Prerequisite: ARTS 1250 or permission of instructor.

**ARTS 3125 Figure Painting (4 Credits)**

An intensive course in painting the human body--the most timeless subject of art. Students work mainly in oils and experiment with a variety of surfaces and techniques. Students also investigate line, proportion, light and shadow, composition and color. Final project: life-size painting of two figures. Lab fee. Prerequisite: ARTS 2115 or ARTS 3065 or permission of instructor.

**ARTS 3145 Painting Workshop (4 Credits)**

Concentration on selected techniques and approaches to painting. Topics change. Course may be repeated to a maximum of 12 credits. Lab Fee.

**ARTS 3245 Printmaking Workshop (4 Credits)**

This upper-level course focuses on various topics and processes as the definition of contemporary printmaking evolves. Subjects such as lithography or intermediate screen printing, photo-based prints, or current themes relevant to printmaking are possible core formats for the course. Group and individual critiques, digital image presentations and examination of prints and reproductions. Lab fee. Prerequisites: sophomore standing and ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first. Course may be repeated to a maximum of 12 credits.

**ARTS 3347 Professional Practice (4 Credits)**

This course is required of BFA studio art majors and is open to BA art majors. It covers practical artist survival skills, including resume and cover letter writing, exhibition proposals, documentation of art work, artist statements, portfolio development and professional presentation of self and work. The course is reinforced by field trips and guest speakers who introduce both academic and non-academic art experiences and professions. Lab fee.

**ARTS 3348 Senior Practicum in the Visual Arts (4 Credits)**

Required for all studio BFA candidates. Students are expected to begin research and investigation for work that may be included in the BFA exhibitions. Emphasis is placed on a three-pronged assessment consisting of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

**ARTS 3349 Senior Seminar in the Visual Arts (4 Credits)**

Required for all studio BFA candidates. Students pursue work individually and demonstrate a synthesis of ongoing research, demonstrate development and participate in structured weekly critiques with other studio BFAs and faculty. This work is a meaningful extension of fall and winter quarters and extends beyond the installation of BFA exhibition. Emphasis is placed on discussions and critiques centered on the three-pronged assessment initiated in winter quarter of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

**ARTS 3450 Portrait Photography (4 Credits)**

This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. The class focuses on the genre of photographic portraiture. Through labs and classroom lectures, many interpretations of portraiture are covered. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisites: ARTS 2415 and any one of the following: ARTS 2425, ARTS 2435, ARTS 2440, ARTS 2445, or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

**ARTS 3452 Photography and Society (4 Credits)**

This course celebrates the enduring tradition of social documentary photography and visual storytelling. Participants will practice basic principles of photography, such as; camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing tools. Contemporary Social Documentary Photography practice will be positioned within the context of the history of photography. Emphasis will be on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited selection of prints, or published online. Creation of a personal website will be required. Community engaged collaboration will be a component of this course. Collaboration with another DU class may also be a component. No prerequisites. This course may satisfy one requirement for a Photography and Society Certificate. "Photography and Society." Students must have a digital camera with manual metering capability; contact the professor if you cannot meet this requirement.

**ARTS 3455 Photography Workshop: Alternative Processes in Photography (4 Credits)**

Concentration on selected techniques and approaches to photography. Topics change. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisites: ARTS 2415 Introduction to Photography or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

**ARTS 3555 Ceramic Workshop (4 Credits)**

Concentration on selected techniques and experimental approaches to ceramics. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: ARTS 2515 or approval of instructor.

**ARTS 3645 Advanced Mold Making & Casting (4 Credits)**

This course explores moldmaking and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced to advanced techniques for reproducing form such as multiple part molds and rotocasting. Students hone their ideas by exploring the conceptual significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content supports in-depth student research into contemporary art and fosters critical dialog.

**ARTS 3655 Sculpture Workshop (4 Credits)**

Concentration on selected techniques and experimental approaches to sculpture. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3701 Topics in Studio Art (4 Credits)**

Selected topics in advanced studio art research. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: instructor's permission.

**ARTS 3865 Senior Project: Conservation (4 Credits)**

Required for, and limited to, BFA pre-art conservation majors. It is normally taken spring quarter of the senior year. The student works with a professional art conservator on a major conservation project that will become part of his or her portfolio and will be exhibited in the senior BFA exhibition.

**ARTS 3915 Advanced Problems in Art (1-5 Credits)**

This course is for students who have completed all 3000-level courses in a given area of concentration to show proficiency and wish to pursue more advanced work. A proposal form must be obtained from the art office and signed by the instructor and the Director of the School of Art and Art History before the student registers for this course. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3960 Conservation Internship (4 Credits)**

The internship is normally taken during the fall of a major's senior year, under the direction of a professional Conservator, either in private practice or in a conservation department. Students should work closely with their advisor to arrange the Conservation Internship during the quarter before it will be taken. The student works on a wide variety of materials and problems in conservation during this internship, gaining as varied an experience as possible and developing a professional portfolio. Must be a BFA major in Pre-Art Conservation.

**ARTS 3966 Studio Art Travel (1-4 Credits)**

A travel course to selected locations to visit galleries, museums and artists' studios. Location and content of course change. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3980 Studio Art Internship (1-4 Credits)**

The student is responsible for locating the internship and gaining approval for it, using the internship guidelines and contract form in the art office. Typical internships have been located in commercial galleries, fine art printmaking houses, professional artists' studios and non-profit arts organizations.

**ARTS 3988 Study Abroad Resident Credit (0-18 Credits)****ARTS 3991 Independent Study (1-6 Credits)**

Supervised studies not addressed in this catalog of classes. Advanced projects must be faculty approved. Permission/registration form is available from the Office of the Registrar.

**ARTS 3999 Exit Survey (0 Credits)**

All majors in the School of Art and Art History are required to register for ARTS 3999 during their final quarter of study at the University of Denver. The course is completed by taking the online exit survey. It does not bear credit; no tuition is assessed and no grade is given. Majors cannot graduate until they complete this requirement. The information from this anonymous survey is used by the school to improve its programs. We greatly appreciate our students' help in this regard.

# Art History (ARTH)

## **ARTH 1010 Images of Culture (4 Credits)**

This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1020 Highlights of Medieval Art (4 Credits)**

The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1030 Highlights of Renaissance Art (4 Credits)**

The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1040 Sacred Spaces in Asia (4 Credits)**

This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1050 Highlights of American Art (4 Credits)**

This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist's life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1060 Contemporary Art Worlds (4 Credits)**

Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## **ARTH 1988 Study Abroad Resident Credit (0-18 Credits)**

### **ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)**

This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **ARTH 2802 World Art II: c. 1000-1700 (4 Credits)**

This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **ARTH 2803 World Art III: 1700 to the Present (4 Credits)**

This is the third quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1700 to the present. Students will consider the crucial role of these image and objects in the formation of their respective historical and cultural contexts.

### **ARTH 2814 Medieval Art (4 Credits)**

This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **ARTH 2840 Survey of Asian Art (4 Credits)**

An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 3300 Seminar in Art History (4 Credits)**

This seminar is primarily designed to introduce students to the advanced research techniques and methods of art history. The thematic content of this course changes. Students develop skills to analyze scholarly literature, to refine research papers and to deliver oral presentations.

**ARTH 3400 Portfolio\* Professional Development and Creative Practices in Art History (4 Credits)**

Portfolio is a professional development and creative practices course, introducing the practicalities of staple jobs for Art History majors and minors as well as the range of other possible career tracks and additional academic studies. The course combines an inquiry-based classroom experience with a signature seminar format and guest lecture series. Such a teaching+learning approach will not only improve your criticality but also strengthen your adeptness at investigation and analysis; deepen your knowledge of concepts, principles, and platforms for today's creative industries; expand your professional networks; and provide hands-on, career-oriented experiences as you prepare your own portfolio for the contemporary marketplace.

**ARTH 3652 Internship (1-4 Credits)**

By arrangement, advanced undergraduate art history students may intern in an art gallery, small museum, historic house, non-profit art organization, archive or library. See guidelines and contract form in the School of Art and Art History office.

**ARTH 3656 Curatorial Practicum (4 Credits)**

Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

**ARTH 3661 Learning in Museums (4 Credits)**

Comprehensive introduction to museum education. Examines informal education, learning theories, interactive education, exhibits and programs. Cross-listed with ANTH 3661.

**ARTH 3701 Topics in Art History (1-4 Credits)**

Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

**ARTH 3702 Topics in Contemporary Art (4 Credits)**

This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

**ARTH 3813 Arts of the American West (4 Credits)**

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

**ARTH 3815 Puritan, Shaker, Hindu: Material Religion in North America (4 Credits)**

The diversity of religious experience and spirituality is emphasized in this historical examination of image and artifact in North America. Beginning with sacred indigenous arts and including Puritans, Shakers, Judaism, Mormons, Ghost Dance religion, Buddhists, Hindus, and others, this class considers the ways in which different spiritual worldviews are expressed through and shaped by the art and objects people create and the environments they build. It looks at the encounters between cultures in colonial and post-colonial contexts that result in ever changing material forms of religion. Students learn through slide-lecture-discussions, reading, small group discussions, research papers or presentations, and field trips.

**ARTH 3817 Gothic Art (4 Credits)**

This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world—its beliefs, aspirations, social and political realities.

**ARTH 3818 Art of Renaissance Europe (4 Credits)**

This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

**ARTH 3822 Northern Renaissance Art (4 Credits)**

This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

**ARTH 3823 17th-Century European Art (4 Credits)**

This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

**ARTH 3825 Abstract Expressionism (4 Credits)**

In the years immediately following World War II, American art flourished through a generation of artists whose work successfully moved beyond (and at its best, matched) the substantial innovations of modern artists working in Europe around the time of World War I. From richly varied backgrounds and equipped with a deep understanding of art history, these artists forged careers during the Depression and, though fiercely independent, united in the late 1940s with the goal of establishing a new American modern art. Their monumental, highly singular, expressive abstractions (and near-abstractions) gave rise to the movement called Abstract Expressionism, which dominated American painting in the 1950s and beyond.

**ARTH 3832 19th-Century Art (4 Credits)**

This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

**ARTH 3834 Global Contemporary Art (4 Credits)**

This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction and discussion of contemporary art.

**ARTH 3838 Connoisseurship (4 Credits)**

In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum's collection.

**ARTH 3839 Topics in Modern Art (4 Credits)**

Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

**ARTH 3840 Sacred Arts of Asia (4 Credits)**

This course explores the sacred art and architecture of Asia, including but not limited to India, China, and Japan. Major religious traditions, including Buddhism, Hinduism, and Islam, are viewed through the lens of artistic development; indigenous religious traditions and philosophical constructs, including Shintoism, Daoism, Confucianism, and Bon are also explored for their influence in art, architecture, and visual culture more broadly in and between Asian regions.

**ARTH 3862 Olmec to Aztec: Mesoamerica (4 Credits)**

This course is an introduction to the art and archaeology of the indigenous peoples of Mesoamerica from about 2000 BC to AD 1521. The course explores the early royal art of the Olmec, the colossal pyramids of Teotihuacan, the manuscripts of the Mixtec, and the imperial power of the Aztecs. This class presents a timeline of Mesoamerica and investigates how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, gender, and human sacrifice.

**ARTH 3863 Kings and Cosmology: Maya Art (4 Credits)**

This course is an introduction to the art and archaeology of the Maya from about 300 BCE to 1200 CE, although the beliefs and traditions of the living Maya will inform this study of the past. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos.

**ARTH 3864 Buddhism(s) and Arts (4 Credits)**

This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

**ARTH 3867 The Circle and the Four Corners: Native North American Art (4 Credits)**

This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures.

**ARTH 3868 Art of the Andes (4 Credits)**

This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

**ARTH 3871 Women in Art (4 Credits)**

This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

**ARTH 3872 Introduction to Conservation (4 Credits)**

This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

**ARTH 3875 History of Collections (4 Credits)**

This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

**ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)**

What is 'Islamic' in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists' response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.

**ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)**

Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists' acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

**ARTH 3910 Art History Travel (4 Credits)**

A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.

**ARTH 3988 Study Abroad Resident Credit (0-18 Credits)****ARTH 3991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

## Arts and Humanities (AH)

**AH 3980 Critical Race and Ethnic Studi (1-4 Credits)****AH 3982 Arts and Humanities Internship (1-4 Credits)**

## Asian Studies (ASIA)

**ASIA 2102 Topics in Chinese Art (4 Credits)**

Selected topics in Chinese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3841.

**ASIA 2105 Topics in Japanese Art (4 Credits)**

Selected topics in Japanese Art. Content changes. Course may be taken more than once. Cross listed with ARTH 3842.

**ASIA 2701 Topics in Asian Studies (1-4 Credits)****ASIA 2704 Buddhism (4 Credits)**

Buddhist life and thought from origins to present in India, Tibet, Japan and China. Cross listed with RLGS 3820.

**ASIA 2714 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**

This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the the guru/si#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2114.

**ASIA 2850 Imperial China (4 Credits)**

In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term. Cross listed with HIST 2850.

**ASIA 3701 Topics in Asian Studies (1-4 Credits)**

Specialized topics in Asian Studies. Topic varies per offering. Check with the Asian Studies program director for more information. Open to majors and non-majors. May be repeated for credit.

**ASIA 3875 Chinese Science and Global History (4 Credits)**

This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected. Cross listed with HIST 3875.

**ASIA 3901 Asian Studies Directed Readings (4 Credits)**

Students will read deeply in a specific field of scholarship directed by a core faculty member in the Asian Studies program and will write a methodological essay that discusses the scholarship in their chosen field of research. This is the first part of a required, two-quarter sequence that will culminate in the senior thesis. Enrollment is restricted to Asian Studies majors.

**ASIA 3902 Asian Studies Senior Thesis (4 Credits)**

Students will pursue a primary document research project under the supervision of their core faculty member in Asian Studies. The goal of this course is the writing and completion of the senior thesis in Asian Studies. Prerequisite: ASIA 3901.

**ASIA 3980 Asian Studies Internship (1-4 Credits)**

Provides academic credit for off-campus internships in areas related to the Asian Studies major. The purpose of the internship is the gain valuable work experience, explore various career options, develop job competencies and/or apply theoretical knowledge to practical concerns of the world. Must be an Asian Studies major and have cumulative GPA of 3.0 and have taken at least two Asian Studies content courses, not counting language training. Requires approval of Asian Studies director.

**ASIA 3991 Independent Study (1-4 Credits)**

## Bachelor of Arts Completion Program (BACP)

**BACP 2050 Writing Workshop (4 Credits)**

Course Description: The Writing Workshop re-introduces students to skills essential for successful university study as well as workplace writing. This is not just an "academic" subject. It is also important to career development and confidence in the workplace. This course focuses on knowledge and skills of expression that bring university study and workplace experience closer together. It deals with close reading, identifying and assessing arguments in texts and other media, approaches to note-taking, and the effective annotation of potential sources; quoting sources accurately and ethically while integrating the quoted material into one's own writing; creating accurate and ethical summaries and paraphrases; demonstrating a university-level grasp of grammar, mechanics, and style; and giving clear, actionable feedback to fellow student writers with the aim of helping them improve their work.

**BACP 2075 Data Concepts and Structures (4 Credits)**

This course will cover the basics of data to include data concepts, terminology, and literacy. Students will learn what typical data sets are, how data relationships work, and where data is stored. These concepts will be the basis for data analysis using commonly available tools and techniques.

**BACP 3350 Directed Research (4 Credits)**

Directed Research introduces students to academic research with focus on developing substantive academic arguments. In this course, students select a topic from their majors to research and produce an argumentative research paper. This course focuses on several aspects of the academic writing and research process. Students will apply critical thinking, identification, assessment, and application of arguments in academic work. They will practice developing claims, annotating sources, and integrating effective and accurate sources into one's own writing. This course also emphasizes appropriate use of collegiate-level grammar, mechanics, and style, and correct use of Turabian Author-Date style citations and University College format requirements.

**BACP 3400 Civic Engagement (4 Credits)**

Because education has social as well as personal benefits, it carries with it opportunities and obligations for civic engagement. Most people have some desire to be of help to others, but knowing how to help without interfering or being condescending often requires cultivated sensitivity. The Civic Engagement project provides students with an opportunity to identify a community need, learn how that need is or is not being addressed, and get engaged in a particular set of service activities for an agreed upon duration of time. Students may receive help with finding appropriate settings through DU's Center for Community Engagement and Service Learning. Online students receive help in how to identify service learning opportunities in their local communities or through their employers. Students are expected to keep and submit a reflective log on the nature of their activity and the learning they have derived from it.

**BACP 3450 Integrative Project Design (4 Credits)**

Through this course, students create a project design for their integrative project which is conducted and completed in BACP 3500. This course, along with BACP 3500, emphasizes B.A. Completion Program learning objectives: creativity, critical thinking, knowledge utilization, decision-making, empowerment, and effective communication. Students design a research-based project, which, when the project is completed, illuminates the problem and argues for a set of activities addressing the issues and proposing a possible solution. In doing so, students draw on theories, concepts, and knowledge from several different courses in their major. Students complete the design document for the Integrative Project Report including the identification and definition of the problem, purpose of their project, setting/context for the project, an extensive literature review outline, preliminary methods of investigation, and a timeline for completion. Students leave the course prepared to begin the Integrative Project.

**BACP 3500 Integrative Project (4 Credits)**

Students in all majors design, complete, and submit an integrative project. The project comprises implementation of the project design developed in BACP 3450. The integrative project requires: clear problem definition; gathering high-quality relevant evidence; analyzing and evaluating evidence, data, and information; developing findings (e.g., conclusions, recommendations, decisions, results, observations, inferences, solutions, etc.); and crafting arguments to explain how and why these findings were reached, and why the findings are valid. The project focuses on utilizing background knowledge or skills developed throughout the BACP, integration of evidence, applying critical thinking skills, and presenting a coherent and persuasive culminating academic paper. The emphasis is on combining several concepts, types of knowledge, and skills learned through the B.A. Completion Program to address a specific challenge. Through this project students learn how multiple perspectives can be integrated to create useful solutions to defined problems.

**BACP 3980 Internship (0-4 Credits)**

The Bachelor of Arts Degree Completion Program Internship is designed to offer students a purposeful experience in a practical, industry-related setting. The internship is an individualized learning experience. A training plan is created for each student in conjunction with the internship site supervisor to provide experiences related to the skills and knowledge covered in the certificate and master's programs as well as professional goals. Students are responsible for finding their own internship site and proposing their internship ideas. University College will send notification to all COMM students if they hear of internship possibilities. Students may also work with the DU career center, to explore opportunities for internship experiences. To be eligible for an internship, completion of a minimum of 28 hours of coursework is required OR Academic Director approval for students with previous experience in the field.

**BACP 3991 Independent Study (1-4 Credits)**

Student completes special learning project on a topic which is not covered by an existing course. This project is completed under faculty supervision. Topic and assignments must be approved by supervising instructor and Bachelor of Arts Completion Program director.

## Biology (BIOL)

**BIOL 1005 Perspectives-Veterinary Medicine (2 Credits)**

Introduction to career areas in veterinary medicine through lectures, guest speakers and demonstrations. The credits for this course are general elective only. They do not apply to any major or minor in NSM or to SI-NPW of the common curriculum. Prerequisites: BIOL 1010 and BIOL 1020, or by departmental permission.

**BIOL 1010 Physiological Systems (4 Credits)**

The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

**BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)**

The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

**BIOL 1020 Physiological Systems Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

**BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

**BIOL 1220 Molecules to Humankind I (4 Credits)**

First class in a three-quarter sequence for non-majors that examines the mechanisms that sustain life. Emphasis is placed on understanding the human body at the molecular, cellular and physiological levels. In the fall quarter our discussions start with the atom and basic chemistry. We next consider the properties of complex molecules, including DNA, proteins, carbohydrates and lipids, in order to see how such molecules are used and organized by living organisms. Our discussions of large and complex molecules lead naturally to the basic unit of life, the cell. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1221 Molecules to Humankind II (4 Credits)**

Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1222 Molecules to Humankind III (4 Credits)**

Third class in a three-quarter sequence focuses for non-majors on cell biology, genetics, and human reproduction and development. After a review of cell structure and function, focusing on how cells are capable of replication with modification, the mechanisms by which information is passed on from one cell to another and from one generation to the next are considered. The second half of the quarter concerns sexual reproduction and early development. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: BIOL 1221.

**BIOL 1260 Sustaining Life I (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1261 Sustaining Life II (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

**BIOL 1262 Sustaining Life III (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

**BIOL 1270 Living in the Microbial World I (4 Credits)**

Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1271 Living in the Microbial World II (4 Credits)**

For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

**BIOL 1272 Living in the Microbial World III (4 Credits)**

In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

**BIOL 1988 Study Abroad Resident Credit (0-18 Credits)****BIOL 1990 Independent Study (1-5 Credits)****BIOL 2010 General Ecology (4 Credits)**

Topics in ecosystems, population and community ecology, as well as behavioral ecology. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

**BIOL 2011 General Ecology Lab (1 Credit)**

Exercise and experimentation to complement the lecture. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021 with a minimum grade of D-.

**BIOL 2055 Ways of Seeing and Sensing in Biological Systems at Kennedy Mountain Campus (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Biological Sciences, Physics & Astronomy, and Media, Film & Journalism Studies at DU's Kennedy Mountain Campus (KMC). As part of this course, students will collaborate as part of multidisciplinary teams; to compile and apply new content knowledge in biology/ecology, film-making, science communication and story-telling in a project-based curriculum unique to the KMC. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We will examine various aspects of natural systems specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to "seeing" through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To further develop the concept of "sensing," we will explore the soundscapes of the KMC as well as the ways plants and animals in this ecosystem sense their surroundings. We will also explore the KMC using human senses other than sight to navigate the nighttime environment. Students will work in teams of 3-4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing to participate for credit in Biological Sciences will complete additional reading and assignments focusing on the various ways that biological systems (from cells, to organisms, to communities) sense and respond to changes in their environment, including light, heat, sound, chemical cues, and physical forces such as electricity and gravity. This course will meet together with PHYS 2050 and MFJS 2050 courses, which each have different prerequisites and discipline-specific assignments. Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 2090 Biostatistics (4 Credits)**

Statistics in biological research. Computer-aided statistical analysis and hypothesis testing focusing on experiments and data unique to the biological sciences. Cross listed with BIOL 4090.

**BIOL 2120 Cell Structure and Function (4 Credits)**

Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. Prerequisite: BIOL 1011. Corequisites: BIOL 2121 lab section and CHEM 1010.

**BIOL 2121 Cell Structure & Function Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. Co-requisite: BIOL 2120.

**BIOL 2320 Andean Landscapes (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in the Andes of Peru through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits and occurs during winter interterm. Over a period of 11 days we will visit the cities and surroundings of Lima, Arequipa, and Cusco, Peru where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The Andean environment offers unique challenges for environment and societies and by understanding the locations and patterns of human activity in the Andes, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in situ critical thinking skills and the promotion of cultural diversity and global awareness. This course counts toward the sustainability minor and the intercultural global studies minor. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 2510 General Genetics (4 Credits)**

Mechanisms of heredity with application to all forms of life. Topics include classical genetics (mendelian inheritance, meiosis, epistasis, recombination gene mapping, chromosomal mutations) and an introduction to modern molecular genetics (DNA structure and function, gene expression and regulation). Prerequisites: BIOL 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.

**BIOL 2511 General Genetics Lab (1 Credit)**

The laboratory component of BIOL 2510. COREQUISITES: BIOL 2510 PREREQUISITES: BIOL 1020 AND BIOL 1021 RECOMMENDED PREREQUISITES: BIOL 2121.

**BIOL 2825 Biogeographies of Conservation in Serengeti & Zanzibar (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem and Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 2988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3005 Science Communication (4 Credits)**

Science communication has shaped, and continues to shape, the world in which we live (e.g., why you wash your hands, why we don't feed bears in U.S. national parks anymore, and why some students imagine themselves becoming scientists or not). Sharing how science is conducted and how new knowledge is generated through the scientific method also plays a critical role in our future: creating engaged citizens, shaping the next generation of scientists, increasing diversity and diverse perspectives in the sciences, informing policy-makers and lawyers, combatting misconceptions, increasing trust of scientists, and guiding our own individual behaviors. But, like any other complex skillset, science communication takes practice. This course provides students with a range of resources and skills for effective, ethical, and evidence-based communication of complex socio-scientific issues. It provides a supportive environment in which students will practice and refine their science communication through peer feedback and engagement with real audiences. The focus is on cultivating practical communication skills, with emphasis on effective speaking, writing and exhibition of scientific topics with the variety of audiences students will encounter in their future careers. Course readings, activities, and final projects also examine how identity shapes both the science we do and the lenses we and other stakeholders bring to communication tasks. The course is hybrid, highly interactive, and writing-intensive. This course is restricted to Junior or Senior Standing UG majoring in the College of Natural Sciences and Mathematics.

**BIOL 3010 Evolution (4 Credits)**

Evolution is the central concept in biology. This course examines the foundations of evolutionary theory. We will cover the history of life on earth, the genetic basis for evolution, evolutionary processes (natural and sexual selection), the origin of species, and medical applications of evolutionary theory. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 2510.

**BIOL 3025 Science and the Law (2,4 Credits)**

This course will focus on the intersection of science and US law. Four major areas of focus that will be covered are the admissibility of expert witnesses / scientific evidence in court; how advances in forensic genetics and national DNA databases raise legal issues pertaining to expectations of privacy and the standards for reaching a verdict; the impact of US Supreme Court opinions on the patenting of genes used as diagnostic markers for human disease and the legal landscape surrounding issues of evolution and creationism/intelligent design. Students will then explore how the law impacts their own areas of scientific interest. The goal of this course is to increase our understanding as scientists of how advances in science impact and are impacted by the US judicial system. PREREQUISITES: BIOL 1010 AND BIOL 1011.

**BIOL 3035 Invasive Species Ecology (4 Credits)**

This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

**BIOL 3044 Coral Reef Ecology (3 Credits)**

Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef conservation. This course counts as a category elective for Ecology and Biodiversity majors. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).

**BIOL 3045 Coral Reef Ecology Lab (1 Credit)**

Ecology of coral reefs laboratory to supplement lecture material; travel to the Caribbean over spring break to observe coral reefs firsthand; introduction to research methods. SCUBA certification and permission of instructor required. A travel and dive fee is associated with this course.

**BIOL 3055 Ecology of the Rockies (4 Credits)**

A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 2010 or permission of instructor.

**BIOL 3070 Ecological Field Methods (4 Credits)**

Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3085 Insect Ecology (4 Credits)**

A general introduction to insect biology and the science of entomology. Arthropods are the most diverse group of animals on Earth and insects account for more than half of all known living organisms. This course explores the biodiversity of insects on Earth, insect morphology and physiology. The evolutionary history and taxonomy of key orders of insects is emphasized as well as the importance of insects to our everyday lives. This course counts as a category elective for Ecology and Biodiversity majors. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010.

**BIOL 3090 Microbial Ecology (4 Credits)**

Interactions among microorganisms and their environment. Impact of ecological principles on microbial diseases, pollutant degradation, nutrient cycles and global change. Prerequisites: BIOL 1010, BIOL 1020, AND BIOL 2510.

**BIOL 3095 Global Change Ecology (4 Credits)**

Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth's organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. RECOMMENDED PREREQUISITES/COREQUISITES: BIOL 2090.

**BIOL 3110 Special Topics: Biology (1-5 Credits)**

Topics of special interest to teaching/research faculty of department presented as needed to complement and expand existing curriculum. May be repeated for credit. PREREQUISITES: BIOL 1010.

**BIOL 3120 General Microbiology (4 Credits)**

Fundamental principles of microorganisms in the world and in disease; role of bacteria in biological phenomena. Includes laboratory. Lab fee associated with this course. Counts as a category elective for Ecology and Biodiversity majors. Prerequisite: BIOL 2120.

**BIOL 3145 Cellular and Molecular Biology of Cancer (4 Credits)**

This course examines the mechanisms that underlie the development and progression of cancer. The cellular and molecular events that drive uncontrolled cell proliferation and eventual metastasis of tumors are discussed. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2120.

**BIOL 3150 Intracellular Dynamics (4 Credits)**

Focuses on spatial and temporal control of intracellular processes with an emphasis on neuronal and endocrine cells. Topics include vesicular traffic, protein targeting, dynamics and spatial organization of signaling complexes. Emphasis on modern techniques of cell and molecular biology with examples from primary literature. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2120.

**BIOL 3160 Biophysics: Ion Channels & Disease (4 Credits)**

Examines ion channel structure and function and the ways in which this information provides insight into human disease. The focus is on the use of biophysical techniques in combination with molecular and genetic analysis of channel genes. General Physics recommended. This course counts as a category elective for the Molecular Biology major and Cognitive Neuroscience concentration. Prerequisite: BIOL 2120.

**BIOL 3230 Nutrition (3 Credits)**

Investigation of metabolism, all nutrients and various applications of nutrition to sports and healthy living. Prerequisite: BIOL 3250.

**BIOL 3241 Anatomy and Physiology of the Skeletal, Nervous and Muscular systems (5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Skeletal, Muscular, and Nervous system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisites: BIOL 2120.

**BIOL 3242 Human Anatomy and Physiology - Systems of homeostasis (5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Cardiovascular, Respiratory, Urinary, Digestive, Immune and Reproductive system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisites: BIOL 2120.

**BIOL 3245 Human Anatomy (5 Credits)**

This course is designed to introduce you to the fundamental concepts, content and scientific bases of human anatomy. Specific content covered in the course includes: the Language of Anatomy, Body Organization, Histology, and Integument, Skeletal, Muscular, Nervous, Cardiovascular, Respiratory, Urinary, Digestive and Reproductive anatomy at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Prerequisite: BIOL 2120 Cell Structure and Function.

**BIOL 3250 Human Physiology (5 Credits)**

Functional relationships of human organ systems with coordinated laboratory activities and experiments that demonstrate and test physiological principles. Lab fee associated with this course. Prerequisites: BIOL 1010.

**BIOL 3251 Exercise Physiology (4 Credits)**

This course will cover exercise physiology topics included but not limited to: energy systems, physiological response to exercise/training, and exercise programming. A strong background in human physiology is recommended. This course counts as a category elective for the Physiology in Health and Disease major. Prerequisite: BIOL 1010.

**BIOL 3252 High Altitude Physiology (4 Credits)**

This course is an advanced course in physiology for those interested in both the impacts of altitude exposure on health and athletic performance. We live at altitude in Denver, and in fact there are many factors affecting our bodies (which we may or may not realize) that impact our daily lives. This course aims to provide insight on the acute and chronic physiological responses of altitude as well as to provide a deeper understanding into the use of hypoxic environments for improving health and benefiting athletic performance. We will explore the physiological mechanisms related to these reduced oxygen environments as well as develop projects that contribute to the understanding of using this environment as a stimulus. This course counts as a category elective for the Physiology in Health and Disease major. Prerequisite: BIOL 3242.

**BIOL 3253 Environmental Physiology of Animals (4 Credits)**

By studying species across the animal kingdom, we will learn about the vast array of physiological strategies that have evolved to help animals maintain homeostasis in the face of varied environmental challenges. We will cover foundational principals of animal physiological ecology and evolution, as well as new and exciting discoveries through weekly discussions of primary literature. We will focus primary literature discussions on "extreme environments," as Earth's harshest landscapes provide exciting and powerful examples of adaptations of physiological systems. This course will be delivered through a combination of lectures, active learning assignments, readings from the scientific literature, and group discussions. By the end of this course, you will develop a new perspective on the ecological and evolutionary factors that shape physiological similarities and differences among the animals of our planet (including humans). This course counts as a category elective for the Ecology and Biodiversity major and Physiology in Health and Disease major. Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 3254 Advanced Cardiovascular and Pulmonary Physiology (4 Credits)**

This course provides a deeper level of physiological knowledge of the cardiac, vascular, circulatory, and pulmonary systems and their functions. With both lecture materials as well as in-class discussion of concepts and research articles, we will go deep into the basic levels of composition and function and facilitate the understanding of mechanisms that limit disease populations, elderly, etc. How can we adapt our lifestyles to improve our cardiovascular health? Prerequisite: BIOL 2120 or BIOL 3242.

**BIOL 3256 Advanced Human Anatomy & Physiology (5 Credits)**

This one quarter course is intended for advanced biology and physiology majors with an interest in the anatomical structure and physiological functioning of body systems. This course builds upon the Human Anatomy and Human Physiology courses that are prerequisites. This advanced course will explore in greater depth understanding mechanisms of action of major body systems and elaborate on the relationship between structure and function. In addition to didactic content, students will complete evaluation of primary literature and design laboratory experiments to test hypotheses of interest. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, models, dissections, inquiry-based learning, experimentation and a variety of assessments. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. Please note that the lab portion of this course requires dissection. This course counts as a category elective for the Physiology in Health and Disease major. Prerequisites: BIOL 3241 and BIOL 3242.

**BIOL 3257 Clinical Exercise Physiology (5 Credits)**

This is an upper-level course in clinical physiology for those interested in understanding fundamental practices and assessments within clinical settings. We will work to combine knowledge from various backgrounds in physiology and tie theoretical and practical concepts together for assessing body function and developing methods for improving health and performance. We will relate daily experiences with class content to deepen our knowledge and retain this information for future reference. We will connect the physiological concepts related to the cardiovascular, respiratory, muscle systems as well as develop projects that require combining knowledge of the assessment skills and evaluation for clear communication and exercise prescription to special populations. Prerequisite BIOL2120 or BIOL 3242.

**BIOL 3258 Research Techniques in Exercise Physiology (4 Credits)**

This upper-level course is designed to give you exposure to several methods of research within the area of exercise physiology. This is a hands-on course that combines theory and literature with practical research experiences in physiology. For those interested in understanding more about research, this is the course for you as we will perform data collection and analysis of differing topics. These may include the following topics: pulse and tissue oxygenation, signaling (heart rate variability, oxygen kinetics), respiratory loops, Doppler ultrasound (blood flow and tissue structure), etc. Our aims will focus on understanding how and why the method works, how to collect data, as well as the analysis and reporting of variables for proper interpretation.

**BIOL 3259 Electrocardiogram Interpretation (2 Credits)**

This course is an advanced course in cardiac physiology for those interested in understanding principles associated with cardiac function, electrical physiology of the heart, and interpretation of the electrocardiogram. This is applicable for several pre-med career paths especially within clinical settings. As the functions related to our heart drive our cardiovascular system, we will find ways to relate our experiences of daily life to the concepts and principles learned throughout this course to deepen our knowledge and retain this information. We will explore the physiological mechanisms related to the cardiac system as well as develop projects that require combining knowledge of the electrical pathways and of use of electrocardiography for proper interpretation. Prerequisite: BIOL 2120, BIOL 3241, BIOL 3242, or equivalent.

**BIOL 3260 Nutritional Physiology (4 Credits)**

This course is designed to introduce the fundamental concepts, content and scientific bases of nutritional physiology at the levels. This course will examine the scientific structure and properties of carbohydrates, proteins and lipids as the major macronutrients required for human health. In addition, it includes exploration of the digestion, absorption and metabolism of both macronutrients and micronutrients. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, inquiry-based learning, experimentation and a variety of assessments. Prerequisite: BIOL 2120.

**BIOL 3261 Exercise Testing and Prescription (4 Credits)**

The purpose of this upper-level course is to develop knowledge combined with hands-on skills for integration of exercise testing and prescription concepts. Material in this course will be applicable for performance as well as clinical considerations. This is an active course which will require your participation as both the subject and technician, giving perspective and understanding of methods and protocols along with their justification for various purposes. Recommended prerequisite course: Clinical Exercise Physiology.

**BIOL 3280 Intro to Pathophysiology (4 Credits)**

This course is designed as an introduction of the mechanisms and consequences of disease based on physiological dysfunction in the major organ systems. The course will focus on the fundamental concepts and processes of human pathophysiology through exploration of the unique physiological roles of several body systems, how these systems have important integrative relationships that underlie the overall physiological functioning of healthy humans, and how system function is altered in disease and the clinical manifestations of these changes. This course counts as a category elective for the Physiology in Health and Disease major. Prerequisite: BIOL 2120. A course in human physiology is recommended.

**BIOL 3350 Conservation Biology (5 Credits)**

Conservation Biology is the study of documenting the earth's biodiversity, its threats, and how it may be protected. It is a multidisciplinary science within ecology with contributions from environmental chemistry, geography, sociology, and political science, among other fields. In this class students learn the language of conservation biology, the methods used by conservation biologists, and the nuances of current issues. In class, material is learned through both lecture and interactive exercises in the classroom portion, with hands-on practice in techniques and applications during the lab. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 2010.

**BIOL 3410 Animal Behavior (4 Credits)**

This class examines animal behavior from an evolutionary and ecological perspective. The course provides the background needed to understand behavioral evolution, including a focus on the inheritance of behavior, natural selection, sexual selection, and kin selection. This class studies the evolution of a variety of behaviors, including communication and displays, mate choice, parental care, cooperation, mating systems, social behavior, habitat selection, foraging, and anti-predator behavior. The emphasis is on theoretical principles, design of experiments, and interpretation of data. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisites: BIOL 1010 and BIOL 1011, and BIOL 2010. Recommended Prerequisite: BIOL 2090.

**BIOL 3560 Molecular Biology Laboratory (4 Credits)**

Laboratory based course that covers techniques in gene excision, cloning and reinsertion and gene sequencing. Lab fee associated with this course. Prerequisite: BIOL 2510, or permission of instructor.

**BIOL 3570 Proteins in Biological Systems (4 Credits)**

Proteins considered in their biological setting; protein synthesis and degradation; survey of protein functions in vivo; introduction to protein biotechnology. This course counts as a category elective for the Molecular Biology major. Prerequisites: BIOL 2120.

**BIOL 3610 Developmental Biology (4 Credits)**

Processes and mechanisms of development, exemplified by higher animal embryogenesis, with consideration of microbial model systems. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2120 and 2510.

**BIOL 3615 Blood Vessel Development and Disease (4 Credits)**

This course details the underlying biological programs during blood vessel development and mechanisms that lead to vascular pathologies. The class will incorporate aspects embryology, signaling transduction, and genetics as well as current techniques in developmental biology to comprehensively cover how blood vessels are formed embryonically. Additionally, we will discuss in detail how defects in blood vessel-related signaling programs later manifest into disease. Prerequisite for this course is Cell Structure and Function (BIOL2120/2121).

**BIOL 3630 Cell Biology of Development (4 Credits)**

Every organism has a stereotypical shape, but how does this shape arise? This course examines the cellular and molecular mechanisms that direct the forming of body and tissue shape. This course counts a category elective for the Molecular Biology major. Prerequisite: BIOL 2120.

**BIOL 3640 Introductory Neurobiology (4 Credits)**

Organization and function of vertebrate central nervous system; nature of action potential, biochemistry of neurotransmitters, neuropeptides, functional anatomy of nervous system, phylogeny of nervous system. This course counts as a category elective for the Molecular Biology major and Cognitive Neuroscience concentration. Prerequisite: BIOL 2120.

**BIOL 3641 Systems Neuroscience (4 Credits)**

Structure and function of the brain and spinal cord, emphasis on functional systems including sensory perception, motor control and consciousness. This course counts as a category elective for the Cognitive Neuroscience concentration. Prerequisite: BIOL 3640.

**BIOL 3642 Neuropharmacology (4 Credits)**

How psychoactive drugs exert their effects on the nervous system; drugs of abuse and drugs used in the treatment of psychotic and neurodegenerative disorders. This course counts as a category elective for the Molecular Biology major and Cognitive Neuroscience concentration. Prerequisite: BIOL 2120. Recommended prerequisites: BIOL 3640.

**BIOL 3644 Neuromuscular Pathophysiology (4 Credits)**

Cellular and molecular basis for normal nerve and muscle functions and the alteration of these functions by toxins, trauma and diseases of the brain, nerves and muscles; how specific insults produce clinical symptoms and pathology. Prerequisite: BIOL 2120.

**BIOL 3646 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is the capstone course for the neuroscience portion of the cognitive neuroscience program. Seminar topics include but are not limited to neurological disorders, model systems in neuroscience and sensory systems.

**BIOL 3647 Neuroscience of Movement (4 Credits)**

Producing the vast array of movements that humans (and many animals) use everyday represents one of the body's greatest challenges and greatest successes. These various movements require that the nervous, muscular, and skeletal systems work in concert to achieve a common goal. This course will explore the scientific basis of movement production, with particular emphasis on the neuroscience of motor control. We will explore how the nervous system drives the development of movement strategies at an early age, modifies movement strategies to adapt to changing demands throughout life, and how injury, dysfunction, and/or aging can lead to movement challenges. This course counts as a category elective for the Physiology in Health and Disease major and Cognitive Neuroscience concentration. Required prerequisite: Cell Structure & Function (BIOL 2120); Recommended prerequisite (1 or more of the following): Introduction to Neuroscience (BIOL 3640) or permission of instructor.

**BIOL 3648 Molecular Mechanisms of Neurological Disease (4 Credits)**

This course will be an in-depth study into some of the key molecular mechanisms involved in the pathogenesis of human neurological disease. A particular emphasis will be placed on the role of RNA regulation and metabolism. The primary focus will be on five devastating diseases: 1. Spinal Muscular Atrophy (SMA) 2. Fragile X Syndrome (FXS) and Fragile X Tremor Ataxia Syndrome (FXTAS) 3. Myotonic Dystrophy type 1 and 2 (DM1 and DM2) 4. Spinocerebellar Ataxia type 2 (SCA2) 5. Amyotrophic Lateral Sclerosis (ALS) and Frontotemporal Dementia (FTD) This course will cover a variety of topics including disease pathophysiology and pathogenesis. However, readings will be assigned from the recent primary literature discussing cellular and molecular mechanisms. This course counts as a category elective for the Molecular Biology major and Cognitive Neuroscience concentration. Prerequisite: BIOL 2510 Genetics.

**BIOL 3649 Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics (4 Credits)**

Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics covers the following disorders: Alzheimer's disease, Parkinson's disease, amyotrophic lateral sclerosis, Huntington's disease, spinocerebellar ataxia, Creutzfeldt-Jakob disease, multiple sclerosis, traumatic brain injury and spinal cord injury. Course literature includes primary journal articles and review papers describing the etiology and pathophysiological mechanisms of these disorders. Potential therapeutic approaches to treatment are also investigated. The course format typically includes a lecture reviewing the basic biology, symptoms, and current treatments for each disorder, followed by a thorough analysis of primary research papers focused on novel molecular mechanisms and new targets for therapeutic development. Grading is based on 3 exams throughout the academic quarter and participation in discussing journal articles in class. This course counts as a category elective for the Cognitive Neuroscience concentration. Prerequisite: BIOL 2120 Cell Structure and Function. Recommended: BIOL 3640 Introductory Neurobiology. For Graduate Students: an additional term paper is required with the exact topic to be agreed upon by the student and instructor.

**BIOL 3650 Endocrinology (4 Credits)**

Mechanisms of hormone action, evolution of vertebrate endocrine systems, analysis of function integration of hormonal responses in maintenance of homeostasis. This course counts as a category elective for the Molecular Biology major and Cognitive Neuroscience concentration. Prerequisite: BIOL 2120.

**BIOL 3651 Comparative Endocrinology (4 Credits)**

Intercellular communication systems are essential for the proper coordination of trillions of cells in multi-cellular animals. This course will evaluate the evolution of neuroendocrine networks in both invertebrates and vertebrates with a focus on how these neuroendocrine networks influence, growth, reproduction, osmoregulation, and metabolism. Prerequisite: BIOL 3650.

**BIOL 3656 Cellular Aspects of Diabetes and Obesity (4 Credits)**

This course focuses on specific cellular and molecular events key to the understanding of the pathological conditions of diabetes and obesity. Topics include the endocrine pancreas, adipose tissue and neuroendocrine control energy expenditure and feeding behavior. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2120.

**BIOL 3670 Molecular Immunology (4 Credits)**

The ability to distinguish self from non-self is crucial to all organisms. In humans Organs, cells and other higher animals, this task fall to the immune system. Suppression of this system is key to numerous pathogenic viruses including Ebola and human immunodeficiency virus. The failure to adequately regulate immune response underlies allergic reactions, arthritis and diabetes. This course will introduce students to the organs, cells and molecules that underlie mammalian immune response; immunogenetics and the fundamental mechanisms of cell mediated and humoral immune response; and the relationship of immune system to human disease. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2510.

**BIOL 3675 Virology (4 Credits)**

Viruses are the ultimate cell biologists. They usurp essential cellular components to create new virus progeny leading to pathological cellular physiology. This course will delve into the genetic and cellular principles that govern virus entry, replication, and assembly and cover a broad range of DNA and RNA-based virus families. This course counts as a category elective for the Molecular Biology major. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3690 Cellular Microbiology (4 Credits)**

The field of cellular microbiology broadly defines the interface between commensal or pathogenic microbes, prokaryotes or lower eukaryotes, and their host. The burgeoning field of cellular microbiology has seen an explosion of new knowledge related to the feedback regulation between commensal microbes and their hosts. Furthermore, our knowledge of virulence factors that promote host and pathogenic microbe niches has continued to expand. This topics course will build a medically relevant and coherent picture of the host-microbe interface on genetic, molecular, cellular, and organismal scales by surveying relevant literature that has uncovered interspecies communication and control pathways. This course counts as a category elective for the Molecular Biology major. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3700 Topics in Ecology (1-4 Credits)**

Topics vary; may include plant, animal, biochemical, alpine or aquatic; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: one quarter of undergraduate ecology and/or instructor's permission.

**BIOL 3701 Topics in Genetics (1-4 Credits)**

Topics vary; may include genetic methods, molecular genetics, human genetics, chromosomes or population genetics; one topic per quarter. May be repeated for credit. Taught from original literature. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2510 and/or instructor's permission.

**BIOL 3702 Advanced Topics in Regulatory Biology (1-4 Credits)**

Topics vary; may include endocrinology, physiology or immunology; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: varies with topic and instructor; instructor's permission usually required.

**BIOL 3703 Advanced Topics in Developmental Biology (1-4 Credits)**

Topics vary; may include gene expression in development, developmental immunogenetics, developmental biochemistry or aging; one topic per quarter. May be repeated for credit. Taught from original literature. This course counts as a category elective for the Molecular Biology major. Prerequisite: instructor's permission.

**BIOL 3704 Advanced Topics in Cell Biology (1-4 Credits)**

Topics vary; may include supramolecular structure, microscopy, membranes and techniques. May be repeated for credit. Taught from original literature. This course counts as a category elective for the Molecular Biology major. Prerequisites: BIOL 2120.

**BIOL 3705 Advanced Topics in Molecular Biology (1-4 Credits)**

Topics vary, but may include biochemistry, supramolecular structure and function, molecular genetics, membrane biology. May be taken more than once for credit. Taught from original literature. This course counts as a category elective for the Molecular Biology major. Prerequisite: varies with course and instructor; instructor's permission usually required.

**BIOL 3706 Topics in Evolution (1-4 Credits)**

Topics vary, but may include molecular evolution, plant evolution and animal evolution. Prerequisite: BIOL 2120 and BIOL 2510.

**BIOL 3707 Advanced Topics in Conservation Biology (1-4 Credits)****BIOL 3708 Topics in Integrative Physiology (2-4 Credits)**

Topics for this course include, but are not limited to, human physiology and disease, integrative physiology, environmental or social impacts on human physiology and health, and comparative physiology. Students will gain knowledge of a specific topic in physiology and/or pathophysiology through discussion of current literature and research. May be repeated for credit. Prerequisite: BIOL 2120.

**BIOL 3800 Human Molecular Biology (4 Credits)**

Medical Genetics is the 24th member of the American Board of Medical Specialties. This course will introduce students to the fundamentals of molecular biology with an emphasis on understanding of how the field is applied in the context of medical diagnostics, personalized/precision medicine and other commercial applications. Students will be introduced to published research reports and provided with opportunities to critically examine the application of molecular biology to central questions in such areas as oncology, inherited diseases and genetically engineered organisms. Prerequisite: BIOL 2510.

**BIOL 3850 Genetic Engineering (4 Credits)**

This course will cover principles in gene manipulation and its application in research, medicine and industry. More specifically, this course will explain emerging technologies in genetic engineering and its practical and ethical implications. Topics will incorporate historical and emerging aspects of developmental biology, chemistry, and genetics as well as current techniques in genetic manipulation that are related to genomic editing. Additionally, students will be trained to interface with genomic databases and employ DNA sequence editing software to manipulate DNA sequences to achieve novel cloned products. This course counts as a category elective for the Molecular Biology major. Prerequisite for this course is Genetics BIOL 2510.

**BIOL 3855 Genetic Model Organisms in Health & Disease (4 Credits)**

This course is focused on how basic science studies using genetic model organisms have had a major impact on human health and disease in addition to helping us understand fundamental aspects of biology. We will cover clinically relevant recent advances from bacterial studies (i.e. CRISPR/Cas9-mediated genome editing) to how studies in fruit flies revealed insights into immune disease. Students will gain a better appreciation for why researchers using model organisms were awarded Nobel prizes as well as why major medical funding organizations like the National Institutes of Health, American Cancer Society, and American Heart Association support research using non-human systems. This course will prepare students to understand health-relevant research from varied model systems. Students will learn practical aspects for determining which model systems are best suited to answer which types of questions. They will also practice designing experiments and defending their importance in grant abstract-style essays. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3910 Viruses & Infectious Human Diseases (4 Credits)**

From sexually transmitted viruses to bacterial pneumonia, infectious pathogens are the number one threat to human health. This course will introduce students to prions, viruses and bacterial pathogens with an emphasis on those commonly encountered in clinical medical practice. Through the use of technical/scientific research journals students will be encouraged to investigate the etiology, pathogenesis and treatment of human infectious disease with an emphasis on the clinical, molecular diagnostic and therapeutic aspects of the disease. This course counts as a category elective for the Molecular Biology major. Prerequisite: BIOL 2510. Recommended prerequisite: BIOL 3800.

**BIOL 3920 Forensic Pathology (2-4 Credits)**

In its broadest definition, forensic science represents a fusion of the natural sciences, criminology and jurisprudence. The field of forensic pathology in particular focuses on the investigation of sudden, unnatural, unexplained or violent deaths. Using the most authoritative books available and a multimedia lecture format, students in this course gain an introductory understanding of the pathophysiology of wounding and death as well as the clinical antemortem symptomology of physical abuse, neglect and extrajudicial wounding. Students also learn about the processes responsible for the decomposition of corpses as well as the use of molecular and geometric tools for the reconstruction of crime scenes from bloodstain evidence. Finally, students learn how to integrate a variety of forensic tools in investigations of sexual assault, serial killers, traffic fatalities and mass deaths. Prerequisite: BIOL 2120 or permission of instructor.

**BIOL 3950 Undergraduate Research (1-10 Credits)**

Participation in faculty research programs by agreement between student and faculty member. Maximum of 5 quarter hours of BIOL 3950 and/or BIOL 3991 may be applied to the 45-quarter-hour requirement for a major in biological sciences.

**BIOL 3988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3991 Independent Study (1-10 Credits)**

Topic in biology studied under faculty supervision. Student's responsibility to identify faculty supervisor before registering for class. Maximum of 5 quarter hours of BIOL 3991 and/or BIOL 3950 may be applied toward the 45-quarter-hour requirement for a major in biological sciences.

**BIOL 3995 Independent Research (1-10 Credits)**

## Black Studies (BLST)

**BLST 2150 Introduction to Black Studies (4 Credits)**

Black Studies began in 1968 as a discipline dedicated to understanding and improving the lived experience of Africans and African Americans. It started with the intention of providing a safe space for Black students to exercise their intellectual creativity, while engaging in accurate portrayals of the Black experience. Introduction to Black Studies is designed for all students as a cornerstone for the Black Studies minor. This course introduces students to the breadth and depth of Black Studies as a discipline, using primary and secondary sources. Introduction to Black Studies uses historical, interdisciplinary, intersectional, and transnational grounding in the study of Black people. Focused primarily on the U.S., this course examines current theories, methods, and goals in Black Studies while allowing students to delve into some of Black Studies' most current and exciting scholarship. In this course, students will think about what freedom and democracy have meant to African American people in the United States, and the ways that they have creatively expressed these meanings over time. This interdisciplinary introduction to Black Studies combines the teaching of foundational texts in the field while reinforcing skills in reading and writing learned throughout the quarter. The course will also meet the requirements for AI/SC. This course will also be cross listed with departmental courses from the multiple programs with courses that align with the Black Studies minor (i.e. ENGL 2xxx, HIST 2xxx, and RLGS 2xxx).

## Business Core (BUS)

**BUS 1099 Daniels Professional Development Program Part I (0 Credits)**

Some experiences are essential to a student's development, but don't fit well within the confines of a traditional course. This is a face-to-face zero-credit course intended to provide students with a framework to master professional development through experiential-based learning opportunities that will give them the necessary tools to identify a career path prior to graduation and succeed in their career development. Key topics include resume and cover letter development, understanding the business majors and associated career paths, and professional skill development such as appropriate business dress, communication, and etiquette.

**BUS 1440 The Fourth Industrial Revolution (4 Credits)**

This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

**BUS 2099 Daniels Professional Development Program Part II (0 Credits)**

This course is the second part of the Daniels Professional Development Program (DPDP). Similar to DPDP I, this course will expose students experiential-based learning opportunities that will provide the necessary tools and skills to successfully land an internship and full-time position prior to graduation. This will include attending a career fair, completing a mock interview and receiving real-time feedback, creating a professional LinkedIn profile, and attendance to career services workshops focused on professional development. Prerequisite: BUS 1099.

**BUS 3000 Strategic Business Communications (4 Credits)**

Leading CEOs know what multiple studies confirm: competence in communication is an essential skill for entry-level positions in business, and excellence in communication is necessary to become an industry leader. This course is designed to allow extensive time to practice and receive expert coaching. Since communication skills develop over time, you will build proficiency through multiple oral and written assignments that increase in rigor and complexity. The assignments will give you the individual and team skills you will need to be successful in both your academic and professional career. The quarter culminates in a client project addressing real campus or community issues. Prerequisites: BUS 1099 (with Passing - "P" grade) and admission to Daniels.

**BUS 3099 Daniels Professional Development Program Part 3 (0 Credits)**

Some skills and certifications are essential to student success in landing an internship and full-time job at graduation but do not fit well within the confines of a traditional course. This zero-credit course will provide students with a platform to master skills to prepare them for a career in the Fourth Industrial Revolution. Relevant skills and certifications will vary based on a student's major and career interests. Common examples include Google Analytics, the Advanced Excel Certification, Python, Salesforce, and Robotic Process Automation.

**BUS 3441 The IoT Build (2 Credits)**

The Internet of Things (IoT) is moving rapidly toward "The Internet of All Things." From water bottles to clothing to furniture, everything in our everyday world will be connected to the Internet, sharing information about our lives. In this course, you'll get hands-on experience building IoT applications. You'll learn how to gather data from sensors such as weight, occupancy, sound, proximity, pressure, gas, and infrared. By 2030, there will be 500 billion devices connected to the Internet. This class will show you how.

**BUS 3442 Python Programming (4 Credits)**

Python is a general-purpose, high-level programming language suitable to a wide variety of tasks in today's interconnected and technology-based world. Python is also an object-oriented language, a necessity for real-time, dynamic, and web-based applications. In this course, you'll learn how to apply Python to basic programming elements such as data types, arithmetic operations, control structures, methods/functions, arrays, and file handling.

**BUS 3446 Blockchain and Cryptocurrency (2 Credits)**

Bitcoin was created in 2009 and eight years later it reached a record high of \$20,000 per coin. Bitcoin is a virtual currency, or more commonly known as a cryptocurrency, that is managed by a decentralized network of users instead of a government or central bank. Anonymity, low transaction fees, built-in scarcity, and borderless transactions are some of the benefits that Bitcoin provides. This course will provide a high-level overview of blockchain and cryptocurrency, starting from the beginning with the basic fundamentals of blockchain technology. You will gain a comprehensive understanding of blockchain, what it is, and how it is used in cryptocurrency and the opportunities available with decentralized applications. We will explore the concept of money as a medium of exchange for goods and services and how cryptocurrencies such as Bitcoin aim to replace traditional Fiat currencies.

**BUS 3450 Blockchain, Cryptocurrency & FinTech: What You Need To Know (4 Credits)**

Bitcoin made blockchain technology famous, it highlighted a transformative technology that facilitates the transfer of value between two entities without a trusted 3rd party. Blockchain technology has the potential to disrupt industries, financial systems and social norms. This course will study the fundamentals of Blockchain, cryptocurrency and financial technology (FinTech). We will begin with a high-level overview on the origin and concept of money and how it is valued. It will progress through an in-depth dive into the business of Blockchain, Bitcoin, Smart-Contracts and Financial Technology. This course will expose students to the opportunities, risks and challenges an immutable, decentralized system based on consensus presents. We will explore the consequence and application of blockchain technology in decentralized applications, DAOs, non-fungible tokens (NFTs), and the Metaverse. No prior knowledge of Blockchain, Cryptocurrency, and FinTech is required to take this course.

**BUS 3700 Topics in Business (0-10 Credits)****BUS 3800 Business for the Public Good (4 Credits)**

The vision of Business for the Public Good is to provide an impactful culminating experience in the Daniels Core in which students think critically and creatively to address a societal issue through the lens of business. In this capstone to the business core, students will identify a real-world problem and use business tools and knowledge to address the issue. Topics include stakeholder management, corporate social responsibility, models of business, globalization, the natural environment, technology, public policy, innovative design thinking, among others. This course is designed to explore the place of business in the context of society. The course will familiarize students with the relationships among the private, public and nonprofit sectors. The course will challenge students by engaging them in projects focused on pioneering business to achieve public good and public benefit. Enforced Prerequisite: MGMT 3000 (minimum grade of C-).

**BUS 3980 Internship (0-4 Credits)**

Initial for-credit internship experience for students pursuing a business major, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

## **Business Ethics and Legal Studies (LGST)**

**LGST 2000 Foundations of Business Law (4 Credits)**

Managerial perspective on the role of law and its relationship to business environment; emphasis on American legal system (history of law, courts and civil procedure), private law (business torts, contracts, corporate responsibilities and business ethics), and governmental intervention (constitutional law, employment law, white collar criminal law and corporate/securities law). Prerequisites: Grade of C- in BUS 1440 and sophomore standing.

**LGST 2560 The Constitution & Business (4 Credits)**

Current real world issues are analyzed in the exploration of constitutional law as it relates to business and free enterprise. Prerequisites: LGST 2000.

**LGST 2570 Contracts for Business (4 Credits)**

This course includes a comprehensive discussion of major contractual topics—including drafting and negotiation - and how they relate to legal and ethical elements of business. Prerequisites: LGST 2000.

**LGST 2910 Daniels Ethics Fellows I: Community Impact (2 Credits)**

This course comprises the first half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact their community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent community leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and community leaders, and (5) engage in a series of online quizzes designed to evaluate ethical reasoning and growth.

**LGST 2920 Daniels Ethics Fellows II: Business Impact (2 Credits)**

This course comprises the final half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact the business community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent business leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and business leaders, and (5) engage in a serious writing assignment designed to evaluate ethical reasoning and growth. Prerequisite: LGST 2910.

**LGST 2960 Employment Law & Ethics (4 Credits)**

Designed to offer insight into important employment law issues including employment-at-will, employees privacy rights, employment discrimination and labor law. Prerequisites: LGST 2000.

**LGST 3030 The Supreme Court & Your Life (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3100 Business Ethics & Social Responsibility (4 Credits)**

The purpose of this course is to introduce students to ethical concepts, theories and issues as they relate to business and managerial decision making. A primary focus includes topics such as employee privacy, sales responsibility, sexual harassment, discrimination, intellectual property, whistle blowing, and career/family conflicts. The course is also designed to introduce students to more general approaches or ways of thinking about ethics, and students grapple with some of the basic and fundamental problems of ethics. Cross listed with MGMT 3100. Prerequisites: LGST 2000.

**LGST 3200 Ethics & Your World (2 Credits)**

This course evaluates the how ethical decision-making can benefit a person professionally, personally, and as part of a community operating under a social contract more generally. This holistic approach evaluates ethics from many different viewpoints such as: (1) a professional calling, (2) happiness versus joyfulness, (3) moral sacrifices, (4) money and ethics, (5) beauty and ethics, (6) popularity and esteem and ethics, (7) priorities, (8) daily motivation, (9) ethical decision-making frameworks, and (10) a consistent and moral worldview. The ethical decision-making frameworks include Utilitarianism, Deontology, Virtue Ethics, Ethical Egoism, Libertarianism, and the Real Rabbits approach.

**LGST 3400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and “white collar” crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our “Impact of Driverless Mobility” course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3510 CEOs and Corporate Governance (4 Credits)**

The course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Each student will complete four papers or projects during the quarter, which will focus on a single corporate case study. The course projects will be designed to address and research the major dimensions of the course. Guest speakers will include corporate CEOs, board members, corporate general counsel, regulators, and investors.

**LGST 3520 Legal and Ethical Issues in Purchasing a Home (4 Credits)**

In this course, we will be considering some of the legal and ethical considerations that purchasers, sellers and agents face when buying or selling a home. This course will take students through the process of purchasing a home, from the initial stage of working with a real estate broker (including brokerage agreements and agency law), to submitting an offer/negotiations, understanding the contract terms, contingencies and implications, loan/financing considerations, title review, appraisal, inspections, objections and negotiations, and the closing of the purchase/sale. Prerequisite: LGST 2000.

**LGST 3550 Topics in Business Law II (4 Credits)**

Law relating to general and limited partnerships, corporations, property, securities law, professional responsibilities and related studies. Accounting students only. Prerequisites: LGST 2000.

**LGST 3600 Business and Global Values (4 Credits)**

This course explores the current state of globalization and its impact on business. In the context of ethical and legal norms, the course will examine how formal governmental and intergovernmental organizations (IGOs), as well as non-governmental organizations (NGOs), pressure business and affect business strategy and decisions. The course will also examine how business can adapt to comparative values and cultures in the international system, as well as universal values, and analyze issues and cases from both idealist and realist perspectives. Students will apply analytical tools from ethics, law, and public policy in examining leading business cases on the following topics: global terrorism and political risk. Prerequisite: LGST 2000.

**LGST 3700 International Business Law (4 Credits)**

Introduction to public international law (rights and duties of states and intergovernmental organizations) and to private international law (rights and duties of individuals, businesses and nongovernmental organizations) in international affairs. Key issues include alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of business and legal issues. Prerequisites: LGST 2000.

**LGST 3701 Topics in Legal Studies (1-4 Credits)**

Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.

**LGST 3710 E-Commerce Law and Ethics (4 Credits)**

Over the past 20 years, changes in technology have been dramatic and far-reaching, and navigating the future will continually challenge the business professional. This course examines the legal and ethical dimensions of online privacy, security, marketing, contracts and intellectual property. Prerequisites: LGST 2000.

**LGST 3720 Negotiation & Conflict Resolution in Business (4 Credits)**

This course is a rigorous exploration of negotiating business deals. Students will learn to develop strategies in a variety of conflict situations. Students will work closely with the professor and each other in simulations to address negotiation challenges, engage in mediation and arbitration, and become effective masters at resolving conflict. Prerequisites: minimum grade C- in LGST 2000.

**LGST 3740 Daniels Fund Ethics Consortium Case Competition Seminar (2 Credits)**

The Daniels Fund Ethics Consortium Case Competition — a component of the Daniels Fund Ethics Initiative Collegiate Program — exposes students to a thought-provoking business ethics case on principle based crisis management in business. The competition builds on the principle-based ethical framework central to decision making in a complex business environment. Students in this class will learn how to work in teams in order to collaboratively analyze, present, and respond to various scenarios of businesses in crisis as well as respond to questions posed by a panel of judges. The course challenges students' ethical reasoning and provides a significant opportunity to increase awareness of the importance of principle-based ethics for business crisis management.

**LGST 3790 Entrepreneur & Family Business (4 Credits)**

This course covers (1) how an individual starts a business, (2) what you must know to get a new business off the ground and moving towards success, (3) the most current issues involving the creation of value, (4) strengthening and growing family businesses through the process of adopting best practices in governance, coupled with ethical conduct, value based leadership and legal compliance. Students are moved along tracks from which they can both observe and absorb a means to insure success and longevity in operating an individually owned or family owned business. Cross listed with LGST 4790. Prerequisites: LGST 2000.

**LGST 3980 Internship (1-5 Credits)****LGST 3991 Independent Study (1-8 Credits)**

Independent research/study; requires written report. Prerequisites: LGST 2000 and instructor's permission.

## Business Information and Analytics (INFO)

**INFO 1010 Analytics I: Data Management and Analysis (4 Credits)**

The amount of data businesses are able to maintain and process is growing exponentially, and the ability to manage that data successfully can give a business a tremendous competitive advantage. This course introduces the student to the business data landscape, as well as basic data management and analysis skills through spreadsheet and database applications. Student projects focus on data collection, data cleansing and mining, statistical and graphical analysis, basic modeling, and written presentation skills. Corequisite with INFO 1011.

**INFO 1011 Microsoft Excel Certification Lab (0 Credits)**

This course covers basic topics in Excel and is designed to prepare students for the Microsoft Office Specialist Excel exam (associate level) and to introduce students to the basic Excel features and functions that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Excel Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. No prerequisites or restrictions.

**INFO 1020 Analytics II: Business Statistics and Analysis (4 Credits)**

Businesses can never have perfect information; therefore, they must employ statistical techniques to improve the decision-making process. This course introduces students to the basic tenets of probability and statistics, with an emphasis on business applications. Statistical models as decision-support tools are taught. Student projects focus on data collection, data analysis, decision analysis, and written presentation skills. Prerequisites: INFO 1010, and (MATH 1200 or MATH 1951). Corequisite: INFO 1021.

**INFO 1021 Microsoft PowerPoint and Word Certification Lab (0 Credits)**

This course covers basic topics in Word and PowerPoint and is designed to prepare students for the Microsoft Office Specialist Word and PowerPoint exams (associate level) and to introduce students to the basic Word and PowerPoint features that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Word Specialist Exam and Microsoft Office PowerPoint Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. Corequisite: INFO 1020. No prerequisites or restrictions.

**INFO 1031 Advanced Excel Certification Lab (0 Credits)**

The course covers advanced topics in Excel. The course goes beyond just the topics on the Excel Expert Certification exam and looks at functions and features that students are likely to use in work situation. The course uses projects to represent real-world scenarios.

**INFO 2020 Analytics III: Business Modeling and Analysis (4 Credits)**

Businesses make decisions and improve processes using a variety of modeling and analytic techniques. This course introduces the student to the techniques of multiple regression analysis, time series analysis, spreadsheet modeling, and simulation for solving a variety of business problems. Applications include economic forecasting, supply chain management, and project management. Student projects focus on using spreadsheet modeling for problem solving, and emphasize written and oral presentation techniques. Prerequisites: INFO 1020 and all MOS certifications.

**INFO 3100 Automating Business Processes (4 Credits)**

This course focuses on using Microsoft Excel and Python to support decision making for managers. This course will cover advanced Excel functions and menu options along with basic spreadsheet modeling design and good practices. It will also cover automating tasks in Excel using VBA. We will then transition into using Python to create programs outside of the Microsoft Office environment. In both platforms the focus is on basic programming logic, reading and writing data, creating data summaries and pivot tables and basic statistical tests and summaries. Prerequisite: INFO 2020.

**INFO 3110 Applied Nonparametric Statistics (4 Credits)**

This course develops a more advanced understanding of the fundamental concepts of probability and statistics, and how they relate to managerial type problems and decision making. You will develop experience performing and interpreting standard and particularly nonparametric data analysis methodologies, such as the sign test, the signed rank test, the rank sum test, and nonparametric correlations. You will obtain familiarity with a statistical software package. Prerequisite: INFO 2020 (minimum grade of C-).

**INFO 3140 Foundations of Information Management (4 Credits)**

This course introduces students to the foundations of information management (e.g. database management). Specifically, this course will focus on database theory, appropriate database design, modeling tools, and the practical issues of database implementation and management. Designing and developing databases is an iterative process, and the class approach will be practical and hands-on. Prerequisite: INFO 2020.

**INFO 3200 Data Mining and Visualization (4 Credits)**

This course explores the concepts of storytelling with data, prediction modeling, and presenting statistical results. It covers the concepts of visualization terminology along with all the steps of the modeling process: define goal, get data, explore & visualize data, pre-process data, partition the data series, apply modeling technique(s), evaluation and compare performance, implement the model, and communicate the results. The modeling techniques covered include Time Series Forecasting, Clustering, Principal Components Analysis, Decision Trees, Naïve Bayes, K-Nearest Neighbor, Multiple and Logistic Regression, and Machine Learning Approaches. This course also covers the interpretation of real-time business data in terms of dashboards and scorecards. Prerequisite: INFO 2020.

**INFO 3240 Enterprise Information Management (4 Credits)**

This is the second in a series of two courses designed to introduce students to information management. This course focuses on procedural programming using T-SQL, an introduction to an enterprise information management system using Microsoft SQL Server and an introduction to an integrated development environment using Microsoft Visual Studio. Prerequisite: INFO 3100 and INFO 3140.

**INFO 3300 Data Warehousing and Business Intelligence (4 Credits)**

This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisite: INFO 3240.

**INFO 3320 Sports Analytics (4 Credits)**

This course serves as an introduction to sports analytics. Analytical topics will include, but are not limited to, regression (or predictive) modeling, optimization, ranking methodologies, web scraping, among others. Sports topics will include topics from most professional sports, gambling (daily fantasy sports), and business operations. In addition, the students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools.

**INFO 3340 Project Management and Simulation (4 Credits)**

"Cheaper, better, faster" is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one-time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Monte Carlo simulation modeling is also covered to explore the benefits and limitations of simulation as a tool for solving business problems, and to present students with the opportunity to build, analyze, and report on Monte Carlo simulations. Prerequisite: INFO 2020.

**INFO 3350 Statistical Computing (4 Credits)**

This course will provide the student with a base of skills necessary to program in one or more common scripting software packages. No prior programming knowledge is required. After completion of the course, the student will be able to independently perform most basic statistical procedures using either software package. The student will also have the tools necessary to learn advanced topics from the software package documentation by themselves. Prerequisite: INFO 2020.

**INFO 3400 Complex Data Analytics (4 Credits)**

This course explores the concepts of the considerations and management of big data projects. It also explores technical aspects of performing text analytics and natural language processing, social network analysis, and social media analysis. We focus on social data for many of the examples and also explore how disparate data sources can be combined to provide insight for business decisions. Prerequisite: INFO 3200.

**INFO 3440 Optimization Modeling (4 Credits)**

This course introduces concepts and techniques for the modeling and solution of business decision problems. It gives broad coverage to the formulation of optimization models and the use of commercially available software tools for solving them. These models include topics such as linear programming, integer programming, the transportation and assignment problems, network optimization models and non-linear programming. Emphasis is placed on the process of analyzing business scenarios, formulating models in spreadsheet and open-source software, interpreting model output, and presenting written project reports. Prerequisite: INFO 2020.

**INFO 3477 Database-Driven Websites (4 Credits)**

This course provides a comprehensive overview of website development. Students explore the prevailing vocabulary, tools, and standards used in the field and learn how the various facets including HTML5, CSS, JavaScript, VBScript, ASP, PHP, HTTP, clients, servers, and databases function together in today's web environment. In addition, software and services that are easily incorporated into a website (e.g. maps, checkout, blogs, content management) are surveyed and discussed. Students produce an interactive website on the topic of their choice for the final project and leave the course prepared to develop real world database driven websites. Prerequisite: INFO 3140.

**INFO 3500 Capstone/Senior Project (4 Credits)**

This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from problem definition, data collection, and model construction, through analysis and presentation of results to recommendations for specific business decisions. Prerequisites: All other Business Analytics major courses.

**INFO 3700 Topics in Business Analytics (1-4 Credits)**

Exploration of various topics and issues related to timely analytics applications. Prerequisite: INFO 2020.

**INFO 3980 Internship (0-10 Credits)**

Internship; requires written report.

**INFO 3991 Independent Study (0-4 Credits)**

Independent research/study; requires written report.

## Chemistry (CHEM)

**CHEM 1001 Science of Contemporary Issues I (4 Credits)**

CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 1002 Science of Contemporary Issues II (4 Credits)**

CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

**CHEM 1003 Science of Contemporary Issues III (4 Credits)**

CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

**CHEM 1010 General Chemistry I (3 Credits)**

The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

**CHEM 1020 General Chemistry II (3 Credits)**

The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

**CHEM 1240 General Chemistry I Laboratory (1 Credit)**

Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

**CHEM 1250 General Chemistry II Laboratory (1 Credit)**

Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

**CHEM 2131 Chemistry of the Elements (3 Credits)**

Descriptive chemistry of main group and transition elements including redox and coordination chemistry. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

**CHEM 2141 Chemistry of the Elements Lab (1 Credit)**

Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course.

**CHEM 2240 Introduction to Environmental Chemistry (4 Credits)**

An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

**CHEM 2270 Quantitative Chemical Analysis (4 Credits)**

This combined lecture-laboratory course is primarily focused on understanding and applying the principles and techniques associated with making quantitative chemical measurements. Topics covered include statistics, applications of acid-base, complexation, precipitation, and redox titrations in chemical measurements, activity, electroanalytical techniques, and gravimetric analysis. Lab Fee associate with this course. Prerequisites: CHEM 2131 and CHEM 2141.

**CHEM 2451 Organic Chemistry I (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisites: CHEM 2131 and CHEM 2141.

**CHEM 2452 Organic Chemistry II (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451 and CHEM 2461.

**CHEM 2453 Organic Chemistry III (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451, CHEM 2452, CHEM 2461, and CHEM 2462.

**CHEM 2461 Organic Chemistry Lab I (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2451.

**CHEM 2462 Organic Chemistry Lab II (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2452.

**CHEM 2463 Organic Chemistry Lab III (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2453.

**CHEM 3110 Chemical Systems I (3 Credits)**

Advanced discussion of modern concepts of organic chemistry; bonding, stereochemistry, reaction mechanisms. Prerequisites: CHEM 2453 and equivalent of one year of physical chemistry.

**CHEM 3120 Chemical Systems II (3 Credits)**

Interpretation of trends in the chemistry of the elements in terms of orbital interactions. Most examples will be taken from the third row transition metals and the boron and carbon groups. Prerequisites: CHEM 2131, CHEM 3310 and CHEM 3110.

**CHEM 3130 Chemical Systems III (3 Credits)**

Advanced-level physical biochemistry course intended for advanced-level undergraduates and graduate students. Focuses on kinetic, thermodynamic and dynamic aspects of biopolymers; delineates the relationship of these properties to the mechanism and function of biological macromolecules. Prerequisites: CHEM 3811, CHEM 3812, CHEM 3813, CHEM 3610 or the equivalent.

**CHEM 3210 Instrumental Analysis (4 Credits)**

Course focus is toward students' understanding of instrumental components and the theory behind both component's and instrument's operation. Emphasis is on techniques such as spectroscopy and chromatography. Students will experience extensive hands-on use of a number of instruments. Course provides a strong background for Chemistry Frontiers (CHEM 3500) and emphasizes techniques and skills sought by chemical and biotechnology industries. Lab fee associated with this course. Prerequisites: CHEM 2011 or CHEM 2270.

**CHEM 3220 Advanced Analytical Chemistry (3 Credits)**

Principles of chemical instrumentation applied to analytical measurements; principles, instrumentation and applications of spectrometric and chromatographic measurements. Prerequisites: CHEM 3210 and CHEM 3621, or the equivalent.

**CHEM 3310 Structure and Energetics I (3 Credits)**

Fundamentals of quantum chemistry, and introduction to symmetry and molecular structure of small and large systems. Prerequisite: one year of physical chemistry.

**CHEM 3320 Structure and Energetics II (3 Credits)**

Computational methods in chemistry. Prerequisites: CHEM 3310, one year of physical chemistry.

**CHEM 3410 Atmospheric Chemistry (3 Credits)**

The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 and CHEM 2453) OR CHEM 2240.

**CHEM 3411 Aquatic Chemistry (3 Credits)**

The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 and CHEM 2453) or CHEM 2240.

**CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)**

A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: (CHEM 2270 or CHEM 2011) and CHEM 2453.

**CHEM 3500 Chemistry Frontiers (3 Credits)**

Advanced-level laboratory course required for all undergraduates majoring in chemistry or environmental chemistry. Emphasis on the development of oral, written, computer and presentation skills necessary for success as a scientist. Skills will be honed through state-of-the-art laboratory experiences from diverse areas of chemistry. Lab fee associated with this course. Prerequisites: CHEM 3210 and CHEM 3610.

**CHEM 3610 Physical Chemistry I (3 Credits)**

Fundamentals of thermodynamics, including phase and reaction equilibria, properties of solutions, and electrochemistry needed for advanced study in life sciences and for Physical Chemistry II and III. May be taken for graduate credit by nonchemistry majors. Prerequisites: CHEM 2453, calculus and physics.

**CHEM 3620 Physical Chemistry II (3 Credits)**

Fundamentals of quantum chemistry, including theories of atomic and molecular structure and spectroscopy. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3610.

**CHEM 3621 Physical Chemistry III (3 Credits)**

Fundamentals of kinetic theory and statistical mechanics. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3620.

**CHEM 3703 Topics in Organic Chemistry (3 Credits)**

May include organic photochemistry, organic synthesis, organic electrochemistry or natural products. May be repeated for credit. Prerequisites: CHEM 3110 or equivalent and others depending on topic.

**CHEM 3705 Topics in Biochemistry (3,4 Credits)**

May include physical techniques for exploring biological structure, biological catalysis, and selected fields within biochemistry taught from original literature. May be repeated for credit. Prerequisites: CHEM 3831 and 3813.

**CHEM 3811 Biochemistry-Proteins (3 Credits)**

Protein structure and function, starting with the building blocks and forces that drive the formation of protein structure and the basic concepts of protein structure, and continuing with enzyme catalysis, kinetics, and regulation. Prerequisites: CHEM 2453 or instructor permission.

**CHEM 3812 Biochemistry-Membranes/Metabolism (3 Credits)**

Membranes and membrane mediated cellular processes, energy and signal transduction, and metabolic/biosynthetic pathways. Prerequisite: CHEM 3811 or CHEM 3831.

**CHEM 3813 Biochemistry-Nucleic Acids (3 Credits)**

Molecular processes underlying heredity, gene expression and gene regulation in prokaryotes and eukaryotes. Prerequisites: CHEM 2453 and CHEM 3811.

**CHEM 3820 Biochemistry Lab (3 Credits)**

Purification and properties of biological molecules and structures. Lab fee associated with this course. Prerequisites: CHEM 3811 AND (CHEM 2011 OR CHEM 2270).

**CHEM 3831 Advanced Protein Biochemistry (3 Credits)**

This course provides fundamental insights into the chemistry and physics of proteins. It investigates how amino acids form proteins with highly complex three-dimensional structures and how these structures mediate function. We examine key research articles and their contribution to our current understanding of proteins. Topics range from protein folding to enzyme kinetics and emphasize basic principles. Prerequisites: CHEM 2453 and instructor permission.

**CHEM 3980 Internship-Undergraduate (0 Credits)**

Practical work experience.

**CHEM 3991 Independent Study (1-10 Credits)**

May be repeated for credit.

**CHEM 3995 Independent Research (1-10 Credits)**

Research project conducted under guidance of a faculty member. Credit hours and projects arranged on an individual basis. May be repeated for credit.

## Chinese (CHIN)

**CHIN 1001 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This course counts towards the Language requirement of the Common Curriculum.

**CHIN 1002 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the second course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Pre requisite: CHIN 1001 or equivalent, or permission of the instructor.

**CHIN 1003 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the third course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Prerequisite: CHIN 1002 or equivalent, or permission of the instructor.

**CHIN 1516 Contemporary China in Literature and Films (4 Credits)**

This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. Cross listed with ASIA 1516. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)**

Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecoliterature and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 2001 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 1003, equivalent, or permission of instructor.

**CHIN 2002 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2001, equivalent, or permission of instructor.

**CHIN 2003 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2002, equivalent, or permission of instructor.

**CHIN 2100 Advanced Intermediate Chinese (4 Credits)**

This single-quarter course is one of the transitional courses from intermediate Chinese to advanced Chinese. The course materials, while continuing from the CHIN 2001-2002-2003 sequence, give students more opportunities to synthesize vocabulary and grammatical patterns they have learned from previous courses. The introduction of major grammatical patterns is completed by the end of this course. Prerequisite: CHIN 2003, equivalent, or permission of instructor.

**CHIN 2301 Chinese Conversation and Composition I (4 Credits)**

This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2100, equivalent, or permission of instructor.

**CHIN 2302 Chinese Conversation and Composition II (4 Credits)**

This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2301, equivalent, or permission of instructor.

**CHIN 3300 Chinese Society in Transition (4 Credits)**

Through studying selected texts and focusing on topics about various aspects of Chinese society in transition, this class aims at strengthening and further developing students' overall skills, in particular, skills of reading comprehension, presenting information and one's opinions, and debating with other people. Prerequisite: CHIN 2003 plus study in China OR CHIN 2302; or permission of instructor.

**CHIN 3400 Chinese Cinema and Chinese Society (4 Credits)**

This advanced class is designed to strengthen and to develop further students' overall Chinese proficiency and in-depth understanding of the contemporary societies of greater China, including mainland China, Hong Kong and Taiwan, by means of studying the representative Chinese language films produced in these three areas. Prerequisite: CHIN 2302 or above, equivalent, or permission of instructor.

**CHIN 3650 Chinese-English Translation I (4 Credits)**

This seminar is designed for students with advanced-level proficiency in Chinese and English to learn basic translation theories and to develop fundamental skills in translating, from Chinese to English and vice versa, texts which primarily deal with general social needs and everyday communications. Prerequisite: CHIN 3300 or above, equivalent, or permission of instructor.

**CHIN 3991 Independent Study (1-5 Credits)**

## Clinical Psychology (CPSY)

**CPSY 2100 Understanding the Criminal Mind (4 Credits)**

This course explores the fascinating factors of the criminal mind. This course provides an in-depth analysis of: the different types of criminals and categories of violence; overview of the various theoretical approaches of the etiology of criminal minds; summarize the various types of criminal personalities; and provide information on the role of the criminal justice system. Prerequisite: PSYC 1001.

## Communication Arts (CA)

**CA 2050 Effective Communication (4 Credits)**

In this course, students develop communication competence while applying communication skills that are both effective and appropriate in diverse contexts. The focus of the course is on developing skills that lead to improved collaborations, organizations, and relationships as well as improved presentation of persuasive arguments using credible supporting evidence. By fostering understanding of communication competency, as well as how communication shapes identity, perception, and culture, the course strives to enable students to better navigate complex personal and professional worlds.

**CA 2100 Creativity and Innovation (4 Credits)**

Everyone has a creative core. It can become hidden or lost, but the ability to recognize one's creative source and tap into it provides an increased range of communication options. This course focuses on analyzing approaches to the creative process, as well as cultivating best creativity practices for use in professional and personal life. Students will learn about the significant creativity theories of prominent creativity scholars. Also, course participants will explore the association between adult playful personality and individual, as well as organizational creativity. The experiences and activities of this course build skills and confidence in using creativity and innovative thought in a variety of disciplines.

**CA 3050 Media and Society (4 Credits)**

This course provides a critical examination of media forms and their impact on society. The representation of culture through print media (books, magazines, newspapers, and online media) and through various visual media (film, television, Internet) is explored. Students learn how informational, entertainment, literary, and commercial messages are crafted and transmitted. The focus is on messages, the institutions behind the messages, and their impact on society.

**CA 3100 Cross-Cultural Communication (4 Credits)**

In an increasingly global society and a world of growing international interaction, communicating effectively with people of different cultural and ethnic backgrounds becomes a challenge but also an opportunity. The ability to accept and transcend differences has personal and professional transformative powers. This course explores a range of communication concepts and theories such as cultural competency, identity theory salience, and the nature of prejudice and its impact on communication. Students have the opportunity to develop and practice skills and abilities that enhance sincere, sensitive, and effective communication across differences.

**CA 3150 Effective Presentations (4 Credits)**

Researching and refining ideas and then representing them effectively are indispensable skills. This course focuses on crafting effective written and spoken presentations that employ appropriate organizational, visual, and physical elements. Students have opportunities to select visual elements such as images, graphs, and charts; to address physical considerations such as voice, gesture, and body language; and to relate text, movement, and visuals in effective professional presentations. Students learn to use PowerPoint and other graphic presentation software in crafting and supporting presentations.

**CA 3200 Art and Interpretation (4 Credits)**

Students will learn to describe, analyze, and interpret visual imagery with a specific focus placed on understanding and examining various forms of contemporary art and digital media. Students will cultivate expanded visual literacy skills for understanding and evaluating digital culture and become critical consumers of visual media. Students will leave this course with tools and concepts for art interpretation and its application that can be applied to new and emerging media, across fields, and in everyday life.

**CA 3250 Visual & Physical Communication (4 Credits)**

How does body language reveal or conceal true intent? Humans appear to be "hard-wired" to assess, examine, and respond to the physical language of others. Although this process is often automatic or unconscious, people can learn to identify visual signs and employ the elements of physical rhetoric (posture, stance, bearing, expression, and gait) in conscious ways to persuade others. This course will explore the body's physical response to certain triggers like anxiety, anger, and stress and how those triggers manifest outwardly. Students will examine strategies for reading physical signs in others and for managing their own physical and visual language. Students will learn techniques for performing nonverbal language, gaining tools for communicating leadership, power, acceptance, openness, and other nonverbal behaviors that impact communication in professional settings.

**CA 3300 Communication for Challenging Situations (4 Credits)**

This course moves beyond core communication mechanics to applying communication skills in interpersonal and professional settings that reflect a culturally complex and global world. Students will explore communication constructs relative to a variety of audiences and use this knowledge to achieve the desired communication outcomes. In addition, the ability to lead and participate effectively in individual and group conversations requires the knowledge and selection of communication processes including strategies and techniques such as conflict resolution, facilitation, dialogue, debate, and negotiations. Students will become better prepared to manage difficult conversations in multiple settings.

## Communication Studies (COMN)

**COMN 1001 Practicing Communication (4 Credits)**

Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1002 Theorizing Communication (4 Credits)**

Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars' attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students' understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1011 Comm through Literature (4 Credits)**

This course emphasizes the analysis and performance of diverse forms of literature. In addition to the dramaturgical elements of interpretation that are highlighted in this course, students learn how to contextualize serious public issues through literature while developing confidence and skills as performers and public speakers.

**COMN 1012 Speaking on Ideas that Matter (4 Credits)**

The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 1015 Voice and Gender (4 Credits)**

In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.

**COMN 1100 Communication in Personal Relationships (4 Credits)**

Relationships have a direct and lasting impact on us: they shape who we are, and the paths we take toward who we will become. The purpose of this course is to analyze and apply theories and research relevant to communication processes in a variety of personal relationships. Discussion of issues such as attachment, identity, hetero- and homosexual relationships, family communication, conflict, and intrapersonal discourses will provide students a foundation on which to build skills useful in a variety of personal relationships. In Communication in Personal Relationships, students will: sensitively express attitudes and discuss research about different issues pertinent to the study of personal relationships; develop the skills to critically analyze their own relationships and the relationships of others; reflect on and challenge their and others' ideas in a critically constructive manner so that we arrive at a new level of understanding together; and demonstrate the ability to apply communication and interpersonal theories and research outside of this classroom upon completion of the course.

**COMN 1200 Small Group Communication (4 Credits)**

This course approaches small group communication through a combination of theory and practice. Theories related to group development and leadership, collaborative communication, dialogue and rhetorical sensitivity, and principled negotiation and consensus, are explored through group discussions, research, case studies and presentations. Students have the opportunity to: strengthen their critical thinking and listening skills; confidently voice their identity within a greater community; increase their ability in writing and presenting their thoughts; and develop communication competence by facilitating civility within small group settings.

**COMN 1210 Foundations of Communication Studies (4 Credits)**

This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1550 Communication in the Workplace (4 Credits)**

This course offers a topics-based introduction to the study and practice of communication in a variety of organizational settings. The emphasis is on issues of power, politics, globalization, culture, diversity, relationships, and conflict. Students learn how to recognize, diagnose, and solve communication related problems in the workplace.

**COMN 1600 Communication and Popular Culture (4 Credits)**

This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or 'lenses' to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

**COMN 1700 Fundamentals of Intercultural Communication (4 Credits)**

This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

**COMN 1988 Study Abroad Resident Credit (0-18 Credits)****COMN 2000 Identities in Dialogue (4 Credits)**

This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others' experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

**COMN 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2030 Social Movement Rhetoric (4 Credits)**

This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 2100 Fundamentals of Communication Theory (4 Credits)**

Basic concepts, theories and models of the communication process. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2110 Quantitative Inquiry in Communication (4 Credits)**

This course is designed to introduce students to the process of reading, analyzing, conducting and critiquing quantitative research in communication studies. Research is a pervasive aspect of contemporary life, both inside and outside of the university. As such, many of the jobs taken by communication studies majors require, or are at the very least enhanced by, the ability to conduct and interpret research. This course introduces students to the various aspects associated with quantitative research methods in an effort to illuminate the significance of research about communication in our lives and help students act as critical consumers of the research encountered.

**COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2140 The Dark Side of Relationships (4 Credits)**

This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2150 Rhetorical/Critical Communication Inquiry (4 Credits)**

This course focuses on the process of interpreting, understanding, and evaluating everyday persuasive acts for the purpose of sharing insights and influencing the community audience. This course fosters a variety of analytical skills, including how to describe primary rhetorical acts (such as speeches, films, news coverage, television programs, songs, advertisements, and public commemorative art, among others) in rich, relevant detail; how to situate or make sense of rhetorical acts within their historical, cultural moments; and how to use theory to develop a critical perspective that helps to render a judgment about a text or act. Students sharpen critical instincts by working through the inventional process to produce a piece of rhetorical or cultural criticism.

**COMN 2200 Qualitative Inquiry in Communication (4 Credits)**

This course focuses on introducing students to a selection of qualitative methods used in communication research. The class covers the basic techniques for collecting, interpreting, and analyzing qualitative data. Throughout the term, the course operates on two interrelated dimensions: one focused on the theoretical approaches to various types of qualitative research, and the other focused on the practical techniques of data collection and analysis, such as interviewing and collecting field notes.

**COMN 2210 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

**COMN 2220 Race and Popular Culture (4 Credits)**

This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2270 Intro to Health Communication (4 Credits)**

This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2400 Landmarks in Rhetorical Theory (4 Credits)**

This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2450 Between Memory & Imagination (4 Credits)**

How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2470 Gender and Communication (4 Credits)**

Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

**COMN 2471 The Social Construction of Travel (4 Credits)**

Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2541 Advanced Debate and Forensic Activities (1-4 Credits)**

This course serves as a practicum for students interested in developing advanced argumentation skills. The focus is on preparing students for competition in intercollegiate debate. Students engage in in-depth research of debate topics, as well as participate in substantial practice of arguments and positions developed as necessary to prepare for intercollegiate competition.

**COMN 2600 Introduction to Political Communication (4 Credits)**

The purpose of this course is to introduce students to the subdiscipline of political communication with a focus on the United States. Through scholarship, case study development, discussion, and activities, this course surveys the major communicative actors in U.S. public and political life. Students will use theories from across political communication to understand the roles of elites, media organizations, and everyday individuals in political talk. Students should leave the course with the ability to identify and critically assess the political communication that permeates their lives.

**COMN 2700 Topics in Communication (1-4 Credits)****COMN 2701 Topics in Communication (1-4 Credits)****COMN 2702 Topics in Communication (1-4 Credits)****COMN 2703 Topics in Communication (1-4 Credits)****COMN 2704 Topics in Communication (1-4 Credits)****COMN 2705 Topics in Communication (1-4 Credits)****COMN 2988 Study Abroad Resident Credit (0-18 Credits)****COMN 3005 Diverse Family Communication (4 Credits)**

This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

**COMN 3010 Critical Sexuality Studies (4 Credits)**

This course takes a critical approach to the study of sexualities by asking us to challenge our assumptions and everyday knowledges about identities, gender, sexuality, race, class, and ethnicity. This course is organized thematically as we explore various topics within the larger study of critical sexuality studies and communication studies. We examine contemporary issues within queer theory, critical race studies, identity politics, feminism, performance studies, and popular culture.

**COMN 3015 Culture and Pedagogy (4 Credits)**

This seminar invites students to analyze and reflect upon the ways in which individuals and groups have created cultural ideals, images, and constructs of education. The course focuses upon pedagogy broadly conceived as an integral part of a diverse and conflictual society and on how pedagogies shape our understanding and reproduction of, as well as our resistance to, such a society. We explore a variety of conflicting views of what it means to be educated, for what purpose, for what kind of society, and towards what future.

**COMN 3020 Conflict Management (4 Credits)**

Substantive and relational types of conflict, various strategies for conflict resolution.

**COMN 3050 Feminism and Intersectionality (4 Credits)**

This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

**COMN 3130 Organizational Communication (4 Credits)**

This is an applied course, service learning course, based on a consulting model. While the course will extend and enrich the topical and theoretical knowledge developed in COMN 1550 and COMN 2130, the primary purpose of this course will be to help students explore how they can put such knowledge into practice by collectively working with a local non-profit organization to first diagnose and then propose (and, in some cases implement) solutions to an organizational communication problem faced by that organization.

**COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

**COMN 3230 Principles of Leadership (4 Credits)**

Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

**COMN 3270 Health Communication (4 Credits)**

This course examines the role of health communication in our everyday lives. We will focus on communication strategies that inform and influence individuals, families and communities in decisions that enhance health. We will also explore the dynamics and impact of health communication between individuals and the health care system such as doctor-patient communication, dissemination of health related information, and the role of mediated communication in examining health communication.

**COMN 3280 Family Communication (4 Credits)**

The purpose of this course is to enhance understanding about communication patterns within families. In this course, we will examine theory/research on the role of communication in creating and maintaining healthy marriages and families. Specifically, we will study communication and the family life cycle, different family forms, family race/ethnicity, power in families, conflict in families, communication and stress in families, and communication in the aging family. The course format includes lectures, discussions, analysis of case studies, and in class applications.

**COMN 3285 Advanced Relational Communication (4 Credits)**

Advanced Relational Communication is intended to increase understanding of relationships from diverse perspectives. The three main perspectives we will investigate show how relationships affect and are affected by their context, the individuals involved, and the relational system. The goals of this course are for students to increase their skill in (1) explaining how knowledge about context, individuals, and relational systems increases understanding of communication processes in a variety of relationships; (2) evaluating critically the information about relationships that we encounter in our everyday lives; (3) asking and investigating questions about real-life relationships.

**COMN 3290 Communication and Aging (4 Credits)**

In this course, we will focus on the communication processes associated with aging. We will explore the implications of aging and how aging affects the process and outcomes social and relational interactions. We will examine communication and aging through interactional processes (intrapersonal, interpersonal and relational) and through context (organization, family, health, and culture). Emphasis will be placed on the theoretical and applied research in communication and aging.

**COMN 3300 Principles of Persuasion (4 Credits)**

This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

**COMN 3310 Globalization, Culture, and Communication (4 Credits)**

Drawing from a critical multidisciplinary perspective, this course examines how culture and communication are impacted by globalization. The course explores issues of power and positionality, as well as economic, political, and cultural implications of globalization on people, products, and ideologies in both local and transnational contexts.

**COMN 3315 Public Deliberation (4 Credits)**

During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?.

**COMN 3425 Rhetoric and Governance (4 Credits)**

An introduction to the works of Michel Foucault and his influence on contemporary rhetorical theory. Permission of instructor is required.

**COMN 3431 Rhetoric and Communication Ethics Seminar: Communication and Climate Change (4 Credits)**

Since the release of Al Gore's "An Inconvenient Truth," American public discourse has become increasingly concerned with global warming. Not only is there nearly 100% consensus among climate scientists that human-induced climate change exists, but the severity of global warming is entering the popular imaginary, in the form of journalism, films, etc. But while scientists are committed to slowing global warming, the types of sweeping policy and behavioral changes needed to abate the projected climate catastrophe have been very slow in coming. As such, communication scholars—particularly those concerned with the art of public persuasion—are in a unique position to contribute to this significant and complex issue. In the words of climate scientists Susanne Moser and Lisa Dilling, "We need to open up the communication process to a wider community, in which participants own the process and content of communication." The goal of this course is to produce original scholarly research in response to Moser and Dilling's call, to invite more and better communication concerning climate change.

**COMN 3435 Rhetoric and Public Life (4 Credits)**

An introduction to the conceptual and political history of the public sphere. The course pays particular attention to how the normative assumptions of public communication are affected by the demands of cultural pluralism. Permission from instructor is required.

**COMN 3470 Seminar in Free Speech (4 Credits)**

This course will survey some of the major conceptual innovations in the justifications of freedom of speech. We will begin with an exploration of the traditional defenses of free speech and then move to a reexamination of those defenses in light of modern communication theory and the challenges of pluralism. In particular we will ask if the justifications of free speech need to be rethought given our understanding of speech as a social force that constitutes identities and values rather than merely expressing private opinions. Moreover, given our understanding of the social force of speech, should we regulate speech that is racist, sexist and seems to erode the foundations of a public culture based on mutual respect and public deliberation over social goods? Can we devise a robust defense of free speech based on its social force that both protects those that may be harmed by antidemocratic discourses and still provides the resources for democratic dissent?.

**COMN 3680 Gender and Communication (4 Credits)**

This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

**COMN 3700 Topics in Communication (1-4 Credits)****COMN 3701 Topics in Communication (1-4 Credits)****COMN 3702 Topics in Communication (1-4 Credits)****COMN 3703 Topics in Communication (1-4 Credits)****COMN 3704 Topics in Communication (1-4 Credits)****COMN 3705 Topics in Communication (1-4 Credits)****COMN 3770 Mediated Communication and Relationships (4 Credits)**

This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

**COMN 3800 Philosophies of Dialogue (4 Credits)**

This course explores the philosophies of dialogue of Martin Buber, Mikhail Bakhtin and others in the context of contemporary communication scholarship on ethics, culture, and relationship. Prerequisite: permission of instructor.

**COMN 3850 Communication Ethics (4 Credits)**

This class is not just about how to be ethical communicators but it is also about how to discover ethics—the good life and care for others, answerability and responsibility—deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

**COMN 3980 Internship (1-8 Credits)****COMN 3988 Study Abroad Resident Credit (0-18 Credits)****COMN 3990 Communication Capstone (4 Credits)**

This course allows students to synthesize knowledges across the communication studies major through original research presentation.

**COMN 3991 Independent Study (1-5 Credits)****COMN 3993 Communication Capstone Sequence 1 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the first half of the sequence.

**COMN 3994 Communication Capstone Sequence 2 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the second half of the sequence.

**COMN 3995 Independent Research (1-10 Credits)**

Topics and quarter hours vary. Prerequisite: instructor's permission.

## Community Engagement (CENG)

**CENG 1700 Topics in Community Engagement (1-4 Credits)****CENG 2510 Denver Urban Issues and Policy (1-2 Credits)**

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. As members of the Denver community, we have the responsibility and right to investigate important issues and co-create solutions that center equity and inclusion. There is a wide array of actions that can be taken to create social change, depending on what the issue demands and the strengths, skills, and talents of those working for change. The aim of this course is three-fold. First, you will learn how the history of Denver, including how legacies of violence, displacement, forced migration, and resettlement of Black, Indigenous, and People of Color communities, have shaped the issues we see today. Second, the course will introduce you to some of the most critical issues facing Denver and local efforts to address those issues. Lastly, the course will provide the space for you to explore the variety of social change actions that can be taken, weighing the pros and cons of each and considering how to assess fit for the issue(s) you care about and your own strengths.

**CENG 2520 Community Organizing (2 Credits)**

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. In this course, you will learn about the history of community organizing in the United States, the role of community organizing in contemporary social movements, and the components of the community organizing process. Students will first learn how to critically examine power, privilege, oppression, and white supremacy in the context of working for social change. Then, you will explore various community organizing practices including identifying self-interests; building relationships; defining issues using an anti-oppression analysis; understanding root causes; centering the experience of the communities most impacted by injustice and systemic oppression; and creating a vision, strategies, tactics to support campaigns for social justice.

**CENG 2590 From Public Good Theory to Action (2 Credits)**

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. Through this course, you will integrate your personal, professional, and academic goals with a focus on social change. In doing so, you will gain a clear sense of your identity as a public good scholar as well as a personal action plan that you can implement to address a social justice issue of your choosing. You will apply an anti-oppression analysis to your plan including how the I's of Oppression manifest in your selected topic, ways you center the knowledge/voices of the communities most impacted by the injustice/systemic oppression, and how white supremacy shows up in your issue and how to actively work to address racist and oppressive practices.

**CENG 2700 Topics in Community Engagement (1-4 Credits)**

## Computer Science (COMP)

**COMP 1101 Analytical Inquiry I (4 Credits)**

Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**COMP 1201 Introduction to Computer Science I (2 Credits)**

This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. Ideally taken concurrently with COMP 1351.

**COMP 1202 Introduction to Computer Science II (2 Credits)**

This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. Prerequisite: COMP 1201.

**COMP 1203 Introduction to Computer Science III (2 Credits)**

This course introduces testing and software development in computer science. Topics covered include using debuggers, version control systems, unit testing and general testing, Unified Modeling Language (UML), computing ethics, and software development in a team setting. Prerequisite: COMP 1202.

**COMP 1351 Introduction to Programming I (3 Credits)**

This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

**COMP 1352 Introduction to Programming II (3 Credits)**

This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. Prerequisite: COMP 1351.

**COMP 1353 Introduction to Data Structures & Algorithms I (3 Credits)**

This course introduces data structures used in computation, including their behavior, usage, implementation, and the analysis of their space usage. In addition, the algorithms used for access, manipulation, and updating the data structures is covered. Data structures and algorithms addressed include contiguous and linked lists, stacks, queues, hash tables, heaps, trees, self-balancing trees, graphs, and graph traversal. Introductory runtime analysis is used to prove time and space requirements for data structures and their performance while being used. Prerequisite: COMP 1352.

**COMP 1601 Computer Science Pathways (1 Credit)**

This course is designed to help first year computer science and game development students succeed in a very challenging major. Topics and activities may include academic success strategies; personal inventory exercises; interviewing computer science alumni; exploring ethical concerns within the profession; seminars by industry and academic experts; establishing the relationships between computing and other disciplines; critical and creative thinking activities; disseminating information on the dual degree programs, the honors program requirements, the honor code, and computer science department program structures; and readings from and discussions about computing related articles and publications.

**COMP 1671 Introduction to Computer Science I (4 Credits)**

Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

**COMP 1672 Introduction to Computer Science II (4 Credits)**

Advanced programming techniques; arrays, recursion, dynamic data structures, algorithm abstraction, object-oriented programming including inheritance and virtual functions. Prerequisite: COMP 1671.

**COMP 1991 Independent Study (1 Credit)****COMP 2300 Discrete Structures in Computer Science (4 Credits)**

Number systems and basic number theory, propositional and predicate logic, proof techniques, mathematical induction, sets, counting and discrete probability, case studies with applications from computer science, such as data representation, algorithm analysis and correctness, and system design. Prerequisites: COMP 1672 or COMP 1352.

**COMP 2355 Intro to Systems Programming (4 Credits)**

The prerequisites for this class are a good understanding of imperative and object-oriented programming in Java. The prerequisites for this class include a good understanding of basic programming constructs, such as branches (if, switch), loops (for, while, do), exceptions (throw, catch), functions, objects, classes, packages, primitive types (int, float, boolean), arrays, arithmetic expressions and boolean operations. Computer organization is a parallel prerequisite; if possible, students should register for both this course and COMP 2691. You must have a good understanding of basic data structures such as arrays, lists, sets, trees, graphs and hash-tables. This is a class on systems programming with focus on the C programming language and UNIX APIs. There will be programming assignments designed to make you use various Debian GNU/Linux system APIs. Programming assignments involve writing code in C or C++. Prerequisite: COMP 2673.

**COMP 2361 Systems I (4 Credits)**

This course introduces low-level computer systems and programming. Topics covered include Linux, the C programming language, pointers, dynamic memory management, number systems, instruction set architectures, debugging, and caching. Prerequisites: COMP 1353.

**COMP 2362 Systems II (4 Credits)**

This course introduces computer operating systems and parallel programming. Topics covered include processes, process forks, threads, race conditions, synchronization, scheduling, memory systems, resource sharing, and sockets. Prerequisite: COMP 2361.

**COMP 2370 Introduction to Data Structures & Algorithms II (4 Credits)**

This course introduces the performance analysis of algorithms, including proof techniques; data structures and their physical storage representation, including space and performance analysis; recursive techniques; stacks, queues, lists, trees, sets, graphs; sorting and searching algorithms. Prerequisites: MATH 2200 or COMP 2300; COMP 2673.

**COMP 2381 Object-Oriented Software Development (4 Credits)**

Some problems are most naturally modeled by a hierarchy of objects and the relationships between those objects. This course introduces object-oriented design and development as a problem solving technique. Topics covered include the Java programming language, including classes, methods, fields, inheritance, interfaces, polymorphism, generics, static typing, design patterns, and the Java Collections Framework. Prerequisite: COMP 1353.

**COMP 2673 Introduction to Computer Science III (4 Credits)**

An introduction to several advanced topics in computer science. Topics vary from year to year and may include any of the following: theory of computing, cryptography, databases, computer graphics, graph theory, game theory, fractals, mathematical programming, wavelets, file compression, computational biology, genetic algorithms, neural networks, simulation and queuing theory, randomized algorithms, parallel computing, complexity analysis, numerical methods. Prerequisite: COMP 1672 or COMP 1771.

**COMP 2691 Introduction to Computer Organization (4 Credits)**

This course covers basic topics in Computer Organization and is a required course in the BS in Computer Science, BS in Game Development, and BS in Computer Engineering degrees. Topics include: instruction set architectures, integer and floating point arithmetic, processors, memory systems, and topics in storage and Input/Output. Prerequisite: COMP 1672.

**COMP 2701 Topics in Computer Science (1-5 Credits)****COMP 2821 Introductory Game Design (4 Credits)**

Learn fundamental game design practices through the creation of paper and physical game prototypes using a play-centric design process. Topics include the formal elements, dramatic elements, and system dynamics of games, with an emphasis on playtesting, game analysis, and group game projects. Prerequisites: COMP 1352 or COMP 1672 or EDPX 2100.

**COMP 2901 Computing and Society (4 Credits)**

This course is designed to explore the social implications of computing practices, organization and experience. These topics and other issues are correlated with examples from the older and modern history of technology and science. Some formal experience with computing is assumed, but students who have a good familiarity with ordinary computing practice should be ready. Students are also expected to contribute their expertise in one or more of the areas of their special interest. Cross listed with DMST 3901.

**COMP 3000 Seminar: The Real World (1 Credit)**

Series of lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with MATH 3000.

**COMP 3100 Human-Computer Interaction (4 Credits)**

Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. No prerequisites are required to take the course and students from all disciplines are welcome. Cross listed with COMP 4100.

**COMP 3200 Discrete Structures (4 Credits)**

Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Cross-listed as MATH 3200. Prerequisites: (COMP 2300 or MATH 2200) and (COMP 2673 or COMP 1353).

**COMP 3351 Programming Languages (4 Credits)**

Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Prerequisites: COMP 2370 and ((COMP 2355, COMP 2691) or COMP 2362).

**COMP 3352 Elements of Compiler Design (4 Credits)**

Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

**COMP 3353 Compiler Construction (4 Credits)**

Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

**COMP 3361 Operating Systems I (4 Credits)**

Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: for undergraduates: (COMP 2355 and COMP 2691) or COMP 2361; COMP 2370; for graduate students: COMP 3003, 3004, and 3005.

**COMP 3371 Data Structures & Algorithms (4 Credits)**

Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms. Prerequisites: COMP 2370 or equivalent and COMP 3200.

**COMP 3372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks.

**COMP 3381 Software Engineering I (4 Credits)**

An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351; COMP 3361 or COMP 2362; or instructor permission.

**COMP 3382 Software Engineering II (4 Credits)**

Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture. Prerequisite: COMP 3381.

**COMP 3384 Secure Software Engineering (4 Credits)**

This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software. There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 2362 or COMP 3361.

**COMP 3400 Advanced Unix Tools (4 Credits)**

Design principles for tools used in a UNIX environment. Students gain experience building tools by studying the public domain versions of standard UNIX tools and tool-building facilities. Prerequisites: COMP 2400 and knowledge of C and csh (or another shell), and familiarity with UNIX.

**COMP 3410 World Wide Web Programming (4 Credits)**

The World Wide Web (WWW, or web for short) has revolutionized how people communicate with one another and is one of the major technological advances in making the Internet visible around the world. Most people think of the web when they think of the Internet, but in fact the web is a method of organizing and accessing information on top of the Internet. Conceptually the web has a simple design, but it relies heavily on the underlying technology of the Internet. Students will learn what the web is, how it was designed, how it currently works, and how to develop apps on top of it through HTML, CSS and Javascript. Prerequisite: COMP 2673 or COMP 1353.

**COMP 3411 Web Programming II (4 Credits)**

In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain webapplications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

**COMP 3412 Web Projects: Web Development III (4 Credits)**

In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

**COMP 3421 Database Organization & Management I (4 Credits)**

An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included. Graduate students will read one or two relevant technical papers and write a summary report. Prerequisites: for undergraduates: COMP 1353 or COMP 2673; for graduates: COMP 3005.

**COMP 3424 NoSQL Databases (4 Credits)**

In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: for undergraduates, COMP 2355 or COMP 2361; for graduates: COMP 3005.

**COMP 3431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

**COMP 3432 Machine Learning (4 Credits)**

This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 2370; COMP 2355 or COMP 2361.

**COMP 3433 Data Visualization (4 Credits)**

This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 1353 and Python Programming.

**COMP 3441 Introduction to Probability and Statistics for Data Science (4 Credits)**

The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R.

**COMP 3455 Shell Scripting and System Tools (4 Credits)**

This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Students should have experience with Python prior to taking this course.

**COMP 3501 Introduction to Artificial Intelligence (4 Credits)**

Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2673 or COMP 1353.

**COMP 3510 Software for AI Robotics (4 Credits)**

This course provides an introduction to the key artificial intelligence issues involved in the development of intelligent robotics. We will examine a variety of algorithms for autonomous mobile robot behavior, exploring issues that include software control architectures, localization, navigation, sensing, planning, and uncertainty. We also introduce the Robot Operating System (ROS) middleware, which is popular in academic, industry, and government research. This course does not assume any prior knowledge of artificial intelligence or robotics. The course will be project focused. In the project assignments you will learn ROS and learn to implement algorithms essential for conducting AI robotics research. Prerequisites: COMP 2300, COMP 2370 and COMP 2355 or COMP 2361 and proficiency in Python and Unix. Cross listed with COMP 4510.

**COMP 3591 Computational Geometry (4 Credits)**

This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 2300 and COMP 2370.

**COMP 3621 Computer Networking (4 Credits)**

An introduction to computer networks with an emphasis on Internet protocols. Topics include: internet design, application layer protocols such as SMTP and HTTP, session layer protocols including TCP and UDP, the internet protocol (IP), link layer technology such as Ethernet, and security issues related to networking. Programming experience of client/server architectures using sockets and TCP/UDP through projects is emphasized. Prerequisites: for undergraduates: (COMP 2355 or COMP 2361) and COMP 2370; for graduates COMP 3004 and COMP 3006. Cross listed with COMP 4621.

**COMP 3681 Networking for Games (4 Credits)**

Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

**COMP 3701 Topics in Computer Graphics (4 Credits)****COMP 3702 Topics in Database (4 Credits)****COMP 3703 Topics-Artificial Intelligence (4 Credits)****COMP 3704 Advanced Topics: Systems (4 Credits)****COMP 3705 Topics in Computer Science (1-4 Credits)****COMP 3721 Computer Security (4 Credits)**

This course gives students an overview of computer security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 2362 or COMP 3361. Cross listed with COMP 4721.

**COMP 3722 Network Security (4 Credits)**

Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. Prerequisites: COMP 3721, or permission of instructor.

**COMP 3723 Ethical Hacking (4 Credits)**

Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, foot printing targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP 1203 or COMP 2673 (CS Intro sequence).

**COMP 3731 Computer Forensics (4 Credits)**

Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 3361; COMP 2355 or 2361 for undergraduates; COMP 3006 for graduates.

**COMP 3732 Human-Centered Data Security and Privacy (4 Credits)**

With an increasing digital presence, it is critical to understand users' needs and requirements in using technological equipment to secure interactions and adhere to privacy perceptions. Thus, it is essential to analyze the cognitive, social, organizational, commercial, and cultural factors in mind. This course will provide a socio-technical approach for analyzing critical user interaction with devices encountered in everyday life, including web, mobiles, and wearables. This course will help students develop an understanding of technological interactions from the perspectives of multiple stakeholders such as users, developers, system administrators, and others and build tools to protect user data.

**COMP 3801 Introduction Computer Graphics (4 Credits)**

Fundamentals of 3D rendering including the mathematics behind coordinate systems, projections, clipping, hidden surface removal, shadows, lighting models, shading models, and mapping techniques. Significant use of 3D APIs through shader programming is covered along with the basics of 3D model representation and animations. Satisfies "Advanced Programming" requirements for graduate students. Prerequisites: COMP 2370, MATH 1952 or 1962.

**COMP 3821 Game Programming I (4 Credits)**

Introduces the fundamentals of digital game programming that are essential as future game programmers or game designers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites and animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 2821.

**COMP 3822 Game Programming II (4 Credits)**

In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3821. Suggested corequisite or prerequisite: COMP 3801.

**COMP 3831 Game Prototyping (4 Credits)**

Introduces game prototyping, where game concepts are created and developed into working prototypes using student-chosen game development tools. Engages in critical awareness of game creation practices through discussions, critiques, demos, and player testing. Students have the opportunity to explore their creativity, to expand their knowledge of game design, and to build a broad portfolio of ideas and working projects that demonstrate both their design and technical skillsets. Required for Game Development majors, though all majors are welcome. Prerequisites: COMP 2821.

**COMP 3832 Game Capstone I (4 Credits)**

Students design, build, critique, and playtest their game prototypes from Game Prototyping. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students alter their game design document to add new features, making corrections to prior design issues, and focus on making the game playable and "fun." Prerequisite: COMP 3821 and COMP 3831.

**COMP 3833 Game Capstone II (4 Credits)**

Students design, build, critique and playtest their working game from Game Capstone I. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students modify their design document and implement changes in their game, create new concept art for the features, build an introduction level into their game, test the game with "Play testers", and focus on creating a game that is "fun" to play. By the end of the quarter, their game is ready for distribution on an appropriate platform. Prerequisite: COMP 3832.

**COMP 3904 Internship/Co-Op in Computing (0-10 Credits)**

Practical experience in designing, writing and/or maintaining substantial computer programs under supervision of staff of University Computing and Information Resources Center. Prerequisites: COMP 2370 and approval of internship committee (see department office).

**COMP 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in the regular course schedule for that particular year.

**COMP 3995 Independent Research (1-10 Credits)**

## Construction Management (CMGT)

**CMGT 2170 Construction Building Systems (4 Credits)**

A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced. This class will also have an off campus , experiential learning lab associated with it.

**CMGT 2300 Introduction to Architecture and Design Management (4 Credits)**

This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students are introduced to principles, protocols and the planning process related to the design function and the link between the architect's vision and the finished physical structure. Students are introduced to design thinking theory and application. Students learn to read and interpret the various graphical and written construction documents, know how they are developed and what information they contain. Coverage of architectural, structural, mechanical, electrical, plumbing, and civil drawings and specifications. The business model for design services is explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction. Experiential learning lab is associated with this course.

**CMGT 3100 Construction Estimating (4 Credits)**

This course is designed to provide the student with the theory, principles and techniques of quantity analysis (take-off), labor determinations, overhead and profit analysis. It offers insight into the construction estimating process. The role of the estimator, types of estimating, CSI Divisions, bid/contract documents, change order pricing, design/build projects, and estimation compilation will be introduced. Discussions regarding the cost/benefit of sustainable materials and typical construction materials will enhance the requisite knowledge of construction estimating. Prerequisites: CMGT 2300 and CMGT 2170. This course also has a required lab. This course is a Co/Prerequisite for CMGT 3120.

**CMGT 3120 Construction Scheduling and Project Controls (4 Credits)**

Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Pre/Corequisites: CMGT 3100.

**CMGT 3155 Sustainable Development/LEED (4 Credits)**

The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis will be placed on how LEED project certification influences the overall construction project. Topics will include LEED certification techniques for sustainable sites, water efficiency, energy & atmosphere, materials & resources, indoor environmental quality, innovation and design. The following topics will be covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student will study and analyze how management and LEED techniques are applied to current construction projects. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3177 Environmental Systems and MEP Coordination (4 Credits)**

A study of electrical and mechanical systems (MEP) used in the construction of buildings. Course content includes system design, component selection and utilization for energy conservation, cost estimating of systems, coordination and management of installation. Specific systems included are electrical, air conditioning, heating, ventilation and plumbing, fire protection, life safety, communication, power systems and lighting. The course also considers coordination of MEP systems and explores emerging technology and environmental issues related to mechanical and electrical systems in buildings. Prerequisite: REAL 1700, CMGT 2170 and CMGT 2300.

**CMGT 3190 Residential Development (4 Credits)**

A course sequence designed to emphasize the practical application of the theories and concepts of residential development. The course provides a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property in a case format. Students will apply accounting, finance, marketing, real estate and construction management techniques in the planning for a residential development. The application of green building materials and methods is emphasized. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3480 Construction Project Management (4 Credits)**

This course offers a study of Construction Project Management including different scheduling techniques, use of estimation against scheduling, contracting, construction law, and software use for scheduling. Students obtain the needs for thought process of construction management including scheduling, bidding, proposals, communications, contracts, project planning and initialization, scheduling, estimating, resource planning, organizing, and project control. Use of software is critical and programs are chosen based on independent needs of students. Prerequisites: CMGT 2170 & CMGT 2300.

**CMGT 3700 Topics in Construction Mgmt (0-4 Credits)**

Exploration of various topics and issues related to construction management. Prerequisite: degree checkpoint 2.

**CMGT 3980 Construction Management Internship (1-10 Credits)**

Practical experience (field study); requires written report. Prerequisite: instructor's permission.

**CMGT 3991 Independent Study (1-10 Credits)**

Individual research/study; requires written report. Prerequisite: junior standing and instructor's permission.

## Counseling Psychology (CNP)

**CNP 1200 Career Decision Making (2 Credits)**

For undergraduates unsure of their academic and/or career direction. Helps students explore their interests, skills, values and the world of work; provides decision-making strategies to aid in future career and life decisions.

**CNP 1250 Peer Counseling (2 Credits)**

Are you interested in learning about how to help others? Interested in being a counselor? This course will provide an introduction to the profession of counseling. Learn more about the variety of roles and responsibilities of mental health professionals and how you can learn how to help others.

**CNP 1650 Unlearning to Learn: A Journey in Self Discovery (1-2 Credits)**

Introduction for students to gain self-awareness and broadening viewpoints to aid in their success as a new student at the University of Denver. This course will focus on interactive and experiential learning around topics such as personality, learning styles, emotional intelligence, strengths and virtues, and learning across difference. This interactive and experiential learning community will engage in critical thinking, challenging dialogues, and praxis (i.e. reflection and action) through a holistic approach of understanding personality, learning styles, emotional intelligence, strengths and virtues, and learning across difference. The aim of this course is to cultivate a sense of belonging through self-discovery. This course provides foundational skill-building to prepare students to actively engage in their learning experience at the University of Denver.

**CNP 1700 Introduction to 4D Peer Mentorship (1 Credit)**

This course will prepare students to serve as effective peer mentors through their role as 4D Peer Mentors. By introducing students to emotionally intelligent leadership, they will build their identity as a leader. This leadership identity will be supplemented by student development/transition theory as students' consider their own transition to college and how they can apply that to their role as a 4D] Peer Mentor. Embedded throughout the course, students will be introduced to the 4D Experience framework and grow in their understanding and application of the tenants of 4D to successfully complete the course.

**CNP 2550 Psychology of Men and Masculinities (4 Credits)**

This course is designed to focus on men, and how their lived experiences impact the daily lives and experiences of all gendered individuals in the U.S. This course focuses on the psychological process of men and masculinity.

**CNP 3249 Counseling Psychology: Health and Positive Psychology (4 Credits)**

This course will provide an overview of the topic of health psychology. Health psychology is the study of the bi-directional relationship between psychology and health. Topics in this course will include psychological factors that lead people to act in unhealthy ways, how people adjust and cope with pain and illness, the impact of stress and social support on health, and cultural considerations in health and well-being. Enforced Prerequisites: Psych 101.

**CNP 3262 Diversity of Counseling Psychology and Mental Health (4 Credits)**

This course will examine how people's sociocultural context influences their thoughts, feelings, and behaviors regarding health and healing. It will provide an introduction to general theories and methods related to culture and diversity (e.g. equity, power, privilege, identity theories, etc.). Focus will be given to the psychological and political underpinnings of culture and diversity and the connections between diversity and psychological processes related to health and healing. The course will introduce concepts related to health disparities and sociopolitical systems in which communities operate to achieve health and healing. Prerequisite: PSYC 1001.

**CNP 3263 Counseling Psychology: The Psychology of Sex and Intimate Relationships (4 Credits)**

This course will examine theoretical perspectives and current research in the study of sex and intimate relationships. Topics will include the development of sexual attraction, theories of intimate relationship development, communication, common problems in relationships (jealousy, infidelity, conflict, attachment, etc.), individual and gender differences in sexual behaviors and intimate relationships.

**CNP 3701 Topics in Counseling Psychology (4 Credits)**

Selected themes and topics from Counseling Psychology. Content changes and course may be repeated to a maximum of 12 credit.

**CNP 3991 Independent Study (1-10 Credits)**

## Economics (ECON)

**ECON 1020 Economics: A Critical Introduction (4 Credits)**

The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society; and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the "new economy"; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the "new economy", but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the "economic" one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1030 Introduction to Micro and Macroeconomics (4 Credits)**

The primary goal of this course is to introduce essential microeconomic and macroeconomic concepts to prepare economics majors and minors for their upper level economics courses. It achieves this goal (i) by separating and interrelating micro level (e.g., individual) and macro level (e.g., society) dynamics in the economy; (ii) by considering those dynamics within their historical context; and (iii) in the context to history of ideas in economics. The course also introduces analytical tools such as graphical and data analysis to demonstrate core ideas in micro and macroeconomic theories and policies. Prerequisite: ECON 1020.

**ECON 1988 Study Abroad Resident Credit (0-18 Credits)****ECON 2020 Intermediate Microeconomics (4 Credits)**

Microeconomic foundations to determine prices and production; consumer behavior, the behavior of firms in competitive and imperfectly competitive markets, and factor markets. Prerequisite: ECON 1030.

**ECON 2030 Intermediate Macroeconomics (4 Credits)**

Determinants of aggregate levels of production, employment and prices, focusing on the short-run dynamics of an economy consisting of a complex structure of interrelated markets; includes analysis of investment decisions, monetary structures and labor markets. Prerequisite: ECON 1030.

**ECON 2050 History of Economic Thought (4 Credits)**

Development of economic thought; leading writers and schools, their influence and theories. Prerequisite: ECON 1030.

**ECON 2250 Money & Banking (4 Credits)**

This course familiarizes you with the basic principles of money, banking, balance sheets, financial instruments, financial institutions, and monetary policy. We examine alternative perspectives on a variety of issues such as the nature and origins of money, how money enters the economy, the role of banks and nonbank financial institutions in the creation of money, the relationship between banks, nonbank financial firms and the central bank, and financial crises. Additionally, we study the relation between monetary and fiscal and financial stabilization policies, and whether they are complementary or contradict each other. How these policies affect private sector balance sheets will be another topic of our course. We also study the evolution of the financial system including financial practices, instruments, institutions and how they impact and are impacted by regulation. We then use the principles of money and banking we learn this quarter to understand the role of banks in the recent 2008 Global Financial Crisis, as well as its broader causes and potential cures. Prerequisite: ECON 1030.

**ECON 2280 Gender in the Economy (4 Credits)**

This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1020.

**ECON 2300 Comparative Economic Systems (4 Credits)**

The purpose of this course is to develop an understanding of the methods (both theoretical and empirical) used to compare economic systems around the world. As a learning objective, by the end of the course students should be able to explain the differences between economic, financial, and legal institutions, policies, and economic performance in alternative economic systems and to critically evaluate changes occurring in transition economies (particularly China, Russia, and Central and Eastern Europe) and their implications for economic growth. Prerequisite: ECON 1030.

**ECON 2330 China and the Global Economy (4 Credits)**

This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

**ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)**

This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

**ECON 2400 Public Finance (4 Credits)**

Public-sector economics, including public finance and expenditures; effects of different types of taxes and various government programs; government budgeting; cost benefit analysis. Prerequisite: ECON 1030.

**ECON 2410 Industrial Organization Economics (4 Credits)**

This course explores some applied topics in microeconomic theory such as innovation and technological change; cost of production and decision making by firms; market structures and competition; labor market; the changing role of the state; antitrust; regulation and deregulation; and international trade. Prerequisite: ECON 1030.

**ECON 2450 Race in the Economy (4 Credits)**

This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

**ECON 2500 Economic Development (4 Credits)**

This course introduces the student to several dimensions of, and forces pertaining to, development processes, including nature's inequalities, colonial legacies, the role and limitations of primary production, labor utilization, industrialization, trade, technology acquisition, foreign direct investment and other forms of capital flow, and the role of the state. If time permits, discussion include environmental concerns and cultural factors. Prerequisite: ECON 1030.

**ECON 2510 The Asian Economies (4 Credits)**

This course is based on a comparative approach, examining several Asian economies' colonial background, their primary producing sectors, the developmental state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

**ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

**ECON 2610 International Economics (4 Credits)**

The student learns about balance of payments, accounting, international monetary arrangements, international trade, and international investment. Certain policies that have a direct impact on a country's balance of payments, e.g. macroeconomic policies, exchange rate policy, and commercial policies, are examined. Some features of recent US trade policy stances is also be surveyed. Prerequisite: ECON 1030.

**ECON 2670 Quantitative Methods (4 Credits)**

This course offers an introduction to empirical work and statistics relevant to the study of economics. The course begins with a discussion of the use and creation of data, and various sources of data. It then presents the basic foundations of statistical methods for the description and analysis of data. Students learn how to calculate common descriptive statistics, test hypotheses related to the mean and differences between means, and how to perform and interpret bivariate linear regression analysis. In the process, students learn and use a popular software package commonly used for statistical analysis in economics. Prerequisite: ECON 1030.

**ECON 2701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 2710 Labor Economics (4 Credits)**

Labor theory and institutions; theory of labor demand and supply including market models, demographics and education; the labor movement and legislation, industrial conciliation methods, and modern industrial relations. Prerequisite: ECON 1030.

**ECON 2980 Internship (0 Credits)**

This online course integrates first-hand labor market experience and career readiness with economic knowledge and skill building. Students will actively build their professional networks, complete internship hours, engage in professional development, and critically reflect on their labor market experience. Students are responsible for applying to and securing their own internships prior to registering for the course with support from the internship coordinator. Prerequisites: ECON 2020 or ECON 2030.

**ECON 2988 Study Abroad Resident Credit (0-18 Credits)****ECON 3040 Marxian Political Economy (4 Credits)**

An exposition of Marx's theory of value through a detailed reading of Capital, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.

**ECON 3110 European Economic History (4 Credits)**

The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3460 Monetary Theory and Policy (4 Credits)**

Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3480 Money & Financial Markets (4 Credits)**

Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3500 Economic Development (4 Credits)**

Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3600 International Monetary Relations (4 Credits)**

Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3610 International Trade Theory & Policy (4 Credits)**

Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

**ECON 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**ECON 3670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)**

This course develops the foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Prerequisites: ECON 2670. Cross-listed with ECON 4670.

**ECON 3701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 3740 Health Economics (4 Credits)**

This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3830 Topics in Macroeconomics (4 Credits)**

Coverage varies but may include advanced topics in monetary theory, the study of business cycles, or the works of important monetary and macroeconomic theorists. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3850 Mathematics for Economists (4 Credits)**

The frontier of the research in modern mainstream economics relies on the modeling of economic phenomena, which requires increasingly sophisticated mathematical tools. The purpose of this course is to introduce these tools to early graduate students and advanced undergraduates, particularly those interested in pursuing graduate studies in economics. While this is primarily a math course that covers topics from linear algebra, multivariate calculus, and constrained optimization, economic applications will be used to provide intuition. This course provides a solid foundation in mathematical economics as well as a glimpse of the kind of work that is currently being done in the field. For graduate students, the course will provide the necessary mathematical background for ECON 4030 and Econ 4020. Prerequisite: ECON 2020 and 2670.

**ECON 3900 Growth, Technology and Economic Policy (4 Credits)**

This course will introduce students to the important issues related to technological change and how it relates to economic growth. The lectures seek to explain how technology and innovation determine growth and development with special emphasis on learning-by-doing, organizational capability, appropriation and spillover effects. The core topics that will be covered include: (1) origins of new technology and its market introduction, (2) the process of technological adoption and advancement, (3) the dissemination of technology and innovations within and cross firms, industries and countries, (4) the impacts of technological change, including benefits and costs, on individual and society at large and (5) policy implications to promote innovation and to reduce its negative effects. The rest of the course will focus on the relationship of technological change to human development, social welfare, as well as prior experiences of industrialized economies and emerging economies. Prerequisites: ECON 2020 and junior standing.

**ECON 3970 Environmental Economics (4 Credits)**

This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

**ECON 3988 Study Abroad Resident Credit (0-18 Credits)****ECON 3990 Capstone: Research, Evaluate, and Report on Living in CO (2 Credits)**

Gather and evaluate data to share the diverse economic experiences of all Coloradans. Collectively write and present an economic report. Engage with Colorado policymakers and policy advocates to explore how research informs policy and to enhance understanding of policymaking and outcomes throughout Colorado.

**ECON 3991 Independent Study (1-8 Credits)**

Prerequisites: ECON 1030.

**ECON 3995 Independent Research (1-4 Credits)**

This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

**ECON 3997 Economics Honors Thesis (4 Credits)**

Students pursuing Departmental Distinction will write an Economics Honors Thesis of between 30 and 50 pages during their senior year. The subject of the Thesis must concern some important topic in Economics, the precise nature of which will be determined by the student and an advisor chosen from among the Economics faculty. A student wanting to try for this Distinction must first meet with the Department Chair to discuss which Professor he or she will request to supervise his or her Thesis. The Professor who agrees to supervise an Honors Thesis is responsible for certifying that the work is of sufficient quality for Departmental Distinction in Economics.

## Emergent Digital Practices (EDPX)

**EDPX 2000 Imaging in Emergent Digital Practices (4 Credits)**

This course introduces digital imaging and digital illustration. Foundational technical methods and semiotics are introduced as ways to explore contemporary visual language. Students gain understanding in the digital creation and deciphering of images in 2D space. The essential language and concepts concerning representation and digital reproduction are developed through critical study and making. Lab fee. No prerequisites.

**EDPX 2100 Interactivity in Emergent Digital Practices (4 Credits)**

This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

**EDPX 2300 Systems in Emergent Digital Practices (4 Credits)**

This course studies the fundamental concepts of systems, both analog and digital, analyzing how structure and operation combine to produce complex results and effect change in the world. Students will learn how the components of digital systems from simple electronics to complex software and distributed networks function systematically to solve problems and share information. Through study of the development of the computer, the internet and digital interfaces students will gain a critical understanding of how these systems have been historically shaped. Reading, writing, and making will synthesize practice and critical ideas. No prerequisites. Lab fee.

**EDPX 2400 Time in Emergent Digital Practices (4 Credits)**

This course introduces the fundamental concepts of time-based media, with an emphasis on audio and video production. Basic recording, capturing, editing and manipulation of time are covered. Students gain understanding on how to utilize, analyze, and manipulate time in digital media. Students learn the basic language and critical analysis techniques needed to understand when and how to take advantage of each time-based media for their practice. Lab fee. No prerequisites.

**EDPX 2710 Critical Game Cultures (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practices of play. This course is taught with a teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We co-construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee.

**EDPX 2730 Understanding Digital Art (4 Credits)**

An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class.

**EDPX 2740 Animated Satire (4 Credits)**

This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy.

**EDPX 2770 Exploring Digital Cultures (4 Credits)**

This course introduces the fundamental concepts of speculation from a critical perspective and treats these as central to understanding contemporary digital culture. What will the future be and how can we imagine it to be a more advanced and better one? Students will explore the different cultural aspects of critical speculation through theory, literature, art, and making. Cyborgs, speculative/science fiction, and the posthuman will be used to discuss failure and iteration.

**EDPX 3100 Programming for Play (4 Credits)**

This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Specific topics will vary each time the course is taught, and the course is repeatable up to two times. Lab fee. Cross listed with EDPX 4100. Prerequisite: EDPX 2100 or permissions of the instructor.

**EDPX 3110 Rapid Game Design and Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3112 Rapid Physical Game Design & Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 2300. Lab fee.

**EDPX 3120 Making Critical Games (4 Credits)**

Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintain an essential ludic quality. Public good and civic engagement projects are welcomed. The course may be repeated with instructor permission when projects vary. Specific topics will vary each time the course is offered, and the course is repeatable up to 3 times. Lab fee. Prerequisites: EDPX 3100 or COMP 1671, and EDPX 3110, or permission of the instructor. Cross listed with EDPX 4120.

**EDPX 3200 Data Visualization (4 Credits)**

This course explores the creation of informational graphics for the visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations are also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 4200. Prerequisites: EDPX 2100, or permission of the instructor.

**EDPX 3210 Typographic Landscapes (4 Credits)**

This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3270 Making Networked Art (4 Credits)**

In this course networked art is understood in the broadest sense from art that natively exists on digital networks to art that critiques and engages with the concept of the network in contemporary society. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will engage with network architectures and platforms developing experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 2100. Lab fee. Crosslisted with EDPX 4270.

**EDPX 3310 Tangible Interactivity (4 Credits)**

Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3320 Interactive Art (4 Credits)**

This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta data/multimedia asset acquisition and authoring environments. While utilizing student skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 4320. Prerequisite: EDPX 3310 or EDPX 3450, or permissions of the instructor.

**EDPX 3330 Advanced Coding (4 Credits)**

This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 2100 or COMP 1671.

**EDPX 3340 Designing Social Good (4 Credits)**

This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and then to make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross-listed with EDPX 4340. Prerequisite: EDPX 2100 or permission of the instructor.

**EDPX 3350 Sustainable Design (4 Credits)**

This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

**EDPX 3370 Biomedica in Emergent Digital Practices (4 Credits)**

This EDP art-science course in Biomedica will survey and investigate the interplay between new media, biological systems/ technologies and bioethics as they relate to creative inquiry at the juncture of life sciences, digital media and contemporary technoculture. The course will build upon the basic paradigms and platforms of biosemiotics and biomimetics to expand into a coverage of our framing of corporeality, biological/environmental sensibilities and our perceptions and interconnections with biomaterials and lifeforms that we exist thru and within. Course topics will adapt to significant developments in biological sciences, emergent media and bioethics. The course can be repeated for credit with offering of new course topics. Cross Listed with EDPX 4370. Prerequisite: EDPX 2300. Course is open to Biology, Environmental Science majors and Sustainability minors with instructor approval.

**EDPX 3400 Video Art (4 Credits)**

This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4400.

**EDPX 3410 Advanced Video Art (4 Credits)**

This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on off-screen time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into space, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3440 Site-Specific Installation (4 Credits)**

This class produces projects investigating physical space, virtual space and site-specific public installation. Lab fee. Cross listed with EDPX 4440. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3450 Visual Programming (4 Credits)**

This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.

**EDPX 3460 Visual Programming II (4 Credits)**

This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 4460. Prerequisite: EDPX 3450 or permission of the instructor.

**EDPX 3490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3600 3D Modeling (4 Credits)**

This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of compositing in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 4600, MFJS 3600. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3610 3D Animation (4 Credits)**

This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 4610. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3620 3D Spaces (4 Credits)**

An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3700 Topics in Emergent Digital Culture (4 Credits)**

This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

**EDPX 3701 Topics in Emergent Digital Making (1-4 Credits)**

Topics in Emergent Digital Making.

**EDPX 3730 21st Century Digital Art (4 Credits)**

An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

**EDPX 3740 Performance Cultures (4 Credits)**

This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. For output, students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab fee. Prerequisites: EDPX 2200 and EDPX 2400, or permission of the instructor.

**EDPX 3750 Sound Cultures (4 Credits)**

This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 2400.

**EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. Cross listed with EDPX 4770.

**EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)**

This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists.

**EDPX 3780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students read, discuss, write, and otherwise respond to primary texts by the likes of William Gibson, Bruce Sterling, Cory Doctorow, Philip K. Dick, and Hiroshi Yamamoto. Science fiction studies may also include sub-genres (steampunk, hard science fiction, ecological) and regional categories (Japanese sci-fi), as well as consider science fiction in other media formats (sound recordings, film, games). For output, students produce written materials in a variety of formats, culminating in a formal essay or interactive publication. Cross listed with EDPX 4780.

**EDPX 3800 Topics in Digital Making (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. This course may be repeated. Lab fee. Prerequisite: varies with topic.

**EDPX 3960 BFA Capstone (4 Credits)**

This course is required for all BFA students prior to taking the undergraduate capstone course. Students work independently with a faculty member to research and develop their capstone project in detail addressing ideas, making, venues, distribution, and other aspects of professional practice. Lab fee. Senior standing required. Must be a BFA student.

**EDPX 3980 Internship (1-8 Credits)**

Instructor approval required.

**EDPX 3990 Capstone (4 Credits)**

This course provides time and guidance for individual students to develop complex works that are a culmination of their studies. All projects must synthesize the principles of experience, emergence, and engagement taught throughout the program. All projects require both writing and making, the balance of these two to be determined by the nature of the work. Lab fee. Senior standing required.

**EDPX 3991 Independent Study (1-8 Credits)**

Independent Study form required.

## Engineering (ENGR)

**ENGR 1010 Electronics for the Arts 1 - Analog (4 Credits)**

Introduction to analog electronics, culminating in construction of an analog sound synthesizer. Students are required to complete simple projects with circuits while learning the basics of analog synthesizers. Introduction to circuit simulation software (e.g. Falstad or Multisim), learn how to use oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

**ENGR 1011 Electronics for the Arts 2 - Digital (4 Credits)**

Introduction to digital electronics and coding for Arduino style microprocessors, culminating in design and construction of a hybrid analog/digital sound synthesizer or other device. Students are required to complete simple projects with Arduino while learning the basics of digital synthesizers. Introduction to programming, reinforce the use of oscilloscopes and multimeters, design and solder PCB boards are among other topics covered in this course.

**ENGR 1012 Electronics for the Arts 3 - Digital (4 Credits)**

Individual or team-based development of more complex devices or systems, potential for product development. Students are required to complete complex projects that involve combining analog and digital synthesizers with the external world (sensors and/or actuators). Introduction to python programming and incorporation of artificial intelligence (AI) into synthesizers are among other topics covered in this course.

**ENGR 1511 Engineering Connections (1 Credit)**

This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

**ENGR 1572 Applied MATLAB Programming (3 Credits)**

The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671 or COMP 1351, and MATH 1952.

**ENGR 1611 Introduction to Engineering Design (4 Credits)**

Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.

**ENGR 1622 Introduction to Mechatronic Systems I with MultiSim and MathCAD (4 Credits)**

Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multisim circuit analysis software and Mathcad are among other topics covered in this course.

**ENGR 1632 Introduction to Mechatronic Systems II (4 Credits)**

Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

**ENGR 1700 Machine Shop Practice (1 Credit)**

Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

**ENGR 1911 Introduction to CAD (2 Credits)**

This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

**ENGR 1921 Introduction in Engineering II (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

**ENGR 1931 Introduction to Engineering III (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

**ENGR 2610 Engineering Integration I (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: Junior standing in the appropriate engineering discipline and ENME 3511 for MME majors or ENCE 3210 and ENEE 2211 for ECE majors (the latter three can be taken concurrently).

**ENGR 2620 Engineering Integration II (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisite: ENGR 2610.

**ENGR 2905 Engineering Cooperative Education (0-12 Credits)**

For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

**ENGR 2910 Engineering Economics and Ethics (3 Credits)**

This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

**ENGR 2950 Engineering Assessment I (0 Credits)**

Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2012 AND ENGR 1572.

**ENGR 2951 Engineering Assessment II (0 Credits)**

Students perform a lifelong learning experience and assessment-related tasks, e.g. a survey and exit interview. The course also includes career and professional development, as well as information on the Fundamentals of Engineering (FE) exam. Engineering students are encouraged, but not required to complete the FE exam. This course should be taken in the last year of attendance. Prerequisites: ENGR 3323.

**ENGR 3100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.

**ENGR 3200 Introduction to Nanotechnology (4 Credits)**

In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2410.

**ENGR 3220 Introduction to Micro-Electro-Mechanical-Systems and Microsystems (4 Credits)**

This course introduces students to the multi-disciplinary field of Micro-Electro-Mechanical-Systems (MEMS) technology. MEMS and Microsystem technology is the integration of micro-scale electro-mechanical elements, sensors, actuators, and electronics on a common substrate or platform through semiconductor microfabrication technologies. The course gives a brief overview of the involved physical phenomena, electromechanical transduction mechanisms, design principles, as well as fabrication and manufacturing technologies. Cross listed with ENGR 4220.

**ENGR 3313 Engineering Design Project I (2 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENME 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

**ENGR 3323 Engineering Design Project II (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

**ENGR 3333 Engineering Design Project III (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include: 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3323.

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3525 Power Electronics and Renewable Energy Laboratory (1 Credit)**

In this course the fundamentals of switching converters and power electronics in a real laboratory set-up are covered. The course incorporates hardware design, analysis, and simulation of various switching converters as a power processing element for different energy sources. The energy sources are power utility, batteries, and solar panels. Prerequisite: ENGR 3520.

**ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

**ENGR 3535 Electric Power Engineering Laboratory (1 Credit)**

In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3545 Electric Power Economy (3 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

**ENGR 3590 Power System Protection (3 Credits)**

This course covers methods of calculation of fault currents under different types of faults; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENEE 2022, ENGR 3530 or equivalent. 3.0 hours. Cross listed with ENGR 4590.

**ENGR 3611 Engineering Mathematics (3 Credits)**

Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 4723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3611, ENGR 3721, and ENGR 3722, or permission of the instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 3991 Independent Study (1-5 Credits)**

Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENGR 3995 Independent Research (1-10 Credits)**

## Engineering, Bio (ENBI)

**ENBI 3500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 4500. Prerequisites: ENME 2661.

**ENBI 3510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include analysis of the human musculoskeletal system as sensors, levers, and actuators; joint articulations and their mechanical equivalents; kinematic and kinetic analysis of human motion; introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; mechanical properties of hard and soft tissues; mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; orthopedic implants. Cross listed with ENBI 4510. Prerequisites: ENME 2410, ENME 2520, and ENME 2541.

**ENBI 3800 Topics in Bioengineering (1-4 Credits)**

Special topics in bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

## Engineering, Computer (ENCE)

**ENCE 2101 Digital Design (3 Credits)**

Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM's, PLA's and PAL's; data selectors and multiplexors; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

**ENCE 3100 Advanced Digital System Design (4 Credits)**

Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

**ENCE 3210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

**ENCE 3231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

**ENCE 3241 Computer Organization and Architecture (3 Credits)**

Organization of digital computers; memory, register transfer and datapath; Arithmetic Logic Unit; computer architecture; control unit; I/O systems. Prerequisite: ENCE 2101.

**ENCE 3250 HDL Modeling & Synthesis (3 Credits)**

Introduction to Hardware Design Language (HDL). Language syntax and synthesis. Applications related to digital system implementation are developed. Project. Prerequisite: ENCE 2101 or instructor's permission.

**ENCE 3260 Python for Engineers (3 Credits)**

This course introduces python programming to students and gives them programming and mathematical tools that will be useful in different areas of engineering. The course is divided into 2 main parts. Part 1 (Introduction to Python Programming), covers the fundamental concepts of python programming, covering topics from variables and data structures, functions, algorithm complexity, representation of numbers and basics of parallel computing. Part 2 (Introduction to Numerical Methods), gives an overview of a variety of numerical methods that are useful for engineers. The course reviews the basics of linear algebra, discusses the importance of eigenvalues and eigenvectors, regressions and concepts of “discrete Fourier transform” and “fast Fourier transform”.

**ENCE 3321 Network Design (4 Credits)**

Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**

Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

**ENCE 3620 Computer Vision (4 Credits)**

This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisite: ENEE 3111.

**ENCE 3630 Pattern Recognition (4 Credits)**

This class provides an introduction to classical pattern recognition. Pattern recognition is the assignment of a physical object or event to one of several prescribed categories. Applications includes automated object recognition in image and videos, face identification, and optical character recognition. Major topics include Bayesian decision theory, Parametric estimation and supervised learning, Linear discriminant functions, Nonparametric methods, Feature extraction for representation and classification, Support Vector Machines. Cross listed with ENCE 4630.
